10. REPORTS, SUGGESTIONS, REQUESTS

11. ADJOURNMENT

M I N U T E S

Item #1 – Meeting Call to Order

Mayor Partington called the meeting to order at 7:00 p.m.

Item #2 – Invocation

Evangelist John Jeyaseelan, Bethel Ministries, provided the invocation.

Item #3 – Pledge of Allegiance

Mayor Partington led the Pledge of Allegiance.

Item #4 – Presentations and Proclamations

Item #4A – Graham Johnston

Mayor Partington proclaimed April 2, 2024 as a day to recognize and celebrate Graham Johnston for his contributions to the community.

Commissioner Persis expressed her support and presented Mr. Graham with a key to the city.

Item #5 – Audience Remarks

Mr. Alan Burton, 915 Ocean Shore Boulevard, requested the Commission consider integrating the ReGrow the Loop initiative with the city's five-year Capital Improvement Program (CIP). He reviewed a five-year plan comparing to the work completed at Vadner Park.

Item #6 – Approval of Minutes

Mayor Partington advised the minutes from the March 19, 2024, meeting had been sent to the Commission for review and posted on the city's website for public viewing. He asked for any corrections, additions, or omissions. He stated hearing no corrections, the minutes would stand approved as presented.

Commissioner Sargent moved, seconded by Commissioner Persis, for approval of the March 19, 2024, City Commission meeting minutes.

The motion passed by voice vote.

Item #7 – Consent Agenda

Mayor Partington advised the actions proposed for the items on the Consent Agenda were so stated on the agenda. He asked if any member of the Commission had questions or wished to discuss any items separately.

Commissioner Sargent requested Items 7D and 7E be pulled from the Consent Agenda

Commissioner Persis moved, seconded by Commissioner Tolland, for approval of the consent agenda, absent Items 7D and 7E.

Call Vote:	Commissioner Tolland	Yes
	Commissioner Sargent	Yes
	Commissioner Persis	Yes
	Commissioner Briley	Yes
Carried.	Mayor Partington	Yes

Item #7D – Electric Vehicle Charging Equipment Agreement With FPL

City Clerk Susan C. Dauderis read by title only:

RESOLUTION NO. 2024-53

A RESOLUTION AUTHORIZING THE EXECUTION OF AN ELECTRIC VEHICLE CHARGING EQUIPMENT AGREEMENT WITH FLORIDA POWER & LIGHT FOR THE INSTALLATION OF ELECTRIC VEHICLE CHARGING STATIONS IN CITY HALL PARKING LOT; AUTHORIZING THE EXECUTION OF AN EASEMENT IN FAVOR OF FLORIDA POWER & LIGHT; AUTHORIZING THE PURCHASE OF PROJECT SPECIFIC INSURANCE; AND SETTING FORTH AN EFFECTIVE DATE.

Commissioner Briley moved, seconded by Commissioner Sargent, for approval of Resolution No. 2024-53 as read by title only.

Commissioner Sargent inquired if after the ten-year period would the easement defer back to the city; whereby, Mr. Shawn Finley, Public Works Director, explained typically it

would not automatically defer back to the city but the easement could be written that way. Commissioner Sargent expressed concerns regarding usage due to the location of the stations; whereby, Mr. Finley stated Florida Power and Light (FPL) selected the location due to needs. Commissioner Sargent inquired if FPL would put a solar panel shade structure; whereby Mr. Peter Martinez, FPL, stated there was a separate program for solar power and noted FPL could work with staff to review separate options.

Commissioner Tolland and Commissioner Briley expressed support of the solar power noting concerns on location.

Call Vote:	Commissioner Sargent	Yes
	Commissioner Persis	Yes
	Commissioner Briley	Yes
	Commissioner Tolland	Yes
Carried.	Mayor Partington	Yes

Item #7E – Work Auth - Aeronautical Survey & Obstruction Analysis Services

City Clerk Susan C. Dauderis read by title only:

RESOLUTION NO. 2024-54

A RESOLUTION ACCEPTING A PROPOSAL FROM AVCON, INC., TO PERFORM AN AERONAUTICAL SURVEY AND PREPARE AN OBSTACLE ACTION PLAN FOR THE ORMOND BEACH MUNICIPAL AIRPORT; AUTHORIZING THE EXECUTION OF A WORK AUTHORIZATION AND PAYMENT THEREFORE; AND SETTING FORTH AN EFFECTIVE DATE.

Mr. Daryl Hickman, 323 River Vale Lane, reviewed his relation to the Ormond Beach Municipal Airport (airport) and expressed support of the survey.

Ms. Connie Colby, 108 Roble Lane, expressed concerns on the item and the airport. She inquired about the survey boundaries, fencing, special permit, and the Aviation Advisory Board meetings.

Ms. Sharon Trescott, 689 Pineland Trail, unincorporated Volusia County, asked questions regarding the survey, potential future studies, flooding, off airport obstructions, runway slopes and the city and Volusia County overlays on her property.

Mr. Michael Rogers, 667 Pineland Trail, unincorporated Volusia County, discussed the importance of the item and expressed concerns of the boundaries of the survey and Federal Aviation Administration (FAA) guidelines.

Mr. Arthur Armstrong, 77 Emerald Oaks Lane, shared concerns regarding the Florida Department of Transportation (FDOT) guidelines regarding the item, nearby neighborhoods, public involvement at the airport, and airport funds.

Commissioner Sargent read an email from Ms. Karin Augut expressing concerns on the item, runway approach obstructions, FAA grant requirements, and funding.

Mr. Jack Thompson, AVCON, Inc., addressed concerns regarding the boundaries of the survey, reviewed the maps and diagrams from the agenda packet and discussed the obstacle action plan that would be created.

Commissioner Tolland confirmed the study was compliant with FAA and FDOT; whereby, Mr. Thompson confirmed. She inquired if the surveys completed would be aerial and ground surveys; whereby, Mr. Thompson confirmed.

Commissioner Sargent inquired about the use of data from 2011; whereby, Mr. Steven Lichliter, Airport Manager, explained the data was submitted by FDOT, noting the airport updates the data submitted to FAA on an annual basis. Commissioner Sargent thanked the residents for their comments.

Commissioner Tolland inquired about the fencing and special permit; whereby, Mr. Lichliter explained FDOT conducted an annual airport licensing inspection noting, due to the obstructions, the airport was operating under a special permit. He stated in the city's CIP there was a three-year security upgrade project for the airport which included new fencing.

Commissioner Persis moved, seconded by Commissioner Sargent, for approval of Resolution No. 2024-54 as read by title only.

Call Vote:	Commissioner Persis	Yes
	Commissioner Briley	Yes
	Commissioner Tolland	Yes
	Commissioner Sargent	Yes
Carried.	Mayor Partington	Yes

Comments on the Consent Agenda

There were no further comments on the Consent Agenda.

Item #8 – Public Hearings

Item #8A – Fountain View, Phase 1C, Preliminary Plat

City Clerk Susan C. Dauderis read by title only:

RESOLUTION NO. 2024-55

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF ORMOND BEACH, FLORIDA APPROVING THE PRELIMINARY PLAT FOR "FOUNTAIN VIEW, PHASE 1C", SHOWN WITHIN PHASE 1 OF THE PLANTATION OAKS PLANNED RESIDENTIAL DEVELOPMENT; ESTABLISHING CONDITIONS AND EXPIRATION DATE OF APPROVAL; AND SETTING FORTH AN EFFECTIVE DATE.

Mr. Steven Spraker, Planning Director, explained the item was a preliminary plat for 140 lots on approximately 90 acres within the Plantation Oaks development, noting the streets were private and would connect with the existing Phase 1. He discussed the preservation areas and reviewed the overall development map. He stated the Planning Board recommended approval.

Commissioner Briley moved, seconded by Commissioner Sargent, for approval of Resolution No. 2024-55 as read by title only.

Commissioner Persis stated the item was consistent with the land use designation and the city's comprehensive plan, noting the project did not adversely impact environmentally sensitive areas.

Call Vote:	Commissioner Briley	Yes
	Commissioner Tolland	Yes
	Commissioner Sargent	Yes
	Commissioner Persis	Yes
Carried.	Mayor Partington	Yes

Item #9 – First Reading of Ordinances

Item #9A – Ordinance Calling 2024 Regular City Election

City Clerk Susan C. Dauderis read by title only:

ORDINANCE NO. 2024-01

AN ORDINANCE REGARDING THE OFFICE OF MAYOR AND CITY COMMISSIONERS FOR ZONES 1 THROUGH 4 BY PROVIDING FOR AND CALLING A PRIMARY MUNICIPAL ELECTION OF THE REGISTERED ELECTORS OF THE CITY OF ORMOND BEACH TO BE HELD ON AUGUST 20, 2024; PROVIDING FOR AND CALLING A REGULAR MUNICIPAL ELECTION OF THE REGISTERED ELECTORS RESIDING IN THE CITY OF ORMOND BEACH TO BE HELD ON NOVEMBER 5, 2024; PROVIDING FOR QUALIFYING AND ELECTION PROCEDURES; ESTABLISHING A DATE FOR TAKING OFFICE; AUTHORIZING THE EXECUTION OF A MEMORANDUM OF UNDERSTANDING FOR SERVICES AND MATERIALS WITH THE COUNTY OF VOLUSIA; PROVIDING FOR SEVERABILITY; AND SETTING FORTH AN EFFECTIVE DATE.

Commissioner Briley moved, seconded by Commissioner Sargent, for approval of Ordinance No. 2024-01, on first reading, as read by title only.

Call Vote:	Commissioner Tolland	Yes
	Commissioner Sargent	Yes
	Commissioner Persis	Yes
	Commissioner Briley	Yes
Carried.	Mayor Partington	Yes

Item #9 – Reports, Suggestions, Requests

Events, Updates and Requests
Ms. Joyce Shanahan, City Manager, reviewed upcoming meetings, workshops, and events. She provided updates on the Performing Arts Center and other city projects.

Ms. Claire Whitley, Assistant City Manager, reminded the Commission of an upcoming retirement and provided a status update regarding a worker compensation claim and pension ordinance change.

Commissioner Tolland discussed mental wellness, statistics regarding local drug overdoses, Native Plant Month and events she attended. She requested the Commission consider remarks made by Mr. Burton as she was very interested in including the initiative in the CIP; whereby, Ms. Shanahan noted it could be discussed at the upcoming CIP workshop for 2025. She emphasized the importance of finding the right person to hire after Performing Arts Center Supervisor Marc Schwartz retires.

Commissioner Sargent inquired if staff set a meeting with the Volusia County Schools Superintendent; whereby, Ms. Shanahan stated the Superintendent was out of town then VCS had spring break, noting she would be reaching out again to schedule a meeting soon. He explained concerned residents approached him regarding dogs on the beach and the rules not being enforced; whereby, Ms. Shanahan stated staff could reach out to Volusia County regarding enforcement. He expressed support of the city's first responders and thanked them for their hard work.

Commissioner Persis discussed events she attended and her support for ReGrow the Loop. She inquired if the Commission would be interested in adding utility line undergrounding in the 2025 CIP; whereby, the entire Commissioner agreed to discuss further with more information.

Commissioner Tolland and Mr. Finley noted it was a costly project.

Commissioner Briley expressed support of the underground utility lines and potentially adding the Interstate 95 and US Highway 1 area to a Community Redevelopment Agency (CRA) area. He discussed events he attended and other upcoming events.

Volusia County Council Member Troy Kent discussed ReGrow the Loop and dogs on the beach pilot programs. He informed the Commission two Volusia County ECHO grants were approved at the Volusia County Council meeting for the City of Ormond Beach and expressed his support of the city's commitment to the ECHO program.

Commissioner Briley clarified his comments from the earlier workshop, noting he was supportive of the overnight docking at Cassen Park and his concerns regarding security, safety, and timing of the trial phase.

Item #10 – Adjournment

The meeting was adjourned at 8:23 p.m.

City of Ormond Beach
AGENDA ITEM

April 16, 2024 - City Commission

Number: 7.A

Section:	CONSENT AGENDA		
Item Category:	Consent - Resolution	**Res./Ord. No:**	2024-56
Strategic Goal:	Water Quality & the Environment - Other		
Department:	Economic Development		
Subject:	Acceptance of FDEP Grant Agreement Fleming Avenue Storm-water Pump Station and Force-main		
Summary:	The Central Park area of the City is prone to stormwater flooding and has a history of stormwater flooding complaints from affected residents. Due to a significant flooding event in 2009, the City undertook a number of major capital improvement projects to reduce the incidence of flooding. These projects include the interconnection of the five Central Park Lakes, upgrades to the Bennet Lane Pump Station and enhanced automated controls for the pumping system. These improvements have made significant progress in reducing flood effects within the Central Park neighborhoods; careful management of the lake levels by City staff, in conjunction with these projects, has improved the situation for many residents. This project will complete the recommended improvements and allow for greater control of the lake levels during times of extreme weather events through the construction of a storm-water pump station and force-main along Fleming Avenue, as identified in the City's Stormwater Master Plan and Five-year Capital Improvement Plan. In 2023, the City Commission recognized this need and included a legislative priority and appropriations request from the State Legislature. The aim was to secure one-third of the funds necessary for construction, while the remaining funds would be made available through FEMA grant and City funds. For State Fiscal Year 2023-2024, the Florida Legislature appropriated $5,350,000 from the General Revenue Fund of the General Appropriation Act to the City of Ormond Beach to construct a 90 Cubic Feet per Second pump station, and associated electrical/generator, a 36-inch force-main, and outfall structure, and reclaimed augmentation		

	stations. The augmentation stations are to offset potential nutrient loading of the river in the event of a storm drawdown.
Financial Impact:	The total cost for this project is estimated at $16,000,000. The City has received a funding commitment for this project from the State Legislature in the form of a general appropriation in the amount of $5,350,000. Last fall, staff submitted a grant request and are awaiting funding for FEMA's Hazard Mitigation Grant Program (HMGP) for funding in the amount of $9,420,900 and are awaiting a decision. The city's share is estimated to be approximately $1,229,100 from Stormwater Fund 107.
Citizen Impact:	This project will positively impact the residents of Ormond Beach by further reducing the likelihood of flooding in the Central Park area of Ormond Beach.
Recommended Action (Staff, Advisory Board and/or Other):	Staff recommends retroactive approval of a State of Florida Department of Environmental Protection Grant Agreement for the Fleming Avenue Pump Station and Force Main.
Staff Contact:	Brian Rademacher, Economic Development Director, (386) 676-3266
Attachments:	1. 24-56 FDEP Grant- Fleming Ave (P24-0056G) 2. Ormond Beach Pump Station and Force Main FL DEP_LPA0599 - Agreement
Approval:	Kelly McGuire, Finance Director 4/8/2024 Claire Whitley, Assistant City Manager 4/9/2024 Joyce Shanahan, City Manager 4/11/2024

RESOLUTION NO. 2024-56

A RESOLUTION AUTHORIZING THE ACCEPTANCE OF A GRANT AWARD FROM THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION REGARDING FUNDING FOR THE CONSTRUCTION OF A STORMWATER PUMP STATION AND FORCE-MAIN ALONG FLEMING AVENUE; RATIFYING THE EXECUTION OF AN AGREEMENT; AUTHORIZING THE EXECUTION OF ALL DOCUMENTS NECESSARY AND INCIDENTAL THERETO; AND SETTING FORTH AN EFFECTIVE DATE.

WHEREAS, the City desires to construct a 90 Cubic Feet per Second (CFS) pump station, an associated electrical/generator, a 36-inch force-main, an outfall structure, and reclaimed augmentation stations along Fleming Avenue (the "Project"), and

WHEREAS, the total Project cost is estimated to be $16,000,000, and

WHEREAS, the City has received a grant award from the Florida Department of Environmental Protection ("FDEP") in the amount of $5,350,000, and

WHEREAS, City staff has submitted a grant application under the Federal Emergency Management Agency's (FEMA) Hazard Mitigation Grant Program for grant funding in the amount of $9,420,900 for the Project, and is awaiting notification of the grant award, and

WHEREAS, the City Manager has certified that funds in the estimated amount of $1,229,100, representing the remaining Project cost, have been appropriated to the credit of the Stormwater Fund and have not been appropriated for any other purpose, and

WHEREAS, the Mayor and City Manager executed the grant agreement ("Agreement") with the FDEP on December 5, 2023, now therefore,

BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:

SECTION ONE. The City Commission hereby ratifies the Mayor and City Manager's execution of the Agreement between the City and the Florida Department of Environmental Protection regarding funding of the Project. A copy of said Agreement is attached hereto and incorporated herein by reference.

SECTION TWO. The Mayor and City Manager are hereby authorized and directed to execute any and all documents that are necessary and incidental for the City to accept the grant award.

SECTION THREE. The City Manager hereby certifies that funding in the amount of $1,229,100, for the Project will be derived from the Stormwater Fund.

SECTION FOUR. This Resolution shall take effect immediately upon its adoption.

APPROVED AND AUTHENTICATED this 16th day of April, 2024.

Joyce A. Shanahan, City Manager

STATE OF FLORIDA
DEPARTMENT OF ENVIRONMENTAL PROTECTION
STANDARD TERMS AND CONDITIONS
APPLICABLE TO GRANT AGREEMENTS

ATTACHMENT 1

1. Entire Agreement.

This Grant Agreement, including any Attachments and Exhibits referred to herein and/or attached hereto (Agreement), constitutes the entire agreement between the parties with respect to the subject matter hereof and supersedes all prior agreements, whether written or oral, with respect to such subject matter. Any terms and conditions included on Grantee's forms or invoices shall be null and void.

2. Grant Administration.

a. Order of Precedence. If there are conflicting provisions among the documents that make up the Agreement, the order of precedence for interpretation of the Agreement is as follows:
   i. Standard Grant Agreement
   ii. Attachments other than Attachment 1, in numerical order as designated in the Standard Grant Agreement
   iii. Attachment 1, Standard Terms and Conditions
   iv. The Exhibits in the order designated in the Standard Grant Agreement

b. All approvals, written or verbal, and other written communication among the parties, including all notices, shall be obtained by or sent to the parties' Grant Managers. All written communication shall be by electronic mail, U.S. Mail, a courier delivery service, or delivered in person. Notices shall be considered delivered when reflected by an electronic mail read receipt, a courier service delivery receipt, other mail service delivery receipt, or when receipt is acknowledged by recipient. If the notice is delivered in multiple ways, the notice will be considered delivered at the earliest delivery time.

c. If a different Grant Manager is designated by either party after execution of this Agreement, notice of the name and contact information of the new Grant Manager will be submitted in writing to the other party and maintained in the respective parties' records. A change of Grant Manager does not require a formal amendment or change order to the Agreement.

d. This Agreement may be amended, through a formal amendment or a change order, only by a written agreement between both parties. A formal amendment to this Agreement is required for changes which cause any of the following:
   (1) an increase or decrease in the Agreement funding amount;
   (2) a change in Grantee's match requirements;
   (3) a change in the expiration date of the Agreement; and/or
   (4) changes to the cumulative amount of funding transfers between approved budget categories, as defined in Attachment 3, Grant Work Plan, that exceeds or is expected to exceed twenty percent (20%) of the total budget as last approved by Department.
   A change order to this Agreement may be used when:
   (1) task timelines within the current authorized Agreement period change;
   (2) the cumulative transfer of funds between approved budget categories, as defined in Attachment 3, Grant Work Plan, are less than twenty percent (20%) of the total budget as last approved by Department;
   (3) changing the current funding source as stated in the Standard Grant Agreement; and/or
   (4) fund transfers between budget categories for the purposes of meeting match requirements.
   This Agreement may be amended to provide for additional services if additional funding is made available by the Legislature.

e. All days in this Agreement are calendar days unless otherwise specified.

3. Agreement Duration.

The term of the Agreement shall begin and end on the dates indicated in the Standard Grant Agreement, unless extended or terminated earlier in accordance with the applicable terms and conditions. The Grantee shall be eligible for reimbursement for work performed on or after the date of execution through the expiration date of this Agreement, unless otherwise specified in Attachment 2, Special Terms and Conditions. However, work performed prior to the execution of this Agreement may be reimbursable or used for match purposes if permitted by the Special Terms and Conditions.

4. Deliverables.

The Grantee agrees to render the services or other units of deliverables as set forth in Attachment 3, Grant Work Plan. The services or other units of deliverables shall be delivered in accordance with the schedule and at the pricing outlined in the Grant Work Plan. Deliverables may be comprised of activities that must be completed prior to Department making payment on that deliverable. The Grantee agrees to perform in accordance with the terms and conditions set forth in this Agreement and all attachments and exhibits incorporated by the Standard Grant Agreement.

5. Performance Measures.

The Grantee warrants that: (1) the services will be performed by qualified personnel; (2) the services will be of the kind and quality described in the Grant Work Plan; (3) the services will be performed in a professional and workmanlike manner in accordance with industry standards and practices; (4) the services shall not and do not knowingly infringe upon the intellectual property rights, or any other proprietary rights, of any third party; and (5) its employees, subcontractors, and/or subgrantees shall comply with any security and safety requirements and processes, if provided by Department, for work done at the Project Location(s). The Department reserves the right to investigate or inspect at any time to determine whether the services or qualifications offered by Grantee meet the Agreement requirements. Notwithstanding any provisions herein to the contrary, written acceptance of a particular deliverable does not foreclose Department's remedies in the event deficiencies in the deliverable cannot be readily measured at the time of delivery.

6. Acceptance of Deliverables.

i. Acceptance Process. All deliverables must be received and accepted in writing by Department's Grant Manager before payment. The Grantee shall work diligently to correct all deficiencies in the deliverable that remain outstanding, within a reasonable time at Grantee's expense. If Department's Grant Manager does not accept the deliverables within 30 days of receipt, they will be deemed rejected.

ii. Rejection of Deliverables. The Department reserves the right to reject deliverables, as outlined in the Grant Work Plan, as incomplete, inadequate, or unacceptable due, in whole or in part, to Grantee's lack of satisfactory performance under the terms of this Agreement. The Grantee's efforts to correct the rejected deliverables will be at Grantee's sole expense. Failure to fulfill the applicable technical requirements or complete all tasks or activities in accordance with the Grant Work Plan will result in rejection of the deliverable and the associated invoice. Payment for the rejected deliverable will not be issued unless the rejected deliverable is made acceptable to Department in accordance with the Agreement requirements. The Department, at its option, may allow additional time within which Grantee may remedy the objections noted by Department. The Grantee's failure to make adequate or acceptable deliverables after a reasonable opportunity to do so shall constitute an event of default.

7. Financial Consequences for Nonperformance.

a. Withholding Payment. In addition to the specific consequences explained in the Grant Work Plan and/or Special Terms and Conditions, the State of Florida (State) reserves the right to withhold payment when the Grantee has failed to perform/comply with provisions of this Agreement. None of the financial consequences for nonperformance in this Agreement as more fully described in the Grant Work Plan shall be considered penalties.

b. Invoice reduction

If Grantee does not meet a deadline for any deliverable, the Department will reduce the invoice by 1% for each day the deadline is missed, unless an extension is approved in writing by the Department.

c. Corrective Action Plan. If Grantee fails to correct all the deficiencies in a rejected deliverable within the specified timeframe, Department may, in its sole discretion, request that a proposed Corrective Action Plan (CAP) be submitted by Grantee to Department. The Department requests that Grantee specify the outstanding deficiencies in the CAP. All CAPs must be able to be implemented and performed in no more than sixty (60) calendar days.

    i. The Grantee shall submit a CAP within ten (10) days of the date of the written request from Department. The CAP shall be sent to the Department's Grant Manager for review and approval. Within ten (10) days of receipt of a CAP, Department shall notify Grantee in writing whether the CAP proposed has been accepted. If the CAP is not accepted, Grantee shall have ten (10) days from receipt of Department letter rejecting the proposal to submit a revised proposed CAP. Failure to obtain Department approval of a CAP as specified above may result in Department's termination of this Agreement for cause as authorized in this Agreement.

    ii. Upon Department's notice of acceptance of a proposed CAP, Grantee shall have ten (10) days to commence implementation of the accepted plan. Acceptance of the proposed CAP by Department does not relieve Grantee of any of its obligations under the Agreement. In the event the CAP fails to correct or eliminate performance deficiencies by Grantee, Department shall retain the right to

require additional or further remedial steps, or to terminate this Agreement for failure to perform. No actions approved by Department or steps taken by Grantee shall preclude Department from subsequently asserting any deficiencies in performance. The Grantee shall continue to implement the CAP until all deficiencies are corrected. Reports on the progress of the CAP will be made to Department as requested by Department's Grant Manager.

iii. Failure to respond to a Department request for a CAP or failure to correct a deficiency in the performance of the Agreement as specified by Department may result in termination of the Agreement.

8. Payment.

a. Payment Process. Subject to the terms and conditions established by the Agreement, the pricing per deliverable established by the Grant Work Plan, and the billing procedures established by Department, Department agrees to pay Grantee for services rendered in accordance with section 215.422, Florida Statutes (F.S.).

b. Taxes. The Department is exempted from payment of State sales, use taxes and Federal excise taxes. The Grantee, however, shall not be exempted from paying any taxes that it is subject to, including State sales and use taxes, or for payment by Grantee to suppliers for taxes on materials used to fulfill its contractual obligations with Department. The Grantee shall not use Department's exemption number in securing such materials. The Grantee shall be responsible and liable for the payment of all its FICA/Social Security and other taxes resulting from this Agreement.

c. Maximum Amount of Agreement. The maximum amount of compensation under this Agreement, without an amendment, is described in the Standard Grant Agreement. Any additional funds necessary for the completion of this Project are the responsibility of Grantee.

d. Reimbursement for Costs. The Grantee shall be paid on a cost reimbursement basis for all eligible Project costs upon the completion, submittal, and approval of each deliverable identified in the Grant Work Plan. Reimbursement shall be requested on Exhibit C, Payment Request Summary Form. To be eligible for reimbursement, costs must be in compliance with laws, rules, and regulations applicable to expenditures of State funds, including, but not limited to, the Reference Guide for State Expenditures, which can be accessed at the following web address: https://www.myfloridacfo.com/docs-sf/accounting-and-auditing-libraries/state-agencies/reference-guide-for-state-expenditures.pdf.

e. Invoice Detail. All charges for services rendered or for reimbursement of expenses authorized by Department pursuant to the Grant Work Plan shall be submitted to Department in sufficient detail for a proper pre-audit and post-audit to be performed. The Grantee shall only invoice Department for deliverables that are completed in accordance with the Grant Work Plan.

f. State Funds Documentation. Pursuant to section 216.1366, F.S., if Contractor meets the definition of a non-profit organization under section 215.97(2)(m), F.S., Contractor must provide the Department with documentation that indicates the amount of state funds:

i. Allocated to be used during the full term of the contract or agreement for remuneration to any member of the board of directors or an officer of Contractor.

ii. Allocated under each payment by the public agency to be used for remuneration of any member of the board of directors or an officer of the Contractor.

The documentation must indicate the amounts and recipients of the remuneration. Such information must be posted on the State's the contract tracking system and maintained pursuant to section 215.985, F.S., and must be posted on the Contractor's website, if Contractor maintains a website.

g. Interim Payments. Interim payments may be made by Department, at its discretion, if the completion of deliverables to date have first been accepted in writing by Department's Grant Manager.

h. Final Payment Request. A final payment request should be submitted to Department no later than sixty (60) days following the expiration date of the Agreement to ensure the availability of funds for payment. However, all work performed pursuant to the Grant Work Plan must be performed on or before the expiration date of the Agreement.

i. Annual Appropriation Contingency. The State's performance and obligation to pay under this Agreement is contingent upon an annual appropriation by the Legislature. This Agreement is not a commitment of future appropriations. Authorization for continuation and completion of work and any associated payments may be rescinded, with proper notice, at the discretion of Department if the Legislature reduces or eliminates appropriations.

j. Interest Rates. All interest rates charged under the Agreement shall be calculated on the prevailing rate used by the State Board of Administration. To obtain the applicable interest rate, please refer to: www.myfloridacfo.com/Division/AA/Vendors/default.htm.

k. Refund of Payments to the Department. Any balance of unobligated funds that have been advanced or paid must be refunded to Department. Any funds paid in excess of the amount to which Grantee or subgrantee is entitled under the terms of the Agreement must be refunded to Department. If this Agreement is funded with federal funds and the Department is required to refund the federal government, the Grantee shall refund the Department its share of those funds.

9. Documentation Required for Cost Reimbursement Grant Agreements and Match.

If Cost Reimbursement or Match is authorized in Attachment 2, Special Terms and Conditions, the following conditions apply. Supporting documentation must be provided to substantiate cost reimbursement or match requirements for the following budget categories:

a. Salary/Wages. Grantee shall list personnel involved, position classification, direct salary rates, and hours spent on the Project in accordance with Attachment 3, Grant Work Plan in their documentation for reimbursement or match requirements.

b. Overhead/Indirect/General and Administrative Costs. If Grantee is being reimbursed for or claiming match for multipliers, all multipliers used (i.e., fringe benefits, overhead, indirect, and/or general and administrative rates) shall be supported by audit. If Department determines that multipliers charged by Grantee exceeded the rates supported by audit, Grantee shall be required to reimburse such funds to Department within thirty (30) days of written notification. Interest shall be charged on the excessive rate.

c. Contractual Costs (Subcontractors). Match or reimbursement requests for payments to subcontractors must be substantiated by copies of invoices with backup documentation identical to that required from Grantee. Subcontracts which involve payments for direct salaries shall clearly identify the personnel involved, salary rate per hour, and hours spent on the Project. All eligible multipliers used (i.e., fringe benefits, overhead, indirect, and/or general and administrative rates) shall be supported by audit. If Department determines that multipliers charged by any subcontractor exceeded the rates supported by audit, Grantee shall be required to reimburse such funds to Department within thirty (30) days of written notification. Interest shall be charged on the excessive rate. Nonconsumable and/or nonexpendable personal property or equipment costing $5,000 or more purchased for the Project under a subcontract is subject to the requirements set forth in chapters 273 and/or 274, F.S., and Chapter 69I-72, Florida Administrative Code (F.A.C.) and/or Chapter 69I-73, F.A.C., as applicable. The Grantee shall be responsible for maintaining appropriate property records for any subcontracts that include the purchase of equipment as part of the delivery of services. The Grantee shall comply with this requirement and ensure its subcontracts issued under this Agreement, if any, impose this requirement, in writing, on its subcontractors.

   i. For fixed-price (vendor) subcontracts, the following provisions shall apply: The Grantee may award, on a competitive basis, fixed-price subcontracts to consultants/contractors in performing the work described in Attachment 3, Grant Work Plan. Invoices submitted to Department for fixed-price subcontracted activities shall be supported with a copy of the subcontractor's invoice and a copy of the tabulation form for the competitive procurement process (e.g., Invitation to Bid, Request for Proposals, or other similar competitive procurement document) resulting in the fixed-price subcontract. The Grantee may request approval from Department to award a fixed-price subcontract resulting from procurement methods other than those identified above. In this instance, Grantee shall request the advance written approval from Department's Grant Manager of the fixed price negotiated by Grantee. The letter of request shall be supported by a detailed budget and Scope of Services to be performed by the subcontractor. Upon receipt of Department Grant Manager's approval of the fixed-price amount, Grantee may proceed in finalizing the fixed-price subcontract.

   ii. If the procurement is subject to the Consultant's Competitive Negotiation Act under section 287.055, F.S. or the Brooks Act, Grantee must provide documentation clearly evidencing it has complied with the statutory or federal requirements.

d. Travel. All requests for match or reimbursement of travel expenses shall be in accordance with section 112.061, F.S.

e. Direct Purchase Equipment. For the purposes of this Agreement, Equipment is defined as capital outlay costing $5,000 or more. Match or reimbursement for Grantee's direct purchase of equipment is subject to specific approval of Department, and does not include any equipment purchased under the delivery of services to be completed by a subcontractor. Include copies of invoices or receipts to document purchases, and a properly completed Exhibit B, Property Reporting Form.

f. Rental/Lease of Equipment. Match or reimbursement requests for rental/lease of equipment must include copies of invoices or receipts to document charges.

g. Miscellaneous/Other Expenses. If miscellaneous or other expenses, such as materials, supplies, non-excluded phone expenses, reproduction, or mailing, are reimbursable or available for match or reimbursement under the

terms of this Agreement, the documentation supporting these expenses must be itemized and include copies of receipts or invoices. Additionally, independent of Grantee's contract obligations to its subcontractor, Department shall not reimburse any of the following types of charges: cell phone usage; attorney's fees or court costs; civil or administrative penalties; or handling fees, such as set percent overages associated with purchasing supplies or equipment.

h. Land Acquisition. Reimbursement for the costs associated with acquiring interest and/or rights to real property (including access rights through ingress/egress easements, leases, license agreements, or other site access agreements; and/or obtaining record title ownership of real property through purchase) must be supported by the following, as applicable: Copies of Property Appraisals, Environmental Site Assessments, Surveys and Legal Descriptions, Boundary Maps, Acreage Certification, Title Search Reports, Title Insurance, Closing Statements/Documents, Deeds, Leases, Easements, License Agreements, or other legal instrument documenting acquired property interest and/or rights. If land acquisition costs are used to meet match requirements, Grantee agrees that those funds shall not be used as match for any other Agreement supported by State or Federal funds.

10. Status Reports.

The Grantee shall submit status reports quarterly, unless otherwise specified in the Attachments, on Exhibit A, Progress Report Form, to Department's Grant Manager describing the work performed during the reporting period, problems encountered, problem resolutions, scheduled updates, and proposed work for the next reporting period. Quarterly status reports are due no later than twenty (20) days following the completion of the quarterly reporting period. For the purposes of this reporting requirement, the quarterly reporting periods end on March 31, June 30, September 30 and December 31. The Department will review the required reports submitted by Grantee within thirty (30) days.

11. Retainage.

The following provisions apply if Department withholds retainage under this Agreement:

a. The Department reserves the right to establish the amount and application of retainage on the work performed under this Agreement up to the maximum percentage described in Attachment 2, Special Terms and Conditions. Retainage may be withheld from each payment to Grantee pending satisfactory completion of work and approval of all deliverables.

b. If Grantee fails to perform the requested work or fails to perform the work in a satisfactory manner, Grantee shall forfeit its right to payment of the retainage associated with the work. Failure to perform includes, but is not limited to, failure to submit the required deliverables or failure to provide adequate documentation that the work was actually performed. The Department shall provide written notification to Grantee of the failure to perform that shall result in retainage forfeiture. If the Grantee does not correct the failure to perform within the timeframe stated in Department's notice, the retainage will be forfeited to Department.

c. No retainage shall be released or paid for incomplete work while this Agreement is suspended.

d. Except as otherwise provided above, Grantee shall be paid the retainage associated with the work, provided Grantee has completed the work and submits an invoice for retainage held in accordance with the invoicing procedures under this Agreement.

12. Insurance.

a. Insurance Requirements for Sub-Grantees and/or Subcontractors. The Grantee shall require its sub-grantees and/or subcontractors, if any, to maintain insurance coverage of such types and with such terms and limits as described in this Agreement. The Grantee shall require all its sub-grantees and/or subcontractors, if any, to make compliance with the insurance requirements of this Agreement a condition of all contracts that are related to this Agreement. Sub-grantees and/or subcontractors must provide proof of insurance upon request.

b. Deductibles. The Department shall be exempt from, and in no way liable for, any sums of money representing a deductible in any insurance policy. The payment of such deductible shall be the sole responsibility of the Grantee providing such insurance.

c. Proof of Insurance. Upon execution of this Agreement, Grantee shall provide Department documentation demonstrating the existence and amount for each type of applicable insurance coverage ***prior to*** performance of any work under this Agreement. Upon receipt of written request from Department, Grantee shall furnish Department with proof of applicable insurance coverage by standard form certificates of insurance, a self-insured authorization, or other certification of self-insurance.

d. Duty to Maintain Coverage. In the event that any applicable coverage is cancelled by the insurer for any reason, or if Grantee cannot get adequate coverage, Grantee shall immediately notify Department of such cancellation and shall obtain adequate replacement coverage conforming to the requirements herein and provide proof of such replacement coverage within ten (10) days after the cancellation of coverage.

e. Insurance Trust. If the Grantee's insurance is provided through an insurance trust, the Grantee shall instead add the Department of Environmental Protection, its employees, and officers as an additional covered party everywhere the Agreement requires them to be added as an additional insured.

13. Termination.

i. Termination for Convenience. When it is in the State's best interest, Department may, at its sole discretion, terminate the Agreement in whole or in part by giving 30 days' written notice to Grantee. The Department shall notify Grantee of the termination for convenience with instructions as to the effective date of termination or the specific stage of work at which the Agreement is to be terminated. The Grantee must submit all invoices for work to be paid under this Agreement within thirty (30) days of the effective date of termination. The Department shall not pay any invoices received after thirty (30) days of the effective date of termination.

ii. Termination for Cause. The Department may terminate this Agreement if any of the events of default described in the Events of Default provisions below occur or in the event that Grantee fails to fulfill any of its other obligations under this Agreement. If, after termination, it is determined that Grantee was not in default, or that the default was excusable, the rights and obligations of the parties shall be the same as if the termination had been issued for the convenience of Department. The rights and remedies of Department in this clause are in addition to any other rights and remedies provided by law or under this Agreement.

iii. Grantee Obligations upon Notice of Termination. After receipt of a notice of termination or partial termination unless as otherwise directed by Department, Grantee shall not furnish any service or deliverable on the date, and to the extent specified, in the notice. However, Grantee shall continue work on any portion of the Agreement not terminated. If the Agreement is terminated before performance is completed, Grantee shall be paid only for that work satisfactorily performed for which costs can be substantiated. The Grantee shall not be entitled to recover any cancellation charges or lost profits.

iv. Continuation of Prepaid Services. If Department has paid for any services prior to the expiration, cancellation, or termination of the Agreement, Grantee shall continue to provide Department with those services for which it has already been paid or, at Department's discretion, Grantee shall provide a refund for services that have been paid for but not rendered.

v. Transition of Services Upon Termination, Expiration, or Cancellation of the Agreement. If services provided under the Agreement are being transitioned to another provider(s), Grantee shall assist in the smooth transition of Agreement services to the subsequent provider(s). This requirement is at a minimum an affirmative obligation to cooperate with the new provider(s), however additional requirements may be outlined in the Grant Work Plan. The Grantee shall not perform any services after Agreement expiration or termination, except as necessary to complete the transition or continued portion of the Agreement, if any.

14. Notice of Default.

If Grantee defaults in the performance of any covenant or obligation contained in the Agreement, including, any of the events of default, Department shall provide notice to Grantee and an opportunity to cure that is reasonable under the circumstances. This notice shall state the nature of the failure to perform and provide a time certain for correcting the failure. The notice will also provide that, should the Grantee fail to perform within the time provided, Grantee will be found in default, and Department may terminate the Agreement effective as of the date of receipt of the default notice.

15. Events of Default.

Provided such failure is not the fault of Department or outside the reasonable control of Grantee, the following non-exclusive list of events, acts, or omissions, shall constitute events of default:

a. The commitment of any material breach of this Agreement by Grantee, including failure to timely deliver a material deliverable, failure to perform the minimal level of services required for a deliverable, discontinuance of the performance of the work, failure to resume work that has been discontinued within a reasonable time after notice to do so, or abandonment of the Agreement;
b. The commitment of any material misrepresentation or omission in any materials, or discovery by the Department of such, made by the Grantee in this Agreement or in its application for funding;
c. Failure to submit any of the reports required by this Agreement or having submitted any report with incorrect, incomplete, or insufficient information;
d. Failure to honor any term of the Agreement;
e. Failure to abide by any statutory, regulatory, or licensing requirement, including an entry of an order revoking the certificate of authority granted to the Grantee by a state or other licensing authority;
f. Failure to pay any and all entities, individuals, and furnishing labor or materials, or failure to make payment to any other entities as required by this Agreement;

g. Employment of an unauthorized alien in the performance of the work, in violation of Section 274 (A) of the Immigration and Nationality Act;
h. Failure to maintain the insurance required by this Agreement;
i. One or more of the following circumstances, uncorrected for more than thirty (30) days unless, within the specified 30-day period, Grantee (including its receiver or trustee in bankruptcy) provides to Department adequate assurances, reasonably acceptable to Department, of its continuing ability and willingness to fulfill its obligations under the Agreement:
    i. Entry of an order for relief under Title 11 of the United States Code;
    ii. The making by Grantee of a general assignment for the benefit of creditors;
    iii. The appointment of a general receiver or trustee in bankruptcy of Grantee's business or property; and/or
    iv. An action by Grantee under any state insolvency or similar law for the purpose of its bankruptcy, reorganization, or liquidation.

16. Suspension of Work.

The Department may, in its sole discretion, suspend any or all activities under the Agreement, at any time, when it is in the best interest of the State to do so. The Department shall provide Grantee written notice outlining the particulars of suspension. Examples of reasons for suspension include, but are not limited to, budgetary constraints, declaration of emergency, or other such circumstances. After receiving a suspension notice, Grantee shall comply with the notice. Within 90 days, or any longer period agreed to by the parties, Department shall either: (1) issue a notice authorizing resumption of work, at which time activity shall resume; or (2) terminate the Agreement. If the Agreement is terminated after 30 days of suspension, the notice of suspension shall be deemed to satisfy the thirty (30) days' notice required for a notice of termination for convenience. Suspension of work shall not entitle Grantee to any additional compensation.

17. Force Majeure.

The Grantee shall not be responsible for delay resulting from its failure to perform if neither the fault nor the negligence of Grantee or its employees or agents contributed to the delay and the delay is due directly to acts of God, wars, acts of public enemies, strikes, fires, floods, or other similar cause wholly beyond Grantee's control, or for any of the foregoing that affect subcontractors or suppliers if no alternate source of supply is available to Grantee. In case of any delay Grantee believes is excusable, Grantee shall notify Department in writing of the delay or potential delay and describe the cause of the delay either (1) within ten days after the cause that creates or will create the delay first arose, if Grantee could reasonably foresee that a delay could occur as a result; or (2) if delay is not reasonably foreseeable, within five days after the date Grantee first had reason to believe that a delay could result. **THE FOREGOING SHALL CONSTITUTE THE GRANTEE'S SOLE REMEDY OR EXCUSE WITH RESPECT TO DELAY**. Providing notice in strict accordance with this paragraph is a condition precedent to such remedy. No claim for damages, other than for an extension of time, shall be asserted against Department. The Grantee shall not be entitled to an increase in the Agreement price or payment of any kind from Department for direct, indirect, consequential, impact or other costs, expenses or damages, including but not limited to costs of acceleration or inefficiency, arising because of delay, disruption, interference, or hindrance from any cause whatsoever. If performance is suspended or delayed, in whole or in part, due to any of the causes described in this paragraph, after the causes have ceased to exist Grantee shall perform at no increased cost, unless Department determines, in its sole discretion, that the delay will significantly impair the value of the Agreement to Department, in which case Department may: (1) accept allocated performance or deliveries from Grantee, provided that Grantee grants preferential treatment to Department with respect to products subjected to allocation; (2) contract with other sources (without recourse to and by Grantee for the related costs and expenses) to replace all or part of the products or services that are the subject of the delay, which purchases may be deducted from the Agreement quantity; or (3) terminate Agreement in whole or in part.

18. Indemnification.

a. The Grantee shall be fully liable for the actions of its agents, employees, partners, or subcontractors and shall fully indemnify, defend, and hold harmless Department and its officers, agents, and employees, from suits, actions, damages, and costs of every name and description arising from or relating to:
    i. personal injury and damage to real or personal tangible property alleged to be caused in whole or in part by Grantee, its agents, employees, partners, or subcontractors; provided, however, that Grantee shall not indemnify for that portion of any loss or damages proximately caused by the negligent act or omission of Department;
    ii. the Grantee's breach of this Agreement or the negligent acts or omissions of Grantee.

b. The Grantee's obligations under the preceding paragraph with respect to any legal action are contingent upon Department giving Grantee: (1) written notice of any action or threatened action; (2) the opportunity to take over and settle or defend any such action at Grantee's sole expense; and (3) assistance in defending the action at Grantee's sole expense. The Grantee shall not be liable for any cost, expense, or compromise incurred or made by Department in any legal action without Grantee's prior written consent, which shall not be unreasonably withheld.

c. Notwithstanding sections a. and b. above, the following is the sole indemnification provision that applies to Grantees that are governmental entities: Each party hereto agrees that it shall be solely responsible for the negligent or wrongful acts of its employees and agents. However, nothing contained herein shall constitute a waiver by either party of its sovereign immunity or the provisions of section 768.28, F.S. Further, nothing herein shall be construed as consent by a state agency or subdivision of the State to be sued by third parties in any matter arising out of any contract or this Agreement.

d. No provision in this Agreement shall require Department to hold harmless or indemnify Grantee, insure or assume liability for Grantee's negligence, waive Department's sovereign immunity under the laws of Florida, or otherwise impose liability on Department for which it would not otherwise be responsible. Any provision, implication or suggestion to the contrary is null and void.

19. Limitation of Liability.

The Department's liability for any claim arising from this Agreement is limited to compensatory damages in an amount no greater than the sum of the unpaid balance of compensation due for goods or services rendered pursuant to and in compliance with the terms of the Agreement. Such liability is further limited to a cap of $100,000.

20. Remedies.

Nothing in this Agreement shall be construed to make Grantee liable for force majeure events. Nothing in this Agreement, including financial consequences for nonperformance, shall limit Department's right to pursue its remedies for other types of damages under the Agreement, at law or in equity. The Department may, in addition to other remedies available to it, at law or in equity and upon notice to Grantee, retain such monies from amounts due Grantee as may be necessary to satisfy any claim for damages, penalties, costs and the like asserted by or against it.

21. Waiver.

The delay or failure by Department to exercise or enforce any of its rights under this Agreement shall not constitute or be deemed a waiver of Department's right thereafter to enforce those rights, nor shall any single or partial exercise of any such right preclude any other or further exercise thereof or the exercise of any other right.

22. Statutory Notices Relating to Unauthorized Employment and Subcontracts.

a. The Department shall consider the employment by any Grantee of unauthorized aliens a violation of Section 274A(e) of the Immigration and Nationality Act. If Grantee/subcontractor knowingly employs unauthorized aliens, such violation shall be cause for unilateral cancellation of this Agreement. The Grantee shall be responsible for including this provision in all subcontracts with private organizations issued as a result of this Agreement.

b. Pursuant to sections 287.133, 287.134, and 287.137 F.S., the following restrictions apply to persons placed on the convicted vendor list, discriminatory vendor list, or the antitrust violator vendor list:

   i. Public Entity Crime. A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a bid, proposal, or reply on a contract to provide any goods or services to a public entity; may not submit a bid, proposal, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, proposals, or replies on leases of real property to a public entity; may not be awarded or perform work as a Grantee, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity in excess of the threshold amount provided in section 287.017, F.S., for CATEGORY TWO for a period of 36 months following the date of being placed on the convicted vendor list.

   ii. Discriminatory Vendors. An entity or affiliate who has been placed on the discriminatory vendor list may not submit a bid, proposal, or reply on a contract to provide any goods or services to a public entity; may not submit a bid, proposal, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, proposals, or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity.

   iii. Antitrust Violator Vendors. A person or an affiliate who has been placed on the antitrust violator vendor list following a conviction or being held civilly liable for an antitrust violation may not submit a bid, proposal, or reply on any contract to provide any good or services to a public entity;

may not submit a bid, proposal, or reply on any contract with a public entity for the construction or repair of a public building or public work; may not submit a bid, proposal, or reply on leases of real property to a public entity; may not be awarded or perform work as a Grantee, supplier, subcontractor, or consultant under a contract with a public entity; and may not transact new business with a public entity.

iv. Notification. The Grantee shall notify Department if it or any of its suppliers, subcontractors, or consultants have been placed on the convicted vendor list, the discriminatory vendor list, or antitrust violator vendor list during the life of the Agreement. The Florida Department of Management Services is responsible for maintaining the discriminatory vendor list and the antitrust violator vendor list and posts the list on its website. Questions regarding the discriminatory vendor list or antitrust violator vendor list may be directed to the Florida Department of Management Services, Office of Supplier Diversity, at (850) 487-0915.

23. Compliance with Federal, State and Local Laws.

a. The Grantee and all its agents shall comply with all federal, state and local regulations, including, but not limited to, nondiscrimination, wages, social security, workers' compensation, licenses, and registration requirements. The Grantee shall include this provision in all subcontracts issued as a result of this Agreement.

b. No person, on the grounds of race, creed, color, religion, national origin, age, gender, or disability, shall be excluded from participation in; be denied the proceeds or benefits of; or be otherwise subjected to discrimination in performance of this Agreement.

c. This Agreement shall be governed by and construed in accordance with the laws of the State of Florida.

d. Any dispute concerning performance of the Agreement shall be processed as described herein. Jurisdiction for any damages arising under the terms of the Agreement will be in the courts of the State, and venue will be in the Second Judicial Circuit, in and for Leon County. Except as otherwise provided by law, the parties agree to be responsible for their own attorney fees incurred in connection with disputes arising under the terms of this Agreement.

24. Build America, Buy America Act (BABA) - Infrastructure Projects with Federal Funding.

This provision does not apply to Agreements that are wholly funded by Coronavirus State and Local Fiscal Recovery Funds under the American Rescue Plan Act. Also, this provision does not apply where there is a valid waiver in place. However, the provision may apply to funds expended before the waiver or after expiration of the waiver.

If applicable, Recipients or Subrecipients of an award of Federal financial assistance from a program for infrastructure are required to comply with the Build America, Buy America Act (BABA), including the following provisions:

a. All iron and steel used in the project are produced in the United States--this means all manufacturing processes, from the initial melting stage through the application of coatings, occurred in the United States;

b. All manufactured products used in the project are produced in the United States-this means the manufactured product was manufactured in the United States; and the cost of the components of the manufactured product that are mined, produced, or manufactured in the United States is greater than 55 percent of the total cost of all components of the manufactured product, unless another standard for determining the minimum amount of domestic content of the manufactured product has been established under applicable law or regulation; and

c. All construction materials are manufactured in the United States-this means that all manufacturing processes for the construction material occurred in the United States.

The Buy America preference only applies to articles, materials, and supplies that are consumed in, incorporated into, or affixed to an infrastructure project. As such, it does not apply to tools, equipment, and supplies, such as temporary scaffolding, brought to the construction site and removed at or before the completion of the infrastructure project. Nor does a Buy America preference apply to equipment and furnishings, such as movable chairs, desks, and portable computer equipment, that are used at or within the finished infrastructure project but are not an integral part of the structure or permanently affixed to the infrastructure project.

25. Investing in America

Grantees of an award for construction projects in whole or in part by the Bipartisan Infrastructure Law or the Inflation Reduction Act, including the following provision:

i. Signage Requirements

a. Investing in America Emblem: The recipient will ensure that a sign is placed at construction sites supported in whole or in part by this award displaying the official Investing in America emblem and must identify the project as a "project funded by President Biden's Bipartisan

Infrastructure Law" or "project funded by President Biden's Inflation Reduction Act" as applicable. The sign must be placed at construction sites in an easily visible location that can be directly linked to the work taking place and must be maintained in good condition throughout the construction period.

The recipient will ensure compliance with the guidelines and design specifications provided by EPA for using the official Investing in America emblem available at: https://www.epa.gov/invest/investing-america-signage.

b. Procuring Signs: Consistent with section 6002 of RCRA, 42 U.S.C. 6962, and 2 CFR 200.323, recipients are encouraged to use recycled or recovered materials when procuring signs. Signage costs are considered an allowable cost under this assistance agreement provided that the costs associated with signage are reasonable. Additionally, to increase public awareness of projects serving communities where English is not the predominant language, recipients are encouraged to translate the language on signs (excluding the official Investing in America emblem or EPA logo or seal) into the appropriate non-English language(s). The costs of such translation are allowable, provided the costs are reasonable.

26. Scrutinized Companies.

i. Grantee certifies that it is not on the Scrutinized Companies that Boycott Israel List or engaged in a boycott of Israel. Pursuant to section 287.135, F.S., the Department may immediately terminate this Agreement at its sole option if the Grantee is found to have submitted a false certification; or if the Grantee is placed on the Scrutinized Companies that Boycott Israel List or is engaged in the boycott of Israel during the term of the Agreement.

ii. If this Agreement is for more than one million dollars, the Grantee certifies that it is also not on the Scrutinized Companies with Activities in Sudan, Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or engaged with business operations in Cuba or Syria as identified in section 287.135, F.S. Pursuant to section 287.135, F.S., the Department may immediately terminate this Agreement at its sole option if the Grantee is found to have submitted a false certification; or if the Grantee is placed on the Scrutinized Companies with Activities in Sudan List, or Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or engaged with business operations in Cuba or Syria during the term of the Agreement.

iii. As provided in subsection 287.135(8), F.S., if federal law ceases to authorize these contracting prohibitions, then they shall become inoperative.

27. Lobbying and Integrity.

The Grantee agrees that no funds received by it under this Agreement will be expended for the purpose of lobbying the Legislature or a State agency pursuant to section 216.347, F.S., except that pursuant to the requirements of section 287.058(6), F.S., during the term of any executed agreement between Grantee and the State, Grantee may lobby the executive or legislative branch concerning the scope of services, performance, term, or compensation regarding that agreement. The Grantee shall comply with sections 11.062 and 216.347, F.S.

28. Record Keeping.

The Grantee shall maintain books, records and documents directly pertinent to performance under this Agreement in accordance with United States generally accepted accounting principles (US GAAP) consistently applied. The Department, the State, or their authorized representatives shall have access to such records for audit purposes during the term of this Agreement and for five (5) years following the completion date or termination of the Agreement. In the event that any work is subcontracted, Grantee shall similarly require each subcontractor to maintain and allow access to such records for audit purposes. Upon request of Department's Inspector General, or other authorized State official, Grantee shall provide any type of information the Inspector General deems relevant to Grantee's integrity or responsibility. Such information may include, but shall not be limited to, Grantee's business or financial records, documents, or files of any type or form that refer to or relate to Agreement. The Grantee shall retain such records for the longer of: (1) three years after the expiration of the Agreement; or (2) the period required by the General Records Schedules maintained by the Florida Department of State (available at: http://dos.myflorida.com/library-archives/records-management/general-records-schedules/).

29. Audits.

a. Inspector General. The Grantee understands its duty, pursuant to section 20.055(5), F.S., to cooperate with the inspector general in any investigation, audit, inspection, review, or hearing. The Grantee will comply with this duty and ensure that its sub-grantees and/or subcontractors issued under this Agreement, if any, impose this requirement, in writing, on its sub-grantees and/or subcontractors, respectively.

b. Physical Access and Inspection. Department personnel shall be given access to and may observe and inspect work being performed under this Agreement, with reasonable notice and during normal business hours, including by any of the following methods:
    i. Grantee shall provide access to any location or facility on which Grantee is performing work, or storing or staging equipment, materials or documents;
    ii. Grantee shall permit inspection of any facility, equipment, practices, or operations required in performance of any work pursuant to this Agreement; and,
    iii. Grantee shall allow and facilitate sampling and monitoring of any substances, soils, materials or parameters at any location reasonable or necessary to assure compliance with any work or legal requirements pursuant to this Agreement.

c. Special Audit Requirements. The Grantee shall comply with the applicable provisions contained in Attachment 5, Special Audit Requirements. Each amendment that authorizes a funding increase or decrease shall include an updated copy of Exhibit 1, to Attachment 5. If Department fails to provide an updated copy of Exhibit 1 to include in each amendment that authorizes a funding increase or decrease, Grantee shall request one from the Department's Grants Manager. The Grantee shall consider the type of financial assistance (federal and/or state) identified in Attachment 5, Exhibit 1 and determine whether the terms of Federal and/or Florida Single Audit Act Requirements may further apply to lower tier transactions that may be a result of this Agreement. For federal financial assistance, Grantee shall utilize the guidance provided under 2 CFR §200.331 for determining whether the relationship represents that of a subrecipient or vendor. For State financial assistance, Grantee shall utilize the form entitled "Checklist for Nonstate Organizations Recipient/Subrecipient vs Vendor Determination" (form number DFS-A2-NS) that can be found under the "Links/Forms" section appearing at the following website: https:\\apps.fldfs.com\fsaa.

d. Proof of Transactions. In addition to documentation provided to support cost reimbursement as described herein, Department may periodically request additional proof of a transaction to evaluate the appropriateness of costs to the Agreement pursuant to State guidelines (including cost allocation guidelines) and federal, if applicable. Allowable costs and uniform administrative requirements for federal programs can be found under 2 CFR 200. The Department may also request a cost allocation plan in support of its multipliers (overhead, indirect, general administrative costs, and fringe benefits). The Grantee must provide the additional proof within thirty (30) days of such request.

e. No Commingling of Funds. The accounting systems for all Grantees must ensure that these funds are not commingled with funds from other agencies. Funds from each agency must be accounted for separately. Grantees are prohibited from commingling funds on either a program-by-program or a project-by-project basis. Funds specifically budgeted and/or received for one project may not be used to support another project. Where a Grantee's, or subrecipient's, accounting system cannot comply with this requirement, Grantee, or subrecipient, shall establish a system to provide adequate fund accountability for each project it has been awarded.
    i. If Department finds that these funds have been commingled, Department shall have the right to demand a refund, either in whole or in part, of the funds provided to Grantee under this Agreement for non-compliance with the material terms of this Agreement. The Grantee, upon such written notification from Department shall refund, and shall forthwith pay to Department, the amount of money demanded by Department. Interest on any refund shall be calculated based on the prevailing rate used by the State Board of Administration. Interest shall be calculated from the date(s) the original payment(s) are received from Department by Grantee to the date repayment is made by Grantee to Department.
    ii. In the event that the Grantee recovers costs, incurred under this Agreement and reimbursed by Department, from another source(s), Grantee shall reimburse Department for all recovered funds originally provided under this Agreement and interest shall be charged for those recovered costs as calculated on from the date(s) the payment(s) are recovered by Grantee to the date repayment is made to Department.
    iii. Notwithstanding the requirements of this section, the above restrictions on commingling funds do not apply to agreements where payments are made purely on a cost reimbursement basis.

30. Conflict of Interest.

The Grantee covenants that it presently has no interest and shall not acquire any interest which would conflict in any manner or degree with the performance of services required.

31. Independent Contractor.

The Grantee is an independent contractor and is not an employee or agent of Department.

32. Subcontracting.

a. Unless otherwise specified in the Special Terms and Conditions, all services contracted for are to be performed solely by Grantee.
b. The Department may, for cause, require the replacement of any Grantee employee, subcontractor, or agent. For cause, includes, but is not limited to, technical or training qualifications, quality of work, change in security status, or non-compliance with an applicable Department policy or other requirement.
c. The Department may, for cause, deny access to Department's secure information or any facility by any Grantee employee, subcontractor, or agent.
d. The Department's actions under paragraphs b. or c. shall not relieve Grantee of its obligation to perform all work in compliance with the Agreement. The Grantee shall be responsible for the payment of all monies due under any subcontract. The Department shall not be liable to any subcontractor for any expenses or liabilities incurred under any subcontract and Grantee shall be solely liable to the subcontractor for all expenses and liabilities incurred under any subcontract.
e. The Department will not deny Grantee's employees, subcontractors, or agents access to meetings within the Department's facilities, unless the basis of Department's denial is safety or security considerations.
f. The Department supports diversity in its procurement program and requests that all subcontracting opportunities afforded by this Agreement embrace diversity enthusiastically. The award of subcontracts should reflect the full diversity of the citizens of the State. A list of minority-owned firms that could be offered subcontracting opportunities may be obtained by contacting the Office of Supplier Diversity at (850) 487-0915.
g. The Grantee shall not be liable for any excess costs for a failure to perform, if the failure to perform is caused by the default of a subcontractor at any tier, and if the cause of the default is completely beyond the control of both Grantee and the subcontractor(s), and without the fault or negligence of either, unless the subcontracted products or services were obtainable from other sources in sufficient time for Grantee to meet the required delivery schedule.

33. Guarantee of Parent Company.

If Grantee is a subsidiary of another corporation or other business entity, Grantee asserts that its parent company will guarantee all of the obligations of Grantee for purposes of fulfilling the obligations of Agreement. In the event Grantee is sold during the period the Agreement is in effect, Grantee agrees that it will be a requirement of sale that the new parent company guarantee all of the obligations of Grantee.

34. Survival.

The respective obligations of the parties, which by their nature would continue beyond the termination or expiration of this Agreement, including without limitation, the obligations regarding confidentiality, proprietary interests, and public records, shall survive termination, cancellation, or expiration of this Agreement.

35. Third Parties.

The Department shall not be deemed to assume any liability for the acts, failures to act or negligence of Grantee, its agents, servants, and employees, nor shall Grantee disclaim its own negligence to Department or any third party. This Agreement does not and is not intended to confer any rights or remedies upon any person other than the parties. If Department consents to a subcontract, Grantee will specifically disclose that this Agreement does not create any third-party rights. Further, no third parties shall rely upon any of the rights and obligations created under this Agreement.

36. Severability.

If a court of competent jurisdiction deems any term or condition herein void or unenforceable, the other provisions are severable to that void provision, and shall remain in full force and effect.

37. Grantee's Employees, Subcontractors and Agents.

All Grantee employees, subcontractors, or agents performing work under the Agreement shall be properly trained technicians who meet or exceed any specified training qualifications. Upon request, Grantee shall furnish a copy of technical certification or other proof of qualification. All employees, subcontractors, or agents performing work under Agreement must comply with all security and administrative requirements of Department and shall comply with all controlling laws and regulations relevant to the services they are providing under the Agreement.

38. Assignment.

The Grantee shall not sell, assign, or transfer any of its rights, duties, or obligations under the Agreement, or under any purchase order issued pursuant to the Agreement, without the prior written consent of Department. In the event of any assignment, Grantee remains secondarily liable for performance of the Agreement, unless Department expressly waives such secondary liability. The Department may assign the Agreement with prior written notice to Grantee of its intent to do so.

39. Compensation Report.

If this Agreement is a sole-source, public-private agreement or if the Grantee, through this agreement with the State, annually receive 50% or more of their budget from the State or from a combination of State and Federal funds, the

Grantee shall provide an annual report, including the most recent IRS Form 990, detailing the total compensation for the entities' executive leadership teams. Total compensation shall include salary, bonuses, cashed-in leave, cash equivalents, severance pay, retirement benefits, deferred compensation, real-property gifts, and any other payout. The Grantee must also inform the Department of any changes in total executive compensation between the annual reports. All compensation reports must indicate what percent of compensation comes directly from the State or Federal allocations to the Grantee.

40. Execution in Counterparts and Authority to Sign.

This Agreement, any amendments, and/or change orders related to the Agreement, may be executed in counterparts, each of which shall be an original and all of which shall constitute the same instrument. In accordance with the Electronic Signature Act of 1996, electronic signatures, including facsimile transmissions, may be used and shall have the same force and effect as a written signature. Each person signing this Agreement warrants that he or she is duly authorized to do so and to bind the respective party to the Agreement.

STATE OF FLORIDA
DEPARTMENT OF ENVIRONMENTAL PROTECTION
Special Terms and Conditions
AGREEMENT NO. LPA0599

ATTACHMENT 2

These Special Terms and Conditions shall be read together with general terms outlined in the Standard Terms and Conditions, Attachment 1. Where in conflict, these more specific terms shall apply.

1. Scope of Work.
The Project funded under this Agreement is Ormond Beach Pump Station & Force Main. The Project is defined in more detail in Attachment 3, Grant Work Plan.

2. Duration.
a. Reimbursement Period. The reimbursement period for this Agreement begins on July 1, 2023 and ends at the expiration of the Agreement.
b. Extensions. There are extensions available for this Project.
c. Service Periods. Additional service periods are not authorized under this Agreement.

3. Payment Provisions.
a. Compensation. This is a cost reimbursement Agreement. The Grantee shall be compensated under this Agreement as described in Attachment 3.
b. Invoicing. Invoicing will occur as indicated in Attachment 3.
c. Advance Pay. Advance Pay is not authorized under this Agreement.

4. Cost Eligible for Reimbursement or Matching Requirements.
Reimbursement for costs or availability for costs to meet matching requirements shall be limited to the following budget categories, as defined in the Reference Guide for State Expenditures, as indicated:

Reimbursement	Match	Category
☐	☐	Salaries/Wages
		Overhead/Indirect/General and Administrative Costs:
☐	☐	a. Fringe Benefits, N/A.
☐	☐	b. Indirect Costs, N/A.
☒	☐	Contractual (Subcontractors)
☐	☐	Travel, in accordance with Section 112, F.S.
☐	☐	Equipment
☐	☐	Rental/Lease of Equipment
☐	☐	Miscellaneous/Other Expenses
☐	☐	Land Acquisition

5. Equipment Purchase.
No Equipment purchases shall be funded under this Agreement.

6. Land Acquisition.
There will be no Land Acquisitions funded under this Agreement.

7. Match Requirements
There is no match required on the part of the Grantee under this Agreement.

8. Insurance Requirements

Required Coverage. At all times during the Agreement the Grantee, at its sole expense, shall maintain insurance coverage of such types and with such terms and limits described below. The limits of coverage under each policy maintained by the Grantee shall not be interpreted as limiting the Grantee's liability and obligations under the Agreement. All insurance policies shall be through insurers licensed and authorized to issue policies in Florida, or alternatively, Grantee may provide coverage through a self-insurance program established and operating under the laws of Florida. Additional insurance requirements for this Agreement may be required elsewhere in this Agreement, however the minimum insurance requirements applicable to this Agreement are:

a. Commercial General Liability Insurance.
The Grantee shall provide adequate commercial general liability insurance coverage and hold such liability insurance at all times during the Agreement. The Department, its employees, and officers shall be named as an additional insured on any general liability policies. The minimum limits shall be $250,000 for each occurrence and $500,000 policy aggregate.

b. Commercial Automobile Insurance.
If the Grantee's duties include the use of a commercial vehicle, the Grantee shall maintain automobile liability, bodily injury, and property damage coverage. Insuring clauses for both bodily injury and property damage shall provide coverage on an occurrence basis. The Department, its employees, and officers shall be named as an additional insured on any automobile insurance policy. The minimum limits shall be as follows:

$200,000/300,000	Automobile Liability for Company-Owned Vehicles, if applicable
$200,000/300,000	Hired and Non-owned Automobile Liability Coverage

c. Workers' Compensation and Employer's Liability Coverage.
The Grantee shall provide workers' compensation, in accordance with Chapter 440, F.S. and employer liability coverage with minimum limits of $100,000 per accident, $100,000 per person, and $500,000 policy aggregate. Such policies shall cover all employees engaged in any work under the Grant.

d. Other Insurance. None.

9. Quality Assurance Requirements.

There are no special Quality Assurance requirements under this Agreement.

10. Retainage.

No retainage is required under this Agreement.

11. Subcontracting.

The Grantee may subcontract work under this Agreement without the prior written consent of the Department's Grant Manager except for certain fixed-price subcontracts pursuant to this Agreement, which require prior approval. The Grantee shall submit a copy of the executed subcontract to the Department prior to submitting any invoices for subcontracted work. Regardless of any subcontract, the Grantee is ultimately responsible for all work to be performed under this Agreement.

12. State-owned Land.

The work will not be performed on State-owned land.

13. Office of Policy and Budget Reporting.

The Grantee will identify the expected return on investment for this project and provide this information to the Governor's Office of Policy and Budget (OPB) within three months of execution of this Agreement. For each full calendar quarter thereafter, the Grantee will provide quarterly update reports directly to OPB, no later than 20 days after the end of each quarter, documenting the positive return on investment to the state that results from the Grantee's project and its use of funds provided under this Agreement. Quarterly reports will continue until the Grantee is instructed by OPB that no further reports are needed, or until the end of this Agreement, whichever occurs first. All reports shall be submitted electronically to OPB at env.roi@laspbs.state.fl.us, and a copy shall also be submitted to the Department at legislativeaffairs@floridaDEP.gov.

14. Common Carrier.

a. Applicable to contracts with a common carrier – firm/person/corporation that as a regular business transports people or commodities from place to place. If applicable, Contractor must also fill out and

return PUR 1808 before contract execution] If Contractor is a common carrier pursuant to section 908.111(1)(a), Florida Statutes, the Department will terminate this contract immediately if Contractor is found to be in violation of the law or the attestation in PUR 1808.

b. Applicable to solicitations for a common carrier – Before contract execution, the winning Contractor(s) must fill out and return PUR 1808, and attest that it is not willfully providing any service in furtherance of transporting a person into this state knowing that the person unlawfully present in the United States according to the terms of the federal Immigration and Nationality Act, 8 U.S.C. ss. 1101 et seq. The Department will terminate a contract immediately if Contractor is found to be in violation of the law or the attestation in PUR 1808.

15. Additional Terms.
None.

Any terms added here must be approved by the Office of General Counsel.

ATTACHMENT 3
GRANT WORK PLAN

PROJECT TITLE: Ormond Beach Pump Station & Force Main

PROJECT LOCATION: The Project will be located in the City of Ormond Beach within Volusia County; Lat/Long (29.2648,-81.0641).

PROJECT BACKGROUND: The Central Park area of Ormond Beach (Grantee) has experienced chronic stormwater flooding and has a history of stormwater flooding complaints. The area contains several lakes which were interconnected after a significant flooding event in May 2009, however the lakes continue to experience water levels reaching over the banks. This project will provide regional flood control with the installation of a pump station to draw down the Central Park lake system prior to large storm events, and to provide additional storm attenuation volume. The pump station will discharge to the Halifax River via stormwater piping along the Fleming Avenue corridor.

PROJECT DESCRIPTION: The Grantee will construct a 90 Cubic Feet per Second (CFS) pump station, and associated electrical/generator, a 36-inch force main, an outfall structure, and reclaimed augmentation stations. The augmentation stations are to offset potential nutrient loading of the river in the event of a storm drawdown.

TASKS: All documentation should be submitted electronically unless otherwise indicated.

Task 1: Construction

Deliverables: The Grantee will construct a 90 CFS pump station, and associated electrical/generator, a 36-inch force main, an outfall structure, and reclaimed augmentation stationsin accordance with the construction contract documents.

Documentation: The Grantee will submit: 1) a copy of the final design; 2) a signed acceptance of the completed work to date, as provided in the Grantee's Certification of Payment Request; and 3) a signed Engineer's Certification of Payment Request.

Performance Standard: The Department's Grant Manager will review the documentation to verify that the deliverables have been completed as described above. Upon review and written acceptance by the Department's Grant Manager, the Grantee may proceed with payment request submittal.

Payment Request Schedule: The Grantee may submit a payment request for cost reimbursement no more frequently than monthly.

PROJECT TIMELINE & BUDGET DETAIL: The tasks must be completed by, and all documentation received by, the corresponding task end date. Cost reimbursable grant funding must not exceed the budget amounts as indicated below.

Task No.	Task Title	Budget Category	Grant Amount	Task Start Date	Task End Date
1	Construction	Contractual Services	$5,350,000	10/01/2024	04/30/2026
		Total:	$5,350,000		

STATE OF FLORIDA
DEPARTMENT OF ENVIRONMENTAL PROTECTION
Public Records Requirements

Attachment 4

1. **Public Records.**

a. If the Agreement exceeds $35,000.00, and if Grantee is acting on behalf of Department in its performance of services under the Agreement, Grantee must allow public access to all documents, papers, letters, or other material, regardless of the physical form, characteristics, or means of transmission, made or received by Grantee in conjunction with the Agreement (Public Records), unless the Public Records are exempt from section 24(a) of Article I of the Florida Constitution or section 119.07(1), F.S.

b. The Department may unilaterally terminate the Agreement if Grantee refuses to allow public access to Public Records as required by law.

2. **Additional Public Records Duties of Section 119.0701, F.S., If Applicable.**
For the purposes of this paragraph, the term "contract" means the "Agreement." If Grantee is a "contractor" as defined in section 119.0701(1)(a), F.S., the following provisions apply and the contractor shall:

a. Keep and maintain Public Records required by Department to perform the service.

b. Upon request, provide Department with a copy of requested Public Records or allow the Public Records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in Chapter 119, F.S., or as otherwise provided by law.

c. A contractor who fails to provide the Public Records to Department within a reasonable time may be subject to penalties under section 119.10, F.S.

d. Ensure that Public Records that are exempt or confidential and exempt from Public Records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the contractor does not transfer the Public Records to Department.

e. Upon completion of the contract, transfer, at no cost, to Department all Public Records in possession of the contractor or keep and maintain Public Records required by Department to perform the service. If the contractor transfers all Public Records to Department upon completion of the contract, the contractor shall destroy any duplicate Public Records that are exempt or confidential and exempt from Public Records disclosure requirements. If the contractor keeps and maintains Public Records upon completion of the contract, the contractor shall meet all applicable requirements for retaining Public Records. All Public Records stored electronically must be provided to Department, upon request from Department's custodian of Public Records, in a format specified by Department as compatible with the information technology systems of Department. These formatting requirements are satisfied by using the data formats as authorized in the contract or Microsoft Word, Outlook, Adobe, or Excel, and any software formats the contractor is authorized to access.

f. **IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, F.S., TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THE CONTRACT, CONTACT THE DEPARTMENT'S CUSTODIAN OF PUBLIC RECORDS AT:**

Telephone: **(850) 245-2118**

STATE OF FLORIDA
DEPARTMENT OF ENVIRONMENTAL PROTECTION
Special Audit Requirements
(State and Federal Financial Assistance)

Attachment 5

The administration of resources awarded by the Department of Environmental Protection *(which may be referred to as the "Department", "DEP", "FDEP" or "Grantor", or other name in the agreement)* to the recipient *(which may be referred to as the "Recipient", "Grantee" or other name in the agreement)* may be subject to audits and/or monitoring by the Department of Environmental Protection, as described in this attachment.

MONITORING

In addition to reviews of audits conducted in accordance with 2 CFR Part 200, Subpart F-Audit Requirements, and Section 215.97, F.S., as revised (see "AUDITS" below), monitoring procedures may include, but not be limited to, on-site visits by DEP Department staff, limited scope audits as defined by 2 CFR 200.425, or other procedures. By entering into this Agreement, the recipient agrees to comply and cooperate with any monitoring procedures/processes deemed appropriate by the Department of Environmental Protection. In the event the Department of Environmental Protection determines that a limited scope audit of the recipient is appropriate, the recipient agrees to comply with any additional instructions provided by the Department to the recipient regarding such audit. The recipient further agrees to comply and cooperate with any inspections, reviews, investigations, or audits deemed necessary by the Chief Financial Officer (CFO) or Auditor General.

AUDITS

PART I: FEDERALLY FUNDED

This part is applicable if the recipient is a State or local government or a non-profit organization as defined in 2 CFR §200.330

1. A recipient that expends $750,000 or more in Federal awards in its fiscal year, must have a single or program-specific audit conducted in accordance with the provisions of 2 CFR Part 200, Subpart F. EXHIBIT 1 to this Attachment indicates Federal funds awarded through the Department of Environmental Protection by this Agreement. In determining the federal awards expended in its fiscal year, the recipient shall consider all sources of federal awards, including federal resources received from the Department of Environmental Protection. The determination of amounts of federal awards expended should be in accordance with the guidelines established in 2 CFR 200.502-503. An audit of the recipient conducted by the Auditor General in accordance with the provisions of 2 CFR Part 200.514 will meet the requirements of this part.

2. For the audit requirements addressed in Part I, paragraph 1, the recipient shall fulfill the requirements relative to auditee responsibilities as provided in 2 CFR 200.508-512.

3. A recipient that expends less than $750,000 in federal awards in its fiscal year is not required to have an audit conducted in accordance with the provisions of 2 CFR Part 200, Subpart F-Audit Requirements. If the recipient expends less than $750,000 in federal awards in its fiscal year and elects to have an audit conducted in accordance with the provisions of 2 CFR 200, Subpart F-Audit Requirements, the cost of the audit must be paid from non-federal resources (i.e., the cost of such an audit must be paid from recipient resources obtained from other federal entities.

4. The recipient may access information regarding the Catalog of Federal Domestic Assistance (CFDA) via the internet at https://sam.gov/content/assistance-listings.

PART II: STATE FUNDED

This part is applicable if the recipient is a nonstate entity as defined by Section 215.97(2), Florida Statutes.

1. In the event that the recipient expends a total amount of state financial assistance equal to or in excess of $750,000 in any fiscal year of such recipient (for fiscal years ending June 30, 2017, and thereafter), the recipient must have a State single or project-specific audit for such fiscal year in accordance with Section 215.97, F.S.; Rule Chapter 69I-5, F.A.C., State Financial Assistance; and Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General. EXHIBIT 1 to this form lists the state financial assistance awarded through the Department of Environmental Protection by this agreement. In determining the state financial assistance expended in its fiscal year, the recipient shall consider all sources of state financial assistance, including state financial assistance received from the Department of Environmental Protection, other state agencies, and other nonstate entities. State financial assistance does not include federal direct or pass-through awards and resources received by a nonstate entity for Federal program matching requirements.

2. In connection with the audit requirements addressed in Part II, paragraph 1; the recipient shall ensure that the audit complies with the requirements of Section 215.97(8), Florida Statutes. This includes submission of a financial reporting package as defined by Section 215.97(2), Florida Statutes, and Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General.

3. If the recipient expends less than $750,000 in state financial assistance in its fiscal year (for fiscal year ending June 30, 2017, and thereafter), an audit conducted in accordance with the provisions of Section 215.97, Florida Statutes, is not required. In the event that the recipient expends less than $750,000 in state financial assistance in its fiscal year, and elects to have an audit conducted in accordance with the provisions of Section 215.97, Florida Statutes, the cost of the audit must be paid from the non-state entity's resources (i.e., the cost of such an audit must be paid from the recipient's resources obtained from other than State entities).

4. For information regarding the Florida Catalog of State Financial Assistance (CSFA), a recipient should access the Florida Single Audit Act website located at https://apps.fldfs.com/fsaa for assistance. In addition to the above websites, the following websites may be accessed for information: Legislature's Website at http://www.leg.state.fl.us/Welcome/index.cfm, State of Florida's website at http://www.myflorida.com/, Department of Financial Services' Website at http://www.fldfs.com/and the Auditor General's Website at http://www.myflorida.com/audgen/.

PART III: OTHER AUDIT REQUIREMENTS

(NOTE: This part would be used to specify any additional audit requirements imposed by the State awarding entity that are solely a matter of that State awarding entity's policy (i.e., the audit is not required by Federal or State laws and is not in conflict with other Federal or State audit requirements). Pursuant to Section 215.97(8), Florida Statutes, State agencies may conduct or arrange for audits of State financial assistance that are in addition to audits conducted in accordance with Section 215.97, Florida Statutes. In such an event, the State awarding agency must arrange for funding the full cost of such additional audits.)

PART IV: REPORT SUBMISSION

1. Copies of reporting packages for audits conducted in accordance with 2 CFR Part 200, Subpart F-Audit Requirements, and required by PART I of this form shall be submitted, when required by 2 CFR 200.512, by or on behalf of the recipient directly to the Federal Audit Clearinghouse (FAC) as provided in 2 CFR 200.36 and 200.512

   A. The Federal Audit Clearinghouse designated in 2 CFR §200.501(a) (the number of copies required by 2 CFR §200.501(a) should be submitted to the Federal Audit Clearinghouse), at the following address:

By Mail:

Federal Audit Clearinghouse
Bureau of the Census
1201 East 10th Street
Jeffersonville, IN 47132

Submissions of the Single Audit reporting package for fiscal periods ending on or after January 1, 2008, must be submitted using the Federal Clearinghouse's Internet Data Entry System which can be found at http://harvester.census.gov/facweb/

2. Copies of financial reporting packages required by PART II of this Attachment shall be submitted by or on behalf of the recipient directly to each of the following:

A. The Department of Environmental Protection at one of the following addresses:

By Mail:
Audit Director
Florida Department of Environmental Protection
Office of Inspector General, MS 40
3900 Commonwealth Boulevard
Tallahassee, Florida 32399-3000

Electronically:
FDEPSingleAudit@dep.state.fl.us

B. The Auditor General's Office at the following address:

Auditor General
Local Government Audits/342
Claude Pepper Building, Room 401
111 West Madison Street
Tallahassee, Florida 32399-1450

The Auditor General's website (http://flauditor.gov/) provides instructions for filing an electronic copy of a financial reporting package.

3. Copies of reports or management letters required by PART III of this Attachment shall be submitted by or on behalf of the recipient directly to the Department of Environmental Protection at one of the following addresses:

By Mail:
Audit Director
Florida Department of Environmental Protection
Office of Inspector General, MS 40
3900 Commonwealth Boulevard
Tallahassee, Florida 32399-3000

Electronically:
FDEPSingleAudit@dep.state.fl.us

4. Any reports, management letters, or other information required to be submitted to the Department of Environmental Protection pursuant to this Agreement shall be submitted timely in accordance with 2 CFR 200.512, section 215.97, F.S., and Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General, as applicable.

5. Recipients, when submitting financial reporting packages to the Department of Environmental Protection for audits done in accordance with 2 CFR 200, Subpart F-Audit Requirements, or Chapters 10.550 (local governmental entities) and 10.650 (non and for-profit organizations), Rules of the Auditor General, should indicate the date and the reporting package was delivered to the recipient correspondence accompanying the reporting package.

PART V: RECORD RETENTION

The recipient shall retain sufficient records demonstrating its compliance with the terms of the award and this Agreement for a period of **five (5)** years from the date the audit report is issued, and shall allow the Department of Environmental Protection, or its designee, Chief Financial Officer, or Auditor General access to such records upon request. The recipient shall ensure that audit working papers are made available to the Department of Environmental Protection, or its designee, Chief Financial Officer, or Auditor General upon request for a period of **three (3)** years from the date the audit report is issued, unless extended in writing by the Department of Environmental Protection.

EXHIBIT – 1

FUNDS AWARDED TO THE RECIPIENT PURSUANT TO THIS AGREEMENT CONSIST OF THE FOLLOWING:

Note: If the resources awarded to the recipient represent more than one federal program, provide the same information shown below for each federal program and show total federal resources awarded

Federal Resources Awarded to the Recipient Pursuant to this Agreement Consist of the Following:					
Federal Program A	Federal Agency	CFDA Number	CFDA Title	Funding Amount	State Appropriation Category
				$	
Federal Program B	Federal Agency	CFDA Number	CFDA Title	Funding Amount	State Appropriation Category
				$	

Note: Of the resources awarded to the recipient represent more than one federal program, list applicable compliance requirements for each federal program in the same manner as shown below:

Federal Program A	First Compliance requirement: i.e.: (what services of purposes resources must be used for)	
	Second Compliance requirement: i.e.:(eligibility requirement for recipients of the resources)	
	Etc.	
	Etc.	
Federal Program B	First Compliance requirement: i.e.: (what services of purposes resources must be used for)	
	Second Compliance requirement: i.e.: (eligibility requirement for recipients of the resources)	
	Etc.	
	Etc.	

Note: If the resources awarded to the recipient for matching represent more than one federal program, provide the same information shown below for each federal program and show total state resources awarded for matching.

State Resources Awarded to the Recipient Pursuant to this Agreement Consist of the Following Matching Resources for Federal Programs:					
Federal Program A	Federal Agency	CFDA	CFDA Title	Funding Amount	State Appropriation Category
Federal Program B	Federal Agency	CFDA	CFDA Title	Funding Amount	State Appropriation Category

Note: If the resources awarded to the recipient represent more than one state project, provide the same information shown below for each state project and show total state financial assistance awarded that is subject to section 215.97, F.S.

State Resources Awarded to the Recipient Pursuant to this Agreement Consist of the Following Resources Subject to Section 215.97, F.S.:						
State Program A	State Awarding Agency	State Fiscal Year[1]	CSFA Number	CSFA Title or Funding Source Description	Funding Amount	State Appropriation Category
Original Agreement	Department of Environmental Protection	2023-2024	37.039	Statewide Water Quality Restoration Project - LI 1705A	$5,350,000	140047
State Program B	State Awarding Agency	State Fiscal Year[2]	CSFA Number	CSFA Title or Funding Source Description	Funding Amount	State Appropriation Category

Total Award	$5,350,000	

Note: List applicable compliance requirement in the same manner as illustrated above for federal resources. For matching resources provided by the Department for DEP for federal programs, the requirements might be similar to the requirements for the applicable federal programs. Also, to the extent that different requirements pertain to different amount for the non-federal resources, there may be more than one grouping (i.e. 1, 2, 3, etc.) listed under this category.

For each program identified above, the recipient shall comply with the program requirements described in the Catalog of Federal Domestic Assistance (CFDA) [https://sam.gov/content/assistance-listings] and/or the Florida Catalog of State Financial Assistance (CSFA) [https://apps.fldfs.com/fsaa/searchCatalog.aspx], and State Projects Compliance Supplement (Part Four: State Projects Compliance Supplement [https://apps.fldfs.com/fsaa/state_project_compliance.aspx]. The services/purposes for which the funds are to be used are included in the Agreement's Grant Work Plan. Any match required by the Recipient is clearly indicated in the Agreement.

Exhibit A
Progress Report Form

DEP Agreement No.:	LPA0599
Project Title:	Ormond Beach Pump Station & Force Main
Grantee Name:	City of Ormond Beach
Grantee's Grant Manager:	
Reporting Period:	Select Quarter - Select Year

Provide the following information for all tasks identified in the Grant Work Plan:
Summarize the work completed within each task for the reporting period, provide an update on the estimated completion date for each task, and identify any anticipated delays or problems encountered. Use the format provided below and use as many pages as necessary to cover all tasks. Each quarterly progress report is due no later than twenty (20) days following the completion of the quarterly reporting period.

Task 1: Select Task Title

- **Progress for this reporting period**:
- **Identify delays or problems encountered**:

Task 2: Select Task Title

- **Progress for this reporting period**:
- **Identify delays or problems encountered**:

Task 3: Select Task Title

- **Progress for this reporting period**:
- **Identify delays or problems encountered**:

Task 4: Select Task Title

- **Progress for this reporting period**:
- **Identify delays or problems encountered**:

Task 5: Select Task Title

- **Progress for this reporting period**:
- **Identify delays or problems encountered**:

Completion Status for Tasks

Indicate the completion status for the following tasks, if included in the Grant Work Plan. For construction, the estimated completion percentage should represent the work being funded under this Agreement.

Design (Plans/Submittal): 30% ☐, 60% ☐, 90% ☐, 100% ☐

Permitting (Completed): Yes ☐, No ☐

Construction (Estimated): _____ %

This report is submitted in accordance with the reporting requirements of the above DEP Agreement number and accurately reflects the activities associated with the project.

Please use the most current form found on the website, linked above, for each payment request.

City of Ormond Beach
AGENDA ITEM

April 16, 2024 - City Commission

Number: 7.B

Section:	CONSENT AGENDA		
Item Category:	Consent - Resolution	**Res./Ord. No:**	2024-57
Strategic Goal:	Transportation & Community Development - Determine the best redevelopment option for church property and enhance temporary use and signage		
Department:	Economic Development		
Subject:	Acceptance of Florida Commerce Grant - Design of a Downtown Community Center		
Summary:	The need for a downtown community center is incorporated in the Downtown Master Plan Update of 2019, and aligns with the City's economic goals by providing a large venue in the downtown area that will serve as a focal point for gatherings and events. The community center will provide a space for cultural, historical and community events, serving residents, businesses, and visitors to the downtown area. By attracting people to the downtown area, the City anticipates a significant boost to the local economy. In 2023, the City Commission, in furtherance of this priority, included a legislative priority and appropriations request from the State Legislature. The aim was to secure half of the funds necessary for the first phase of a downtown community center, which involves the site design and engineering. For State Fiscal Year 2023-2024, the Florida Legislature approved the City's request and appropriated $783,059 from the General Revenue Fund of the General Appropriation Act to the City of Ormond Beach for the Downtown Community Center Project. Funding under this agreement will be used for design and pre-development activities, which will provide the essential steps needed for the project to move forward. The estimated cost for this phase is $1,566,118 and would be split evenly, with 50% coming from the appropriations request and 50% from the City of Ormond Beach general revenue or CRA fund. This agenda item is limited to accepting the previously requested legislative funding for this project and does not make a determination or commitment regarding specific location or design. A City Commission workshop is scheduled for May 7, 2024, to discuss the future use of city-		

	owned property at 56 N. Beach Street, purchased in 2018 and initially considered as the location for this project. At that workshop, staff will provide an overview and background of the property at 56 N. Beach Street as it pertains to this project and discuss exploring other uses for that property, as well as alternative locations for the proposed community center. Additional information and opportunities for discussion will be scheduled as needed to facilitate City Commission direction needed for staff to move forward within the scope of allocated funding. Because the original grant has a performance period from July 1, 2023, through June 30, 2024, the Florida Commerce Department has requested the City sign this original agreement, with the State's proposed budget for 2024-2025 including language for the expended balance of funds for this project to be appropriated for Fiscal Year 2024-2025. Once the appropriation is moved to Fiscal Year 2024-2025, an amendment will be brought before the Commission to update the contract with the new performance period, allowing for completion of the design project.
Financial Impact:	The total cost for this project is approximately $1,566,118. The City has received a funding commitment for this project from the State Legislature in the form of a General Appropriation in the amount of $783,059. The City's remaining matching funds of $783,059 will be derived from the City's general revenue fund.
Citizen Impact:	Accepting state funds for site design and engineering of a downtown community and event center in Ormond Beach, Florida has several positive impacts on citizens. It enhances local infrastructure, creating a vibrant hub for cultural and recreational activities. It stimulates economic growth, attracting visitors and businesses.
Recommended Action (Staff, Advisory Board and/or Other):	Staff recommends approval of the Florida Commerce Grant for the Design of a Downtown Community Center.
Staff Contact:	Brian Rademacher, Economic Development Director, (386) 676-3266
Attachments:	1. 24-57 FL Dept Commerce Grant (P24-0058G) 2. Grant Agreement State of Florida Commerce Dept. HL188
Approval:	Kelly McGuire, Finance Director 4/1/2024 Claire Whitley, Assistant City Manager 4/3/2024 Joyce Shanahan, City Manager 4/11/2024

RESOLUTION NO. 2024-57

A RESOLUTION AUTHORIZING THE EXECUTION OF A GRANT AGREEMENT BETWEEN THE CITY AND THE STATE OF FLORIDA DEPARTMENT OF COMMERCE REGARDING FUNDING FOR DESIGN WORK AND PRE-DEVELOPMENT ACTIVITIES FOR A DOWNTOWN COMMUNITY CENTER; AUTHORIZING THE EXECUTION OF ALL NECESSARY DOCUMENTS INCIDENTAL THERETO FOR THE CITY TO ACCEPT THE GRANT AWARD; AND SETTING FORTH AN EFFECTIVE DATE.

WHEREAS, the City Commission desires to enter into a Grant Agreement ("Agreement") with the State of Florida, Department of Commerce for funding assistance in the amount of $783,059 for design and pre-development activities for a downtown community center (the "Project"), and

WHEREAS, the total cost of the Project is $1,566,118, and

WHEREAS, the City Manager has certified that funding for the city's matching portion of the Project is available from the General Revenue Fund in the amount of $783,059 and has not been appropriated for any other purpose, now therefore,

BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:

SECTION ONE. The Mayor and the City Manager are hereby authorized and directed to execute an Agreement between the City and the State of Florida Department of Commerce regarding funding for the Project. A copy of said Agreement is attached hereto and incorporated herein by reference.

SECTION TWO. This Resolution shall take effect immediately upon its adoption.

APPROVED AND AUTHENTICATED, this 16th day of April, 2024.

GRANT AGREEMENT
STATE OF FLORIDA
DEPARTMENT OF COMMERCE

THIS GRANT AGREEMENT NUMBER HL188 ("Agreement") is made and entered into by and between the State of Florida, Department of Commerce ("Commerce"), and the City of Ormond Beach ("Grantee"). Commerce and Grantee are sometimes referred to herein individually as a "Party" and collectively as "the Parties".

WHEREAS, Commerce has the authority to enter into this Agreement and distribute State of Florida funds ("Award Funds") in the amount and manner set forth in this Agreement and in the following Attachments incorporated herein as an integral part of this Agreement:

- Attachment 1: Scope of Work
- Attachment 2 and Exhibit 1 to Attachment 2: Audit Requirements
- Attachment 3: Audit Compliance Certification
- Attachment 4: Minority and Service-Disabled Veteran Business Enterprise Report

WHEREAS, the Agreement and its aforementioned Attachments are hereinafter collectively referred to as the "Agreement", and if any inconsistencies or conflict between the language of this Agreement and its Attachments arise, then the language of the Attachments shall control, but only to the extent of the conflict or inconsistency;

WHEREAS, Grantee hereby represents and warrants that Grantee's signatory to this Agreement has authority to bind Grantee to this Agreement as of the Effective Date and that Grantee, through its undersigned duly authorized representative in his or her official capacity, has the authority to request, accept, and expend Award Funds for Grantee's purposes in accordance with the terms and conditions of this Agreement;

NOW THEREFORE, for and in consideration of the covenants and obligations set forth herein and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties intending to be legally bound hereby agree to perform the duties described herein in this Agreement as follows:

A. AGREEMENT PERIOD

This Agreement is effective as of July 1, 2023 (the "Effective Date") and shall continue until the earlier to occur of (a) June 30, 2024 (the "Expiration Date") or (b) the date on which either Party terminates this Agreement (the "Termination Date"). The period of time between the Effective Date and the Expiration Date or Termination Date is the "Agreement Period."

B. FUNDING

This Agreement is a cost reimbursement Agreement. Commerce shall pay Grantee up to Seven Hundred Eighty-Three Thousand Fifty-Nine Dollars and Zero Cents ($783,059.00) in consideration for Grantee's performance under this Agreement. Commerce shall not provide Grantee an advance of Award Funds under this Agreement. Any advance payment under this Agreement is subject to section 216.181(16), F.S. Travel expenses are not authorized under this Agreement. Commerce shall not pay Grantee's costs related to this Agreement incurred outside of the Agreement Period. In conformity with s. 287.0582, F.S., the State of Florida and Commerce's performance and obligation to pay any Award Funds under this Agreement is contingent upon an annual appropriation by the Legislature. Commerce shall have final unchallengeable

DocuSign Envelope ID: 32D6DEEA-1861-486B-9261-DAAA52D4AAE3

authority as to both the availability of funds and what constitutes an "annual appropriation" of funds. Grantee shall not expend Award Funds for the purpose of lobbying the Legislature, the judicial branch, or a state agency. Grantee shall not expend Award Funds to pay any costs incurred in connection with any defense against any claim or appeal of the State of Florida or any agency or instrumentality thereof (including Commerce); or to pay any costs incurred in connection with the prosecution of any claim or appeal against the State of Florida or any agency or instrumentality thereof (including Commerce), which Grantee instituted or in which Grantee has joined as a claimant. Grantee shall either (i) maintain Award Funds in a separate bank account, or (ii) expressly designate in Grantee's business records and accounting system that the Award Funds originated from this Agreement. Grantee shall not commingle Award Funds with any other funds. Commerce may refuse to reimburse Grantee for purchases made with commingled funds. Grantee's costs must be in compliance with all laws, rules, and regulations applicable to expenditures of State funds, including the Reference Guide for State Expenditures (https://www.myfloridacfo.com/docs-sf/accounting-and-auditing-libraries/state-agencies/reference-guide-for-state-expenditures.pdf?sfvrsn=b4cc3337_2).

C. ELECTRONIC FUNDS TRANSFER

Within 30 calendar days of the date the last Party has signed this Agreement, Grantee shall enroll in Electronic Funds Transfer (EFT) from the State's Chief Financial Officer. A copy of the Authorization form can be found on the vendor instruction page at: https://www.myfloridacfo.com/Division/AA/Vendors/ . Any questions should be directed to the Direct Deposit/EFT Section of the Division of Accounting and Auditing at (850) 413-5517. Once enrolled, invoice payments shall be made by EFT.

D. MODIFICATION

If, in Commerce's sole and absolute determination, changes to this Agreement are necessitated by law or otherwise, Commerce may at any time, with written notice of all such changes to Grantee, modify this Agreement within its original scope and purpose. Grantee shall be responsible for any due diligence necessary to determine the impact of the modification. Any modification of this Agreement requested by Grantee must be in writing and duly signed by all Parties in order to be enforceable.

E. AUDIT REQUIREMENTS AND COMPLIANCE

1. **Florida Single Audit Act - Section 215.97, Florida Statutes ("F.S.")**. Grantee shall comply with all applicable provisions of s. 215.97, F.S., s. 215.971, F.S., and Attachment 2 and Exhibit 1 to Attachment 2: Audit Requirements. Grantee shall perform the deliverables and tasks set forth in Attachment 1, Scope of Work. Grantee may only expend Award Funds for allowable costs resulting from obligations incurred during the Agreement Period. Grantee shall refund to Commerce any: (1) balance of unobligated Award Funds which have been advanced or paid to Grantee; or (2) Award Funds paid in excess of the amount to which Grantee is entitled under the terms and conditions of this Agreement and Attachments hereto, upon expiration or termination of this Agreement.

2. **Audit Compliance**. Grantee understands and shall comply with the requirements of s. 20.055(5), F.S. Grantee agrees to reimburse the State for the reasonable costs of investigation the Inspector General or other authorized State official incurs for investigations of Grantee's compliance with the terms of this or any other agreement between the Grantee and the State which results in the suspension or

DocuSign Envelope ID: 32D6DEEA-1861-486B-9261-DAAA52D4AAE3

debarment of Grantee. Grantee shall not be responsible for any costs of investigations that do not result in Grantee's suspension or debarment.

F. RECORDS AND INFORMATION RELEASE

1. **Records Compliance**. Commerce is subject to the provisions of chapter 119, F.S., relating to public records. Any document Grantee submits to Commerce under this Agreement may constitute public records under the Florida Statutes. Grantee shall cooperate with Commerce regarding Commerce's efforts to comply with the requirements of chapter 119, F.S. Grantee shall respond to requests to inspect or copy such records in accordance with chapter 119, F.S., for records made or received by Grantee in connection with this Agreement. Grantee shall immediately notify Commerce of the receipt and content of any records request by sending an e-mail to PRRequest@commerce.fl.gov within one (1) business day after receipt of such request. Grantee shall indemnify, defend, and hold Commerce harmless from any violation of Florida's public records laws wherein Commerce's disclosure or nondisclosure of any public record was predicated upon any act or omission of Grantee. As applicable, Grantee shall comply with s. 501.171, F.S. Commerce may terminate this Agreement if Grantee fails to comply with Florida's public records laws. Grantee shall allow public access to all records made or received by Grantee in connection with this Agreement, unless the records are exempt from s. 24(a) of Article I of the State Constitution or s. 119.07(1), F.S.

2. **Identification of Records**. Grantee shall clearly and conspicuously mark all records submitted to Commerce if such records are confidential and exempt from public disclosure. Grantee's failure to clearly mark each record and identify the legal basis for each exemption from the requirements of chapter 119, F.S., prior to delivery of the record to Commerce serves as Grantee's waiver of a claim of exemption. Grantee shall ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for as long as those records are confidential and exempt pursuant to Florida law. If Commerce's claim of exemption asserted in response to Grantee's assertion of confidentiality is challenged in any court of law, Grantee shall defend, assume, and be responsible for all fees, costs, and expenses in connection with such challenge.

3. **Keeping and Providing Records**. Commerce and the State have an absolute right to view, inspect, or make or request copies of any records arising out of or related to this Agreement. Grantee has an absolute duty to keep and maintain all records arising out of or related to this Agreement. Commerce may request copies of any records made or received in connection with this Agreement, or arising out of Grantees use of Award Funds, and Grantee shall provide Commerce with copies of any records within 10 business days after Commerce's request at no cost to Commerce. Grantee shall maintain all books, records, and documents in accordance with generally accepted accounting procedures and practices which sufficiently and properly reflect all expenditures of Award Funds. For avoidance of doubt, Grantee's duties to keep and provide records to Commerce includes all records generated in connection with or as a result of this Agreement. Upon expiration or termination of this Agreement, Grantee shall transfer, at no cost, to Commerce all public records in possession of Grantee or keep and maintain public records required by Commerce to perform the service. If Grantee keeps and maintains public records upon completion of this Agreement, Grantee shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to Commerce, upon request from Commerce's custodian of records, in a format that is compatible with the information technology systems of Commerce.

4. **Audit Rights.** Representatives of the State of Florida, Commerce, the State Chief Financial Officer, the State Auditor General, the Florida Office of Program Policy Analysis and Government Accountability or representatives of the federal government and their duly authorized representatives shall have access to any of Grantee's books, documents, papers, and records, including electronic

DocuSign Envelope ID: 32D6DEEA-1861-486B-9261-DAAA52D4AAE3

storage media, as they may relate to this Agreement, for the purposes of conducting audits or examinations or making excerpts or transcriptions.

5. **Single Audit Compliance Certification.** Annually, within 60 calendar days of the close of Grantee's fiscal year, Grantee shall electronically submit a completed Audit Compliance Certification (a version of this certification is attached hereto as Attachment 3) to audit@commerce.fl.gov. Grantee's timely submittal of one completed Audit Compliance Certification for each applicable fiscal year will fulfill this requirement for all agreements between Commerce and Grantee.

6. **Ensure Compliance**. Grantee shall ensure that any entity which is paid from, or for which Grantee's expenditures will be reimbursed by, Award Funds, is aware of and will comply with the aforementioned audit and record keeping requirements.

7. **Contact Custodian of Public Records for Questions.**

   IF THE GRANTEE HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE GRANTEE'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS by telephone at (850) 245-7140, via e-mail at PRRequest@commerce.fl.gov, or by mail at Department of Commerce, Public Records Coordinator, 107 East Madison Street, Caldwell Building, Tallahassee, Florida 32399-4128.

G. TERMINATION AND FORCE MAJEURE

1. **Termination due to Lack of Funds:** In the event funds to finance this Agreement become unavailable or if federal or state funds upon which this Agreement is dependent are withdrawn or redirected, Commerce may terminate this Agreement upon no less than 24 hour written notice to Grantee. Commerce shall be the final authority as to the availability of funds and will not reallocate funds earmarked for this Agreement to another program thus causing "lack of funds." In the event of termination of this Agreement under this provision, Grantee will be paid for any work satisfactorily completed prior to notification of termination. The lack of funds shall not constitute Commerce's default under this Agreement.

2. **Termination for Cause:** Commerce may terminate the Agreement if Grantee fails to: (1) deliver the services within the time specified in the Agreement or any extension; (2) maintain adequate progress, thus endangering performance of the Agreement; (3) honor any term of the Agreement; or (4) abide by any statutory, regulatory, or licensing requirement. The rights and remedies of Commerce in this clause are in addition to any other rights and remedies provided by law or under the Agreement. Grantee shall not be entitled to recover any cancellation charges or lost profits.

3. **Termination for Convenience:** Commerce, by written notice to Grantee, may terminate this Agreement in whole or in part when Commerce determines in Commerce's sole and absolute discretion that it is in Commerce's interest to do so. Grantee shall not provide any deliverable pursuant to Attachment 1: Scope of Work after it receives the notice of termination, except as Commerce otherwise specifically instructs Grantee in writing. Grantee shall not be entitled to recover any cancellation charges or lost profits.

4. **Grantee's Responsibilities Upon Termination:** If Commerce issues a Notice of Termination to Grantee, except as Commerce otherwise specifies in that Notice, Grantee shall: (1) Stop work under this Agreement on the date and to the extent specified in the notice; (2) complete performance of such part of the work Commerce does not terminate; (3) take such action as may be necessary, or as Commerce may specify, to protect and preserve any property which is in the possession of Grantee

DocuSign Envelope ID: 32D6DEEA-1861-486B-9261-DAAA52D4AAE3

and in which Commerce has or may acquire an interest; and (4) upon the effective date of termination, Grantee shall transfer, assign, and make available to Commerce all property and materials belonging to Commerce pursuant to the terms of this Agreement and all Attachments hereto. Grantee shall not receive additional compensation for Grantee's services in connection with such transfers or assignments.

5. **Force Majeure and Notice of Delay from Force Majeure.** Neither Party shall be liable to the other for any delay or failure to perform under this Agreement if such delay or failure is neither the fault nor the negligence of the Party or its employees or agents and the delay is due directly to acts of God, wars, acts of public enemies, strikes, fires, floods, or other similar cause wholly beyond the Party's control, or for any of the foregoing that affects subcontractors or suppliers if no alternate source of supply is available. However, in the event of delay from the foregoing causes, the Party shall take all reasonable measures to mitigate any and all resulting delay or disruption in the Party's performance obligation under this Agreement. If the delay is excusable under this FORCE MAJEURE AND NOTICE OF DELAY FROM FORCE MAJEURE section, the delay will not result in any additional charge or cost under the Agreement to either Party. In the case of any delay Grantee believes is excusable under this FORCE MAJEURE AND NOTICE OF DELAY FROM FORCE MAJEURE section, Grantee shall notify Commerce in writing of the delay or potential delay and describe the cause of the delay either: (1) within 10 calendar days after the cause that creates or will create the delay first arose, if Grantee could reasonably foresee that a delay could occur as a result; or (2) within five calendar days after the date Grantee first had reason to believe that a delay could result, if the delay is not reasonably foreseeable. THE FOREGOING SHALL CONSTITUTE GRANTEE'S SOLE REMEDY OR EXCUSE WITH RESPECT TO DELAY. Providing notice in strict accordance with this FORCE MAJEURE AND NOTICE OF DELAY FROM FORCE MAJEURE section is a condition precedent to such remedy. Commerce, in its sole discretion, will determine if the delay is excusable under this FORCE MAJEURE AND NOTICE OF DELAY FROM FORCE MAJEURE section and will notify Grantee of its decision in writing. No claim for damages, other than for an extension of time, shall be asserted against Commerce. Grantee shall not be entitled to an increase in the Agreement price or payment of any kind from Commerce for direct, indirect, consequential, impact, or other costs, expenses or damages, including but not limited to costs of acceleration or inefficiency arising because of delay, disruption, interference, or hindrance from any cause whatsoever. If performance is suspended or delayed, in whole or in part, due to any of the causes described in this FORCE MAJEURE AND NOTICE OF DELAY FROM FORCE MAJEURE section, after the causes have ceased to exist, Grantee shall perform at no increased cost, unless Commerce determines, in its sole discretion, that the delay will significantly impair the value of the Agreement to Commerce or the State, in which case, Commerce may terminate the Agreement in whole or in part.

H. BUSINESS WITH PUBLIC ENTITIES

Grantee is aware of and understands the provisions of s. 287.133(2)(a), F.S., and s. 287.134(2)(a), F.S. As required by s. 287.135(5), F.S., Grantee certifies that it is not: (1) listed on the Scrutinized Companies that Boycott Israel List, created pursuant to s. 215.4725, F.S.; (2) engaged in a boycott of Israel; (3) listed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, created pursuant to s. 215.473, F.S.; or (4) engaged in business operations in Cuba or Syria. Commerce may immediately terminate this Agreement if Grantee submits a false certification as to the above, or if Grantee is placed on the Scrutinized Companies that Boycott Israel List, engages in a boycott of Israel, is placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or has engaged in business operations in Cuba or Syria.

I. CONTINUING DISCLOSURE OF LEGAL PROCEEDINGS

DocuSign Envelope ID: 32D6DEEA-1861-486B-9261-DAAA52D4AAE3

Prior to execution of this Agreement, Grantee must disclose in a written statement to Commerce's Agreement Manager all prior or on-going civil or criminal litigation, investigations, arbitration or administrative proceedings (collectively "Proceedings") involving this Agreement. Thereafter, Grantee has a continuing duty to promptly disclose all Proceedings upon occurrence. This duty of disclosure applies to Grantee's or subcontractor's officers and directors when any Proceeding relates to the officer or director's business or financial activities. Details of settlements that are prevented from disclosure by the terms of the settlement may be annotated as such. Grantee shall promptly notify Commerce's Agreement Manager of any Proceeding relating to or affecting the Grantee's or subcontractor's business. If the existence of such Proceeding causes the State concern about Grantee's ability or willingness to perform the Agreement, then upon Commerce's request, Grantee shall provide to Commerce's Agreement Manager all reasonable assurances that: (i) Grantee will be able to perform the Agreement in accordance with its terms and conditions; and (ii) Grantee and/or its employees, agents, or subcontractor(s) have not and will not engage in conduct in performing services for Commerce which is similar in nature to the conduct alleged in such Proceeding.

J. ADVERTISING AND SPONSORSHIP DISCLOSURE

1. **Limitations on Advertising of Agreement.** Commerce does not endorse any Grantee, commodity, or service. Subject to chapter 119, F.S., Grantee shall not publicly disseminate any information concerning this Agreement without prior written approval from Commerce, including, but not limited to mentioning this Agreement in a press release or other promotional material, identifying Commerce or the State as a reference, or otherwise linking Grantee's name and either a description of the Agreement or the name of Commerce or the State in any material published, either in print or electronically, to any entity that is not a Party to this Agreement, except potential or actual authorized distributors, dealers, resellers, or service representatives.

2. **Disclosure of Sponsorship**. As required by s. 286.25, F.S., if Grantee is a nongovernmental organization which sponsors a program financed wholly or in part by state funds, including any funds obtained through this Agreement, it shall, in publicizing, advertising, or describing the sponsorship of the program, state: "Sponsored by (Grantee's name) and the State of Florida, Department of Commerce." If the sponsorship reference is in written material, the words "State of Florida, Department of Commerce" shall appear in the same size letters or type as the name of the organization.

K. RECOUPMENT OF FUNDS

1. **Recoupment**. Notwithstanding anything in this Agreement to the contrary, Commerce has an absolute right to recoup Award Funds. Commerce may refuse to reimburse Grantee for any cost if Commerce determines that such cost was not incurred in compliance with the terms of this Agreement. Commerce may demand a return of Award Funds if Commerce terminates this Agreement. The application of financial consequences as set forth in the Scope of Work is cumulative to any of Commerce's rights to recoup Award Funds. Notwithstanding anything in this Agreement to the contrary, in no event shall the application of any financial consequences or recoupment of Award Funds exceed the amount of Award Funds, plus interest.

2. **Overpayments.** If Grantee's (a) noncompliance with this Agreement or any applicable federal, state, or local law, rule, regulation or ordinance, or (b) performance or nonperformance of any term or condition of this Agreement results in (i) an unlawful use of Award Funds; (ii) a use of Award Funds that doesn't comply with the terms of this Agreement; or (iii) a use which constitutes a receipt of Award Funds to which Grantee is not entitled (each such event an "Overpayment"), then Grantee shall return such Overpayment of Award Funds to Commerce.

DocuSign Envelope ID: 32D6DEEA-1861-486B-9261-DAAA52D4AAE3

3. **Discovery of Overpayments**. Grantee shall refund any Overpayment of Award Funds to Commerce within 30 days of Grantee's discovery of an Overpayment or receipt of notification from Commerce that an Overpayment has occurred. Commerce is the final authority as to what may constitute an Overpayment of Award Funds. Refunds should be sent to Commerce's Agreement Manager and made payable to the "Department of Commerce." Should repayment not be made in a timely manner, Commerce may charge interest at the lawful rate of interest on the outstanding balance beginning 30 days after the date of notification or discovery.

4. **Right of Set-Off.** Commerce and the State shall have all of its common law, equitable, and statutory rights of set-off, including, without limitation, the State's option to withhold for the purposes of set-off any moneys due to Grantee under this Agreement up to any amounts due and owing to Commerce with respect to this Agreement, any other contract with any State department or agency, including any contract for a term commencing prior to the term of this Agreement, plus any amounts due and owing to the State for any other reason. The State shall exercise its set-off rights in accordance with normal State practices, including, in cases of set-off pursuant to an audit, the finalization of such audits by the State or its representatives.

L. INSURANCE

Unless Grantee is a state agency or subdivision as defined in s. 768.28(2), F.S., Grantee shall provide and maintain at all times during this Agreement adequate commercial general liability insurance coverage. A self-insurance program established and operating under the laws of the State of Florida may provide such coverage.

Grantee, at all times during the Agreement, at Grantee's sole expense, shall provide commercial insurance of such a type and with such terms and limits as may be reasonably associated with this Agreement, which, as a minimum, shall be: workers' compensation and employer's liability insurance in accordance with chapter 440, F.S., with minimum employer's liability limits of $100,000 per accident, $100,000 per person, and $500,000 policy aggregate. Such policy shall cover all employees engaged in any Agreement work.

Grantee shall maintain insurance coverage of such types and with such terms and limits as may be reasonably associated with this Agreement, as required by law, and as otherwise necessary and prudent for the Grantee's performance of its operations in the regular course of business. The limits of coverage under each policy maintained by Grantee shall not be interpreted as limiting Grantee's liability and obligations under this Agreement. All insurance policies shall be through insurers licensed and authorized to write policies in Florida, and such policies shall cover all employees engaged in any Agreement work. Grantee shall maintain any other insurance required in the Scope of Work. Upon request, Grantee shall produce evidence of insurance to Commerce.

Commerce shall not pay for any costs of any insurance or policy deductible, and payment of any insurance costs shall be Grantee's sole responsibility. Providing and maintaining adequate insurance coverage is a material obligation of Grantee, and failure to maintain such coverage may void the Agreement, at Commerce's sole and absolute discretion, after Commerce's review of Grantee's insurance coverage when Grantee is unable to comply with Commerce's requests concerning additional appropriate and necessary insurance coverage. Upon execution of this Agreement, Grantee shall provide Commerce written verification of the existence and amount for each type of applicable insurance coverage. Within 30 calendar days of the effective date of the Agreement, Grantee shall furnish Commerce proof of applicable insurance coverage by standard ACORD form certificates of insurance. In the event that an insurer cancels any applicable coverage for any reason, Grantee shall immediately notify Commerce of such cancellation and shall obtain adequate replacement coverage conforming to the requirements herein and provide proof of such replacement coverage within 15 business days after the cancellation of coverage. Copies of new insurance certificates must be provided to Commerce's Agreement Manager with each insurance renewal.

DocuSign Envelope ID: 32D6DEEA-1861-486B-9261-DAAA52D4AAE3

M. CONFIDENTIALITY AND SAFEGUARDING INFORMATION

Each Party may have access to confidential information made available by the other. The provisions of the Florida Public Records Act, Chapter 119, F.S., and other applicable state and federal laws will govern disclosure of any confidential information received by the State of Florida.

Grantee must implement procedures to ensure the appropriate protection and confidentiality of all data, files, and records involved with this Agreement.

Except as necessary to fulfill the terms of this Agreement and with the permission of Commerce, Grantee shall not divulge to third parties any confidential information obtained by Grantee or its agents, distributors, resellers, subcontractors, officers, or employees in the course of performing Agreement work, including, but not limited to, security procedures, business operations information, or commercial proprietary information in the possession of the State or Commerce.

Grantee shall not use or disclose any information concerning a recipient of services under this Agreement for any purpose in conformity with state and federal law or regulations, except upon written consent of the recipient or the responsible parent or guardian of the recipient when authorized by law.

When Grantee has access to Commerce's network and/or applications, in order to fulfill Grantee's obligations under this Agreement, Grantee shall abide by all applicable Commerce Information Technology Security procedures and policies. Grantee (including its employees, subcontractors, agents, or any other individuals to whom Grantee exposes confidential information obtained under this Agreement), shall not store, or allow to be stored, any confidential information on any portable storage media (*e.g.*, laptops, thumb drives, hard drives, *etc.*) or peripheral device with the capacity to hold information. Failure to strictly comply with this provision shall constitute a breach of Agreement.

Grantee shall immediately notify Commerce in writing when Grantee, its employees, agents, or representatives become aware of an inadvertent disclosure of Commerce's unsecured confidential information in violation of the terms of this Agreement. Grantee shall report to Commerce any Security Incidents of which it becomes aware, including incidents sub-contractors or agents reported to Grantee. For purposes of this Agreement, "Security Incident" means the attempted or successful unauthorized access, use, disclosure, modification, or destruction of Commerce information in Grantee's possession or electronic interference with Commerce operations; provided, however, that random attempts at access shall not be considered a security incident. Grantee shall make a report to Commerce not more than seven business days after Grantee learns of such use or disclosure. Grantee's report shall identify, to the extent known: (i) the nature of the unauthorized use or disclosure, (ii) the confidential information used or disclosed, (iii) who made the unauthorized use or received the unauthorized disclosure, (iv) what Grantee has done or shall do to mitigate any detrimental effect of the unauthorized use or disclosure, and (v) what corrective action Grantee has taken or shall take to prevent future similar unauthorized use or disclosure. Grantee shall provide such other information, including a written report, as Commerce's Information Security Manager requests.

In the event of a breach of security concerning confidential personal information involved with this Agreement, Grantee shall comply with s. 501.171, F.S., as applicable. When notification to affected persons is required by statute, Grantee shall provide that notification, but only after receipt of Commerce's written approval of the contents of the notice. Defined statutorily, and for purposes of this Agreement, "breach of security" or "breach" means the unauthorized access of data in electronic form containing personal data. Good faith acquisition of personal information by an employee or agent of Grantee is not a breach, provided the information is not used for a purpose unrelated to Grantee's obligations under this Agreement or is not subject to further unauthorized use.

DocuSign Envelope ID: 32D6DEEA-1861-486B-9261-DAAA52D4AAE3

N. PATENTS, COPYRIGHTS, AND ROYALTIES

1. All legal title and every right, interest, claim or demand of any kind, in and to any patent, trademark or copyright, or application for the same, or any other intellectual property right to, the work developed or produced under or in connection with this Agreement, is the exclusive property of Commerce to be granted to and vested in the Florida Department of State for the use and benefit of the state; and no person, firm or corporation shall be entitled to use the same without the written consent of the Florida Department of State. Any contribution by Grantee or its employees, agents or contractors to the creation of such works shall be considered works made for hire by Grantee for Commerce and, upon creation, shall be owned exclusively by Commerce. To the extent that any such works may not be considered works made for hire for Commerce under applicable law, Grantee agrees, upon creation of such works, to automatically assign to Commerce ownership, including copyright interests and any other intellectual property rights therein, without the necessity of any further consideration.

2. If any discovery or invention arises or is developed in the course or as a result of work or services performed with funds from this Agreement, Grantee shall refer the discovery or invention to Commerce who will refer it to the Department of State to determine whether patent protection will be sought in the name of the State of Florida.

3. Where activities supported by this Agreement produce original writings, sound recordings, pictorial reproductions, drawings, or other graphic representations and works of any similar nature Commerce has the right to use, duplicate, and disclose such materials in whole or in part, in any manner, for any purpose whatsoever and to allow others acting on behalf of Commerce to do so. Grantee shall give Commerce written notice when any books, manuals, films, websites, web elements, electronic information, or other copyrightable materials are produced.

4. Notwithstanding any other provisions herein, in accordance with s. 1004.23, F.S., a State University is authorized in its own name to perform all things necessary to secure letters of patent, copyrights, and trademarks on any works it produces. Within 30 calendar days of same, the president of a State University shall report to the Department of State any such university's action taken to secure or exploit such trademarks, copyrights, or patents in accordance with s. 1004.23(6), F.S.

O. INFORMATION TECHNOLOGY RESOURCE

Grantee shall obtain prior written approval from the appropriate Commerce authority before purchasing any Information Technology Resource (ITR) or conducting any activity that will impact Commerce's electronic information technology equipment or software, in any way. ITR includes computer hardware, software, networks, devices, connections, applications, and data. Grantee shall contact the Commerce Agreement Manager listed herein in writing for the contact information of the appropriate Commerce authority for any such ITR purchase approval.

P. NONEXPENDABLE PROPERTY

1. For the requirements of this Nonexpendable Property section of the Agreement, "nonexpendable property" is the same as "property" as defined in s. 273.02, F.S., (equipment, fixtures, and other tangible personal property of a nonconsumable and nonexpendable nature).

2. All nonexpendable property, purchased under this Agreement, shall be listed on the property records of Grantee. Grantee shall inventory annually and maintain accounting records for all nonexpendable property purchased and submit an inventory report to Commerce with the final expenditure report. The records shall include, at a minimum, the following information: property tag identification number,

DocuSign Envelope ID: 32D6DEEA-1861-486B-9261-DAAA52D4AAE3

description of the item(s), physical location, name, make or manufacturer, year, and/or model, manufacturer's serial number(s), date of acquisition, and the current condition of the item.

3. At no time shall Grantee dispose of nonexpendable property purchased under this Agreement without the written permission of and in accordance with instructions from Commerce.

4. Immediately upon discovery, Grantee shall notify Commerce, in writing, of any property loss with the date and reason(s) for the loss.

5. Grantee shall be responsible for the correct use of all nonexpendable property Grantee purchases or Commerce furnishes under this Agreement.

6. A formal Agreement amendment is required prior to the purchase of any item of nonexpendable property not specifically listed in Attachment 1: Scope of Work.

7. Upon the Expiration Date of this Agreement, Grantee is authorized to retain ownership of any nonexpendable property purchased under this Agreement; however, Grantee hereby grants to Commerce a right of first refusal in all such property prior to disposition of any such property during its depreciable life, in accordance with the depreciation schedule in use by Grantee. Grantee shall provide written notice of any such planned disposition and await Commerce's response prior to disposing of the property. "Disposition" as used herein, shall include, but is not limited to, Grantee no longer using the nonexpendable property for the uses authorized herein, the sale, exchange, transfer, trade-in, or disposal of any such nonexpendable property. Commerce, in its sole discretion, may require Grantee to refund to Commerce the fair market value of the nonexpendable property at the time of disposition rather than taking possession of the nonexpendable property.

Q. REQUIREMENTS APPLICABLE TO THE PURCHASE OF OR IMPROVEMENTS TO REAL PROPERTY

In accordance with s. 287.05805, F.S., if funding provided under this Agreement is used for the purchase of or improvements to real property, Grantee shall grant Commerce a security interest in the property in the amount of the funding provided by this Agreement for the purchase of or improvements to the real property for five years from the date of purchase or the completion of the improvements or as further required by law.

Upon the Expiration Date of the Agreement, Grantee shall be authorized to retain ownership of the improvements to real property set forth in this Agreement in accordance with the following: Grantee is authorized to retain ownership of the improvements to real property so long as: (1) Grantee is not sold, merged or acquired; (2) the real property subject to the improvements is owned by Grantee; and (3) the real property subject to the improvements is used for the purposes provided in this Agreement. If within five years of the termination of this Agreement, Grantee is unable to satisfy the requirements stated in the immediately preceding sentence, Grantee shall notify Commerce in writing of the circumstances that will result in the deficiency upon learning of it, but no later than 30 calendar days prior to the deficiency occurring. In such event, Commerce shall have the right, within its sole discretion, to demand reimbursement of part or all of the funding provided to Grantee under this Agreement.

R. CONSTRUCTION AND INTERPRETATION

The title, section, and paragraph headings in this Agreement are for convenience of reference only and shall not govern or affect the interpretation of any of the terms or provisions of this Agreement. The term "Agreement" means this Agreement together with all attachments and exhibits hereto, as the same may from time to time be amended, modified, supplemented, or restated in accordance with the terms hereof.

DocuSign Envelope ID: 32D6DEEA-1861-486B-9261-DAAA52D4AAE3

The use in this Agreement of the term "including" and other words of similar import mean "including, without limitation" and where specific language is used to clarify by example a general statement contained herein, such specific language shall not be deemed to modify, limit, or restrict in any manner the construction of the general statement to which it relates. The word "or" is not exclusive and the words "herein," "hereof," "hereunder," and other words of similar import refer to this Agreement, including any Exhibits and Attachments, and not to any particular section, subsection, paragraph, subparagraph, or clause contained in this Agreement. As appropriate, the use herein of terms importing the singular shall also include the plural, and vice versa. The reference to an agreement, instrument, or other document means such agreement, instrument, or other document as amended, supplemented, and modified from time to time to the extent permitted by the provisions thereof and the reference to a statute means such statute as amended from time to time and includes any successor legislation thereto and any regulations promulgated thereunder. All references to "$" shall mean United States dollars. The term "Grantee" includes any person or entity which has been duly authorized to and has the actual authority to act or perform on Grantee's behalf. The term "Commerce" includes the State of Florida and any successor office, department, or agency of Commerce, and any person or entity which has been duly authorized to and has the actual authority to act or perform on Commerce's behalf. The recitals of this Agreement are incorporated herein by reference and shall apply to the terms and provisions of this Agreement and the Parties. Time is of the essence with respect to the performance of all obligations under this Agreement. Each Party has read and understands this Agreement. In the event an ambiguity or question of intent or interpretation arises, this Agreement shall be construed as if drafted jointly by the Parties, and no presumption or burden of proof shall arise favoring or disfavoring any Party by virtue of the authorship of any of the provisions of this Agreement.

S. CONFLICT OF INTEREST

This Agreement is subject to chapter 112, F.S. Grantee shall disclose the name of any officer, director, employee, or other agent who is also an employee of the State. Grantee shall also disclose the name of any State employee who owns, directly or indirectly, more than a 5% interest in Grantee or its affiliates.

T. GRANTEE AS INDEPENDENT CONTRACTOR

Grantee is at all times acting and performing as an independent contractor. Commerce has no ability to exercise any control or direction over the methods by which Grantee may perform its work and functions, except as provided herein. Nothing in this Agreement may be understood to constitute a partnership or joint venture between the Parties.

U. EMPLOYMENT ELIGIBILITY VERIFICATION – E-VERIFY

1. E-Verify is an Internet-based system that allows an employer, using information reported on an employee's Form I-9, Employment Eligibility Verification, to determine the eligibility of all new employees hired to work in the United States. There is no charge to employers to use E-Verify. The Department of Homeland Security's E-Verify system can be found at: https://www.e-verify.gov/.

2. In accordance with section 448.095, F.S., the State of Florida expressly requires the following:

a) Every public agency and its contractors and subcontractors shall register with and use the E-Verify system to verify the work authorization status of all newly hired employees. A public agency or a contractor or subcontractor thereof may not enter into a contract unless each party to the contract registers with and uses the E-Verify system.

b) An employer shall verify each new employee's employment eligibility within three (3) business days after the first day that the new employee begins working for pay as required under 8

DocuSign Envelope ID: 32D6DEEA-1861-486B-9261-DAAA52D4AAE3

C.F.R. 274a. Beginning July 1, 2023, a private employer with 25 or more employees shall use the E-Verify system to verify a new employee's employment eligibility.

3. If an entity does not use E-Verify, the entity shall enroll in the E-Verify system prior to hiring any new employee or retaining any contract employee after the effective date of this Agreement.

V. NOTIFICATION OF INSTANCES OF FRAUD

Upon discovery, Grantee shall report all known or suspected instances of Grantee, or Grantee's agents, contractors or employees, operational fraud or criminal activities to Commerce's Agreement Manager in writing within 24 chronological hours.

W. NON-DISCRIMINATION

Grantee shall not discriminate unlawfully against any individual employed in the performance of this Agreement because of race, religion, color, sex, physical handicap unrelated to such person's ability to engage in this work, national origin, ancestry, or age. Grantee shall provide a harassment-free workplace, with any allegation of harassment to be given priority attention and action.

X. ASSIGNMENTS

Grantee shall not assign, subcontract, or otherwise transfer its rights, duties, or obligations under this Agreement, by operation of law or otherwise, without the prior written consent of Commerce, which consent may be withheld in Commerce's sole and absolute discretion. Commerce is at all times entitled to assign or transfer its rights, duties, or obligations under this Agreement to another governmental entity in the State of Florida. Any attempted assignment of this Agreement or any of the rights hereunder by Grantee in violation of this provision shall be void *ab initio*.

Y. ENTIRE AGREEMENT; SEVERABILITY

This Agreement, and the attachments and exhibits hereto, embodies the entire agreement of the Parties with respect to the subject matter hereof. There are no provisions, terms, conditions, or obligations other than those contained in this Agreement; and this Agreement supersedes all previous communications, representations, or agreements, either verbal or written, between the Parties. If a court of competent jurisdiction voids or holds unenforceable any provision of this Agreement, then that provision shall be enforced only to the extent that it is not in violation of law or is not otherwise unenforceable, and all other provisions shall remain in full force and effect. This Agreement may be executed in counterparts, each of which shall be an original and all of which shall constitute one and the same instrument. If any inconsistencies or conflict between the language of this Agreement and its Attachments arise, then the language of the attachments shall control, but only to the extent of the conflict or inconsistency.

Z. WAIVER; GOVERNING LAW; ATTORNEYS' FEES, DISPUTE RESOLUTION

1. **Waiver.** No waiver by Commerce of any of provision herein shall be effective unless explicitly set forth in writing and signed by Commerce. No waiver by Commerce may be construed as a waiver of any failure, breach, or default not expressly identified by such written waiver, whether of a similar or different character, and whether occurring before or after that waiver. No failure by Commerce to exercise, or delay in exercising, any right, remedy, power or privilege under this Agreement may be construed as a waiver thereof; nor shall any single or partial exercise of any right, remedy, power or privilege hereunder preclude any other or further exercise thereof or the exercise of any other right, remedy, power or privilege. The rights and remedies set forth herein are cumulative and not exclusive.

DocuSign Envelope ID: 32D6DEEA-1861-486B-9261-DAAA52D4AAE3

2. **Governing Law.** The laws of the State of Florida shall govern the construction, enforcement, and interpretation of this Agreement, regardless of and without reference to whether any applicable conflicts of laws principles may point to the application of the laws of another jurisdiction. The Parties expressly consent to exclusive jurisdiction and venue in any state court located in Leon County, Florida, and waive any defense of forum non conveniens, lack of personal jurisdiction, or like defense. IN ANY LEGAL OR EQUITABLE ACTION BETWEEN THE PARTIES, THE PARTIES HEREBY EXPRESSLY WAIVE TRIAL BY JURY TO THE FULLEST EXTENT PERMITTED BY LAW.

3. **Attorneys' Fees, Expenses.** Except as set forth otherwise herein, each of the Parties shall pay its own attorneys' fees and costs in connection with the execution and delivery of this Agreement and the transactions contemplated hereby.

4. **Dispute Resolution.** Commerce shall decide disputes concerning the performance of the Agreement, and Commerce shall serve written notice of same to Grantee. Commerce's decision shall be final and conclusive unless within 21 calendar days from the date of receipt, Grantee files with Commerce a petition for administrative hearing. Commerce's final order on the petition shall be final, subject to any right of Grantee to judicial review pursuant to chapter 120.68, F.S. Exhaustion of administrative remedies is an absolute condition precedent to Grantee's ability to pursue any other form of dispute resolution; provided however, that the Parties may employ the alternative dispute resolution procedures outlined in chapter 120, F.S.

AA. INDEMNIFICATION

If Grantee is a state agency or subdivision, as defined in s. 768.28(2), F.S., pursuant to s. 768.28(19), F.S., neither Party indemnifies nor insures or assumes any liability for the other Party for the other Party's negligence.

1. Grantee shall be fully liable for the actions of its agents, employees, partners, or subcontractors and shall fully indemnify, defend, and hold harmless the State and Commerce, and their officers, agents, and employees, from suits, actions, damages, and costs of every name and description, including attorneys' fees, arising from or relating to personal injury and damage to real or personal tangible property alleged to be caused in whole or in part by Grantee, its agents, employees, partners, or subcontractors; provided, however, that Grantee shall not indemnify, defend, and hold harmless the State and Commerce, and their officers, agents, and employees for that portion of any loss or damages the negligent act or omission of Commerce or the State proximately caused.

2. Further, Grantee shall fully indemnify, defend, and hold harmless the State and Commerce from any suits, actions, damages, and costs of every name and description, including attorneys' fees, arising from or relating to violation or infringement of a trademark, copyright, patent, trade secret or intellectual property right; provided, however, that the foregoing obligation shall not apply to Commerce's misuse or modification of Grantee's products or Commerce operation or use of Grantee's products in a manner not contemplated by this Agreement. If any product is the subject of an infringement suit, or in Grantee's opinion is likely to become the subject of such a suit, Grantee may, at Grantee's sole expense, procure for Commerce the right to continue using the product or to modify it to become non-infringing. If Grantee is not reasonably able to modify or otherwise secure for Commerce the right to continue using the product, Grantee shall remove the product and refund Commerce the amounts paid in excess of a reasonable fee, as determined by Commerce in its sole and absolute discretion, for past use. Commerce shall not be liable for any royalties.

3. Grantee's obligations under the two immediately preceding paragraphs above, with respect to any legal action are contingent upon the State or Commerce giving Grantee (1) written notice of any action or threatened action, (2) the opportunity to take over and settle or defend any such action at Grantee's

DocuSign Envelope ID: 32D6DEEA-1861-486B-9261-DAAA52D4AAE3

sole expense, and (3) assistance in defending the action at Grantee's sole expense. Grantee shall not be liable for any cost, expense, or compromise incurred or made by the State or Commerce in any legal action without Grantee's prior written consent, which shall not be unreasonably withheld.

4. The State and Commerce may, in addition to other remedies available to them at law or equity and upon notice to Grantee, retain such monies from amounts due Grantee as may be necessary to satisfy any claim for damages, penalties, costs and the like asserted by or against them. The State may set off any liability or other obligation of Grantee or its affiliates to the State against any payments due Grantee under any Agreement with the State.

ATTACHMENT 1
SCOPE OF WORK

A. PROJECT DESCRIPTION: For State Fiscal Year 2023-2024, the Florida Legislature appropriated Seven Hundred Eighty-Three Thousand Fifty-Nine Thousand Dollars and Zero Cents ($783,059.00) in Specific Appropriation line 2336A, from the General Revenue Fund of the General Appropriation Act ("GAA") to the City of Ormond Beach (Grantee) for the City of Ormond Beach – Downtown Community Center Project (Project).

Funding under this agreement will be used for design and pre-development activities for the construction of downtown community center. The completion of these design and pre-development activities will provide the essential steps needed for the project to be considered shovel ready. The community center will provide a space for cultural, historical and community events, serving both the residents and visitors to the downtown area.

B. GRANTEE RESPONSIBILITIES Grantee shall, in addition to all other requirements set forth in the Agreement and this Scope of Work, perform the following activities:

a) Complete and the following design and pre-development activities
   1) Surveys, including but not limited to
      i. Boundary Survey
      ii. Topographic Survey
      iii. Geotechnical Survey
   2) Public Engagement and Outreach – conduct a minimum of one (1) public meeting to solicit input on the design and development of the community center
   3) Complete and submit to Commerce's Agreement Manager a copy of the final design, engineering and construction plans for the project
   4) Permitting

b) Provide Commerce copies of all contracts and subcontracts entered into in furtherance of the project, for which Grantee is seeking reimbursement under this Agreement. All such contracts and subcontracts must be procured in compliance with the Grantee's policies and procedures, and with applicable law.

c) In performing under this Agreement, Grantee shall comply with all applicable laws, rules, and regulations, including but not limited to any applicable requirements of Chapter 255, Florida Statutes.

d) Provide a minimum of Seven Hundred Eight-Three Thousand Fifty-Nine Dollars and Zero Cents ($783,059.00) in other match as match for the Project, by the end of the Agreement period. Grantee shall provide a letter and supporting documentation to Commerce's Agreement Manager which demonstrates that the Grantee met its match requirements, including, but not necessarily limited to: the source of the contribution; the amount of each contribution and provide a summary of all match contributions. Commerce reserves the right to request any additional documentation Commerce deems necessary to support the Grantee's claim that it has met the match requirement. Commerce shall retain five percent (5%) of the total grant award as a financial consequence if Grantee fails to provide proof of match funds.

C. COMMERCE'S RESPONSIBILITIES: Commerce shall monitor progress, review reports, conduct site visits as determined necessary by Commerce, and process payments to Grantee.

D. DELIVERABLES: Grantee agrees to provide the following services as specified:

DocuSign Envelope ID: 32D6DEEA-1861-486B-9261-DAAA52D4AAE3

Deliverable No. 1 Design and Pre-Development Activities		
Tasks	**Minimum Level of Service**	**Financial Consequences**
Grantee shall complete the design and pre-development activities in accordance with Section B.a) of this Scope of Work.	Grantee may request reimbursement upon completion of a minimum of one (1) task in accordance with Section B.a) of this Scope of Work. Task completion shall be evidenced by submission of the following documentation: a. Copies of surveys in accordance with Section B.a).1); b. For public meetings, in accordance with Section B.a)2), provide a copy of the meeting notice, agenda, any handouts, and sign-in sheets; c. Copy of final design, engineering and construction plans in accordance with Section B.a)3) d. Copy of permits in accordance with Section B.a)4); and e. Invoice package in accordance with Section 6 of this Scope of Work.	Failure to complete the Minimum Level of Service will result in non-payment.
		Deliverable $783,059.00
TOTAL AWARD NOT TO EXECEED: $783.059.00		

E. REPORTING:

1. Quarterly: Grantee shall provide a quarterly report listing all progress relating to the Deliverables in Section D. Quarterly reports are due to Commerce within 30 calendar days after the end of each quarter, until submission of the final invoice package. The ending dates for each quarter of the program year are September 30, December 31, March 31, and June 30. The quarterly report shall include a summary of project progress, indicating percentage of completion of each Deliverable, and all additional reports which are required pursuant to this Agreement, including but not limited to, reports documenting the positive return on investment to the State that results from Grantee's project and its use of Award Funds. The summary shall also include any issues or events occurring which affect the ability of the Grantee to meet the terms of this Agreement. **If all required reports and copies are**

DocuSign Envelope ID: 32D6DEEA-1861-486B-9261-DAAA52D4AAE3

not sent to Commerce or are not completed in a manner acceptable to Commerce, payments may be withheld until the reports are properly completed or otherwise allowable by law.

2. Minority and Service-Disabled Veteran Business Enterprise Report: Grantee shall provide a Minority and Service-Disabled Veteran Business Enterprise Report (Attachment 4) with each invoice summarizing the participation of certified and non-certified minority and service-disabled veteran subcontractors and material suppliers for that period and the project to date. Grantee shall include the names, addresses, and dollar amount of each certified and non-certified Minority Business Enterprise and Service-Disabled Veteran Enterprise participant. Commerce's Minority Coordinator can be reached at (850) 245-7455 to answer concerns and questions.
3. Close-out Report: No later than 60 calendar days after the Agreement ends or is terminated, Grantee shall provide copies of all paid invoices to document completed work.

F. INVOICE SUBMITTAL AND PAYMENT SCHEDULE: Commerce shall pay Grantee in accordance with the following schedule in the amount identified per deliverable in Section D above. The deliverable amount specified does not establish the value of the deliverable. In accordance with the requirements of s. 215.971(1), F.S., and the **Audit Requirements and Compliance** section of this Agreement, Grantee and its subcontractors may only expend funding under this Agreement for allowable costs resulting from obligations incurred during the Agreement period.

1. Grantee shall provide no more than one invoice quarterly for all services rendered during the applicable period. Grantee shall submit invoices as set forth below to be eligible to receive and retain payment for the performance of duties and completion of deliverables set forth above. Grantee shall submit all documentation necessary to support Grantee's expenditures. Commerce may request any information from Grantee that Commerce deems necessary to verify that Grantee has performed the services for which payment is requested. Grantee's submission of each invoice package is Grantee's certification that it has performed the services and incurred the costs in compliance with all applicable laws and the terms of this Agreement. Grantee will provide invoices in accordance with the requirements of the Reference Guide for State Expenditures available at: https://www.myfloridacfo.com/docs-sf/accounting-and-auditing-libraries/state-agencies/reference-guide-for-state-expenditures.pdf?sfvrsn=b4cc3337_2 . Invoices must be legible and must clearly reflect the performance for which payment is sought. Payment does not become due under this Agreement until Commerce accepts and approves the invoiced deliverable(s) and any required report(s). At Commerce's option, Grantee may submit invoices electronically. Grantee shall submit its final invoice for payment to Commerce no later than 60 days after this Agreement ends and Commerce may, at Commerce's sole and absolute discretion, refuse to honor any requests for payment submitted after this deadline.
2. Invoices must contain Grantee's name, address, federal employer identification number or other applicable Grantee identification number, the Agreement number, the invoice number, and the invoice period. Grantee shall submit the following documents with the itemized invoice:
   - **a**. A cover letter signed by Grantee's Agreement Manager certifying that the costs being claimed in the invoice package: (1) are specifically for the project represented to the State in the budget appropriation; (2) are for one or more of the components as stated in Section D, Deliverables, of this Scope of Work; (3) have been paid or that professional services have been rendered in a rural community or rural area of opportunity as defined in section 288.065(2), F.S.; and (4) were incurred during the Agreement period;
   - **b.** Grantee's invoices shall include the date, period in which work was performed, amount of reimbursement, and work completed to date;
   - **c.** A certification by a licensed engineer using AIA forms G702 and G703, or their substantive equivalents, certifying that the project, or a quantifiable portion of the project, is complete; if applicable
   - **d.** Before and after photographs of the completed work; if applicable
   - **e.** A copy of all supporting documentation for vendor payments;
   - **f.** A copy of the cancelled check(s) specific to the project; and

DocuSign Envelope ID: 32D6DEEA-1861-486B-9261-DAAA52D4AAE3

g. A copy of the bank statement that includes the cancelled check.

3. The State may require any other information from Grantee that the State deems necessary to verify that the services have been rendered under the Agreement.

4. All documentation necessary to support payment requests must be submitted with Grantee's invoice for Commerce's review.

5. Grantee's invoice and all documentation necessary to support payment requests must be submitted into Commerce's Subrecipient Enterprise Resource Application (SERA). Further instruction on SERA invoicing and reporting, along with a copy of the invoice template, will be provided upon execution of the Agreement.

6. If the Grantee is a county or municipality that is a rural community or rural area of opportunity as those terms are defined in s. 288.0656(2), the payment of submitted invoices may be issued for verified and eligible performance that has been completed in accordance with the terms and conditions set forth in this Agreement to the extent that federal or state law, rule, or other regulation allows such payments. Upon meeting either of the criteria set forth below, the Grantee may elect in writing to exercise this provision.

a. A county or municipality that is a rural community or rural area of opportunity as those terms are defined in section 288.0656(2), F.S., that demonstrates financial hardship; or

b. A county or municipality that is a rural community or rural area of opportunity as those terms are defined in s. 288.0656(2), F.S., and which is located in a fiscally constrained county, as defined in section 218.67(1), F.S. If the Grantee meets the criteria set forth in this paragraph, then the Grantee is deemed to have demonstrated a financial hardship.

G. RETURN ON INVESTMENT: Grantee is required to provide, on or before October 31, 2023, an initial report identifying actual returns on investment by fiscal year for state funding previously received (if applicable), as well as projected positive returns the state will receive by providing Grantee funding through this Agreement.

1. Beginning at the end of the first full quarter following execution of this Agreement, Grantee shall provide quarterly update reports directly to Commerce's Agreement Manager documenting the positive return on investment to the state that results from the Grantee's project and its use of monies provided under this Agreement.

2. Quarterly update reports shall be provided to Commerce's Agreement Manager within 30 calendar days after the end of each quarter thereafter until Grantee is instructed that no further reports are needed.

H. FINANCIAL CONSEQUENCES FOR FAILURE TO TIMELY AND SATISFACTORILY PERFORM: Failure to complete all deliverables in accordance with the requirements of this Agreement, and most particularly the deliverables specified above in Section D, Deliverables, will result in Commerce's assessment of the specified financial consequences. If appropriate, should the Parties agree to a corrective action plan, the plan shall specify additional financial consequences to be applied after the effective date of the corrective action plan. This provision for financial consequences shall in no manner affect Commerce's right to terminate the Agreement as provided elsewhere in the Agreement.

- End of Attachment 1 (Scope of Work) -

DocuSign Envelope ID: 32D6DEEA-1861-486B-9261-DAAA52D4AAE3

Attachment 2
AUDIT REQUIREMENTS

The administration of resources awarded by Commerce to the recipient (herein otherwise referred to as "Grantee") may be subject to audits and/or monitoring by Commerce as described in this Attachment 2.

MONITORING. In addition to reviews of audits conducted in accordance with 2 CFR 200, Subpart F - Audit Requirements, and section 215.97, Florida Statutes (F.S.), as revised (see AUDITS below), monitoring procedures may include, but not be limited to, on-site visits by Commerce staff, limited scope audits as defined by 2 CFR §200.425, or other procedures. By entering into this agreement, the recipient agrees to comply and cooperate with any monitoring procedures or processes deemed appropriate by Commerce. In the event the Commerce determines that a limited scope audit of the recipient is appropriate, the recipient agrees to comply with any additional instructions provided by Commerce staff to the recipient regarding such audit. The recipient further agrees to comply and cooperate with any inspections, reviews, investigations, or audits deemed necessary by the Chief Financial Officer (CFO) or Auditor General.

AUDITS.

PART I: FEDERALLY FUNDED. This part is applicable if the recipient is a state or local government, or a nonprofit organization as defined in 2 CFR §200.1.

1. A recipient that expends $750,000 or more in federal awards in its fiscal year must have a single or program-specific audit conducted in accordance with the provisions of 2 CFR 200, Subpart F - Audit Requirements. EXHIBIT 1 to this form lists the federal resources awarded through Commerce by this agreement. In determining the federal awards expended in its fiscal year, the recipient shall consider all sources of federal awards, including federal resources received from Commerce. The determination of amounts of federal awards expended should be in accordance with the guidelines established in 2 CFR §§200.502-503. An audit of the recipient conducted by the Auditor General in accordance with the provisions of 2 CFR §200.514 will meet the requirements of this Part.
2. For the audit requirements addressed in Part I, paragraph 1, the recipient shall fulfill the requirements relative to auditee responsibilities as provided in 2 CFR §§200.508-512.
3. A recipient that expends less than $750,000 in federal awards in its fiscal year is not required to have an audit conducted in accordance with the provisions of 2 CFR 200, Subpart F - Audit Requirements. If the recipient expends less than $750,000 in federal awards in its fiscal year and elects to have an audit conducted in accordance with the provisions of 2 CFR 200, Subpart F - Audit Requirements, the cost of the audit must be paid from non-federal resources (i.e., the cost of such an audit must be paid from recipient resources obtained from other than federal entities).

PART II: STATE FUNDED. This part is applicable if the recipient is a nonstate entity as defined by Section 215.97(2), Florida Statutes.

1. In the event that the recipient expends a total amount of state financial assistance equal to or in excess of $750,000 in any fiscal year of such recipient (for fiscal years ending June 30, 2017, and thereafter), the recipient must have a state single or project-specific audit for such fiscal year in accordance with section 215.97, F.S.; Rule Chapter 69I-5, F.A.C., State Financial Assistance; and Chapters 10.550 (local governmental entities) and 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General. EXHIBIT 1 to this form lists the state financial assistance awarded through Commerce by this agreement. In determining the state financial assistance expended in its fiscal year, the recipient shall consider all sources of state financial assistance, including state financial assistance received from Commerce, other state agencies, and other nonstate entities. State financial assistance does not include federal direct or pass-through awards and resources received by a nonstate entity for federal program matching requirements.

DocuSign Envelope ID: 32D6DEEA-1861-486B-9261-DAAA52D4AAE3

2. For the audit requirements addressed in Part II, paragraph 1, the recipient shall ensure that the audit complies with the requirements of section 215.97(8), F.S. This includes submission of a financial reporting package as defined by section 215.97(2), F.S., and Chapters 10.550 (local governmental entities) and 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General.
3. If the recipient expends less than $750,000 in state financial assistance in its fiscal year (for fiscal years ending June 30, 2017, and thereafter), an audit conducted in accordance with the provisions of section 215.97, F.S., is not required. If the recipient expends less than $750,000 in state financial assistance in its fiscal year and elects to have an audit conducted in accordance with the provisions of section 215.97, F.S., the cost of the audit must be paid from the nonstate entity's resources (i.e., the cost of such an audit must be paid from the recipient's resources obtained from other than state entities).

PART III: OTHER AUDIT REQUIREMENTS.

(NOTE: This part would be used to specify any additional audit requirements imposed by the State awarding entity that are solely a matter of that State awarding entity's policy (i.e., the audit is not required by Federal or State laws and is not in conflict with other Federal or State audit requirements). Pursuant to Section 215.97(8), Florida Statutes, State agencies may conduct or arrange for audits of state financial assistance that are in addition to audits conducted in accordance with Section 215.97, Florida Statutes. In such an event, the State awarding agency must arrange for funding the full cost of such additional audits.)

N/A

PART IV: REPORT SUBMISSION.

1. Copies of reporting packages for audits conducted in accordance with 2 CFR 200, Subpart F - Audit Requirements, and required by Part I of this form shall be submitted, when required by 2 CFR§200.512, by or on behalf of the recipient directly to the Federal Audit Clearinghouse (FAC) as provided in 2 CFR §200.1 and §200.512. The FAC's website provides a data entry system and required forms for submitting the single audit reporting package. Updates to the location of the FAC and data entry system may be found at the OMB website.
2. Copies of financial reporting packages required by Part II of this form shall be submitted by or on behalf of the recipient directly to each of the following:

   a. Commerce at each of the following addresses:

   Electronic copies (preferred):
   Audit@commerce.fl.gov

   or

   Paper (hard copy):
   Department of Commerce
   MSC # 75, Caldwell Building
   107 East Madison Street
   Tallahassee, FL 32399-4126

   b. The Auditor General's Office at the following address:

   Auditor General
   Local Government Audits/342
   Claude Pepper Building, Room 401
   111 West Madison Street
   Tallahassee, Florida 32399-1450

   The Auditor General's website (https://flauditor.gov/) provides instructions for filing an electronic copy of a financial reporting package.

3. Copies of reports or the management letter required by Part III of this form shall be submitted by or on

DocuSign Envelope ID: 32D6DEEA-1861-486B-9261-DAAA52D4AAE3

behalf of the recipient directly to:

Electronic copies (preferred): Audit@commerce.fl.gov	or	Paper (hard copy): Department of Commerce MSC # 75, Caldwell Building 107 East Madison Street Tallahassee, FL. 32399-4126

4. Any reports, management letters, or other information required to be submitted Commerce pursuant to this agreement shall be submitted timely in accordance with 2 CFR §200.512, section 215.97, F.S., and Chapters 10.550 (local governmental entities) and 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General, as applicable.
5. Recipients, when submitting financial reporting packages to Commerce for audits done in accordance with 2 CFR 200, Subpart F - Audit Requirements, or Chapters 10.550 (local governmental entities) and 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General, should indicate the date that the reporting package was delivered to the recipient in correspondence accompanying the reporting package.

PART V: RECORD RETENTION. The recipient shall retain sufficient records demonstrating its compliance with the terms of this Agreement for a period of five (5) years from the date the audit report is issued, or five (5) state fiscal years after all reporting requirements are satisfied and final payments have been received, whichever period is longer, and shall allow Commerce, or its designee, CFO, or Auditor General access to such records upon request. The recipient shall ensure that audit working papers are made available to Commerce, or its designee, CFO, or Auditor General upon request for a period of five (5) years from the date the audit report is issued, unless extended in writing by Commerce. In addition, if any litigation, claim, negotiation, audit, or other action involving the records has been started prior to the expiration of the controlling period as identified above, the records shall be retained until completion of the action and resolution of all issues which arise from it, or until the end of the controlling period as identified above, whichever is longer.

AUDIT COMPLIANCE CERTIFICATION

Grantee Name: _____
FEIN: _____
Grantee's Fiscal Year: _____
Contact Person Name and Phone Number: _____
Contact Person Email Address: _____

1. Did Grantee expend state financial assistance, during its fiscal year, that it received under any agreement (e.g., agreement, grant, memorandum of agreement, memorandum of understanding, economic incentive award agreement, etc.) between Grantee and the Department of Commerce (Commerce)? ____ Yes ____ No

If the above answer is yes, also answer the following before proceeding to item 2:

Did Grantee expend $750,000 or more of state financial assistance (from Commerce and all other sources of state financial assistance combined) during its fiscal year? ____ Yes ____ No

If yes, Grantee certifies that it will timely comply with all applicable state single or project-specific audit requirements of s. 215.97, Florida Statutes, and the applicable rules of the Department of Financial Services and the Auditor General.

2. Did Grantee expend federal awards, during its fiscal year that it received under any agreement (e.g., agreement, grant, memorandum of agreement, memorandum of understanding, economic incentive award agreement, etc.) between Grantee and Commerce? ____ Yes ____ No

If the above answer is yes, also answer the following before proceeding to execution of this certification:

Did Grantee expend $750,000 or more in federal awards (from Commerce and all other sources of federal awards combined) during its fiscal year? ____ Yes ____ No

If yes, Grantee certifies that it will timely comply with all applicable single or program-specific audit requirements of 2 CFR Part 200, Subpart F, as revised.

By signing below, I certify, on behalf of Grantee, that the above representations for items 1 and 2 are true and correct.

AGENDA ITEM

April 16, 2024 - City Commission

Number: 7.C

Section:	CONSENT AGENDA		
Item Category:	Consent - Resolution	**Res./Ord. No:**	2024-58
Strategic Goal:	Quality of Life - Other		
Department:	Leisure Services		
Subject:	Amendment to the City's existing contract with Yellowstone Landscape		

Summary:

This is a request to approve an amendment to the City's existing contract with Yellowstone Landscape in the amount of $14,237 for additional services to the grounds maintenance contract.

Staff works closely with the contractor, Yellowstone Landscape, to ensure the City receives the best grounds maintenance services at the best possible price. The contract stipulates additional costs will be in accordance with the executed contract's unit costs or as otherwise negotiated by City staff for additional site maintenance, not presently included within the contract. Staff conducted due diligence between past and current sites to assure that the City is receiving full value.Listed below are the services to be added onto the existing contract.

Current Contract Amount	**$1,925,991.30**
NEW SERVICES AREAS	
A1A medians (newly developed safety medians)- 39 services for (9) new medians	
($291/month)	$3,492
Doug Thomas Way extension- 29 services for new roadway extension	
($665/month)	$7,980
Pineland Trail sidewalk- 3 services for new sidewalk	
($80/month)	$960

	<table><tr><td>**2329 Bonnie View Dr. north side fence line maintenance- 11 services and 1 shrub trimming**</td><td></td></tr><tr><td>($150.42/month)</td><td>$1,805</td></tr><tr><td>**GRAND TOTAL OF CONTRACT AMENDMENT**</td><td>**$14,237**</td></tr><tr><td></td><td></td></tr><tr><td>**TOTAL ADJUSTED CONTRACT PRICE**</td><td>**$1,940,228.30**</td></tr></table>
Financial Impact:	The requested amendment will result in an adjustment of $14,237 for a full contract price of $1,940,228.30. Funding for these services is shared by Fund 001 - General Fund, Fund 401 - Water/Wastewater Fund, Fund 104 - Community Redevelopment Fund, Fund 108 - Airport Fund, and Fund 460 - Solid Waste Fund. Sufficient funding is available to approve the requested amendment.
Citizen Impact:	Residents, businesses, and visitors benefit by the City providing attractive, safe, functional City property and parks for all to enjoy.
Recommended Action (Staff, Advisory Board and/or Other):	Staff recommends the City Commission approve the $14,237 amendment to the Yellowstone Landscape contract.

RESOLUTION NO. 2024-58

A RESOLUTION AUTHORIZING THE EXECUTION OF AMENDMENT #1-2024 TO THAT CONTRACT AWARDED TO AUSTIN OUTDOOR, LLC d/b/a YELLOWSTONE LANDSCAPE REGARDING GROUNDS MAINTENANCE SERVICES, BY INCREASING THE CONTRACT PRICE BY $14,237.00; AND SETTING FORTH AN EFFECTIVE DATE.

BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:

SECTION ONE. The Mayor and the City Manager are hereby authorized and directed to execute Amendment to Contract #1-2024 to that Contract between the City and Austin Outdoor, LLC d/b/a Yellowstone Landscape, as authorized by Resolution No. 2012-89, to account for additional service areas not listed within the original contract. The said Amendment, a copy of which is attached hereto and incorporated herein by reference, increases the Contract Price by $14,237.00.

SECTION TWO. This Resolution shall take effect immediately upon its adoption.

APPROVED AND AUTHENTICATED this 16th day of April, 2024.

Creating premier properties. Building lasting relationships

Justifications for Contract Amendment 1-2024

New A1A medians – (9) newly constructed safety crosswalk medians. Providing (39) grounds maintenance services per year. Equal service level with existing A1A medians.

Doug Thomas Way extension – newly constructed roadway completing the loop of Doug Thomas Way. Providing (29) grounds maintenance services per year. Equal service level with existing Doug Thomas Way areas.

New Pineland Trail sidewalk – newly constructed sidewalks along the southern portion of Pineland Trial. Proving (3) grounds maintenance services per year. Adequate services level to keep sidewalk free and clear of debris & plant growth. Similar service level compared to the West 40 sidewalk maintenance.

2329 Bonnie View Dr. lot – mowing and brush trimming along northern fence line with residential property. Providing (11) grounds maintenance services per year, plus a (1) time per year heavy trimming of shrub/tree growth to maintain a 5' ft buffer.
Utility Managers comments – "This property is the former site of a potable water tower that was removed from service and taken down many years ago. In the past, Utility crews would periodically go to the address and perform yard maintenance when staff was available. Unfortunately, with Utilities Staff increased workload, staff has been unable to perform this maintenance for the last few years. This has resulted in the property taking on an unkempt appearance. In the interests of being a good neighbor, it is believed that a professional touch in the landscaping maintenance is the best option. In talking with the property owner next door, she is concerned that the growth is going to damage her fence. She also mentioned that the area is sometimes used by the homeless."

AGENDA ITEM

April 16, 2024 - City Commission

Number: 7.D

Section:	CONSENT AGENDA		
Item Category:	Consent - Disposition Item	**Res./Ord. No:**	
Strategic Goal:	Public Safety - Other		
Department:	Public Works		
Subject:	Construction & Demolition Franchise Renewal for Hubbard Construction Company dba Mid Florida Materials		
Summary:	On March 11, 2024, Hubbard Construction Company dba Mid Florida Materials (Hubbard), submitted a construction and demolition roll-off services franchise agreement renewal application, affidavit of acknowledgment of business type, and a nonrefundable renewal fee of $1,500. Hubbard's existing franchise will expire on April 18, 2024. Hubbard acknowledges the per-pull charge of $48.95 to be remitted by the tenth day of the month accompanied by appropriate documentation. Hubbard offers 10-, 20-, 30-, and 40-yard roll containers. The principal owners have extensive background in the recycling and solid waste industry and staff expects a high level of customer satisfaction.		
Financial Impact:	Revenues from this nonexclusive franchise agreement will be $5,000 from the receipt of the annual franchise fee, $1,500 from the renewal fee, and approximately $2,500 from pull charges, which will be applied to fund 460 - Solid Waste Fund.		
Citizen Impact:	The franchising of waste haulers ensures that these businesses operate within the requirements of the City. Having multiple authorized haulers provides a varied selection from which to choose.		
Recommended Action (Staff, Advisory Board and/or Other):	Staff intends to renew the non-exclusive franchise agreement for collection and disposal of construction and demolition debris to Hubbard Construction Company dba Mid Florida Materials from April 18, 2024 to April 18, 2025.

To the applicant: The following information checklist is provided to assist you in preparing your application for a non-exclusive franchise to provide containers for construction and demolition debris collection and disposal services to properties located in the City of Ormond Beach. Please provide the required information identified in this checklist as an attachment to the franchise application.

Franchise Application Requirements
And Requirement Checklist

PFO ☑ 1. Name(s) and business address(es) of principal officers and stockholders and other persons having financial or controlling interest in any partnership or corporation;

PFO ☑ 2. Names(s) and business address(es) of local managing officers of any publicly owned corporation having more than 25 shareholders;

PFO ☑ 3. Proof that corporation is in good standing in the State, and if not a Florida corporation, proof that applicant is qualified to do business in the State of Florida;

☐ 4. If applicant is other than a corporation, and is operating under a fictitious name, applicant shall be required to submit information that such fictitious name is registered and held by applicant;

PFO ☑ 5. List of type, number, and complete description of all equipment to be used by applicant for providing safe and efficient services;

PFO ☑ 6. Description or listing of the applicant's and its related entity's experience in the collection of construction and demolition debris;

PFO ☑ 7. List of all franchises awarded to the applicant and the status of those franchises;

City of Ormond Beach
Public Works Department
Construction & Demolition Roll-Off Services Franchise Application

NA ☐ 8. List of all franchises applied for which were not granted during the previous five-year period;

PFD ☑ 9. Written response to selection criteria as follows:

1. The public need for the proposed franchise or franchise transfer
2. The financial ability of the applicant to perform
3. Such other matters or information regarding the applicant or proposed franchise that the City Commission may determine relevant in its legislative discretion;

PFD ☑ 10. Applicant shall maintain in full force and effect the insurance coverages required by Exhibit "A" of City of Ormond Beach Resolution No. 2021-144 and any subsequent amendments thereto. Commercial General Liability coverage shall be $1 million each occurrence, $1 million aggregate products and completed operations and $50,000 fire damage (any one fire).

NA ☐ 11. An applicant for an initial franchise, or a material modification of an existing franchise, or a transfer of a franchise shall file the original and ten (10) copied of the application with the City Clerk, or his or her designee. Any transfer of more then twenty-five (25) percent of the ownership of the franchisee shall be deemed to be a "transfer of a franchise."

PFD ☑ 12. Contemporaneously with the filing of an application for an initial franchise, the applicant shall remit to the City a nonrefundable application fee in the amount of two thousand five hundred dollars ($2,500.00); and contemporaneously with the filing of an application for a material modification of an existing franchise, or a transfer of a franchise, the applicant shall remit to the City, unless otherwise prohibited by law or waived by the City, a nonrefundable application fee in the amount of one thousand five hundred dollars ($1,500.00). "Material modification" shall mean a change in any term or condition that substantially or materially affects any right or obligation of the franchisee or City under a franchise.

PFD ☑ 13. Within ten (10) business days after the filing of an application, the applicant shall furnish a complete copy of the application to all other collectors of construction and demolition debris that have franchises in the City. The copy shall be furnished by personal delivery or sent by certified mail, return receipt requested, to the principal business office of such other collectors of construction and demolition debris.

Definitions:

1. Applicant: a person or corporation applying to the City of Ormond Beach for a non-exclusive franchise to provide construction and demolition roll-off containers and/or collect construction and demolition debris within the City for hire, remuneration or other consideration.

2. Franchisee: person or corporation to whom the City has issued a non-exclusive franchise to provide roll-off containers for construction and demolition services and/or to provide construction and demolition debris collection and disposal services to properties in the City.

Monthly Financial Status Report
February 2024

This report provides the City Commission with an update of the financial status of the City's operating funds. The purpose of the report is to identify any significant variances from the adopted budget and to identify any adverse trends and their implications for the current and future years' budgets.

The first table following this introduction provides a summary of the revenues and expenditures to date by fund. Additional detail by fund type is provided in subsequent tables.

Revenues at or above 42% benchmark is favorable, while expenses at or below the 42% benchmark is also favorable.

The airport fund has revenue and expense impacts from FAA grants.
The Impact Fee funds experienced an increase in revenue due to new subdivision (Ridge Haven).

General Fund Revenues

Ad valorem Taxes- Annual revenue is estimated at $16 million and is based on the taxable value ($4.6 billion) and the General Fund operating millage (3.761). Actuals to date are $14 million of the budgeted amount.

Utility Taxes- The City levies a utility tax of 10% on electric and gas sales. To date, the City has collected $1.86 million

Communication Taxes – Communication service taxes collected as of February 2024 are $467,253.

Business Tax –Business tax collections amounted to $42,814. The majority of business taxes are collected in the last quarter of the fiscal year.

Licenses, Permits and Franchise Fees – This revenue source includes building permits, plan review and franchise fees. The City has franchise fee agreements which require electric and natural gas providers to remit 6% of gross sales to the City. Payments made to the City for franchise fees often occur several months after they are collected by FPL and other providers. Collections through February 2024 are $1.6 million.

Intergovernmental – This revenue source includes municipal revenue sharing and sales tax. Through February 2024, the City received a total of $1.7 million in this category. This category was impacted by the COVID Pandemic in previous years.

Charges for Services – This category includes Leisure Services user charges and additional revenue from contracts for right of way mowing, traffic signal maintenance, and street lighting. The Volusia County Library is no longer charged as it has been in previous years in this category. The City received $508,000 in this category through February.

Fines and Forfeitures – Traffic, code enforcement, and court fines make up this revenue category. Revenues were $19,470 as of February 2024.

Miscellaneous Revenue – Interest and internal service charges for Fleet and Engineering are included in this revenue category. Revenues collected were $874,000

Transfers In –Transfers have been recorded in the amount of $2.4 million.

General Fund Revenues - February 2024

Economic Development Monthly Report

March, 2024

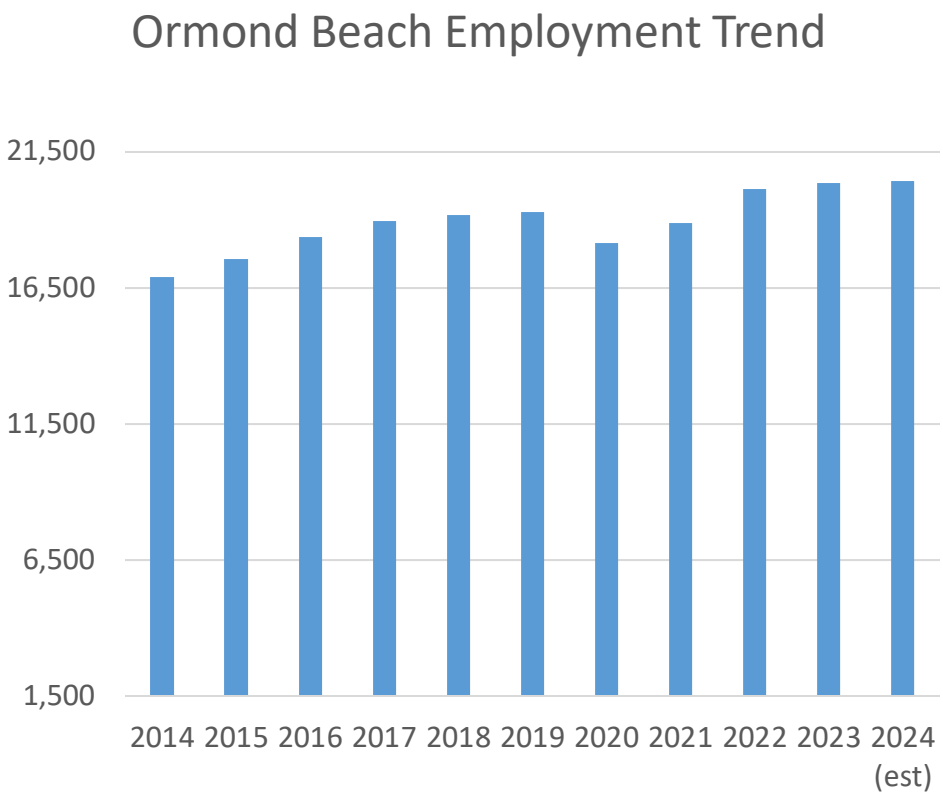
Ormond Beach February Employment

20,434

This is up 1.9% from last year

Ormond Beach Unemployment Rate

3.4%



Notes and Updates:

- **Employment for February** was 20,434 up 1.6% from the same month last year. The unemployment rate is 3.4%. After three years of robust year-over-year improvement in employment, 2023 saw an uptick of 1.75% over the previous year, a possible signal the job market is beginning to cool off. Since January 2024 employment was up 58.

- **The Economic Development Department concluded** the Spring 2024 StartUp and Grow Ormond FastTrac program. 12 local businesses graduated and participated in a graduation celebration where they pitched their businesses and received a certificate of completion. Coordination is underway for a second session in the near future.

- **The City Commission recently** approved the acceptance of a $1.6 million Florida Jobs Growth Grant Fund from Florida Commerce. These funds will allow for the construction of Business Park Drive in the Business Park, providing for a secondary collector road allowing for improved logistics and growth by businesses in the park. The Airport Business Park is the City's major employment center for target industry like advanced manufacturing. Construction is estimated to begin in late Spring 2024.

- **Doing Business in Ormond Beach** is updated with new content and available for download on the City's website. Hard copies are available in the Economic Development Department. The perfect guide for any business starting or growing a business in Ormond Beach. Doing Business Here | City of Ormond Beach, FL - Official Website

Board of Adjustment and Appeals - April 6, 2024		
PZ-2024-023	88 Wye Drive	This is an application from William Lenssen, Sarsum Recta Const., LLC., agent on behalf of the property owner of 88 Wye Drive. The subject property is zoned as R-3, (Single-Family Medium Density). The applicant is requesting a side yard variance to allow construction of a 4' wide sidewalk on the south side of the single-family residence. Section 2-50(y)(1) of the Land Development Code requires that no patio, deck or sidewalk shall be closer than five (5) feet to the side interior property line. A variance of 4 feet to the required interior side yard setback of 5 feet is requested for a final interior side yard setback of 1 foot in order to construct a 4' wide sidewalk on the south side of the single-family residence.

Planning public hearing items

Planning Board - April 11, 2024		
PZ-23-077	Water Supply Work Plan, Comprehensive Plan amendment	This is an administrative request to amend the Comprehensive Plan related to the Water Supply Work Plan, including text amendments to the (1) Utilities Element, (2) Conservation Element, (3) Capital Improvements Element and adoption of the Water Supply Plan as Appendix A to the Utilities Element.
PZ-24-010	Fountain View, Phase 1B, Final Plat	This is an application submitted from Plantation Oaks of Ormond Beach, LLC, for a final plat for a 137-lot single-family subdivision on approximately 63.22 acres. The Fountain View, Phase 1B subdivision, part of Phase 1 of the Plantation Oaks Planned Residential Development, located on the west side of Plantation Oaks Boulevard. The subdivision land area is part of an overall parcel at 1700 Plantation Oaks Boulevard.
SPRC-24-016	Fountain View, Phase 1D, Preliminary Plat	This is an application submitted from Plantation Oaks of Ormond Beach, LLC, for a preliminary plat for 103 single-family lots on 62.14 acres. The Fountain View, Phase 1D subdivision, part of Phase 1 of the Plantation Oaks Planned Residential Development, located on the west side of Plantation Oaks Boulevard. The subdivision land area is part of an overall parcel at 1700 Plantation Oaks Boulevard.
SPRC-24-017	Fountain View, Phase 1E, Preliminary Plat	This is an application submitted from Plantation Oaks of Ormond Beach, LLC, for a preliminary plat for 110 single-family lots on 36.19 acres. The Fountain View, Phase 1E subdivision, part of Phase 1 of the Plantation Oaks Planned Residential Development, located on the west side of Plantation Oaks Boulevard. The subdivision land area is part of an overall parcel at 1700 Plantation Oaks Boulevard.
SPRC-24-018	Fountain View, Phase 1F, Preliminary Plat	This is an application submitted from Plantation Oaks of Ormond Beach, LLC, for a preliminary plat for 97 single-family lots on 32.13 acres. The Fountain View, Phase 1F subdivision, is part of Phase 1 of the Plantation Oaks Planned Residential Development, located on the west side of Plantation Oaks Boulevard. The subdivision land area is part of an overall parcel at 1700 Plantation Oaks Boulevard.
PZ-24-024	1628 West Granada Boulevard, Special Exception for Electronic Changeable Copy Signage	This is an application submitted from Aluminum Plus, on behalf of the property owner, Monica Investment Group, Inc., for a Special Exception to allow for one (1) electronic changeable copy sign for retail prices of gasoline at the Shell Convenience store located at 1628 West Granada Boulevard.
PZ-24-038	Interlocal Service Boundary Agreement (ISBA) renewal	This is an administrative request to renew the North U.S. 1 Interlocal Service Boundary Agreement (ISBA). The North U.S. 1 Interlocal Service Boundary Agreement was adopted in 2014, amended in 2019 (Plantation Oaks – first amendment), and 2021/2022 (RidgeHaven – second amendment). The administrative request seeks a ten (10)-year renewal and does not amend any other portions of the North U.S. 1 Interlocal Service Boundary Agreement.
PZ-24-040	Land Development Code Amendment, Stout-MacDonald House name change to Local Landmark List	An administrative request to amend the Land Development Code (LDC), Chapter 2, District and General Regulations, Article VI, Overlay Districts, Section 2-71, Historic districts and landmarks, subsection (k), Ormond Beach Historic Landmark List, number (31) to amend the name of the historic landmark at 38 East Granada Boulevard from the MacDonald House to the Stout-MacDonald House.
PZ-24-039	Capital Improvements Element	This is an administrative amendment to update the Capital Improvements Schedule of the Capital Improvements Element of the City of Ormond Beach Comprehensive Plan consistent with the adopted Capital Improvement Plan in accordance with State law. This update does not include any text changes to the goals, objectives and policies of the Capital Improvements Element.
PZ-24-004	Zoning Districts Review	An administrative action to review the Ormond Beach zoning districts, including the uses of the B-1, B-2, B-4, B-5, and B-6 zoning districts, definition of uses and conditional & special exception criteria. Any recommended changes would require a separate action as a Land Development Code amendment
The Planning Board agenda is available at: https://www.ormondbeach.org/224/Planning-Board. For additional information, please contact the Planning Department via e-mail at comdev@ormondbeach.org or by telephone at (386) 676-3238.

City of Ormond Beach
AGENDA ITEM

April 16, 2024 - City Commission

Number: 8.A

Section:	PUBLIC HEARINGS		
Item Category:	Public Hearing - Ordinances	**Res./Ord. No:**	2024-2
Strategic Goal:	Quality of Life - Other		
Department:	Planning & Building		
Subject:	Woodsprings Suites, Comprehensive Plan Land Use Map Amendment		
Summary:	This is a request submitted by Ridge Land Holdings, LLC, and RCM Properties, LLC, property owners, for a Small-Scale Comprehensive Plan Land Use Map amendment for approximately 1.33 acres located at Benton Street and Atlantic Road, Volusia County Parcel Identification Numbers (3136-01-34-0220, 3136-01-01-0022, and 3136-01-34-0140) from "Medium Density Residential" to "Low Intensity Commercial." The property is within the North U.S. Highway 1 Interlocal Service Boundary Agreement (ISBA) area that contains land use conditions of a maximum of 8 units per acre and a maximum Floor Area Ratio that shall not exceed 0.50 for Retail and 0.55 for all other Nonresidential uses. The subject property is a total of 2.66 acres with a split land use of "Low Intensity Commercial" for 1.33 acres and "Medium Density Residential" for 1.33 acres. The purpose of the Comprehensive Plan Small Scale Land Use Map amendment is to amend the 1.33 acres of "Medium Density Residential" to "Low Intensity Commercial." There has been a conceptual site plan submittal for a four-story hotel of 51,945 square feet with 122 rooms. Based upon the existing split land use and zoning, both this Comprehensive Plan Small Scale Land Use Map amendment and a zoning map amendment would be required. There are also unused alleyways that will require a separate application for right-of-way vacations. The Planning Board reviewed the amendment at the March 14, 2024 meeting and recommended approval by a 6-0 vote. There were no individuals who spoke for or against the Small-Scale Comprehensive Plan Land Use Map amendment.		
Financial Impact:	There is no financial impact as the result of this Small-Scale Comprehensive Plan Land Use Map amendment.		

Citizen Impact:	No citizen impact is expected as the result of this request. The area immediately behind the North U.S. corridor is a transition area where a hotel would be an appropriate use.
Recommended Action (Staff, Advisory Board and/or Other):	The Planning Board recommended **APPROVAL** of the Small-Scale Comprehensive Plan Land Use Map amendment for approximately 1.33 acres located at Benton Street and Atlantic Road, Volusia County Parcel Identification Numbers (3136-01-34-0220, 3136-01-01-0022, and 3136-0134-0140) from "Medium Density Residential" to "Low Intensity Commercial."

ORDINANCE NO. 2024-02

AN ORDINANCE AMENDING THE FUTURE LAND USE ELEMENT OF THE COMPREHENSIVE PLAN OF THE CITY OF ORMOND BEACH BY AMENDING THE FUTURE LAND USE MAP TO CHANGE THE DESIGNATION OF 1.33± ACRES, LOCATED ALONG BENTON STREET, NORTH OF ATLANTIC ROAD (VOLUSIA COUNTY PARCEL NUMBERS 3136-01-34-0220 AND 3136-01-01-0022) FROM 'MEDIUM DENSITY RESIDENTIAL" TO "LOW INTENSITY COMMERCIAL"; PROVIDING FOR CONFLICT; AUTHORIZING TRANSMITTAL; AND SETTING FORTH AN EFFECTIVE DATE.

WHEREAS, Ridge Land Holdings, LLC, a Florida Limited Liability Company, and RCM Properties, L.L.C., a Florida Limited Liability Company ("Applicants/Property Owners") are the fee simple owners of certain real property consisting of approximately 2.66 acres located along Benton Street, north of Atlantic Road (Volusia County parcel numbers: 3136-01-34-0220, 3136-01-01-0022, and 3136-01-34-0140), which is legally described and depicted in Exhibit "A" ("Property") attached hereto and incorporated herein, and

WHEREAS, the Property has a split Future Land Use Map designation of "Low Intensity Commercial" for 1.33 acres (Volusia County parcel number: 3136-01-34-0140) and "Medium Density Residential" for 1.33 acres (Volusia County parcel numbers: 3136-01-34-0220 and 3136-01-01-0022), and

WHEREAS, the Applicants/Property Owners have submitted an application to amend the City's Comprehensive Land Use Plan *("Comprehensive Plan"*) by changing the Future Land Use Map designation for a portion of the Property described and depicted in Exhibit "A",

from “Medium Density Residential” to “Low Intensity Commercial” for approximately 1.33 acres, as depicted in Exhibit “B” attached hereto and incorporated herein, and

WHEREAS, the Property is located within the Interlocal Service Boundary Agreement (ISBA) area and Policy 9.1.4. of the Future Land Use Element of the *Comprehensive Plan* states within the “Low Intensity Commercial” land use category that the density shall not exceed 8 dwelling units per acre and the maximum FAR shall not exceed 0.50 for retail and 0.55 for all other nonresidential uses, and

WHEREAS, the City Commission has approved Ordinance No. 90-36, as subsequently amended, adopting a *Comprehensive Plan* in accordance with Part II, Chapter 163, *Florida Statutes*, and

WHEREAS, the proposed *Comprehensive Plan* amendment involves a use of fifty (50) acres or less, and

WHEREAS, the proposed *Comprehensive Plan* amendment does not involve a text change to the goals, policies, and objectives of the City's *Comprehensive Plan*, but only proposes a land use change to the Future Land Use Map for small scale development activity, and

WHEREAS, the proposed *Comprehensive Plan* amendment is not located within an area of critical state concern, and

WHEREAS, the Planning Board, as the City’s local planning agency, duly held a public hearing, with due public notice, and recommends approval of the proposed *Comprehensive Plan* amendment, and

WHEREAS, the City Commission has conducted public hearings on the proposed *Comprehensive Plan* amendment, as described in §163.3184(11), *Florida Statutes*, and

WHEREAS, the City Commission finds that approval of the proposed *Comprehensive Plan* amendment will preserve the internal consistency of the City's *Comprehensive Plan* pursuant to §163.3177, *Florida Statutes*, and

WHEREAS, the proposed *Comprehensive Plan* amendment shall be submitted to the Volusia Growth Management Commission for a determination of consistency in accordance with Section 202.3 of the Charter of Volusia County, Florida, now therefore,

BE IT ENACTED BY THE PEOPLE OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:

SECTION ONE. The foregoing recitals are incorporated herein by reference as the legislative findings of the Ormond Beach City Commission.

SECTION TWO. The Future Land Use designation of that portion of real property totaling 1.33± acres, located along Benton Street, north of Atlantic Road (Volusia County parcel numbers: 3136-01-34-0220, and 3136-01-01-0022), as legally described and depicted in Exhibit "A" and the Future Land Use Map of the City of Ormond Beach *Comprehensive Plan* attached hereto, is hereby changed from "Medium Density Residential" to "Low Intensity Commercial" for approximately 1.33 acres, as described and depicted in Exhibit "B".

SECTION THREE. Policy 9.1.4. of the Future Land Use Element of the Comprehensive Plan regarding the Interlocal Service Boundary Agreement (ISBA) area is applicable to the Property and states within the "Low Intensity Commercial" land use category

that the density shall not exceed 8 dwelling units per acre and the maximum FAR shall not exceed 0.50 for retail and 0.55 for all other nonresidential uses.

SECTION FOUR. In order to make the City of Ormond Beach *Comprehensive Plan*, as hereby amended, available to the public, a certified copy of the enacting Ordinance, as well as certified copies of the City of Ormond Beach *Comprehensive Plan* and the amendments thereto, shall be located in the Planning Department of the City of Ormond Beach. The Planning Director shall also make copies available to the public for a reasonable reproduction charge.

SECTION FIVE. The Planning Director is hereby authorized and directed to transmit copies of this Ordinance, and the public hearing notice within ten (10) business days of the date of approval hereof, to the Volusia County Growth Management Commission in accordance with Section 202.3 of the Charter of Volusia County, Florida; and to the Florida Department of Economic Opportunity, and to any other person or entity requesting a copy.

SECTION SIX. All Ordinances or parts of Ordinances in conflict herewith are hereby repealed to the extent of such conflict.

SECTION SEVEN. Pursuant to §163.3187(5)(c), *Florida Statutes*, the effective date of this *Comprehensive Plan* amendment shall be 31 days after the adoption of this ordinance (June 7, 2024); provided, however, that if challenged within 30 days after adoption (June 6, 2024), this *Comprehensive Plan* amendment shall not become effective until the Department of Economic Opportunity or the Administration Commission, if applicable, issues a final order determining that the adopted small scale development amendment is in compliance with the Local Government Comprehensive Planning and Land Development Regulation Act; and pursuant to Section 202.3

of the Charter of Volusia County, Florida will become final upon a certification of consistency from the Volusia Growth Management Commission.

PASSED UPON at the first reading of the City Commission, this 16th day of April, 2024.

PASSED UPON at the second and final reading of the City Commission, this 7th day of May, 2024.

STAFF REPORT
Woodsprings Suites, Comprehensive Plan Amendment – Land Use Map
Project Number: PZ-2025-015

PLANNING BOARD DATE:	March 14, 2024
TENTATIVE CITY COMMISSION DATE:	April 16, 2024 (first reading), May 7, 2024 (second reading)
APPLICANT:	Ridge Land Holdings, LLC and RCM Properties, LLC, property owners
LOCATION:	Benton Street and Atlantic Road, Volusia County Parcel Identification Numbers (3136-01-34-0220, 3136-01-01-0022, and 3136-0134-0140)
REQUEST:	Small-Scale Comprehensive Plan Land Use Map amendment for an approximately 1.33 acres from "Medium Density Residential" to "Low Intensity Commercial". The property is within the North U.S. 1 Interlocal Service Boundary Agreement (ISBA) area
SITE PLAN REVIEW COMMITTEE RECOMMENDATION:	Approval
STAFF CONTACT:	Steven Spraker, AICP, Planning Director
MAP OF PROJECT AREA:	
SECTION 1, INTRODUCTION:

This is a request submitted by Ridge Land Holdings, LLC, and RCM Properties, LLC, property owners, for a Small-Scale Comprehensive Plan Land Use Map amendment for approximately 1.33 acres located at Benton Street and Atlantic Avenue, Volusia County Parcel Identification Numbers (3136-01-34-0220, 3136-01-01-0022, and 3136-0134-0140) from “Medium Density Residential” to “Low Intensity Commercial”. The property is within the North U.S. Highway 1 Interlocal Service Boundary Agreement (ISBA) area that contain land use conditions of a maximum of 8 units per acre and a maximum Floor Area Ratio that shall not exceed 0.50 for Retail and 0.55 for all other Nonresidential uses.

SECTION 2, BACKGROUND:

The subject property is a total of 2.66 acres with a split land use of “Low Intensity Commercial” for 1.33 acres and “Medium Density Residential” for 1.33 acres. The purpose of the Comprehensive Plan Small Scale Land Use Map amendment is to amend the 1.33 acres of “Medium Density Residential” to “Low Intensity Commercial”.

The subject property is within the North U.S. Highway 1 Interlocal Service Boundary Agreement (ISBA). The North U.S. Highway 1 Interlocal Service Boundary Agreement between the City of Ormond Beach and the County of Volusia established a municipal service area designed to:

- Encourage intergovernmental coordination in planning, service delivery, and boundary adjustments;
- Reduce intergovernmental conflicts and litigation between local governments;
- Promotes sensible boundaries that reduce the costs of local governments;
- Avoid duplicating local services;
- Increase political transparency and accountability; and
- Prevent inefficient service delivery and an insufficient tax base to support the delivery of those services.

The City Commission adopted the original North U.S. Highway 1 Interlocal Service Boundary Agreement (ISBA) on August 19, 2014 per Ordinance No. 2014-27. Volusia County Council adopted the Interlocal Service Boundary Agreement on August 21, 2014 by Volusia County Ordinance No. 2014-12. Ordinance 2015-05 established the land use amendments for the ISBA and was adopted on January 20, 2015. As part of the land use map amendment adoption, a map annotation was included that limits density to eight (8) units per acre and a maximum floor area ratio of 0.50 for retail uses and 0.55 for all other non-residential uses. Ordinance 2015-13 established the city zoning designations for properties within the ISBA and was approved on April 7, 2015.

There has been a conceptual site plan submittal for a four-story hotel of 51,945 square feet with 122 rooms. Based upon the existing split land use and zoning, both this Comprehensive Plan Small Scale Land Use Map amendment and a zoning map amendment would be required. There are also unused alleyways that will require a separate application for right-of-way vacations.

Existing Land Use, "Low Intensity Commercial" – 1.33 acres:

The City of Ormond Beach Comprehensive Plan provides the directive text for the existing City land use of "Low Intensity Commercial" that states the following:

> Purpose: A multi-use land use category to depict those areas of the city that are now developed, or appropriate to be developed, for retail, office and professional services, residential, and restaurants consistent with the surrounding uses, transportation facilities and natural resource characteristics of such areas. For projects that propose a mixture of residential and non-residential uses, the minimum FAR should be 0.2.
>
> Density: Maximum 10 units per acre.
>
> Maximum FAR: 0.6

Policy 9.1.4. of the Future Land Use Element of the Comprehensive Plan contains table 4 that provides land use map annotations as follows:

- Low Intensity Commercial (LIC): Density shall not exceed 8 dwelling units per acre. Maximum FAR shall not exceed 0.50 for Retail or 0.55 for all other Nonresidential uses.

Existing Land Use, "Medium Density Residential" – 1.33 acres:

The City of Ormond Beach Comprehensive Plan provides the directive text for the existing City land use of "Medium Density Residential" that states the following:

> Purpose: To allow a variety of highly aesthetic dwelling units, encouraging the establishment of recreation areas and open space and discouraging look-alike rows of dwellings. MDR also allows the development of relatively low-density duplex, townhouse and multi-family projects which emphasize open space and maintain a low profile, thus maximizing the compatibility with single-family areas. Institutional uses may be permitted in accordance with the maximum floor area ratio.
>
> Density: Minimum 5-12 units per acre except in the Downtown Community Redevelopment Area where 5 - 15 units shall be allowed.
>
> Maximum FAR: 0.3

Proposed Land Use, ""Low Intensity Commercial" – 2.66 acres:

The City of Ormond Beach Comprehensive Plan provides the directive text for the existing City land use of "Low Intensity Commercial" that states the following:

> Purpose: A multi-use land use category to depict those areas of the city that are now developed, or appropriate to be developed, for retail, office and professional services, residential, and restaurants consistent with the surrounding uses, transportation facilities and natural resource characteristics of such areas. For projects that propose a mixture of residential and non-residential uses, the minimum FAR should be 0.2.
>
> Density: Maximum 10 units per acre.
>
> Maximum FAR: 0.6

Policy 9.1.4. of the Future Land Use Element of the Comprehensive Plan contains table 4 that provides land use map annotations as follows:

- Low Intensity Commercial (LIC): Density shall not exceed 8 dwelling units per acre. Maximum FAR shall not exceed 0.50 for Retail or 0.55 for all other Nonresidential uses.

Application process: The proposed land use amendment schedule of the subject property is as follows:

EXHIBIT 1: Tentative land use map amendment schedule:

Action	Date
Planning Board	March 14, 2024
City Commission, 1st Reading	April 16, 2024
City Commission, 2nd Reading	May 7, 2023

After City action, the application is required to be submitted to the Volusia County Growth Management Commission (VGMC) to allow review by other Volusia County jurisdictions. The amendment would also be transmitted to the Department of Florida Commerce.

The following public notices have or are required to occur:

EXHIBIT 2: Public Notice:

Public Notice	Date	Notes
Planning Board	On/before February 29, 2024	300' radius
Newspaper advertisement for Planning Board	On/before March 4, 2024	
Abutter letters for City Commission meetings	On/before April 2, 2024	300' radius
Newspaper advertisement for City Commission, 2nd reading	On/before April 26, 2024	

The project information has also been posted on the city website under the Planning Department at: (1) Development Reports, https://www.ormondbeach.org/247/Development-Projects and (2) Public Hearing Advertisements and Notices, https://www.ormondbeach.org/1000/Public-Hearing-Advertisements-and-Notice.

SECTION 3, ANALYSIS:

The application seeks an amendment from a commercial land use designation to a commercial land use designation with the goal of constructing a hotel (transient lodging) use.

Policy 2.5.2. of the Future Land Use Element of the Comprehensive Plan provides the criteria listed below to review land use amendments:

1. Whether the future land use amendment is consistent with the Comprehensive Plan Goals, Objectives and Policies.

The Interlocal Service Boundary Agreement area contains both commercial and industrial areas. The change to a commercial use is consistent with the city's Comprehensive Plan. The amendment is consistent with the goal, objective, and policies of the Future land Use Element as shown below:

GOAL 1. LAND USE DISTRIBUTION

FUTURE DEVELOPMENT AND REDEVELOPMENT ACTIVITIES SHOULD BE DIRECTED IN APPROPRIATE AREAS AS DEPICTED ON THE FUTURE LAND USE MAP TO MEET THE LAND USE NEEDS OF THE ANTICIPATED POPULATION, IN A MANNER CONSISTENT WITH SOUND PLANNING PRINCIPLES, THE GOALS, OBJECTIVES AND POLICIES CONTAINED HEREIN, AND THE DESIRED COMMUNITY CHARACTER.

THE FUTURE LAND USE ELEMENT SHOULD ALLOW LIMITED COMMERCIAL EXPANSION, PROMOTE INDUSTRIAL USE, AND MAINTAIN CURRENT RESIDENTIAL DENSITIES IN THE CORE AREA WHILE ESTABLISHING LOWER DENSITIES IN THE PERIMETER AREAS, FOCUSING REDEVELOPMENT IN THE DOWNTOWN COMMUNITY REDEVELOPMENT AREA, US1, AND SRA1A, AND PROVIDING A CONTINUED HIGH LEVEL OF OPEN SPACE. FUTURE GROWTH SHALL BE TIMED AND LOCATED TO MAXIMIZE EXISTING PUBLIC INFRASTRUCTURE.

2. Whether the proposed plan amendment meets the criteria established in the Florida Statutes.

In accordance with Chapter 163.3187(1), Florida Statutes, any local government Comprehensive Plan amendments directly related to proposed small-scale development activities may be approved without regard to statutory limits on the frequency of consideration of amendments to the local Comprehensive Plan. A small-scale development amendment may be adopted only under the following conditions:

a. The proposed amendment involves a use of 50 acres or fewer.

The subject property is 2.66± acres (less than 50 acres).

b. The proposed amendment does not involve a text change to the goals, policies, and objectives of the local government's Comprehensive Plan, but only proposes a land use change to the future land use map for a site-specific small-scale development activity. However, text changes that relate directly to, and are adopted simultaneously with, the small-scale future land use map amendment shall be permissible under this section.

The proposed amendment is solely for the Future Land Use Map and does not propose any text amendments to the City's Comprehensive Plan.

c. The property that is the subject of the proposed amendment is not located within an area of critical state concern, unless the project subject to the proposed amendment involves the construction of affordable housing units meeting the criteria of s. 420.0004(3), and is located within an area of critical state concern designated by s. 380.0552 or by the Administration Commission pursuant to s. 380.05(1).

This criterion is not applicable as the site location is not located within an area of state critical concern.

3. Whether the land use is an appropriate use of the land.

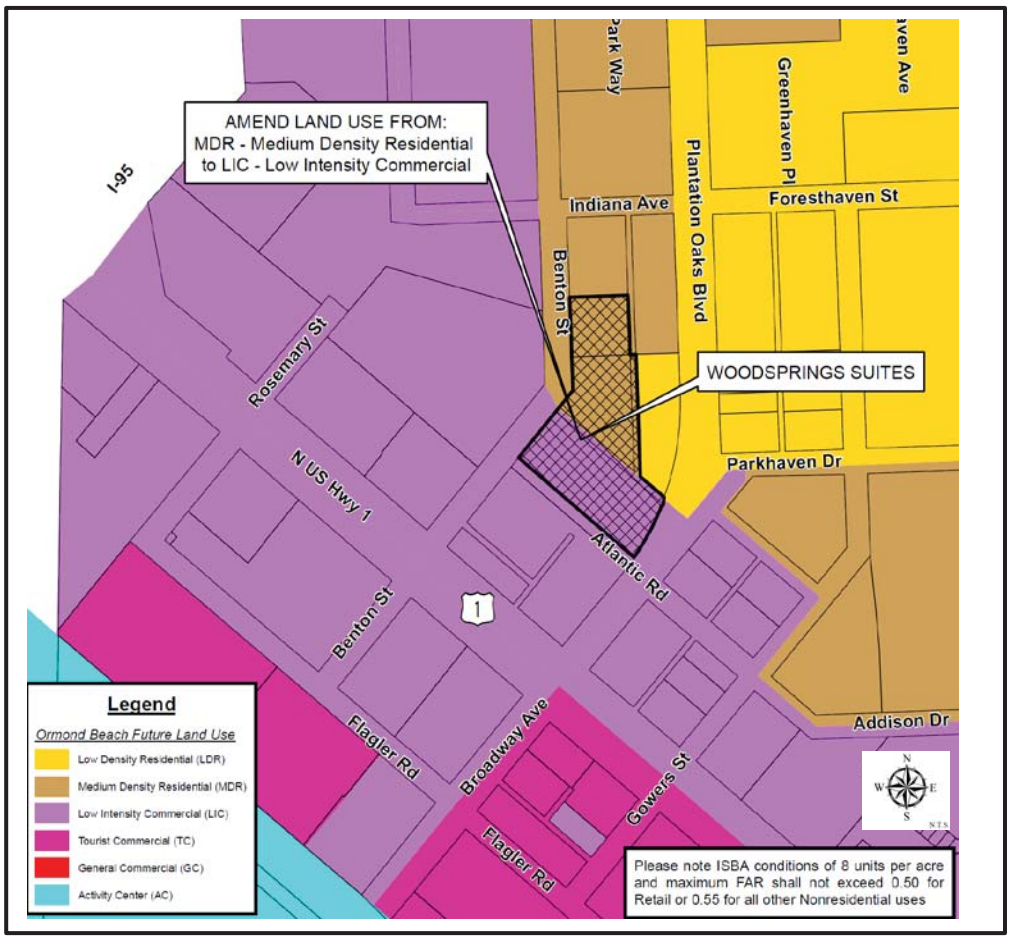
Commercial land use designations exist to the west and east and south across North U.S. Highway 1. The conceptual use of a hotel is consistent with the North U.S. Highway 1 corridor. Additionally, the land area is too far off the North U.S. 1 right-of-way to support a commercial use. The hotel use at four stories would likely be visible to the U.S. 1 corridor without needing the direct frontage other commercial uses would require. The use is also a good transition from the commercial uses along U.S. 1 to the proposed residential uses (duplexes, townhomes, and single-family) further to the north along Plantation Oaks Boulevard.

The adjacent land use designations and zoning classifications are shown in Exhibit 3 and the Existing Future Land Use designations are shown in Exhibit 4 below:

EXHIBIT 3: Land use and zoning designations:

Land Use and Zoning Designations of Adjacent Property			
	Current Land Uses	**Existing Future Land Use Designation**	**Existing Zoning Classifications**
North	Vacant Residential – Townhomes proposed	“Medium Density Residential”	R-4, Single-Family Cluster & Townhouse
South	RaceTrac gas station & Dunkin Donuts	“Low Intensity Commercial”	B-7, Highway Tourist Commercial
West	Vacant	“Low Intensity Commercial”	B-7, Highway Tourist Commercial
East	Plantation Oaks stormwater pond & RidgeHaven subdivision	“Low Density Residential” & “Medium Density Residential”	PRD, Planned Residential Development

EXHIBIT 4: Existing Future Land Use map for the area:



4. Whether there is adequate infrastructure to serve the proposed land use.

The analysis of infrastructure needs for a comprehensive plan amendment is different from a concurrency review for a site plan. The impact analysis examines the maximum expected impacts of the current designation versus the requested designation based on a preliminary development scenario. This analysis is not meant to replace or contradict the findings of a Concurrency Management Review. However, the relative differences between designations can provide useful information in the long-range planning process. The analysis is based on 2.66 acres with the existing land use of “Low Intensity Commercial” and “Medium Density Residential” the proposed land use of “Low Intensity Commercial” for the entire parcel.

EXHIBIT 5: Impact analysis:

Property acreage = 2.66 acres		
Allowed entitlements	**Existing LIC & MDR land use**	**Proposed LIC land use**
Maximum density (residential) units per acre*	8	8
Maximum density (residential)	20 units	20 units
Maximum floor area ratio*	0.55 & 0.30	0.55
Maximum building square footage (SF)	49,245 SF	63,728 SF

*Based upon map annotations in the Interlocal Service Boundary Agreement area

The maximum number of residential uses of 20 units would remain unchanged with the land use amendment. The proposed land use would allow a maximum building size of 63,728 square feet.

EXHIBIT 6: Water and Sewer impact analysis:

Existing		
Land Use	**Water (gallons per day)**	**Sewer (gallons per day)**
"Low Intensity Commercial" & "Medium Density Residential"	7,387	6,279
Proposed		
Land Use	**Water (gallons per day)**	**Sewer (gallons per day)**
"Low Intensity Commercial"	9,559	8,125
INCREASE	**+2,172**	**+1,846**

Notes:

- Commercial/Industrial water = (square feet/100) X 15 gallons of water per day
- Commercial/Industrial sewer = Water gallons per day X 85%

The existing wastewater treatment plant is currently permitted for a rated capacity of 8 million Gallons per Day (MGD) for wastewater influent flow from the sanitary sewer collection system. The most recent annual period average daily flow to the facility is 4.98 MGD. The most recent annual period average daily treated effluent flow for reuse customers is 3.30 MGD. Approved development projects proposed, 0.58 MGD for wastewater treatment added with current wastewater plant flow is estimated at 5.56 MGD at build out. The plant capacity remaining is 2.44 MGD if all approved projects are built out. The LOS for sanitary sewer continues to be met.

The City operates a single water treatment plant having a permitted and rated capacity remaining at 12 million Gallons per Day (MGD). The existing demand for water uses

during the most recent annual period is 5.50 MGD. When the proposed projects of 0.55 for the city's service area are added to the existing demand, the total is 6.05 MGD. There is a remaining capacity of 5.95 MGD if all approved projects are built out. The LOS for potable water service continues to be met.

Traffic:

Below is a theoretical review of traffic impacts.

EXHIBIT 7: Traffic impact analysis:

Existing		
Land Use	**ITE land use category**	**Trip Generation**
"Low Intensity Commercial"	#820, Shopping Center	37.01
"Medium Density Residential"	#565, Day Care	47.62
Total existing land use average daily trips		1,900
Proposed		
Land Use	**ITE land use category**	**Trip Generation**
"Low Intensity Commercial"	#310, Hotel	7.99 per room
Total proposed land use average daily trips		998 (see application)
	NET REDUCTION	**902**

The traffic impacts were performed based upon the known use of the hotel with the project engineer providing a trip generation sheet based on the ITE Trip Generation Manual, 11th Edition. The most intensive use would likely by a retail use, using the trip generation of a Shopping Center (#820). Assuming a 0.50 FAR, the maximum building square footage would be 57,934 resulting in 2,144 average daily trips or an increase of 244 average daily trips in the most intensive scenario.

Traffic capacity exists for the proposed change of the land use from "Medium Density Residential" to "Low Intensity Commercial" for a 1.33-acre portion of the property.

Stormwater Management: The site development of each land development area has designed a stormwater management system.

Solid Waste: Solid waste provision would be addressed at the time of site development.

Schools: The proposed amendment does not increase the residential uses allowed.

Recreation: Ormond Beach has approximately 602 acres of parkland and facilities and the proposed amendment would have no impact on the city recreation level of service. Based on a city population of 44,671 acres and a required 13 acres of parkland per 1,000 residents, 580.72 acres of parkland is required. The city is in the process of acquiring 901 Airport Road to add an additional 18.60 acres of parkland.

Other Services: City police and fire protection services serve this area. The parcel is located within an approximate 4-5-minute response time from emergency facilities. There is no impact to other city services.

5. Whether the proposed map amendment impacts surrounding jurisdictions.

The proposed land use amendment is not expected to impact surrounding jurisdictions. The property is within the Interlocal Service Boundary Agreement area.

SECTION 4, RECOMMENDATION:

It is recommended that the Planning Board **APPROVE** the Small-Scale Comprehensive Plan Land Use Map amendment for an approximately 1.33 acres located at Benton Street and Atlantic Avenue, Volusia County Parcel Identification Numbers (3136-01-34-0220, 3136-01-01-0022, and 3136-0134-0140) from “Medium Density Residential” to “Low Intensity Commercial”.

Applicant Submitted Information

WOODSPRINGS SUITES-ORMOND BEACH
DETAILED NARRATIVE

REQUEST STATEMENT

Germana Engineering & Associates, LLC proposes a rezone and small comprehensive plan amendment application on behalf of the property owner, RCM Properties, LLC.

The applicant requests a rezone to a PBD, to allow up to 51,945 square feet (122 rooms) of hotel/motel use with 4 habitable stories. A site plan is provided in the submission documents. The applicant intends to connect the proposed development to existing central potable water and sanitary sewer service.

AMENDED SITE DESCRIPTION

The total project area consists of (3) parcels. Alt Key # 7075971, 2470020, 6814767. The existing alleys will be vacated, and the vacated lands will become part of the subject property. Therefore, the existing alleys need to be included in the rezone and land use amendment. A boundary survey of the subject property and a sketch and description of the alleyways have been included in the supplemental documents. Separate legal descriptions are provided for the survey and sketch and description of the alleyways.

EXISTING AND PROPOSED USES

The existing zoning classification is B-7 (1.33 ± acres) and R-4 (1.33 ± acres). A rezone to PBD is requested to allow for the transient lodging development. The existing future land use is LIC (1.33 ± acres) and MDR (1.33 ± acres). The MDR needs to be amended to allow for transient lodging.

LAND USE COMPATABILITY

The proposed tourist oriented hotel development is located near the highway interchange and the rezone and small scale comprehensive plan amendment should satisfy the general intent of the City of Ormond Beach comprehensive plan. The development will have appropriate buffers to adjacent lands as specified in the land development code.

The proposed use, hotel/motel, is appropriate at the proposed location and is compatible with existing and planned uses in the surrounding area. The project will provide sufficient access to support the proposed development intensity.

The intended development will not have an adverse impact on surrounding land uses.

SERVICES AND FACILITIES

POTABLE WATER

An existing 8” water main stub is available for connection southwest of Atlantic Road. A utility availability letter is included in the supplemental documents to illustrate capacity of available for the proposed hotel use.

WOODSPRINGS SUITES-ORMOND BEACH
DETAILED NARRATIVE

SANITARY SEWER

An existing 4" sanitary sewer force main stub is available for connection southwest of Atlantic Road. A utility availability letter is included in the supplemental documents to illustrate capacity is available for the proposed hotel use.

DRAINAGE

The proposed project will provide underground stormwater chambers to meet state water quality and water quantity standards. The stormwater system will meet all applicable elements of the City of Ormond Beach land development code.

SOLID WASTE

The solid waste demand will be consistent with other commercial establishments and the City of Ormond Beach land development code. The proposed development will maintain the level of service.

TRAFFIC

A traffic impact statement has been provided in the supplemental documents. The proposed hotel use will meet the objectives and policies of the City of Ormond Beach comprehensive plan.

MASS TRANSIT

An existing mass transit facility, US1 & I95, is located near the intersection of Flagler Road and US1. No proposed facilities for development of this project.

NATURAL AND HISTORIC RESOURCES

The project site is not listed on the national register of historic places or locally designated historic sites. The project site is not listed on the Florida Master File. No wetlands or outstanding water bodies. No endangered, threatened, or special concern species exist.

CITY OF ORMOND BEACH COMPREHENSIVE PLAN CONSISTENCY

The proposed development will be consistent with the goals, objective, and policies of the City of Ormond Beach comprehensive plan.

Engineering Firm Registry # 29279

TRAFFIC IMPACT STATEMENT

As shown within the attached site plan, the proposed Woodsprings Suites hotel is located within the City of Ormond Beach. The proposed project consists of a 51,945 square foot (4 story) hotel with 122 rooms.

Trip generation potential for the proposed development was calculated based upon equations contained in the ITE Trip Generation Manual, 11th Edition. Based on land use code, 310, for a hotel with 122 rooms, **Table 1** identifies the projected trip generation for this project. No internal capture or pass-by was assumed in the trip generation calculations.

The proposed development has the potential to generate 998 daily trips, 73 PM peak hour trips, 37 entering, and 36 exiting. **Table 1** illustrates the trip generation calculations for the site.

Table 1: Trip Generation Summary

LAND USE	ITE CODE	ROOMS	DAILY	AM PEAK HOUR			PM PEAK HOUR		
				ENTER	EXIT	TOTAL	ENTER	EXIT	TOTAL
Hotel	310	122	998	38	27	65	37	36	73

9. THE BOUNDARY LINES SHOWN ARE COMPRISED FROM THE SAID INFORMATION ALONG WITH EXISTING MONUMENTATION FOUND IN THE FIELD. SURVEY DOES NOT TERMINE OR REFLECT OWNERSHIP. THERE MAY BE OTHER INFORMATION NOT ON RECORD OR PROVIDED, SUCH AS: DEEDS OR SURVEY HELPERS FROM OTHER THAT ARE NOT ON RECORD TO A1A SURVEYING AT THE TIME OF SURVEY. A1A SURVEYING ATTEMPTS TO CONTACT LOCAL SURVEYORS FOR HELPER SURVEYS. SEE LIMITATIONS.

10. UNDERGROUND UTILITIES NOT LOCATED EXCEPT AS SHOWN, PER FIELD VISIBLE LOCATIONS OR MARKINGS.

11. LIMITATIONS:

A.) THE CLIENT AND/OR THEIR LEGAL REPRESENTATIVE(S) IS REQUIRED PER FLORIDA STATUTE RULE 5J-17.052(2)(D)(4) AND THE ALTA REQUIREMENTS THAT ALL RECORDED INSTRUMENTS (EASEMENTS, RIGHT-OF-WAYS) & ETC.) THAT APPLIES TO THIS SURVEY MUST BE PROVIDED TO THIS SURVEYOR. SOME INSTRUMENTS OF RECORD REFLECTING EASEMENTS, RIGHT-OF-WAY(S), AND OR OWNERSHIP HAVE BEEN FURNISHED TO THE SURVEYOR, PER TITLE COMMITMENT. THERE MAY BE ADDITIONAL RECORDINGS NOT PROVIDED TO THIS SURVEYOR THAT MAY BE FOUND IN THE PUBLIC RECORDS OF THIS COUNTY OR A PREVIOUS SURVEY BY OTHERS NOT ON RECORD THAT WERE NOT PROVIDED AT THE TIME OF THIS SURVEY. THIS SURVEYOR RETAINS THE RIGHT TO REVISE HIS OR HER SURVEY WHEN SAID DOCUMENTATION IS PRESENTED.

B.) IT IS UNDERSTOOD TO BE THE PROFESSIONAL OPINION OF THIS SURVEYOR AND THE FIRM FROM WHICH IS FORMULATED ON HIS / HER BEST KNOWLEDGE, INFORMATION AND BELIEF, AND AS SUCH, DOES NOT CONSTITUTE A GUARANTEE OR WARRANTY, EITHER EXPRESSED OR IMPLIED. FURTHERMORE, THIS SURVEYOR AND FIRM DOES NOT ASSUME RESPONSIBILITY AND SHALL NOT BE LIABLE FOR CLAIMS ARISING FROM ERRONEOUS OR INCORRECT INFORMATION FURNISHED BY THE OWNER, LENDER, OR OWNER'S CONTRACTORS OR OTHERS WHICH IS USED AS A BASIS TO FORMULATE THIS SURVEYORS OPINION.

C.) ADDITIONS OR DELETIONS TO SURVEY MAPS OR REPORTS BY OTHER THAN THE SIGNING PARTY IS PROHIBITED WITHOUT WRITTEN CONSENT OF THE PARTY PER FLORIDA STATUES CHAPTER RULE 5J-17.051(3)(5)(6).

D.) THE ACCEPTANCE OF THIS SURVEY AS CERTIFIED FOR THE EXCLUSIVE USE OF NAMES SHOWN HEREON SHALL CONSTITUTE FULFILLMENT OF MY CONTRACTUAL OBLIGATION. "ORIGINAL" AS DEFINED HEREON REFERS TO THE SIGNED AND SEALED GRAPHIC REPRESENTATION OF THE FIELD SURVEY. CAD FILES ARE NOT THE SURVEY AND THESE MAY BE A SURCHARGE FOR THEM.

E.) TAX PARCEL IDENTIFICATION NUMBERS, ADJACENT OWNERS NAME AND ADDRESS WHEN SHOWN, IS TAKEN FROM SAID COUNTY PROPERTY WEB SITE.

F.) TREE INFORMATION:
TREES AS SHOWN ON THE SURVEY IS FOR THE LOCATION AND DIAMETER TAKEN APPROXIMATELY 4 TO 4-1/2 FEET ABOVE GROUND LEVEL (APPROXIMATELY CHEST HEIGHT). THE TREE IDENTIFICATION SHOWN IS USUALLY A COMMONLY KNOWN NAME. HOWEVER, THE ACCURACY OF THE SPECIES OF SAID IDENTIFICATION SHOULD BE IDENTIFIED AND CONSULTED BY AN ARBORIST OR ANY OTHER PROFESSIONAL LICENSED TO IDENTIFY TREES (LANDSCAPE ARCHITECT, ENVIRONMENTALIST, ETC.). IDENTIFICATION IS OUT OF THE EXPERTISE OF A FLORIDA SURVEYOR OR MAPPER, UNLESS THEY POSSESS SUCH CERTIFICATES.

12. PIPE SIZE, MATERIAL AND INVERTS OF SEWER AND DRAINAGE STRUCTURES WERE OBTAINED WHERE ACCESSIBLE. DUE TO THE NATURE OF OBTAINING THE DATA WHERE THE STRUCTURES ARE IN USE AND THE ACTUAL INVERTS ARE OBSCURED, THE INFORMATION OBTAINED MAY BE THE BEST APPROXIMATION OF THE TRUE MEASUREMENTS. IT IS THE RESPONSIBILITY OF THE END USER TO VERIFY THE DIAMETER AND MATERIAL UTILIZING AS-BUILT DRAWINGS OR OTHER RESOURCES PRIOR TO CONSTRUCTION.

13. IN INSTANCES WHERE THE STRUCTURES ARE FULL OF WATER OR EFFLUENT, AND THE INVERTS WERE OBSCURED, THE BOTTOM OF THE STRUCTURE WAS OBTAINED.

14. UNITS OF MEASUREMENT ARE IN U.S. SURVEY FEET AND DECIMAL PARTS THEREOF. WELL IDENTIFIED FEATURES IN THIS SURVEY WERE FIELD MEASURED TO A HORIZONTAL POSITIONAL ACCURACY OF 0.05'. THE ELEVATIONS ON IMPERVIOUS SURFACES WERE FIELD MEASURED TO 0.03' AND ON GROUND SURFACES TO 0.1'.

15. OFFICIAL RECORDS BOOK 724, PAGE 511, SECTION 1, A(1) PAGE 522 DESCRIBES THE VACATION OF THE WESTERLY PORTION OF ATLANTIC ROAD FROM BENTON STREET TO BROADWAY, HOWEVER THE DEED ON FILE DOES NOT REFLECT THAT. AT THIS SAME PAGE IT ALSO DESCRIBES THE EASTERLY 10 FEET OF BENTON STREET FROM NORTHERLY LINE OF U.S. HIGHWAY No.1 NORTHERLY TO THE WESTERLY SIDE OF 15 FOOT ALLEY BETWEEN LOTS 21 AND 22, BLOCK 34.

Ms. Jessica Heiny
Germana Engineering & Assoc
1120 W Minneola Ave.
Clermont, FL 34711

RE: Water and Sewer Service Availability for Parcel 3136-01-34-0140

Dear Ms. Heiny,

The City of Ormond Beach is the utility provider for the above referenced parcel. Our records indicate this property is at the southeast corner of Atlantic Rd. and Benton St. Water and irrigation service can be provided from an 8" water main located on the west side of Atlantic Rd. There is also a 12" water main on Plantation Oaks Blvd. that runs along the south property line.

There is no gravity sanitary sewer service available for this property. There is a 4" force main on the west side of Atlantic Rd. and an 8" force main on the south side of Plantation Oaks Blvd. A lift station would need to be constructed from the property to the force main.

This letter does not obligate the City to provide service without payment of all applicable utility service and connection fees and compliance with all applicable City codes.

If you should need any further clarification, please feel free to contact me at (386) 676-3305.

Sincerely,

Robert C Preis Jr.

Utilities Manager

THIS CORRECTIVE WARRANTY DEED IS BEING RECORDED TO CORRECT THE WARRANTY DEED RECORDED IN OFFICIAL RECORDS BOOK 8217, PAGE 1840, PUBLIC RECORDS OF VOLUSIA COUNTY TO SHOW THE PROPER LEGAL DESCRIPTION.

[Space Above This Line For Recording Data]

Corrective Warranty Deed

This Indenture made this 18 day of July, 2022 between **NGT Transportation, LC, a Florida limited liability company**, and **SNILLOC Family Limited Partnership Number One, a Florida limited partnership,** whose post office address is **2249 Old Dixie Hwy, Ormond Beach, FL 32174** of the County of **Volusia**, State of **Florida**, grantor*, **RCM Properties L.L.C., a Florida limited liability company,** whose post office address is **123 Magnolia Avenue, Daytona Beach, Daytona Beach, FL 32114** of the County of **Volusia**, State of **Florida**, grantee*,

Witnesseth that said grantor, for and in consideration of the sum of TEN AND NO/100 DOLLARS ($10.00) and other good and valuable considerations to said grantor in hand paid by said grantee, the receipt whereof is hereby acknowledged, has granted, bargained, and sold to the said grantee, and grantee's heirs and assigns forever, the following described land, situate, lying and being in **Volusia County**, **Florida**, to-wit:

See Attached "Exhibit A"

Subject to taxes for the year 2022 and all subsequent years.

Subject to easements, restrictions, conditions, and reservations of record, if any, the mention of which shall not serve to reimpose the same.

Grantor warrants that at the time of this conveyance, the subject property is not the Grantor's homestead within the meaning set forth in the constitution of the state of Florida, nor is it contiguous to or a part of homestead property. Grantor's residence and homestead address is: 2249 Old Dixie Hwy, Ormond Beach, FL 32174.

and said grantor does hereby fully warrant the title to said land, and will defend the same against lawful claims of all persons whomsoever.

* "Grantor" and "Grantee" are used for singular or plural, as context requires.

DRAFT

Planning Board minutes from March 14, 2024

ITEM:

PZ-2024-015

Woodsprings Suites

Comprehensive Plan Amendment, Land Use Map

Resolution 2023-109. Mr. Spraker stated that the project is under construction. He stated the final plat is a legal document to subdivide land after constructing improvements or posting a performance bond. Mr. Spraker stated that the final plat was reviewed by the SPRC, City Attorney's Office, and the City Surveyor. He concluded that the SPRC recommends approval of the final plat.

Mr. Spraker stated that the project was awarded an Outstanding Sustainability Initiative from the Surfcoast Chapter of the Florida Planning and Zoning Association in December 2023.

Board Discussion and Questions

Mr. du Moulin asked if the irrigation for the subdivision was drawn from the stormwater pond. Mr. Spraker confirmed that was correct. Mr. du Moulin asked if the stormwater pond was not adequate if there is a secondary well. Mr. Spraker stated that this is correct and there is a well to supplement the stormwater pond if necessary.

Mr. Galloway stated there are a lot of homes getting ready to be built in this area.

Board Recommendation

Chairman Thomas opened it up to the Board for a motion.

Mr. Scudiero motioned to approve PZ 2024-009, RidgeHaven Subdivision, Final Plat. Mr. Galloway seconded it. Vote was called, and the motion was approved (6-0).

F. PZ 2024-015, Woodsprings Suites, Comprehensive Plan Land Use Map Amendment

Mr. Spraker stated that this is a request for a Small-Scale Comprehensive Plan Land Use Map amendment for an approximate 1.33 acres located at Benton Street and Atlantic Avenue, from "Medium Density Residential" to "Low Intensity Commercial". He reviewed the process for a land use amendment that includes: (1) review by Planning staff, (2) Planning Board review and recommendation, (3) City Commission action and if approved (4) transmittal to the Volusia County Growth Management Commission and Department of Florida Commerce.

Mr. Spraker reviewed the proposed Future Land Use Map with the amendment. He stated that the map amendment sought to go from "Medium Density Residential" to "Low Intensity Commercial". He stated that the goal of the application is to make the entire project a "Low Intensity Commercial" land use designation in order to construct a hotel. Mr. Spraker reviewed the uses in the area including U.S. Highway 1 and stated the subject property was in a transitional area where a hotel would be appropriate. He continued that the property is within the North U.S. Highway 1 Interlocal Service Boundary Agreement (ISBA) area that contains land use conditions of a maximum of 8 units per acre and a maximum Floor Area Ratio that shall not exceed 0.50 for retail and 0.55 for all other nonresidential uses. Mr. Spraker concluded that staff recommended approval of the land use amendment application.

Board Discussion and Questions

Ms. Shull inquired about the allowed residential density. Mr. Spraker confirmed that a hotel would be reviewed based upon the Floor Area Ratio. He stated that the residential density would apply to single-family houses, townhomes or multi-family uses. Mr. Spraker noted that the project would need a right-of-way (ROW) vacation and a zoning map amendment to Planned Business Development.

Mr. du Moulin asked if the applicant agreed to install a lift station. Mr. Spraker stated that the project is not that far yet and this is a land use map amendment. He stated the application changes colors on a map and determines the appropriateness of a use category. Mr. Spraker stated that there is no site plan with this application and speculated that the project would construct a private lift station. Mr. du Moulin questioned if the applicant would be responsible for that. Mr. Spraker confirmed that the lift station and sewer service is the responsibility of the applicant.

Mr. Galloway inquired to a parcel next to the amendment area. Mr. Spraker confirmed that this area is part of the Benton Street right-of-way.

Board Recommendation

Chairman Thomas opened it up to the Board for a motion.

Mr. Jorczak motioned to approve PZ 2024-015, Woodsprings Suites, Comprehensive Plan Land Use Map Amendment. Mr. Galloway seconded it. Vote was called, and the motion was approved (6-0).

G. PZ 2024-016, 7-Eleven Electronic Changeable Copy Signage, 3 North Yonge Street, Special Exception

Ms. Cushing stated that this a request submitted for a Special Exception to allow two (2) electronic changeable copy signs for the retail prices of gasoline at the 7-Eleven convenience store located at 3 North Yonge Street per Section 3-47(G). She stated that there are no other site or building improvements proposed. Ms. Cushing reviewed the development order review process for the Special Exception that included (1) Planning staff review, (2) Planning Board review and recommendation, and (3) City Commission action. She stated that this process is applied to the following two 7-Eleven applications.

Ms. Cushing stated that electronic changeable copy signage for the retail display of gasoline is allowed as a Special Exception. She stated that the application is a face change to modify the manual changeable copy to electronic changeable copy signage. Ms. Cushing stated that the application complies with Section 3-47(G) of the LDC and staff recommended approval of the application.

Board Discussion and Questions

Mr. Jorczak asked staff if the proposed signs would be increased in size.

Ms. Cushing responded that they are simply doing a face change to remove the manual changeable copy sign area to electronic changeable copy sign. She confirmed that there will be no increase in the sign size and the proposed electronic changeable copy area will meet the requirements of Section 3-47(G).

Ordinance Adoption
Business Impact Estimate

Proposed ordinance's number and legal title:

2024-02

AN ORDINANCE AMENDING THE FUTURE LAND USE ELEMENT OF THE COMPREHENSIVE PLAN OF THE CITY OF ORMOND BEACH BY AMENDING THE FUTURE LAND USE MAP TO CHANGE THE DESIGNATION OF 1.33± ACRES, LOCATED ALONG BENTON STREET, NORTH OF ATLANTIC ROAD (VOLUSIA COUNTY PARCEL NUMBERS 3136-01-34-0220 AND 3136-01-01-0022) FROM 'MEDIUM DENSITY RESIDENTIAL" TO "LOW INTENSITY COMMERCIAL"; PROVIDING FOR CONFLICT; AUTHORIZING TRANSMITTAL; AND SETTING FORTH AN EFFECTIVE DATE.

This Business Impact Estimate is provided in accordance with section 166.041(4), Florida Statutes. If one or more boxes are checked below, this means the City is of the view that a business impact estimate is not required by state law for the proposed ordinance, but the City is, nevertheless, providing this Business Impact Estimate as a courtesy and to avoid any procedural issues that could impact the enactment of the proposed ordinance. This Business Impact Estimate may be revised following its initial posting.

- ☐ The proposed ordinance is required for compliance with Federal or State law or regulation;
- ☐ The proposed ordinance relates to the issuance or refinancing of debt;
- ☐ The proposed ordinance relates to the adoption of budgets or budget amendments, including revenue sources necessary to fund the budget;
- ☐ The proposed ordinance is required to implement a contract or an agreement, including, but not limited to, any Federal, State, local, or private grant or other financial assistance accepted by the municipal government;
- ☐ The proposed ordinance is an emergency ordinance;
- ☐ The ordinance relates to procurement; or
- ☒ The proposed ordinance is enacted to implement the following:
    a. Part II of Chapter 163, Florida Statutes, relating to growth policy, county and municipal planning, and land development regulation, including zoning, development orders, development agreements and development permits;
    b. Sections 190.005 and 190.046, Florida Statutes, regarding community development districts;
    c. Section 553.73, Florida Statutes, relating to the Florida Building Code; or
    d. Section 633.202, Florida Statutes, relating to the Florida Fire Prevention Code.

In accordance with the provisions of controlling law, even notwithstanding the fact that an exemption noted above may apply, the City hereby publishes the following information:

1. A summary of the proposed ordinance, including a statement of the public purpose to be served by the proposed ordinance, such as serving the public health, safety, morals, and welfare of the City.

   This is a request submitted by Ridge Land Holdings, LLC, and RCM Properties, LLC, property owners, for a Small-Scale Comprehensive Plan Land Use Map amendment for approximately 1.33 acres located at Benton Street and Atlantic Avenue, Volusia County Parcel Identification Numbers (3136-01-34-0220, 3136-01-01-0022, and 3136-0134-0140) from "Medium Density Residential" to "Low Intensity Commercial". The property is within the North U.S. Highway 1 Interlocal Service Boundary Agreement (ISBA) area that contain land use conditions of a maximum of 8 units per acre and a maximum Floor Area Ratio that shall not exceed 0.50 for Retail and 0.55 for all other Nonresidential uses.

2. An estimate of the direct economic impact of the proposed ordinance on private, for-profit businesses in the City, including the following, if any:

   a. An estimate of direct compliance costs that businesses may reasonably incur if the ordinance is enacted;

      None. This is a request for a Comprehensive Plan Future Land Use Map amendment. No compliance costs are anticipated.

   b. Identification of any new charge or fee on businesses subject to the proposed ordinance, or for which businesses will be financially responsible; and

      None. This is a request for a Comprehensive Plan Future Land Use Map amendment. There are no charges or fees proposed.

   c. An estimate of the City's regulatory costs, including an estimate of revenues from any new charges or fees that will be imposed on businesses to cover such costs.

      None. This is a request for a Comprehensive Plan Future Land Use Map amendment.

3. A good faith estimate of the number of businesses likely to be impacted by the ordinance.

   None. This is a request for a Comprehensive Plan Future Land Use Map amendment.

4. Any additional information the City determines may be useful.

   (This section may include: methodology or data used to prepare the Business Impact Estimate, e.g., City staff solicited comments from businesses as to the potential impact of the proposed ordinance by contacting the chamber of commerce, social media posting, direct mail/email, posting on the City's website, public workshop, etc.; efforts made to reduce the potential fiscal impact on businesses; and state the proposed ordinance is a generally applicable ordinance that applies to all persons similarly situated (individuals or businesses) and, therefore, the proposed ordinance does not affect only businesses.)

   No business impacts proposed. The item was advertised by U.S. mail to abutting property owners and newspaper advertisements. Information on the application is also on the city's website.

City of Ormond Beach
AGENDA ITEM

April 16, 2024 - City Commission

Number: 8.B

Section:	PUBLIC HEARINGS		
Item Category:	Public Hearing - Ordinances	**Res./Ord. No:**	2024-3
Strategic Goal:	Transportation & Community Development - Other		
Department:	Planning & Building		
Subject:	Tomoka Reserve, Zoning Map Amendment		
Summary:	This is an application submitted by Robert A. Merrell III, Esquire, Cobb Cole on behalf of the property owner, Triumph Oaks of Ormond Beach I, LLC, for a zoning map amendment to rezone the Tomoka Oaks golf course land consisting of approximately 147.94 acres, from PRD, Planned Residential Development to R-2, Single-Family Low Density. The former Tomoka Oaks golf course land is situated within the Tomoka Oaks residential subdivision. The physical and historical connection of these two properties present unique circumstances regarding the developer's proposed development of the golf course land. Development of the golf course land under PRD, Planned Residential Development zoning, and not the R-2 Single-Family Low Density zoning district, can better satisfy the goals and objectives of the City's Comprehensive Plan and the requirements of the Land Development Code to achieve a harmonized development of the golf course land in a manner that will lessen the impacts on adjacent neighborhoods. Within the packet, the following information is included: 1. Planning staff's report; 2. Applicant's submittal; 3. Zoning maps and zoning district analysis; 4. Correspondence on the application; 5. Tomoka Oaks HomeOwner's Association analysis of application, including two planner's analysis; 6. Letter from project attorney, Karl J. Sanders dated January 10, 2024; and 7. Janaury 11, 2024 Planning Board minutes. The Planning Board reviewed the zoning map amendment at the January 11, 2024 meeting. The applicant's attorney, the Tomoka Oaks HomeOwner's Association, and residents addressed the Planning		

	Board. The Planning Board meeting minutes are part of the project packet attached. The Planning Board recommended denial of the zoning map amendment by a 7-0 vote.
Financial Impact:	There is no budget impact as the result of this application for the zoning map amendment.
Citizen Impact:	Members of the public, City staff, the Planning Board, and City Commission have recognized the unique and special characteristics of theTomoka Reserve property. The zoning map amendment application received written comments and public comments at the Planning Board meeting.
Recommended Action (Staff, Advisory Board and/or Other):	The Planning Board recommended **DENIAL** of the application for a zoning map amendment from PRD, Planned Residential Development to the R-2, Single-Family Low Density and to maintain the existing PRD, Planned Residential Development zoning for the Tomoka Reserve property.

ORDINANCE NO. 2024-03

AN ORDINANCE AMENDING PARAGRAPH C, OFFICIAL ZONING MAP, OF SECTION 2-01, ESTABLISHED, OF ARTICLE 1, ESTABLISHMENT OF ZONING DISTRICTS AND OFFICIAL ZONING MAP, OF CHAPTER 2, DISTRICT AND GENERAL REGULATIONS, OF THE CITY OF ORMOND BEACH *LAND DEVELOPMENT CODE*, BY AMENDING THE OFFICIAL ZONING MAP TO REZONE ONE PARCEL OF REAL PROPERTY TOTALING APPROXIMATELY 147.94 ACRES LOCATED AT 20 TOMOKA OAKS BOULEVARD, VOLUSIA COUNTY PROPERTY APPRAISER PARCEL IDENTIFICATION NUMBER: 3242-07-00-0010 FROM PRD, PLANNED RESIDENTIAL DEVELOPMENT TO R-2, SINGLE-FAMILY LOW DENSITY; AUTHORIZING REVISION OF OFFICIAL ZONING MAP; REPEALING ALL INCONSISTENT ORDINANCES OR PARTS THEREOF; AND SETTING FORTH AN EFFECTIVE DATE.

WHEREAS, Triumph Oaks of Ormond Beach I, LLC, a Florida limited liability company ("Property Owner") is the fee simple owner of certain real property consisting of approximately 147.94 acres located at 20 Tomoka Oaks Boulevard, (Volusia County Property Appraiser parcel identification number: 3242-07-00-0010) Ormond Beach, Florida, which is legally described and depicted in Exhibit "A" ("Property") attached hereto and incorporated herein, and

WHEREAS, the Property Owner has submitted an application to the city to re-zone the Property from PRD, Planned Residential Development, to R-2, Single-Family Low Density, and

WHEREAS, the Property to be re-zoned is more than ten contiguous acres, consisting of approximately 147.94 contiguous acres, and

WHEREAS, the Planning Board held a public hearing regarding this matter as required by Chapter 1, Article II, Section 1-15(d)(3), of the *Land Development Code*, and

WHEREAS, the City Commission held a public hearing regarding this matter as required by Section 166.041(3)(a), *Florida Statutes*, and

WHEREAS, all applicable legal notice requirements have been complied with, and

WHEREAS, the City Commission finds the proposed rezoning to be consistent with the Future Land Use Element, and the Future Land Use Map, of the City's adopted *Comprehensive Plan*, now therefore,

BE IT ENACTED BY THE PEOPLE OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:

SECTION ONE. The foregoing recitals are incorporated herein as the findings of the City Commission.

SECTION TWO. Paragraph C, Official Zoning Map, of Section 2-01, Established, of Article I, Establishment of Zoning Districts and Official Zoning Map, of Chapter 2, District and General Regulations, of the *Land Development Code* of the City of Ormond

Beach, Florida is hereby amended by amending the Official Zoning Map, to change the zoning designation of one parcel located at 20 Tomoka Oaks Boulevard, Volusia County Property Appraiser parcel identification number: 3242-07-00-0010, as more particularly described and depicted in Exhibit "A" from PRD, Planned Residential Development, to R-2, Single-Family Low Density as shown and depicted in Exhibit "B".

SECTION THREE. All Ordinances or parts of Ordinances in conflict herewith are hereby repealed to the extent of such conflict.

SECTION FOUR. This Ordinance shall be effective immediately upon its adoption.

PASSED UPON at the first reading of the City Commission, this 16th day of April, 2024.

PASSED UPON at the second reading of the City Commission, this 7th day of May, 2024.

PLANNING BOARD
STAFF REPORT
Tomoka Reserve, Zoning Map Amendment
Project Number: ZMA 2023-054

PLANNING BOARD DATE:	January 11, 2024
TENTATIVE CITY COMMISSION DATES:	To be determined
APPLICANT:	Robert A. Merrell III, Esquire, Cobb Cole, on behalf of the property owner, Triumph Oaks of Ormond Beach I, LLC
LOCATION:	20 Tomoka Oaks Boulevard
REQUEST:	Zoning map amendment from PRD, Planned Residential Development to R-2, Single-Family Low Density for approximately 147.94 acres
PLANNING STAFF RECOMMENDATION:	Denial of the zoning map amendment to the R-2, Single-Family Low Density zoning district
STAFF CONTACT:	Steven Spraker, AICP, Planning Director
MAP OF THE PROJECT AREA:	

SECTION 1, INTRODUCTION:

This is an application submitted by Robert A. Merrell III, Esquire, Cobb Cole on behalf of the property owner, Triumph Oaks of Ormond Beach I, LLC, for a zoning map amendment to rezone the Tomoka Oaks golf course land consisting of approximately 147.94 acres, from PRD, Planned Residential Development to R-2, Single-Family Low Density. The former Tomoka Oaks golf course land is situated within the Tomoka Oaks residential subdivision. The physical and historical connection of these two properties present unique circumstances regarding the developer's proposed development of the golf course land. Development of the golf course land under PRD, Planned Residential Development zoning, and not the R-2 Single-Family Low Density zoning district, can better satisfy the goals and objectives of the City's Comprehensive Plan and the requirements of the Land Development Code to achieve a harmonized development of the golf course land in a manner that will lessen the impacts on adjacent neighborhoods.

SECTION 2, HISTORICAL OVERVIEW:

The development of Tomoka Oaks golf course and Tomoka Oaks residential subdivision both began in approximately 1961. Historical records show a symbiotic connection between the properties from the very beginning, with uses that were intended to complement each other. The City's official zoning map, certified by the city clerk on March 7, 1967, based on a 1956 zoning ordinance (Ordinance 56-29), shows residential lots around the perimeter of the golf course. The 1967 (1956) zoning map is attached as ATTACHMENT 1. The zoning map shows a road system around the perimeter of the golf course that included Tomoka Oaks Boulevard, which extended from State Road 5A (Nova Road) to the traffic circle; and the traffic circle/diamond that provided connecting roadway links to St. Andrews Drive, Oakmont Drive, Tomoka View Drive, and the golf course itself. The configuration of the traffic circle on the 1967 (1956) zoning map is significant because it remains the same today as it did more than 60 years ago. An inference can be drawn that the road system and traffic circle were intended primarily to serve the limited development of residents who lived in Tomoka Oaks subdivision and others who enjoyed the golf course amenity.

The golf course opened for play in approximately 1962 as an 18-hole golf course and related uses that included a clubhouse, cart barn, and maintenance barn. The zoning map shows that Tomoka Oaks subdivision and the golf course were in an "R-2-A" zoning district. In 1963, Tomoka Oaks, Inc., conveyed by warranty deed to Ralph R. Frederick, trustee, all of the Sam Sneed Golf and Country Club. The warranty deed contained several conditions, including covenants that the property be used in perpetuity as a golf course and country club; providing Tomoka Oaks, Inc., a right of first refusal to purchase the property in the event Mr. Frederick intended to sell the property; and providing that in the event the property ceased to be used exclusively as a golf course and related uses, and the property was not sold to Tomoka Oaks, Inc., Tomoka Oaks Golf and Country Club, Inc., or Tomoka Oaks Homeowners Association, then the property would automatically revert back to Tomoka Oaks, Inc. The records indicate that Tomoka Oaks, Inc., intended to liquidate and dissolve as a corporate entity, and therefore, in 1970 its board of directors approved a resolution releasing Tomoka Oaks Inc.'s right of first refusal to purchase the property under the warranty deed, and further releasing (effective on December 13, 1973) its interest in the property under the reverter clause. A release was

subsequently executed in 1971. Notwithstanding the release by Tomoka Oaks, Inc., of its interests under the warranty deed in and to the golf course property, the golf course was continuously and exclusively used for nearly 60 years by residents of Tomoka Oaks subdivision and the general public as a golf course and/or open space amenity.

In 2006, attorney Rob Merrell, on behalf of a developer-client, requested the zoning for the Tomoka Oaks golf course land be changed to PRD, Planned Residential Development to allow the construction of a low impact development. A low impact development under PRD, Planned Residential Development zoning could best preserve the unique characteristics and historical connection between the golf course property and Tomoka Oaks subdivision because development of the golf course land would have a direct and immediate impact on residents of Tomoka Oaks subdivision and neighboring subdivisions. The City Commission approved the PRD rezoning request and approved a development order (by Ordinance 2006-17) authorizing the construction of 119 multi-family townhomes and condominiums, three single-family residences, a nine-hole redesigned golf course and driving range, tennis facility, maintenance area, spine road, and parking. The approval included a condition that the developer provide restrictive covenants to ensure the use of the nine-hole golf course in perpetuity; and further required the consent of the City Commission for any release of the restrictive covenant. The approval by the City Commission allowed the applicant to develop the golf course property in a manner that preserved the sense of open space that residents of Tomoka Oaks subdivision had enjoyed, and relied upon, for decades. The PRD, Planned Residential Development development order expired in 2014. The Tomoka Oaks golf course land has been zoned PRD, Planned Residential Development for over 17 years.

SECTION 3, RECENT BACKGROUND:

Triumph Oaks of Ormond Beach I, LLC acquired the Tomoka Oaks golf course land in 2021. It did so with full knowledge that the land was zoned PRD, Planned Residential Development. In 2022, Triumph Oaks of Ormond Beach I, LLC submitted to the City, through its attorney Rob Merrell, an application for a development order under the existing PRD, Planned Residential Development zoning. The applicant is seeking approval to construct 276 residential lots of various widths ranging from sixty feet (60') to eighty feet (80'). Upon considering the evidence and testimony that was presented at a public hearing held on November 7, 2023, including the recommendation of the Planning Board, the City Commission voted unanimously to remand the matter back to the Planning Board for further proceedings to address concerns regarding density, lot size, natural buffer, compatibility with surrounding neighborhoods, ingress and egress, traffic, and pedestrian safety. Subsequent to the non-final action taken by the City Commission to remand the proposed PRD development application back to the Planning Board, the applicant notified the City, through its attorney, that it would not participate in further proceedings on the remand and withdrew the PRD development application. Instead, the applicant advised the City that it would pursue an application to rezone the golf course land from PRD, Planned Residential Development to R-2, Single-Family Low Density. The applicant has indicated that if R-2, Single-Family Low Density zoning district is approved, it intends to construct single-family homes on the golf course land with essentially the same or similar density and number of lots that it has proposed with its PRD development application, and without addressing the concerns that have been identified by the City Commission that are the subject of the remand action taken by the City Commission on the applicant's

PRD development application. The actions taken by Triumph Oaks of Ormond Beach I, LLC, show an unwillingness by the applicant to address concerns that have been identified by the Planning Board, the City Commission, and the residents of Tomoka Oaks subdivision.

SECTION 4, APPLICATION FOR DEVELOPMENT UNDER PRD ZONING:

At a public hearing on July 13, 2023, the Planning Board reviewed the project application submitted under the PRD, Planned Residential Development zoning for the issuance of a development order that included 276 residential lots that included 50', 60', and 80' wide lots under certain conditions. The Tomoka Oaks HOA is a party intervenor in the proposed PRD development application that was submitted by Triumph Oaks of Ormond Beach I, LLC. The Planning Board completed portions of the public hearing and the meeting was continued until August 21, 2023.

On August 16, 2023, the applicant provided to the Planning staff a revised plan that included 60' wide lots (117), 80' wide lots (101), 90' wide lots (10), and 100' wide lots (46). City staff advised the Planning Board that the new information provided on August 16, 2023, should be considered a material change to the original application, and that it had not been reviewed by Planning staff and other interested people, nor had it been publicly advertised. At the August 21, 2023, Planning Board meeting, the Planning Board concurred with staff and continued the matter to a meeting to be held on September 26, 2023.

At the public meeting held on September 26, 2023, the Planning Board reviewed the revised site plan. The City's Planning staff determined that two primary issues remained unresolved: lot widths along the perimeter of the golf course, and the proposed 50-foot landscape buffer plantings and irrigation. In addition to the applicant's representatives, approximately twenty residents spoke at the meeting. The residents who addressed the Planning Board discussed the unique history and characteristics of the golf course property, how the proposed development would negatively impact the sense of open space they have enjoyed for over 60 years, and how the increased density would strain the neighborhood road system, including the traffic circle that was intended to serve a limited development. The Planning Board voted unanimously (7-0) to recommend to the City Commission that the applicant's proposed development application be denied, and offered the following guidance:

1. **Density**. Each board member expressed concern with the proposed number of lots. Board members indicated support of the SPRC recommendation of 100-foot wide lots on the perimeter. Additionally, some board members believed that all the lots (including interior lots) should be wider and have additional square footage. Board members discussed a wide range of allowed lots with most members in favor of a range between 220 and 240 lots.
2. **50 foot buffer**. Board members stated that there should be a type 6 buffer where gaps exist and irrigation to newly planted landscape material.
3. **Traffic**. Board members stated that the traffic analysis is flawed based upon evidence and testimony provided and their experiences. Specific discussions included:

   A. The existing diamond of Saint Andrews Drive and Tomoka Oaks Boulevard;

B. Impacts to Tomoka Oaks and the Trails subdivision;

C. Intersection impacts at Main Trail and West Granada Boulevard; and

D. Timing of the traffic signal at Nova Road and Tomoka Oaks Boulevard.

4. **Architectural design**. Board members sought a wide variety of architectural elevations. The comment of "no cookie cutter" homes was provided. The Board focused on the distance for houses that could repeat building styles.
5. **Driveways**. Board members discussed a desire to have a longer driveway in order to stack vehicles on the home lots and not have on-street parking.

The Planning Board members discussed the benefits to developing the golf course property under the PRD, Planned Residential Development zoning as a means to minimize impacts on adjacent neighborhoods, while also providing an opportunity to the applicant to harmonize the development of the golf course consistent with the historical and unique characteristics of the golf course, similar to the goals that were achieved by the 2006 PRD development order.

The City Commission considered the applicant's application for a development order under the PRD, Planned Residential Development zoning at a public hearing on November 7, 2023. After considering the evidence and testimony that was presented by the applicant, the party-intervenor, and residents, the City Commission voted unanimously (5-0) to remand the matter back to the Planning Board for further proceedings to address several issues including density, traffic, compatibility with surrounding neighborhoods, lot sizes, and the natural buffer. The City Commission took note of the fact that the golf course land (approximately 148 acres) is located in the center of an existing residential development, Tomoka Oaks subdivision; and that the development of the land posed significant challenges. The City Commission recognized that development of the golf course land under PRD, Planned Residential Development zoning provided the best opportunity to minimize negative impacts on adjacent neighborhoods, similar to the goals that were achieved by the 2006 PRD development order. The Planning Board and City Commission minutes are included in ATTACHMENT 6.

The applicant has apparently abandoned efforts to develop the golf course land under the existing PRD, Planned Residential Development zoning. The applicant has, instead, filed this application to rezone the subject property from PRD, Planned Residential Development to R-2, Single-Family Low Density zoning district. If approved, the applicant intends to develop the subject property under R-2, Single-Family Low Density zoning with the same or similar plans that have been considered by the Planning Board and City Commission under the PRD, Planned Residential Development zoning. The applicant hopes to avoid addressing the concerns that have been identified by the City Commission under the applicant's PRD, Planned Residential Development development application.

SECTION 5, APPLICATION FOR THE ZONING MAP AMENDMENT:

The process to rezone the subject property to R-2, Single-Family Low-Density zoning, is described below. The Tomoka Oaks HOA has requested to participate as a party-intervenor regarding the applicant's application to rezone the golf course land from PRD, Planned Residential Development to R-2, Single-Family Low Density.

EXHIBIT 1: Zoning map amendment process

Reviewing entity/action	Date	Required advertising
Planning Board	**January 11, 2024**	**1. Mail notice, 300' radius.** **2. Newspaper advertisement.**
City Commission	Tentatively, February 20, 2023 & March 5, 2023	1. Mail notice, 300' radius. 2. Newspaper advertisement.

In summary, the zoning map amendment seeks to change the zoning allowances for the property. Under the R-2 Single-Family Low Density zoning district single-family, detached residences are allowed as a permitted use. The permitting of a single-family subdivision would require the following steps:

1. Review of the Site Plan Review Committee;
2. Planning Board review of the Preliminary Plat;
3. City Commission action on the Preliminary Plat;
4. Construction of subdivision improvements (typically in phases);
5. Planning Board review of the Final Plat:
6. City Commission action on the Final Plat;
7. Recording of the plat; and
8. Construction of individual single-family houses.

This process requires technical administrative review by the City's Site Plan Review. The process does not allow review and approval by the Planning Board and City Commission.

SECTION 6, ANALYSIS:

The uses around the subject property are as follows:

EXHIBIT 2: Land uses and zoning abutting Tomoka Reserve

Direction	Current Land Uses	Future Land Use Designation	Zoning
North	Single-Family Residential	"Low Density Residential"	R-2, Single-Family Low Density
South	Single-Family Residential	"Low Density Residential"	R-2, Single-Family Low Density
East	Single-Family Residential	"Low Density Residential"	R-2, Single-Family Low Density
West	Single-Family Residential	"Low Density Residential"	R-2, Single-Family Low Density

The subject property was platted in 1961 as the Sam Snead Golf and Country Club. The city designated land use is “Low Density Residential” and the zoning is PRD, Planned Residential Development. The existing land use allows several uses, including a golf course and single-family homes. Section 2-02, Future land use map designations and zoning districts of the Land Development Code provides the compatible zoning districts to the “Low Density Residential” land use as follows:

EXHIBIT 3: Compatible zoning districts

Comprehensive Plan Future Land Use Map Designation	Corresponding Compatible Zoning District
LDR, Low Density Residential	R-1, Residential Estate
	R-2, Single-Family Low Density
	R-2.5, Single-Family Low-Medium Density
	R-3, Single-Family Medium Density
	PRD, Planned Residential Development

Review of compatible zoning districts:

The zoning district maps and sections are included in ATTACHMENT 4 and are reviewed below:

EXHIBIT 4: R-1, Residential Estate zoning district

Section 2-12. R-1, Residential Estate	
Purpose:	The purpose of this zoning district is to provide for both existing and proposed single-family residential development characteristic of the spacious lots currently existing in various areas of the city, particularly along the Halifax River and the Atlantic Ocean, which are considered representative of the original and historic character of the city.
Density:	2.17 units per acre.
Maximum building height:	30’.
Lot requirements:	Minimum lot width = 100’, minimum lot depth = 150’, minimum lot size = 20,000 square feet.
Setbacks:	Front = 30’, Rear = 25’, Sides = 8’ total 20’, special waterbody setbacks.
Existing location of zoning district:	Along both sides of the Halifax River and Ocean Shore Boulevard abutting the Atlantic Ocean.
Staff analysis:	This district has been used along the Halifax River and the Atlantic Ocean. The total lot area requirement is 20,000 square feet. Staff would not recommend the use of this zoning district for the Tomoka Reserve property.

EXHIBIT 5: R-2, Single-Family Low Density zoning district

Section 2-13. R-2, Single-Family Low Density	
Purpose:	The purpose of the Single-Family Low Density (R-2) Zoning District is to protect and encourage the continued development of low density, single-family residential development.
Density:	4.3 units per acre.
Maximum building height:	30'.
Lot requirements:	Minimum lot width = 100', minimum lot depth = none, minimum lot size = 10,000 square feet.
Setbacks:	Front = 30', Rear = 25', Sides = 8' total 20', special waterbody setbacks.
Existing location of zoning district:	1. Beachside – along Halifax Drive and portions of SR A1A. 2. Along both sides of Beach Street. 3. Tomoka Oaks and Trails subdivisions. 4. Along Hidden Hills Drive area. 5. Portions of Tymber Creek subdivision. 6. Arroyo Parkway area.
Staff analysis:	This zoning district requires lot sizes of 100' in width and requires a lot area of 10,000 square feet. The Tomoka Reserve project was previously zoned as R-2, Single-Family Low Density prior to 2006. The residential uses around the Tomoka Reserve project have an R-2, Single-Family Low Density zoning designation. The applicant has requested that the Tomoka Reserve project be designated back to the R-2, Single-Family Low Density zoning district.

EXHIBIT 6: R-2.5, Single-Family Low-Medium Density zoning district

Section 2-14. R-2.5, Single-Family Low-Medium Density	
Purpose:	The purpose of the Single-Family Low-Medium Density (R-2.5) Zoning District is to protect and encourage the continued development of the residential single-family development that has occurred at relatively low densities.
Density:	4.98 units per acre.
Maximum building height:	30'.
Lot requirements:	Minimum lot width = 90', minimum lot depth = none, minimum lot size = 8,750 square feet.
Setbacks:	Front = 30', Rear = 20', Sides = 8' total 20', waterbody = 30'.

Section 2-14. R-2.5, Single-Family Low-Medium Density (continued)	
Existing location of zoning district:	1. Beachside north of Granada Boulevard, between Ocean shore Boulevard and North Halifax Drive. 2. Portions of Tymber Creek subdivision. 3. Arroyo Parkway area, between Santa Ana Avenue and South Center Street.
Staff analysis:	This zoning district requires a lot area of 8,750 square feet. The R-2.5, Single-Family Low-Medium Density zoning district was originally designed for the beachside area and was utilized for the annexed areas of Arroyo Parkway and the Tymber Creek subdivision. Staff would not recommend the use of this zoning district for the Tomoka Reserve property.

EXHIBIT 7: R-3, Single-Family Medium Density zoning district

Section 2-15. R-3, Single-Family Medium Density	
Purpose:	The purpose of the Single-Family Medium Density (R-3) Zoning District is to stabilize and protect the residential characteristics of existing medium density, single-family neighborhoods and to promote and encourage a suitable environment for family life.
Density:	5.05 units per acre.
Maximum building height:	30’.
Lot requirements:	Minimum lot width = 75’, minimum lot depth = 115’, minimum lot size = 8,625 square feet. Special standards allow 7,500 square foot lots.
Setbacks:	Front = 25’, Rear = 20’, Sides = 8’ total 20’, waterbody = 30’.
Existing location of zoning district	1. Beachside south of Granada Boulevard, between South Atlantic Avenue and Riverside Drive. 2. Mainland – Beach Street to US1, Central Park area, subdivisions near Granada Boulevard. 3. Breakaway Trails (planned development overlay). 4. Ormond Lakes (planned development overlay).
Staff analysis:	This zoning district requires a lot area of 8,625 square feet. The R-3 zoning district is the core single-family residential development zoning district. Staff would not recommend the use of this zoning district for the Tomoka Reserve property because of the smaller lot sizes allowed.

EXHIBIT 8: PRD, Planned Residential Development zoning district

Section 2-35. PRD, Planned Residential Development	
Purpose:	The purpose of the PRD, Planned Residential Development District classification is to provide more flexibility with regard to land use, density and dimensional standards, and other requirements of this Land Development Code, to encourage developments that incorporate innovative concepts of site planning, coordinated architectural and functional design, higher level of amenities, increased amounts of open space, recreation and landscaping, and a better living environment overall.
Density:	Site specific holding analysis required.
Maximum building height:	Specified within the development order.
Lot requirements:	Specified within the development order.
Setbacks:	Specified within the development order.
Existing location of zoning district:	1. Tomoka Reserve (vacant); 2. Pineland. 3. Southern Pines, 4. River Oaks. 5. Tattersall (vacant). 6. Chelsea Place. 7. Ormond Grande. 8. Cupola at Oceanside. 9. Cypress Trails.
Staff analysis:	The Planned Residential Development zoning district was formerly an overlay and became its own zoning district in 2004. The zoning district allows design flexibility, requires a holding capacity analysis for density, additional preservation areas, recreational areas, and common open space. The Planned Residential Development zoning district is a negotiated zoning district. This is the existing zoning on the Tomoka Reserve property.

The Land Development Code provides a list of compatible zoning districts that is discussed above. In Planning staff's opinion, the R-2.5, Single-Family Low-Medium Density and R-3, Single-Family Medium Density zoning districts are not appropriate for the Tomoka Reserve property based on smaller lot sizes and lack of consistency with the surrounding residential properties. The R-1, Residential Estate zoning district is a larger lot zoning district of 20,000 square feet that has historically been used along the Halifax River and the Atlantic Ocean. If the intent of the zoning map amendment is to require larger lots, this zoning district would allow just over two units per acre.

The Exhibit below reviews zoning development standards of the proposed zoning district (R-2, Single-Family Low Density) and the existing zoning district (PRD, Planned Residential Development).

EXHIBIT 9: Zoning standards of existing and proposed zoning districts

Standard	R-2 zoning	PRD zoning
Lot Size:	100’ lot width – 10,000 square feet lot area	R-2, Single-Family Low-Medium Density zoning district used as a basis. Can seek varying lot sizes
Setbacks:	Front yard setback of 30’, rear yard setback of 25’, side yards setbacks of a minimum of 8’ to total 20’ between both setbacks, and a side corner setback of 20’	Established within the development order
Building coverage:	35%	Established within the development order
Building height:	30’	Established within the development order
Natural preservation:	15% required	20% required
Buffer area:	6’ buffer abutting single-family residential development	Established within the development order
Perimeter setback required:	Not required	40’
Recreation facilities:	Not required	90 square feet per lot
Off-site improvements:	Not required	Can be negotiated as part of the development order
Architectural standards:	Not required	Required
Fence standards:	Not required	Required

In the public hearings regarding the applicant’s application to develop the golf course land under PRD, Planned Residential Development zoning, many speakers, including the applicant’s representatives, and members of the Planning Board and City Commission all acknowledged that the Tomoka Oaks golf course property is a one-of-a-kind property with a unique history and community characteristics. It is significant to note that, historically, there does not appear to have been a similar type of development in Ormond Beach. The proposed development of the golf course land is unique. It is one-of-a-kind, and it poses significant challenges.

A common theme at each of the public hearings for the PRD development application

was that the Planned Residential Development zoning is the most appropriate zoning under which development of the golf course land should occur. Development of the golf course land under PRD, Planned Residential Development zoning is better suited to accomplish the goals and objectives of the City's Comprehensive Plan and Land Development Code regulations. The opinion of the Planning staff is that the existing PRD, Planned Residential Development zoning is the most appropriate zoning for the Tomoka Oaks golf course property.

SECTION 7, CRITERIA FOR REZONING:

Section 1-15(d)(3) of the Land Development Code provides that nonplanned development rezonings shall be reviewed based on the development order criteria contained in subsection (e) of that section. It is important to note that many of the development order criteria envision a site plan or some type of development. A zoning map amendment does not include a site plan or development plan. A zoning map amendment in essence changes colors on the zoning map that would then allow a menu of options as conditional, and Special Exception uses, and specific dimensional standards. An analysis of the applicant's request to rezone the subject property from PRD, Planned Residential Development to R-2, Single-Family Low-Density zoning district is provided below:

1. **The proposed development conforms to the standards and requirements of this Code and will not create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare, or quality of life.**

   The applicant asserts (ATTACHMENT 3) that the development of the golf course property under R-2 zoning would result in density of the development that is identical to adjacent properties. The existing Planned Residential Development zoning provides an opportunity to harmonize the development standards and impacts from the development of this unique piece of land in a manner that will lessen adverse impacts on other properties. It should be noted that a specific site development plan is not included as part of the applicant's rezoning application (and one is not required), notwithstanding the applicant's stated intention to develop the golf course land in accordance with the proposed development plan that was submitted under the PRD, Planned Residential Development zoning. It should be noted that upon remand to the Planning Board of the PRD, Planned Residential Development development application, the City Commission expressed concern regarding negative impacts from the proposed development. The PRD, Planned Residential Development zoning best satisfies this condition.

2. **The proposed development is consistent with the Comprehensive Plan.**

   The property is designated "Low Density Residential" on the City's Future Land Use Map. The Future Land Use Element of the Comprehensive Plan states:

   Low Density Residential (LDR)

   Purpose: To protect and encourage the continued development of typical single-family residential areas and stabilize and protect the character of such neighborhoods. Institutional uses may be permitted in accordance with the maximum floor area ratio.

Density: up to 4.3 units per acre

Maximum FAR: 0.2

The following is a list of the Comprehensive Plan Objectives and Policies pertaining to the proposed residential development:

Future Land Use Element

GOAL 1. LAND USE DISTRIBUTION

FUTURE DEVELOPMENT AND REDEVELOPMENT ACTIVITIES SHOULD BE DIRECTED IN APPROPRIATE AREAS AS DEPICTED ON THE FUTURE LAND USE MAP TO MEET THE LAND USE NEEDS OF THE ANTICIPATED POPULATION, IN A MANNER CONSISTENT WITH SOUND PLANNING PRINCIPLES, THE GOALS, OBJECTIVES AND POLICIES CONTAINED HEREIN, AND THE DESIRED COMMUNITY CHARACTER.

THE FUTURE LAND USE ELEMENT SHOULD ALLOW LIMITED COMMERCIAL EXPANSION, PROMOTE INDUSTRIAL USE, AND MAINTAIN CURRENT RESIDENTIAL DENSITIES IN THE CORE AREA WHILE ESTABLISHING LOWER DENSITIES IN THE PERIMETER AREAS, FOCUSING REDEVELOPMENT IN THE DOWNTOWN COMMUNITY REDEVELOPMENT AREA, US1, AND SRA1A, AND PROVIDING FOR A CONTINUED HIGH LEVEL OF OPEN SPACE. FUTURE GROWTH SHALL BE TIMED AND LOCATED TO MAXIMIZE EXISTING PUBLIC INFRASTRUCTURE.

OBJECTIVE 1.1. RESIDENTIAL LAND USE

Ensure the availability of adequate lands to meet the residential land use needs of the community.

POLICY 1.1.3.

Preserve the character of existing neighborhoods by not allowing intrusion of land uses that would threaten to alter the neighborhood character and by encouraging voluntary rehabilitation and sound maintenance programs in viable neighborhoods which are capable of self-renewal and establishing code enforcement or public redevelopment activities in areas not capable of self-renewal.

POLICY 1.1.5.

Encourage innovative design measures for new residential developments and ensure that adequate provision is made for neighborhood facilities suitable to the type of development proposed.

POLICY 1.1.6.

Provide the opportunity, through zoning and other land use controls, for the development of a variety of housing types (i.e., single-family, duplex, townhouse, multi-family) in both conventional, planned unit and cluster type developments, that will meet the varied needs of the citizens of Ormond Beach.

POLICY 1.1.14.

Enhance community livability in the central core and older sections of the City by encouraging infill as appropriate, transit-oriented development, and walkable residential areas.

POLICY 2.4.7.

Encourage cluster development which promotes the efficient use of open space and reduces development costs, in areas where services and facilities exist or are planned.

Housing Element

GOAL 1. HOUSING SUPPLY

ENSURE THE AVAILABILITY OF SAFE AND ADEQUATE HOUSING UNITS OF DIFFERENT TYPES, SIZES, AND PRICE RANGES TO MEET THE NEEDS OF ALL CURRENT AND FUTURE RESIDENTS.

OBJECTIVE 1.1. HOUSING SUPPLY

The City shall continue to facilitate the private production of a housing supply, including adequate sites for mobile homes or manufactured housing and low and moderate-income housing, which will meet future community needs and offset housing deficiencies as noted in this Element.

OBJECTIVE 1.2. PROVISION OF ADEQUATE SERVICES AND FACILITIES

Each existing housing development and residential neighborhood along with all new housing development shall meet the existing adopted level of service standards.

POLICY 1.2.1.

The general residential development pattern in the city should be in accord with the community's growth strategy for residential densities, as stipulated within the Future Land Use Element.

The R-2, Single-Family Low Density, and existing PRD, Planned Residential Development zoning are consistent with the "Low Density Residential" land use. The zoning districts of R-1, R-2.5, and R-3 are also consistent. However, the goal of the zoning map amendment is to assign *the most appropriate* zoning based on the unique and special characteristics of the golf course land. It should be noted that upon remand to the Planning Board of the PRD, Planned Residential Development development application, the City Commission acknowledged that the PRD zoning is the most appropriate zoning for this unique, one-of-a-kind property, to mitigate negative impacts. The PRD, Planned Residential Development zoning designation best satisfies this condition.

3. The proposed development will not adversely impact environmentally sensitive lands or natural resources, including but not limited to waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells.

The zoning map amendment does not include a site development plan and this criterion is not applicable. The subject property does not have any on-site wetlands

and is not located within floodplain “A” or “AE”. Development of the Tomoka Oaks golf course property would require an environmental analysis.

4. **The proposed use will not substantially or permanently depreciate the value of surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties.**

   The applicant asserts that:

   > “Design of the project is intended to promote a residential neighborhood featuring a variety of aesthetically pleasing home types and design, in order to promote a diverse, architecturally rich neighborhood that will complement the existing variety demonstrated in the Tomoka Oaks neighborhood.”

   Although R-2, Single-Family Low-Density zoning district *may* be consistent with abutting residential development, the existing PRD, Planned Residential Development zoning district provides an opportunity to develop a *better* overall subdivision design with standards for recreation, open space, and natural preservation.

5. **There are adequate public facilities to serve the development, including but not limited to roads, sidewalks, bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds.**

   A zoning map amendment does not generally consider concurrency for public facilities, such as roads, utilities or schools. A zoning map amendment would eventually result in the applicant submitting preliminary and final plats that would include a concurrency review of all public facilities, including roads and traffic. However, it should be noted that during the public hearings on the applicant’s PRD, Planned Residential Development application, significant concern was expressed by residents regarding the ability of the existing road system, including the traffic circle, to accommodate additional traffic from the proposed development. Upon remand to the Planning Board of the PRD, Planned Residential Development development application, the City Commission expressed a desire that the adequacy of the existing road system within Tomoka Oaks subdivision be addressed.

6. **Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe. This finding shall be based on a traffic report where available, prepared by a qualified traffic consultant, engineer, or planner, which details the anticipated or projected effect of the project on adjacent roads and the impact on public safety.**

   A zoning map amendment does not consider traffic impacts because a site plan is not required. However, it should be noted that upon remand to the Planning Board of the PRD, Planned Residential Development development application, the City Commission expressed concern regarding ingress and egress, traffic, traffic patterns, and pedestrian safety.

7. **The proposed development is functional in the use of space and is aesthetically acceptable.**

   A zoning map amendment does not require or include a site plan. However, it should be noted that upon remand to the Planning Board of the PRD, Planned Residential Development development application, the City Commission expressed concern regarding the functional use of space.

8. **The proposed development provides for the safety of occupants and visitors.**

   A zoning map amendment does not require or include a site plan. However, it should be noted that upon remand to the Planning Board of the PRD, Planned Residential Development development application, the City Commission expressed concern regarding traffic, traffic patterns, and the safety of pedestrians.

9. **The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area.**

   A zoning map amendment does not require or include a site plan. This criterion would not be applicable to the zoning map amendment.

10. **The testimony provided at public hearings**.

    The testimony and evidence submitted at the public hearing may be considered.

SECTION 8, RECOMMENDATION:

Neighborhood meetings regarding the proposed Tomoka Reserve project began in the summer of 2021. The proposed development of the golf course land has undergone several public hearings before the Planning Board and City Commission for the issuance of a development order under the PRD, Planned Residential Development zoning. Members of the public, City staff, Planning Board, and City Commission have recognized the unique and special characteristics of the golf course land. After the City Commission voted to remand the matter back to the Planning Board, the applicant withdrew the PRD development application and is now seeking to amend the PRD, Planned Residential Development zoning to R-2, Single-Family Low Density. The developer intends to pursue development of the former golf course land under the R-2, Single-Family Low Density zoning district with the same or similar plans that the developer proposed under the PRD development application. The review of a development plan for the golf course under R-2, Single-Family Low Density zoning requires a technical administrative review by the City's Site Plan Review Committee and Preliminary and Final Plat reviews by the Planning Board or City Commission. Rezoning the golf course land to the R-2, Single-Family Low Density zoning district would eliminate the opportunity provided by PRD, Planned Residential Development zoning district to harmonize the challenges presented by the proposed development of the former golf course land in a manner that best satisfies the goals and objectives of the City's Comprehensive Plan and Land Development Code regulations.

The opinion of the City's Planning staff is that the existing PRD, Planned Residential Development zoning for the former golf course property should be preserved for the reasons stated in this staff report and based upon the unique characteristics of the property, including the existing developed residential pattern around the golf course property. Planning staff's opinion and recommendation is further supported by the analysis in this report and conclusions provided in criteria 1, 2, 4, 5, 6, 7 and 8, above.

It is recommended that the Planning Board **deny** the applicant's request to rezone the property from PRD, Planned Residential Development to the R-2, Single-Family Low Density and to maintain the existing PRD, Planned Residential Development zoning for the subject property.

Re: Triumph Oaks of Ormond Beach I, LLC
R-2 Rezoning – Tomoka Reserve
20 Tomoka Oaks Boulevard, Ormond Beach, FL

Dear Steven:

It is this Firm's pleasure to represent Triumph Oaks of Ormond Beach I, LLC (Owner) in connection with their request for R-2 Rezoning of the property located at 20 Tomoka Oaks Boulevard. Applicant intends to develop the 147+/- acre property as a residential development project, as further detailed in the project narrative statement included herein.

In connection with our SPRC Pre-Application meeting held on January 5, 2022, please find enclosed the following:

1. Project Narrative Statement;
2. Public Hearing Application;
3. Application fee in the amount of $3,150.00;
4. Notarized Authorization of Owner;
5. Sunbiz Information;
6. Property Appraiser Information Card;

7. Copy of Deed; and

8. Survey/Legal Description.

* * * * *

If you have any questions regarding this request, please don't hesitate to contact me. We look forward to working with you and your staff on this project. We look forward to receiving staff comments as they are available.

Sincerely,

Robert A. Merrell III

a. The proposed development conforms to the standards and requirements of this Land Development Code and will not create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare or quality of life.

1. *The proposed rezoning requests a density of development that is identical to directly adjacent properties. The existing Tomoka Oaks neighborhood is comprised of 584 single family residential units under the R-2 zoning designation. The proposed rezoning is consistent with the density set forth in the City's Comprehensive Plan for Low Density Residential land uses, which provides for up to 4.3 units/acre.*

   The proposed rezoning does not create undue crowding - the proposed development revitalizes a piece of property formerly used as a failed golf course and provides residential development compatible with surrounding properties.

b. The proposed development is consistent with the comprehensive plan.

1. *The property is located within the Low Density Residential (LDR) Future Land Use Classification. The intent of the LDR classification is to "To protect and encourage the continued development of typical single-family residential areas and stabilize and protect the character of such neighborhoods." (emphasis added). The category allows a maximum density of up to 4.3 units per acre. The property is targeted for residential development under the Comprehensive Plan. The project will encourage the continued provision of single-family residential areas in areas where urban services exist to support the planned growth.*

2. *In addition to the compatibility with the existing future land use category, the proposed development is consistent with the following goals, objectives, and policies of the City's Comprehensive Plan:*

   POLICY 1.1.6. Provide the opportunity, through zoning and other land use controls, for the development of a variety of housing types (i.e., single-family, duplex, townhouse, multi-family) in both conventional, planned unit and cluster type developments, that will meet the varied needs of the citizens of Ormond Beach.
   Response: The proposed development is an infill project designed to create additional housing opportunities for residents in an area where urban services are readily available. The conceptual development would promote compatibility with surrounding home sites on the exterior of the property and allow for additional housing opportunities.

   POLICY 1.1.7. Continuously review and modify development and building regulations to provide for sound residential communities and quality housing.
   Response: The proposed development will be designed and constructed in accordance with the latest development and building regulations at the local and state level, to ensure that the development is comprised of residential homes of a quality and character that will promote a long-lasting, aesthetically pleasing residential neighborhood in one of the City's

core areas, with a community association that will ensure continued protection of the values and aesthetics of the existing and proposed homes.

POLICY 1.1.14. Enhance community livability in the central core and older sections of the City by encouraging infill as appropriate, transit oriented development and walkable residential areas.
Response: The proposed residential development is a residential infill project that repurposes a former golf course property into a walkable, compatible residential neighborhood that complements surrounding single family homes.

POLICY 2.2.1. The City shall limit urban sprawl by directing urban growth to those areas where public facilities and services are available.
Response: As noted herein, the proposed project is located in an area where existing services are in place to support the development.

POLICY 2.2.5. In order to protect natural resources, new development and redevelopment shall be encouraged to infill existing developed areas
Response: The proposed residential development is a residential infill project that repurposes a former golf course property into a walkable, compatible residential neighborhood that complements surrounding single family homes.

POLICY 2.4.10. Direct development towards existing residential communities and planned growth areas already served by infrastructure, to utilize resources that existing neighborhoods offer, thereby conserving open space and natural resources on the urban fringe.
Response: The proposed residential development is a residential infill project that repurposes a former golf course property into a walkable, compatible residential neighborhood that complements surrounding single family homes.

c. The proposed development will not adversely impact environmentally sensitive lands or natural resources, including, but not limited to, waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields and individual wells.

The property does not contain any wetland systems, and will be benefitted through the addition of stormwater treatment features, as outlined herein. Development of the property includes the design and use of modern stormwater treatment systems, which will facilitate the removal of phosphorus and nitrogen travelling into the Tomoka River, which is an impaired water body. Redeveloping the site through the use of dry ponds with existing vegetation will help promote the intake and filtration of stormwater and runoff from the property by retaining the water for treatment prior to its outflow into the river. Redevelopment of the site for residential uses will also remediate environmental impacts from the property's former use as a golf course, which can result in impacts to soil from the abundant application of pesticides and fertilizers. Redevelopment of the site will be in

accordance with a Soil Management Plan reviewed and approved by the Florida Department of Environmental Protection.

d. The proposed use will not substantially or permanently depreciate the value of surrounding property; Create a nuisance; Deprive adjoining properties of adequate light and air; or Create excessive noise, odor, glare or visual impacts on the neighborhood and adjoining properties.

   Design of the project is intended to promote a residential neighborhood featuring a variety of aesthetically pleasing home types and designs, in order to promote a diverse, architecturally rich neighborhood that will complement the existing variety demonstrated in the Tomoka Oaks neighborhood.

e. There are adequate public facilities to serve the development, including, but not limited to, roads, sidewalks, bikepaths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools and playgrounds.

   Adequate public services exist to support the proposed development.

f. Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe. This finding shall be based on a traffic report where available, prepared by a qualified traffic consultant, engineer or planner which details the anticipated or projected effect of the project on adjacent roads and the impact on public safety.

   A traffic impact analysis has been submitted for the proposed development that addresses the transportation needs associated with this development.

g. The proposed development is functional in the use of space and aesthetically acceptable.
h. The proposed development provides for the safety of occupants and visitors.
i. The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area.

   g-i. The rezoning will require compliance with all City requirements for site design and layout under the R-2 zoning designation.

j. The testimony provided at public hearings – *To be determined at time of hearing.*

3	4	5.	6.	7.	8.	9.			
Maximum Building Coverage	Maximum Impervious Lot Coverage	Minimum Lot Size	Minimum Lot Width	Minimum Lot Depth	Minimum Perimeter	Setbacks			
						a. Front	b. Rear	c. Side	d. Street Side/Co
35%	75%	20,000 SF	100'	150'	None	30' (see Additional Front Yard Setbacks listed below)	25'	8' total 20'	20'

back shall be the average building setback of all existing single-family dwelling units within 300' of each side lot line of the lot on which s proposed to be located, minus 10', provided that in no event shall the front yard setback be less than thirty 30'. It shall include arated from the lot in question by any side streets. In the event no single-family dwelling units are located within three hundred feet d front yard shall be thirty feet (30'). For the purpose of this requirement, the three hundred feet (300') shall be measured along a t-of-way line, beginning at the corner of the lot nearest the direction being measured (e.g., for three hundred feet (300') north, begin ding any street rights-of-way within the three hundred-foot (300') distance.

han one principal structure, as defined in Chapter 1, Article III, Section 1-22, located on any adjacent lot within the 300', only the re nearest the front property line will be used to calculate the applicable setback. Principal structure means any structure that is defined in this Land Development Code.

s 9.a.(1) and 9.a.(2) of this section, a single-family dwelling unit that is proposed to replace an existing single-family dwelling unit may the same building footprint and height as the dwelling unit that it is replacing.

s 9.a.(1) through 9.a.(3) of this section, a structure may encroach into a required front yard setback provided that the new structure is um viewing angle to the right-of-way of not less than 110 degrees from the closest front corner and 130 degrees from the furthest cture on the adjacent lot, as depicted in Exhibit 9.a., and the 30' setback is met.

n 3-15, Coastal Management, shall extend beyond a line projected between the average setback of all buildings within 800' of each ch the proposed building is to be constructed or within a building setback otherwise established under Florida Statutes or Chapter 3, ent Code, whichever is greater. Such line shall run parallel with the street right-of-way line; or

tage Lots (Excluding Oceanfront):

ack from the mean or ordinary high-water line for properties abutting a waterbody shall be the average building setback of all units within 300' of each side lot line of the lot on which the single-family dwelling unit is proposed to be located, minus 5', or as orida Statutes or Chapter 3, Article II, Section 3-16 of this Land Development Code, Surface Waters and Marine Life Habitat, whichever event shall the setback be less than 30'. The rear yard setback line may meander to follow the mean high-water line.

an one principle structure, as defined in Chapter 1, Article III, Section 1-22, located on any adjacent lot within the 300', only the re nearest the mean or ordinary high-water line will be used to calculate the applicable setback. Principle structure means any principle use as defined in this Land Development Code.

a. and b. of this section, a single-family dwelling unit that is proposed to replace an existing single-family dwelling unit may be built e building footprint and height as the dwelling unit that it is replacing.

s a. through c. of this section, a structure may encroach into a required waterfront yard setback provided that the new structure is so viewing angle to the waterway of not less than 110 degrees from the closest front corner and 130 degrees from the furthest front on the adjacent lot, as depicted in Exhibit 9.e., and the 30' setback is met.

of Sanchez Avenue and north of the centerline of Lorillard Place.

---

backs for any lot of record as of October 3, 1989, and to which these regulations apply, shall not be less than the average building setback of all units within three hundred feet (300') of each side lot line of the lot on which the single-family dwelling unit is proposed to be located provided etback be less than thirty feet (30'). It shall include single-family dwelling units separated from the lot in question by any side streets. In the even located within three hundred feet (300') of both sides, the required front yard shall be thirty feet (30'). For the purpose of this requirement, the easured along a line parallel with the street right-of-way line, beginning at the corner of the lot nearest the direction being measured (e.g., for th at northeast corner), and including any street rights-of-way within the three hundred-foot (300') distance.

han one principle structure, as defined in Chapter 1, Article III, Section 1-22, located on any adjacent lot within the 300', only the setback of the front property line will be used to calculate the applicable setback. Principle structure means any structure that is occupied by a principle use a ent Code.

s 9.a.(1) and 9.a.(2) of this section, a single-family dwelling unit that is proposed to replace an existing single-family dwelling unit may be built to ding footprint and height as the dwelling unit that it is replacing.

s 9.a.(1) and 9.a.(2) of this section, a structure may encroach into a required front yard setback provided that the new structure is so located as e to the right-of-way of not less than 110 degrees from the closest front corner and 130 degrees from the furthest front corner of the closest st d in Exhibit 9.a., and the 30' setback is met.

Management, shall extend beyond a line projected between the average setback of all buildings within 800' of each side lot line of the lot upon constructed or within a building setback otherwise established under Florida Statutes or Chapter 3, Article II of this Land Development Code, shall run parallel with the street right-of-way line; or

tage Lots (Excluding Oceanfront):

ack from the mean or ordinary high-water line for properties abutting a waterbody shall be the average building setback of all existing single-fa ch side lot line of the lot on which the single-family dwelling unit is proposed to be located, minus 5', or as otherwise established under Florida Section 3-16 of this Land Development Code, Surface Waters and Marine Life Habitat, whichever is greater, provided that in no event shall the ear yard setback line may meander to follow the mean high-water line.

an one principle structure, as defined in Chapter 1, Article III, Section 1-22, located on any adjacent lot within the 300', only the setback of the mean or ordinary high-water line will be used to calculate the applicable setback. Principle structure means any structure that is occupied by a Land Development Code.

s a. and b. of this section, a single-family dwelling unit that is proposed to replace an existing single-family dwelling unit may be built to the sam ootprint and height as the dwelling unit that it is replacing.

s a. through c. of this section, a structure may encroach into a required waterfront yard setback provided that the new structure is so located a e to the waterway of not less than 110 degrees from the closest front corner and 130 degrees from the furthest front corner of the closest stru d in Exhibit 9.e., and the 30' setback is met.

Sec. 2-35. - PRD, Planned Residential Development District.

(a) *In general.* The purpose of the PRD, Planned Residential Development District classification is to provide more flexibility with regard to land use, density and dimensional standards, and other requirements of this Land Development Code, to encourage developments that incorporate innovative concepts of site planning, coordinated architectural and functional design, higher level of amenities, increased amounts of open space, recreation and landscaping, and a better living environment overall.

(b) *Permitted uses.*

(1) *Residential uses.*

a. Permitted uses within PRD districts include all permitted uses listed under the particular zoning district regulations of the district in which the planned development is located.

b. More intense uses (e.g., townhouses in a single-family district, or apartments in a townhouse district) may be allowed, provided that their visual and functional impact on neighboring districts is minimized by providing adequate buffering and screening, and all the requirements of this section are met.

c. Multifamily structures may also be allowed in PRD districts that are in single-family districts, provided that the multifamily structures and associated parking areas are not within two hundred feet (200') of any single-family district adjoining the planned development.

d. For those developments proposed within the SR district, the requirements of that district must also be met.

(2) *Other uses.* The following uses may be allowed in a PRD district, provided that the requirements of article IV of this chapter, conditional uses and special exceptions, and this section are complied with:

a. Clubs and recreation facilities to serve the residents of the project.

b. Daily needs retail and services.

c. Houses of worship.

d. Public schools and parks.

e. Public uses.

Compatible neighborhood commercial facilities and office uses may be permitted within PRDs having a minimum size of thirty (30) acres; however, no more than twenty percent (20%) of the gross area shall be devoted to these uses, including parking. For the purpose of planned development review, the determination of compatible commercial shall be based on the architectural and spatial design of the proposed facility compared to that of the total development and the relationship of the proposed facility to the retail needs of the planned development

residents. Such commercial uses are limited to those listed as principal permitted uses in the B-2, Neighborhood Commercial District. For those developments encompassing land already zoned commercial, a wider range of interpretation will be granted to permit and encourage compatible development. In addition to having adequate access to the thoroughfare system, such commercial area shall, when possible, have internal access to serve the residents of the planned development.

(c) *Density.*

(1) *Allowable densities.* The maximum allowed gross density level of a planned residential development shall vary according to the land use classification assigned to the property on the city's adopted future land use map, subject to the provisions of this section. Where more than one (1) land use classification is included in the project, the least-dense classification shall apply.

(2) *Density bonus.* Except within the SR district, any planned development may qualify for a density increase of up to twenty percent (20%) over the allowed density, as based on the adopted future land use map, provided that the increase will not create the following adverse situations:

a. Adverse impact on neighboring sites or subject site;

b. Traffic congestion in the streets which adjoin the development; or

c. An excessive burden on sewerage, water supply, parks, recreational areas or other facilities which are proposed to serve the development.

(3) *Density and project phasing.* Where a PRD is proposed to be constructed in phases, at no point in the development of the project shall constructed density exceed the overall density per acre approved for the entire project.

(4) *Holding capacity; density.* Density determined in subsection (c)(1) of this section is for gross density purposes only. A more refined methodology for determining the holding capacity of a particular site proposed for development is derived from a three-tiered system based on soil characteristics related to the high seasonal groundwater tables (as derived from the SCS soil classification study); flooding potential as noted on the FEMA, FIRM maps; and the availability of central water and/or central sewer facilities. Table 2 illustrates the relationship between environmental constraints and water and sewer availability when calculating density. This table lists the coefficients for determining density in a matrix.

The procedure for determining holding capacity is as follows:

Step 1: Applicant prepares environmental constraints map for the parcel proposed for development;

Step 2: Calculate the acreage of property within each particular environmental constraints category;

Step 3: Multiply the acreage in each category by a coefficient determined by site-specific environmental constraints and availability of water and sewer as noted in table 2.

Step 4: Sum the totals for each category to achieve the holding capacity for the parcel in terms of maximum potential density.

Once the holding capacity is determined, the developer must prepare plans that are consistent with the holding capacity and environmental constraints of the subject property.

Five (5) distinct environmental constraint categories have been identified and are described below, together with their density allocations.

a. *Very Low.* Areas that lie within the 100-year floodplain and where the seasonal high water table is at or above the surface or areas outside of the 100-year floodplain where the seasonal high water table is six inches (6") or more above the surface. Here, the constraints are seen as being severe, with associated environmental impacts too damaging for community development. Areas in this category are, for the most part, the riverine wetlands and cypress swamps interspersed among the pine flatwoods. Representative soils include the various mucks associated with the wetlands and more established cypress systems. A nominal standard of 0.2 units to the acre (one (1) unit per five (5) acres) is assigned as the maximum achievable density for this category, regardless of the availability of central utilities (facilities are not planned for these areas). In some cases, it is conceivable that a single development site could be located within a five-acre parcel classified entirely as "very low." However, a more likely scenario, particularly for larger parcels, would be the transfer of the density allocation to the more buildable areas of the site.

b. *Low.* Includes soil types with a seasonally high water table that, at times, will reach and exceed the surface. This category includes land that falls within designated 100-year floodprone areas and has a seasonal high water table that does not reach the surface and is not greater than six inches (6") below the surface, or lands where the water table will occasionally be at or above the surface (zero (0) to six inches (6") above) but, for various reasons, is not designated as a 100-year floodprone area. The low category encompasses the more subtle depressional features among the flatwoods. The pine/cypress vegetative community and the depressional variety of the Pomona, Immokalee, and Myakka soil series commonly occur in this category. These lands can tolerate a certain amount of mitigated modification without irreversible environmental damage. The maximum density value for this category is 0.5 units per acre (one (1) unit per two (2) acres) regardless of the availability of utilities. As with the very low category, these levels of development can be achieved only under the ideal circumstances consistent with the criteria for protection of

wetlands that typically occur within this soil category. Therefore, development is not likely to occur at assigned densities within these areas but will probably be transferred to other more suitable on-site uplands.

c. *Medium Low.* These are areas that are within the 100-year floodplain and the seasonal high water table is greater than six inches (6") to twenty-four inches (24") below the surface or those areas that are outside of the floodplain and the seasonal high water table does not reach the surface and is not greater than six inches (6") below the surface. Density ranges in this category are one (1) unit per two (2) acres without infrastructure; one (1) unit per acre with central water only; and three (3) units per acre with both central water and sewer. Depending upon actual vegetative system conditions, these areas may be suitable for limited development or for open space uses with on-site density transfer to more suitable areas.

d. *Medium.* The criteria for designating lands in the medium category is the seasonal high water table greater than six inches (6") below the surface to twenty-four inches (24") below and outside of floodprone areas or is twenty-four inches (24") or greater below surface if in floodprone area. Extensive areas in the western and southern portion of the Pamlico Terrace are in this category. Due to the nearly level terrain in those areas within the floodplain, the water table hovers near the surface for two (2) to three (3) months a year. However, with proper drainage design and adequate infrastructure, development potential can reach up to four (4) units per acre with central water and sewer; one (1) unit per two (2) acres with no central utilities; and two (2) units per acre with central water only. Planned unit developments, with net densities in excess of one (1) unit per acre utilizing either well or septic or one (1) unit per two (2) acres utilizing well and septic may be allowed provided that minimum lot size requirements are not reduced, to achieve maximum potential density. Instead, transfer of density to a portion of the site serviced by a central system will be allowed, provided the proposed development is consistent with the zoning district requirements, level-of-service standards, and compatible with the natural resources.

e. *High.* This category includes lands that are not within a floodprone area and have a water table deeper than twenty-four inches (24") below the surface. These lands generally consist of deep sandy soils and are the most suited for community development. They are in relatively short supply due to the prevailing high water tables and floodprone conditions in the undeveloped perimeter areas of the city and the early development of the deep, sandy ridge areas. Representative soils of this category include the Tavares, Daytona, and DeLand series. Up to six (6) units to the acre (roughly the equivalent of duplex or zero-lot-line development on five thousand (5,000) square foot lots) is achievable with central utilities. With central water only, the maximum density would be

three (3) units per acre if that could be achieved under health department septic standards. The location of package plants is acceptable in the medium and high categories for planned unit developments at the higher densities (e.g., greater than one (1) unit per acre) on an interim basis only where it is not economically feasible (due to and/or sewer service at the time of development. In these cases, the development shall be dry-lined and impact fees paid in advance or bonded for. Without central sewer or water, the maximum density is one (1) unit per two (2) acres (project size in relation to line extension distances) to connect to central water.

Table 1. Density Determinations

Development Potential	None	Water Only*	Water and Sewer
Very Low	0.2	0.2	0.2
Low	0.5	0.5	0.5
Medium Low	0.5	1.0	3.0
Medium	0.5	1.0	4.0
High	0.5	1.0	6.0

* For purposes of computing maximum potential density only; a minimum lot size of 1 acre is required for any development utilizing septic tanks. Connection to central sewer will be required whenever line extensions and appurtenances thereto are deemed economically feasible.

Table 2. Characteristics of Environmental Constraint Categories

Environmental Constraints	100-Year Floodplain	Seasonal High Water Table
Very Low	N/A	At or above the surface
Low	IN	0.1" to 6" below surface

Medium Low	IN	6" to 24" below surface
	OUT	0.01" to 6" below surface
Medium	IN	24"+ below surface
	OUT	6" to 24" below surface
High	OUT	24" + below surface

(d) *Dimensional requirements.*

(1) *Minimum parcel size.*

a. Five acres: SR, R-1, R-2, R-2.5, R-3.

b. One acre: R-4, R-5, R-6.

(2) *Maximum building height.* The maximum building height for a proposed PRD district shall be based on the existing zoning district regulations in which the residential development is located, except that one (1) additional story may be allowed for structures located at least one hundred feet (100') from any development perimeter boundary line abutting a district having a lower height limit. In no case shall any building height exceed seventy-five feet (75') when measured from the average median lot elevation to the highest point of any structure and/or attached services.

(3) *Setbacks.* All structures shall be set back a minimum of forty feet (40') from the project's perimeter boundaries unless natural or manmade features, such as lakes, creeks, wooded or conservation areas are present. Where a project abuts a collector or arterial street, the setback requirement may be increased if an effective buffering treatment cannot be provided between the street and residential use.

(4) *Minimum building spacing.* Building setbacks shall comply with the individual district requirements. Given the possibilities of innovative architectural design, the city commission may alter the minimum for specific designs, provided that the original intent of the spacing requirements is maintained.

(e) *Interior road system.*

(1) All single-family attached and detached dwelling units on individually platted lots shall have access to a street meeting all street standards; provided, however, that up to three (3) dwelling units may utilize a common driveway as long as spatial requirements for parking in chapter 3, article III of this Land Development Code are met.

(2) All streets shall meet all street standards for construction and size, including a commonly-owned easement that meets the normal right-of-way requirements for a street. Some of these requirements may be waived or the right-of-way width may be reduced to forty feet (40') if the streets are proposed as private streets, or if the traffic volume in those streets is two hundred average daily trips (200 ADT) or less.

(3) When a planned development proposes a street which would be a logical extension of the city's collector or arterial street system, the city may require an increase in the right-of-way and/or pavement width and increased construction standards, as necessary.

(f) *Off-street parking.* The off-street parking requirements of chapter 3, article IV of this Land Development Code shall be complied with except as follows:

(1) *Single-family dwelling.*

a. The width of the driveway for an individual dwelling unit may be tapered to below the required width if it is clearly shown on the plan that each automobile may be easily maneuvered for ingress and egress without requiring the relocation of the other vehicle.

b. Up to three (3) single-family cluster-type dwelling units with two-car (2) garages may utilize a common access driveway, provided that the dwelling units shall meet the general parking requirements, and the common utilized portions of the driveway shall not be less than twenty feet (20') wide.

c. For each single-family dwelling located on a forty-foot (40') right-of-way street with a two-car (2) garage, one (1) guest parking space per four (4) dwellings shall be provided. For single-family dwellings with less than a two-car (2) garage, one (1) guest parking space per two (2) dwelling units shall be provided.

d. Guest parking shall be distributed throughout the development to adequately serve all dwelling units.

(2) *Multifamily dwelling.*

a. If garages are provided, the requirements of this section for single-family dwellings shall apply.

b. One (1) guest parking space shall be provided for each two (2) dwelling units, provided, however, if the deed restrictions and covenants prevent the assignment of more than one (1) parking space to each dwelling unit, one (1) guest parking space shall be provided for each four (4) dwelling units.

c. Common parking areas are only allowed in conjunction with multifamily structures or other developments under single or condominium ownership. The land for the common parking area shall not be subdivided from the land which contains the structures it serves. All common parking lots shall be built to the construction standards utilized for streets.

(3)

Offices.

a. One (1) parking space for each of the following:
    1. Two hundred (200) square feet of gross floor area on the first floor;
    2. Two hundred fifty (250) square feet of gross floor area on the second story; and
    3. Three hundred (300) square feet of gross floor area on additional stories; or

b. Vehicle parking deferral. To avoid requiring more parking spaces than is actually needed to serve a development, the city may defer the provision of some portion of the off-street parking spaces required by this Land Development Code if previous experience within the city for such a case or information supplied by the developer suggests that the required number of parking spaces may not be necessary. In such a case, the developer shall provide a deferred parking plan in accordance with the following criteria:
    1. Shall be designed to contain sufficient space to meet the full parking requirements of this Land Development Code, shall illustrate the layout for the full number of parking spaces, and shall designate which are to be deferred.
    2. Shall not assign deferred spaces to areas required for landscaping, transition zones, setbacks, or areas that would otherwise be unsuitable for parking spaces because of the physical characteristics of the land or other requirements of this Land Development Code.
    3. Shall describe how the area of deferred parking plan would remain and be maintained in its natural state, and shall include a landscaping plan for the deferred parking area.
    4. Shall include a written agreement with the city that the deferred spaces will be converted to parking spaces that conform to this Land Development Code at the developer's expense should the city determine from experience that the additional parking spaces are needed.
    5. Shall include a written agreement that the developer shall incur the expense of a traffic study to be undertaken by a registered transportation engineer to determine the advisability of providing the full parking requirement should the city determine from experience that the additional parking spaces are needed.

When presented with evidence that the parking is inadequate, the city shall request a study to determine the need of providing the full parking requirement to satisfy the proven demand for parking as discussed in subsection (f)(3)b.5 of this section. Based upon the study and the recommendations of the transportation engineer, the director of planning, the planning board, and the city commission shall determine if the deferred spaces by the developer or retained as deferred parking area. The developer may, at any time, request that the city approve a revised development plan to allow converting the deferred spaces to operable parking spaces.

(g) *Landscaping and utility lines.*

(1) All common open space, parking lot islands, and all land not otherwise developed shall be landscaped in a manner that enhances the appearance of the project.

(2) An underground irrigation system shall be installed in all landscaped areas of the planned development. After installation, the system shall be regularly used and maintained. Landscaped buffer areas shall be provided as required in chapter 3, article I of this Land Development Code, if applicable.

(h) *Recreational facilities.* Areas for passive and active recreation shall be provided. Such areas shall be designed and improved to serve their intended use and shall reflect the recreational needs of the residents of the development. Recreational areas shall meet the following minimum requirements:

(1) They shall be located and designed with adequate access to encourage use by the residents;

(2) Active indoor or outdoor recreation areas, such as swimming pools or community buildings, shall be designed to serve a maximum of three hundred (300) dwelling units;

(3) Thirty (30) square feet of indoor recreation floor area, including exercise rooms, all-purpose space, dining areas and similar uses shall be provided for each dwelling unit, unless waived by the city commission and replaced at a minimum as follows:

a. Subdivisions of two hundred (200) dwelling units or less may provide, at a minimum, an additional thirty (30) square feet per unit of outdoor active recreation space in compliance with this section in lieu of the indoor recreation floor area requirement;

b. Subdivisions that do not provide indoor recreational facilities are not eligible for park and recreation impact fee credits;

c. The open space and/or additional outdoor facilities must be compatible with adjacent properties and the recreational facilities must be consistent with the needs of the project;

d. The planning board and city commission determine, after reviewing the proposed development plan, that the preservation of natural resources and/or provision of additional recreation facilities is appropriate and that indoor recreational facilities can be waived;

(4) Sixty (60) square feet of outdoor active recreation space (exclusive of parking, landscaping, retention/detention ponds and other site features), including pools, pool decks, shuffleboard courts, tennis courts and fishing piers and similar uses, shall be provided for each dwelling unit. Impact fee credits for any specific outdoor recreation site shall be limited to three hundred (300) dwelling units;

(5) Recreation sites which include indoor and outdoor activities shall comply with all general site plan design and construction standards with regard to buffer areas, landscaping, interior landscaping, parking arrangement, lighting, signing, and drainage. Up to fifty percent (50%) of

the required parking may be designed as overflow spaces;

(6) The minimum parcel size of any single active recreational area shall be eight thousand (8,000) square feet in area and no less than eighty feet (80') in its smallest dimension. No designated active recreation area shall be closer than thirty feet (30') to a dwelling unit within the development at its closest point and shall be adequately buffered to reduce noise, glare and visual impacts on adjoining homesites. Active recreation facilities shall not be located in any required buffer area;

(7) Thirty (30) square feet of common accessible, open space shall be provided for each dwelling unit as follows:

a. Common open space shall be available to all the residents of the development. At the option of the developer, subject to the approval of the city commission, common open space may be dedicated to the use of the general;

b. Common open space must be adequately landscaped and irrigated;

c. Natural features worthy of preservation shall be left in a natural state;

d. Water bodies may be utilized to meet twenty-five percent (25%) of the available open space requirement, provided significant recreational use of the waterbody can be demonstrated. Water retention and wetlands areas may not be included in this calculation;

(8) Twenty percent (20%) of the project shall be left in a natural state. This may include designated conservation areas within lots or common areas, but shall not include classified wetlands and required upland buffers;

(9) One (1) on-site parking space shall be provided for each two hundred fifty (250) square feet of indoor recreation area and one (1) such space for each four hundred (400) square feet of active outdoor recreation area. If both types of recreation areas are located on the same site, only the indoor requirement must be met. Applicants requesting a waiver of indoor recreation facilities may request approval of an alternative parking plan as part of the planned residential development application. Alternative parking plans shall be reviewed for consistency with the city's comprehensive plan, this Land Development Code, the Americans with Disabilities Act (ADA) and other applicable regulations.

(i) *Supplemental requirements.*

(1) *Fences.*

a. If fences are not prohibited in the deed restrictions and covenants of the project, a schematic fencing plan shall be incorporated in the development plan.

b. The fencing plans shall clearly illustrate the types of fencing to be allowed and the locations of gates to provide access for safety personnel.

c. Provisions to ensure adequate maintenance of fencing shall be incorporated into the homeowners' association documents.

(2) *Lighting.* Where necessary, additional lighting may be required to supplement street lighting. Where required, such lighting shall be shown on the development plan.

(3) *Deed restrictions and covenants.* No amendment to the deed restrictions and covenants which would alter the design or use of the property and structures shall be made without the written permission of the city.

(4) *Unity of title.* All land included within a PRD shall be under the control of the applicant, whether that applicant is an individual, partnership, or corporation, or group of individuals, partnerships or corporations. Applicants shall present evidence, at the time of application, of unified control of the entire area within the proposed development. The applicant shall provide:

a. An agreement to proceed with the proposed development according to all of the provisions of these regulations;

b. Agreements, contracts, deed restrictions and sureties acceptable to the city commission for completion of the development, or each approved phase of the development, according to the approved plans;

c. Agreements, through the establishment of a homeowners' association, for the continuing operation and maintenance of all such areas, functions, and facilities which are not to be provided, operated or maintained at expense, acceptable to the city commission;

d. An agreement to notify the city, at the same time the development owners are notified, of any proposed amendments to the homeowners' association; and

e. Assurance that binds the applicant's successors in title to any commitments made under subsections (i)(4)b, c and d of this section.

All such agreements and evidence of unified control shall be examined by the city attorney and no approval shall be granted without a certificate by the city attorney that such agreements and evidence of unified control meet the requirements of this section.

(j) *Application and review.*

(1) A written application, consistent with the requirements of article IV of this chapter for PRD shall be made to the planning department, using the application form provided by the city. The application shall be processed as required in chapter 1, article II, administration and enforcement.

(2) Applications shall include the following:

a.

Complete site plan submittal per chapter 4, article I of this Land Development Code, except that final engineering and construction drawings may be withheld pending the issuance of a development order by the city commission.

b. Documentation, including written explanations, drawings and illustrations, demonstrating conformance with subsection (j)(4) of this section.

c. Special studies including, but not limited to, traffic impact study, environmental assessment report, and holding capacity analysis as required by this Land Development Code.

(3) Following approval of rezoning to PRD and issuance of development order, the applicant may submit final site plan drawings or make application for preliminary plat approval in accordance with chapter 4, article II of this Land Development Code.

(4) In considering an application for a PRD, the planning board may recommend approval, approval with conditions, or disapproval and the city commission may base its conditions of approval or denial of the issuance of a development order on the extent to which the development offers site amenities above that normally found for permitted uses in the district with regard to the following:

a. Innovative site design.

b. Coordinated architectural design.

c. Open space, recreation, common areas.

d. Coordinated streetscape elements.

(k) *Adoption/amendments/expiration.* The PRD development order shall be adopted by the city commission in accordance with the provisions of chapter 1, article II of this Land Development Code.

(l) *Exceptions.* A PRD application involving land in the R-4, R-5 and R-6 zoning districts shall be subject to the following in lieu of the standards contained in this section:

(1) *Recreational standard.* None.

(2) *Parking standard.* In lieu of the general parking standards and subsection (f) of this section, the number of dwellings is limited by the requirement of one and one-half (1½) spaces per unit. If located on a transit route, the parking standard may be reduced to one (1) space per unit.

(3) *Setback standard.* Shall be based upon the underlying zoning district.

(Ord. No. 2015-46, § 1, 11-2-2015)

Re: Tomoka Oaks Proposed Golf Course R-2 Rezoning

Gentlemen:

I am submitting the attached resolution as legal counsel for Tomoka Oaks Homeowner's Association (Association). This request relates to the current request from the developer to rezone the entire parcel as R-2. My clients are opposed to the rezoning and intend to argue that the competent substantial evidence exists to mandate that any development be done as a planned development. This is based upon the unique location and development history of the property and adjacent lands.

Many of the members reside on the existing fairways and all of the members will be impacted by the proposed development as to issues related to traffic, buffering, impacts on property values, congestion and loss of open space.

The city code, in section 2-210, provides for intervention by affected parties in quasi-judicial hearings. Consequently, the Association seeks to intervene in the planning process and subsequent quasi-judicial proceedings as an intervenor with formal standing status as allowed by

the code. I am submitting a copy to Rob Merrell, legal counsel for the applicant, in order to determine if the applicant has any objection to this petition.

Please let me know if staff has any questions or comments about this petition.

Respectfully submitted,

Dennis K. Bayer

DKB/kh
Enclosure

RESOLUTION OF BOARD OF DIRECTORS OF TOMOKA OAKS HOMEOWNER'S ASSOCIATION

WHEREFORE, the issue of the Tomoka Oaks Homeowner's Association, Inc. ("TOHA") petitioning the city of Ormond Beach ("City") to allow it to intervene in the matter of the development of residences on the now-closed Tomoka Oaks golf course ("Development") in accordance with Section 2-210 of the City codes (("Code") has come before the Board of Directors of the HOA ("Board"); and

WHEREFORE, the Board of the HOA has reviewed the matter and has agreed to request intervention from the City;

WHEREFORE the Board voted by a majority to intervene, it is

RESOLVED AS FOLLOWS:

1. The Board of the HOA formally requests from the City that the HOA be allowed to intervene in the matter relating to the Development. The HOA requests that it be granted all powers and privileges provided under the Code.
2. The HOA requests that the City will confer the HOA as having standing to fully participate in all public hearings and attendant processes associated with the proposed development.

The Resolution approved this 17th day of May, 2022.

TOMOKA OAKS HOMOWNER'S ASSOCIATION, INC.

Subject:	Reject Zone Change of Tomoka Oaks Golf Course
Date:	Friday, December 22, 2023 4:31:47 PM

[External Email-Use Caution] - OB/IT Helpdesk

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Steven Spraker, Planning Board Members, City Commissioners and Mr. Mayor,

My name is Denise Corley. I have spoken at planning board meetings and at the Commissioners meeting in regards to the conversion of the open space of the Tomoka Oaks Golf course into a 272 lot gated community PDR.

Instead of substantially lowering the number of lots for the PDR, the developer has submitted a plan that is a direct refusal to listen to the community and elected officials.

Sec. 1-03. - Legislative purpose and intent.

The purpose of the city's Land Development Code is to provide land development regulations that implement the city's comprehensive plan. The comprehensive plan and this Land Development Code are tools that the leaders of the city shall use to protect and maintain a high quality of life for the citizenry of the city. Specifically, this Land Development Code is required to be consistent with the comprehensive plan's goals, objectives and policies concerned with land use; transportation; housing; recreation and open space; conservation; coastal management; public facilities including sanitary sewers, solid waste, drainage, potable water, as well as ground water recharge; intergovernmental coordination; and capital improvements. If any provision of this Land Development Code is found inconsistent with the comprehensive plan, the comprehensive plan shall prevail.

Is the golf course a "ground water recharging area"? How does the St. Johns Water Authority determine this? Is there a case to be made that the land has been Open Space for 60 years and because it is completely surrounded by homes it should remain Open Space and a ground water recharging zone and not hard surfaces as 317 homes would amount to.

I see the developer has hired a speciality lawyer, Karl J. Sanders now to cite city and state development land use laws against the city of Ormond Beach.
How someone who spent 2.6 million (not very much for 147 acres) can disrupt an entire community is what Land Use Codes are written for.

Not all development is good development.

What costs more: a lawsuit or all the expensive infrastructure problems that are going to come from allowing this Zone Change and plan to be approved.

Does Volusia County require wider roads to accommodate specific numbers of lots/houses using those roads as safe entrance and exits and evacuation routes?

#1. The number one issue is too many houses which equals too much traffic, overloading of all community facilities - hospitals, fire departments,police departments and schools.
Keep in mind this is not the only development to be built. Ormond Beach is going to be overwhelmed as soon as all these developments get built and especially what Daytona Beach is doing. Avalon development of 10,000 units!

#2. No evacuation route except through the existing neighbor also using the same exits for evacuation. There must be a way to reject an R-2 zoning on the basis of the lack of a proprietary entrance/exit.

#3. The land is toxic and needs remediation to be safe- this developer moved land in the demolition without any thought to the remediation. Below is the recommended remediation process for the soil on the golf course recommended by the Environmental Report. Who will over see that the remediation is done properly?

2. Soil Management Plan (SMP):
    a. Additional soil assessment within the former course greens is proposed to further define organochlorine pesticide (OCP) impacts. The submittal proposes stockpiling the upper two feet of unsaturated soil from each green into 1,000 cubic yard (cy) stockpiles. Each stockpile will be sampled for total and synthetic precipitation leaching procedure (SPLP) dieldrin and toxaphene analyses, and for total arsenic analyses at a frequency of 5 soil samples per 1,000 cy.
        i. Soil with dieldrin and/or toxaphene residential SCTL exceedances will be disposed of at a licensed landfill facility.
        ii. Soil with concentrations of dieldrin and/or toxaphene above the leachability SCTL but below the residential SCTL will be mixed with clean onsite soil and resampled. Once reuse sample results meet the leachability SCTL the soil will be managed based on corresponding arsenic concentrations.
        iii. Soil with concentrations of dieldrin or toxaphene below residential and leachability SCTLs will be placed within appropriate future land uses based on corresponding arsenic concentrations.

Now is the time to start questioning the legality of changing the 99 year inpurpetuty clause, sold to homeowners for years. Once a PRD always a PRD?
You changed the zoning of heavy industrial zoning. Can you challenge changing the zoning of the Tomoka Oaks Golf Course to Open Space /Recreational?

I am a homeowner and I am responding to the Developers Arguments for an R-2 Zoning code change.

A. The proposed development conforms to the standards and requirements of this Land Development Code and will not create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare or quality of life.

1). The proposed development may conform on paper to the LDC but NOT in the Spirit of the Code. It will have negative impacts on the public health, safety, welfare and quality of life for all the neighborhoods that will be affected- Tomoka Oaks, Escondido Condominiums, The Trails and Talaqua.
The proposed zoning change overwhelms the adjacent properties by taking away the major Open Space/ Recreational golf course that those properties have enjoyed for 60 years. The proposed rezoning creates overcrowding on narrow roads and entrance/exits not designed for this amount of traffic.

B. The proposed development is consistent with the comprehensive plan.

1). The Low Density Residential (LDR) Future Land Use Classification, " To protect and encourage the continued development of typical single-family residential areas and stabilize and protect the character of such neighborhoods". Tomoka Oaks is a desired stable neighborhood and its character will be disastrously affected by the loss of the open space of the golf course and the overcrowding of its roads and one entrance/exit. The property is NOT targeted for residential development under the Comprehensive Plan. The project will overcrowd an area that is seeing too much expansion of residential growth, over running the existing services.
2). Don't forget the existing goals of the City's Comprehensive Plan is to provide open space and recreation which voters continue to cite as a number one priority.

POLICY 1.1.6. Provide the opportunity, through zoning and other land use controls, for the development of a variety of housing types (i.e., single-family, duplex, townhouse, multifamily) in both conventional, planned unit and cluster type developments, that will meet the varied needs of the citizens of Ormond Beach. Response: The proposed development is an infill project designed to create additional housing opportunities for residents in an area where urban services are readily available. The conceptual development would promote compatibility with surrounding home sites on the exterior of the property and allow for additional housing opportunities.

1). POLICY 1.1.6 was not intended to remove open space/ recreational areas from existing neighborhoods. In this case the development and zone change will cause undue traffic on narrow roads with no sidewalks the roads of an enclosed neighborhood.

POLICY 1.1.7. Continuously review and modify development and building regulations to provide for sound residential communities and quality housing.

1.) The zoning for the Tomoka Oaks Golf Course should have always been Open Space/ Recreational since homes were sold under the premise of "Golf Course Views".
2). The issue of this development is it is being shoehorned into the center of an existing neighborhood that has enjoyed the Open Space/ Recreational Amenity of trees and non-urbanization for 60 years. The values and aesthetics of the existing neighborhood rests on the open space of the golf course and will be forever diminished by a zone change to R-2.

POLICY 1.1.14. Enhance community livability in the central core and older sections of the City by encouraging infill as appropriate, transit oriented development and walkable residential areas.

Response: 1. The enhanced livability of the Tomoka Oaks neighborhood is equated with the Open Space view of the historic and native trees and abundant wildlife that inhabit the golf course land.
2. The golf course was designed to be the central feature of the Tomoka Oaks neighborhood, 178 homes enjoy these views.
3. I would argue that the "older section" clause in this policy would refer to areas closer to the municipal section of Ormond Beach not the Nova Rd area of Tomoka Oaks and The Trails, which are not urban infill or walkable to the Library for example.

POLICY 2.2.1. The City shall limit urban sprawl by directing urban growth to those areas where public facilities and services are available.

1). It is important the city prioritizes what is in the best interest determining what constitutes urban sprawl and what constitutes overcrowding and urbanization. The answer is NOT to ruin healthy communities.

POLICY 2.2.5. In order to protect natural resources, new development and redevelopment shall be encouraged to infill existing developed areas.

1). Open Space / Recreational land should not be considered infill. Open Space is vital to a healthy community.

POLICY 2.4.10. Direct development towards existing residential communities and planned growth areas already served by infrastructure, to utilize resources that existing neighborhoods offer, thereby conserving open space and natural resources on the urban fringe.

1. When policy 2.4.10 talks about "infrastructure already existing" this presumes current, infrastructureis sufficient for a large development. It is not.

a) The development proposes to use the very access roads of the existing neighborhood NOT designed of 317 more home access.
b) The scant infrastructure on the golf course after all is 147 acres of Open Space; there are no roads, no sidewalks, no sewers, no lighting, no drain pipes, no retention ponds, no water pumps.
c) Instead of complementing the existing neighborhood it will produce urbanization and overcrowding.

C. **The proposed development will not adversely impact environmentally sensitive lands or natural resources, including, but not limited to, waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields and individual wells.**

1) Every hard surface is an affront to the environment, especially here in Florida. As stated "the Tomoka River is already an impaired water body". No matter what dry pond system utilized by 317 homes it will NOT be beneficial to the environment. In fact, the soil management has been ignored when the buildings were removed before the Florida Department of Environmental Protection made its recommendations for remediation. Already toxic soil has been strewn over the land and in the air.
2) The golf course is the high ground in Tomoka Oaks, known to be well draining open space. The existing neighborhood sits below it. Controlling drainage, run-off and toxins is guess work. Perhaps the best remediation for the land is to let it rest for 99 years like the former dump now Nova Creational Center. Who would want their child playing in the dirt where known carcinogens have been used? The remediation process will require just two soil samples for every lot (10,000 sq ft).

D.**The proposed use will not substantially or permanently depreciate the value of surrounding property; Create a nuisance; Deprive adjoining properties of adequate light and air; or Create excessive noise, odor, glare or visual impacts on the neighborhood and adjoining properties.**

1) There is nothing more valuable than Open Space or water views in real estate. We bought our property and paid a premium because of the view of the Open Space of the golf course and the beautiful trees.
2)So, YES our property values will be substantially depreciated for the years of construction and then permanently.
3) The whole project will be a nuisance, creating excessive noise, odor and visual impacts to the surrounding neighborhoods.
4) Tomoka Oaks is already complete and the Open Space/ Recreational land provided by the golf course completes the community and there is no need to crowd the community.

E. There are adequate public facilities to serve the development, including, but not limited to, roads, sidewalks,

bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools and playgrounds.

1) There are not adequate facilities now in Ormond Beach.

F. Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe. This finding shall be based on a traffic report where available, prepared by a qualified traffic consultant, engineer or planner which details the anticipated or projected effect of the project on adjacent roads and the impact on public safety.

1)Testimony by citizens of Tomoka Oaks, The Trails, Escondido Condominiums, speaks to the reality of the traffic safety in the neighborhood now and adding an estimated 2,700 more trips through the neighborhood from this development will overrun the roads and cause a public hazard and quality of life loss.
2) have you ever gotten a Traffic Report paid for by a Developer that claimed the Developers Project would NOT be allowable?
3) The roads of the existing neighborhood were not designed for 317 more homes. The entrances/exits are too narrow, all the roads will have to be widened essentially turning a quiet neighborhood into a throughway. Does a Developer's project deserve that Taxpayer support?

G. The proposed development is functional in the use of space and aesthetically acceptable.

This development overcrowds existing neighborhoods, by putting undue traffic on the neighborhood roads that have no sidewalks and are not designed for more traffic and inadequate entrance and exit and evacuation routes because the entire proposal is inside another subdivision.

H. The proposed development provides for the safety of occupants and visitors.

This statement is unknowable.

I. The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area.

This is a Zone Change request. No plans related to materials or architectural features have been submitted.

G-I. The rezoning will require compliance with all City requirements for site design and layout under the R-2 zoning designation.

Rezoning of land that has been used as Open Space/Recreational zone for 60 years should be Grandfathered into Open Space/ Recreational especially considering it is surrounded contiguously by existing homes and has only one entrance through the Tomoka Oaks Subdivision.

Please reject this Zoning change and in fact change the zoning to Open Space/Recreational- the developers bought a golf course, if they don't want it, they should sell it.

Thank you
Denise Corley

Good evening,

I'm shocked and appalled by the actions of the Tomoka Reserve developers. The tantrum they are throwing over not getting their way leads those in our quiet neighborhood of Tomoka Oaks to conclude that they will not be neighborly, and that should be echoed with the planning board as well. We were already concerned about the entrance to our neighborhood as well as the impact to traffic, public works, roadways, utilities, schools, medical services, and more. Now they are intent on making a larger impact on our community out of spite and using threats to get their way. The planning board should make a stand that tantrums don't prove fruitful in this community. They may be used to pushing people around in bigger cities, but pulling these antics here should not be tolerated.

They've said a ton of things so far that we can all see right through. Traffic already backs up past the Escondido entrance even without Tomoka Reserve. The light that is going in at Nova and Tomoka Oaks Blvd is going to prevent construction vehicles from entering there which proves their statements of less than 10% of traffic through the Trails as completely false. Construction equipment utilizing Misner Branch bridge should require a study because a portion of that bridge is already having significant issues with normal use. This could potentially mean that all construction equipment would use the Main Trail and Nova intersection to enter, then over to Iroquois or Rio Pinar to S St Andrews. Their impact to the Trails neighborhood has been vastly misrepresented. This then opens the conversation of what else they have misrepresented in their presentations thus far because we can all see they are gaslighting.

I'm trying to remain hopeful that the planning board will protect our community. Over the last couple of years we have come to know this as home and now that my husband retired from the service, he wants to call it home too. However, our children's safety and wellbeing are our primary concern. If Tomoka Reserve moves forward we know Tomoka Oaks will no longer be the neighborhood we fell in love with and bought into. We already struggle with massive speeding on St Andrews, but the influx of traffic, inaccessibility to the neighborhood, impact on our already struggling ability to access medical services, not to mention how unbelievably difficult the construction will make habitability of our home with my husbands PTSD (literally why we chose an established neighborhood)....I can't stand the thought of leaving our forever home, but it's a reality we are faced with. Please save our neighborhood from Tomoka Reserve.

Thank you,

Leah Washington

Letter to The Observer:

It is interesting to try to follow the reasoning of the developers who bought the Tomoka Oaks golf course property of 147 acres almost three years ago.

Now, instead of 272 homes which the Planning Board and the Commissioners thought were too many, they would like to build 317 homes.

What will the Planning Board say when they receive this latest request from the developers to "increase" the number of homes?

Did something change? Will the one and only 450-foot road leading in and out of Tomoka Oaks "and" the proposed development change to be a wider and longer road? Will the imposition of added traffic and devaluation of the homes in the Tomoka Oaks development and all the affected surrounding developments change?

Will the two-lane roads in Tomoka Oaks and The Trails suddenly become four lanes and sidewalks appear where there are none? Will the homeowners change their minds about missing the beauty of the open space and the golf course that was promised to them in a written, spoken and/or implied agreement?

Will the threatened and protected gopher tortoises relocate to a safer place along with their burrow guests of up to 350 different species who hunker down with them in their burrows? By the way, this is one of the reasons the tortoises are protected, because they provide a home to these grateful guests.

Will this 147 acres on one of the highest elevations in East Volusia with impervious newly constructed houses and streets and sidewalks suddenly soak up water during a storm when the retention ponds fail? Will the Trails welcome the added traffic in their development that was not designed for that volume of traffic? Will the Escondido Condo residents find a way to get out of their one and only driveway?

Will the developers suddenly propose an emergency evacuation plan that will show that we can all get out in a safe and timely manner? It has been almost three years and our concern for the safety of walkers and bicyclists in addition to this missing evacuation plan does not even seem to be on their radar.

It will be interesting to see what has changed.

MEMORANDUM

TO:	Ormond Beach Planning Board
CC:	S. Spraker, AICP, Planning Director
FROM:	Thomas Harowski, AICP, President
SUBJECT:	Tomoka Reserve Zoning Application
DATE:	December 29, 2023

The developers of the proposed Tomoka Reserve development have abandoned their application for a planned residential development and are seeking standard zoning for the tract requesting R-2 Single Family zoning be applied. The existing Tomoka Oaks Subdivision is zoned R-2, but it is not automatic that rezoning the subject parcel to R-2 is mandatory or even the most appropriate action by the city. This report is being offered to explore other options for consideration. Let's begin with a few statements of fact.

- The subject property is designated as low density residential by the City's comprehensive plan.
- Low density residential allows development up to 4.3 units per acre, but there is no guarantee or firm entitlement that every low-density residential parcel can be developed to the maximum level allowed by the land use classification.
- The current zoning of the subject property is Planned Residential Development (PRD), but there is no active development agreement supporting the zoning designation.
- The eventual zoning assigned to the subject property needs to be consistent with the future land use designation and compatible with the surrounding community.
- The original design of the Tomoka Oaks neighborhood included a residential subdivision and an 18-hole golf course and country club that was integral to the local community and functioned, in part, as community open space.
- For most of its existence the Tomoka Oaks Golf and Country Club included swimming and tennis as well as community space and a restaurant in the clubhouse. Club members and the general public could use the restaurant and many Tomoka Oaks residents enrolled children in the summer camp programs. Neighborhood association meetings were held at the clubhouse, so the facility

was integrated into the neighborhood as a social center as well as being community open space.

- The actual development density of the Tomoka Oaks subdivision is about 1.27 units per acre when the subject property is properly recognized as neighborhood open space per the original subdivision design.

- Regardless of a traffic study finding that the proposed development would meet level of service standards, the Tomoka Oaks neighborhood will still be impacted by a significant level of traffic which will reduce traffic safety and increase hazards for pedestrians and cyclists.

Analysis

The Community Planning Act (F.S. 163.3164 (9)) defines compatibility as:

> "… a condition in which land uses or conditions can coexist in relative proximity to each other in a stable fashion over time such that no use or condition is unduly negatively impacted directly or indirectly by another use or."

The City of Ormond Beach comprehensive plan supports the state definition with Future Land Use Element Policy 1.1.3 which in part reads "Preserve the character of existing neighborhoods by not allowing the intrusion of land uses that would threaten to alter the neighborhood character…." The fact that a land use type may be the same, say single-family adjacent to single-family, does not mean that the new land use cannot be intrusive if it alters the neighborhood character.

As discussed extensively during the hearings on the applicant's request for PRD approval, the planned construction of new housing on the subject property is a clear intrusion into the Tomoka Oaks neighborhood. The only place where the proposed development does not abut existing houses is literally where the driveway into the former clubhouse is located. This is the "hole in the donut" concept that was extensively discussed and accepted by both the Planning Board and the City Commission as a clear element of impact by the proposed development on the existing neighborhood. Ample evidence of this finding is available in the minutes of the September 26, 2023, meeting. Because of the intrusive nature of the proposed development on the existing neighborhood the requirement for a compatible development demands that impacts from the new development follow a density and lot size compatible with the existing neighborhood and that the project compensate Tomoka Oaks for the loss of community open space.

A zoning designation assigned to a property must be consistent with the comprehensive plan as well as being compatible with the area surrounding the proposed development. Section 2-02 of the City's land development code includes Table 2-2 Future Land Use Map Designations and Compatible Zoning Districts. For low density residential land uses, the table lists the following classifications:

R-1 Residential Estates
R-2 Single Family Low Density
R-2.5 Single-Family Low-Medum Density
R-3 Single Family Medium Density
Planned Residential Development

The following table provides some basic information about each of the classifications that are consistent with the low-density land use and may be compatible with existing developments.

Zoning District	Units/ Acre	Lot Size	Lot Width	Lot Depth	Lot Coverage
R-1	2.17	20,000	100	150	75%
R-2	4.30	10,000	100	NA	75%
R-2.5	4.98	8,750	90	NA	75%
R-3	5.05	8,625	75	NA	75%
PRD	Negotiated				

The current zoning of the property is planned residential development (PRD) which needs to be completed with a development agreement specifying the provisions governing the use and development of the property. While the applicants sought a PRD agreement that was not recommended by the Planning Board, the City Commission did not deny the application, but referred the proposal to the Planning Board for additional refinement. The City Commission has no obligation to abandon the PRD zoning until it is fully demonstrated that no development agreement under the PRD can be approved. Since the proposed project never proceeded to a final vote, there is no affirmative evidence that the submitted proposal or a modified proposal cannot receive approval.

Given the clear disparity between the developed character of Tomoka Oaks and the minimum dimensional standards of the R-2 zoning district, it is clear that the PRD zoning offers the best opportunity to maximize compatibility between the proposed project and the existing neighborhood development. It is clear from the Planning Board public hearings that there is a plan that they would consider acceptable. Note the comments of Mr. Galloway on page 18 of the September 26, 2023, meeting minutes; the comments of Mr. Thomas on page 20; the comments of Mr. Galloway and Mr. Thomas on page 22; and Mr. Galloway again on page 24. These comments suggest a project size of 220 to 250 units would receive serious consideration, and that a range of lot sizes would be acceptable so long as the perimeter lots were predominantly the same size as the R-2 lot minimums.

While rezoning to R-2 would seem to be an easy choice for the subject parcel and would be consistent with the low-density land use, development of the project at minimum R-2 standards is inconsistent and incompatible with the existing Tomoka Oaks neighborhood. The developed density of the neighborhood is 1.27 units per acre; about 25% of the allowable maximum density and about 50% of the proposed project density. Given the direct impact of the proposed development on a significant number of units in

Tomoka Oaks and indirect impacts on the entire neighborhood resulting from increased traffic and lessened safety for pedestrians and cyclists, R-2 is not the best zoning choice.

If density comparison between the current neighborhood and the proposed development is to be the key criterion for compatibility, the table above suggests that R-1 zoning is in fact the most appropriate standard zoning. This choice recognizes that Tomoka Oaks is developed well above the minimum R-2 standards, and that a project that approaches the minimum requirements for R-2 zoning is in fact not compatible with the current neighborhood.

Findings

It is indisputable that PRD zoning offers the best opportunity to maximize compatibility with the current neighborhood while remaining consistent with the comprehensive plan and future land use. The City Commission did not reject the PRD proposal. They expressed concerns about the plan and referred the request to the Planning Board to work on refinements. The applicants elected to abandon the process without the project ever coming to a final vote. It is clear from the Planning Board hearings that there is a path to an acceptable plan under PRD zoning that can be supported for City Commission review. The current zoning is PRD and there is no reason to approve any zoning other than PRD at this point in time.

If standard zoning is to be applied, R-1 density is more consistent with the developed nature of Tomoka Oaks. The resultant project under R-1 would yield a project density closer to the developed character of the neighborhood and it would lessen external impacts from traffic and from reduced public safety.

Commentary on the Application

As part of the application for rezoning, the applicants provided a project narrative that responds to questions posed in the application form and they cite compliance with several comprehensive plan policies. Some of their conclusions and statements in the narrative are debatable. The following comments offer a contrasting perspective given the positions laid out in the preceding analysis.

> *The proposed development conforms to the standards and requirements of this Land Development Code and will not create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare or quality of life. (From City Application)*

- The applicants align crowding with the maximum density allowed by the future land use classification. The proposed project does fall within the allowable range set by the comprehensive plan, but the proposed project as presented would be about twice as dense as the existing neighborhood. The statement that the proposed development is a reuse of a failed golf course has no impact on the criteria identified in part of the application.

- Keep in mind that the nature of the former golf course property has much more coterminous property with the existing neighborhood than would a more typical new subdivision adjacent to an existing neighborhood.

The proposed development is consistent with the comprehensive plan. (From City application.)

- The requested R-2 zoning is consistent with the comprehensive plan, but it is not the only zoning category that meets the consistency test. The findings of this analysis are that PRD is the best option followed by R-1 Single-family and then R-2 Single Family.

- The applicant's response cites Policy 1.1.6, but the response really misses a key point of the policy. The policy is intended to promote a variety of housing types with duplex, townhouse, and multi-family specifically cited as varied housing types. The proposed development with R-2 single-family does not really respond to this point.

- The applicant's response cites Policy 1.1.7 regarding sound residential communities and quality housing, but the standard zoning option provides no assurance that "the development is comprised of residential homes of a quality and character that will promote a long-lasting, aesthetically pleasing residential neighborhood…" as they claim. Outside of the PRD format there is no vehicle to provide for an affirmative commitment to design and other community enhancements.

- The applicant's narrative repeatedly claims the project as an infill development. This is true in the sense that the project is located within the more developed core area of the city rather than at the outer periphery. However, it has been well established during the many public hearing on this project during the PRD review, that Tomoka Oaks and the former golf course is a unique condition in that the proposed development in entirely consumed within the existing neighborhood and is deserving of a more fine-grained treatment of the border between the two projects to provide at least a minimal level of compatibility.

January 2, 2024

Dear Planning Board Members,

Did you know:

- Tomoka Reserves' zoning map amendment to rezone the Sam Snead Golf and Country Club plat from a PRD to R-2 is in direct conflict with the city's Comprehensive Plan?

- R-2 zoning of this plat violates the major goal of the city's Future Land Use Element?

- And R-2 zoning of the 147 acres is not consistent with Low Density Residential development policies?

Here's why:

In 2006, the Sam Snead Golf and Country Club acreage was zoned PRD to specifically protect Tomoka Oaks residents from R-2 development of the golf course land.

Minutes of the Planning Board meeting from August 10, 2006 (attached) detail just why **PRD 06-32** for the Tomoka Golf Village Planned Residential Development Rezoning received unanimous approval of the city commission, city attorney, applicant attorney, planning board members and city staff. *Meeting highlights demonstrate:*

- The PRD development order would:
    - Locate 119 units in the center of the development thus preventing negative impacts on Tomoka Oaks residents.
    - Reconstruct a portion of the 18-hole golf course and blanket the remaining 18-holes with a conservation easement so the land area could not be used for anything other than the golf course or open space purposes.

- The project was touted by the 2006 applicant's attorney Rob Merrell as the "poster child" for Smart Growth principles; i.e., clustering condo and townhome units to preserve open space and recreation areas.

- Mr. Merrell stated that by approving the rezoning to PRD, the resulting development order would restrict the open space and golf course area in perpetuity.

- And City Attorney Randy Hayes felt there were enough layers of protection that future development should not be a serious concern. Development Orders ran with the land and protected the project should it be sold or go bankrupt due to market conditions or mismanagement.

The subsequent Development Order dated 10/31/2006 and recorded in Volusia County Book 5944 Page 2183 states:

- The owner shall provide for covenants and restrictions that restrict the golf course to open space and golf course use.
- The development order was binding upon future owners and ran with the real property.

Although the development order expired on 10/17/2014, the city implicitly recognized the land's perpetuity use to remain a golf course or open recreational area. As stated in item F, page 7 of the development order, if the permit was voided, a new PRD development order shall be considered by the City. There was no automatic rezoning to R-2.

I understand that on 1/11/24 the Planning Board is to review the "appropriateness" of the zoning designation consistent with the "Low Density Residential" land use category. I request the Planning Board recommend denial, and cite the Comprehensive Plan's Future Land Use code as justification.

> https://www.ormondbeach.org/DocumentCenter/View/456/Future-Land-Use---122023-w-map?bidId=
>
> *The major goal of the Future Land Use Element is to achieve the highest quality of life for all the residents of the City, its visitors and businesses by managing growth in a manner that is consistent with sound social, economic, fiscal, and environmental principles. The element reflects existing urban service capacities and constraints, and it also establishes locations where future service improvements will follow.* (page 5)
>
> *The purpose of Low Density Residential is to protect and encourage the continued development of typical single-family residential areas and stabilize and protect the character of such neighborhoods.* (page 7)

The Sam Snead Golf and Country Club plat is not typical of single-family residential areas. R-2 zoning will violate:

- Policy 1.1.2: Requires the zoning to continue to promote sound planning for the location and design of new residential development in relation to the existing Tomoka Oaks neighborhood. The R-2 application for approximately 317 homes is in direct conflict with the City Commission's request for sound planning demonstrated when the commission remanded the (now withdrawn) PRD for 272 homes back to the Planning Board to decrease the density. Increasing density via R-2 does not represent sound planning.

- Policy 1.1.3 which requires the preservation of the character of the existing Tomoka Oaks neighborhood by not allowing intrusion of land uses that would threaten to alter the

neighborhood character. The R-2 zoning creates a landlocked neighborhood within the center of Tomoka Oaks thus permanently altering Tomoka Oak's character.

Please recommend that the PRD zoning remain in place for the reasons outlined in the approved 2006 PRD: 119 maximum units located in the core with perpetual, protected retention of the 18-hole golf course green space.

ORMOND BEACH PLANNING BOARD

Regular Meeting

August 10, 2006 7:00 PM

City Commission Chambers
22 South Beach Street
Ormond Beach, FL 32174

PURSUANT TO SECTION 286.0105, FLORIDA STATUTES, IF ANY PERSON DECIDES TO APPEAL ANY DECISION MADE BY THE PLANNING BOARD WITH RESPECT TO ANY MATTER CONSIDERED AT THIS PUBLIC MEETING, THAT PERSON WILL NEED A RECORD OF THE PROCEEDINGS AND FOR SUCH PURPOSE, SAID PERSON MAY NEED TO ENSURE THAT A VERBATIM RECORD OF THE PROCEEDING IS MADE, INCLUDING THE TESTIMONY AND EVIDENCE UPON WHICH THE APPEAL IS TO BE BASED.

PERSONS WITH A DISABILITY, SUCH AS A VISION, HEARING OR SPEECH IMPAIRMENT, OR PERSONS NEEDING OTHER TYPES OF ASSISTANCE, AND WHO WISH TO ATTEND CITY COMMISSION MEETINGS OR ANY OTHER BOARD OR COMMITTEE MEETING MAY CONTACT THE CITY CLERK IN WRITING, OR MAY CALL 677-0311 FOR INFORMATION REGARDING AVAILABLE AIDS AND SERVICES.

I. ROLL CALL

Members Present

Dr. Beverly Grissom
Al Jorczak
Lynn McCoy
Doug Thomas
Rita Press

Staff Present

Brenda Bates, Recording Technician
Betty Ruger, Minutes Technician
Clay Ervin, AICP, Planning Director
Randy Hayes, City Attorney

Members Excused

Brian Daly

II. INVOCATION

Mrs. Press led the invocation.

III. PLEDGE OF ALLEGIANCE

IV. NOTICE REGARDING ADJOURNMENT

NEW ITEMS WILL NOT BE HEARD BY THE PLANNING BOARD AFTER 10:00 PM UNLESS AUTHORIZED BY A MAJORITY VOTE OF THE BOARD MEMBERS PRESENT. ITEMS WHICH HAVE NOT BEEN HEARD BEFORE 10:00 PM MAY BE CONTINUED TO THE FOLLOWING THURSDAY OR TO THE NEXT REGULAR MEETING, AS DETERMINED BY AFFIRMATIVE VOTE OF THE MAJORITY OF THE BOARD MEMBERS PRESENT (PER PLANNING BOARD RULES OF PROCEDURE, SECTION 2.7). A

V. APPROVAL OF MINUTES

The minutes of the June 8, 2006 meeting of the Planning Board were approved as presented.

VI. PLANNING DIRECTOR'S REPORT

Mr. Ervin stated that:

- The list of upcoming meetings provided to the Board included the information regarding the August 17th workshop in DeLand that dealt with the Volusia County's 10-Year Work Program. He said that traffic congestion was a critical issue and one that the board members would have to deal with in their review of development and redevelopment projects. He said the County's Work Program was one element of many that would hopefully be used to improve the local roadway systems. He noted that that meeting was a time-certain item (2:00 pm) on the County Council's agenda.
- Department of Transportation Secretary Denver Stutler would speak at the VCARD (Volusia County Association for Responsible Development) luncheon; he would discuss statewide traffic issues, present and future.

VII. PUBLIC HEARINGS

Chairwoman Press explained to the public that the Planning Board was advisory, and that their decisions, unlike those of the City Commission were not binding. She said that the purpose of board hearing was to hear from the applicant, the City staff and the residents and that the official record of that meeting would then be presented to the City Commission, who would vote on the proposal in two public hearings.

Chairwoman Press explained the meeting process to the public and asked that any speakers identify themselves and limit their comments to five minutes.

A. PRD 06-32: Tomoka Golf Village Planned Residential Development Rezoning

Mr. Ervin said that the application was to rezone 147 acres (the existing Tomoka Oaks Golf Course), which was surrounded by the existing Tomoka Oaks subdivision. He advised that the Land Use designation was Low-density Residential, which allowed a density of up to 4.3 units per acre (4.3 u/ac) and had a current zoning of R-2 (Single-family Low Density), which required lots with a minimum of 10,000 square feet and minimum dimensions of 100' x 100'. He said that the zoning was consistent with the existing homes in Tomoka Oaks and in neighboring developments such as The Trails.

Mr. Ervin recalled that in 2005, the property owners (RTH, Inc., represented by Dr. and Scott Ryals) met with staff and identified their desire to redevelop the golf course so that they could 1) maintain the golf course and 2) generate additional revenue. He said that staff had been surprised to note that the land use and zoning were something other than Open Space/Recreation, typical for such properties, and that the owners had the right to develop the property.

Mr. Ervin acknowledged some confusion expressed by residents of the area and explained that based on the land area, the owners could theoretically develop up to 632 single-family homes; however, because of the size and shape of the property, and the incorporation of roads, stormwater and open area, the number of homes that could be accommodated would realistically be reduced to about 300.

Mr. Ervin said that the applicants had been advised of the concerns of adjoining property owners, noting that the subdivision was one of Ormond's nicer communities and one of the few areas in which homes backed onto a golf course. He said they had relied upon the golf course and bought their properties

believing that the golf course would always be there. He said that because the owners had development rights established by the existing land use and zoning, Staff had identified the concepts of clustering the homes and orienting the units to have the least amount of visual impact.

Mr. Ervin said that staff was also concerned with the possibility of leaving room for future development of the remaining portion of the golf course by clustering the homes; therefore, while the staff recommended approval of the proposal, staff also recommended that the development order blanket the remaining golf course property with a conservation easement so the land area could not be used for anything other than the golf course or open space purposes.

Mr. Ervin informed the board that the project had been in review with the City for about a year and that the staff focused on ensuring that the development not create negative impacts for the existing neighborhood. He said that they determined that by shifting the existing driving range towards the northwest and concentrating the condominiums around a relocated and revamped clubhouse, the new construction would not be close to the existing homes along the 18th, 9th and 10th holes. He said the project also proposed to locate 35 townhomes towards the northeast portion of the site with access by an entrance road off of Tomoka Oaks Boulevard and to locate two condominium buildings near the updated tennis center.

Mr. Ervin reported that staff had spoken with many residents of the area and noted that for the record, the Board had been provided with a copy of an e-mail from Ms. Linda Lewis, who had expressed concern with the buffering of the three estate lots proposed for the northwest area of the golf course. He said that Ms. Lewis had enjoyed an open space behind her home and was afraid that the location of the easement for a sanitary sewer line would result in the removal of the existing trees. He reported that the City's engineers and applicant had confirmed that they would consider utilizing a directional dig; therefore, there would be no open-earth excavation of the land and the existing trees could be preserved and protected. He said that the applicant would be required to follow through with that requirement.

Mr. Ervin said that the existing residents were concerned with the number of trees that could be impacted by the project; he stated that the applicant met or exceeded the City's tree mitigation standards because of the additional plantings around the buildings that would be utilized as visual buffers. He said that the plans included the tree mitigation calculations that showed number of trees to be removed and the number of trees to be replanted.

Mr. Ervin pointed out that the City required all multi-family buildings to maintain a minimum of 200' from any single-family home and said that the cart paths had been designed for emergency access; they provided an alternative access route to the properties if the spine roads were damaged or otherwise inaccessible. He said that the design also called for decorative pavement leading into the main drive, the townhomes, tennis center, and updated/relocated clubhouse.

Mr. Ervin displayed the plan layout and typical elevations and noted that staff had also required the architecture to be consistent with the existing development in Tomoka Oaks. He showed renderings of the 3-story golf villas and pointed out that there would be underground parking facilities to minimize the amount of impervious surface. He noted that sub-surface parking was possible because the site was very well-drained, with a low water table.

Mr. Ervin acknowledged that Board Member Jorczak and Mr. Larry Stout of the Airport Advisory Board had questioned whether the additional density and intensity proposed might violate the City's Airport Overlay Zone. He explained that Airport Overlay District comprised areas for which there were concerns

regarding noise impacts that would result from the airport. He recalled the overlay issues presented to the Planning Board in the past and said that they had not been able to use the 60 DNL (day and night noise level contour), shown as a star-shaped zone, because it did not meet certain statutory and federal requirements. He said the City instead utilized the "iron cross" contour (a legally defensible method of establishing the noise levels) and stated that the project was located outside both the 60 DNL line and the City's adopted "iron cross" contours.

Mr. Ervin said that per Mr. Jorczak's request, staff looked at source of the noise complaints. He said that such complaints had been documented when the City was embattled with the decision as to whether or not to expand Runway 17-35; he pointed out on the map that the complaints had been identified as closer to the airport than the project location. He said that Mr. Jorczak and Mr. Stout had also questioned if there was a way to ensure that future purchasers of property in the area were aware that they were buying near the municipal airport, i.e. a kind of due diligence warning.

Mr. Ervin said that the staff report included technical analysis to show how the project complied with the city's concurrency requirements (water, sewer, stormwater and roads), identified zoning and land use issues, and summarized why the City staff recommended approval of the project. He reiterated that a number of Tomoka Oaks residents were unhappy with the project because they felt the golf course had not been properly maintained and worried that the project would just increase the problems they faced.

Mr. Ervin explained that Staff had to look at the proposal from a technical perspective in regard to land use and zoning and said that the proposed plan was considerably less intense than what could be developed there. He reiterated that Staff had made the applicant aware of the concerns, made sure that the development was compatible with the neighborhood, had no negative impacts on the existing residents and preserved the golf course. He agreed that it would be wonderful to retain the property as open space, but reminded everyone present that they had to respect the property rights of the property owner, who already had development rights on the property, given the land use and zoning. He emphasized that the proposal de-intensified the project, concentrated the development and ensured that the impacts would be minimal.

Mr. Jorczak asked if there was a mechanism that the City could employ to notify potential purchasers of the proximity to the airport.

Mr. Ervin replied that there was nothing in the City codes to mandate such notification. He said that the Board could identify that as a concern and as a condition for their approval. He said that the applicant could decide to accept the condition; if they chose not to accept it, the City would then have to decide whether to impose the condition as a part of the rezoning request.

Mr. Thomas questioned why there were fewer noise complaints in 2006, than in 2005.

Mr. Robert Hernandez, Ormond Airport Manager, said that voluntary airport procedures and traffic patterns established prior to his tenure tried to limit the air traffic to the north and west sides of the airport as much as possible. He said most of the current complaints were being generated from the area east of the airport, where much of the training was conducted, and that there were a number of homes on that departure corridor. He explained that air traffic expanded and contracted in all directions and that although he would not say that there would be no aircraft over the proposed community, he felt the Tomoka Oaks residents were getting the benefit of the established voluntary procedures for noise control.

Chairwoman Press clarified with Mr. Ervin that the applicants had the right under the current zoning to remove the golf course and develop the entire area with houses, but that the proposed PRD (Planned Residential Development) would limit the residential development to 122 units and would require a conservation easement over the remaining portion of the golf course to prevent future development of that land. She asked if the development order, as proposed, would preclude the applicants from building any more than the 122 approved residential units on that property.

Mr. Ervin concurred.

Chairwoman Press stated for the record that she had requested an on-site review of the proposal and had toured the property with the owners. She said that she had learned that many of the roads would not be paved and asked who would be responsible for maintaining those roads.

Mr. Ervin responded that the maintenance of the roads would be the responsibility of the developer at first, but that the homeowners' association that would be created would ultimately be responsible for the maintenance of all grounds on the project.

Chairwoman Press asked if the roads met City standards.

Mr. Ervin said that the City required roads to be constructed with a 6" sub-base, 6" base and 1.25" of asphalt; he said that roads were generally designed for a 15 to 25-year life. He assured the Chairwoman that those standards applied to the subject roads. He pointed out that the emergency access/cart path type of roads might not be topped with asphalt, but would be stabilized and had to meet minimum standards established by the Code for emergency access areas. He said it was a common practice and had been utilized in other projects, such as Broadwater, Breakaway Trails, Aberdeen, etc. He noted that breakaway fences were utilized in emergency access areas.

Chairwoman Press asked if the order of the project phases could change.

Mr. Ervin responded that the development order would identify the project phases and that the applicants would have to adhere to the phases, as stated. He acknowledged that the residents of Tomoka Oaks were concerned that the applicants would build the residential units without completing the other improvements and said that was the reason for the phasing. He reported that Phase 1 would involve the relocation and construction of a new tennis facility, Phase 1B would include demolition of the existing parking lot and clubhouse, Phase 1C would be the completion of the townhomes, golf and tennis areas, and the clubhouse would be completed in Phase 2B. He noted that the amenities would correlate with the new homes being developed. He also acknowledged that the applicants were being required to upgrade the appearance of the golf course.

Mr. Thomas disclosed that he also toured the facilities and met with the applicant.

Mr. Robert A. Merrell, 150 Magnolia Avenue, Daytona Beach, representing the applicant, stated that he was also a resident of Ormond Beach. He thanked City staff for their very thorough report, particularly with regard to comprehensive plan consistency and code compliance. He stated that the project had evolved into a better product during the year-long process of working with City staff.

Mr. Merrell said that the project was the "poster child" for Smart Growth principles. He explained that the concept of smart growth was predicated upon the belief that the population would continue to grow and that people would continue to move into the area. He said that smart growth addressed the issues of

where people would live and work, the redevelopment of urban areas, clustering development in areas where services were already available (fire stations, police stations, utilities) and clustering to preserve open space and recreation areas.

Mr. Merrell presented slides of the property, some with the proposal super-imposed over the existing development. He pointed out that the development would include demolition and rebuild of the clubhouse and pool area and the tennis center. He explained that the new three-level clubhouse facility would house partial underground golf cart storage; dining areas, kitchen and banquet facilities, a lounge area, pro shop, locker rooms, and surrounding covered porch on the middle level; offices, executive offices, and a sky lounge on the upper level. He added that there would be a tiki bar overlooking the new pool area.

Mr. Merrell pointed out the proposed condominiums and maintenance facility to be located near the tennis center and said that the redevelopment of the golf course would include bridges and new lakes that would store reuse water from the City's effluent plant. He mentioned that there would be fountains and that comfort stations would be constructed for the golfers and would include under-cover golf cart parking and vending machines.

Mr. Merrell explained that 30 two-story townhomes would be constructed at the northeast corner of the property, access to be by way of the road from the main entrance by the clubhouse. He showed the floor plans of both the townhomes, as well as the three-story condominiums with substantial balconies. He added that the three single-family estate lots would be located near Holes 11 and 16.

Mr. Merrell repeated Mr. Ervin's statement that the proposed project was consistent with the comprehensive plan and met all the criteria in the Land Development Code (LDC) for the PRD rezoning. He stated that the existing R-3 residential zoning (Staff note: actual zoning is R-2) and the future land use classification allowed development at up to 4.3 units per acre over the entire 147 acres. He agreed that it was unusual for a golf course to have a residential zoning, saying that they were typically zoned for Recreation/Open Space, with the surrounding homes zoned for residential. He speculated that the original developer wanted to have an exit strategy in case the project did not succeed.

Mr. Merrell thought that the proposal would make the community proud, given the cluster of the residential units and the dramatic improvement of the amenities. He said that the golf course had suffered in the last couple of years because of the 2004 hurricanes, September 11th and the construction of Nova Road. He said that the purpose of the proposal was to reverse that trend. He said many times there were issues that were not raised until the first public hearing; he hoped the residents would be receptive to the plans.

Mr. Thomas stated that he wanted to discuss the traffic study, since the residents of Tomoka Oaks were very concerned about the traffic.

Mr. Merrell agreed that traffic issues were a concern with any new development and restated that they would be adding 122 residential units, even though the property was entitled to far more homes. He said that a traffic analysis completed for the project had considered the anticipated increase in trips, all of the intersections that could be affected and all of the road segments that could be affected. He said that the model used was one that was accepted by the City and the County; that study had indicated that there were no level of service problems. He recognized that there were traffic issues with some projects in the city at present, but that the widening of, and intersection improvements along, Nova Road had helped the

traffic situation in the area of the subject. He reiterated that the project would not cause a level of service problem on any of the intersections or affected roads.

Mr. Thomas asked if the residences would be primarily occupied by full-time residents or whether the applicant anticipated residents for whom the units would be second homes.

Mr. Merrell stated that they felt there would be some part-time residents, but that the traffic analysis was predicated upon full-time residents. He added that even increasing trips at the peak hours did not produce traffic problems.

Mr. Thomas noted that he was trying to ask questions on behalf of the audience, since they had not had an opportunity to look at the traffic study, as had the board members. He asked what the traffic counts could be estimated to be if the property was instead developed with 300 single-family homes.

Mr. Sans Lassiter, President of Lassiter Transportation Group, 123 Live Oak Avenue, Daytona Beach, and resident of Ormond Beach, said that the study was based on a trip generation rate of 119 multi-family dwelling units and three single-family dwelling units. He explained that multi-family, as proposed, was a lower trip generator (about 6-7 trips per unit per day); therefore, the estimated number of daily trips generated by the proposed development was approximately 773. He further explained that 350 single-family residences (about 10 trips per day) could be expected to generate 3,500 daily trips. He concluded that the proposal represented a significant reduction over what could be done otherwise.

Mr. Lassiter agreed with Mr. McCoy that the trips in the study shown as vested were those trips for the development in Tomoka Oaks that had already been approved and for which the consultant had to account.

Mr. Merrell stated for the record that the applicant had agreed to install the utilities in such a way as to not damage the existing trees. He also mentioned that by approving the rezoning to Planned Residential Development, the resulting agreement (development order) would restrict the open space and golf course area in perpetuity; he said that the applicant had agreed to a deed covenant (conservation easement and reciprocal covenant among all of the owners on the property) that would assure that the property would forever remain recreation/open space.

Chairwoman Press questioned the distance from 23 Pine Valley Circle (the home from which one of the photos was taken) to the golf village townhomes.

Mr. Ervin said that the closest point between any single-family residence and a multi-story building would be 225'. He said that the distance was 300' at the location in question, since the dimension was tied to the fairway (225', plus the fairway). He reiterated that the primary focus was to keep the buildings inside the fairways and away from the existing homes.

Mr. Jorczak asked if there would be any mechanism in place that would preclude the subsequent homeowners' association from turning the development into a private operation to exclude the public.

Mr. Merrell said that the Covenants and Restrictions and the condominium association Declaration would prevent that.

Mr. Thomas asked if there was any conceivable way that it could happen.

City Attorney Hayes said that although nothing was 100% guaranteed, he felt there were enough layers of protection that future development should not be a serious concern in the future.

Mr. Merrell said the applicants would agree to include whatever language that the city attorney deemed appropriate and necessary to assure that outcome.

Mr. Thomas understood and said that his concern was because the board and the residents had all heard the word "never" in the past.

Mr. Merrell elaborated on the city attorney's comments, saying that the discourse was in the public record and that coupled with the binding documents, would provide the City with an enforcement mechanism. He said the restriction was as fool-proof as they could make it.

City Attorney Hayes said that the City would make sure that the development order was drafted to make it as difficult as possible to undo.

Dr. Grissom inquired as to who would be responsible for the maintenance of the golf facilities.

Mr. Merrell said that maintenance would continue to be the responsibility of the owners of the golf course. He noted that only the residential units would be sold.

Dr. Grissom asked if the owners, as the condominium association or homeowners association, could have the prerogative to change the Covenants and Restrictions or Declarations of Condominium or any of the parameters include therein.

City Attorney Hayes replied that he did not think they could because it would be a condition of the development order, and would in fact be a violation of the development order, which had perpetual existence. He thought it would also be in violation of the recorded covenants and restrictions. He said that in reality, he did not think it could occur.

Mr. Merrell voiced his opinion that it would arguably require the City to agree to lift the deed covenant.

City Attorney Hayes reiterated his belief that there were enough layers to provide a sufficient safety net.

Mr. Jorczak thanked Mr. Ervin for his efforts to answer the questions regarding the airport issue on short notice. He thought that the applicants might find it beneficial when marketing the properties to promote the airport as an easy way to access their second homes. He remarked that municipal airports everywhere were under assault and felt it was very important that potential purchasers be notified that there was an airport nearby. He mentioned that the airport was a vital tool in shifting the City's tax base away from solely residential properties toward some industrial uses, what the City was hoping to achieve with the proposed Ormond Crossings development and which he felt was important. He said that there would always be noise associated with the airports and said that he anticipated an increase in use of the airport by the new very light jets, since they were more economical for businesses to purchase for both private use and for air taxi services .

Mr. Lewis Slaughter, 53 North St. Andrews Drive, thought that there would need to be a traffic light at the intersection of Tomoka Oaks Boulevard with Nova Road.

Mr. Mark Tolle, 54 Oakmont Circle, asked if there had been an environmental impact study conducted for the property. He reported that the property was currently home to a large breeding population of raptors, including great bard owls, screech owls, scissor-tail kites, swallow-tail kites (a species of special concern for the state of Florida) four species of pileated woodpeckers, and was a migratory stop for painted grosbeaks, American gold finches, etc.

Mr. Ervin said that because the site had already been impacted by development and was surrounded by existing homes, the property did not meet the City's criteria for requiring an environmental assessment report. He said that staff was aware that the area was home to migratory birds and that they had checked with Florida Fish & Wildlife to see whether or not nesting bald eagles or other endangered species had been identified there. He said that unless they had such documentation, a study could not be required; he said staff would seek verification as to whether or not the property was home to the variety of different species identified and whether or not there was a need for additional protections prior to scheduling the item for presentation to the City Commission.

Mr. Tolle referred to Dr. Grissom's comment regarding the ongoing maintenance of the property and said he did not believe that the golf course property was currently being maintained by a professional golf course management company. He opined that the course was in deplorable condition, far beyond simply lack of irrigation; he questioned the ability of RTH to maintain the golf course in an acceptable manner and cited the maintenance equipment and level of maintenance, saying that the course was not very playable and the reason why it was an inexpensive to play there.

Mr. Todd Hendricks, CPH Engineers, 520 Palm Coast Parkway, Palm Coast, said that the firm was the civil engineer for the project. He advised that Mr. Joe Young of Biological Consulting Services had performed an environmental assessment on the project and found no concerns that would prohibit the project from moving forward.

Longtime resident Ms. Susan Reynolds, 17 Oakmont Circle, agreed that the condition of the course was deplorable and likened it to living on a horse pasture in Ocala. She pointed out that any CADD technician could make the renderings of the proposed project look beautiful and noted that the project would require the developers to remove the bulk of the trees. She stated that the existing trees were not maintained and thought that from a safety standpoint they should be required to remove those that had died. She thought that provisions for maintenance of the trees should also be written into the development order. She disagreed that the condition of the course was due to hurricanes, September 11th, or the Nova Road construction.

Ms. Reynolds thought that the proposal was better than allowing 300 homes to be built, but thought that the existing vegetation would also be allowed to die, because the buildings would be constructed over the root systems, which were already stressed.

Mr. Paul Momberger, 100 North St. Andrews Drive, stated that he lived on the 3rd Hole and that he felt the plan included buffers that would negate any impact on the adjacent residents. He noted that part of the reason that the grass did not grow was because there were so many trees. He stated that the infusion of new money for development would bring new life to the golf course and hopefully, help with the maintenance issues. He agreed that it needed to be improved and felt that the proposal was part of the solution. He added that the redevelopment of the clubhouse would also provide social benefits for the community. Mr. Momberger said that he supported the project.

Mr. Adelaide Mathew, 54 South St. Andrews, another longtime resident agreed and said that the 2004 hurricanes had left dead trees that had yet to be taken down. He questioned the proposed underground parking.

Mr. Ervin explained that not all of the parking spaces would be underground. He said that portions of the required condominium parking would be underground and townhome parking would be in garages and on the driveways (above grade).

Mr. Frank Bullard, 115 Rio Pinar Drive, questioned the effect of the new development on the water pressure in the area, which he said often fluctuated by about 30 pounds, depending upon the time of day. He asked if the current residents would be able to utilize the upgraded utilities that would be a part of the new development.

Mr. Ervin said that the development would utilize the existing water mains serving Tomoka Oaks and would have a loop system to maintain the water pressure. He said he had not been aware of a water pressure problem in the area, but assured Mr. Bullard that his comments would be forwarded to the Utilities staff and addressed prior to any City Commission meeting. He mentioned that the City's Fire Department periodically reviewed the water pressure to ensure that there was adequate fire flow pressure throughout the city.

Chairwoman Press again mentioned that the hearing at the advisory board level was a way for the public to ask questions and raise concerns; she encouraged the residents to attend the City Commission meeting, at which time the final decision would be made.

Ms. Sharon Kist, 68 Oakmont Circle, confirmed that there was a water problem in Tomoka Oaks and asked if the new amenities would be available for use by the current residents or whether they would be restricted to use by the owners of the condominiums.

Chairwoman Press said it was her understanding that there would be six tennis courts and assumed that they could be used by the residents.

Ms. Kist asked City staff to check on the water pressure in that area. She remembered that she had once been told that it was a problem at her house, rather the pressure.

Chairwoman Press said she thought that there was a problem with the water pressure throughout the city.

Ms. Christine Goudreau, 115 North St. Andrews Drive, asked about the hours of operation of the courts; she also questioned the light and sound that would emanate from the facility area.

Mr. Ervin said that the hours of operation had been identified by staff, as had the height of the lighting. He said that there were some conflicting requirements, because the police wanted the lighting to be higher and brighter, while staff wanted to keep the lighting lower and less bright. He said that the goal was to prevent spillover lighting onto the properties of the existing residents by utilizing lower lighting, trees and limited hours of operation to prevent the lighting impact.

In response to Mr. McCoy's request, Mr. Ervin advised that whether or not the amenities would be open for use by the residents was a decision to be made by the applicants.

Mr. Jorczak asked if there was a national standard for golf course maintenance and if so, whether it could be applied to the Tomoka Oaks course.

Mr. Ervin said he did not know, but would check into it.

Mr. David Ponitz, 90 North St. Andrews Drive, stated that both Mr. Ervin and Mr. Merrell had done a good job representing the development. He said he was pleased that none of the townhomes or condominium units were directly behind any abutting properties and asked if the development order could include a statement that specified the acreage to remain open space. He thought that perhaps that acreage could be zoned to ensure that it would remain open space.

Mr. Merrell explained that the planned development zoning did differentiate between the residential and recreational components, i.e., it was essentially a custom zoning for the property for which the development order dictated what could or could not be done as a result of the rezoning process. Every individual use (golf course, tennis courts, etc.) would be identified on the plans, which would become a part of that development order.

Mr. Ponitz said that in exchange for special development orders such as that being sought by the applicant, the City had an opportunity to ask for things above beyond what was generally required by the Land Development Code regulations. He asked if the City could ask the applicants to increase the size of the replacement trees.

Chairwoman Press asked the planning director to address the tree mitigation.

Mr. Ervin explained that Mr. Ponitz referred to the City's specific prohibitions regarding tree removal. He said that trees that were removed had to be mitigated; i.e., they had to be replaced. He said that the number of replacement trees was based on the size (diameter) of the tree being removed, not necessarily on a 1:1 basis. He said that protected trees were those 6"-12" in diameter as measured at four feet (4') above grade; replacement trees had to be a minimum 2.5". Specimen trees were those between 12" and 36" in diameter; replacement trees had to be larger, with a fuller canopy. He added that removal of trees over 36" in diameter required City Commission approval. He said because of the size of the project and the existing trees on site and given the proposed landscaping plans, Staff felt it was appropriate to require them to adhere to the City's regular standards as they would for any development.

Mr. Ervin concurred with Mr. Ponitz that the PRD was a discretionary zoning for which the Planning Board and City Commission had the right to ask for mitigation above and beyond what was required by Code. He mentioned that the City's minimum requirements were also specific in regard to native and xeric landscaping, i.e., plantings that could survive in periods of drought. He said that the applicants utilized many different species, such as oaks, pines and magnolias, as well as decorative elements such as crape myrtles, etc., to accentuate the perimeter of the property. He said that some plants would be used in close proximity to the buildings to enhance the architecture being used. He further detailed the proposed landscaping and advised the board that it was within their purview to require an increase in the size of replacement trees if they felt it was justified.

Mr. Lewis Slaughter, 53 North St. Andrews, stated that he was in favor of the project and thought it would be a major asset to the city. He was pleased with the two new lakes that had been dug and said that the reuse water would help the look of the course tremendously. He asked if there could be a light installed at the intersection of Tymber Creek Road and Nova Road.

Mr. Sans Lassiter, Lassiter Transportation Group, said that whether or not a traffic signal would be warranted was the first thing that they had considered, but that they had not been able to show that intersection as warranting a traffic signal. He explained that Nova Road was a State Road and that the DOT (Department of Transportation) had very strict standards for when they would or would not allow a traffic signal; he said that the intersection did not come close to the threshold, mainly because the primary trips to and from the project area were from the south on Nova Road.

Mr. Slaughter stressed his support for the project and said that by their ability to attract more members, they would be in a better position financially to maintain the golf course. He asked if there would be an opportunity, in conjunction with the redevelopment of the golf course, for the adjacent homeowners to connect to the City's reuse system to reduce the need for private groundwater wells in the area.

Mr. Ervin commented to Mr. Ponitz that Mr. Hendrix wanted to discuss the request for upsizing the landscape mitigation.

Mr. Ervin also responded to Mr. Slaughter that the provision of reuse water to the residents adjacent to the golf course would be an expensive City of Ormond Beach public improvement project that would require the expenditure of capital improvement dollars. He said the City Commission had identified the South Peninsula area as the No. 1 priority and said there were other improvements that had been identified for completion in the next 5 -10 years. He said that the extension of the reuse water had not been identified as a capital improvement that could be funded in the next 5-10 years. He said that the City could consider it for future funding and that there might be an opportunity to utilize grants from the Water Management District, but reiterated that it was not currently identified as a priority.

Ms. Zella Wilen, 48 Oakmont Circle, said she was also a long-time resident. She objected to the rezoning request, as well as the request to construct streets across privately-owned business property. She did not want Tomoka Oaks Boulevard to be approved for extension or connection to any planned street. She also objected to the increased traffic that would be created by the new development.

Ms. Wilen referred the Board to the City archives (September and November, 1970); she said that there had been a rezoning issue raised and the homeowners had retained an attorney to argue against the zoning change to R-5. She said that the homeowners had prevailed. She thought that if the proposal proceeded [to the City Commission], the Tomoka Oaks HOA Board of Directors should alert and notify every one of the homeowners in Tomoka Oaks of the rezoning request, not just those within the 300' radius of the project. She said she equated the request for the PRD to the prior request to rezone the property to R-5.

Chairwoman Press pointed out that the meeting would be advertised in the newspaper.

Mr. McCoy noted that the advertisement was countywide.

Dr. Gerald Gibb, 69 North St. Andrews Drive, stated that the traffic report was based on data, [not experience]. He said that the reason that most of the traffic turned southbound on Nova Road because it was too dangerous to turn northbound. He also stated that the construction would occur over a period of time and that construction workers would come and go at the same time as the residents, exacerbating the traffic in the area. He questioned if there was to be a traffic management plan during the construction of the project.

Mr. Lassiter agreed that for the "Existing Condition", the consultants could only count the traffic that did turn, not the traffic that might want to turn but did not. He felt it important that they understand that their

Future Conditions analysis used the Urban Area Model, which distributed traffic without regard to congestion. He explained that the model looked at the major distribution points north and south on Nova Road up to US1 and in other parts of the city to determine the more likely direction traffic would go if there were no congestion. He felt that their analysis was absolutely correct.

Mr. Lassiter also liked the idea of a construction traffic management plan and said that they would recommend identifying routes for the resulting traffic. He reminded the Board that that the 770-trip per day increase was for the buildout of the development, not the construction traffic.

Ms. Leslie Nixon, 36 North St. Andrews Drive, expressed concern with additional traffic trying to negotiate the Tomoka Oaks Boulevard circle near the entrance to the subdivision.

Mr. Lassiter explained that the 770 trips was the number of estimated trips on a daily basis; he said there were 74 in the peak hour. He further explained that typically, the impact study deducted the existing traffic from the traffic proposed for the new development, but instead, the subject analysis assumed the existing traffic would remain. He said that meant that their analysis was overly conservative (predicted too much traffic), but that they wanted to be as conservative as possible. He stated that their analysis also assumed 100% occupancy year-round, which they also knew to be unlikely, but which would also produce conservative numbers.

Ms. Nixon asked for the percent of increase in trips. She wanted to make sure that Staff recognized that the ongoing development along the North US1 corridor would mean additional traffic for Nova Road, making left turns out of the subdivision even more difficult.

Ms. Nixon also asked if the Board could recommend fewer homes, rather than 120 proposed. She thought that the applicants could improve the clubhouse, the golf course and the tennis courts, but scale down the residential portion of the project.

Mr. Ray Sanchez, 12 Pine Valley Circle, stated that the traffic circle was dangerous and confusing, particularly since it was two-way traffic. He questioned the sales prices of the residential units.

Mr. Lassiter responded that because a traffic signal at the intersection with Nova Road was not warranted, the stop sign control was deemed to be adequate. He said that the same was true for traffic internal to the site, which would be less than at Nova Road. He answered that the consultants had not provided a percent of increase resulting from the project, but pointed out that they did not take a deduction either; they simply added the anticipated traffic to it (an over-estimate).

Mr. Jorczak asked if they had given any thought to how the circle could be improved.

Mr. Lassiter said that the circle was analyzed in the current condition. He said they could certainly do so by studying if it would be warranted by the level of delay, would reduce the level of delay, or would make the circle safer.

Mr. Jorczak said that the safety element seemed to warrant that study, regardless of the additional traffic that would be generated from the proposed 122 units. He remarked that the junction might require a different kind of layout.

Mr. Lassiter said that as a traffic engineer, his primary focus was safety. He stated that round-abouts and traffic circles, although becoming more popular, were particularly pedestrian-hostile. He pointed out that

cars did not have to stop, gaps in traffic did not occur, and visibility was lessened because of the lack of time to look left and right. He said that because traffic came from the left, people did not always look to the right for pedestrians. He reiterated that pedestrian safety was one of his major concerns.

Mr. Thomas, a resident of Tomoka Oaks, thought that striping or arrows on the pavement might help drivers negotiate the circle. He thought that there were some simple things that could be done to improve the situation.

Mr. Lassiter said that it was something at which they could look.

Chairwoman Press thought that Mr. Lassiter could work on those things before the item reached the City Commission, since it was a concern to many of the residents.

Dr. Grissom questioned the nature and location of common areas for the new owners.

Mr. Merrell said that would be detailed in the plat, another process they were going through. He said that he did not have exhibits available for the item before the board, but that the common areas would be fully identified in the plat documents.

Dr. Grissom asked if the applicant wanted to respond to the residents' comments regarding the "deplorable condition" of the golf course.

Mr. Merrell said that they intended to address that conditions at the golf course were less than perfect. He said that they also wanted to point out that the golf course was being redeveloped to retrofit reuse water lines throughout the entire irrigation system at a cost of hundreds of thousands of dollars. He said that reshaping the course would also be a huge improvement. He said that together with the residences, the golf club and the tennis facility, it would be a much better place. He thought that the residents would be happy with it.

Mr. Merrell agreed that a CADD drawing could make anything look good, but pointed out that the pictures would be the zoning map for the property. He said that if they wanted to change anything, they would have to reappear before the Board for another advertised public hearing. He said that the reason Staff liked the Planned Residential Development was that they had the ability to negotiate the zoning and had done so to the benefit of the City and pointed out that those things were binding.

Dr. Grissom asked Mr. Merrell if he and the applicant had previously discussed the possibility of increasing the size of the replacement trees used for mitigation.

Mr. Merrell said that their landscape architect, Galen Pugh, had been in dozens of meetings with the City staff and that many changes had been made to the plan to avoid impacting important trees. He said it was a given that the trees would be thinned and that the dead trees would be removed; he said the plan also exceeded the City's Code requirements for landscaping, typical of planned development rezoning negotiations. He reiterated that there had been a great deal of focus by City staff with regard to the trees.

Dr. Grissom stated that she was sensitive to the tree mitigation concerns and recalled her shock when she discovered that the beautiful, healthy trees in Breakaway Trails had been removed and replaced with what amounted to twigs. She thought that they should exceed the current excession, if possible.

Mr. Merrell thought that the issue was avoiding the removal of the trees, rather than with what to replace the existing trees. He noted that a tree survey had enabled them to identify all the important trees and that saving certain trees had required them to redraw the plans several times.

Dr. Grissom said she recognized that the applicants had presented a project that was beautiful. She questioned whether the Board could mandate that the development be sustained in the best possible condition at all times, i.e., in perpetuity.

Mr. Thomas recalled that Hurricanes Charley and Frances had caused the removal of a lot of old, dying and diseased trees, but not before tremendous damage had been done to the homes of the residents. He advised that his daughter, a resident of Ormond Lakes, had been required to save some magnificent oaks on her property, but less than a year later one of those same oaks was costing her $2,000 to remove because it had been diseased and had fallen on her fence. He stated that although he felt mitigation was a good thing in the long run and that he was not in favor of taking out a lot of trees, there were a lot of rotten, dead, sick and diseased trees throughout the city that should be removed.

City Attorney Hayes advised the Chair that he included a provision in all of the development orders that conferred to code enforcement the power to enforce the terms of the development order, as with any other ordinance. He said that the City therefore had the power to keep all projects from falling into disrepair.

Chairperson Press pointed out that it was 9:00 pm and asked that subsequent speakers limit their comments to things that had not already been expressed to the board.

Ms. Linda Larsen Lewis, 231 Rio Pinar, expressed her concern that her property line would be 100 feet from one of the three estate lots behind her property. She said that the trees were the only thing that would visibly buffer her home from her new neighbor and asked for assurance that the trees would remain.

Mr. Ervin reported that he had met with Ms. Lewis the day before and stated that her concerns were the City's concerns. He pointed out the location of the three estate lots and said that those lots would have the minimum lot size, width and setbacks that applied to the existing subdivision. He also pointed out Mrs. Lewis' lot and said that although the distance from the lot line to the proposed lot line was 100', the distance between homes would be 160'. He said that the trees in that area would be preserved by the developer, but cautioned that once sold, the homeowner could take out some of the trees if they met the mitigation requirements. He said that the City had not required a minimum buffer because of distance between the lot and the buildings and the existing landscaping along the perimeter of the Lewis lot line but advised that it was within the purview of the Board to do so if they felt the trees should be protected.

Mr. Jorczak questioned the size of the existing trees.

Mr. Ervin replied that the trees ranged from small saplings to a 40" oak; he noted that there were several historic trees, the majority of which were specimen trees. He said that the tree survey showed only the trees over 6" in diameter (protected trees).

Mr. Jorczak asked if taking those trees would require a separate action from the City.

Mr. Ervin explained that once the three residential lots were sold, the homeowners could request the removal of any tree on their property, the same as any homeowner in the city of Ormond Beach. He said

the number of trees that would have to be replaced would depend on the size of the tree to be removed. He said there was currently nothing in the City's Code or in the project documents that would require minimum tree line buffering on the residential lots.

Mr. Jorczak remarked that he understood, but thought it unlikely that someone buying an estate lot and erecting a big house would then want to take down the trees.

Mr. Ervin replied that it had happened in the past. He recalled Ms. Lewis' question as to whether or not a buffer was to be conserved that could not be touched and stated that the reality was that when the property was transferred, the owners could conceivably remove the trees.

Mr. Jorczak advised Ms. Lewis that taking down a specimen tree in Ormond Beach was a big deal.

Mr. Thomas agreed.

Mr. Ervin pointed out that historic trees were different than specimen trees. He stated that the developer was being required to do a directional dig for the extension to the sanitary sewer so that it a 40" historic oak would not be impacted. He said that there were also 25 – 28" oaks that had been identified for preservation, but wanted it on the public record that they were located within the property to be subdivided; therefore, if the subsequent owners met the mitigation requirements, removal of the trees would be justified.

Dr. Grissom asked how the deed restriction would work.

Mr. Ervin said that if the Board wanted to require a minimum buffer, they could identify, e.g., a 10' perimeter buffer with a tree every so many feet as part of the development order.

Ms. Lewis stated that people did take trees down so that they could have view of the golf course. She acknowledged that tracking 1,100 trees was an overwhelming job, but stated that she had noted a healthy pine and two smaller pines on the property that were not shown on the survey.

Ms. Reynolds asked what protections were in place to prevent the project from going bankrupt either because of mismanagement or because of market conditions. She said that she had seen it happen in far better situations and did not want a situation in which new owners would be allowed to do whatever they wanted just because they were finishing a stalled project. She expressed concern because of the scope of the project and because the owners had not demonstrated the ability to maintain the golf course.

City Attorney Hayes advised the Chair that development orders ran with the land; therefore, the owner of the land (or a subsequent owner) was subject to the requirements of the development order. He said there was no way to know whether or not any particular project would be built out or flounder. He said that the best the City could do was to create a safety net in the development order and ensure that the development occurred in accordance with the requirements of the approval.

City Attorney Hayes confirmed for Ms. Reynolds that the proposal was for a phased project and that the developer would have to complete one phase before starting another.

Long-time resident Ms. Susan Juckett, 311 Rio Pinar Trail, said that her view, which had gone from "lovely" to a lot of dead trees, and would now be of a comfort station (golf course bathroom).

City Attorney Hayes assured Ms. Juckett that any new owners in the future would also be required to preserve the golf course.

Ms. Juckett questioned the time line for all phases to the anticipated completion of the project. She stated that she was concerned with construction noise, dust, etc.

Mr. Ervin said that the construction timeframe identified in the PRD development order would be valid for five (5) years. He said that if Phase I had not been completed in that timeframe, the order would lapse. He said that the conditions would remain in place, but any redevelopment would require that it be brought back for another hearing and, with the existing conditions as minimum standards, any kind of upgrades would have to be to current Code.

Ms. Juckett asked if it would be to Phase I completion or completion of the project.

Mr. Ervin responded that it would be to completion of the project.

Ms. Juckett asked if the tree mitigation would be on-site. She also questioned the impact of new residents on Tomoka Elementary School, shopping facilities, the hospital, as well as the effect they could be expected to have on the water pressure in the area, already low.

Chairperson Press pointed out that the City staff was not aware of the problem and would address it.

Ms. Juckett stated that the problem would get worse before it got better. She found it hard to believe that the developer did not know the price for which they expected to market the units.

Mr. John Randall, 70 Oakmont Circle, recalled that he and his father had cleared their lot by hand and that subsequent generations would be occupying the residence. He questioned what mechanism would ensure that the integrity of the project would be maintained and that the homeowners' association would be able to collect their dues in order to pay the cost of maintaining the things for which they would be responsible. He asked who would be responsible for the property covered by the conservation easements and questioned what would happen if the golf course went belly-up. He also expressed concern with the wildlife habitat that would be lost.

Mr. Randall commended the developer on a great idea, but sought assurance that the dream continued to be a reality in 20 years.

Dr. Grissom said she liked the idea of a deed restriction to protect the property.

Mr. Ervin responded to Mr. Randall's question that the City would have the ability, as with any easement, to access the property for maintenance and then charge the homeowners' association; he likened it to a sort of lien on the property. He said the City had the guarantee that someone would maintain the property and that the HOA would ultimately be financially responsible per code enforcement provisions in the easement documents.

Mr. Ervin said that the conservation/open space easements over the golf course meant that the owner continued to own the golf course property, but restricted the use of the property to a golf course and open space purpose. He said it would be an easement to the City; therefore, the easement could not be released without the approval of the City. He said that the easement would be described around the golf course itself, and that based on the testimony, RTH Corporation would maintain ownership of the golf

course; he said that the areas around the townhomes and condominiums would be identified as common areas for those particular projects. He said that the common areas being used by the condominiums would be owned, maintained and operated by that association, whereas the golf course would be owned, maintained and operated by the RTH, Inc. He said that the City would require that the conservation easement on the golf course be recorded prior to any development. He pointed out that the easement was being created in association with the subdivision plat.

Mr. Jorczak asked if the City had ever required surety bonds to ensure completion of a project.

Mr. Ervin explained that they allowed surety bonds only for subdivision improvements, not for commercial developments. He agreed with the resident who had stated that developers sometimes failed to complete projects and said that in a market-driven economy the market sometimes had to rebound before someone else finished a development. He said that was the reason that the city attorney required recording of a very specific development plan that provided very specific guidelines as to what could be developed on a certain property; a subsequent developer would know exactly what could and could not be done. He explained that traditional zoning allowed for a great deal of options, whereas the PRD was a very specific recorded document of covenant and restrictions that traveled with the land, not the owner. He said it gave the residents of Tomoka Oaks much better protection for future conditions.

City Attorney Hayes said that from a legal standpoint, surety bonds sounded good, but were not practical. He pointed out that the City would not want to have to finish a project in default; it would create a nightmare scenario for the City.

City Attorney Hayes recommended that the Board members voice their comments on the proposal in an effort to solicit a motion. He offered to assist them with any conditions that they might wish to impose with their recommendation.

Mr. Ervin stated that he had summarized for clarification the ten (10) issues that had been brought up by the board members:

1) The City's engineering staff reported no environmental impacts.
   - Determine whether or not an environmental impact or assessment report has been done.
   - Forward a copy to the resident who requested it and include a copy in the City Commission's agenda packet.

2) Traffic conditions:
   - Analyze improvements at the circle that would make it safer (striping, signage, etc.).
   - Ask the applicant to look at other improvements that might be made.
   - Provide signal warrant study background information, i.e., why a signal is not warranted at the intersection of Tomoka Oaks Boulevard and Nova Road

3) Request to upsize the minimum size of the trees for mitigation. *(Mr. Ponitz)*

4) Question the possibility of providing reuse water for lots adjoining the golf course (noted that it was not identified in the City's Capital Improvements Program) - *Mr. Ponitz*

5) Address water pressure issues in Tomoka Oaks and include in the information forwarded to the City Commission.

6) Identify if minimum golf course maintenance standards are available from either a local or national organization. *(Mr. Jorczak)*

7) Clarify the role of the City in establishing the Covenants and Restrictions and the Development Order to ensure that the golf course is protected in perpetuity.

8) Possibility of notice to future purchasers of property in the subdivision of potential for airport impacts. *(Mr. Jorczak)*

9) Address concern regarding the buffering of the estate lots. (*Ms. Lewis)*

10) Documentation to ensure that each phase of the project is completed prior to beginning the next phase; ensure that the complete project will be built out in five years.

Chairwoman Press opened the floor to board comments.

Mr. McCoy pointed out that Mr. Momberger, one of the speakers, was a registered landscape architect and that he had not seemed particularly concerned with the issue of tree mitigation. He also pointed out that Mr. Ponitz, one of the other speakers, was the Utilities Engineer for the City of Daytona Beach. He said that the gentlemen were good at their jobs; therefore, he felt reasonably assured that the landscaping mitigation was well within or surpassed the City codes. He suggested that the many of trees about which the residents were concerned were probably in poor condition and had most likely reached the end of their useful life.

Mr. Thomas said he was also a long-time resident who favored the project. He said that he had sat on the Planning Board for many years and could recognize when the alternative was worse than the plan. He said he did not want 300-400 homes added, when the proposal was for only 122 homes of what he believed would be part-time residents. He felt it was a beautiful plan and that the project would be a great asset to Ormond Beach.

Mr. Thomas referred to the concern expressed by a resident that the survey had missed a large sand pine, and explained that the State did not recognize sand pines as significant trees; therefore, it had not been marked. With regard to the concerns about the project not being completed, he stated that the three best real estate values were: a view, water and a golf course; he thought there would be buyers simply because the property was on a golf course. He restated that the City was tough on the issue of tree removal and reiterated his support for the project with the conditions discussed.

Mr. Jorczak echoed Mr. Thomas' comments and said that he thought it was an upscale project with a lower density than what would otherwise be allowed. He thought it would upgrade the neighborhood and would generate dollars that would help improve the golf course and surrounding amenities. He said that he hoped that the City would consider the concerns raised at meeting and said that he would recommend approval.

Dr. Grissom said she also supported the project and any motion to approve would include any amendments necessary to address the concerns raised. She thought that deed restrictions should be

required for the three estate lots to require that they maintain the tree buffer in order to protect the privacy of abutting property owners.

Chairwoman Press opined that no one would buy the properties unless the golf course was upgraded and felt that the proposal would force those improvements to occur. She said for that reason she believed the project would be good for the area and was an example of Smart Growth.

Mr. Thomas recommended approval of PRD 06-32, with the recommendations by staff. He added that his motion was amendment friendly and clarified that he was including the ten items as listed by the planning director.

Mr. McCoy seconded the motion.

City Attorney Hayes responded to questions by Mr. Jorczak and Mr. McCoy that the [tree] buffer mandated by deed restriction would apply only to the three estate lots. He said that the board could make that a condition of their recommendation.

Mr. Ervin replied to Mr. Thomas that the list of ten items included addressing the traffic circle. He also pointed out that the applicants had already agreed to provide for a minimum 10-foot wide buffer at the rear of the lots, in which there would be a minimum planting of one tree every 30 linear feet with continuous hedge material between the trees. He explained that the buffer for those homes would be required as a part of the development order, either as a private restriction on the individual lots or by mandating that the buffer be placed on the golf course outside those lots. He said that the applicants could make that decision.

Mr. Merrell said that he understood the resident's concern, but said that having buffers between two houses was not typical and that houses backed up to each other in subdivisions all over the city. He said that the applicants were willing to do what Mr. Ervin was proposing, but that it was routinely done as a matter of zoning. He thought that having a provision in the development order was the better way to handle the issue, i.e., the developer would establish the buffer and it would then transfer with the land; subsequent property owners would be responsible for maintaining it. He said that the provision could be enforced through the code enforcement mechanism.

City Attorney Hayes agreed that it would be better to put the onus on the developer as opposed to the property owner.

Mr. Merrell said that the suggested method would require only a code enforcement action rather than a court hearing, should there be a problem with the buffer in the future.

Mr. Thomas agreed to add acceptance of the applicants' voluntary inclusion of the buffer to his motion.

Mr. McCoy reiterated his second.

Ms. Bates called the question, which was approved by unanimous vote.

Mr. Thomas thanked everyone for attending the meeting, participating in the democratic process and helping the board to make their decision.

Mr. Ervin announced that the proposal was tentatively scheduled for the October 3rd City Commission meeting. He advised the residents that they would again be noticed and that an advertisement would again run in the newspaper.

The board voted to close the public hearing.

VIII. MEMBER COMMENTS

There were no member comments.

IX. ADJOURNMENT

There being no further business, the meeting adjourned at 9:45 p.m.

Respectfully submitted,

Clay Ervin, AICP, Planning Director

ATTEST:

Mrs. Rita Press, Chairperson

ORMOND BEACH PLANNING BOARD

Regular Meeting

July 13, 2023 6:00 PM

Calvary Christian Center
1687 West Granada Boulevard
Ormond Beach, FL 32174

PURSUANT TO SECTION 286.0105, FLORIDA STATUTES, IF ANY PERSON DECIDES TO APPEAL ANY DECISION MADE BY THE PLANNING BOARD WITH RESPECT TO ANY MATTER CONSIDERED AT THIS PUBLIC MEETING, THAT PERSON WILL NEED A RECORD OF THE PROCEEDINGS AND FOR SUCH PURPOSE, SAID PERSON MAY NEED TO ENSURE THAT A VERBATIM RECORD OF THE PROCEEDING IS MADE, INCLUDING THE TESTIMONY AND EVIDENCE UPON WHICH THE APPEAL IS TO BE BASED.

PERSONS WITH A DISABILITY, SUCH AS A VISION, HEARING OR SPEECH IMPAIRMENT, OR PERSONS NEEDING OTHER TYPES OF ASSISTANCE, AND WHO WISH TO ATTEND CITY COMMISSION MEETINGS OR ANY OTHER BOARD OR COMMITTEE MEETING MAY CONTACT THE CITY CLERK IN WRITING, OR MAY CALL 677-0311 FOR INFORMATION REGARDING AVAILABLE AIDS AND SERVICES.

I. ROLL CALL

Members Present	Staff Present
Angie Shull, Vice Chair	Claire Whitley, Assistant City Manager
G.G. Galloway	Steven Spraker, Planning Director
Al Jorczak	Becky Weedo, Senior Planner
Mike Scudiero	David Allen, Planning Civil Engineer
Barry du Moulin	Cara Culliver, Landscape Architect
Troy Railsback (Absent)	Robin Gawel, Senior Planner
Doug Thomas, Chair	Sarah Cushing, Senior Planner
	Marcella Miller, Recording Technician
	Randy Hayes, City Attorney

II. INVOCATION

Chairman Thomas led the invocation.

III. PLEDGE OF ALLEGIANCE

IV. NOTICE REGARDING ADJOURNMENT

NEW ITEMS WILL NOT BE HEARD BY THE PLANNING BOARD AFTER 9:00 PM UNLESS AUTHORIZED BY A MAJORITY VOTE OF THE BOARD MEMBERS PRESENT. ITEMS WHICH HAVE NOT BEEN HEARD BEFORE 9:00 PM MAY BE CONTINUED TO THE FOLLOWING THURSDAY OR TO THE NEXT REGULAR MEETING, AS DETERMINED BY AFFIRMATIVE VOTE OF THE MAJORITY OF THE BOARD MEMBERS PRESENT (PER PLANNING BOARD RULES OF PROCEDURE, SECTION 2.7).

Mr. Randy Hayes, City Attorney, explained the process for the public hearing. Attorney Hayes recommended that those individuals who sought to give testimony on the application be sworn in by the Board Secretary and to affirm if they took the Oath when they speak.

Attorney Hayes reviewed an outline of procedural and evidentiary matters regarding Quasi-Judicial proceedings regarding the roles of the City Attorney, Planning Board and explanation of a Quasi-Judicial hearing, competent substantial evidence, Burden of Proof, witness testimonies, and the decision making process of the Planning Board. He added that there are two stipulations that the Planning Board members must vote on to: (1) agree to stipulate that the professionals who will testify on behalf of the parties are qualified to do so, and (2) allow Tomoka Oaks HOA to participate in the proceeding as a "party-intervenor".

Attorney Hayes advised the Board that once moving into the public hearing they must vote on the two stipulations aforementioned.

Chairman Thomas stated that the Planning Board members are their neighbors and are volunteers. He continued that the Board tries to do what is best for them and the City of Ormond Beach, and have no special interest.

Chairman Thomas opened the Public Hearing.

V. PUBLIC HEARINGS

A. PRD 2022-043, Tomoka Reserve – Issuance of a Development Order

Chairman Thomas asked Ms. Miller, Recording Technician, to read the Oath. Ms. Miller read the Oath:

"Do you swear that the testimony you are about to give is the truth, the whole truth and nothing but the truth?"

Mr. Galloway motioned to approve of and accept the following stipulations: (1) the parties agree to stipulate that the professionals who will testify on behalf of the parties are qualified to do so; and (2) allow Tomoka Oaks HOA to participate in the proceeding as a "party-intervenor". Mr. Jorczak seconded it. Vote was called, and the motion was approved (6-0).

Mr. Steven Spraker, Planning Director, explained the application for the issuance of a development order for the Tomoka Reserve subdivision. The application seeks to allow the issuance of a development order for 276 single-family lots on approximately 147.94 acres under certain conditions and associated subdivision improvements. The subject property is currently zoned as Planned Residential Development (PRD), and is located at 20 Tomoka Oaks Boulevard.

Mr. Spraker stated that the property has an existing land use of "Low Density Residential" (LDR) which allows a density of up to 4.3 units per acre. He continued that the purpose of the land use is to protect and encourage the continued development of typical single-family residential areas and stabilize and protect the character of

such neighborhoods. Mr. Spraker added that institutional uses may be permitted in accordance with the maximum floor area ratio.

Mr. Spraker continued with the explanation of the existing zoning of Planned Residential Development (PRD). In 2006, there was a zoning map amendment that went from R-2, Single-Family Low Density to PRD, Planned Residential Development. A site specific development order was approved for 122 residential units and the reconfiguration of the golf course. Mr. Spraker stated that one of the conditions of approval was to provide the covenant and restrictions on the golf course because in 2006 it was determined that there was no covenant and restrictions. The development order expired. He explained the process for the issuance of a development order began with a neighborhood meeting, in which the property went through two, then Site Plan Review Committee (SPRC), Planning Board and City Commission. Mr. Spraker explained that the development order is a zoning document that provides the number of lots, landscape buffer, and recreational areas. If approved, the next step is the construction plans as preliminary plat, with detailed engineering, landscape buffers, and roadways, which also goes through the process with the SPRC, neighborhood meeting, back to the Planning Board and then on to the City Commission.

Mr. Spraker reviewed the Tomoka Reserve Site Plan. He continued that the project is approximately 148 acres, with 276 proposed units and a density of 1.87 units per acre. He stated that the project seeks to allow a gated vehicular access while allowing pedestrians to still access the project through sidewalks. Mr. Spraker stated that there is an emergency access easement noted on the plan. The project is not in a designated floodplain, and there are no wetlands on the property. He added that an environmental assessment was provided with the project. Mr. Spraker remarked that the site plan is preserving 34 acres and an additional 9 acres for recreation. A key issue expressed through the process is size of the lots, with the proposal of 80' lots in width, 60' lots in width, and 50' lots in width. He continued that there is a proposed 50' buffer around the perimeter of the site (3.3 miles). The project stormwater areas use berms around exiting vegetation which is a low impact development technique. He added that the historic trees on the property are being sought to be preserved and that they provided the required school concurrency and a Traffic Impact Analysis.

Mr. Spraker reviewed key issues included in the staff report, starting with issue 1, the development ability of the former golf course. Mr. Spraker stated the Planning Board packet included an analysis from Ms. Davis, including a letter from Mr. Brent Spain Esquire. Also included in the packet was an analysis from the City Attorney's office and from the applicant's law firm, Cobb Cole. Mr. Spraker explained the position of the city staff that there is no covenant and restrictions that would prevent the site from being used for residential purposes.

Mr. Spraker reviewed issue 2, the lot size compatibility. Mr. Spraker described the R-2 zoning district which was the original zoning on the property and the surrounding area. The R2 zoning district requires a 100'-wide lot width a 10,000 square-foot lot area size. He explained that part of the applicant's Planned Residential Development request is to provide additional buffers, recreation and open space in order to negotiate lot size. They are not increasing the overall density but reconfiguring it in order to provide additional natural preservation and additional buffer and recreation,

according to Mr. Spraker. Staff discussed its similarity to what happened with an area of west Ormond, where there were applications for subdivisions less than 80' in width. These applications were denied and the subdivisions were made to comply with the 80'-wide lots.

Mr. Spraker discussed issue 3, planting of the 50' natural buffer. The applicant is seeking to use the existing vegetation along the perimeter buffer and in the areas that do not have vegetation, they are seeking to do seven trees and 30 shrubs and grasses, per 100 linear feet, clustered in 20' spacing. The irrigation is proposed to be provided by a truck with a water tank and no permanent irrigation. Mr. Spraker continued that the position of the Site Plan Review Committee (SPRC) is that the type 6 buffer which requires seven trees, 70 shrubs and 70 ground covers per 100' linear feet with staggered planting, should be adopted by the Board as it has worked well in other applications. SPRC staff strongly objects to the use of non-permanent irrigation and believes that this will lead to future land use issues and the Homeowners' Association (HOA) would be tasked with doing the irrigation. Mr. Spraker stated the buffer should not be clustered in a 20-foot buffer depth but rather staggered over the 50-foot buffer area in order to allow for proper tree growth and spacing.

Mr. Spraker discussed issue 4, the setback plan. Mr. Spraker stated that the applicant proposed a setback plan and staff provided an analysis in the staff report. Mr. Spraker reviewed the setbacks proposed by the applicant and the recommendations of the SPRC. Staff does support the front porch setbacks, as they have been successful in Chelsea Place.

Mr. Spraker discussed issue 5, Sheet PD6 note on the lot separation. Mr. Spraker explained that the note allowed variation on the buffer width. Staff recommends that the note be amended to state that the 50' buffer abutting the Tomoka Oaks existing residential lots and areas called out as natural preservation shown on the site plan. The natural preservation area shall not be modified and shall always be vegetative areas (Option 24 in the staff report). Mr. Spraker stated the language within the development order becomes a contract and when they go to construction that is what needs to be presented in the preliminary plat.

Mr. Spraker discussed issue 6, the traffic. The applicant performed a detailed Traffic Impact Analysis (TIA). City staff had the TIA reviewed by the traffic consultants, Traffic Engineering Data Solutions (TEDS) employed by the city. After requests from citizens at the February neighborhood meeting, the applicant updated the TIA traffic counts to get current counts. The TIA concluded that 96 percent of the project trips used Tomoka Oaks Boulevard and 4 percent used Iroquois Trail for external access. He added that the traffic study found that a traffic signal is warranted at Tomoka Oaks Boulevard and Nova Road. Mr. Spraker stated that the TIA concluded that all local intersections operate at a Level of Service "A" or "B", where the adopted Level of Service is a "D". A proportionate fair share calculation was drafted, which is where state law allows them to contribute their fair share for whatever traffic impacts they have. Mr. Spraker referenced another traffic issue that is part of the SPRC review, the intersection of St. Andrews Drive and Tomoka Oaks Boulevard. The intersection is awkward and does not function well. Mr. Spraker stated staff believed that the applicant should bear some responsibility in the reconfiguration, perhaps through a joint partnership through the impact fee credits.

Mr. Spraker stated that comments were received from residents in that they desire sidewalks on both sides of Tomoka Oaks Boulevard, where the applicant only proposed a sidewalk on one side.

Mr. Spraker discussed issue 7, recreation areas. The development order seeks to provide all outdoor recreational areas with no indoor recreation provided. The project has proposed 9 acres of recreational areas, with final details to occur with the preliminary plat.

Mr. Spraker discussed issue 8, environmental analysis. Mr. Spraker states Ayden Environmental submitted site assessment reports and a Soils Management Plan to the Florida Department of Environmental Protection (FDEP), where all work will be managed by them with the oversight of the FDEP. The FDEP approved the site assessment reports and Soils Management Plan in a letter dated November 16, 2022. Mr. Spraker stated that there are no wetlands on the site and it is not in a designated floodplain, and added that any gopher tortoises onsite will be reviewed at the preliminary plat.

Mr. Spraker stated that the applicant has applied for a R-2 Zoning Map application, separate of the PRD, with the intent that if the PRD is not approved, it would be necessary to ensure that they have zoning. He reiterated that the R-2 zoning allows 100' wide lots with a 10,000 square-foot lot area minimum. The setbacks are 30' in the front yard, with the building coverage at 35 percent. Mr. Spraker stated Planned Developments have additional requirements on the natural preservation, requiring 20 percent whereas the Land Development Code (LDC) requires 15 percent. Mr. Spraker continued that the applicant is proposing a 50' buffer within the Planned Development, when only 6' is required under the R-2 zoning guidelines. Mr. Spraker detailed that the R-2 zoning district does not require a perimeter setback, where the Planned Development requires a 40' perimeter setback. The Planned Development site plan includes 9 acres of recreational area and there is no recreation requirement in R-2 zoning.

Mr. Spraker reviewed the correspondence received throughout the proposed project and advised that a city webpage is maintained that shows each project submittal site plan, in which the information and documents were also enclosed in the Planning Board packet. He explained that concerns received included the topics of lot sizes, lot compatibility, stormwater, buffer widths, impacts to the existing wildlife, and traffic. The correspondence received were included in the packet.

Mr. Spraker explained that when reviewing the PRD criteria, the Planning Board should take into consideration: (1) the application submittal, (2) staff report and SPRC comments, (3) written correspondence provided, (4) criteria of the LDC contained within the staff report, and (5) testimony provided at the Planning Board public hearing. He stated that staff recommends denial of the proposed site plan for the issuance of a development order. He continued that there are items that the applicant can do that would change the recommendation including larger lot sizes, adjusting the buffer in terms of the plantings and irrigation, revisions to the setback plan, participation in the diamond intersection with a diamond reconfiguration

requirement at the construction (preliminary plat) phase of the development, and sidewalk additions be on both sides of Tomoka Oaks Boulevard.

Mr. Spraker concluded with thanking Calvary Christian Center with allowing use of their facility for the public hearing, and reminded everyone that there were comment cards in the back for those wishing to speak on the item.

Board Discussion and Questions

Mr. Jorczak asked for clarification of the statement in the Board packet, specifying that denial of the application may lead to the movement of the R-2 Single-Family Low-Density Zoning Map Amendment to provide the property a zoning designation. Mr. Spraker replied that the property is required by state law to have a zoning. If unable to work through the Planned Residential Development (PRD) process, the property is required to have a zoning designation. Mr. Spraker states the applicant has submitted an application to amend to R-2 which allows single-family lots as an allowed use. Under the R-2 zoning, as long as the application meets the criteria in the LDC, there is nothing that the SPRC can do to deny the application. Mr. Spraker continued that they would be required to have 100' wide lots and 10,000 square feet lot sizes, and have to have stormwater and utilities, and 15 percent natural preservation.

Mr. Scudiero asked Mr. Spraker for clarification based on the 147 acres, what the number of single-family homes would be to fall under the second scenario. Mr. Spraker answered that a site plan is required to calculate the number. It has not been submitted to city staff.

Ms. Shull inquired about the 100' wide lots and if that would be throughout the entire proposed property under the R-2 zoning. Mr. Spraker confirmed yes, but commented that there are certain things that staff cannot require such as increased buffers and recreation. The entire basis of the application is the trade of the increased buffers and the natural area for smaller lots in size.

Chairman Thomas disclosed that he met with the attorney for the applicants, Mr. Rob Merrell, Esquire, Cobb Cole Attorneys at Law, at City Hall on July 12, 2023 to discuss the item.

Applicant's Presentation

Mr. Rob Merrell, Esquire, Cobb Cole Attorneys at Law, 2049 S. Ridgewood Avenue, Daytona Beach, and Representative of the developers, thanked the Planning Board and staff for their time. He reiterated the choices that are before the Board, adding the possibility of a custom choice option, if they so desire. He delivered a summary of the project and overview of the rezoning criteria in a PowerPoint presentation, including explanation of the experts testifying about the project and their qualifications.

Mr. Merrell stated that the applicants purchased the property approximately three years ago. Two neighborhood meetings were held as well as other smaller meetings with the HOA and others. He concluded that several revisions have been made to the plan in which Mr. Dwight Durant, Zev Cohen & Associates, will detail.

Mr. Dwight Durant, Zev Cohen & Associates, 300 Interchange Boulevard, stated that the overall plan is for 276 units on 147 acres, where the holding capacity density analysis allows 800 units. He reviewed the site plan and open space plan and explained the benefits of the design, including the water distribution system, versus the golf course fertilizer effects. Mr. Durant continued with details on emergency access. He added that the minimum size lot, surrounding the perimeter of the site is 80' wide by 120' long, which allows additional space between the homes. He continued with information on the lot range widths from 50' to 80', the maintenance plan for the 50' buffer, and the proposed density of 1.87 units per acre. Mr. Durant explained that the open space plan exceeds the LDC standards on preservation areas and that 53 percent of the site is dedicated to landscape buffers, open space, stormwater management systems, and recreation areas. Mr. Durant added that he took the Oath.

Mr. Merrell continued with his presentation and added that he did not take the Oath. He explained the architectural standards of the proposed project, commenting that the neighbors want quality and diversity, similar to what Tomoka Oaks currently has, and that is what is being proposed with the variety of architectural plans.

Mr. Jake Stehr, Zev Cohen & Associates, 300 Interchange Boulevard, began with advising the Board that he took the Oath. He stated that the proposed property 50' landscape buffer is approximately three miles in length. In reference to the buffers, he described the proposed landscape and irrigation plan and remarked that the project requires a six (6') foot landscape buffer which requires two shade trees, 20 shrubs and 20 ground cover per 100 linear feet, and the applicants are proposing seven (7) trees, 30 shrubs and 30 ground cover per 100 linear feet.

Mr. Donald Spence, President and Owner, Native Florida Landscapes, LLC, stated that he is also a Board Certified Master Arborist and Ph.D. of Plant Pathology, University of Florida. Dr. Spence explained that he assisted with performing the tree survey and with the proposed buffer layout design, keeping it as similar to the existing buffer as possible. The layout is designed for a native, drought-tolerant species, that will not need irrigation after establishment.

Mr. Durant reviewed the criteria met in the LDC standards and the compliance of them.

Mr. Mark Karet, Director of Planning and Landscape Architecture, Zev Cohen & Associates, 300 Interchange Boulevard, stated that he took the Oath. He added that he has 35 years of experience in both the public and private sectors, has his Master's Degree in Urban and Regional Planning from the University of Florida, and is also a member of the American Institute of Certified Planners (AICP). Mr. Karet spoke on the project's conformance with the LDC standards and consistency with the Comprehensive Plan. He commented that LDC, Section 2-35(b), deals with more intense uses, such as townhomes and apartment districts, versus what is being presented in the application. He referenced the concern of 'crowding' and noted that the density is less than one half of what is permitted under the Future Land Use designation. The open space and buffers create slight crowding, although more than 50 percent of the site is open space. Mr. Karet added that the property falls in the "Low Density Residential" Future Land Use designation and the proposal aligns with

the land use and LDC, and the application aligns with the goals, policies of the city, supports infill development, and adheres to the intended use of the property.

Mr. Durant explained that the last criteria is on trees and that Mr. Bill Ray, AICP, and Mr. Jeff Flairty, P.E., Environmental and Planning Consultant and Presidents, Ray and Associates, are in attendance for any questions. He concluded that there are no wetlands onsite, and that an Environmental Analysis was performed.

Mr. Michael Hotaling, MAI, Managing Partner, Moody Williams Appraisal Group, 1300 Riverplace Boulevard, Suite 640, Jacksonville, stated that he took the Oath. He continued that he was asked to analyze the home sales as to whether the golf course lots sold for more than the non-golf course lots. Mr. Hotaling advised that he looked through two sets of data from 2021 to current and 2016-2018, and found the only substantial price difference was in the size of the homes. Golf course fronting lots tend to have larger homes, according to Mr. Hotaling, and he found that the gross sales price tends to be higher, but the price per square foot turns out to be lower. He advised that he also analyzed the potential impact of the Planned Development on the existing homes and explained that there has been a paradigm shift in how subdivisions are developed in regulation and the local demand. Smaller lots are being sought after, with smaller yards to mow. The same size house is wanted but with less yard to maintain. More compact neighborhoods with walkability, underground utilities and community amenities are desired. Mr. Hotaling continued that essentially with golf courses, there is a stigma associated, and people pay less for the homes on the golf course because the golf course is closed.

Mr. Sans Lassiter, P.E., President, LTG Engineering and Planning, 1450 West Granada Boulevard, stated that he took the Oath. He stated that he has his Master's Degree in Transportation of Engineering from the University of Florida, and has 45 years of experience. Mr. Lassiter delivered explanation of the traffic analysis, including the warrant for a traffic signal at Tomoka Oaks Boulevard and Nova Road. The development will be going through the proportionate fair share process, with the stacking information and traffic access improvements presented.

Mr. Merrell continued with describing the 9th criteria regarding material and architectural features and standards, which is part of the negotiating process as part of the custom zoning, Planned Residential Development (PRD). He explained the difference from 'by the book' straight zoning. Mr. Merrell commented that the final, 10th criteria is happening now with the expert-testimonies.

Tomoka Oaks HOA Presentation

Mr. Dennis Bayer, Esquire, 109 6th Street, Flagler Beach, legal counsel of the Tomoka Oaks HOA, introduced himself with 35 years of experience in land use and zoning and resides in Ormond-by-the-Sea. He added that he has worked on golf course conversion cases. He stated that buffers, location of lot sizes, and compatibility with lot sizes requires flexibility. Mr. Bayer stated that he has met with the developers, consultants, and staff, and expressed his concerns with size of the significantly smaller lots, traffic and infrastructure. He commented that the HOA supports staff's recommendation.

Mr. Thomas Harowski, Certified Planner and Tomoka Oaks resident, 97 N. St. Andrews Drive, stated that he did take the Oath, and has a Master's Degree in City and Regional Planning, and is a member of the American Institute of Certified Planners (AICP), with 50 years' experience in the field. Mr. Harowski continued that he submitted an analysis of the proposed plan and spoke on compatibility between the proposed project and the neighborhood, traffic concerns, and residential design standards. He suggested the proposed project would be the first thing that people see when they go into the community and will be a defining element to the extent that the new homes will give a different impression of the neighborhood which will change Tomoka Oaks and the existing community. He reiterated the plan for bigger houses on smaller lots. The new houses will be more massive in appearance than the most exceptional in size in Tomoka Oaks now. Mr. Harowski expressed his concerns with the design of the proposed houses on the 50'-wide lot homes with the garages all protruding forward. He added that when going down the entrance street, you will see a continuous row of garages on both sides. He continued with 50'-wide lots on the project, they should be consistent. He explained that he has prepared quality alternative designs. Mr. Harowski noted that diversified design is the final element in the characteristic of Tomoka Oaks, and currently they have wood, brick, stucco and stone and the proposed neighborhood presents a more monolithic look, inconsistent with the current neighborhood. He commented on the design of the homes being repeated throughout the proposed development with 16 models throughout. Mr. Harowski referenced the traffic study and expressed his concern as well with the traffic that would come with the project, and stated that all agree a traffic signal is needed at Nova Road and Tomoka Oaks Boulevard, with an excess of 2,700 additional trips per day. He suggested that the applicant should be required to modify the study to reflect the upcoming changes to Nova Road proposed by the Florida Department of Transportation and an updated diamond intersection with an adequate turning radius. Mr. Harowski concluded with his concern about the sidewalks, with one sidewalk being proposed on only one side, commenting that there should be sidewalks for safety on both sides.

Mr. Spraker provided a reminder that anyone interested in speaking to the Planning Board would need to complete a comment card.

Chairman Thomas opened the public comments.

VI. PUBLIC COMMENTS

Each speaker is allowed three (3) minutes to address the Planning Board.

Audience Comments

Ms. Carolyn Davis, 46 Oakmont Circle, introduced herself as a resident of Tomoka Oaks and confirmed that she took the Oath. She commented that her name may be familiar from the staff report. She advised that she writes the Tomoka Oaks Times newsletter. Ms. Davis hired Attorney Brent Spain, Theriaque & Spain Law Firm, who submitted a letter of opinion citing case law, that a golf course property cannot be developed into residential homes. Ms Davis explained Mr. Spain's legal authority in that he received his J.D. from Florida State University (FSU), where he ranked #7 in his class of 214. She continued that his relevant areas of practice include land use and zoning law, land use litigation, and appellate advocacy. Ms. Davis clarified that her

prevention efforts are independent of the volunteer HOA mitigation efforts and expressed that she respects their efforts. She thanked *Jim, Dennis and Tom* for their presentations. Ms. Davis explained that she felt compelled to take a different path, based upon historical and legal records that would prevent development. She added that she noticed that the developers included their resumes and pictures, of ten professionals to lend credibility to their flawed application. She stated that it is important to let the Planning Board know that she has her own list of credible, seasoned professionals, a number higher than ten, it is the homeowners of Tomoka Oaks and the surrounding neighborhoods that purchased homes believing the golf course would always remain a green area within our neighborhood. She asked the homeowners to raise their hands until her speech was over. She stated that she wanted the Board to see the faces of her credible professionals. Ms. Davis advised that she will provide the City Commission hundreds of resumes and signed and return post cards of public opposition. She stated that Tomoka Oaks residents went to her house today as she was writing this speech to personally deliver their post cards. A realtor, Kathy, asked Ms. Davis to tell the Board that even she does not want the proposed project. Ms. Davis concluded that she agrees with the decision of the city staff and Mr. Spain that the Planning Board should recommend denial. Mr. Spain's opinion will continue to have significant relevance for the denying the R-2 application as well.

Ms. Stephanie A. Cox, 1526 Agatha Drive, Deltona, stated that she did not take the Oath but solemnly swears. She continued that she is a resident of Volusia County and is a licensed real estate broker for over 33 years. She explained that she plans to move to Ormond Beach to be closer to her 4-registered voting children. Ms. Cox expressed that she is tired of the growth, traffic, problems with the schools and infrastructure in the city, as well as the traffic that will come if this development is approved.

Mr. Len Gaspary, 7 Oakmont Circle, stated that he lives on the Tomoka Oaks golf course. He elaborated on his career as a home builder in Volusia County, including homes in Tomoka Oaks. He built four houses on the golf course, as well as four to five houses off of the golf course in Tomoka Oaks. Mr. Gaspary commented that when he was new to the neighborhood, the golf course lots were substantially more expensive then off of the golf course lots, and he chose to live at his home based on the fact that it was on the golf course. He added that 36 years ago, he paid a premium for the lot. Mr. Gaspary continued that at one time you had to get your home plans approved by an architectural review board and had to be administered by the people who developed the Trails subdivision to ensure it would fit in with the community. Mr. Gaspary expressed his feelings about if the golf course is closed, it will impact the value of the homes and lots. He feels that there must be a way to mitigate the loss and value of his house, as it changes the complete character of the community by adding 276 lots, which will add almost 800 people when all is said and done. He confirmed that he took the Oath.

Mr. Jeff Boyle, 614 N. Halifax Drive, stated that he is duly sworn and commented on the proposal having consistency issues. Comprehensive Land Use Planning, Goal 2, says that the development must be compatible with nearby homes, lot sizes and density. Policy 1.1.3. - prohibits altering the neighborhood character by squeezing a new subdivision inside an existing subdivision. Policy 2.1.1. - this project allows unsafe traffic flow, with more than 2,700 daily trips. Policy 2.4.6 - protects the environment from excessive tree removals, too much impervious surface and

stormwater that overflows into the Tomoka River. Policy 1.6.4. - states, preserve natural open space in urban areas, do not eliminate 148 acres of that open space. He continued, in the Land Development Code, Section 1-15, prohibits depreciation of adjacent property values and undue crowding. Section 2-35, requires a PRD to provide an indoor recreation amenity that is missing and substantial community benefits that justify code waivers and exemptions sought by the applicant. Mr. Boyle added that legal questions cloud this golf course conversion, early Tomoka Oaks documents promised a golf course "in perpetuity".

Mr. Boyle stated on October 3, 2006, the City Commission granted a 122-unit Tomoka development order with the condition to preserve the golf course. Everyone was unanimous on the decision, including the City Commission, including the current Mayor and two preceding Mayors, the Planning Board, the Planning Director, city staff, and the applicant's attorney all recognized that it implied unwritten golf course protection existed. He continued that in 2014, the United States Court of Appeals, 11th judicial circuit, upheld unwritten implied golf course protections. It does not have to be in writing. Mr. Boyle advised Chairman Thomas, in case law precedent and in city land use codes, we believe that the Board has solid legal grounds to deny this proposed rezoning.

Ms. Denise White, 9 Fox Run Trail, advised that she lives in the Trails subdivision and thanked the Board for their time and efforts and listening to the residents. She expressed her concern with the development is health and safety of everybody. She understands developers rights and knows why they purchased the land, but explained that thousands are impacted by the development by 450' single-road for residents to get in and out of the neighborhood, and takes issues with the traffic analysis stating that only four percent of residents will be going through the Trails. Ms. White stated that the Trails has small two-lane narrow roads that are laden with medians and that she walks the wider roads on Tomoka Oaks Boulevard. She continued that last year the question was raised by Trails residents about overflow traffic. She commented that it will affect all of them. She asked when looking at the map, at the 450' road, how it is reasonable to expect that it is not affecting everybody's lives and health and safety.

Ms. Ashley Dufrene, 118 N. St. Andrews Drive, stated that in Section 1-15, Article II, Administration Enforcement of the Ormond Beach Land Development Code, it is the Planning Board and City Commissioners' duty to ensure that the proposed use will not substantially or permanently depreciate the values of the surrounding property; create a nuisance; or deprive the adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood on the adjoining properties. Ms. Dufrene advised the Board that the current plan in front of them does everything that a proposed use should not. She said that her and her husband purchased their home in 2015 with the vision of raising their family there as generations did before them. They were looking for peace and tranquility being that they lived in major cities (Orlando, Miami, Atlanta and Washington D.C.) prior to settling in Ormond Beach. Ms. Dufrene continued that they were done with big-city-living and fell in love with Tomoka Oaks as they drove down the road and complete strangers would wave 'hello'. She explained that she felt that they were 'home'. She described that as they walked into the open house they were greeted with windows aligning the back of the home to see what they imagined 'old Florida' looked like with beautiful live oak trees lining what was the second fairway of the Tomoka Oaks

Golf Course. It was beauty that they had not seen in so many years living in congested neighborhoods and concrete jungles for all of their lives. They chose to buy the house even at the top of their price-range. Ms. Dufrene stated that they looked at a house on Rio Pinar that was $50,000 less but knew that the Tomoka Oaks home's view of the golf course was worth the extra expense. She added that eight years later, what was once their peace and tranquility as they are expecting their first child, will be destroyed by a wall of homes lining the back of their house, fifty feet from the edge of their pool. She elaborated that the new homes will block their sunrise-view and be replaced with concrete walls that are everywhere you turn nowadays. The wall of homes will not be finalized for years to come, and for the next 5+ years there will be a construction zone surrounding the beautiful land including their sleeping baby. She commented that hammering, pounding, and dust will circulate as they try to enjoy their haven of peace and privacy. Ms. Dufrene concluded that the proposed use must "not create a nuisance; or deprive adjoining properties of adequate light and air; create excess noise, odor, glare, or visual impacts on the neighborhood and adjoining properties." She closed in saying that she hopes that she illustrated that the plan will do everything that it should not. Ms. Dufrene confirmed that she took the oath.

Ms. Michelle C. Zirkelbach, 328 River Bluff Drive, expressed that she cares deeply and passionately about the home as her and her husband built the home and raised their children there. She added that she cares about her neighbors and neighborhood and cares about the City of Ormond Beach. She continued that the proposed development affects everybody as every resident travels on one of the major thoroughfares in the city. Ms. Zirkelbach stated that Ormond has grown extensively since she moved here in 1989 and she realized that a guiding force in the development is the Comprehensive Plan. She continued that the Comprehensive Plan establishes a community's policies and priorities regarding future development while aiming to preserve the environmental features and community character. She remarked that community character is something that Tomoka Oaks has in spades. The compatibility with existing character is something the developer wants the residents to believe is true. She continued that combability is just a buzzword to her at this point. Ms. Zirkelbach stated that the neighborhood is full of individual architectural design an abundance of majestic trees and established homes. She continued expressing her confusion with the applicants' claims that the proposed 50' wide, 60' wide and the 80' wide lots were compatible with the existing 100'+ lots they currently enjoy throughout Tomoka Oaks. Ms. Zirkelbach stated that her and the other residents are confused about the traffic studies. She apprised the Board that she was a former math teacher and is aware that people can make numbers say whatever they want them to, resulting in all Ormond Beach residents suffering the consequences of the traffic. Ms. Zirkelbach commented that she has been reading and studying a lot about the matter at hand and is reminded of when she studied contracts when getting her real estate license in 2004. She remarked that she never had a buyer ask her to find them a house on a 50', 60' or 80'-wide lot. She continued that they are being faced with the developers maximizing profits per acre. Ms. Zirkelbach concluded that all of the residents that raised their hands signed a contract to buy a home in a golf course community or on a golf course. She expressed lack of care about the expert that said that the home values will go up, if her quality of life goes down.

Ms. Ellen L. Cook, 1 Tomoka Oaks Boulevard, Escondido Condominiums, expressed her concern with the traffic, with her condominium building facing Nova Road. She

stated that the only thing that will not prevent anything is if the proposed development will not be built. She elaborated on the traffic that is seen stacked up and said that it is due to the railroad. She said that it does not matter how many cars are coming or going, that everyone has to stop at the railroad track. Ms. Cook remarked that putting up another traffic signal on Tomoka Oaks Boulevard is not going to matter if the railroad is closed and nobody can pass and turn left onto Nova Road or from Nova Road on to Tomoka Oaks Boulevard as everything comes to a halt. A railroad signal will not be in sync with the traffic signal, she said, and added that there will be accidents. Ms. Cook concluded that only the residents in Escondido and Tomoka Oaks know what goes on there and suggested that they pay attention because it is going to be a big issue.

Ms. Adele Shaw, 1 Tomoka Oaks Boulevard, stated that she took the Oath and lives in the Escondido Condominiums and is also concerned about the traffic. She continued that when she sees the word Reserve in the words Tomoka Reserve, she thinks of nature. Ms. Shaw that the city could have purchased the former golf course. Ms. Shaw expressed her dissatisfaction with the project and lack of natural preservation and recreation in it.

Mr. Tom Fitzgibbon, 51 S. St. Andrews Drive, stated that he lives in Tomoka Oaks and is a member of their HOA Board. Mr. Fitzgibbon confirmed he took the Oath. He expressed his concern with the traffic, stating that the new houses will add 600 vehicles or more and more than 2,700 daily trips at a minimum. The development traffic will block Escondido going in. He continued that turning left from Tomoka Oaks Boulevard onto Nova Road is already dangerous, and commented that there will be twice the amount of cars and trucks will make it worse. Mr. Fitzgibbon remarked that the traffic light may take up to two years to install. He continued that the Granada Boulevard, Main Trail-intersection, where LTG is predicting that after the development is built there, that only 18 more cars in the AM peak hour will exit onto Granada Boulevard, and referenced the part of the report that detailed that there will be 600 more vehicles where many will exit through the Trails to Granada Boulevard to Walmart, Lowes and other locations. Taking the Trails route versus Nova Road is about the same travel time. Mr. Fitzgibbon stated that he takes the route through the Trails as it is a nicer route. He expressed his concern with the data and methodology of LTG traffic study. He stated that residents could not hire a traffic expert because no local traffic agencies approved of the development. Mr. Fitzgibbon explained that none of the narrow roads have sidewalks and puts the residents and kids in danger. The Public Works Department has promised to put in speed tables on Tomoka Oaks Boulevard based on a speeding problem that radars, signs and patrols cannot fix. He commented that four houses down from his house, a female pedestrian was killed by a driver. He stated that he saw a city inspector also almost get hit by a speeding car as well as large delivery trucks that speed blindly around cars, clipping overhead wires and trees. Mr. Fitzgibbon asked the Planning Board and City Commissioners to finish the street work before house construction and to plan the possible development correctly to limit injuries and deaths.

Ms. Denise Corley, 51 S. St. Andrews Drive, stated that she took the Oath, opposes the development and spoke on her topics of compatibility and soil. She continued that the 100'-wide lots create spacious feel along with 13 islands. She added that the proposal looks urbanized with 50', 60', 80'-wide lots covering 50 percent of the land and is incompatible. The proposal tells the fact that centrally located smaller homes

are appropriately screened from the existing neighborhood and she continued that it points to the fact that village-homes on 50'-wide lots are less compatible. Ms. Corley continued that the center cavity is not diverse and the area in the north corridor is spacious, larger and upscale, and expressed that the plans for diversity are sketchy. She asked if there are assurances that the houses will be private homes or if it is a corporate rental housing development, and asked if it would be good for Ormond Beach. Ms. Corley remarked that calling the golf course an infill makes it sound as though it is the ghetto in an urban city. She expressed concerns about the soil and asked the Board to take a close reading of the environmental report where it points to several remediation steps that need to be performed for the soil clean up target levels to be met with standards for residential housing. She asked if it can be trusted that the steps will be followed in accordance to the law and if the soil will continue with unacceptable levels of harmful chemicals, be removed offsite or mixed with the other soil. Ms. Corley suggested that the recommendation that the soil will be transported and piled on open space in amenity areas of the proposal is of no comfort to the existing residents. She expressed her concerns with the fertilizers, poisons, animal feces, petroleum products, rubbish in the drainage ponds as well as the airborne toxins released by moving soil as discomforting as well. She touched on the berms, and stormwater drainage ponds on the perimeter of the proposal and those abutting the 50' buffer of the Tomoka Oaks residents, and mentioned that she hopes the berm is not toxic soil piled up behind the homes. Ms. Corley continued that the swales, ditches and dry ponds proposed are known to be mosquito habitats and that Tomoka Oaks residents utilize ground stormwater pipes. She urged that the Board vote no on the proposal.

Ms. Jane Eddy, 306 River Bluff Drive, stated that she took the Oath and read a letter from another Tomoka Oaks resident, Ms. Julie Frebis, who was unable to attend. "I would like to utilize my time this evening to discuss the overall development occurring in the City of Ormond Beach and the lack of critical infrastructure our city currently has to accommodate the needs of its citizens. I recently had to take my mother to the emergency room. She was suffering with a heart condition that without timely treatment could have easily led to a stroke. We went into the ER around noon and waited five hours for a room. Once in the room, we waited another three hours before we saw a doctor. The doctor ordered medication and due to a lack of staff, she was not given the medication until I called a high-level contact at the hospital to get extra attention. Once I called my contact, she was given the medication about 45 minutes later or almost nine hours since arriving at the ER. This concerns me a great deal. What if her condition was worse and she had a stroke? What about our citizens that do not have someone to call? How many of our current citizens are suffering severe medical consequences due to the lack of critical care infrastructure? What about the families when they need care? This is not the hospital's fault. They are working at break-neck speed to expand their services. This is simply due to having too many people move to our town in too short of a time period. It is time to step on the brake pedals. I work as the employee benefits director for a large company in the area and am acutely aware of the lack of other medical providers in our community. You need to be aware that there is a critical shortage of primary care physicians in the area. Most in our community have to wait up to six months to book a new patient appointment with a primary care provider. Also to my knowledge we only have one provider in all of East Florida that serves the under privileged or maternity care. My question to you is what is more important? Additional tax revenue for the city, and

allowing developers to build to the maximum, or the well-being of the Ormond Beach current residents? The right answer is the well-being of our current residents."

Mr. Scott Ryals, 24 Tomoka Oaks Boulevard, stated that prior to his current address he lived at 66 N. St. Andrews Drive. He stated that he had a decision to make when he saw the problems back in 2006/2008. He commented that it was a very difficult decision to put in 122 units on a golf course he played since 1970. He added that he has been in the neighborhood for 50 years. Mr. Ryals said that he knows every chemical that was put on the golf course before and got his first job there. He elaborated on his familiarity with the golf course and club house. He stated if we let a piece of our city do what's happening, to me and my family, you won't think to highly of Ormond Beach. Mr. Ryals stated that he still lives in Tomoka Oaks and he loves it. Mr. Ryals stated that he knows how mitigation takes place with numbers, and how individual freedoms are taken away over time. He stated that he was the one who stated if anything was done to the golf course property that it would remain a golf course. Mr. Ryals commented that he beat his head night and day on how he can do it. He said that they could only put in 122 units with the 2006 development and did not want to make $150 million off the development. They did not want to impact the traffic. He concluded that he hopes his perspective is understood and that he enjoys Tomoka Oaks and plans on staying there. Chairman Thomas commented that Mr. Ryals had taken the Oath.

Mr. Peter Tupas, 332 River Bluff Drive, confirmed he took the Oath. He stated that he has been a resident of Tomoka Oaks for 27 years and has been a real estate broker for 30 years. He disagrees with comment made about the golf course depreciating the value of the homes on it. He added that a lot of people paid a lot of money because the houses are on the golf course. Mr. Tupas commented on the two-lane access on Nova Road and two-lane access going from Main Trail, and adding 600 cars with rush hour, people will be stacked up. Mr. Tupas stated in the real estate business, anything behind houses impacts there value. He remarked that the traffic light may assist getting people on the road but that the access through Tomoka Oaks will be jammed up getting to the traffic light.

Mr. Ned and Lauren Huhta, 30 Pine Valley Circle, introduced himself and his daughter, and stated that he took the Oath and is a second-generation resident. He explained that he lives in a custom built home and is like none other in the neighborhood. He added that he supports the city staff denial and encourages the Board to do so. Mr. Huhta commented on his support of the Tomoka Oaks residents and remarked that the high traffic levels will be a nuisance to all who travel through the area, and believes that it promotes a lower quality of life. He suggests the applicant provide all of the funding for the configuration of the entry area if approved. He requested that if reuse water for irrigation is provided to the project, then re-use water should be provided to existing Tomoka Oaks residents. Miss Huhta confirmed that they took the Oath.

Mr. Richard Goldhair, 21 Cherokee Trail, advised that he took the Oath. He stated he desired to talk about the construction traffic that will likely last three to five years, as well as weekends on Saturdays 7:00 a.m. to 7:00 p.m. He expressed his hope that the 18-wheelers will not be allowed. If they cannot use the Tomoka Oaks entrance, will there be overflow on the two Main Trail entrances, Nova Road and Granada Boulevard. Mr. Goldhair referenced traffic, including large delivery vehicles

contending with pedestrians, skateboarders and bicyclists at the choke point off of Nova Road with the public shopping center on one side and community center on the other side with the possibility of a catastrophic situation. He continued that trucks accessing Granada Boulevard that get to Rio Pinar and Iroquois to get to the new construction site, they will have to go over the Misners Branch bridge. He expressed concern if the bridge can take the excess weight of the construction trucks and increased traffic. He questioned how the proposed project will affect real estate values and insurance premiums.

Ms. Barbara Handsman Doliner, 108 S. St. Andrews Drive, stated that she took the Oath. She explained that her family has had a thumbprint in Volusia County for 83 years and she has been a resident of the Trails and Tomoka Oaks for 35 years. She added that she raised her children there and that they are all registered voters. Ms. Doliner stated that she has been a professional volunteer in the community for 35 years and expressed appreciation to the Planning Board for volunteering. She thanked the residents for working diligently to maintain the neighborhood. She commented that she does not understand why the proposed project and the people behind the project, are so resistant to what the community has to say. Ms. Doliner stated and repeated, that it does not fit the community. She suggested building it in Miami or elsewhere and not in Tomoka Oaks where they do not want 'cookie-cutter' homes. She added that they do not care if gates or sidewalks are included in the proposal, and concluded that the shoe does not fit and this Cinderella will never have the shoe fit, no matter what way it is packaged. It does not fit. Ms. Doliner reiterated the suggestion for 100'-wide lot executive homes with 120 units. At $700,000 per home, she asked if that was enough money to make, what is the issue here. Ms. Doliner concluded that no consideration was given to increasing police, EMTs and Firefighters. She understands the shortage of doctors, the overcrowded hospitals and the going rate of over 7 hours at the emergency department. The shoe simply doesn't fit.

Mr. James Cameron, 39 Laurel Oaks Circle, stated solemnly swore that all of his comments are true in nature. He stated that he in support of the application and has worked with a local pro-business group for a number of years and has worked with the Volusia County Association for Responsible Development. He expressed the importance of all finding a happy medium that everybody can agree to and said that he talked with Planning Board members as well as with people in opposition to the issue. Mr. Cameron pointed out that he has heard a lot of people say that they have a lot of confidence in Planning staff. He concluded that he hopes a custom zoning can be agreed upon between all parties.

Mr. Renny Herrero, 111 N. St. Andrews Drive, stated that he took the Oath. He stated that he has lived in the community his entire life and is part of six generations. His grandfather was born in New Smyrna in 1918 and installed a love for surfing and golf in him. Mr. Herrero continued that he and his wife married and were excited with the expectation of being near a golf course and has played golf in Tomoka Oaks since the 1980s. He commented that he has played almost every golf course around the community and referenced the statements about 21 different golf courses within 20 miles and another questionable comment on four municipal golf courses, and remarked he did not think that it was factual information. Mr. Herrero stated that he can think of about seven golf courses within 20 miles as well as two municipal golf courses and delivered additional information on the popularity of golf courses and

educational opportunities in reviving ones that are run down. He referenced one in Atlanta where businessmen put their ideas together and put together a plan for educational opportunities for a rebuild. Mr. Herrero commented that golf is still popular and there are 60-80 people out on the LPGA Golf Course swinging a club daily even in the summer heat. He remarked that it is outside and beautiful. He added that the idea to relaunch Tomoka Oaks as a standalone 18-hole course without financial support is not financially sound. Mr. Herrero suggested considering other proposals that would keep the golf course. He concluded that the community could be behind the concept of a use that included the golf course in the redevelopment. Mr. Herrero stated to approve this plan is to settle for lack of possibilities and ideas. We can do better.

Ms. Caroline Herrero, 111 N. St. Andrews Drive, stated that she took the Oath. She stated she lived and grew up in Tomoka Oaks, and enjoyed being outside there in its beauty, ran and rode her bike there. She added that now one of her favorite parts of her daily routine is sharing it with her grandmother when they go on their evening walks. She added that they have noticed the growth of Ormond Beach and how it has changed the experience of living here. Miss Herrero continued that the Developer's Economic Impact Study states that all traffic is engineered to go Nova Road via Tomoka Oaks Boulevard with it being said that there are other alternatives and that they are longer. She clarified that if you exit the neighborhood onto Nova Road to get to Granada Boulevard where the traffic light and Main Trail connect, which is the other exit, it measures approximately two miles even and if you take the short cut through the Trails it measures 1.9 miles to get to the same intersection. She commented that it is already tricky for pedestrians and cyclists on the streets and pleaded with the Board not to approve the proposed project with this density.

8:30 p.m. Chairman Thomas announced an 8-minute break.

Mr. Adam Kipi, 52 Pine Valley Circle, stated that he took the Oath. He stated that he does environmental remediation and litigation for a living and spoke on the environmental report and asked the question of if they are going to dig 2' and then fill it in with clean fill straight over the top with the problem of going 2' just straight over the fairways because it is only affecting the fairways. He suggested that there would be other drainage issues. Mr. Kipi commented on the proposed homes and retention areas, suggesting that there will still be sloping, topography and grading issues. He touched on the traffic light and remarked that it will be an issue. He added that unless the main entrance is widened to Nova Road that they will be backed up, even with a roundabout. Mr. Kipi referenced the applicants PRD and then the addition of a part two, and added that when he moved here in 2021 he noticed on google maps still had Tomoka Oaks displaying a golf course and noticed in pictures that it had been neglected for years and had the thought that if it were to come up for sale that the residents can buy it and make it a golf course again. He suggested commercially, to take it back to a golf course and sign a Rehabilitation Completion Order. He referenced Tomoka Oaks as being a community built around a golf course and to possibly sell it to the city, stating that nobody wants the proposal or houses to be right up to the back of their fences. He suggested to go build off of Airport Road in undeveloped land. He expressed that he feels that it is going to look ridiculous and that it is going to be a nightmare.

Mr. Tyler Brown, 90 N. St. Andrews Drive, stated that he took the Oath. He expressed concern with the compatibility with Tomoka Reserve and Tomoka Oaks. He stated the applicant states the density is 1.87 units per acre for the Tomoka Reserve project and 2.09 for the Tomoka Oaks subdivision. He stated he questions these numbers. Mr. Brown stated when looking at the Volusia County Property Appraiser's (VCPA) Website, there are 547 lots in Tomoka Oaks with a land area of 282.85 acres, which he calculated at 1.93 units per acre and not 2.09 units per acre,. He commented that the number does not include roads or the islands in Tomoka Oaks and he did not have access to that specific data on the VCPA website. Mr. Brown remarked that it is the addition of 148 acres of the golf course that Tomoka Oaks was built around that was the core of the neighborhood. The number for Tomoka Oaks drops to 1.27 units per acre, lower than their proposed development, according to Mr. Brown. He then referenced the newspaper article out this morning that stated the number is closer to 1.003 units per acre at 547 homes and 545 acres. Mr. Brown commended city staff for their observation of the project and concluded that with the concerns raised by residents, the city might want to clarify the units per acre issue, and more, prior to when the Planning Board reviews any recommendation one way or another.

Ms. Missy Herrero, 111 N. St. Andrews Drive, asked if Mr. Cameron, who expressed that he was in favor of the development, was a paid witness and if so, should he have identified himself as a paid consultant?

Attorney Hayes replied that there is no evidence of Ms. Herrero's inquiry.

Chairman Thomas added that there is no proof that he was a paid witness.

Ms. Herrero stated that she has been a resident of Ormond Beach for 30 years and is a native Floridian. She commented that she is not against development and understands that they cannot fight it but we do have the power to shape it. Ms. Herrero stated that she heard from the Planning Board before that Ormond Beach residents do not want to share their sand in the sandbox with people moving to Florida. She shared her personal story about her parents illnesses with COVID in January and how she and members of her family work in the hospital, serving the community for decades. Ms. Herrero explained that they went to the hospital and both the hospital and the emergency department were full with no beds. She advised that she took her 87-year old father there for needed fluids and how they waited for eight hours in the hallway. She added that it is not the hospital or the nurses or doctors faults and that they are doing the best they can. She said that they left at midnight and that her father returned the next day by ambulance and he waited another eight hours in the hallway again. Ms. Herrero stated that they left and he continued to deteriorate, and attended an appointment via tele med and then had to return to the hospital for a third time via ambulance and was then admitted. She continued that his health deteriorated to a point that the family decided to go home on Hospice-care. Ms. Herrero reported that they did not have a Hospice nurse for five days because there was a shortage and he died three days later. Ms. Herrero explained that there is no structure for the existing residents and that this is what people are doing that are living and dying in the community today. She concluded that she hopes that the Board does not have the same experience that she did of the real life experience-data presented, and that she took the Oath and recommends denial of the plan.

Mr. Paul Hughes, 4 Lauren Court, stated that he took the Oath and expressed his concern with the missing logic, delivering history on his experience in the community in that he moved back to family here 30 years ago and bought into Tomoka Oaks Country Club and Golf Course, the greenspace, what the neighborhood offered to the kids with the opportunity to ride bikes and enjoy life. He continued that he supports all of the efforts for the greenspace and quality of life the golf course would offer by stopping the proposed development. Mr. Hughes commented that when it was up for sale he was late and offered to write a check for the 150 acres so that it would stop. He added that he thinks that there are enough people there that could come up with the money or use the city's money or other appropriate resources, including the university what would be interested in involvement to bringing it back to a greenspace, golf course, and avoid this. Mr. Hughes suggested if going through with this project design, there will be five to seven years construction with trucks that will exceed 24 tons, attempt to go over the bridge, which will limit the number of entrances into the neighborhood. He spoke on his traffic concerns, expressing his recommendation of denial, stating that there is no physical way to put 30 pounds of potatoes in a five-pound croker sac. Mr. Hughes concluded that it is too much for this community and that they bought what they bought, for the green space and what it was and have paid dearly for it.

Ms. Janice Rose, 21 Eagle Court, stated that she took the Oath and has lived on the golf course for 32 years. She asked for a provision in the Planned Development order that the Tomoka Reserve HOA is required to preserve and maintain the trees and the buffer around the development now and in the future. She continued that if they do not, the residents of Tomoka Oaks should have the right to sue. Ms. Rose commented that she may not have 30 years to see mature trees behind the property.

Ms. Leah Washington, 12 Oakmont Circle, stated that she took the Oath and that her and her family moved to Tomoka Oaks in September of 2020. She added that her husband is off serving his last tour in the military and they decided to settle down in Tomoka Oaks with their kids. She commented that they are going to call it home forever, the purpose of them not going with her husband during his last tour so that their kids can settle down and call their place 'home' in their forever home, in a place where they can grow up with kids and know the kids for longer than three years at a time. Ms. Washington stated that they live in a community that was advertised as a golf course community. She expressed that they are finding as time goes on that the peaceful community is not there anymore and is not going to exist. She explained how difficult it has been to find a pediatrician in the community going through three different pediatricians offices to get care and stay with her health insurance. She continued that specialty care for pediatrics does not exist in the community as they have had to travel to Lake Nona, Lake Mary and Orlando frequently for care. She added that they have gone through four different dental offices as well due to having to circulate insurance companies and not being able to sustain the patient load. They drop certain insurance companies in order to sustain a better count in their practices. Ms. Washington stated that all of this is happening without the development and asked what she is supposed to tell her kids when they cannot get a pediatrician or sick child appointment for three weeks, then in turn having to sit in the Emergency Room (ER) for six hours. She commented that it is negligible of the community to consider the proposed development. Ms. Washington concluded that the Florida Department of Transportation (FDOT) issued their study recently and quoted statistics that started

in 2011 that came after the area was zoned Residential in 2006. She mentioned rezoning of a particular pod of land, she thinks that changes would have had to occurred within the geographic area around the property which prevents the use of the property under its current zoning. She concluded that it seems that the community has proven that it is not possible to continue the residential zoned area and suggests denying the project all together.

Mr. Logan Pigliacampi, 31 S. St. Andrews Drive, stated that he took the Oath. He stated he lives on the golf course and attended today's meeting to witness what has been ongoing for a few years. He stated that he was born and raised here and that the golf course has been critical to his way of life. He continued that he goes to the University of Florida and feels our fundamentals of living, how we want to expand and conquer everything around us, and want to make it industrialized and improve everything, and how in part of that, the beautiful scenery is ruined. Mr. Pigliacampi mentioned that he recently took a trip across the United States and drove through approximately 23 states and noticed how the levels of air pollution and industrialized trucking and fracking contribute to asthma. He explained an experience that he had when he just cleaned his white car and then when going through Georgia, through a town that experienced something like this proposal, noticed his car was pitch black. Mr. Pigliacampi stated that these things affect him and the Tomoka Oaks residents. He concluded that he has to live the next 60-80 years with this world and issued a warning, pleading about industrializing the area. He remarked that the community needs the trees and not just the limited number of required ground cover. Mr. Pigliacampi urged the Board to vote no and said to think about long term consequences, including the lives of area residents, the wildlife, and impacts of construction.

Ms. Darla Widnall, 7 Shawnee Trail, stated that people have been trying to fight the development for two years. She commented that she heads up the people in the Trails that do not want any residential development on the golf course. She continued that the city spent $125,000 for a two-year survey for Parks and Recreation, where they came up with 10 items, greenspace, parks, and a golf course in Ormond Beach, to name a few. Ms. Widnall commented that she is not a golfer but that the Tomoka Oaks Golf Course was a beautiful one and feels that it still could be. She attended the FDOT meeting where there were experts and she elaborated on the proposed 276 homes in the middle of Tomoka Oaks, and west of Interstate 95 on Granada Boulevard where there will be 10,000 homes. Ms. Widnall stated that she advised them to change whatever they are doing to Nova Road because by 2045 due to the possibility of the 10,000 additional homes. She concluded that she did not take the Oath but swears to tell the truth.

Ms. Debbie Gatz, 32 N. St. Andrews Drive, stated that she took the Oath. She has been in Tomoka Oaks for 27 years. She inquired about the Planned Development buffer and existing trees. She added that due to living in Florida with storms, a lot of their trees have gone down. Ms. Gatz expressed concern with her existing buffer left with all of the 80' vines taking over her landscape. She encouraged the Board to look at the Planned Development to see what is in place for their HOA to take care of those buffers that have existing trees. Ms. Gatz thanked her neighbors and elaborated on her history in the area, living in the Trails prior to Tomoka Oaks. Her family walks a lot and when walking with others, people always refer to the diversity of the homes.

Ms. Beth Rabitaille, 22 Rio Pinar Trail, stated that she has lived there for 30 years and commented that the road is busy with drivers that speed down it. She questions how accurate the traffic report is. She concluded that she did not take the Oath but swears to it.

Tomoka Oaks HOA Rebuttal/Summary

Mr. Dennis Bayer, Esquire, 109 6th Street, Flagler Beach, legal counsel of the Tomoka Oaks HOA, requested that the Planning Board reflect upon what they heard tonight. When the developers were making their initial application they described this as infill. He continued that this is not infill, but instead the filling of greenspace with a residential development. He further explained that infill is where rundown houses and rundown neighborhoods are taken out and replaced with new development. Mr. Bayer reviewed the history of the property as a golf course since 1963. He commented that it is not a golf course now and it they do not get what they want with a PRD, it will not go straight zoning. He suggested reviewing the staff report and criteria and the issues that the developer needs to answer. Mr. Bayer asked how the buffer will be maintained five years from now when the vines take over all of the trees. Mr. Bayer stated that Mr. Harowski provided design options for the smaller lots. Mr. Bayer acknowledged that the issue of medical care may not be in the Land Development Code for concurrency, but it is a factor should be considered for lower density. This development is building in the heart of the existing Tomoka Oaks subdivisions. He urged the Board to go along with the staff recommendations of denial based upon the lack of information that has been given by the developer.

Applicant's Rebuttal/Summary

Mr. Merrell stated their presentation and design professionals addressed many of the questions brought up tonight. The design professionals provided information on the lot widths and the buffer types. Mr. Merrell stated that they desire to hear from the Planning Board and provide responses as needed. What has been presented are options. At the root of this issue, this property has a residential density and land use, which is an entitlement. Mr. Merrell stated an entitlement is automatic. He continued it is not a choice between nothing and the application. It is up to the Planning Board to look at the list in the staff report and provide direction on the residential development of the property. Mr. Merrell stated that they are looking for direction on the options presented.

Chairman Thomas brought the discussion up to the Board.

Board Discussion and Questions

Ms. Shull asked for clarification about the R-2. Attorney Hayes explained the development application based on the PRD zoning before them today. The R-2 is a different issue and not before the Planning Board at this time, and should not form the basis of the Board decision based on a different issue. Attorney Hayes further explained that depending on the decision of the Board, the developer will have a decision to make whether submitting another application to rezone to R-2, come back before the Planning Board, or submit another application for a PRD development order.

Ms. Shull inquired about the irrigation on the buffer and where that water would be coming from. Mr. Spraker replied that irrigation is recommended by staff. There are two reuse ponds that they are seeking to use reuse water and suggested that a well will most likely be needed to supplement the reuse ponds. Mr. Spraker stated that the irrigation water supply would be part of the preliminary plat.

Ms. Shull asked about the self-amending mention. Mr. Spraker answered that the PD6 detailed the amendment of that language. He reiterated the lot layout language that the project can make the lots wider, for examples a 50' wide lot into a 60' wide lot. Staff has no objection to making lot widths wider and the project could not exceed the overall lot total of 276 units. Mr. Spraker commented that if the Board does not like the architectural standards or if they would like something else regarding the submittal, they can discuss and recommend to change. What has been provided is consistent with other Planned Developments.

Chairman Thomas asked for clarification about irrigation and if staff is seeking in ground irrigation. Mr. Spraker explained that in the landscape proposal it is to establish a natural vegetation that after a certain point, no longer requires water. A truck with water would be used to establish the landscaped areas temporarily. Mr. Spraker commented that the concern is if there is a drought, and the buffer dies, it puts the obligation on the HOA. Staff has never seen a buffer of this size utilizing temporary irrigation.

Mr. Scudiero stated that several speakers referenced putting in a traffic signal and asked for confirmation on if it has been approved. Mr. Spraker replied that the response comments stated that it was presented to the Department of Transportation (DOT) and it was verbally approved and Mr. Lassiter may have additional information.

Mr. du Moulin thanked the Tomoka Oaks HOA. He asked if there is a possibility of a win-win type situation, referencing greenspace solar panel farming that everyone can benefit from. It would be for something other than houses. He asked if housing does go in, if they can go in with increased lot size, such as the Broadwater subdivision for million dollar homes instead. Mr. du Moulin stated he is seeking a solution where everyone wins.

Mr. Galloway disclosed that he has friends on both sides of the equation and has spoken with a few Tomoka Oaks residents, as well as Mr. Durant and Mr. Merrell. He asked for the difference between the 80' wide lot from the proposed 100' wide lots. Mr. Durant explained that with the market of what people want to buy, they are interested in the smaller lot widths. Mr. Durant added that the greenspace is the same for both. Mr. Durant stated that they want this project to be successful He continued to be blunt, our future residents don't want to look into the back of the Tomoka Oaks houses. They desire for the buffer to be successful and believe that the proposed plan will be successful. Mr. DuRant stated there is an existing, non-irrigated buffer out on the property today that we are seeking to replicate. He suggested allowing them to put the buffer in as proposed and that if it does not work out, they will try something else. He reiterated that they do not want to irrigate or fertilize and do not want to have run-off. The project is seeking to replicate what the existing buffer is and if there is a need for security, the project can bond the improvements.

Mr. Galloway asked for additional information on the proposed plans inconsistency with the Comprehensive Plan. Mr. Spraker replied that in the staff report it is not one of the reasons why staff recommended denial. It was not said that the proposed plan is inconsistent with the Comprehensive plan. He clarified that the reason for recommending denial were criteria 1 and 4, consistency with the Land Development Code (LDC), as in section 2-35 is permissive and specifies that, *'you may'* do something. He further explained that the issuance of the development order is a negotiated zoning. The area surrounding the property has 100' wide lots. Mr. Spraker continued that it is understood, the design of the project is to provide the buffer in exchange for smaller lots, which would be fine in the interior of the project, but the perimeter should stay at 100'. He also referred to Mr. Durant's comment on the setbacks at 7.5' for a side yard setback, which is smaller than a typical lot. Mr. Spraker concluded that staff did not recommend denial based upon consistency with the Comprehensive Plan.

Attorney Hayes specified that the staff report identifies the criteria that the proposal before them today should be evaluated.

Mr. Mark Karet, referenced the question as to if the plans are consistent with the Comprehensive Plan. He stated that Ormond Beach has land use categories that clearly would have not allowed residential development on the former golf course property, such as the "Recreation & Open Space" land use designation. Mr. Karet continued that the "Low Density Residential" land use allows residential development. Mr. Karet stated that the staff report indicates a policy that could be used to deny the application based on inconsistency with the Comprehensive Plan. Mr. Karet stated, as detailed earlier, the cited policy cannot be used as a reason for denial. He remarked that in order to deny the use, one would need to determine that the residential use is inconsistent and read words which are not in the policy.

Mr. Galloway stated or require 100' wide lots? Mr. Karet replied that the policy only refers to use and does not address lot sizes. Single-family lots next to single-family lots, regardless of lot size, is the same land use.

Mr. Karet stated in the application of Section 2-35 of the Land Development Code, staff is reading words in the language. He stated that what is being said tonight is that compatibility means that it has to be the same thing and that is not what the modern practice of planning says. Mr. Karet commented that compatibility has to be sensitive to the character of the community. He reiterated that it is infill development which is encouraged throughout the Comprehensive Plan. Mr. Karet states that there are many communities that are eliminating single-family only zoning.

Mr. Galloway stated he understands what Mr. Karet is stating, but there are many individuals tonight and notes that state that either they do not want the project or they want 100' wide lots. Mr. Galloway stated that the application is asking for smaller lot sizes and there are questions about compatibility. Mr. Karet stated that staff is seeking 100' wide lots next to the Tomoka Oaks existing 100' wide lots. Additionally, staff is seeking a type 6 landscape buffer of a 50' width with certain plantings that is typically required with industrial development next to low density residential uses. Mr. Karet re-emphasized that city staff is asking for both the 100' lot width and an indusial size landscape planting plan. Mr. Karet stated as a professional planner, that does not stand up.

Mr. Jorczak spoke on the diversity of the housing in the existing Tomoka Oaks community from the size and type, describing them as impressive in comparison with the newer developments out there or a cookie cutter approach. He commented that the existing community has issues with some of the people that service the neighborhood, such as the landscapers and mail carriers, and does not feel is the safest to get through with the amount of traffic there and the vehicles parked on the street. Mr. Jorczak remarked that it is a phenomenal area that we should be looking for excellence in how the piece of property is developed. He suggested that it needs to be something that blends with the existing area that has a character and a flavor and is not going to be an enclave. Mr. Jorczak commended Mr. Harowski on his research for his presentation and suggested doing a little more in researching if the proposed development should or should not go in. He remarked that he appreciates the time, efforts and money spent on creating the Board packet and all that city staff has done to point out what can be done as far as development options.

Chairman Scudiero made a motion to hold a time-certain vote, no later than 10:55 p.m. Chairman Thomas explained that he does not want to put a time-constraint on this and that it is of his top-5 most important issues ever heard in all his years of being on the Board.

Mr. Merrell stated that they appreciate the comments and expressed that the applicants are taking notes and listening to all Board suggestions. Mr. Merrell stated they are okay with a time certain continuance of the application.

Mr. Galloway stated that he has more questions and cannot vote on the issue tonight. Mr. Merrell stated that the applicant team is not seeking to rush the item and are noting all the comments.

Mr. Galloway asked if the staff recommendation of increasing lots to 100' wide around the perimeter were implemented, what would be the density (the number of units) that would be applying. Mr. Merrell replied that the project has been reviewed for a design using the straight zoning classification with 100'-wide lots, R-2. He stated that the design yielded about the same number of units. Mr. Merrell stated getting rid of the 50' buffer, you gain a lot of real estate, but the product would not be as good. Mr. Merrell stated if the project is required to provide 100' wide lots and a 50' industrial type buffer, it is just not a fair trade. Mr. Galloway stated that the project is developing in the middle of an existing neighborhood and those concerns need to be addressed. Mr. Galloway pondered why the abutting property owners did not purchase the former golf course as a community development district.

Mr. Scudiero asked the applicant, if the Board agrees to adopt all of staff and SPRC's recommendations, what the number of houses would look like. Mr. Merrell stated that they have not done this exercise.

Chairman Thomas referenced the presentation of Mr. Harowski. He asked for the design plan for the 50' wide lots and if they included an alley. Mr. Karet replied that there is room for back loaded alley ways. Chairman Thomas replied that would be the only way that he would vote for 50' lots.

Chairman Thomas asked about the open space and recreation planned for the project. Mr. Stehr answered that there would be a sports field, pavilions, pickle-ball courts,

two playgrounds, pocket parks, and added that the plan has not yet been finalized and additional open space and recreation can be added or modified.

Chairman Thomas referenced the traffic direction in between the fields and the parking lot between the areas and expressed his concern for the children's safety. Mr. Stehr advised that they would take it into consideration.

Ms. Shull inquired about the gates. Mr. Stehr stated that they are requesting electronic access gates for vehicular access only. Pedestrians are able to go through on the proposed sidewalks.

Ms. Shull asked about the lot size and density. She stated that the Tomoka Reserve project appeared to have more homes than the Tomoka Oaks subdivisions. Mr. Stehr referenced the density breakdown based on the LDC that was included in the staff report. Ms. Shull said that she agrees with the 100' wide lots around the perimeter but is unsure about the 50' and 60' wide lots in the interior. Mr. Stehr stated that there are condos and apartments abutting the existing subdivision. Chairman Thomas questioned if these were in the neighborhood. Ms. Shull stated the project is a neighborhood inside of a neighborhood. She stated her goal was to be consistent with what is in the existing neighborhood.

Ms. Shull stated she did not believe that the 50' wide lots are consistent with the neighborhood. Mr. Stehr asked if the multifamily was consistent. Ms. Shull stated that she is providing her feedback on the project.

Ms. Shull discussed the setbacks and stated from her experience, they allow for short driveways, which means cars are parked out in the street. Mr. Stehr replied that it is a 25' setback allowing for two cars in the driveway, and two in the garage. Ms. Shull commented that it is too much house on the lot.

Mr. Durant stated that the existing Tomoka Oaks lots are suffering with not enough room in their backyard, therefore they are trying to give flexibility to be able to sacrifice some of the front. He continued that the setbacks would provide additional distances between subdivisions.

Ms. Shull asked if fencing would be allowed inside of the neighborhood, even for those houses backed up to the buffer. Mr. Stehr confirmed that they are.

Ms. Shull asked why it was mentioned prior that 100' wide lots would not work, but that 80' wide lots can. Mr. Merrell replied that 100' wide lots could work, but they are not as good for the developer, and the 80' wide lots work better for the project. There is a concern that there is not a market for 100' wide lots.

Ms. Shull stated, as a realtor, she believes that 100' wide lots would be very desirable.

Chairman Thomas commented that the 100' wide lots in Tomoka Oaks do not stay on the market very long.

Mr. Carl Velie, property owner, for the proposed Tomoka Reserve development, stated that the value of property that is based on building and the land. The land is 20 to 25 percent of the property value, depending on how urbanized that it is. He remarked the bigger the lot width, the higher the cost of the house will be, based on

the house size. Most of the houses in Tomoka Oaks are selling for $400,000 to $500,000 range, and are 40 to 50 years old. Mr. Velie, stated if the project built a new home on the same sized lots then it would likely be an $800,000 home. Mr. Velie added that proposed houses on a 100' lot with 10,000 square feet in lot size will be substantially higher than the typical house in Tomoka Oaks. He stated that they are trying to match the same value on a smaller lot width with similar lot square footage.

Mr. Velie continued that they think they can sell a few 100' lots but he is not sure if they can sell two hundred of them as quick, and may have to wait 15 years. That is not what the developer wants to do. Mr. Velie stated that he does not think people want to buy million-dollar houses unless they are on the river or ocean. He said the project seeks to create a product that will sell quickly, or as good or better than what is in the neighborhood. He stated that there is a difference compatible and comparable. This project will be compatible with a residential use abutting a residential use. Comparable is going different because these will be new homes with new amenities. Mr. Velie stated that the new construction will result in better built and stronger houses. He expressed concern with have a 100' wide house with a value of $800,000 next to a 60' wide house with a value of $500,000. Mr. Velie stated if they thought that they could sell 100' wide lots, they would be all for it. But they do not think that the project can sell 100' wide lots.

Mr. du Moulin stated that if it is designed correctly it could work. Mr. Velie detailed the constraints of the existing property layout. Mr. Velie suggested that there be a quadrant area or pod where the lots are smaller at 50' or 60' lots. He remarked that the studies the applicants have done show that there is not enough demand for the million dollar homes.

Ms. Shull asked why Mr. Velie believes that they cannot sell 100' wide lots. Mr. Velie responded that the study the project has done there is not enough demand for the million-dollar homes. The concern is that there are not 200 or 250 buyers who can purchase the million dollar homes. Ms. Shull commented that they will go a lot farther with the neighbors if there is a higher quality product in the area. Mr. Velie replied that the proposed homes are planned to sell higher than any in the area, other than the riverfront properties that are in Tomoka Oaks. Mr. Velie stated that the cost per square foot is $250 to $300. For a 2,000 square foot house, that would be $600,000. For a 3,000 square foot house, it will be a million dollars and we do not see that demand in the market. Mr. Velie explained his experience in the area and stated that he moved to Florida in 1954 and moved to Ormond Beach in 1964. He was an appraiser for 40 years and learned the life cycle of a neighborhood. Mr. Velie concluded that it is to their advantage to sell the most expensive house that they can sell. Mr. Velie stated that this development will be new and modern. The newer, more expensive homes would enhance the values in Tomoka Oaks.

Chairman Thomas restated that the public participation is closed.

Chairman Thomas inquired about the 80' wide lots and the comment people do not want to have homes next to smaller homes. He stated on the proposed site plan, there are 80' wide lots across the street from 50' and 60' wide lots. Mr. Velie responded that area is the main road. Mr. Stehr answered that after numerous meetings with the neighborhood, the applicants went back to 80'wide lots by 125', matching the R-2

square footage. The 80' wide lots allow relocation of the garage to the side or to the rear.

Mr. Sheldon Rubin, property owner, added that the setback on the 80' wide lot is 25 percent. He remarked that the 10,000 square foot lots with 80' wide lots on the perimeters plus the 50' and the open space, is quite accommodating. Mr. Rubin questioned that he is not sure why everyone is stuck on the 100' wide lot. Mr. Rubin stated that they will be modern, high-priced housing with benefits and a bigger buffer, in which they agreed to the plantings for. He expressed concern for the disconnect. Mr. Rubin stated through the process there has been a desire to lock down this site plan and show exactly what is desired. He reiterated that we did not have any flexibility with the rules. So, on the inside lots we show 50' wide lots. Mr. Rubin added that if they have to put an alley on some of the 50' wide lots, that they will do so if given the opportunity. There needs to be flexibility in the design. He concluded that it is a superb site plan.

Mr. Jorczak stated that increasing lot widths would decrease the lot total and also reduce the traffic impacts. He asked if there were a catastrophic event and in an emergency evacuation for the entire area, how long would it take to get the residents out with the current road situation, with a huge number of people in a short period of time with limited road structure to do it.

Mr. Lassiter replied that they did not analyze a mass evacuation situation. He confirmed that they did a standard peak hour evaluation. He continued that without a traffic signal it will take a long time. Mr. Lassiter replied that when doing beachside analysis they do have to look at hurricane evacuation times. He continued that there is plenty of advance warning. He confirmed that the traffic analysis showed that the proposed plan works. Mr. Lassiter referenced the traffic signal and advised that what they did to the traffic signal study, and that the Department of Transportation (DOT) approved it with the following two items, (1) peak hour analysis to show that it will not work with a two-way stop; and (2) intersection control evaluation.

Mr. Jorczak expressed concern with overall traffic impacts that the city has experienced. He stated that the options to address traffic are limited based on transportation costs and funding. Mr. Jorczak stated that the Hand Avenue extension has been discussed for many years to alleviate traffic on SR40 and there is no plan to anything soon. Mr. Jorczak stated he hoped that in the planning process some of the citywide traffic problems can be addressed.

Mr. Lassiter stated that beachside developments required to perform a hurricane evacuation analysis. He stated when the PM peak hour analysis shows that it is working well, this is criteria in the hurricane evacuation analysis. Mr. Lassiter stated that the project works in the PM peak hour. Mr. Lassiter referred back to the question on the traffic signal. He stated that a signal warrant analysis was performed and FDOT verbally agreed with the analysis and are requesting the peak hour analysis and an intersection control analysis.

Mr. Jorczak asked if the warrant analysis coordinated with the railroad. Mr. Lassiter stated that is required as part of the study. Mr. Lassiter detailed how traffic signals work with emergency vehicles and train horns.

Chairman Thomas asked Mr. Lassiter if a study was done of the Trails intersection on Route 40. Mr. Lassiter replied that a statement was made earlier that the distance is close but he stated the traffic time was not. The main entrance to Tomoka Reserve is very close to Nova Road and the travel speeds to get out the Main Trail going out to State Road 40 is much slower. Mr. Lassiter stated the distribution is based on the travel time.

Chairman Thomas expressed his concern with the project traffic when going to Tomoka Elementary School at the intersection of the Trails subdivision and SR40. Chairman Thomas detailed the route from the Tomoka Reserve project onto Nova Road and West Granada Boulevard. He stated the left hand turns onto Old Tomoka Road are problematic and do not have long stacking lanes.

Chairman Thomas detailed the issue with the intersection of Main Trail and SR40 and a single lane to go straight or make turning movements. He expressed concern about the increased traffic at this intersection. Chairman Thomas added that the only solution he sees is if the city to make a right-hand turn lane out of the Main Trail onto Granada Boulevard, a southbound right turn (west onto SR40).

Mr. Scudiero accepted that a majority of the traffic from Tomoka Reserve will go to Nova Road based on its proximity. One question has arisen is what would that do to the existing Tomoka Oaks population that now does not want to deal with the backup in the morning onto Nova Road Would residents on South St. Andrews and Rio Pinar, go out through the Trails to avoid the Nova Road backup. Mr. Lassiter explained that because of how the existing homes are built, around the two relative access points, whether Main Trail or Nova Road, 64 percent of all existing traffic that has access to Main Trail and Tomoka Oaks, use Main Trail and 36 percent use Nova Road access. Mr. Lassiter added that because of the location of the proposed project, its primary impact is going to be on Nova Road, a state road, and less impact on Main Trail to SR40.

Chairman Thomas stated that there are approximately 1,000 homes that are in the Trails, 500+ homes in Tomoka Oaks, and now proposing to add 276 more lots, totaling approximately 1,800 homes. Chairman Thomas stated that there would be approximately 1,800 homes with approximately 3,600 vehicles going out three exits through Tomoka Oaks and the Trails.

Mr. Lassiter stated that we counted them all. Mr. Lassiter explained that the traffic analysis process has gone through several rounds of review by the Department of Transportation (DOT), by the City and the City's consultant, as well as the County. He stated that they all agreed we came to the right conclusion based on how traffic studies are conducted.

Chairman Thomas stated he believed that the traffic counting is flawed. Mr. Lassiter stated that traffic counting now uses video which is not flawed and is more accurate.

Ms. Shull asked if the count was done during school times. Mr. Lassiter replied yes. Ms. Shull expressed uncertainty about how the traffic analysis is performed and stated in the manor in which people drive and at the speeds they drive, she does not feel comfortable about adding additional traffic and backups to the Tomoka Oaks and Trails neighborhood areas.

Chairman Thomas inquired about the current City of Ormond Beach population. Mr. Spraker answered approximately 44,000. Mr. Spraker added that the time was approaching to conclude this meeting.

Chairman Thomas asked the Board to share additional closing comments for the applicants.

Mr. Galloway stated what he is hearing are concerns with density. He referenced it as trying to put five pounds of sugar in a one-pound bag. He continued that unless the HOA is willing to come up with a Community Development Fund to buy the property from the property owners, that something will be built there. Mr. Galloway stated that he just does not feel like 276 units is what needs to be put in that donut hole. He stated that there are 500 homes that exist and they bought with the expectation of a golf course. He spoke on the American Dream, the ability to own a home, no matter how large or how much it costs. Mr. Galloway stated that there has to be a happy medium here. The homeowners have to realize that something will be built there or there needs to be a purchase of the property from the HOA and/or residents. Mr. Galloway stated that it should not be my tax dollars paying for a park. Mr. Galloway stated that he hoped that the applicant team is listening tonight.

Mr. Velie replied that when he and the other property owners first started the process, they originally had a different engineering firm that drew up a plan for units and they declined that route as they wanted something consistent with the subdivision. He explained that he took a 1.85 mile circle on Google Earth around the neighborhood over the Trails, from Misners Branch East, Tomoka Oaks Condo North, Escondido, Tahlequah, Tomoka Meadows and Harbor Oaks. He added that he took every plat and platted it out, and found that they have less density than the Trails residential section, not including the Villas, at 1.91 units per acre and Tomoka Oaks is 2.09 units per acre. He further detailed that Mallard's Reach is 2.23 units per acre and Tahlequah is 3.06 units per acre, and considering the entire Trails subdivision is 3.4 units per acre. Mr. Velie concluded that any other subdivision in the city has higher density than what is being proposed with Tomoka Reserve.

Mr. Galloway commented that he values Mr. Spraker and thinks the City of Ormond Beach has the best city Planning Director and believes that the applicants need to reassess and come back. He added that he has faith that something will increase the value of the homes there.

Mr. Jorczak agrees with the city's comments on the issues were appropriate. On some issues, he stated he may have gone further. He continued with remarks on the influx of people moving to the area, and how things are not going to get getter with the hospitals or traffic. He commented that Ormond Beach considers themselves to be a jewel on the east coast and is a special community, therefore should not be augmenting what has been done in other major cities, but should be looking for excellence. Mr. Jorczak concluded that he would like to see a better mix on the lot sizes. He stated the wider lot widths would reduce density and ensure a higher value of houses.

Mr. du Moulin concurred with Mr. Jorczak and stated he would like to see an increase in the lot sizes.

Ms. Shull concurred with Mr. Jorczak as well on the density and lot sizes. She remarked that the homeowners are compromising and know something is going to be built there, and advised the developers to compromise as well and work with them symbiotically. Ms. Shull concluded suggesting for the developers to take into consideration the unique piece of property that it is as well as the interconnected density and traffic.

Mr. Scudiero commented that he would like to see the golf course reopened, but that compromise between the applicants and the homeowners are necessary. He concluded for the applicants to find ways to make it more palatable for everyone. Mr. Scudiero stated a compromise is needed.

Chairman Thomas referenced earlier remarks on the irrigation for the plants and stated that if the applicants cannot abide by staff's suggestions, to at least do a bond so that the homeowners are not stuck with not having the vegetation buffer as promised. He spoke on the 50'-wide lot sizes, and said that he is opposed, but that if the Board agrees with them, he will support if there is an alley and a garage in the back. Chairman Thomas stated that in Venetian Bay, there is a section that is set off by itself and where they do not have garages in the front of the houses. He added that he would love to see 100'-wide lots. He commented that both the developers and the landowners have rights. Chairman Thomas stated that the residents also have rights. Chairman Thomas remarked that whatever goes in is going to be impacting the resident's lives. Chairman Thomas agreed with Mr. Galloway that something will be built and there needs to be compromise. He stated that he understood there are residents who are seeking no development, but he believes that something He concluded that when he moved to the city 50 years ago, the population was approximately 30,000. There has been a growth of 14,000 people, and commented that the traffic reflects more than that.

VII. OTHER BUSINESS

It was discussed that the item requires a continuation for the applicants to bring other ideas and options back for another public hearing in front of the Planning Board and for the Planning Board to have more time for the support decision-making process. It was determined, taking the availability of the Planning Board, staff, and applicants, that the continuation meeting will be held on Monday, August 21, 2023 at 6:00 p.m. (location is to be determined). Mr. Spraker explained that the Planning Board is scheduled to meet on August 10, 2023 for the monthly Planning Board meeting as planned as well.

City Attorney Hayes stated that when the Board resumes this meeting, the item would be where it is now with Board member comments and discussion. The applicant and HOA attorney should be provided an opportunity to provide any updates. City Attorney Hayes stated a motion and a second would be needed for the continuation.

Chairman Thomas entertained a motion for the continuation date.

Mr. Galloway motioned for a continuation of the meeting on August 21, 2023 at 6:00 p.m. with a location to be determined. Ms. Shull seconded it. Vote was called, and the motion was approved (6-0).

VIII. MEMBER COMMENTS

Mr. Jorczak thanked the citizens of Ormond Beach for their input and expressing their opinions.

Ms. Shull thanked the audience members and staff for their input.

Chairman Thomas commented that he is interested in the City of Ormond Beach having another hospital. He added if the zoning could be amended where a hospital could be built taller than seven stories. Mr. Spraker replied that it would be a charter amendment.

IX. ADJOURNMENT

The meeting was adjourned at 10:57 p.m.

Respectfully submitted,

Steven Spraker, Planning Director

ATTEST:

Doug Thomas, Chair

Minutes transcribed by Marcella Miller.

M I N U T E S

ORMOND BEACH PLANNING BOARD

Regular Meeting

August 21, 2023 6:00 PM

Tomoka Christian Church
1450 Hand Avenue
Ormond Beach, FL 32174

PURSUANT TO SECTION 286.0105, FLORIDA STATUTES, IF ANY PERSON DECIDES TO APPEAL ANY DECISION MADE BY THE PLANNING BOARD WITH RESPECT TO ANY MATTER CONSIDERED AT THIS PUBLIC MEETING, THAT PERSON WILL NEED A RECORD OF THE PROCEEDINGS AND FOR SUCH PURPOSE, SAID PERSON MAY NEED TO ENSURE THAT A VERBATIM RECORD OF THE PROCEEDING IS MADE, INCLUDING THE TESTIMONY AND EVIDENCE UPON WHICH THE APPEAL IS TO BE BASED.

PERSONS WITH A DISABILITY, SUCH AS A VISION, HEARING OR SPEECH IMPAIRMENT, OR PERSONS NEEDING OTHER TYPES OF ASSISTANCE, AND WHO WISH TO ATTEND CITY COMMISSION MEETINGS OR ANY OTHER BOARD OR COMMITTEE MEETING MAY CONTACT THE CITY CLERK IN WRITING, OR MAY CALL 677-0311 FOR INFORMATION REGARDING AVAILABLE AIDS AND SERVICES.

I. ROLL CALL

Members Present	Staff Present
Angie Shull, Vice Chair	Steven Spraker, Planning Director
G.G. Galloway	David Allen, Planning Civil Engineer
Al Jorczak	Cara Culliver, Landscape Architect
Mike Scudiero	Sarah Cushing, Senior Planner
Barry du Moulin	Marcella Miller, Recording Technician
Troy Railsback	Randy Hayes, City Attorney
Doug Thomas, Chair (arrived at 6:05 p.m.)	

II. INVOCATION

Mr. Railsback led the invocation.

III. PLEDGE OF ALLEGIANCE

IV. NOTICE REGARDING ADJOURNMENT

NEW ITEMS WILL NOT BE HEARD BY THE PLANNING BOARD AFTER 9:00 PM UNLESS AUTHORIZED BY A MAJORITY VOTE OF THE BOARD MEMBERS PRESENT. ITEMS WHICH HAVE NOT BEEN HEARD BEFORE 9:00 PM MAY BE CONTINUED TO THE FOLLOWING THURSDAY OR TO THE NEXT REGULAR MEETING, AS DETERMINED BY AFFIRMATIVE VOTE OF THE MAJORITY OF THE BOARD MEMBERS PRESENT (PER PLANNING BOARD RULES OF PROCEDURE, SECTION 2.7).

V. APPROVAL OF THE MINUTES

Mr. Scudiero motioned to approve the July 13, 2023 Minutes. Mr. du Moulin seconded it. Vote was called, and the motion was approved (7-0).

Chairman Thomas opened the Public Hearing.

Attorney Hayes explained the continuation of the July 13, 2023 Planning Board meeting on Tomoka Reserve and how the meeting ended at the question, answer and decision component of the meeting agenda and where it continues this evening. Attorney Hayes stated that there will be no public comments unless it is the pleasure of the Board and added that the disclosure parts continue to apply. Recent updates have been proposed from the applicants as of last week on August 16th and staff advised that they need more time and have not been able to review the full context of the proposed changes, therefore today is more a material hearing and the issue could be continued to a later date. Recommendations were made for the Chairman to let the applicant, attorney and HOA attorney talk and decide if more time is needed to analyze the new plans.

VI. PUBLIC HEARINGS

A. PRD 2022-043, Tomoka Reserve – Issuance of a Development Order – continuation of the July 13, 2023 meeting

Mr. Spraker, Planning Director, suggested that if the Board is interested in considering the new site plan that there should be a new public hearing for it, as well as advertisement of it, and for it to go through the Site Plan Review Committee (SPRC) and the public hearing. Today the Board has the ability to act on what they heard at the July 13th Planning Board meeting. Mr. Spraker concluded that the Board may want to see something else which will require resubmittal.

Applicant's Opening Remarks

Mr. Rob Merrell, Esquire, Cobb Cole Attorneys at Law, representative for the applicant, stated that he respects Mr. Spraker's wish for additional time to analyze the new plan and added that another updated plan was submitted on Friday. He advised the Board that he is interested in feedback from them and to come to a consensus at the next public hearing.

Attorney Hayes remarked that he suggests more of a summary presentation, than a full fledge question and answer discussion which is the purpose of a public hearing.

Chairman Thomas stated that he does not want to get back into a heavy discussion but more a summary of the new proposal and hear from the Homeowners' Association (HOA).

Tomoka Oaks HOA Opening Remarks

Mr. Dennis Bayer, Esquire, 109 6th Street, Flagler Beach, legal counsel of the Tomoka Oaks HOA, stated that he too respects Mr. Spraker's decision if the major or material changes require the continuation of the matter. Mr. Bayer added that he would like time to discuss the continued areas of significant disagreement that the

HOA has. He expressed his concern with the July 13th Planning Board meeting closing comment that was made that something will be built on the property but that the project was too dense, and remarked that going from 276 units to 272 units is not a material change in their eyes, and would like to be able to discuss that and other areas of concern.

Applicant's Summary of Changes

Mr. Merrell went over key issues of concern explaining that most of them have been resolved.

Key issue: lots sizes: Mr. Merrell started with the changes with the lot sizes around the perimeter of the development addressing the requested 100'- wide lots around the perimeter, with the request for them to match the existing Tomoka Oaks properties along the perimeter, the 50'- wide lots that were eliminated and now solely 60'- wide lots around the perimeter. He added that the greenspace, road alignments and stormwater ponds are staying the same. Additional 90'- wide lots and 100'- wide lots were added as well along the perimeter, where it was previously 80'- wide lots. Mr. Merrell commented that he does not think that anyone is going to see their neighbors' lot from the backyard with the buffer.

Key issue: Buffer: Mr. Merrell touched on the buffer, plantings, irrigation and maintenance and said that they agree with the number of bushes and understory trees to be planted in a type 6 buffer per staff's suggestion, but want to use a Florida-friendly type landscape that does not have to be frequently watered but more a wild landscape. Regarding a permanent irrigation system, Mr. Merrell expressed that there are other alternatives. He added that they are in agreement to offer a two-year bond if it needs to be replaced.

Key issue: Dimensional standards: Mr. Merrell continued that they are agreeing with staff's requested setbacks and dimensional standards.

Key issue: PD6 note on lot separation: Mr. Merrell continued that they are agreeing with staff's requested note modification on lot separation.

Key issue: Traffic: Mr. Merrell stated that staff requested that the diamond be reconfigured to a circle shape, and the applicants are suggesting a similar shape with rounded edges, allowing better flow as well as adding landscaping in the island. Regarding the proportionate share, it has been decided that the applicants are taking care of it 100 percent on their own. Mr. Merrell added that it was agreed to add sidewalks on both sides of the street. He further explained that it has been agreed to add a provision that says that the applicant will make application for permits for the signal within 30 days of the subdivision approval and such permits will be issued prior to the issuance of the subdivision construction permit, to be sure that the light is put in before anyone is traveling there on the road. Mr. Merrell referenced the architectural design requests and stated that the architectural standard language has been reworked. He continued and spoke on the request for a potential vehicular cut-through at the amenity area and it has since been reconfigured.

Key issues: Neighborhood meeting at preliminary plat: Mr. Merrell stated that the applicants agree to conduct a neighborhood meeting.

Key issues: architectural standards: Mr. Merrell stated that the architectural standards have been updated.

Key issues: amenity space parking lot: Mr. Merrell stated that the site design was amended based on the concern of cut through traffic.

Tomoka Oaks HOA Summary

Mr. Bayer commented that he does not think that the golf course remaining a golf course is near a determination yet and added that if there is a party that feels that the property has to stay a golf course it will be up to the courts to decide and not an issue for him or Mr. Merrell. He continued that the HOA set up a Board that continues to try and negotiate with developers to make the project more compatible, with significant areas of disagreement still existing.

Mr. Bayer brought up an aforementioned comment from the last meeting that this development is having significant impact on the quality of life for the existing tax-paying property owners which is fueling the comments that were made. He referenced the density, and the history of the site, mentioning that the last project proposed and approved by the City of Ormond Beach on this property was 100+ homes and significant open space in 2006, when the recession hit and projects did not get developed. Mr. Bayer added that the site is not urban infill and is a development of open recreational greenspace that has been developed around by homeowners that expect it to remain an open space. He continued that their decision is that the perimeter lots should be 100'- wide and asked staff if it is 100'- wide on the front of the lot and rear of the lot, or just 100'- wide on the rear of the lot and not the front. Mr. Bayer expressed concern with what is being said about the homeowners not even seeing the project because of the buffer and commented that they will be able to see them as secondary impacts, which includes the traffic.

Mr. Bayer touched on the traffic concerns and stated that the traffic study looks at the delays in traffic intersections and does not consider the fact that Nova Road is about to lose lanes under the Department of Transportation (DOT) proposal, or the possible fuel tank storage project. He was pleased with the agreement to the two sidewalks and stated that he hopes that the proposed updated rounded diamond area helps, and looks forward to having third party traffic consultants review it.

Mr. Bayer mentioned the architectural concerns and stated that Mr. Harowski, Certified Planner and Tomoka Oaks resident, worked on language so that they are not cookie-cutter, where every other house looks the same. Mr. Bayer elaborated on the HOA proposal that the same house model may not be used more than three times within a single lot phase and to have more diverse housing, and requests that the architectural plan be enhanced over and above what it is currently.

Mr. Bayer referenced the proposed buffer and explained that in his history in practicing law he has seen where neighbors complain that other neighbors are cutting down the buffer and seek Code Enforcement action and wants to see enforcement action that the property owners abutting the golf course would have the ability to do.

He asked for language pertaining to what happens after the two year bond, as well as the wild versus manicured buffer, and whether the HOA or developers will be responsible for it. Mr. Bayer concluded that with multiple sets of plans that there are still several concerns necessary to make the project more compatible with the interest of the current property owners.

Board Discussion

Chairman Thomas brought the discussion up to the Board. He reviewed the choices before the Board. Chairman Thomas disclosed that he received a phone call from Mr. Barshay. Chairman Thomas stated to Mr. Barshay that they should discuss the project with the homeowners and the HOA. Chairman Thomas commented on the new material with the change of lots, and staff's suggestions and advised the Board that it needed to be decided if it was going to be reviewed as new material or accept the submittal that was discussed on July 13, 2023 and continue on with a recommendation.

Mr. du Moulin stated that he accepts it as new material and should go back to SPRC for review.

Mr. Galloway agreed that it is new material and stated that he talked to people from both sides and hates to prolong it but that staff needs more time and thinks it will be fair to all parties.

Mr. Jorczak concurred with Mr. Galloway and commented that there are still questions to be raised. The overall density and lot sizes need more review. He added that it is an enclave within an enclave and has concerns with the architectural standards.

Mr. Scudiero reviewed the three options of voting it up, vote it down based on the July 13, 2023 meeting only, or continue the meeting and let the new presentation be formally made and legally advertised. He stated that he is not comfortable voting on the previous rendition with another rendition coming. He added that it is probably going to go to court and asked what the attorneys want to do.

Attorney Hayes explained the process and the Planning Boards role in it. The function of the Planning Board is to review the application and determine if the changes are not new material or act on the proposal that was submitted on July 13, 2023, and vote up or down. The new changes, once folded into the application go to City Commission but they lose the benefit of the experience of the Planning Board. Another option suggested is to continue with another meeting date with more discussion before it goes to City Commission.

Mr. Railsback apologized for missing the first Tomoka Reserve meeting and commented that he supports the position of the full benefit of the City Commission being a recommendation for a final plan and encouraged another meeting, incorporating as much of a concession and fine-tuning to benefit the community as well as property owners so that the process is not repeated again. He expressed interest in reducing density with the 100'- wide lots and putting a roundabout design in rather than a diamond.

Ms. Shull concurred with the Board and commented that the project has evolved. She disclosed that she met with Mr. Carl Velie and Mr. Ray Barshay on July 3, 2023 following the first set of plans and now the plans are different. Ms. Shull wants to make sure that all comments are addressed and added that it is not a typical neighborhood and that there needs to be time to address everything. She concluded that the property is infill but not derelict land and is a beautiful property.

Mr. Galloway expressed the importance on whatever decision is made.

Chairman Thomas concurred with Ms. Shull and added that he is glad it is being considered as new material and questioned that if there are changes now, what changes might arise between this meeting and when it goes to City Commission. He suggested making the best attempt and to consider the new material and move forward, giving the applicants a reaction to their recent summation for guidance.

Attorney Hayes stated that it should be general sound advice only and not getting into too much detail.

Ms. Shull stated that there is still too much density and would like to see bigger lots, even with the 60' – wide lots and commented on the congestion. She added that there are too many cars in the area creating congestion. Ms. Shull remarked that something still needs to be worked out with the irrigation for the buffer and added that she agrees that the architectural designs should be different.

Mr. Railsback commented that he has concerns with the density and squeezing a lot of property in and wants to see a more conforming development. He expressed his concerns with the buffer becoming a problem in the future and that there needs to be a requirement for whose responsibility it is to maintain it. Mr. Railsback added that he hopes the irrigation saves on water as well. He added that the architectural design should be controlled, and suggested that they should not be all the same color scheme in the same vicinity. He suggested that the diamond area should be a one-way traffic roundabout.

Mr. Scudiero stated that the changes discussed tonight are a step in the right direction. Mr. Scudiero referenced the density and stated that the compromise between 0 and 276 is not 272 and expressed his hopes that they keep working, commenting that there is not much change.

Mr. du Moulin questioned if it is legally right to build on this land. Mr. du Moulin referenced the past agreements stating the land would be a golf course. Mr. du Moulin stated additional work needs to be done and he wants to ensure that the land is not built on if there are restrictions that only allow a golf course.

Mr. Jorczak expressed that he still has concerns with the enclave within an enclave and suggested that whatever is developed blend in more efficiently with what is already there as far as lot sizes and the density perspective and not inconvenience the surrounding community. He commented on the minimal land left in the City of Ormond Beach. There are over 53 facilities in the community that are funded by the taxpayer, including open spaces and sports areas. Mr. Jorczak added that what is put

into a specialized area with the rest of the community and be an asset to the City of Ormond Beach is going to take all the input they can get from city staff from a technical standpoint and give it a hard look at the economics from the developers standpoint on how the property can be used. Mr. Jorczak concluded that there is more work to do on the proposal.

Mr. Galloway referenced the last Board meeting where 475 homes were approved in Plantation Oaks and explained the difference between the two projects where that land was designed to hold 475 homes. He continued that he is interested in seeing a spreadsheet on how the proposed homes inside of the existing homes will affect those homes' resale value. He added that he is concerned with the buffer and who will be responsible for the maintenance. Further expressing his concern with the buffer, he referenced a swamp area on Clyde Morris Boulevard where the brush behind the homes caught fire approximately six months ago. The number of lots are questionable as well he said. He spoke on development and reiterated that something will go in there and that the question is in the number of homes. Mr. Galloway concluded that it is a possibility that a few key people could go in and offer the developer a price and someone purchase it and then it will be seen what they want to do.

Chairman Thomas elaborated on recent experiences, one relative to the concern of the lot sizes in seeing homes as close as 10' from one another in Jacksonville, Florida. It was discussed and determined that depending on the area, there is 5' to 20' between homes in a subdivision on a 60'- wide lot typically. He continued that he and his wife noticed that traffic was congested going into the Trails from Interstate 40 on Sunday at 1:35 p.m., with eight cars going into the neighborhood and then four of the cars going though to Tomoka Oaks, expressing his concern with the traffic. Chairman Thomas commented that Tomoka Oaks is a traditional neighborhood where you have to search hard and far to find two homes alike and does not like the idea of dropping cookie-cutter homes into a well-established, traditional neighborhood. He added his concern with the density and that he hopes that there are a lot of changes before meeting again.

Attorney Hayes reviewed the available dates to hold the next Tomoka Reserve continuation Planning Board meeting, Tuesday, September 26 or Thursday, September 28, 2023.

Mr. Spraker stated that as part of the motion it is requested to hold a time-certain date before the new plan is submitted to the SPRC, which is requested by staff to be September 6, 2023.

Board discussion ensued and September 26, 2023 was decided upon as the next Planning Board meeting date.

It was discussed that the item requires a continuation for the applicants to bring other ideas and options back for another public hearing in front of the Planning Board and for the Planning Board to have more time for the support decision-making process. It was determined, taking the availability of the Planning Board, staff, and applicants, that the continuation meeting will be held on Tuesday, September 26, 2023 at 6:00 p.m. at Calvary Christian Center. Chairman Thomas asked the residents to keep the

comments to new questions or comments in reference to tonight's meeting and limit speaking time to 1 ½ - 2 minutes.

Chairman Thomas entertained a motion for the continuation date.

Mr. Galloway motioned for a continuation of the meeting on September 26, 2023 at 6:00 p.m., and for all the plans to be submitted to the Planning Department on or before September 6, 2023. Ms. Shull seconded it. Vote was called, and the motion was approved (7-0).

VII. OTHER BUSINESS

No other business was discussed.

VIII. MEMBER COMMENTS

Mr. Jorczak recommended that citizens of Ormond Beach attend the upcoming fuel farm County meeting for the safety of the community.

The Board thanked the staff and thanked everyone for attending.

Chairman Thomas requested for the applicant to choose different colors on the updated project plans.

IX. ADJOURNMENT

The meeting was adjourned at 7:13 p.m.

Respectfully submitted,

Steven Spraker, Planning Director

ATTEST:

Doug Thomas, Chair

Minutes transcribed by Marcella Miller.

M I N U T E S

ORMOND BEACH PLANNING BOARD

Regular Meeting

September 26, 2023 6:08 PM

Calvary Christian Center
1687 West Granada Boulevard
Ormond Beach, FL 32174

PURSUANT TO SECTION 286.0105, FLORIDA STATUTES, IF ANY PERSON DECIDES TO APPEAL ANY DECISION MADE BY THE PLANNING BOARD WITH RESPECT TO ANY MATTER CONSIDERED AT THIS PUBLIC MEETING, THAT PERSON WILL NEED A RECORD OF THE PROCEEDINGS AND FOR SUCH PURPOSE, SAID PERSON MAY NEED TO ENSURE THAT A VERBATIM RECORD OF THE PROCEEDING IS MADE, INCLUDING THE TESTIMONY AND EVIDENCE UPON WHICH THE APPEAL IS TO BE BASED.

PERSONS WITH A DISABILITY, SUCH AS A VISION, HEARING OR SPEECH IMPAIRMENT, OR PERSONS NEEDING OTHER TYPES OF ASSISTANCE, AND WHO WISH TO ATTEND CITY COMMISSION MEETINGS OR ANY OTHER BOARD OR COMMITTEE MEETING MAY CONTACT THE CITY CLERK IN WRITING, OR MAY CALL 677-0311 FOR INFORMATION REGARDING AVAILABLE AIDS AND SERVICES.

I. ROLL CALL

Members Present	Staff Present
Angie Shull, Vice Chair	Claire Whitley, Assistant City Manager
G.G. Galloway	Steven Spraker, Planning Director
Al Jorczak	Cara Culliver, Landscape Architect
Mike Scudiero	Robin Gawel, Senior Planner
Barry du Moulin	Sarah Cushing, Senior Planner
Troy Railsback	David Allen, Planning Civil Engineer
Doug Thomas, Chair	Randy Hayes, City Attorney
	Marcella Miller, Recording Technician

II. INVOCATION

Chairman Thomas led the invocation.

III. PLEDGE OF ALLEGIANCE

IV. NOTICE REGARDING ADJOURNMENT

NEW ITEMS WILL NOT BE HEARD BY THE PLANNING BOARD AFTER 9:00 PM UNLESS AUTHORIZED BY A MAJORITY VOTE OF THE BOARD MEMBERS PRESENT. ITEMS WHICH HAVE NOT BEEN HEARD BEFORE 9:00 PM MAY BE CONTINUED TO THE FOLLOWING THURSDAY OR TO THE NEXT REGULAR MEETING, AS DETERMINED BY AFFIRMATIVE VOTE OF THE MAJORITY OF THE BOARD MEMBERS PRESENT (PER PLANNING BOARD RULES OF PROCEDURE, SECTION 2.7).

V. APPROVAL OF THE MINUTES

Mr. Jorczak motioned to approve the August 21, 2023 Minutes. Mr. Galloway seconded it. Vote was called, and the motion was approved (7-0).

Chairman Thomas opened the Public Hearing.

Attorney Hayes explained the continuation of the August 21, 2023 Planning Board meeting on Tomoka Reserve. Recommendations were made by staff, Planning Board, and the HOA attorney to allow more time to analyze the previous set of new plans. Tonight, the Planning Board can make a recommendation to the City Commission or request additional information. Attorney Hayes added that the recent material submitted, according to the applicants, is consistent with the Comprehensive Plan and Land Development Code (LDC) regulations and staff disagrees and recommends that the application be denied. He concluded that the witnesses are not required to be re-sworn and directed for those wishing to speak to announce their name and whether or not they have been sworn in.

Chairman Thomas and the Planning Board discussed the allotted speaking time for residents and audience members and it was determined to allow three minutes per person. Chairman Thomas opened the public hearing.

VI. PUBLIC HEARINGS

A. PRD 2022-043, Tomoka Reserve – Issuance of a Development Order – continuation of the July 13, 2023 meeting

Staff Presentation

Mr. Spraker, Planning Director, thanked Calvary Christian Center for hosting the meeting and stated that the application is for the issuance of a development order for the Tomoka Reserve subdivision, at 20 Tomoka Oaks Boulevard. He continued that the existing land use is "Low Density Residential" and the existing zoning is Planned Residential Development (PRD). The zoning district does not have a development order associated with it any longer and has since expired, the reason for the public hearing.

Mr. Spraker continued that the project has gone through two pre-application meetings, the Site Plan Review Committee (SPRC),a neighborhood meeting, and today, the third Planning Board meeting. Mr. Spraker stated that if there is a recommendation tonight, the tentative City Commission meeting date will be November 07, 2023 at Calvary Christian Center. Mr. Spraker explained the issuance of a development order review process. A PRD is a zoning document that shows lots, landscape buffers, open areas, recreational areas, and architectural standards. A PRD does not require engineering construction plans that include stormwater and utilities, which will come later with a preliminary plat. The preliminary plat would go through a neighborhood meeting, Planning Board and City Commission.

Mr. Spraker displayed a recap of the July 13, 2023 site plan with the proposal of 276 units, a mixture of 50', 60', 80' wide lots. He explained the August submittal that was before the Planning Board, with a mixture of 60', 80', 90', and 100' wide lots, but because it was submitted after it was advertised, it required a new public hearing. He continued that the applicant agreed with some SPRC recommendations, including

the building coverage, setbacks, note for lot separation, Tomoka Oaks diamond improvements, sidewalks on both sides of Tomoka Oaks Boulevard, neighborhood meeting for the preliminary plat, the timing of the traffic signal, updated architectural design language and the removal of the cut-through of amenity space parking area.

Mr. Spraker stated that a new site plan was submitted on September 06, 2023, and the changes are primarily the mixture of lot sizes along the perimeter of the boundary of the project of 80' wide lots and interior, 60' wide lots. Other aspects of the site plan that did not change were the gated vehicular access of the subdivision, it is not in the wetlands or floodplain. Mr. Spraker added that other characteristics that did not change were the environmental assessment provided, the 34 acres of natural preservation, recreational areas, 50' buffer around the site, preservation of historic trees, the school concurrency and Traffic Impact Analysis provided.

Mr. Spraker stated that the two remaining key issues are the perimeter lot sizes and the material and irrigation of the 50' buffer. The SPRC continues to recommend 100' wide lots on the perimeter where the site plan shows 80' wide lots as the former and surrounding zoning district of R-2 are 100' wide lots.

Mr. Spraker continued that the existing conditions today with the 3.3 mile buffer in the planting plan states that there are native trees and shrubs that will provide screening between the existing homes and the proposed development. Another existing condition is the existing vegetation to be able to use and gaps of landscaping to be planted, and 70 percent of the 50' buffer with trees and shrubs for visual screening. Mr. Spraker stated that the proposed plan shows that the buffer shall be 50' wide containing five trees and 50 shrubs. No groundcover was proposed in the plan. The existing vegetation would be used for gaps of landscaping to be planted. Mr. Spraker added that watering would be provided by a large water tanker truck, not permanent irrigation. The plan offered a maintenance bond for two years and requires an 80 percent survival rate to release the bond.

Mr. Spraker delivered an overview of staff's recommendations, including the City's Landscape Architect, of a type 6 buffer of seven trees, 70 shrubs, and 70 ground cover plants. The proposed plan does not meet the visual screen requirement of the LDC. He stated that staff is supportive of the use of native/xeric plantings. He added that that the irrigation by water tanker truck does not comply with the LDC. Mr. Spraker expressed concerns with the fact that the watering plan shifts compliance to the future HOA. It can involve additional maintenance and costs, as well as the 2-year bond and 80 percent survival plant rate.

Mr. Spraker reviewed the correspondence that was received and that was also included in the meeting packet. Some of the correspondences included the compatibility with the existing Tomoka Oaks, property value concerns, loss of quality of life, traffic concerns, golf course perpetuity and related uses, the existing configuration of the diamond intersection, Tomoka Reserve HOA concerns, wildlife concerns and buffer concerns.

Mr. Spraker delivered an overview of the Planning Board review criteria consisting of the application submittal, staff report, SPRC comments, written correspondence provided, criteria of the LDC contained within the staff report, and testimony provided at the Planning Board public hearing. He stated that staff recommends denial of the proposed site plan for the issuance of a development order, based on the

perimeter lot sizes and the buffer planting plan. Mr. Spraker continued that if the Planning Board believes that it is appropriate they can recommend approval. Either recommendation of approval or denial goes to the City Commission for the final decision.

Applicant's Presentation

Mr. Rob Merrell, Esquire, Cobb Cole Attorneys at Law, representative for the applicant, stated that Mr. Don Spence will speak again on the buffer and Mr. Michael Hoteling, on the lot widths, the two key issues. Mr. Merrell recapped on the PRD due to its custom zoning for the property. He asked the Board for suggested items in negotiation for an agreement.

Key issue: Buffer:

Mr. Don Spence, Master Arborist/Native Plant Expert, Ph.D., Native Florida Landscapes, explained that he has been working with landscaping and native design for 25 years. Three years ago he completed a tree survey for the property and beginning in January, started work on the buffer plan. Mr. Spence stated that it is based on a low density residential and a buffer planting plan that had three or four plants to fill in gaps along the shrubs. He continued that several months later, they got pushback from the City as they wanted a type 6 buffer. He explained the reasons that the team felt it was not appropriate as a type 2 buffer is outlined for low density residential. A type 2 buffer is three trees and 30 shrubs. The team proposed a bonified, meaningful type 4 buffer with five trees and 50 shrubs, to fill in the gaps to provide visual screening between the existing homes and the homes that are proposed to be built. Mr. Spence expressed his concern with the said irrigation requested, as the existing trees and trees to be planted are native and once established over the next six to seven months, will not need it, same as the existing buffer that is not being watered. He stated that the goal is to plant plants that mimic the existing trees in the buffer, claiming that if the tree dies it will be replaced per the two year bond.

Mr. Spence continued reviewing the buffer planting plan and stated that the 50' wide buffer, that would be managed by the HOA, if there are tree problems would not be able to plant across the entire buffer due to many of the homes having fences or walls. In the plan, the center 20' of the buffer would be the planting zone. He continued that trees and shrubs need full sun and cannot be planted underneath of canopies. Mr. Spence stated that space is needed for access (15' on the development side and space for neighbors on the backside). He added that access is needed behind the property lots of the homes built to manage trees and any invasive plant problems, therefore cannot plant across along the entire width of the buffer. Mr. Spence reassured that the plants will be watered and made sure of their survival at 100 percent from the initial plan of 80 percent, after two years. The site will develop in phases and the bonds will follow in phases and long-term maintenance will be driven by the legal agreement that the HOA develops. Mr. Spence reviewed a table that explains the watering phase for the trees and shrubs and stated that the plan meets and exceeds what the University of Florida recommendation is. He continued that they are not willing to dig up the buffer for ground coverings and feel it does not add to the visual screening. He pointed out that a water tanker truck is in the plan for irrigation and backed up his point with the LDC guideline specifying that if using native/xeric plants a permanent irrigation system is not required. Mr. Spence concluded that there is no standard for a type 6 buffer being applied in a residential setting and no example of an industrial buffer design against residential.

Mr. Merrell stated that the proposed buffer plan is well founded and innovative, concurring with Mr. Spence, and added that a permanent irrigation system would tear up the manicured grass.

Key issue: Lot sizes:

Mr. Michael Hoteling, MAI, Managing Partner, Moody Williams Appraisal Group, stated that he has been appraising commercial, residential, subdivision type properties for 20 years. He spoke on the appropriateness of the lot sizes and stated that most of the lots of the homes being proposed are 2,100 to 2,900 square feet and most of the lots that get sold are between 60' wide and 80' wide, with some 100' wide. Mr. Hoteling commented that this will be a nice subdivision where the homes can range from $600,000 to possibly over $1 million. He added that when pricing the homes in Tomoka Oaks three weeks ago, there were no homes for sale that exceeded $700,000, except for those along the water. Mr. Hoteling concluded that what is being proposed to be built will add value to the existing development and not detract from it.

Mr. Merrell stated that the alternative to the custom zoning is straight zoning. The subject property is low density residential in which the zoning classification does not have all of what is being offered through the proposed project. He explained the reason it was decided to go through the PRD process and propose the combination of lots is because the market does not do 'Tomoka Oaks lot sizes' at 100' by 100' anymore. Mr. Merrell added that the applicants wanted the mixture of lot sizes starting at 50' wide lots and a larger landscape buffer for separation. The minimum guidelines for the landscape buffer is required to be 50' and if adding all of the green around the outside it is an average of 129' of greenspace between both properties. Doing straight zoning at a 6' buffer requirement as opposed to the 129'. The straight zoning would have also offered only two trees and 20 shrubs as the landscaping buffer requirement. Mr. Merrell added regarding outdoor recreation, and the open space and parks, that they are a concession as part of the negotiating PRD. Mr. Merrell referenced the architectural standards and how the applicants listened to the neighbors and their dislike of cookie-cutter homes. He touched on the pedestrian connectivity being volunteered, stating that they would add sidewalks out to Nova Road. Mr. Merrell concluded that something is going to be built, whether based on custom zoning or straight zoning.

Board Questions of the Applicant

Mr. Scudiero asked what the average lot square footage is in the existing Tomoka Oaks development versus what the perimeter lots would be with the 80' wide, 90' wide, and 100' wide lot range.

Mr. Dwight Durant, Zev Cohen & Associates, stated that what is being proposed are 80' wide by 120' deep lots, approximately 10,000 square feet, and the existing typical Tomoka Oaks lot is 100' by 120', approximately 10,000 to 12,000 square feet. The inside lots are approximately 7,000 – 8,000 square feet. It was discussed that some of the proposed lots have a different rear width and can be above 10,000 square feet.

Mr. du Moulin inquired about the proposed irrigation of the buffer and if there is a specific amount of time that the water tanker truck would irrigate. Mr. Merrell replied that the detailed proposal and plan is in the board packet materials.

Chairman Thomas asked about the different proposed façades of the homes and asked for clarification on if it is every 4th house before duplicating the same façade,

expressing that he does not like every other house repeating the same design. He added that currently in Tomoka Oaks you will not see two houses within 200', 300' and 400'. Mr. Merrell replied that the same façade cannot be next to each other or across the street, and urged Chairman Thomas and the Board to be specific in what it is exactly that they would like to see. Mr. Merrell clarified that the applicant is not trying to recreate or replicate Tomoka Oaks, an older product and design, but bring forward the quality and variety that they have asked for.

Mr. Railsback referenced the elevations and colors of the homes and stated that they should be not 'cookie cutter' in design. He asked what is being done for the softening of the diamond and if it will be a roundabout instead. Mr. Merrell relied that the diamond is proposed to be reconfigured to an amoeba shape, with rounded corners, allowing better flow for vehicles, including buses, as well as adding landscaping in the island.

Mr. Jake Stehr, Zev Cohen & Associates, read the material included in the recently submitted plans that stated architectural variations in the variety of house sizes designs in the neighborhood is encouraged to facilitate it so that the two adjacent homes on the same side of the street as well as the house across the street and its two adjacent homes have to have a minimum of three different design elements of the following ten elements.

Ms. Shull asked if the plan was referencing different design elements (example brick and siding) or if the whole house is different. Mr. Stehr answered elements such as roof pitch and roof type, the skin/exterior finish material, color, garage orientation and size, porch size and location, number of stories, window sizes and shapes, window location and decorative elements. He concluded that houses cannot be mirrored across the street from one another and that options will be given to future home buyers.

Mr. Galloway asked for clarification on the buffer. Mr. Merrell explained that their idea is to leave the places that already have bushes and trees alone. The reason for not wanting to lay groundcover down is to avoid tearing the ground/landscaping up and put wild landscaping in. Mr. Merrell added that if landscaping was put in along the entire 50' buffer it would not be able to be accessed and maintained, according to Mr. Spence.

Mr. Jorczak inquired about what the average required time for the trees, based on size, that is going to be planted to be able to provide 100 percent screening in all of the areas that trees have not been supplied to fill the gaps. He commented that it will determine if it will be three, five, or ten years before the trees will provide the screening. Mr. Spence replied that different trees grow different ways and it is hard to tell. The trees are designed to provide a canopy and the shrubs will provide the visual appearance between the homes. There is not going to be 100 percent complete vegetative screening, as the code only calls for 40 percent. Mr. Spence concluded that there will be gaps for a while and in time the plants, natives and shrubs will mature and will reseed themselves in the buffer, creating a denser buffer over time.

Ms. Shull asked Mr. Spraker for explanation of the request for the 50' buffer, the irrigation, and type 6 buffer. Mr. Spraker answered that one of the key factors expressed was the buffer and the lot sizes during the pre-application neighborhood meetings and the SPRC meetings. The goal is to provide the buffer to mitigate for some of the loss of the natural buffer that is there today. Tattersall, RidgeHaven, and Tymber Creek Apartments are projects that have natural buffers. He stated that staff

is not against the native or xeric plantings, but are against taking a former golf course, developing it into residential, and leaving gaps in the buffer. He added that Ms. Culliver, Landscape Architect, is available to go through the details of the recommendation if necessary. Mr. Spraker added that staff believes that irrigation is a key source for the plantings.

Tomoka Oaks HOA Presentation

Mr. Dennis Bayer, Esquire, 109 6th Street, Flagler Beach, legal counsel of the Tomoka Oaks HOA, expressed his disappointment with the applicant's response to the HOA in negotiating the architectural standards, traffic impacts and buffers. A few of the architectural ideas were agreed upon, but not on having the different architectural styles close to one another. Another HOA request was for buffer enforcement once the two-year performance bond is over. No comments were received back from the applicants regarding if that language was acceptable or not. Mr. Bayer rebutted Mr. Merrell's comment and said that property is currently zoned PRD and the last development proposed that came to the Board was to convert the golf course, which was PRD with part of the property being a golf course, and part of it residential. He spoke on the PRD and R-2 zoning and referenced a Florida Supreme Court case, The Snyder Decision, a landmark land use decision that has been in place in the Florida Supreme Court since 1993. Based on it, he remarked that the City Commission can say that they do not want R-2 zoning and that they want it to stay PRD, given the unique circumstance presented by the property. Mr. Bayer continued that they agree with staffs comments on the issue with the buffer and stated that the buffer is typically required between the new residential development and the existing residential development and are typically at a much higher standard than residential next to residential, as the use is being surrounded, therefore a different buffer requirement. Mr. Bayer referenced the Matanzas Shores Golf Course conversion where they required a lot of different issues with the buffer that was much greater than the standard residential buffers, which is part of the golf course conversion process. He stated that this is not the standard development review and is very unique. Mr. Bayer concluded that the HOA agrees with staff on the 100' wide lots on the perimeter and the type 6 buffer, and the recommendation of denial to the City Commission.

Mr. Tom Harowski, Certified Planner and Tomoka Oaks resident, 97 N. St. Andrews Drive, expressed the resident's frustration with the developments with the late withdraw of the plan that they presented at the last meeting, and the lesser plan submitted. He spoke on the applicants list of concessions in response to staff comments and stated that it did not affect the project in size or layout. The addition of the sidewalks on Tomoka Oaks Boulevard and the modification of the island, he says are basic safety issues. Mr. Harowski commented that the basic issues remain the same since the beginning. He continued that the applicants refuse to apply the staff recommended 100' wide lots on the perimeter or offer reasonable solutions. The threatened alternative of R-2 standard zoning, which requires 100' wide lots throughout seem acceptable to the applicant as an alternative and should be acceptable for a portion of the project. Mr. Harowski remarked that they turned to the design guidelines but still need to include the requirement for diversity in garage door orientation and the way the driveway faces. The compatibility is not having clusters of units that are the same. He remarked that the design that they have seen does not get that point. Mr. Harowski spoke on the important factor of the traffic signal

application and how a 30-day period was mentioned previously and stated that the application should be made promptly.

Audience Comments

Ms. Flavia Cassasola, 21 N. St. Andrews Drive, asked if the proposal gets approved if a moratorium has been considered on the noise level, 24 hours a day/7 days a week, from sunrise to sunset. She mentioned that people walk and bike the neighborhood at all hours of the day and remarked that the Mac tucks can be driving through as well as jack hammers working at all hours of the day and night, including weekends and holidays. Ms. Flavia asked if the construction schedule has been considered. She added that the investors bought the property to make money and that she has been in opposition since the beginning as there has been no compromise in the 272 units. Ms. Cassasola concluded that it is going to impact Tomoka Oaks, the Trails and Talaquah as well as the traffic and recommends denial.

Ms. Ashley Dufrene, 118 N. St. Andrews Drive, said that she took the Oath and reminded the Planning Board that the City of Ormond Land Development Code (LDC), Section 1-18, states that the proposed use will not substantially or permanently create a nuisance, deprive adjoining properties of adequate light and air or create excessive noise, odor, glare or visual impacts on the neighborhood and adjoining properties. Ms. Dufrene remarked that she lives on the golf course and knows that all three of those will happen if the development takes place without the proper guidance that the City and HOA is providing.

Ms. Bonnie Kloepfer, 23 Tomoka Oaks Drive, did not take the Oath prior but does so now. She commented that she is at the mouth of the Tomoka Oaks Golf Course. She added that she has a brand new white house and it will get filthy from the trucks and dirt from construction. She continued that the issue of 1,100 cars per day going back and forth is insane and cannot imagine what the traffic will be like. Ms. Kloepfer commented on their sentiments on trying to make it easy for the residents and their claim of compromising. She expressed her discontent with proposed number of homes. Ms. Kloepfer referenced yesterday's newspaper in regards to the purchases of one million plus homes on the rise in Volusia and Flagler Counties. She concluded her comments with the expression "if you build it, they will come", and said that she would like a proposed development such as Tomoka Estates or Estates of Tomoka Reserve instead of jammed in houses.

Ms. Denise White, 9 Fox Run Trail, The Trails, stated that she took the Oath. She thanked the Board for their time and service. Ms. White added that a reduction of four homes does nothing for the safety, traffic, density or lifestyle issues and changes nothing whatsoever. She remarked that it will impact everyone's lives and safety. Ms. White spoke on the merit of the old adage, "just because you can build does not mean that you should."

Mr. Jeff Boyle, 614 N. Halifax Drive, took the Oath and stated that the data in numbers in Volusia County are causing loss of sight in the big picture. He referenced the Comprehensive Plan policies and goals and remarked that the latest site plan is not compatible with adjacent homes and added that the revisions protect the neighborhood character, and does not guarantee safe traffic flow. Mr. Boyle continued that the revisions do not preserve natural open space. He stated that the golf course should have been zoned Open Space/Recreation, and commented that it is a mystery why it was not. The zonings protect adjacent property rights. Rezonings threaten those rights. Mr. Boyle said that Tomoka Oaks defines everything that is

good about Ormond Beach with a quality environment, quality homes and quality people who have suffered this thread with heroic dignity after paying premium property taxes to the City for over 60 years. Mr. Boyle stated that the revised site plan disrespects the city, the spirit and intent of the land use codes, the residents of the Trails and other nearby communities and the people of Tomoka Oaks. He added that they deserve better. He concluded that the revised plan is not Ormond Beach and is not who they are.

Ms. Ronnie Ranieri, 216 Rio Pinar Trail, swears to the Oath, and expressed her concern with 272 houses with only one point of egress. Another concern expressed is the traffic in the mornings and the safety of the kids that are walking or riding bikes to Tomoka Elementary School and the private Temple school. She commented that it is a tragedy waiting to happen. Ms. Ranieri remarked that reducing the plan by four houses from 276 is not going to work. She added that hundreds of cars are going to be coming out of the neighborhood at rush hour in the morning. Ms. Ranieri commented that most families have two cars and with the number of houses that are proposed, is worried about the kids.

Ms. Connie Colby, 108 Robal Lane, stated that she is concerned about it being a gated community as school busses do not go into gated communities. The children in middle school can walk and ride their bikes but middle school busses will have to come in the community somewhere to pick the kids up and will have to park outside of the gate, near the roundabout which would stop traffic. Ms. Colby continued that in her neighborhood a lot of the parents drive their kids to the bus stop or pick them up in the afternoon which will lead to more people parking along the road, causing a traffic mess. Ms. Colby pointed out that according to one of the maps, and with her experience living in gated communities, there has to be an emergency exit for emergency vehicles and suggests that there be a plan for it. Ms. Colby concluded that a lot of the proposed properties are close together and expressed her concern for boat, trailer, and RV storage on the properties.

Ms. Kelsey Kipi, 52 Pine Valley Circle, vowed to take the Oath, and commented that the reduction of the four homes on the plan is nothing and explained how they made lots slightly larger at the expense of the greenspace. She added that the developers purchased the golf course and asked why it could not a golf course that goes in. Ms. Kipi stated that Tomoka Oaks Golf Course closed due to a lack of maintenance to the course and not a lack of interest in the sport. Two local golf courses, both Halifax Plantation and Riviera, both have waitlists, according to Ms. Kipi. She suggested to restore the course and the membership with follow and profit will be made, and the greenspace will remain. No more angry citizens and no more debating on lot sizes and buffer zones and no more FDEP requirements. Ms. Kipi concluded to restore the course or sell it to someone who is willing to do so.

Ms. Lauren and Mr. Ned Huhta, 30 Pine Valley Circle, stated that they took the Oath. Ms. Huhta stated that she is a third generation resident and her grandfather designed and built their home. She expressed their concern with the signage for Tomoka Reserve and asked for specifics of where the signage will be located. Mr. Huhta added that he grew up in the house. He asked if the reclaimed water is going to be used for the proposed neighborhood residents as well as those around the perimeter. He asked if an adjoining property owner has a say in what is planted in the buffer and can decide on something mutually agreeable. Mr. Huhta remarked that they do not like Magnolia trees.

Ms. Wendy Dedo Findes, 16 Oakmont Circle, stated that she did not take the Oath but does now, and has lived in Tomoka Oaks for 27 years. She asked if the Planning Board has visited the Tomoka Oaks Golf Course or driven through Tomoka Oaks. She added that it is a very quiet, residential community and when the kids are in school, people are walking around quietly. Ms. Dedo Findes stated to build the proposed development inside of the golf course area will be a catastrophe. She said that there are no sidewalks, therefore kids ride their bikes in the narrow streets due to the neighborhood initially tailored to an older community. Ms. Dedo Findes added that the Trails are going to be affected. She spoke on the light at Tomoka Oaks and Nova Road and how it will be a havoc, with only one ingress and one egress through Tomoka Reserve which will spread out through Main Trail, Iroquois, and Rio Pinar. She continued that are a lot more children in the community now, including her 6th grade son at Ormond Beach Middle School (OBMS). She expressed her concern for all of the kids. Ms. Dedo Findes stated that all of this should be of consideration, the children, quality of life, and the environment. Ms. Dedo Findes concluded that wildlife have been displaced because there is nowhere to go with all of the developments.

Mr. Tyler Travis, 888 Willow Run, stated that he rents in Tomoka Oaks, and just moved here from Virginia and elaborated on his experience in a dense, high-traffic area in Virginia and offered a contrary, counter-perspective, expressing his respect for the current residents. He continued that he likes his privacy but is also interested in smaller lot sizes to be able to afford a home. Larger lots and estates would price him out, according to Mr. Travis. He is interested in new construction, and spoke on the architectural designs and how the applicant plans to alternate styles throughout. With townhomes it was only door color or shutter color that changed. Mr. Travis commented on the traffic and said that as long as there are sidewalks and traffic crossing lights, just as he was in a dense area in Virginia and it was not an issue. The kids had to walk to the bus stops, other than the younger kids whose parents took them to school. He added that he has a young child and had no problem playing with them out in the streets in their neighborhood.

Mr. Robert Banker, 1 Tomoka Oaks, #135, Escondido, stated that when the HOA President raised the idea of 276 units going in, the residents wanted it changed. He agreed with the President that then it went down to 272 units, that he did not like it and that it was not much of a change. Mr. Banker continued that he would like to see the number 0, unsure if it will happen. He commented that the applicant stated that they were going to put in $600,000, $800,000, and possibly $1 million homes. Mr. Banker stated that the plan shows a section in the middle similar to appearance as a sardine can which he does not see them being 7', 8', 10', 15' to 20' apart. He suggests that they will not sell for more than $100 to $150,000. A $700,000 will not be next to a $150,000 and still maintain value. He referenced the infrastructure and commented that no one is considering what it will do to the Publix area. Mr. Banker stated that the President commented that something is going in, and he asks why and what is the hurry. He spoke on a unilateral amendment and how the language for it should be stricken. Mr. Banker asked how when the construction is going on with the trucks backing up at the traffic signal, how the traffic will be going in and out.

Ms. Michele Zirkelbach, 328 River Bluff Drive, stated that she swears to the Oath. She thanked the Planning Board members for their time. In reference to time, she added that Mr. Merrell started out his presentation with the remark that a lot of hours have gone into talking about of stuff, and the irony in the statement. She commented

that for every hour that Mr. Merrell has spent, it is a billable hour for him and the residents match him hour for hour times every resident in the neighborhood and have more invested in this in manpower hours and are ready to have a real negotiation. Ms. Zirkelbach stated that when Mr. Merrell sits at the mediation table when someone comes back with a less than 2 percent reduction, he takes it for what it is a slap in the face. She continued that is where they are, 276 homes, down to 272, is not a meaningful move on their part in which finds offensive. She continued, and referenced Chairman's remark on speaking directly to the plan that that represented, and said that she finds it unacceptable. She spoke on the previous proposal approved, keeping parcel greenspace golf course and having less homes and nothing has been proved in terms of traffic. Ms. Zirkelbach stated that if continuing with this back and forth, for the Planning Board or City Commission to ask the hard questions about the traffic study. She stated that when looking at the traffic study and its statement that one car is going to be going to Tomoka Elementary out through Nova Road, that they have more common sense. She concluded that she agrees that something is going to go in there and offered food for thought on the market out there not for smaller lots and commented that Kings Landing subdivision in Port Orange is being brokered by Realty Pros, Mr. Buzzy Porter and Mr. Bill Navarra, whom she esteems, but said they are one acre home sites that are selling for $250, 000, $267, 000 to $278,000. Ms. Zirkelbach stated that if the threat is R-2 zoning and all of the lots being 10,000 square feet that the whole concept should be reconsidered as one-acre lots. One-acre lots is where it is at!

Ms. Missy Herrero, 111 N. St. Andrews Drive, stated that she has lived there for over 30 years and residents have spent thousands of dollars for legal representation to defend their quality of life and safety of their community. She continued that they do not have money to gain in the war of attrition. She said that they have been meeting with different members of the development and Board for over two years. Mr. Ray Barshay was quoted in the newspaper for saying that they just have not been able to tell their story, and Ms. Herrero commented that she does not know what they have been doing for two years. He invited them to see the quality of the product that they wanted to build out at Plantation Bay, on 80' wide lots. Ms. Herrero asked before she took her time to do so, what was behind the 80' wide lots. The answer was a golf course. Ms. Herrero spoke directly to the new plan and said that it is still not compatible in the existing neighborhood. 60' and 80' wide lots does not fit. The proposed buffer is the most inexpensive approach to the buffer. She mentioned a comment brought up by their HOA Attorney, that it is not a neighborhood backed up to a neighborhood, it is a neighborhood where people invested in property and homes on a golf course for views and privacy and are losing that, so the buffer should not be treated as a regular Residential to Residential buffer. Ms. Herrero commented that Mr. Rubin is from South Florida where she grew up, and her friend sent her miles and miles of buffers, dense, diverse, and well-maintained examples, with no water trucks driving along the buffer. She suggested that if it has to be built to some extent that it needs to be done in the best, high-quality possible approach as the reality is that the environmentally-friendly innovative approach is the least expensive and the most profitable for the developer. Ms. Herrero commented that there is information on how when golf courses are developed it affects the value of homes, with experts that say the opposite, and she said that data can be provided for it. She added that they do not have millions of dollars to win on this and they do. She suggested that if someone had time to pick apart the experts, it does not all add up and urged the Board vote no.

Ms. Dale Ryals, 20 Eagle Court, stated that she was not hear at the last meeting to take the Oath. She commented that her husband was in the hospital over the last month at Advent Hospital and when transported by ambulance and admitted to the Emergency Room, where he had to stay for two days due to no available room in the hospital. She continued that the hallways were lined with patients. The hospital claimed that they are not going to improve with only two hospitals. Ms. Ryals stated that when the development order was done the neighborhood was told by the City Commission that the golf course was needed for holding and draining the water to be able to put it back into the aquifer. She added putting rows of the houses with concrete and asphalt roads will have sewer drains and it will end up in the Tomoka Basin. They were told they could not add too many chemicals to the golf course so that it would not get into the Tomoka Basin. Ms. Ryals commented on the million and a half gallon water that had to be added to the reclaimed water, in which 250 of it came from St. Johns, and 250,000 came from her husband's pocket. The mylar-rubber liners was not paid for so her husband had to pay a lot of money to put the liners in, which could be an EPA problem.

Mr. John Rhoades, 39 N. St. Andrews Drive, stated that on his property, the city sewer and water/electricity come in from Nova Road through his yard/easement. He was aware when he purchased the property. He added that the infrastructure is going to have to come in from somewhere through easements or the main road which will tear up roads and create a miserable quality of life. He continued that the traffic and noise will be horrible and wants people to be aware of it when they are coming through resident's yards. Mr. Rhoades concluded that he appreciates the Boards time and trouble.

Mr. Paul Hughes, 4 Lauren Court, stated that he has taken 30 years of Oaths with the Government as an officer and added that his Oath is his bond. He commented that Tomoka Oaks is the body and the donut hole looks more like the large intestines. He remarked that hope is not a good plan for investments and added that there is no detailed entrance, drawing or plans that have put up to the gated, private, profit-motivated, smaller lot community. Mr. Hughes stated that the Escondido neighborhood has not seen any drawings to see how their lives will be altered with all of the underground utilities, sewers, that are max capacity now will all have to be altered at an extreme cost. He spoke on the northeast section where it has been cleared already on the plans and asked how they got a land use variance to alter the neighborhood standard to demolish a house or use for a rear entrance for EMS. Mr. Hughes remarked that he sees the issue with the watering for the plants and claims it will not be water that is treated. He referenced the Misners Branch Bridge and the overweight trucks that will be going over it and asked who will pay the construction costs when it has to be closed down for maintenance. He added that the plans do not include the utilities, and concluded that a person with nothing to hide, hides nothing.

Mr. John Measel, 16 Eagle Court, spoke on not irrigating the buffer and commented that if you do not water grass, you will get nothing but weeds and sandspurs. He added his concern with the traffic diamond and the thought that it will be suitable to add another 500-600 cars daily. He stated that it is not suitable now. Mr. Measel suggested to put a traffic circle and concluded that the traffic will be horrible.

Applicant's Rebuttal

Mr. Merrell thanked the residents for being there and spoke on the number of units that were reduced and stated that it started at 300 and is at 272. He reiterated the

straight zoning concept, the alternative in negotiating the zoning. He referenced the Snyder Case law and stated that it has nothing to do with rezoning of property that is surrounded by the exact same zoning. The limit of what you can ask for was talked about and it was said that you cannot think you are going to get the limit of what the Comprehensive Plan allows. Mr. Merrell referenced Mr. Spraker's report in that the Comprehensive Plan allowance is 4.3 units per acre, 632 units, which was their starting point.

Mr. Merrell referenced Mr. Harowski and thanked him and his input and suggestions on architecture and commented that they did not do all of what was suggested and remarked if the Board wants a particular thing to let the applicants know. On the traffic signal timing, Mr. Merrell remarked that if the light was not put in based on the DOT's timing that they would put the money up to have it built when the permit was issued and Mr. Lassiter will process the FDOT request. Mr. Merrell advised the Planning Board that if they feel differently to make it part of the motion.

Mr. Merrell referenced Ms. Flavia's remarks and stated that they have proposed construction time limits, on the cover sheet of the plan, Monday – Saturday, 7am – 7pm. He advised that it will not be 24/7 and it will not take place on Sundays.

Mr. Merrell refenced Ms. Lauren and Mr. Ned Huhta's inquiries on signage and answered that the plan is to have a sign like what was exhibited at the first hearing, at the entrance to the Tomoka Reserve community, not the entrance to Tomoka Oaks. The City Utility Department will have the answer on reclaimed water. Mr. Merrell stated that they are happy to discuss the types of trees.

Mr. Merrell thanked Mr. Travis for his remarks.

Tomoka Oaks HOA Rebuttal

Mr. Bayer referenced the Board members comments over the last couple of Board meetings that the project is too dense, with no significant reduction, as well as staff's comments on why the Type 6 buffer is appropriate and why it needs to be maintained and irrigated. He remarked that he understands a natural look and does not think it is a natural area with issues. Mr. Bayer spoke on the traffic circle and how it should be a requirement. He added that there has not been any substantive change since the last meeting and based on that he agrees with staff's recommendation of denial with it being time to go to City Commission. Mr. Bayer concluded that he respects the request that it go with the recommendation of the Planning Board of no, that it is not adequate and the way the property should be developed.

Live Stream Update

Mr. Spraker stated that staff is aware the livestream cut out from one link and are not able to re-establish that link. He stated a new live link has been established that is on the city's Facebook page and the city website. He stated he is aware that audience members are getting e-mails and texts and the city Public Information Officer (PIO) is also providing the new link.

Applicant's Rebuttal

Mr. Merrell stated at the end of the day, in response to Mr. Bayer, he pretty much repeated what has been talked about all along which is what to do with the lot sizes and the buffer in terms how it is planted and maintained. Mr. Merrell stated you heard a difference of opinion and they were professional opinions, very well thought out. He stated that there were hopes that the Board listened to them and looked at the

package that was in front of them, because if they said, "yes, but.." Mr. Merrell stated that is the safe route and then the City Commission knows that the Planning Board is willing to say the proposed houses can be built, but on suggested terms. Mr. Merrell continued that if the Planning Board says no for them to say why and explain because there are things in the reasons presented to you that you could say why and that it may not be the type of evidence that is needed to say no. He asked the Board to think about those things.

Break

Chairman Thomas stated that the Board is going to take a break at 8:14 p.m. The meeting resumed at 8:27 p.m.

Board Discussion

Chairman Thomas thanked all of those who spoke and for their input. He stated it is very important that the Board gets that and hopes that they all feel that over the three meetings that they have all been treated with dignity and respect and that true feeling that the Board really does care about their thoughts, wants to hear from them, and considers their opinions. Chairman Thomas stated that he wanted to remind the audience, "we are you - we are no different than you, we are just the volunteer people who sit up here and want to do what is best for our overall community." He thanked the audience for attending and for their participation. Chairman Thomas stated they are bringing the discussion up to the Board and the Board will have the discussion among themselves. He stated that the public hearing is closed, and cannot acknowledge anybody in the audience without the Board asking for them, and commented to please not raise any hands because it is closed for the public participation.

Mr. Jorczak stated that in the staff report it was discussed for the replacement of any of the plantings that may die and the two-year bond being put up to replace those issues. He stated that he noticed in some developments where there are dead trees long after the development has been completed and wondered if the city has any information with respect to developers who are responsible for going to do replacements in a certain time period and what the evidence generally is throughout the community. Mr. Jorczak stated that there have been a lot of developments that he has not gone through after they have been built to see what the propensity is for that to happen irrespective of the information that had been presented as to what it takes for the shrubbery to mature and then survive without any irrigation. Mr. Jorczak inquired if there was any data that could be shared as to an incidence of that happening and the time period to resolve it if another development was under no compunction or no city responsibility to do that replacement.

Mr. Spraker stated that staff does not have any empirical data to answer this question. He stated that typically a subdivision is constructed by a developer with inspections of landscaping at the end of construction to ensure whatever was supposed to be built is there and then it is turned over to a Homeowners' Association (HOA) for maintenance. Mr. Spraker continued if there are complaints about gaps in buffers or dead material, Neighborhood Improvement staff will investigate and look at the approved plans and seek to come to a resolution. The city Landscape Architect is often times included in the review. Mr. Spraker stated that there is a method for enforcement. Attorney Hayes stated that there are conditions in the development order and the obligations for maintenance are with the Homeowners' Association

(HOA). Staff seeks to work with the respective parties to find a solution. Attorney Hayes continued that there are enforcement provisions that code enforcement staff can enforce.

Mr. Jorczak asked if irrigation is a typical part of a development order. Mr. Spraker referenced the example of the Pineland subdivision that used a natural area that did not require new irrigation. He stated that wherever there are landscape plantings there is a requirement for irrigation.

Ms. Shull asked about long-term irrigation for other properties and referenced the applicant's request not to use an irrigation system. Mr. Spraker stated that if it is planted then there is an irrigation system and if it is a natural area, it is already established and no additional irrigation is installed. He referenced the natural areas and wetlands within the Pineland subdivision. Mr. Spraker stated that Tomoka Reserve has areas that will not need irrigation based on the natural areas. He continued that the city Landscape Architect advised that as new landscape material is planted, irrigation is required.

Ms. Shull asked why the plan did not want to include groundcover material and asked Mr. Spraker elaborate. Mr. Spraker stated that a buffer is sought between two developments and the groundcover is a tool to accomplish the buffer. Mr. Spraker stated in staff's opinion, the type 6 is an appropriate buffer. He concluded that if there is a desire to trade groundcover material for more trees or shrubs, that it is possible through the development order process. The groundcover is one of three layers that make up a landscape buffer.

Ms. Shull asked about maintenance and vine maintenance. Mr. Spraker stated that a normal course of maintenance would include managing vines and such material. He explained that he understood that the desire of the buffer is to let it grow natural and that SPRC staff are focused on the gaps in the buffer and filling the gaps. Ms. Shull inquired if the maintenance would be taken over by the HOA. Mr. Spraker confirmed that is correct.

Mr. Scudiero remarked that this is an applicant who appears before us quite often, and the least that can be done is to provide direction. Mr. Scudiero commented that he does not love the plan and did not think that was a secret. He stated that his biggest hang-up is the density. He continued, not just density in general, because of some of the lots being larger throughout the perimeter, commenting at least you cannot always see in other neighborhoods around the city where the density is higher. Mr. Scudiero stated that his concern is the references to the donut, which is not a completely inaccurate description. He stated if you are going to fill the donut in, it has to be with the same material as the rest of the donut. Mr. Scudiero stated his concern here is that the lot sizes, not just lot widths, need to be consistent throughout. He stated that would be his biggest suggestion to the attorney.

Mr. Scudiero added that when you take a neighborhood that is 50 or 60 years old, there is no way to re-create every style of home and architecture as so much has change in that time period. Mr. Scudiero stated that the homes today, even if they are the same square footage, they are vastly different than what was built originally in Tomoka Oaks. Mr. Scudiero continued that it is owed to the surrounding residents to make the development as close as possible – make the donut as contiguous as possible. He added and as consistent as possible. Mr. Scudiero concluded explaining his heartburn is that the development plan does not get anywhere close, especially with the 60' wide lots in the center, to the existing development.

Mr. Railsback commented that he concurred with Mr. Scudiero's comments. He stated that he read the application and all of the submittals. He stated that he previously lived in the Trails and was familiar with this area, which was one of the residents' concerns. He stated that he believed the Board members have a very intimate perspective of that area of the community. Mr. Railsback added that he served on the Quality-of-Life Board and that elements such as traffic and continuity are important to his decision-making process. He stated that in his review he could not ignore the fact that there is an open question of should the property always be a golf course. Mr. Railsback compared it to someone who bought on a lake or on the river and if someone was going to develop a houseboat development behind them. He stated that would invade on their original thought process of where they wanted to live and what they decided to purchase.

Mr. Railsback stated that if something goes in there that is not a golf course, considering the conformity and compatibility discussed and whether concessions were made. He commented that from the perspective of what could go there, 632 units are allowed under the land use and there are other concurrency issues that would pair that number down. Mr. Railsback stated that he is works in the area of HOA/condo unit development and has been thinking of the issues of development and what should of or could have been done that would be better for the surrounding area. He identified parking as an issue. Mr. Railsback expressed concern with so many vehicles with short driveways and two or three cars parking in the street when you have guests. He stated that he did not want this to be an afterthought and wishes there were longer driveways.

Mr. Railsback commented that he would like much less density and how that is his major concern. He offered the estate home concept as an alternative concept that would be more compatible. He continued that it is going to take an established neighborhood with larger lots and homes that are not 7 ½ feet offset from the property line, effectively 156' apart, then something greater than that should be in place, adding that there are no homes in Tomoka Oaks that are 15' apart or that have the same building elevations. Mr. Railsback stated in order to get his support there would need to be enhanced architectural standards that separate similar building elevations and much less density. He remarked that if you have a larger home price per square foot, rather than a ton of smaller homes, you can get to the same range and get a project that is better conforming to the area. Mr. Railsback expressed concerns about the traffic flow, including the thoroughfare leading into Rio Pinar, Iroquois, and Main Trail and out to SR40. He stated it will become a racetrack at different times of the day with safety concerns. Mr. Railsback expressed his concerns with Rio Pinar and North/South St. Andrews Drive. He expressed that a higher density project would provide additional traffic impacts and does not know how that many cars would work through that area.

Mr. Railsback stated he agreed with the donut comments. He stated the new development should be the same design or better. Mr. Railsback expressed support for greater sized lots or a greater size home and the rising tide will bring everything up.

Mr. du Moulin stated he rode his bike from Winding Woods through the area and Tomoka Oaks is a unique community with the houses beautifully maintained with its own character. Mr. du Moulin expressed that he is still shaky on the legal issues on whether or not the former golf course can be built upon. He stated that if the

developers want to be good stewards to their neighbors, the community, and to Ormond Beach that they should consider a larger scope for the housing development. Mr. du Moulin recalled at the last Planning Board meeting that there was a project called the "Enclave" which had larger lots sizes, 12 homes on 26 acres. He stated that the only problem was that it had septic systems and that is not applicable here. He suggested if something was to go on the former golf course, if it legally can go in there, the developers need to expand the acreage per lot.

Mr. du Moulin continued that he was concerned with the traffic and suggests that the traffic studies are flawed. He stated that the Fishkind study was also flawed. Mr. du Moulin expressed additional concerns with the traffic patterns and expressed that the traffic studies do not cut it. He stated the project needs to consider larger lots that would reduce the overall traffic demand and suggested a rotary at Tomoka Oaks Boulevard and Saint Andrews Drive diamond.

Mr. Jorczak stated that he has spent a considerable amount of time reviewing this project and concurs that it is unique. He expressed a concern that the proposed houses would be cookie-cutter homes which is quite a bit different than the existing neighborhood surrounding the project. Mr. Jorczak stated if this project were 5 miles from the center of town, it may be appropriate, but this is dropped into an existing residential subdivision that has an atmosphere. Mr. Jorczak stated that he understood the business model that the developer is working with and what homes that they believe that they can sell. He commented that the elephant in the room for him has been the change in lot size. Mr. Jorczak stated that this property could be even better than the existing Tomoka Oaks homes. He encouraged the developer to take a look at other potential economic models with larger lot sizes. Mr. Jorczak continued that the former golf course is such a unique piece of property and how he would like to see what is already there expanded as opposed to a standard development model.

Mr. Jorczak expressed concerns about traffic from the project and traffic in general. He stated that traffic is a common issue that happens everywhere - the infrastructure does not catch up to the level of development. Mr. Jorczak continued that traffic is astounding and getting worse by the year, and it will continue to get worse. He stated these elements have to be dealt with in a fashion to minimize the effects, including the use of larger lots. He stated that both issues of traffic and density can be helped with larger lots. Mr. Jorczak commented that the land area's limited access should also be considered. He stated that there is not one project before the Planning Board that has not discussed access. He acknowledged that the property will likely be developed in some residential fashion. Mr. Jorczak stated that density, traffic/safety, diversity of building styles, and compatibility with the surrounding neighborhood are all key issues and concerns. He concluded that the comments of the other Board members are valid comments and there needs to be a better job of mitigating the impacts of this development than what is in front of them.

Mr. Galloway commented that he wanted to be clear that he has friends, professionally and long term, on both sides of this equation. Mr. Galloway stated to the resident who asked about the board members familiarity with this area, that he and his family have spent a lot of time in Tomoka Oaks and the Trails.

Mr. Galloway stated he has done research in relation to this application and lots being built in this area. The first thing is that not a single developer has been able to develop to maximum land use density allowed. He added that it seems that developers ask for the moon and we pull back the density. He stated that 60 to 70 percent of the lots that

his company pulled were between 55' and 65' in width. He continued that 30 to 40 percent were 70' to 80' in width. Mr. Galloway stated that they could not find any new subdivisions with 100' wide lots. He stated that a 50' wide lot would probably cost the builder $100,000 today. There are no more $25,000 lots. Mr. Galloway continued that a 100' wide lot, not on the water, would likely cost between $185,000 and $250,000, and then there is the cost of the house construction.

Mr. Galloway recalled he did a tape measurement prior to the meeting and the buffer would go from the stage to the curtain at the end of the seating area. The new house would have a 30' setback, plus the 50' buffer, and the Tomoka Oaks 25' setback. Mr. Galloway stated that there would 115' from house to house. He commented that he never has seen an inner-city neighborhood have that much space between the back of the houses. He expressed his concerns including the potential of neighbors to take down trees.

Mr. Galloway stated that the applicant did what he had asked of them by putting in a combination of lot sizes. He remarked that what they did not do was listen. He continued expressing that everyone has property rights – the developer has property rights and homeowners have property rights – what they did not do was listen to the neighborhood. Mr. Galloway stated that he could vote for this project if it had less density. He continued that he thought that the project would come back with 220, 230, 240 – maybe 250 lots. Mr. Galloway stated he was a little shocked and a little disappointed that the number of lots was not less. He stated he is not sure if they are still asking for the moon or if they will take what the City Commission will give.

Mr. Galloway commented that he believed that something would be built on the property. He continued that there is always an ability to buy property, at the right price, and encouraged residents to continue the purchase option. Mr. Galloway encouraged the HOA and residents to pursue a purchase through a community development bond over 30 years. He stated it would cost about $129 a month per homeowner and that they can buy it. He asked the audience how many individuals would be willing to participate in a purchase. Mr. Galloway stated if the residents bought it, they could decide what to do with the land. He continued to encourage the residents to seek to buy the property. Mr. Galloway concluded that he is for this project, but not at this density.

Mr. Jorczak asked if every single lot was 100' in width, what would that do to reduce the density in terms of the number of lots as it currently sits. Mr. Spraker stated he believes that the applicant has done an analysis and would prefer that the applicant address this question. City staff have not reviewed any plans where all lots are 100' in width. Mr. Spraker speculated that between 280 and 300 lots would be possible. Mr. Spraker stated the applicant would likely have a better answer.

Mr. Jorczak clarified that all the other parameters would be the same. Mr. Merrell questioned which perimeters and Mr. Jorczak stated all of them. Mr. Merrell replied that they have a plan adhering to the Land Development Code that allowed 300 lots. Mr. Jorczak stated that he is not talking about the code. Mr. Merrell continued that the project engineers developed a code compliant plan for the benefit of the property owner and the answer is 300.

Mr. Jorczak stated that he is looking for the 100' wide lot within the context of the PRD application, including the buffer and recreational area. Mr. Merrell stated the question mixes apples and oranges. Mr. Merrell stated a 100' wide project would utilize a different set of standards other than the PRD and the buffers and recreation

areas. Mr. Jorczak stated his fundamental question was within the PRD development plan, if the lots were all 100' in width, what the total number be. Mr. Merrell replied that they do not have the answer to that question and concluded that they mixed the lots up and brought the other things along – these all go together.

Attorney Hayes stated that the lot number question would require other site-specific analysis which is not before the Board tonight. He continued that if it is of belief that the density is too much on this project, then the Board can talk a little bit about it, but that it is a development application under a PRD zoning. Chairman Thomas sought clarification if the question was to maintain the PRD site plan layout and require a minimum lot size of 100' in width and depth. Mr. Railsback stated it would be approximately 240 lots based on the existing lot areas in the site plan. Mr. Galloway questioned if that impacted the buffer. Mr. Railsback replied with the calculated lot sizes in the site plan (60' X 125' and 80' X 125') and then divided by 10,000 square feet which came to approximately 240 lots. Mr. Galloway confirmed that there would still be a 50' buffer.

Ms. Shull reviewed the case studies provided about other golf courses provided by the applicant. She stated the studies looked good with a 9-hole course and how one golf course added estate homes. She continued that one in Boca left the part of the golf course and added a 55+ community with 120 homes. Ms. Shull stated that other things can be done with the property. She expressed that she understood the intention was not to rebuild a golf course. She stated that the other densities are not anywhere near what is being proposed. She stated that she concurred with other board members on the density. Ms. Shull expressed concern that traffic is going to be too much, concerns with children in other neighborhoods with no sidewalks, Tomoka Reserve cut through traffic. She stated that no matter what is said, that it is 600 more cars. Ms. Shull added that the stoplight is an issue and commented that the traffic signal should be in place before the homes are finished, just as the WaWa did the traffic signal first.

Ms. Shull stated that the density is a big concern and how the buffer needs to be installed as a type 6 with irrigation. Ms. Shull remarked that the HOA should not bear the burden of future buffer costs. She added that the ground cover needs to be installed.

Ms. Shull stated that she does not like the different lot sizes of 60' and 80' in width and explained that the lot widths need to be larger. She continued that the length of the driveways and having options for side entry garages are important for neighborhoods. Ms. Shull concluded that if there is not enough parking, individuals will park on the street and the community will not look good.

Chairman Thomas stated that the traffic engineer for the project does a very good job for traffic studies, but the system is so flawed that it is unreal. He continued that the studies are not reality, totally not reality. Chairman Thomas stated the density is a concern, as well as the traffic with the biggest problem coming out Main Trail to West Granada Boulevard. He stated this will be a nightmare. He stated that when the school is rebuilt and how right now coming out of the Trails where there is no bus pickup for elementary kids so they are either taken by their parents or riding bikes – most will go by car. Chairman Thomas asked the traffic engineer if they did the traffic study at school hours with the elementary school at Main Trail to West Granada Boulevard and commented that he doubted it. Chairman Thomas acknowledged the traffic engineer nodded yes, that the study was done. Chairman Thomas stated that people are not going want to wait the time they are going to have to wait because of

the way that intersection is right now you have going out to Granada. He stated that you have people wanting to turn right and you have people wanting to go straight and people wanting to turn left. He continued if somebody wants to turn left, nobody will be able to go anywhere. Chairman Thomas stated especially when school is coming out after people drop their kids off in the morning and people are still trying to get there and to the little Christian School to the west on Granada Boulevard that also has people stacked up waiting to turn right. Chairman Thomas stated that the traffic nightmare in his opinion is not going to be at Tomoka Oaks and Nova Road, but it is going to be a nightmare because people coming out of Tomoka Oaks now are going down on Rio Pinar and turning on Main Trail or on Iroquois. Chairman Thomas stated that the school will have more kids going to it because the school will be bigger. He reiterated that traffic will be a nightmare. He asked who will pay for needed improvements at the intersection and asked if the developer is going to pay for the intersection improvements.

Chairman Thomas asked the acreage of Tomoka Oaks minus the Tomoka Reserve property. He stated that there are over 500 homes in Tomoka Oaks. Mr. Spraker recalled there was a density analysis provided that showed Tomoka Oaks had a density of 2.09 units per acre. The acreage would be 547 homes divided by 2.09 units per acre.

Chairman Thomas stated that he has a problem with the density that has been discussed several times. He agreed with the applicant that there is a demand for 50 and 60' wide lots, but he did not believe that this demand is in the heart of an existing development of 100' wide lots. Chairman Thomas recalled he was on the Board in 2006 and the development plan at that time saved the golf course, allowed 117 condominiums, and three single-family lots. He stated that the 2006 approval recognized the property as a collection point of water to recharge the aquifer. Chairman Thomas stated that he understands times have changed, costs have risen, and housing types have changed. He stated that he wished the project team could come back with a plan similar to the 2006 plans because everyone got what they wanted.

Chairman Thomas added that 117 units will not work and now he can understand 220 to 230 residential units. Chairman Thomas stated that this is zoned as PRD now and it does not necessarily need to change.

Attorney Hayes asked to summarize a few points before answering the question. He stated this is a legal proceeding and there are rules that do apply and explained the Planning Board-role as a decision maker to weigh the competent and substantial evidence that was described at the July meeting. He stated the role of the Planning Board to weigh the testimony provided and determine which evidence is more credible. Attorney Hayes stated the initial burden is on the applicant to establish the application is consistent with the Comprehensive Plan and the requirements of the Land Development Code. The Planning staff's report is part of the evidence to consider. Attorney Hayes continued that application tonight is for a development within the Planned Residential Development zoning designation. The R-2 zoning district is not applicable tonight and may be a future application, but it is not before the Board tonight.

Attorney Hayes stated he wanted to point out some observations and his comments are not testimony. He continued that his role is to provide legal advice and counsel.

Attorney Hayes stated this is a unique piece of property and Tomoka Oaks was designed around this golf course and provided the following observations:

- Tomoka Oaks had an R-2 zoning designation;
- The R-2 zoning district also applied to the former golf course property for decades. The golf course operated for decades. He stated one may ask why was it not zoned separately. Attorney Hayes stated no additional zoning was in place because of restrictive covenants;
- The restrictive covenants for the former golf course were released by the HOA. The protection went away and the land continued to operate as a golf course;
- There was an application in 2005/2006 to rezone the golf course property from R-2 to PRD. This was reviewed by the Planning Board and approved by the City Commission. The approval allowed 119 multi-family units and three single-family units and certain conditions such as a covenant to restrict the use to a golf course with development;
- The 2006 development order expired with no construction. The 2006 covenant for use as a golf course was never recorded.

Attorney Hayes stated that these demonstrate the unique characteristics of this property. He continued that it is another application for development under the PRD zoning. He stated that there is probably a difference in why it is not separated out in the early years as described and how it is his speculation and it can be taken it for what it is worth. Attorney Hayes explained where the Board was and that the Board has to weigh the competent and substantial evidence and if the application is consistent with the Comprehensive Plan and the requirements of the Land Development Code. The initial burden is on the applicant and it shifts over to the HOA. Attorney Hayes stated that the Board gets to make that final determination.

Attorney Hayes stated that if the Board does not believe the application meets the criteria then the motion should be for denial. If it is believed to meet the criteria, then the motion should be for approval, and if it falls somewhere in between, a creative motion can be made, including a denial, and provide conditions. Attorney Hayes concluded that the Board has discretion, because as stated by the applicant, this a negotiated development order.

Chairman Thomas asked if there is a legal requirement if this application does not go through, does the city have to re-zone the property. Attorney Hayes stated that there is no rezoning application before the board. He continued if the Planning Board and the City Commission deny the current application, the question becomes what options does the applicant have. Attorney Hayes stated the applicant can present another PRD site plan under the PRD zoning or they can file an application to rezone the property to R-2. Attorney Hayes stated the rezoning to the R-2 is not before the board tonight.

Chairman Thomas stated he wished the applicant presented something like 2006 with some higher housing numbers. He stated at this point that he has major problems with the application.

Mr. Galloway asked Mr. Railsback what number he calculated if all were 100' wide lots. Mr. Railsback responded 240 lots. Mr. Railsback replied that it could be a little more or less based on the geometry of the property.

Mr. Galloway inquired about his interest of entertaining a motion of accepting the proposal with comments from staff for 240 homes. He stated that would give the applicant a message of where we stand and he always states that he would like to see the lot range between 220 and 240 lots. Attorney Hayes replied that the motion would require new data. Attorney Hayes commented that from what he was understanding the concern is the density. Attorney Hayes continued that a recommendation can be made for denial with details of the reasons for the denial motion so that there is a good factual basis for the recommendation. Attorney Hayes stated the detailed reasons or conditions would allow the applicant to make a decision of how they will move forward or pursue an application to R-2.

Mr. Galloway withdrew his motion.

Chairman Thomas stated his desired range was 220-225 lots. He discussed other lot range potentials and stated he would set the lot range low. He remarked that the City Commission would have some idea of what the Planning Board thought was appropriate and added at 250 lots, it is only a reduction of 22 lots.

Mr. Galloway stated he was putting a lot number out there to let the applicant know the current plan is too many lots. He commented that the City Commission will make the final determination. Chairman Thomas stated it would be in the minutes that they were looking at 220 units. Mr. Jorczak commented that if there is a denial tonight, the number is out there. Mr. Jorczak stated if the applicant wants to go to the City Commission, they can adjust the number to some extent.

Attorney Hayes stated that the Board can approve a motion with reasonable conditions. He added that the question then becomes what is reasonable based on the testimony and evidence presented. Attorney Hayes continued that it appears to that the Board does not like the density and desires something less. He stated that his recommendation is to make a motion to deny and state the reasons into the record this way the applicant has items to consider as they move forward and consider what the Board has stated.

Mr. Railsback stated that what the City Attorney and the applicant are asking the Board to do is to tell the reasons why the Board is denying the application. He provided an example that the Board denies the project because it is more than 230 units, the lack of a rotary circle, and the lots were not a minimum of 100' in width. Mr. Railsback commented that with the recommendations, the applicant could consider the revisions for the City Commission hearing.

Ms. Shull stated that she did not know that every little detail, the sprinkler system, the things that the Planning Department has said, could be put into a motion and expressed that those are the things that the Board would like taken care of. She added that that there was a lot in there that they do not know if it has been taken care of yet because the Planning Department has not had an opportunity to go over it. She continued that they have not had the opportunity to run the numbers to see how many 100' lots could go in there. Ms. Shull concluded that for them to sit there on a calculator and figure that it is around 220 is not a good way to put into a motion.

Chairman Thomas stated that this is true and he could go for no irrigation if the developer would pass the two years and maybe go to 5 or 7+ years that they would guarantee that those would last.

Ms. Shull stated that the motion is going to be three pages long. She stated that the City Commission will know what was discussed, read the notes, and know the points

of concern. Ms. Shull suggested a motion to deny and to please read the Planning Board minutes.

Chairman Thomas stated he believed that each City Commissioner or Mayor that appointed will be calling and seeking information from board members and that is totally legal. He stated that he knows that his commissioner talks to him about a lot of decisions made by the Planning Board.

Attorney Hayes reiterated what he heard and expressed that if he is wrong, for the Board to correct him. What the Board does not like as a basis for denial is:

- Density – believe that it is too much. There was talk about fuzzy numbers that the Board may be comfortable with under an appropriate plan;
- Traffic analysis is flawed based on evidence and testimony that you have heard and in the Boards own experiences;
- The traffic triangle should be a traffic circle; and
- The buffer and whether it should be a natural buffer or some other form of buffer and whether that buffer should have irrigation of some form.

Attorney Hayes asked if there were any other items.

Chairman Thomas stated a concern is the Main Trail and West Granada Boulevard intersection. He continued that is going to be a major problem. Attorney Hayes replied that would all be supported by the minutes and the record.

Attorney Hayes stated that if a motion is made with those parameters based on the evidence in the record that the application could be moved on up to the next level which would be the City Commission. He stated that the City Commission would take all the information under advisement, as they always do, and they will make their own determination after a legal proceeding just as this.

Mr. Railsback asked if the variety of elevations was included. Attorney Hayes stated that it was not, but that it could be included but not necessarily limited, because there are so many things. He reiterated that the Board's recommendation is advisory to the City Commission.

Chairman Thomas asked the Planning Director when the meeting minutes are written up and with the recommendation of the Board, if a synopsis could be included of the reasons that the vote was to deny it so that it would be in print that goes to the Mayor and City Commissioners.

Mr. Spraker explained that the way the minutes are done is more verbatim than a summary so that the entire scope of what is being said is reflected. He continued that staff always does a summary, usually brief, that hits the highlights. He concluded that yes, the minutes can reflect exactly what was said.

Mr. Scudiero stated that he would like to make a motion and if there is a second they can each give their articulated reasons both for the record and for the applicant's benefit.

Board Motion and Discussion

Mr. Scudiero motioned to deny PRD 2022-043, Tomoka Reserve – Issuance of a Development Order. Ms. Shull seconded it.

Chairman Thomas announced that the Board was going into discussion.

Mr. Scudiero stated his summary of concerns:

- Density;
- The plan that the applicant has come up with the buffers;
- An improved traffic rotary at the entrance;
- Instead of the 60, 80, 90 and maybe 100' wide lots, they want them all to be 100' in lot width, just like the rest of the neighborhood.

Mr. Railsback added the desire for a variety of house building elevations, including colors and roofing materials. He stated at least the minimum in the application and if a greater separation was given, his thought was that was another carrot for the City Commission.

Ms. Shull stated her issues are:

- The buffer, a desire to see a type 6 buffer;
- Would like to see the irrigation system to go in;
- Traffic signal to go in;
- Not sure about the diamond and roundabout. She noted that traffic study with the fire truck trying to get around that thing and it bothered her;
- Lot sizes are too much. The 60' wide lots are too crammed into that little space and it does not conform to the rest of the neighborhood that is already there;
- The gated community was a positive; and
- The main thing is the density because of the traffic.

Mr. du Moulin stated that he is concerned with the proposed lot sizes and the rotary.

Mr. Jorczak stated the elephant in the room for him has always been the density and he thought that it had been addressed. He added that he would like to see something less for the lots than what Mr. Railsback calculated in terms of how that is going to fit within the existing community. Mr. Jorczak discussed the architectural styles that the Board talked about and expressed that it would be nice if there was something better defined as to what the flexibility would be. He stated that he supported a no vote and concurs with what the city staff has recommended with respect to irrigation. Mr. Jorczak commented that he would recommend beyond what they had indicated in terms of just the perimeter lots being 100' in frontage. He continued that he believed that there is far less density of homes. He stated what the developer wants to do with respect to reducing that and seeing whether he has an economic model, is something that they will have to work with. Mr. Jorczak concluded that the way it is proposed today, he would vote for denial.

Mr. Galloway stated that he has a problem making them all 100' in width because of the lot radiuses with no way to get 100' wide lots on a curve. He added that he is okay with 100' wide on the back side of the lots. Mr. Galloway stated that he believed that there needed to be a flexibility of 80' and 100' wide lots. He concluded that you cannot get a 100' wide lot in a circle.

Mr. Jorczak stated that you can go above 100' in lot width and that he believed that the fewer number of homes would be better.

Mr. Galloway stated that he thought that it could be done with a combination of 80 and 100' wide lots. He stated that he would hate to tie-string them with 100' wide lots.

Chairman Thomas asked if Mr. Galloway was going to put a ratio on that, and said that what he looked at was that there was ten 100' wide lots and a few 80' wide lots. Mr. Galloway stated that he did not believe that a ratio was needed and that they should let the engineers analyze that. He stated that you can say that there should be more 100' wide lots, but you cannot tie somebody down to put all 100' wide lots in.

Mr. Railsback suggested making the lot deeper with a minimum of 10,000 square feet (80' X 125'). He stated that if you have to squeeze an 80' wide frontage lot, then it needs to be deeper. Mr. Galloway concurred and commented that the Board was doing the schematics and are not engineers. Chairman Thomas stated what we are is neighbors. Mr. Galloway concluded that in this type of property you cannot make all 100' wide lots.

Attorney Hayes sought to refocus the Board. He stated that there is a motion and second for denial. He continued that most of the comments are consistent and some are a little different. Attorney Hayes explained to the Board that you can incorporate the comments as part of the motion and second for supporting purposes of the motion to deny. He stated that these comments are not going to tie anything down specifically. Attorney Hayes restated that the Board's action is a recommendation. He stated if the maker of the motion and the seconder is okay incorporating those comments as a supporting basis for the motion to deny, all of that information would go up to the City Commission.

Chairman Thomas asked for a point of clarification if any member of the Board can call any City Commissioner or Mayor. Attorney Hayes confirmed that there is no Sunshine Law requirement for a member of the Planning Board communicating with a member of the City Commission. Attorney Hayes stated that Planning Board members cannot talk with each other.

Mr. Railsback stated for the minutes that he would like to see longer driveways as parking in the street is going to be an afterthought and that he would be remiss if he did not bring it up. He continued that he is okay with deeper lots and believes that two or three spots are needed plus the garage, not one car hanging into the road.

Attorney Hayes stated that he saw the maker of the motion and the seconder nod their heads to incorporate the item as a supporting basis for the motion.

Chairman Thomas asked if Attorney Hayes had his concerns on the list. Attorney Hayes responded that he did.

Chairman Thomas stated that there is a motion and a second. He stated that the Board has had discussion and asked the recording technician to call the vote. Mr. Galloway asked the motion be repeated. Chairman Thomas stated the motion was to deny the application. Attorney Hayes confirmed that the supporting basis in the Board comments are incorporated. Chairman Thomas asked the recording technician to call the vote.

Vote was called:

Mr. du Moulin: Yes, to deny.
Mr. Scudiero: Yes.
Mr. Railsback: Yes.

Mr. Galloway: Yes.
Mr. Jorczak: Yes.
Ms. Shull: Yes.
Chairman Thomas: Yes.

The motion for denial was approved (7-0).

Chairman Thomas stated that when the Planning Board first started at the first meeting, he told them that this is one of the top five decisions that he had ever been involved in at the Planning Board. He stated that it can now be moved up to the number two slot. Chairman Thomas stated that the only one that proceeded it was voting to tear down the Ormond Hotel to which he regrets to this day.

Chairman Thomas thanked the audience for their patience and courtesy. He stated that these have been the biggest meetings they have had and that they are probably one of the nicest, most respectful groups ever. He stated there has been no hollering or hooting and that he thanked the audience for that because they made the Board's job easier.

VII. OTHER BUSINESS

No other business was discussed.

VIII. MEMBER COMMENTS

No member comments.

IX. ADJOURNMENT

The meeting was adjourned at 9:42 p.m.

Respectfully submitted,

Steven Spraker, Planning Director

ATTEST:

Doug Thomas, Chair

Minutes transcribed by Marcella Miller.

Past Minutes

Section D

November 7, 2023, City Commission

Present: Mayor Bill Partington, Commissioners Lori Tolland, Travis Sargent, Susan Persis and Harold Briley, City Attorney Randy Hayes, Assistant City Manager Claire Whitley and Assistant City Clerk Taylor Lochert.

A G E N D A

1. CALL TO ORDER

2. INVOCATION

3. PLEDGE OF ALLEGIANCE

4. PRESENTATIONS AND PROCLAMATIONS

A. Hometown Heroes

B. National Native American Heritage Month

5. AUDIENCE REMARKS - REGARDING ITEMS NOT ON THE AGENDA

6. APPROVAL OF MINUTES

A. Minutes from City Commission meeting - October 17, 2023

7. COMMUNITY REDEVELOPMENT AGENCY

A. **RESOLUTION NO. 2023-195**: A RESOLUTION OF THE CITY COMMISSION, ALSO ACTING AS THE COMMUNITY REDEVELOPMENT AGENCY, OF THE CITY OF ORMOND BEACH, FLORIDA APPROVING AND AUTHORIZING THE EXECUTION OF AN AMENDMENT TO AGREEMENT FOR STREETSCAPE AND BANDING REPAIR WITH P&S PAVING, INC. REGARDING THE GRANADA BLVD. STREETSCAPE BANDING REPAIR PROJECT, UNDER BID NO. 2022-19; AUTHORIZING PAYMENT THEREFOR; AND SETTING FORTH AN EFFECTIVE DATE. **(SEE ITEM 8A)**

Staff Contact: *Shawn Finley, Public Works Director, (386) 676-3292*

8. CONSENT AGENDA

The action proposed is stated for each item on the Consent Agenda. Unless a City Commissioner removes an item from the Consent Agenda, no discussion on individual items will occur and a single motion will approve all items.

A. **RESOLUTION NO. 2023-195**: A RESOLUTION OF THE CITY COMMISSION, ALSO ACTING AS THE COMMUNITY REDEVELOPMENT AGENCY, OF THE CITY OF ORMOND BEACH, FLORIDA APPROVING AND AUTHORIZING THE EXECUTION OF AN AMENDMENT TO AGREEMENT FOR STREETSCAPE AND BANDING REPAIR WITH P&S PAVING, INC. REGARDING THE GRANADA BLVD. STREETSCAPE BANDING REPAIR PROJECT, UNDER BID NO. 2022-19; AUTHORIZING PAYMENT THEREFOR; AND SETTING FORTH AN EFFECTIVE DATE.

Staff Contact: *Shawn Finley, Public Works Director, (386) 676-3292*

B. **RESOLUTION NO. 2023-196**: A RESOLUTION AUTHORIZING A

TO THE ATLANTIC OCEAN ON SATURDAY, NOVEMBER 18, 2023 FROM 8:00 A.M. TO 2:00 P.M.; AND SETTING FORTH AN EFFECTIVE DATE.

Staff Contact: *Steven Spraker, Planning Director, (386) 676-3341*

C. **RESOLUTION NO. 2023-197**: A RESOLUTION AUTHORIZING THE ACCEPTANCE OF A GRANT AWARD FROM THE STATE OF FLORIDA, OFFICE OF THE ATTORNEY GENERAL REGARDING FUNDING FOR THE CITY'S VICTIM'S ADVOCATE PROGRAM; AUTHORIZING THE EXECUTION OF ALL DOCUMENTS INCIDENTAL THERETO, INCLUDING ANY CONTRACT NECESSARY FOR THE CITY TO ACCEPT THE GRANT AWARD; AND SETTING FORTH AN EFFECTIVE DATE.

Staff Contact: *Loretta Moisio, Grants Coordinator, (386) 676-3315*

D. **RESOLUTION NO. 2023-198**: A RESOLUTION ACCEPTING THE QUOTE FROM OWENS ACCREDITATION SERVICES, LLC REGARDING ACCREDITATION SERVICES FOR THE POLICE DEPARTMENT; AUTHORIZING THE EXECUTION OF AN AGREEMENT AND PAYMENT THEREFOR; AND SETTING FORTH AN EFFECTIVE DATE.

Staff Contact: *Jesse Godfrey, Police Chief, (386) 676-3500*

E. **RESOLUTION NO. 2023-199**: A RESOLUTION AUTHORIZING THE SOLE SOURCE PROCUREMENT OF PARTS AND SERVICE FROM PARKSON CORPORATION FOR THE CITY'S AQUA GUARD SELFCLEANING BAR/FILTER SCREEN AT THE WATER RECLAMATION FACILITY; AUTHORIZING THE EXECUTION OF A CONTRACT; AND SETTING FORTH AN EFFECTIVE DATE.

Staff Contact: *Bob Preis, Utilities Manager, (386) 676-3305*

F. **RESOLUTION NO. 2023-200**: A RESOLUTION AUTHORIZING A WORK AUTHORIZATION AND ADDITIONAL FUNDING TO ANDRITZ SEPARATION, INC. FOR THE REPAIR OF THE CENTRIFUGE UNIT AT THE WATER TREATMENT PLANT; AND SETTING FORTH AN EFFECTIVE DATE.

Staff Contact: *Bob Preis, Utilities Manager, (386) 676-3305*

G. **RESOLUTION NO. 2023-201**: A RESOLUTION AUTHORIZING THE SUBMITTAL OF A GRANT APPLICATION TO THE COUNTY OF VOLUSIA UNDER THE ECHO GRANTS-IN-AID PROGRAM FOR FUNDING ASSISTANCE REGARDING THE INSTALLATION OF LED LIGHTING AT THE ORMOND BEACH SPORTS COMPLEX FOR THE SOFTBALL QUAD; AUTHORIZING THE EXECUTION OF ALL DOCUMENTS INCIDENTAL THERETO, INCLUDING ANY CONTRACT NECESSARY FOR THE CITY TO ACCEPT THE GRANT AWARD; AND SETTING FORTH AN EFFECTIVE DATE.

Staff Contact: *Loretta Moisio, Grants Coordinator, (386) 676-3315*

H. **RESOLUTION NO. 2023-202**: A RESOLUTION AUTHORIZING THE SUBMITTAL OF A GRANT APPLICATION TO THE COUNTY OF VOLUSIA UNDER THE ECHO GRANTS-IN-AID PROGRAM FOR FUNDING ASSISTANCE REGARDING THE RENOVATION OF BASEBALL FIELDS 2-5 AT THE NOVA COMMUNITY PARK; AUTHORIZING THE EXECUTION OF ALL DOCUMENTS INCIDENTAL THERETO, INCLUDING ANY CONTRACT

I. **FEMA Flood Mitigation Assistance Program Grant Application**

Staff Contact: *Steven Spraker, Planning Director, (386) 676-3341*

Disposition: Approve as recommended in the City Manager staff report dated November 7, 2023.

J. **Auto Renewal - Golden Eagle (at Andy Romano Beachfront Park)**

Staff Contact: *Robert Carolin, Leisure Services Director, (386) 676-3279*

Disposition: Approve as recommended in the City Manager staff report dated November 7, 2023.

9. PUBLIC HEARINGS

A. **ORDINANCE NO. 2023-51:** AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF ORMOND BEACH, FLORIDA, VACATING A PORTION OF BENTON STREET, A PLATTED PUBLIC RIGHT-OF-WAY SOUTH OF PENNSYLVANIA AVENUE, LOCATED BETWEEN VOLUSIA COUNTY PARCEL IDENTIFICATION NUMBERS: 3136-01-08-0010, 3136-01-07-0010, AND 3136-01-01-0021, AND ALONG VOLUSIA COUNTY PARCEL IDENTIFICATION NUMBERS: 3136-01-01-0021 AND 3136-01-21-0050; REPEALING ALL INCONSISTENT ORDINANCES OR PARTS THEREOF; PROVIDING FOR RECORDATION AND TRANSMITTAL; AND SETTING FORTH AN EFFECTIVE DATE. **(SECOND READING)**

Staff Contact: *Steven Spraker, Planning Director, (386) 676-3341*

B. **ORDINANCE NO. 2023-52:** AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF ORMOND BEACH, FLORIDA, VACATING A PORTION OF HAMMOND STREET, A PLATTED PUBLIC RIGHT-OF-WAY SOUTH OF PENNSYLVANIA AVENUE AND NORTH OF PLANTATION OAKS BOULEVARD, LOCATED BETWEEN VOLUSIA COUNTY PARCEL IDENTIFICATION NUMBERS: 3125-08-00-0014, 3136-01-07-0010 AND 3136-01-01-0021; REPEALING ALL INCONSISTENT ORDINANCES OR PARTS THEREOF; PROVIDING FOR RECORDATION AND TRANSMITTAL; AND SETTING FORTH AN EFFECTIVE DATE. **(SECOND READING)**

Staff Contact: *Steven Spraker, Planning Director, (386) 676-3341*

C. **ORDINANCE NO. 2023-53:** AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF ORMOND BEACH, FLORIDA, VACATING A PORTION OF ROSEMARY STREET, A PLATTED PUBLIC RIGHT-OF-WAY SOUTH OF PENNSYLVANIA AVENUE, LOCATED BETWEEN VOLUSIA COUNTY PARCEL IDENTIFICATION NUMBERS: 3136-01-09-0001 AND 3136-01-08-0010; REPEALING ALL INCONSISTENT ORDINANCES OR PARTS THEREOF; PROVIDING FOR RECORDATION AND TRANSMITTAL; AND SETTING FORTH AN EFFECTIVE DATE. **(SECOND READING)**

Staff Contact: *Steven Spraker, Planning Director, (386) 676-3341*

RESERVE SUBDIVISION; AUTHORIZING THE DEVELOPMENT OF 272 LOTS ON 147.94+ ACRES TO BE LOCATED AT 20 TOMOKA OAKS BOULEVARD; ESTABLISHING CONDITIONS AND EXPIRATION OF APPROVAL; AND SETTING FORTH AN EFFECTIVE DATE.

10. SECOND READING OF ORDINANCES

A. **ORDINANCE NO. 2023-54:** AN ORDINANCE AMENDING THE ANNUAL BUDGET FOR FISCAL YEAR 2022-2023 BY AMENDING THE GENERAL FUND (001); DOWNTOWN REDEVELOPMENT TRUST FUND (104); STORMWATER UTILITY FUND (107); AIRPORT FUND (108); LOCAL LAW ENFORCEMENT TRUST FUND (109); PENSION CONTRIBUTION PASS THROUGH FUND (113); RECREATION FACILITY FEE FUND (115); GRANTS FUND (116); 2010 BEACHFRONT PARK BOND FUND (220); CAPITAL IMPROVEMENTS FUND (301); EQUIPMENT RENEWAL & REPLACEMENT FUND (302); PUBLIC SAFETY VEHICLE & EQUIPMENT FUND (305); TRANSPORTATION IMPROVEMENTS FUND (308); FACILITIES RENEWAL & REPLACEMENT FUND (317); WATER AND WASTEWATER FUND (401); RENEWAL & REPLACEMENT FUND (409); SOLID WASTE FUND (460); AND THE GENERAL LIABILITY FUND (504); AND SETTING FORTH AN EFFECTIVE DATE. **(SECOND READING)**

Staff Contact: *Kelly McGuire, Finance Director, (386) 676-3226*

11. REPORTS, SUGGESTIONS, REQUESTS

12. ADJOURNMENT

MINUTES

Item #1 – Meeting Call to Order

Mayor Partington called the meeting to order at 6:10 p.m.

Item #2 – Invocation

Chaplain Sam Mercado, Advent Health, provided the invocation.

Item #3 – Pledge of Allegiance

Mayor Partington led the Pledge of Allegiance.

Item #4 – Presentations and Proclamations

Item #4A – Hometown Heroes

Mayor Partington presented a proclamation to Deputy Fire Chief Nate Quartier and Police Captain Chris Roos in honor of the Hometown Heroes Military Appreciation Banner program and proclaimed November 2023 as a time to celebrate the Hometown Heroes.

Item #5 – Audience Remarks

Ms. Melissa Horan, 1010 Seashell Court, discussed her experience with public safety concerns in small towns and encouraged the City Commission to mitigate potential risks.

Ms. Rebecca Mangali, unincorporated Volusia County, discussed misconceptions regarding the Belvedere Fuel Terminals and fuel prices.

Mr. Kason McFarren, unincorporated Volusia County, thanked the Commission for their work regarding the Belvedere Fuel Farm.

Ms. Connie Colby, 108 Roble Lane, requested the agenda items have more details on the agenda to help with transparency and discussed the potential relocation of the police station.

Volusia County Council Member Troy Kent, 130 Magnolia Drive, thanked the Commission and staff for their support of the dog friendly beach in Volusia County.

Commissioner Briley thanked Council Member Kent for his work on the dog friendly beach.

Item #6 – Approval of Minutes

Mayor Partington advised the minutes of the October 17, 2023, meeting had been sent to the Commission for review and were posted on the city's website for public viewing. He asked for any corrections, additions, or omissions. He stated hearing no corrections, the minutes would stand approved as presented.

Commissioner Sargent moved, seconded by Commissioner Briley, for approval of the October 17, 2023, City Commission meetings minutes.

The motion passed by voice vote.

Item #7 – Community Redevelopment Agency

Mayor Partington advised the following items were Community Redevelopment items. He explained the City Commission served as the Community Redevelopment Agency (CRA) of the city and must review the item and make a recommendation as the CRA.

Mayor Partington recessed the City Commission meeting, called the CRA meeting to order, and opened the public hearings at 6:31 p.m.

Item #7A – Granada Boulevard Streetscape Sidewalk Banding Repair Contract Modification

Assistant City Clerk Taylor Lochert read by title only:

RESOLUTION NO. 2023-195

A RESOLUTION OF THE CITY COMMISSION, ALSO ACTING AS THE COMMUNITY REDEVELOPMENT AGENCY, OF THE CITY OF ORMOND BEACH, FLORIDA APPROVING AND AUTHORIZING THE EXECUTION OF AN AMENDMENT TO AGREEMENT FOR STREETSCAPE AND BANDING REPAIR WITH P&S PAVING, INC. REGARDING THE GRANADA BLVD. STREETSCAPE BANDING REPAIR PROJECT, UNDER BID NO. 2022-19; AUTHORIZING PAYMENT THEREFOR; AND SETTING FORTH AN EFFECTIVE DATE. **(SEE ITEM 8A)**

Commissioner Persis moved, seconded by Commissioner Sargent, for recommendation of Resolution No. 2023-195, as read by title only.

The motion passed by voice vote.

Mayor Partington closed the public hearing, adjourned the CRA meeting, and reconvened the City Commission meeting at 6:32 p.m.

Item #8 – Consent Agenda

Mayor Partington advised the actions proposed for the items on the Consent Agenda

Call Vote:	Commissioner Tolland	Yes
	Commissioner Sargent	Yes
	Commissioner Persis	Yes
	Commissioner Briley	Yes
Carried.	Mayor Partington	Yes

Comments on the Consent Agenda

Commissioner Sargent expressed his support of Items 8G and 8H regarding Volusia County ECHO grants for the Sports Complex Softball Quad LED lighting and Nova Community Park Fields restoration.

Item #9 – Public Hearings

Mayor Partington opened the Public Hearings.

Item #9A – Partial Right-of-Way Vacation, Benton Street

Assistant City Clerk Taylor Lochert read by title only:

ORDINANCE NO. 2023-51

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF ORMOND BEACH, FLORIDA, VACATING A PORTION OF BENTON STREET, A PLATTED PUBLIC RIGHT-OF-WAY SOUTH OF PENNSYLVANIA AVENUE, LOCATED BETWEEN VOLUSIA COUNTY PARCEL IDENTIFICATION NUMBERS: 3136-01-08-0010, 3136-01-07-0010, AND 3136-01-01-0021, AND ALONG VOLUSIA COUNTY PARCEL IDENTIFICATION NUMBERS: 3136-01-01-0021 AND 3136-01-21-0050; REPEALING ALL INCONSISTENT ORDINANCES OR PARTS THEREOF; PROVIDING FOR RECORDATION AND TRANSMITTAL; AND SETTING FORTH AN EFFECTIVE DATE. **(SECOND READING)**

Commissioner Briley moved, seconded by Commissioner Tolland, for approval of Ordinance No. 2023-51, on second reading, as read by title only.

Call Vote:	Commissioner Sargent	Yes
	Commissioner Persis	Yes
	Commissioner Briley	Yes
	Commissioner Tolland	Yes
Carried.	Mayor Partington	Yes

Item #9B – Partial Right-of-Way Vacation, Hammond Street

Assistant City Clerk Taylor Lochert read by title only:

ORDINANCE NO. 2023-52

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF ORMOND BEACH, FLORIDA, VACATING A PORTION OF HAMMOND STREET, A PLATTED PUBLIC RIGHT-OF-WAY SOUTH OF PENNSYLVANIA AVENUE AND NORTH OF PLANTATION OAKS BOULEVARD, LOCATED BETWEEN VOLUSIA COUNTY PARCEL IDENTIFICATION NUMBERS: 3125-08-00-0014, 3136-01-07-0010 AND 3136-01-01-0021; REPEALING ALL INCONSISTENT ORDINANCES OR PARTS THEREOF; PROVIDING FOR RECORDATION AND TRANSMITTAL; AND SETTING FORTH AN EFFECTIVE DATE. **(SECOND READING)**

Commissioner Sargent moved, seconded by Commissioner Briley, for approval of Ordinance No. 2023-52, on second reading, as read by title only.

Call Vote:	Commissioner Persis	Yes

Assistant City Clerk Taylor Lochert read by title only:

ORDINANCE NO. 2023-53

AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF ORMOND BEACH, FLORIDA, VACATING A PORTION OF ROSEMARY STREET, A PLATTED PUBLIC RIGHT-OF-WAY SOUTH OF PENNSYLVANIA AVENUE, LOCATED BETWEEN VOLUSIA COUNTY PARCEL IDENTIFICATION NUMBERS: 3136-01-09-0001 AND 3136-01-08-0010; REPEALING ALL INCONSISTENT ORDINANCES OR PARTS THEREOF; PROVIDING FOR RECORDATION AND TRANSMITTAL; AND SETTING FORTH AN EFFECTIVE DATE. **(SECOND READING)**

Commissioner Sargent moved, seconded by Commissioner Briley, for approval of Ordinance No. 2023-53, on second reading, as read by title only.

Call Vote:	Commissioner Briley	Yes
	Commissioner Tolland	Yes
	Commissioner Sargent	Yes
	Commissioner Persis	Yes
Carried.	Mayor Partington	Yes

Mayor Partington recessed the Public Hearing at 6:37 p.m.

Item #10 – Public Hearings

Item #10A – FY 2022-23 Budget Amendments

Assistant City Clerk Taylor Lochert read by title only:

ORDINANCE NO. 2023-54

AN ORDINANCE AMENDING THE ANNUAL BUDGET FOR FISCAL YEAR 2022-2023 BY AMENDING THE GENERAL FUND (001); DOWNTOWN REDEVELOPMENT TRUST FUND (104); STORMWATER UTILITY FUND (107); AIRPORT FUND (108); LOCAL LAW ENFORCEMENT TRUST FUND (109); PENSION CONTRIBUTION PASS THROUGH FUND (113); RECREATION FACILITY FEE FUND (115); GRANTS FUND (116); 2010 BEACHFRONT PARK BOND FUND (220); CAPITAL IMPROVEMENTS FUND (301); EQUIPMENT RENEWAL & REPLACEMENT FUND (302); PUBLIC SAFETY VEHICLE & EQUIPMENT FUND (305); TRANSPORTATION IMPROVEMENTS FUND (308); FACILITIES RENEWAL & REPLACEMENT FUND (317); WATER AND WASTEWATER FUND (401); RENEWAL & REPLACEMENT FUND (409); SOLID WASTE FUND (460); AND THE GENERAL LIABILITY FUND (504); AND SETTING FORTH AN EFFECTIVE DATE. **(SECOND READING)**

Commissioner Sargent moved, seconded by Commissioner Persis, for approval of Ordinance No. 2023-54, on second reading, as read by title only.

Call Vote:	Commissioner Tolland	Yes
	Commissioner Sargent	Yes
	Commissioner Persis	Yes
	Commissioner Briley	Yes
Carried.	Mayor Partington	Yes

Mayor Partington reconvened the Public Hearings at 6:39 p.m.

Item #9D – Tomoka Reserve, Issuance of a Development Order

Assistant City Clerk Taylor Lochert read by title only:

ORDINANCE NO. 2023-55

DATE.

Mr. Randy Hayes, City Attorney, provided background on the item and noted the item was for an application for a development under a Planned Residential Development (PRD) zoning district. He explained it was a quasi-judicial proceeding, and noted the Commission should review the application against the Land Development Code and Comprehensive Plan, while keeping in mind the relevant evidence. He recommended any witnesses who wished to testify take an Oath. He requested the Commission consider accepting two stipulations including the professionals who would testify on behalf of the parties were qualified to do so and to allow the Tomoka Oaks Home Owners Association (HOA) to participate in the proceeding as a party-intervenor. He reviewed the order of business including time allotment for all involved parties to speak and voting conflicts.

Commissioner Briley moved, seconded by Commissioner Sargent, for approval of the two stipulations presented by Mr. Hayes.

Call Vote:	Commissioner Sargent	Yes
	Commissioner Persis	Yes
	Commissioner Briley	Yes
	Commissioner Tolland	Yes
Carried.	Mayor Partington	Yes

Commissioner Persis moved, seconded by Commissioner Tolland, to swear in all witnesses who wished to testify.

Call Vote:	Commissioner Persis	Yes
	Commissioner Briley	Yes
	Commissioner Tolland	Yes
	Commissioner Sargent	Yes
Carried.	Mayor Partington	Yes

Mayor Partington requested Court Reporter Shilah Blakeney provide the Oath to all who wished to testify.

Ms. Blakeney provided the Oath.

Mr. Spraker reviewed the existing land use, the application process, the process of the development and at what future stages it would go back before the Commission. He discussed the characteristics of the property and proposed designs of the development. He noted the concerns of the residents and the Planning Board's recommendation of denial.

Mr. Rob Merrell, Cobb Cole Law Firm, discussed the Growth Management Act and how it relates to the project and the city's Comprehensive Plan. He discussed the meetings held by the developer and the input provided. He reviewed the developer's team expert qualifications and their reports provided. He discussed the two outstanding items from staff's recommendation including the proposed buffer. He stated there was a pending application for the R-2 zoning to match the Tomoka Oaks subdivision zoning, noting it was not preferred by the developer.

Mr. Dennis Bayer, party-intervenor, expressed appreciation to the developer for working with the residents of the community. He adamantly disagreed with the application of the R-2 application. He discussed the uniqueness of the property and the expectations of the homeowners in the Tomoka Oaks subdivision. He noted the requests the HOA made to the developer, traffic issues, Planning Board recommendation, property entitlements, zoning and potential zoning.

Mr. Tom Harowski, party-intervenor, provided his background and summarized the issues the residents had with the proposed development including compatibility, density, design standards, lot sizing, traffic, and sidewalks.

Ms. Carolyn Davis, 46 Oakmont Circle, thanked Mr. Spraker for his professionalism and

Riverbend Golf Course.

Ms. Denise White, 9 Fox Run Trail, voiced concerns regarding health, safety, welfare, quality of life of the surrounding residents, and traffic.

Mr. Dale Ryals, 20 Eagle Court, explained her concerns regarding lack of hospital infrastructure, density of proposed project, cohesive look, and water use.

Ms. Ashley DuFrene, 118 North Saint Andrews Drive, expressed opposition of the proposed project and voiced concerns regarding density and the R-2 application. She referred to articles within the Land Development Code and provided a photo of her unobstructed view.

Ms. Angie Shull, 110 Deer Lake Circle, discussed her background with the city and expressed concerns regarding density and traffic.

Mr. Dick Reed, 16 Stone Quarry Trail, encouraged the Commission to buy the property and make the land a public golf course.

Mr. Jim Cameron, 39 Laurel Oaks Circle, expressed support of the proposed development.

Ms. Kristin Deaton, 80 Shadowcreek Way, encouraged the Commission to listen to the residents and the Planning Board's recommendation.

Mayor Partington recessed the City Commission meeting at 8:00 p.m.

Mayor Partington reconvened the City Commission meeting at 8:10 p.m.

Mr. Jim Rose, 21 Eagle Court, stated he was the chairman of the Golf Course Committee of the Tomoka Oaks HOA, and provided his background with the project. He requested the Commission deny the developers request.

Mr. Jeff Boyle, 614 North Halifax Drive, discussed the Planning Board's recommendation. He expressed concerns regarding traffic, protected covenants and requested the Commission deny the request.

Ms. Darla Widnall, 7 Shawnee Trail, voiced concerns regarding an emergency evacuation plan and traffic. She provided a handout to the Commission.

Mr. Tyler Brown, 90 North Saint Andrews Drive explained his concerns regarding the density calculations, lot sizes, and conservation space.

Mr. Paul Hughes, 4 Lauren Court, voiced concerns regarding an evacuation route, infrastructure, traffic, and the proposed project being a gated community.

Mr. Paul Maybeck, 15 Pine Valley Circle, summarized an email he sent that was provided to the Commission which included concerns on sidewalks, traffic and removal of trees.

Mr. Rick Rickards, 1 Tomoka Oaks Boulevard, stated he was opposed to the development noting concerns of broken promises.

Mr. Tom Fitzgibbon, 51 South Saint Andrews Drive, expressed concerns regarding property values and traffic.

Ms. Denise Corley, 51 South Saint Andrews Drive, voiced concerns regarding the nature, environment, and quality of life. She encouraged the Commission to vote no on the project.

Ms. Michelle Zirkelbach, 328 River Bluff Drive, stated she provided a handout to the Commission and reviewed concerns regarding density calculations and compatibility.

property values.

Ms. Jessica Vitale, 7 Eagle Drive, indicated concerns regarding project location, density, traffic, construction noise, greenspace, natural buffers, and potential title restrictions.

Ms. Barbara Doliner, 108 South Saint Andrews Drive, expressed concerns regarding the developer and the project.

Ms. Missy Herrero, 111 North Saint Andrews Drive, voiced concerns regarding the density calculations, traffic study, lot sizes, lack of compatibility, and lack of hospital infrastructure.

Mr. Tyler Travis, 888 Willow Run, expressed support of the development.

Mr. Bayer reviewed the Planning Board recommendation, noting concerns of traffic and density.

Mr. Merrell stated he had a team available for any questions. He reviewed potential options if the project was denied.

Commissioner Briley thanked the residents and Mr. Spraker for their work on the project. He questioned if the golf course was originally part of Tomoka Oaks, if the proposed development would be in Tomoka Oaks as its own development and inquired if the development would be considered a re-plat of the existing subdivision; whereby, Mr. Spraker explained the golf course was platted as its own separate parcel and not part of the Tomoka Oaks subdivision. Commissioner Briley expressed concerns regarding the subdivision's ingress and egress; whereby, Mr. Spraker stated there would need to be multiple access points and noted the proposed plan did have an emergency access identified. Commissioner Briley discussed the access points and inquired if The Trails subdivision could be gated; whereby, Mr. Spraker stated that would need to go through the site plan process, amendments to the plats, and homeowners' agreements.

Commissioner Briley asked about the distance between Nova Road and the Escondido apartments; whereby, Mr. Sans Lassiter, Lassiter Transportation Group, reviewed the traffic study and traffic light needs. Commissioner Briley expressed concerns regarding traffic in peak hours and during times the train went through the area.

Mr. Lassiter explained the traffic light would have preemption noting that would help mitigate traffic backups during the times the train went through the area. He reviewed the traffic analysis.

Commissioner Briley discussed the vehicular and pedestrian conflicts within the current subdivisions. He reviewed the weight capacity for the Misner's Trail bridge, expressed concerns for the structure of the bridge and inquired who maintained the bridge; whereby, Mr. Shawn Finley, Public Works Director, indicated the Florida Department of Transportation (FDOT) inspects the bridge annually and the city maintains it.

Commissioner Persis inquired about the time of day the traffic study was completed; whereby, Mr. Lassiter noted it was completed in the morning and afternoon. She stated she traveled to the subdivisions during peak hours and noted the current traffic concerns. She inquired if the developer was willing to significantly reduce the number of homes in the development, increase the lot sizes, and irrigate the buffers; whereby, Mr. Merrell asked what significant meant. Commissioner Persis clarified the prior Commission agreed to 122 homes in 2006; whereby, Mr. Merrell stated the 2006 plan was no longer an option and 122 homes would not work for the project.

Mr. Carl Velie, property owner, explained all the costs associated and noted they needed the number of lots to be profitable, and discussed the landscaping aspect of the buffer of the proposed project.

Commissioner Sargent inquired what the maximum height of the homes would be; whereby, Mr. Merrell stated the same as the R-2 zoning. Commissioner Sargent inquired

Commissioner Tolland inquired about the calculations of the density; whereby, Mr. Spraker stated the calculations for the density of Tomoka Oaks subdivision could not include the 84 acres that had an open-space conservation zoning which did not allow for density. He reviewed the calculations for both subdivisions. She asked about the golf course; whereby, Mr. Hayes stated when the golf course was constructed it had a restrictive covenant which prohibited development, noting it did allow the HOA to release the covenant. He explained the release happened in 1976. She inquired about the natural buffer; whereby, Mr. Don Spence, on behalf of applicant, stated the buffer would take ten years for the trees to reach maturity and the shrubs would take about five years.

The entire Commission disclosed they met individually with the development team and several residents and discussed the types of meetings held.

Mr. Hayes reminded the Commission the item before them was an application for a development order under PRD zoning. He noted the Commission's decision should be based on if the development met the competent substantial evidence standard including conforming to the Land Development Code and Comprehensive Plan, the development will not adversely impact the environment, the development will not substantially or permanently depreciate the value of the surrounding property, adequate public facilities, ingress and egress traffic safety, the development is a functional use of space, provides for safety of occupants and visitors, and the proposed use of materials and architectural features will not adversely impact the neighborhood aesthetics. He reviewed potential options for the Commission.

Commissioner Persis discussed concerns regarding ingress and egress, traffic and environmental impact. She stated she would vote no on the item, and stated she would like to deny the request or send back to the Planning Board for the developers to include a substantial reduction in density, similar to the approved PRD from 2006.

Commissioner Sargent reviewed the issues he had including traffic, pedestrian safety, and density. He stated he would support sending the item back to the Planning Board in hopes of a plan similar to the 2006 approved PRD.

Commissioner Tolland expressed concerns regarding pedestrian safety, compatibility with surrounding neighborhoods, density, natural buffer, and traffic. She indicated support of a plan similar to the 2006 approved PRD.

Commissioner Briley stated concerns for the compatibility, lot sizes, and density. He agreed the item should go back before the Planning Board.

Mayor Partington supported the item being remanded to the Planning Board and expressed concerns regarding density and traffic.

Commissioner Persis moved, seconded by Commissioner Tolland, to remand the item to the Planning Board for further consideration.

Call Vote:	Commissioner Briley	Yes
	Commissioner Tolland	Yes
	Commissioner Sargent	Yes
	Commissioner Persis	Yes
Carried.	Mayor Partington	Yes

Mayor Partington closed the public hearings.

Item #10 – Reports, Suggestions, Requests

Events, Compliments, and Announcements

Ms. Claire Whitley, Assistant City Manager, reviewed upcoming events including a Veterans Day celebration luncheon, HOme for the HOlidays parade, and Ormond Beach MainStreet Riverfest.

Commissioner Tolland thanked residents, staff, and the Planning Board regarding the

Commissioner Persis thanked Mr. Spraker, Mr. Hayes, Ms. Whitley and City Manager Joyce Shanahan.

Commissioner Briley reviewed events he attended including the ribbon cutting for the dog section of the Volusia County beach and Hometown Heroes drive-thru lunch.

Item #11 – Adjournment

The meeting was adjourned at 10:11 p.m.

APPROVED: December 5, 2023

DRAFT

Planning Board minutes from January 11, 2024

ITEM:

ZMA-2023-054

Tomoka Reserve, Zoning Map Amendment

requirements and ensure that the gopher tortoises are in place prior to relocating them and ensure it is done properly. He commented that they would not have a problem if people wanted to go out with them on the site as they have nothing to hide.

Mr. Jorczak referenced the mix of development in the community and the need of affordable housing and asked for the target range of pricing for the townhomes. Mr. Storch replied that the townhomes are estimated to be in the high $200,000s. The affordable housing looks at 30 percent of income being affordable housing and if below the medium scale of housing, then housing can be less than $45,000 per home. Mr. Storch noted to make more affordable housing would be to look at the idea of smaller housing for development. He added that at the same time people can look at things that will create affordability in other manor such as having homes located in areas closer to jobs and shopping so not to pay for the cost of transportation. He concluded that townhouses are amongst the most affordable.

Chairman Thomas opened the hearing up for any public comments. Hearing none, he opened it back up to the Board and entertained a motion.

Mr. Railsback motioned to approve PP 2023-074, Bradford Park subdivision, Preliminary Plat. Mr. Galloway seconded it. Vote was called, and the motion was approved (7-0).

C. ZMA 2023-054, Tomoka Reserve, 20 Tomoka Oaks Boulevard, Zoning Map Amendment

Attorney Hayes reviewed preliminary matters on the item, explaining that the application this time is for rezoning and the sole question is whether the property should be rezoned. He continued that the facts are the same. At prior meetings, the developer's representatives informed the Board that they can pursue an R-2 rezoning application. The Planned Residential Development (PRD) issuance of a development order matter was remanded back to the Planning Board and it was not denied. The applicant has decided to move forward with the rezoning application. Attorney Hayes referenced information from prior public hearings which was also included in the Board packet. He explained the quasi-judicial proceedings, with rules of court that apply. The decision of the Planning Board is an advisory to the City Commission. The burden of proof initially lies with the applicant to demonstrate that the application for rezoning follows the Comprehensive Plan, ordinances and laws, and if so then the burden shifts in opposition by providing competent and substantial evidence that the rezoning should not be applied.

Attorney Hayes stated that the City's code has a mechanism to allow parties who may have a substantially affected interest to intervene as a former party. The Tomoka Oaks Homeowners' Association (HOA) requested party-intervenor status and the consent was given as a stipulation for the PRD issuance of a development order. The HOA filed a request to be treated as a party intervenor in the rezoning request. Attorney Hayes added that he received a letter from the applicant's attorney. He continued that there is a provision in the city Code of Ordinances that does not specify the intervenor status. He added that he did not speak with the attorney for the applicant but did speak with the HOA attorney. He reviewed the Rules of Procedure and added that the residents receive three minutes to speak. If a party is being represented by a spokesperson, additional time may be allotted.

Attorney Hayes stated that witnesses are not required to be sworn in but they can be if the Board so chooses. He suggested that when the proceedings are open for the presentation for the application, the first inquiry should be of the Tomoka Oaks HOA and whether or not they are going to request party intervenor status. If so, it can be handled as a procedural matter and if not, then it would go directly to the Planning Director, then to the 20-minute applicant presentation, and if there is a party-intervenor, then 20 minutes, and if not, can skip right to the presentation, and then the applicant can have the last 10 minutes prior to the vote, followed by questions by the Board and deliberations and decisions by the Board. He explained that during the deliberations and decisions by the Board, several questions can be asked such as procedural matters, points of order, and parliamentary procedures can be asked to the Board but not by the audience.

Chairman Thomas brought the matter to the Board and asked to point out anything that they did not agree with. He continued that this is the fourth time dealing with the piece of property. He suggested to stick by the procedures from the previous three meetings, including the swearing-in.

Chairman Thomas expressed his dissatisfaction regarding the applicants sending a letter out so close to the public hearing with objections and conditions, and the late arrival of the items.

Chairman Thomas opened it up to the Board.

Mr. Scudiero stated that he suggested a time-certain vote so that the Planning Board will know the outcome tonight. He suggested 9:55 p.m. at the latest to be able to be out by 10:00 p.m.

There was further discussion that it may have to be continued if necessary.

Mr. Galloway referenced the late letters that he has not had the opportunity to read and commented that the Planning Board has been put under pressure by developers from out of town and people representing developers. He expressed concern with threats and bullying by them and stated that it is not the way to address the Board, demanding that they stop.

Mr. Steven Spraker, Planning Director, explained the application for a zoning map amendment from Planned Residential Development (PRD), to R-2, Single-Family Low Density, for approximately 147.94 acres located at 20 Tomoka Oaks Boulevard. Mr. Spraker reviewed the history in that the land area was platted in 1961 as a golf course, and that residential lots built around the golf course, developing a symbiotic connection between the golf course land and the residential lots. In 2006, the zoning changed from R-2 Single-Family Low Density to PRD, Planned Residential Development for 119 multi-family units, 3 single-family homes, and preservation of a golf course. In 2014, the Planned Residential Development (PRD) expired. In 2021, Triumph Oaks of Ormond Beach I purchased the golf course land area which had closed. Mr. Spraker continued that in 2023, there was a Planning Board meeting and a City Commission meeting where City Commission remanded the application back to the Planning Board to review concerns including density, traffic, compatibility with surrounding neighborhoods, lot sizes, and the natural buffer. November 21, 2023 the applicant withdrew the PRD, issuance of a Development Order and sought the zoning map amendment to the R-2 Single-Family Low Density zoning district.

Mr. Spraker explained what a zoning map amendment is, detailing how the application seeks to amend the zoning designation from PRD, Planned Residential

Development, to R-2 Single-Family Low Density. The R-2, Single-Family Low Density allows certain uses and dimensional standards. He continued that there are no site plans or other development plans associated with a zoning map amendment.

If approved, development of single-family houses would require:

(1) Review of the Site Plan Review Committee (SPRC);

(2) Preliminary Plat, review by the Planning Board and action by the City Commission;

(3) Final Plat, review by the Planning Board and action of the City Commission.

Mr. Spraker stated that Section 2-02 of the Land Development Code (LDC) provides the compatible zoning districts to the Low Density Residential (LDR) land use. There are five zoning districts by the LDC that are compatible with the LDR land use. The applicant is requesting the R-2, Single-Family Low Density zoning district based on:

(1) The zoning prior to 2006 was the R-2, Single-Family Low Density zoning district;

(2) The surrounding subdivisions are zoned R-2, Single-Family Low Density; and

(3) The R-2, Single-Family Low Density zoning district is consistent with the Low Density Residential land use.

Mr. Spraker elaborated that based on Planning Staff review and discussion, the final points of analysis were that throughout the final process of the PRD and development order, there has been recognition that the Tomoka Reserve property is unique and unusual. He continued that there are not many land areas that are entirely surrounded by 178 single-family homes, referencing the 'hole in the donut' analogy. Mr. Spraker continued, that the goal of a zoning map amendment is to assign the most appropriate zoning based on the unique and special characteristics of the golf course land. He added that within the Planned Residential Development (PRD) zoning, staff believes that the existing Planned Residential Development (PRD) zoning district would provide a better overall subdivision design with the standards for recreation, open space, and natural preservation. The City Commission acknowledged the PRD zoning intent for this unique, one-of-a-kind property, to mitigate negative impacts to those existing properties that had developed with the expectation of a buffer, natural area, next to it. Development of the golf course land under the PRD is better suited to accomplish the goals and objectives of the City's Comprehensive Plan and Land Development Code regulations.

Mr. Spraker concluded that it is recommended that the Planning Board deny the applicant's request to rezone the property from PRD, Planned Residential Development, to the R-2, Single-Family Low Density and to maintain the existing PRD, Planned Residential Development zoning for the subject property.

Applicant's Presentation

Mr. Karl Sanders, Esquire, KJS Law PA, 1102 A1A N., Ste 201, Ponte Vedra Beach, addressed the procedural issues and agreed with sticking with the same procedures in this proceeding. He suggested that his correspondence to Mr. Hayes was misunderstood and added that his communication was designed to ensure Mr. Bayer has enough time as the Board deems necessary to provide a meaningful opportunity

to present his clients objections and concerns. Mr. Sanders referenced his other correspondence and apologized for any offense, stating that they were purely legal issues and were raised to be part of the record in order to be part of any subsequent judicial proceeding and were determined to be the most efficient way to communicate the objections in writing to have in the record.

Mr. Sanders explained that the hearing tonight is on a new application for a zoning map amendment application, and is not meant to rehash the old application. It is being asked to amend the label that is on the official zoning map from PRD and reassign the historical zoning district label that has always been assigned to the property, R-2, to reflect a zoning district that provides the property owners with entitlements to use their property. Mr. Sanders stated there are no zoning entitlements for the property and nothing can be done with the property today due to the fundamental difference between a PRD zoning district and a conventional zoning district. He explained that with a conventional zoning district, the zoning code sets forth what can be done with the property, and it tells you what can be done with those uses, what the development standards are. He added that with a PRD zoning district, it is not a conventional one and is a voluntary, negotiated agreement and currently has no development standards. With a PRD development order, the document that sets forth the development standards for a specific piece of property, but that no longer exists and has since expired. Mr. Sanders remarked that they have to have the same development rights for their property as anyone else. He concluded that they do not know how the property will be ultimately developed in the future, but expressed how they are entitled to have at a minimum, 'something' as property owners.

Tomoka Oaks HOA Presentation

Mr. Dennis Bayer, Esquire, 109 6th Street, Flagler Beach, legal counsel of the Tomoka Oaks HOA, addressed the procedural issue on how in during the last process the developers stipulated that they would have party-intervenor status. He stated that he was aware at 4:50 p.m. tonight, that they are objecting to it. Mr. Bayer added that the issue will be raised when they go to City Commission and feels that there is sufficient evidence in his experts' reports that his clients are the "hole in the donut" that is a substantially affected neighborhood. Mr. Bayer referenced one of the experts who have worked on a number of golf courses around the state and their memorandum about how the homeowners have relied in good faith for decades on the representation of the original developer in the city, that it would remain open space and greenspace. He stated that the property taxes have been predicated upon the assumption that his clients and their successors would continue to enjoy the proximity to an outstanding golf course in a serene and attractive, natural setting. Mr. Bayer continued that those statements established at the prior proceedings, clearly establish a standing on behalf of his clients. He advised that it can be addressed further at the City Commission and expressed that he did not appreciate the late notice from Mr. Sanders.

Mr. Bayer stated that he spoke with other land use attorneys in the State of Florida in that there is no state law, no case law, or local regulations, that tell you if a PUD or a PRD expires, that it automatically reverts back to the underlying zoning. This property was zoned R-2 prior to any of the development occurring. He gave an example of a blank canvas and that if R-2 zoning is granted, they can paint the canvas however they want to as long as the R-2 zoning standards are met. There is nothing that the residents can challenge as long as they have the minimum square footage of

lots, stormwater, and other dimensional standards. The Board cannot say that they need to protect more trees or that more buffers need to be provided. If the canvas is painted under a PRD designation, the colors and confines need to be picked out just as the same process before.

Regarding entitlements, Mr. Bayer expounded on the entitlements that are there. The property was purchased in 2006 and the 2006 ordinance states that if the development order ever expired, the right to come in and apply for a new development order is an option. As long as there is a process, which is available to any property owner, when you buy a property with a designation of PRD, you are not being treated any different than any other property owner. Mr. Bayer explained that the applicants could have sought the R-2 rezoning before they took title as a condition of closing but they did not, as they took it encumbered with the PRD designation, meaning that there is no claim that they are not being treated as fairly as any other property owner in Ormond Beach or the State of Florida.

Mr. Bayer touched on the clarity of case law and expressed that he feels no property owner is automatically entitled for a rezoning. They can show that it is compatible with the Comprehensive Plan. He stated that two expert opinions say that R-2 zoning is not compatible with the existing character of the neighborhood and there will be no control over what type of housing goes into the property, adding that if it goes to straight-zoning, the city loses input to the type of construction. Speaking on previous public hearings, Mr. Bayer reminded the Board what they were told that there is no market for 100'- wide lots, and now the entire development is proposed to be 100'-wide lots. He continued that the Board was told by the developers that they wanted the Boards input and views on the development and when they were told that it was too dense, they did not want to hear it, but now came back with this application. Mr. Bayer concluded that Mr. Harowski is going to summarize his position on the issues and that the Board should deny the request for rezoning to R-2.

Mr. Tom Harowski, Certified Planner and Tomoka Oaks resident, 97 N. St. Andrews Drive, delivered an overview of his comments provided to the Board on December 29, 2023, that R-2 zoning is one of five zoning options that the city's code identifies as consistent with low density residential land use. He specified that the question is which of the five is most compatible with the neighborhood. Mr. Harowski continued that the State Statute gives the definition of compatibility, defined as a condition in which land uses and conditions coexist in relative proximity to each other in a stable fashion over time, such that no use or condition is unduly negatively impacted directly or indirectly by another use. Mr. Harowski added that Policy 1.1.3 in the Comprehensive Plan supports it, where it says, "preserve the character of existing neighborhoods by not allowing the intrusion of land uses that would threaten to alter the neighborhood character." He continued that given the fact that an adjacent land use might be similar in type, single-family to single-family, does not mean that they cannot be intrusive or alter the neighborhood character. Mr. Harowski referenced the analogy, "the hole in the donut" characteristic of the property, and elaborated that it illustrates the intrusive nature of the project as it injects into the community, and how the only place where the entire parcel does not abut a single-family house existing in Tomoka Oaks or a lot that has not been developed yet is the driveway into the old golf course property. The requirement for a compatible project demands that impacts from the new development follow density and lot sizes compatible with the existing neighborhood.

In a report Mr. Harowski provided to the Board, he says it identified the density of actual development in Tomoka Oaks at approximately 1.27 units per acre. It's been said that the land use is 4.3 and the R-2 is equivalent with the land use, but is not compatible with the existing situation. He added while in a rezoning to R-2 seems to be an easy choice, the development of the property at R-2 minimum standards, the development will occur well above the development level for the existing housing. He commented that at the minimum R-2 standards, it would be 50 percent greater than the existing neighborhood. Mr. Harowski used density as a comparison between the new and the old neighborhoods. In terms of minimizing the intrusive impacts, the table of consistent zoning classification or R-1 rather than R-2, is the most compatible choice after Planned Residential Development (PRD). Mr. Harowski concluded that the result of a project under an R-1 would be a project density closer to the developed character of the neighborhood and would lessen external impacts from traffic and from induced public safety that would be seen with any sizeable development.

Chairman Thomas asked Ms. Miller, Recording Technician, to read the Oath.

Ms. Miller read the Oath:

"Do you swear that the testimony you are about to give is the truth, the whole truth and nothing but the truth?"

Audience Comments

Ms. Carolyn Davis, 46 Oakmont Circle, Tomoka Oaks, stated that she took the Oath and thanked the Board for their careful review of the R-2 rezoning application. She understands that the applicant is legally offended when the city or residents refer to the property under discussion as a golf course, so instead referred to the property using the name recorded on the plat and in the applicant's warranty deed which legally describe the property as the Sam Snead Golf and Country Club. Included in the packet, she added that in her letter it states that an R-2 rezoning of the Sam Snead Golf and Country Club plat would permanently alter the character of Tomoka Oaks Country Club Estates by locating a new totally land-locked neighborhood in the center of Tomoka Oaks. Ms. Davis continued that an R-2 rezoning violates the city's future land use element detailed in the Comprehensive Plan in Policy 1.1.3, which requires preservation of any bordering neighborhoods' character. While the applicant tries to make the case that they legally have the right to a R-2 rezoning, she disagrees and sites the officially recorded 2006 Tomoka Oaks Golf Village PRD development order. On pages 7-8 of the development order it states that the development order runs with the real property and if the development order expires, the City Commission will reconsider a new PRD application. Ms. Davis commented that the property is not in limbo and nowhere does the now expired development order state that the land use will revert to R-2. She stated that if any Planning Board member desires to state an acceptable density for the Sam Snead Golf and Country Club plat that they hold themselves to the same standards as expert testimony which requires that any number be upheld by competent and substantial evidence and suggested to site the 2006 PRD which was unanimously approved by the 2006 Planning Board, City Commission, Attorney Randy Hayes, and by Mr. Rob Merrell, Esquire, who represented the 2006 applicant and now co-represents the current applicant. The prior PRD recorded 119 maximum units (condos and townhomes), not 119 lots, what she says Mr. Merrell described as the poster child for smart development and concluded that she could not agree more.

Ms. Denise White, 9 Fox Run Trail, The Trails, stated that she took the Oath. She commented that they have been through this quite a few times and agrees with everything that was discussed back in 2006 and 2023, that the development is unique, and PRD is the appropriate zoning for it. She referenced the analogy, "the donut hole in the middle", and how it goes back to the safety, the quality of life, even if not looking at any new pictures, she said that they know that what is allowed versus the PRD limiting and guiding the way forward. Ms White expressed concern with the 450' entrance, and how the PRD allows customization. Ms. White thanked the Board and staff for their time.

Ms. Debbie Brown, 90 N. St. Andrews Drive, Tomoka Oaks, remarked that she used to live in Daytona Beach and stayed out of Ormond Beach politics and elaborated that she did not understand why someone from Jacksonville or Miami is involved. She stated that she encourages the Planning Board to go with staff's recommendation to turn down the R-2 zoning and Tomoka Reserve. She added that Tomoka Oaks was always linked to be a golf course community and that 75 percent of the streets in Tomoka Oaks are named after worldwide golf courses. Ms. Brown continued that developing 317 homes instead of 272 inside an already existing development is already improper. As the owners of Tomoka Oaks have already indicated several times had the willingness to purchase the property only to be ignored and ridiculed. Ms. Brown commented that the owners have been to several meetings with Tomoka Oaks, only to be controlled by the Tomoka Reserve attorneys. In the beginning Tomoka Reserve owners were requesting to not try to overdevelop the land and were requested to have 100' – wide lots adjacent to 100' – wide lots. Ms. Brown directed her comments to Tomoka Reserve representatives and urged them to remember that they purchased a golf course, not vacant land to be developed for profit. She asked what rights she has as a property owner if she does not have any rights.

Ms. Darla Widnall, 7 Shawnee Trail, The Trails, named the roads that would be most affected by the proposed development, Tomoka Oaks Boulevard and Nova Road, and Main Trail and Nova Road, and Main Trail and Granada Boulevard. She suggested that each of the intersections would need at least an extra right turn lane which is required to be 400' in length. Ms. Widnall continued referencing the traffic study in that only one has been done with a follow up traffic study and commented that both were done by Mr. Lassiter's company who were hired by the developers. She added that the City has only hired a traffic engineer from Debary to comment on the traffic studies. The City has not done their own study. Ms. Widnall expressed that it can only be imagined the traffic study paid for by the developers being believed, when they say only 4 percent of traffic will be coming through the Trails. She urged not to be fooled that a traffic signal will help, and that the Florida Department of Transportation has not approved a traffic signal and only said that they would consider it. Ms. Widnall commented that Mr. Lassiter, the traffic engineer, has conflicting beliefs who thinks that a traffic signal is a good thing with the recent PRD application, but also said that he would not recommend a signal at that position because it would cause too many rear-end crashes in his previous analysis completed in 2006. Ms. Widnall referenced the gopher tortoises and remarked that the developers were in violation of state law when they demolished 20,000 square feet of buildings in the golf course without obtaining a gopher tortoise permit.

Mr. Paul Hughes, 4 Lauren Court, Tomoka Oaks, stated that he took the Oath. He continued that he has lived in the neighborhood for approximately 30 years. Mr. Hughes stated that there is a use for the land as-is, and explained that he offered to

buy the golf course when it was up for sale and wanted to put one home on it, but his wife was not happy about the idea. He continued that you can put a single-family home on it and could let the land revert or have a buffer or a golf course for friends, whether it be for one home or one-thousand homes. Mr. Hughes stated that there is precedent in doing so, and how he did so before with a school up in the Panhandle and bought 50 acres so they did not have to worry about the buffers. He commented on the angst in the neighborhood, and elaborated that anyone can come in and buy a piece and commented that no one has determined the value of the affect of all the gyration on the neighbors. He added that people are suffering from all of the anxiety that this is causing. Mr. Hughes stated behind the new iron gates that were installed recently, there is demolition on the property. The parking lot that was historically there had leaded cars on it for years and there are studies that have to be performed before tearing up anything that has leaded gasoline particulates on the ground and does not believe any of that has occurred. Mr. Hughes added that he does not believe that there have been studies of the aftermath of that and the dangers in it and how when the particulates go airborne, pica can be established in small children or people with autoimmune deficiencies, who would have problems with the soils and the airborne particulates that are there now because there is nothing going on. Mr. Hughes remarked that there was no reason to destroy it, but that they tore it down along with the old building and storage warehouse. He added that the soils have been in question since 2006 and there are many people who have a concern with autoimmune deficiencies and were reassured by the attorneys that this was not going to be a problem and how it seems history is repeating itself. Mr. Hughes suggests that the town consider establishing a significant buffer all the way around the golf course until this is resolved along with being properly tested, with all parties agreeing to the testing so that it is a fair decision and study.

Mr. John Measel, 16 Eagle Court, Tomoka Oaks, stated that he took the Oath. He continued that the golf course should have never been allowed to be zoned R-2 due to the density. He added that Mr. Merrell stated that the development team did not think that 317 units would ever be a good fit for this property. Mr. Measel stated that one of the biggest problems with the R-2 zoning is that the majority of houses built on the golf course were built to utilize the golf course as their backyard. You can walk around the edges of the golf course and a majority of houses are sitting at the rear yard setback. Some of the houses have their pools and pool enclosures within inches of the property. Mr. Measel expressed that there is no way that houses can be built that close and that all of the other houses are set back at the bare minimum setback without affecting their property values, even if at the previously mentioned $600,000 houses. The property was previously said to be PRD for a reason, as the streets around Tomoka Oaks were set up for the amount of housing in the area, counting the greenspaces of the golf course. Mr. Measel added that anyone driving the property knows that there is one near-miss a day on the streets with pedestrians or bicyclists getting hit.

Mr. Measel stated that the density is the main issue and added that he knows that the City cannot afford to upgrade St. Andrews North and South, Rio Pinar Trail, Main Trail, or Misners Bridge. He commented that the developer is not going to take on the project. If it insisted on getting a zoning, Mr. Measel suggests giving an R-1 zoning or maintaining a PRD.

Ms. Kristin Deaton, 80 Shadowcreek Way, Breakaway Trails, lifelong Ormond Beach resident, took the Oath and urged the Planning Board to use their conscience

when making the vote. She added that it is a project that they did not like at 272 homes, are definitely not going to like at 317 homes or any other magic number that they come up with. Ms. Deaton stated that there are more viable solutions and trusts that the Board will make the right decision.

Mr. Tom Fitzgibbon, 51 S. St. Andrews Drive, Tomoka Oaks, stated that he took the Oath. He continued that Tomoka Reserve is a pedestrian and traffic safety hazard for the current residents. In and around Tomoka Oaks, the Trails, Escondido Condos, Talaquah, Nova Road and Granada intersections, several years ago, four houses down from his house, a pedestrian was killed by a driver around a blind curve. He added that he saw a city inspector almost hit by a car, and has seen large delivery trucks speed around blind curbs and clip overhead wires and trees many times. Mr. Fitzgibbon commented that none of the Tomoka Oaks old narrow streets have sidewalks. When he walks, runs, or bikes, he said that he is in the streets surrounded by cars and trucks whizzing around him. He commented that the narrow curbing, tree and shrub-lined streets, and traffic islands obstruct views and put kids in danger. Utility trucks park in the street at all times during the day and night, further obscuring sight lines and causing drivers, pedestrians, bikers, baby carriages, and dog walkers to play a deadly form of dodgeball in the traffic. Mr. Fitzgibbon stated that predictions from LTG hired by the developer call into question their data and methodology, adding 600+ cars and 3,000+ trips daily in a two lane road, Tomoka Oaks Boulevard, and a standard stop sign intersection will cause more accidents. He continued that many people will choose to drive on S. St. Andrews Drive and Trails roads and added that their old development was never designed to support the additional traffic that Tomoka Reserve will create. Mr. Fitzgibbon asked the Planning Board and City Commissioners to significantly limit the number of houses to 122, the original 2006 PRD number, and to consider the 2006 PRD the gold standard for any new development. He continued and asked them to require the development to finish street work before house construction begins, including new sidewalks on both sides of Tomoka Oaks Boulevard, require the installation of a traffic light at Nova Road and Tomoka Oaks Boulevard before house construction begins, allow for heavy construction traffic flow, require a comprehensive new traffic study due to the changed development layout and increased number of houses, and to consider saving Tomoka Oaks Golf Course as a public course or other open space use. Once built with houses, he states that it will never be available again. Mr. Fitzgibbon added that Tomoka Reserve is a traffic safety hazard and he appreciates help in limiting the danger to the children and families living there. He concluded that the developer was negotiating the PRD because they realized that the property was unique and they did not think 272 houses was enough, dropped their PRD, and is now claiming that they have no property rights.

Mr. Jeff Boyle, 614 N. Halifax Drive, took the Oath and stated that hundreds of residents, the Planning Board, and City Commission have pleaded for a density reduction for this project. He continued that 272 units were voted down and now the applicants are back seeking a rezoning so that they can build 317 units. He stated that Attorney Sanders called any attempt to reduce that number “an exercise in futility” and has threatened legal action if the City does not approve the rezoning. Mr. Boyle commented that they asked for less development and they gave them 45 units or more and withdrew the promise of a Nova Road traffic signal. He continued that there has been six public hearings since last January, moved from City Hall to local churches to accommodate mass community turnouts and in the 12 month public outcry,

protesting density, increased traffic and impacts on adjacent neighborhood property rights. Mr. Boyle commented that the developers have ignored the citizens protests voiced at a neighborhood meeting, the three Planning Board hearings, a City Commission meeting and here at the Planning Board again tonight. The developers assert compatibility with both a letter and the spirit of the Land Development Code claiming an automatic right to a rezoning that will exempt their property and project from Planning Board and City Commission review. Mr. Boyle stated that we are here because rezonings and approvals are not automatic and require public hearings, public testimony and votes. Applicants have property rights to develop the land but local governments and advisory boards get to decide how. He continued and expressed that the project fails every test and why they had to make threats against our city. Mr. Boyle concluded for the Planning Board to weigh only the facts and reject the rezoning.

Ms. Bonnie Kloepfer, 23 Tomoka Oaks Boulevard, Tomoka Oaks, asked if anything has changed since the last meeting. She asked if 1,100 Tomoka Oaks, Trails, and Escondido residents woke up one morning and expressed that it was a great idea to have at least 1,200 additional vehicles coming in and out one route per day. She asked what the developers have come up with and seriously want to work with the residents. Ms. Kloepfer stated that they have come back with a vengeance and now want to put in their 300+ homes crammed in. She said that no one wants it, including the City Commission because it is not right. Ms. Kloepfer asked what has been fixed and asked if they are supposed to believe that a traffic light at Nova Road is fixing the additional traffic and asked if they came up with another entrance and exit, more schools, more hospitals, doctors or roads. She commented that they have come up with nothing but their "fancy so-called experts", waiving around degrees and no serious solutions to the resident's problems. Ms. Kloepfer commented on an interesting gentleman that showed up at one of the meetings who did not live in the area and thought it was a great idea to cram in all the homes. She added that the applicants have come up with nothing but lots of money and fancy lawyers and they keep trying to fit their big feet into Cinderella's slipper and it does not fit.

Ms. Michelle Zirkelbach, 328 River Bluff Drive, Tomoka Oaks, stated that took the Oath and thanked city staff, Planning Board, City Commission and a host of volunteers including Mr. Jim Rose, Ms. Mary Greenlees, Mr. Tom Fitzgibbon, Ms. Denise Corley, Ms. Carolyn Davis, Mr. Jeff Boyle, Mr. Tyler Brown, Ms. Missy Herrero, and Ms. Ashley Dufrene. Ms. Zirkelbach stated that Ms. Dufrene is not in attendance because she had a beautiful baby girl and was given the authorization to speak on her behalf in saying that she cannot make it as her hands were full. She asked Ms. Zirkelbach to share the following: "I am still opposed to this development. We too have property rights." Ms. Zirkelbach commented that she recalls being in her shoes when they moved into their dreamhouse in Tomoka Oaks with a four year old and two year old. They are in attendance now as a 27 year old and 29 year old. She added that they would say that they had the most amazing childhood. Ms. Zirkelbach stated that she wished the same for Ashley's daughter with carefree walks, bike rides to friends' houses, to be able to listen and watch for the wildlife, hear the sounds of laughter at an amazing game of Manhunt, and says that she is worried that it will not happen and is worried. Common sense tells them that the traffic study is not right and common sense tells them that their roads in Tomoka Oaks are not designed for any amount of additional traffic even remotely close to what the developer is proposing. Ms. Zirkelbach expressed that they have a lifestyle in

Tomoka Oaks and the traffic would severely impact it. She continued that earlier tonight she thought she heard the applicant's new attorney state that the PRD failed. She commented that she did not see it that way and thinks that the PRD process was working and the only thing that failed was their plan to give them what they want, which did not reflect what the residents of Tomoka Oaks or the citizens of Ormond Beach want. Ms. Zirkelbach added that Mr. Ruben has a habit of going in and asking for more after he gets what he initially wants, just as four or five units per acre becomes eight units per acre and six dwelling houses when it was supposed to be four dwelling houses. She added that the wisdom of her 27 year old asks why aren't we trying to build it better. Ms. Zirkelbach concluded that she has her daughters, 7th grade Citizens, project that says what is wanted is open land, space, and not a bunch of junk jammed into a donut hole.

Ms. Mariah Zirkelbach, 328 River Bluff Drive, Tomoka Oaks, stated that she took the Oath and that Tomoka Oaks is a place that has quality over quantity. Quality of living, quality of housing and in her case, quality of childhood. In a world where children are becoming further removed from being children, those who are looking to choose quantity need to reflect. Ms. Zirkelbach commented that her childhood was quality, not just due to her family but because of where she grew up. She explained that her imagination would fly as her and her brother came up with games to stay outside. She continued that she could easily travel house to house without her parents worrying and had the ability to get to Rainbow Park, the shopping center, and the bike trails on her own, where she said that her independence is rooted from. Ms. Zirkelbach stated that as she now looks to purchase her own home, she reflects on the freedom that she had, with the tall oak trees that never seemed to end, endless memories and friendships that ground her in who she is as an adult. She commented that shoving 317 houses where they are not required or necessary is for the purpose to line pockets of those whose pockets are already full. Ms. Zirkelbach concluded that the citizens of the town are entitled to quality of life and the well being of Ormond and sees that there is enough quantity and thinks that it is time for the developers to get back to quality.

Ms. Mary Greenlees, 94 N. St. Andrews Drive, Tomoka Oaks, stated that she took the Oath and has lived at her home for almost 25 years. She said that she strongly opposes the R-2 zoning. She expressed that she feels that it is a missed opportunity and that if they would have been informed of the 2006 PRD expiration that they would not be in the situation. In 2006, she was going through breast cancer treatments and thought 119 townhomes was a great plan, a poster child for smart growth. Then 18 years later, they are asking three times that and offering a 6' buffer. Ms. Greenlees suggested a park option, as she has done research on how a Community Development District (CDD) works and added that existing residents would need a 100 percent "yes" vote. Ms. Greenlees suggested to talk to Mr. Mori Hosseini at Intervest Construction, and added that they have created greenspace, adding value to neighborhoods, and spread the costs to the new lot owners successfully. She commented that the Planning Board recommended that the residents meet with the owners to try and come up with a resolution. She met twice with Mr. Dwight Durant, Mr. Ray Barshay, and two committee members and after five hours and two meetings, the outcome was a reduction of four lots. Ms. Greenlees stated that the project has been in the works for over three years and the Ormond Beach City Commission, Planning Board, Mayor, City Attorney, Assistant City Manager, and Planners have their backs and care about Ormond Beach and she feels that it is the

best she has seen in years. Ms. Greenlees added that there is a new development in Halifax Plantation called Windchase, where homes start at $700,000 with three-car garages built on estate lots and are selling. Tomoka Oaks, The Trails, Escondido, and numerous Ormond Beach residents are vigilant, smart and will continue to support their position. She added that there is not one Ormond Beach resident that is in favor of 317 new homes built in the middle of town. Ms. Greenlees stated to think outside of the box and suggested a mediation as the developers deserve to have a return on investment and added that the real question is how much and how long they are going to have to wait. She stated that she votes for R-1 zoning, estate homes on beautiful lots in the middle of a beautiful town that start at $700,000.

Chairman Thomas asked the applicant if there was any additional testimony to add.

Mr. Sanders stated that he does not have any additional evidence to present to the Board and is available for any questions.

Board Discussion and Questions

Mr. Scudiero commented that he listened to everything that was said and read through the Planning Board meeting packet and spoke on the zoning, rights, and entitlements on the property, and expressed how he likes to know what he is buying. The applicant bought a piece of property with no entitlements and expressed that it seems like a bad idea to then ask for considerations that are not granted within the purchase and property contract that was signed. Mr. Scudiero agrees with staff in denying the request.

Mr. Railsback stated that he shares Mr. Bayer and Mr. Scudiero's thoughts on the matter in that originally the Tomoka Oaks area contemplated what should be there and developed around it. Mr. Railsback referenced the PRD process in what is allowed to be done is working in trying to find something palatable for the community. He stated, the developer voluntarily purchased the property with those labels and entitlements or lack of entitlements. Mr. Railsback concluded that he is not in favor of moving away from the PRD at all.

Mr. du Moulin complimented the resident's logic and referenced Broadwater in that if the area went to an R-1 zoning like Broadwater it would be approximately 75 homes and feels that if these type of estates were developed on the property it would be a jewel for the developer. He added that it would be an increase on property values to the surrounding community as well as Ormond Beach to be able to say that they have another jewel in their community. Mr. du Moulin expressed concern with cramming the number of homes proposed in the area, saturating the infrastructure, as well as the number of homes in Ormond Crossings. He explained that he feels that it will create more issues and is concerned with catastrophic events. He concluded that he thinks that the developers need to take a second look and that they can make a good profit and can use this as an advertisement of a neat community where everyone is a winner. He concluded that he sides with the original PRD and not the R-2 zoning.

Mr. Jorczak stated that his position on the project has not changed. He feels that it is not consistent in character. He expressed that the density issue and what it does to the existing infrastructure and how it was not designed to handle what is being proposed bothers him. Mr. Jorczak expressed that the challenge he has had in the uniqueness of the property is if something were to be done it should be above and beyond what has been done in other communities. He stated that it may be necessary to create a special zoning district for the property that would be translatable across many

communities where golf courses have been in the center of residential developments and they no longer exist. Mr. Jorczak stated that an example may be set on what is done. He added that he cannot support the R-2 rezoning. He continued that the PRD gives the city a tremendous amount of leeway in terms of how it gets developed and is a compromise vehicle to work with the developers and economic development. Mr. Jorczak recommended going beyond a PRD, and to think more in terms about what can be done. He concluded that he cannot support the R-2 zoning designation for the property.

Mr. Galloway referenced property rights and stated that the owner had the right to sell the property and the Tomoka Oaks HOA had the right to buy the property. He mentioned that six to nine months ago there was a way was brought up for the residents to buy the land and put it in on their tax bill over 30 years. The majority did not have interest in doing so. Mr. Galloway stated that there were individuals within the community and the HOA that tried to buy the property. He continued that he is not going to tell the developer what they can and cannot do, but how to try and live within the guidelines. He referenced Mr. Harowski's comments on the units per acreage mentioned and calculated that it would be approximately 187.88 homes, adding that something is going to go in the donut hole. Mr. Galloway stated that he previously could support 222 homes but that after tonight, the most that he can support is what Mr. Harowski said at 187 homes, and not an R-2 zoning. He remarked that he has property rights too as a tax payer and does not want his tax dollars used to buy the property and turn it into a golf course. Mr. Galloway expressed that it is fine if the residents as individuals were interested in buying it and donate the land back to the city to open it up as a golf course.

Ms. Shull concurred with the Board and added that the applicants have a ton of attorneys and experts involved and should have known what they were getting into. She added that the PRD would have been the best way as a voluntary agreement between the developer and the City. Ms. Shull stated that the applicants were advised what was preferred when asked what was wanted at several meetings and four neighborhood meetings and the only change was three to four homes less. She expressed her frustration in the now request of R-2 to put more homes in when it was known that one of the concerns was with the density, and she does not support it. Ms. Shull commented that she does not appreciate the applicant's attorney and other developer threat-letters. She added that the people of the city own and run the city, and elect their City Commissioners in and have a right to say what they want to say.

Chairman Thomas remarked that anyone that knows him must realize that he has the philosophy that the property owner can do what the code says with their property. He continued that when they bought the property it was PRD and that it should remain PRD until a better solution comes up other than R-2. Chairman Thomas spoke on the material and letters that the Planning Board receive and said that they had additional letters on their dais this evening, which are all public record.

Attorney Hayes refocused the Board on the issue before them, the application to rezone the property and drew distinction between the PRD zoning in the development process and traditional zoning, and explaining that the PRD is a flexible zoning district and is intended to allow flexible uses versus a conventional zoning district. He added that the development orders are not negotiated contracts and that the applications are reviewed as any other application for a development order and how conditions for the development order or PRD are not negotiated. Attorney Hayes

stated that the issue before the Planning Board is if the property should be rezoned from PRD to R-2. The burden is on the applicant to produce competent and substantial evidence, not through attorneys' opinions, but through witnesses, testimony and experts to show and demonstrate what they believe the property should be zoned, which was not heard. Attorney Hayes reviewed what was discussed and what the Planning Boards decision should be based on at this point, including the Planning staff's professional staff report and any other competent and substantial evidence the Board believes supports their decision.

Mr. Galloway and Mr. Railsback asked for further clarification. Attorney Hayes suggested that the direction should be turned to who has the burden and if that burden was satisfied and what the evidence was that supports it.

Mr. Scudiero added that the local roads are not equipped to double the traffic that they would see from the R-2 zoning. He sided with the staff recommendation for denial.

Mr. Railsback stated that he does not think that the burden shifted, with no evidence to support R-2. He added that the other testimony that was considered further supports that the mountain for them to climb to establish the R-2 zoning is conforming or should be is not there, and that if the burden shifts, he feels comfortable with the evidence that was provided that support to oppose it.

Mr. Jorczak added that he thinks that the reason for the staff recommendation is sound and does not think that the applicant has met the requirements for the R-2 application. He concurs with the staff's recommendation to the City Commission to recommend denial of rezoning to the R-2 zoning district.

Mr. Galloway concurred with staff and the Board.

Ms. Shull concurred with the Board.

Chairman Thomas stated that this is his 34th year on the Planning Board and he has never had an applicant come back on a Board denial with a reason for the change being *because that is what it used to be*, which he remarked that he feels is not meeting the burden of proof. He concluded that he agrees with the staff reasons for denial.

Mr. Scudiero reiterated and restated his earlier comments and motion, that based on the testimony heard and the recommendation by staff, he expressed concern that the applicant has not shown any evidence to suggest that the traffic concerns are invalid, therefore he motions to follow the staff recommendation and deny the request. It was discussed in a summation that:

(1) The Board does not believe that the applicant has met their burden to provide competent and substantial evidence to show that the property should be rezoned to R-2; and

(2) Notwithstanding, the failure of the applicant to find competent and substantial evidence, it is the Boards position that the HOA opposition, through the testimony of Mr. Harowski, did provide competent and substantial evidence to show why the application should be denied; and

3) Relying on the recommendation of the city staff report.

Mr. Scudiero motioned to deny ZMA 2023-054, Tomoka Oaks Boulevard, Zoning Map Amendment to R-2. Mr. Railsback seconded it. Vote was called, and the motion for denial was unanimous (7-0).

Chairman Thomas asked the Board for any further discussion on the motion.

IX. PUBLIC COMMENTS

None

X. OTHER BUSINESS

None

XI. MEMBER COMMENTS

Mr. Galloway stated that he was in Tallahassee the last two days and expressed concern with being "buffaloed" by three developers in the state. He commented that the Board must do what they did tonight and not fold. He warned them to be prepared because he is seeing it happening all throughout the state. Mr. Galloway urged that it be stopped at the Planning Board and City Commission.

Mr. Jorczak commented that he has been following the activity with the Belvedere lawsuit and added to Mr. Galloway's comments in that the developers are becoming sophisticated in how they approach the entire legal and judicial system before the projects get down to the local level and feels they did their homework and knew the direction they wanted to go and the piece needed to put in place, initiating their local activity. Mr. Jorczak touched on governmental operation, in that governmental bodies get tied up in day-to-day things and need to look further down stream in terms of what is happening in the whole geographical area. He referenced the County and zoning districts that the Board has not looked at or kept up with as far as changes and what is going on with being involved in day-to-day activity and should look at reevaluating things that were done 20 + years ago and get in front of the game in terms of recommending changes in zoning districts and what is being permitted including special exceptions. Mr. Jorczak concluded that time should be reserved to look into the future.

Chairman Thomas suggested that the City hire a position solely to forecast and look at trends and challenges in the cities with all of the people wanting to move to Florida. He commented on thoughts that Florida is overcrowded and how there is open space in the middle of the state due to everyone preferring to live on the coast.

Ms. Shull expressed concern with the Land Development Code (LDC) and the different zoning district histories including their changes over time, as well as changes in cities and developers and ways for the city to help maintain itself. She expressed interest in a review of trends and to look at the desire for the growth of the city and to review zoning district designs.

Mr. du Moulin suggested that the Board have a review and look at what other cities are doing and asked if they have something in place to prevent another carwash, storage facility and/or extra housing to catch it before it is too late.

Mr. Railsback thanked staff and commented that they are ahead of things and added that the review of the Tomoka Reserve meeting item and their position on it was the

Dear Mr Speaker,

My name is William Loomis and I live at 41 Oakmont Circle in Ormond Beach.
My wife Beverly and I recently sold our home in Arizona and returned to our homes in Northern Vermont and Central New Hampshire. We had spent over 20 years in Arizona and on retirement as we had the homes in New England we had returned home, but with some reservations about winters in Both states. So, four years ago we rented a house in Ormond Beach for three months. We really liked Ormond and decided it would be a Great place to spend our winters. Before the rental period was up we had found and purchased a house in Tomoka Oaks. It was an ideal addition to our Northern Vermont Lake House and our home and land in Central New Hampshire.
We have very much enjoyed our Ormond Beach experience and have been very happy in Tomoka
Oaks, with one exception. At times, exiting Tomoka Oaks via the limited number of exits ie., Nova Road and the Trails is quite difficult due to traffic congestion. But with all the positives regarding Tomoka Oaks we can overlook the traffic issues.

Now however, we look at 317 new homes and +/-
500-600 more vehicles using the same often congested roadways and we are very concerned.
.
Traffic is only one of our concerns. We also are concerned that a developer's quest for money is going to have a deleterious effect on the quality of life for the occupants of Tomoka Oaks.

When we selected Tomoka Oaks as our choice for a home we were looking at the golf course property as an existing buffer against development, just the opposite of what is occurring.

We also are concerned about the reduction in property values and difficulty of resale in Tomoka Oaks as a result of this development.

We are very much AGAINST this development!

Respectfully,

William and Beverly Loomis
41 Oakmont Circle
Ormond Beach

bill.loomis@outlook.com
603-748-4408

In early 2017 we purchased our home on Tomoka Oaks Golf Course. After a few years of looking, we chose Ormond Beach because of the town's beauty, small town feel, history, and uniqueness. We chose Tomoka Oaks for the beauty of the neighborhood and the uniqueness of all the homes in the neighborhood. When we purchased our home, we were aware the golf course was a bit run down. I always envisioned the golf course selling but selling to someone like me who does renovation work. I envisioned the Club House being renovated, having a restaurant open to the public, banquet rooms to rent out for weddings and parties, a beautiful outdoor area for weddings and parties. At that time the owner was not interested in selling. We continuously spoke to neighbors, spoke to the son of the owner, and watched the real estate as to what was going on and if would go up for sale. In the meantime, I was creating a business plan and looking into the financial and investors for the purchase of the golf course. The listing for sale never happened. Then we were informed the golf course sold to a Developer. I will admit, it crushed me. Some may have only seen a rundown building and a rundown golf course that needs to go. I saw a thriving business for the community of Ormond Beach.

In all reality, Developers and their Investors do not care about a community. Its business only and the bottom line is "money and profit". I completely understand this, we run a business and profiting is your survival. It is up to our Officials to make sound decisions as to what is and will be beneficial to the community of Ormond Beach or what is not beneficial to the community of Ormond Beach. We all know the possibilities that when we develop a new area, whether it's a shopping area or housing area, businesses and homeowners move to the newer area leaving a decline in the older area. The older shopping area loses value, rent becomes cheaper, harder to fill stores and either becomes cheap discounted stores or vacant. Older residential areas become less desirable, value of homes decrease and eventually become a low-income area due to the decrease in value. It's hard for me to imagine that happening to Tomoka Oaks but is it possible, yes. Housing development on US1 will place the demand for building grocery stores, gas stations and retail stores going up towards Bunnel due to it won't be convenient to drive to the existing areas. Housing development by Tymber Creeks will place the demand for building grocery stores, gas stations and retail stores on 40 going towards Barbersville due to it won't be convenient to drive to the existing areas.

Over the six years I have seen much developmental growth, not only Ormond Beach but up and down the coast. Don't get me wrong, growth in a community can be a really good thing, however, too much overgrowth can also be a pit to a community. I understand the need for growth in a community. It brings in revenue communities need. I do realize that there is a strong demand for growth in housing due to the high demand of housing from everyone wanting to move from other states. I also realize creating business growth in a community also creates the need for employment opportunities which in returns needs housing for the business demands. The question is: Where and when is it just enough and where and when is it too much, where and when is it beneficial to a community and where and when is it toxic to a community. How much beauty does Ormond Beach want to remove from their community. How much preservation does Ormond Beach want to remove from its community. How much wildlife does Ormond Beach want to displace and be forced to relocate. What does Ormond Beach want in a community? I see the 2023-2027 strategic plan which is mainly generating growth from businesses with a small portion of residential homes. What does Ormond Beach want to see in residential growth in 5 years? What does Ormond Beach want to see in residential growth in 10 years? What happens with Ormond Beach once the moving boom fades away. If we do reach a population of close to 70,000, as projected by Ormond Beach, how will our roads handle the traffic from growth and tourism. Under The

Economic Development Strategic Plan, under Weakness, shows traffic on the first line. What is Ormond Beach's strategic plan on traffic since it is the number one issue under weakness. As I read through the City of Ormond Beach website on Economic Development, Development Projects, PRD and R2 I did notice on the PRD Planned Business Development Zoning Map, Tomoka Reserve is the only development that does not have immediate entering and exiting accesses off a main road. Tomoka Reserve is being built within the inside of an existing subdivision where Tomoka Reserve has to use the roads inside a subdivision to enter and exit to a main road. Besides tax revenue from the additional 45 homes added with R2 Zoning, what is the benefit for the City of Ormond Beach, what is the benefit for the residents of Ormond Beach.

As I sit here writing this, my morning view is watching the sun gleaming through the tress with the Spanish moss glowing in beauty from the sunlight rays. It is heartbreaking to me knowing this will no longer be my morning view while enjoying my coffee. If given a choice, do I want the development behind my home, NO I DO NOT. The residents of Tomoka Oaks, The Trails and Escondido Condos are at the mercy of the Planning Board and City Commissioner's on the decisions they make. The residents of Escondido Condos really get the worst deal of it all, how in the world are they supposed to exit their condo. Who wants to live that traffic fight every day. I personally do see these condos selling out, losing value, and leaving it open to low income. But with all that being said, as this continues to move forward, is it asking too much to not have more homes crammed in, is it asking too much to have the new homes developed with the same lot sizes matching the ones already on the golf course. Is it asking too much to have more than a 6-foot buffer in between our homes. Is it asking too much to not have a nightmare of traffic entering and exiting our community. Is it asking too much for the condos to have a way to exit out. I still can't comprehend, going by the traffic survey, how a red light on Nova Road is going to ease the traffic from 272 or 317 additional homes. We have a diamond shaped island at the entrance on Tomoka Oaks Blvd, how long will N. St. Andrews, S. St Andrews and Escondido Condos have to wait to get on Nova Rd. Of course, there are many more concerns and questions that not only I, but the entire neighborhood has. When I say entire neighborhood, it's not just the homes on the golf course it is the entire neighborhood of Tomaka Oaks, the Trails and Escondido.

I ask myself, would I still feel the same way if this development wasn't in my back yard. Yes, I would. This development is an odd placement for a subdivision. Again, I am not against growth, I believe I would feel differently if there were more access roads entering and exiting the subdivision.

Thank you for your time.

Sincerely,

The Bowman's

Subject: For Planning Board - Important Green Space for Beautiful Ormond Beach
Date: Thursday, January 4, 2024 11:08:54 AM

[External Email-Use Caution] - OB/IT Helpdesk

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Mr. Spraker and Planning Board -

147 acres of rolling gentle hills covered in grass and beautiful moss waving Oaks surrounding wide fairways. Thousands of memories of the old club house, 18 holes of happiness and misery. Weddings, birthdays and hundreds of other events playing out during spectacular sunsets. Red shouldered hawks shrieking over tortoise, deer, rabbit and fox.

This was the Tomoka Oaks Country Club. And now a Southern Florida developer wants to build 317 houses, driveways and roads. Public golf courses can serve as an important recreational resource for a community, providing a space for residents and visitors to enjoy outdoor activities and engage in physical exercise. They can also serve as a venue for community events and activities, such as tournaments and fundraisers, which can help bring people together and build a sense of community.

In addition to their recreational and social benefits, public golf courses also have economic benefits for a community. They attract visitors from outside the area, who stay in local hotels and eat at local restaurants, which helps support the local economy. They also provide jobs for local residents, including groundskeepers, pro shop attendants, and other staff.

Ormond Beach has no public golf course (we had two courses that welcomed the public — both are closed due to mismanagement) even while golf has made a massive comeback in popularity. Ormond Beach should have a golf course as an amenity for all the people in the community. Young people should get outside and learn golf as an important skill that focuses their talents and minds.

Please preserve the Tomoka Oaks Golf Course as open space for a golf course or some other open space use. Once houses are built, the open space is gone forever

and traffic and taxes increase.

Tom Fitzgibbon - Tomoka Oaks Resident - Beautiful Ormond Beach, Florida

Steven,

Thank you for the notice. I have concerns that I have not seen addressed. Is there a side view diagram of the purposed typical road inside the purposed private neighborhood.? For example, 6 foot side walks, each side of road, 50 foot width of road, underground utilities, a typical cross section. Since the map is not to a visable scale and no discernible criteria for roads or exits.., nor are driveways annotated…the driveways may only hold one car. If so, each house would need street parking. If two cars are parked there may not be room for normal two way traffic between the parked cars. Must the garages face the road or sideways to the drive?

I also see , what appears to be walkways and or emergency ingress/egress . If they are walkways, then that's public to private . There has been no variance or other hearings. Where would one find the governing statutes?This should be required in the process of considering zoning.

The "Tomoka reserve" folks have place a different gate at the entrance. While this may be their right, how can the general public go and walk the property as to what they purpose?

Thank you for your time.
Best regards,
Paul Hughes

Good afternoon,

The zoning map amendment application for the Tomoka Reserve project is scheduled to be heard at the **January 11, 2024 Planning Board**. The Planning Board meeting location will be at **Tomoka Christian Church at 1450 Hand Avenue,** Ormond Beach, FL 32174 and will start at 6pm. The project webpage for the zoning map amendment is https://www.ormondbeach.org/1036/Tomoka-Reserve-R-2-Zoning. This webpage includes the zoning map amendment application submitted in May.

A zoning map amendment is a request to amend the zoning designation of a property. In this application, there is a request for a change from PRD, Planned Residential Development, to R-2, Single-Family Low Density, for approximately 147.94 acres located at 20 Tomoka Oaks Boulevard. A zoning map amendment does not include a site or development plan and focuses on the appropriateness of the zoning designations consistent with the "Low Density Residential" land use category.

If there is a desire to provide correspondence to be included in the public hearing on the zoning map amendment, please send it to me via e-mail (Steven.Spraker@ormondbeach.org), by mail, or hand delivery (contact information below). Please include "For Planning Board" in the subject of the e-mail.

Please contact me with any questions. Thank you

Good morning,

The Tomoka Reserve project has withdrawn its application for the PRD Development Order for project PRD 2022-043. A request has been made to move forward with their zoning map amendment application from PRD, Planned Residential Development to R-2, Single-Family Low Density. The letter is available on the project webpage at: https://www.ormondbeach.org/1013/Tomoka-Reserve. No date for a Planning Board meeting has been established and updates will be provided on the city's website and through the distribution list. Please contact me with any questions. Thank you

Good morning,

The Site Plan Review Committee has received an updated site plan submittal which is available at: https://www.ormondbeach.org/1013/Tomoka-Reserve.

The Tomoka Reserve project has been scheduled for a **September 26, 2023** Ormond Beach Planning Board meeting to be held at **Calvary Christian Center at 1687 West Granada Boulevard**, Ormond Beach, FL 32174 starting at **6:00 pm**. Please note the location as Calvary Christian Center at 1687 West Granada Boulevard. Written comments on the project for inclusion in the packet can be (1) sent to comdev@ormondbeach.org or to my e-mail address (Steven.Spraker@ormondbeach.org) - please include "For Planning Board" in subject line, (2) hand delivered to Room 104 of the Ormond Beach City Hall, or (3) mailed to me at the address provided below. Correspondence provided on/before September 13, 2023 at 5pm would be provided in the packet. Additional correspondence received after September 13th would be provide to Planning Board members separately. Correspondence received “For Planning Board” to date will be provided in the Planning Board packet.

The tentative Planning Board packet distribution date would be September 15, 2023.

Please contact me with any questions.

Subject: RE: Former Tomoka Oaks Golf Course Redevelopment, distribution list (08.17.2023)

Good morning,

There are three updates from the Planning Board continuation packet issued August 11, 2023. The first update (Attachment 16) is additional correspondence received from August 10, 2023 to August 16, 2023. The second update (Attachment 17) is additional information provided by the applicant from August 16, 2023. The third update (Attachment 18) is a staff PowerPoint detailing the applicant's responses to staff recommendations. The updates are available on the Tomoka Reserve webpage at https://www.ormondbeach.org/1013/Tomoka-Reserve or the Planning Board webpage.

City staff received additional information (Attachment 17) from the project team for Tomoka Reserve project on August 16, 2023. This material is supplemental to the existing submittal and has not been reviewed by the Site Plan Review Committee. The Planning Board can act upon the original site plan presented at the July 13, 2023 meeting. City staff would advise the Planning Board that the additional information provided August 16, 2023 should be considered a material change. **If there is a desire to alter the site plan presented on July 13, 2023, then an additional Planning Board meeting would need to be conducted with additional review by the Site Plan Review Committee, public notice, and the opportunity for public comments.** It is important to note that the August 21, 2023 Planning Board meeting has been advertised as a continuation of July 13, 2023 with no public/audience comments based upon where the July 13, 2023 meeting stopped. Any material change is required to occur with public notification and a new public hearing.

As a reminder, the Planning Board meeting will be held at **Tomoka**

Christian Church at 1450 Hand Avenue, Ormond Beach, FL, 32174, starting at 6:00 p.m. The link to listen to the audio of the August 21, 2023 Planning Board continuation is: https://youtube.com/live/mCVJh3WI-cg?feature=share.

Please contact me with any questions. Thank you

Good morning,

The Tomoka Reserve project has re-submitted to the Site Plan Review Committee (SPRC) with the intention of being scheduled for the Thursday, July 13, 2023 Planning Board. Final Planning Board agenda determination of the project by the SPRC would occur on or before June 22, 2023. The project submittal is available at: https://www.ormondbeach.org/1013/Tomoka-Reserve. Written comments on the project for inclusion in the packet can be (1) sent to comdev@ormondbeach.org or to my e-mail address (Steven.Spraker@ormondbeach.org) - please include "For Planning Board" in subject line, (2) hand delivered to Room 104 of the Ormond Beach City Hall, or (3) mailed to me at the address provided below. Please contact me with any questions.

Subject: RE: Former Tomoka Oaks Golf Course Redevelopment, distribution list (05.12.2023)

Good morning,

The Site Plan Review Committee (SPRC) has issued a request for additional information which is available at: https://www.ormondbeach.org/1013/Tomoka-Reserve. There are outstanding comments that would require a re-submittal. With a re-submittal in late May/early June, the project would likely be scheduled for the July 13, 2023 Planning Board. A distribution list e-mail would be sent at a later date to confirm the re-submittal.
As part of the last submittal, the project team provided information on the site environmental review. The link below is to the Florida Department of Environmental Protection website (if prompted, select the "public oculus login" link and it should automatically direct you to the documents). https://depedms.dep.state.fl.us:443/Oculus/servlet/shell?command=hitlist&[freeText=]&[folderName=]&[profile=Cleanup_Remediation]&[creator=]&[entityType=any]&[createdDateTo=]&[catalog=5]&[searchBy=Profile]&[sortBy=Document+Date]&[createdDate=]&{County=_EQ_VOLUSIA}&{District=_EQ_CD}&{Facility-Site+ID=_EQ_ERIC_18037}.
The project team also submitted a Zoning Map Amendment application from Planned Residential Development to R-2, Single-Family Low Density and it is available at: https://www.ormondbeach.org/1036/Tomoka-Reserve-R-2-Zoning. The Zoning Map Amendment would be processed if

the current application for the issuance of a development order is denied to provide the property a zoning designation.

Good morning,

Cobb Cole, Attorneys at Law, shall conduct neighborhood meetings (notice attached) on **Wednesday, February 8, 2023** during two (2) sessions, one of which will be held at 5:00 p.m. and one session of which will be held at 7:00 p.m. in the sanctuary at Temple Beth-El, located at 579

North Nova Road in Ormond Beach, FL 32174 regarding the application of Triumph Oaks of Ormond Beach I, LLC. The application, submitted as Tomoka Reserve, seeks a Planned Residential Development amendment to allow a single-family residential development on the former golf course located at 20 Tomoka Oaks Boulevard. The information on the project is available at: https://www.ormondbeach.org/1013/Tomoka-Reserve. The project shall require the review and recommendation of the Planning Board and final action by the City Commission. Additional information on the neighborhood meeting can be obtained by contacting Debi LaCroix, CLA, Cobb Cole by telephone at (386) 323-9263 or by email at Debi.LaCroix@cobbcole.com.

The project team has submitted updated site plans and documents regarding the project which are available at: https://www.ormondbeach.org/1013/Tomoka-Reserve. The Site Plan Review Committee review comments would be issued after the neighborhood meeting. No Planning Board or City Commission dates have been established.

Subject: RE: Former Tomoka Oaks Golf Course Redevelopment, distribution list (01.05.2022)

Good morning,

As a follow-up to this morning's Site Plan Review Committee (SPRC) meeting there were request to provide the two drawings that were discussed during the SPRC meeting. Please find the drawings attached. Please note that these are drawings that were used for site plan

discussion and are not finished documents.

Staff will provide additional information for this project as received to this distribution list. Thank you

Steven

Subject: RE: Former Tomoka Oaks Golf Course Redevelopment, distribution list (07.06.2021)

Good morning,

This is a distribution list city staff has assembled based on interest in the former Tomoka Oaks Golf Course redevelopment. If you do not want to be included in future e-mails, please respond **STOP** and staff shall remove your e-mail from this list.

The project team for the former Tomoka Oaks Golf Course has requested a meeting with the Site Plan Review Committee (SPRC). The meeting with the SPRC has been scheduled for Wednesday, January 5, 2022 in Room 103 starting at 9:00 a.m. at the Ormond Beach City Hall, 22 South Beach Street. A Zoom link has been provided at the end of this e-mail for the SPRC meeting.

The SPRC contains members of city staff (Planning, Engineering, Utilities, Building/Fire, and Landscape Architecture) that review development projects. The process for development review is as follows and is also

attached as a flowchart:

1. Submittal/review of SPRC;
2. Neighborhood meeting;
3. Planning Board, review and recommendation; and
4. City Commission, review and action.

To date, a concept plan has not been submitted to the SPRC. Thank you

Good afternoon,

Please find attached a flyer for the second community meeting for the former Tomoka Oaks Golf Course. The flyer indicates the second community meeting will be held on July 15, 2021 starting at 6 p.m. at the Ormond Beach Performing Arts Center.

Please note that this is not a city meeting, but a pre-submittal meeting hosted by the project design team. There have been no city applications or concept plans submitted for this project. Please contact me with any questions.

Thank you

Good morning,

This is a distribution list city staff has assembled based on interest in the former Tomoka Oaks Golf Course Redevelopment. If you do not want to be included in future e-mails, please respond STOP and staff shall remove your e-mail from this list.

City staff have been informed that the property owner and their design team have planned three community meetings (flyer attached). The first of the community meetings, Introduction to Development Team and Solicit Input From Citizens, has been scheduled for May 20,2021 at the Ormond Beach Performing Arts Center (399 North U.S. Highway 1) at 4pm and 6pm. For additional information and to make reservations (including the Zoom link) the flyer has provided a telephone number of (386) 323-9244. The dates for the other two meetings have not been determined per the flyer.

Please note that this is not a city meeting, but a pre-submittal meeting hosted by the project design team. There have been no city applications or concept plans submitted for this project. City staff will provide updates, such as an application submittal, through this distribution list and the Planning notification system on our website: https://www.ormondbeach.org/CivicAlerts.aspx?CID=19.

RE: Tomoka Reserve Zoning Application

Dear Board Members,

Please consider this memorandum in opposition to the currently proposed R-2 rezoning of the Tomoka Reserve project submitted on behalf of the Tomoka Oaks HOA. Our position is that the property should be developed as a planned unit type development. Both the memorandum by planning expert Tom Harowski and the case law in the case of Florida support this position.

First as to the legal analysis. The seminal decision guiding local governments on land use decision is *Board of County Commissioners, Brevard County vs. Snyder , 627 So. 2nd 469 (Fla. 1993).* In this case, the Supreme Court ruled n favor of the county's denial of a rezoning request from a general use residential designation to a medium density multi-family designation. Both designations were consistent with the county's comp plan for the parcel.

Two key legal conclusions that are applicable to this matter. Initially *Snyder* provides that the local government has discretion to decide the maximum density provided for in the code should not be allowed provided that the developer is given some development approval that is consistent with the comp plan and supported by competent substantial evidence. In the prior hearings before the planning board and the city commission on this project, the city's position was that the property could be developed as a PRD however issues remained to be resolved, like overall density, lot sizes and buffers. The approval was not denied but instead the project was sent back to this planning board for additional consideration of the issues raised during the extended hearing process.

The second aspect of *Snyder* that is applicable relates to the city's authority to maintain the existing PRD designation on Tomoka Reserve. The Supreme Court held that the local government has authority to maintain the existing zoning classification (PRD in our case) where the decision accomplishes a legitimate public purpose and the decision is not arbitrary, discriminatory or unreasonable. As discussed at considerable length in the prior hearings, the

subject property has a long development history intertwined with the development and uses of the current existing neighborhoods. This is the proverbial hole in the middle of the doughnut and not another vacant tract down the road on SR 40. This parcel has historically served as a significant recreational and open space amenity that predates the comprehensive plan. It provides public benefits of storm water retention and wildlife habitat. These factors were all taken into consideration when the property was zoned to PRD in 2006 for a plan that allowed residential and recreational uses on the site. The refusal to rezone as now requested by the developers would take into account the unique location and features that exist which will best be developed as a planned development.

Mr. Harowski has provided competent substantial evidence in his memorandum that overcomes the preliminary analysis that rezoning is consistent with the comp plan as to the issue of density. Density alone is not the dispositive factor, particularly when the R-2 proposal would create a higher density product in the middle of an established neighborhood. A final point to be made relates to the claim that the development of this property can be considered to be "infill". The term infill generically references replacing blighted inner city areas with new development. The Florida statutes (section 163.3164 (49) as the development of vacant parcels in otherwise built up areas where public facilities like sewer systems, roads, schools and recreation areas are currently in place and the average residential density is at least five dwelling units per acre, the average nonresidential intensity is a FAR of at least 1.0 and vacant and the developable land does not constitute more than ten percent of the area. This project fails several sections of the definition, most significantly that it would destroy recreational open space and the existing densities are well below 5 units per acre.

Accordingly, the Tomoka Oaks HOA respectfully requests that this rezoning be denied and the property be developed under a PRD designation as it currently stands.

Respectfully submitted,

Dennis K. Bayer

Subject: Tomoka Reserve: Dangerous Streets for Our Families

[External Email-Use Caution] - OB/IT Helpdesk

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Mayor Partington:

As you know, a Southern Florida developer has now applied for R-2 zoning for the old Tomoka Oaks Golf Course, dropping plans for a PRD and increasing the number of houses from 272 to 317. This will clearly increase injuries/deaths for residents and families in and around Tomoka Oaks, The Trails, Escondido Condos, Talaquah, Nova and Granada intersections.

Several years ago, four houses down from our house, a woman pedestrian was killed by a driver. I have seen a city inspector almost get hit by a speeding car. I have seen large delivery trucks speed around blind curves and clip overhead wires and trees many times.

None of our old narrow roads have sidewalks. When I walk, run or bike, I am in the street surrounded by cars and trucks whizzing around me. The narrow, curving, tree/shrub lined streets and traffic islands obstruct driver views and put kids in danger.

Utility trucks park in the street at all times day and night, further obscuring sightlines and causing drivers, pedestrians, bikers, baby carriages, dog walkers, etc. to play a deadly form of dodgeball with traffic. Speed limits are exceeded, by my count, about 50% of the time.

LTG, a traffic firm hired by the developer, predicts that the new development will add only two times as many cars and trucks exiting via Tomoka Oaks Boulevard to Nova during peak morning travel. This seems too low, since the 317 new houses will add 650+ vehicles and more than 3200+ daily trips at a minimum. The development traffic will block Escondido Condos' only entrance.

At the Granada and Main Trails intersection, LTG is predicting that after the development is built, there will only be 18 more peak morning cars exiting onto Granada. Many of us will try to exit through the Trails to Granada to the rebuilt elementary school, Walmart, Lowes and other locations. Taking the Trails route versus Nova is about the same travel time and a lot more beautiful.

These predictions from LTG, hired by the developer, call into question their data and methodology. We could not hire a traffic expert because no one local wanted to question the developer's conclusions and lose future work.

I am asking the Ormond Beach Planning Board and Commissioners to:

1. significantly limit the number of houses to 122, the original 2006 PRD number
2. require the developer to finish the street work before house construction begins
3. require the installation of a light at Nova and Tomoka Oaks Blvd before house construction begins to allow for heavy construction traffic flow
4. require a comprehensive new traffic study due to the changed development layout and increased number of houses.
5. keep considering the 2006 PRD as the gold standard for development
6. please consider saving Tomoka Oaks Golf Course as a public course or other open space use. Once filled with houses it will never be available again.

Thank you for listening,

Tom Fitzgibbon - Tomoka Oaks - Ormond Beach

Ormond Beach Planning Board,

My name is Melonie Caldwell my Husband and I own and reside in Tomoka Oaks on Oakmont Circle, Ormond Beach, FL. I am writing regarding the proposed R-2 Rezoning of 20 Tomoka Oaks Boulevard.

I understand that growth and development are in our future. However, I have major concerns with the Rezoning of Tomka Reserve from PRD to R-2.

In prior meetings the concern of both the Planning Board and City Commissioners was that the proposed development was too dense for the area. If it was to be rezoned to R-2, the original proposal of 272 houses could change to 317 houses. This is going in the opposite direction; from the direct recommendation the developer was given, to decrease the density. The developer stated that decreasing the number of lots just wouldn't work. The fact is it would work, they just don't think their profit would be as high. I am not sure how them not making as much money as they want is the city's problem. They then threatened to rezone the area to R-2, however this is not up to the developer, the area does not have to be rezoned. The request to rezone the area to R-2 can and should be denied.

With only one way in and out of this area, there would be safety concerns for this parcel being zoned as R-2. Being in Florida, national disasters happen quite frequently. With the one way in and one way out, evacuating the area at an R-2 density will create issues. There are only three ways out of Tomoka Oaks, two of which are through the very narrow streets of The Trails. The single entrance into the parcel is located on a small diamond that will get backed up at the inter section Tomoka Oaks Blvd and Nova Road

Rezoning this to R-2 would make this parcel too dense for the area. This is why I oppose the rezoning that is being proposed.

Thank you for your time and consideration.

Best Regards,

Melonie Caldwell
Tomoka Oaks
Ormond Beach, FL

To: The City of Ormond Beach
- **City Commissioners**: Mr. Partington, Ms. Persis, Ms. Tolland, Mr. Sargent and Mr. Briley
- **City Staff**: Ms. Shanahan, Mr. Finley, Mr. Gray, Mr. Spraker and Mr. Hayes
- **Planning Board**: Mr. Thomas, Mr. Jorczak, Ms. Shull, Mr. Dumoulin, Mr. Galloway, Mr. Scudiero and Mr. Railsback

Dear Friends of Ormond Beach:

Re: Dangerous Street Infrastructure in The Trails, Ormond Beach, already Exacerbated by Tomoka Oaks and even further with Proposed Tomoka Reserve thru Traffic.

The proposed **Tomoka Reserve** development of the former **Tomoka Oaks Golf Course** has **opened Pandoras Box** regarding the topic of **the Trails already difficult and dangerous traffic situation.** Lots of Trails residents are now, more than ever, voicing their concerns with having to contend with, in many cases, substandard street infrastructure and poor maintenance, creating an already dangerous situation worse, especially when an est. 60% of the Tomoka Oaks residents already use the Trails Road infrastructure via Rio Pinar and Iroquois every day.

Contrary to Tomoka Oaks, **the Trails Public Street Infrastructure**, due to the area's geography, is a hodge podge of meandering streets, with a number of small landscaped / center islands, many times infringing on the already, too narrow street travel lanes, causing deficient turn radii intersections, where today's larger vehicles have major problems circumventing, creating dangerous and unsafe conditions for both vehicular traffic and pedestrians / bicyclists.

A large number of the Trails streets also feature other dangerous issues, such as, blocked/or obstructed street intersection line of sight, obstructed / blocked and/or inadequate street lights, obstructed / missing or poorly marked crosswalk lines or signs, as well as, vegetation and/or tree obstructions relating to vehicle clearance (height/width) requirements, etc.

These important issues are in need of the City of Ormond Beach's urgent attention, and can be **Categorized** and detailed as follows:

A. Major Trails Public Street Hazard urgently in need of upgrading / re-engineering

The Main Trail serves as the primary thoroughfare for entrance and exits for all the Trails and, to a large degree, Tomoka Oaks residents, as well as, the majority of all service, delivery and emergency vehicles.

These major Public Street Hazard areas are:
- --- Two unsafe 3-point (triangular/diamond) street intersections, with deficient / restricted turn radii
- --- A dilapidated and under dimensioned wooden bridge (over Misner tributary)
- --- A number of too narrow street lanes (encroached by center islands) with partially uprooted street surface by trees

Note! The dangerous "large" Main Trail / W. Granada intersection (which is closely related to some of these issues) was previously raised in a letter dated December 17, 2023. So far, the City of Ormond Beach has yet to officially reply!

B. Other Public Trail Streets Hazard Issues requiring upgrades and/or maintenance

Other dangerous areas:
- --- A number of too narrow street lanes, especially with encroached center islands, and even more so, with curved streets, substantially limit the turn radii (for large vehicles/trucks on secondary streets)
- --- A number of blocked/or obstructed line of sight intersections (mainly secondary streets)
- --- Partly non-working or inadequate street lighting due to tree canopy obstructions (all streets)

--- A few crosswalks are missing crosswalk lines and/or signs, some other needs repainting, and a few (Main Trail) should be upgraded to Raised Speed Bump Zebra Crosswalks
--- Vegetation and/or trees obstructions relating to: a) vehicle clearance (min. height 14ft / width 8ft) requirements, or b) obstructing the Trails sidewalks
--- Dangerous street intersections with the Trails Pedestrian/Bike Trails, that requires crosswalk lines, signs or zebra crosswalks

Some Information about these Topics and possible Solutions can be found in:
- "Manual of Uniform Minimum Standards for Design, Construction and Maintenance for Streets and Highways (known as the "Florida Greenbook") 2018 & 2023 Editions
- FDOT Design Manual 2024
- FDOT Access Management Guidebook 2019

Below please find descriptive details / illustrations relating to these issues:

1.. Severely Restricted / Deficient Vehicle Turning Radii – Urgent Attention Needed!

The turning radii is severely restricted at two of the Main Trail 3-road (triangle) intersections, and doesn't comply with any current safely standards to accommodate today's public street traffic, that includes many more larger delivery vehicles, incl. various trucks, tractor trailers etc. than previous years!

1.1 Intersection – Main Trail next to 420 Main Trail:

Above: Substantially inadequate turning radii (circled in purple) shown from Main Trail towards W. Granada. As of today, there are several tire tracks on the grass in that corner and the street sign has been knock down many times.

Left: Same intersection seen from the other side - inadequate space / turning radii for larger vehicles (circled in purple) especially with a center island obstruction and a storm drain located in the right corner.

Potential solution – Replace with one lane roundabout, which would create a larger turning radius, and improve traffic flow.

1.2. Intersection: Main Trail & Shady Branch (next to Misner Branch).

Note! The two far left lanes - Inadequate with insufficient turning radii due to too narrow lanes (purple circle) when turning in either direction. The pedestrian guard rail (far left) forces a majority of turning vehicles to use more than one lane, already created several accidents with many more likely, if nothing is done fast, with potential legal actions against the City of Ormond Beach.
Potential solution – Replace with one lane roundabout, to accommodate larger turning radius, and improve traffic flow.

2.. Main Trail Bridge (Misner Branch)

This very old wooden bridge is inadequate for the current traffic weight load (limit to 35 tons), too narrow and shows serious and dangerous signs of cracks in the wood bearing structure, besides a large number of horizontal and vertical stress fractures visible on the bridge road surface. In April 2024, the bridge is up for a second-year inspection, that needs to be done carefully and in a comprehensive and detailed fashion, due to its age, poor condition, as well as, with all the added traffic in the last 2 years.

If **another 2,500+ projected daily trips** are added from the **proposed residential development Tomoka Reserve** at the **former Tomoka Oaks Golf Course**, it is most likely only a matter of time, before the bridge will fail, potentially causing serious injuries.

The above pictures clearly show the bridge road surface, displaying both serious horizontal and vertical stress fractures. The majority of dangerous problems lay underneath the road surface, and are not visible.

3.. Center Island Obstructions (creating too narrow vehicle lanes)

Public residential streets with a speed limit of 25mph or less, should preferably be designed with 12ft wide vehicle lanes (accepted design criteria), in order to accommodate larger trucks, tractor trailers and emergency vehicles (incl. Fire Ladder Trucks).

Parts of Main Trail feature divided medians with adequate 12ft wide vehicle lanes; however, other parts of Main Trail and a number of the Trails secondary roads, fail these commonly accepted safety design requirements, in part due to a number of smaller standalone Center Island obstructions. In special cases, the minimum lane requirements will allow for a width of no less than 10ft (for a straight road, without road height or width clearance obstructions), however not recommended.

Right:
Straight Street Lanes - next to 415 Main Trail – features several Center Island obstructions and unacceptably narrow lanes in both directions. Several vehicles have hit tree branches, as well as, the center tree, that has now started to uproot the road surface, since this 2021 picture.
At least the street is fairly straight, and not curved.

Left:
Curved Street Lanes – next to nr. 30 Choctaw Trail.

Major Center Island obstruction / unacceptably narrow curved lane (seen on right), as well as, low overhanging and obstructing tree branches.

All larger vehicles (incl. garbage trucks etc.) using this part of Choctaw Trail are forced to **use the opposite lane to pass**, which is NOT acceptable.

Actions Needed: There are approx. 15 similar Center Island obstructions throughout the Trails, that need **Your urgent attention**! It is obvious, that these danger areas would require re-engineering, and/or the Center Island to be partially or completely removed!

4.. Line of Sight Obstructions and/or
Dangerous Tree/Vegetation Obstructions / Limiting Vehicle Height and/or Width

A large number of the streets in the Trails display dangerous Line of Sight obstructions and/or overhanging tree trunks, canopies, branches or other vegetation obstructions. Some very noticeable obstructions were cleared and/or partially removed after previous hurricanes, but many more are still there, requiring the City of Ormond Beach urgent attention.

Above: Turn from Main Trail towards Misner Branch. This obstruction also affects the sidewalk.

Left: Intersection -Main Trail / Stonehaven Trail /back of Trails Shopping Center

This corner features a dangerous line of sight problem when exiting onto Mail Trail from the left, partially due to a < 90-degree intersection angle, as well as, substantial tree and vegetation obstructions (purple circle). Safety standards allows for lower < 2ft vegetation (small plantings), and higher trees, with no tree branches below 6-7ft, to allow for a clear line of sight.

Left: Choctaw Trail – Major vegetation obstructions

Actions Needed:
Line-of-Sight Obstructions: There are a number of these dangerous Line-of-Sight obstructions throughout the Trails, that need **urgent attention**! These danger areas need clearing and would require the Ormond Beach Public Works to step in!

Dangerous Tree/Vegetation Obstructions:
There are quite a number of these problem spots around the Trails that need attention. Since these obstructions are part of, and impacts the Public Street network, it would be reasonable to believe that the City of Ormond Beach is responsible for their removal, or clean up.

5.. Crosswalk and Sidewalk Safety Hazards

The Trails is an old lovely community, however, after 45+ years some safety upgrades and maintenance are inevitable needed, especially due to the larger volume of traffic. Despite the "No Through Traffic Signs", a number of non-resident drivers have discovered and using the Trails streets for easier access to, West Granada and/or Nova, creating higher speed issues (30-40 mph), besides not stopping for pedestrians. This creates serious and dangerous situations, especially when young children are walking / biking to the Trails Park / Sports Center, the Trails Shopping Center, and in the coming month, also to/from the Tomoka Elementary School when reopened, etc.

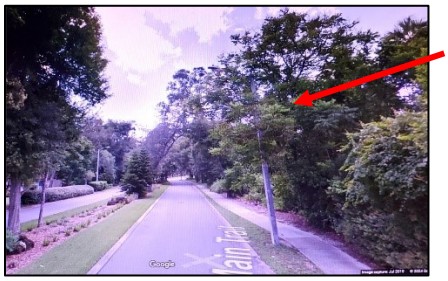
Right: Main Trail close to Rio Pinar.
With too many speeding drivers on Main Trail, this would be a perfect place to add a **Raised "Speed Bump" Zebra Crosswalk** (with minimal cost), designed for residential streets with speed limit < 30mph (Trails limit is 25mph). Currently, the crosswalk lines are quite poorly marked.

Left: This is a typical 6 inch **Raised Speed Bump Zebra Crosswalk,** and could easily be, and inexpensively installed at 2 - 3 Main Trail locations, to safeguard against accidents, and slow down speeders. Nowadays, these crosswalks are mandatory for residential streets in a number of countries, and have contributed to substantially limit accidents.

Action Needed: A number of Crosswalks are showing lines of poorly visibility, in some cases lines are missing and in other areas Zebra Crosswalks could be preferred with appropriate yield signs.

6.. Obstructed or Inadequately Functioning Street Lights

A recent review of the Trail's Public Street Lights (done after dark), shows many being obscured and/or blocked by tree canopies, some with lights flickering or, in a few cases not even operational.



Actions Needed: Obstacles need to be cleared in a 10ft circle around the light posts, in order to restore their intended function. An illumination test should be performed, where the indented area to be lit is measured. A few different types of lights are installed; from a tall "giraffe light" (Main Trail) to a shorter "top hat light". Main Trail will require 10,000–15,000 lumens (brighter), and the secondary streets an est. 3,000-4,000 lumens (softer), depending on the proximity to residential houses.

Finally … We, concerned residents of the Trails trust that You, our City Representatives, will seriously review this information and take needed actions, as well as, allocate resources and funds to make these improvements. The Trails being Tomoka Oaks' "sister" development, relies on You to also take care of these current issues at hand, and **NOT embark and approve a re-zoning** of the **former Tomoka Oaks Golf Course**.

Sincerely,

Erik Emsing

Erik Emsing (Resident of the Trails)
36 Choctaw Trail, Ormond Beach, FL. 32174
Cell: 386-843-3160 E-mail: eemsing@comcast.net

Dear Mayor Partington and City Commissioners,

While I have only been a resident of Tomaka Oaks since 2014, I have been coming to Ormond Beach since the 1980s and spent years looking for the perfect place live. When I found a house on Riverbluff drive ten years ago, I knew I had found an amazing spot. In my opinion Tomoka Oaks / The Trails is a very unique area that I assumed was fully developed and would not be destroyed by greedy developers with high density junk homes. While I am all for capitalism and growth when done properly, I am a very frustrated that in the last 20 years, greedy developers, lawyers, and corrupt public officials have allowed laws and loopholes that affect the quality of life of thousands. I have been silently following the plans to develop the Tomoka Oaks golf course but not been part of the vocal group or even attended any meetings. My thoughts were that the situation was out of my control. I was happy you rejected the initial proposal and held on to a slim hope the whole thing would not be allowed. However, after reading the recent article on how the developers pulled there proposal and came back with an even 'slimier' option for over 300 homes, I felt I need to say something. From what I have read, the golf course was zoned in such a way that it was never supposed to be developed… Unless you are naïve, It is obvious that the emergency access road clearly will become permanent…Years of construction noise, reduction of the surface water levels, increased traffic, nonconforming lots and homestyles, and no increase in public amenities will all lead to what? A slight increase in the Ormond Beach tax coffers, multimillions for a 3 or 4 owners/ developers, and a massive decrease in the quality of life of the hundreds or even thousands of residents of Tomaka Oaks and the Trails. Not to mention a permanent degradation of the landscape of Ormond Beach in general. Google Map it and you will see that if properly maintained, the layout of Tomka Oaks golf course could make it the premier course in this area. You have done such a good job for years keeping Ormond Beach one of the best places in North Florida, why wreak it just to benefit of a handful of greedy people?

"I'm not here on a holiday and this is my hobby. I can't play golf at night," Barshay, who owns the River Grille in Ormond Beach, said.

Sincerely,

Concerned Tomoka Oaks Resident

SUBJECT: PROPOSED REZONING OF ~147.94 ACRE PROPERTY AT 20 TOMOKA OAKS BOULEVARD IN ORMOND BEACH FROM PRD TO R2 PROJECT NUMBER ZMA 2023-054 (MERRELL/ TRIUMPH OAKS OF ORMOND BEACH LLC, APPLICANT); FP CASE #2021_08_03

Dear Mr. Spraker:

I am a professional planner, AICP #051,330. I have been retained by my clients, the TOMOKA OAKS HOMEOWNERS' ASSOCIATION (TOHA), John Power, President, to provide professional land use advice and to appear on their behalf as an expert witness in future hearings concerning the conversion of this 147-acre course, which my clients advise me was designed by the late legendary Sam Snead.

My client group's members have relied in good faith for decades on the representations of the original developer and the City of Ormond Beach. The extent of this reliance is set forth in detail at page 2 of the Staff Report for this case. As stated in the Staff Report: "The former Tomoka golf course land is situated in the Tomoka Oaks residential subdivision. The physical and historical connection of these two properties present unique circumstances regarding the developer's proposed development of the golf course land." [pg. 2]

Their property tax rates have been predicated upon the assumption that they and their successors in interest would continue to enjoy their proximity to an outstanding golf course in a serene and attractive natural setting with a high-quality open space amenity, designed in coordination with their individual properties and the other design components of their subdivision.

Research performed in preparation for this letter. In preparing this letter, my clients and I have researched the history of the subject property. We have made close reading of the following reports and documents, among others:

- *Daytona Beach News Journal* May 10, 2021 article "Residents riled up over former golf course's fate" by Clayton Park.
- *Ormond Beach Observer* May 21, 2021 article "Developers host first 'pre-neighborhood' meeting for Tomoka Oaks golf course project" by Jarleene Almenas.
- *Ormond Beach Observer* July 22, 2021 article "Early concept: 318 homes on former golf course" by Brian McMillan.
- August 3, 2021 Community Meeting slide presentation.
- Memorandum dated August 30, 2021 from Tom Harowski of TMH Consulting. (Mr. Harowski is a Tomoka Oaks resident and a professional land use planner.)
- Memorandum dated June 28, 2023 by Mr. Harowski, explaining in detail the case against the proposed 278 unit development and proposing alternative development standards.
- Staff Report dated January 11, 2024.

History of the Course. According to Mr. Park's *News Journal* article, the Tomoka Oaks Golf & Country Club, with its 130-acre course was opened in 1964, and was sold by its original developers in 1979 to Dick Ryals, a local radiologist who owned and managed the course as a family business until 2010. Based upon my conversations with affected Tomoka Oaks neighbors, I concluded that they were generally satisfied with the Ryals family's management of the course. The course was subsequently acquired and managed by Oakland Raiders veteran placekicker Sebastian Janikowski and has since been acquired by an ownership group headed by Ray Barshay and Carl Veile.

Considerations not addressed by the anticipated applicant.

1. The Ormond Beach Land Development Code contains no provisions for regulating the adaptive reuse of former golf courses, and specifically their conversion to residential uses. Some local governments, including Collier County and the City of Bonita Springs in Lee County, have adopted ordinances which define a detailed process for conversion of golf courses. The Collier County ordinance was adopted after a study of the challenges of golf course conversion. Both the ordinance and the study may be of value to Ormond Beach in designing its own procedures for golf course conversion.

2. The City of Ormond Beach has the option to impose a moratorium on the conversion of golf course properties to residential uses in order to have time to study the challenge of conversion and its effects on the neighborhood.

Recommended Findings of Fact

1. The existing golf course was designed by the late Sam Snead. Since it opened in the early 1960s, the course has been a defining feature the Tomoka Oaks neighborhood, providing high quality recreation and open space amenities.

2. The golf course was a vital and irreplaceable component of the original Tomoka Oaks development project and has continued to be a vital and irreplaceable component of the neighborhood as it now exists. Tomoka Oaks would be a very different community without this golf course and in particular the open space amenity which it provides.

3. There is a distinction between a freestanding golf course, e. g. a traditional membership country club or a municipal course, and a course that was designed as an integral part of a residential development, such as Tomoka Oaks. In such cases, the golf course is an integral part of the entire development, and not a mere amenity, such as a bocce court or a card room. The golf course itself is subject to many constraints which inform the design process—soil types, elevations, species, for example. The golf course is not simply a vacant space which was not considered desirable for residences or ancillary amenities.

4. The residential portions of a golf course development are designed concurrently, and in unity with, those of the course itself, which attracts golfers and prospective lot

purchasers and residents, for whom the golf course provides both a recreational and an open space amenity. Golf courses of this sort are designed to highlight the edge that forms the frontier between the residential lots and the course thereby enhancing the premium expected over non-frontage lots.

5. Since the early 1960s, the original residents and their successors and assigns have contributed to the profitability of the original developer and have enriched the City's tax base with their remittances of fees and taxes. They were motivated by their **investment-backed expectations** that a well-managed golf course in the heart of their community would allow them to continue to enjoy Tomoka Oaks as it was originally designed.

6. The applicant has an existing entitlement on this property which was granted by the City Commission. The City has no obligation to grant any number of additional residential units to replace the golf course.

7. In granting the original development order, the City Commission approved a ratio of residential development to recreation and open space, which has remained in place for more than half a century. The conversion of the golf course, or any portion of it, to residential would increase the residential to recreational/ open space ratio accordingly.

8. To the extent that the City of Ormond Beach may consider allowing some residential development within the existing golf course footprint, it is incumbent upon the City's decisionmakers, as its highest priority, to **maintain the open space amenity** which current residents and their predecessors in interest have enjoyed and which has been maintained for them since the early 1960. This enjoyment can be maintained in part through the use of greenbelts and opaque barriers with a minimum 100 foot width.

9. Greenbelts and opaque barriers would best be maintained by a continuing reliance on the Planned Residential Development (PRD) zoning category, which is set forth in great detail in both the Harowski memorandum and in page 7 of the Staff Report: "The City Commission considered the applicant's application for a development order under the PRD, Planned Residential Development zoning at a public hearing on November 7, 2023…The City Commission recognized that development of the golf course under PRD, Planned Residential Development zoning provided the best opportunity to minimize negative impacts on adjacent neighborhoods."

10. As an equally high priority to #7 above, the City's decision-makers must assure that any future residential development within the 130-plus acre footprint of the existing golf course are **compatible** with the existing residential lots and units of the Tomoka Oaks

    subdivision as defined in Sec. 163.3164(9) of Florida Statutes.[1] To achieve this compatibility, the HOA proposes a minimum 50-foot buffer between the existing homes and the new homes. The HOA further proposes that lots at the perimeter of the project should be larger to match the lot size of the existing homes more closely.

11. As a secondary, but significant, priority in addition to findings # 7 and # 8 above, the City's decision-makers must assure that a significant portion of the 130-plus acre golf course footprint, be maintained as a **recreational amenity** to serve the needs and preferences of existing and future residents. An example of such facilities would be a par-3 (executive) golf course of 9 or 18 holes. This can be maintained in part through the use of greenbelts and opaque barriers.

12. As a tertiary, but significant, priority in addition to # 7, 8, and 9 above the City's decision-makers must assure that protected species are identified and their habitats placed under conservation easement held by a third party, preferably a not-for-profit land trust.

13. Open space can be preserved by reducing the Applicant's proposed lot depth of 120 feet was offered as a means of protecting some of the existing tree cover (based on their statement at the "reveal" meeting). Trees preserved on residential lots are at a much higher risk for removal unless some type of special protection is given such as tree protection easements. Reducing lot depth to **110 feet** would provide at least 10 additional feet that could be devoted to buffer area.

14. Existing residential units in the Tomoka Oaks neighborhood tend to exceed 2,000 square feet in conditioned floor area, and many are much larger. The minimum floor area in the 2,000 square foot range with a two-car garage and other items such as porches added to that base, is acceptable for new residential units.

15. The diversity of housing types and designs is key to the aesthetic appearance and curb appeal of Tomoka Oaks. To maintain compatibility with those existing units, the

[1] "(9) 'Compatibility' means a condition in which land uses or conditions can coexist in relative proximity to each other in a stable fashion over time such that no use or condition is unduly negatively impacted directly or indirectly by another use or condition."

following guidelines should be considered for new residences within the 130-acre footprint of the historic golf course:

- Limit the width of front facing garages to one-third of the house width unless the garage is set back from the front façade of the house by at least 10 feet. No limit would be imposed on side-entry garages to encourage this style in the neighborhood.

- Roof lines will be variable using varied roof styles, pitches, projections, gables, dormers and similar design elements so that the new units do not look like the tent designs that seem so popular in newer subdivisions.

- A limitation on how frequently a floor plan can be repeated along with limits on the exterior design repetition. The front façade should include four to six individual design elements and blank walls should be prohibited. Newer home designs frequently use blank walls or nearly blank walls on the sides of homes. A mixture of one-story and two-story product will be encouraged.

16. Given the great long term impact of the conversion of longstanding golf course land to residential use, the City's decision makers must make all reasonable efforts to assure that existing residents and property owners have an opportunity to participate in any redesign of the existing golf course property.

17. The proposed rezoning is inconsistent with the definition of the LDR future land use category and with the following Goals, Objectives and Policies of the Ormond Beach Comprehensive Plan: Future Land Use Element Goal 1, Policy 1.1.2, Policy 1.1.6, Policy 1.1.7, Policy 1.1.14, Objective 2, Policy 2.2.1, Policy 2.2.5, Policy 2.4.7, and Policy 2.4.10, and should be denied because of those inconsistencies.

18. The proposed rezoning should be denied outright based upon the competent substantial evidence identified in the Harowski memorandum, the Staff Report which recommended denial, and the testimony which will be provided by TOHA and Tomoka Oaks residents and property owners.

This concludes my presentation. Based upon the preponderance of competent substantial evidence, it is my professional opinion that this application for rezoning should be denied outright.

Sincerely,

Max Forgey AICP

Max Forgey is an experienced land use planner with more than three decades of professional experience and exceptional success in administration of local government comprehensive planning strategies, land development and regulatory controls, governmental relations, and public policy communications. Primary clients are governmental organizations and private property owners.

His professional knowledge encompasses creating and developing community and small-area plans, urban design and architectural standards, land development entitlements, project management, and expert witness testimony. Max has worked on more than 30 cases across 25 Florida counties and municipalities, appearing before local planning agencies, city and county elected bodies, hearing examiners, administrative law judges, and circuit court proceedings.

Max also actively participates in and leads speaking engagements at professional development conferences and symposia through the Promised Lands section of the American Planning Association Florida chapter, with the American Institute of Certified Planners, with 1000 Friends of Florida and other organizations.

Qualifications

- FORGEY PLANNING. Owner of an urban planning and land-use consulting practice.
- Master of Public Affairs (MPA) in Urban and Regional Planning, Indiana University.
- Member American Institute of Certified Planners (AICP).
- Qualified as an expert witness in Lee County Hearing Examiner proceedings.
- Former Planning and Community Development Director in Charlotte County.
- Former Planning Commissioner (LPA), City of Cape Coral, Florida.

Accomplishments

- Established FORGEY PLANNING, an urban planning and land use consulting practice.
- Developed a template for auditing the effectiveness of existing local governments comprehensive plans and zoning code for internal consistency of plan policy framework.
- Authored “The Platted Lands Challenge” report for the six-county area of Southwest Florida offering policy guidance for platted, scattered-lot properties.
- Development of implementation strategies which employ automation to create linked mixed media tools for restructuring and updating local government planning and zoning regulations.

Certification

AICP (American Institute of Certified Planners) Certification #051,330 Florida Chapter, APA Member in good standing since 1993. A national professional certification maintained by the American Planning Association. AICPs must first meet educational standards and then pass an examination covering all aspects of professional planning practice, and are expected to maintain their membership through a self-directed program of study that is monitored by the national organization, which includes regular training in law and ethics.

Professional Experience

Forgey Planning Cape Coral, FL

Owner. 2008-present. A solo planning practice concentrating comprehensive planning work for Lee and Sarasota Counties, the City of North Port, and the Captiva Community Panel. Developed a template for auditing the effectiveness of existing local governments comprehensive plans which has been applied in Sarasota County and the City of North Port. An expert witness since 2013, working on more than 30 cases in 25 Florida counties and municipalities, appearing before planning commissions, city councils, county commissions, hearing examiners, administrative law judges, and circuit court. Qualified as an expert witness in Lee County Hearing Examiner proceedings.

Zoning Technologies Cape Coral, FL

President. 2011-2017. A start-up subsection 'S' corporation that specialized in restructuring and updating local government comprehensive plans and developing implementation strategies which employ automation to create linked tools (e.g. application forms, automated worksheets, case reports, and adopting resolutions). The Zoning Technologies expert system prototype products were marketed statewide and were demonstrated at the American Planning Association (APA) national conference in Atlanta in 2014.

Osceola County, Florida Kissimmee, FL

Planning Coordinator. 2005-2008. Authored key elements of the Osceola County Comprehensive Plan and most of the County's 2008 Evaluation and Appraisal Report.

Clay County, Florida Green Cove Springs, FL

Senior Planner. 2003-2005. Authored the county's Interlocal Service Delivery Agreement Report (ISDAR) mandated by the Florida legislature, identifying all service overlaps between and among all local governments within Clay County.

Lake County, Florida Tavares, FL

Planning Director. 2001-2003. Staff liaison to the Environmental Lands Management Advisory Committee, a citizen organization created by the Board of County Commissioners to study the creation of an environmental land program. Recommended policies were ratified in November 2002, when Lake County voters approved a one-third mil assessment for the acquisition of environmental lands.

Southwest Florida Regional Planning Council Fort Myers, FL

Planner. 1997-1998. Reviewed local government plan amendments throughout the six-county area and authored "The Platted Lands Challenge" report.

Charlotte County, Florida Port Charlotte, FL

Community Development Director 1995-1997; *Planning Director 1990-1995.* Early in my tenure, Gulf Development Corporation (GDC), the County's largest land subdivider, declared bankruptcy, shifting responsibility for completion of roads, bridges, drainage works, and utilities, to the public sector and forcing a host of development decisions upon the local government and public agencies. I had three memorable achievements during these seven years:

- Managed the research, preparation, and adoption of the County's Evaluation and Appraisal Report (EAR) and Comprehensive Plan. Aggressively negotiated with the Florida Department of Community Affairs (DCA) to remove the Plan's not-in-compliance finding.

- Led the staff team that rewrote the Charlotte County Comprehensive Plan and was the point person in the successful four-year effort to negotiate a stipulated settlement agreement between the Board of County Commissioners and the Florida Department of Community Affairs to find Charlotte County's Comprehensive Plan in compliance with Florida's Growth Management Act.

- Advocated against the rezoning of 42 parks (illustrated as such on GDC sales maps and the County's Future Land Use Maps) to residential uses. The Company's receivers eventually relented on their policy position and donated 41 parcels to the people of Charlotte County.

City of Cape Coral Cape Coral, FL

Deputy Planning Director. 1985-1990. Authored and supervised preparation of key elements of the 1988 Comprehensive Plan (the City's first plan under the 1985 Growth Management Act) and the City's 1989 Land Development Code.

Education

Indiana University Bloomington, IN

Master of Public Affairs (MPA) from the O'Neil School of Public and Environmental Affairs, 1982. Concentration in Urban and Regional Planning.

Bachelor of Arts (BA). 1976. Undergraduate degree in English Literature and History.

Important Cases, Continuing Education, Writing & Teaching

- Leading continuing education program for Cape Coral Planning & Zoning Commission (Local Planning Agency) with Ralf Brookes Esq. on September 25, 2023.

- Attending and participating in American Planning Association, Florida Chapter State Conference in Jacksonville September 5th through 6th, 2023.

- Attending and participating in *23rd Annual Florida Land Use Law Conference* in Tampa on August 28th and 29th, 2023.

- Program chair for APA Florida/ FPZA *"The Perfect Storm Eight Months Out: A Symposium for Professional Planners, Design Professionals, Plan Commissioners & Regular People*" at Charlotte County Event & Conference Center Punta Gorda May 12, 2023.

- Presenting a panel *"Incorporation, Annexation, and Disincorporation"* with Jim Studiale, AICP, and Luke Lirot, Esq. at APA Florida state conference on Orlando September 7, 2022.

- Co-presented a panel *"Legislative and Quasi-judicial: What Every Planner Needs to Know"* with Attorney Andrew Dickman, AICP, at annual conference of Florida Planning and Zoning Association on Captiva Island June 3, 2022.

- Program Chair for "*The Swamp Peddlers"*, an APA Florida/ Florida Planning & Zoning Association symposium conducted on August 6, 2021 in Punta Gorda. Keynote speaker Jason Vuic and other presenters explored the legacy of land sales scams in Southwest Florida on the twentieth anniversary of the General Development Corporation bankruptcy.

- Designed and co-presented *"Land Use 101"*, a seminar for planning commissioners, elected officials, and new planners, hosted by the City of Cape Coral on June 16 and July 14, 2021 with co-presenters Vince Cautero, AICP, the City's Community Development Director, and Attorney Ralf Brookes.

- Expert witness for client West Villagers for Responsible Government (WV4RG), a citizen organization which challenged the annexation of the 8730-acre non-contiguous West Villages subdivisions into the City of North Port. The City Commission rejected the Villagers' challenge by a unanimous vote, but following appeal presented by attorney Luke Lirot, the Twelfth District overturned the City's order denying petition for contraction in *West Villagers for Responsible Government v. City of North Port.*

- Moderated a panel for law credit at the September 9, 2020 Zoom-facilitated American Planning Association's Florida state conference. Co-presenters were attorneys Karen Consalo, Thomas

Hawkins, and Andrew Dickman. "*The Rules are* Very *Different Here: How to Reform Florida's Land Use Decision-making Process"* surveyed the inconsistencies among local governments' handling of land use decision-making and proposed a new Environmental Land Management Study (ELMS) to improve those processes.

- Attended and participated in American Planning Association Florida chapter's 18th annual *Public Policy Workshop* at Florida State University, Tallahassee February 2020.

- Drafted update of Town of *Fort Myers Beach Sign Ordinance* to reflect SCOTUS *Reed v. Gilbert* opinion for Weiler Engineering Fall 2019-Winter 2020.

- Program chair for "*Planners in Peril: Law, Legislation, and Ethics for Design Professionals*," an APA Florida Promised Lands section symposium December 6, 2019 at Bonita Springs City Hall.

- Program chair for "*How High is the Water, Ma?: Rising Sea Level on the Florida Gulf Coast and what we can do about it,*" sponsored by Friends of Boca Grande Community Center, March 22, 2019 at the Boca Grande Community Center Auditorium.

- Member, *Faith Presbyterian Affordable Housing Board*, a not-for-profit corporation which aspires to offer quality housing for low- and moderate-income persons in Cape Coral. Appointed 2018; appointment ended December 2020.

- Received 2018 American Planning Association Florida Chapter, Promised Lands section's first-ever *Wayne Daltry Award for Planning Programs* for developing professional education symposia.

- Prepared *policy audit of Town of Fort Myers Beach Comprehensive Plan* for Weiler Engineering, Summer 2018.

- Program chair for American Planning Association symposium "*Warped Tour '18: Land Use Law for Planners*" March 23, 2018 in Punta Gorda.

- Attended and participated in the hurricane-shortened APA Florida chapter annual conference in Daytona Beach September 4-6, 2017. Led panel with Greg Beliveau, AICP and Jane West Esq. entitled "*How to Build a Better Client*."

- Program chair for Captiva Community Panel/ Florida APA symposium "*Now in* My *Back Yard: Rising Sea Level on Florida's Gulf Coast and what can be done about it*" January 13, 2017 at South Seas Resort on Captiva Island.

- Co-authored article with Karen Consalo, Esq. "*Best Practices for Local Government Land Use Decision-making*" in Summer 2016 edition of *Florida Planning*.

- Speaker at American Planning Association Florida Chapter Annual Conference in Tampa, September 9, 2016. "*A Pre-tirement Guide for Perplexed Planners: Making the Transition to Solo Practitioner*."

- Attended and participated in CLE International's annual *Land Use Law symposium* in Tampa, August 18-19, 2016, and August 6-7, 2015.

- Speaker at University of Central Florida 2016 Public Administration Research Conference April 8, 2016. Topic: "*What's the Big Idea: New Software that Aids Land Use Decisions*."

- Attended and participated in *APA Florida chapter annual conference* in Hollywood, Florida September 10-13, 2015.

- Coordinator and presenter for daylong FAPA-sponsored symposium *"Everything You Ever Wanted to Know about Florida Land Use*" in Cape Coral May 16, 2014.

Ormond Beach, FL 32174

RE: Tomoka Reserve – Application for Zoning Map Amendment
City Staff Report & Quasi-Judicial Hearings on ZMA 2023-054

Dear Mr. Hayes:

The purpose of this correspondence is to formally communicate both the preliminary legal objections and quasi-judicial hearing expectations of Triumph Oaks of Ormond Beach, LLC ("Triumph Oaks") with respect to its pending application for a Zoning Map Amendment to re-establish the legally required development entitlements for its real property located at 20 Tomoka Oaks Boulevard in Ormond Beach ("ZMA 2023-054").

First and foremost, Triumph Oaks objects to the "analysis" employed by the City's Planning Staff in its recent report recommending denial of our application for a Zoning Map Amendment to re-assign the "R-2" label as the governing zoning district for the subject property. Instead of analyzing the actual application that we filed (ZMA 2023-054), Staff reviews our *prior* application for a new PRD Development Order (PRD 2022-043) that was withdrawn last year and no longer exists. According to City Staff, the PRD zoning district is "more appropriate" for our property.

The fundamental flaw with that opinion is this – a PRD zoning district reflects a *voluntary agreement* between a private property owner and the government as to site-specific zoning regulations for development of that property. Where, as here, the property owner does not agree to the terms requested by the government for a proposed PRD Development Order, the property owner is entitled – as a matter of clearly established law – to have the property assigned with a "conventional" zoning district label. Stated differently, the law does not permit the government to unilaterally assign (or maintain) a "PRD" zoning label for one's property without a PRD Development Order which actually identifies approved development rights for the property. Without an approved PRD Development Order, a PRD zoning map label is nothing more than just that – a label. This is not a debatable issue.

HISTORICAL EVOLUTION OF THE PENDING APPLICATION (ZMA 2023-054)

As you are aware, the City's official zoning map currently reflects a label of "PRD" for the subject property. This PRD label on the City's zoning map is a result of the City's prior decision to adopt Ordinance 2006-17 (the 2006 Ordinance), which did two things; namely, the 2006 Ordinance:

1. Amended the zoning map label for the subject property, changing it from its historical designation of "R-2" (a conventional zoning district which allows for single-family residential developments that meet the published standards and criteria of the City's Land Development Code) to a designation of "PRD" (a site-specific zoning district which allows for a specific "Planned Residential Development" proposal, the terms of which are *not* defined by the City's published land development regulations); and
2. Approved a PRD Development Order for "The Tomoka Oaks Golf Village PRD." That PRD Development Order reflected a final, negotiated agreement with the City as to the specific zoning entitlements for the property, including the permitted uses and development standards for the property (i.e., a mixed-use development consisting of 119 multi-family dwelling units, single-family homes and a re-designed golf course).

The proposed mixed-use development approved by the 2006 Ordinance, however, never materialized, and the PRD Development Order – per its express terms – expired in 2014. As a result, the property has a zoning map label of "PRD," but no corresponding PRD Development Order which actually defines the permitted uses and development standards for the property. And, as the City has repeatedly maintained (both verbally and in writing), ***this means that the property currently has no zoning entitlements.***

In short, as the City has previously acknowledged, Triumph Oaks needs one of two things before it can actually exercise *any* development rights on its property:

1. A new PRD Development Order (that is agreeable to both the City and the property owner); or
2. A Zoning Map Amendment (changing the official zoning map label for the property back to its original designation of "R-2").

The members of Triumph Oaks initially attempted the first option and filed an application for a new PRD Development Order (PRD 2022-043); however, they ultimately exercised their legal right to withdraw that application after the City Commission remanded it to the Planning Board for consideration of a new development plan with a "significant reduction" in the number of residential lots. Instead, the members of Triumph Oaks rejected that invitation and decided to move forward

with the second option – a zoning map amendment to re-affirm their legal right to use and develop their private property, consistent with the published development standards associated with the City's R-2 zoning district.

PROCEDURAL & LEGAL POSTURE OF THE PENDING APPLICATION (ZMA 2023-054)

The pending application seeks a Zoning Map Amendment, not a new PRD Development Order. Accordingly, as a matter of clearly established law, Staff's analysis of the application (as well as the quasi-judicial review of same by both the Planning Board and City Commission) *must* be limited to the merits of the actual application that is before them.

The City's Staff Report, however, engages in an extensive discussion as to why it believes the existing PRD zoning map label is "the most appropriate zoning for the Tomoka Oaks golf course property." The first problem with that statement is that it is factually inaccurate. There is no "Tomoka Oaks golf course property." The prior golf course was closed years ago, and the property has remained vacant and undeveloped for quite some time now.

The second problem with that statement is that it completely disregards the *actual* request that is currently pending before the City. **Again, Triumph Oaks is simply asking for a *Zoning Map Amendment* to re-establish R-2 as the governing zoning district for its property.** It is *not* asking the City to approve a proposed development agreement and it is *not* looking to publicly negotiate a new PRD Development Order. That ship has sailed, and the City has no legal authority to either delay a vote on our pending application or otherwise demand that we seek a new PRD Development Order. And I trust that your advice to the Planning Board members with respect to their obligation to base their decision only on the legally relevant facts associated with the *pending* application will be consistent with your advice to them at the hearing on my client's prior application (for a new PRD Development Order) on September 26, 2023, when you stated:

> What you have before you this evening is an application for development under a PRD, Planned Residential Development. This is not a straightforward R-2 residential development application. The property is not zoned for that. ***That is not a discussion we had tonight because you do not have that application before you.*** That discussion may come at a later date, but it is not currently before you.
>
> ***This [PRD Development Order application] is not an R-2 application for rezoning.*** Following Board comments, I will provide you with the standards for review [in making] your decision [on the pending application].

In short, the reason for the pending application for a zoning map amendment is that – per the City's own statement that "the property does not have any allowed zoning uses" – my client cannot exercise its right to develop its property with *any* lawful use because of the 2006 Ordinance that (a) amended the zoning map label for the property to PRD, and (b) approved a PRD Development Order (which no longer exists). Thus, per the City's own admission, the 2006 Ordinance is now facially

unconstitutional, as it deprives the property owner of its substantive due process right to be free from the "arbitrary or irrational exercise of power" by the government. See, e.g., WCI Communities, Inc. v. City of Coral Springs, 885 So. 2d 912, 914 (Fla. 4th DCA 2004). In the words of the Florida Supreme Court:

> An ordinance whereby the city council delegates to itself the *arbitrary and unfettered authority* to decide where and how a particular structure shall be built or where it shall located, without at the same time setting up reasonable standards which would be applicable alike *to all property owners similarly conditioned*, cannot be permitted to stand as a valid municipal enactment.
>
> North Bay Village v. Blackwell, 88 So. 2d 524, 526 (Fla. 1956) (emphasis added).

Stated differently, private property owners have a constitutional right to be free from any governmental laws (or actions) which seek to authorize the exercise of arbitrary discretion or unfettered authority over one's private property rights. See, e.g., Sears, Roebuck & Co. v. Forbes/Cohen Fla. Props., L.P., 223 So. 3d 292, 298 (Fla. 4th DCA 2017) (awarding attorney's fees for constitutional challenge to terms of City's PUD Amendment for violation of substantive due process rights because it permitted City "to arbitrarily and capriciously deprive Sears of its property rights"). And, in addition to the constitutional protections which safeguard one's substantive due process rights, private property owners are also protected by constitutional and statutory provisions designed to ensure the government must pay just compensation (and attorneys' fees) for any unlawful "taking" of private property.

Accordingly, please be advised that Triumph Oaks is fully prepared to take any and all legal action deemed necessary to preserve its constitutional and statutory right to develop its property, per the express directives and authority of clearly established law. That being said, I am confident that you will continue to provide your client with the appropriate legal counsel as to these matters (including the financial consequences for failing to follow the clearly established law), and I trust that the City will timely render a final order on our pending action no later than the scheduled meeting of the City Commission on February 20, 2024.

LEGAL CRITERIA/BURDENS OF PROOF FOR QUASI-JUDICIAL HEARINGS ON ZMA 2023-054

To the extent that the City's Staff Report is insinuating that the Planning Board must consider a "proposed development" in its quasi-judicial deliberations on our pending application for a Zoning Map Amendment, let me reiterate that we are *not* seeking approval of any specific development proposal. Rather, the *only* issues for consideration are whether the quasi-judicial body has been presented with competent substantial evidence reflecting that the evidentiary record reflects that the property owner has satisfied its initial burden of proof demonstrating entitlement to approval of the pending application. And, as the Florida Supreme Court made clear more than 30 years ago, the respective burdens of proof are as follows:

> [W]e hold that a landowner seeking to rezone property has the burden of proving that the proposal is consistent with the comprehensive plan and complies with all procedural requirements of the zoning ordinance. At this point, the burden shifts to the governmental board to demonstrate that maintaining the existing zoning classification with respect to the property accomplishes a legitimate public purpose.
>
> In effect, the landowners' traditional remedies will be subsumed within this rule, and the board will now have the burden of showing that the refusal to rezone the property is not arbitrary, discriminatory, or unreasonable.
>
> Board of County Commissioners of Brevard County v. Snyder, 627 So. 2d 469, 476 (Fla. 1993).

In sum, the first issue for consideration is whether the record reflects that application is consistent with the City's Comprehensive Plan and complies with all procedural requirements of the City's zoning code. That question has already been answered by the City's own Planning Staff, as the contents and conclusions of the Staff Report expressly reflect that (a) the R-2 zoning district is consistent with the City's Comprehensive Plan, and (b) the pending application complies with all procedural requirements of the City's zoning code.

Thus, the *only* lawful basis for the City to deny our application is if substantial competent evidence is presented to prove that maintaining the existing zoning classification of PRD (without a corresponding PRD Development Order) accomplishes a legitimate public purpose. As a matter of law, I respectfully submit that it is simply not possible for such a showing to be made; namely, the existing zoning classification of PRD does not afford Triumph Oaks with *any* zoning entitlements to develop its property. And the denial of one's constitutional and statutory rights to develop private property has *never* been judicially declared a "legitimate" public purpose; to the contrary, it is undeniably unlawful and will not be tolerated by the courts of this State.

In closing, let me restate and summarize both the purpose of the pending application and the lawful scope of the City's review of that application:

- Triumph Oaks has applied for a Zoning Map Amendment. The pending application neither includes nor requests consideration of *any* development proposal, as any such proposal would be entirely irrelevant to the City's lawful consideration of our application.
- The quasi-decision of both the Planning Board and the City Commission to either approve or deny the pending application must be based on legally competent evidence, which is limited solely to those facts that are actually relevant to the pending application. Mere opinions as to "appropriateness" of any new PRD Development Order proposal are just that, and they are entirely irrelevant to the City's lawful consideration of this application.

This is a simple request to re-assign the conventional zoning label of "R-2" to the property and re-affirm that it is entitled to be developed in accordance with the City's published development standards for that zoning district – just like all of the other parcels which surround the subject property. Triumph Oaks respectfully requests that the City vote to approve its request and restore the legally required development entitlements for its property.

I thank you in advance for your prompt attention to this matter and look forward to having our pending application (ZMA 2023-054) properly considered and voted on by the Planning Board at the quasi-judicial hearing tomorrow evening. In the meantime, should you have any questions or wish to discuss this matter further, please do not hesitate to contact either me or Rob Merrell.

Very truly yours,

Karl J. Sanders

Hi Steven,

Attached are the:

- Commission Hearing Minutes dated 10-3-2006
- The Tomoka Village Golf Village PRD development order dated 10/31/2006

Both documents state the golf course property that is not used for the condos/townhomes would remain as either golf course or open green space in perpetuity.

Please do provide these documents to the Planning Board for consideration at tonight's hearing. The orange highlighted areas of the documents pinpoint what is relevant.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Steven,

After reading all 212 pages, two questions:

Why were the Oct. 3, 2006 City Commission meeting minutes omitted? They have much greater relevance than the August 2006 Planning Board minutes.

Why the reference to the 2006 development order preserving a nine hole golf course? No mention in 2006 minutes of a nine hole course, the development order was always conditional on preserving an eighteen hole golf course or open space on an eighteen hole footprint.

Please correct my assumptions if they are wrong.

Thank you.

Jeff

BEFORE THE
CITY COMMISSION
OF THE
CITY OF ORMOND BEACH

IN RE: Application of RTH, Inc.
PRD-06-32
"Tomoka Oaks Golf Village" Planned Residential Development
within the limits of the existing Tomoka Oaks Golf Course

DEVELOPMENT ORDER

This matter having come on for public hearing before the City Commission of the City of Ormond Beach, Florida, on October 3, 2006 and October 17, 2006, and the City Commission having considered those items as required by Chapter 1, Article II, Section 1-18(D)(3) of the *Land Development Code*, and having heard testimony and evidence from all affected persons, the City Commission hereby finds that:

(1) The land use conforms to the standards and requirements of this *Land Development Code* and will not create undue crowding beyond the conditions normally permitted in the PRD, Planned Residential zoning district, or adversely affect the public health, safety, welfare or quality of life;

(2) The land use is consistent with the *Comprehensive Plan*;

(3) The land use will not adversely impact environmentally sensitive lands or natural resources, including but not limited to waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells;

(4) The land use will not substantially or permanently depreciate the value of surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties;

(5) Public facilities, such as roads, sidewalks, bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds will not be unduly burdened and are adequate to serve the land use;

(6) Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe;

(7) The land use is functional in the use of space and aesthetically acceptable;

(8) The land use provides for the safety of occupants and visitors;

(9) The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area; and

(10) The testimony provided at public hearings.

Thereupon and in consideration thereof, the City Commission hereby orders that:

A. The application of RTH, Inc., a Florida corporation, for the "Tomoka Oaks Golf Village" a planned residential development to allow the construction of consisting of 119-multifamily units (townhomes and condominiums) and 3-single family dwellings on a 147-acre parcel within the limits of the existing Tomoka Oaks Golf Course, in the R-2 Single Family Low Density zoning district, on that real property described and depicted on Exhibit "A" attached hereto and incorporated herein by reference, is hereby granted, subject to the following conditions:

1. All applicable provisions of Chapter 2, District and General Regulations, Article II, District Regulations, Section 2-35, Planned Residential Development, of the City of Ormond Beach *Land Development Code*, except as otherwise specifically modified hereby, shall at all times be strictly complied with;

2. That the following recommendations of the Planning Board shall be resolved and strictly complied with at all times:

a. The owner shall provide for covenants and restrictions that restrict the golf course to open space and golf course use. The City of Ormond Beach shall be involved in a manner that requires the approval of the City if the owners ever wish to remove the restriction on use.

b. The owner shall provide a note on the plat for the property indicating to future property owners the proximity of the airport and the flight pattern of the traffic from the airport.

c. The applicant shall include a landscape buffer around the 3 single-family lots that is a minimum of 10-feet in width with trees and shrubs in accordance with the minimum buffering requirements specified by the Land Development Code, Chapter 3, Article I, Section 3-06, as currently adopted.

3. That the following comments of the Site Plan Review Committee shall be resolved and strictly complied with at all times:

CITY LANDSCAPE ARCHITECT COMMENTS:

a. Wheel stops must be provided. Vehicle bumpers will not overhang the planting beds.

b. Applicant must provide a littoral planting detail and specifically show where they are to be planted on the pond banks in all applicable ponds; applicant must provide calculation for each pond; clarify if ponds are wet or dry; if dry then littoral planting is not required.

c. Applicant must provide a note on the plans that any tree needed to be removed during construction will require a one for one replacement penalty; protected trees will require one 2.5" caliper variety and specimen trees will require one 4.5" caliper variety to suit its planting location; replacement trees need to be Florida #1 at a minimum height of ten feet (10'). CPH will make the determination as to what is best suited for each replacement.

d. Remove the asterisk note on page TR-8.

CIVIL ENGINEER COMMENTS:

e. Applicant must provide legend to clarify phasing.

f. Sheet C6 – Include Temporary Construction Entrance in Phase 1A.

g. Sheet C2 – Provide As Built Requirements for Water and Sewer; relocate the As Built Requirements for Roadway Construction from sheet C36.

h. Sheet C22 –Removing the fire hydrant from the pond.

i. Sheets C45-C47 – Estimated Wet Season Water Table Elevation and Design Pond High Water Elevation to each section.

j. Applicant must locate easements for utilities and lift station on the plat.

CHIEF BUILDING OFFICIAL COMMENTS:

k. Applicant must provide additional fire hydrants to townhouse and condo locations.

l. Applicant must provide location of fire department connections.

m. The location of handicap spaces for the clubhouse is unacceptable; accessible parking spaces shall not cross the roadway and shall be as close to the building as possible.

FIRE DEPARTMENT COMMENTS:

n. Fire hydrants shall be installed at intervals not to exceed 500 feet; provide location of additional hydrants on plans.

PUBLIC UTILITIES COMMENTS:

o. Manhole #44 on page C18 of the plans needs to be lined.

p. Applicant must update fire hydrant assembly detail.

q. Show how reuse will be connected to existing reuse line or the proposed reuse line to be constructed to the reuse storage pond by Tomoka Oaks.

r. Reuse meter to be provided by owner of make and model approved by the City. A reuse agreement will need to be executed by the owner and the City.

s. Applicant must confirm if water master meter shall be needed or if units will be individually metered.

t. Applicant must provide match lines on composite utility sheets.

u. All water and sewer lines to be owned and maintained by City must be in public rights of way or 40 foot access and utility easement; an easement or deed is also needed for the lift station.

POLICE DEPARTMENT COMMENTS:

v. Parking lot lighting, pole heights must not exceed 20 feet and maximum wattage shall be 250 watts (see Land Development Code Chapter 3, Article 5 Architectural Design Standards, Chapter 3 Page 10). This will impact lighting calculations currently submitted.

4. The subdivision is approved to have a total of consisting of 119-multifamily units (townhomes and condominiums) and 3-single family dwellings with the following dimensions as shown on the attached plans. The townhomes and condominiums shall be developed in accordance with the conceptual plans approved for the proposed PRD and the requirements established in Chapter 2, Article IV, Section 2-57 M. Multi-Family Dwellings:

Land Use	Min. Lot Area	Min. Lot Width	Front Setback	Side Corner	Side Setback	Rear Setback
Single-family	10,000-square feet	100- feet	30-feet	20-feet	8-feet total 20-feet	25-feet

5. As a stand alone zoning district the following permitted uses and dimensional criteria for this Planned Residential Development are hereby established as follows:

1. **Permitted Principal Uses and Structures.**

   a. Single-family Detached units

   b. Townhouse Units, as located on the conceptual development plan prepared by Conklin Porter and Homes, CPH project number T7501, dated June 2005.

   c. **Multifamily Condominium units** as located on the

conceptual development plan prepared by Conklin Porter and Homes, project number T7501, dated June 2005.

2. Permitted Accessory Uses and Structures

a. Single Family detached dwellings and all accessory uses customarily associated with, dependent on and incidental to their permitted principal uses, provided that such uses conform to the regulations set forth in Chapter 2, Article III.

b. Home Occupations, Type "A", subject to the regulations set forth in Chapter 2, Article III.

6. The project shall be phased over a 5-year period and shall consist of 6 phases; a new phase shall not be initiated until the improvements and enhancements identified in the previous phase have been initiated and are substantially completed. This condition shall not prevent the owner from completing multiple phases concurrently. The following summarizes the phasing of the project:

Phase	Description
1A	Construction of the tennis facility, maintenance area, parking, spine road and associated stormwater improvements. The "Golf Townhomes" at the northern most portion of the development (9th and 10th fairway) will be constructed
1B	Demolition and reconstruction of the clubhouse and parking lot.
1C	Completion of all of the townhomes in the golf and tennis areas.
2A	Development of condominiums at tennis facility.
2B	Development of condominiums at the driving range and clubhouse areas.
3	Development of 3-single family homes on the estate lots.

B. The final plans for the development project shall be consistent with the provisions of this Development Order and the plans depicted in Exhibit "B" hereto; provided, however, that the said plans shall be amended as necessary in order to achieve such consistency.

C. No material change shall be made to the final plan for the development project without further review by the Planning Board and approval by the City Commission in accordance with the procedures for the approval of this Development Order.

D. All site construction activity shall be performed in strict compliance with the terms and conditions of this Development Order approved for this development project, and of the *Land Development Code*.

E. If the final plan approval lapses under the provisions of Section 1-14(C)(2) of the *Land Development Code*, before the planned development permit can be re-established, a new PRD Development Order shall be considered by the City Commission.

F. In the event the use of the land approved by this PRD Development Order is abandoned for a period of two (2) years or there has been no construction activity during that period, the permit shall be void and a Notice of Final Plan Revocation filed under the provisions of Section 1-14(C)(2) of the *Land Development Code*, before the planned development permit can be reestablished, a new PRD Development Order shall be considered by the City Commission.

G. Semi-annually, the Neighborhood Improvement Officer shall prepare a report indicating which planned developments are not in compliance with Section 1-14, or the conditions stipulated in the Development Order, in the event a Neighborhood Improvement Officer subsequently determines there to be any violation, such Officer shall promptly present such determination to the Special Master for hearing.

H. Pursuant to Chapter 1, Article II, Section 1-14(C) (2), of the *Land Development Code*, the first phase of this Special Exception shall automatically expire and become void, without further action by the City Commission, 24 months (October 17, 2008) from the date of City commission approval, unless a site plan or building permit has been issued prior to that date; and a use building permit is so issued, this Special Exception shall remain in full force and effect unless and until subsequently amended by the City Commission.

I. The expiration date of the sixth and final phase of the project to be constructed shall be five (5) years in the future, or to October 17, 20011, and shall automatically expire and become void, without further action by the City Commission, unless a building permit

is issued for the sixth and final phase of the project prior to that date; and if a building permit is so issued, the Development Order shall remain in full force and effect unless and until subsequently amended by the City Commission

J. This Development Order shall be recorded in the public records of Volusia County, Florida, at the expense of RTH, Inc., a Florida corporation, and shall be binding upon RTH, Inc., a Florida corporation, and its successors and assigns, and shall run with the real property described in Exhibit "A" attached hereto and incorporated herein by reference. (Parcel ID No. 3242-07-00-0010)

GENERAL NOTES:

ALL CONSTRUCTION SHALL BE IN ACCORDANCE WITH THE CITY OF ORMOND BEACH'S LAND DEVELOPMENT CODE REQUIREMENTS, AND THE STANDARD CONSTRUCTION DETAILS AND CONSTRUCTION SPECIFICATIONS (SCDCS). AN ENGINEERING PERMIT AND TREE REMOVAL PERMIT IS REQUIRED PRIOR TO STARTING CONSTRUCTION.

NO LAND SHALL BE CLEARED, EXCAVATED OR FILLED AND NO STRUCTURE SHALL BE ERECTED, REPAIRED OR DEMOLISHED WITHOUT PROPER PERMIT(S) AS REQUIRED BY THE CITY OF ORMOND BEACH.

NOTIFY THE CITY OF ORMOND BEACH'S ENGINEERING DIVISION AT 676-3269 48 HOURS PRIOR TO THE START OF CONSTRUCTION.

ANY CONSTRUCTION CHANGES TO APPROVED PLANS SHALL BE SUBMITTED TO THE CITY OF ORMOND BEACH FOR APPROVAL PRIOR TO PERFORMING THE WORK.

ROAD CONSTRUCTION AND PIPE INSTALLATION COMPACTION AND DENSITY TESTING SHALL CONFORM TO THE CITY OF ORMOND BEACH'S MINIMUM REQUIREMENTS. CERTIFIED COPIES OF TEST REPORTS SHALL BE SUBMITTED TO THE CITY INSPECTOR AND THE CITY'S ENGINEERING DIVISION.

A PRE-PAVING UTILITY INSPECTION MUST BE REQUESTED AND COMPLETED PRIOR TO THE PAVING OF ALL ROADS, STREETS, AND PARKING AREAS.

A FINAL INSPECTION, TO BE CONDUCTED BY THE CITY OF ORMOND BEACH, SHALL BE PERFORMED ON ALL CONSTRUCTION. THE DESIGN ENGINEER SHALL NOTIFY THE CITY OF ORMOND BEACH'S ENGINEERING DIVISION 676-3269 WHEN REQUESTING A FINAL INSPECTION.

THREE COMPLETE SETS OF AS-BUILT DRAWINGS (5 FOR SUBDIVISIONS) ARE REQUIRED TO BE SUBMITTED TO THE CITY OF ORMOND BEACH PRIOR TO REQUESTING A FINAL INSPECTION.

THE CITY HAS A CONTRACTOR FOR ROLL OFF SERVICE. NO OTHER CONTRACTOR SHALL BE PERMITTED TO PROVIDE THIS SERVICE. VERIFY COMPANY UNDER CONTRACT WITH THE CITY.

CONSTRUCTION STANDARDS FOR ALL DRAINAGE SYSTEM COMPONENTS SHALL CONFORM TO THE LATEST EDITION OF THE FDOT ROADWAY AND TRAFFIC DESIGN STANDARDS MANUAL.

ALL STORM SEWER PIPE SHALL BE REINFORCED CONCRETE (RCP), HIGH DENSITY POLYETHYLENE (HDPE), POLYVINYL CHLORIDE (PVC) OR ALUMINUM CORRUGATED METAL PIPE (ACMP), AS SHOWN ON THE PLANS.

STORM DRAINAGE PIPES SHALL BE A MINIMUM OF FIFTEEN (15) INCH DIAMETER OR EQUIVALENT.

STORM INLETS, MANHOLES AND CATCH BASINS SHALL BE EITHER POURED IN PLACE OR PRE CAST REINFORCED CONCRETE. STRUCTURES SHALL BE REQUIRED AT EACH CHANGE OF PIPE SIZE OR CHANGE IN PIPE DIRECTION.

STORM INLETS SHALL BE SPACED IN SUCH A MANNER AS TO ACCEPT ONE HUNDRED (100) PERCENT OF THE DESIGN STORM RUNOFF.

WET DETENTION PONDS SHALL BE EIGHT (8) FEET MINIMUM TO TWELVE (12) FEET MAXIMUM DEPTH BELOW THE DESIGN LOW OR NORMAL WATER STAGE.

MAXIMUM DISTANCES BETWEEN INLETS AND/OR JUNCTION BOXES:

PIPE SIZE (INCHES)	LENGTH OF RUN (FEET)
15	150
18	300
24 OR GREATER	400

ALL SWALES, DITCHES AND DRY RETENTION POND SIDE SLOPES SHALL BE NO STEEPER THAN 4:1 (H:V) AND SHALL BE SODDED.

NORMAL ROADSIDE SWALES SHALL BE CONSTRUCTED TO A MAXIMUM DEPTH OF 18" BELOW THE OUTSIDE EDGE OF PAVEMENT OR CONCRETE CURB.

CONCRETE EROSION CONTROL MUST BE PROVIDED WHERE SWALES OF CULVERTS INTERCEPT DRAINAGE DITCHES.

A MINIMUM ONE FOOT (1') FREEBOARD ABOVE THE DESIGN HIGH WATER ELEVATION IS REQUIRED AT ALL POINTS AROUND WET DETENTION PONDS.

LAKE INFLOW AND OUTLET STRUCTURES SHALL GENERALLY BE CONSTRUCTED WITH REINFORCED CONCRETE AND SHALL BE SUBJECT TO THE APPROVAL OF THE CITY.

SOIL EROSION CONTROL MEASURES, SATISFACTORY TO THE CITY, SHALL BE EMPLOYED DURING CONSTRUCTION AND UPON COMPLETION OF THE POND.

THE CITY MAY REQUEST THAT THE DEVELOPER SUBMIT A REPORT BY A QUALIFIED HYDROLOGIST ON THE IMPACT THE POND WILL HAVE ON NEIGHBORING WATER TABLE ELEVATIONS BOTH DURING CONSTRUCTION AND AFTER POND COMPLETION. THE CITY MAY REQUIRE GROUNDWATER MONITORING DURING THE POND EXCAVATION.

ADEQUATE MAINTENANCE EASEMENTS OR RIGHTS-OF-WAY AS APPROVED BY THE CITY SHALL BE PROVIDED AROUND THE ENTIRE PERIMETER OF ALL PONDS AND ASSOCIATED OUTFALLS DISCHARGING INTO AND OUT OF PONDS. APPLICABLE CROSS SECTIONS SHALL BE INCLUDED ON ALL FINAL DEVELOPMENT PLANS.

DEVELOPMENT PLANS SHALL CONTAIN DRAINAGE CONTROL STRUCTURE (OVERFLOW) INFORMATION, BOTTOM ELEVATION, TOP ELEVATION, NORMAL WATER LEVEL AND THE 25 YR. - 24 HR. DESIGN HIGH WATER LEVELS

IN GENERAL, ALL RETENTION/DETENTION PONDS MUST BE CONSTRUCTED PRIOR TO ANY ROAD, PARKING LOT OR BUILDING CONSTRUCTION COMMENCING OR AS CURRENT PERMIT CONDITIONS DICTATE.

THE ENGINEER OF RECORD SHALL BE RESPONSIBLE TO OBTAIN ANY AND ALL DEWATERING PERMITS THAT MAY BE REQUIRED.

CULVERTS CROSSING RIGHTS-OF-WAY SHALL EXTEND FROM RIGHT-OF-WAY LINE TO RIGHT-OF-WAY LINE UNDER THE ROADWAY.

ALL STORM WATER MANAGEMENT SYSTEMS ARE TO BE OWNED AND MAINTAINED BY EITHER THE SURROUNDING PROPERTY OWNERS OR AN ASSOCIATION OF THE SURROUNDING PROPERTY OWNERS OR SOME OTHER GROUP AS APPROVED BY THE CITY.

SANITARY SEWER CONSTRUCTION GENERAL NOTES

THE CITY'S PUBLIC UTILITY DEPARTMENT SHALL BE NOTIFIED PRIOR TO BEGINNING ANY SEWER CONSTRUCTION.

ALL SANITARY SEWER MAIN LINES SHALL BE A MINIMUM OF 8" IN DIAMETER. SERVICE LATERALS WITH MULTIPLE CONNECTIONS SHALL BE 6" DIAMETER OR LARGER.

ALL SANITARY SEWER LINES SHALL BE PVC SDR 35. IN PLACES WHERE A MINIMUM COVER OF 4.0' CANNOT BE MAINTAINED, C-900 GREEN PVC DR-25, CLASS 100 OR CONCRETE ENCASEMENT SHALL BE USED.

MINIMUM ALLOWABLE SANITARY SEWER SLOPES ALLOWED ARE:

8" PIPE 0.40%
10" PIPE 0.30%
12" PIPE 0.22%

SEWER LINE CONSTRUCTION SHALL BE ACCOMPLISHED BY THE USE OF A LASER INSTRUMENT UNLESS ANOTHER METHOD IS PREVIOUSLY APPROVED BY THE CITY.

THE CONTRACTOR SHALL AT ALL TIMES, DURING PIPE LAYING, DEWATER THE GROUND SUFFICIENTLY TO KEEP THE GROUNDWATER ELEVATION A MINIMUM OF 6" BELOW THE PIPE BEING LAID WITHIN THE AREA OF THE TRENCH.

ALL PIPES SHALL BE LAID ON A FIRM FOUNDATION. SOFT OR SPONGY BEDDING FOR PIPES WILL NOT BE ACCEPTED. ANY UNSUITABLE MATERIAL SHALL BE REMOVED AND REPLACED WITH A DRY, COMPACTED, GRANULAR MATERIAL SATISFACTORY TO THE CITY.

EXCAVATION AND BACKFILL: THE CONTRACTOR SHALL PROVIDE ADEQUATE SHEETING AND BRACING OF EXCAVATION WORK OR USE OF TRENCH BOX IN ORDER TO PROVIDE FOR THE SAFETY OF WORKMEN, AS WELL AS REPRESENTATIVES OF THE CITY, THE DESIGN ENGINEER, AND THE DEVELOPER.

THE CONTRACTOR SHALL INSTALL A METALLIZED FOIL LOCATER TAPE, OR SIMILAR DEVICE AS MAY BE APPROVED BY THE CITY FOR THE FULL LENGTH OF ALL PVC WATER, RECLAIMED WATER AND SEWAGE FORCE MAINS. THIS PIPE LOCATER AID SHALL BE INSTALLED (1'S) INCHES BELOW FINISHED GRADE OR AS DIRECTED BY THE MANUFACTURER AND IS IN ADDITION TO THE LOCATER WIRE REQUIRED IN THE UTILITY PIPE LOCATION MATERIALS DETAIL (MISCELLANEOUS DETAILS SECTION - M10).

MANHOLES SHALL BE LOCATED AT INTERVALS NOT EXCEEDING 400 FEET.

MANHOLE RIMS SHALL MATCH FLUSH WITH THE FINISH GRADE ELEVATION IN PAVED AREAS AND A MINIMUM OF 0.2 FEET ABOVE GRADE IN UNPAVED AREAS.

THE CONTRACTOR SHALL CONSTRUCT SANITARY SEWER MANHOLES IN SUCH A WAY THAT SEWER LINES DO NOT INTERSECT SEALED JOINTS BETWEEN SECTIONS OF THE MANHOLE.

RUBBER BOOTS AND STAINLESS STEEL BANDS SHALL BE UTILIZED IN THE CONNECTION OF THE SEWER MAIN TO THE MANHOLES (SEE RUBBER BOOT AND PRECAST JOINT CONNECTION DETAIL).

INDIVIDUAL SANITARY SERVICE CONNECTORS ON NEW CONSTRUCTION SHALL NOT BE CONNECTED DIRECTLY INTO MANHOLES, BUT TO SEWER MAIN LINES BY USE OF WYE CONNECTIONS.

FOR SINGLE FAMILY HOMES, SINGLE FOUR INCH SEWER SERVICES SHALL BE CONSTRUCTED AT EACH LOT OR UNIT AND LOCATED ON THE DOWNSTREAM SIDE OF THE LOT CENTER LINE. THESE SERVICES SHALL BE EXTENDED 4 FEET ABOVE GROUND AT THE PROPERTY LINE WITH A PVC RISER AND PLUG BEING EASILY VISIBLE FROM THE ROAD. RUBBER SEAL FITTINGS TO BE USED ON ALL LINES, NO GLUED JOINTS.

FOR MULTI-FAMILY AND COMMERCIAL SITES, SIX INCH MINIMUM SEWER SERVICES AND CLEANOUTS SHALL BE PROVIDED AS APPROVED BY THE CITY.

SANITARY SEWER LATERALS LONGER THAN 70 FEET, MEASURED FROM THE SEWER MAIN TO THE RIGHT-OF-WAY LINE MAY BE APPROVED ON A CASE BY CASE BASIS. SUCH LATERALS SHALL BE D.I.P. EPOXY LINED OR C-900 PVC.

SANITARY SEWER MANHOLES WHICH HAVE SEWER FORCE MAINS DISCHARGING DIRECTLY INTO THEM, OR ANY MANHOLE WITHIN 200 FEET OF A LIFT STATION, SHALL BE FIBERGLASS OR PVC LINED. RETRO-FITTING OF MANHOLES WITH LINERS SHALL BE REQUIRED WHEN NEW CONNECTIONS SUCH AS THIS ARE MADE. FIBERGLASS SHALL BE A MINIMUM 1/2" THICKNESS UNLESS APPROVED OTHERWISE BY THE CITY. LINING SHALL BE AGRU SURE-GRIP OR PRE-APPROVED EQUAL.

SEE CHART S-9C FOR PIPE SIZE AND MATERIALS.

THE CITY OF ORMOND BEACH REQUIRES THE DEVELOPER TO TELEVISE ANY AND ALL SANITARY SEWER MAIN LINES AND LATERALS PRIOR TO ANY FINAL ACCEPTANCE, AND RESERVES THE RIGHT TO REQUEST WATER AND AIR RESTING.

ALL SEWER MAINS PRIOR TO ACCEPTANCE BY THE CITY SHALL BE TELEVISED BY A REPUTABLE COMPANY THAT ENGAGES IN THIS TYPE OF WORK. THE VIDEO SHALL BE NON-STOP WITH AUDIO DESCRIBING WHAT IS BEING REVIEWED. WRITTEN VIDEO LOGS DESCRIBING THE CONDITION OF THE LINES SHALL ACCOMPANY THE TAPE SUBMISSION TO THE CITY.

CONTRACTORS SHALL BE REQUIRED TO TELEVISE ALL SEWER LINES IN THE PRESENCE OF CITY PERSONEL AND PROVIDE COPIES OF THE VIDEO TAPE TO THE PUBLIC UTILITY DEPT. ANY DEFECTS NOTED SHALL BE CORRECTED PRIOR TO ACCEPTANCE BY THE CITY.

ALL MANHOLES CONSTRUCTED IN SIDE YARDS, BACKYARDS, AND EASEMENTS OFF THE RIGHT-OF-WAY SHALL BE OUTFITTED WITH FIBERGLASS LINERS OR OTHER TYPES OF LINERS OR COATINGS APPROVED BY THE CITY. IN ADDITION THE CITY MAY REQUIRE LINERS OR COATINGS TO BE INSTALLED IN OTHER AREAS WHERE THE PUBLIC UTILITY DEPARTMENTS BELIEVE THE NEED IS JUSTIFIED.

ALL SEWER LINES WHICH ARE CONSTRUCTED OFF PUBLIC RIGHTS-OF-WAY WITHIN SIDEYARDS, BACKYARDS, AND OTHER POORLY ACCESSABLE AREAS SHALL BE CONSTRUCTED OF C-900 PVC, OR EPOXY LINED DUCTILE IRON PIPE. ABSOLUTLY NO USE OF PLASTIC STYRENE FITTINGS SHALL BE ALLOWED.

SEWER LATERAL LOCATIONS SHALL BE MARKED ALONG THE OUTSIDE OF THE CURB WITH A SAWCUT "V", OR BY A METAL TAB SET INTO THE PAVEMENT.

EZ-WRAP PLASTIC, AS MANUFACTURED BY PRESS-SEAL GASKET CORPORATION OR APPROVED EQUAL, SHALL BE USED ON THE OUTSIDE OF ALL MANHOLE AND WETWELL JOINTS. APPLY ONE LAYER OF 9" WRAP CENTERED ON EACH JOINT. A CITY INSPECTOR SHALL PERSONALLY INSPECT ALL JOINT SEALS PRIOR TO BACKFILLING OPERATIONS.

MATERIALS		
DIAMETER	MATERIAL	STANDARD
> 3" - 4"	PVC 1120 / SDR 21	ASTM D 2241
> 4" - 12"	PVC 1120 / CLASS 150	AWWA C 900
14" - 36" (16"- 24" — DR - 18) (30"- 36" — DR - 21)	PVC 1120	AWWA C 905

NOTE: *PVC PIPE COLOR SHALL BE BLUE FOR POTABLE WATER MAIN, GREEN OR WHITE FOR SEWER FORCE MAIN, AND PURPLE FOR REUSE MAIN.

WATER SYSTEM CONSTRUCTION GENERAL NOTES

THE CITY'S PUBLIC UTILITIES DEPARTMENT SHALL BE NOTIFIED PRIOR TO BEGINNING ANY WATER SYSTEM CONSTRUCTION.

DEWATERING SHALL BE PROVIDED TO KEEP GROUNDWATER ELEVATION A MINIMUM OF 6 INCHES BELOW WATER MAIN BEING LAID.

ALL WATER MAINS SHALL BE LAID ON A FIRM FOUNDATION WITH ALL UNSUITABLE MATERIAL (MUCK, ROCK, COQUINA, ETC.) REMOVED AND REPLACED WITH CLEAN GRANULAR MATERIAL.

TRENCHES SHALL BE BACKFILLED WITH CLEAN GRANULAR MATERIAL IN MAX. 1' LIFTS WITH A MINIMUM COMPACTION OF 98 PERCENT (AASHTO-T180) IN PAVED AREAS AND 90 PERCENT IN UNPAVED AREAS.

IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO ENSURE THAT TRENCH COMPACTION TESTS BE PROVIDED AT POINTS 1 FOOT ABOVE THE PIPE AND AT 1 FOOT VERTICAL INTERVALS TO FINISH GRADE, AT A MINIMUM SPACING OF EVERY 300 FEET, AND TO FURNISH COPIES OF TEST REPORTS PROMPTLY TO THE CITY ENGINEERING DEPARTMENT.

METALLIZED PIPE LOCATION TAPE SHALL BE LOCATED 15 INCHES BELOW FINISHED GRADE OR AS SPECIFIED BY MANUFACTURER FOR ALL PVC LINES. MARKER TAPE SHALL BE USED ON ALL DUCTILE IRON PIPE.

ALL WATER SERVICES (SINGLE 1" AND DOUBLE 1 1/2") SHALL BE POLYETHYLENE TUBING (BLUE IN COLOR); POLYBUTYLENE SHALL NOT BE ALLOWED.

ALL WATER SERVICE ENDINGS SHALL BE MARKED WITH 4" X 4" LUMBER (PRESSURE TREATED) EXTENDING 4 FEET ABOVE GRADE, WITH WATER SERVICES SECURED 24" ABOVE THE GROUND. WIRE TIES SHALL BE USED TO SECURE THE CURB STOPS TO SUPPORT POSTS.

WATER VALVES SHALL BE PLACED AT ALL STREET INTERSECTIONS AND AT MAXIMUM SPACINGS OF 500 FEET.

AT ALL WATER MAIN TEES AND CROSSES, VALVES SHALL BE INSTALLED ON ALL LEGS EXCEPT ONE.

APPROVED WATER VALVE TYPES ARE THE FOLLOWING:

A. STANDARD GATE VALVES LESS THAN 24" DIAMETER RESILIENT SEAT GATE VALVES (AWWA C-509).
B. TAPPING VALVES AND MECHANICAL TAPPING SLEEVE SHALL BE STAINLESS STEEL (AWWA C - 509)

ALL WATER VALVE BOXES SHALL BE ADJUSTED TO FINISH GRADE AND THE LIDS PAINTED BLUE TO MAKE THEM PLAINLY VISIBLE.

WATER VALVES SHALL BE COMPLETELY OPENED BY THE CONTRACTOR UPON FINAL ACCEPTANCE OF NEW WATER SYSTEMS IN THE PRESENCE OF UTILITY DEPARTMENT PERSONNEL.

ALL FIRE HYDRANTS SHALL BE CONSTRUCTED TO MAKE THEM EASILY ACCESSIBLE TO FIRE PERSONNEL IN CASE OF FIRE. THE MAIN NOZZLE CONNECTION SHOULD ALWAYS FACE THE STREET AND BE 16-18" ABOVE GRADE.

AS STANDARD PRACTICE, WATER MAINS SHALL BE INSTALLED 4 FEET OFF THE BACK OF CURB OR AS APPROVED BY THE CITY.

ALL WATER MAINS SHALL BE NSF-APPROVED FOR POTABLE WATER USE, AND SHALL HAVE A MINIMUM COVER OF 36 INCHES. IN SPECIAL CASES WHERE IT IS IMPOSSIBLE OR INAPPROPRIATE TO PROVIDE ADEQUATE COVER, DUCTILE IRON CLASS 350 OR CONCRETE ENCASEMENT MAY BE USED AS APPROVED BY THE CITY.

ALL PROPOSED WATER MAINS SHALL BE FLUSHED, DISINFECTED AND BACTERIOLOGICALLY CLEARED FOR SERVICE IN ACCORDANCE WITH LATEST AWWA STANDARDS AND THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION REQUIREMENTS.

WATER MAINS SHALL BE AWWA C-900 CL 150 OR D.I.P. CLASS 350 STANDARD CEMENT LINED.

UPON CONSTRUCTION COMPLETION AND ACCEPTANCE OF THE SYSTEM, IT SHALL BE THE DESIGN ENGINEER'S RESPONSIBILITY TO ENSURE THAT THE SYSTEM IS PROPERLY CERTIFIED AND ACCEPTED BY THE HEALTH DEPARTMENT, AND THAT CERTIFIED AS-BUILT DRAWINGS ARE PROVIDED TO THE CITY PRIOR TO PAVING AND ANY USE OF THE SYSTEM. PROVIDE THREE (3) BLUELINE COPIES AND ONE (1) MYLAR OF AS-BUILT DRAWINGS.

MEGALUG OR EQUIVALENT, RESTRAINED JOINT SYSTEM MAY BE USED ON ALL RESTRAINED FITTINGS, VALVES, ETC. MINIMUM DEPTH OF BURY ON PIPES NOT MEETING REQUIRED COVER REQUIREMENTS SHALL FOLLOW THE MOST RECENT DIPRA THRUST RESTRAINT DESIGN GUIDELINES.

WATER SYSTEMS SHALL BE PRESSURE TESTED AT 150 PSI STATIC PRESSURE FOR A PERIOD OF 2 HOURS PER AWWA STANDARDS. TESTS SHALL BE CONDUCTED BEFORE FINAL PAVING AND IN THE PRESENCE OF THE CITY'S INSPECTOR.

ALL WATER SERVICES SHALL BE MARKED WITH A "^" SAWCUT INTO THE CURB OR BY METAL TABS SET INTO THE PAVEMENT.

ALL WATER VALVES AND BLOW-OFFS SHALL BE MARKED WITH AN "X" SAWCUT INTO THE CURB OR BY METAL TABS SET INTO THE PAVEMENT, LOCATION OF METAL TABS IN INCHES FROM EDGE OF PAVEMENT SHALL EQUAL DISTANCE IN FEET FROM EDGE OF PAVEMENT TO VALVE.

WATER SERVICES SHALL NORMALLY BE DOUBLE 1 1/2" SERVICES LOCATED AT SIDE LOT LINES. IN INSTANCES WHERE SERVICES NEED TO BE OFFSET, 1" SINGLE SERVICES SHALL BE SPECIFIED. THESE SERVICES MAY BE OFFSET A MAXIMUM OF 5.0'.

UNIFLANGE 1300 SERIES PIPE RESTRAINTS AS MANUFACTURED BY FORD OR APPROVED EQUAL MAY BE USED AS APPROPRIATE FOR RESTRAINING IN-LINE PRESSURE PIPE EACH SIDE OF PIPE JOINT, AS REQUIRED BY RESTRAINT TABLE.

TRACING WIRE SHALL BE INSTALLED IN ACCORDANCE WITH UTILITY PIPE LOCATION MATERIALS DETAIL.

NO GALVANIZED PIPE, FITTINGS, ETC. ARE ACCEPTED.

ALL WATER METERS SHALL BE INSTALLED AT THE RIGHT OF WAY LINE ONLY REGARDLESS OF SIZE.

ROADWAY CONSTRUCTION NOTES

ALL RIGHT OF WAY OTHER THAN ROADWAY AREAS SHALL BE SEEDED AND MULCHED OR SODDED. THE CITY RESERVES THE RIGHT TO REQUIRE SODDING IN SPECIAL AREAS WHERE EROSION IS A CONCERN.

THE FOLLOWING WILL BE THE STANDARD PROTECTION FOR DITCHES UNLESS DRAINAGE CALCULATIONS INDICATE OTHERWISE:

SWALE PROFILE GRADES	PROTECTION REQUIRED
0.2% - 1.0%	SEEDING AND MULCHING
1.0% - 4.0%	SODDING
4.0% AND GREATER	DITCH PAVING

ALL FRANCHISE UTILITY CROSSINGS, INCLUDING BUT NOT LIMITED TO FPL, BELLSOUTH AND CABLE SHALL BE INSTALLED PRIOR TO INSTALLATION AND COMPACTION OF THE ROAD SUB BASE. ANY CROSSINGS AFTER INSTALLATION OF THE SUB BASE SHALL BE BY DIRECTIONAL BORE.

THE LIMITS OF STABILIZED SUB BASE SHALL EXTEND TO A DEPTH OF SIX INCHES (6") BELOW THE BOTTOM OF THE BASE AND OUTWARD TO TWELVE INCHES (12") BEYOND THE CURB.

THE STABILIZING MATERIAL IF REQUIRED, SHOULD BE A HIGH BEARING VALUE SOIL, SAND-CLAY, LIMEROCK, RECYCLED CONCRETE, SHELL OR OTHER MATERIAL AS APPROVED BY THE CITY AND A LICENSED SOILS ENGINEER.

THE SUB BASE SHALL BE STABILIZED NOT LESS THAN FORTY (40) POUNDS LIMEROCK BEARING RATIO (LBR). A COMPACTION OF NO LESS THAN NINETY-EIGHT (98%) PERCENT DENSITY BASED ON AASHTO T-180 SHALL BE REQUIRED.

TESTS FOR SUB BASE BEARING CAPACITY AND COMPACTION SHALL BE DONE AT A MINIMUM OF EVERY 300 FEET AND SHALL BE STAGGERED TO THE LEFT, RIGHT AND AT CENTER LINE OF THE ROADWAY.

BASES FOR ALL STREETS SHALL HAVE A MINIMUM SIX INCH (6") DEPTH. PRIMING AND SANDING SHALL BE REQUIRED AS SOON AS BEARING CAPACITY AND COMPACTION HAS BEEN ACHIEVED.

RECYCLED CONCRETE OR LIMEROCK BASES SHALL BE COMPACTED TO (98 %) MAXIMUM DENSITY BASED ON AASHTO T-180 MODIFIED PROCTOR TEST.

RECYCLED CONCRETE MIX DESIGNS SHALL BE SUBMITTED TO THE CITY FOR APPROVAL PRIOR TO START OF SUB BASE PREPARATION.

CEMENT DELIVERY TICKETS SHALL BE PROVIDED TO THE CITY AT THE TIME OF PLACEMENT.

TESTING OF THE IN-PLACE BASE SHALL BE DONE AT INTERVALS EQUIVALENT TO SUB BASE TESTING AND SHALL CONSIST OF, AS A MINIMUM, MOISTURE CONTENT AND COMPACTION TEST.

DESIGN MIXES SHALL BE SUBMITTED TO THE CITY FOR THEIR APPROVAL NO LESS THAN THREE (3) WORKING DAYS PRIOR TO ANY ROADWAY CONSTRUCTION.

ASPHALT SPECIFICATIONS SHALL BE SUBMITTED BY THE DESIGN ENGINEER WITH FINAL PLANS TO THE CITY. FLORIDA STATE CERTIFIED BATCH PLANTS MUST THEN CERTIFY THAT THESE APPROVED SPECIFICATIONS HAVE BEEN MET.

EXTRACTION AND GRADATION TESTS ON ASPHALT MIXES SHALL BE PROVIDED TO THE CITY TO INSURE THAT DESIGN MIXES MEET THE CITY STANDARD SPECIFICATIONS.

THE ROADWAY CROWN SHALL HAVE A STANDARD ONE QUARTER INCH (1/4") PER FOOT SLOPE.

ALL ROADWAYS WITH CURB AND GUTTER SECTIONS SHALL HAVE AS A STANDARD A MINIMUM LONGITUDINAL SLOPE OF 0.30

THE FINISHED PAVEMENT EDGE SHALL BE WITHIN ONE QUARTER INCH (1/4") OF THE ADJACENT CONCRETE CURB.

CONCRETE CURBS SHALL BE PROVIDED ON BOTH SIDES OF ALL STREETS AND CONSTRUCTED WITH 2500 PSI CONCRETE AT 28 DAYS.

CONCRETE CURBS SHALL BE SAW CUT TO A DEPTH EQUAL TO 1/4 OF CURB THICKNESS AT INTERVALS OF TEN FEET (10') WITH EXPANSION JOINTS AT STREET INTERSECTIONS, STRUCTURES AND ALONG CURVES AT SIXTY FEET (60') INTERVALS. ALL EXPANSION JOINT MATERIAL IS REQUIRED TO BE INSTALLED THROUGH THE ENTIRE DEPTH OF THE CONCRETE CURB.

AN "X" SHALL BE CUT IN THE CURB TO MARK THE LOCATION OF WATER DISTRIBUTION SYSTEM VALVE.

AN "T" SHALL BE CUT INTO THE CURB TO MARK THE LOCATION OF ALL VALVES OTHER THAN WATER DISTRIBUTION VALVES.

A "V" SHALL BE CUT IN THE CURB TO MARK THE LOCATION OF ALL SEWER SERVICES.

A "L" SHALL BE CUT IN THE CURB TO MARK THE LOCATION OF ALL RECLAIMED WATER SERVICES.

A "^" SHALL BE CUT IN THE CURB TO MARK THE LOCATION OF ALL WATER SERVICES.

THREE (3) CONCRETE CYLINDERS SHALL BE TAKEN AND TESTED FOR EVERY THREE HUNDRED (300) FEET OF ROADWAY CONSTRUCTED. TEST RESULTS SHALL THEN BE PROVIDED TO THE CITY AS THEY BECOME AVAILABLE.

THE DEVELOPER SHALL PROVIDE ALL REQUIRED PAVEMENT MARKINGS ON ALL ROADWAYS PER CITY, COUNTY AND STATE REQUIREMENTS. CENTERLINE STRIPES SHALL BE PROVIDED ON EXTENSIONS OF CITY COLLECTOR OR ARTERIAL ROADS, COUNTY ROADS AND STATE HIGHWAYS ONLY.

STOP BARS SHALL BE PLACED AT ALL SUBDIVISION ENTRANCES AND INTERSECTIONS CONTAINING CITY COLLECTOR AND ARTERIAL ROADS, COUNTY ROADS AND STATE HIGHWAYS.

ALL TRAFFIC CONTROL DEVICES PLACED AT INTERSECTIONS, PRIVATE STREETS, PUBLIC STREETS, COUNTY ROADS AND STATE HIGHWAYS WITHIN THE CITY LIMITS SHALL BE INSTALLED ACCORDING TO THE MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES, LATEST EDITION.

THE DEVELOPER IS RESPONSIBLE FOR PAYING FEES FOR ALL STREET LIGHTS PRIOR TO ACCEPTANCE OF THE PROJECT BY THE CITY.

STANDARD TURNING RADII FOR INTERSECTIONS:

3-LANE ACCESS OR FEEDER	35'
LOCAL TO COLLECTOR	35'
LOCAL OR COLLECTOR TO ARTERIAL	40'
ARTERIAL TO ARTERIAL	50'

CITY INSPECTOR SHALL BE PRESENT DURING PAVING OF ALL PUBLIC AND PRIVATE ROADS. PAVING SHALL BE PERFORMED DURING NORMAL BUSINESS HOURS, MONDAY THROUGH FRIDAY. PAVING DURING WEEKENDS IS NOT PERMITTED.

CONSTRUCTION METHODS AND DESIGN FOR CONCRETE PAVEMENT SHALL CONFORM TO FDOT STANDARD SPECIFICATION FOR ROAD AND BRIDGE CONSTRUCTION, LATEST EDITION.

ALL CONTRACTORS THAT ARE PERFORMING THE CONSTRUCTION OF PUBLIC IMPROVEMENTS (WATER MAIN, SANITARY SEWER MAIN, RECLAIMED WATER MAIN, STORM WATER PIPES AND INLETS AND ALSO CONSTRUCTION OF ROADWAYS) SHALL BE CERTIFIED WITH THE FLORIDA STATE DEPARTMENT OF PROFESSIONAL REGULATIONS (DPR) FOR THE TYPE OF WORK THAT THEY PERFORM. A COPY OF THE VALID LICENSE IS REQUIRED AT PRE CONSTRUCTION MEETING.

UTILITY DEPTH:

- HIGH VOLTAGE UTILITIES SUCH AS POWER (FEEDER, SERVICE AND DROPS) SHALL BE BURIED A MINIMUM OF 30 INCHES IN DEPTH.
- LOW VOLTAGE UTILITIES SUCH AS PHONE AND CABLE TV SHALL BE BURIED A MINIMUM OF 12 INCHES IN DEPTH FOR FEEDER AND SERVICES. SERVICE DROPS SHALL BE BURIED A MINIMUM OF 6 INCHES IN DEPTH.
- HIGH VOLTAGE UTILITIES INSTALLED PARALLEL TO PRESSURE MAINS SHALL MAINTAIN A MINIMUM FIVE FOOT SEPARATION.

GEOTECHNICAL TESTING REPORTS SIGNED AND SEALED BY A PROFESSIONAL ENGINEER SHALL BE SUBMITTED TO THE CITY OF ORMOND BEACH PRIOR TO FINAL SIGN OFF. REPORTS SHALL CLEARLY LABEL PROJECT NAME AND PHASE.

SITE DATA

1. EXISTING ZONING: R-3
PROPOSED ZONING: PRD

PLANNED RESIDENTIAL DEVELOPMENT (PRD)
SECTION 2-36 CITY OF ORMOND BEACH
LAND DEVELOPMENT CODE

PERMITTED USES: SINGLE FAMILY HOMES, TOWNHOMES, AND MULTI-FAMILY CONDOMINIUMS

2. DENSITY REQUIREMENTS
FUTURE LAND USE MAP: LOW DENSITY RESIDENTIAL
MAX. DENSITY REQUIREMENT OF 4.0 UNITS PER ACRE

OVERALL DENSITY OF PROPOSED DEVELOPMENT:
122 UNITS/147 ACRES = 0.83 UNITS/ACRE

SINGLE FAMILY ESTATE LOTS SUB AREA DENSITY:
5 UNITS/4.59 ACRES = 0.98 UNITS/ACRE

TENNIS COURT CONDOS SUB AREA DENSITY:
30 UNITS/7.92 ACRES = 3.79 UNITS/ACRE

TENNIS COURT TOWNHOMES SUB AREA DENSITY:
5 UNITS/1.35 ACRES = 3.70 UNITS/ACRE

GOLF COURSE CONDOS SUB AREA DENSITY:
54 UNITS/6.80 ACRES = 7.94 UNITS/ACRE

TOWNHOMES SUB AREA DENSITY:
28 UNITS/5.67 ACRES = 4.94 UNITS/ACRE

3. DIMENSIONAL REQUIREMENTS
ENTIRE SITE AREA: 147 AC
PROJECT AREA: 1,446,706.36 SF (33.21 AC)

MINIMUM PARCEL SIZE OF 5 ACRES REQUIRED
SITE AREA PROVIDED 147 AC.

MAXIMUM BUILDING HEIGHT OF 40' REQUIRED
MAX. 40' BUILDING HEIGHT PROVIDED

200 - FOOT MINIMUM SEPARATION FOR STRUCTURES OF MULTI-FAMILY AND ASSOCIATED PARKING FROM A A SINGLE FAMILY ZONING DISTRICT.
291.20 FEET PROVIDED

40-FOOT MINIMUM SETBACK REQUIRED (OTHER THAN MULTI-FAMILY USE)
165-FOOT MINIMUM SETBACK PROVIDED

4. INTERIOR ROAD SYSTEM
40-FOOT RIGHT OF WAY PROPOSED FOR INTERIOR ROADS

5. PARKING REQUIREMENTS

5.1 COUNTRY CLUB, GOLF COURSE AND TENNIS CENTER
100 SEAT RESTAURANT
40 SEAT BAR
296 SEAT BANQUET HALL
2,824 S.F. PRO SHOP
18 HOLE GOLF COURSE
6 TENNIS COURTS
7,379 S.F. TENNIS CENTER

PARKING REQUIREMENTS:
1 SPACE PER 4 SEATS - RESTAURANT AND BAR
(81 SEATS/4 = 46 SPACES

1 SPACE PER 3 SEATS - BANQUET HALL
296 SEATS/3 = 99 SPACES

3 SPACES PER HOLE - GOLF COURSE
18 HOLES * 3 = 54 SPACES

1 SPACE PER 250 S.F. - PRO SHOP
2,824 S.F. / 250 = 11 SPACES

2 SPACES PER TENNIS COURT
6 COURTS * 2 = 12 SPACES

1 SPACE PER 250 S.F. - TENNIS CENTER
7,379 / 250 = 30 SPACES

TOTAL SPACES REQUIRED = 241 SPACES
HANDICAPPED SPACES REQ'D = 7 SPACES

PARKING PROVIDED:
TOTAL PROVIDED: 241 SPACES
HANDICAPPED SPACES PROVIDED: 8 SPACES

5.2 TOWN HOMES
28 TOWN HOME UNITS
1 GUEST SPACE REQUIRED PER 2 UNITS
28 UNITS / 2 = 15 SPACES
HANDICAPPED SPACES REQ'D = 1 SPACE

PARKING PROVIDED:
TOTAL PROVIDED: 16 SPACES
HANDICAPPED SPACES PROVIDED: 1

5.3 GOLF COURSE CONDOMINIUMS
54 CONDOMINIUM UNITS
2 SPACES REQUIRED PER UNIT + 1 GUEST SPACE PER 4 UNITS
54 UNITS * 2 = 94 UNITS / 4 = 122 SPACES
HANDICAPPED SPACES REQ'D = 6 SPACES (2 PER BUILDING)

PARKING PROVIDED:
TOTAL PROVIDED:
108 GARAGE SPACES + 32 SURFACE PARKING = 122 SPACES
HANDICAPPED SPACES PROVIDED: 8

5.4 TENNIS COURT CONDOMINIUMS
30 CONDOMINIUM UNITS
2 SPACES REQUIRED PER UNIT + 1 GUEST SPACE PER 4 UNITS
30 UNITS * 2 = 38 UNITS / 4= 68 SPACES
HANDICAPPED SPACES REQ'D = 4 SPACES (2 PER BUILDING)

PARKING PROVIDED:
TOTAL PROVIDED:
56 GARAGE SPACES + 12 SURFACE PARKING= 68 SPACES
HANDICAPPED SPACES PROVIDED: 4

5.5 SINGLE FAMILY ESTATE LOTS
FULL ON-SITE PARKING PROVIDED

6. LANDSCAPE AND UTILITY LINES
ALL COMMON AREAS SHALL BE LANDSCAPED AND IRRIGATED

7. RECREATIONAL FACILITIES
THE PROJECT INCLUDES GOLF, TENNIS, AND SWIMMING FACILITIES

7.1 INDOOR RECREATION:
INDOOR RECREATION REQUIRED:
30 S.F. PER DWELLING UNIT= 30 S.F.*122 UNITS = 3,660 S.F.

INDOOR RECREATION PROVIDED:
7,379 S.F. TENNIS CENTER + 10,348 S.F. CLUBHOUSE = 17,821 S.F.

7.2 OUTDOOR RECREATION:
OUTDOOR RECREATION REQUIRED:
60 S.F. PER DWELLING UNIT= 60 S.F.*122 UNITS = 7,320 S.F.

OUTDOOR RECREATION PROVIDED:
GOLF, TENNIS AND POOL AREAS PROVIDED EXCEED REQUIREMENTS

7.3 GOLF, TENNIS AND POOL RECREATION SITES WILL COMPLY WITH ALL GENERAL SITE PLAN DESIGN AND CONSTRUCTION STANDARDS.

7.4 COMMON ACCESSIBLE OPEN SPACE
COMMON ACCESSIBLE OPEN SPACE REQUIRED:
30 S.F. PER DWELLING UNIT = 30 S.F.*122 UNITS = 3,660 S.F.

COMMON ACCESSIBLE OPEN SPACE PROVIDED:
GOLF COURSE WILL BE OPEN TO THE PUBLIC AND EXCEED REQUIREMENTS

7.5 NATURAL STATE:
20% OF THE PROJECT REQUIRED TO BE LEFT IN A NATURAL STATE

ONLY 33.21 ACRES OUT OF 147 ACRES WILL BE UTILIZED FOR DEVELOPMENT
OVER 20% OF THE PROJECT WILL REMAIN IN ITS NATURAL STATE

8. SUPPLEMENTAL REQUIREMENTS
FENCES: LOCATION OF FENCES ARE SHOWN ON DEVELOPMENT PLANS

LIGHTING: LIGHTING FOR THE PROJECT IS SHOWN ON THE PLANS

DEED RESTRICTIONS AND COVENANTS: NO AMENDMENTS TO THE DEED RESTRICTIONS AND COVENANTS SHALL BE MADE WITHOUT PERMISSION OF THE CITY

UNITY OF TITLE: ALL LAND WITHIN THE TOMOKA OAKS GOLF VILLAGE PRD IS UNDER THE CONTROL OF THE APPLICANT

ADDITIONAL AREA

OVERALL SITE PLAN

Sheet No. C5

EXHIBIT "B"
PAGE 4 OF 35

CONSTRUCTION PHASING PLAN

PHASE 1A SHALL INCLUDE CONSTRUCTION OF THE TENNIS FACILITY, AND MAINTENANCE FACILITY, PARKING TO SUPPORT THESE USES WILL BE CONSTRUCTED. THE NORTHERN MOST TOWNHOMES SHOWN ON THIS PLAN WILL ALSO BE CONSTRUCTED IN THIS PHASE. ALL REQUIRED ROADWAY IMPROVEMENTS AND UNDERGROUND UTILITIES TO SUPPORT FUTURE PHASES OF DEVELOPMENT WILL BE COMPLETED IN THIS PHASE. (WITH THE EXCEPTION OF THE ENTRANCE ROAD CONNECTION THAT WILL BE BUILT ON PHASE 1B).

PHASE 1B SHALL INCLUDE THE DEMOLITION AND RE-CONSTRUCTION OF THE CLUBHOUSE, CLUBHOUSE PARKING LOT, AND ENTRANCE ROADS AND ASSOCIATED UTILITIES AS SHOWN. COMFORT STATION WILL ALSO BE RECONSTRUCTED. THE BALANCE OF THE PROJECT'S TOWNHOMES WILL BE CONSTRUCTED IN PHASE 1B.

PHASE 2A SHALL INCLUDE CONSTRUCTION OF SOME OF THE CONDOMINIUM UNITS, AND ASSOCIATED UNDERGROUND PARKING, AS SHOWN ON THIS PLAN.

PHASE 2B SHALL INCLUDE THE CONSTRUCTION OF THE BALANCE OF THE PROJECT'S CONDOMINIUMS AND ASSOCIATED UNDERGROUND PARKING.

PHASE 3 SHALL INCLUDE CONSTRUCTION OF THE ESTATE LOTS.

NOTES:

1. SEGMENTS OF EMERGENCY ACCESS TRACT SHALL BE STABILIZED AND SIGNAGE PROVIDED PER CITY REQUIREMENTS.
2. UTILITIES WILL BE STUBBED IN ADVANCE TO FUTURE PHASE CONNECTION AS DEVELOPMENT PROGRESSES.
3. PHASES MAY BE ADJUSTED IN SEQUENTIAL ORDER, FOLLOWING STAFF APPROVAL.

LANDSCAPE NOTES:

1. The Landscape Contractor shall be responsible for all materials and all work as called for on the Landscape Plans and in the Landscape Specifications. In the event of variation between quantities shown on plant list and the plans, the plans shall control. The Landscape Contractor shall verify all quantities and report any discrepancies at the time of bidding.
2. The Landscape Contractor shall review architectural/engineering plans and become thoroughly familiar with surface and subsurface utilities.
3. Every possible safeguard shall be taken to protect building surfaces, equipment and furnishings. The Landscape Contractor shall be responsible for any damage or injury to person or property which may occur as a result of negligence in the execution of the work.
4. The work shall be coordinated with other trades to prevent conflicts. Coordinate the planting with the irrigation work to assure availability and proper location of irrigation flares and plants.
5. All planting shall be performed by personnel familiar with planting procedure and under the supervision of a qualified planting foreman.
6. All plant material shall be graded Florida No. 1 or better as outlined under Grades and Standards for Nursery Plants, Part I and II, published by the Florida Department of Agriculture and Consumer Services or to the standards as given in the latest "American Standard for Nursery Stock," American National Standards Institute.
7. The Landscape Architect or Owner shall have the right, at any stage of the operations, to reject any and all work and materials which, in his opinion, do not meet with the requirements of these specifications.
8. Except as otherwise specified, the Landscape Contractor's work shall conform to accepted horticultural practices as used in the trade.
9. The minimum acceptable size of all plants, measured after pruning, with branches in normal positions, shall conform to the measurements specified on the plant list, or as indicated on the Landscape drawings. Height and spread dimensions refer to main body of the plant and not extreme branch tip to tip. The caliper of tree trunks is to be taken one foot above the ground level.
10. Plants shall be protected upon arrival at the site, by being thoroughly watered and properly maintained until planted.
11. All tree pits shall be excavated to size and depth in accordance with the USDA Standard for Nursery Stock 260.1, unless shown otherwise on the drawings, and backfilled with the specified planting soil. The Landscape Contractor shall test fill all tree pits with water before planting to assure proper drainage percolation is available.
12. The Landscape Contractor shall be responsible for proper watering of all plants. All plants shall be thoroughly watered at time of planting and kept adequately watered until time of acceptance. It shall be the Landscape Contractor's responsibility to assure that plants are not over watered.
13. It shall be the Landscape Contractor's responsibility to prevent plants from falling or being blown over, to reset/replant and replant all plants which have or fall and to replace all plants which are damaged due to lack of proper guying or staking. The Landscape Contractor shall be legally liable for any damages caused by instability of any plant material.
14. All trees and all palms shall be guyed or staked or braced. The Landscape Contractor shall determine which small or multi-trunk trees need to be guyed and staked to maintain plants. Staking of trees and shrubs, if required, shall be done as per staking and guying detail prepared by the Landscape Architect. It shall be the responsibility of the Landscape Contractor to remove guys and stakes from the trees and job site after a period of 90 days.
15. Plants blown over by high winds, within the guaranteed period, shall not be cause for additional expense to the Owner, but shall be the responsibility of the Landscape Contractor. Damaged plants shall be replaced by the Landscape Contractor at no additional cost to the Owner.
16. Sod shall be certified to be free of the imported fire ant. Sod shall have a dense growth of acceptable grass, reasonably free of weeds with not less than 1 1/2" of soil firmly adhering to roots. It shall be the responsibility of the Landscape Contractor to measure and determine the exact ground required. This amount shall be verified with the Owner or Landscape Architect before installation.
17. The Landscape Contractor shall insure adequate vertical drainage in all plant beds, planters, and sod areas. Vertical drilling through any compacted fill to native soil shall be accomplished to insure drainage. If such drained fill is necessary to assure positive drainage, this issue shall be brought up by the Landscape Contractor at time of bidding.
18. The Landscape Contractor shall insure that his work does not interrupt established or projected drainage patterns.
19. The Landscape Contractor shall prune, shape and remove dead foliage/limbs from existing plant material to remain. Confirm with the Landscape Architect or Owner the extent of work required at time of bidding.
20. Mulch - All plant beds shall be top dressed with 3" shredded hardwood mulch (or approved equal).
21. Transplanted Material - The Landscape Contractor shall be responsible for determining and evaluating which plant materials are suitable for transplanting and shall verify this with the Landscape Architect or Owner. The Landscape Contractor shall take all reasonable, horticulturally acceptable measures to assure the successful transplanting of determined plant materials. The Landscape Contractor shall be responsible for replacing any relocated plant materials which die if such measures are not taken, as determined by the Landscape Architect or Owner. Replacement plants shall be of identical species and size if required.
22. MAINTENANCE PRIOR TO FINAL INSPECTION AND ACCEPTANCE:

    Maintenance shall commence after each plant is planted and the maintenance period shall continue until the job or possible phase of the job is accepted by the Landscape Architect or Owner. Extreme care shall be taken to instruct the Owner or his representatives in general maintenance procedures.

    Plant maintenance shall include watering, pruning, weeding, cultivating, mulching, tightening, and repairing of guys, replacement of stakes or dead plants, resetting plants to proper grades or upright positions and restoration of the planting saucer and all other care needed for proper growth of the plants.

    During the maintenance period and up to the date of final acceptance, the Landscape Contractor shall do all seasonal spraying and/or dusting of trees and shrubs. Upon completion of all planting, an inspection for acceptance of work will be held. The Landscape Contractor shall notify the Landscape Architect or Owner for scheduling of the inspection 10 days prior to the anticipated date.

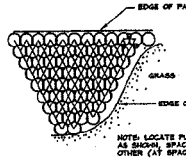
    At the time of the inspection, if all of the materials are acceptable, a written notice will be given by the Landscape Architect or Owner to the Landscape Contractor stating the date when the Maintenance Period ends.

    GUARANTEE AND REPLACEMENT:

    All plant materials shall be guaranteed for one (1) year from the time of final inspection and interim acceptance shall be alive and in satisfactory growth for each specific kind of plant at the end of the guaranteed period.

    At the end of the guarantee period, any plant required under this contract that is dead or not in satisfactory growth, as determined by the Owner or the Landscape Architect, shall be removed and replaced. Replacement plants shall have an extended guarantee, as noted above, from time of replacement.

    All replacements shall be planted of the same kind and size as specified on the plant list. They shall be the responsibility of the Landscape Contractor.



NOTE: LOCATE PLANTS IN A TRIANGULAR PATTERN AS SHOWN, SPACED EQUIDISTANT FROM EACH OTHER (AT SPACING SPECIFIED IN THE PLANT LIST).

Attachment J

Mayor Costello stated whatever name was attached, be it a ditch or tributary, what was important was that this project can not stop water flowing onto the land. He asked if the height of the fence would be at a low point compared to the road.

Mr. Ervin stated the maximum height of the fence would be six feet along the property line. He explained the industrial parcel closest to US1 would have an extensive amount of fill and would be four feet higher at a finished floor elevation than the homes in Ormond Lakes, and the project would have a six foot wall at that location along with landscaping with the finished grade approximately two to three feet below the top of the wall. Mr. Ervin recommended a condition be added to correlate the fencing to the elevation of the roadway.

Mayor Costello advised it was very dark in front of the McDonalds west of I-95 where the lights were shielded, but was very bright after passing the screening which proved the screening does work well.

Commissioner Kelley moved, seconded by Commissioner Gillooly, to approve Resolution No. 2006-222, approving the Special Exception to include the indoor pool as presented and the wall height to extend six feet above the elevation of a road entering or surrounding the property.

Call Vote:

Commissioner Kelley	yes
Commissioner Partington	yes
Commissioner Gillooly	yes
Commissioner Kent	yes
Mayor Costello	yes

Carried.

Mayor Costello called for a short break at 9:30 p.m. and he reconvened the meeting at 9:37 p.m.

Hearing no objection, Mayor Costello closed the public hearing on Item #9(E).

Item #9(F) - "Ormond Beach Commercial Complex"

RESOLUTION NO. 2006-223

A RESOLUTION AUTHORIZING THE EXECUTION AND ISSUANCE OF A DEVELOPMENT ORDER FOR "ORMOND BEACH COMMERCIAL COMPLEX" SPECIAL EXCEPTION ON A SITE LOCATED AT 500 WEST GRANADA BOULEVARD WITHIN THE B-9 (BOULEVARD) ZONING DISTRICT; BY AUTHORIZING A WAIVER OF THE MASONRY BUFFER WALL REQUIREMENTS ALONG THE REAR PROPERTY LINE, BY ALLOWING THE USE OF AN EXISTING SIX FOOT HIGH WOOD FENCE IN LIEU THEREOF; ESTABLISHING CONDITIONS AND EXPIRATIONS OF APPROVAL; AND SETTING FORTH AN EFFECTIVE DATE.

Commissioner Kelley moved, seconded by Commissioner Partington, to approve Resolution No. 2006-223, as read by title only.

Call Vote:

Commissioner Partington	yes
Commissioner Gillooly	yes
Commissioner Kent	yes
Commissioner Kelley	yes
Mayor Costello	yes

Carried.

Hearing no objection, Mayor Costello closed the public hearing on Item #9(F).

Item #9(G) – "The Tomoka Oaks Golf Village"

ORDINANCE NO. 2006-17

AN ORDINANCE AMENDING SUBSECTION A, ZONING MAP, OF SECTION 2-03, OFFICIAL ZONING MAP AND ZONING DISTRICT, OF CHAPTER 1, ARTICLE II, ESTABLISHMENT OF ZONING DISTRICTS AND OFFICIAL ZONING MAP, OF THE LAND DEVELOPMENT CODE, BY AMENDING THE OFFICIAL ZONING MAP TO REZONE A 147-ACRE PARCEL OF REAL PROPERTY FROM R-2 (SINGLE-FAMILY LOW DENSITY) TO PRD (PLANNED RESIDENTIAL DEVELOPMENT), SAID REAL

PROPERTY BEING LOCATED WITHIN THE LIMITS OF THE EXISTING TOMOKA OAKS GOLF COURSE; ESTABLISHING BOUNDARIES; AUTHORIZING REVISION OF THE OFFICIAL ZONING MAP; APPROVING A DEVELOPMENT ORDER FOR "THE TOMOKA OAKS GOLF VILLAGE" PLANNED RESIDENTIAL DEVELOPMENT (PRD); REPEALING ALL ORDINANCES AND PARTS THEREOF; AND SETTING FORTH AN EFFECTIVE DATE.

Mr. Ervin stated this was a rezoning for a 147 acre parcel from R-2 to Planned Residential Development (PRD). He noted there was a revised development order on the dais that identified the three items from the Planning Board recommendation that could be incorporated into the final development order. Mr. Ervin pointed out many comments from the Planning Board were recommendations for staff to check certain items such as water pressure and landscaping; therefore, they could not be identified in the development order; but the City Attorney culled through those comments to come up with specific requirements that could be incorporated into the development order, and they were addressed by staff. He stated the reuse availability, which was a major capital undertaking, was not feasible at this time. Mr. Ervin reported the landscaping plan was reviewed, and many of the trees being planted were already above and beyond the minimum requirement. He stated traffic improvements would be incorporated into site plan, and the applicant had agreed to those improvements. Mr. Ervin noted these improvements would include striping, signage, and cautionary signage. He advised staff contacted the Utilities Department regarding water presser concerns at least three times to verify whether or not water pressure problems were being experienced in the Tomoka Oaks area; but the pressures were meeting minimum requirements, and no specific problems were identified. Mr. Ervin stated there would not be any dead-end systems and would actually loop back into the existing system; therefore, water pressure should be maintained.

Mr. Ervin advised the development order would include notification to purchasers by a note on the plat that they were within proximity of the airport and within the flight plan of the airport. He stated the golf course shall remain a golf course and would not be able to be converted to any other use without approval by the City Commission. Mr. Ervin reiterated this property was Low Density Residential with an R-2 zoning; therefore, a developer could, in theory, develop the entire golf course for 600 homes, but considering the contours 300 single-family homes would be more realistic. He explained the proposal was for multi-family homes consisting of three and four story condominiums, town homes, and three single-family homes.

Mr. Rob Merrell, 1638 John Anderson Drive, representing the applicant, provided a visual presentation of the project. He reported he would rely on Mr. Ervin's conclusions in his staff report concerning Comprehensive Plan consistency, compliance with all of the City's Land Development Code requirements, and other issues. Mr. Merrell pointed out the Planning Board recommended unanimous approval with conditions that they have accepted. He stated there were issues everyone agreed on regarding some Smart Growth principles, and this project represented some of those principles such as the concept of urban renewal, proximity to services, clustering development, and the preservation of open space. Mr. Merrell explained this project was for 122 residential units, a new club house, pro shop, tennis center, tennis courts, and many amenities. He stated the property owner made a concession to cluster a lower number of units that would allow a great deal of open space. Mr. Merrell reported there would be a total of 84 condominium units, 35 townhouse units, and three residential units. He presented a computer rendering of the development proposed superimposed on the aerial photograph and pointed out the various elements of the proposed plan along with renderings of the buildings and landscaping. Mr. Merrell reported there would be considerable improvements to the lake system and the green for the golf course as a result of retrofitting the golf course for reuse water. He advised this request was for a planned redevelopment rezoning.

Mr. Harry Wendelstedt, 88 South St. Andrews, stated he has been a resident of Tomoka Oaks for 35 years, which was one of the finest residential developments in Volusia County. He stated he believed this would adversely affect the residents who live along the golf course. Mr. Wendelstedt reported people were told when purchasing their property that this golf course would remain for 99 years. He expressed a concern regarding property values; however, he has been informed that should not be a concern. Mr. Wendelstedt stated Tomoka Boulevard was two lanes, and he expressed concern regarding what would happen should another natural disaster occur such as the fires of 1998. He recommended placing a traffic light at the end of Tomoka Boulevard and Nova Road. Mr. Wendelstedt noted residents may have had a different view if the renderings and information were made available to the people earlier than this evening. He stated he opposed the development because the homeowners would loose the site of the rolling green fairways.

Ms. Joan Deemer, 86 South St. Andrews Drive, stated she lived in Tomoka Oaks for 28 years and opposed the recommended changes. She expressed concern that this would adversely affect the area with too many people and too many cars taking away the charm of Tomoka Oaks.

Ms. Zella Wilen, 48 Oakmont Circle, stated in the Fall of 1970 a request to rezone this property to R-5 was rejected at the Planning Board and in October 6, 1970, the Land Use Map was adopted by the Commission and that map showed Tomoka Oaks, including the golf course and undeveloped wooded areas, to be Single-family Residential Low Density zoned R-2, making Tomoka Oaks some of the largest lots in Ormond Beach. She reported that at the recent Planning Board meeting she objected to the entire rezoning change, stating Tomoka Oaks Boulevard should not be approved for an extension or a connection to any planned or named street within this area. Ms. Wilen voiced an objection to any overnight lodging should that be considered. She stated she opposed the increased traffic through Tomoka Oaks to the South St. Andrews area and noted this would add additional traffic to the Trails as well. Ms. Wilen reported the City Attorney in 1970 talked about spot zoning, cautioning the Planning Board that the golf course was a conditional use and would be able to request certain updating and remodeling, and that statement was relevant today. She noted restrooms were a problem due to vandalism, but were needed. Ms. Wilen pointed out the club house and garage areas could have been upgraded at any time in the past 36 years. She reported this change would impact the entire Tomoka Oaks area, not only those living on the golf course or within the 300 foot notification area. Ms. Wilen equated the 1970 R-5 request to this PRD request and opposed the change. She advised part of the selling point for homes in this area was that this would remain a golf course for 99 years, and she urged the zoning remain the same and the project be stopped.

Mr. Rob Merrell stated the property owner made a commitment to maintain the open space of the golf course in perpetuity. He pointed out the entire property was currently zoned for home sites; however, the development order under this proposal would indicate that the golf course would remain open space, and the City would then be able to enforce that as an element of the development order. Mr. Merrell reported speakers mentioned a 99-year provision, but there was no such covenant; however, this proposal would include a commitment to cluster 122 units in areas designed to be the least intrusive along with a recorded covenant to keep the golf course.

Mr. Hayes concurred that there was no covenant of record regarding the golf course; therefore, the applicant had a right to request this redevelopment of the Commission. He noted the City could now go back to try to do what some of the homeowners believed they already had for some 30 years.

Mr. Merrell advised the Commission received a complete traffic report in their information packet, and no failures in the transportation network were found, but several improvements were being proposed. He reported he met with as many people as possible prior to this meeting. Mr. Merrell advised that many people saw the pictures in advance of the Planning Board meeting, and there was a full-house at the Planning Board meeting. He noted many of those people did not come to make an objection tonight because they went away from the meeting satisfied that their questions and concerns were answered. He reported a DOT warrant would be needed for a traffic light, but the requirements for a light would not nearly be met. Mr. Merrell stated this was very different from what occurred in the 1970s because what was being shown now was what would occur if approved by the Commission, and it could not be changed.

Commissioner Kelley moved, seconded by Commissioner Partington, to approve Ordinance No. 2006-17, on first reading, as read by title only.

Commissioner Kent reported he met with the developers a year ago, and the plans had not changed a great deal. He expressed concern regarding buffering for the current residents; however, the presentation showed this was addressed, and he could support this proposal.

Commissioner Gillooly stated the concept had merit, but she questioned what protection the people who purchased a home on a golf course would have. She noted people needed to be aware when purchasing a home what could occur to the property surrounding their home. Commissioner Gillooly pointed out nothing was uncovered that would protect the people to have this remain a golf course. She stated Tomoka Oaks was and remains a premier community in the City, but the golf course had not keep up to that premier status. Commissioner Gillooly suggested this development would bring in new residents, but at a greatly reduced rate than was permitted. She noted the design was thoughtful in that it kept the buffer, and the improvements may help bring the premier status back to the homes, increasing the value of the

existing homes. Commissioner Gillooly informed Mr. Merrell that she would like to assure the residents this would be the last residential plan for the Tomoka Oaks community. She advised she also told Mr. Merrell that she noted the developer planned the project with surrounding green space and improvements to the golf course, but she needed additional assurances that this would remain intact. Commissioner Gillooly reported the reply she received was an iron clad commitment. She stated the developer had a right to develop this property in a residential manner, and all of the above-noted improvements would to be made, which would make the overall project better.

Commissioner Partington advised he met with the developer last year and would vote for this for some of the same reasons as Commissioner Kent and Commissioner Gillooly previously mentioned. He noted this project would improve the entire subdivision, and this development set the standard for developments in other areas. Commissioner Partington reported he was comfortable this developer would make this project as high a quality, if not a higher quality, than he had done previously.

Commissioner Kelley reported he also met with the developer and saw a presentation last year. He stated this answered many questions; and while it would not answer the questions of those who want the land to stay exactly as it was, it did answer the question of whether there would be residential buildings constructed directly behind someone who now had a golf course view. Commissioner Kelley advised the placement of the development would not adversely impact the visual effect. He pointed out this would provide assurance that this would never come back to an R-2, R-3, or R-4 and would be dedicated. Commissioner Kelley reported the owner had prospective buyers come to him years ago to develop the property, but chose not to sell because he wanted to keep the golf course. He advised the proposal would only improve the value of all of the property in the area. Commissioner Kelley stated he shared a concern relative to the traffic, but was convinced the people would not come through the Trails because it would be faster to go to Nova Road and turn west to Clyde Morris Boulevard. He noted the only difficulty he could envision was the time it would take to exit on to Nova Road, particularly eastbound. Commissioner Kelley reported this project would be an improvement to the entire neighborhood, and it would assure the golf course would remain.

Mayor Costello reported he met with the developer a year ago, and the reality of the situation was that this was a residential piece of land that could hold 600 units and could realistically only hold 300 units without a golf course, but this proposal was for 122 homes with a golf course. He stated the choice was that in order to keep the golf course, the owner would have to make some money. Mayor Costello explained the alternative was, because the land was poorly permitted years ago, a developer had the right to construct 300 single-family homes and remove the golf course. He pointed out that in this development order the only thing permissible was the golf course open space. Mayor Costello recommended the developer set aside the finances for a traffic light even if it was not warranted at this point in that he believed traffic to be a valid concern. He asked if DOT would permit a light if the money was available.

Mr. Sans Lassiter, Traffic Engineer, replied if a traffic light was installed that does not meet the DOT warrants and an accident was caused by the fact the signal was installed, it would make the one installing the light liable. He explained traffic lights are a major liability issue because they increase rear end accidents and are meant to avoid right angle accidents which are more severe. Mr. Lassiter advised that due to this particular entrance on this particular road, most of the turns from Nova Road would be northbound left turns entering the parcel and most exiting from this project would be eastbound or outbound right turns, and those movements do not conflict with each other; therefore, this would not meet DOT's requirement for a traffic signal, and they would not allow it to be installed without a significant change in development such as a build-out of area. He reported the count at the peak hours did not meet the warrant, and the requirement was to meet eight hours to warrant a signal.

Mayor Costello stated the City had hired Mr. Lassiter on numerous occasions, and he was known to be honorable and would not state anything that could later be refuted. He assured Ms. Wilen the plan did not include any hotel/motel type proposal.

Call Vote:

Commissioner Gillooly	yes
Commissioner Kent	yes
Commissioner Kelley	yes
Commissioner Partington	yes
Mayor Costello	yes

Carried.

Hearing no objection, Mayor Costello closed the public hearing on Item #9(G).

Correspondence after the Planning Board meeting: January 12, 2024 to April 8, 2024

To: Ormond Beach Mayor/Commission Office

My name is Beverly Loonis and I live at 41 Oakmont Circle in Tomoka Oaks.

I don't live on the golf course, my friends do. I live across the street.

Recently, a company was laying cable in our area. That resulted in multiple trucks and personell. This added to the already increasing traffic in the area.

Developers are fighting to add more mayhem to an already congested area. Their goal is financial gain. The residents of Tomoka Oaks want a quality of life, not more stop signs, stop lights, more people.

There will be added danger to children and animals (pets) due to increased vehicles on the road. As it is now,

in a 25 mph zone, some drive at least 50 mph. More homes and people will increase the possibility of danger.

If these developers continue with their desire to add more homes to our neighborhood, our streets will be a nightmare.

Huge Trucks, large earth movers, dirt, dust, workers in and out with their cars and trucks - this misery would continue for several years. When done, more traffic to our area, Nova Road, the Trails, even Granada and Rte 1.

To these developers, I say, leave us. Go to an area where the landscape has already been destroyed, where there isn't a neighborhood that doesn't welcome you.

Beverly Loomis
41 Oakmont Cir.

Ormond Beach City Commissioners,

My name is Melonie Caldwell my Husband and I own and reside in Tomoka Oaks on Oakmont Circle, Ormond Beach, FL. I am writing regarding the proposed R-2 Rezoning of 20 Tomoka Oaks Boulevard.

I understand that growth and development are in our future. However, I have major concerns with the Rezoning of Tomka Reserve from PRD to R-2.

In prior meetings the concern of both the Planning Board and City Commissioners was that the proposed development was too dense for the area. If it was to be rezoned to R-2, the original proposal of 272 houses could change to even more houses. This is going in the opposite direction; from the direct recommendation the developer was given, to decrease the density. The developer stated that decreasing the number of lots just wouldn't work. The fact is it would work, they just don't think their profit would be as high. I am not sure how them not making as much money as they want is the city's problem. They then threatened to rezone the area to R-2, however this is not up to the developer, the area does not have to be rezoned. When they purchased this unique property, they were fully aware of the PRD zoning. There is no reason to rezone this to R-2 and the should be denied.

With only one way in and out of this area, there would be safety concerns for this parcel being zoned as R-2. Being in Florida, national disasters happen quite frequently. With the one way in and one way out, evacuating the area at an R-2 density will create issues. There are only three ways out of Tomoka Oaks, two of which are through the very narrow streets of The Trails. The single entrance into the parcel is located on a small diamond that will get backed up at the inter section Tomoka Oaks Blvd and Nova Road

Rezoning this to R-2 would make this parcel too dense for the area. This is why I oppose the rezoning that is being proposed.

Thank you for your time and consideration.

Best Regards,

Melonie Caldwell
Tomoka Oaks
Ormond Beach, FL

February 23, 2024

Dear City of Ormond Beach Commission,

Before purchasing the Sam Snead Golf & Country Club property in April 2021, did the Tomoka Reserve applicant verify all possible zoning options with the City? It would appear they did not.

Did the applicant provide competent substantial evidence at the Planning Board January 11, 2024 meeting that supports their R-2 Zoning Map Amendment ZMA 2023-054? It would appear they did not.

Is the applicant truly in "limbo" to exercise any development rights as their legal representative claimed at the January 11, 2024 Planning Board meeting? They appear to think so. History appears to refute that claim.

The 147 acre Sam Snead Golf & Country Club plat was amended in 2006 from R-2 to PRD zoning during the City's approval of the Tomoka Oaks Golf Village PRD. Throughout the 2006 PRD hearing process, the City **implicitly** recognized numerous times the perpetuity use of the golf course land to remain a golf course or open space recreational area as has been relied upon in good faith by Tomoka Oaks homeowners since the 1963 inception and 18-year build-out of the Tomoka Oaks **master planned community**. [1]

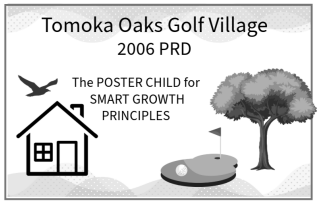
The current owners of the Sam Snead Golf & Country Club plat, Triumph Oaks of Ormond Beach, I, LLC, submitted their PRD-2022-043 Tomoka Reserve application in April 2022, *as was their right under the conditions of the expired 2006 Tomoka Oaks Golf Village Development Order*. [2] And when their 2022 Tomoka Reserve PRD application failed to get their desired 272 density outcome, they withdrew their PRD and submitted a Tomoka Reserve zoning map amendment to revert back to the original R-2 zoning in order to justify even higher density for Tomoka Reserve.

As Planning Board Chairman Doug Thomas stated at the end of the January 11, 2024 Planning Board meeting for Tomoka Reserve's zoning map amendment, this was the first time in his 30+ years on the board that he had ever seen an applicant request to "go backwards" which goes against logical development practices. The other board members agreed with Chairman Thomas and with the Staff Report's denial recommendation. The Board unanimously recommended denial of the R-2 zoning map amendment. Now you, our commissioners, have to determine if the property remains zoned PRD or goes backwards to R-2.

Let's review what "going backwards" from PRD to R-2 should take into consideration:

- To begin with, the 2006 Tomoka Oaks Golf Village PRD application to rezone the Sam Snead Golf & Country Club plat from R-2 to PRD retained the 18-hole golf course in perpetuity while concentrating 119 multifamily units at the core of the golf course.

- This 2006 PRD application was applauded and unanimously approved by the 2006 Planning Board, the 2006 Commission, the City Attorney, the City Staff, and the applicant's attorney, Rob Merrell who stated the PRD was representative of a "Poster Child for Smart Growth principles.[3]"



- Let's look at some highlights from the August 10, 2006 Planning Board minutes [3] to get some context for our Poster Child:

    - The city recognized Tomoka Oaks homeowners had relied upon the golf course and bought their properties in good faith believing that the golf course would always be there.

    - Mr Merrell's poster child touted a density of only 119 clustered units and 3 estate homes which satisfied traffic issues and would restrict in perpetuity the remaining 18-hole golf course recreational area to "forever remain recreation/open space."

    - Staff recommended that the development order blanket the remaining golf course property with a conservation easement so the land area could not be used for anything other than the golf course or open space purposes.

    - In response to concerns that the project might go bankrupt or be a victim of a poor economy and not be built, City Attorney Randy Hayes said the development order would run with the land. To protect Tomoka Oaks homeowners, the current golf course property owner and future owners were subject to the requirements of the development order.

- Now let's take a look at some highlights of the City Commission first reading on October 3, 2006 [4] to provide even more justification for the unanimous R-2 to PRD rezoning:

    - Mr. Merrell said the 2006 proposal included a commitment to cluster 119 multifamily units, and 3 estate homes, in areas designed to be the least intrusive to Tomoka Oaks homeowners. And covenants would be recorded to restrict the golf course property to remain a golf course and protected green space.

    - Commissioner Gillooly received an "ironclad commitment" from Mr. Merrell that this would be the last residential plan for the Tomoka Oaks community.

- Commissioner Kelley said the PRD provided assurance this zoning would never come back to an R-2, R-3, or R-4 and would be dedicated.

- Mayor Costello said that “in this development order the only thing permissible was the golf course open space.”

- The City **implicitly** recognized the use of the Sam Snead Golf & Country Club parcel to retain a golf course or recreational green space in perpetuity.

- The Commission unanimously approved the PRD at their subsequent October 17, 2006 second reading. [5]

- Highlights of the Tomoka Oaks Golf Village Development Order for PRD-06-32 (recorded 10/31/2006, Book 5944, Page 2183) which validate the City’s implicit recognition of the land use to retain the 18-hole golf course property in perpetuity include:

  - The owner shall provide for covenants and restrictions that restrict the golf course to open space and golf course use. The City of Ormond Beach shall be involved in a manner that requires the approval of the City if the owners ever wish to remove the restriction on use.

  - The Development Order shall be recorded in the public records of Volusia County Florida, . . . and shall be binding upon RTH, Inc. . . and its successors and assigns, and shall run with the real property (Sam Snead Golf & Country Club parcel ID No. 3242-07-00-0010).

  - In the event the use of the land is abandoned for a period of two (2) years, or there has been no construction activity during that period, the permit shall be void . . . and a new PRD Development Order shall be considered by the City Commission.

  - The Development Order approved for RTH, Inc. was active for 8 years from 10/17/2006 through 10/17/2014. During this active timeframe:

    - Approximately 156 home buyers purchased homes in Tomoka Oaks, with 108 homes identified by the MLS as either being “on the golf course” or in a “golf course community.” [6] Buyers bought in good faith that the golf course land was protected in perpetuity per recorded Development Order 5944 / 2183.

Sample MLS “remarks” during active 8 year 2006 Dev Order

- On the 18th green
- On 13th green
- Backs up to the 7th fairway
- View of golf course
- On the golf course
- Exceptional golf course living
- Golf course right across the street
- Tomoka Oaks, a well established neighborhood and a golf course community

        - Prior to any development, RTH, Inc. conveyed the property, as well as the Development Order running with the land, to Putnam State Bank on 7/21/2010 (Warranty Deed, Book 6496 / Page 4634, Volusia County FL).

        - Putnam State Bank sold the property to EJTS Holding, LLC on 12/12/2011 (Special Warranty Deed, Book 6659 / Page 1525, Volusia County FL). Deed states: *Sale of Sam Snead Golf & Country Club subject to encumbrances, easements and restriction of records. Together with all the tenements, hereditaments and appurtenances thereto belonging in any wise appertaining.*

        - The Development Order expired on 10/17/2014. Although the permit was now void, per the conditions of the Development Order, the City Commission could still accept a new PRD application for the property.

- EJTS Holding, LLC sold the Sam Snead Golf & Country Club property to Triumph Oaks of Ormond Beach I, LLC on 4/21/2021 (Book 8036, Page 3448, Volusia County Florida).

    - Warranty Deed states: *Sale of Sam Snead Golf & Country Club subject to reservations, covenants, conditions, restrictions and easements of record and to all applicable zoning ordinances and/or restrictions imposed by governmental authorities, if any.*

    - Cobb Cole's own title insurance analysis indicates that insurance coverage does not exist for the 2006 Development Order thus expressly acknowledging the 2006 Development Order. [7]

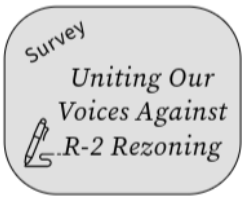
So is the applicant's claim valid that their property rights are in limbo and the city is unlawfully denying their development rights? Or is the applicant legally allowed to submit as many PRD applications as necessary to negotiate a development acceptable to the City Commission as was incorporated into conditions of the 2006 PRD Development Order should it expire?

The applicant has explicitly threatened to sue the City if the Commission denies their R-2 zoning map amendment. Should the Commission deny the R-2 zoning map amendment:

> And should the applicant file an Appeal
> > And should a judge rule on the facts presented at this hearing
> > > Or should mediation be recommended to come to an agreement on appropriate zoning and the number of homes that can be built:

I request that the City insist the 2006 PRD set the precedent for any residential development: no more than 119 units located in the core of the Sam Snead Golf & Country Club plat with perpetual retention of the 18-hole golf course property as protected green space or outdoor recreational use.

Any court decision or mediation regarding an Appeal should also take into account resident responses to my **R-2 Opposition Survey** [8] completed by 221 residents primarily living in Tomoka Oaks and the surrounding neighborhoods of Escondido Condos, The Trails, Talaquah, and Tomoka Oakwood North Condos. These residents, as well as other Ormond Beach citizens, are legitimately concerned about negative traffic impacts, decreased property values, the adverse impact on the character of Tomoka Oaks which will totally surround Tomoka Reserve, strain on existing infrastructure which was never designed for additional homes on the Sam Snead Golf & Country Club property, and catastrophic gridlock during natural or man-made disasters. (This survey is included in the Commission packet as part of the public record which the City could possibly provide for *any* court review.)



The R-2 Opposition Survey is also a key indicator of how our community best views a successful outcome for the land use of the Sam Snead Golf & Country Club property, with the majority of residents preferring retention of the green space in some form, i.e., golf course, park, wildlife habitat. Those who do believe some development is an ideal or unavoidable outcome limit their views to a clustered development that retains the golf course land, or solely to a luxury development that greatly reduces density to achieve an upscale character.

Additionally, I request the City provide court representatives with the 48 resident letters on record [9] opposing the PRD application as these letters are relevant to the ”appropriateness” of the R-2 zoning map amendment which would allow even more density than the applicant’s initial PRD application.

Lastly, I would like to remind the City of the **1963 express covenant** and the multitude of **implied covenants and restrictions** that have been in place since 1963 that support that the golf course property is to remain a golf course or recreational green space in **perpetuity**. This fully cited, historical evidence was provided to the City on June 12, 2022.[10] Tomoka Oaks homeowners have relied in good faith on these recorded express and implied covenants as was most recently validated by the City in the 2006 Tomoka Oaks Golf Village PRD approval. Although the 2006 development order has expired, the City Commission’s green space perpetuity intent set a precedent that has not expired.

The “Sam Snead Golf & Country Club” and the “Tomoka Oaks Country Club Estates” were developed to co-exist as a **Master Planned Community.** Development and marketing of the estates occurred over an 18 year period (1963 - 1981). Every Tomoka Oaks home developer advertised golf course lots and golf course homes (examples on pg 6) with homeowners paying a premium for golf course facing properties.

561 households [11] desire no residential development of the Sam Snead Golf & Country Club property. We are counting on the wisdom and leadership of our City and Commission to protect Tomoka Oaks from any zoning or development that is not in alignment with our Land Use Codes, Comprehensive Plan, and the implied perpetuity green space protection of the Sam Snead Golf & Country Club property as detailed by land use attorney Brent Spain. [12]

I request that during the 1st reading of the Tomoka Reserve R-2 zoning map amendment that the Commission unanimously deny the application and honor the words of William R. McElroy, founding President and Chairman of the Board of Tomoka Oaks, Inc., whose February 23, 1963 **Invitation** (pg 7 below) published exactly 61 years ago today, promised, “To keep this Area in all its natural beauty, certain protective covenants have been provided for the benefit and protection of all property owners.”

Respectfully submitted,

Carolyn Davis

TOMOKA OAKS
COUNTRY CLUB ESTATES
ORMOND BEACH

AN INVITATION TO YOU:

Because we are so proud of our accomplishments to date, we extend to you a cordial invitation to visit Tomoka Oaks Country Club Estates.

It was months ago that Tomoka Oaks Country Club Estates was but an idea— and an excellent one — in the minds of some ambitious local citizens who desired to present the ultimate in gracious and contented living to the many people who wanted to live in Florida.

From its very inception, no effort has been spared in planning and developing — to make Tomoka Oaks Country Club Estates one of the finest exclusive residential areas in the State of Florida.

Cut from 545 beautiful wooded acres, this magnificent setting lends itself completely to natural beauty and — to preserve the contour of the rolling land and beautiful old trees the newly constructed streets wind through the property to enhance its natural beauty.

Right in the center of this magnificent natural beauty spot has been built Tomoka Oaks Golf and Country Club — an eighteen hole championship Golf Course — 6,788 yards long covering 135 acres. The Club House is now open and plans are already being developed to enlarge and improve it.

Large lots with a minimum of 100 feet at the front building line and 12,000 square feet insure your privacy. Wide streets have been built, with concrete gutters and storm sewers for good drainage. Sanitary sewers and Ormond City water have been installed.

Five model homes are now under construction. Still under construction — to be sure — but far enough along so that you can see the type of home that will be built at Tomoka Oaks Country Club Estates.

To keep this Area in all its natural beauty, certain protective covenants have been provided for the benefit and protection of all property owners.

Ideally located on Nova Road just off U.S. Route #1, within the City Limits of Ormond Beach, Tomoka Oaks Country Club Estates is but minutes to shopping, churches, schools and the World's Most Famous Beach.

We're sure you'll enjoy seeing the progress that has been made at Tomoka Oaks Country Club Estates and will be convinced that it will truly be as we have planned — one of Florida's most exclusive residential areas for healthful contented living.

We cordially invited you to drive out to Tomoka Oaks Country Club Estates today and see for yourself.

Sincerely,

TOMOKA OAKS COUNTY CLUB ESTATES.

by William C. Elroy

President

Uniting Our Voices Against R-2 Rezoning

The developer has threatened legal action against the city if the Commission does not approve their R-2 rezoning of the Tomoka Oaks golf course property. Let's let the Commission know why they should not give into bully tactics.

All Names and Responses will be compiled by Carolyn Davis and provided to the Ormond Beach City Commissioners and Mayor before they vote on the R-2 rezoning map application which could allow 317 homes on the Sam Snead Golf and Country Club property.

Forms can be submitted by **anyone.** Each member of your household can submit a form. Or you can submit one form which combines your family's input. Please submit no later than Tuesday, January 30, 2024.

Survey Questions

1. Name
2. Neighborhood
3. What is your #1 concern regarding developing the golf course property? Why is this a concern? Examples might include one of the following: traffic, reduced property values, altering of neighborhood character, shortage of essential medical services, catastrophic evacuation gridlock, overcrowded schools, loss of quiet enjoyment, etc.
4. What is your #2 concern regarding developing the golf course property? Why?
5. In an ideal world, what would you like to see happen to the golf course property?

Prepared by:
Carolyn Davis
46 Oakmont Circle
Ormond Beach, FL 32174

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
1	Krystal Ahmad *Tomoka Oaks*	Lowering my home value after I paid premium for my neighborhood, traffic, over-populate schools, lower home value, disrupt ecosystems, lower quality of neighborhood, overwhelm hospital it already is, noise.	Going to disturb our local ecosystem of humans. Overwhelm/over-populate schools, hospitals, pediatrician offices, lower home value.	1. Enormous park with running paths, playgrounds, splash pads, park, nature preserve. Get donations to build it. Trails and hiking. Pavilion.. 2) Golf course again.
2	Andree Begin *Tomoka Oaks*	Besides destroying the flavor of our Tomoka Oaks community, the proposed development would greatly increase traffic. The increased traffic would impact each Tomoka Oaks resident on a daily basis; this would be a nightmare.	If approved, the proposed development will reduce property values without a question.	The city would buy the property. A board would be created consisting of Tomoka Oaks residents and the Ormond Beach community to propose a plan showing the best land use for this property keeping our property values, traffic and green areas in mind.
3	Peggy Brown *Tomoka Oaks*	Property values	Traffic	Condos in middle with a surrounding golf course
4	Roger Blanchard *Tomoka Oaks*	Traffic	Traffic	Park
5	The Bishop Family *Tomoka Oaks*	The adverse affect on our neighborhood's character.	Loss of valuable & beneficial green space.	The city should establish a family-friendly, open green space/recreational area with picnic tables and hiking & biking trails.
6	The Bobeck family *Tomoka Oaks*	The loss of the neighborhood this was intended to be. We moved in 15 months ago because of the quiet nature of this area	Schools. My daughter started out at Hinson where they could not keep 1 full time teacher on staff. Now she is at OBMS and has already lost two teachers this year	I would love to see the TOHA take control and return it to a golf course. It could be profitable but mostly maintain the natural beauty of the area
7	Tyler Brown *Tomoka Oaks*	Loss of TOHA Character	Continued Congestion in and around Ormond Beach.	Ideally it would be a golf course or recreational space with a large green space buffer.
8	Win Burgess *Tomoka Oaks*	It is really hard to pick one concern as they are all major issues. I live on the golf course so loss of quiet enjoyment is high on my list. I bought my house in 1985.	Traffic. There is really only one way in and one way out of Tomoka Oaks. Traffic in the event of an emergency will be a nightmare.	Restore the golf course.
9	Bonnie carle *Tomoka Oaks*	Overcrowding	Lack of resources to handle that many people	Park for Ormond beach
10	Caitlyn Casey-Parker *Tomoka Oaks*	Traffic. Ormo d Beach is already facing traffic flow problems, and this neighborhood will cause major traffic issues within the development and on Nova and Granada.	Loss of green space. Soon there wont be any green space left within city limits.	A nature preserve with walking and biking trails. It would be fantastic if it could be connected to Central Park with protected bike lanes.
11	Caldwell Family *Tomoka Oaks*	Safety is my #1 concern. With only one way in and out of this golf course, it should be limited to the number of houses allowed.	Relating back to my 1st concern, these are things that go along w/ safety, traffic, evacuation routes, over crowded resources (schools, hospitals)	Low density housing with a possible 9-hole golf course. Keep the zoning as it is and the developer actually work with the community to get the correct number of houses in this special piece of property. If it gets rezoned, R1 with 1 acre lots.
12	Carmen Charlton *Tomoka Oaks*	Traffic, privacy, property values	Displaced wildlife	Leave as is, turn into more biking, walking trails
13	Christopher & Natalia Caldwell *Tomoka Oaks*	All of the above	Traffic more than anything. And the simple fact that we enjoy having a view of the trees from our back windows, it was one of the reasons why we purchased the house.	We would like to see a park with trails to walk and ride bikes, with sport fields for adults and kids. Maybe a pond with benches around.
14	Denise Corley *Tomoka Oaks*	Altering the Charactor of the neigborhood	Traffic	Public Golf Course like "The Park" in West Palm Beach
15	Flavia Casassola *21 N St Andrews Drive* *Tomoka Oaks*	Traffic in and out of Tomoka Blvd into Nova since it's the only direct route in and out for both Tomoka Oaks and future proposed development	Noise factor! Heavy trucks and other construction equipment moving in and out of the same one in and out road already congested with traffic and school bus stops. Our quite neighbohood will be subjected to constant noise for years of construction	Remain a green space of some kind although I don't think that will happen. If houses go in, the density should be severely diminished. May be 100 to 150 homes maximum.

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
16	James Cantrell *Tomoka Oaks*	Traffic gridlock	Loss of natural habitat (golf course has been this for a number of animals) for wildlife. Our wildlife, the gold course fox, many birds and other wildlife that lives on the golf course.	Perfect world, a golf course or some combination of nature conservation area and community facility (Ormond beach museum would be nice).
17	Laura Cook *Tomoka Oaks*	Traffic, losing our beautiful golf course (the city should buy it) neighborhood character, overcrowding on all aspects (schools, hospitals, medical services and facilities). Also the ability to walk or ride bicycles throughout the neighborhood.	All the above	Have the city buy it and bring the course back .
18	Nora Costanzo *Tomoka Oaks*	Shortage of essential medical services	Catastrophic evacuation gridlock	Declared a preservation area
19	Palmer Crellin *Tomoka Oaks*	Reduced property values	Uncontrollable traffic making emergency and safety responses to be jeopardy.	Limit units built to minimum density with 50' buffer requirements
20	The Coble Fernandez Fam. *Tomoka Oaks*	TRAFFIC	ALTERING OF THE NEIGHBORHOOD	NATURAL RESEVE/WALKING PADS
21	Adam Doliner *Tomoka Oaks*	I grew up learning to swim and play tennis at the TOMOKA golf club… I rode my bike to the club. My friends and I had burgers in the restaurant. This land needs to be saved .	Why devalue the surrounding homes for the greed of a developer? Why RUIN OUR COMMUNITY? Why?	Adult Community village 4 people on spectrum. Complete with bike paths, butterfly gardens, community garden areas. An interactive, safe haven, the property would not be detrimental to the surrounding area but would " fit" the location.
22	AMANDA DOLINER *Tomoka Oaks*	This proposal doesn't fit the location. Save the beauty and serenity of TOMOKA OAKS. THIS DEVELOPER DOESNT FIT OUR COMMUNITY	Ormond Beach DOESNT have the infastructure to handle this absurd proposal… No room for Traffic, police, fire, emergency vehicle's no room	IF SOMETHING HAS TO BE DEVELOPED NOT MORE THEN 100 ESTATE HOMES
23	Andy Doliner *Tomoka Oaks*	I don't want my neighborhood ruined with the proposed massive development	I don't want to have massive traffic in my neighborhood. I don't want our services to be hindered. This plan has No concern for OUR COMMUNITY	As the property is a " butterfly" I'd like to see 1/4 wing developed as an adult autism spectrum independent living village… with beautiful gates and within the surrounding area bike paths, butterfly gardens, flower gardens and community garden.
24	Ashley DuFrene *Tomoka Oaks*	Decrease in quality of life and loss of quiet enjoyment. This not only will cause a disturbance for many years but it is altering the neighborhood character. The course was never meant to become a development of this proportion, if anything at all.	Overcrowding of Ormond Beach. More traffic. More casualties. More overcrowding our schools and hospitals.	The property to be left alone to it's natural habitat if not restored to a golf course or a nice park. If anything is developed it should not be in the view of the current homes on the course just like the 2006 PRD.
25	BARBARA DOLINER *Tomoka Oaks*	The current developer has no concern for the TOMOKA OAKS RESIDENTS, our ORMOND BEACH COMMUNITY OR LIFE STYLE.	Our TOMOKA OAKS COMMUNITY was built around a golf course , trees, peace quiet. The developers absurd design RUINS TOMOKA OSKS. RUINS OUR QUALITY OF LIFE, RUINS OUR PROPERTY VALUES. RUINS OUR BEAUTIFUL COMMUNITY.	My perfect world creates 82-95 ONE STORY, single family estate homes on 2-5 acres. Utilizing the butterfly wings. With each wing having 20-25 homes. Bike path sound perimeter and 100 ft buffer from existing homes. Think of rings around the butterfly.
26	Carolyn Davis & Bob Young *Tomoka Oaks*	Loss of quiet enjoyment and property values. We purchased our home when the 2006 PRD was active and believe this PRD's development order implicitly protects the land use to remain a golf course or recreational green space in perpetuity.	Traffic is already becoming an issue in Ormond Beach, and adding homes on this "one-of-a-kind" jewel will only increase traffic and safety concerns.	City or professional Golf firm purchases the land. Deed restates the use condition specified in the 12/12/1963 Warranty Deed, Book 585, Page 157: *The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses*. Restores 18-hole golf course and rents the clubhouse for community & private events.

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
27	Kim and Chuck Emerson *Tomoka Oaks*	I am concerned about the traffic coming in and out of Tomoka Oaks. There will be traffic jams if 315 home go in the golf course.	We moved up here last year from Palm Beach due to overcrowding, and we picked Tomoka Qaks because of the beautiful tranquility and quietness of the neighborhood. I will feel like I'm back in Delray Beach if this project moves forward!!	I would love to see it go back to a golf course with a nice clubhouse.
28	Mike Eddy *Tomoka Oaks*	Traffic, our roads without sidewalks were never planned to have the traffic we have now much less adding another 200 plus households..	Property values are a problem, anyone knows the last fifty years there was a premium price paid for golf course homes.	Forget ideal world, that won't happen but I think a majority of residents would accept an R1 designation.
29	Diane and Frederick Fox *Tomoka Oaks*	Traffic, Altering neighborhood character	Over populated neighborhood and traffic bottleneck	Park environment
30	Jillian Firmin *Tomoka Oaks*	Traffic	Altering the character	Make it into a beautiful park or nature preserve
31	Tom Fitzgibbon *Tomoka Oaks*	unsafe traffic increase on my road	density/compatibility	2006 PRD 122 units and golf course
32	Aimee and Andrew Gurtis *Tomoka Oaks*	loss of green space and neighborhood character	Traffic and overcrowding	Estate homes with appropriate green space
33	Debbie Gatz *Tomoka Oaks*	Loss of green space in the middle of our beautiful city.	Buffer areas, not being maintained and kept the way they currently are if there is already trees on it. Keep in mind this is brush and vines growing in my yard from the golf course for years now.	Nine hole golf course and recreation, facilities, dog parks, etc.
34	Gupta Family *Tomoka Oaks*	Tomoka Oaks is a prime location and the premise of the neighborhood was the golf course. The previous owners purposely ruined the golf course. This area should be persevered as either a green space or returned to a golf course.	Traffic and overall essential services will further stressed. 10 years from now if this turned into a development and not a green space - the decision will be unfavorably looked upon for the mess it created and lack of healthy space.	Returned to a a golf course or green space. Last option would be some development with golf course still in place
35	Lori Graf *Tomoka Oaks*	DANGEROUS TRAFFIC INTERSECTIONS AND TRAFFIC ON EXISTING ROADS SURROUNDING THE PROPOSED DEVELOPMENT	Altering character of existing neighborhood	No more than 150 lots with nice homes. Green spaces, and amenities like a pool, clubhouse, tennis, pickleball courts, spa, that would be open to residents of the immediate surrounding communities for a fee
36	Pam Gaspary *Tomoka Oaks*	I fear for the integrity of our area. It's a safe place to live now.	Our schools are already overcrowded. There is no more room for classrooms ,	i'd love to see a small neighborhood restaurant, outdoor activies such as; disc golf, picnic tables, pet walks, etc.
37	The Greenlees Family *Tomoka Oaks*	Homes within 6 feet of existing golf course residents. Growth with no plan on how to handle access, traffic, healthcare, and the lack of green space in Ormond Beach.	The impact it will have to the residents of Ormond Beach, not only the Tomoka Oaks residents, but the whole city. This project is not out West, but in the middle of town. The beachside residents will suffer.	The developers understand that they made a bad investment, didn't do their homework in regard to zoning, and donate the property to the city. City could turn it in to a storm water drainage area.
38	Chris & Cindy Heaven *Tomoka Oaks*	Traffic	Property values	Green belt
39	Diane Hoislbauer *Tomoka Oaks*	#1 concern is the traffic, being that Tomoka Oaks has NO sidewalks, the extra traffic will make it hazardous for walkers, bikers, etc.	Alterning neighborhood charater is #2 concern. The homes will not present the same character being crowded into the golf course.	become a public park or have 1 acre estates with less that 100 homes.
40	Glen Huckins *Tomoka Oaks*	Property value decreasing.	Traffic.	Reopened as a golf course or a park for the local neighborhoods.
41	Lauren Huhta *Tomoka Oaks*	Unsafe traffic	altering of neighborhood character	Restored back to a golf course or solar farm

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
42	Missy Herrero *Tomoka Oaks*	Concern for the safety of existing residents related to everyday activities: running, biking, walking with our children, senior parents & pets. Front entrance blocked due to hurricane & wildfires over the years. Daily traffic patterns & evacuation concern.	My family has experienced the unfortunate effects of the shortage of essential medical services; our infrastructure is not keeping up with the rate of development.	In a "Perfect world"-we'd love to see the golf course restored complete with clubhouse and restaurant, tennis and golf., "ideal world": 2006 PRD w/122 units and a golf course.
43	Paul Hughes *Tomoka Oaks*	Safety: the 1960's Tomoka Oaks was built as a "pocket" neighborhood. Only entrance was Nova Road. Designed for 200+ homes. Second Phase added two complimentary arterial paths plus 140+ homes. It exceeds design now.	Over burdened utilities and infrastructure. Cannot put 50lbs in a 5 pound sack. Plus Gray water poisoning .	Sold and bought as a contractual CountryClub/Golf Course/Green Space. The buyers bought as a single function and use. The buyers argument could be for a fuel farm too. When you buy an Exploding KiA don't expect to resell as a Cadillac.
44	Peter & Jamie Hardy *Tomoka Oaks*	Traffic (all of the above)	Reduced property values (all of the above)	Return back to a golf course or a green space
45	Renny Herrero *Tomoka Oaks*	Overdevelopment and increased social stress. Too many people in too small a place which has already been established.	Environmental. Development of a beautiful and unique piece of property.	Optimize the site for what it already is. It would thrive as a gathering place for the people to play golf and introduce other outdoor hobbies. ex:walking trails, dog walking, food truck, outdoor beer garden, music.
46	Susan Hillman *Tomoka Oaks*	Overcrowding of area within existing structures	Area infrastructure can't withstand overwhelming influx of homes along with traffic issues we will also have drainage issues	Recreational space or if no other options then high end residential to be no more than 100 homes
47	Carol Johnson *Tomoka Oaks*	altering of neighborhood/placing a city into a neighborhood	overcrowded and dangerous roads	Ideally that it would stay a recreation site. Or, fewer homes/a community/rec center that welcomes present residents
48	Christoper Jaime, DPT *Tomoka Oaks*	Traffic	Shortage of essential medical services	Back to a golf course or solar farm
49	June Jacobsen *Tomoka Oaks*	Property Value decline	Loss of a potential recreational area or conservation region	A Park with walking trails, a dog area, ponds open to all.....
50	Mindy James *Tomoka Oaks*	My main concern is the amount of homes being built is too excessive for the area. Traffic getting out of our neighborhood onto Nova is already extremely difficult and dangerous. Adding more cars and people exiting the one location is reckless.	We need to stop the over growth in Ormond Beach. Our schools, roads and hospital can not keep up with all this expansion. We need to be mindful of our growth and not allow this to happen.	Ideally, I would love for it to become a public park similar to the one in Port Orange or Central Park.
51	Kaya Kaminski *Tomoka Oaks*	Unnecessary development	Disruption of current neighborhood	Golf course returned or turned into a park or left alone
52	Kelsey Kipi *Tomoka Oaks*	Reduced Property Values. Homes on green space hold an average of 3-4% higher value than their counterparts. My home will drastically diminish in value.	Loss of Quiet Enjoyment. Tomoka oaks is a peaceful neighborhood that surrounds a beautiful property. Development of this land in anything other than substantial recreational space will deprive all of us of our peace, quiet, and scenic views.	I would like to see the property sold to a golf course developer and the course restored. If townhomes need be built as specified in 2006, this would still satisfy my perfect world request.
53	King *Tomoka Oaks*	Neighborhood character	Gridlock	Golf course - small development okay
54	Richard Kershaw *Tomoka Oaks*	Too many homes and traffic in such a small area. Ruin the general make up of the neighborhood.	Environmental concerns with the old golf course and animal impact, including the Gopher turtles which are protected.	Revert back to a golf course or a natural preserve / park
55	Richie & Bonnie Kloepfer *Tomoka Oaks*	Traffic-Already excessive amount of vehicles. We have kids waiting for school buses, bikers, walkers	Medical-People having to be laying in the hallways because of lack of room. Not enough doctors, not enough anything.	A small golf course with quality estate homes surrounding it. No more than 100 homes on large lots with different styles adding property value to the existing property owners of Tomoka Oaks.

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
56	Robert Cook & Donna Klein *Tomoka Oaks*	Property value. this is important to stay the course of constant values rising.	Traffic. Traffic currently is enough and speeds probably too high. New development with it comes more unwanted traffic.	Restore to a golf course with reasonable due/fees.
57	Susan Klippel *Tomoka Oaks*	Loss of green space	Traffic	City park / green space. Worst case smaller community with green space
58	Ellen Lauturner *Tomoka Oaks*	Strain on city services especially medical	Traffic/gridlock	Become a park
59	Maria Lusk *Tomoka Oaks*	Traffic	Overcrowding of schools	We are new in town and dont have enough knowledge to say what it should be.
60	Ricard Lukac *Tomoka Oaks*	Traffic	Neighborhood character	Have the City make it a park or " Green Area"
61	Rita Lee *Tomoka Oaks*	All of the above	Traffic, medical services, etc	9 hole golf course, pool, restaurant
62	Warren and Nancy Lensmire *Tomoka Oaks*	Altering of neighborhood character.	Traffic problems	A nature preserve for Ormond Beach
63	William T Loomis IV *Tomoka Oaks*	Traffic	Reduced Property Values	City purchases the property and turns into a city park.
64	Christopher Moody *Tomoka Oaks*	The biggest concern is the traffic and saftey of pedestrians. The schools and hospital's are already overloaded, this would just make matters worse.	The property should be large estate homes with a minimum 1 acre.	I would like to see a golf course and country club with pool.
65	John Measel *Tomoka Oaks*	One of the bigger problems with R2 zoning is the majority of houses built on the golf course where built to utilize the course as their backyard some houses have pools and enclosures built up the property line.	This property was previously zoned PRD for a reason the streets thru Tomoka Oaks and the Trails can't handle the additional 1000 trips a day on average a R2 would make without improvements and side walks	In a beautiful world would like to see a golf course, but understand housing being built but no more than 187 units
66	John P. MURPHY *Tomoka Oaks*	All of the above	....bring in undersibles.....	Remain a golf course....
67	Mary Ellen McConnell *Tomoka Oaks*	Altering of neighborhood character	Traffic	Park and trails
68	Harry McConnell *Tomoka Oaks*	Increased traffic will bottleneck at Nova/Tomoka Oaks Blvd causing inconvenience and accidents. Emergency traffic will be impeded. Drivers will likely use S. St. Andrews and Trails streets further disrupting peace.	Failure to preserve land as a nature sanctuary to protect Tomoka Oaks against noise & light pollution. Development will reduce quality of life for present residents and reduce property values.	Make a park in the center, where the clubhouse was, with walking trails winding through it with 100' perimeterall around left to nature. Some ponds scattered in the parks and buffer. Memorial Gardens on Granada & Halifax could be a model.
69	Mary Murphy *Tomoka Oaks*	Actually, all of the above are main concerns...Traffic would be.most concerning.	Altering of neighborhood character. I am sure many will be wandering about our now quiet and peaceful neighborhood.	A 9 hole golf course with minimal townhouses. Under proper management this should be a profitable and accepting arrangement.
70	Paul and Deb Maybeck *Tomoka Oaks*	SAFETY: excessive traffic on narrow roads endangers kids at bus stops, walkers, bikers, EMS access, and catastrophic evacuation. Endangers the ability to enter/exit onto Nova Rd especially due to RR cars backed up north of exit.	LOSS OF GREEN SPACE: loss of valuable quiet, negatively alters neighborhood character, no consideration for humans or animals. Six foot buffer is totally absurd and will result in property values being adversely affected.	Return property to its previous life as a "golf and country club" with a stable golf corporation running it. Or if that is not possible, build less than 100 homes, attached or single units, surrounded by a full golf course as was proposed in 2006.
71	Paul and Debbie Marz *Tomoka Oaks*	Property value. Concern is that it is wrong to take the green space away which was always an implied golf neighborhood.	Altering the character of this community. Concern is that the future of building in the middle of our neighborhood will be disastrous to the existing homes.	Ideally the course should be brought back to the level of success that it was intended to be. All neighboring municipalities own and run successful courses except Ormond Beach.

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
72	Paul Mena *Tomoka Oaks*	Loss of property value. The proposed neighborhood would reside within one of the most established neighborhoods in the city of Ormond and the plans are for dense population which goes against our current set up.	Catastrophic Evacuation gridlock	Adding 317 house holds would amount to roughly 750 more vehicles trying to use the same exits which could cause serious issues if the need for evacuation was ever deemed necessary
73	Paula Mousikos *Tomoka Oaks*	Traffic and changing the beauty of the land behind our houses. Also reduced property values with hideous development.	Building anything on this beautiful piece of property.	Turned back into a golf course or even an 18 hole with minor development like a condo somewhere so that I don't have to look at it.
74	Yvonne Bonnie Maloney *Tomoka Oaks*	Traffic. We have no sidewalks for walking, baby strollers, dog walkers. Emergency vehicles are barely able to drive in.	Medical care-my husband died last year partly because the ED and hospital was severely under staffed and he went to the ED 3 times. Would he have survived if he had adequate care?	Restoring part of the golf course with high-end golf villas in the middle. Existing golf course homes will lose value if developed as submitted
75	Christine Neely *Tomoka Oaks*	Reduced property values	Too much traffic	Not being built at all
76	Heidi Nates *Tomoka Oaks*	Reduced property values	I chose Tomoka Oaks because of the neighborhoods character. It was something one thing we did not	I would love to see the city purchase the property to be used as a place to walk, maybe have a 3 par golf course, pickleball courts
77	Roberta Naleway *Tomoka Oaks*	The look of our neighborhood is going to change. In similar situations with cities things turned worse and we are faced with this. Worried about the value of their home dropping before or about how the neighborhood feel could change.	It feels like there is no way traffic will not be affected with that many homes.	To be developed or fixed to be the same property type it was meant to be.
78	Neil & Suzie Oslos *Tomoka Oaks*	The area to be developed has limited access and egress which would cause catastrophic evacuation gridlock.	Signiticant traffic again focused on the limited egress from the development.	I do not live on the golf course but the lots on the golf course were originally sold as golf course lots. This area should be preserved as a park.
79	Andrea Pagán *Tomoka Oaks*	Soil erosion and flooding. 'Soil erosion impacts downstream hydrology and can cause an increase in flooding, which can harm the environment.' I live nearby the river. Houses adjacent get flooded by heavy rain.	Traffic, pedestrian safety, and house insurance impact on the long run.	Dog park, picnic area, trail walk/run, playground.
80	Blanche Parks *Tomoka Oaks*	Traffic into and out of Tomoka Oaks will become a nightmare	The number of additional houses is going to altar the character of the entire neighborhood	Par 3 golf course with fewer homes
81	DANIEL PECKHAM *Tomoka Oaks*	Traffic will be a nightmare which will impact the ability for emergency vehicles entry and exit as there is only one way in and one way out. The hospitals are already overcrowded as well as the schools.	This development will completely change the character of this neighborhood and reduce property values. There is so much wildlife on the property that would be displaced.	I would like it to remain a golf course or have the city or affluent Ormond residents turn it into a park.
82	Jim Phillips *Tomoka Oaks*	Traffic	Shortage of medical services	150 estate lots, 50 foot boundary buffer and new boundary trail open to all of T Oaks.
83	Jimmy and Joyce Page *Tomoka Oaks*	Traffic congestion and safety at the entrance	Overload of services	Nature preserve or park
84	John and Carol Power *Tomoka Oaks*	Traffic safety. These roads were not designed or constructed to handle an additional 250-300+ vehicles.	Emergence response/evacuation.	Return to being a golf course (of some sort) and or/green space.
85	John Powell *Tomoka Oaks*	altering of neighborhood character	reduced property values	Remain a golf course or green space.
86	Mike & Pam Peerless *Tomoka Oaks*	The traffic will be horrendous. The golf course was not intended to build hundreds of houses on. The ingress/egress issue will not be tolerable and the surrounding areas will be a nightmare to deal with, let alone the Tomoka Oaks subdivision.	Diminished property values to existing homes.	Turn it into a nature preserve.

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
87	Price Family *Tomoka Oaks*	Loss of character. We bought in this neighbourhood for its character, age, quirkiness. We love that nothing in Tomoka Oaks is cookie-cutter and the mature landscaping. What they are doing on Clyde Morris and Williamson should be illegal.	Traffic. The addition of 500-600 additional cars is going to be a nightmare. This is the kind of neighbourhood where families go on walks and kids go outside to play/ride bikes like it's still the 1980s like their parents did.	It would be nice to keep it mostly a natural park and rebuild pool/racquet facilities for the neighbourhood to enjoy whist still leaving the open space to just let kids play. We have some ponds, great trees, and don't need ugly square retention ponds
88	Jan and Jim Rose *Tomoka Oaks*	Traffic/Density-too many houses cause too much traffic.	The additional residents would alter the character of the neighborhood and negatively impact the quiet enjoyment of the residents.	Estate homes being built with substantially less density than proposed.
89	John R. Rhoades *Tomoka Oaks*	Density and the traffic and other problems it will cause.	The years of construction, heavy machinery noise, dust, and loss of my quality of life.	I would like to see it become a park or other green space. How many more apartments or houses do we need until we overload our infrastructure here in Ormond Beach.
90	Richard and Dale Ryals *Tomoka Oaks*	Traffic property value hospital overcrowded	Bought in 1973 to be on the golf course forever	Stay a golf course. Ormond should have a public golf course like Daytona and other cities have. Ormond only has a private course
91	Sherri Rummel-Hawk *Tomoka Oaks*	Overcrowding and lack of resources	Lower our property value changing the quaintness of our neighborhood	This property could be for Ormond Beach
92	Ginger Stanley *Tomoka Oaks*	Traffic	Traffic	Clubhouse, bicycle trails, park, walking trails, pool
93	Jeff & Wendy Steiskal *Tomoka Oaks*	Loss of beautiful, quiet golf course property reducing property values	Traffic and increased population problems. We purchased in 2912 and it's very sad to see this little gem of a place ruined by so much development	Something similar to proposal from before. Maybe a smaller amount of condos in the center and the golf course reopened
94	Jeff Steiskal *Tomoka Oaks*	They bought a golf course and it should remain with minimal development minimal impact on the existing neighborhood	Loss of property values and quiet enjoyment	Reopen the course with restaurants and small condo development or hotel
95	Joaquin Sierra *Tomoka Oaks*	Traffic, property value	Safety	CITY PARK
96	Kimberly Welch Staley *Tomoka Oaks*	Traffic and value of existing home	Buffer between houses on golf course and my home which is on the golf course	Green Space like a park for the Ormond Beach community.
97	Strickland Family *Tomoka Oaks*	opposed for Many Reasons, Traffic, Crime, reduced property value	congestion	Restore Golf Course
98	William & Rebecca Shank *Tomoka Oaks*	Loss of environment which motivated our home purchase. Excessive traffic.	Traffic and loss of privacy for our homes.	Remain a golf course.
99	Dr. Ian Tafel *Tomoka Oaks*	There is already too much traffic around this area and especially into and out of Tomoka Oaks. Adding even more houses to the golf course will only magnify the issue.	My family and I bought a home in Tomoka Oaks after being told the golf course would never be developed. We liked the secluded and quiet nature of this place. That is now threatened by the developers plans for the golf course	It should be converted into a nature preserve with walking trails for the residents of Tomoka oaks.
100	Gregory Tremmel *Tomoka Oaks*	Increased traffic	Shortage of essential medical services	A public park
101	Pam Turrill *Tomoka Oaks*	Traffic	Lack of property value	Turn it into a park
102	Richard W. Turrill, Pamela R. Turrill *Tomoka Oaks*	Reduced property values	Increased traffic in/out Tom Oaks	Luxury homes on 1.5 acres or larger.

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
103	The Tafel Family *Tomoka Oaks*	Traffic and potential gridlock. The amount of traffic already on Nova road is dangerous for both drivers and pedestrians.	Stress on emergency resources. Our first responders are already spread too thin and hospitals are overcrowded. It is dangerous.	We would like it to remain a wildlife space to all the animals that have made their habitats there, or be developed into an estate community with plenty of green space and limited traffic increase.
104	Tracie Titus *Tomoka Oaks*	Traffic	Losing the character of our neighborhood	Estate homes and green space
105	Jessica Vitale *Tomoka Oaks*	Traffic, overcrowding schools and hospitals, the property not matching the lot sizes of Tomoka Oaks plots, having a neighborhood inside our already established neighborhood.	Loosing a large green space for wildlife, and over crowding the surrounding neighborhoods.	Would love to see the property stay a golf course with a new club house, or only develop a small amount of townhomes in the middle of property with the existing golf course surrounding it.
106	L.J. & Joan Van Lancker *Tomoka Oaks*	Our main concern is the increased vehicle presence will create a safety hassard on a daily basis as well as the dangerous evacuation gridlock if necessary. Pedestrians, bikers, runners, etc. are at risk of injury on a daily basis as it is.	Decreased property values as a result of the nonconforming lot & housing sizes proposed by the developer.	Become a Public Gulf Course, or prestigiuos housing community of about 120 homes to set as an example of THE UNIQUE community in Ormond Beach worthy of Tomoka Oaks.
107	Sandra Bass VanCleef *Tomoka Oaks*	Traffic is already a concern. With very limited access; I feel this will be a huge issue.	Loss of green space and additional pollution runoff to the Tomoka River. Loss of wildlife the is fairly abundant now.	Ideally? Maintained as a green space.
108	Bob whiteside *Tomoka Oaks*	Access in and out of our neighborhood	Decreasing property values of existing homes	Golf course, maybe with some housing as was proposed when zoning was changed to PRD. No more than 150 homes.
109	Carmen & Tim Woody *Tomoka Oaks*	Our major concern is that we do not want anymore traffic in our community. 300+ homes would turn this place into a nightmare & be forced to move to a less congested area which would be a huge hardship for me & my family.	Aside from the horrible congestion of homes, the possible damage it could bring to the existing older homes plus all the tortoise & deer would stop visiting my home	I would love for it to remain a golf course & tennis courts because even if they were at a business we were still using it & we would love for it to stay green & full of nature, the way its always been.
110	Hunter Wendelstedt *Tomoka Oaks*	Traffic, danger to children	Loss of quiet neighborhood	50 Luxury homes or other planning board recommendations
111	Laura Weast *Tomoka Oaks*	Flooding	Loss of character to the neighborhood	Golf course
112	Mary Pat Whiteside *Tomoka Oaks*	The fact that my home will lose value due to the noise and traffic of construction	The traffic will grow exponentially.	A few nice estate homes will be built.
113	Natalie Weaver *Tomoka Oaks*	Traffic at Nova Road Entry and into the development	Neighborhood character	Keep it an open space. Some one or some group buy it and let it be.
114	Robert and Nancy Willis *Tomoka Oaks*	Reduce property values, I don't want this development to negatively affect my property value	Traffic, evacuation gridlock. If so, many people are in a development with one exit, that would cause tremendous gridlock in the case of an emergency getting out of the development.	Remain open space, or or become a beautified Park
115	Wilson Famiĺy *Tomoka Oaks*	Reduced property values. The appraisal of our home was based off of greenspace behind our home. With the development homes this will reduce our property value.	Traffic, currently traffic is already bad and adding additional 300 homes will only make the existing problem worse when trying to exit the neighborhood.	Reopen as a gold course or be turned into a park
116	Adam Zirkelbach *Tomoka Oaks*	Altering Neighborhood Character. Tomoka Oaks is a enjoyable and beautiful community in Ormond Beach and is one of the few that have been affected by the major growth in the area. If they are going to be allowed to build, build it better.	Lack of infrastructure. Ormond Beach, regardless of this community or next, is growing quickly and infrastructure is not keeping up. Lack of hospital rooms, small roadways, lack of safety features, overcrowded schools. Quality of life.	1. Revive the golf course 2. Nothing at all 3. Build it better than what the builder has proposed.

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
117	Bill Zirkelbach *Tomoka Oaks*	Traffic and altering the overall character of the our subdivision. Also it would negatively impact our current infrastructure.	Trraffice flow and impact on infrastructure, environmental and property values.	Keep as green space. I understand the developers rights. Would entertain estate homes on acre lots would provide green space & have less of an impact on our infrastructure. Also these estate home would have a positive impact on property values
118	Mariah Zirkelbach *Tomoka Oaks*	Overcrowding in terms of schools, hospital's, evacuation	traffic flow and too much density for the town thats already expanding at a rapid rate	Either nothing and let it be a nature preserve or the 119 houses that was pre approved by the city
119	Michelle Zirkelbach *Tomoka Oaks*	Traffic - common sense tells us recent traffic studies are not an accurate predictor of the gridlock overdevelopment causes.	Loss of value in terms of character and actual dollars - especially for homes directly on the gold course where people who paid a premium price for a lot with no neighbors behind them could potentially see the back of THREE Tomoka Reserve Homes.	Ideally it would remain some form of green space. At the VERY most, it should be developed along the lines of the 2006 PRD.
120	Rick Zirkelbach *Tomoka Oaks*	Traffic	Home values	A better plan for this property.
121	Barbara Steadman *Escondido Condos*	Traffic, catastrophic evacuation gridlock and shortage of essential medical services are my main concern.	See #1	Another golf course or if that is not feasible, a limited number of one family homes with large lot sizes.
122	Bhanu Patel *Escondido Condos*	Traffic	Infrastructure Congestion	stay open as golf course
123	Carolyn Brenner *Escondido Condos*	Traffic	shortage of essential medical services	I would like the land to see some open space preserved for recreation.
124	Kirk Thrush *Escondido Condos*	Traffic. The property, when used as a golf course didn't negatively affect traffic. Building housing on the property most certainly will negatively affect traffic, safety	Escondido will have no safe entrance/ exit with the increased traffic…	Stay as a green space or park. Set aside a portion for community gardens…
125	Marcia A, Rudman *Escondido Condos*	Catastrophic evacuation gridlock	Traffic	Some development is pretty much inevitable but I would like to see as little as possible with some recreational activities.
126	Mary Leonard *Escondido Condos*	Traffic!!!!!	overcrowding	A beautiful green space
127	Rick Rickards *Escondido Condos*	The development of the golf course property would severely alter the safety and character of surrounding areas.	It's morally wrong to pull the rug out from under residents who purchased properties in a golf course community with the promise that it would be green space in perpetuity.	Ideally, the golf course property should be redeveloped into a golf course or developed into a public park.
128	Robert Baner *Escondido Condos*	Over crowding and intended use of property by town fathers years ago.	Only one access to this area. How can this be a good idea to anyone of a sound mind?	Rebuild the golf course
129	Stefanie Ibison *Escondido Condos*	Traffic	Flooding	In an ideal world it would reopen as a golf course. With the closing of Riverbed Ormond Beach could use a good public course.
130	Susan Banker *Escondido Condos*	main concern is traffic!!! before there is a light. more cars waiting. will make it impossible for us to make a left hand turn onto Tomoka Oaks BLVD to get to Nova. How will we get out? prisoner!!	No plans to address the already crowded hospitals and schools.	I'd like to see it developed back into a golf course. If not possible, do a golf course and about 50-100 homes around it, or no houses.
131	Betros family *The Trails*	Devaluing the neighborhood with cheap new builds	Increased traffic	New golf course, preservation area or high quality estate size homes

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
132	Bob & Pam Wilson *The Trails*	Cut through traffic is already an issue, as people eliminate the Granada/Nova light. Additional homes will only add to the numbers, passing through the Trails to access Granada, if headed South or west. Already a huge back up at Tomoka Elementary light.	Lack of infrastructure to support growth	Operating golf course
133	Bob Henry *The Trails*	Traffic	Property Values	Leave it as a green space
134	Bonnie Williamson *The Trails*	Traffic	reduced property values	turned into a park
135	Carol Mahon *The Trails*	Traffic	Medical services	green space
136	Caroline and Juan Prados *The Trails*	Traffic. The Trails was not built for so much of it!!!	Its not in keeping with the Tomoka Oaks properties.	Another golf course 🙏
137	Charles & Nell Thomas *The Trails*	Traffic.	Betrayal of existing homeowners.	Purchase and reopen golf course.
138	Cindy Newman *The Trails*	Shortage of essential medical services	Saftey and traffic	Less homes, each the same size lots as existing homes in Tomoka Oaks 100x100 lots.
139	Craig Shankland *The Trails*	Traffic thru the Trails will be horrendous	The golf course should be saved, it's a gem for the city. It will make money, be great for the youth to learn agronomy and buisness there are two nines which is a big asset	Kept as a golf course it's a gem. It will make money all previous owners knew nothing on how to run successful golf courses. We have social media now to get the advertising out in seconds, that makes a huge difference
140	Danny Bouck *The Trails*	Increased traffic on the roads connecting both neighborhoods. I have hound children who like to play in the front yard and the traffic level is already high enough with people speeding.	Changing the way of how people view the Trails and Tomoka Oaks neighborhoods. From my experience people who don't live here want to live here because of the exclusive nature.	I would love to see a new golf course be built. I was never around for when it was a golf course but always heard it was a great layout. If someone could buy and build a new course I would definitely be a member.
141	Denise White *The Trails*	Traffic is my number one concern. Our roads were not designed for a large increase in traffic. In particular, the Trails has very narrow, winding roads with many blind spots which endangers the areas walkers runners, and bicyclers.	My number two concern dovetails off the increased number of vehicles. Our safety is at risk because of no sidewalks and a single ingress/egress that feeds into a two lane 450 foot quirky road.	Ideally a golf course would be my preference but the old 2006 nine hole, residential use would be acceptable. I, also, think the estate lot concept would be acceptable.
142	Diane chanfrau *The Trails*	Altering of neighborhood character, property value reduced, traffic, evacuation issues,	Loss of quiet enjoyment	Green recreational space
143	Donald Cardone *The Trails*	Marked traffic on Main Trail causing congestion. Increased likelihood of accidents is a real risk. Due to marked congestion of Main Trail and exit onto Granada Blvd.	Above concern is paramount	Retain a natural environment
144	Doug & Darla Widnall *The Trails*	Overtaxed infrastructure	Out of control traffic, no sidewalks, curvy 2-lane roads, 3,000 extra daily trips from the proposed new development	18 hole golf course with a clubhouse/restaurant
145	Ed Davis *The Trails*	Loss of Quiet Enjoyment	Traffic	Enforcement of Deed Restriction that it be used as golf course
146	Ed McLaughlin *The Trails*	traffic	potential leaks	golf course or park

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
147	Erik Emsing *The Trails*	Increased Traffic, Disruptions and Noise, Public Utility Problems, Groundwater Shortage, Changed Neighborhood Character, Construction NOISE for Years Disturbing the Peace	It should remain a Golf Couse as it was Initially Planned for. Everything around Tomoka Oaks and the Trails were dimensioned with that layout thus NOT Accommodating another 300 houses!	That the Golf Couse be reactivated and improved...
148	Gail Roe *The Trails*	Too much traffic through the Trails	Too many houses close together	Reopen golf course
149	Jan Collier *The Trails*	Traffic	Small size homes built by Corporation Home Builder	Larger home lots, walking trails; trees planted
150	Jennifer Genovese *The Trails*	We are over building at this point. The traffic, utilities, services are going to be stretched let alone facilities like water, electric, car pollution.	Residents in Tomoka Oaks purchased there because of the golf course and the open, and peaceful feeling. That area should be developed	It should be an open area…a park of some type.
151	Jens Fagerlund *The Trails*	Traffic and evacuation gridlock	Evacuation gridlock	Nature experience park
152	Judy L Ramos *The Trails*	Traffic through The Trails, loss of quietness, vehicles speeding up and down Rio Pinar and Iroquois Trails trying to get out of Tomoka Oaks reduced property value, altering the characteristics of the neighbor	Effects on the wild life and taking away old oak trees	Develop something more for families like Top Golf
153	Kathy Tiger *The Trails*	Disrupting the charm and tranquility of Tomoka Oaks / the Trails. Increased already non-sustainable traffic incl. Tomoka Oaks without safe sidewalks. Added problems with Power Utilities, groundwater & noise.	It should remain as it was originally planned and sold to house buyers until it was closed.	Reactivate the Golf Couse and make it great ... KEEP the Open GREEN Space!pace
154	Kristina Moore *The Trails*	Traffic	Shortage of medical services We need another hospital, not more people and gridlock	Green area. How did greedy developers get this land?
155	Lillian Rutherford *The Trails*	Traffic would drastically increase which would lead to a decrease in a multitude of areas such as: walking safety, property value, gridlocks if there was an evacuation, overcrowded schools/restaurants/etc., increase in routes criminals might take, etc	Infrastructure breakdown, not enough room to support the amount of home proposed	A golf course - this would increase home values. Another form of recreation. If it must be built on, then build it with lot sizes that are the same as what is already in the area.
156	Lynda Wilson *The Trails*	I'm greatly concerned about the increased traffic into my neighborhood.	I believe our city needs to slow down on approving new developments of housing and apartments	As mentioned before a park would be nice with possibly a par three golf course.
157	Michele Davis *The Trails*	Traffic	Overcrowding	Golf course
158	Norma Washburn *The Trails*	When we moved into The Trails 37 years ago This was ideal. Now traffic woes and endless building has made it less. Greed is the deciding factor.	Another beautiful green natural space gone. I played golf there. reopened	A city owned golf course.
159	Olga and Paul Ambruster *The Trails*	Traffic, additional costs place on the local people.	Don't allow homes. The interstructure is not allowed any homes. We the tax payers can't have additional taxes place upon us..	Park
160	Paige Cohen *The Trails*	Traffic - our city is already growing and being in the neighborhood next to Tomoka Oaks, we are concerned about too many cars going through our city and infrastructure does not allow for added traffic.	Tomoka Oaks residence bought in a golf course community. To turn an area of land into another community within a community is shocking and feel for those who have property in Tomoka Oaks, and how it will affect surrounding neighborhoods.	A park. Ormond Beach needs more green space with the increase of people moving into our small beach town!
161	Pat Murphy *The Trails*	traffic	Decreased green space	City park

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
162	Paula Bolwerk *The Trails*	Excess traffic and schools overcrowded	Infrastructure may not support	Let it grow into woods for the animals
163	Pichon family *The Trails*	Traffic is a major concern. I live on the corner of Main Trail and Rio Pinar. The traffic is already heavy without the addition of another neighborhood. Waiting at the stop light on Granada would be horrendous	Reduced property values is another concern. The congestion will make our property less desirable along with older homes competing with new ones.	I would like to see it grow back into the forest. There are so many neighborhoods being developed into apartments, etc, that I often wonder where the animals are supposed to live. There seems to be no forethought. Just tear it down and build more!
164	Sarah Gowen *The Trails*	Increased Traffic	Overcrowding of schools, neighborhood and area in general	It's a golf course property! Leave it alone or re-purpose as conservation area.
165	Scott Baker *The Trails*	As a Trails resident we have seen already the traffic in our neighborhoods increase without the additional 300 plus homes being added. With this development, this will only get worse. Our roads are not equipped for this volume.	For years the Trails and Tomoka Oaks have been premier developments. Adding this many homes will only serve to decrease property values in the area and will not go along with the higher end homes in the area.	Ideally we would see the golf course reborn
166	Scott Frantz *The Trails*	Traffic cutting through the Trails. Many of the new residence will cut through the Trails on Rio Pinar Trail to get to Granada.	Hospitals. its currently a several hour wait time at Advent and Halifax hospitals ER'S.	THE PROPERTY WILL BE DEVELOPED. ANOTHER ENTRANCE/EXIT MUST BE CREATED TO ALLOW TRAFFIC DIRECT ACCESS TO US 1.
167	Shelagh Traill *The Trails*	Traffic on the already dilapidated, aging bridge in The Trails and increased traffic on Main Trail from Granada Blvd.	Decreased property values.	Turned I to a community park and municipal 9-hole golf course.
168	Shon MacDughlas *The Trails*	Traffic - Traffic is already an issue on Rio Pinar, this development will cause more safety issues with kids on the streets (no sidewalks) ruining the neighborhood	Destroying our quiet community	Turn it back into a golf course or leave as green belt/park, if nothing else, reduce the number of home allowed
169	Susan Cummings *The Trails*	The additional vehicular traffic from cars taking a shortcut to reach Granada Boulevard is troublesome.	I am concerned about the aquifer supporting all of the new building.	A Park with bike trails
170	Suzie Lindsey *The Trails*	Traffic - Ormond's growth needs to cease; we are already seeing more and more traffic.	Reduced property values - Tomoka Oaks is a golf course community, that is why they purchased their homes in that subdivision.	Re-open as a golf course; it would certainly bring in a lot of people.
171	The Bing Family *The Trails*	Traffic and the safety of our children, pets, and families. The Trails is a place we chose to live in because it is not overcrowded and the residents are friendly and active. We always have families biking, walking, going to the park, and enjoying it.	Tomoka Elementary School is currently being built to meet current enrollment needs. Adding over 200 homes would drastically impact the school in a negative way.	I would like to see it redeveloped into a golf course or community park area. Can we buy it as a coop between Tomoka Oaks and The Trails and Talaquah?
172	Vallie Smith and Charles McLeod *The Trails*	Granada is already a traffic hazzard with the abundance of traffic.	Our water utility is stressed enough!	A nice park would be exciting.
173	W. R. Reed ll *The Trails*	Lack of a public golf course in o.Bch. Also, heavy traffic with limited exits.	Emergency vehicles access.	We need a public golf course. Come on Ormond Beach, spend the money.
174	William Beyer *The Trails*	My primary concern is traffic. Besides catastrophic evacuation gridlock in the event of a hurricane, just adding that many more vehicles to an already overburdened infrastructure is mismanagement at it's worst.	Shortage of medical services. The county is already stretched thin and the addition of several hundred more families (not to mention all the construction ongoing on Clyde Morris Blvd And Williamson Blvd will surely to degradation of medical care.	I would like to see the City of Ormond Bch and Volusia County step up and buy out the developers. They could create a park with walking trails, handball, tennis & pickle ball courts that could charge a nominal fee that would pay the purchase.
175	James Nobles *Tomoka Oakwood North Condos*	Traffic	Air and noise pollution plus many of the examples listed. This developer should be tarred and feathered and sent walking. What a pig.	Turn it into a park or another golf course.
176	Mary Hintze *Tomoka Oakwood North Condos*	Traffic, gridlock , overcrowded	More importantly All of the concerns listed above !	Left as a golf course, if not a park like setting !

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
177	Maria Martin *Tomoka Oakwood North Condos*	Althering of neighborhood chatacter	Catastrophic evacuation gridlock dangerously.	It will be ideal the golf course move to a bigger space.
178	Dawn Waldorf *Talaquah*	Increased traffic on Nova Rd. Dangerous middle lane.	Decreased property values	A community park
179	Dawn Waldorf and Geeter Kyrazis *Talaquah*	Loss of quiet enjoyment - the character and quiet nature of the neighborhood will be impacted by excess population density	Increased traffic - road infrastructure is not sufficient for increased population	Converted into public green space
180	Ginger Davis *Talaquah*	Traffic	Loss of quiet	Low density housing that compliments the existing lot sizes adjacent the golf course
181	José laura Gierbolini *Talaquah*	Traffic	Should be redeveloped as a golf course	Keep it a golf course. Add tennis pickleball and restaurant
182	Sally Wells *Talaquah*	Traffic	Water shortages	Park
183	Martha Hurst *Fiesta Heights but have family who live on the old Tomoka Oaks golf course*	Traffic. It's awful slresfy	Home value decrease	Daytona State takes it over and start a horticultural and agronomy school. Closest one is in Lake City.
184	Marce Kinstle *Hidden Hills*	The traffic on Granada is horrendous and can not be handled as is. The development is pushing the animals into the neighborhoods as well as flooding that has never occurred is now happening in my neighborhood.	The people who have lived there for years are going to have to deal with the new hydrodynamics and every time they develop they push the water to the older properties. My yard has never flooded until this year with all the new development	Let the neighborhood decide
185	Amy Sandler *Ormond By the Sea*	All of the above	We are choking with overdevelopment. I am not confident that having industrial production is necessary for our area	A non sectarian private or charter school
186	Crabb Family *Tomoka Estates*	We are against this development due to the increased traffic and impacts on our already strained health and safety services.	Our roads are already in need of repair and maintenance so these added families will only increase another area our community is struggling with.	Make it a nature park.
187	Douglas Widnall III *Tomoka Meadows*	Traffic	Environmental Concerns	I would like to see it become a golf course again,
188	Nancy DeLuca *Trails North Forty* *(former Trails homeowner)*	#1: alteration of neighborhood character and loss of quiet enjoyment for people and wildlife	#2: I don't like the fact that the developers assume they can change the zoning. Just because they purchased the property doesn't make them entitled to do what they want with it	I would like to see the city or county purchase the property and maintain it as a public golf course
189	John Chadwell *Village of Pine Run*	Added traffic . Added density which is inconsistent with the surroundings. .	Overcrowding the schools and stressing our infrastructure	The golf course becomes "green space"
190	Chrisann Joson *Coquina Point,* *parents live in Tomoka Oaks*	Reduced property value	Traffic	Golf course restored!!
191	Missy Ascik *Beachside*	Traffic	influx of people and lack of infrastructure. Roads, schools, hospitals	community park with community garden, walking trails and open areas
192	Al Wilson *Other Ormond Beach neighborhood*	Traffic concern in and out of Tomoka Oaks and the Trails and along the Nova Rd and Granada corridor. The homeowners at the entrances of both communities will suffer loss of property value as well.	The shopping center at the Trails is already overflowing, Publix is crazy most days and all the restaurants are booked as well. Can't imagine adding 250-300 homesites in that area.	Perhaps larger estate lots with lots of greenspace. A 9 hole par 3 with a community clubhouse as well.

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
193	Barbara Bonarrigo *Other Ormond Beach neighborhood*	Traffic,	Altering of neighborhood character	Recreation
194	David Mott *Other Ormond Beach neighborhood*	Me and other folks moved into a golf course community because it is a golf course community .	Crime, pollution, traffic,congestion - more people more of all of the aforementioned	Turn it into a city owned/operated municipal golf corse. 4 or more courses have been shut down in theOB/DB area because of greedy land barons and whoever is in bed with them.
195	Debbie Cavanaugh *Other Ormond Beach neighborhood*	Traffic: Ormond Beach is getting way too crowded and does not have the infrastructure to handle 317 new homes. Traffic is bad now and it would be a nightmare to add potentially another 600+ vehicles using our roadways.	Home Values: Ormond Beach was the place to live. You paid more money for your home because of the character of the city. Adding that many homes would take away from the value of my largest investment, my home.	You could Parcel out sections near existing homes giving the homeowner and opportunity to expand their existing single residence property. Use other sections for community activity geared things for the existing community.
196	Dennis & Barbara Manzer *Other Ormond Beach neighborhood*	Take care of the infrastructure before you start building.	Failing to develop the infrastructure before expanding the population. DUH!	Leave the property alone until all the infrastructure is in place.
197	Dorena James *Other Ormond Beach neighborhood*	Overcrowding, over development	Traffic	Turn into green space for a park for all to enjoy.
198	Elena Krafft *Other Ormond Beach neighborhood*	Traffic	Overcrowding	Restored
199	Ivona Tydir *Other Ormond Beach neighborhood*	Biggest issue is storm system and flooding of the Trails that would be inevitable with rising water table in the hurricane season.	Traffic on Rio Pinar will be unfair to the residents of the Trails.	Park, nature preserve or recreational area.
200	Jeff Boyle *Other Ormond Beach neighborhood*	traffic, altering neighborhood character	environment, toxic soil, runoff flooding	redeveloped golf course, open space recreation
201	Josie Coulson *Other Ormond Beach neighborhood*	The answer is spelled out above! Every single one of them. Please do not allow this to happen!	Answered above	Allow the residents living there the right to make that decision and City Commissioners have tha.
202	Julie Sipes *Other Ormond Beach neighborhood*	Traffic	Altering the character of the neighborhood	Be a Golf Course or a Park
203	Lisa Bennett *Other Ormond Beach neighborhood*	traffic: this development will only exacerbate things. There are only two ways to leave Ormond Beach. Granada is a complete nightmare, and US1 is almost there. Adding all those homes will seal the deal on traffic.	OVER DEVELOPMENT. What has been done to this town is sinful. A once quaint and unique town has just become like any other over developed city in FL. And there is only one reason for it. Greed.	A golf course or green space.
204	Mark Chase *Other Ormond Beach neighborhood*	traffic. city resorces, woods and open ares cleard for houses.	over building.	leave as is.
205	Michael Shawn McBride *Other Ormond Beach neighborhood*	Over development	Lack of infrastructure	Affordable housing
206	Nancy Meres *Other Ormond Beach neighborhood*	There is already an increase of traffic ,,	School's are overcrowded Now,	Nothing
207	Pamela Novy *Other Ormond Beach neighborhood*	Traffic resulting in gridlock and added difficulty during evacuations.	Losing more trees and green spaces	I'd love to see a park with walking and biking trails.
208	Pamela Skilling *Other Ormond Beach neighborhood*	Altering of neighborhood character whic would be caused by overcrowding, ie, too many homes leading to too much traffic /gridlock issues, which will drastically reduce quality of life	Too much traffic increasing neighbors sense of danger if trying to take a walk, ie, loss of enjoyment	A park with pickleball courts, benches, picnic tables , etc. whatever a majority of the residents would like. How about more GREEN SPACE!?@&!! What a novel concept! Thank you
209	Peran family *Other Ormond Beach neighborhood*	Traffic	Loss of quiet enjoyment	Make gardens/park

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
210	Rick and Linda Beadel *Other Ormond Beach neighborhood*	Increased traffic, loss of quiet enjoyment, reduced property values,	It should remain a golf course or sanctuary. This is what the people that bought in Tomoka Oaks thought they were getting. I support their efforts because if it can happen to them it can happen anywhere.	devoped as a sanctuary preserve
211	Ron Joson *Other Ormond Beach neighborhood*	Changing the landscape of the Tomoka Oaks community	Traffic congestion	Rebuild golf course
212	Shirley James *Other Ormond Beach neighborhood*	Traffic, not appropriate infrastructure to handle all the new building and you already can't get a bed at Advent. Overnight stays in the ER hallway are unacceptable.	Those who purchased gold course property and paid higher taxes all those years have lost the value of their location.	Redevelop as a 3 par, driving range. Our kids grew up playing gold and tennis there - such a shame.
213	Suzanne Scheiber *Other Ormond Beach neighborhood*	overdevelopment causes all of these issues. We are behind on medical services, infrastructure, and basic planning for Ormond Beach. If I have to choose one then infrastructure.	loss of quality of life which is all encompassing of many items to consider that you name in #1.	green space open to the public
214	Tamisue Wills *Other Ormond Beach neighborhood*	Traffic	Overcrowding of schools	Park
215	The Kennedy Family *Other Ormond Beach neighborhood*	Increased traffic on already crowded Nova Road and Granada Blvd. would add crucial time for ambulance, fire and police responders.	The character of the community would be greatly diminished and decrease property values.	People bought homes in Tomoka Oaks with expectations that the golf course area would remain community property. That would be honored in a perfect world.
216	Don Miller *Daytona Beach*	home values will plummet	clear cutting of land	City and ECHO should purchase all perimeter golf course holes, return to a golf course, and lease management of course. Leave center only for residential building..
217	Kory Lostaglio *Realtor/former Tom.Oaks*	I understand everyone's right to profit from real estate acquisitions, I feel there are far too many residences planned for this area. Having this many homes will affect everything negatively except of course for the county tax & investor profits.	This many homes puts a burden on everything, traffic especially.	I think a community built for the elderly with some single family, some condos and a medical facility is much wiser. It will cut down on the traffic as most people living there won't be driving. It could be a perfect retirement village.
218	Ann Johnson *Port Orange*	The damage it will cause to surrounding communities, like flooding.	Traffic. The infrastructure is not capable of handling all the traffic that comes with such development.	Return to natural by being purchased by city or county.
219	Constance Colby *Close residential neighborhood*	Depriving people who bought on a golf course their rights to open space by. Turning the golf course into an overcrowded slum area.	Traffic both through the Trails and Nova Road which is already a death trap which plans are to narrow it.	Revert to a golf course, maybe public with memberships. We need one as so many have closed and there are lots of retirees here.
220	Ryan Firmin *Concerned vacationer to the area*	The capacity to ruin a very desirable neighborhood by stuffing in houses like sardines	Increased need for medical services which would delay emergency care	Public park
221	Megan cody *Out of state*	Traffic	Loss of charm. I've been coming to visit family in Tomoka Oaks since 1991 and love the quaintness of this special place. If this place looses its charm our family will have to find another place to come and stay when we are in the area.	the project is too big. This should be a park, a green space or at the most 119 homes.

Doug Thomas, Chairman
Ormond Beach Planning Board
22 South Beach Street
Ormond Beach, Florida 32174

Re: ***Tomoka Reserve – PRD-2022-043***

Dear Chairman Thomas & Planning Board Members:

Our law firm represents Carolyn Davis and a consortium of homeowners within the Tomoka Oaks Country Club Estates subdivision in Ormond Beach, Florida ("Tomoka Oaks"). At its regular meeting on ***Thursday, July 13, 2023***, the Ormond Beach Planning Board ("Planning Board") is scheduled to consider the above-referenced project, which seeks to rezone and convert the existing Tomoka Oaks golf course into 276 single-family residential lots. For the reasons discussed herein, our clients oppose the proposed redevelopment of the golf course property and respectfully request that the Planning Board recommend ***denial*** of the proposed rezoning.

A. General Factual Overview

Briefly stated, in April 2021, Triumph Oaks of Ormond Beach, LLC ("Triumph Oaks"), purchased the Tomoka Oaks Golf & Country Club ("Golf Club") for approximately $2,600,000. Thereafter, Triumph Oaks filed an application with the City of Ormond Beach ("City") seeking to rezone the golf course property to Planned Residential Development (PRD) and redevelop the golf course with 276 single-family residential lots. Based upon such rezoning application and Triumph Oaks' proposed plans to permanently close the Golf Club and convert the golf course into 276 single-family lots, the issue has arisen as to whether the property is restricted to use as a golf course, either expressly or impliedly.

As discussed herein and based upon the historical and recorded documentation relating to Tomoka Oaks, our clients maintain that the Golf Club property is subject to either an express covenant or an implied covenant limiting the use of the property to a golf and country club, golf course, and related recreational uses. Accordingly, our clients assert that the proposal to convert

the Golf Club property into 276 single-family residential lots is not permissible and the requested rezoning should be ***denied***.

B. The Golf Club Restriction

In 1961, the City approved plats for both the Golf Club (f/k/a Sam Snead Golf & Country Club) and Tomoka Oaks Country Club Estates Unit 1.[1] The Plat for Unit 1 of the Tomoka Oaks Country Club Estates subdivision contained 105 residential lots, including approximately 55 residential lots bordering the golf course.[2]

In conjunction with the development of Unit 1 of Tomoka Oaks, the developer recorded "Restrictions Tomoka Oaks Country Club Estates, Unit #1, Ormond Beach, Florida" ("Unit 1 Covenants").[3] Notably, Paragraph 10 of the Unit 1 Covenants states:

> The Grantee [*i.e.*, lot owner] shall automatically become a member of the Tomoka Oaks Homeowners Association, a non-profit corporation comprised of all lot owners in Tomoka Oaks Country Club Estates . . . .

Paragraph 11 of the Unit 1 Covenants expressly prohibited the developer from releasing in whole or in part any restriction or reservation set forth in Paragraph 10.

Thereafter, on or about January 1, 1963, Tomoka Oaks, Inc., entered a 99-year "Lease" with Tomoka Oaks Golf and Country Club, Inc., for the golf course property.[4] Paragraph 3 of the Lease, entitled "Use," provided in pertinent part:

> ***The demised premises shall be used perpetually for a country club and related uses***. . . . ***This provision shall survive the lease*** and be included in any deed but the deed restriction may be waived by a resolution of two-thirds (2/3) of the Board of Directors of the Lessee with the concurrence of two-thirds (2/3) of the members of said Lessee and the concurrence of two-thirds (2/3) of the members of Tomoka Oaks Homeowners Association. . . .[5]

On or about October 30, 1963, Tomoka Oaks Golf and Country Club, Inc., executed a "Surrender of Lease."[6] As noted above, however, the limitation that the subject property be "used perpetually for a country club and related uses" survived the Lease per the express terms of Paragraph 3 therein.

5 *See id*. at Page 362 (emphasis supplied).
6 *See id*. at Book 585, Page 155.

Following the Surrender of Lease, Tomoka Oaks, Inc., conveyed the golf course property to Ralph B. Frederick, Trustee, via Warranty Deed dated December 12, 1963 ("1963 Warranty Deed").[7] Notably, the 1963 Warranty Deed for the golf course property provided in pertinent part:

> ***The above described property shall be used perpetually for purposes of a golf and country club, golf course, and related uses***, and in the event that party of the second part, or its successors in interest, ***fail to utilize said property exclusively as a golf and country club, golf course, and related uses***, and the property not be sold to Tomoka Oaks, Inc., Tomoka Oaks Golf and Country Club, Inc. or Tomoka Oaks Homeowners Association as specified in the preceding paragraph, ***then the above described property shall automatically revert*** to and become the property of party of the first part . . . .
>
> ***The aforesaid reverter clause specified in the last preceding paragraph may be released or modified*** by resolution concurred in by two-thirds of the entire board of directors of Tomoka Oaks, Inc. at any time after ten years after the date of recording of this Deed; provided that if Tomoka Oaks, Inc. shall have disposed of four-fifths (4/5) of the lots in Tomoka Oaks Country Club Estates, then the foregoing right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks Homeowners Association, Inc., to be exercised by resolution of two-thirds (2/3) of the Board of Directors of the Tomoka Oaks Homeowners Association, Inc.[8]

Consistent with the terms of the surrendered Lease, the 1963 Warranty Deed expressly provided that the subject property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." Moreover, while the 1963 Warranty Deed included language and a process for the release or modification of the "reverter clause," there is no language in the 1963 Warranty Deed authorizing the release or modification of the actual restrictive covenant limiting the use of the property to a "golf and country club, golf course, and related uses."

On or about February 18, 1969, Tomoka Oaks, Inc., purported to pass a "Resolution" to effectuate the sale of the golf course property to Ormond Ocean Homes, Inc.[9] Therein, Tomoka Oaks, Inc., purported to "release . . . its right of first refusal" and "further releases the reverter clause contained in [the 1963 Warranty Deed], such release of reverter to become effective December 13, 1973, the release date specified in such reverter clause."[10] Relying upon such Resolution, Tomoka Oaks, Inc., executed a "Release" on or about June 16, 1971, purporting to

---

[7] *See id*. at Book 585, Page 157. At the time of such conveyance, Ralph B. Frederick was also apparently the President of Tomoka Oaks, Inc.

[8] *See id*. at Page 159 (emphasis supplied).

[9] *See id*. at Book 1238, Page 246.

[10] *See id*. at Page 248.

release its "right of first refusal" and the "reverter clause contained in [the 1963 Warranty Deed], such release of reverter to become effective December 13, 1973, the release date specified in such reverter clause."[11]

Based upon the foregoing Resolution and Release, Triumph Oaks and/or its representatives have suggested to the City that the use restriction imposed upon the golf course property is no longer valid or in effect. Our clients maintain that this view is legally flawed and without merit.

As reflected above, the 1963 Lease for the golf course property expressly provided that "[t]he demised premises shall be used perpetually for a country club and related uses" and that such "provision shall survive the lease." Additionally, and consistent with the 1963 Lease, the 1963 Warranty Deed expressly provided that the property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." While the 1963 Lease mentions a process by which such use restriction could potentially be waived, the historical documentation presented to our office does not establish that such process was ever followed – *i.e.*, concurrence of two-thirds of the Lessee and its members and two-thirds of the members of the Tomoka Oaks Homeowners Association.[12]

Further, while the 1963 Warranty Deed included language and a process for the release or modification of the "reverter clause," there is no language in the Warranty Deed authorizing the release or modification of the actual restrictive covenant limiting the use of the property to a "golf and country club, golf course, and related uses." Rather, the 1963 Warranty Deed unambiguously states that the subject property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses."

Lastly, reliance upon the 1969 Resolution and the 1971 Release to claim that the use restriction was somehow waived or released is misplaced. Even assuming the 1969 Resolution and the 1971 Release are valid – which is questionable – neither document purports to release, waive, or otherwise modify the use restriction.[13]

---

[11] *See id*. at Book 1307, Page 89.

[12] The historical documentation provided to our office, including newspaper articles, reflect the existence of a "Tomoka Oaks Homeowners Association" during the subject timeframe.

[13] The 1969 Resolution and the 1971 Release are of questionable validity given that they purport to "prospectively" release the "right of reverter." By its own terms, the 1963 Warranty Deed provided that Tomoka Oaks, Inc., could release or modify the reverter clause only by resolution "at any time ***after*** ten years ***after*** the date of recording of this Deed" and only if Tomoka Oaks, Inc., had not yet disposed of four-fifths (4/5) of the lots in Tomoka Oaks at such time. *See* Book 585, Pages 158-59, Official Records of Volusia County (emphasis supplied). Contrary to the plain language of the 1963 Warranty Deed, Tomoka Oaks, Inc., purported to pass a resolution more than four (4) years ***before*** the ten (10) year anniversary of the recording of the 1963 Warranty Deed seeking to release the right of reverter. Further, the fact that the 1969 Resolution and the 1971 Release purported to "delay" the effectiveness of such release until December 13, 1973 (*i.e.*, ten (10) years after the 1963 Warranty Deed was recorded) is irrelevant. Not only does it ignore the fact that the 1963 Warranty Deed required the resolution itself to occur ten (10) years ***after*** the

As discussed above, the 1969 Resolution and the 1971 Release purport to release the "right of first refusal" and the "reverter clause." Nothing in the express language of the 1969 Resolution or the 1971 Release, however, purports to waive, release, or otherwise modify the use restriction providing that the property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." Accordingly, based upon the foregoing and the plain and unambiguous language in the 1963 Lease and the 1963 Warranty Deed, our clients maintain that such use restriction is valid and effective and was never lawfully released, waived, or otherwise terminated. On this basis alone, the proposed conversion of the golf course into 276 single-family residential lots would be prohibited and the Planning Board should recommend ***denial*** of the proposed rezoning.

C. Implied Restriction Limiting The Tomoka Oaks Property To Use As A Golf Club

In addition to the above, it is well established that a "restrictive covenant" may "arise by implication from the conduct of parties or from the language used in deeds, plats, maps, or general building development plans."[14] In this regard, courts have recognized:

> If there is a common plan of development that places restrictions on property use, then such restrictions may be enforced in equity. "A court's primary interest in equity is to give effect to the actual intent of the grantor . . . by looking not only to language in deeds, but variously to matters extrinsic to related written documents, including conduct, conversation, and correspondence."[15]

Consistent with the above, Florida courts have held that use restrictions may also be implied based upon notations denoted on plats or maps:

> Whenever the owner of a tract of land subdivides the same into lots and blocks, lays off streets and other public ways and designates portions of said lands to be parks[,] playgrounds[,] or similar facilities or uses similar words calculated to encourage prospective purchasers to buy said lots, and actually sells lots with reference to the plat, he becomes bound to his grantees by the plat and the representations thereon. As the maker of the plat and the one who selects the words used thereon it will be construed against him.

---

recording of the Deed, but it ignores the fact that Tomoka Oaks, Inc., did not have any authority to adopt any such resolution if four-fifths (4/5) of the lots in Tomoka Oaks had been disposed of by such time.

[14] *See Skyline Woods Homeowners Ass'n. v. Broekmeier*, 805, 758 N.W.2d 376, 387 (Neb. 2008).

[15] *See id*. (citation omitted); *see also Strader v. Oakley*, 410 So. 2d 954, 955-56 (Fla. 1st DCA 1982) (recognizing implied restriction that limited construction to only single-family residences).

> Common honesty requires that he perform that which at the time of conveyance he represented he would perform.[16]

Turning to the instant case, several courts have examined implied restrictions and the requirement to maintain or operate property as a golf course when developed in conjunction with a surrounding residential subdivision. For example, in *Shalimar Association v. D.O.C. Enterprises*, 688 P.2d 682 (Az. Ct. App. 1984), the court held that there was an implied restrictive covenant to maintain property as a golf course even though there were no express covenants burdening the golf course property on behalf of the adjoining homeowners. The court concluded that the common plan of development, which included a golf course, combined with the representations made to the purchasers about the maintenance of the golf course and the adjoining homeowners' express covenants, created an implied restrictive covenant that the land be used only as a golf course.

Similarly, in *Ute Park Summer Homes Association v. Maxwell Land Grant Co.*, 427 P.2d 249 (N.M. 1967), the New Mexico Supreme Court found that an implied restriction existed requiring the subject property to be used as a golf course. In so doing, the court focused on the representations made to prospective purchasers and the materials used in the sales of the lots which pictured an area marked "golf course." The court reiterated that, when a map or plat showing a park or other open area is used to sell property, "the purchaser acquires a private right, generally referred to as an easement, that such area shall be used in the manner designated," and such private right "is not dependent on a proper making and recording of a plat for purposes of dedication."[17]

Numerous other courts have concluded that the facts surrounding the initial development of properties as golf course communities and the marketing of lots in such communities to prospective purchasers created an "implied restrictive covenant" limiting the use of the subject properties to a golf course. In reaching this conclusion, the courts have examined such things as: (1) the plats, maps, and drawings of the community; (2) advertisements, brochures, and marketing materials; (3) common schemes or plans of development; (4) recorded covenants; (5) general informational documents regarding the community; and (6) lot premiums and purchasers' reliance upon the existence of the golf course in acquiring their lots.[18]

---

[16] *McCorquodale v. Keyton*, 63 So. 2d 906, 910 (Fla. 1953); *see also Boothby v. Gulf Props. of Ala.*, 40 So. 2d 117 (Fla. 1948). A common plan or scheme of development is a well-recognized principle in Florida law. *See Hagan v. Sabal Palms, Inc.*, 186 So. 2d 302, 307 (Fla. 1966).

[17] *Ute Park Summer Homes Association v. Maxwell Land Grant Co.*, 427 P.2d 249, 253 (N.M. 1967).

[18] *See Knight v. City of Albuquerque*, 794 P. 2d 739 (N.M. Ct. App. 2014) (holding property denoted on subdivision plats as a golf course must remain either a golf course or open space, stating "a developer will not be allowed to induce purchasers to buy property by purporting to include open space such as parks or golf course in a subdivision plat, only to subsequently change the uses of those open space areas"); *In re Heatherwood Holdings, LLC v. HGC, Inc.*, 746 F.3d 1206 (11th Cir. 2014) (holding evidence of common scheme of development that included golf course property as an integral part and as an inducement to purchasers of residential lots

Here, the historical documentation relating to Tomoka Oaks and the Golf Club establishes the following: (1) a common developer (Tomoka Oaks, Inc.) with a plan of development for a residential community surrounding an 18-hole championship golf course; (2) an approved unified master plan for Tomoka Oaks, which included the golf course and the residential lots; (3) references to "golf course" on the recorded plats for various portions of Tomoka Oaks; (4) recorded restrictions, as previously discussed, providing that the golf course property shall be used "for purposes of a golf and country club, golf course, and related uses"; (5) recorded residential covenants that reference the golf course and authorize reduced setbacks to take advantage of the adjoining golf course; (6) marketing and sales materials for the residential lots depicting the common development plan, including the golf course; (7) evidence of lot premiums being charged for residential lots with golf course frontage; and (8) evidence that successors developers had actual, as well as constructive, notice of the approved master plan and common plan of development. Additionally, it is indisputable that residents within Tomoka Oaks purchased their properties in reliance upon or because of the Golf Club.

Accordingly, even assuming the express covenant restricting use of the subject property to a golf and country club is no longer valid as Triumph Oaks has erroneously suggested, the above-summarized facts and cited case law would establish that, at a minimum, the use of the Golf Club property is limited to a golf course or similar open space purposes by virtue of an implied restrictive covenant. Simply put, whether by an implied grant, implied restriction, or estoppel, such restriction would prevent the subdivision and development of the Golf Club property with 276 single-family residential lots as currently proposed. Thus, on this additional basis, the Planning Board should recommend ***denial*** of the proposed rezoning.

D. Conclusion

In sum, as discussed herein, nothing in the express language of the 1969 Resolution or the 1971 Release purports to waive, release, or otherwise modify the use restriction imposed via the 1963 Lease and the 1963 Warranty Deed that the property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." Thus, based upon the foregoing and the plain and unambiguous language in the 1963 Lease and the 1963 Warranty Deed that the use

---

therein created an implied restriction limiting the use of such property to a golf course); *Ponderosa Pines Golf Course, LLC v. Ponderosa Pines Prop. Owner's Ass'n*, 2013 WL 4515569 (N.M. Ct. App. 2013) (holding "equitable servitude in favor of the individual subdivision property owners precluded Plaintiff from changing the use of the golf course"); *Skyline Woods Homeowners Ass'n.*, 758 N.W.2d at 390 ("We conclude that homeowners who bought their property relying on the proximity and existence of the golf course should be protected by implied restrictive covenants that the property be maintained as a golf course. We therefore agree with the district court that an implied restrictive covenant requiring that it be used only as a golf course burdens and runs with the golf course property."); *see also Victorville W. Ltd. P'ship v. Inverrary Ass'n*, 226 So. 3d 888 (Fla. 4th DCA 2017) (refusing to cancel golf course covenant even though course had become unprofitable, concluding that "the golf course preserves the character of the community and provides residents with a pleasant view" and, thus, "must be enforced because it remains a 'substantial value to' the surrounding residences").

restriction was to be "perpetual," our clients maintain that such use restriction is still valid and in effect. Accordingly, on this basis alone, our clients respectfully submit that the Planning Board should recommend ***denial*** of the proposed rezoning, which seeks to improperly convert the Golf Club property into 276 single-family residential lots, or otherwise table the matter until such time as a judicial determination is made regarding the continued validity of the express restrictive covenant.

Further, even assuming the express restrictive covenant is no longer valid and in effect, as Triumph Oaks has erroneously suggested, our clients maintain that the Golf Club property is nevertheless subject to an implied restrictive covenant, thereby limiting the use of such property to a golf and country club, golf course, and related recreational uses. On this additional basis, our clients respectfully submit that the Planning Board should recommend ***denial*** of the proposed rezoning or otherwise table the matter until such time as a judicial determination is made regarding such implied restriction.

Our clients appreciate the Planning Board's attention to this matter of great community importance to the residents of Tomoka Oaks and respectfully request that the Planning Board recommend ***denial*** of the proposed rezoning. Please do not hesitate to contact me if you have any questions or need additional information,

Sincerely,

S. Brent Spain

Protective Covenants and Restrictions - modified 3/10/24

I researched the history of parcel 39-14-32, which was developed into the **Sam Snead Golf and Country Club** and the **Tomoka Oaks Country Club Estates,** to reconstruct the sales and ownership history of these two properties and the recordings of covenants and restrictions related to the properties.

Based on this research, I have formed the opinion that:

1. In the early 1960's, Tomoka Oaks, Inc. recorded protective covenants restricting land use of the Sam Snead Golf and Country Club to be "**perpetually for use as a golf and country club, golf course, and related uses**."

2. Throughout the early 1960's, Tomoka Oaks, Inc. recorded deeds, leases, covenants, restrictions, referral rights, and reverter clauses to protect the intended perpetual use of the golf course property, as well as protect the financial interests of lot and homeowners should the golf course property not be used as recorded in the protective covenants and restrictions.

3. Beginning in 1969, conflicts of interest in cross-ownership resulted in recordings being filed with Volusia County that intentionally, systematically and questionably negated or released many of the earlier protective covenants and restrictions, and eliminated rights of current and future Tomoka Oaks Country Club Estates homeowners should the golf course property not be used as originally encumbered: **perpetually for use as a golf and country club, golf course, and related uses**.

4. The unethical and possibly illegal documents filed in #3 above could potentially cloud the title due to cross-ownership conflicts of interest. Therefore, the protective covenants and restrictions originally recorded in the early 1960's (specifically Warranty Deed 585/157 recorded 12/12/1963 and Restrictions 431/32 recorded 1/31/1962) may still be in effect today.

For the Reader's information:

- The preceding pages of this section contain tables detailing recordings on file with Volusia County, and articles in the *Daytona Beach News-Journal,* that are the basis for my opinions throughout this section. Tables cite the document's recording date and book and page number for each specific deed, lease, covenant, restriction, referral right, and reverter clause.

- All *Daytona Beach News-Journal* article citations come from www.newsbank.com accessed through the Volusia County Library.

- All opinions are my own. I did not collaborate with any other Tomoka Oaks homeowner or with the HOA.

- This document was edited on 3/10/24 to include the legal opinion of land use attorney Brent Spain of Theriaque & Spain law firm per his letter to the Planning Board dated July 12, 2023 available at https://ormondbeachfl.portal.civicclerk.com/event/2455/files/attachment/7874

  Pages 298-305

Protective Covenants and Restrictions: January 1962 - December 1963

It is my opinion that:

- William R. McElroy, as the first president and Chairman of the Board of Tomoka Oaks, Inc.,[1] fulfilled his fiduciary responsibility to both Tomoka Oaks, Inc. stockholders and to the Tomoka Oaks Country Club Estate lot owners and homeowners by filing official recordings with Volusia County that:
    1. Encumbered the use of the golf course property as "**perpetually for use as a golf and country club, golf course, and related uses**."
    2. Protected Tomoka Oaks, Inc. and protected residential lot owners and homeowners by recording covenants, restrictions, referral rights, and reverter clauses should the golf course property not be used perpetually as a golf and country club, golf course, and related uses.
    3. Provided current and future residential lot owners and homeowners in Unit 1 with automatic Tomoka Oaks Homeowner Association (HOA) membership, of which said HOA:
        - Could be transferred the referral right to accept or reject Sam Snead golf course property sales offers should Tomoka Oaks, Inc. transfer to the HOA the right to accept or reject the offer.
        - Has legal standing via reverter rights should future Sam Snead Golf and Country Club owners not use the golf course property as perpetually intended.

Table 1	Official Recording Date 1/31/1962

Restrictions – Unit 1, Tomoka Oaks Country Club Estates
Recorded 1/31/1962. Book 431 / Page 32.

Verbatim Text
Tomoka Oaks, Inc. the owner and grantor of all lots, desires the lots be subject to certain restrictions for the mutual benefit and protection of said owner and to persons both natural and corporate who may hereafter purchase or acquire any interest in said property.

The owner declares and creates the following restrictions, reservations and conditions to be binding upon it and upon each and every person and corporation hereafter.

Paraphrase of Restriction Highlights

#3 Construction on lots adjoining the golf course can be within 10 feet of golf course boundary

#10 Grantee automatically a member of the Tomoka Oaks Homeowners Association

#11 Grantor reserves right to release restrictions except #10

#14 Grantor may transfer right to enforce restrictions to the Tomoka Oaks Homeowners Association

#15 Covenants binding for 25 years, then automatically extended for successive periods of 10 years unless instrument signed by majority of lot owners is recorded agreeing to covenant changes.

Submitted and signed by:
Tomoka Oaks, Inc.
W. L. McElroy, President
Ted Brousseau, Secretary

[1] (Daytona Beach Sunday News-Journal pg 36 - Tomoka Oaks Subdivision Work Starts, 10/1/1961)

My opinion

I believe Tomoka Oaks, Inc. intended Restrictions be consistent from Unit to Unit. Therefore, restrictions recorded for Unit 1 would also be recorded for subsequent Units such as Unit 3, etc. Paragraph #11's last sentence states, "The Grantor further reserves the right to include, in any contract or deed hereafter made, any additional restrictive covenants not inconsistent with these herein contained.

During my research, I found no official recordings by the majority of the lot owners agreeing to any covenant changes or releasing any restrictions in Unit 1.

Also, I have not received any documentation from the City that perpetuity covenants and restrictions were released by the voluntary Tomoka Oaks HOA (see Table 12).

Table 2 *Daytona Beach Sunday News-Journal* 7/8/1962

Daytona Beach Sunday News-Journal, 7/8/1962, page 16
NEW TOMOKA LINKS SOLD TO McELROY GROUP

Paraphrase:

- Golf Course Developers, Inc. sold out to Tomoka Oaks, Inc. due to financial issues.
- William R. (Bill) McElroy, president of Tomoka Oaks, Inc. announced the purchase.
- McElroy said plans under way for formation of a new corporation named Tomoka Oaks Golf Club, Inc.
- McElroy said it will be a "**permanent golf club**" and "When the new golf club corporation is formed, the land will be conveyed to the new corporation. **It will be subject to restrictions for use only as a golf club and other recreational use**."

My research shows:

- On 9/15/1961, the golf course property was conveyed by Tomoka Oaks, Inc. to Golf Course Developers, Inc., Warranty Deed Book 397 / Page 526 restricting use to a golf course.
- Golf Course Developers developed the Sam Snead Golf and Country Club during 1961-1962. As shown in the article above, Golf Course Developers sold the course back to Tomoka Oaks, Inc. Warranty Deed 465/202 dated 7/9/1962 and Mortgage Deed, Book 465 / Page 204 dated 8/1/1962.
- Tomoka Oaks Golf Club, Inc. was filed with Division of Corporations, State of Florida on 7/19/1962.
- Another corporation was filed 1/8/1963 called Tomoka Oaks Golf and Country Club, Inc. which was formed to handle the conveyance referred to in McElroy's article comments above. This conveyance took the form of a lease whose terms stated leased property "**shall be used perpetually for a country club and related uses**. " (See Table 3).

Table 3 Official Recording Date 1/1/1963

Golf Course Lease
Recorded 1/1/1963. Book 516 / Page 360.

Lease Start Date: 1/1/1963
Lessor: Tomoka Oaks, Inc. Signed by W. R. McElroy, President
Lessee: Tomoka Oaks Golf and Country Club, Inc. Signed by W. R. McElroy, President

Paraphrase of Lease Highlights:

- Premises: All of Sam Snead Golf and Country Club
- Term and Rental : Ninety-nine (99) years subject to termination as per terms of lease
- Use: Premises shall be used perpetually for a country club and related uses. This provision shall survive the lease and be included in the deed. Deed restrictions may be waived by two-thirds of Lessee Board of Directors with concurrence of:
    - 2/3's of the members of said Lessee
    - 2/3's of the members of the Tomoka Oaks Homeowners Association

My opinion:

- McElroy fulfilled his 7/8/1962 public statement (Table 2) to convey the Sam Snead Golf and Country Club, and that it was "subject to restrictions for use only as a golf club and other recreational use."
- McElroy fulfilled his 7/8/1962 public statement (Table 2) regarding the permanent use of the premises by incorporating into the lease deed restrictions that protected homeowners and golf club members should the property not be used perpetually for a country club and related uses.
- The lease was surrendered in late 1963 (Book 585 / Page 155) but as stated in the lease, the "use" provision survived the lease and was subsequently included in a Warranty Deed dated 12/12/1963, Book 585 / Page 157 (Table 6).
- The lease was another of the master plan elements which demonstrated the coexistence of the golf course and the residential estates.

Table 4 *Daytona Beach Sunday News-Journal* 2/23/1963

Daytona Beach Sunday News-Journal, 2/23/1963, page 14
ANNOUNCEMENT: Your Invitation to Visit Tomoka Oaks Country Club Estates

Paraphrased Excerpts

W.R. McElroy personally signed an **Invitation** as President of Tomoka Oaks Country Club Estates inviting potential home buyers to visit "the ultimate in gracious and contented living," where "from its very inception, no effort has been spared in planning and developing . . . one of the finest exclusive residential areas in the State of Florida." The Estates are "cut from 545 beautiful wooded acres . . . Right in the center of this magnificent natural beauty spot has been built Tomoka Oaks Golf and Country Club – an eighteen hole championship Golf Course."

McElroy went on to state, "To keep this Area in all its natural beauty, **certain protective covenants have been provided** for the benefit and protection of all property owners."

And in a prior **Invitation** published on 2/16/1963, page 2, of the *Daytona Beach News-Journal*, Tomoka Oaks Country Club Estates informed potential home buyers that, "To keep this Area in all its natural beauty, **certain protective covenants are necessary** for the benefit and protection of all property owners and will be included in the deed."

My opinion

McElroy fulfilled his public assurance to include protective covenants. (See Tables 5 and 6.)
This marketing invitation was another of the master plan elements of coexistence.

Table 5	Official Recording Date 3/1/1963

Supplemental Restrictions – Unit, 1 Tomoka Oaks Country Club Estates
Recorded 3/1/1963. Book 516 / Page 358

Paraphrased Excerpts

- Whereas Tomoka Oaks, Inc., a Florida Corporation, is the owner of all lots in Tomoka Oaks Country Club Estates, Unit #1 . . .
- Whereas said owner does now wish to subject said property to certain further restrictions relating to the size of residential buildings to be built adjacent to the golf course. . .
- No principal residence shall be constructed upon any lot adjacent to the golf course . . . which shall contain less than 1500 square feet of enclosed living area and 2300 square feet of total covered area.

Submitted and signed by:
Tomoka Oaks, Inc.
W. R. McElroy, President
Ted Brousseau, Secretary

My Opinion

The Sam Snead Golf and Country Club and the Tomoka Oaks Country Club Estates shared the common developer: Tomoka Oaks, Inc.

The golf course and the residential subdivision estates were designed and intended to coexist.

Tomoka Oaks, Inc. (a Florida Profit Corporation) wanted to protect their interest by ensuring the golf course would always be surrounded by homes that contained at least 2300 square feet. The value of the golf course was tied to the value of the lots surrounding it, and the value of the lots was tied to the value of the golf course bordering those lots. McElroy incorporated these supplemental restrictions to protect both Tomoka Oaks, Inc. financial interests and homeowners' financial interests.

Table 6	Official Recording Date 12/12/1963

Warranty Deed
Recorded 12/12/1963. Book 585 / Page 157.

Paraphrased summary separated into understandable segments

Warranty Deed - All of the Sam Snead Golf and Country Club
Between
Tomoka Oaks, Inc.; party of the first part (TOI)
AND
Ralph R. Frederick, trustee; party of the second part (FREDERICK)

[*start of Referral Rights*]

This conveyance is subject to the express condition that if FREDERICK desires to sell or convey the golf course to any person, firm, or corporation other than a subsidiary of FREDERICK, offers acceptable to owner (Ralph R. Frederick) are referred to TOI for TOI's acceptance or rejection for a period of 30 days.

If TOI rejects or fails to accept the offer, offer shall be presented to Tomoka Oaks Golf and Country Club, Inc. (TOGCC) for its acceptance or rejection for a period of 30 days. Acceptance or rejection is subject to the approval of TOI.

Right to accept or reject offer is transferrable and may be transferred by TOI or TOGCC to the Tomoka Oaks Homeowners Association (HOA) within 30 days and acted upon within those 30 days.

[*end of Referral Rights*]

[*start of property land use Covenant*]

The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.

[*end of property land use Covenan*t]

[*start of Reverter clause*]

- IF Frederick or successors in interest fail to utilize the property exclusively as a golf and country club, golf course, and related uses
- AND the property not be sold to TOI or TOGCC or HOA as specified in preceding paragraph
- THEN property shall automatically revert to and become the property of TOI
    - AND all rights of FREDERICK or successors in interest shall immediately terminate
        - UNLESS

        FREDERICK or successors shall within 90 days after the day of mailing to FREDERICK or successors by TOI or TOGCC or HOA a written notice to utilize said property as a golf and country club, golf course, and related uses, complies with said reverter clause and continues to use said property as a golf and country club, golf course, and related uses.

The reverter clause may be released or modified by resolution concurred in by two-thirds of the entire board of directors of Tomoka Oaks, Inc. at any time after ten years after the date of recording of this Deed on 12/12/1963; providing that

- IF TOI shall have disposed of four-fifths (4/5) of the lots in Tomoka Oaks Country Club Estates
- THEN the foregoing right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks HOA to be exercised by resolution of two-thirds (2/3) of the Board of Directors of the Tomoka Oaks HOA.

[*end of Reverter clause*]

Deed signed by: Ralph R. Frederick, President, Tomoka Oaks, Inc.

My opinion

Deed 585/157 was the primary instrument Tomoka Oaks, Inc. recorded to encumber and protect the use of the Sam Snead Golf and Country Club to be "**used perpetually for purposes of a golf and country club, golf course, and related uses**."

I believe the intent of deed 585/157 was to protect the financial interest of Tomoka Oaks, Inc. and the financial interest of the residential homeowners in Tomoka Oaks Country Club Estates should the golf course property ever be sold.

Regarding future sales, the "referral right:"

- Gave Tomoka Oaks, Inc. the right to match the offer thus preserving the "restricted use" of the golf course property.
- AND it gave Tomoka Oaks, Inc. the right to transfer the offer to the HOA of which every lot owner (in Unit 1 at the time of deed recording) was a member (Table 1).

Regarding the restricted use of the Sam Snead Golf and Country Club property, the reverter clause:

- Ensured the golf course property would revert back to Tomoka Oaks, Inc. should the owners fail to utilize the property exclusively as a golf and country club, golf course, and related uses
- Ensured that if 4/5's of the lots had been sold (which at the time of this deed recording would have been the Unit 1 lot owners) the reverted was vested automatically in the HOA of which every lot owner (in Unit 1 at the time of deed recording) was a member (Table 1), and the right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks HOA.

I believe Tomoka Oaks, Inc. intended that HOA membership would be automatic for all lot and homeowners for every Unit in Tomoka Oaks Country Club Estates (Table 1). Therefore the language of deed 585/157 would apply to all Units even though Unit 1 was the only Unit under development during the recording of Deed 585/157.

I am not including Tomoka Oaks Golf and Country Club, Inc. (TOGCC) in my opinion here, because TOGCC surrendered their lease in late 1963. But I did find inconsistencies in TOGCC's official recordings subsequent to the lease surrender as shown in Table 13.

This deed also fulfilled McElroy's public assurance to provide protective covenants for the benefit and protection of homeowners (Table 2).

Opinion of Brent Spain, land use attorney with Spain & Theriaque:

Consistent with the terms of the surrendered Lease, the 1963 Warranty Deed expressly provided that the subject property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." Moreover, while the 1963 Warranty Deed included language and a process for the release or modification of the "reverter clause," there is no language in the 1963 Warranty Deed authorizing the release or modification of the actual restrictive covenant limiting the use of the property to a "golf and country club, golf course, and related uses."

Ralph R. Frederick's Conflict of Interest in Cross Ownership

Frederick was president and the primary stock holder of TOCC, Inc. when TOCC, Inc. sold the Sam Snead Golf and Country Club to Ormond Ocean Homes, Inc. in March 1970. Frederick was also the President, General Manager, and a stockholder of Ormond Ocean Homes, Inc. at the time of the sale.

The newspaper articles in **Table 7** detail Ralph R. Frederick's cross ownership interests which, I believe, resulted in questionable and unethical filings and intentions as explained in subsequent tables in the section directly below titled: "Protective Covenants and Restrictions during Ralph R. Frederick's Ownership Interest: January 1966 - August 1969."

Table 7

Ralph R. Frederick had cross ownership interests in:

- Sam Snead Golf and Country Club
  - President, Trustee, and majority stock holder under Tomoka Oaks, Inc. from 12/12/1963 – 3/22/1964
  - President and majority stockholder under TOCC, Inc. from 3/23/1964 – 3/5/1970. Warranty Deed 612/269 dated 3/23/1964.
- Tomoka Oaks Country Club Estates
  - President and stock holder under Tomoka Oaks, Inc. from 12/12/1963 – 3/5/1970
- Ormond Ocean Homes
  - Stockholder, General Manager, President from 1961 - 3/28/1970 (as per news articles immediately below)

Three *Daytona Beach News-Journal* articles detail Ralph R. Frederick's ownership interest in Ormond Ocean Homes, Inc.

Sunday Issue Date 7/16/1961, page 35

ELLINOR MAKES DEAL ON NORTH HALF OF VILLAGE

- $1.5 million purchase of north section of Ellinor Village scheduled to close 9/10/1961.
- Buyers, all from Freeport, IL, will do business as Ormond Ocean Homes Inc., a Florida corporation.
- Stock held by officers and by Ralph R. Frederick of Ormond Beach who will be general manager.
- Frederick is a personal friend of the Freeport group and brought the two parties together.

Sunday Issue Date 5/30/1965, page 32

ORMOND RENTAL PROJECT GETS BIG FHA LOAN

- Ormond Ocean Homes, a 232-unit rental housing development on the Ormond peninsula, will spend $1,832,000 for modernizing, president Ralph Frederick announced last week.
- Money will be used to renovate the former north half of the Ellinor Village resort.
- Frederick will be the prime contractor
- Frederick, who heads 11 corporations here and is general manager of the Tomoka Oaks development, and Ray Gramley of Freeport, IL bought the development several years ago.

Evening Issue Date 3/6/1970, page 32

IT SAYS IT HERE by Bernard Kahn - page 16

What is brewing is negotiation by Phoenix [Arizona based Sovereign Industries, Inc. see 3/29/1970 Sunday, page 1], an investment conglomerate, to buy the Tomoka Oaks Golf and Country Club and Tomoka Oaks, Inc., the neighboring real estate development, plus Ormond Ocean Homes Apartments (the former north section of Ellinor Village.)
Hustlin' Ralph Frederick, the card playing pro motor, has the big piece of the action in all three parcels.

My Opinion

Ralph R. Frederick had a conflict of interest in ownership regarding the 3/5/1970 sale of the Sam Snead Golf and Country Club (which Frederick owned stock in under his corporation TOCC, Inc. Warranty Deed 612/269) and the sale of Tomoka Oaks

Country Club Estates (which Frederick owned stock in under Tomoka Oaks, Inc.) to Ormond Ocean Homes, Inc. where Frederick was a stockholder, president, and general manager. Just 23 days after the sale, Sovereign Industries, Inc. acquired all stock in Ormond Ocean Homes, Inc. on 3/28/1970 (Table 10). Therefore Frederick benefited financially from the sales of the golf course and the estates, and from the purchase of his Ormond Ocean Homes, Inc. stock. And it was in Frederick's best financial interest that prior recorded restrictions and covenants not jeopardize those sales.

Official filings recorded by Tomoka Oaks, Inc. and Tomoka Oaks Golf and Country Club, Inc. (that I see as questionable, unethical, and potentially cloud the title), were recorded AFTER 3/28/1970 and all relate to the systematic removal of protective covenants and/or the release of referral rights and reverter rights intended to protect golf course property "use" and protect the rights and financial interests of Tomoka Oaks lot and home owners. Tables 11, 12, 13, 15 and 16 detail these questionable filings.

Protective Covenants and Restrictions during Ralph R. Frederick's Ownership Interest: January 1966 - August 1969

Table 8	Official Recording Date 3/23/1964

Warranty Deed Warranty Deed 612/269
Dated 3/23/1964

Mortgage Deed
Dated 1/10/1966. Book 774 / Page 699.

TOCC, Inc., whose president and majority stockholder was Ralph R. Frederick, took possession of the Sam Snead Golf and Country Club via Warranty Deed 612/269 dated 3/23/1964. TOCC took out Mortgage Deed, Book 774 / Page 699, dated 1/10/1966.

The Note was endorsed by Ralph R. Frederick (as majority stockholder), James P. Callahan, George L. Haller, Russell W. McFall, and Richard L. Shelter who were all officers of Tomoka Oaks, Inc., and who all owned homes fronting the Sam Snead golf course.

I found no official recordings with Volusia County that reversed or modified the "restrictive use" of the Sam Snead Golf and Country Club in Deed 585/157 to be anything other than, "**The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.**"

My Opinion

This mortgage deed represents a conflict of interest in ownership as it was endorsed by officers of Tomoka Oaks, Inc. who also owned and lived in homes that fronted the Sam Snead golf course:

Ralph R Frederick	24 TOMOKA OAKS BLVD	Book 897 / Page 525
George L. Haller	23 PINE VALLEY CIR	Book 503 / Page 219
Russell W McFall	41 S ST ANDREWS DR	Book 830 / Page 396
Richard L. Shetler	66 ST ANDREWS DR	*Daytona Beach Sunday News-Journal*, 9/9/1962, pg 36 *Daytona Beach Morning Journal*, 12/21/1963, pg 11
James Callahan	Owner of lots:	
	29 S ST ANDREWS DR	*Daytona Beach Sunday News-Journal*, 10/23/1966, page 36
	33 S ST ANDREWS DR	*Daytona Beach Sunday News-Journal,* 8/18/1968, page 42

I believe this conflict carried forward in the future **Conveyance** of Tomoka Oaks Country Club Estates recorded 7/6/1970, Book 1212 / Page 70, which, in my opinion, was an unethical conveyance (Table 11).

Table 9	Official Recording Date 8/4/1969

RESTRICTIONS - Unit 3 Tomoka Oaks Country Club Estates
Dated 8/4/1969. Book 1121 / Page 554.

- Same as Unit 1 restrictions, but omitted automatic HOA membership of lot owners in Unit 3.
- Still contained golf course setback restriction for homes on the golf course

Signed by: Tomoka Oaks, Inc., R. W. Davis, President and Donald W. Acer, Jr., Secretary

Issues with Restrictions on Unit 3

When comparing line-for-line the Restrictions for Unit 1 (Table 1) and Unit 3, there were minor differences with two notable exceptions.

Exception 1. The entirety of paragraph #10 in the Unit 1 Restrictions was omitted in the Unit 3 Restrictions. The first sentence of paragraph #10 in Unit 1 states:

> *The Grantee shall automatically become a member of the Tomoka Oaks Homeowners Association; a non-profit corporation comprised of all of the lot owners in Tomoka Oaks Country Club Estates and shall be liable to pay such dues and/or assessments as may be required by said Association in proportion to the number of lots owned.*

Exception 2. Paragraph #11 in the Unit 1 Restrictions states:

> *The Grantor reserves the right to release in whole or in part any restrictions or reservation hereunder, except paragraph 10 immediately next preceding.*
>
> Unit 3 Restrictions state:
>
> *The Grantor reserves the right to release in whole or in part any restrictions or reservation.*

NOTE: Both Unit 1 and Unit 3 Restrictions state in their final paragraphs:

> *These covenants are to run with the land and shall be binding on all parties claiming under them for a period of 25 years from date these covenants are recorded, after which time said covenants shall be automatically extended for successive periods of 10 years unless instrument signed by a majority of the then lot owners has been recorded agreeing to change said covenants in whole or in part.*
>
> NOTE: My Volusia County research did not uncover any official records filed and recorded by lot owners or the HOA changing covenants in the Unit 1 or Unit 3 Restrictions. Nor have I received any documentation from the City that perpetuity covenants and restrictions were released by the voluntary Tomoka Oaks HOA (see Table 12)

My Opinion

Ralph R. Frederick was president of Tomoka Oaks, Inc. (owner of the residential estates) at the time Unit 3 Restrictions were recorded. He was also president and majority stockholder of TOCC, Inc. which owned the golf course property.

At the time Unit 3 Restrictions were recorded, Frederick knew both the golf course property and the remaining residential lots were under negotiation for sale to Ormond Ocean Homes, Inc. (of which Frederick was a stock holder - see Table 7), and he did not want the homeowners in Unit 3 to have legal recourse (as provided in Warranty Deed 585/157 reverter clause), through HOA membership that might potentially affect any future sale by Ormond Ocean Homes, Inc. And I believe Frederick had Ralph. W. Davis sign the Restrictions as President of Tomoka Oaks, Inc. to avoid the appearance of Frederick's conflict of interest in ownership in the golf course property and residential lots as relative to the upcoming sale to Ormond Ocean Homes, Inc.

I also believe the omission of automatic HOA membership in Unit 3 was a violation of Frederick's fiduciary responsibility as the prior trustee of the Sam Snead Golf and Country Club and as the current president of Tomoka Oaks Country Club Estates. Frederick knew the intent of prior Tomoka Oaks, Inc. president W. R. McElroy was to protect homeowners if the course were ever sold and not used as a golf course, yet Frederick omitted homeowners' membership into the very Association that gave the homeowners their reverter rights and the possibility to match future sales offers via the referral right in Deed 585/157 (Table 6).

Protective Covenants and Restrictions during Ormond Ocean Homes, Inc. Ownership: March 1970 - June 1971

Table 10	Official Recording Date 3/5/1970

Warranty Deed
Dated 3/5/1970. Book 1188 / Page 533.

TOCC, Inc. grantor
Ormond Ocean Homes, Inc. grantee

All of the Sam Snead Golf and Country Club.
Subject to restrictions and reservations of Record.

Deed signed by: Ralph R. Frederick, President of TOCC, Inc.

Warranty Deed
Dated 3/5/1970. Book 1188 / Page 529.

Tomoka Oaks, Inc. Grantor
Ormond Ocean Homes, Inc. Grantee

Deed is for lots in Tomoka Oaks Country Club Estates as detailed in Schedule A, Book 1188 / Page 530.
Subject to restrictions and easements of record.

Deed signed by: Ralph R. Frederick, President of Tomoka Oaks, Inc.

My Opinion

On 3/5/1970, the golf course property was still subject to the "use restriction" specified in Deed 585/157 which specifically stated: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.** The "use" can be inferred from the inclusion of "Subject to restrictions and reservations of Record," so it is my opinion the "restrictive use" was in effect and deemed approved in the 'subject to' statement in Deed 1188/533.

The "use" restriction was also in effect at the time Sovereign Industries, Inc. acquired all Ormond Ocean Home, Inc. stock three weeks after the 3/5/1970 sale per Daytona Beach News Journal article dated 3/29/70 page 1 and page 2. My Volusia County Records research did not find any prior officially recorded reversal of the restricted use prior to March 1970 or at any time after.

On 3/5/1970, and when Sovereign acquired all Ormond Ocean Homes stock three weeks later, the referral rights and reverter rights in Deed 585/157 were still in effect. It is my opinion, as explained in Table 11 below, that Sovereign had concerns about Deed 585/157 which resulted in the unethical systematic removal of those 585/157 rights as explained in Table 11.

Table 11	Official Recording Date 7/6/1970

Conveyance
Recorded 7/6/1970. Book 1212 / Page 70.

Tomoka Oaks, Inc. conveys all holdings in Tomoka Oaks Country club Estates to Ormond Ocean Homes, Inc.

Paraphrase of Conveyance

- Tomoka Oaks Homeowners Association has never had any being as a corporation or association.
- Tomoka Oaks, Inc. is conveying to Ormond Ocean Homes, Inc. all of its remaining holdings in Tomoka Oaks Country Club Estates.
- Tomoka Oaks, Inc. sets over, transfers, and assigns to Ormond Ocean Homes Inc. any right, title or interest in the restrictions and the right to enforce, alter, change the Restrictive Covenants dated Jan 31, 1962.

Conveyance signed by: R. W. Davis, President, Tomoka Oaks, Inc. on 3/5/1970

My Opinion

- The timeline of this Conveyance is questionable. It was signed by Tomoka Oaks, Inc. president Ralph W. Davis on 3/5/1970 which conveniently matches the date of the Warranty Deed, but the Conveyance was not recorded until 4 months later.
- The Conveyance was signed by R. W. Davis, President, Tomoka Oaks, Inc. rather than Ralph R. Frederick as President of Tomoka Oaks, Inc. which I believe was done to avoid Frederick's conflict of interest in ownership (Table 7).
- **There was an active homeowners association/club at the time of the 3/5/1970 sale of both the estates and the golf course to Ormond Ocean Homes, Inc.*** (See Table 11 A below.) Therefore it was unethical of Ralph W. Davis to sign a Conveyance stating," Tomoka Oaks Homeowners Association has never had any being as a corporation or association."
- It was unethical (and possibly illegal) of Ralph W. Davis to sign a Conveyance transferring to Ormond Ocean Homes, Inc. "any right, title or interest in the restrictions and the right to enforce, alter, change the Restrictive Covenants dated Jan 31, 1962."

  As Table 1 shows, the Unit 1 Restrictions dated 1/31/1962 stated:

  - #10 Grantee automatically a member of the Tomoka Oaks Homeowners Association
  - #11 Grantor reserves right to release restrictions except #10
  - #15 These covenants are to run with the land and shall be binding on all parties claiming under them for a period of 25 years from date these covenants are recorded, after which time said covenants shall be automatically extended for successive periods of 10 years unless instrument signed by a majority of the then lot owners has been recorded agreeing to change said covenants in whole or in part.

    Therefore, only Unit 1 homeowners could release the #10 restriction; not Tomoka Oaks, Inc., and my research did not find any recordings by lot 1 homeowners or the HOA that released the #10 automatic HOA membership.

    Also, as per #15, my research did not locate any recording by the majority of all lot owners agreeing to change said covenants in whole or in part, therefore it was unethical and possibly illegal to assign that right to Ormond Ocean Homes, Inc. because the right belongs only to the lot owners. Nor have I received any documentation from the City that perpetuity covenants and restrictions were released by the voluntary Tomoka Oaks HOA (see Table 12).

    I also believe that the intent of the Unit 1 restrictions, filed by William R. McElroy, was to protect homeowners. Both Ralph R. Frederick and Ralph W. Davis were aware of this intent, but filed records that negated and denied the existence of an HOA, which in turn released homeowners' reverter rights should the property not be perpetually used as a golf course, country club, and related uses.

- Sovereign Industries, Inc. acquired all Ormond Ocean Homes, Inc. stock three weeks after the 3/5/1970 sales, and, in my opinion, Sovereign wanted assurance from Tomoka Oaks, Inc. that the 3/5/1970 sale could not be challenged due to the referral rights and reverter clause in deed 585/157. And I believe Sovereign did not want to be legally bound by

the referral rights and reverter clause should Ormond Ocean Homes, Inc. (aka Sovereign) decide to sell the Sam Snead Golf and Country Club at some point in the future. Therefore, Frederick had to officially justify the release of the referral rights and the reverter clause in deed 585/157, and this was done in these four documents which systematically negated the protections defined in Deed 585/157:

- Conveyance recorded 7/6/1970 (Table 11)
- Resolution recorded 10/19/1970 (Table 12)
- Affidavit recorded 11/22/1970 (Table 13)
- Release recorded 6/16/1971 (Table 15)

It is my opinion Tomoka Oaks, Inc. officers acted unethically, and possibly illegally, when they filed the above four documents which were in direct opposition of the intent of Deed 585/157.

- The following Tomoka Oaks, Inc. officers and stockholders were Tomoka Oaks homeowners whose homes bordered the golf course at the time of the Conveyance. They were aware of the homeowners association of which some officers were active participants (See Table 11 A):

Ralph R Frederick	24 TOMOKA OAKS BLVD	Book 897 / Page 525
Ralph W Davis	40 N St. Andrews Drive	Book 643 / Page 637
Russell W McFall	41 S ST ANDREWS DR	Book 947 / Page 178
James Bochhoven	5 OAKMONT CIRCLE	Book 716 / Page 551
Richard L. Shetler	66 ST ANDREWS DR	*Daytona Beach Sunday News-Journal*, 9/9/1962, pg 36 *Daytona Beach Morning Journal*, 12/21/1963, pg 11
Rockwell V Collins	28 ST ANDREWS DR	*Daytona Beach Sunday News-Journal*, 11/5/1989, page 8
James Callahan	Owners of lots:	
	29 S ST ANDREWS DR	*Daytona Beach Sunday News-Journal*, 10/23/1966, page 36
	33 S ST ANDREWS DR	*Daytona Beach Sunday News-Journal,* 8/18/1968, page 42

NOTE: The "Tomoka Oaks, Inc., Timeline" section goes into further details about each officer, the offices they held, and the residential lots/homes they had ownership in.

Table 11 A

Tomoka Oaks Homeowners Association

Two years prior to the Conveyance, there was a Tomoka Oaks Homeowners Association/Club:

Daytona Beach Evening News, 6/25/1968, page 2
The Tomoka Oaks Homeowners Club* had a Christmas Party in July and distributed gifts to the 100 or so members present. [Mrs. James Bochoven, whose husband was an officer of Tomoka Oaks, Inc., was an attendee.]

And less than one year after the Conveyance*, News Journal* articles again mention the Homeowners Association / Club:

Daytona Beach Sunday News, 4/18/1971, page 42
The Tomoka Oaks Homeowners Association had a covered dish supper at the Tomoka Oaks Country Club with about 120 attending.

Daytona Beach Evening News, 6/21/1971, page 11
The Tomoka Oaks Homeowners Club* had a buffet Supper at Tomoka Oaks Country Club for about 80.

During PLR Development, LTD's ownership, the *Tomoka Oaks Country Club Acquisition Committee* was formed in an attempt to buyout PLR. Although the acquisition attempt failed, the article below demonstrates continuance of the HOA:

Daytona Beach Evening News, 4/26/1974, page 18
Tomoka Oaks Country Club moved closer Friday to becoming a private club, owned and operated by the members . . . The original committee of eight was expanded to 14 following meetings of the Tomoka Oaks Home Owners Assn

earlier in the week . . . [Rockwell Collins, former officer of Tomoka Oaks Golf and Country Club. Inc. and resident of Tomoka Oaks Country Club Estates with a golf course facing home at 28 ST ANDREWS DR, was a member of the *Tomoka Oaks Country Club Acquisition Committee*.]

My opinion

* In this context, *club* can also indicate *association*. During the 1960's, the concept of a homeowner association was gaining more prominence, but it was not as common a term as it is today. I can see where a newspaper reporter would use the word "club" as opposed to "association" and vice versa. These articles are a direct indication that Tomoka Oaks Homeowners did meet and communicate on a regular basis.

Table 12 Official Recording Date 10/19/1970

Resolution
Recorded 10/19/1970. Book 1238 / Page 246.

RE: Board of Directors Meeting held 1.75 years earlier on 2/18/1969 in which:

Paraphrase

- It has been submitted to Tomoka Oaks, Inc. that TOCC, Inc. has contracted to sell the golf course property to Ormond Ocean Homes, Inc.
- Tomoka Oaks, Inc. rejects its right to exercise any option to purchase the property, and is in full accord with the sale which is hereby ratified and approved by its Board of Directors on 2/18/1969.
- Tomoka Oaks, Inc. intends to liquidate and dissolve and releases all rights reserved it in the deed of conveyance 585/157 recorded 12/12/63.
- Release of Reverter to become effective 12/13/1973

Signed by: Donald W. Acer, Jr., Secretary

My Opinion

The timeline regarding the official filing of this Resolution is questionable.

The intent of the Resolution is unethical and possibly illegal.

1. The official recording of this 2/18/1969 Resolution was not until 10/19/1970 which was
   - 21 months after the date of the Board of Director's Meeting
   - 7 months after the sale of the golf course to Ormond Ocean Homes, Inc. by TOCC, Inc. on 3/5/1970.
2. The deed of conveyance 585/157 recorded 12/12/1963 specifically indicates:
   - The reverter clause could only be released or modified by BOD resolution at any time AFTER ten years of the 585/157 deed recording date of 12/12/1963. Therefore:
     - The earliest date the BOD could release or modify the reverter clause was 12/13/1973.
     - The BOD resolution that was passed on 2/18/1969 (which modified the clause) was only 6.25 years after 12/12/1963; not 10 years as required by 585/157.
     - BOD meeting held 2/18/1969 specified a reverter release date of 12/12/1973 which was almost 3.75 years in the future.

- Tomoka Oaks, Inc. was dissolved by Proclamation on 7/11/1972 which was 16 months before the release of the reverter.
- TOCC, Inc was dissolved by Proclamation 6/28/1971 which was 30 months before the release of the reverter.

  I question the ethics of how the Board, in 1969, could specify a reverter release date of 1973 knowing Tomoka Oaks, Inc. was liquidating and would therefore no longer be in existence should the property need to revert to Tomoka Oaks, Inc. due to Ormond Ocean Homes (aka Sovereign) not using the property perpetually for a golf and country club, golf course, and related uses. Also, Ralph R. Frederick's corporation, TOCC, Inc., was also dissolved by Proclamation before the release of the reverter.

- If Tomoka Oaks, Inc. has sold four-fifths of the lots in Tomoka Oaks Country Club Estates, the right to release or modify the reverter clause is vested automatically and exclusively in the Tomoka Oaks Homeowners Association.

  I question how the BOD could ethically and legally release all reverter rights, including those provided to the Tomoka Oaks HOA,

  - Knowing they were releasing one of the protections McElroy publicly promised in his Invitation to the Public (Table 4).
  - Not knowing if 4/5 of the lots would or would not have been sold by 12/12/1973.
  - Not knowing if a Tomoka Oaks HOA still might be recorded with Volusia County prior to 12/12/1973. (see Table 12 A)

3. Ralph R. Frederick had a definite conflict of interest in ownership at the time the Resolution was passed (Table 7). This conflict directly jeopardized and negated the homeowners' reverter rights (Table 6).

   In my opinion, Frederick, as president of Tomoka Oaks Country Club Estates, had a fiduciary responsibility to lot owners and homeowners to protect their financial interests. Throughout 1962 and continuing into 1970, Tomoka Oaks Country Club Estates (owned by Tomoka Oaks, Inc.) marketed the estates as coexisting with the golf course. Golf course facing lots and homesites were more desirable and therefore priced higher than non-golf course facing lots and homesites. (See Section "Master Planned Community" of this report for details and citations.) Due to this representation of coexistence, Fredericks should have included specific referral rights and reverter rights in Deed 1188/533, rather than using this Resolution to release all rights.

4. Deed 1188/533 was "subject to restrictions and reservations of Record."

   Prior to the filing of Resolution 1238/248 in October 1970, I found no official Volusia County Record filings releasing or modifying the reverter clause, or the restriction in Units 1 and 3. And I found no recorded reversal or modification of the "restricted use" defined as: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.** Nor have I received any documentation from the City that perpetuity covenants and restrictions were released by the voluntary Tomoka Oaks HOA. As the Affidavit in Table 12A below indicates, no official homeowners association uniting all Units was ever formed, therefore the voluntary HOA has no authority to release the perpetuity restrictions and covenants.

As per Brent Spain's summary of the historical documentation supplied within this "Protective Covenants and Restrictions document:

Reliance upon the 1969 Resolution and the 1971 Release to claim that the use restriction was somehow waived or released is misplaced. Even assuming the 1969 Resolution and the 1971 Release are valid – which is questionable – neither document purports to release, waive, or otherwise modify the use restriction.

https://ormondbeachfl.portal.civicclerk.com/event/2455/files/attachment/7874 Pages 298-305

Table 12 A

In December 12, 2003, the Tomoka Oaks HOA retained Michael A Pyle, PA, to research the title documents related to the Tomoka Oaks Property in order to determine the status of the Association and the restrictive covenants on units in the subdivision. This search appears to be related to the HOA's Architectural Control Committee's jurisdiction.

Affidavit 5327 / 3897 filed 5/25/2004 concluded:

- The Association consists of a number of separate Units, developed at different times by different developers.
- Affidavit appearing in public record indicated no homeowners association was ever formed.
- The HOA of public record as of 2003 appears to be voluntary and not tied to any restrictive covenants, and has no power under the laws related to homeowners associations.
- The HOA of public record as of 2003 has no jurisdiction over anybody, including owners of Unit 1, because it is not the same association that was contemplated in the original documents.

My Opinion
This affidavit serves as further support that the original developer of the residential estates and the golf course, Tomoka Oaks, Inc., intended for homeowners to be members of an HOA. Although there are no recorded HOA filings until 7/12/1977, 1915/304 and 1916/1154, there were homeowners prior to 1977 who voluntarily met regularly and were referred to as the Homeowners Association or Homeowners Club.

As stated in Table 12 above, I have not received any documentation from the City that perpetuity covenants and restrictions were released by the voluntary Tomoka Oaks HOA. As the Affidavit in Table 12A indicates, no official homeowners association uniting all Units was ever formed, therefore the voluntary HOA has no authority to release the perpetuity restrictions and covenants.

Table 13 Official Recording Date 11/22/1970

Affidavit
Recorded 11/22/1970. Book 1238 / Page 244.

Summary:

- Corp has been inactive for the last 5 years
- Corp granted rights from Tomoka Oaks, Inc. while in a lease agreement regarding the golf course dated 1/1/1963
- Lease canceled by mutual consent 12/13/1963

Signed 11/5/1968 by: William R. Conway, VP, Tomoka Oaks Golf and Country Club, Inc.

My Opinion

This Affidavit was another document Ralph R. Frederick needed to prove there could be no legal challenges to TOCC, Inc.'s March 1970 sale of the Sam Snead golf course to Ormond Ocean Homes, Inc. (aka Sovereign Industries, Inc.). It is my opinion the Affidavit did not truthfully state the facts, and that Tomoka Oaks Golf and Country Club, Inc. was active after 11/5/1968 and after the Tomoka Oaks, Inc. BOD 2/18/1969 resolution approving the sale of the golf course property to Ormond Ocean Homes, Inc.

- The Affidavit was signed 11/5/1968 but not recorded with Volusia County until 11/22/1970, which was 2 years later.
- The recording date of the Affidavit was 8 months after the sale of the golf course property to Ormond Ocean Homes/Sovereign.
- Tomoka Oaks Golf and Country Club, Inc. filed two recordings with Volusia County during their stated inactive timeframe:

- Warranty Deed recorded 9/14/1965; Book 735 / Page 428
- Quit Claim Deed recorded 2/18/1966; Book 774 / Page 657

o Florida's Division of Corporations indicates the corporation was dissolved by proclamation on 10/21/1974, which was 6 years after their stated inactive date.

Table 14 Official Recording Date 6/15/1971

Warranty Deed
Recorded 6/15/1971. Book 1306 / Page 286.

Ormond Ocean Homes, Inc. grantor
PLR Development, LTD grantee

- All of the Sam Snead Golf and Country Club.
- Remaining lots in Tomoka Oaks Country Club Estates

Subject to restrictions, reservations, and easements of Record.

My Opinion

On 6/15/1971 the golf course property was still subject to the "use restriction" specified in Deed 585/157 which specifically stated: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.** The "use" can be inferred in 1306/286 from the inclusion of "Subject to restrictions, reservations, and easements of Record.," so it is my opinion the "restrictive use" was in effect and deemed approved in Deed 1306/286. My Volusia County Records research did not find any officially recorded reversal or modification of the encumbered use.

It is my opinion that on 6/15/1971 the golf course property was still subject to the reverter clause in Deed 585/157 despite the filings in Tables 11, 12, and 13. Ormond Ocean Homes, Inc. (aka Sovereign Industries, Inc.), still had a fiduciary responsibility to lot owners and homeowners to protect their financial interests because throughout their ownership, Ormond Ocean Homes, Inc. marketed the estates as coexisting with the golf course. Golf course facing lots and homesites were more desirable and therefore priced higher than non-golf course facing lots and homesites. (See Section "Master Planned Community" of this report for additional details and citations.) Due to this representation of coexistence, Ormond Ocean Homes, Inc. (aka Sovereign) had a fiduciary responsibility to uphold in Deed 1306/286 the referral rights and reverter rights in 585/157. Instead, in my opinion, Ormond Ocean Homes, Inc. and Tomoka Oaks, Inc. intentionally and unethically released the protective rights of homeowners should the golf course not be perpetually used as intended: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.**

Protective Covenants and Restrictions during Milton W. Pepper's Ownership Interest: June 1971 - February 1979

It is my opinion that beginning in June 1971 through February 1979 (see Ownership Chart), Milton W. Pepper failed in his fiduciary responsibility to protect homeowners' reverter rights and potential referral rights as intended in Tomoka Oak, Inc.'s 12/12/1963 Deed 585/157 (Table 7).

1. Pepper perpetuated Tomoka Oak, Inc.'s:
    - 1970's unethical denial of the existence of an HOA (Tables 11 and 16).
    - 1970's unethical release of any and all rights reserved onto it in 585/157 (Tables 12 and 15).
    - Unethical assignment of rights, titles, or interest in all restrictions and rights to enforce, alter, change or wave Restrictive Covenants dated 1/31/1962 (Table 11).
2. Pepper included reverter rights protecting himself as the individual golf course owner, but he did not include referral or reverter protections for estate lot owners and homeowners when he sold the Sam Snead Golf and Country Club to RTH, Inc. in February 1979. (Table 19)

Table 15 Official Recording Date 6/16/1971

Release
Recorded 6/16/1971. Book 1307 / Page 89.

Summary:

- As per BOD meeting held 2/18/1969, Tomoka Oaks, Inc.:
    - Releases any and all rights reserved unto it in Deed 585/157, particularly its right of first refusal set forth in said deed
    - Releases the Reverter Clause contained in Deed 585/157
- The release of the Reverter Clause to be effective 12/13/1973

Release signed by: R. W. Davis, President, Tomoka Oaks, Inc.

My Opinion

See Table 12 regarding the BOD Resolution on 2/18/1969 as Table 12 directly relates to the 1307/89 Release in Table 15.

In my opinion, the major differences between Resolution 1238/248 (Table 12) and Release 1307/89 (Table 15) are that:

- 1307/89 was filed and recorded one day after Ormond Ocean Homes, Inc. sold the golf course property to PLR Development, LTD.
- PLR was, in my opinion, asking for legal assurance from Tomoka Oaks, Inc. that the Reverter in Deed 585/157 did not present a legal obstacle to the sale of the golf course property to PLR.
- PLR did not want to be legally bound by the 585/157 reverter clause should PLR sell the Sam Snead golf course.

Table 16	Official Recording Date 5/8/1972

Assignment
Recorded: 5/8/1972. Book 1420 / Page 159

Paraphrase

- Tomoka Oaks Homeowners Association has never had any being as a corp or association.
- Tomoka Oaks, Inc. conveyed to Ormond Ocean Homes all of its remaining holdings in Tomoka Oaks Country Club Estates and assigned all of its right, title or interest originally contained in the Restrictive Covenants dated Jan 31, 1962.
- Ormond Ocean Homes, Inc. does hereby set over, transfer, and assign to PLR any right, title or interest in all restrictions and the right to enforce, alter, change or waive any original restrictions.

Signed by Ormond Ocean Homes, Inc.

My Opinion

Ormond Ocean Homes, Inc.'s Assignment of the Estates to PLR was based on the same unethical premise as Tomoka Oaks, Inc.'s 7/6/1970 Conveyance of the Estates to Ormond Ocean Homes (Table 11). Therefore the same issues detailed in the Table 11 Conveyance carry forward to this Assignment. And my opinion remains the same:

- The timeline regarding the official filing of this Assignment is questionable as per same rationale in Table 11.
- The intent of the Assignment is unethical because there was an active HOA at the time of the Assignment as detailed in Table 11 A and 12 A.

Table 17	Official Recording Date 2/27/1975

Warranty Deed
Recorded 2/27/1975. Book 1768 / Page 1798.

PLR Development, LTD grantor (Milton W. Pepper, General Partner)
AKRON Enterprises, Inc. grantee (Milton W. Pepper, President)

Sale of all of the Sam Snead Golf and Country Club to AKRON subject to easements, restrictions and reservations of record, if any.

My Opinion

On 2/27/1975 the golf course property was still subject to the "restrictive use" in Deed 585/157 (Table 6): **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.**

My Volusia County Records research did not find any officially recorded reversal or modification of the restricted use. Nor have I received any documentation from the City that perpetuity covenants and restrictions were released by the voluntary Tomoka Oaks HOA (see Table 12),

Table 18	Official Recording Date 2/28/1977

Warranty Deed
Recorded 2/28/1977. Book 1887 / Page 301.

PLR Development, LTD grantor
BML Investments and PRN Investments grantees

Sale of remaining lots in Tomoka Oaks Country Club Estates.
Subject to restrictions, reservations, and easements of record.

My Opinion

- I believe the Unit 1 Restrictions were still in effect at the time of the 2/28/1977 sale of Tomoka Oaks Country Club Estates, and therefore if 4/5's of the lots in Unit 1 had been sold, the reverter right would vest automatically in the HOA. (Tables 1, 11 and 16) I have not received any documentation from the City that perpetuity covenants and restrictions were released by the voluntary Tomoka Oaks HOA (see Table 12).

Table 19	Official Recording Date 2/14/1979

Warranty Deed
Recorded 2/14/1979. Book 2052 / Page 1019.

Milton W. Pepper grantor
RTH, Inc. grantee

Sale of the Sam Snead Golf and Country Club to RTH, Inc.
Subject to easements and restrictions of record, if any.

Reverter
"During the term of the purchase money note and wrap around mortgage executed of even date herewith by grantee to grantor, or for a period of 18 years in the event the mortgage is prepaid in full, the above described property shall revert to the grantor upon the condition that any portion of said property is used for any purpose other than a golf course with club house and appurtenant amenities.

My Opinion

On 2/14/1979 the golf course property was still subject to the "use restriction" specified in Deed 585/157 which specifically stated: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.** The "use" can be inferred from the inclusion of "Subject to easements and restrictions of record, if any." Therefore, it is my opinion the "restrictive use" was in effect and deemed approved in the 'subject to' statement in Deed 2052/1019.

It is my opinion that on 2/14/1979 the golf course property was still subject to the reverter clause in Deed 585/157 despite the filings in Tables 15 and 16. The intent of the Reverter was to continue to protect the original restrictive use. The reverter may have capped at 18 years upon payment of the note, but the **intent** was still **perpetual**.

Milton W. Pepper as sole owner of the golf course, and as stockholder in PLR Development, LTD., still had a fiduciary responsibility to lot owners and homeowners to protect their financial interests. Throughout its ownership, PLR marketed the

estates as coexisting with the golf course. Golf course facing lots were more desirable and therefore priced 70% - 96% higher[2], [3] than non-golf course facing lots and homesites. (See Section "Master Planned Community" of this report for details and citations.) Due to this representation of coexistence, Pepper had a fiduciary responsibility to uphold in Deed 2052/1019 the referral rights and reverter rights intended in 585/157. Instead, in my opinion, Milton W. Pepper, PLR Development, LTD, and Tomoka Oaks, Inc. intentionally and unethically released the protective rights of homeowners should the golf course not be perpetually used as intended.

Also, it should be noted:

- Milton W. Pepper's son-in-law, Ben Horne, was a real estate agent who listed homes in Tomoka Oaks Country Club Estates and who placed ads in the *Daytona Beach News- Journal* advertising golf course fronting lots and homes.
- Milton W. Pepper and Ben Horne were both stockholders in Tomoka Oakwood Development Corp. which owned and developed Tomoka Oaks North condominiums of which buyers received a paid membership in Tomoka Oaks Country Club.
- The above conflicts of interest in cross ownership are detailed and cited in the section of this report titled "Conflicts of Interest in Cross-Ownership."

Table 19A Official Recording Date 10/31/2006

Development Order for PRD-06-32: Tomoka Oaks Golf Village - signed 10/6/2006
Recorded 10/31/2006 Book 5944 / Page 2183

Applicant: RTH, Inc.
City Issuing Order: Ormond Beach

Highlights of the Development Order:

- Allows construction of 119 multifamily units (townhomes and condominiums) and 3-single family dwellings on a 147-acre parcel within the limits of the existing Tomoka Oaks Golf Course
- PRD land development code must be strictly complied with.
- The owner shall provide for covenants and restrictions that restrict the golf course to open space and golf course use. The City of Ormond Beach shall be involved in a manner that requires the approval of the City if the owners ever wish to remove the restriction on use.
- In the event the land approved by this PRD Development Order is abandoned for a period of (2) years or there has been no construction activity during that period, the permit shall be void and a Notice of Final Plan Revocation filed under the provisions of Section 1-14(c)(2) of the *Land Development Code*, before the planned development permit can be reestablished, a new PRD Development Order shall be considered by the City Commission.
- Development Order shall be binding upon RTH, Inc. a Florida corporation, and shall run with the real property.

Note:

- The city implicitly recognized the perpetual use of the property to remain a golf course or recreational green space when approving the 2006 PRD application.
- Before PRD 06-32 expired, approximately 86 home buyers purchased homes in Tomoka Oaks during the active Development Order time frame thus relying on good faith that the golf course land was protected per recorded instruments..
- The Development order expired 10/17/2014.
- Property is currently assigned a land use of "expired PRD" and the City can review future PRD applications.

Table 20 Official Recording Dates 7/21/2010 - present

Warranty Deed
Recorded 7/21/2010. Book 6496 / Page 4634.

RTH, Inc. grantor
Putnam State Bank grantee

Verbatim excerpt:
It is the intent of the grantor and grantee that the conveyance of the above described property to Putnam State Bank will not act in any way as satisfaction of the notes and mortgages RTH, Inc. to Putnam State Bank (copies of which are recorded in O.R. Book 6160 at page 132 and O. R. Book 6296 at page 4639 of the public records of Volusia County, Florida.) It is the express intent of the parties that the above-described notes and mortgages will not merge with the interest of Putnam acquired under this deed until it is determined that there are no intervening liens.

Special Warranty Deed
Recorded 12/12/2011. Book 6659 / Page 1525.

Putnam State Bank grantor
EJTS Holding, LLC grantee

Sale of Sam Snead Golf and Country Club subject to encumbrances, easements and restriction of records.
Together with all the tenements, hereditaments and appurtenances thereto belonging in any wise appertaining.

Warranty Deed
Recorded 4/21/2021. Book 8036 / Page 3448.

EJTS Holding, LLC grantor
Triumph Oaks of Ormond Beach I, LLC grantee

Sale of Sam Snead Golf and Country Club subject to reservations, covenants, conditions, restrictions and easements of record and to all applicable zoning ordinances and/or restrictions imposed by governmental authorities, if any.

My Opinion
Triumph Oaks of Ormond Beach I, LLC L21000120943 identifies local businessmen Carl Velie and Ray Barshay as managers of the LLC. Both either reside in Ormond Beach or have businesses in Ormond Beach and are familiar with the golf course property and its use as a golf course. Even though the prior owner of the course, EJTS Holding allowed the course to run down, there was a sign on the club house door which clearly stated for all to view that, “The Tomoka Golf Course is temporarily closed for public play so that maintenance can work to improve our quality of play.” This sign was still posted as of February 9, 2021 which was 2 months prior to the sale of the course to Triumph Oaks of Ormond Beach I, LLC on 4/23/2021.

Cobb Cole, the law firm representing Triumph Oaks, title insurance analysis indicates that insurance coverage does not exist for the 2006 Development Order thus expressly acknowledging the 2006 Development Order which rezoned the property from R-2 to PRD.

Pages 675-686

Protective Covenants and Restrictions: Summary and My Opinion

Regardless of whatever entity owned (or owns) the Sam Snead Golf and Country Club:

- The golf course property was originally intended and encumbered as: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.**
- My Volusia County Records research did not find any officially recorded reversal or modifications of the restricted, perpetual use defined in Deed 585/157. And I found no modifications to the covenants and Restrictions 431/32.
- I have not received any documentation from the City that perpetuity covenants and restrictions were released by the voluntary Tomoka Oaks HOA. No official homeowners association uniting all Units has ever been formed, and the voluntary HOA has no legal authority to release the perpetuity restrictions and covenants.
- The Reverter clause in Deed 585/157 is still current today, and due to the fact that over 4/5's of the lots in Tomoka Oaks Country Club Estates have been disposed of, the reverter is now vested automatically and exclusively with the voluntary Tomoka Oaks Homeowners Association.
- Brent Spain, land use attorney with Theriaque & Spain, reviewed my historical research. He concluded that the summarized facts and cited case law would establish that, at a minimum, the use of the Sam Snead Golf and Country Club property is limited to a golf course or similar open space purposes by virtue of an implied restrictive covenant.
- Since its inception in the early 1960's and continuing to present time, buyers in Tomoka Oaks Country Club Estates purchased lots and homes in good faith predicated on their value as related to the coexisting golf course.
- The golf course property continues to benefit the surrounding residential properties; it preserves the character of the community, and provides residents with a pleasant view.

March 15, 2024

Dear Mayor Partington,

I respect your ability to quickly focus on facts within documents, and I am sharing Attachment D (the updated summary of Tomoka Oaks Protective Covenants and Restrictions) with you prior to the City's distribution of their Commission packet. Edits on Attachment D relate to Attorney Brent Spain's legal opinion on the golf course land use, the 2006 PRD development order, and email correspondence with the City regarding Tomoka Oaks covenants and restrictions.

For your personal review, I prepared for you a document titled *Summary of Emails with the City Attorney relevant to Tomoka Oaks Covenants and Restrictions.* I realize the City is overseeing numerous development applications and other development related concerns that require the attention of the City attorney, and it is understandable that Mr. Hayes may have shifted his focus from these emails to other more immediate legal matters. Perhaps Mr. Hayes will have time before the Commission's first reading of the Tomoka Reserve application to follow up on my latest email.

I am appreciative of the acknowledgments made in the 1/11/24 Staff Report which support some key elements of my Tomoka Oaks historical research. I respect that the City maintains an unbiased representation of facts, and I wanted to ensure you have facts pertinent to your decision on any development applications or zoning map amendment applications on the Sam Snead Golf and Country Club property.

Kind regards,

Carolyn

Carolyn Davis

Ormond Beach, FL 32174

Protective Covenants and Restrictions - modified 3/10/24

I researched the history of parcel 39-14-32, which was developed into the **Sam Snead Golf and Country Club** and the **Tomoka Oaks Country Club Estates,** to reconstruct the sales and ownership history of these two properties and the recordings of covenants and restrictions related to the properties.

Based on this research, I have formed the opinion that:

1. In the early 1960's, Tomoka Oaks, Inc. recorded protective covenants restricting land use of the Sam Snead Golf and Country Club to be "**perpetually for use as a golf and country club, golf course, and related uses.**"

2. Throughout the early 1960's, Tomoka Oaks, Inc. recorded deeds, leases, covenants, restrictions, referral rights, and reverter clauses to protect the intended perpetual use of the golf course property, as well as protect the financial interests of lot and homeowners should the golf course property not be used as recorded in the protective covenants and restrictions.

3. Beginning in 1969, conflicts of interest in cross-ownership resulted in recordings being filed with Volusia County that intentionally, systematically and questionably negated or released many of the earlier protective covenants and restrictions, and eliminated rights of current and future Tomoka Oaks Country Club Estates homeowners should the golf course property not be used as originally encumbered: **perpetually for use as a golf and country club, golf course, and related uses**.

4. The unethical and possibly illegal documents filed in #3 above could potentially cloud the title due to cross-ownership conflicts of interest. Therefore, the protective covenants and restrictions originally recorded in the early 1960's (specifically Warranty Deed 585/157 recorded 12/12/1963 and Restrictions 431/32 recorded 1/31/1962) may still be in effect today.

For the Reader's information:

- The preceding pages of this section contain tables detailing recordings on file with Volusia County, and articles in the *Daytona Beach News-Journal,* that are the basis for my opinions throughout this section. Tables cite the document's recording date and book and page number for each specific deed, lease, covenant, restriction, referral right, and reverter clause.
- All *Daytona Beach News-Journal* article citations come from www.newsbank.com accessed through the Volusia County Library.
- All opinions are my own. I did not collaborate with any other Tomoka Oaks homeowner or with the HOA.
- This document was edited on 3/10/24 to include the legal opinion of land use attorney Brent Spain of Theriaque & Spain law firm per his letter to the Planning Board dated July 12, 2023 available at https://ormondbeachfl.portal.civicclerk.com/event/2455/files/attachment/7874

  Pages 298-305

Protective Covenants and Restrictions: January 1962 - December 1963

It is my opinion that:

- William R. McElroy, as the first president and Chairman of the Board of Tomoka Oaks, Inc.,[1] fulfilled his fiduciary responsibility to both Tomoka Oaks, Inc. stockholders and to the Tomoka Oaks Country Club Estate lot owners and homeowners by filing official recordings with Volusia County that:
    1. Encumbered the use of the golf course property as "**perpetually for use as a golf and country club, golf course, and related uses.**"
    2. Protected Tomoka Oaks, Inc. and protected residential lot owners and homeowners by recording covenants, restrictions, referral rights, and reverter clauses should the golf course property not be used perpetually as a golf and country club, golf course, and related uses.
    3. Provided current and future residential lot owners and homeowners in Unit 1 with automatic Tomoka Oaks Homeowner Association (HOA) membership, of which said HOA:
        - Could be transferred the referral right to accept or reject Sam Snead golf course property sales offers should Tomoka Oaks, Inc. transfer to the HOA the right to accept or reject the offer.
        - Has legal standing via reverter rights should future Sam Snead Golf and Country Club owners not use the golf course property as perpetually intended.

Table 1	Official Recording Date 1/31/1962

Restrictions – Unit 1, Tomoka Oaks Country Club Estates
Recorded 1/31/1962. Book 431 / Page 32.

Verbatim Text
Tomoka Oaks, Inc. the owner and grantor of all lots, desires the lots be subject to certain restrictions for the mutual benefit and protection of said owner and to persons both natural and corporate who may hereafter purchase or acquire any interest in said property.

The owner declares and creates the following restrictions, reservations and conditions to be binding upon it and upon each and every person and corporation hereafter.

Paraphrase of Restriction Highlights

#3 Construction on lots adjoining the golf course can be within 10 feet of golf course boundary

#10 Grantee automatically a member of the Tomoka Oaks Homeowners Association

#11 Grantor reserves right to release restrictions except #10

#14 Grantor may transfer right to enforce restrictions to the Tomoka Oaks Homeowners Association

#15 Covenants binding for 25 years, then automatically extended for successive periods of 10 years unless instrument signed by majority of lot owners is recorded agreeing to covenant changes.

Submitted and signed by:
Tomoka Oaks, Inc.
W. L. McElroy, President
Ted Brousseau, Secretary

[1] (Daytona Beach Sunday News-Journal pg 36 - Tomoka Oaks Subdivision Work Starts, 10/1/1961)

My opinion

I believe Tomoka Oaks, Inc. intended Restrictions be consistent from Unit to Unit. Therefore, restrictions recorded for Unit 1 would also be recorded for subsequent Units such as Unit 3, etc. Paragraph #11's last sentence states, "The Grantor further reserves the right to include, in any contract or deed hereafter made, any additional restrictive covenants not inconsistent with these herein contained.

During my research, I found no official recordings by the majority of the lot owners agreeing to any covenant changes or releasing any restrictions in Unit 1.

Also, I have not received any documentation from the City that perpetuity covenants and restrictions were released by the voluntary Tomoka Oaks HOA (see Table 12).

Table 2 *Daytona Beach Sunday News-Journal* 7/8/1962

Daytona Beach Sunday News-Journal, 7/8/1962, page 16
NEW TOMOKA LINKS SOLD TO McELROY GROUP

Paraphrase:

- Golf Course Developers, Inc. sold out to Tomoka Oaks, Inc. due to financial issues.
- William R. (Bill) McElroy, president of Tomoka Oaks, Inc. announced the purchase.
- McElroy said plans under way for formation of a new corporation named Tomoka Oaks Golf Club, Inc.
- McElroy said it will be a "**permanent golf club**" and "When the new golf club corporation is formed, the land will be conveyed to the new corporation. **It will be subject to restrictions for use only as a golf club and other recreational use**."

My research shows:

- On 9/15/1961, the golf course property was conveyed by Tomoka Oaks, Inc. to Golf Course Developers, Inc., Warranty Deed Book 397 / Page 526 restricting use to a golf course.
- Golf Course Developers developed the Sam Snead Golf and Country Club during 1961-1962. As shown in the article above, Golf Course Developers sold the course back to Tomoka Oaks, Inc. Warranty Deed 465/202 dated 7/9/1962 and Mortgage Deed, Book 465 / Page 204 dated 8/1/1962.
- Tomoka Oaks Golf Club, Inc. was filed with Division of Corporations, State of Florida on 7/19/1962.
- Another corporation was filed 1/8/1963 called Tomoka Oaks Golf and Country Club, Inc. which was formed to handle the conveyance referred to in McElroy's article comments above. This conveyance took the form of a lease whose terms stated leased property "**shall be used perpetually for a country club and related uses.** " (See Table 3).

Table 3 Official Recording Date 1/1/1963

Golf Course Lease
Recorded 1/1/1963. Book 516 / Page 360.

Lease Start Date: 1/1/1963
Lessor: Tomoka Oaks, Inc. Signed by W. R. McElroy, President
Lessee: Tomoka Oaks Golf and Country Club, Inc. Signed by W. R. McElroy, President

Paraphrase of Lease Highlights:

- Premises: All of Sam Snead Golf and Country Club
- Term and Rental : Ninety-nine (99) years subject to termination as per terms of lease
- Use: Premises shall be used perpetually for a country club and related uses. This provision shall survive the lease and be included in the deed. Deed restrictions may be waived by two-thirds of Lessee Board of Directors with concurrence of:
    - 2/3's of the members of said Lessee
    - 2/3's of the members of the Tomoka Oaks Homeowners Association

My opinion:

- McElroy fulfilled his 7/8/1962 public statement (Table 2) to convey the Sam Snead Golf and Country Club, and that it was "subject to restrictions for use only as a golf club and other recreational use."
- McElroy fulfilled his 7/8/1962 public statement (Table 2) regarding the permanent use of the premises by incorporating into the lease deed restrictions that protected homeowners and golf club members should the property not be used perpetually for a country club and related uses.
- The lease was surrendered in late 1963 (Book 585 / Page 155) but as stated in the lease, the "use" provision survived the lease and was subsequently included in a Warranty Deed dated 12/12/1963, Book 585 / Page 157 (Table 6).
- The lease was another of the master plan elements which demonstrated the coexistence of the golf course and the residential estates.

Table 4 *Daytona Beach Sunday News-Journal* 2/23/1963

Daytona Beach Sunday News-Journal, 2/23/1963, page 14
ANNOUNCEMENT: Your Invitation to Visit Tomoka Oaks Country Club Estates

Paraphrased Excerpts

W.R. McElroy personally signed an **Invitation** as President of Tomoka Oaks Country Club Estates inviting potential home buyers to visit "the ultimate in gracious and contented living," where "from its very inception, no effort has been spared in planning and developing . . . one of the finest exclusive residential areas in the State of Florida." The Estates are "cut from 545 beautiful wooded acres . . . Right in the center of this magnificent natural beauty spot has been built Tomoka Oaks Golf and Country Club – an eighteen hole championship Golf Course."

McElroy went on to state, "To keep this Area in all its natural beauty, **certain protective covenants have been provided** for the benefit and protection of all property owners."

And in a prior **Invitation** published on 2/16/1963, page 2, of the *Daytona Beach News-Journal*, Tomoka Oaks Country Club Estates informed potential home buyers that, "To keep this Area in all its natural beauty, **certain protective covenants are necessary** for the benefit and protection of all property owners and will be included in the deed."

My opinion

McElroy fulfilled his public assurance to include protective covenants. (See Tables 5 and 6.)
This marketing invitation was another of the master plan elements of coexistence.

Table 5	Official Recording Date 3/1/1963

Supplemental Restrictions – Unit, 1 Tomoka Oaks Country Club Estates
Recorded 3/1/1963. Book 516 / Page 358

Paraphrased Excerpts

- Whereas Tomoka Oaks, Inc., a Florida Corporation, is the owner of all lots in Tomoka Oaks Country Club Estates, Unit #1 . . .
- Whereas said owner does now wish to subject said property to certain further restrictions relating to the size of residential buildings to be built adjacent to the golf course. . .
- No principal residence shall be constructed upon any lot adjacent to the golf course . . . which shall contain less than 1500 square feet of enclosed living area and 2300 square feet of total covered area.

Submitted and signed by:
Tomoka Oaks, Inc.
W. R. McElroy, President
Ted Brousseau, Secretary

My Opinion

The Sam Snead Golf and Country Club and the Tomoka Oaks Country Club Estates shared the common developer: Tomoka Oaks, Inc.

The golf course and the residential subdivision estates were designed and intended to coexist.

Tomoka Oaks, Inc. (a Florida Profit Corporation) wanted to protect their interest by ensuring the golf course would always be surrounded by homes that contained at least 2300 square feet. The value of the golf course was tied to the value of the lots surrounding it, and the value of the lots was tied to the value of the golf course bordering those lots. McElroy incorporated these supplemental restrictions to protect both Tomoka Oaks, Inc. financial interests and homeowners' financial interests.

Table 6	Official Recording Date 12/12/1963

Warranty Deed
Recorded 12/12/1963. Book 585 / Page 157.

Paraphrased summary separated into understandable segments

Warranty Deed - All of the Sam Snead Golf and Country Club
Between
Tomoka Oaks, Inc.; party of the first part (TOI)
AND
Ralph R. Frederick, trustee; party of the second part (FREDERICK)

[*start of Referral Rights*]

This conveyance is subject to the express condition that if FREDERICK desires to sell or convey the golf course to any person, firm, or corporation other than a subsidiary of FREDERICK, offers acceptable to owner (Ralph R. Frederick) are referred to TOI for TOI's acceptance or rejection for a period of 30 days.

If TOI rejects or fails to accept the offer, offer shall be presented to Tomoka Oaks Golf and Country Club, Inc. (TOGCC) for its acceptance or rejection for a period of 30 days. Acceptance or rejection is subject to the approval of TOI.

Right to accept or reject offer is transferrable and may be transferred by TOI or TOGCC to the Tomoka Oaks Homeowners Association (HOA) within 30 days and acted upon within those 30 days.

[*end of Referral Rights*]

[*start of property land use Covenant*]

The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.

[*end of property land use Covenant*]

[*start of Reverter clause*]

- IF Frederick or successors in interest fail to utilize the property exclusively as a golf and country club, golf course, and related uses
- AND the property not be sold to TOI or TOGCC or HOA as specified in preceding paragraph
- THEN property shall automatically revert to and become the property of TOI
    - AND all rights of FREDERICK or successors in interest shall immediately terminate
        - UNLESS

        FREDERICK or successors shall within 90 days after the day of mailing to FREDERICK or successors by TOI or TOGCC or HOA a written notice to utilize said property as a golf and country club, golf course, and related uses, complies with said reverter clause and continues to use said property as a golf and country club, golf course, and related uses.

The reverter clause may be released or modified by resolution concurred in by two-thirds of the entire board of directors of Tomoka Oaks, Inc. at any time after ten years after the date of recording of this Deed on 12/12/1963; providing that

- IF TOI shall have disposed of four-fifths (4/5) of the lots in Tomoka Oaks Country Club Estates

- THEN the foregoing right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks HOA to be exercised by resolution of two-thirds (2/3) of the Board of Directors of the Tomoka Oaks HOA.

[*end of Reverter clause*]

Deed signed by: Ralph R. Frederick, President, Tomoka Oaks, Inc.

My opinion

Deed 585/157 was the primary instrument Tomoka Oaks, Inc. recorded to encumber and protect the use of the Sam Snead Golf and Country Club to be "**used perpetually for purposes of a golf and country club, golf course, and related uses**."

I believe the intent of deed 585/157 was to protect the financial interest of Tomoka Oaks, Inc. and the financial interest of the residential homeowners in Tomoka Oaks Country Club Estates should the golf course property ever be sold.

Regarding future sales, the "referral right:"

- Gave Tomoka Oaks, Inc. the right to match the offer thus preserving the "restricted use" of the golf course property.
- AND it gave Tomoka Oaks, Inc. the right to transfer the offer to the HOA of which every lot owner (in Unit 1 at the time of deed recording) was a member (Table 1).

Regarding the restricted use of the Sam Snead Golf and Country Club property, the reverter clause:

- Ensured the golf course property would revert back to Tomoka Oaks, Inc. should the owners fail to utilize the property exclusively as a golf and country club, golf course, and related uses
- Ensured that if 4/5's of the lots had been sold (which at the time of this deed recording would have been the Unit 1 lot owners) the reverted was vested automatically in the HOA of which every lot owner (in Unit 1 at the time of deed recording) was a member (Table 1), and the right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks HOA.

I believe Tomoka Oaks, Inc. intended that HOA membership would be automatic for all lot and homeowners for every Unit in Tomoka Oaks Country Club Estates (Table 1). Therefore the language of deed 585/157 would apply to all Units even though Unit 1 was the only Unit under development during the recording of Deed 585/157.

I am not including Tomoka Oaks Golf and Country Club, Inc. (TOGCC) in my opinion here, because TOGCC surrendered their lease in late 1963. But I did find inconsistencies in TOGCC's official recordings subsequent to the lease surrender as shown in Table 13.

This deed also fulfilled McElroy's public assurance to provide protective covenants for the benefit and protection of homeowners (Table 2).

Opinion of Brent Spain, land use attorney with Spain & Theriaque:

Consistent with the terms of the surrendered Lease, the 1963 Warranty Deed expressly provided that the subject property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." Moreover, while the 1963 Warranty Deed included language and a process for the release or modification of the "reverter clause," there is no language in the 1963 Warranty Deed authorizing the release or modification of the actual restrictive covenant limiting the use of the property to a "golf and country club, golf course, and related uses."

Ralph R. Frederick's Conflict of Interest in Cross Ownership

Frederick was president and the primary stock holder of TOCC, Inc. when TOCC, Inc. sold the Sam Snead Golf and Country Club to Ormond Ocean Homes, Inc. in March 1970. Frederick was also the President, General Manager, and a stockholder of Ormond Ocean Homes, Inc. at the time of the sale.

The newspaper articles in **Table 7** detail Ralph R. Frederick's cross ownership interests which, I believe, resulted in questionable and unethical filings and intentions as explained in subsequent tables in the section directly below titled: "Protective Covenants and Restrictions during Ralph R. Frederick's Ownership Interest: January 1966 - August 1969."

Table 7

Ralph R. Frederick had cross ownership interests in:

- Sam Snead Golf and Country Club
  - President, Trustee, and majority stock holder under Tomoka Oaks, Inc. from 12/12/1963 – 3/22/1964
  - President and majority stockholder under TOCC, Inc. from 3/23/1964 – 3/5/1970. Warranty Deed 612/269 dated 3/23/1964.
- Tomoka Oaks Country Club Estates
  - President and stock holder under Tomoka Oaks, Inc. from 12/12/1963 – 3/5/1970
- Ormond Ocean Homes
  - Stockholder, General Manager, President from 1961 - 3/28/1970 (as per news articles immediately below)

Three *Daytona Beach News-Journal* articles detail Ralph R. Frederick's ownership interest in Ormond Ocean Homes, Inc.

Sunday Issue Date 7/16/1961, page 35
ELLINOR MAKES DEAL ON NORTH HALF OF VILLAGE

- $1.5 million purchase of north section of Ellinor Village scheduled to close 9/10/1961.
- Buyers, all from Freeport, IL, will do business as Ormond Ocean Homes Inc., a Florida corporation.
- Stock held by officers and by Ralph R. Frederick of Ormond Beach who will be general manager.
- Frederick is a personal friend of the Freeport group and brought the two parties together.

Sunday Issue Date 5/30/1965, page 32
ORMOND RENTAL PROJECT GETS BIG FHA LOAN

- Ormond Ocean Homes, a 232-unit rental housing development on the Ormond peninsula, will spend $1,832,000 for modernizing, president Ralph Frederick announced last week.
- Money will be used to renovate the former north half of the Ellinor Village resort.
- Frederick will be the prime contractor
- Frederick, who heads 11 corporations here and is general manager of the Tomoka Oaks development, and Ray Gramley of Freeport, IL bought the development several years ago.

Evening Issue Date 3/6/1970, page 32
IT SAYS IT HERE by Bernard Kahn - page 16

What is brewing is negotiation by Phoenix [Arizona based Sovereign Industries, Inc. see 3/29/1970 Sunday, page 1], an investment conglomerate, to buy the Tomoka Oaks Golf and Country Club and Tomoka Oaks, Inc., the neighboring real estate development, plus Ormond Ocean Homes Apartments (the former north section of Ellinor Village.)
Hustlin' Ralph Frederick, the card playing pro motor, has the big piece of the action in all three parcels.

My Opinion

Ralph R. Frederick had a conflict of interest in ownership regarding the 3/5/1970 sale of the Sam Snead Golf and Country Club (which Frederick owned stock in under his corporation TOCC, Inc. Warranty Deed 612/269) and the sale of Tomoka Oaks

Country Club Estates (which Frederick owned stock in under Tomoka Oaks, Inc.) to Ormond Ocean Homes, Inc. where Frederick was a stockholder, president, and general manager. Just 23 days after the sale, Sovereign Industries, Inc. acquired all stock in Ormond Ocean Homes, Inc. on 3/28/1970 (Table 10). Therefore Frederick benefited financially from the sales of the golf course and the estates, and from the purchase of his Ormond Ocean Homes, Inc. stock. And it was in Frederick's best financial interest that prior recorded restrictions and covenants not jeopardize those sales.

Official filings recorded by Tomoka Oaks, Inc. and Tomoka Oaks Golf and Country Club, Inc. (that I see as questionable, unethical, and potentially cloud the title), were recorded AFTER 3/28/1970 and all relate to the systematic removal of protective covenants and/or the release of referral rights and reverter rights intended to protect golf course property "use" and protect the rights and financial interests of Tomoka Oaks lot and home owners. Tables 11, 12, 13, 15 and 16 detail these questionable filings.

Protective Covenants and Restrictions during Ralph R. Frederick's Ownership Interest: January 1966 - August 1969

Table 8	Official Recording Date 3/23/1964

Warranty Deed Warranty Deed 612/269
Dated 3/23/1964

Mortgage Deed
Dated 1/10/1966. Book 774 / Page 699.

TOCC, Inc., whose president and majority stockholder was Ralph R. Frederick, took possession of the Sam Snead Golf and Country Club via Warranty Deed 612/269 dated 3/23/1964. TOCC took out Mortgage Deed, Book 774 / Page 699, dated 1/10/1966.

The Note was endorsed by Ralph R. Frederick (as majority stockholder), James P. Callahan, George L. Haller, Russell W. McFall, and Richard L. Shelter who were all officers of Tomoka Oaks, Inc., and who all owned homes fronting the Sam Snead golf course.

I found no official recordings with Volusia County that reversed or modified the "restrictive use" of the Sam Snead Golf and Country Club in Deed 585/157 to be anything other than, "**The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.**"

My Opinion

This mortgage deed represents a conflict of interest in ownership as it was endorsed by officers of Tomoka Oaks, Inc. who also owned and lived in homes that fronted the Sam Snead golf course:

Ralph R Frederick	24 TOMOKA OAKS BLVD	Book 897 / Page 525
George L. Haller	23 PINE VALLEY CIR	Book 503 / Page 219
Russell W McFall	41 S ST ANDREWS DR	Book 830 / Page 396
Richard L. Shetler	66 ST ANDREWS DR	*Daytona Beach Sunday News-Journal*, 9/9/1962, pg 36 *Daytona Beach Morning Journal*, 12/21/1963, pg 11
James Callahan	Owner of lots:	
	29 S ST ANDREWS DR	*Daytona Beach Sunday News-Journal*, 10/23/1966, page 36
	33 S ST ANDREWS DR	*Daytona Beach Sunday News-Journal,* 8/18/1968, page 42

I believe this conflict carried forward in the future **Conveyance** of Tomoka Oaks Country Club Estates recorded 7/6/1970, Book 1212 / Page 70, which, in my opinion, was an unethical conveyance (Table 11).

Table 9	Official Recording Date 8/4/1969

RESTRICTIONS - Unit 3 Tomoka Oaks Country Club Estates
Dated 8/4/1969. Book 1121 / Page 554.

- Same as Unit 1 restrictions, but omitted automatic HOA membership of lot owners in Unit 3.
- Still contained golf course setback restriction for homes on the golf course

Signed by: Tomoka Oaks, Inc., R. W. Davis, President and Donald W. Acer, Jr., Secretary

Issues with Restrictions on Unit 3

When comparing line-for-line the Restrictions for Unit 1 (Table 1) and Unit 3, there were minor differences with two notable exceptions.

Exception 1. The entirety of paragraph #10 in the Unit 1 Restrictions was omitted in the Unit 3 Restrictions. The first sentence of paragraph #10 in Unit 1 states:

> *The Grantee shall automatically become a member of the Tomoka Oaks Homeowners Association; a non-profit corporation comprised of all of the lot owners in Tomoka Oaks Country Club Estates and shall be liable to pay such dues and/or assessments as may be required by said Association in proportion to the number of lots owned.*

Exception 2. Paragraph #11 in the Unit 1 Restrictions states:

> *The Grantor reserves the right to release in whole or in part any restrictions or reservation hereunder, except paragraph 10 immediately next preceding.*

> Unit 3 Restrictions state:
>
> *The Grantor reserves the right to release in whole or in part any restrictions or reservation.*

NOTE: Both Unit 1 and Unit 3 Restrictions state in their final paragraphs:

> *These covenants are to run with the land and shall be binding on all parties claiming under them for a period of 25 years from date these covenants are recorded, after which time said covenants shall be automatically extended for successive periods of 10 years unless instrument signed by a majority of the then lot owners has been recorded agreeing to change said covenants in whole or in part.*

> NOTE: My Volusia County research did not uncover any official records filed and recorded by lot owners or the HOA changing covenants in the Unit 1 or Unit 3 Restrictions. Nor have I received any documentation from the City that perpetuity covenants and restrictions were released by the voluntary Tomoka Oaks HOA (see Table 12)

My Opinion

Ralph R. Frederick was president of Tomoka Oaks, Inc. (owner of the residential estates) at the time Unit 3 Restrictions were recorded. He was also president and majority stockholder of TOCC, Inc. which owned the golf course property.

At the time Unit 3 Restrictions were recorded, Frederick knew both the golf course property and the remaining residential lots were under negotiation for sale to Ormond Ocean Homes, Inc. (of which Frederick was a stock holder - see Table 7), and he did not want the homeowners in Unit 3 to have legal recourse (as provided in Warranty Deed 585/157 reverter clause), through HOA membership that might potentially affect any future sale by Ormond Ocean Homes, Inc. And I believe Frederick had Ralph. W. Davis sign the Restrictions as President of Tomoka Oaks, Inc. to avoid the appearance of Frederick's conflict of interest in ownership in the golf course property and residential lots as relative to the upcoming sale to Ormond Ocean Homes, Inc.

I also believe the omission of automatic HOA membership in Unit 3 was a violation of Frederick's fiduciary responsibility as the prior trustee of the Sam Snead Golf and Country Club and as the current president of Tomoka Oaks Country Club Estates. Frederick knew the intent of prior Tomoka Oaks, Inc. president W. R. McElroy was to protect homeowners if the course were ever sold and not used as a golf course, yet Frederick omitted homeowners' membership into the very Association that gave the homeowners their reverter rights and the possibility to match future sales offers via the referral right in Deed 585/157 (Table 6).

Protective Covenants and Restrictions during Ormond Ocean Homes, Inc. Ownership: March 1970 - June 1971

Table 10	Official Recording Date 3/5/1970
Warranty Deed Dated 3/5/1970. Book 1188 / Page 533. TOCC, Inc. grantor Ormond Ocean Homes, Inc. grantee All of the Sam Snead Golf and Country Club. Subject to restrictions and reservations of Record. *Deed signed by:* Ralph R. Frederick, President of TOCC, Inc.	
Warranty Deed Dated 3/5/1970. Book 1188 / Page 529. Tomoka Oaks, Inc. Grantor Ormond Ocean Homes, Inc. Grantee Deed is for lots in Tomoka Oaks Country Club Estates as detailed in Schedule A, Book 1188 / Page 530. Subject to restrictions and easements of record. *Deed signed by:* Ralph R. Frederick, President of Tomoka Oaks, Inc.	
My Opinion On 3/5/1970, the golf course property was still subject to the "use restriction" specified in Deed 585/157 which specifically stated: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.** The "use" can be inferred from the inclusion of "Subject to restrictions and reservations of Record," so it is my opinion the "restrictive use" was in effect and deemed approved in the 'subject to' statement in Deed 1188/533. The "use" restriction was also in effect at the time Sovereign Industries, Inc. acquired all Ormond Ocean Home, Inc. stock three weeks after the 3/5/1970 sale per Daytona Beach News Journal article dated 3/29/70 page 1 and page 2. My Volusia County Records research did not find any prior officially recorded reversal of the restricted use prior to March 1970 or at any time after. On 3/5/1970, and when Sovereign acquired all Ormond Ocean Homes stock three weeks later, the referral rights and reverter rights in Deed 585/157 were still in effect. It is my opinion, as explained in Table 11 below, that Sovereign had concerns about Deed 585/157 which resulted in the unethical systematic removal of those 585/157 rights as explained in Table 11.	

Table 11	Official Recording Date 7/6/1970
Conveyance Recorded 7/6/1970. Book 1212 / Page 70. Tomoka Oaks, Inc. conveys all holdings in Tomoka Oaks Country club Estates to Ormond Ocean Homes, Inc.	

Paraphrase of Conveyance

- Tomoka Oaks Homeowners Association has never had any being as a corporation or association.
- Tomoka Oaks, Inc. is conveying to Ormond Ocean Homes, Inc. all of its remaining holdings in Tomoka Oaks Country Club Estates.
- Tomoka Oaks, Inc. sets over, transfers, and assigns to Ormond Ocean Homes Inc. any right, title or interest in the restrictions and the right to enforce, alter, change the Restrictive Covenants dated Jan 31, 1962.

Conveyance signed by: R. W. Davis, President, Tomoka Oaks, Inc. on 3/5/1970

My Opinion

- The timeline of this Conveyance is questionable. It was signed by Tomoka Oaks, Inc. president Ralph W. Davis on 3/5/1970 which conveniently matches the date of the Warranty Deed, but the Conveyance was not recorded until 4 months later.
- The Conveyance was signed by R. W. Davis, President, Tomoka Oaks, Inc. rather than Ralph R. Frederick as President of Tomoka Oaks, Inc. which I believe was done to avoid Frederick's conflict of interest in ownership (Table 7).
- **There was an active homeowners association/club at the time of the 3/5/1970 sale of both the estates and the golf course to Ormond Ocean Homes, Inc.*** (See Table 11 A below.) Therefore it was unethical of Ralph W. Davis to sign a Conveyance stating," Tomoka Oaks Homeowners Association has never had any being as a corporation or association."
- It was unethical (and possibly illegal) of Ralph W. Davis to sign a Conveyance transferring to Ormond Ocean Homes, Inc. "any right, title or interest in the restrictions and the right to enforce, alter, change the Restrictive Covenants dated Jan 31, 1962."

  As Table 1 shows, the Unit 1 Restrictions dated 1/31/1962 stated:

  - #10 Grantee automatically a member of the Tomoka Oaks Homeowners Association
  - #11 Grantor reserves right to release restrictions except #10
  - #15 These covenants are to run with the land and shall be binding on all parties claiming under them for a period of 25 years from date these covenants are recorded, after which time said covenants shall be automatically extended for successive periods of 10 years unless instrument signed by a majority of the then lot owners has been recorded agreeing to change said covenants in whole or in part.

    Therefore, only Unit 1 homeowners could release the #10 restriction; not Tomoka Oaks, Inc., and my research did not find any recordings by lot 1 homeowners or the HOA that released the #10 automatic HOA membership.

    Also, as per #15, my research did not locate any recording by the majority of all lot owners agreeing to change said covenants in whole or in part, therefore it was unethical and possibly illegal to assign that right to Ormond Ocean Homes, Inc. because the right belongs only to the lot owners. Nor have I received any documentation from the City that perpetuity covenants and restrictions were released by the voluntary Tomoka Oaks HOA (see Table 12).

    I also believe that the intent of the Unit 1 restrictions, filed by William R. McElroy, was to protect homeowners. Both Ralph R. Frederick and Ralph W. Davis were aware of this intent, but filed records that negated and denied the existence of an HOA, which in turn released homeowners' reverter rights should the property not be perpetually used as a golf course, country club, and related uses.

- Sovereign Industries, Inc. acquired all Ormond Ocean Homes, Inc. stock three weeks after the 3/5/1970 sales, and, in my opinion, Sovereign wanted assurance from Tomoka Oaks, Inc. that the 3/5/1970 sale could not be challenged due to the referral rights and reverter clause in deed 585/157. And I believe Sovereign did not want to be legally bound by

the referral rights and reverter clause should Ormond Ocean Homes, Inc. (aka Sovereign) decide to sell the Sam Snead Golf and Country Club at some point in the future. Therefore, Frederick had to officially justify the release of the referral rights and the reverter clause in deed 585/157, and this was done in these four documents which systematically negated the protections defined in Deed 585/157:

- Conveyance recorded 7/6/1970 (Table 11)
- Resolution recorded 10/19/1970 (Table 12)
- Affidavit recorded 11/22/1970 (Table 13)
- Release recorded 6/16/1971 (Table 15)

It is my opinion Tomoka Oaks, Inc. officers acted unethically, and possibly illegally, when they filed the above four documents which were in direct opposition of the intent of Deed 585/157.

- The following Tomoka Oaks, Inc. officers and stockholders were Tomoka Oaks homeowners whose homes bordered the golf course at the time of the Conveyance. They were aware of the homeowners association of which some officers were active participants (See Table 11 A):

Ralph R Frederick	24 TOMOKA OAKS BLVD	Book 897 / Page 525
Ralph W Davis	40 N St. Andrews Drive	Book 643 / Page 637
Russell W McFall	41 S ST ANDREWS DR	Book 947 / Page 178
James Bochhoven	5 OAKMONT CIRCLE	Book 716 / Page 551
Richard L. Shetler	66 ST ANDREWS DR	*Daytona Beach Sunday News-Journal*, 9/9/1962, pg 36 *Daytona Beach Morning Journal*, 12/21/1963, pg 11
Rockwell V Collins	28 ST ANDREWS DR	*Daytona Beach Sunday News-Journal*, 11/5/1989, page 8
James Callahan	Owners of lots:	
	29 S ST ANDREWS DR	*Daytona Beach Sunday News-Journal*, 10/23/1966, page 36
	33 S ST ANDREWS DR	*Daytona Beach Sunday News-Journal,* 8/18/1968, page 42

NOTE: The "Tomoka Oaks, Inc., Timeline" section goes into further details about each officer, the offices they held, and the residential lots/homes they had ownership in.

Table 11 A

Tomoka Oaks Homeowners Association

Two years prior to the Conveyance, there was a Tomoka Oaks Homeowners Association/Club:

Daytona Beach Evening News, 6/25/1968, page 2
The Tomoka Oaks Homeowners Club* had a Christmas Party in July and distributed gifts to the 100 or so members present. [Mrs. James Bochoven, whose husband was an officer of Tomoka Oaks, Inc., was an attendee.]

And less than one year after the Conveyance, *News Journal* articles again mention the Homeowners Association / Club:

Daytona Beach Sunday News, 4/18/1971, page 42
The Tomoka Oaks Homeowners Association had a covered dish supper at the Tomoka Oaks Country Club with about 120 attending.

Daytona Beach Evening News, 6/21/1971, page 11
The Tomoka Oaks Homeowners Club* had a buffet Supper at Tomoka Oaks Country Club for about 80.

During PLR Development, LTD's ownership, the *Tomoka Oaks Country Club Acquisition Committee* was formed in an attempt to buyout PLR. Although the acquisition attempt failed, the article below demonstrates continuance of the HOA:

Daytona Beach Evening News, 4/26/1974, page 18
Tomoka Oaks Country Club moved closer Friday to becoming a private club, owned and operated by the members . . .
The original committee of eight was expanded to 14 following meetings of the Tomoka Oaks Home Owners Assn

earlier in the week . . . [Rockwell Collins, former officer of Tomoka Oaks Golf and Country Club. Inc. and resident of Tomoka Oaks Country Club Estates with a golf course facing home at 28 ST ANDREWS DR, was a member of the *Tomoka Oaks Country Club Acquisition Committee*.]

My opinion

* In this context, *club* can also indicate *association*. During the 1960's, the concept of a homeowner association was gaining more prominence, but it was not as common a term as it is today. I can see where a newspaper reporter would use the word "club" as opposed to "association" and vice versa. These articles are a direct indication that Tomoka Oaks Homeowners did meet and communicate on a regular basis.

Table 12	Official Recording Date 10/19/1970

Resolution
Recorded 10/19/1970. Book 1238 / Page 246.

RE: Board of Directors Meeting held 1.75 years earlier on 2/18/1969 in which:

Paraphrase

- It has been submitted to Tomoka Oaks, Inc. that TOCC, Inc. has contracted to sell the golf course property to Ormond Ocean Homes, Inc.
- Tomoka Oaks, Inc. rejects its right to exercise any option to purchase the property, and is in full accord with the sale which is hereby ratified and approved by its Board of Directors on 2/18/1969.
- Tomoka Oaks, Inc. intends to liquidate and dissolve and releases all rights reserved it in the deed of conveyance 585/157 recorded 12/12/63.
- Release of Reverter to become effective 12/13/1973

Signed by: Donald W. Acer, Jr., Secretary

My Opinion

The timeline regarding the official filing of this Resolution is questionable.

The intent of the Resolution is unethical and possibly illegal.

1. The official recording of this 2/18/1969 Resolution was not until 10/19/1970 which was
   - 21 months after the date of the Board of Director's Meeting
   - 7 months after the sale of the golf course to Ormond Ocean Homes, Inc. by TOCC, Inc. on 3/5/1970.
2. The deed of conveyance 585/157 recorded 12/12/1963 specifically indicates:
   - The reverter clause could only be released or modified by BOD resolution at any time AFTER ten years of the 585/157 deed recording date of 12/12/1963. Therefore:
     - The earliest date the BOD could release or modify the reverter clause was 12/13/1973.
     - The BOD resolution that was passed on 2/18/1969 (which modified the clause) was only 6.25 years after 12/12/1963; not 10 years as required by 585/157.
     - BOD meeting held 2/18/1969 specified a reverter release date of 12/12/1973 which was almost 3.75 years in the future.

- Tomoka Oaks, Inc. was dissolved by Proclamation on 7/11/1972 which was 16 months before the release of the reverter.
- TOCC, Inc was dissolved by Proclamation 6/28/1971 which was 30 months before the release of the reverter.

I question the ethics of how the Board, in 1969, could specify a reverter release date of 1973 knowing Tomoka Oaks, Inc. was liquidating and would therefore no longer be in existence should the property need to revert to Tomoka Oaks, Inc. due to Ormond Ocean Homes (aka Sovereign) not using the property perpetually for a golf and country club, golf course, and related uses. Also, Ralph R. Frederick's corporation, TOCC, Inc., was also dissolved by Proclamation before the release of the reverter.

- If Tomoka Oaks, Inc. has sold four-fifths of the lots in Tomoka Oaks Country Club Estates, the right to release or modify the reverter clause is vested automatically and exclusively in the Tomoka Oaks Homeowners Association.

I question how the BOD could ethically and legally release all reverter rights, including those provided to the Tomoka Oaks HOA,

- Knowing they were releasing one of the protections McElroy publicly promised in his Invitation to the Public (Table 4).
- Not knowing if 4/5 of the lots would or would not have been sold by 12/12/1973.
- Not knowing if a Tomoka Oaks HOA still might be recorded with Volusia County prior to 12/12/1973. (see Table 12 A)

3. Ralph R. Frederick had a definite conflict of interest in ownership at the time the Resolution was passed (Table 7). This conflict directly jeopardized and negated the homeowners' reverter rights (Table 6).

In my opinion, Frederick, as president of Tomoka Oaks Country Club Estates, had a fiduciary responsibility to lot owners and homeowners to protect their financial interests. Throughout 1962 and continuing into 1970, Tomoka Oaks Country Club Estates (owned by Tomoka Oaks, Inc.) marketed the estates as coexisting with the golf course. Golf course facing lots and homesites were more desirable and therefore priced higher than non-golf course facing lots and homesites. (See Section "Master Planned Community" of this report for details and citations.) Due to this representation of coexistence, Fredericks should have included specific referral rights and reverter rights in Deed 1188/533, rather than using this Resolution to release all rights.

4. Deed 1188/533 was "subject to restrictions and reservations of Record."

Prior to the filing of Resolution 1238/248 in October 1970, I found no official Volusia County Record filings releasing or modifying the reverter clause, or the restriction in Units 1 and 3. And I found no recorded reversal or modification of the "restricted use" defined as: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.** Nor have I received any documentation from the City that perpetuity covenants and restrictions were released by the voluntary Tomoka Oaks HOA. As the Affidavit in Table 12A below indicates, no official homeowners association uniting all Units was ever formed, therefore the voluntary HOA has no authority to release the perpetuity restrictions and covenants.

As per Brent Spain's summary of the historical documentation supplied within this "Protective Covenants and Restrictions document:

Reliance upon the 1969 Resolution and the 1971 Release to claim that the use restriction was somehow waived or released is misplaced. Even assuming the 1969 Resolution and the 1971 Release are valid – which is questionable – neither document purports to release, waive, or otherwise modify the use restriction.

https://ormondbeachfl.portal.civicclerk.com/event/2455/files/attachment/7874 Pages 298-305

Table 12 A

In December 12, 2003, the Tomoka Oaks HOA retained Michael A Pyle, PA, to research the title documents related to the Tomoka Oaks Property in order to determine the status of the Association and the restrictive covenants on units in the subdivision. This search appears to be related to the HOA's Architectural Control Committee's jurisdiction.

Affidavit 5327 / 3897 filed 5/25/2004 concluded:

- The Association consists of a number of separate Units, developed at different times by different developers.
- Affidavit appearing in public record indicated no homeowners association was ever formed.
- The HOA of public record as of 2003 appears to be voluntary and not tied to any restrictive covenants, and has no power under the laws related to homeowners associations.
- The HOA of public record as of 2003 has no jurisdiction over anybody, including owners of Unit 1, because it is not the same association that was contemplated in the original documents.

My Opinion

This affidavit serves as further support that the original developer of the residential estates and the golf course, Tomoka Oaks, Inc., intended for homeowners to be members of an HOA. Although there are no recorded HOA filings until 7/12/1977, 1915/304 and 1916/1154, there were homeowners prior to 1977 who voluntarily met regularly and were referred to as the Homeowners Association or Homeowners Club.

As stated in Table 12 above, I have not received any documentation from the City that perpetuity covenants and restrictions were released by the voluntary Tomoka Oaks HOA. As the Affidavit in Table 12A indicates, no official homeowners association uniting all Units was ever formed, therefore the voluntary HOA has no authority to release the perpetuity restrictions and covenants.

Table 13 Official Recording Date 11/22/1970

Affidavit

Recorded 11/22/1970. Book 1238 / Page 244.

Summary:

- Corp has been inactive for the last 5 years
- Corp granted rights from Tomoka Oaks, Inc. while in a lease agreement regarding the golf course dated 1/1/1963
- Lease canceled by mutual consent 12/13/1963

Signed 11/5/1968 by: William R. Conway, VP, Tomoka Oaks Golf and Country Club, Inc.

My Opinion

This Affidavit was another document Ralph R. Frederick needed to prove there could be no legal challenges to TOCC, Inc.'s March 1970 sale of the Sam Snead golf course to Ormond Ocean Homes, Inc. (aka Sovereign Industries, Inc.). It is my opinion the Affidavit did not truthfully state the facts, and that Tomoka Oaks Golf and Country Club, Inc. was active after 11/5/1968 and after the Tomoka Oaks, Inc. BOD 2/18/1969 resolution approving the sale of the golf course property to Ormond Ocean Homes, Inc.

- The Affidavit was signed 11/5/1968 but not recorded with Volusia County until 11/22/1970, which was 2 years later.
- The recording date of the Affidavit was 8 months after the sale of the golf course property to Ormond Ocean Homes/Sovereign.
- Tomoka Oaks Golf and Country Club, Inc. filed two recordings with Volusia County during their stated inactive timeframe:

- Warranty Deed recorded 9/14/1965; Book 735 / Page 428
- Quit Claim Deed recorded 2/18/1966; Book 774 / Page 657

o Florida's Division of Corporations indicates the corporation was dissolved by proclamation on 10/21/1974, which was 6 years after their stated inactive date.

Table 14 Official Recording Date 6/15/1971

Warranty Deed
Recorded 6/15/1971. Book 1306 / Page 286.

Ormond Ocean Homes, Inc. grantor
PLR Development, LTD grantee

- All of the Sam Snead Golf and Country Club.
- Remaining lots in Tomoka Oaks Country Club Estates

Subject to restrictions, reservations, and easements of Record.

My Opinion

On 6/15/1971 the golf course property was still subject to the "use restriction" specified in Deed 585/157 which specifically stated: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.** The "use" can be inferred in 1306/286 from the inclusion of "Subject to restrictions, reservations, and easements of Record.," so it is my opinion the "restrictive use" was in effect and deemed approved in Deed 1306/286. My Volusia County Records research did not find any officially recorded reversal or modification of the encumbered use.

It is my opinion that on 6/15/1971 the golf course property was still subject to the reverter clause in Deed 585/157 despite the filings in Tables 11, 12, and 13. Ormond Ocean Homes, Inc. (aka Sovereign Industries, Inc.), still had a fiduciary responsibility to lot owners and homeowners to protect their financial interests because throughout their ownership, Ormond Ocean Homes, Inc. marketed the estates as coexisting with the golf course. Golf course facing lots and homesites were more desirable and therefore priced higher than non-golf course facing lots and homesites. (See Section "Master Planned Community" of this report for additional details and citations.) Due to this representation of coexistence, Ormond Ocean Homes, Inc. (aka Sovereign) had a fiduciary responsibility to uphold in Deed 1306/286 the referral rights and reverter rights in 585/157. Instead, in my opinion, Ormond Ocean Homes, Inc. and Tomoka Oaks, Inc. intentionally and unethically released the protective rights of homeowners should the golf course not be perpetually used as intended: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.**

Protective Covenants and Restrictions during Milton W. Pepper's Ownership Interest: June 1971 - February 1979

It is my opinion that beginning in June 1971 through February 1979 (see Ownership Chart), Milton W. Pepper failed in his fiduciary responsibility to protect homeowners' reverter rights and potential referral rights as intended in Tomoka Oak, Inc.'s 12/12/1963 Deed 585/157 (Table 7).

1. Pepper perpetuated Tomoka Oak, Inc.'s:
   - 1970's unethical denial of the existence of an HOA (Tables 11 and 16).
   - 1970's unethical release of any and all rights reserved onto it in 585/157 (Tables 12 and 15).
   - Unethical assignment of rights, titles, or interest in all restrictions and rights to enforce, alter, change or wave Restrictive Covenants dated 1/31/1962 (Table 11).
2. Pepper included reverter rights protecting himself as the individual golf course owner, but he did not include referral or reverter protections for estate lot owners and homeowners when he sold the Sam Snead Golf and Country Club to RTH, Inc. in February 1979. (Table 19)

Table 15	Official Recording Date 6/16/1971

Release
Recorded 6/16/1971. Book 1307 / Page 89.

Summary:

- As per BOD meeting held 2/18/1969, Tomoka Oaks, Inc.:
  - Releases any and all rights reserved unto it in Deed 585/157, particularly its right of first refusal set forth in said deed
  - Releases the Reverter Clause contained in Deed 585/157
- The release of the Reverter Clause to be effective 12/13/1973

Release signed by: R. W. Davis, President, Tomoka Oaks, Inc.

My Opinion

See Table 12 regarding the BOD Resolution on 2/18/1969 as Table 12 directly relates to the 1307/89 Release in Table 15.

In my opinion, the major differences between Resolution 1238/248 (Table 12) and Release 1307/89 (Table 15) are that:

- 1307/89 was filed and recorded one day after Ormond Ocean Homes, Inc. sold the golf course property to PLR Development, LTD.
- PLR was, in my opinion, asking for legal assurance from Tomoka Oaks, Inc. that the Reverter in Deed 585/157 did not present a legal obstacle to the sale of the golf course property to PLR.
- PLR did not want to be legally bound by the 585/157 reverter clause should PLR sell the Sam Snead golf course.

Table 16	Official Recording Date 5/8/1972

Assignment
Recorded: 5/8/1972. Book 1420 / Page 159

Paraphrase

- Tomoka Oaks Homeowners Association has never had any being as a corp or association.
- Tomoka Oaks, Inc. conveyed to Ormond Ocean Homes all of its remaining holdings in Tomoka Oaks Country Club Estates and assigned all of its right, title or interest originally contained in the Restrictive Covenants dated Jan 31, 1962.
- Ormond Ocean Homes, Inc. does hereby set over, transfer, and assign to PLR any right, title or interest in all restrictions and the right to enforce, alter, change or waive any original restrictions.

Signed by Ormond Ocean Homes, Inc.

My Opinion

Ormond Ocean Homes, Inc.'s Assignment of the Estates to PLR was based on the same unethical premise as Tomoka Oaks, Inc.'s 7/6/1970 Conveyance of the Estates to Ormond Ocean Homes (Table 11). Therefore the same issues detailed in the Table 11 Conveyance carry forward to this Assignment. And my opinion remains the same:

- The timeline regarding the official filing of this Assignment is questionable as per same rationale in Table 11.
- The intent of the Assignment is unethical because there was an active HOA at the time of the Assignment as detailed in Table 11 A and 12 A.

Table 17	Official Recording Date 2/27/1975

Warranty Deed
Recorded 2/27/1975. Book 1768 / Page 1798.

PLR Development, LTD grantor (Milton W. Pepper, General Partner)
AKRON Enterprises, Inc. grantee (Milton W. Pepper, President)

Sale of all of the Sam Snead Golf and Country Club to AKRON subject to easements, restrictions and reservations of record, if any.

My Opinion

On 2/27/1975 the golf course property was still subject to the "restrictive use" in Deed 585/157 (Table 6): **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.**

My Volusia County Records research did not find any officially recorded reversal or modification of the restricted use. Nor have I received any documentation from the City that perpetuity covenants and restrictions were released by the voluntary Tomoka Oaks HOA (see Table 12),

Table 18	Official Recording Date 2/28/1977

Warranty Deed
Recorded 2/28/1977. Book 1887 / Page 301.

PLR Development, LTD grantor
BML Investments and PRN Investments grantees

Sale of remaining lots in Tomoka Oaks Country Club Estates.
Subject to restrictions, reservations, and easements of record.

My Opinion

- I believe the Unit 1 Restrictions were still in effect at the time of the 2/28/1977 sale of Tomoka Oaks Country Club Estates, and therefore if 4/5's of the lots in Unit 1 had been sold, the reverter right would vest automatically in the HOA. (Tables 1, 11 and 16) I have not received any documentation from the City that perpetuity covenants and restrictions were released by the voluntary Tomoka Oaks HOA (see Table 12).

Table 19	Official Recording Date 2/14/1979

Warranty Deed
Recorded 2/14/1979. Book 2052 / Page 1019.

Milton W. Pepper grantor
RTH, Inc. grantee

Sale of the Sam Snead Golf and Country Club to RTH, Inc.
Subject to easements and restrictions of record, if any.

Reverter
"During the term of the purchase money note and wrap around mortgage executed of even date herewith by grantee to grantor, or for a period of 18 years in the event the mortgage is prepaid in full, the above described property shall revert to the grantor upon the condition that any portion of said property is used for any purpose other than a golf course with club house and appurtenant amenities.

My Opinion

On 2/14/1979 the golf course property was still subject to the "use restriction" specified in Deed 585/157 which specifically stated: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.** The "use" can be inferred from the inclusion of "Subject to easements and restrictions of record, if any." Therefore, it is my opinion the "restrictive use" was in effect and deemed approved in the 'subject to' statement in Deed 2052/1019.

It is my opinion that on 2/14/1979 the golf course property was still subject to the reverter clause in Deed 585/157 despite the filings in Tables 15 and 16. The intent of the Reverter was to continue to protect the original restrictive use. The reverter may have capped at 18 years upon payment of the note, but the **intent** was still **perpetual**.

Milton W. Pepper as sole owner of the golf course, and as stockholder in PLR Development, LTD., still had a fiduciary responsibility to lot owners and homeowners to protect their financial interests. Throughout its ownership, PLR marketed the

estates as coexisting with the golf course. Golf course facing lots were more desirable and therefore priced 70% - 96% higher[2], [3] than non-golf course facing lots and homesites. (See Section "Master Planned Community" of this report for details and citations.) Due to this representation of coexistence, Pepper had a fiduciary responsibility to uphold in Deed 2052/1019 the referral rights and reverter rights intended in 585/157. Instead, in my opinion, Milton W. Pepper, PLR Development, LTD, and Tomoka Oaks, Inc. intentionally and unethically released the protective rights of homeowners should the golf course not be perpetually used as intended.

Also, it should be noted:

- Milton W. Pepper's son-in-law, Ben Horne, was a real estate agent who listed homes in Tomoka Oaks Country Club Estates and who placed ads in the *Daytona Beach News- Journal* advertising golf course fronting lots and homes.
- Milton W. Pepper and Ben Horne were both stockholders in Tomoka Oakwood Development Corp. which owned and developed Tomoka Oaks North condominiums of which buyers received a paid membership in Tomoka Oaks Country Club.
- The above conflicts of interest in cross ownership are detailed and cited in the section of this report titled "Conflicts of Interest in Cross-Ownership."

Table 19A Official Recording Date 10/31/2006

Development Order for PRD-06-32: Tomoka Oaks Golf Village - signed 10/6/2006
Recorded 10/31/2006 Book 5944 / Page 2183

Applicant: RTH, Inc.
City Issuing Order: Ormond Beach

Highlights of the Development Order:

- Allows construction of 119 multifamily units (townhomes and condominiums) and 3-single family dwellings on a 147-acre parcel within the limits of the existing Tomoka Oaks Golf Course
- PRD land development code must be strictly complied with.
- The owner shall provide for covenants and restrictions that restrict the golf course to open space and golf course use. The City of Ormond Beach shall be involved in a manner that requires the approval of the City if the owners ever wish to remove the restriction on use.
- In the event the land approved by this PRD Development Order is abandoned for a period of (2) years or there has been no construction activity during that period, the permit shall be void and a Notice of Final Plan Revocation filed under the provisions of Section 1-14(c)(2) of the *Land Development Code*, before the planned development permit can be reestablished, a new PRD Development Order shall be considered by the City Commission.
- Development Order shall be binding upon RTH, Inc. a Florida corporation, and shall run with the real property.

Note:

- The city implicitly recognized the perpetual use of the property to remain a golf course or recreational green space when approving the 2006 PRD application.
- Before PRD 06-32 expired, approximately 86 home buyers purchased homes in Tomoka Oaks during the active Development Order time frame thus relying on good faith that the golf course land was protected per recorded instruments..
- The Development order expired 10/17/2014.
- Property is currently assigned a land use of "expired PRD" and the City can review future PRD applications.

Table 20	Official Recording Dates 7/21/2010 - present

Warranty Deed
Recorded 7/21/2010. Book 6496 / Page 4634.

RTH, Inc. grantor
Putnam State Bank grantee

Verbatim excerpt:
It is the intent of the grantor and grantee that the conveyance of the above described property to Putnam State Bank will not act in any way as satisfaction of the notes and mortgages RTH, Inc. to Putnam State Bank (copies of which are recorded in O.R. Book 6160 at page 132 and O. R. Book 6296 at page 4639 of the public records of Volusia County, Florida.) It is the express intent of the parties that the above-described notes and mortgages will not merge with the interest of Putnam acquired under this deed until it is determined that there are no intervening liens.

Special Warranty Deed
Recorded 12/12/2011. Book 6659 / Page 1525.

Putnam State Bank grantor
EJTS Holding, LLC grantee

Sale of Sam Snead Golf and Country Club subject to encumbrances, easements and restriction of records.
Together with all the tenements, hereditaments and appurtenances thereto belonging in any wise appertaining.

Warranty Deed
Recorded 4/21/2021. Book 8036 / Page 3448.

EJTS Holding, LLC grantor
Triumph Oaks of Ormond Beach I, LLC grantee

Sale of Sam Snead Golf and Country Club subject to reservations, covenants, conditions, restrictions and easements of record and to all applicable zoning ordinances and/or restrictions imposed by governmental authorities, if any.

My Opinion
Triumph Oaks of Ormond Beach I, LLC L21000120943 identifies local businessmen Carl Velie and Ray Barshay as managers of the LLC. Both either reside in Ormond Beach or have businesses in Ormond Beach and are familiar with the golf course property and its use as a golf course. Even though the prior owner of the course, EJTS Holding allowed the course to run down, there was a sign on the club house door which clearly stated for all to view that, "The Tomoka Golf Course is temporarily closed for public play so that maintenance can work to improve our quality of play." This sign was still posted as of February 9, 2021 which was 2 months prior to the sale of the course to Triumph Oaks of Ormond Beach I, LLC on 4/23/2021.

Cobb Cole, the law firm representing Triumph Oaks, title insurance analysis indicates that insurance coverage does not exist for the 2006 Development Order thus expressly acknowledging the 2006 Development Order which rezoned the property from R-2 to PRD.
https://www.ormondbeach.org/ArchiveCenter/ViewFile/Item/10425
Pages 675-686

Protective Covenants and Restrictions: Summary and My Opinion

Regardless of whatever entity owned (or owns) the Sam Snead Golf and Country Club:

- The golf course property was originally intended and encumbered as: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.**
- My Volusia County Records research did not find any officially recorded reversal or modifications of the restricted, perpetual use defined in Deed 585/157. And I found no modifications to the covenants and Restrictions 431/32.
- I have not received any documentation from the City that perpetuity covenants and restrictions were released by the voluntary Tomoka Oaks HOA. No official homeowners association uniting all Units has ever been formed, and the voluntary HOA has no legal authority to release the perpetuity restrictions and covenants.
- The Reverter clause in Deed 585/157 is still current today, and due to the fact that over 4/5's of the lots in Tomoka Oaks Country Club Estates have been disposed of, the reverter is now vested automatically and exclusively with the voluntary Tomoka Oaks Homeowners Association.
- Brent Spain, land use attorney with Theriaque & Spain, reviewed my historical research. He concluded that the summarized facts and cited case law would establish that, at a minimum, the use of the Sam Snead Golf and Country Club property is limited to a golf course or similar open space purposes by virtue of an implied restrictive covenant.
- Since its inception in the early 1960's and continuing to present time, buyers in Tomoka Oaks Country Club Estates purchased lots and homes in good faith predicated on their value as related to the coexisting golf course.
- The golf course property continues to benefit the surrounding residential properties; it preserves the character of the community, and provides residents with a pleasant view.

Summary of Emails with the City Attorney relevant to Tomoka Oaks Covenants and Restrictions

December 26, 2023 12:12 PM
From: Carolyn Davis
Sent to: Randy Hayes, Lori Tolland, Steven Spraker
Subject: Proof the Tomoka Oaks HOA released the perpetuity covenant

At the Commission hearing on 11/7/23 regarding the Tomoka Reserve PRD application, you stated that in 1976 the Tomoka Oaks HOA released the perpetuity covenant that the property would remain a golf course or green space recreational area. For your reference, the meeting minutes at *https://www.youtube.com/watch?v=4whfV-AGgPg* state verbatim:

> **Beginning at Minute Marker 3:36:45**
>
> **Commissioner Lori Tolland**: Randy this is for you. . . I have heard multi times and it's been in the packet from residents the discussion about the golf course being perpetual as a golf course in the covenants. Can you just explain that to me and your analysis of it again.
>
> **City Attorney Randy Hayes:** So from the historical research that we have performed, um the golf course when it was constructed had a restrictive covenant that um prohibited the development of property (clears throat). It allowed the HOA to release the covenant. Um in 1976 our research indicates that that in fact occurred, HOA released the covenant, and however in spite of the release the course continued to operate as a golf course for many years, um, and then when the course um stopped being used as a golf course, then in 2006 there's an application to have it rezoned to PRD. So there's been some discussion as to well why didn't the golf course have its own zoning as opposed to the R2 and I don't know the answer to that question but it could well be that it didn't need one because it had the protection of a restricted covenant. Um the applicant has provided a title commitment title policy in the record that shows that there are no liens or restrictions or covenants so um that's something that they have provided to us. So to the extent that um some residents believe that there were errors that may have been performed in the release of that covenant back in 1976, that's not for this commission to decide now. The evidence we have is that there is no covenant and that would be indicative from the 2006 PRD development order

that was approved that rein tried to reinstate one before that development order expired.
Ending at Minute Marker 3:39:03

I submitted Public Records Request #PR-2023-983 to receive the 1976 HOA document you publicly referred to during the 11/7/23 hearing informing Commission Tolland that the HOA released the perpetuity covenant. In response to my request, the city provided me with the attached Release Book 1307 Page 89: SLGMC223112914070.pd. This document is not proof that the voluntary Tomoka Oaks HOA released the perpetuity covenant. This document only states the "Right of First Refusal" and the "Reverter Clause" were released. The Reverter Clause was to take effect if 4/5's of the Tomoka Oaks lots had been sold, and the property was not used as a golf course or recreational area. Release 1307 / 89 in no way released the use of the land to remain a golf course or recreational area; it only released the reverter right of the land to revert to the HOA if not used as a golf course.

Please provide me with the 1976 HOA document you stated publicly was uncovered during the city's research which specifically states the HOA released the perpetuity clause. The existence or absence of this document is understandably critical to any legal defense.

Also, please note the Tomoka Oaks HOA has always been voluntary and the officers cannot enforce any rules, much less release any land use restrictions, without 100% concurrence of every homeowner. To clarify, I am asking you to provide me with the 1976 document you publicly cited during the commission hearing claiming the HOA released the perpetuity use. The document I received did not resolve my public records request.

Thank you,

Carolyn Davis

Sent to: Carolyn Davis, Lori Tolland, Steven Spraker
Subject: Proof the Tomoka Oaks HOA released the perpetuity covenant

Good morning Ms. Davis. I misstated the date. It would be reflected in the research information that we previously provided. Thank you.

December 28, 2023 9:54 AM
From: Carolyn Davis
Sent to: Randy Hayes, Lori Tolland, Steven Spraker
Subject: Proof the Tomoka Oaks HOA released the perpetuity covenant

Hi Randy,

Can you be a little more specific about when you provided me the document that details how the HOA released the perpetuity clause? The only communication I had from the city is attached and it does not state anywhere that the HOA released the perpetuity use.

As summarized by Scott McKee, Assistant City Attorney, the Reverter Clause (reverting the land to the HOA if 4/5's of the Tomoka Oaks lots had been sold, and the property was not used as a golf course or recreational area) was released but there was no mention in his summary or the supporting recorded documents that states the HOA released the perpetuity land use covenant as you stated in the November 7, 2023 commission hearing. I am asking for the document you relied upon when making that statement.

Thank you,

Carolyn Davis

January 22, 2024 12:20 PM
From: Carolyn Davis
Sent to: Randy Hayes, Lori Tolland, Steven Spraker, Dennis Bayer, Bill Partington
Subject: Follow Up 1-22-24: Proof the Tomoka Oaks HOA released the perpetuity covenant

Hi Randy,

I am following up on my request to receive the research document you cited during the 11/7/23 commission hearing where you stated that in the 1970's, the Tomoka Oaks HOA released the perpetuity land use covenant from the Sam Snead Golf and Country Club plat. (See previous emails in this thread for complete details and my prior two requests.)

I am including the Tomoka Oaks HOA attorney, Dennis Bayer, in this follow up request due to his recognized standing at the 1/11/24 Planning Board meeting to represent the voluntary HOA of which I am a paid member. I believe my request is pertinent to Mr. Bayer's need to remain informed regarding legal documents in the city's possession which have future implications in potential legal proceedings.

The applicant has indicated they will pursue legal action if the R-2 re-zoning is denied by the city commission. My concern is that your 11/7/23 statement has the potential to be used as leverage by the applicant to claim in court proceedings or legal mediation that the perpetuity covenant, or any implied perpetuity covenant, was released by the Tomoka Oaks HOA.

If the city has in its possession a document whereby the voluntary Tomoka Oaks HOA did release the perpetuity use of the Sam Snead Golf and Country Club plat to remain a golf course or recreational green space, I am again requesting that you provide me with this document. As explained in my December 28, 2023 email, the attached document previously provided to me in June 2022 does not fulfill my request.

If you believe the City misstated the facts during the 11/7/23 commission hearing, (i.e., the city's research did not produce any document stating the voluntary Tomoka Oaks HOA released the use of the Sam Snead Golf and Country Club plat to remain a golf course or recreational green space in perpetuity), then I request that the City acknowledge this misstatement during the next Tomoka Reserve commission hearing tentatively scheduled for February 2024. This will clarify for the record and for the applicant that no such action was ever taken by the voluntary Tomoka Oaks HOA.

The applicant has indicated they will pursue legal action if the R-2 re-zoning is denied by the city commission. My concern is that your 11/7/23 statement has the potential to be used as leverage by the applicant to claim in court proceedings or legal mediation that the perpetuity covenant, or any implied perpetuity covenant, was released by the Tomoka Oaks HOA.

If the city has in its possession a document whereby the voluntary Tomoka Oaks HOA did release the perpetuity use of the Sam Snead Golf and Country Club plat to remain a golf course or recreational green space, I am again requesting that you provide me with this document. As explained in my December 28, 2023 email, the attached document previously provided to me in June 2022 does not fulfill my request.

If you believe the City misstated the facts during the 11/7/23 commission hearing, (i.e., the city's research did not produce any document stating the voluntary Tomoka Oaks HOA released the use of the Sam Snead Golf and Country Club plat to remain a golf course or recreational green space in perpetuity), then I request that the City acknowledge this misstatement during the next Tomoka Reserve commission hearing tentatively scheduled for February 2024. This will clarify for the record and for the applicant that no such action was ever taken by the voluntary Tomoka Oaks HOA.

I would appreciate an acknowledgement from you of your receipt of this 1/22/24 follow up email.

Thank you,

Carolyn Davis

Steven – for the reasons described below, there is no covenant requiring the golf course to be used in perpetuity.

Subject: Tomoka Oaks- Historical Recorded Documents

Randy,

As I mentioned earlier, I reviewed the public record archives pertaining to the Tomoka Oaks golf course, specifically as to the issue whether there were any recorded documents containing language that the property was "to be used as a golf course in perpetuity". I searched for any covenants/restrictions that would include such language. There was a document recorded at Book 431, beginning at page 32, titled "Restrictions", which was applicable to Tomoka Oaks Country Club Estates, Unit #1, and provided restrictions regarding the use of the residential properties by the individual homeowners,(i.e., such as only using the property for residential use, only buildings for private dwellings, no animals except for domestic animals, etc.) but the restrictions contained no such language pertaining to the use of the golf course property in perpetuity.

I was able however, to locate a document containing the language restricting the use in perpetuity as a golf club, as referenced in the detailed packet of materials containing the history of the development provided to planning staff by Carolyn Davis. The referenced clause is in a warranty deed executed in December of 1963, which conveyed the property from Tomoka Oaks, Inc., to an individual, Ralph Frederick, trustee. This 1963 warranty deed contained three paragraphs of notable interest. The first paragraph contained a right of refusal for Tomoka Oaks, Inc. to re-purchase the property in the event Mr. Frederick decided to sell the golf course. The second paragraph contained the referenced language that the property shall be used as a golf and country club, golf course, or related use, in perpetuity, or revert back to the seller. The third paragraph contained express conditions and provided a mechanism to release or modify the express conditions. Subsequent recorded documents including a corporate resolution adopted by the Tomoka Oaks, Inc. board of directors in 1969, and a release, recorded in 1971, were located that indicate the parties were released from the conditions of the 1963 warranty deed, which shall be discussed in detail below.

As a brief history, during the early development of the Tomoka Oaks subdivision, the golf course property was owned by Tomoka Oaks, Inc., a Florida corporation, and was initially leased in January of 1963 to Tomoka Oaks Golf and Country Club Inc., a non-profit, for a term of 99 years. For whatever reason, the lease was surrendered in October of the same year, and the golf course property was sold in December by Tomoka Oaks, Inc., to Ralph Frederick, Trustee. The golf course property was conveyed by warranty deed for consideration, executed on December 12, 1963, and recorded in the public records of Volusia County on December 13, 1963, at Book 585 beginning on page 157. As previously mentioned the warranty deed contained; 1) a right of first refusal in the event Mr. Frederick decided to sell the golf course property and received a good faith offer; 2) a reverter clause that the property would be used as a golf and country club, golf course, and related use in perpetuity; and 3) a paragraph expressing conditions of the right of first refusal and providing

a provision to allow the parties a release of the reverter clause if express conditions were met.

1963 Warranty Deed Conditions

Language of Right of First Refusal

The warranty deed executed on December 12, 1963 contained the following language, giving Tomoka Oaks, Inc., the right of first refusal to re-purchase the property should the grantee (party of second part) ever decide to sell the property and get a good faith offer.

> *"This conveyance is subject to the express conditions that should party of the second part (grantee), or his successors in interest, desire to sell or convey the above described property to any person, firm or corporation other that a subsidiary of party of the second part, any good faith offer acceptable to such owner must be referred to party of the first part (grantor) for its acceptance or rejection for a period of thirty days, and in the event of its rejection or failure to accept such offer, said offer shall then be presented to Tomoka Oaks Golf and Country Club, Inc., a Florida non-profit corporation, for its acceptance or rejection for a period of thirty days, such acceptance or rejection to be subject to the approval of party of first part (grantor). Such right to accept or reject said offer is transferable and may be transferred by either party of the first part or Tomoka Golf and Country Club, Inc. to the Tomoka Oaks Homeowners Association within said thirty day period and must be acted upon within said period."*

Language of Reverter Clause

The second condition in the 1963 warranty deed contained a condition that the property shall be used as a golf and country club, golf course and related uses by the grantee or its successors in interest or revert back to the seller. The language of the reverter clause is as follows:

> *"The above described property shall be used perpetually for purposes of a golf and country club, golf course, and related uses, and in the event that party of second part, or its successors in interest, fail to utilize said property exclusively as a golf and country club, golf course, and related uses, and the property not be sold to Tomoka Oaks Homeowners Association as specified in the preceding paragraph, then the above described property shall automatically revert to and become the property of the first part, and all rights therein of party of the second part, or its successors in interest, shall immediately terminate unless party of the second part, or its successors in interest, shall within ninety days after the day of mailing to said party of the second part, or its successors in interest, at is last known address by certified mail, by Tomoka Oaks Inc., or Tomok Oaks Homeowners Association, a written notice to utilize said property as a gold and country club, golf course, and related uses, complies with said reverter clause and continues to use said property as a golf and country club, golf course, and related uses."*

Release of Modification of the Reverter Clause

The paragraph immediately following the reverter clause in the warranty deed allows the parties to be released from the reverter clause provided express conditions are met. The language is as follows:

> "The aforementioned reverter clause specified in the last preceding paragraph may be released or modified b resolution concurred in by two-thirds of the entire board of directors of Tomoka Oaks, Inc. at any time after ten years after the date of recording of this Deed; provided that if Tomok Oaks, Inc. shall have disposed of four-fifths (4/5) of the lots in

Tomoka Oaks Country Club Estates, then the foregoing right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks Homeowners Association, Inc., to be exercised by resolution of two-thirds (2/3) of the Board of Directors of the Tomoka Oaks Homeowners Association, Inc."

1969 Corporate Resolution and 1971 Release

A few years after the golf course property was conveyed from Tomoka Oaks, Inc. to Ralph Frederick, a sale of the golf course was pending to the entity, Ormond Ocean Homes, Inc. On February 18, 1969, the board of directors for Tomoka Oaks, Inc., held a special meeting and adopted a corporate resolution, by unanimous vote, which recited the reservations and restrictions contained in the December 1963 warranty deed, specifically the right of first refusal and the reverter clause. The resolution stated, "*it is within knowledge of Tomoka Oaks, Inc. at this time that the above described golf course property is under contract for sale to Ormond Ocean Homes, Inc., and Tomoka Oaks, Inc. has rejected its right to purchase said property and is agreeable to the said sale to Ormond Ocean Homes, Inc., and Tomoka Oaks, Inc. has not transferred the right to accept or reject said offer, and whereas, Tocc, Inc., the present owner of the aforesaid property, had requested Tomoka Oaks, Inc. to formalize its consent to the sale of the above described property to Ormond Ocean Homes, Inc., and Tocc, Inc., with the understanding that Tomoka Oaks, Inc. intends to liquidate and dissolve, has also requested Tomoka Oaks, Inc. to release forever its right of first refusal set forth in the aforesaid deed of conveyance and to also release the reverter clause contained in said deed, the release of the reverter clause to become effective December 13, 1973, the release specified in such reverter clause.*" The corporate resolution adopted by the board of directors for Tomoka Oaks, Inc., was recorded in the public records of Volusia County October 22, 1970, at Book 1238, page 246. It is important to note that this resolution was adopted by the board of directors unanimously, and the date the release of the reverter clause was to become effective, December 13, 1973. As the warranty deed provided the reverter clause could be modified or released by a two-thirds vote by the board of directors *at any time after 10 years of the date of recording of the deed* (which was December 13, 1963). It appears the conditions were met. On June 16, 1971, a Release was filed in the public records of Volusia County at Book 1307, page 89, which acknowledged the corporate resolution adopted by the board of directors and recorded in the public records, further releasing the reverter clause contained in the 1963 deed, becoming effective December 13, 1973, the release date specified in the reverter clause, and stating the release is given for good and valuable consideration. In summary, the records confirm the existence of a document recorded in the public records that provided the property be used for purposes of a golf course in perpetuity. In this case, the document was not contained covenants and restrictions provided by a homeowners' association, but rather in a warranty deed, and as stated previously, subsequent records confirm the reverter clause containing the language was properly released by a recorded corporate resolution and release, and therefore no longer valid. I have attached and combined the three referenced documents as a scanned PDF, and highlighted key provisions for your review.

Thanks,

O.R. RECS 585 PAGE 157

WARRANTY DEED

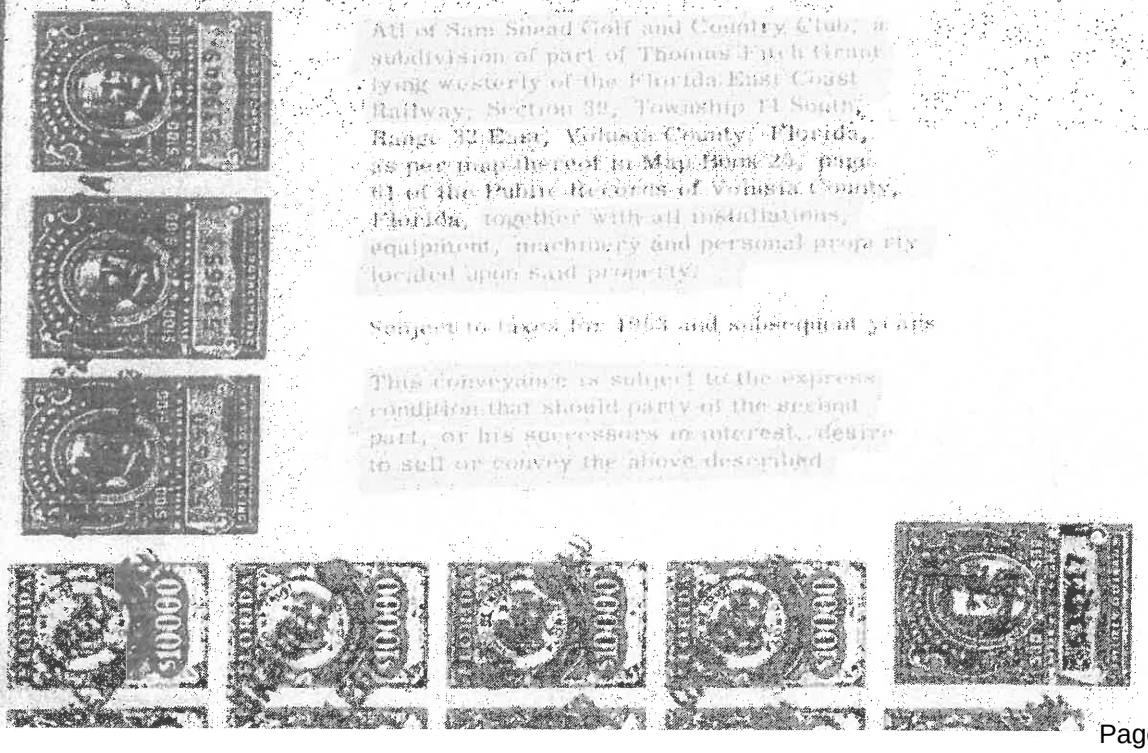
THIS INDENTURE made this 18th day of December, A. D., 1963, between TOMOKA OAKS, INC., a corporation existing under the laws of the State of Florida, having its principal place of business in the County of Volusia and State of Florida, party of the first part, and RALPH R. FREDERICK, TRUSTEE, of 945 John Anderson Drive, Ormond Beach, County of Volusia and State of Florida, party of the second part,

WITNESSETH: That the said party of the first part, for and in consideration of the sum of Ten Dollars ($10.00) to it in hand paid by the said party of the second part, the receipt whereof is hereby acknowledged, has granted, bargained and sold to the said party of the second part, his heirs and assigns forever, the following described land situate, lying and being in the County of Volusia and State of Florida, to-wit:

All of Sam Snead Golf and Country Club, a subdivision of part of Thomas Finch Grant lying westerly of the Florida East Coast Railway, Section 38, Township 14 South, Range 32 East, Volusia County, Florida, as per map thereof in Map Book 24, page 81 of the Public Records of Volusia County, Florida, together with all installations, equipment, machinery and personal property located upon said property.

Subject to taxes for 1963 and subsequent years.

This conveyance is subject to the express condition that should party of the second part, or his successors in interest, desire to sell or convey the above described



property to any person, firm or corporation other than a subsidiary of party of the second part, any good faith offer acceptable to such owner must be referred to party of the first part for its acceptance or rejection for a period of thirty days, and in the event of its rejection or failure to accept such offer, said offer shall then be presented to Tomoka Oaks Golf and Country Club, Inc., a Florida non-profit corporation, for its acceptance or rejection for a period of thirty days, such acceptance or rejection to be subject to the approval of party of the first part. Such right to accept or reject said offer is transferable and may be transferred by either party of the first part or Tomoka Oaks Golf and Country Club, Inc. to the Tomoka Oaks Homeowners Association within said thirty day period and must be acted upon within said period.

The above described property shall be used perpetually for purposes of a golf and country club, golf course, and related uses, and in the event that party of the second part, or its successors in interest, fail to utilize said property exclusively as a golf and country club, golf course, and related uses, and the property not be sold to Tomoka Oaks, Inc., Tomoka Oaks Golf and Country Club, Inc. or Tomoka Oaks Homeowners Association as specified in the preceding paragraph, then the above described property shall automatically revert to and become the property of party of the first part, and all rights therein of party of the second part, or its successors in interest, shall immediately terminate unless party of the second part, or its successors in interest, shall within ninety days after the day of mailing to said party of the second part, or its successors in interest, at its last known address by certified mail, by Tomoka Oaks, Inc., Tomoka Oaks Golf and Country Club, Inc., or Tomoka Oaks Homeowners Association, a written notice to utilize said property as a golf and country club, golf course, and related uses, complies with said reverter clause and continues to use said property as a golf and country club, golf course, and related uses.

The aforesaid reverter clause specified in the last preceding paragraph may be released or modified by resolution concurred in by two-thirds of the entire board

FILED FOR RECORD

of directors of Tomoka Oaks, Inc. at any time after ten years after the date of recording of this Deed; provided that if Tomoka Oaks, Inc. shall have disposed of four-fifths (4/5) of the lots in Tomoka Oaks Country Club Estates, then the foregoing right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks Homeowners Association, Inc., to be exercised by resolution of two-thirds (2/3) of the Board of Directors of the Tomoka Oaks Homeowners Association, Inc.

And the said party of the first part does hereby fully warrant the title to said land, and will defend the same against the lawful claims of all persons whomsoever.

IN WITNESS WHEREOF, the said party of the first part has caused these presents to be signed in its name by its proper officers, and its corporate seal to be affixed, attested by its Secretary, the day and year above written.

RELEASE

KNOW ALL MEN BY THESE PRESENTS, That TOMOKA OAKS, INC., a Florida corporation, pursuant to that certain corporate resolution adopted by the board of directors of the said Tomoka Oaks, Inc. at a special meeting of the board of directors held on the 18th day of February, 1969, a certified copy of which resolution has been duly recorded among the Public Records of Volusia County, Florida in Official Records Book 1238, page 248, does hereby release any and all rights reserved unto it in that certain deed of conveyance recorded in Official Records Book 585, page 157, Public Records of Volusia County, Florida, particularly its right of first refusal set forth in said deed, and said Tomoka Oaks, Inc. further does hereby release the reverter clause contained in the aforesaid deed, such release of reverter to become effective December 13, 1973, the release date specified in such reverter clause. This release is given for good and valuable consideration.

IN WITNESS WHEREOF, TOMOKA OAKS, INC. has caused these presents to be executed in its name, and its corporate seal to be hereunto affixed, by its proper officer thereunto duly authorized, this 16th day of June A. D. 1971.

Signed, sealed, and delivered
in the presence of:

TOMOKA OAKS, INC.

By _____
Its President

STATE OF FLORIDA
COUNTY OF VOLUSIA

I HEREBY CERTIFY that on this day before me, an officer duly authorized in the State and County aforesaid to take acknowledgments, personally appeared R. W. DAVIS, well known to be to be the president of Tomoka Oaks, Inc., a Florida corporation, and he acknowledged executing the above and

foregoing release in the presence of two subscribing witnesses freely and voluntarily under authority duly vested in him by said corporation and that the seal affixed thereto is the true corporate seal of said corporation.

WITNESS my hand and official seal in the County and State last aforesaid this 16th day of June, A. D. 1971.

Notary Public, State of Florida at Large.

My Commission expires: 9/12/73

DAVID L. BLACK
ATTORNEY AT LAW
801 N. GRANDVIEW AVE., DAYTONA BEACH, FLA.

RESOLUTION

WHEREAS, TOMOKA OAKS, INC., a Florida corporation, made, executed, and delivered to Ralph R. Frederick, Trustee, a deed to certain property described as follows:

> All of Sea Breed Golf and Country Club, a subdivision of part of Thomas Fitch Grant lying westerly of the Florida East Coast Railway, Section 39, Township 14 South, Range 32 East, Volusia County, Florida, as per map thereof in Map Book 25, page 61, of the Public Records of Volusia County, Florida, together with installations, equipment, machinery and personal property located upon said property.

which deed was duly recorded on December 13, 1963 in Official Records Book 585, page 157, Public Records of Volusia County, Florida, and

WHEREAS, such deed of conveyance contained the following reservations and restrictions:

> "This conveyance is subject to the express condition that should the party of the second part (Ralph R. Frederick, trustee), or his successors in interest, desire to sell or convey the above-described property to any person, firm, or corporation other than a subsidiary of party of the second part, any good faith offer acceptable to such owner must be referred to party of the first part for its acceptance or rejection for a period of thirty days, and in the event of its rejection or failure to accept such offer, said offer shall then be presented to Tomoka Oaks Golf and Country Club, Inc., a Florida non-profit corporation, for its acceptance or rejection for a period of thirty days, such acceptance or rejection to be subject to the approval of the party of the first part (Tomoka Oaks, Inc.) Such right to accept or reject said offer is transferable and may be transferred by either party of the first part or Tomoka Oaks Golf and Country Club, Inc. to the Tomoka Oaks Homeowners Association within said thirty day period and must be acted upon within said period.
>
> The above described property shall be used perpetually for purposes of a golf and country club, golf course, and related uses, and in the event that party of the second part, or its successors in interest, fail to utilize said property exclusively as a golf and country club, golf course, and related uses, and the property not be sold to Tomoka Oaks, Inc., Tomoka Oaks Golf and Country Club, Inc. or Tomoka Oaks Homeowners Association as specified in the preceding paragraph, then the above described property shall automatically revert to and become the property of the party of the first part, and all rights therein

of party of the second part, or its successors in interest, shall immediately terminate unless the party of the second part, or its successors in interest, shall within ninety days after the date of mailing to said party of the second part, or its successors in interest, at its last known address by certified mail, by Tomoka Oaks, Inc., Tomoka Oks Golf and Country Club, Inc., or Tomoka Oaks Homeowners Association, a written notice to utilize said property as a golf and country club, golf course, and related uses, complies with said reverter clause and continues to use said property as a golf and country club, golf course, and related uses.

The aforesaid reverter clause specified in the last preceding paragraph may be released or modified by resolution concurred in by two-thirds of the entire board of directors of Tomoka Oaks, Inc. at any time after ten years after the date of recording of this Deed; provided that if Tomoka Oaks, Inc. shall have disposed of four-fifths of the lots in Tomoka Oaks Country Club Estates; then the foregoing right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks Homeowners Association, Inc., to be exercised by resolution of two-thirds of the Board of Directors, of the Tomoka Oaks Homeowners Association, Inc."

and

WHEREAS, it is within the knowledge of Tomoka Oaks, Inc. at this time that the above-described Golf Course property is under contract for sale to Ormond Ocean Homes, Inc., and Tomoka Oaks, Inc. has rejected its right to purchase the said property and is agreeable to the said sale to Ormond Ocean Homes, Inc., and Tomoka Oaks, Inc. has not transferred the right to accept or reject said offer, and

WHEREAS, Tocc, Inc., the present owner of the aforesaid property, has requested Tomoka Oaks, Inc. to formalize its consent to the sale of the above-described property to Ormond Ocean Homes, Inc., and

WHEREAS, Tocc, Inc., with the understanding that Tomoka Oaks, Inc. intends to liquidate and dissolve, has also requested Tomoka Oaks, Inc. to release forever its right of first refusal set forth in the aforesaid deed of conveyance and to also release the reverter clause contained in said deed, the release of reverter to become effective December 13, 1973, the release date specified in such reverter clause,

1238 PAGE 246
OCT 22 PM 1 20

NOW, THEREFORE, the following resolutions are hereby adopted:

"BE IT RESOLVED: That inasmuch as it has been submitted to Tomoka Oaks, Inc. that Tocc, Inc. has contracted to sell the following described property to Ormond Ocean Homes, Inc.:

All of Sam Snead Golf and Country Club, a subdivision of part of Thomas Fitch Grant lying westerly of the Florida East Coast Railway, Section 39, Township 14 South, Range 32 East, Volusia County, Florida, as per map thereof in Map Book 25, page 61, of the Public Records of Volusia County, Florida, together with installations, equipment, machinery, and personal property located upon said property,

Tomoka Oaks, Inc. does hereby reject its right to exercise any option to purchase the aforesaid property and is in full accord with the sale of the aforesaid property to Ormond Ocean Homes, Inc. and that the said sale is hereby ratified and approved and that Tomoka Oaks, Inc. evidences its consent to the said sale by the action of its board of directors taken at this duly convened, authorized meeting of the board of directors of said corporation.

BE IT FURTHER RESOLVED: That since Tomoka Oaks, Inc. intends to liquidate and dissolve, Tomoka Oaks, Inc. does hereby release any and all rights reserved unto it in that certain deed of conveyance recorded in Official Records Book 585, page 157, Public Records of Volusia County, Florida, particularly its right of first refusal set forth in said deed, and Tomoka Oaks, Inc. further releases the reverter clause contained in the aforesaid deed, such release of reverter to become effective December 13, 1973, the release date specified in such reverter clause, and the president and/or secretary of this corporation are hereby authorized and empowered to execute any and all further instruments which may be required in order to effect the releases herein referred to."

I HEREBY CERTIFY that the above and foregoing is a true and correct copy of a resolution passed by a unanimous vote of the board of directors of Tomoka Oaks, Inc. at a special meeting of the board of directors held on the 18th day of February, A. D. 1969, the said meeting having been duly convened and a quorum being present.

DATED: This 19th day of October, 1970.

Donald W. Acer, Jr.

Donald W. Acer, Jr. - Secretary of Tomoka Oaks, Inc.

Mayor Partington

February 23, 2024

Dear City of Ormond Beach Commission,

Before purchasing the Sam Snead Golf & Country Club property in April 2021, did the Tomoka Reserve applicant verify all possible zoning options with the City? It would appear they did not.

Did the applicant provide competent substantial evidence at the Planning Board January 11, 2024 meeting that supports their R-2 Zoning Map Amendment ZMA 2023-054? It would appear they did not.

Is the applicant truly in "limbo" to exercise any development rights as their legal representative claimed at the January 11, 2024 Planning Board meeting? They appear to think so. History appears to refute that claim.

The 147 acre Sam Snead Golf & Country Club plat was amended in 2006 from R-2 to PRD zoning during the City's approval of the Tomoka Oaks Golf Village PRD. Throughout the 2006 PRD hearing process, the City **implicitly** recognized numerous times the perpetuity use of the golf course land to remain a golf course or open space recreational area as has been relied upon in good faith by Tomoka Oaks homeowners since the 1963 inception and 18-year build-out of the Tomoka Oaks **master planned community**. [1]

Implicitly: to recognize in an indirect way

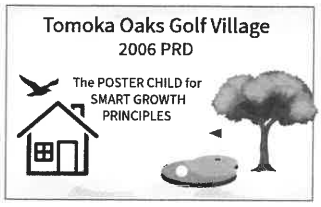
The current owners of the Sam Snead Golf & Country Club plat, Triumph Oaks of Ormond Beach, I, LLC, submitted their PRD-2022-043 Tomoka Reserve application in April 2022, *as was their right under the conditions of the expired 2006 Tomoka Oaks Golf Village Development Order*. [2] And when their 2022 Tomoka Reserve PRD application failed to get their desired 272 density outcome, they withdrew their PRD and submitted a Tomoka Reserve zoning map amendment to revert back to the original R-2 zoning in order to justify even higher density for Tomoka Reserve.

As Planning Board Chairman Doug Thomas stated at the end of the January 11, 2024 Planning Board meeting for Tomoka Reserve's zoning map amendment, this was the first time in his 30+ years on the board that he had ever seen an applicant request to "go backwards" which goes against logical development practices. The other board members agreed with Chairman Thomas and with the Staff Report's denial recommendation. The Board unanimously recommended denial of the R-2 zoning map amendment. Now you, our commissioners, have to determine if the property remains zoned PRD or goes backwards to R-2.

Let's review what "going backwards" from PRD to R-2 should take into consideration:

- To begin with, the 2006 Tomoka Oaks Golf Village PRD application to rezone the Sam Snead Golf & Country Club plat from R-2 to PRD retained the 18-hole golf course in perpetuity while concentrating 119 multifamily units at the core of the golf course.

- This 2006 PRD application was applauded and unanimously approved by the 2006 Planning Board, the 2006 Commission, the City Attorney, the City Staff, and the applicant's attorney, Rob Merrell who stated the PRD was representative of a "Poster Child for Smart Growth principles.[3]"



- Let's look at some highlights from the August 10, 2006 Planning Board minutes [3] to get some context for our Poster Child:

    - The city recognized Tomoka Oaks homeowners had relied upon the golf course and bought their properties in good faith believing that the golf course would always be there.

    - Mr Merrell's poster child touted a density of only 119 clustered units and 3 estate homes which satisfied traffic issues and would restrict in perpetuity the remaining 18-hole golf course recreational area to "forever remain recreation/open space."

    - Staff recommended that the development order blanket the remaining golf course property with a conservation easement so the land area could not be used for anything other than the golf course or open space purposes.

    - In response to concerns that the project might go bankrupt or be a victim of a poor economy and not be built, City Attorney Randy Hayes said the development order would run with the land. To protect Tomoka Oaks homeowners, the current golf course property owner and future owners were subject to the requirements of the development order.

- Now let's take a look at some highlights of the City Commission first reading on October 3, 2006 [4] to provide even more justification for the unanimous R-2 to PRD rezoning:

    - Mr. Merrell said the 2006 proposal included a commitment to cluster 119 multifamily units, and 3 estate homes, in areas designed to be the least intrusive to Tomoka Oaks homeowners. And covenants would be recorded to restrict the golf course property to remain a golf course and protected green space.

    - Commissioner Gillooly received an "ironclad commitment" from Mr. Merrell that this would be the last residential plan for the Tomoka Oaks community.

- Commissioner Kelley said the PRD provided assurance this zoning would never come back to an R-2, R-3, or R-4 and would be dedicated.

- Mayor Costello said that "in this development order the only thing permissible was the golf course open space."

- The City **implicitly** recognized the use of the Sam Snead Golf & Country Club parcel to retain a golf course or recreational green space in perpetuity.

- The Commission unanimously approved the PRD at their subsequent October 17, 2006 second reading. [5]

- Highlights of the Tomoka Oaks Golf Village Development Order for PRD-06-32 (recorded 10/31/2006, Book 5944, Page 2183) which validate the City's implicit recognition of the land use to retain the 18-hole golf course property in perpetuity include:

  - The owner shall provide for covenants and restrictions that restrict the golf course to open space and golf course use. The City of Ormond Beach shall be involved in a manner that requires the approval of the City if the owners ever wish to remove the restriction on use.

  - The Development Order shall be recorded in the public records of Volusia County Florida, . . . and shall be binding upon RTH, Inc. . . and its successors and assigns, and shall run with the real property (Sam Snead Golf & Country Club parcel ID No. 3242-07-00-0010).

  - In the event the use of the land is abandoned for a period of two (2) years, or there has been no construction activity during that period, the permit shall be void . . . and a new PRD Development Order shall be considered by the City Commission.

  - The Development Order approved for RTH, Inc. was active for 8 years from 10/17/2006 through 10/17/2014. During this active timeframe:

    - Approximately 156 home buyers purchased homes in Tomoka Oaks, with 108 homes identified by the MLS as either being "on the golf course" or in a "golf course community." [6] Buyers bought in good faith that the golf course land was protected in perpetuity per recorded Development Order 5944 / 2183.

Sample MLS "remarks" during active 8 year 2006 Dev Order

- On the 18th green
- On 13th green
- Backs up to the 7th fairway
- View of golf course
- On the golf course
- Exceptional golf course living
- Golf course right across the street
- Tomoka Oaks, a well established neighborhood and a golf course community

- Prior to any development, RTH, Inc. conveyed the property, as well as the Development Order running with the land, to Putnam State Bank on 7/21/2010 (Warranty Deed, Book 6496 / Page 4634, Volusia County FL).

- Putnam State Bank sold the property to EJTS Holding, LLC on 12/12/2011 (Special Warranty Deed, Book 6659 / Page 1525, Volusia County FL). Deed states: *Sale of Sam Snead Golf & Country Club subject to encumbrances, easements and restriction of records. Together with all the tenements, hereditaments and appurtenances thereto belonging in any wise appertaining.*

- The Development Order expired on 10/17/2014. Although the permit was now void, per the conditions of the Development Order, the City Commission could still accept a new PRD application for the property.

- EJTS Holding, LLC sold the Sam Snead Golf & Country Club property to Triumph Oaks of Ormond Beach I, LLC on 4/21/2021 (Book 8036, Page 3448, Volusia County Florida).

    - Warranty Deed states: *Sale of Sam Snead Golf & Country Club subject to reservations, covenants, conditions, restrictions and easements of record and to all applicable zoning ordinances and/or restrictions imposed by governmental authorities, if any.*

    - Cobb Cole's own title insurance analysis indicates that insurance coverage does not exist for the 2006 Development Order thus expressly acknowledging the 2006 Development Order. [7]

So is the applicant's claim valid that their property rights are in limbo and the city is unlawfully denying their development rights? Or is the applicant legally allowed to submit as many PRD applications as necessary to negotiate a development acceptable to the City Commission as was incorporated into conditions of the 2006 PRD Development Order should it expire?

The applicant has explicitly threatened to sue the City if the Commission denies their R-2 zoning map amendment. Should the Commission deny the R-2 zoning map amendment:

> And should the applicant file an Appeal
> > And should a judge rule on the facts presented at this hearing
> > > Or should mediation be recommended to come to an agreement on appropriate zoning and the number of homes that can be built:

I request that the City insist the 2006 PRD set the precedent for any residential development: no more than 119 units located in the core of the Sam Snead Golf & Country Club plat with perpetual retention of the 18-hole golf course property as protected green space or outdoor recreational use.

Any court decision or mediation regarding an Appeal should also take into account resident responses to my **R-2 Opposition Survey** [8] completed by 221 residents primarily living in Tomoka Oaks and the surrounding neighborhoods of Escondido Condos, The Trails, Talaquah, and Tomoka Oakwood North Condos. These residents, as well as other Ormond Beach citizens, are legitimately concerned about negative traffic impacts, decreased property values, the adverse impact on the character of Tomoka Oaks which will totally surround Tomoka Reserve, strain on existing infrastructure which was never designed for additional homes on the Sam Snead Golf & Country Club property, and catastrophic gridlock during natural or man-made disasters. (This survey is included in the Commission packet as part of the public record which the City could possibly provide for *any* court review.)

The R-2 Opposition Survey is also a key indicator of how our community best views a successful outcome for the land use of the Sam Snead Golf & Country Club property, with the majority of residents preferring retention of the green space in some form, i.e., golf course, park, wildlife habitat. Those who do believe some development is an ideal or unavoidable outcome limit their views to a clustered development that retains the golf course land, or solely to a luxury development that greatly reduces density to achieve an upscale character.

Additionally, I request the City provide court representatives with the 48 resident letters on record [9] opposing the PRD application as these letters are relevant to the "appropriateness" of the R-2 zoning map amendment which would allow even more density than the applicant's initial PRD application.

Lastly, I would like to remind the City of the **1963 express covenant** and the multitude of **implied covenants and restrictions** that have been in place since 1963 that support that the golf course property is to remain a golf course or recreational green space in **perpetuity**. This fully cited, historical evidence was provided to the City on June 12, 2022.[10] Tomoka Oaks homeowners have relied in good faith on these recorded express and implied covenants as was most recently validated by the City in the 2006 Tomoka Oaks Golf Village PRD approval. Although the 2006 development order has expired, the City Commission's green space perpetuity intent set a precedent that has not expired.

The "Sam Snead Golf & Country Club" and the "Tomoka Oaks Country Club Estates" were developed to co-exist as a **Master Planned Community.** Development and marketing of the estates occurred over an 18 year period (1963 - 1981). Every Tomoka Oaks home developer advertised golf course lots and golf course homes (examples on pg 6) with homeowners paying a premium for golf course facing properties.

561 households [11] desire no residential development of the Sam Snead Golf & Country Club property. We are counting on the wisdom and leadership of our City and Commission to protect Tomoka Oaks from any zoning or development that is not in alignment with our Land Use Codes, Comprehensive Plan, and the implied perpetuity green space protection of the Sam Snead Golf & Country Club property as detailed by land use attorney Brent Spain. [12]

I request that during the 1st reading of the Tomoka Reserve R-2 zoning map amendment that the Commission unanimously deny the application and honor the words of William R. McElroy, founding President and Chairman of the Board of Tomoka Oaks, Inc., whose February 23, 1963 **Invitation** (pg 7 below) published exactly 61 years ago today, promised, "To keep this Area in all its natural beauty, certain protective covenants have been provided for the benefit and protection of all property owners."

Respectfully submitted,

Carolyn Davis Carolyn

TOMOKA OAKS

COUNTRY CLUB ESTATES

ORMOND BEACH

AN INVITATION TO YOU:

Because we are so proud of our accomplishments to date, we extend to you a cordial invitation to visit Tomoka Oaks Country Club Estates.

It was months ago that Tomoka Oaks Country Club Estates was but an idea—and an excellent one—in the minds of some ambitious local citizens who desired to present the ultimate in gracious and contented living to the many people who wanted to live in Florida.

From its very inception, no effort has been spared in planning and developing—to make Tomoka Oaks Country Club Estates one of the finest exclusive residential areas in the State of Florida.

Cut from 545 beautiful wooded acres, this magnificent setting lends itself completely to natural beauty and — to preserve the contour of the rolling land and beautiful old trees the newly constructed streets wind through the property to enhance its natural beauty.

Right in the center of this magnificent natural beauty spot has been built Tomoka Oaks Golf and Country Club — an eighteen hole championship Golf Course — 6,788 yards long covering 135 acres. The Club House is now open and plans are already being developed to enlarge and improve it.

Large lots with a minimum of 100 feet at the front building line and 12,000 square feet insure your privacy. Wide streets have been built, with concrete gutters and storm sewers for good drainage. Sanitary sewers and Ormond City water have been installed.

Five model homes are now under construction. Still under construction — to be sure — but far enough along so that you can see the type of home that will be built at Tomoka Oaks Country Club Estates.

To keep this Area in all its natural beauty, certain protective covenants have been provided for the benefit and protection of all property owners.

Ideally located on Nova Road just off U.S. Route #1, within the City Limits of Ormond Beach, Tomoka Oaks Country Club Estates is but minutes to shopping, churches, schools and the World's Most Famous Beach.

We're sure you'll enjoy seeing the progress that has been made at Tomoka Oaks Country Club Estates and will be convinced that it will truly be as we have planned — one of Florida's most exclusive residential areas for healthful contented living.

We cordially invited you to drive out to Tomoka Oaks Country Club Estates today and see for yourself.

Sincerely,

TOMOKA OAKS COUNTY CLUB ESTATES.

by William E. Elroy

President

BEFORE THE
CITY COMMISSION
OF THE
CITY OF ORMOND BEACH

IN RE: Application of RTH, Inc.
PRD-06-32
"Tomoka Oaks Golf Village" Planned Residential Development
within the limits of the existing Tomoka Oaks Golf Course

DEVELOPMENT ORDER

This matter having come on for public hearing before the City Commission of the City of Ormond Beach, Florida, on October 3, 2006 and October 17, 2006, and the City Commission having considered those items as required by Chapter 1, Article II, Section 1-18(D)(3) of the *Land Development Code*, and having heard testimony and evidence from all affected persons, the City Commission hereby finds that:

(1) The land use conforms to the standards and requirements of this *Land Development Code* and will not create undue crowding beyond the conditions normally permitted in the PRD, Planned Residential zoning district, or adversely affect the public health, safety, welfare or quality of life;

(2) The land use is consistent with the *Comprehensive Plan*;

(3) The land use will not adversely impact environmentally sensitive lands or natural resources, including but not limited to waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells;

(4) The land use will not substantially or permanently depreciate the value of surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties;

(5) Public facilities, such as roads, sidewalks, bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds will not be unduly burdened and are adequate to serve the land use;

(6) Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe;

(7) The land use is functional in the use of space and aesthetically acceptable;

(8) The land use provides for the safety of occupants and visitors;

(9) The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area; and

(10) The testimony provided at public hearings.

Thereupon and in consideration thereof, the City Commission hereby orders that:

A. The application of RTH, Inc., a Florida corporation, for the "Tomoka Oaks Golf Village" a planned residential development to allow the construction of consisting of 119-multifamily units (townhomes and condominiums) and 3-single family dwellings on a 147-acre parcel within the limits of the existing Tomoka Oaks Golf Course, in the R-2 Single Family Low Density zoning district, on that real property described and depicted on Exhibit "A" attached hereto and incorporated herein by reference, is hereby granted, subject to the following conditions:

1. All applicable provisions of Chapter 2, District and General Regulations, Article II, District Regulations, Section 2-35, Planned Residential Development, of the City of Ormond Beach *Land Development Code*, except as otherwise specifically modified hereby, shall at all times be strictly complied with;

2. That the following recommendations of the Planning Board shall be resolved and strictly complied with at all times:

a. The owner shall provide for covenants and restrictions that restrict the golf course to open space and golf course use. The City of Ormond Beach shall be involved in a manner that requires the approval of the City if the owners ever wish to remove the restriction on use.

b. The owner shall provide a note on the plat for the property indicating to future property owners the proximity of the airport and the flight pattern of the traffic from the airport.

c. The applicant shall include a landscape buffer around the 3 single-family lots that is a minimum of 10-feet in width with trees and shrubs in accordance with the minimum buffering requirements specified by the Land Development Code, Chapter 3, Article I, Section 3-06, as currently adopted.

3. That the following comments of the Site Plan Review Committee shall be resolved and strictly complied with at all times:

CITY LANDSCAPE ARCHITECT COMMENTS:

a. Wheel stops must be provided. Vehicle bumpers will not overhang the planting beds.

b. Applicant must provide a littoral planting detail and specifically show where they are to be planted on the pond banks in all applicable ponds; applicant must provide calculation for each pond; clarify if ponds are wet or dry; if dry then littoral planting is not required.

c. Applicant must provide a note on the plans that any tree needed to be removed during construction will require a one for one replacement penalty; protected trees will require one 2.5" caliper variety and specimen trees will require one 4.5" caliper variety to suit its planting location; replacement trees need to be Florida #1 at a minimum height of ten feet (10'). CPH will make the determination as to what is best suited for each replacement.

d. Remove the asterisk note on page TR-8.

CIVIL ENGINEER COMMENTS:

e. Applicant must provide legend to clarify phasing.

f. Sheet C6 – Include Temporary Construction Entrance in Phase 1A.

g. Sheet C2 – Provide As Built Requirements for Water and Sewer; relocate the As Built Requirements for Roadway Construction from sheet C36.

h. Sheet C22 –Removing the fire hydrant from the pond.

i. Sheets C45-C47 – Estimated Wet Season Water Table Elevation and Design Pond High Water Elevation to each section.

j. Applicant must locate easements for utilities and lift station on the plat.

CHIEF BUILDING OFFICIAL COMMENTS:

k. Applicant must provide additional fire hydrants to townhouse and condo locations.

l. Applicant must provide location of fire department connections.

m. The location of handicap spaces for the clubhouse is unacceptable; accessible parking spaces shall not cross the roadway and shall be as close to the building as possible.

FIRE DEPARTMENT COMMENTS:

n. Fire hydrants shall be installed at intervals not to exceed 500 feet; provide location of additional hydrants on plans.

PUBLIC UTILITIES COMMENTS:

o. Manhole #44 on page C18 of the plans needs to be lined.

p. Applicant must update fire hydrant assembly detail.

q. Show how reuse will be connected to existing reuse line or the proposed reuse line to be constructed to the reuse storage pond by Tomoka Oaks.

r. Reuse meter to be provided by owner of make and model approved by the City. A reuse agreement will need to be executed by the owner and the City.

s. Applicant must confirm if water master meter shall be needed or if units will be individually metered.

t. Applicant must provide match lines on composite utility sheets.

u. All water and sewer lines to be owned and maintained by City must be in public rights of way or 40 foot access and utility easement; an easement or deed is also needed for the lift station.

POLICE DEPARTMENT COMMENTS:

v. Parking lot lighting, pole heights must not exceed 20 feet and maximum wattage shall be 250 watts (see Land Development Code Chapter 3, Article 5 Architectural Design Standards, Chapter 3 Page 10). This will impact lighting calculations currently submitted.

4. The subdivision is approved to have a total of consisting of 119-multifamily units (townhomes and condominiums) and 3-single family dwellings with the following dimensions as shown on the attached plans. The townhomes and condominiums shall be developed in accordance with the conceptual plans approved for the proposed PRD and the requirements established in Chapter 2, Article IV, Section 2-57 M. Multi-Family Dwellings:

Land Use	Min. Lot Area	Min. Lot Width	Front Setback	Side Corner	Side Setback	Rear Setback
Single-family	10,000-square feet	100- feet	30-feet	20-feet	8-feet total 20-feet	25-feet

5. As a stand alone zoning district the following permitted uses and dimensional criteria for this Planned Residential Development are hereby established as follows:

1. **Permitted Principal Uses and Structures.**

   a. Single-family Detached units

   b. Townhouse Units, as located on the conceptual development plan prepared by Conklin Porter and Homes, CPH project number T7501, dated June 2005.

   c. **Multifamily Condominium units** as located on the

conceptual development plan prepared by Conklin Porter and Homes, project number T7501, dated June 2005.

2. Permitted Accessory Uses and Structures

a. Single Family detached dwellings and all accessory uses customarily associated with, dependent on and incidental to their permitted principal uses, provided that such uses conform to the regulations set forth in Chapter 2, Article III.

b. Home Occupations, Type "A", subject to the regulations set forth in Chapter 2, Article III.

6. The project shall be phased over a 5-year period and shall consist of 6 phases; a new phase shall not be initiated until the improvements and enhancements identified in the previous phase have been initiated and are substantially completed. This condition shall not prevent the owner from completing multiple phases concurrently. The following summarizes the phasing of the project:

Phase	Description
1A	Construction of the tennis facility, maintenance area, parking, spine road and associated stormwater improvements. The "Golf Townhomes" at the northern most portion of the development (9th and 10th fairway) will be constructed
1B	Demolition and reconstruction of the clubhouse and parking lot.
1C	Completion of all of the townhomes in the golf and tennis areas.
2A	Development of condominiums at tennis facility.
2B	Development of condominiums at the driving range and clubhouse areas.
3	Development of 3-single family homes on the estate lots.

B. The final plans for the development project shall be consistent with the provisions of this Development Order and the plans depicted in Exhibit "B" hereto; provided, however, that the said plans shall be amended as necessary in order to achieve such consistency.

C. No material change shall be made to the final plan for the development project without further review by the Planning Board and approval by the City Commission in accordance with the procedures for the approval of this Development Order.

D. All site construction activity shall be performed in strict compliance with the terms and conditions of this Development Order approved for this development project, and of the *Land Development Code.*

E. If the final plan approval lapses under the provisions of Section 1-14(C)(2) of the *Land Development Code*, before the planned development permit can be re-established, a new PRD Development Order shall be considered by the City Commission.

F. In the event the use of the land approved by this PRD Development Order is abandoned for a period of two (2) years or there has been no construction activity during that period, the permit shall be void and a Notice of Final Plan Revocation filed under the provisions of Section 1-14(C)(2) of the *Land Development Code*, before the planned development permit can be reestablished, a new PRD Development Order shall be considered by the City Commission.

G. Semi-annually, the Neighborhood Improvement Officer shall prepare a report indicating which planned developments are not in compliance with Section 1-14, or the conditions stipulated in the Development Order, in the event a Neighborhood Improvement Officer subsequently determines there to be any violation, such Officer shall promptly present such determination to the Special Master for hearing.

H. Pursuant to Chapter 1, Article II, Section 1-14(C) (2), of the *Land Development Code*, the first phase of this Special Exception shall automatically expire and become void, without further action by the City Commission, 24 months (October 17, 2008) from the date of City commission approval, unless a site plan or building permit has been issued prior to that date; and a use building permit is so issued, this Special Exception shall remain in full force and effect unless and until subsequently amended by the City Commission.

I. The expiration date of the sixth and final phase of the project to be constructed shall be five (5) years in the future, or to October 17, 20011, and shall automatically expire and become void, without further action by the City Commission, unless a building permit

is issued for the sixth and final phase of the project prior to that date; and if a building permit is so issued, the Development Order shall remain in full force and effect unless and until subsequently amended by the City Commission

J. This Development Order shall be recorded in the public records of Volusia County, Florida, at the expense of RTH, Inc., a Florida corporation, and shall be binding upon RTH, Inc., a Florida corporation, and its successors and assigns, and shall run with the real property described in Exhibit "A" attached hereto and incorporated herein by reference. (Parcel ID No. 3242-07-00-0010)

II. INVOCATION

Mrs. Press led the invocation.

III. PLEDGE OF ALLEGIANCE

IV. NOTICE REGARDING ADJOURNMENT

NEW ITEMS WILL NOT BE HEARD BY THE PLANNING BOARD AFTER 10:00 PM UNLESS AUTHORIZED BY A MAJORITY VOTE OF THE BOARD MEMBERS PRESENT. ITEMS WHICH HAVE NOT BEEN HEARD BEFORE 10:00 PM MAY BE CONTINUED TO THE FOLLOWING THURSDAY OR TO THE NEXT REGULAR MEETING, AS DETERMINED BY AFFIRMATIVE VOTE OF THE MAJORITY OF THE BOARD MEMBERS PRESENT (PER PLANNING BOARD RULES OF PROCEDURE, SECTION 2.7). A

V. APPROVAL OF MINUTES

The minutes of the June 8, 2006 meeting of the Planning Board were approved as presented.

VI. PLANNING DIRECTOR'S REPORT

Mr. Ervin stated that:

- The list of upcoming meetings provided to the Board included the information regarding the August 17th workshop in DeLand that dealt with the Volusia County's 10-Year Work Program. He said that traffic congestion was a critical issue and one that the board members would have to deal with in their review of development and redevelopment projects. He said the County's Work Program was one element of many that would hopefully be used to improve the local roadway systems. He noted that that meeting was a time-certain item (2:00 pm) on the County Council's agenda.
- Department of Transportation Secretary Denver Stutler would speak at the VCARD (Volusia County Association for Responsible Development) luncheon; he would discuss statewide traffic issues, present and future.

VII. PUBLIC HEARINGS

Chairwoman Press explained to the public that the Planning Board was advisory, and that their decisions, unlike those of the City Commission were not binding. She said that the purpose of board hearing was to hear from the applicant, the City staff and the residents and that the official record of that meeting would then be presented to the City Commission, who would vote on the proposal in two public hearings.

Chairwoman Press explained the meeting process to the public and asked that any speakers identify themselves and limit their comments to five minutes.

A. PRD 06-32: Tomoka Golf Village Planned Residential Development Rezoning

Mr. Ervin said that the application was to rezone 147 acres (the existing Tomoka Oaks Golf Course), which was surrounded by the existing Tomoka Oaks subdivision. He advised that the Land Use designation was Low-density Residential, which allowed a density of up to 4.3 units per acre (4.3 u/ac) and had a current zoning of R-2 (Single-family Low Density), which required lots with a minimum of 10,000 square feet and minimum dimensions of 100' x 100'. He said that the zoning was consistent with the existing homes in Tomoka Oaks and in neighboring developments such as The Trails.

Mr. Ervin recalled that in 2005, the property owners (RTH, Inc., represented by Dr. and Scott Ryals) met with staff and identified their desire to redevelop the golf course so that they could 1) maintain the golf course and 2) generate additional revenue. He said that staff had been surprised to note that the land use and zoning were something other than Open Space/Recreation, typical for such properties, and that the owners had the right to develop the property.

Mr. Ervin acknowledged some confusion expressed by residents of the area and explained that based on the land area, the owners could theoretically develop up to 632 single-family homes; however, because of the size and shape of the property, and the incorporation of roads, stormwater and open area, the number of homes that could be accommodated would realistically be reduced to about 300.

Mr. Ervin said that the applicants had been advised of the concerns of adjoining property owners, noting that the subdivision was one of Ormond's nicer communities and one of the few areas in which homes backed onto a golf course. He said they had relied upon the golf course and bought their properties

believing that the golf course would always be there. He said that because the owners had development rights established by the existing land use and zoning, Staff had identified the concepts of clustering the homes and orienting the units to have the least amount of visual impact.

Mr. Ervin said that staff was also concerned with the possibility of leaving room for future development of the remaining portion of the golf course by clustering the homes; therefore, while the staff recommended approval of the proposal, staff also recommended that the development order blanket the remaining golf course property with a conservation easement so the land area could not be used for anything other than the golf course or open space purposes.

Mr. Ervin informed the board that the project had been in review with the City for about a year and that the staff focused on ensuring that the development not create negative impacts for the existing neighborhood. He said that they determined that by shifting the existing driving range towards the northwest and concentrating the condominiums around a relocated and revamped clubhouse, the new construction would not be close to the existing homes along the 18th, 9th and 10th holes. He said the project also proposed to locate 35 townhomes towards the northeast portion of the site with access by an entrance road off of Tomoka Oaks Boulevard and to locate two condominium buildings near the updated tennis center.

Mr. Ervin reported that staff had spoken with many residents of the area and noted that for the record, the Board had been provided with a copy of an e-mail from Ms. Linda Lewis, who had expressed concern with the buffering of the three estate lots proposed for the northwest area of the golf course. He said that Ms. Lewis had enjoyed an open space behind her home and was afraid that the location of the easement for a sanitary sewer line would result in the removal of the existing trees. He reported that the City's engineers and applicant had confirmed that they would consider utilizing a directional dig; therefore, there would be no open-earth excavation of the land and the existing trees could be preserved and protected. He said that the applicant would be required to follow through with that requirement.

Mr. Ervin said that the existing residents were concerned with the number of trees that could be impacted by the project; he stated that the applicant met or exceeded the City's tree mitigation standards because of the additional plantings around the buildings that would be utilized as visual buffers. He said that the plans included the tree mitigation calculations that showed number of trees to be removed and the number of trees to be replanted.

Mr. Ervin pointed out that the City required all multi-family buildings to maintain a minimum of 200' from any single-family home and said that the cart paths had been designed for emergency access; they provided an alternative access route to the properties if the spine roads were damaged or otherwise inaccessible. He said that the design also called for decorative pavement leading into the main drive, the townhomes, tennis center, and updated/relocated clubhouse.

Mr. Ervin displayed the plan layout and typical elevations and noted that staff had also required the architecture to be consistent with the existing development in Tomoka Oaks. He showed renderings of the 3-story golf villas and pointed out that there would be underground parking facilities to minimize the amount of impervious surface. He noted that sub-surface parking was possible because the site was very well-drained, with a low water table.

Mr. Ervin acknowledged that Board Member Jorczak and Mr. Larry Stout of the Airport Advisory Board had questioned whether the additional density and intensity proposed might violate the City's Airport Overlay Zone. He explained that Airport Overlay District comprised areas for which there were concerns

regarding noise impacts that would result from the airport. He recalled the overlay issues presented to the Planning Board in the past and said that they had not been able to use the 60 DNL (day and night noise level contour), shown as a star-shaped zone, because it did not meet certain statutory and federal requirements. He said the City instead utilized the "iron cross" contour (a legally defensible method of establishing the noise levels) and stated that the project was located outside both the 60 DNL line and the City's adopted "iron cross" contours.

Mr. Ervin said that per Mr. Jorczak's request, staff looked at source of the noise complaints. He said that such complaints had been documented when the City was embattled with the decision as to whether or not to expand Runway 17-35; he pointed out on the map that the complaints had been identified as closer to the airport than the project location. He said that Mr. Jorczak and Mr. Stout had also questioned if there was a way to ensure that future purchasers of property in the area were aware that they were buying near the municipal airport, i.e. a kind of due diligence warning.

Mr. Ervin said that the staff report included technical analysis to show how the project complied with the city's concurrency requirements (water, sewer, stormwater and roads), identified zoning and land use issues, and summarized why the City staff recommended approval of the project. He reiterated that a number of Tomoka Oaks residents were unhappy with the project because they felt the golf course had not been properly maintained and worried that the project would just increase the problems they faced.

Mr. Ervin explained that Staff had to look at the proposal from a technical perspective in regard to land use and zoning and said that the proposed plan was considerably less intense than what could be developed there. He reiterated that Staff had made the applicant aware of the concerns, made sure that the development was compatible with the neighborhood, had no negative impacts on the existing residents and preserved the golf course. He agreed that it would be wonderful to retain the property as open space, but reminded everyone present that they had to respect the property rights of the property owner, who already had development rights on the property, given the land use and zoning. He emphasized that the proposal de-intensified the project, concentrated the development and ensured that the impacts would be minimal.

Mr. Jorczak asked if there was a mechanism that the City could employ to notify potential purchasers of the proximity to the airport.

Mr. Ervin replied that there was nothing in the City codes to mandate such notification. He said that the Board could identify that as a concern and as a condition for their approval. He said that the applicant could decide to accept the condition; if they chose not to accept it, the City would then have to decide whether to impose the condition as a part of the rezoning request.

Mr. Thomas questioned why there were fewer noise complaints in 2006, than in 2005.

Mr. Robert Hernandez, Ormond Airport Manager, said that voluntary airport procedures and traffic patterns established prior to his tenure tried to limit the air traffic to the north and west sides of the airport as much as possible. He said most of the current complaints were being generated from the area east of the airport, where much of the training was conducted, and that there were a number of homes on that departure corridor. He explained that air traffic expanded and contracted in all directions and that although he would not say that there would be no aircraft over the proposed community, he felt the Tomoka Oaks residents were getting the benefit of the established voluntary procedures for noise control.

Chairwoman Press clarified with Mr. Ervin that the applicants had the right under the current zoning to remove the golf course and develop the entire area with houses, but that the proposed PRD (Planned Residential Development) would limit the residential development to 122 units and would require a conservation easement over the remaining portion of the golf course to prevent future development of that land. She asked if the development order, as proposed, would preclude the applicants from building any more than the 122 approved residential units on that property.

Mr. Ervin concurred.

Chairwoman Press stated for the record that she had requested an on-site review of the proposal and had toured the property with the owners. She said that she had learned that many of the roads would not be paved and asked who would be responsible for maintaining those roads.

Mr. Ervin responded that the maintenance of the roads would be the responsibility of the developer at first, but that the homeowners' association that would be created would ultimately be responsible for the maintenance of all grounds on the project.

Chairwoman Press asked if the roads met City standards.

Mr. Ervin said that the City required roads to be constructed with a 6" sub-base, 6" base and 1.25" of asphalt; he said that roads were generally designed for a 15 to 25-year life. He assured the Chairwoman that those standards applied to the subject roads. He pointed out that the emergency access/cart path type of roads might not be topped with asphalt, but would be stabilized and had to meet minimum standards established by the Code for emergency access areas. He said it was a common practice and had been utilized in other projects, such as Broadwater, Breakaway Trails, Aberdeen, etc. He noted that breakaway fences were utilized in emergency access areas.

Chairwoman Press asked if the order of the project phases could change.

Mr. Ervin responded that the development order would identify the project phases and that the applicants would have to adhere to the phases, as stated. He acknowledged that the residents of Tomoka Oaks were concerned that the applicants would build the residential units without completing the other improvements and said that was the reason for the phasing. He reported that Phase 1 would involve the relocation and construction of a new tennis facility, Phase 1B would include demolition of the existing parking lot and clubhouse, Phase 1C would be the completion of the townhomes, golf and tennis areas, and the clubhouse would be completed in Phase 2B. He noted that the amenities would correlate with the new homes being developed. He also acknowledged that the applicants were being required to upgrade the appearance of the golf course.

Mr. Thomas disclosed that he also toured the facilities and met with the applicant.

Mr. Robert A. Merrell, 150 Magnolia Avenue, Daytona Beach, representing the applicant, stated that he was also a resident of Ormond Beach. He thanked City staff for their very thorough report, particularly with regard to comprehensive plan consistency and code compliance. He stated that the project had evolved into a better product during the year-long process of working with City staff.

Mr. Merrell said that the project was the "poster child" for Smart Growth principles. He explained that the concept of smart growth was predicated upon the belief that the population would continue to grow and that people would continue to move into the area. He said that smart growth addressed the issues of

where people would live and work, the redevelopment of urban areas, clustering development in areas where services were already available (fire stations, police stations, utilities) and clustering to preserve open space and recreation areas.

Mr. Merrell presented slides of the property, some with the proposal super-imposed over the existing development. He pointed out that the development would include demolition and rebuild of the clubhouse and pool area and the tennis center. He explained that the new three-level clubhouse facility would house partial underground golf cart storage; dining areas, kitchen and banquet facilities, a lounge area, pro shop, locker rooms, and surrounding covered porch on the middle level; offices, executive offices, and a sky lounge on the upper level. He added that there would be a tiki bar overlooking the new pool area.

Mr. Merrell pointed out the proposed condominiums and maintenance facility to be located near the tennis center and said that the redevelopment of the golf course would include bridges and new lakes that would store reuse water from the City's effluent plant. He mentioned that there would be fountains and that comfort stations would be constructed for the golfers and would include under-cover golf cart parking and vending machines.

Mr. Merrell explained that 30 two-story townhomes would be constructed at the northeast corner of the property, access to be by way of the road from the main entrance by the clubhouse. He showed the floor plans of both the townhomes, as well as the three-story condominiums with substantial balconies. He added that the three single-family estate lots would be located near Holes 11 and 16.

Mr. Merrell repeated Mr. Ervin's statement that the proposed project was consistent with the comprehensive plan and met all the criteria in the Land Development Code (LDC) for the PRD rezoning. He stated that the existing R-3 residential zoning (Staff note: actual zoning is R-2) and the future land use classification allowed development at up to 4.3 units per acre over the entire 147 acres. He agreed that it was unusual for a golf course to have a residential zoning, saying that they were typically zoned for Recreation/Open Space, with the surrounding homes zoned for residential. He speculated that the original developer wanted to have an exit strategy in case the project did not succeed.

Mr. Merrell thought that the proposal would make the community proud, given the cluster of the residential units and the dramatic improvement of the amenities. He said that the golf course had suffered in the last couple of years because of the 2004 hurricanes, September 11th and the construction of Nova Road. He said that the purpose of the proposal was to reverse that trend. He said many times there were issues that were not raised until the first public hearing; he hoped the residents would be receptive to the plans.

Mr. Thomas stated that he wanted to discuss the traffic study, since the residents of Tomoka Oaks were very concerned about the traffic.

Mr. Merrell agreed that traffic issues were a concern with any new development and restated that they would be adding 122 residential units, even though the property was entitled to far more homes. He said that a traffic analysis completed for the project had considered the anticipated increase in trips, all of the intersections that could be affected and all of the road segments that could be affected. He said that the model used was one that was accepted by the City and the County; that study had indicated that there were no level of service problems. He recognized that there were traffic issues with some projects in the city at present, but that the widening of, and intersection improvements along, Nova Road had helped the

traffic situation in the area of the subject. He reiterated that the project would not cause a level of service problem on any of the intersections or affected roads.

Mr. Thomas asked if the residences would be primarily occupied by full-time residents or whether the applicant anticipated residents for whom the units would be second homes.

Mr. Merrell stated that they felt there would be some part-time residents, but that the traffic analysis was predicated upon full-time residents. He added that even increasing trips at the peak hours did not produce traffic problems.

Mr. Thomas noted that he was trying to ask questions on behalf of the audience, since they had not had an opportunity to look at the traffic study, as had the board members. He asked what the traffic counts could be estimated to be if the property was instead developed with 300 single-family homes.

Mr. Sans Lassiter, President of Lassiter Transportation Group, 123 Live Oak Avenue, Daytona Beach, and resident of Ormond Beach, said that the study was based on a trip generation rate of 119 multi-family dwelling units and three single-family dwelling units. He explained that multi-family, as proposed, was a lower trip generator (about 6-7 trips per unit per day); therefore, the estimated number of daily trips generated by the proposed development was approximately 773. He further explained that 350 single-family residences (about 10 trips per day) could be expected to generate 3,500 daily trips. He concluded that the proposal represented a significant reduction over what could be done otherwise.

Mr. Lassiter agreed with Mr. McCoy that the trips in the study shown as vested were those trips for the development in Tomoka Oaks that had already been approved and for which the consultant had to account.

Mr. Merrell stated for the record that the applicant had agreed to install the utilities in such a way as to not damage the existing trees. He also mentioned that by approving the rezoning to Planned Residential Development, the resulting agreement (development order) would restrict the open space and golf course area in perpetuity; he said that the applicant had agreed to a deed covenant (conservation easement and reciprocal covenant among all of the owners on the property) that would assure that the property would forever remain recreation/open space.

Chairwoman Press questioned the distance from 23 Pine Valley Circle (the home from which one of the photos was taken) to the golf village townhomes.

Mr. Ervin said that the closest point between any single-family residence and a multi-story building would be 225'. He said that the distance was 300' at the location in question, since the dimension was tied to the fairway (225', plus the fairway). He reiterated that the primary focus was to keep the buildings inside the fairways and away from the existing homes.

Mr. Jorczak asked if there would be any mechanism in place that would preclude the subsequent homeowners' association from turning the development into a private operation to exclude the public.

Mr. Merrell said that the Covenants and Restrictions and the condominium association Declaration would prevent that.

Mr. Thomas asked if there was any conceivable way that it could happen.

City Attorney Hayes said that although nothing was 100% guaranteed, he felt there were enough layers of protection that future development should not be a serious concern in the future.

Mr. Merrell said the applicants would agree to include whatever language that the city attorney deemed appropriate and necessary to assure that outcome.

Mr. Thomas understood and said that his concern was because the board and the residents had all heard the word "never" in the past.

Mr. Merrell elaborated on the city attorney's comments, saying that the discourse was in the public record and that coupled with the binding documents, would provide the City with an enforcement mechanism. He said the restriction was as fool-proof as they could make it.

City Attorney Hayes said that the City would make sure that the development order was drafted to make it as difficult as possible to undo.

Dr. Grissom inquired as to who would be responsible for the maintenance of the golf facilities.

Mr. Merrell said that maintenance would continue to be the responsibility of the owners of the golf course. He noted that only the residential units would be sold.

Dr. Grissom asked if the owners, as the condominium association or homeowners association, could have the prerogative to change the Covenants and Restrictions or Declarations of Condominium or any of the parameters include therein.

City Attorney Hayes replied that he did not think they could because it would be a condition of the development order, and would in fact be a violation of the development order, which had perpetual existence. He thought it would also be in violation of the recorded covenants and restrictions. He said that in reality, he did not think it could occur.

Mr. Merrell voiced his opinion that it would arguably require the City to agree to lift the deed covenant.

City Attorney Hayes reiterated his belief that there were enough layers to provide a sufficient safety net.

Mr. Jorczak thanked Mr. Ervin for his efforts to answer the questions regarding the airport issue on short notice. He thought that the applicants might find it beneficial when marketing the properties to promote the airport as an easy way to access their second homes. He remarked that municipal airports everywhere were under assault and felt it was very important that potential purchasers be notified that there was an airport nearby. He mentioned that the airport was a vital tool in shifting the City's tax base away from solely residential properties toward some industrial uses, what the City was hoping to achieve with the proposed Ormond Crossings development and which he felt was important. He said that there would always be noise associated with the airports and said that he anticipated an increase in use of the airport by the new very light jets, since they were more economical for businesses to purchase for both private use and for air taxi services .

Mr. Lewis Slaughter, 53 North St. Andrews Drive, thought that there would need to be a traffic light at the intersection of Tomoka Oaks Boulevard with Nova Road.

Mr. Mark Tolle, 54 Oakmont Circle, asked if there had been an environmental impact study conducted for the property. He reported that the property was currently home to a large breeding population of raptors, including great bard owls, screech owls, scissor-tail kites, swallow-tail kites (a species of special concern for the state of Florida) four species of pileated woodpeckers, and was a migratory stop for painted grosbeaks, American gold finches, etc.

Mr. Ervin said that because the site had already been impacted by development and was surrounded by existing homes, the property did not meet the City's criteria for requiring an environmental assessment report. He said that staff was aware that the area was home to migratory birds and that they had checked with Florida Fish & Wildlife to see whether or not nesting bald eagles or other endangered species had been identified there. He said that unless they had such documentation, a study could not be required; he said staff would seek verification as to whether or not the property was home to the variety of different species identified and whether or not there was a need for additional protections prior to scheduling the item for presentation to the City Commission.

Mr. Tolle referred to Dr. Grissom's comment regarding the ongoing maintenance of the property and said he did not believe that the golf course property was currently being maintained by a professional golf course management company. He opined that the course was in deplorable condition, far beyond simply lack of irrigation; he questioned the ability of RTH to maintain the golf course in an acceptable manner and cited the maintenance equipment and level of maintenance, saying that the course was not very playable and the reason why it was an inexpensive to play there.

Mr. Todd Hendricks, CPH Engineers, 520 Palm Coast Parkway, Palm Coast, said that the firm was the civil engineer for the project. He advised that Mr. Joe Young of Biological Consulting Services had performed an environmental assessment on the project and found no concerns that would prohibit the project from moving forward.

Longtime resident Ms. Susan Reynolds, 17 Oakmont Circle, agreed that the condition of the course was deplorable and likened it to living on a horse pasture in Ocala. She pointed out that any CADD technician could make the renderings of the proposed project look beautiful and noted that the project would require the developers to remove the bulk of the trees. She stated that the existing trees were not maintained and thought that from a safety standpoint they should be required to remove those that had died. She thought that provisions for maintenance of the trees should also be written into the development order. She disagreed that the condition of the course was due to hurricanes, September 11th, or the Nova Road construction.

Ms. Reynolds thought that the proposal was better than allowing 300 homes to be built, but thought that the existing vegetation would also be allowed to die, because the buildings would be constructed over the root systems, which were already stressed.

Mr. Paul Momberger, 100 North St. Andrews Drive, stated that he lived on the 3rd Hole and that he felt the plan included buffers that would negate any impact on the adjacent residents. He noted that part of the reason that the grass did not grow was because there were so many trees. He stated that the infusion of new money for development would bring new life to the golf course and hopefully, help with the maintenance issues. He agreed that it needed to be improved and felt that the proposal was part of the solution. He added that the redevelopment of the clubhouse would also provide social benefits for the community. Mr. Momberger said that he supported the project.

Mr. Adelaide Mathew, 54 South St. Andrews, another longtime resident agreed and said that the 2004 hurricanes had left dead trees that had yet to be taken down. He questioned the proposed underground parking.

Mr. Ervin explained that not all of the parking spaces would be underground. He said that portions of the required condominium parking would be underground and townhome parking would be in garages and on the driveways (above grade).

Mr. Frank Bullard, 115 Rio Pinar Drive, questioned the effect of the new development on the water pressure in the area, which he said often fluctuated by about 30 pounds, depending upon the time of day. He asked if the current residents would be able to utilize the upgraded utilities that would be a part of the new development.

Mr. Ervin said that the development would utilize the existing water mains serving Tomoka Oaks and would have a loop system to maintain the water pressure. He said he had not been aware of a water pressure problem in the area, but assured Mr. Bullard that his comments would be forwarded to the Utilities staff and addressed prior to any City Commission meeting. He mentioned that the City's Fire Department periodically reviewed the water pressure to ensure that there was adequate fire flow pressure throughout the city.

Chairwoman Press again mentioned that the hearing at the advisory board level was a way for the public to ask questions and raise concerns; she encouraged the residents to attend the City Commission meeting, at which time the final decision would be made.

Ms. Sharon Kist, 68 Oakmont Circle, confirmed that there was a water problem in Tomoka Oaks and asked if the new amenities would be available for use by the current residents or whether they would be restricted to use by the owners of the condominiums.

Chairwoman Press said it was her understanding that there would be six tennis courts and assumed that they could be used by the residents.

Ms. Kist asked City staff to check on the water pressure in that area. She remembered that she had once been told that it was a problem at her house, rather the pressure.

Chairwoman Press said she thought that there was a problem with the water pressure throughout the city.

Ms. Christine Goudreau, 115 North St. Andrews Drive, asked about the hours of operation of the courts; she also questioned the light and sound that would emanate from the facility area.

Mr. Ervin said that the hours of operation had been identified by staff, as had the height of the lighting. He said that there were some conflicting requirements, because the police wanted the lighting to be higher and brighter, while staff wanted to keep the lighting lower and less bright. He said that the goal was to prevent spillover lighting onto the properties of the existing residents by utilizing lower lighting, trees and limited hours of operation to prevent the lighting impact.

In response to Mr. McCoy's request, Mr. Ervin advised that whether or not the amenities would be open for use by the residents was a decision to be made by the applicants.

Mr. Jorczak asked if there was a national standard for golf course maintenance and if so, whether it could be applied to the Tomoka Oaks course.

Mr. Ervin said he did not know, but would check into it.

Mr. David Ponitz, 90 North St. Andrews Drive, stated that both Mr. Ervin and Mr. Merrell had done a good job representing the development. He said he was pleased that none of the townhomes or condominium units were directly behind any abutting properties and asked if the development order could include a statement that specified the acreage to remain open space. He thought that perhaps that acreage could be zoned to ensure that it would remain open space.

Mr. Merrell explained that the planned development zoning did differentiate between the residential and recreational components, i.e., it was essentially a custom zoning for the property for which the development order dictated what could or could not be done as a result of the rezoning process. Every individual use (golf course, tennis courts, etc.) would be identified on the plans, which would become a part of that development order.

Mr. Ponitz said that in exchange for special development orders such as that being sought by the applicant, the City had an opportunity to ask for things above beyond what was generally required by the Land Development Code regulations. He asked if the City could ask the applicants to increase the size of the replacement trees.

Chairwoman Press asked the planning director to address the tree mitigation.

Mr. Ervin explained that Mr. Ponitz referred to the City's specific prohibitions regarding tree removal. He said that trees that were removed had to be mitigated; i.e., they had to be replaced. He said that the number of replacement trees was based on the size (diameter) of the tree being removed, not necessarily on a 1:1 basis. He said that protected trees were those 6"-12" in diameter as measured at four feet (4') above grade; replacement trees had to be a minimum 2.5". Specimen trees were those between 12" and 36" in diameter; replacement trees had to be larger, with a fuller canopy. He added that removal of trees over 36" in diameter required City Commission approval. He said because of the size of the project and the existing trees on site and given the proposed landscaping plans, Staff felt it was appropriate to require them to adhere to the City's regular standards as they would for any development.

Mr. Ervin concurred with Mr. Ponitz that the PRD was a discretionary zoning for which the Planning Board and City Commission had the right to ask for mitigation above and beyond what was required by Code. He mentioned that the City's minimum requirements were also specific in regard to native and xeric landscaping, i.e., plantings that could survive in periods of drought. He said that the applicants utilized many different species, such as oaks, pines and magnolias, as well as decorative elements such as crape myrtles, etc., to accentuate the perimeter of the property. He said that some plants would be used in close proximity to the buildings to enhance the architecture being used. He further detailed the proposed landscaping and advised the board that it was within their purview to require an increase in the size of replacement trees if they felt it was justified.

Mr. Lewis Slaughter, 53 North St. Andrews, stated that he was in favor of the project and thought it would be a major asset to the city. He was pleased with the two new lakes that had been dug and said that the reuse water would help the look of the course tremendously. He asked if there could be a light installed at the intersection of Tymber Creek Road and Nova Road.

Mr. Sans Lassiter, Lassiter Transportation Group, said that whether or not a traffic signal would be warranted was the first thing that they had considered, but that they had not been able to show that intersection as warranting a traffic signal. He explained that Nova Road was a State Road and that the DOT (Department of Transportation) had very strict standards for when they would or would not allow a traffic signal; he said that the intersection did not come close to the threshold, mainly because the primary trips to and from the project area were from the south on Nova Road.

Mr. Slaughter stressed his support for the project and said that by their ability to attract more members, they would be in a better position financially to maintain the golf course. He asked if there would be an opportunity, in conjunction with the redevelopment of the golf course, for the adjacent homeowners to connect to the City's reuse system to reduce the need for private groundwater wells in the area.

Mr. Ervin commented to Mr. Ponitz that Mr. Hendrix wanted to discuss the request for upsizing the landscape mitigation.

Mr. Ervin also responded to Mr. Slaughter that the provision of reuse water to the residents adjacent to the golf course would be an expensive City of Ormond Beach public improvement project that would require the expenditure of capital improvement dollars. He said the City Commission had identified the South Peninsula area as the No. 1 priority and said there were other improvements that had been identified for completion in the next 5 -10 years. He said that the extension of the reuse water had not been identified as a capital improvement that could be funded in the next 5-10 years. He said that the City could consider it for future funding and that there might be an opportunity to utilize grants from the Water Management District, but reiterated that it was not currently identified as a priority.

Ms. Zella Wilen, 48 Oakmont Circle, said she was also a long-time resident. She objected to the rezoning request, as well as the request to construct streets across privately-owned business property. She did not want Tomoka Oaks Boulevard to be approved for extension or connection to any planned street. She also objected to the increased traffic that would be created by the new development.

Ms. Wilen referred the Board to the City archives (September and November, 1970); she said that there had been a rezoning issue raised and the homeowners had retained an attorney to argue against the zoning change to R-5. She said that the homeowners had prevailed. She thought that if the proposal proceeded [to the City Commission], the Tomoka Oaks HOA Board of Directors should alert and notify every one of the homeowners in Tomoka Oaks of the rezoning request, not just those within the 300' radius of the project. She said she equated the request for the PRD to the prior request to rezone the property to R-5.

Chairwoman Press pointed out that the meeting would be advertised in the newspaper.

Mr. McCoy noted that the advertisement was countywide.

Dr. Gerald Gibb, 69 North St. Andrews Drive, stated that the traffic report was based on data, [not experience]. He said that the reason that most of the traffic turned southbound on Nova Road because it was too dangerous to turn northbound. He also stated that the construction would occur over a period of time and that construction workers would come and go at the same time as the residents, exacerbating the traffic in the area. He questioned if there was to be a traffic management plan during the construction of the project.

Mr. Lassiter agreed that for the "Existing Condition", the consultants could only count the traffic that did turn, not the traffic that might want to turn but did not. He felt it important that they understand that their

Future Conditions analysis used the Urban Area Model, which distributed traffic without regard to congestion. He explained that the model looked at the major distribution points north and south on Nova Road up to US1 and in other parts of the city to determine the more likely direction traffic would go if there were no congestion. He felt that their analysis was absolutely correct.

Mr. Lassiter also liked the idea of a construction traffic management plan and said that they would recommend identifying routes for the resulting traffic. He reminded the Board that that the 770-trip per day increase was for the buildout of the development, not the construction traffic.

Ms. Leslie Nixon, 36 North St. Andrews Drive, expressed concern with additional traffic trying to negotiate the Tomoka Oaks Boulevard circle near the entrance to the subdivision.

Mr. Lassiter explained that the 770 trips was the number of estimated trips on a daily basis; he said there were 74 in the peak hour. He further explained that typically, the impact study deducted the existing traffic from the traffic proposed for the new development, but instead, the subject analysis assumed the existing traffic would remain. He said that meant that their analysis was overly conservative (predicted too much traffic), but that they wanted to be as conservative as possible. He stated that their analysis also assumed 100% occupancy year-round, which they also knew to be unlikely, but which would also produce conservative numbers.

Ms. Nixon asked for the percent of increase in trips. She wanted to make sure that Staff recognized that the ongoing development along the North US1 corridor would mean additional traffic for Nova Road, making left turns out of the subdivision even more difficult.

Ms. Nixon also asked if the Board could recommend fewer homes, rather than 120 proposed. She thought that the applicants could improve the clubhouse, the golf course and the tennis courts, but scale down the residential portion of the project.

Mr. Ray Sanchez, 12 Pine Valley Circle, stated that the traffic circle was dangerous and confusing, particularly since it was two-way traffic. He questioned the sales prices of the residential units.

Mr. Lassiter responded that because a traffic signal at the intersection with Nova Road was not warranted, the stop sign control was deemed to be adequate. He said that the same was true for traffic internal to the site, which would be less than at Nova Road. He answered that the consultants had not provided a percent of increase resulting from the project, but pointed out that they did not take a deduction either; they simply added the anticipated traffic to it (an over-estimate).

Mr. Jorczak asked if they had given any thought to how the circle could be improved.

Mr. Lassiter said that the circle was analyzed in the current condition. He said they could certainly do so by studying if it would be warranted by the level of delay, would reduce the level of delay, or would make the circle safer.

Mr. Jorczak said that the safety element seemed to warrant that study, regardless of the additional traffic that would be generated from the proposed 122 units. He remarked that the junction might require a different kind of layout.

Mr. Lassiter said that as a traffic engineer, his primary focus was safety. He stated that round-abouts and traffic circles, although becoming more popular, were particularly pedestrian-hostile. He pointed out that

cars did not have to stop, gaps in traffic did not occur, and visibility was lessened because of the lack of time to look left and right. He said that because traffic came from the left, people did not always look to the right for pedestrians. He reiterated that pedestrian safety was one of his major concerns.

Mr. Thomas, a resident of Tomoka Oaks, thought that striping or arrows on the pavement might help drivers negotiate the circle. He thought that there were some simple things that could be done to improve the situation.

Mr. Lassiter said that it was something at which they could look.

Chairwoman Press thought that Mr. Lassiter could work on those things before the item reached the City Commission, since it was a concern to many of the residents.

Dr. Grissom questioned the nature and location of common areas for the new owners.

Mr. Merrell said that would be detailed in the plat, another process they were going through. He said that he did not have exhibits available for the item before the board, but that the common areas would be fully identified in the plat documents.

Dr. Grissom asked if the applicant wanted to respond to the residents' comments regarding the "deplorable condition" of the golf course.

Mr. Merrell said that they intended to address that conditions at the golf course were less than perfect. He said that they also wanted to point out that the golf course was being redeveloped to retrofit reuse water lines throughout the entire irrigation system at a cost of hundreds of thousands of dollars. He said that reshaping the course would also be a huge improvement. He said that together with the residences, the golf club and the tennis facility, it would be a much better place. He thought that the residents would be happy with it.

Mr. Merrell agreed that a CADD drawing could make anything look good, but pointed out that the pictures would be the zoning map for the property. He said that if they wanted to change anything, they would have to reappear before the Board for another advertised public hearing. He said that the reason Staff liked the Planned Residential Development was that they had the ability to negotiate the zoning and had done so to the benefit of the City and pointed out that those things were binding.

Dr. Grissom asked Mr. Merrell if he and the applicant had previously discussed the possibility of increasing the size of the replacement trees used for mitigation.

Mr. Merrell said that their landscape architect, Galen Pugh, had been in dozens of meetings with the City staff and that many changes had been made to the plan to avoid impacting important trees. He said it was a given that the trees would be thinned and that the dead trees would be removed; he said the plan also exceeded the City's Code requirements for landscaping, typical of planned development rezoning negotiations. He reiterated that there had been a great deal of focus by City staff with regard to the trees.

Dr. Grissom stated that she was sensitive to the tree mitigation concerns and recalled her shock when she discovered that the beautiful, healthy trees in Breakaway Trails had been removed and replaced with what amounted to twigs. She thought that they should exceed the current excession, if possible.

Mr. Merrell thought that the issue was avoiding the removal of the trees, rather than with what to replace the existing trees. He noted that a tree survey had enabled them to identify all the important trees and that saving certain trees had required them to redraw the plans several times.

Dr. Grissom said she recognized that the applicants had presented a project that was beautiful. She questioned whether the Board could mandate that the development be sustained in the best possible condition at all times, i.e., in perpetuity.

Mr. Thomas recalled that Hurricanes Charley and Frances had caused the removal of a lot of old, dying and diseased trees, but not before tremendous damage had been done to the homes of the residents. He advised that his daughter, a resident of Ormond Lakes, had been required to save some magnificent oaks on her property, but less than a year later one of those same oaks was costing her $2,000 to remove because it had been diseased and had fallen on her fence. He stated that although he felt mitigation was a good thing in the long run and that he was not in favor of taking out a lot of trees, there were a lot of rotten, dead, sick and diseased trees throughout the city that should be removed.

City Attorney Hayes advised the Chair that he included a provision in all of the development orders that conferred to code enforcement the power to enforce the terms of the development order, as with any other ordinance. He said that the City therefore had the power to keep all projects from falling into disrepair.

Chairperson Press pointed out that it was 9:00 pm and asked that subsequent speakers limit their comments to things that had not already been expressed to the board.

Ms. Linda Larsen Lewis, 231 Rio Pinar, expressed her concern that her property line would be 100 feet from one of the three estate lots behind her property. She said that the trees were the only thing that would visibly buffer her home from her new neighbor and asked for assurance that the trees would remain.

Mr. Ervin reported that he had met with Ms. Lewis the day before and stated that her concerns were the City's concerns. He pointed out the location of the three estate lots and said that those lots would have the minimum lot size, width and setbacks that applied to the existing subdivision. He also pointed out Mrs. Lewis' lot and said that although the distance from the lot line to the proposed lot line was 100', the distance between homes would be 160'. He said that the trees in that area would be preserved by the developer, but cautioned that once sold, the homeowner could take out some of the trees if they met the mitigation requirements. He said that the City had not required a minimum buffer because of distance between the lot and the buildings and the existing landscaping along the perimeter of the Lewis lot line but advised that it was within the purview of the Board to do so if they felt the trees should be protected.

Mr. Jorczak questioned the size of the existing trees.

Mr. Ervin replied that the trees ranged from small saplings to a 40" oak; he noted that there were several historic trees, the majority of which were specimen trees. He said that the tree survey showed only the trees over 6" in diameter (protected trees).

Mr. Jorczak asked if taking those trees would require a separate action from the City.

Mr. Ervin explained that once the three residential lots were sold, the homeowners could request the removal of any tree on their property, the same as any homeowner in the city of Ormond Beach. He said

the number of trees that would have to be replaced would depend on the size of the tree to be removed. He said there was currently nothing in the City's Code or in the project documents that would require minimum tree line buffering on the residential lots.

Mr. Jorczak remarked that he understood, but thought it unlikely that someone buying an estate lot and erecting a big house would then want to take down the trees.

Mr. Ervin replied that it had happened in the past. He recalled Ms. Lewis' question as to whether or not a buffer was to be conserved that could not be touched and stated that the reality was that when the property was transferred, the owners could conceivably remove the trees.

Mr. Jorczak advised Ms. Lewis that taking down a specimen tree in Ormond Beach was a big deal.

Mr. Thomas agreed.

Mr. Ervin pointed out that historic trees were different than specimen trees. He stated that the developer was being required to do a directional dig for the extension to the sanitary sewer so that it a 40" historic oak would not be impacted. He said that there were also 25 – 28" oaks that had been identified for preservation, but wanted it on the public record that they were located within the property to be subdivided; therefore, if the subsequent owners met the mitigation requirements, removal of the trees would be justified.

Dr. Grissom asked how the deed restriction would work.

Mr. Ervin said that if the Board wanted to require a minimum buffer, they could identify, e.g., a 10' perimeter buffer with a tree every so many feet as part of the development order.

Ms. Lewis stated that people did take trees down so that they could have view of the golf course. She acknowledged that tracking 1,100 trees was an overwhelming job, but stated that she had noted a healthy pine and two smaller pines on the property that were not shown on the survey.

Ms. Reynolds asked what protections were in place to prevent the project from going bankrupt either because of mismanagement or because of market conditions. She said that she had seen it happen in far better situations and did not want a situation in which new owners would be allowed to do whatever they wanted just because they were finishing a stalled project. She expressed concern because of the scope of the project and because the owners had not demonstrated the ability to maintain the golf course.

City Attorney Hayes advised the Chair that development orders ran with the land; therefore, the owner of the land (or a subsequent owner) was subject to the requirements of the development order. He said there was no way to know whether or not any particular project would be built out or flounder. He said that the best the City could do was to create a safety net in the development order and ensure that the development occurred in accordance with the requirements of the approval.

City Attorney Hayes confirmed for Ms. Reynolds that the proposal was for a phased project and that the developer would have to complete one phase before starting another.

Long-time resident Ms. Susan Juckett, 311 Rio Pinar Trail, said that her view, which had gone from "lovely" to a lot of dead trees, and would now be of a comfort station (golf course bathroom).

City Attorney Hayes assured Ms. Juckett that any new owners in the future would also be required to preserve the golf course.

Ms. Juckett questioned the time line for all phases to the anticipated completion of the project. She stated that she was concerned with construction noise, dust, etc.

Mr. Ervin said that the construction timeframe identified in the PRD development order would be valid for five (5) years. He said that if Phase I had not been completed in that timeframe, the order would lapse. He said that the conditions would remain in place, but any redevelopment would require that it be brought back for another hearing and, with the existing conditions as minimum standards, any kind of upgrades would have to be to current Code.

Ms. Juckett asked if it would be to Phase I completion or completion of the project.

Mr. Ervin responded that it would be to completion of the project.

Ms. Juckett asked if the tree mitigation would be on-site. She also questioned the impact of new residents on Tomoka Elementary School, shopping facilities, the hospital, as well as the effect they could be expected to have on the water pressure in the area, already low.

Chairperson Press pointed out that the City staff was not aware of the problem and would address it.

Ms. Juckett stated that the problem would get worse before it got better. She found it hard to believe that the developer did not know the price for which they expected to market the units.

Mr. John Randall, 70 Oakmont Circle, recalled that he and his father had cleared their lot by hand and that subsequent generations would be occupying the residence. He questioned what mechanism would ensure that the integrity of the project would be maintained and that the homeowners' association would be able to collect their dues in order to pay the cost of maintaining the things for which they would be responsible. He asked who would be responsible for the property covered by the conservation easements and questioned what would happen if the golf course went belly-up. He also expressed concern with the wildlife habitat that would be lost.

Mr. Randall commended the developer on a great idea, but sought assurance that the dream continued to be a reality in 20 years.

Dr. Grissom said she liked the idea of a deed restriction to protect the property.

Mr. Ervin responded to Mr. Randall's question that the City would have the ability, as with any easement, to access the property for maintenance and then charge the homeowners' association; he likened it to a sort of lien on the property. He said the City had the guarantee that someone would maintain the property and that the HOA would ultimately be financially responsible per code enforcement provisions in the easement documents.

Mr. Ervin said that the conservation/open space easements over the golf course meant that the owner continued to own the golf course property, but restricted the use of the property to a golf course and open space purpose. He said it would be an easement to the City; therefore, the easement could not be released without the approval of the City. He said that the easement would be described around the golf course itself, and that based on the testimony, RTH Corporation would maintain ownership of the golf

course; he said that the areas around the townhomes and condominiums would be identified as common areas for those particular projects. He said that the common areas being used by the condominiums would be owned, maintained and operated by that association, whereas the golf course would be owned, maintained and operated by the RTH, Inc. He said that the City would require that the conservation easement on the golf course be recorded prior to any development. He pointed out that the easement was being created in association with the subdivision plat.

Mr. Jorczak asked if the City had ever required surety bonds to ensure completion of a project.

Mr. Ervin explained that they allowed surety bonds only for subdivision improvements, not for commercial developments. He agreed with the resident who had stated that developers sometimes failed to complete projects and said that in a market-driven economy the market sometimes had to rebound before someone else finished a development. He said that was the reason that the city attorney required recording of a very specific development plan that provided very specific guidelines as to what could be developed on a certain property; a subsequent developer would know exactly what could and could not be done. He explained that traditional zoning allowed for a great deal of options, whereas the PRD was a very specific recorded document of covenant and restrictions that traveled with the land, not the owner. He said it gave the residents of Tomoka Oaks much better protection for future conditions.

City Attorney Hayes said that from a legal standpoint, surety bonds sounded good, but were not practical. He pointed out that the City would not want to have to finish a project in default; it would create a nightmare scenario for the City.

City Attorney Hayes recommended that the Board members voice their comments on the proposal in an effort to solicit a motion. He offered to assist them with any conditions that they might wish to impose with their recommendation.

Mr. Ervin stated that he had summarized for clarification the ten (10) issues that had been brought up by the board members:

1) The City's engineering staff reported no environmental impacts.
   - Determine whether or not an environmental impact or assessment report has been done.
   - Forward a copy to the resident who requested it and include a copy in the City Commission's agenda packet.

2) Traffic conditions:
   - Analyze improvements at the circle that would make it safer (striping, signage, etc.).
   - Ask the applicant to look at other improvements that might be made.
   - Provide signal warrant study background information, i.e., why a signal is not warranted at the intersection of Tomoka Oaks Boulevard and Nova Road

3) Request to upsize the minimum size of the trees for mitigation. *(Mr. Ponitz)*

4) Question the possibility of providing reuse water for lots adjoining the golf course (noted that it was not identified in the City's Capital Improvements Program) - *Mr. Ponitz*

5) Address water pressure issues in Tomoka Oaks and include in the information forwarded to the City Commission.

6) Identify if minimum golf course maintenance standards are available from either a local or national organization. *(Mr. Jorczak)*

7) Clarify the role of the City in establishing the Covenants and Restrictions and the Development Order to ensure that the golf course is protected in perpetuity.

8) Possibility of notice to future purchasers of property in the subdivision of potential for airport impacts. *(Mr. Jorczak)*

9) Address concern regarding the buffering of the estate lots. *(Ms. Lewis)*

10) Documentation to ensure that each phase of the project is completed prior to beginning the next phase; ensure that the complete project will be built out in five years.

Chairwoman Press opened the floor to board comments.

Mr. McCoy pointed out that Mr. Momberger, one of the speakers, was a registered landscape architect and that he had not seemed particularly concerned with the issue of tree mitigation. He also pointed out that Mr. Ponitz, one of the other speakers, was the Utilities Engineer for the City of Daytona Beach. He said that the gentlemen were good at their jobs; therefore, he felt reasonably assured that the landscaping mitigation was well within or surpassed the City codes. He suggested that the many of trees about which the residents were concerned were probably in poor condition and had most likely reached the end of their useful life.

Mr. Thomas said he was also a long-time resident who favored the project. He said that he had sat on the Planning Board for many years and could recognize when the alternative was worse than the plan. He said he did not want 300-400 homes added, when the proposal was for only 122 homes of what he believed would be part-time residents. He felt it was a beautiful plan and that the project would be a great asset to Ormond Beach.

Mr. Thomas referred to the concern expressed by a resident that the survey had missed a large sand pine, and explained that the State did not recognize sand pines as significant trees; therefore, it had not been marked. With regard to the concerns about the project not being completed, he stated that the three best real estate values were: a view, water and a golf course; he thought there would be buyers simply because the property was on a golf course. He restated that the City was tough on the issue of tree removal and reiterated his support for the project with the conditions discussed.

Mr. Jorczak echoed Mr. Thomas' comments and said that he thought it was an upscale project with a lower density than what would otherwise be allowed. He thought it would upgrade the neighborhood and would generate dollars that would help improve the golf course and surrounding amenities. He said that he hoped that the City would consider the concerns raised at meeting and said that he would recommend approval.

Dr. Grissom said she also supported the project and any motion to approve would include any amendments necessary to address the concerns raised. She thought that deed restrictions should be

required for the three estate lots to require that they maintain the tree buffer in order to protect the privacy of abutting property owners.

Chairwoman Press opined that no one would buy the properties unless the golf course was upgraded and felt that the proposal would force those improvements to occur. She said for that reason she believed the project would be good for the area and was an example of Smart Growth.

Mr. Thomas recommended approval of PRD 06-32, with the recommendations by staff. He added that his motion was amendment friendly and clarified that he was including the ten items as listed by the planning director.

Mr. McCoy seconded the motion.

City Attorney Hayes responded to questions by Mr. Jorczak and Mr. McCoy that the [tree] buffer mandated by deed restriction would apply only to the three estate lots. He said that the board could make that a condition of their recommendation.

Mr. Ervin replied to Mr. Thomas that the list of ten items included addressing the traffic circle. He also pointed out that the applicants had already agreed to provide for a minimum 10-foot wide buffer at the rear of the lots, in which there would be a minimum planting of one tree every 30 linear feet with continuous hedge material between the trees. He explained that the buffer for those homes would be required as a part of the development order, either as a private restriction on the individual lots or by mandating that the buffer be placed on the golf course outside those lots. He said that the applicants could make that decision.

Mr. Merrell said that he understood the resident's concern, but said that having buffers between two houses was not typical and that houses backed up to each other in subdivisions all over the city. He said that the applicants were willing to do what Mr. Ervin was proposing, but that it was routinely done as a matter of zoning. He thought that having a provision in the development order was the better way to handle the issue, i.e., the developer would establish the buffer and it would then transfer with the land; subsequent property owners would be responsible for maintaining it. He said that the provision could be enforced through the code enforcement mechanism.

City Attorney Hayes agreed that it would be better to put the onus on the developer as opposed to the property owner.

Mr. Merrell said that the suggested method would require only a code enforcement action rather than a court hearing, should there be a problem with the buffer in the future.

Mr. Thomas agreed to add acceptance of the applicants' voluntary inclusion of the buffer to his motion.

Mr. McCoy reiterated his second.

Ms. Bates called the question, which was approved by unanimous vote.

Mr. Thomas thanked everyone for attending the meeting, participating in the democratic process and helping the board to make their decision.

Mr. Ervin announced that the proposal was tentatively scheduled for the October 3rd City Commission meeting. He advised the residents that they would again be noticed and that an advertisement would again run in the newspaper.

The board voted to close the public hearing.

VIII. MEMBER COMMENTS

There were no member comments.

IX. ADJOURNMENT

There being no further business, the meeting adjourned at 9:45 p.m.

Respectfully submitted,

Clay Ervin, AICP, Planning Director

ATTEST:

Mrs. Rita Press, Chairperson

Minutes transcribed by Betty Ruger.

M I N U T E S

ORMOND BEACH PLANNING BOARD

Regular Meeting

August 10, 2006 7:00 PM

City Commission Chambers
22 South Beach Street
Ormond Beach, FL 32174

PURSUANT TO SECTION 286.0105, FLORIDA STATUTES, IF ANY PERSON DECIDES TO APPEAL ANY DECISION MADE BY THE PLANNING BOARD WITH RESPECT TO ANY MATTER CONSIDERED AT THIS PUBLIC MEETING, THAT PERSON WILL NEED A RECORD OF THE PROCEEDINGS AND FOR SUCH PURPOSE, SAID PERSON MAY NEED TO ENSURE THAT A VERBATIM RECORD OF THE PROCEEDING IS MADE, INCLUDING THE TESTIMONY AND EVIDENCE UPON WHICH THE APPEAL IS TO BE BASED.

PERSONS WITH A DISABILITY, SUCH AS A VISION, HEARING OR SPEECH IMPAIRMENT, OR PERSONS NEEDING OTHER TYPES OF ASSISTANCE, AND WHO WISH TO ATTEND CITY COMMISSION MEETINGS OR ANY OTHER BOARD OR COMMITTEE MEETING MAY CONTACT THE CITY CLERK IN WRITING, OR MAY CALL 677-0311 FOR INFORMATION REGARDING AVAILABLE AIDS AND SERVICES.

I. ROLL CALL

Members Present

Dr. Beverly Grissom
Al Jorczak
Lynn McCoy
Doug Thomas
Rita Press

Staff Present

Brenda Bates, Recording Technician
Betty Ruger, Minutes Technician
Clay Ervin, AICP, Planning Director
Randy Hayes, City Attorney

Members Excused

Brian Daly

II. INVOCATION

Mrs. Press led the invocation.

III. PLEDGE OF ALLEGIANCE

IV. NOTICE REGARDING ADJOURNMENT

NEW ITEMS WILL NOT BE HEARD BY THE PLANNING BOARD AFTER 10:00 PM UNLESS AUTHORIZED BY A MAJORITY VOTE OF THE BOARD MEMBERS PRESENT. ITEMS WHICH HAVE NOT BEEN HEARD BEFORE 10:00 PM MAY BE CONTINUED TO THE FOLLOWING THURSDAY OR TO THE NEXT REGULAR MEETING, AS DETERMINED BY AFFIRMATIVE VOTE OF THE MAJORITY OF THE BOARD MEMBERS PRESENT (PER PLANNING BOARD RULES OF PROCEDURE, SECTION 2.7). A

V. APPROVAL OF MINUTES

The minutes of the June 8, 2006 meeting of the Planning Board were approved as presented.

VI. PLANNING DIRECTOR'S REPORT

Mr. Ervin stated that:

- The list of upcoming meetings provided to the Board included the information regarding the August 17th workshop in DeLand that dealt with the Volusia County's 10-Year Work Program. He said that traffic congestion was a critical issue and one that the board members would have to deal with in their review of development and redevelopment projects. He said the County's Work Program was one element of many that would hopefully be used to improve the local roadway systems. He noted that that meeting was a time-certain item (2:00 pm) on the County Council's agenda.
- Department of Transportation Secretary Denver Stutler would speak at the VCARD (Volusia County Association for Responsible Development) luncheon; he would discuss statewide traffic issues, present and future.

VII. PUBLIC HEARINGS

Chairwoman Press explained to the public that the Planning Board was advisory, and that their decisions, unlike those of the City Commission were not binding. She said that the purpose of board hearing was to hear from the applicant, the City staff and the residents and that the official record of that meeting would then be presented to the City Commission, who would vote on the proposal in two public hearings.

Chairwoman Press explained the meeting process to the public and asked that any speakers identify themselves and limit their comments to five minutes.

A. PRD 06-32: Tomoka Golf Village Planned Residential Development Rezoning

Mr. Ervin said that the application was to rezone 147 acres (the existing Tomoka Oaks Golf Course), which was surrounded by the existing Tomoka Oaks subdivision. He advised that the Land Use designation was Low-density Residential, which allowed a density of up to 4.3 units per acre (4.3 u/ac) and had a current zoning of R-2 (Single-family Low Density), which required lots with a minimum of 10,000 square feet and minimum dimensions of 100' x 100'. He said that the zoning was consistent with the existing homes in Tomoka Oaks and in neighboring developments such as The Trails.

Mr. Ervin recalled that in 2005, the property owners (RTH, Inc., represented by Dr. and Scott Ryals) met with staff and identified their desire to redevelop the golf course so that they could 1) maintain the golf course and 2) generate additional revenue. He said that staff had been surprised to note that the land use and zoning were something other than Open Space/Recreation, typical for such properties, and that the owners had the right to develop the property.

Mr. Ervin acknowledged some confusion expressed by residents of the area and explained that based on the land area, the owners could theoretically develop up to 632 single-family homes; however, because of the size and shape of the property, and the incorporation of roads, stormwater and open area, the number of homes that could be accommodated would realistically be reduced to about 300.

Mr. Ervin said that the applicants had been advised of the concerns of adjoining property owners, noting that the subdivision was one of Ormond's nicer communities and one of the few areas in which homes backed onto a golf course. He said they had relied upon the golf course and bought their properties

believing that the golf course would always be there. He said that because the owners had development rights established by the existing land use and zoning, Staff had identified the concepts of clustering the homes and orienting the units to have the least amount of visual impact.

Mr. Ervin said that staff was also concerned with the possibility of leaving room for future development of the remaining portion of the golf course by clustering the homes; therefore, while the staff recommended approval of the proposal, staff also recommended that the development order blanket the remaining golf course property with a conservation easement so the land area could not be used for anything other than the golf course or open space purposes.

Mr. Ervin informed the board that the project had been in review with the City for about a year and that the staff focused on ensuring that the development not create negative impacts for the existing neighborhood. He said that they determined that by shifting the existing driving range towards the northwest and concentrating the condominiums around a relocated and revamped clubhouse, the new construction would not be close to the existing homes along the 18th, 9th and 10th holes. He said the project also proposed to locate 35 townhomes towards the northeast portion of the site with access by an entrance road off of Tomoka Oaks Boulevard and to locate two condominium buildings near the updated tennis center.

Mr. Ervin reported that staff had spoken with many residents of the area and noted that for the record, the Board had been provided with a copy of an e-mail from Ms. Linda Lewis, who had expressed concern with the buffering of the three estate lots proposed for the northwest area of the golf course. He said that Ms. Lewis had enjoyed an open space behind her home and was afraid that the location of the easement for a sanitary sewer line would result in the removal of the existing trees. He reported that the City's engineers and applicant had confirmed that they would consider utilizing a directional dig; therefore, there would be no open-earth excavation of the land and the existing trees could be preserved and protected. He said that the applicant would be required to follow through with that requirement.

Mr. Ervin said that the existing residents were concerned with the number of trees that could be impacted by the project; he stated that the applicant met or exceeded the City's tree mitigation standards because of the additional plantings around the buildings that would be utilized as visual buffers. He said that the plans included the tree mitigation calculations that showed number of trees to be removed and the number of trees to be replanted.

Mr. Ervin pointed out that the City required all multi-family buildings to maintain a minimum of 200' from any single-family home and said that the cart paths had been designed for emergency access; they provided an alternative access route to the properties if the spine roads were damaged or otherwise inaccessible. He said that the design also called for decorative pavement leading into the main drive, the townhomes, tennis center, and updated/relocated clubhouse.

Mr. Ervin displayed the plan layout and typical elevations and noted that staff had also required the architecture to be consistent with the existing development in Tomoka Oaks. He showed renderings of the 3-story golf villas and pointed out that there would be underground parking facilities to minimize the amount of impervious surface. He noted that sub-surface parking was possible because the site was very well-drained, with a low water table.

Mr. Ervin acknowledged that Board Member Jorczak and Mr. Larry Stout of the Airport Advisory Board had questioned whether the additional density and intensity proposed might violate the City's Airport Overlay Zone. He explained that Airport Overlay District comprised areas for which there were concerns

regarding noise impacts that would result from the airport. He recalled the overlay issues presented to the Planning Board in the past and said that they had not been able to use the 60 DNL (day and night noise level contour), shown as a star-shaped zone, because it did not meet certain statutory and federal requirements. He said the City instead utilized the "iron cross" contour (a legally defensible method of establishing the noise levels) and stated that the project was located outside both the 60 DNL line and the City's adopted "iron cross" contours.

Mr. Ervin said that per Mr. Jorczak's request, staff looked at source of the noise complaints. He said that such complaints had been documented when the City was embattled with the decision as to whether or not to expand Runway 17-35; he pointed out on the map that the complaints had been identified as closer to the airport than the project location. He said that Mr. Jorczak and Mr. Stout had also questioned if there was a way to ensure that future purchasers of property in the area were aware that they were buying near the municipal airport, i.e. a kind of due diligence warning.

Mr. Ervin said that the staff report included technical analysis to show how the project complied with the city's concurrency requirements (water, sewer, stormwater and roads), identified zoning and land use issues, and summarized why the City staff recommended approval of the project. He reiterated that a number of Tomoka Oaks residents were unhappy with the project because they felt the golf course had not been properly maintained and worried that the project would just increase the problems they faced.

Mr. Ervin explained that Staff had to look at the proposal from a technical perspective in regard to land use and zoning and said that the proposed plan was considerably less intense than what could be developed there. He reiterated that Staff had made the applicant aware of the concerns, made sure that the development was compatible with the neighborhood, had no negative impacts on the existing residents and preserved the golf course. He agreed that it would be wonderful to retain the property as open space, but reminded everyone present that they had to respect the property rights of the property owner, who already had development rights on the property, given the land use and zoning. He emphasized that the proposal de-intensified the project, concentrated the development and ensured that the impacts would be minimal.

Mr. Jorczak asked if there was a mechanism that the City could employ to notify potential purchasers of the proximity to the airport.

Mr. Ervin replied that there was nothing in the City codes to mandate such notification. He said that the Board could identify that as a concern and as a condition for their approval. He said that the applicant could decide to accept the condition; if they chose not to accept it, the City would then have to decide whether to impose the condition as a part of the rezoning request.

Mr. Thomas questioned why there were fewer noise complaints in 2006, than in 2005.

Mr. Robert Hernandez, Ormond Airport Manager, said that voluntary airport procedures and traffic patterns established prior to his tenure tried to limit the air traffic to the north and west sides of the airport as much as possible. He said most of the current complaints were being generated from the area east of the airport, where much of the training was conducted, and that there were a number of homes on that departure corridor. He explained that air traffic expanded and contracted in all directions and that although he would not say that there would be no aircraft over the proposed community, he felt the Tomoka Oaks residents were getting the benefit of the established voluntary procedures for noise control.

Chairwoman Press clarified with Mr. Ervin that the applicants had the right under the current zoning to remove the golf course and develop the entire area with houses, but that the proposed PRD (Planned Residential Development) would limit the residential development to 122 units and would require a conservation easement over the remaining portion of the golf course to prevent future development of that land. She asked if the development order, as proposed, would preclude the applicants from building any more than the 122 approved residential units on that property.

Mr. Ervin concurred.

Chairwoman Press stated for the record that she had requested an on-site review of the proposal and had toured the property with the owners. She said that she had learned that many of the roads would not be paved and asked who would be responsible for maintaining those roads.

Mr. Ervin responded that the maintenance of the roads would be the responsibility of the developer at first, but that the homeowners' association that would be created would ultimately be responsible for the maintenance of all grounds on the project.

Chairwoman Press asked if the roads met City standards.

Mr. Ervin said that the City required roads to be constructed with a 6" sub-base, 6" base and 1.25" of asphalt; he said that roads were generally designed for a 15 to 25-year life. He assured the Chairwoman that those standards applied to the subject roads. He pointed out that the emergency access/cart path type of roads might not be topped with asphalt, but would be stabilized and had to meet minimum standards established by the Code for emergency access areas. He said it was a common practice and had been utilized in other projects, such as Broadwater, Breakaway Trails, Aberdeen, etc. He noted that breakaway fences were utilized in emergency access areas.

Chairwoman Press asked if the order of the project phases could change.

Mr. Ervin responded that the development order would identify the project phases and that the applicants would have to adhere to the phases, as stated. He acknowledged that the residents of Tomoka Oaks were concerned that the applicants would build the residential units without completing the other improvements and said that was the reason for the phasing. He reported that Phase 1 would involve the relocation and construction of a new tennis facility, Phase 1B would include demolition of the existing parking lot and clubhouse, Phase 1C would be the completion of the townhomes, golf and tennis areas, and the clubhouse would be completed in Phase 2B. He noted that the amenities would correlate with the new homes being developed. He also acknowledged that the applicants were being required to upgrade the appearance of the golf course.

Mr. Thomas disclosed that he also toured the facilities and met with the applicant.

Mr. Robert A. Merrell, 150 Magnolia Avenue, Daytona Beach, representing the applicant, stated that he was also a resident of Ormond Beach. He thanked City staff for their very thorough report, particularly with regard to comprehensive plan consistency and code compliance. He stated that the project had evolved into a better product during the year-long process of working with City staff.

Mr. Merrell said that the project was the "poster child" for Smart Growth principles. He explained that the concept of smart growth was predicated upon the belief that the population would continue to grow and that people would continue to move into the area. He said that smart growth addressed the issues of

where people would live and work, the redevelopment of urban areas, clustering development in areas where services were already available (fire stations, police stations, utilities) and clustering to preserve open space and recreation areas.

Mr. Merrell presented slides of the property, some with the proposal super-imposed over the existing development. He pointed out that the development would include demolition and rebuild of the clubhouse and pool area and the tennis center. He explained that the new three-level clubhouse facility would house partial underground golf cart storage; dining areas, kitchen and banquet facilities, a lounge area, pro shop, locker rooms, and surrounding covered porch on the middle level; offices, executive offices, and a sky lounge on the upper level. He added that there would be a tiki bar overlooking the new pool area.

Mr. Merrell pointed out the proposed condominiums and maintenance facility to be located near the tennis center and said that the redevelopment of the golf course would include bridges and new lakes that would store reuse water from the City's effluent plant. He mentioned that there would be fountains and that comfort stations would be constructed for the golfers and would include under-cover golf cart parking and vending machines.

Mr. Merrell explained that 30 two-story townhomes would be constructed at the northeast corner of the property, access to be by way of the road from the main entrance by the clubhouse. He showed the floor plans of both the townhomes, as well as the three-story condominiums with substantial balconies. He added that the three single-family estate lots would be located near Holes 11 and 16.

Mr. Merrell repeated Mr. Ervin's statement that the proposed project was consistent with the comprehensive plan and met all the criteria in the Land Development Code (LDC) for the PRD rezoning. He stated that the existing R-3 residential zoning (Staff note: actual zoning is R-2) and the future land use classification allowed development at up to 4.3 units per acre over the entire 147 acres. He agreed that it was unusual for a golf course to have a residential zoning, saying that they were typically zoned for Recreation/Open Space, with the surrounding homes zoned for residential. He speculated that the original developer wanted to have an exit strategy in case the project did not succeed.

Mr. Merrell thought that the proposal would make the community proud, given the cluster of the residential units and the dramatic improvement of the amenities. He said that the golf course had suffered in the last couple of years because of the 2004 hurricanes, September 11th and the construction of Nova Road. He said that the purpose of the proposal was to reverse that trend. He said many times there were issues that were not raised until the first public hearing; he hoped the residents would be receptive to the plans.

Mr. Thomas stated that he wanted to discuss the traffic study, since the residents of Tomoka Oaks were very concerned about the traffic.

Mr. Merrell agreed that traffic issues were a concern with any new development and restated that they would be adding 122 residential units, even though the property was entitled to far more homes. He said that a traffic analysis completed for the project had considered the anticipated increase in trips, all of the intersections that could be affected and all of the road segments that could be affected. He said that the model used was one that was accepted by the City and the County; that study had indicated that there were no level of service problems. He recognized that there were traffic issues with some projects in the city at present, but that the widening of, and intersection improvements along, Nova Road had helped the

traffic situation in the area of the subject. He reiterated that the project would not cause a level of service problem on any of the intersections or affected roads.

Mr. Thomas asked if the residences would be primarily occupied by full-time residents or whether the applicant anticipated residents for whom the units would be second homes.

Mr. Merrell stated that they felt there would be some part-time residents, but that the traffic analysis was predicated upon full-time residents. He added that even increasing trips at the peak hours did not produce traffic problems.

Mr. Thomas noted that he was trying to ask questions on behalf of the audience, since they had not had an opportunity to look at the traffic study, as had the board members. He asked what the traffic counts could be estimated to be if the property was instead developed with 300 single-family homes.

Mr. Sans Lassiter, President of Lassiter Transportation Group, 123 Live Oak Avenue, Daytona Beach, and resident of Ormond Beach, said that the study was based on a trip generation rate of 119 multi-family dwelling units and three single-family dwelling units. He explained that multi-family, as proposed, was a lower trip generator (about 6-7 trips per unit per day); therefore, the estimated number of daily trips generated by the proposed development was approximately 773. He further explained that 350 single-family residences (about 10 trips per day) could be expected to generate 3,500 daily trips. He concluded that the proposal represented a significant reduction over what could be done otherwise.

Mr. Lassiter agreed with Mr. McCoy that the trips in the study shown as vested were those trips for the development in Tomoka Oaks that had already been approved and for which the consultant had to account.

Mr. Merrell stated for the record that the applicant had agreed to install the utilities in such a way as to not damage the existing trees. He also mentioned that by approving the rezoning to Planned Residential Development, the resulting agreement (development order) would restrict the open space and golf course area in perpetuity; he said that the applicant had agreed to a deed covenant (conservation easement and reciprocal covenant among all of the owners on the property) that would assure that the property would forever remain recreation/open space.

Chairwoman Press questioned the distance from 23 Pine Valley Circle (the home from which one of the photos was taken) to the golf village townhomes.

Mr. Ervin said that the closest point between any single-family residence and a multi-story building would be 225'. He said that the distance was 300' at the location in question, since the dimension was tied to the fairway (225', plus the fairway). He reiterated that the primary focus was to keep the buildings inside the fairways and away from the existing homes.

Mr. Jorczak asked if there would be any mechanism in place that would preclude the subsequent homeowners' association from turning the development into a private operation to exclude the public.

Mr. Merrell said that the Covenants and Restrictions and the condominium association Declaration would prevent that.

Mr. Thomas asked if there was any conceivable way that it could happen.

City Attorney Hayes said that although nothing was 100% guaranteed, he felt there were enough layers of protection that future development should not be a serious concern in the future.

Mr. Merrell said the applicants would agree to include whatever language that the city attorney deemed appropriate and necessary to assure that outcome.

Mr. Thomas understood and said that his concern was because the board and the residents had all heard the word "never" in the past.

Mr. Merrell elaborated on the city attorney's comments, saying that the discourse was in the public record and that coupled with the binding documents, would provide the City with an enforcement mechanism. He said the restriction was as fool-proof as they could make it.

City Attorney Hayes said that the City would make sure that the development order was drafted to make it as difficult as possible to undo.

Dr. Grissom inquired as to who would be responsible for the maintenance of the golf facilities.

Mr. Merrell said that maintenance would continue to be the responsibility of the owners of the golf course. He noted that only the residential units would be sold.

Dr. Grissom asked if the owners, as the condominium association or homeowners association, could have the prerogative to change the Covenants and Restrictions or Declarations of Condominium or any of the parameters include therein.

City Attorney Hayes replied that he did not think they could because it would be a condition of the development order, and would in fact be a violation of the development order, which had perpetual existence. He thought it would also be in violation of the recorded covenants and restrictions. He said that in reality, he did not think it could occur.

Mr. Merrell voiced his opinion that it would arguably require the City to agree to lift the deed covenant.

City Attorney Hayes reiterated his belief that there were enough layers to provide a sufficient safety net.

Mr. Jorczak thanked Mr. Ervin for his efforts to answer the questions regarding the airport issue on short notice. He thought that the applicants might find it beneficial when marketing the properties to promote the airport as an easy way to access their second homes. He remarked that municipal airports everywhere were under assault and felt it was very important that potential purchasers be notified that there was an airport nearby. He mentioned that the airport was a vital tool in shifting the City's tax base away from solely residential properties toward some industrial uses, what the City was hoping to achieve with the proposed Ormond Crossings development and which he felt was important. He said that there would always be noise associated with the airports and said that he anticipated an increase in use of the airport by the new very light jets, since they were more economical for businesses to purchase for both private use and for air taxi services .

Mr. Lewis Slaughter, 53 North St. Andrews Drive, thought that there would need to be a traffic light at the intersection of Tomoka Oaks Boulevard with Nova Road.

Mr. Mark Tolle, 54 Oakmont Circle, asked if there had been an environmental impact study conducted for the property. He reported that the property was currently home to a large breeding population of raptors, including great bard owls, screech owls, scissor-tail kites, swallow-tail kites (a species of special concern for the state of Florida) four species of pileated woodpeckers, and was a migratory stop for painted grosbeaks, American gold finches, etc.

Mr. Ervin said that because the site had already been impacted by development and was surrounded by existing homes, the property did not meet the City's criteria for requiring an environmental assessment report. He said that staff was aware that the area was home to migratory birds and that they had checked with Florida Fish & Wildlife to see whether or not nesting bald eagles or other endangered species had been identified there. He said that unless they had such documentation, a study could not be required; he said staff would seek verification as to whether or not the property was home to the variety of different species identified and whether or not there was a need for additional protections prior to scheduling the item for presentation to the City Commission.

Mr. Tolle referred to Dr. Grissom's comment regarding the ongoing maintenance of the property and said he did not believe that the golf course property was currently being maintained by a professional golf course management company. He opined that the course was in deplorable condition, far beyond simply lack of irrigation; he questioned the ability of RTH to maintain the golf course in an acceptable manner and cited the maintenance equipment and level of maintenance, saying that the course was not very playable and the reason why it was an inexpensive to play there.

Mr. Todd Hendricks, CPH Engineers, 520 Palm Coast Parkway, Palm Coast, said that the firm was the civil engineer for the project. He advised that Mr. Joe Young of Biological Consulting Services had performed an environmental assessment on the project and found no concerns that would prohibit the project from moving forward.

Longtime resident Ms. Susan Reynolds, 17 Oakmont Circle, agreed that the condition of the course was deplorable and likened it to living on a horse pasture in Ocala. She pointed out that any CADD technician could make the renderings of the proposed project look beautiful and noted that the project would require the developers to remove the bulk of the trees. She stated that the existing trees were not maintained and thought that from a safety standpoint they should be required to remove those that had died. She thought that provisions for maintenance of the trees should also be written into the development order. She disagreed that the condition of the course was due to hurricanes, September 11th, or the Nova Road construction.

Ms. Reynolds thought that the proposal was better than allowing 300 homes to be built, but thought that the existing vegetation would also be allowed to die, because the buildings would be constructed over the root systems, which were already stressed.

Mr. Paul Momberger, 100 North St. Andrews Drive, stated that he lived on the 3rd Hole and that he felt the plan included buffers that would negate any impact on the adjacent residents. He noted that part of the reason that the grass did not grow was because there were so many trees. He stated that the infusion of new money for development would bring new life to the golf course and hopefully, help with the maintenance issues. He agreed that it needed to be improved and felt that the proposal was part of the solution. He added that the redevelopment of the clubhouse would also provide social benefits for the community. Mr. Momberger said that he supported the project.

Mr. Adelaide Mathew, 54 South St. Andrews, another longtime resident agreed and said that the 2004 hurricanes had left dead trees that had yet to be taken down. He questioned the proposed underground parking.

Mr. Ervin explained that not all of the parking spaces would be underground. He said that portions of the required condominium parking would be underground and townhome parking would be in garages and on the driveways (above grade).

Mr. Frank Bullard, 115 Rio Pinar Drive, questioned the effect of the new development on the water pressure in the area, which he said often fluctuated by about 30 pounds, depending upon the time of day. He asked if the current residents would be able to utilize the upgraded utilities that would be a part of the new development.

Mr. Ervin said that the development would utilize the existing water mains serving Tomoka Oaks and would have a loop system to maintain the water pressure. He said he had not been aware of a water pressure problem in the area, but assured Mr. Bullard that his comments would be forwarded to the Utilities staff and addressed prior to any City Commission meeting. He mentioned that the City's Fire Department periodically reviewed the water pressure to ensure that there was adequate fire flow pressure throughout the city.

Chairwoman Press again mentioned that the hearing at the advisory board level was a way for the public to ask questions and raise concerns; she encouraged the residents to attend the City Commission meeting, at which time the final decision would be made.

Ms. Sharon Kist, 68 Oakmont Circle, confirmed that there was a water problem in Tomoka Oaks and asked if the new amenities would be available for use by the current residents or whether they would be restricted to use by the owners of the condominiums.

Chairwoman Press said it was her understanding that there would be six tennis courts and assumed that they could be used by the residents.

Ms. Kist asked City staff to check on the water pressure in that area. She remembered that she had once been told that it was a problem at her house, rather the pressure.

Chairwoman Press said she thought that there was a problem with the water pressure throughout the city.

Ms. Christine Goudreau, 115 North St. Andrews Drive, asked about the hours of operation of the courts; she also questioned the light and sound that would emanate from the facility area.

Mr. Ervin said that the hours of operation had been identified by staff, as had the height of the lighting. He said that there were some conflicting requirements, because the police wanted the lighting to be higher and brighter, while staff wanted to keep the lighting lower and less bright. He said that the goal was to prevent spillover lighting onto the properties of the existing residents by utilizing lower lighting, trees and limited hours of operation to prevent the lighting impact.

In response to Mr. McCoy's request, Mr. Ervin advised that whether or not the amenities would be open for use by the residents was a decision to be made by the applicants.

Mr. Jorczak asked if there was a national standard for golf course maintenance and if so, whether it could be applied to the Tomoka Oaks course.

Mr. Ervin said he did not know, but would check into it.

Mr. David Ponitz, 90 North St. Andrews Drive, stated that both Mr. Ervin and Mr. Merrell had done a good job representing the development. He said he was pleased that none of the townhomes or condominium units were directly behind any abutting properties and asked if the development order could include a statement that specified the acreage to remain open space. He thought that perhaps that acreage could be zoned to ensure that it would remain open space.

Mr. Merrell explained that the planned development zoning did differentiate between the residential and recreational components, i.e., it was essentially a custom zoning for the property for which the development order dictated what could or could not be done as a result of the rezoning process. Every individual use (golf course, tennis courts, etc.) would be identified on the plans, which would become a part of that development order.

Mr. Ponitz said that in exchange for special development orders such as that being sought by the applicant, the City had an opportunity to ask for things above beyond what was generally required by the Land Development Code regulations. He asked if the City could ask the applicants to increase the size of the replacement trees.

Chairwoman Press asked the planning director to address the tree mitigation.

Mr. Ervin explained that Mr. Ponitz referred to the City's specific prohibitions regarding tree removal. He said that trees that were removed had to be mitigated; i.e., they had to be replaced. He said that the number of replacement trees was based on the size (diameter) of the tree being removed, not necessarily on a 1:1 basis. He said that protected trees were those 6"-12" in diameter as measured at four feet (4') above grade; replacement trees had to be a minimum 2.5". Specimen trees were those between 12" and 36" in diameter; replacement trees had to be larger, with a fuller canopy. He added that removal of trees over 36" in diameter required City Commission approval. He said because of the size of the project and the existing trees on site and given the proposed landscaping plans, Staff felt it was appropriate to require them to adhere to the City's regular standards as they would for any development.

Mr. Ervin concurred with Mr. Ponitz that the PRD was a discretionary zoning for which the Planning Board and City Commission had the right to ask for mitigation above and beyond what was required by Code. He mentioned that the City's minimum requirements were also specific in regard to native and xeric landscaping, i.e., plantings that could survive in periods of drought. He said that the applicants utilized many different species, such as oaks, pines and magnolias, as well as decorative elements such as crape myrtles, etc., to accentuate the perimeter of the property. He said that some plants would be used in close proximity to the buildings to enhance the architecture being used. He further detailed the proposed landscaping and advised the board that it was within their purview to require an increase in the size of replacement trees if they felt it was justified.

Mr. Lewis Slaughter, 53 North St. Andrews, stated that he was in favor of the project and thought it would be a major asset to the city. He was pleased with the two new lakes that had been dug and said that the reuse water would help the look of the course tremendously. He asked if there could be a light installed at the intersection of Tymber Creek Road and Nova Road.

Mr. Sans Lassiter, Lassiter Transportation Group, said that whether or not a traffic signal would be warranted was the first thing that they had considered, but that they had not been able to show that intersection as warranting a traffic signal. He explained that Nova Road was a State Road and that the DOT (Department of Transportation) had very strict standards for when they would or would not allow a traffic signal; he said that the intersection did not come close to the threshold, mainly because the primary trips to and from the project area were from the south on Nova Road.

Mr. Slaughter stressed his support for the project and said that by their ability to attract more members, they would be in a better position financially to maintain the golf course. He asked if there would be an opportunity, in conjunction with the redevelopment of the golf course, for the adjacent homeowners to connect to the City's reuse system to reduce the need for private groundwater wells in the area.

Mr. Ervin commented to Mr. Ponitz that Mr. Hendrix wanted to discuss the request for upsizing the landscape mitigation.

Mr. Ervin also responded to Mr. Slaughter that the provision of reuse water to the residents adjacent to the golf course would be an expensive City of Ormond Beach public improvement project that would require the expenditure of capital improvement dollars. He said the City Commission had identified the South Peninsula area as the No. 1 priority and said there were other improvements that had been identified for completion in the next 5 -10 years. He said that the extension of the reuse water had not been identified as a capital improvement that could be funded in the next 5-10 years. He said that the City could consider it for future funding and that there might be an opportunity to utilize grants from the Water Management District, but reiterated that it was not currently identified as a priority.

Ms. Zella Wilen, 48 Oakmont Circle, said she was also a long-time resident. She objected to the rezoning request, as well as the request to construct streets across privately-owned business property. She did not want Tomoka Oaks Boulevard to be approved for extension or connection to any planned street. She also objected to the increased traffic that would be created by the new development.

Ms. Wilen referred the Board to the City archives (September and November, 1970); she said that there had been a rezoning issue raised and the homeowners had retained an attorney to argue against the zoning change to R-5. She said that the homeowners had prevailed. She thought that if the proposal proceeded [to the City Commission], the Tomoka Oaks HOA Board of Directors should alert and notify every one of the homeowners in Tomoka Oaks of the rezoning request, not just those within the 300' radius of the project. She said she equated the request for the PRD to the prior request to rezone the property to R-5.

Chairwoman Press pointed out that the meeting would be advertised in the newspaper.

Mr. McCoy noted that the advertisement was countywide.

Dr. Gerald Gibb, 69 North St. Andrews Drive, stated that the traffic report was based on data, [not experience]. He said that the reason that most of the traffic turned southbound on Nova Road because it was too dangerous to turn northbound. He also stated that the construction would occur over a period of time and that construction workers would come and go at the same time as the residents, exacerbating the traffic in the area. He questioned if there was to be a traffic management plan during the construction of the project.

Mr. Lassiter agreed that for the "Existing Condition", the consultants could only count the traffic that did turn, not the traffic that might want to turn but did not. He felt it important that they understand that their

Future Conditions analysis used the Urban Area Model, which distributed traffic without regard to congestion. He explained that the model looked at the major distribution points north and south on Nova Road up to US1 and in other parts of the city to determine the more likely direction traffic would go if there were no congestion. He felt that their analysis was absolutely correct.

Mr. Lassiter also liked the idea of a construction traffic management plan and said that they would recommend identifying routes for the resulting traffic. He reminded the Board that that the 770-trip per day increase was for the buildout of the development, not the construction traffic.

Ms. Leslie Nixon, 36 North St. Andrews Drive, expressed concern with additional traffic trying to negotiate the Tomoka Oaks Boulevard circle near the entrance to the subdivision.

Mr. Lassiter explained that the 770 trips was the number of estimated trips on a daily basis; he said there were 74 in the peak hour. He further explained that typically, the impact study deducted the existing traffic from the traffic proposed for the new development, but instead, the subject analysis assumed the existing traffic would remain. He said that meant that their analysis was overly conservative (predicted too much traffic), but that they wanted to be as conservative as possible. He stated that their analysis also assumed 100% occupancy year-round, which they also knew to be unlikely, but which would also produce conservative numbers.

Ms. Nixon asked for the percent of increase in trips. She wanted to make sure that Staff recognized that the ongoing development along the North US1 corridor would mean additional traffic for Nova Road, making left turns out of the subdivision even more difficult.

Ms. Nixon also asked if the Board could recommend fewer homes, rather than 120 proposed. She thought that the applicants could improve the clubhouse, the golf course and the tennis courts, but scale down the residential portion of the project.

Mr. Ray Sanchez, 12 Pine Valley Circle, stated that the traffic circle was dangerous and confusing, particularly since it was two-way traffic. He questioned the sales prices of the residential units.

Mr. Lassiter responded that because a traffic signal at the intersection with Nova Road was not warranted, the stop sign control was deemed to be adequate. He said that the same was true for traffic internal to the site, which would be less than at Nova Road. He answered that the consultants had not provided a percent of increase resulting from the project, but pointed out that they did not take a deduction either; they simply added the anticipated traffic to it (an over-estimate).

Mr. Jorczak asked if they had given any thought to how the circle could be improved.

Mr. Lassiter said that the circle was analyzed in the current condition. He said they could certainly do so by studying if it would be warranted by the level of delay, would reduce the level of delay, or would make the circle safer.

Mr. Jorczak said that the safety element seemed to warrant that study, regardless of the additional traffic that would be generated from the proposed 122 units. He remarked that the junction might require a different kind of layout.

Mr. Lassiter said that as a traffic engineer, his primary focus was safety. He stated that round-abouts and traffic circles, although becoming more popular, were particularly pedestrian-hostile. He pointed out that

cars did not have to stop, gaps in traffic did not occur, and visibility was lessened because of the lack of time to look left and right. He said that because traffic came from the left, people did not always look to the right for pedestrians. He reiterated that pedestrian safety was one of his major concerns.

Mr. Thomas, a resident of Tomoka Oaks, thought that striping or arrows on the pavement might help drivers negotiate the circle. He thought that there were some simple things that could be done to improve the situation.

Mr. Lassiter said that it was something at which they could look.

Chairwoman Press thought that Mr. Lassiter could work on those things before the item reached the City Commission, since it was a concern to many of the residents.

Dr. Grissom questioned the nature and location of common areas for the new owners.

Mr. Merrell said that would be detailed in the plat, another process they were going through. He said that he did not have exhibits available for the item before the board, but that the common areas would be fully identified in the plat documents.

Dr. Grissom asked if the applicant wanted to respond to the residents' comments regarding the "deplorable condition" of the golf course.

Mr. Merrell said that they intended to address that conditions at the golf course were less than perfect. He said that they also wanted to point out that the golf course was being redeveloped to retrofit reuse water lines throughout the entire irrigation system at a cost of hundreds of thousands of dollars. He said that reshaping the course would also be a huge improvement. He said that together with the residences, the golf club and the tennis facility, it would be a much better place. He thought that the residents would be happy with it.

Mr. Merrell agreed that a CADD drawing could make anything look good, but pointed out that the pictures would be the zoning map for the property. He said that if they wanted to change anything, they would have to reappear before the Board for another advertised public hearing. He said that the reason Staff liked the Planned Residential Development was that they had the ability to negotiate the zoning and had done so to the benefit of the City and pointed out that those things were binding.

Dr. Grissom asked Mr. Merrell if he and the applicant had previously discussed the possibility of increasing the size of the replacement trees used for mitigation.

Mr. Merrell said that their landscape architect, Galen Pugh, had been in dozens of meetings with the City staff and that many changes had been made to the plan to avoid impacting important trees. He said it was a given that the trees would be thinned and that the dead trees would be removed; he said the plan also exceeded the City's Code requirements for landscaping, typical of planned development rezoning negotiations. He reiterated that there had been a great deal of focus by City staff with regard to the trees.

Dr. Grissom stated that she was sensitive to the tree mitigation concerns and recalled her shock when she discovered that the beautiful, healthy trees in Breakaway Trails had been removed and replaced with what amounted to twigs. She thought that they should exceed the current excession, if possible.

Mr. Merrell thought that the issue was avoiding the removal of the trees, rather than with what to replace the existing trees. He noted that a tree survey had enabled them to identify all the important trees and that saving certain trees had required them to redraw the plans several times.

Dr. Grissom said she recognized that the applicants had presented a project that was beautiful. She questioned whether the Board could mandate that the development be sustained in the best possible condition at all times, i.e., in perpetuity.

Mr. Thomas recalled that Hurricanes Charley and Frances had caused the removal of a lot of old, dying and diseased trees, but not before tremendous damage had been done to the homes of the residents. He advised that his daughter, a resident of Ormond Lakes, had been required to save some magnificent oaks on her property, but less than a year later one of those same oaks was costing her $2,000 to remove because it had been diseased and had fallen on her fence. He stated that although he felt mitigation was a good thing in the long run and that he was not in favor of taking out a lot of trees, there were a lot of rotten, dead, sick and diseased trees throughout the city that should be removed.

City Attorney Hayes advised the Chair that he included a provision in all of the development orders that conferred to code enforcement the power to enforce the terms of the development order, as with any other ordinance. He said that the City therefore had the power to keep all projects from falling into disrepair.

Chairperson Press pointed out that it was 9:00 pm and asked that subsequent speakers limit their comments to things that had not already been expressed to the board.

Ms. Linda Larsen Lewis, 231 Rio Pinar, expressed her concern that her property line would be 100 feet from one of the three estate lots behind her property. She said that the trees were the only thing that would visibly buffer her home from her new neighbor and asked for assurance that the trees would remain.

Mr. Ervin reported that he had met with Ms. Lewis the day before and stated that her concerns were the City's concerns. He pointed out the location of the three estate lots and said that those lots would have the minimum lot size, width and setbacks that applied to the existing subdivision. He also pointed out Mrs. Lewis' lot and said that although the distance from the lot line to the proposed lot line was 100', the distance between homes would be 160'. He said that the trees in that area would be preserved by the developer, but cautioned that once sold, the homeowner could take out some of the trees if they met the mitigation requirements. He said that the City had not required a minimum buffer because of distance between the lot and the buildings and the existing landscaping along the perimeter of the Lewis lot line but advised that it was within the purview of the Board to do so if they felt the trees should be protected.

Mr. Jorczak questioned the size of the existing trees.

Mr. Ervin replied that the trees ranged from small saplings to a 40" oak; he noted that there were several historic trees, the majority of which were specimen trees. He said that the tree survey showed only the trees over 6" in diameter (protected trees).

Mr. Jorczak asked if taking those trees would require a separate action from the City.

Mr. Ervin explained that once the three residential lots were sold, the homeowners could request the removal of any tree on their property, the same as any homeowner in the city of Ormond Beach. He said

the number of trees that would have to be replaced would depend on the size of the tree to be removed. He said there was currently nothing in the City's Code or in the project documents that would require minimum tree line buffering on the residential lots.

Mr. Jorczak remarked that he understood, but thought it unlikely that someone buying an estate lot and erecting a big house would then want to take down the trees.

Mr. Ervin replied that it had happened in the past. He recalled Ms. Lewis' question as to whether or not a buffer was to be conserved that could not be touched and stated that the reality was that when the property was transferred, the owners could conceivably remove the trees.

Mr. Jorczak advised Ms. Lewis that taking down a specimen tree in Ormond Beach was a big deal.

Mr. Thomas agreed.

Mr. Ervin pointed out that historic trees were different than specimen trees. He stated that the developer was being required to do a directional dig for the extension to the sanitary sewer so that it a 40" historic oak would not be impacted. He said that there were also 25 – 28" oaks that had been identified for preservation, but wanted it on the public record that they were located within the property to be subdivided; therefore, if the subsequent owners met the mitigation requirements, removal of the trees would be justified.

Dr. Grissom asked how the deed restriction would work.

Mr. Ervin said that if the Board wanted to require a minimum buffer, they could identify, e.g., a 10' perimeter buffer with a tree every so many feet as part of the development order.

Ms. Lewis stated that people did take trees down so that they could have view of the golf course. She acknowledged that tracking 1,100 trees was an overwhelming job, but stated that she had noted a healthy pine and two smaller pines on the property that were not shown on the survey.

Ms. Reynolds asked what protections were in place to prevent the project from going bankrupt either because of mismanagement or because of market conditions. She said that she had seen it happen in far better situations and did not want a situation in which new owners would be allowed to do whatever they wanted just because they were finishing a stalled project. She expressed concern because of the scope of the project and because the owners had not demonstrated the ability to maintain the golf course.

City Attorney Hayes advised the Chair that development orders ran with the land; therefore, the owner of the land (or a subsequent owner) was subject to the requirements of the development order. He said there was no way to know whether or not any particular project would be built out or flounder. He said that the best the City could do was to create a safety net in the development order and ensure that the development occurred in accordance with the requirements of the approval.

City Attorney Hayes confirmed for Ms. Reynolds that the proposal was for a phased project and that the developer would have to complete one phase before starting another.

Long-time resident Ms. Susan Juckett, 311 Rio Pinar Trail, said that her view, which had gone from "lovely" to a lot of dead trees, and would now be of a comfort station (golf course bathroom).

City Attorney Hayes assured Ms. Juckett that any new owners in the future would also be required to preserve the golf course.

Ms. Juckett questioned the time line for all phases to the anticipated completion of the project. She stated that she was concerned with construction noise, dust, etc.

Mr. Ervin said that the construction timeframe identified in the PRD development order would be valid for five (5) years. He said that if Phase I had not been completed in that timeframe, the order would lapse. He said that the conditions would remain in place, but any redevelopment would require that it be brought back for another hearing and, with the existing conditions as minimum standards, any kind of upgrades would have to be to current Code.

Ms. Juckett asked if it would be to Phase I completion or completion of the project.

Mr. Ervin responded that it would be to completion of the project.

Ms. Juckett asked if the tree mitigation would be on-site. She also questioned the impact of new residents on Tomoka Elementary School, shopping facilities, the hospital, as well as the effect they could be expected to have on the water pressure in the area, already low.

Chairperson Press pointed out that the City staff was not aware of the problem and would address it.

Ms. Juckett stated that the problem would get worse before it got better. She found it hard to believe that the developer did not know the price for which they expected to market the units.

Mr. John Randall, 70 Oakmont Circle, recalled that he and his father had cleared their lot by hand and that subsequent generations would be occupying the residence. He questioned what mechanism would ensure that the integrity of the project would be maintained and that the homeowners' association would be able to collect their dues in order to pay the cost of maintaining the things for which they would be responsible. He asked who would be responsible for the property covered by the conservation easements and questioned what would happen if the golf course went belly-up. He also expressed concern with the wildlife habitat that would be lost.

Mr. Randall commended the developer on a great idea, but sought assurance that the dream continued to be a reality in 20 years.

Dr. Grissom said she liked the idea of a deed restriction to protect the property.

Mr. Ervin responded to Mr. Randall's question that the City would have the ability, as with any easement, to access the property for maintenance and then charge the homeowners' association; he likened it to a sort of lien on the property. He said the City had the guarantee that someone would maintain the property and that the HOA would ultimately be financially responsible per code enforcement provisions in the easement documents.

Mr. Ervin said that the conservation/open space easements over the golf course meant that the owner continued to own the golf course property, but restricted the use of the property to a golf course and open space purpose. He said it would be an easement to the City; therefore, the easement could not be released without the approval of the City. He said that the easement would be described around the golf course itself, and that based on the testimony, RTH Corporation would maintain ownership of the golf

course; he said that the areas around the townhomes and condominiums would be identified as common areas for those particular projects. He said that the common areas being used by the condominiums would be owned, maintained and operated by that association, whereas the golf course would be owned, maintained and operated by the RTH, Inc. He said that the City would require that the conservation easement on the golf course be recorded prior to any development. He pointed out that the easement was being created in association with the subdivision plat.

Mr. Jorczak asked if the City had ever required surety bonds to ensure completion of a project.

Mr. Ervin explained that they allowed surety bonds only for subdivision improvements, not for commercial developments. He agreed with the resident who had stated that developers sometimes failed to complete projects and said that in a market-driven economy the market sometimes had to rebound before someone else finished a development. He said that was the reason that the city attorney required recording of a very specific development plan that provided very specific guidelines as to what could be developed on a certain property; a subsequent developer would know exactly what could and could not be done. He explained that traditional zoning allowed for a great deal of options, whereas the PRD was a very specific recorded document of covenant and restrictions that traveled with the land, not the owner. He said it gave the residents of Tomoka Oaks much better protection for future conditions.

City Attorney Hayes said that from a legal standpoint, surety bonds sounded good, but were not practical. He pointed out that the City would not want to have to finish a project in default; it would create a nightmare scenario for the City.

City Attorney Hayes recommended that the Board members voice their comments on the proposal in an effort to solicit a motion. He offered to assist them with any conditions that they might wish to impose with their recommendation.

Mr. Ervin stated that he had summarized for clarification the ten (10) issues that had been brought up by the board members:

1) The City's engineering staff reported no environmental impacts.
   - Determine whether or not an environmental impact or assessment report has been done.
   - Forward a copy to the resident who requested it and include a copy in the City Commission's agenda packet.

2) Traffic conditions:
   - Analyze improvements at the circle that would make it safer (striping, signage, etc.).
   - Ask the applicant to look at other improvements that might be made.
   - Provide signal warrant study background information, i.e., why a signal is not warranted at the intersection of Tomoka Oaks Boulevard and Nova Road

3) Request to upsize the minimum size of the trees for mitigation. *(Mr. Ponitz)*

4) Question the possibility of providing reuse water for lots adjoining the golf course (noted that it was not identified in the City's Capital Improvements Program) - *Mr. Ponitz*

5) Address water pressure issues in Tomoka Oaks and include in the information forwarded to the City Commission.

6) Identify if minimum golf course maintenance standards are available from either a local or national organization. *(Mr. Jorczak)*

7) Clarify the role of the City in establishing the Covenants and Restrictions and the Development Order to ensure that the golf course is protected in perpetuity.

8) Possibility of notice to future purchasers of property in the subdivision of potential for airport impacts. *(Mr. Jorczak)*

9) Address concern regarding the buffering of the estate lots. (*Ms. Lewis)*

10) Documentation to ensure that each phase of the project is completed prior to beginning the next phase; ensure that the complete project will be built out in five years.

Chairwoman Press opened the floor to board comments.

Mr. McCoy pointed out that Mr. Momberger, one of the speakers, was a registered landscape architect and that he had not seemed particularly concerned with the issue of tree mitigation. He also pointed out that Mr. Ponitz, one of the other speakers, was the Utilities Engineer for the City of Daytona Beach. He said that the gentlemen were good at their jobs; therefore, he felt reasonably assured that the landscaping mitigation was well within or surpassed the City codes. He suggested that the many of trees about which the residents were concerned were probably in poor condition and had most likely reached the end of their useful life.

Mr. Thomas said he was also a long-time resident who favored the project. He said that he had sat on the Planning Board for many years and could recognize when the alternative was worse than the plan. He said he did not want 300-400 homes added, when the proposal was for only 122 homes of what he believed would be part-time residents. He felt it was a beautiful plan and that the project would be a great asset to Ormond Beach.

Mr. Thomas referred to the concern expressed by a resident that the survey had missed a large sand pine, and explained that the State did not recognize sand pines as significant trees; therefore, it had not been marked. With regard to the concerns about the project not being completed, he stated that the three best real estate values were: a view, water and a golf course; he thought there would be buyers simply because the property was on a golf course. He restated that the City was tough on the issue of tree removal and reiterated his support for the project with the conditions discussed.

Mr. Jorczak echoed Mr. Thomas' comments and said that he thought it was an upscale project with a lower density than what would otherwise be allowed. He thought it would upgrade the neighborhood and would generate dollars that would help improve the golf course and surrounding amenities. He said that he hoped that the City would consider the concerns raised at meeting and said that he would recommend approval.

Dr. Grissom said she also supported the project and any motion to approve would include any amendments necessary to address the concerns raised. She thought that deed restrictions should be

required for the three estate lots to require that they maintain the tree buffer in order to protect the privacy of abutting property owners.

Chairwoman Press opined that no one would buy the properties unless the golf course was upgraded and felt that the proposal would force those improvements to occur. She said for that reason she believed the project would be good for the area and was an example of Smart Growth.

Mr. Thomas recommended approval of PRD 06-32, with the recommendations by staff. He added that his motion was amendment friendly and clarified that he was including the ten items as listed by the planning director.

Mr. McCoy seconded the motion.

City Attorney Hayes responded to questions by Mr. Jorczak and Mr. McCoy that the [tree] buffer mandated by deed restriction would apply only to the three estate lots. He said that the board could make that a condition of their recommendation.

Mr. Ervin replied to Mr. Thomas that the list of ten items included addressing the traffic circle. He also pointed out that the applicants had already agreed to provide for a minimum 10-foot wide buffer at the rear of the lots, in which there would be a minimum planting of one tree every 30 linear feet with continuous hedge material between the trees. He explained that the buffer for those homes would be required as a part of the development order, either as a private restriction on the individual lots or by mandating that the buffer be placed on the golf course outside those lots. He said that the applicants could make that decision.

Mr. Merrell said that he understood the resident's concern, but said that having buffers between two houses was not typical and that houses backed up to each other in subdivisions all over the city. He said that the applicants were willing to do what Mr. Ervin was proposing, but that it was routinely done as a matter of zoning. He thought that having a provision in the development order was the better way to handle the issue, i.e., the developer would establish the buffer and it would then transfer with the land; subsequent property owners would be responsible for maintaining it. He said that the provision could be enforced through the code enforcement mechanism.

City Attorney Hayes agreed that it would be better to put the onus on the developer as opposed to the property owner.

Mr. Merrell said that the suggested method would require only a code enforcement action rather than a court hearing, should there be a problem with the buffer in the future.

Mr. Thomas agreed to add acceptance of the applicants' voluntary inclusion of the buffer to his motion.

Mr. McCoy reiterated his second.

Ms. Bates called the question, which was approved by unanimous vote.

Mr. Thomas thanked everyone for attending the meeting, participating in the democratic process and helping the board to make their decision.

Mr. Ervin announced that the proposal was tentatively scheduled for the October 3rd City Commission meeting. He advised the residents that they would again be noticed and that an advertisement would again run in the newspaper.

The board voted to close the public hearing.

VIII. MEMBER COMMENTS

There were no member comments.

IX. ADJOURNMENT

There being no further business, the meeting adjourned at 9:45 p.m.

Respectfully submitted,

Clay Ervin, AICP, Planning Director

ATTEST:

Mrs. Rita Press, Chairperson

Minutes transcribed by Betty Ruger.

Mayor Costello stated whatever name was attached, be it a ditch or tributary, what was important was that this project can not stop water flowing onto the land. He asked if the height of the fence would be at a low point compared to the road.

Mr. Ervin stated the maximum height of the fence would be six feet along the property line. He explained the industrial parcel closest to US1 would have an extensive amount of fill and would be four feet higher at a finished floor elevation than the homes in Ormond Lakes, and the project would have a six foot wall at that location along with landscaping with the finished grade approximately two to three feet below the top of the wall. Mr. Ervin recommended a condition be added to correlate the fencing to the elevation of the roadway.

Mayor Costello advised it was very dark in front of the McDonalds west of I-95 where the lights were shielded, but was very bright after passing the screening which proved the screening does work well.

Commissioner Kelley moved, seconded by Commissioner Gillooly, to approve Resolution No. 2006-222, approving the Special Exception to include the indoor pool as presented and the wall height to extend six feet above the elevation of a road entering or surrounding the property.

Call Vote:

Commissioner Kelley	yes
Commissioner Partington	yes
Commissioner Gillooly	yes
Commissioner Kent	yes
Mayor Costello	yes

Carried.

Mayor Costello called for a short break at 9:30 p.m. and he reconvened the meeting at 9:37 p.m.

Hearing no objection, Mayor Costello closed the public hearing on Item #9(E).

Item #9(F) - "Ormond Beach Commercial Complex"

RESOLUTION NO. 2006-223

A RESOLUTION AUTHORIZING THE EXECUTION AND ISSUANCE OF A DEVELOPMENT ORDER FOR "ORMOND BEACH COMMERCIAL COMPLEX" SPECIAL EXCEPTION ON A SITE LOCATED AT 500 WEST GRANADA BOULEVARD WITHIN THE B-9 (BOULEVARD) ZONING DISTRICT; BY AUTHORIZING A WAIVER OF THE MASONRY BUFFER WALL REQUIREMENTS ALONG THE REAR PROPERTY LINE, BY ALLOWING THE USE OF AN EXISTING SIX FOOT HIGH WOOD FENCE IN LIEU THEREOF; ESTABLISHING CONDITIONS AND EXPIRATIONS OF APPROVAL; AND SETTING FORTH AN EFFECTIVE DATE.

Commissioner Kelley moved, seconded by Commissioner Partington, to approve Resolution No. 2006-223, as read by title only.

Call Vote:

Commissioner Partington	yes
Commissioner Gillooly	yes
Commissioner Kent	yes
Commissioner Kelley	yes
Mayor Costello	yes

Carried.

Hearing no objection, Mayor Costello closed the public hearing on Item #9(F).

Item #9(G) – "The Tomoka Oaks Golf Village"

ORDINANCE NO. 2006-17

AN ORDINANCE AMENDING SUBSECTION A, ZONING MAP, OF SECTION 2-03, OFFICIAL ZONING MAP AND ZONING DISTRICT, OF CHAPTER 1, ARTICLE II, ESTABLISHMENT OF ZONING DISTRICTS AND OFFICIAL ZONING MAP, OF THE LAND DEVELOPMENT CODE, BY AMENDING THE OFFICIAL ZONING MAP TO REZONE A 147-ACRE PARCEL OF REAL PROPERTY FROM R-2 (SINGLE-FAMILY LOW DENSITY) TO PRD (PLANNED RESIDENTIAL DEVELOPMENT), SAID REAL

PROPERTY BEING LOCATED WITHIN THE LIMITS OF THE EXISTING TOMOKA OAKS GOLF COURSE; ESTABLISHING BOUNDARIES; AUTHORIZING REVISION OF THE OFFICIAL ZONING MAP; APPROVING A DEVELOPMENT ORDER FOR "THE TOMOKA OAKS GOLF VILLAGE" PLANNED RESIDENTIAL DEVELOPMENT (PRD); REPEALING ALL ORDINANCES AND PARTS THEREOF; AND SETTING FORTH AN EFFECTIVE DATE.

Mr. Ervin stated this was a rezoning for a 147 acre parcel from R-2 to Planned Residential Development (PRD). He noted there was a revised development order on the dais that identified the three items from the Planning Board recommendation that could be incorporated into the final development order. Mr. Ervin pointed out many comments from the Planning Board were recommendations for staff to check certain items such as water pressure and landscaping; therefore, they could not be identified in the development order; but the City Attorney culled through those comments to come up with specific requirements that could be incorporated into the development order, and they were addressed by staff. He stated the reuse availability, which was a major capital undertaking, was not feasible at this time. Mr. Ervin reported the landscaping plan was reviewed, and many of the trees being planted were already above and beyond the minimum requirement. He stated traffic improvements would be incorporated into site plan, and the applicant had agreed to those improvements. Mr. Ervin noted these improvements would include striping, signage, and cautionary signage. He advised staff contacted the Utilities Department regarding water presser concerns at least three times to verify whether or not water pressure problems were being experienced in the Tomoka Oaks area; but the pressures were meeting minimum requirements, and no specific problems were identified. Mr. Ervin stated there would not be any dead-end systems and would actually loop back into the existing system; therefore, water pressure should be maintained.

Mr. Ervin advised the development order would include notification to purchasers by a note on the plat that they were within proximity of the airport and within the flight plan of the airport. He stated the golf course shall remain a golf course and would not be able to be converted to any other use without approval by the City Commission. Mr. Ervin reiterated this property was Low Density Residential with an R-2 zoning; therefore, a developer could, in theory, develop the entire golf course for 600 homes, but considering the contours 300 single-family homes would be more realistic. He explained the proposal was for multi-family homes consisting of three and four story condominiums, town homes, and three single-family homes.

Mr. Rob Merrell, 1638 John Anderson Drive, representing the applicant, provided a visual presentation of the project. He reported he would rely on Mr. Ervin's conclusions in his staff report concerning Comprehensive Plan consistency, compliance with all of the City's Land Development Code requirements, and other issues. Mr. Merrell pointed out the Planning Board recommended unanimous approval with conditions that they have accepted. He stated there were issues everyone agreed on regarding some Smart Growth principles, and this project represented some of those principles such as the concept of urban renewal, proximity to services, clustering development, and the preservation of open space. Mr. Merrell explained this project was for 122 residential units, a new club house, pro shop, tennis center, tennis courts, and many amenities. He stated the property owner made a concession to cluster a lower number of units that would allow a great deal of open space. Mr. Merrell reported there would be a total of 84 condominium units, 35 townhouse units, and three residential units. He presented a computer rendering of the development proposed superimposed on the aerial photograph and pointed out the various elements of the proposed plan along with renderings of the buildings and landscaping. Mr. Merrell reported there would be considerable improvements to the lake system and the green for the golf course as a result of retrofitting the golf course for reuse water. He advised this request was for a planned redevelopment rezoning.

Mr. Harry Wendelstedt, 88 South St. Andrews, stated he has been a resident of Tomoka Oaks for 35 years, which was one of the finest residential developments in Volusia County. He stated he believed this would adversely affect the residents who live along the golf course. Mr. Wendelstedt reported people were told when purchasing their property that this golf course would remain for 99 years. He expressed a concern regarding property values; however, he has been informed that should not be a concern. Mr. Wendelstedt stated Tomoka Boulevard was two lanes, and he expressed concern regarding what would happen should another natural disaster occur such as the fires of 1998. He recommended placing a traffic light at the end of Tomoka Boulevard and Nova Road. Mr. Wendelstedt noted residents may have had a different view if the renderings and information were made available to the people earlier than this evening. He stated he opposed the development because the homeowners would loose the site of the rolling green fairways.

Ms. Joan Deemer, 86 South St. Andrews Drive, stated she lived in Tomoka Oaks for 28 years and opposed the recommended changes. She expressed concern that this would adversely affect the area with too many people and too many cars taking away the charm of Tomoka Oaks.

Ms. Zella Wilen, 48 Oakmont Circle, stated in the Fall of 1970 a request to rezone this property to R-5 was rejected at the Planning Board and in October 6, 1970, the Land Use Map was adopted by the Commission and that map showed Tomoka Oaks, including the golf course and undeveloped wooded areas, to be Single-family Residential Low Density zoned R-2, making Tomoka Oaks some of the largest lots in Ormond Beach. She reported that at the recent Planning Board meeting she objected to the entire rezoning change, stating Tomoka Oaks Boulevard should not be approved for an extension or a connection to any planned or named street within this area. Ms. Wilen voiced an objection to any overnight lodging should that be considered. She stated she opposed the increased traffic through Tomoka Oaks to the South St. Andrews area and noted this would add additional traffic to the Trails as well. Ms. Wilen reported the City Attorney in 1970 talked about spot zoning, cautioning the Planning Board that the golf course was a conditional use and would be able to request certain updating and remodeling, and that statement was relevant today. She noted restrooms were a problem due to vandalism, but were needed. Ms. Wilen pointed out the club house and garage areas could have been upgraded at any time in the past 36 years. She reported this change would impact the entire Tomoka Oaks area, not only those living on the golf course or within the 300 foot notification area. Ms. Wilen equated the 1970 R-5 request to this PRD request and opposed the change. She advised part of the selling point for homes in this area was that this would remain a golf course for 99 years, and she urged the zoning remain the same and the project be stopped.

Mr. Rob Merrell stated the property owner made a commitment to maintain the open space of the golf course in perpetuity. He pointed out the entire property was currently zoned for home sites; however, the development order under this proposal would indicate that the golf course would remain open space, and the City would then be able to enforce that as an element of the development order.* Mr. Merrell reported speakers mentioned a 99-year provision, but there * was no such covenant; however, this proposal would include a commitment to cluster 122 units in areas designed to be the least intrusive along with a recorded covenant to keep the golf course.

* Mr. Hayes concurred that there was no covenant of record regarding the golf course; therefore, the applicant had a right to request this redevelopment of the Commission. He noted the City could now go back to try to do what some of the homeowners believed they already had for some 30 years.

Mr. Merrell advised the Commission received a complete traffic report in their information packet, and no failures in the transportation network were found, but several improvements were being proposed. He reported he met with as many people as possible prior to this meeting. Mr. Merrell advised that many people saw the pictures in advance of the Planning Board meeting, and there was a full-house at the Planning Board meeting. He noted many of those people did not come to make an objection tonight because they went away from the meeting satisfied that their questions and concerns were answered. He reported a DOT warrant would be needed for a traffic light, but the requirements for a light would not nearly be met. Mr. Merrell stated this was very different from what occurred in the 1970s because what was being shown now was what would occur if approved by the Commission, and it could not be changed.

Commissioner Kelley moved, seconded by Commissioner Partington, to approve Ordinance No. 2006-17, on first reading, as read by title only.

Commissioner Kent reported he met with the developers a year ago, and the plans had not changed a great deal. He expressed concern regarding buffering for the current residents; however, the presentation showed this was addressed, and he could support this proposal.

Commissioner Gillooly stated the concept had merit, but she questioned what protection the people who purchased a home on a golf course would have. She noted people needed to be aware when purchasing a home what could occur to the property surrounding their home. Commissioner Gillooly pointed out nothing was uncovered that would protect the people to have this remain a golf course. She stated Tomoka Oaks was and remains a premier community in the City, but the golf course had not keep up to that premier status. Commissioner Gillooly suggested this development would bring in new residents, but at a greatly reduced rate than was permitted. She noted the design was thoughtful in that it kept the buffer, and the improvements may help bring the premier status back to the homes, increasing the value of the

* Comments are factually inaccurate per July 12, 2023 letter from land use attorney Brent Spain of Theriaque & Spain. Pages 2-3 cite 99-year Lease 515/360 and Warranty Deed 585/157 perpetuity covenant. (See Tab Q for letter.)

existing homes. Commissioner Gillooly informed Mr. Merrell that she would like to assure the residents this would be the last residential plan for the Tomoka Oaks community. She advised she also told Mr. Merrell that she noted the developer planned the project with surrounding green space and improvements to the golf course, but she needed additional assurances that this would remain intact. Commissioner Gillooly reported the reply she received was an iron clad commitment. She stated the developer had a right to develop this property in a residential manner, and all of the above-noted improvements would to be made, which would make the overall project better.

Commissioner Partington advised he met with the developer last year and would vote for this for some of the same reasons as Commissioner Kent and Commissioner Gillooly previously mentioned. He noted this project would improve the entire subdivision, and this development set the standard for developments in other areas. Commissioner Partington reported he was comfortable this developer would make this project as high a quality, if not a higher quality, than he had done previously.

Commissioner Kelley reported he also met with the developer and saw a presentation last year. He stated this answered many questions; and while it would not answer the questions of those who want the land to stay exactly as it was, it did answer the question of whether there would be residential buildings constructed directly behind someone who now had a golf course view. Commissioner Kelley advised the placement of the development would not adversely impact the visual effect. He pointed out this would provide assurance that this would never come back to an R-2, R-3, or R-4 and would be dedicated. Commissioner Kelley reported the owner had prospective buyers come to him years ago to develop the property, but chose not to sell because he wanted to keep the golf course. He advised the proposal would only improve the value of all of the property in the area. Commissioner Kelley stated he shared a concern relative to the traffic, but was convinced the people would not come through the Trails because it would be faster to go to Nova Road and turn west to Clyde Morris Boulevard. He noted the only difficulty he could envision was the time it would take to exit on to Nova Road, particularly eastbound. Commissioner Kelley reported this project would be an improvement to the entire neighborhood, and it would assure the golf course would remain.

Mayor Costello reported he met with the developer a year ago, and the reality of the situation was that this was a residential piece of land that could hold 600 units and could realistically only hold 300 units without a golf course, but this proposal was for 122 homes with a golf course. He stated the choice was that in order to keep the golf course, the owner would have to make some money. Mayor Costello explained the alternative was, because the land was poorly permitted years ago, a developer had the right to construct 300 single-family homes and remove the golf course. He pointed out that in this development order the only thing permissible was the golf course open space. Mayor Costello recommended the developer set aside the finances for a traffic light even if it was not warranted at this point in that he believed traffic to be a valid concern. He asked if DOT would permit a light if the money was available.

Mr. Sans Lassiter, Traffic Engineer, replied if a traffic light was installed that does not meet the DOT warrants and an accident was caused by the fact the signal was installed, it would make the one installing the light liable. He explained traffic lights are a major liability issue because they increase rear end accidents and are meant to avoid right angle accidents which are more severe. Mr. Lassiter advised that due to this particular entrance on this particular road, most of the turns from Nova Road would be northbound left turns entering the parcel and most exiting from this project would be eastbound or outbound right turns, and those movements do not conflict with each other; therefore, this would not meet DOT's requirement for a traffic signal, and they would not allow it to be installed without a significant change in development such as a build-out of area. He reported the count at the peak hours did not meet the warrant, and the requirement was to meet eight hours to warrant a signal.

Mayor Costello stated the City had hired Mr. Lassiter on numerous occasions, and he was known to be honorable and would not state anything that could later be refuted. He assured Ms. Wilen the plan did not include any hotel/motel type proposal.

Call Vote:

Commissioner Gillooly	yes
Commissioner Kent	yes
Commissioner Kelley	yes
Commissioner Partington	yes
Mayor Costello	yes

Carried.

Hearing no objection, Mayor Costello closed the public hearing on Item #9(G).

Attachment A: R-2 Opposition Survey Questions for Tomoka Reserve - ZMA2023-054

Survey emailed to 650+ households in Ormond Beach on January 24, 2024.
See Attachment B for responses provided to the City Commission prior to their March 19, 2024 First Reading.

Uniting Our Voices Against R-2 Rezoning

The developer has threatened legal action against the city if the Commission does not approve their R-2 rezoning of the Tomoka Oaks golf course property. Let's let the Commission know why they should not give into bully tactics.

All Names and Responses will be compiled by Carolyn Davis and provided to the Ormond Beach City Commissioners and Mayor before they vote on the R-2 rezoning map application which could allow 317 homes on the Sam Snead Golf and Country Club property.

Forms can be submitted by **anyone.** Each member of your household can submit a form. Or you can submit one form which combines your family's input. Please submit no later than Tuesday, January 30, 2024.

Survey Questions

1. Name
2. Neighborhood
3. What is your #1 concern regarding developing the golf course property? Why is this a concern? Examples might include one of the following: traffic, reduced property values, altering of neighborhood character, shortage of essential medical services, catastrophic evacuation gridlock, overcrowded schools, loss of quiet enjoyment, etc.
4. What is your #2 concern regarding developing the golf course property? Why?
5. In an ideal world, what would you like to see happen to the golf course property?

Prepared by:
Carolyn Davis
46 Oakmont Circle
Ormond Beach, FL 32174

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
1	Krystal Ahmad *Tomoka Oaks*	Lowering my home value after I paid premium for my neighborhood, traffic, over-populate schools, lower home value, disrupt ecosystems, lower quality of neighborhood, overwhelm hospital it already is, noise.	Going to disturb our local ecosystem of humans. Overwhelm/over-populate schools, hospitals, pediatrician offices, lower home value.	1. Enormous park with running paths, playgrounds, splash pads, park, nature preserve. Get donations to build it. Trails and hiking. Pavilion.. 2) Golf course again.
2	Andree Begin *Tomoka Oaks*	Besides destroying the flavor of our Tomoka Oaks community, the proposed development would greatly increase traffic. The increased traffic would impact each Tomoka Oaks resident on a daily basis; this would be a nightmare.	If approved, the proposed development will reduce property values without a question.	The city would buy the property. A board would be created consisting of Tomoka Oaks residents and the Ormond Beach community to propose a plan showing the best land use for this property keeping our property values, traffic and green areas in mind.
3	Peggy Brown *Tomoka Oaks*	Property values	Traffic	Condos in middle with a surrounding golf course
4	Roger Blanchard *Tomoka Oaks*	Traffic	Traffic	Park
5	The Bishop Family *Tomoka Oaks*	The adverse affect on our neighborhood's character.	Loss of valuable & beneficial green space.	The city should establish a family-friendly, open green space/recreational area with picnic tables and hiking & biking trails.
6	The Bobeck family *Tomoka Oaks*	The loss of the neighborhood this was intended to be. We moved in 15 months ago because of the quiet nature of this area	Schools. My daughter started out at Hinson where they could not keep 1 full time teacher on staff. Now she is at OBMS and has already lost two teachers this year	I would love to see the TOHA take control and return it to a golf course. It could be profitable but mostly maintain the natural beauty of the area
7	Tyler Brown *Tomoka Oaks*	Loss of TOHA Character	Continued Congestion in and around Ormond Beach.	Ideally it would be a golf course or recreational space with a large green space buffer.
8	Win Burgess *Tomoka Oaks*	It is really hard to pick one concern as they are all major issues. I live on the golf course so loss of quiet enjoyment is high on my list. I bought my house in 1985.	Traffic. There is really only one way in and one way out of Tomoka Oaks. Traffic in the event of an emergency will be a nightmare.	Restore the golf course.
9	Bonnie carle *Tomoka Oaks*	Overcrowding	Lack of resources to handle that many people	Park for Ormond beach
10	Caitlyn Casey-Parker *Tomoka Oaks*	Traffic. Ormo d Beach is already facing traffic flow problems, and this neighborhood will cause major traffic issues within the development and on Nova and Granada.	Loss of green space. Soon there wont be any green space left within city limits.	A nature preserve with walking and biking trails. It would be fantastic if it could be connected to Central Park with protected bike lanes.
11	Caldwell Family *Tomoka Oaks*	Safety is my #1 concern. With only one way in and out of this golf course, it should be limited to the number of houses allowed.	Relating back to my 1st concern, these are things that go along w/ safety, traffic, evacuation routes, over crowded resources (schools, hospitals)	Low density housing with a possible 9-hole golf course. Keep the zoning as it is and the developer actually work with the community to get the correct number of houses in this special piece of property. If it gets rezoned, R1 with 1 acre lots.
12	Carmen Charlton *Tomoka Oaks*	Traffic, privacy, property values	Displaced wildlife	Leave as is, turn into more biking, walking trails
13	Christopher & Natalia Caldwell *Tomoka Oaks*	All of the above	Traffic more than anything. And the simple fact that we enjoy having a view of the trees from our back windows, it was one of the reasons why we purchased the house.	We would like to see a park with trails to walk and ride bikes, with sport fields for adults and kids. Maybe a pond with benches around.
14	Denise Corley *Tomoka Oaks*	Altering the Charactor of the neigborhood	Traffic	Public Golf Course like "The Park" in West Palm Beach
15	Flavia Casassola *21 N St Andrews Drive* *Tomoka Oaks*	Traffic in and out of Tomoka Blvd into Nova since it's the only direct route in and out for both Tomoka Oaks and future proposed development	Noise factor! Heavy trucks and other construction equipment moving in and out of the same one in and out road already congested with traffic and school bus stops. Our quite neighbohood will be subjected to constant noise for years of construction	Remain a green space of some kind although I don't think that will happen. If houses go in, the density should be severely diminished. May be 100 to 150 homes maximum.

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
27	Kim and Chuck Emerson *Tomoka Oaks*	I am concerned about the traffic coming in and out of Tomoka Oaks. There will be traffic jams if 315 home go in the golf course.	We moved up here last year from Palm Beach due to overcrowding, and we picked Tomoka Qaks because of the beautiful tranquility and quietness of the neighborhood. I will feel like I'm back in Delray Beach if this project moves forward!!	I would love to see it go back to a golf course with a nice clubhouse.
28	Mike Eddy *Tomoka Oaks*	Traffic, our roads without sidewalks were never planned to have the traffic we have now much less adding another 200 plus households..	Property values are a problem, anyone knows the last fifty years there was a premium price paid for golf course homes.	Forget ideal world, that won't happen but I think a majority of residents would accept an R1 designation.
29	Diane and Frederick Fox *Tomoka Oaks*	Traffic, Altering neighborhood character	Over populated neighborhood and traffic bottleneck	Park environment
30	Jillian Firmin *Tomoka Oaks*	Traffic	Altering the character	Make it into a beautiful park or nature preserve
31	Tom Fitzgibbon *Tomoka Oaks*	unsafe traffic increase on my road	density/compatibility	2006 PRD 122 units and golf course
32	Aimee and Andrew Gurtis *Tomoka Oaks*	loss of green space and neighborhood character	Traffic and overcrowding	Estate homes with appropriate green space
33	Debbie Gatz *Tomoka Oaks*	Loss of green space in the middle of our beautiful city.	Buffer areas, not being maintained and kept the way they currently are if there is already trees on it. Keep in mind this is brush and vines growing in my yard from the golf course for years now.	Nine hole golf course and recreation, facilities, dog parks, etc.
34	Gupta Family *Tomoka Oaks*	Tomoka Oaks is a prime location and the premise of the neighborhood was the golf course. The previous owners purposely ruined the golf course. This area should be persevered as either a green space or returned to a golf course.	Traffic and overall essential services will further stressed. 10 years from now if this turned into a development and not a green space - the decision will be unfavorably looked upon for the mess it created and lack of healthy space.	Returned to a a golf course or green space. Last option would be some development with golf course still in place
35	Lori Graf *Tomoka Oaks*	DANGEROUS TRAFFIC INTERSECTIONS AND TRAFFIC ON EXISTING ROADS SURROUNDING THE PROPOSED DEVELOPMENT	Altering character of existing neighborhood	No more than 150 lots with nice homes. Green spaces, and amenities like a pool, clubhouse, tennis, pickleball courts, spa, that would be open to residents of the immediate surrounding communities for a fee
36	Pam Gaspary *Tomoka Oaks*	I fear for the integrity of our area. It's a safe place to live now.	Our schools are already overcrowded. There is no more room for classrooms ,	i'd love to see a small neighborhood restaurant, outdoor activies such as; disc golf, picnic tables, pet walks, etc.
37	The Greenlees Family *Tomoka Oaks*	Homes within 6 feet of existing golf course residents. Growth with no plan on how to handle access, traffic, healthcare, and the lack of green space in Ormond Beach.	The impact it will have to the residents of Ormond Beach, not only the Tomoka Oaks residents, but the whole city. This project is not out West, but in the middle of town. The beachside residents will suffer.	The developers understand that they made a bad investment, didn't do their homework in regard to zoning, and donate the property to the city. City could turn it in to a storm water drainage area.
38	Chris & Cindy Heaven *Tomoka Oaks*	Traffic	Property values	Green belt
39	Diane Hoislbauer *Tomoka Oaks*	#1 concern is the traffic, being that Tomoka Oaks has NO sidewalks, the extra traffic will make it hazardous for walkers, bikers, etc.	Alterning neighborhood charater is #2 concern. The homes will not present the same character being crowded into the golf course.	become a public park or have 1 acre estates with less that 100 homes.
40	Glen Huckins *Tomoka Oaks*	Property value decreasing.	Traffic.	Reopened as a golf course or a park for the local neighborhoods.
41	Lauren Huhta *Tomoka Oaks*	Unsafe traffic	altering of neighborhood character	Restored back to a golf course or solar farm

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
56	Robert Cook & Donna Klein *Tomoka Oaks*	Property value. this is important to stay the course of constant values rising.	Traffic. Traffic currently is enough and speeds probably too high. New development with it comes more unwanted traffic.	Restore to a golf course with reasonable due/fees.
57	Susan Klippel *Tomoka Oaks*	Loss of green space	Traffic	City park / green space. Worst case smaller community with green space
58	Ellen Lauturner *Tomoka Oaks*	Strain on city services especially medical	Traffic/gridlock	Become a park
59	Maria Lusk *Tomoka Oaks*	Traffic	Overcrowding of schools	We are new in town and dont have enough knowledge to say what it should be.
60	Ricard Lukac *Tomoka Oaks*	Traffic	Neighborhood character	Have the City make it a park or " Green Area"
61	Rita Lee *Tomoka Oaks*	All of the above	Traffic, medical services, etc	9 hole golf course, pool, restaurant
62	Warren and Nancy Lensmire *Tomoka Oaks*	Altering of neighborhood character.	Traffic problems	A nature preserve for Ormond Beach
63	William T Loomis IV *Tomoka Oaks*	Traffic	Reduced Property Values	City purchases the property and turns into a city park.
64	Christopher Moody *Tomoka Oaks*	The biggest concern is the traffic and saftey of pedestrians. The schools and hospital's are already overloaded, this would just make matters worse.	The property should be large estate homes with a minimum 1 acre.	I would like to see a golf course and country club with pool.
65	John Measel *Tomoka Oaks*	One of the bigger problems with R2 zoning is the majority of houses built on the golf course where built to utilize the course as their backyard some houses have pools and enclosures built up the property line.	This property was previously zoned PRD for a reason the streets thru Tomoka Oaks and the Trails can't handle the additional 1000 trips a day on average a R2 would make without improvements and side walks	In a beautiful world would like to see a golf course, but understand housing being built but no more than 187 units
66	John P. MURPHY *Tomoka Oaks*	All of the above	....bring in undersibles.....	Remain a golf course....
67	Mary Ellen McConnell *Tomoka Oaks*	Altering of neighborhood character	Traffic	Park and trails
68	Harry McConnell *Tomoka Oaks*	Increased traffic will bottleneck at Nova/Tomoka Oaks Blvd causing inconvenience and accidents. Emergency traffic will be impeded. Drivers will likely use S. St. Andrews and Trails streets further disrupting peace.	Failure to preserve land as a nature sanctuary to protect Tomoka Oaks against noise & light pollution. Development will reduce quality of life for present residents and reduce property values.	Make a park in the center, where the clubhouse was, with walking trails winding through it with 100' perimeterall around left to nature. Some ponds scattered in the parks and buffer. Memorial Gardens on Granada & Halifax could be a model.
69	Mary Murphy *Tomoka Oaks*	Actually, all of the above are main concerns...Traffic would be.most concerning.	Altering of neighborhood character. I am sure many will be wandering about our now quiet and peaceful neighborhood.	A 9 hole golf course with minimal townhouses. Under proper management this should be a profitable and accepting arrangement.
70	Paul and Deb Maybeck *Tomoka Oaks*	SAFETY: excessive traffic on narrow roads endangers kids at bus stops, walkers, bikers, EMS access, and catastrophic evacuation. Endangers the ability to enter/exit onto Nova Rd especially due to RR cars backed up north of exit.	LOSS OF GREEN SPACE: loss of valuable quiet, negatively alters neighborhood character, no consideration for humans or animals. Six foot buffer is totally absurd and will result in property values being adversely affected.	Return property to its previous life as a "golf and country club" with a stable golf corporation running it. Or if that is not possible, build less than 100 homes, attached or single units, surrounded by a full golf course as was proposed in 2006.
71	Paul and Debbie Marz *Tomoka Oaks*	Property value. Concern is that it is wrong to take the green space away which was always an implied golf neighborhood.	Altering the character of this community. Concern is that the future of building in the middle of our neighborhood will be disastrous to the existing homes.	Ideally the course should be brought back to the level of success that it was intended to be. All neighboring municipalities own and run successful courses except Ormond Beach.

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
87	Price Family *Tomoka Oaks*	Loss of character. We bought in this neighbourhood for its character, age, quirkiness. We love that nothing in Tomoka Oaks is cookie-cutter and the mature landscaping. What they are doing on Clyde Morris and Williamson should be illegal.	Traffic. The addition of 500-600 additional cars is going to be a nightmare. This is the kind of neighbourhood where families go on walks and kids go outside to play/ride bikes like it's still the 1980s like their parents did.	It would be nice to keep it mostly a natural park and rebuild pool/racquet facilities for the neighbourhood to enjoy whist still leaving the open space to just let kids play. We have some ponds, great trees, and don't need ugly square retention ponds
88	Jan and Jim Rose *Tomoka Oaks*	Traffic/Density-too many houses cause too much traffic.	The additional residents would alter the character of the neighborhood and negatively impact the quiet enjoyment of the residents.	Estate homes being built with substantially less density than proposed.
89	John R. Rhoades *Tomoka Oaks*	Density and the traffic and other problems it will cause.	The years of construction, heavy machinery noise, dust, and loss of my quality of life.	I would like to see it become a park or other green space. How many more apartments or houses do we need until we overload our infrastructure here in Ormond Beach.
90	Richard and Dale Ryals *Tomoka Oaks*	Traffic property value hospital overcrowded	Bought in 1973 to be on the golf course forever	Stay a golf course. Ormond should have a public golf course like Daytona and other cities have. Ormond only has a private course
91	Sherri Rummel-Hawk *Tomoka Oaks*	Overcrowding and lack of resources	Lower our property value changing the quaintness of our neighborhood	This property could be for Ormond Beach
92	Ginger Stanley *Tomoka Oaks*	Traffic	Traffic	Clubhouse, bicycle trails, park, walking trails, pool
93	Jeff & Wendy Steiskal *Tomoka Oaks*	Loss of beautiful, quiet golf course property reducing property values	Traffic and increased population problems. We purchased in 2912 and it's very sad to see this little gem of a place ruined by so much development	Something similar to proposal from before. Maybe a smaller amount of condos in the center and the golf course reopened
94	Jeff Steiskal *Tomoka Oaks*	They bought a golf course and it should remain with minimal development minimal impact on the existing neighborhood	Loss of property values and quiet enjoyment	Reopen the course with restaurants and small condo development or hotel
95	Joaquin Sierra *Tomoka Oaks*	Traffic, property value	Safety	CITY PARK
96	Kimberly Welch Staley *Tomoka Oaks*	Traffic and value of existing home	Buffer between houses on golf course and my home which is on the golf course	Green Space like a park for the Ormond Beach community.
97	Strickland Family *Tomoka Oaks*	opposed for Many Reasons, Traffic, Crime, reduced property value	congestion	Restore Golf Course
98	William & Rebecca Shank *Tomoka Oaks*	Loss of environment which motivated our home purchase. Excessive traffic.	Traffic and loss of privacy for our homes.	Remain a golf course.
99	Dr. Ian Tafel *Tomoka Oaks*	There is already too much traffic around this area and especially into and out of Tomoka Oaks. Adding even more houses to the golf course will only magnify the issue.	My family and I bought a home in Tomoka Oaks after being told the golf course would never be developed. We liked the secluded and quiet nature of this place. That is now threatened by the developers plans for the golf course	It should be converted into a nature preserve with walking trails for the residents of Tomoka oaks.
100	Gregory Tremmel *Tomoka Oaks*	Increased traffic	Shortage of essential medical services	A public park
101	Pam Turrill *Tomoka Oaks*	Traffic	Lack of property value	Turn it into a park
102	Richard W. Turrill, Pamela R. Turrill *Tomoka Oaks*	Reduced property values	Increased traffic in/out Tom Oaks	Luxury homes on 1.5 acres or larger.

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
117	Bill Zirkelbach *Tomoka Oaks*	Traffic and altering the overall character of the our subdivision. Also it would negatively impact our current infrastructure.	Trraffice flow and impact on infrastructure, environmental and property values.	Keep as green space. I understand the developers rights. Would entertain estate homes on acre lots would provide green space & have less of an impact on our infrastructure. Also these estate home would have a positive impact on property values
118	Mariah Zirkelbach *Tomoka Oaks*	Overcrowding in terms of schools, hospital's, evacuation	traffic flow and too much density for the town thats already expanding at a rapid rate	Either nothing and let it be a nature preserve or the 119 houses that was pre approved by the city
119	Michelle Zirkelbach *Tomoka Oaks*	Traffic - common sense tells us recent traffic studies are not an accurate predictor of the gridlock overdevelopment causes.	Loss of value in terms of character and actual dollars - especially for homes directly on the gold course where people who paid a premium price for a lot with no neighbors behind them could potentially see the back of THREE Tomoka Reserve Homes.	Ideally it would remain some form of green space. At the VERY most, it should be developed along the lines of the 2006 PRD.
120	Rick Zirkelbach *Tomoka Oaks*	Traffic	Home values	A better plan for this property.
121	Barbara Steadman *Escondido Condos*	Traffic, catastrophic evacuation gridlock and shortage of essential medical services are my main concern.	See #1	Another golf course or if that is not feasible, a limited number of one family homes with large lot sizes.
122	Bhanu Patel *Escondido Condos*	Traffic	Infrastructure Congestion	stay open as golf course
123	Carolyn Brenner *Escondido Condos*	Traffic	shortage of essential medical services	I would like the land to see some open space preserved for recreation.
124	Kirk Thrush *Escondido Condos*	Traffic. The property, when used as a golf course didn't negatively affect traffic. Building housing on the property most certainly will negatively affect traffic, safety	Escondido will have no safe entrance/ exit with the increased traffic...	Stay as a green space or park. Set aside a portion for community gardens...
125	Marcia A, Rudman *Escondido Condos*	Catastrophic evacuation gridlock	Traffic	Some development is pretty much inevitable but I would like to see as little as possible with some recreational activities.
126	Mary Leonard *Escondido Condos*	Traffic!!!!!	overcrowding	A beautiful green space
127	Rick Rickards *Escondido Condos*	The development of the golf course property would severely alter the safety and character of surrounding areas.	It's morally wrong to pull the rug out from under residents who purchased properties in a golf course community with the promise that it would be green space in perpetuity.	Ideally, the golf course property should be redeveloped into a golf course or developed into a public park.
128	Robert Baner *Escondido Condos*	Over crowding and intended use of property by town fathers years ago.	Only one access to this area. How can this be a good idea to anyone of a sound mind?	Rebuild the golf course
129	Stefanie Ibison *Escondido Condos*	Traffic	Flooding	In an ideal world it would reopen as a golf course. With the closing of Riverbed Ormond Beach could use a good public course.
130	Susan Banker *Escondido Condos*	main concern is traffic!!! before there is a light. more cars waiting. will make it impossible for us to make a left hand turn onto Tomoka Oaks BLVD to get to Nova. How will we get out? prisoner!!	No plans to address the already crowded hospitals and schools.	I'd like to see it developed back into a golf course. If not possible, do a golf course and about 50-100 homes around it, or no houses.
131	Betros family *The Trails*	Devaluing the neighborhood with cheap new builds	Increased traffic	New golf course, preservation area or high quality estate size homes

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
147	Erik Emsing *The Trails*	Increased Traffic, Disruptions and Noise, Public Utility Problems, Groundwater Shortage, Changed Neighborhood Character, Construction NOISE for Years Disturbing the Peace	It should remain a Golf Couse as it was Initially Planned for. Everything around Tomoka Oaks and the Trails were dimensioned with that layout thus NOT Accommodating another 300 houses!	That the Golf Couse be reactivated and improved...
148	Gail Roe *The Trails*	Too much traffic through the Trails	Too many houses close together	Reopen golf course
149	Jan Collier *The Trails*	Traffic	Small size homes built by Corporation Home Builder	Larger home lots, walking trails; trees planted
150	Jennifer Genovese *The Trails*	We are over building at this point. The traffic, utilities, services are going to be stretched let alone facilities like water, electric, car pollution.	Residents in Tomoka Oaks purchased there because of the golf course and the open, and peaceful feeling. That area should be developed	It should be an open area...a park of some type.
151	Jens Fagerlund *The Trails*	Traffic and evacuation gridlock	Evacuation gridlock	Nature experience park
152	Judy L Ramos *The Trails*	Traffic through The Trails, loss of quietness, vehicles speeding up and down Rio Pinar and Iroquois Trails trying to get out of Tomoka Oaks reduced property value, altering the characteristics of the neighbor	Effects on the wild life and taking away old oak trees	Develop something more for families like Top Golf
153	Kathy Tiger *The Trails*	Disrupting the charm and tranquility of Tomoka Oaks / the Trails. Increased already non-sustainable traffic incl. Tomoka Oaks without safe sidewalks. Added problems with Power Utilities, groundwater & noise.	It should remain as it was originally planned and sold to house buyers until it was closed.	Reactivate the Golf Couse and make it great ... KEEP the Open GREEN Space!pace
154	Kristina Moore *The Trails*	Traffic	Shortage of medical services We need another hospital, not more people and gridlock	Green area. How did greedy developers get this land?
155	Lillian Rutherford *The Trails*	Traffic would drastically increase which would lead to a decrease in a multitude of areas such as: walking safety, property value, gridlocks if there was an evacuation, overcrowded schools/restaurants/etc., increase in routes criminals might take, etc	Infrastructure breakdown, not enough room to support the amount of home proposed	A golf course - this would increase home values. Another form of recreation. If it must be built on, then build it with lot sizes that are the same as what is already in the area.
156	Lynda Wilson *The Trails*	I'm greatly concerned about the increased traffic into my neighborhood.	I believe our city needs to slow down on approving new developments of housing and apartments	As mentioned before a park would be nice with possibly a par three golf course.
157	Michele Davis *The Trails*	Traffic	Overcrowding	Golf course
158	Norma Washburn *The Trails*	When we moved into The Trails 37 years ago This was ideal. Now traffic woes and endless building has made it less. Greed is the deciding factor.	Another beautiful green natural space gone. I played golf there. reopened	A city owned golf course.
159	Olga and Paul Ambruster *The Trails*	Traffic, additional costs place on the local people.	Don't allow homes. The interstructure is not allowed any homes. We the tax payers can't have additional taxes place upon us..	Park
160	Paige Cohen *The Trails*	Traffic - our city is already growing and being in the neighborhood next to Tomoka Oaks, we are concerned about too many cars going through our city and infrastructure does not allow for added traffic.	Tomoka Oaks residence bought in a golf course community. To turn an area of land into another community within a community is shocking and feel for those who have property in Tomoka Oaks, and how it will affect surrounding neighborhoods.	A park. Ormond Beach needs more green space with the increase of people moving into our small beach town!
161	Pat Murphy *The Trails*	traffic	Decreased green space	City park

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
177	Maria Martin *Tomoka Oakwood North Condos*	Althering of neighborhood chatacter	Catastrophic evacuation gridlock dangerously.	It will be ideal the golf course move to a bigger space.
178	Dawn Waldorf *Talaquah*	Increased traffic on Nova Rd. Dangerous middle lane.	Decreased property values	A community park
179	Dawn Waldorf and Geeter Kyrazis *Talaquah*	Loss of quiet enjoyment - the character and quiet nature of the neighborhood will be impacted by excess population density	Increased traffic - road infrastructure is not sufficient for increased population	Converted into public green space
180	Ginger Davis *Talaquah*	Traffic	Loss of quiet	Low density housing that compliments the existing lot sizes adjacent the golf course
181	José laura Gierbolini *Talaquah*	Traffic	Should be redeveloped as a golf course	Keep it a golf course. Add tennis pickleball and restaurant
182	Sally Wells *Talaquah*	Traffic	Water shortages	Park
183	Martha Hurst *Fiesta Heights but have family who live on the old Tomoka Oaks golf course*	Traffic. It's awful slresfy	Home value decrease	Daytona State takes it over and start a horticultural and agronomy school. Closest one is in Lake City.
184	Marce Kinstle *Hidden Hills*	The traffic on Granada is horrendous and can not be handled as is. The development is pushing the animals into the neighborhoods as well as flooding that has never occurred is now happening in my neighborhood.	The people who have lived there for years are going to have to deal with the new hydrodynamics and every time they develop they push the water to the older properties. My yard has never flooded until this year with all the new development	Let the neighborhood decide
185	Amy Sandler *Ormond By the Sea*	All of the above	We are choking with overdevelopment. I am not confident that having industrial production is necessary for our area	A non sectarian private or charter school
186	Crabb Family *Tomoka Estates*	We are against this development due to the increased traffic and impacts on our already strained health and safety services.	Our roads are already in need of repair and maintenance so these added families will only increase another area our community is struggling with.	Make it a nature park.
187	Douglas Widnall III *Tomoka Meadows*	Traffic	Environmental Concerns	I would like to see it become a golf course again,
188	Nancy DeLuca *Trails North Forty (former Trails homeowner)*	#1: alteration of neighborhood character and loss of quiet enjoyment for people and wildlife	#2: I don't like the fact that the developers assume they can change the zoning. Just because they purchased the property doesn't make them entitled to do what they want with it	I would like to see the city or county purchase the property and maintain it as a public golf course
189	John Chadwell *Village of Pine Run*	Added traffic . Added density which is inconsistent with the surroundings. .	Overcrowding the schools and stressing our infrastructure	The golf course becomes "green space"
190	Chrisann Joson *Coquina Point, parents live in Tomoka Oaks*	Reduced property value	Traffic	Golf course restored!!
191	Missy Ascik *Beachside*	Traffic	influx of people and lack of infrastructure. Roads, schools, hospitals	community park with community garden, walking trails and open areas
192	Al Wilson *Other Ormond Beach neighborhood*	Traffic concern in and out of Tomoka Oaks and the Trails and along the Nova Rd and Granada corridor. The homeowners at the entrances of both communities will suffer loss of property value as well.	The shopping center at the Trails is already overflowing, Publix is crazy most days and all the restaurants are booked as well. Can't imagine adding 250-300 homesites in that area.	Perhaps larger estate lots with lots of greenspace. A 9 hole par 3 with a community clubhouse as well.

	Resident Name & Neighborhood	#1 Concern with Tomoka Reserve Application	#2 Concern with Tomoka Reserve Application	In an ideal world, what would you like to see happen to the Sam Snead Golf & Country Club property?
210	Rick and Linda Beadel *Other Ormond Beach neighborhood*	Increased traffic, loss of quiet enjoyment, reduced property values,	It should remain a golf course or sanctuary. This is what the people that bought in Tomoka Oaks thought they were getting. I support their efforts because if it can happen to them it can happen anywhere.	devoped as a sanctuary preserve
211	Ron Joson *Other Ormond Beach neighborhood*	Changing the landscape of the Tomoka Oaks community	Traffic congestion	Rebuild golf course
212	Shirley James *Other Ormond Beach neighborhood*	Traffic, not appropriate infrastructure to handle all the new building and you already can't get a bed at Advent. Overnight stays in the ER hallway are unacceptable.	Those who purchased gold course property and paid higher taxes all those years have lost the value of their location.	Redevelop as a 3 par, driving range. Our kids grew up playing gold and tennis there - such a shame.
213	Suzanne Scheiber *Other Ormond Beach neighborhood*	overdevelopment causes all of these issues. We are behind on medical services, infrastructure, and basic planning for Ormond Beach. If I have to choose one then infrastructure.	loss of quality of life which is all encompassing of many items to consider that you name in #1.	green space open to the public
214	Tamisue Wills *Other Ormond Beach neighborhood*	Traffic	Overcrowding of schools	Park
215	The Kennedy Family *Other Ormond Beach neighborhood*	Increased traffic on already crowded Nova Road and Granada Blvd. would add crucial time for ambulance, fire and police responders.	The character of the community would be greatly diminished and decrease property values.	People bought homes in Tomoka Oaks with expectations that the golf course area would remain community property. That would be honored in a perfect world.
216	Don Miller *Daytona Beach*	home values will plummet	clear cutting of land	City and ECHO should purchase all perimeter golf course holes, return to a golf course, and lease management of course. Leave center only for residential building..
217	Kory Lostaglio *Realtor/former Tom.Oaks*	I understand everyone's right to profit from real estate acquisitions, I feel there are far too many residences planned for this area. Having this many homes will affect everything negatively except of course for the county tax & investor profits.	This many homes puts a burden on everything, traffic especially.	I think a community built for the elderly with some single family, some condos and a medical facility is much wiser. It will cut down on the traffic as most people living there won't be driving. It could be a perfect retirement village.
218	Ann Johnson *Port Orange*	The damage it will cause to surrounding communities, like flooding.	Traffic. The infrastructure is not capable of handling all the traffic that comes with such development.	Return to natural by being purchased by city or county.
219	Constance Colby *Close residential neighborhood*	Depriving people who bought on a golf course their rights to open space by. Turning the golf course into an overcrowded slum area.	Traffic both through the Trails and Nova Road which is already a death trap which plans are to narrow it.	Revert to a golf course, maybe public with memberships. We need one as so many have closed and there are lots of retirees here.
220	Ryan Firmin *Concerned vacationer to the area*	The capacity to ruin a very desirable neighborhood by stuffing in houses like sardines	Increased need for medical services which would delay emergency care	Public park
221	Megan cody *Out of state*	Traffic	Loss of charm. I've been coming to visit family in Tomoka Oaks since 1991 and love the quaintness of this special place. If this place looses its charm our family will have to find another place to come and stay when we are in the area.	the project is too big. This should be a park, a green space or at the most 119 homes.

THERIAQUE & SPAIN LAW FIRM

Ormond Beach Planning Board
22 South Beach Street
Ormond Beach, Florida 32174

Re: *Tomoka Reserve – PRD-2022-043*

Dear Chairman Thomas & Planning Board Members:

Our law firm represents Carolyn Davis and a consortium of homeowners within the Tomoka Oaks Country Club Estates subdivision in Ormond Beach, Florida ("Tomoka Oaks"). At its regular meeting on ***Thursday, July 13, 2023***, the Ormond Beach Planning Board ("Planning Board") is scheduled to consider the above-referenced project, which seeks to rezone and convert the existing Tomoka Oaks golf course into 276 single-family residential lots. For the reasons discussed herein, our clients oppose the proposed redevelopment of the golf course property and respectfully request that the Planning Board recommend ***denial*** of the proposed rezoning.

A. General Factual Overview

Briefly stated, in April 2021, Triumph Oaks of Ormond Beach, LLC ("Triumph Oaks"), purchased the Tomoka Oaks Golf & Country Club ("Golf Club") for approximately $2,600,000. Thereafter, Triumph Oaks filed an application with the City of Ormond Beach ("City") seeking to rezone the golf course property to Planned Residential Development (PRD) and redevelop the golf course with 276 single-family residential lots. Based upon such rezoning application and Triumph Oaks' proposed plans to permanently close the Golf Club and convert the golf course into 276 single-family lots, the issue has arisen as to whether the property is restricted to use as a golf course, either expressly or impliedly.

As discussed herein and based upon the historical and recorded documentation relating to Tomoka Oaks, our clients maintain that the Golf Club property is subject to either an express covenant or an implied covenant limiting the use of the property to a golf and country club, golf course, and related recreational uses. Accordingly, our clients assert that the proposal to convert

Tallahassee	***Orlando***

Tallahassee, Florida 32308	Orlando, Florida 32804
(850) 224-7332	(407) 347-5388
Fax: (850) 224-7662	Fax: (407) 264-6132

www.theriaquelaw.com

the Golf Club property into 276 single-family residential lots is not permissible and the requested rezoning should be ***denied***.

B. The Golf Club Restriction

In 1961, the City approved plats for both the Golf Club (f/k/a Sam Snead Golf & Country Club) and Tomoka Oaks Country Club Estates Unit 1.[1] The Plat for Unit 1 of the Tomoka Oaks Country Club Estates subdivision contained 105 residential lots, including approximately 55 residential lots bordering the golf course.[2]

In conjunction with the development of Unit 1 of Tomoka Oaks, the developer recorded "Restrictions Tomoka Oaks Country Club Estates, Unit #1, Ormond Beach, Florida" ("Unit 1 Covenants").[3] Notably, Paragraph 10 of the Unit 1 Covenants states:

> The Grantee [*i.e.*, lot owner] shall automatically become a member of the Tomoka Oaks Homeowners Association, a non-profit corporation comprised of all lot owners in Tomoka Oaks Country Club Estates . . . .

Paragraph 11 of the Unit 1 Covenants expressly prohibited the developer from releasing in whole or in part any restriction or reservation set forth in Paragraph 10.

Thereafter, on or about January 1, 1963, Tomoka Oaks, Inc., entered a 99-year "Lease" with Tomoka Oaks Golf and Country Club, Inc., for the golf course property.[4] Paragraph 3 of the Lease, entitled "Use," provided in pertinent part:

> ***The demised premises shall be used perpetually for a country club and related uses***. . . . ***This provision shall survive the lease*** and be included in any deed but the deed restriction may be waived by a resolution of two-thirds (2/3) of the Board of Directors of the Lessee with the concurrence of two-thirds (2/3) of the members of said Lessee and the concurrence of two-thirds (2/3) of the members of Tomoka Oaks Homeowners Association. . . .[5]

On or about October 30, 1963, Tomoka Oaks Golf and Country Club, Inc., executed a "Surrender of Lease."[6] As noted above, however, the limitation that the subject property be "used perpetually for a country club and related uses" survived the Lease per the express terms of Paragraph 3 therein.

---

1 *See* Book 25, Page 61, Official Records of Volusia County, Florida; *Id.* at Book 25, Page 58.

2 *See id.* at Book 25, Pages 58 and 59.

3 *See id.* at Book 431, Page 32.

4 *See id.* at Book 516, Page 360.

5 *See id.* at Page 362 (emphasis supplied).

6 *See id.* at Book 585, Page 155.

Following the Surrender of Lease, Tomoka Oaks, Inc., conveyed the golf course property to Ralph B. Frederick, Trustee, via Warranty Deed dated December 12, 1963 ("1963 Warranty Deed").[7] Notably, the 1963 Warranty Deed for the golf course property provided in pertinent part:

> ***The above described property shall be used perpetually for purposes of a golf and country club, golf course, and related uses,*** and in the event that party of the second part, or its successors in interest, ***fail to utilize said property exclusively as a golf and country club, golf course, and related uses***, and the property not be sold to Tomoka Oaks, Inc., Tomoka Oaks Golf and Country Club, Inc. or Tomoka Oaks Homeowners Association as specified in the preceding paragraph, ***then the above described property shall automatically revert*** to and become the property of party of the first part . . . .
>
> ***The aforesaid reverter clause specified in the last preceding paragraph may be released or modified*** by resolution concurred in by two-thirds of the entire board of directors of Tomoka Oaks, Inc. at any time after ten years after the date of recording of this Deed; provided that if Tomoka Oaks, Inc. shall have disposed of four-fifths (4/5) of the lots in Tomoka Oaks Country Club Estates, then the foregoing right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks Homeowners Association, Inc., to be exercised by resolution of two-thirds (2/3) of the Board of Directors of the Tomoka Oaks Homeowners Association, Inc.[8]

Consistent with the terms of the surrendered Lease, the 1963 Warranty Deed expressly provided that the subject property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." Moreover, while the 1963 Warranty Deed included language and a process for the release or modification of the "reverter clause," there is no language in the 1963 Warranty Deed authorizing the release or modification of the actual restrictive covenant limiting the use of the property to a "golf and country club, golf course, and related uses."

On or about February 18, 1969, Tomoka Oaks, Inc., purported to pass a "Resolution" to effectuate the sale of the golf course property to Ormond Ocean Homes, Inc.[9] Therein, Tomoka Oaks, Inc., purported to "release . . . its right of first refusal" and "further releases the reverter clause contained in [the 1963 Warranty Deed], such release of reverter to become effective December 13, 1973, the release date specified in such reverter clause."[10] Relying upon such Resolution, Tomoka Oaks, Inc., executed a "Release" on or about June 16, 1971, purporting to

---

7 *See id.* at Book 585, Page 157. At the time of such conveyance, Ralph B. Frederick was also apparently the President of Tomoka Oaks, Inc.

8 *See id.* at Page 159 (emphasis supplied).

9 *See id.* at Book 1238, Page 246.

10 *See id.* at Page 248.

release its "right of first refusal" and the "reverter clause contained in [the 1963 Warranty Deed], such release of reverter to become effective December 13, 1973, the release date specified in such reverter clause."[11]

Based upon the foregoing Resolution and Release, Triumph Oaks and/or its representatives have suggested to the City that the use restriction imposed upon the golf course property is no longer valid or in effect. Our clients maintain that this view is legally flawed and without merit.

As reflected above, the 1963 Lease for the golf course property expressly provided that "[t]he demised premises shall be used perpetually for a country club and related uses" and that such "provision shall survive the lease." Additionally, and consistent with the 1963 Lease, the 1963 Warranty Deed expressly provided that the property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." While the 1963 Lease mentions a process by which such use restriction could potentially be waived, the historical documentation presented to our office does not establish that such process was ever followed – *i.e.*, concurrence of two-thirds of the Lessee and its members and two-thirds of the members of the Tomoka Oaks Homeowners Association.[12]

Further, while the 1963 Warranty Deed included language and a process for the release or modification of the "reverter clause," there is no language in the Warranty Deed authorizing the release or modification of the actual restrictive covenant limiting the use of the property to a "golf and country club, golf course, and related uses." Rather, the 1963 Warranty Deed unambiguously states that the subject property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses."

Lastly, reliance upon the 1969 Resolution and the 1971 Release to claim that the use restriction was somehow waived or released is misplaced. Even assuming the 1969 Resolution and the 1971 Release are valid – which is questionable – neither document purports to release, waive, or otherwise modify the use restriction.[13]

---

[11] *See id.* at Book 1307, Page 89.

[12] The historical documentation provided to our office, including newspaper articles, reflect the existence of a "Tomoka Oaks Homeowners Association" during the subject timeframe.

[13] The 1969 Resolution and the 1971 Release are of questionable validity given that they purport to "prospectively" release the "right of reverter." By its own terms, the 1963 Warranty Deed provided that Tomoka Oaks, Inc., could release or modify the reverter clause only by resolution "at any time ***after*** ten years ***after*** the date of recording of this Deed" and only if Tomoka Oaks, Inc., had not yet disposed of four-fifths (4/5) of the lots in Tomoka Oaks at such time. *See* Book 585, Pages 158-59, Official Records of Volusia County (emphasis supplied). Contrary to the plain language of the 1963 Warranty Deed, Tomoka Oaks, Inc., purported to pass a resolution more than four (4) years ***before*** the ten (10) year anniversary of the recording of the 1963 Warranty Deed seeking to release the right of reverter. Further, the fact that the 1969 Resolution and the 1971 Release purported to "delay" the effectiveness of such release until December 13, 1973 (*i.e.*, ten (10) years after the 1963 Warranty Deed was recorded) is irrelevant. Not only does it ignore the fact that the 1963 Warranty Deed required the resolution itself to occur ten (10) years ***after*** the

As discussed above, the 1969 Resolution and the 1971 Release purport to release the "right of first refusal" and the "reverter clause." Nothing in the express language of the 1969 Resolution or the 1971 Release, however, purports to waive, release, or otherwise modify the use restriction providing that the property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." Accordingly, based upon the foregoing and the plain and unambiguous language in the 1963 Lease and the 1963 Warranty Deed, our clients maintain that such use restriction is valid and effective and was never lawfully released, waived, or otherwise terminated. On this basis alone, the proposed conversion of the golf course into 276 single-family residential lots would be prohibited and the Planning Board should recommend ***denial*** of the proposed rezoning.

C. Implied Restriction Limiting The Tomoka Oaks Property To Use As A Golf Club

In addition to the above, it is well established that a "restrictive covenant" may "arise by implication from the conduct of parties or from the language used in deeds, plats, maps, or general building development plans."[14] In this regard, courts have recognized:

> If there is a common plan of development that places restrictions on property use, then such restrictions may be enforced in equity. "A court's primary interest in equity is to give effect to the actual intent of the grantor . . . by looking not only to language in deeds, but variously to matters extrinsic to related written documents, including conduct, conversation, and correspondence."[15]

Consistent with the above, Florida courts have held that use restrictions may also be implied based upon notations denoted on plats or maps:

> Whenever the owner of a tract of land subdivides the same into lots and blocks, lays off streets and other public ways and designates portions of said lands to be parks[,] playgrounds[,] or similar facilities or uses similar words calculated to encourage prospective purchasers to buy said lots, and actually sells lots with reference to the plat, he becomes bound to his grantees by the plat and the representations thereon. As the maker of the plat and the one who selects the words used thereon it will be construed against him.

---

recording of the Deed, but it ignores the fact that Tomoka Oaks, Inc., did not have any authority to adopt any such resolution if four-fifths (4/5) of the lots in Tomoka Oaks had been disposed of by such time.

[14] *See Skyline Woods Homeowners Ass'n. v. Broekmeier*, 805, 758 N.W.2d 376, 387 (Neb. 2008).

[15] *See id.* (citation omitted); *see also Strader v. Oakley*, 410 So. 2d 954, 955-56 (Fla. 1st DCA 1982) (recognizing implied restriction that limited construction to only single-family residences).

> Common honesty requires that he perform that which at the time of conveyance he represented he would perform.[16]

Turning to the instant case, several courts have examined implied restrictions and the requirement to maintain or operate property as a golf course when developed in conjunction with a surrounding residential subdivision. For example, in *Shalimar Association v. D.O.C. Enterprises*, 688 P.2d 682 (Az. Ct. App. 1984), the court held that there was an implied restrictive covenant to maintain property as a golf course even though there were no express covenants burdening the golf course property on behalf of the adjoining homeowners. The court concluded that the common plan of development, which included a golf course, combined with the representations made to the purchasers about the maintenance of the golf course and the adjoining homeowners' express covenants, created an implied restrictive covenant that the land be used only as a golf course.

Similarly, in *Ute Park Summer Homes Association v. Maxwell Land Grant Co.*, 427 P.2d 249 (N.M. 1967), the New Mexico Supreme Court found that an implied restriction existed requiring the subject property to be used as a golf course. In so doing, the court focused on the representations made to prospective purchasers and the materials used in the sales of the lots which pictured an area marked "golf course." The court reiterated that, when a map or plat showing a park or other open area is used to sell property, "the purchaser acquires a private right, generally referred to as an easement, that such area shall be used in the manner designated," and such private right "is not dependent on a proper making and recording of a plat for purposes of dedication."[17]

Numerous other courts have concluded that the facts surrounding the initial development of properties as golf course communities and the marketing of lots in such communities to prospective purchasers created an "implied restrictive covenant" limiting the use of the subject properties to a golf course. In reaching this conclusion, the courts have examined such things as: (1) the plats, maps, and drawings of the community; (2) advertisements, brochures, and marketing materials; (3) common schemes or plans of development; (4) recorded covenants; (5) general informational documents regarding the community; and (6) lot premiums and purchasers' reliance upon the existence of the golf course in acquiring their lots.[18]

---

[16] *McCorquodale v. Keyton*, 63 So. 2d 906, 910 (Fla. 1953); *see also Boothby v. Gulf Props. of Ala.*, 40 So. 2d 117 (Fla. 1948). A common plan or scheme of development is a well-recognized principle in Florida law. *See Hagan v. Sabal Palms, Inc.*, 186 So. 2d 302, 307 (Fla. 1966).

[17] *Ute Park Summer Homes Association v. Maxwell Land Grant Co.*, 427 P.2d 249, 253 (N.M. 1967).

[18] *See Knight v. City of Albuquerque*, 794 P. 2d 739 (N.M. Ct. App. 2014) (holding property denoted on subdivision plats as a golf course must remain either a golf course or open space, stating "a developer will not be allowed to induce purchasers to buy property by purporting to include open space such as parks or golf course in a subdivision plat, only to subsequently change the uses of those open space areas"); *In re Heatherwood Holdings, LLC v. HGC, Inc.*, 746 F.3d 1206 (11th Cir. 2014) (holding evidence of common scheme of development that included golf course property as an integral part and as an inducement to purchasers of residential lots

Here, the historical documentation relating to Tomoka Oaks and the Golf Club establishes the following: (1) a common developer (Tomoka Oaks, Inc.) with a plan of development for a residential community surrounding an 18-hole championship golf course; (2) an approved unified master plan for Tomoka Oaks, which included the golf course and the residential lots; (3) references to "golf course" on the recorded plats for various portions of Tomoka Oaks; (4) recorded restrictions, as previously discussed, providing that the golf course property shall be used "for purposes of a golf and country club, golf course, and related uses"; (5) recorded residential covenants that reference the golf course and authorize reduced setbacks to take advantage of the adjoining golf course; (6) marketing and sales materials for the residential lots depicting the common development plan, including the golf course; (7) evidence of lot premiums being charged for residential lots with golf course frontage; and (8) evidence that successors developers had actual, as well as constructive, notice of the approved master plan and common plan of development. Additionally, it is indisputable that residents within Tomoka Oaks purchased their properties in reliance upon or because of the Golf Club.

Accordingly, even assuming the express covenant restricting use of the subject property to a golf and country club is no longer valid as Triumph Oaks has erroneously suggested, the above-summarized facts and cited case law would establish that, at a minimum, the use of the Golf Club property is limited to a golf course or similar open space purposes by virtue of an implied restrictive covenant. Simply put, whether by an implied grant, implied restriction, or estoppel, such restriction would prevent the subdivision and development of the Golf Club property with 276 single-family residential lots as currently proposed. Thus, on this additional basis, the Planning Board should recommend ***denial*** of the proposed rezoning.

D. Conclusion

In sum, as discussed herein, nothing in the express language of the 1969 Resolution or the 1971 Release purports to waive, release, or otherwise modify the use restriction imposed via the 1963 Lease and the 1963 Warranty Deed that the property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." Thus, based upon the foregoing and the plain and unambiguous language in the 1963 Lease and the 1963 Warranty Deed that the use

---

therein created an implied restriction limiting the use of such property to a golf course); *Ponderosa Pines Golf Course, LLC v. Ponderosa Pines Prop. Owner's Ass'n*, 2013 WL 4515569 (N.M. Ct. App. 2013) (holding "equitable servitude in favor of the individual subdivision property owners precluded Plaintiff from changing the use of the golf course"); *Skyline Woods Homeowners Ass'n.*, 758 N.W.2d at 390 ("We conclude that homeowners who bought their property relying on the proximity and existence of the golf course should be protected by implied restrictive covenants that the property be maintained as a golf course. We therefore agree with the district court that an implied restrictive covenant requiring that it be used only as a golf course burdens and runs with the golf course property."); *see also Victorville W. Ltd. P'ship v. Inverrary Ass'n*, 226 So. 3d 888 (Fla. 4th DCA 2017) (refusing to cancel golf course covenant even though course had become unprofitable, concluding that "the golf course preserves the character of the community and provides residents with a pleasant view" and, thus, "must be enforced because it remains a 'substantial value to' the surrounding residences").

restriction was to be "perpetual," our clients maintain that such use restriction is still valid and in effect. Accordingly, on this basis alone, our clients respectfully submit that the Planning Board should recommend ***denial*** of the proposed rezoning, which seeks to improperly convert the Golf Club property into 276 single-family residential lots, or otherwise table the matter until such time as a judicial determination is made regarding the continued validity of the express restrictive covenant.

Further, even assuming the express restrictive covenant is no longer valid and in effect, as Triumph Oaks has erroneously suggested, our clients maintain that the Golf Club property is nevertheless subject to an implied restrictive covenant, thereby limiting the use of such property to a golf and country club, golf course, and related recreational uses. On this additional basis, our clients respectfully submit that the Planning Board should recommend ***denial*** of the proposed rezoning or otherwise table the matter until such time as a judicial determination is made regarding such implied restriction.

Our clients appreciate the Planning Board's attention to this matter of great community importance to the residents of Tomoka Oaks and respectfully request that the Planning Board recommend ***denial*** of the proposed rezoning. Please do not hesitate to contact me if you have any questions or need additional information,

Sincerely,

S. Brent Spain

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Steven Spraker, Commissioners and Mr. Mayor,

My name is Denise Corley. I am a homeowner in Tomoka Oaks subdivision and our home abuts the Sam Snead Golf Course and Country Club parcel. We purchased our home on S. St. Andrews in December 2019.

Buying a home on a golf course and paying for that amenity luring buyers with open space views is nothing more than a SCAM if the amenity disappears which is exactly what is happening here.

The city government needs to step-in and stop this bait and switch.

At any time a golf course can be sold off as developable real estate, completely ignoring the property rights of all those who purchased on the golf course and paid a higher value for such properties.

I support changing the zoning of the Sam Snead Golf Course and Country Club to Open Space/ Recreational zone since that is what the land has been since the conceiving of the Sam Snead Golf and Country Club. Tomoka Oaks Estates have been sold to buyers as a golf course community since the1960's.

Stripping the PRD zone from the Sam Snead Golf and Country Club eviscerates the valuable input the community and the city government imposes on the investor developers.

The 2006 Tomoka Village PRD was approved after much debate and concern for the homeowners of Tomoka Oaks and the larger community. In 2006 the agreement was 119 townhouse units and 3 estate homes and retaining the 18 golf course (open space inpurpetuity), tennis courts and community pool. That low density PRD preserved the golf course
and the view and buffer amenities homeowners purchased.

Mr Rubin and his investors bought Sam Snead Golf and Country Club, the land has a PRD zone. Having been unable to get their PRD plan passed they are now asking for an R-2.

Mr. Sanders, hired by Tomoka Reserve Investors to defend the R-2 zone change, states his clients have no zoning and no way to "utilize their private property rights" but this is only because they refuse to utilize the PRD process. Mr. Sanders claims the commissioners have only to look at whether the property qualifies for R-2, not the best zoning for this particular property. When the Developers bought the property it came with restrictions -a PRD in the deed that was attached to the land to protect it from R-2 zoning because the land was integral to the Planned Community of Tomoka Oaks Estates which totally surrounds the golf course land with just one parking lot entrance. Commissioners did the right thing in 2006 by attaching the PRD to the land for this very reason to protect Tomoka Oaks, the Trail, Esconodido and Talaqua from an R-2 zone.

In the submission for the zone change Mr. Merrell representing the investors, on pages 16-18, a-j, submits plenty of discussion on whether this R-2 zone change is appropriate for this particular piece of property which opens the door to all the discussion that has taken place over the PRD, too many homes will cause undue burden for the community. The city SPRC, planning board and commissioners voted against the PRD because the developers plan too many lots and too dense. It is a valid refusal for the R-2 zone change because it would allow for more lots than their proposed PRD which was opposed by the city of Ormond Beach in the first place. Remember that the city of Ormond Beach has the obligation to "protect from harm and inordinate burden on the private property rights of citizens"-178 private property homeowners on the golf course and 369 private property homeowners of Tomoka Oaks Estates, a total of 547 private property owners.

An article in the Daytona Beach News Journal dated Nov 5th 1989 titled, "*Tomoka Oaks time capsule"* states, " There is a 30' buffer zone behind all Oaks homes abutting the golf course: the typical city setback is 20 feet.". So not only do the golf course homeowners lose their property value in terms of a view amenity but also lose the 30' buffer zone that was designed into the golf course plan as a further amenity. This 30' buffer is home to many of the beautiful trees on the course, R-2 zoning would have no protections for these trees.

R-2 zoning has grave implications for Tomoka Oaks, The Trails, Escondido Condominiums and Talaqua; it isn't just about the land being applicable to zone R-2, there are wide ranging problems that will cost the community dearly.

I have submitted a copy to the 1989 article and a page of photos from just one house on the golf course. Sam Snead Golf and Country Club should be zoned Open Space to stop developers scamming homeowners.

Thank you'
Denise Corley

DBNJ 11/5/89

Tomoka Oaks time capsule

Certain people and events nurtured the growth of Ormond Beach's first subdivision into the genteel, established community known as Tomoka Oaks:

■ The Tomoka Oaks subdivision master plan, calling for a 521-unit single/family development, was approved 33 years ago in May 21, 1956. Then followed approval of Unit VI, for 11 single-family homes.

The last segment plan for 69 single-family homes in The Oaks was approved October, 1977, according to planning department records.

■ The original Oaks architect was Milton Pepper. A later design, submitted by engineer J. Phillips was dropped when the city rejected it.

■ News-Journal files indicate an Arizona-based corporation, Sovereign Industries, Inc., owned the Oaks in 1970, and rebuilt the clubhouse facilities, added nine holes to the golf course and developed more homes.

■ According to Jerry Upson, one of the Oaks first builders, golf home lots sold for $8,900 and $10,000 in the sixties. Today's price for the same lot: between $60,000 and $70,000.

■ Canadian-born athlete Lawson Mitchell served as Tomoka Oaks Golf & Country Club head golf pro from 1967 to 1980. He was vacationing on the West Coast when The News-Journal tried to reach him for this story.

■ In 1977, radiology physician Dr. Richard Ryals, and two partners signed a lease-option agreement with prominent local businessman Milton Pepper to buy the golf course and club.

Dr. Ryals is now sole owner of the club.

■ Retired stockbroker Rockwell V. "Rocky" Collins named major Oaks thoroughfares after famous golf courses around the world: St. Andrews for Scotland's green; Rio Pinar after an Orlando course.

■ The largest golf tournament played at the Oaks was the Florida Amateur, in June, 1970, according to News-Journal files.

■ Rocky Collins' home at 28 N. St. Andrews Dr., built by Tom Kittrell in 1962, is the Oaks' oldest.

■ There's a 30-foot buffer zone behind all Oaks homes abutting the golf course; the typical city setback is 20 feet.

■ The average Oaks lot size is 109 square feet, the largest of any area subdivision.

MEMORANDUM

TO: Ormond Beach City Commission
CC: S. Spraker, AICP, Planning Director
FROM: Thomas Harowski, AICP, President
SUBJECT: Tomoka Reserve Zoning Application
DATE: March 22, 2024

The developers of the proposed Tomoka Reserve development have abandoned their application for a planned residential development and are seeking standard zoning for the tract requesting R-2 Single Family zoning be applied. The existing Tomoka Oaks Subdivision is zoned R-2, but it is not automatic that rezoning the subject parcel to R-2 is mandatory or even the most appropriate action by the city. This report is being offered to explore other options for consideration. Let's begin with a few statements of fact.

- The subject property is designated as low density residential by the City's comprehensive plan.
- Low density residential allows development up to 4.3 units per acre, but there is no guarantee or firm entitlement that every low-density residential parcel can be developed to the maximum level allowed by the land use classification.
- The current zoning of the subject property is Planned Residential Development (PRD), but there is no active development agreement outlining the development entitlements.
- The eventual zoning assigned to the subject property needs to be consistent with the future land use designation and compatible with the surrounding community.
- The original design of the overall Tomoka Oaks neighborhood included a residential subdivision and an 18-hole golf course and country club that was integral to the local community and functioned, in part, as community open space.
- In addition to golf, for most of its existence the Tomoka Oaks Golf and Country Club included swimming and tennis as well as community space and a restaurant in the clubhouse. Club members and the general public could use the restaurant and many Tomoka Oaks residents enrolled children in the summer camp

programs. Neighborhood association meetings were held at the clubhouse, so the facility was integrated into the neighborhood as a social center as well as being community open space.

- The actual development density of the Tomoka Oaks subdivision is about 1.27 units per acre when the subject property is properly recognized as neighborhood open space per the original subdivision design.

- Regardless of a traffic study finding that the proposed development would meet level of service standards, the Tomoka Oaks neighborhood will still be impacted by a significant level of traffic which will reduce traffic safety and increase hazards for pedestrians and cyclists.

Analysis

The Community Planning Act (F.S. 163.3164 (9)) defines compatibility as:

> "… a condition in which land uses or conditions can coexist in relative proximity to each other in a stable fashion over time such that no use or condition is unduly negatively impacted directly or indirectly by another use or condition."

The City of Ormond Beach comprehensive plan supports the state definition with Future Land Use Element Policy 1.1.3 which in part reads "Preserve the character of existing neighborhoods by not allowing the intrusion of land uses that would threaten to alter the neighborhood character…." The fact that a land use type may be the same, say single-family adjacent to single-family, does not mean that the new land use cannot be intrusive if it alters the neighborhood character.

As discussed extensively during the hearings on the applicant's request for PRD approval, the planned construction of new housing on the subject property is a clear intrusion into the Tomoka Oaks neighborhood. The only place where the proposed development does not abut existing houses is literally where the driveway into the former clubhouse is located. This is the "hole in the donut" concept that was extensively discussed and accepted by both the Planning Board and the City Commission as a clear element of impact by the proposed development on the existing neighborhood. Ample evidence of this finding is available in the minutes of the September 26, 2023, meeting. Because of the intrusive nature of the proposed development on the existing neighborhood, the requirement for a compatible development demands that impacts from the new development follow a density and lot size compatible with the existing neighborhood and that the project compensate Tomoka Oaks for the loss of community open space.

A zoning designation assigned to a property must be consistent with the comprehensive plan as well as being compatible with the area surrounding the proposed development. Section 2-02 of the City's land development code includes Table 2-2 Future Land Use Map Designations and Compatible Zoning Districts. For low density residential land uses, the table lists the following classifications:

Subject:	Tomoka Oaks and the Trails Have a Traffic Problem Now, What Happens After Tomoka Reserve is Built?
Date:	Wednesday, April 3, 2024 11:22:02 AM

[External Email-Use Caution] - OB/IT Helpdesk

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Mr. Spraker,

The neighborhoods of Tomoka Oaks and the Trails, between Nova and US1, already have a dangerous traffic problem, as noted by the City of Ormond Beach. The golf course was designed to accommodate perhaps 50 cars, except for special events, at any one time. Tomoka Reserve will add 600+ cars, all piling through one road, Tomoka Oaks Blvd, a traffic nightmare created by the developer. **The developer (Rubin, Barshay and Velie) have indicated no changes are necessary to their entranceway to accommodate 12x current traffic.**

1. Ormond Beach had scheduled speed tables on S. St. Andrews Dr over a year ago, but has since cancelled the installation for unknown reasons.
2. Volusia County has been reported to be the deadliest county in Florida with 648 deaths, 11.19 per 10000 people (see Daytona News-Journal 4/2/24-Volusia Tops US Traffic Fatality)
3. A woman pedestrian was killed by a speeding driver on S. St. Andrews Dr in Tomoka Oaks.
4. Tomoka Oaks has no sidewalks or safe places for walkers, bicycles, strollers, kids playing, golf carts, etc. Trucks and cars parked in the street make drivers and pedestrians play a deadly game of dodgeball.
5. Tomoka Oaks and the Trails do have blind curves, hills, narrow streets and many traffic islands.
6. I saw two trucks racing side by side NE up S. St. Andrews Dr two months ago over the blind hill at 35 S. St. Andrews Dr.
7. Distracted drivers regularly speed through Tomoka Oaks, The Trails, Escondido and Talaquah.
8. Only one of two newly installed radar speed signs is working and it is not slowing down speeders, they ignore the signs.

This is strictly a neighborhood safety issue and I suggest you:

1. Limit the number of cars/trucks by restricting the number of houses built in Tomoka Reserve. The 2006 approved PRD had a limit of 122 houses.
2. Consistently enforce speed limits with speed tables and police patrols.

Help us limit the number of additional deaths and injuries that will result from building too many houses in the Tomoka Oaks Golf Course. Or buy the property and use it for open space in our increasingly crowded beautiful Ormond Beach. Current property owners have rights too.

Thank you,

Tom Fitzgibbon - Tomoka Oaks

R-1 Residential Estates
R-2 Single Family Low Density
R-2.5 Single-Family Low-Medum Density
R-3 Single Family Medium Density
Planned Residential Development

The following table provides some basic information about each of the classifications that are consistent with the low-density land use and may be compatible with existing developments.

Zoning District	Units/ Acre	Lot Size	Lot Width	Lot Depth	Lot Coverage
R-1	2.17	20,000	100	150	75%
R-2	4.30	10,000	100	NA	75%
R-2.5	4.98	8,750	90	NA	75%
R-3	5.05	8,625	75	NA	75%
PRD	Negotiated				

The current zoning of the property is planned residential development (PRD) which needs to be completed with a development agreement specifying the provisions governing the use and development of the property. This is the process used for all PRD properties in the City of Ormond Beach. While the applicants sought a PRD agreement that was not recommended by the Planning Board, the City Commission did not deny the application, but referred the proposal to the Planning Board for additional refinement. The City Commission has no obligation to abandon the PRD zoning until it is fully demonstrated that no development agreement under the PRD can be approved. **Since the proposed project never proceeded to a final vote, there is no affirmative evidence that the submitted proposal or a modified proposal cannot receive approval**.

Given the clear disparity between the developed character of Tomoka Oaks and the minimum dimensional standards of the R-2 zoning district, it is clear that the PRD zoning offers the best opportunity to maximize compatibility between the proposed project and the existing neighborhood development. It is clear from the Planning Board public hearings that there is a plan that they would consider acceptable. Note the comments of Mr. Galloway on page 18 of the September 26, 2023, meeting minutes; the comments of Mr. Thomas on page 20; the comments of Mr. Galloway and Mr. Thomas on page 22; and Mr. Galloway again on page 24. **These comments suggest that at least some members of the Planning Board would seriously consider a project size of 220 to 250 units, and that a range of lot sizes would be acceptable so long as the perimeter lots were predominantly the same size as the R-2 lot minimums**. The Tomoka Oaks Homeowners' Association has not taken a position on a project of this size.

While rezoning to R-2 would seem to be an easy choice for the subject parcel and would be consistent with the low-density land use, development of the project at minimum R-2 standards is inconsistent and incompatible with the existing Tomoka Oaks

neighborhood. The developed density of the neighborhood is 1.27 units per acre; about 25% of the allowable maximum density and about 50% of the proposed project density. **Given the direct impact of the proposed development on a significant number of units in Tomoka Oaks and indirect impacts on the entire neighborhood resulting from reduced open space, increased traffic, and lessened safety for pedestrians and cyclists, R-2 is not the best zoning choice.**

If density comparison between the current neighborhood and the proposed development is to be the key criterion for compatibility, the table above suggests that R-1 zoning is in fact the most appropriate standard zoning. This choice recognizes that Tomoka Oaks is developed well above the minimum R-2 standards, and that a project that approaches the minimum requirements for R-2 zoning is in fact not compatible with the current neighborhood.

Findings

It is indisputable that PRD zoning offers the best opportunity to maximize compatibility with the current neighborhood while remaining consistent with the comprehensive plan and future land use. The City Commission did not reject the PRD proposal. They expressed concerns about the plan and referred the request to the Planning Board to work on refinements. The applicants elected to abandon the process without the project ever coming to a final vote. It is clear from the Planning Board hearings that there is a path to an acceptable plan under PRD zoning that can be supported for City Commission review. The current zoning is PRD and there is no reason to approve any zoning other than PRD at this point in time.

If standard zoning is to be applied, R-1 density is more consistent with the developed nature of Tomoka Oaks. The resultant project under R-1 would yield a project density closer to the developed character of the neighborhood and it would lessen external impacts from traffic and from reduced public safety.

Commentary on the Application

As part of the application for rezoning, the applicants provided a project narrative that responds to questions posed in the application form and they cite compliance with several comprehensive plan policies. Some of their conclusions and statements in the narrative are debatable. The following comments offer a contrasting perspective given the positions laid out in the preceding analysis.

> *The proposed development conforms to the standards and requirements of this Land Development Code and will not create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare or quality of life. (From City Application)*

- The applicants align crowding with the maximum density allowed by the future land use classification. The proposed project does fall within the

allowable range set by the comprehensive plan, but the proposed project as presented would be about twice as dense as the existing neighborhood. The statement that the proposed development is a reuse of a failed golf course has no impact on the criteria identified in part of the application.

- Keep in mind that the nature of the former golf course property has much more coterminous property with the existing neighborhood than would a more typical new subdivision adjacent to an existing neighborhood.

The proposed development is consistent with the comprehensive plan. (From City application.)

- The requested R-2 zoning is consistent with the comprehensive plan, but it is not the only zoning category that meets the consistency test. The findings of this analysis are that PRD is the best option followed by R-1 Single-family and then R-2 Single Family.

- The applicant's response cites Policy 1.1.6, but the response really misses a key point of the policy. The policy is intended to promote a variety of housing types with duplex, townhouse, and multi-family specifically cited as varied housing types. The proposed development with R-2 single-family does not really respond to this point.

- The applicant's response cites Policy 1.1.7 regarding sound residential communities and quality housing, but the standard zoning option provides no assurance that "the development is comprised of residential homes of a quality and character that will promote a long-lasting, aesthetically pleasing residential neighborhood…" as they claim. Outside of the PRD format there is no vehicle to provide for an affirmative commitment to design and other community enhancements.

- The applicant's narrative repeatedly claims the project as an infill development. This is true in the sense that the project is located within the more developed core area of the city rather than at the outer periphery. However, it has been well established during the many public hearing on this project during the PRD review, that Tomoka Oaks and the former golf course is a unique condition in that the proposed development in entirely consumed within the existing neighborhood and is deserving of a more fine-grained treatment of the border between the two projects to provide at least a minimal level of compatibility.

Summary

It is important to recognize that an R-2 development proposal and zoning action taken some 60 years ago may not be the most appropriate and consistent zoning action today as the subject properties will have experienced changes over

time. Our data shows that the actual development density for Tomoka Oaks far exceeds the minimum standards for R-2 single-family and the minimum standards that we must expect the proposed development will follow. The new development will result in the elimination of critical open space in the community that was integral to the original design of Tomoka Oaks. The loss of open space and the increase in actual developed density, even within the R-2 standards, creates a burden on the existing neighborhood and leads to the conclusion that R-2 zoning may no longer be the most consistent option.

It is clear, and has been since the outset, the Planned Residential Development, is the best choice to mitigate impacts and preserve neighborhood character. The applicants have chosen to abandon the pursuit of a PRD agreement despite the clear indication that the Planning Board has expressed parameters that the board members believe will yield a sustainable agreement; and despite the fact that the City Commission has never taken a final vote on any proposal.

This analysis continues to suggest that a PRD is the best option to provide for development of the subject property. If density is to be the key measure of compatibility, then the City R-1 Single Family Residential zoning is the most consistent with the developed character of the neighborhood. Both options should be considered before any R-2 designation is applied.

Finally, it is appropriate to note that the applicants have made statements with regard to compliance with policies of the City's comprehensive plan that are debatable at best and inaccurate or irrelevant in other cases. In making its decision on the proposal, the City Commission should note that the stated compliance with comprehensive plan policies is challenged as noted above.

AGENDA ITEM

November 7, 2023 - City Commission

Number: 9.D

Section:	PUBLIC HEARINGS		
Item Category:	Public Hearing - Ordinances	**Res./Ord. No:**	2023-55
Strategic Goal:	Transportation & Community Development - Other		
Department:	Planning & Building		
Subject:	Tomoka Reserve, Issuance of a Development Order		
Summary:	This is an application submitted by Robert A. Merrell III, Esquire, Cobb Cole on behalf of the property owner, Triumph Oaks of Ormond Beach I, LLC, for the issuance of a development order for the Tomoka Reserve subdivision. The application seeks to allow the issuance of a development order for 272 single-family lots on approximately 147.94 acres under certain conditions and associated subdivision improvements. The subject property is currently zoned as PRD, Planned Residential Development, and is located at 20 Tomoka Oaks Boulevard. The subject property has a land use designation of “Low Density Residential” (LDR) and the zoning classification of Planned Residential Development. The land area for the application was platted in 1961 as the Sam Snead Golf and Country Club. The Tomoka Oaks Golf & Country Club included an 18-hole golf course, clubhouse, cart barn, and maintenance barn. On October 17, 2006, the City Commission approved Ordinance 2006-17 that authorized the following: 1. Zoning map amendment from R-2, Single-Family Low Density to PRD, Planned Residential Development; 2. The Tomoka Oaks Golf Village development order; 3. Development of 119 multi-family units (townhomes and condominiums) and 3 single-family homes, along with a re-designed golf course; 4. The property owner was to provide for covenants and restrictions that restrict the golf course to open space and golf course use with the development of residential use; and 5. A phasing plan for site development.		

The project development order expired in 2014 based on no permit activity. Because there was no construction, none of the development order conditions, including the covenant and restrictions for a golf course, were implemented. The applicant purchased the property in 2021 and has sought to implement a new development order to provide zoning entitlements for the property.

Planning Board reviewed the application for the issuance of a development order at the July 13, 2023, August 21, 2023, and September 26, 2023 meetings. The July 13, 2023 site plan showed a mixture of 50, 60 and 80 foot wide lots. There were approximately 30 individuals who addressed the Planning Board. This Planning Board meeting was continued to the August 21, 2023 meeting. After the advertisement for this meeting, the applicant submitted a new site plan and agreed to several recommendations of the Site Plan Review Committee (SPRC). The Planning Board deemed the changes material and required a new public hearing. At the September 26, 2023 Planning Board meeting, the Board reviewed an updated site plan that had two primary issues from the SPRC remaining: (1) lot widths along the perimeter and (2) 50 foot landscape buffer plantings and irrigation. There were approximately 20 individuals who addressed the Planning Board.

Planning Board recommended denial of the issuance of the development order by a 7-0 vote. During the deliberation of the motion, Planning Board members discussed several issues they desired to make the City Commission aware of. These items are as follows:

1. **Density**. Each board member expressed concern about the proposed number of lots. Board members indicated support of the SPRC recommendation of 100 foot wide lots on the perimeter. Additionally, some board members believed that all the lots (including interior lots) should be wider and have additional square footage. Board members discussed a wide range of allowed lots with most members in a range between 220 and 240 lots.
2. **50 foot buffer**. Board members stated that there should be a type 6 buffer where gaps exist and irrigation to newly planted landscape material.
3. **Traffic**. Board members stated that the traffic analysis is flawed based upon evidence and testimony provided and their experiences. Specific discussions included: (A) the existing diamond of Saint Andrews Drive and Tomoka Oaks Boulevard, (B) impacts to Tomoka Oaks and the Trails subdivision, (C) intersection impacts at Main Trail and West Granada Boulevard.
4. **Architectural design**. Board members sought a wide variety of architectural elevations. The comment of no cookie cutter

homes was provided. The Board focused on the distance between houses that could repeat building styles.

5. **Driveways**. Board members discussed a desire to have a longer driveway in order to stack vehicles on the house lots and not have on-street parking.

The Planning Board discussed the 2006 approval and the appropriateness of that development order. The 2006 development order has been provided as a City Commission attachment. Each of the Planning Board minutes are included in the City Commission packet.

Project discussion: This application is for the issuance of a development order under the existing PRD zoning designation. The PRD zoning includes additional site requirements such as additional natural preservation, common areas, and recreation areas. The PRD development order is a negotiated zoning district. The staff report provides detailed analysis of the project, environmental considerations, the history of the property, and detailed traffic analysis. It is important to note, this stage of development is solely for a zoning development order and additional construction details are required with the Preliminary Plat reviewed by the Planning Board and City Commission.

After the Planning Board review, there are two main issues that remain: (1) number of lots and (2) 50 foot buffer. The SPRC recommendation has been for a 100 foot lot width minimum along the perimeter of Tomoka Oaks. This recommendation is based upon (1) the R-2 minimum lot size is 100', (2) lot widths were identified as key issues at the pre-application neighborhood meetings, and (3) to provide compatibility to the existing lots. The Planning Board also expressed concerns with the interior lot widths. Regarding the second issue, the 50 foot buffer planting material and irrigation, the SPRC believes where there are gaps in the existing vegetation, these areas should be filled in with sufficient landscape material to create a buffer. SPRC staff also believe newly planted materials should have irrigation based on the Land Development Code.

Other key issues discussed by the Planning Board included traffic, architectural design, and driveways. For the traffic issue, the project went through an extensive traffic engineering study and included local road analysis which is not normally required in a traffic analysis. SPRC staff has hired an independent traffic reviewer who has deemed the project complete and accurate with all accepted transportation study regulations. The traffic analysis does not state the project would not create additional trips, but instead the project trips are within the Level of Services adopted by the Comprehensive Plan and project traffic improvements will be made. The architectural design has been a key review point and the Planning Board desired more separation between similar houses. The length of the driveway was brought up at the September 26, 2023 meeting. Board members expressed concern

	about short driveways having insufficient depth for adequate off-street parking.
Financial Impact:	There is no budget impact as the result of this application for the issuance of a development order.
Citizen Impact:	The Tomoka Reserve is a unique parcel of land that has single-family homes surrounding the perimeter. Residents have provided input at neighborhood meetings, through written correspondence, and testimony at public hearings. Key concerns have included (1) compatibility, (2) lot sizes, (3) buffers, (4) traffic, (5) property values, (6) preservation of the land as a golf course, (7) location of the emergency access easement, and (8) wildlife impact. Written project correspondence and input provided at the Planning Board meetings are included.
Recommended Action (Staff, Advisory Board and/or Other):	Planning Board recommended **DENIAL** (7-0 vote) of the proposed application for the issuance of the development order based on concerns regarding: (1) lot sizes and number of proposed units, (2) 50 foot buffer planting and irrigation, (3) traffic impacts, (4) architectural design concerns, and (5) length of driveways on the single family lots. The SPRC also recommends denial based on the analysis contained in the Planning Board staff report.

ORDINANCE NO. 2023-55

AN ORDINANCE AUTHORIZING THE EXECUTION AND ISSUANCE OF A PLANNED RESIDENTIAL DEVELOPMENT DEVELOPMENT ORDER FOR THE "TOMOKA RESERVE" SUBDIVISION, AUTHORIZING THE DEVELOPMENT OF 272 LOTS ON 147.94± ACRES TO BE LOCATED AT 20 TOMOKA OAKS BOULEVARD; ESTABLISHING CONDITIONS AND EXPIRATION OF APPROVAL; AND SETTING FORTH AN EFFECTIVE DATE.

WHEREAS, Triumph Oaks of Ormond Beach I, LLC, a Florida Limited Liability Company (the "Applicant/Property Owner"), has submitted an application to allow the development of a subdivision of 272 lots on 147.94± acres to be located at 20 Tomoka Oaks Boulevard, Volusia County parcel number: 3242-07-00-0010 (the "Property"), to be known as "Tomoka Reserve" (the "Project"), as described and depicted in the Planned Residential Development ("PRD") Development Order attached hereto and incorporated herein, and

WHEREAS, on October 17, 2006, by Ordinance 2006-17, the City Commission authorized a zoning map amendment for approximately 147 acres located at 20 Tomoka Oaks Boulevard from R-2, Single Family Low Density, to PRD, Planned Residential Development, and authorized a development order for: a re-configured golf course, 119 multi-family units (townhomes and condominiums) and three single family lots, under certain conditions, which development order is recorded in Official Records Book 5944, at Pages 2179 through 2227, inclusive of the Public Records of Volusia County, Florida, and

WHEREAS, the aforementioned development order approved by Ordinance 2006-17 expired on October 17, 2014, and

WHEREAS, the 147.94± acre parcel located at 20 Tomoka Oaks Boulevard, is currently zoned as Planned Residential Development (PRD); however, no active development order exists for the Property, and

WHEREAS, the Planning Board held public hearings on July 13, 2023; August 21, 2023; and September 26, 2023, as required by Chapter 1, Article II, Section 1-15(d)(2), of the *Land Development Code*, and has recommended denial of the Project, and

WHEREAS, the City Commission has held a public hearing in accordance with Section 166.041(3)(c)(2), *Florida Statutes* and has considered the following:

(1) The report and recommendations of the Planning Board;

(2) The report and recommendations of the Site Plan Review Committee;

(3) The comments of governmental agencies, utility corporations and individuals, as received, and

(4) The testimony of the City's planning staff, the Applicant, expert witnesses, persons that may be affected as a result of the application, and documentary evidence pertaining thereto, if any, and

WHEREAS, the City Commission further finds with respect to the application for the issuance of a development order, that there is competent substantial evidence to support the following:

(1) The proposed development conforms to the standards and requirements of the *Land Development Code* and will not create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare or quality of life;

(2) The proposed development is consistent with the Comprehensive Plan;

(3) The proposed development will not adversely impact environmentally sensitive lands or natural resources, including but not limited to waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells;

(4) The proposed use will not substantially or permanently depreciate the value of surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties;

(5) There are adequate public facilities to serve the development, including but not limited to roads, sidewalks, bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds;

(6) Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe;

(7) The proposed development is functional in the use of space and aesthetically acceptable;

(8) The proposed development provides for the safety of occupants and visitors; and

(9) The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area; now therefore,

BE IT ENACTED BY THE PEOPLE OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:

SECTION ONE. The foregoing recitals are incorporated herein as the findings of the City Commission.

SECTION TWO. The application of the Property Owner for the issuance of a PRD Development Order for the "Tomoka Reserve" project is hereby approved. The Mayor and the City Manager are authorized and directed to execute and issue the attached PRD Development Order for the "Tomoka Reserve" Planned Residential Development to allow the development of 272 lots on 147.94± acres under certain conditions, to be located at 20 Tomoka Oaks Boulevard (Volusia County parcel number: 3242-07-00-0010).

SECTION THREE. The Project shall be required to obtain a Preliminary Plat and provide detail engineering plans with review by the Planning Board and action by the City Commission prior to the issuance of a site construction permit. A neighborhood meeting shall be required after the first Site Plan Review Committee submittal and prior to the Planning Board meeting for the Preliminary Plat.

SECTION FOUR. The lot layout as shown in Exhibit "C" to the PRD Development Order, and the Tomoka Reserve Planting and Maintenance Plan, dated September 6, 2023 as shown in Exhibit "D" to the PRD Development Order, are hereby accepted.

SECTION FIVE. The Project shall provide subdivision phasing with the Preliminary Plat. The subdivision phasing may be modified with review and approval of the Site Plan Review Committee.

SECTION SIX. Section 2-35(h)(3)(a) of the *Land Development Code* allows additional outdoor recreational areas to be provided in lieu of indoor recreation area. The project

is required to provide 24,840 square feet of outdoor recreational area. The proposed 9.34 acres of outdoor recreational area exceeds the *Land Development Code* requirements and is hereby accepted.

SECTION SEVEN. The Applicant shall be in full and complete compliance with the project conditions described and attached as Exhibit "E" to the PRD Development Order.

SECTION EIGHT. The Applicant, including the Applicant's successors and assigns, shall at all times fully comply with the terms and conditions of the PRD Development Order.

SECTION NINE. All Ordinances or parts of Ordinances in conflict herewith are hereby repealed to the extent of such conflict.

SECTION TEN. This Ordinance shall take effect immediately upon its adoption.

PASSED UPON at the first reading of the City Commission this 7th day of November, 2023.

PASSED UPON at the second and final reading of the City Commission this 5th day of December, 2023.

BEFORE THE
CITY COMMISSION
OF THE
CITY OF ORMOND BEACH

IN RE:	**Application of:**	Triumph Oaks of Ormond Beach I, LLC, a Florida Limited Liability Company
	Planned Residential Development	PRD 2022-043
	Project Name:	Tomoka Reserve
	Property Addresses:	20 Tomoka Oaks Boulevard
	Parcel ID Nos.	3242-07-00-0010

PLANNED RESIDENTIAL DEVELOPMENT DEVELOPMENT ORDER

This matter having come on for public hearing before the City Commission of the City of Ormond Beach, Florida, on November 7, 2023 and December 5, 2023 and the City Commission having considered those items as required by Section 1-18(e) of the *Land Development Code*, and having heard testimony and evidence from all affected persons, the City Commission hereby finds that:

1. The proposed development conforms to the standards and requirements of the *Land Development Code* and will not create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare or quality of life;

2. The proposed development is consistent with the Comprehensive Plan;

3. The proposed development will not adversely impact environmentally sensitive lands or natural resources, including but not limited to waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells;

4. The proposed use will not substantially or permanently depreciate the value of surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties;

5. There are adequate public facilities to serve the development, including but not limited to roads, sidewalks, bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds;

6. Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe;

7. The proposed development is functional in the use of space and aesthetically acceptable;

8. The proposed development provides for the safety of occupants and visitors; and

9. The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area.

Thereupon and in consideration thereof, the City Commission hereby orders that:

A. The application of Triumph Oaks of Ormond Beach I, LLC, a Florida Limited Liability Company (the "Applicant/Property Owner"), for a Planned Residential Development ("PRD") Development Order authorizing the development and construction of a residential subdivision of 272 lots to be known as "Tomoka Reserve" located on a 147.94± acre parcel at 20 Tomoka Oaks Boulevard (Parcel ID number: 3242-07-00-0010) on that real property described in Exhibit "A" attached hereto and incorporated herein by reference is hereby granted, subject to the following conditions:

1. All applicable provisions of Chapter 2, District and General Regulations, Article II, District Regulations, Section 2-35, PRD, Planned Residential Development District, of the City of Ormond Beach *Land Development Code*, except as otherwise specifically modified are hereby made a part of this PRD Development Order;

2. The project shall be required to obtain a Preliminary Plat and provide detail engineering plans with review by the Planning Board and action by the City Commission prior to the issuance of a site construction permit. A neighborhood meeting shall be required after the first Site Plan Review Committee submittal and prior to the Planning Board meeting for the Preliminary Plat;

3. Resolution of the outstanding Site Plan Review Committee comments through the Preliminary Plat process described in Exhibit "B";

4. Full and complete compliance with the Applicant's Site Plan attached as Exhibit "C";

5. Full and complete compliance with the Applicant's Tomoka Reserve Planting and Maintenance Plan, dated September 6, 2023 attached as Exhibit "D";

6. Full and complete compliance with the project conditions attached as Exhibit "E";

B. The final plans for the development project shall be consistent with all of the conditions listed in this PRD Development Order and as depicted in the plans attached hereto as Exhibits "C" and "D" and incorporated herein by reference.

C. No material change shall be made to the final plan for the development project without further review by the Planning Board and approval by the City Commission in accordance with the procedures for the approval or modification of development orders.

D. All site construction activity shall be performed in strict compliance with the terms and conditions of this PRD Development Order approved for this development project, and of the *Land Development Code*.

E. There shall be no site preparation including clearing, filling, dredging, or excavation, nor shall any construction begin until the Preliminary Plat site plans are approved. If construction has not begun within five years (December 5, 2028) from the date of City Commission approval of this PRD Development Order with the subdivision plat processed in accordance with Sections 4-17 or 4-18 of the *Land Development Code*, this PRD Development Order shall automatically become void and shall have no further effect. Before the planned development permit can be re-established, a new PRD Development Order application must be filed shall be reviewed and approved by the Planning Board and the City Commission under the provisions of Section 1-14(3)(b), of the *Land Development Code*.

F. In the event the use of the land approved by this PRD Development Order is abandoned for a period of two (2) years or there has been no construction activity during that period, any permit shall be void and a Notice of Final Plan Revocation shall be filed under the provisions of Section 1-14(3)(b) of the *Land Development Code,* and a new application for a PRD Development Order must be submitted for consideration in accordance with the requirements of the *Land Development Code*.

G. The Neighborhood Improvement Officer shall semi-annually prepare a report indicating which planned developments are not in compliance with Section 1-14, or with the conditions provided in the PRD Development Order. In the event a Neighborhood Improvement Officer determines there to be any violation, such Officer shall initiate appropriate code enforcement action for hearing before the City's Special Master.

H. This PRD Development Order shall be recorded in the public records of Volusia County, Florida, at the expense of Triumph Oaks of Ormond Beach I, LLC, a Florida Limited Liability Company, and shall be binding upon the Property Owners and its successors and assigns, and shall run with the real property described in Exhibit "A" attached hereto and incorporated herein by reference (Volusia County Parcel ID Number: 3242-07-00-0010).

ORDERED this 5th day of December, 2023.

CITY COMMISSION
CITY OF ORMOND BEACH, a Florida municipal corporation

By: _____
BILL PARTINGTON
Mayor

(CITY SEAL)

Attest: _____
JOYCE A. SHANAHAN
City Manager

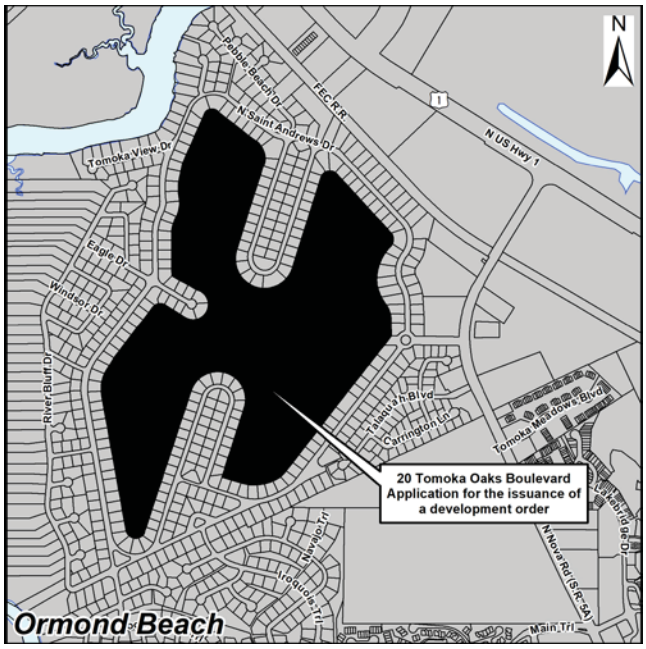
EXHIBIT "A"

LEGAL DESCRIPTION
(from Sliger & Associates, Inc. survey – survey date April 15, 2021)

PROPERTY DESCRIPTION:

SAM SNEAD GOLF AND COUNTRY CLUB, A PART OF THE THOMAS FITCH GRANT, LYING WESTERLY OF THE FLORIDA EAST COAST RAILWAY, SECTION 39, TOWNSHIP 14 SOUTH, RANGE 32 EAST, ACCORDING TO THE PLAT THEREOF, AS RECORDED IN MAP BOOK 25, PAGE 61, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA.

LOCATION MAP



PARCEL ID: 3242-07-00-0010

OWNER: TRIUMPH OAKS OF ORMOND BEACH I LLC

APPLICANT: TRIUMPH OAKS OF ORMOND BEACH I LLC

ADDRESS OF DEVELOPMENT ORDER: 20 TOMOKA OAKS BOULEVARD, ORMOND BEACH, FL 32174

Project Name: PZ-22-043
Project Description: Tomoka Reserve
Review Comments List Date: 9/13/2023

Ref. # 62, Landscape Architect, Cara Culliver, 1/25/23 3:25 PM, Cycle 2, Unresolved
Markup: Buffer Type, Tomoka Reserve PD Plans 5 -Buffer plan.pdf

- Staff is supporting a Type 6 landscape buffer which is consistent with the 50' buffer width & requires 7 trees, 70 shrubs & 70 ground covers per 100' lineal feet.

Ref. # 134, Landscape Architect, Cara Culliver, 6/12/23 5:00 PM, Cycle 4, Unresolved
Markup: High Density Buffer Planting, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf

- A Type 6 buffer which is 50' foot depth requires 7 trees, 70 shrubs & 70 ground covers per 100' lineal feet. The document states 30 shrubs and the planting depth is 20 foot which is inconsistent with Section 3-06(d)(1)(2) of the Land Development Code.

- The elevation & plan view drawings shall be to scale and should show a typical 100 foot length & 50' foot depth planting design. This applies to all of the Typical Buffer Sketches.
- There is no reference to the keyed out plant materials and not able to determine what's being proposed?

- The plan view sketch only shows 5 trees and the requirement is 7 trees per 100 lineal foot. Also, the shrub requirement is 70 and only 30 are shown.

- Spacing trees 15 feet apart doesn't give enough room for growth and you have a 50' foot wide buffer to work within.

- The wildflower areas should be shown in more natural shape.

Ref. # 135, Landscape Architect, Cara Culliver, 6/13/23 10:39 AM, Cycle 4, Unresolved
Markup: Master Buffer Plan, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf

- Need to reference on the master buffer plan where these 3 different typical buffer planting would occur.

- Ultimately, the 3 different planting sketches/specifications will have to be incorporated on 24x36 scaled drawing and included in the ZevCohen landscape plans.

Ref. # 136, Landscape Architect, Cara Culliver, 6/13/23 10:43 AM, Cycle 4, Unresolved
Markup: Tree Mitigation for Specimen & Protected Trees, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf

- Tree mitigation if applicable could drive the density of the buffers and tree caliper sizes. This will have to be worked out with final future detailed drawings.

Ref. # 137, Landscape Architect, Cara Culliver, 6/13/23 10:50 AM, Cycle 4, Unresolved
Markup: Medium Density Buffer & Intact Buffer Plantings Sketches, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf

- The medium and intact buffer sketches would need to be applied to the actual site to determine what needs to be planted back.

- There is a ground cover requirement and no mention of this in the written text for both of these sketches.

Ref. # 138, Landscape Architect, Cara Culliver, 6/13/23 11:01 AM, Cycle 4, Unresolved
Markup: Planting Details, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf

- Please use the City standard planting details.

Ref. # 139, Landscape Architect, Cara Culliver, 6/13/23 11:13 AM, Cycle 4, Unresolved
Markup: Watering Schedule, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf

- Staff is not supportive hand watering for establishment of plant materials/trees. A permanent irrigation system needs to be in place for the establishment of the trees and plant materials as per Section 3-05(e) of the Land Development Code.

- The watering requirement of trees wouldn't be the same as watering requirement for shrubs/ground covers. For example and based on the University of Florida research, 3 gallons of water per caliper inch and establishment rates are based on 3 month per inch of trunk caliper. To establish a 30 (8 gallons of water) or 45 gallon tree (9 gallons of water) at 2.5" caliper would take 8-12 months. You would need to water daily for 1-2 months and every other day for 4 months and weekly until establishment. This is not an efficient way to water a project of this size and there will be limited to no access to this 50 foot buffer when the project is developed. Also, we frequently experience drought which is going to be a factor in keeping this natural buffer alive.

Ref. # 140, Landscape Architect, Cara Culliver, 6/13/23 3:41 PM, Cycle 4, Unresolved
Markup: Intact Buffer, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf
- When 7 existing trees are not present with this buffer type, than Understory trees would be more appropriate than more shade canopy trees.

Ref. # 141, Landscape Architect, Cara Culliver, 6/13/23 3:52 PM, Cycle 4, Unresolved
Markup: Suggested Tree List, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf
- The intent is to provide screening please limit the amount of deciduous trees used in this plant palette.

- This project would have Canopy and Understory trees. Please add a category for native Understory Trees. Might want to call the Medium tree an Understory tree on the sketches.

- I don't think the American Olive, American Hornbeam, Redbud and Sugarberry are available to meet the cities minimum tree size of 10' foot height and 2.5" caliper, please check availability and revise list as necessary.

- The Florida Privet is semi-evergreen and can shed its leaves in the winter.

Ref. # 142, Landscape Architect, Cara Culliver, 6/14/23 8:37 AM, Cycle 4, Unresolved
Markup: Tree Size & Spacing, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf
- The minimum tree size is 10' foot height and 2.5" caliper per Sec.3-05(d)(2).

- Spacing trees 15 feet apart especially for canopy trees doesn't not provide enough room for growth. You have a 50' buffer depth and greater spacing can be achieved with a staggered spacing.
Ref. # 143, Landscape Architect, Cara Culliver, 6/14/23 9:02 AM, Cycle 4, Unresolved
Markup: Wildflowers, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf
- For the success of the wildflower seeds they are installed a certain way, during the fall season, type of seed mix and what's the application rate. Please provide more detailed specifications.
Ref. # 144, Landscape Architect, Cara Culliver, 6/14/23 9:16 AM, Cycle 4, Unresolved
Markup: Existing Turfgrass, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf
- The existing turfgrass will need to be removed for the plantings of the trees and shrubs. The existing grass is going to compete with the establishment of the shrubs and most likely grow over the shrubs and choke them out. This will become a long-term maintenance issue if the grass is left.

Once the plant materials are installed a 3" inch mulch layer (suggest using Pine Bark) will retain the soils moisture.

Ref. # 155, Landscape Architect, Cara Culliver, 9/8/23 10:05 AM, Cycle 5, Unresolved
Markup: Plans Preparation, 2023 09 06 Buffer Tree Planting Locations.pdf

- Per Section 3-05(b)(1),a landscape plan prepared by a person registered as a landscape architect under F.S. ch. 481, part II, shall be submitted in conjunction with any development requiring site plan approval. The plan shall include all items related to trees and tree protection, as well as the grade, type, size, and location of plant materials. All landscape plan sheets shall be signed and sealed.

Ref. # 156, Landscape Architect, Cara Culliver, 9/8/23 10:05 AM, Cycle 5, Unresolved
Markup: 50' Buffer Requirement (Applies To All Sheets BT-100-BT-108), 2023 09 06 Buffer Tree Planting Locations.pdf

- This plan does not demonstrate meeting compliance with the Type 6, 50' landscape buffer which requires 7 trees, 70 shrubs and 70 ground covers per 100' lineal feet. Five trees & 50 shrubs per 100 lineal feet doesn't meet Type 6 buffer requirements.

- Existing palms trees are three to one ratio (3:1), meaning 3 palms equals one required tree. A single palm can't be counted as a required tree.

- All plant materials shall be keyed out showing type, size and locations of plant materials, including a plant list with specifications.

- The landscaped buffer area shall include a minimum five-foot (5') wide visual screen constructed of plant materials which are selected, located, and maintained to provide a visual barrier that is designed to achieve forty percent (40%) opacity within three (3) years from the time of installation between three feet (3') and six feet (6') above the average ground level of the landscaped buffer area when viewed horizontally.

- Trees shall be established along the entire length of and contiguous to any property line at a maximum spacing of fifty feet (50') on-center.

- Abutting residential lot information needs to be show and referenced on this plan.

Ref. # 157, Landscape Architect, Cara Culliver, 9/8/23 10:18 AM, Cycle 5, Unresolved
Markup: Trees Required Chart, 2023 09 06 Buffer Tree Planting Locations.pdf

- This project buffer is 3.3 miles long which equals 17,424 L.F. divided by 100 (x) 7 required trees = 1,220 Required Trees for this buffer, 12,197 Shrubs & 12,197 ground covers.

- This 50' landscape buffer would require 1,220 trees and not 396 as per the chart and submitted plan.

- Please keep in mind protected and specimen tree mitigation might affect buffer density and design.

Ref. # 158, Landscape Architect, Cara Culliver, 9/8/23 11:44 AM, Cycle 5, Unresolved
Markup: Buffer Area Planting Requirements, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

- Staff will not be supporting the "modified buffer" of 5 trees and 50 shrubs. We will be supporting the Type 6, 50' landscape buffer which requires 7 trees, 70 shrubs and 70 ground covers per 100' lineal feet.

- In addition to these requirements all landscape buffers require a minimum of 5' foot wide visual screen constructed of plant materials which are selected, located, and maintained to provide a visual barrier that is designed to achieve forty percent (40%) opacity within (3) years from the time of installation between three feet (3') and six feet (6') above the average ground level of the

landscaped buffer area when viewed horizontally.
- Also, trees shall be established along the entire length of and contiguous to any property line at a maximum spacing of fifty feet (50') on-center.

Ref. # 159, Landscape Architect, Cara Culliver, 9/8/23 11:48 AM, Cycle 5, Unresolved
Markup: Ground Cover Requirement, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

- The design team has submitted no documentation of existing ground covers. This will be determined when full design plans are submitted.

- Ground covers will be required as per the Type 6 buffer requirements.

Ref. # 160, Landscape Architect, Cara Culliver, 9/8/23 11:56 AM, Cycle 5, Unresolved
Markup: Standards for Success, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

- The revised plans submitted did not have a phasing plan. Please submit phasing plan for review.

- Staff will not be supporting a 2 year maintenance bond. We will not be supporting 80% plant survivability but will support 100%. Assuming 20% or greater of the plant materials in the buffer dies that would be a huge burden on Tomoka Reserve, Tomoka Oaks & the City. The question is who would be responsible for establishing "replaced" trees and shrubs after the 2 year period?

- Staff would support a maintenance bond of 6 years for each phase built. After each 2 years of each phase planted plant materials failed will be replaced by Tomoka Reserves HOA. If the maintenance bond is implemented the Tomoka Reserves HOA would be responsible to replace the buffer back per the approved plans and the City staff will conduct necessary inspections for compliance after each 2 year period.

Ref. # 161, Landscape Architect, Cara Culliver, 9/8/23 12:57 PM, Cycle 5, Unresolved
Markup: Short Term Maintenance, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

- Staff is not supportive hand watering for establishment of plant materials/trees. A permanent irrigation system needs to be in place for the establishment of the trees and plant materials as per Section 3-05(e) of the Land Development Code.

- A 26 weeks or 6 month establishment period is not long enough to establish a 2.5" caliper tree. Based on the University of Florida research, 3 gallons of water per caliper inch and establishment rates are based on 3 month per inch of trunk caliper. To establish a 30 (8 gallons of water) or 45 gallon tree (9 gallons of water) at 2.5" caliper would take 8-12 months. You would need to water daily for 1-2 months and every other day for 4 months and weekly until establishment another 6 months. The larger the tree caliper the longer the establishment period.

Ref. # 162, Landscape Architect, Cara Culliver, 9/8/23 1:13 PM, Cycle 5, Unresolved
Markup: Irrigation System, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

- If the irrigation system is designed "strategically" than there would be no distance challenges to pump the water or installing long lengths of irrigation pipe.

Ref. # 163, Landscape Architect, Cara Culliver, 9/8/23 1:16 PM, Cycle 5, Unresolved
Markup: Existing Turfgrass, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

- The existing turfgrass will need to be removed for the plantings of the trees, shrubs & ground covers within the planting bed areas. All planting beds shall be prepped to remove all turfgrasses, weeds and unsuitable materials prior to planting. Leaving the existing grass is not the industry standard & going to compete with the establishment of the shrubs & ground covers and most likely grow over the shrubs and choke them out. This will become a long-term maintenance issue if the

grass is left & hinder the success of establishing plant materials. Once the plant materials are installed a 3" inch mulch layer (suggest using Pine Bark) will retain the soils moisture.

Ref. # 164, Landscape Architect, Cara Culliver, 9/8/23 1:26 PM, Cycle 5, Unresolved
Markup: Watering, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

- Why would watering trees in Phase 1 be 4-6 gallons and less in Phase II & III with 2 gallons? The also applies to the shrubs. This is not based on University of Florida's research, "Planting & Establishing Trees" publication as noted in this report. A 2.5" caliper tree needs 9 gallons of water, 3.5" caliper needs 11 gallons, 4.5" caliper needs 17 gallons & 6" caliper needs 30 gallons of water.

Ref. # 165, Landscape Architect, Cara Culliver, 9/8/23 1:30 PM, Cycle 5, Unresolved
Markup: Irrigation System, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

Irrigating a project of this size (3.3 lineal miles) with hand watering is very inefficient and time consuming. The best approach to watering plant materials is with an efficient irrigation system using "low volume" techniques where water can be applied "directly" to the root ball. Directing water to 100% of the root ball in a manner that water can be absorbed into the root ball when water is needed is critical to optimum tree establishment. Proper irrigation immediately after transplant will influence root growth; therefore the diameter of the tree's irrigation pattern should increase, especially for sandy soils, as the tree's roots expand into the native soil. Efficient irrigation is critical and takes the guess work out with everything being automated and precise.

Ref. # 166, Landscape Architect, Cara Culliver, 9/8/23 1:41 PM, Cycle 5, Unresolved
Markup: Vegetation Maintenance, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

- Before an area is planted it is stripped to bare soil removing all competing vines, weeds, unsuitable materials & turfgrasses. This eliminates the initial competing of weeds with the new plant materials. The applicant wants to keep all the turfgrass intact which is not the industry standard for establishing plant materials within large buffer areas. Staff will not be supportive of keeping turfgrasses intact within the landscape buffer.

Ref. # 167, Landscape Architect, Cara Culliver, 9/8/23 1:56 PM, Cycle 5, Unresolved
Markup: Long-term Buffer Maintenance, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

- The applicant described this buffer as being natural and grass mowing in the buffer contradicts this concept? It would be a maintenance nightmare to mow around and between the trees, shrubs and ground covers. As stated already this buffer would be stripped prior to planting and then topped dressed with 3" mulch layer. There would be no mowing within the buffer and only weed/vine control & pruning of deadwood from trees as described in this plan.

- Other long-term maintenance items would be trimming the existing palms trees and removing the dead fronds, palm boots & seed heads. Also, newly planted trees/plant materials need fertilizer and should be part of the maintenance plan.

Ref. # 168, Landscape Architect, Cara Culliver, 9/8/23 4:48 PM, Cycle 5, Unresolved
Markup: Notes #7 & #8 Modified Buffer, PD1_21067 COV-C1.pdf

- Note #7, staff will not be supporting the "modified buffer" of 5 trees and 50 shrubs. We will be supporting the Type 6, 50' landscape buffer which requires 7 trees, 70 shrubs and 70 ground covers per 100' lineal feet.

- Note #8, an approved buffer plan will be in-place to identify where supplemental plantings will be required.

Ref. # 169, Landscape Architect, Cara Culliver, 9/8/23 4:57 PM, Cycle 5, Unresolved
Markup: Tree Replacement Note, PD2-PD6_21067 ODP-PD5.pdf

- Specimen trees removed will not be on a one to one replacement basis. Mitigation Chart A will determine how many trees will be replaced at 4.5" caliper based on the caliper removed.

Ref. # 65, Civil Engineer, David Allen, 1/31/23 4:34 PM, Cycle 2, Unresolved
Markup: Civil-Operating tables, 21067 Tomoka Reserve Storm Package.pdf

How were the discharge rates established for these tables.

Ref. # 103, Civil Engineer, David Allen, 2/21/23 9:50 AM, Cycle 2, Unresolved
Markup: Civil-=Emergency Access, Autoturn Analysis.pdf

Provide a detail that shows the island and the pavement widths for North St Andrews Drive. Provide the vehicle turn exhibit for this connection as well as the connection within the subdivision.

Ref. # 105, Civil Engineer, David Allen, 2/21/23 11:47 AM, Cycle 2, Unresolved
Markup: Civil-Lot Size, Tomoka Reserve PD Plans 6- typical lot layout.pdf

In the Neighborhood meeting, the width of the lot adjacent to the buff,(existing lots) was a significant question. The width was more important than the square footage of the lot. Please provide rationale for the proposed lot sizes.

Ref. # 118, Civil Engineer, David Allen, 5/10/23 2:15 PM, Cycle 3, Unresolved
Markup: Civil-Dry Retention, 21067 PD-04-28-23.pdf

Dry retention ponds were indicated as allowing infiltration to meet the time related requirements for stormwater management. The borings for the ponds indicated a layer of organics and top soil. How will the ponds function after several rain events have compacted the top layer into an impervious layer at the bottom of the pond.

If the pond bottom is being counted as natural preservation, these organics will seal the pond bottom. If the organics are removed then it should not count towards the natural preservation.

Provide time table of acceptable water stage on the trees within the dry retention.

Ref. # 119, Civil Engineer, David Allen, 5/10/23 2:39 PM, Cycle 3, Unresolved
Markup: Civil- Auto Turn, Autoturn Analysis.pdf

This configuration no longer matches the roadway layout for the [project. please provide an update to this figure.

Also provide a detail that demonstrates the emergency vehicle at the emergency access in conjunction with the existing island in N. St Andrews.

Ref. # 145, Civil Engineer, David Allen, 6/21/23 4:08 PM, Cycle 4, Unresolved
Markup: Civil-Phasing Plan, PD2-PD6_21067 ODP PD2 (1).pdf

Is there a phasing plan available for the project? If so, at what stage will the Emergency Access be constructed?

How will the construction of utility connections be staged in the overall project?

Ref. # 147, Civil Engineer, David Allen, 6/26/23 3:27 PM, Cycle 4, Unresolved
Markup: Civil-Lot Width, PD2-PD6_21067 ODP PD2 (1).pdf

Change the word size to width. The size can increase by depth only. The concern is the width of the lots.

Ref. # 148, Civil Engineer, David Allen, 6/26/23 3:27 PM, Cycle 4, Unresolved
Markup: Civil-Pedestrian access, PD2-PD6_21067 ODP PD2 (1).pdf

Add the term "and individual property owners affected. "

Ref. # 149, Civil Engineer, David Allen, 6/26/23 4:56 PM, Cycle 4, Unresolved
Markup: Civil-Revision Emailed 06-26-23, PD1_21067 COV C1 (1).pdf

Note No. 9, Indicates that this will be a gated subdivision. Provide note that the streets will be [privately maintained. Provide a note that there will be an access/utility easement placed over the entire roadway parcel dedicated to the City of Ormond Beach.

Ref. # 171, Civil Engineer, David Allen, 9/10/23 3:54 PM, Cycle 5, Unresolved
Markup: Civil Emergency Access, PD1_21067 9_5_23r.pdf

Provide the model showing the fire vehicle entering the emergency access.

Ref. # 172, Civil Engineer, David Allen, 9/11/23 8:36 AM, Cycle 5, Unresolved
Markup: Civil-Roadway Section, PD2-PD6_21067 ODP-PD3.pdf

Please show the limits of the tract on this cross-section. Note that the City of Ormond Beach will have an Access-Utility Easement placed on the tract.

Ref. # 173, Civil Engineer, David Allen, 9/11/23 9:57 AM, Cycle 5, Unresolved
Markup: Civil-Access Easement, PD2-PD6_21067 ODP-PD2.pdf

The access easement should be 20 feet wide.

Ref. # 181, Civil Engineer, David Allen, 9/12/23 9:04 AM, Cycle 5, Unresolved
Markup: Civil-Sanitary Sewer Collection System, PD7-PD8_21067 UTL-PD9.pdf
TECHNICAL COMMENT FOR THE PRELIMINARY PLAT

A recent evaluation for the lift stations within the Tomoka Oaks Subdivision shows a significant increase in run-times for the Lift Station 8M1. The proposed gravity system is shown to direct the flow from the new subdivision to this lift station. After discussion with the Utility Manager, we request that the gravity collection system be directed to the Lift Station 8M, Nova Road.

Ref. # 123, Planning Director, Steven Spraker, 5/11/23 8:21 AM, Cycle 3, Unresolved
Markup: 50' Landscape Buffer, PD2-PD6_21067 ODP-PD5B.pdf

- Staff will be supporting a Type 6 buffer plantings within the 50' landscape buffer. Response comments indicate plantings to be a type 4 buffer which will include existing natural vegetation with temporary irrigation is being proposed. Staff is not supportive of a type 4 buffer type and the information provided to date has not made staff supportive of the plant materials or temporary irrigation. A permanent irrigation system needs to be in place for establishment of the trees which can take years depending on the caliper size and drought situations. Staff also have concerns with the long-term maintenance of the buffer area and survivability of the plants with temporary irrigation.

Ref. # 150, Planning Director, Steven Spraker, 6/27/23 10:00 AM, Cycle 4, Unresolved
Comment:
Key policy issues:

1. **Lot Sizes:**

Applicant: mixture of 80', 60' and 50' lots. 80' wide lots abut existing Tomoka Oaks lots.

Staff recommendation: Staff recommends 100' wide lots to total at least 10,000 square feet abutting the perimeter of the existing Tomoka Oaks single-family houses.

2. **Buffer abutting existing Tomoka Oaks single-family houses:**

Applicant: See Tomoka Reserve Buffer Planting and Maintenance Plan, dated June 6, 2023.

Staff recommendation: Staff recommends typical planting (type 6) and irrigation plan. See city Landscape Architect's comments.

~~3. **Setback plan:**~~

~~Applicant: See Sheet PD7.~~

~~Staff recommendation: Staff not supportive of building coverages or proposed setbacks. Staff recommended setbacks included in the review.~~

~~4. **PD6 note on lot separation.**~~

~~Applicant: Note states: The lot separation width shown on this sheet may be subject to change at the time of permitting. The represented distances are from existing lot in Tomoka Oaks neighborhood and proposed lots within Tomoka Reserve.~~

~~Staff recommendation: The 50' buffer abutting the Tomoka Oaks existing residential lots and areas called out as natural preservation shall not be modified and shall always be vegetative areas.~~

~~5. **St. Andrews and Tomoka Oaks Boulevard "diamond".**~~

~~Applicant: Traffic Impact Analysis, response to comments, Item 3 states the existing diamond is expected to operate within the adopted level of service during the peak hours. No improvements are proposed.~~

~~Staff recommendation: The diamond is awkward and in staff's opinion's confusing and potentially dangerous as additional trips are added. Staff recommends that a diamond reconfiguration be required at the construction (preliminary plat) phase of the development.~~

~~6. **Recreation – additional outdoor recreation.**~~

~~Applicant: See sheets PD10 and PD3 where 9.06 acres of outdoor recreation is provided throughout the subdivision.~~

~~Staff recommendation: Staff supportive of the request. Similar request have been approved – RidgeHaven subdivision was the last similar request.~~

Ref. # 174, Planning Director, Steven Spraker, 9/11/23 11:59 AM, Cycle 5, Unresolved
Markup: Planning, inclusion of Tomoka Oaks addresses, 2023 09 06 Buffer Tree Planting Locations.pdf

Please include the address of the abutting properties within Tomoka Oaks.

Ref. # 175, Planning Director, Steven Spraker, 9/11/23 11:59 AM, Cycle 5, Unresolved

Markup: Planning staff, proposed plantings and irrigation, 2023 09 06 Buffer Tree Planting Locations.pdf

Planning staff support the City Landscape Architect's position on buffer type and irrigation requirements.

Ref. # 176, Planning Director, Steven Spraker, 9/11/23 12:20 PM, Cycle 5, Unresolved
Markup: Planning, architectural standards, Project Narrative-PB Revision List.pdf

Per an e-mail, the document on architectural standards was an old draft and not reviewed. Staff understands the architectural standards are contained in Sheet PD8.

Ref. # 177, Planning Director, Steven Spraker, 9/11/23 12:20 PM, Cycle 5, Unresolved
Markup: Planning, Letter - buffer type, Project Narrative-PB Revision List.pdf

Staff is not supportive of the lesser plant material than a type 6 buffer and hand watering - see city Landscape Architect comments.

Ref. # 178, Planning Director, Steven Spraker, 9/11/23 12:20 PM, Cycle 5, Unresolved
Markup: Planning, letter, lot width, Project Narrative-PB Revision List.pdf

The letter response states there are 46 lots that are 100' in width and 10 lots that are 90' in width. This appears to be an older version referencing the 100' wide lots. The plan submitted has 80' wide lots proposed along the perimeter which staff is not supportive of.

Ref. # 179, Planning Director, Steven Spraker, 9/11/23 12:20 PM, Cycle 5, Unresolved
Markup: Planning, timing of the traffic light, Project Narrative-PB Revision List.pdf

The response comments state 30 days after a phase 1 plat approval. Staff believes this to mean a preliminary plat approval.

Ref. # 180, Planning Director, Steven Spraker, 9/11/23 12:20 PM, Cycle 5, Unresolved
Markup: Planning, hearing date, Project Narrative-PB Revision List.pdf

Note that the Planning Board hearing date is September 26th - not September 21st as indicated in the letter.

Ref. # 64, Utility 1, Mike Stephenson, 1/26/23 1:52 PM, Cycle 2, Unresolved
Markup: Site Plan - Revise and Resubmit, Tomoka Reserve PD Plans 7 - Utility plan.pdf

Utilities has no comments regarding the proposed planned residential development. Full site plan approval, however, will require review of more detailed construction plans and design documents. Elements that will be reviewed at that time include, but is not limited to: utility separation requirements, utility connection details, valves and hydrants spacing, applicable permit status, and the inclusion of applicable City standard details.

PROJECT DESCRIPTION:

ISSUANCE OF A DEVELOPMENT ORDER TO ALLOW 272 SINGLE-FAMILY LOTS AND ASSOCIATED SITE IMPROVEMENTS.

SITE INFORMATION:	
SITE ADDRESS:	20 TOMOKA OAKS BLVD., ORMOND BEACH, FL 32174
PROJECT AREA:	147.94 ACRES
TAX PARCEL I.D. #:	3242070000010
ADJACENT ZONING	R2
EXISTING ZONING:	PRD-EXPIRED
PROPOSED ZONING:	PRD
EXISTING LAND USE:	VACANT
PROPOSED LAND USE:	RESIDENTIAL FAMILY
EXISTING FUTURE LAND USE:	LDR
MAXIMUM UNIT/LOT COUNT:	272
MAXIMUM MODEL HOME COUNT:	16
UNIT/LOT DENSITY:	1.83 PER ACRE
LOT TYPE	VARIES
REQUIRED LANDSCAPE BUFFER(S):	50 FT. MINIMUM
MINIMUM LOT DEPTH:	120 FT.
MINIMUM LOT WIDTH:	60 FT.
MAXIMUM BUILDING HEIGHT	35 FT.
UTILITIES:	PROVIDED BY CITY OF ORMOND BEACH

NOTES:
1. PROJECT MAY BE PHASED. PHASING PLAN WILL BE PROVIDED AT SITE PLAN APPROVAL.
2. ALL CONSTRUCTION TRAFFIC SHALL UTILIZE TOMOKA BLVD. AND NOVA ROAD ONLY
3. CONSTRUCTION ACTIVITIES SHALL ONLY BE ALLOWED ON MONDAY THROUGH SATURDAY BETWEEN THE HOURS OF 7:00 A.M. TO 7:00 P.M.
4. PEDESTRIAN ACCESS THROUGH THE SECONDARY ACCESS MAY BE PROVIDED BUT SHALL NOT BE REQUIRED. FINAL DESIGN AND LAYOUT TO BE COORDINATED DURING SUBDIVISION REVIEW
5. THE PERIMETER BUILDING SETBACK SHALL BE NO LESS THAN 50' FROM THE PROJECT BOUNDARY PER L.D.C.
6. MODEL HOMES INCLUDED IN 272 TOTAL PROPOSED UNITS
7. TYPE 6 BUFFER AS MODIFIED PER TOMOKA RESERVE BUFFER PLANTING AND MAINTENANCE PLAN SEP. 6, 2023.
8. EXISTING VEGETATION NATURAL VEGETATION WITHIN THE BUFFER WILL BE UTILIZED TO MEET THE MINIMUM STANDARDS. AT TIME OF CONSTRUCTION IF EXISTING NATURALLY OCCURRING LANDSCAPE IS INSUFFICIENT (BY CITY OF ORMOND BEACH LANDSCAPE ARCHITECT) SUPPLEMENTAL PLANTINGS WILL BE PROVIDED.
9. PROPOSED ENTRANCE WILL BE GATED TO VEHICULAR ACCESS. PEDESTRIAN ACCESS IS STILL PROVIDED THROUGH MAIN ENTRANCE AND EMERGENCY ACCESS.

SHEET: PD7 OF 10

Tomoka Reserve Architectural Standards

I. PREFERRED ARCHITECTURAL THEMES

A. The overall architectural vision for Tomoka Reserve has been established to create a community embodying a "timeless" quality. Such a vision will be realized through a variety of classical and regional architectural styles, combined with authentic detailing and use of high-quality materials.

Permitted architectural styles include but are not limited to contemporary, Modern, Postmodern, coastal themed styles, Mediterranean, Mission, Cracker, Craftsman, Ranch and Tuscan styles.

II. PROHIBITED ARCHITECTURAL STYLES

A. While diversity and creativity in the design of the homes at Tomoka Reserve is encouraged, certain architectural styles are not considered appropriate. These include, but are not limited to Art Deco, A-frame, Adobe, Cabin design style, Gothic, or Southwestern/Pueblo. Buildings and their accessory structures shall be consistent with a common architectural theme.

B. The architectural theme shall be established by harmoniously coordinating the general appearance of all buildings and related structures.

III. EXTERIOR MATERIALS/ELEVATIONS

A. Architectural variation and variety of housing types and designs within the neighborhood is encouraged. To facilitate this diversity the adjacent homes (the 2 adjacent homes on the same side of the street as well as the house across the street and its two adjacent homes) have to have a minimum of three different design elements of the following 10 elements

1. Roof color/materials
2. Roof pitch roof type (cable vs hip)
3. Skin/exterior finish materials
4. Color
5. Garage orientation/size
6. Porch size/location
7. Number of stories
8. Window sizes/shapes
9. Window locations
10. Decorative elements

B. The front facade should include four to six individual design elements and blank walls shall be discouraged unless adequately landscaped. Front elevation walls cannot be all one material and/or all one color.

C. A mixture of one-story and two-story homes will be encouraged to vary the streetscapes.

D. PERMITTED EXTERIOR MATERIALS INCLUDE:

1. Stucco (cement-based or synthetic) -smooth or textured finished (including tabby finish)
2. masonry-stone, brick, split rock and a ceramic concrete block is permitted but must be finished with material that covers the concrete block and grout lines with a minimum of 3/8" thick material; Stone can be Manufactured, Natural, or Cast
3. Wood/fiber cement-timbers, boards, board and batten, tongue and groove solid wood siding and rough sawn lumber; Hardie board or other similar fiber cement products emulating wood finishes
4. Other textures and materials will be evaluated on their own merit by the ARB. Artificial, simulated or imitation materials (e.g. aluminum siding, simulated brick from stucco, Masonite or composite board, etc.) are NOT permitted on the exteriors of a residence.

IV. ROOF

A. Acceptable roof materials for consideration include, heavy weight (30 year) composition shingles with significant dimensional texture, flat tile, "S" tile, slate tile, cedar wood shake, solar shingles and a high-quality standing seam metal roof. Copper and other metal roof products acceptable to the ARB are permitted for limited applications such as bay windows, process, cupolas, and dormers, or in accordance with specific architectural styles. Thermoplastic Polyolefin, PVC membrane or other similar roofing materials/roofing systems will be considered by the ARB on a case-by-case basis for properties developed with ultramodern or contemporary homes that incorporate a flat roof.

B. Roof lines will be variable using varied roof styles, pitches, projections, gables, and hips. Roof pitches shall be between 0 to 6:12. Dormers may have a roof pitch outside the above range. Flat roofs or flat roof with a parapet may be approved if it is a part of an integral design element such as with ultra-modern or contemporary designs. The roof pitch for primary structures should reflect the selected architectural style for the home.

C. Roof structures may be conventionally framed or constructed of prefabricated trusses.

V. WALL PLATES

A. The minimum wall plate heights shall be 9'-0" in main living areas on the first floor. The second-floor wall plate height must be no less than 9'-0" above the first-floor wall plate. Garages must have a minimum plate height of 8'-0".

VI. DRIVEWAYS

A. Driveways shall be stone, paver style materials, or concrete. Asphalt is NOT permitted.

VII. GARAGES

A. Three types of garages are permitted: front-entry, side entry, and accessory garage buildings.

VIII. FENCES

A. The following fence materials are permitted: wood, black wrought iron, high-quality aluminum, and white PVC. Perimeter fencing along rear or side (from front of house to rear property line shall be a maximum height of 6 feet. Fencing along the front property line or side property lines from the front of the house to the front property line shall have a maximum height of 4 feet. This "front yard" fencing must be decorative (no solid fences) and if a wood fence is utilized it must be painted.

IX. LANDSCAPE

A. All disturbed areas on the lot must be irrigated (unless xeric plantings are utilized), and landscaped with either trees, plants or sod including to the back of curb along the street and to the edge of clearing for natural areas and the water's edge for lots along pond banks. All landscaped beds shall be mulched.

X. MODIFICATIONS

A. All modifications to the above shall be submitted to the ARB for consideration of approval. The above are general guidelines. Tomoka Reserve development will have an enhanced focus on the environment, climate change and sustainability, along with protecting and enhancing future values.

SURVEYORS NOTES

1. NOTICE: THIS SURVEY WAS PREPARED WITH BENEFIT OF ALTA COMMITMENT FOR TITLE INSURANCE ISSUED BY FIRST AMERICAN TITLE INSURANCE COMPANY UNDER FILE NO. 12071-2664415 WITH AN EFFECTIVE DATE OF DECEMBER 30, 2020 AT 8:00 A.M. AS UPDATED AND REVISED ON JANUARY 12, 2021. (ISSUING OFFICE REGISTRY ID: 11413390).

2. DIMENSIONS ARE SHOWN IN FEET AND DECIMALS THEREOF.

3. BEARING STRUCTURE BASED ON NAD 83, FLORIDA STATE PLANE, EAST ZONE, U.S. SURVEY FOOT WITH THE BEARING ON THE WESTERLY LINE OF TOMOKA OAKS COUNTRY CLUB ESTATES UNIT 3A BEING S37°58'29"W.

4. UNDERGROUND FOUNDATIONS, IF ANY, NOT LOCATED.

5. THIS PROPERTY IS LOCATED IN F.I.R.M. ZONE "X", THIS LOCATION IS DETERMINED BY SCALING FROM F.I.R.M. COMMUNITY PANEL 12127C0211 & 12127C0212, MAP EFFECTIVE DATE SEPTEMBER 29, 2017, APPROXIMATE SCALE 1"=500 FEET.

6. "NOT VALID WITHOUT THE SIGNATURE AND THE ORIGINAL RAISED SEAL OR DIGITAL SIGNATURE OF A FLORIDA LICENSED SURVEYOR AND MAPPER."

7. "THE PROPERTY DESCRIBED HEREIN, CONTAINS NO GAPS OR GORES AND TAKEN AS A TRACT, CONSTITUTES ONE CONTIGUOUS PARCEL OF LAND".

8. THE LEGAL DESCRIPTION OF THE PROPERTY AS DESCRIBED IN SCHEDULE A AND ON THE SURVEY ARE IN FACT ONE AND THE SAME PARCEL OF LAND IRRESPECTIVE OF THE MINOR DISCREPANCIES IN THE COURSES AND/OR DISTANCES.

SCHEDULE B-II EXCEPTIONS PER TITLE COMMITMENT:

1. DEFECTS, LIENS, ENCUMBRANCES, ADVERSE CLAIMS OR OTHER MATTERS, IF ANY, CREATED, FIRST APPEARING IN THE PUBLIC RECORDS OR ATTACHING SUBSEQUENT TO THE EFFECTIVE DATE BUT PRIOR TO THE DATE THE PROPOSED INSURED ACQUIRES FOR VALUE OF RECORD THE ESTATE OR INTEREST OR MORTGAGE THEREON COVERED BY THIS COMMITMENT. (STANDARD EXCEPTION; NOT A SURVEY MATTER)

2. ANY RIGHTS, INTERESTS, OR CLAIMS OF PARTIES IN POSSESSION OF THE LAND NOT SHOWN BY THE PUBLIC RECORDS. (STANDARD EXCEPTION; NOT A SURVEY MATTER)

3. ANY ENCROACHMENT, ENCUMBRANCE, VIOLATION, VARIATION OR ADVERSE CIRCUMSTANCE AFFECTING THE TITLE THAT WOULD BE DISCLOSED BY AN ACCURATE AND COMPLETE LAND SURVEY OF THE LAND. (AFFECTS SUBJECT PROPERTY AND SHOWN HEREON) [FENCES LABELED E1, E2, E3, E4, E5, E7, E8, E9]; [SCREENED POOL ENCLOSURE LABELED E6]

4. ANY LIEN, FOR SERVICES, LABOR, OR MATERIALS IN CONNECTION WITH IMPROVEMENTS, REPAIRS OR RENOVATIONS PROVIDED BEFORE, ON, OR AFTER DATE OF POLICY, NOT SHOWN BY THE PUBLIC RECORDS. (STANDARD EXCEPTION; NOT A SURVEY MATTER)

5. ANY DISPUTE AS TO THE BOUNDARIES CAUSED BY A CHANGE IN THE LOCATION OF ANY WATER BODY WITHIN OR ADJACENT TO THE LAND PRIOR TO DATE OF POLICY, AND ANY ADVERSE CLAIM TO ALL OR PART OF THE LAND THAT IS, AT DATE OF POLICY, OR WAS PREVIOUSLY UNDER WATER. (STANDARD EXCEPTION; NOT A SURVEY MATTER)

6. TAXES OR SPECIAL ASSESSMENTS NOT SHOWN AS LIENS IN THE PUBLIC RECORDS OR IN THE RECORDS OF THE LOCAL TAX COLLECTING AUTHORITY, AT DATE OF POLICY. (STANDARD EXCEPTION; NOT A SURVEY MATTER)

7. ANY MINERALS OR MINERAL RIGHTS LEASED, GRANTED OR RETAINED BY CURRENT OR PRIOR OWNERS. (STANDARD EXCEPTION; NOT A SURVEY MATTER)

8. TAXES AND ASSESSMENTS FOR THE YEAR 2021 AND SUBSEQUENT YEARS, WHICH ARE NOT YET DUE AND PAYABLE. (STANDARD EXCEPTION; NOT A SURVEY MATTER)

9. RESTRICTIONS, DEDICATIONS, CONDITIONS, RESERVATIONS, EASEMENTS AND OTHER MATTERS SHOWN ON THE PLAT OF SAM SNEAD GOLF & COUNTRY CLUB, AS RECORDED IN PLAT BOOK 25, PAGE(S) 61, BUT DELETING ANY COVENANT, CONDITION OR RESTRICTION INDICATING A PREFERENCE, LIMITATION OR DISCRIMINATION BASED ON RACE, COLOR, RELIGION, SEX, HANDICAP, FAMILIAL STATUS OR NATIONAL ORIGIN TO THE EXTENT SUCH COVENANTS, CONDITIONS OR RESTRICTIONS VIOLATE 42 USC 3604(C). (AFFECTS SUBJECT PARCEL, CANNOT BE GRAPHICALLY DEPICTED)

10. DEVELOPMENT ORDER ISSUED BY CITY OF ORMOND BEACH RECORDED IN OFFICIAL RECORDS BOOK 5944, PAGE 2183. (AFFECTS SUBJECT PARCEL, CANNOT BE GRAPHICALLY DEPICTED)

11. EASEMENT AGREEMENT AS SET FORTH IN INSTRUMENT RECORDED IN OFFICIAL RECORDS BOOK 5089, PAGE 1438. (AFFECTS SUBJECT PROPERTY AND SHOWN HEREON)

12. PROVISIONS CONTAINED IN DEED RECORDED IN OFFICIAL RECORDS BOOK 2052, PAGE 1019, INCLUDING RIGHTS OF LIFE TIME MEMBERS. (AFFECTS SUBJECT PARCEL, CANNOT BE GRAPHICALLY DEPICTED)

13. TERMS AND CONDITIONS OF ANY EXISTING UNRECORDED LEASE(S), AND ALL RIGHTS OF LESSEE(S) AND ANY PARTIES CLAIMING THROUGH THE LESSEE(S) UNDER THE LEASE(S). (STANDARD EXCEPTION; NOT A SURVEY MATTER)

14. ANY MAP OR DIAGRAM NOW OR PREVIOUSLY PROVIDED IS FOR REFERENCE AND INFORMATIONAL PURPOSES ONLY. THE COMPANY AND ITS AGENTS EXPRESSLY DISCLAIM ANY LIABILITY FOR ALLEGED LOSS OR DAMAGE WHICH MAY RESULT FROM RELIANCE UPON SUCH MAP(S) OR DIAGRAM(S). THE FOREGOING DOES NOT LIMIT ANY EXPRESS COVERAGES PROVIDED BY THE TERMS AND PROVISIONS OF ANY TITLE INSURANCE POLICY FOR MATTERS WHICH MIGHT BE REVEALED BY A SURVEY PREPARED AND CERTIFIED IN ACCORD WITH FLORIDA STATUTES SECTION 472.027.

I. Project Description

A. Title of Proposal

Tomoka Reserve Buffer Planting and Maintenance Plan

B. Location

Tomoka Oaks Blvd., Ormond Beach, FL.

C. Buffer Planting Plan and Maintenance Plan Objectives

1. Description

Tomoka Reserve is a 147.94-acre site with an approximate perimeter of 3.3 miles. As proposed, Tomoka Reserve will provide a 50-foot-wide vegetative buffer between the existing subdivisions and the perimeter lots in Tomoka Reserve. Over the long term, the buffer will be managed by the Tomoka Reserve's Homeowners Association. Today, much of the buffer contains native trees and shrubs that provide screening between the existing homes and the proposed development. In areas where the buffer is sparse or where no vegetation is present, native trees and shrubs will be planted to enhance the native buffer based on the requirements in the City of Ormond Beach Land Development Code.

2. Purpose and Need

The purpose of the Buffer Planting and Maintenance Plan is to describe how the buffer plants will be installed and maintained over the short and long term to maximize survivability. The overall objective of the buffer plantings will be to create a visual screen such that the existing homes and the new homes will have some level of screening so that each resident will have an obstructive view of the other.

The Tomoka Reserve development team is committed to keeping the ecology of the current buffer in place and increasing its integrity and diversity by using mostly native vegetation. The existing and enhanced vegetative screen will also function as a habitat for migratory birds and provide habitat for small mammals and turtles. With our commitment to using a wide variety of native species, we will be increasing the biodiversity of this already important plant community.

Another important aspect of using native plants is their ability to tolerate drought once they are established. By using regionally appropriate species, we will be removing the need for a permanent in-ground irrigation system that would draw large volumes of water out of the aquifer. The current buffer is not manicured or irrigated; this plan does not propose intensive management over the long term. The objective of this Buffer Planting and Maintenance Plan is to place trees and shrubs in the buffer to enhance the existing native vegetation.

II. Existing Conditions

A. Physical

The entirety of the site, including the 50-foot buffer, is comprised of sandy soils and there are no naturally occurring wetlands. The soils of this site are dominated by Paola fine sands, which are well-drained soils, Appendix A. The topography of the site has gentile slopes where the eastern portion of the site is higher than the north, south, and western areas. There are no physical barriers present that would prohibit us from enhancing that existing vegetative buffer.

B. Existing biotic conditions

A tree survey was conducted in 2021 that determined that there are 1,970 trees on site that are made up of 21 species of trees. The site is also home to a wide variety of insects, reptiles, amphibians, and small mammals, all of which will benefit from the installation of more native trees, shrubs, grasses, and wildflowers. Around the entire site, approximately 70% of the 50-foot buffer has trees and shrubs that act as a visual screen. However, in many places beneath the canopy, there are gaps in the understory that lack significant screening.

III. Buffer Planting Plan

A. Planting plan description and design

In areas where trees and shrubs will be installed, this plan follows the best management practices outlined in the American National Standards Institute (ANSI) 300 part 6

(Transplanting Standards) and Z60.1 (Nursery Stock Standards), additionally, the planting will follow the directions provided in Appendix B. Tree and Shrub Planting Details in Appendix B were provided by the City of Ormond Beach. The buffer design was created by

a Board Certified Master Arborist and a Registered Landscape Architect, where special consideration was given to incorporating native plants in the buffer plan, Appendix C.

Buffer Area Planting Requirements:

We will be using a modified buffer as the guidelines for the planting requirements. The buffer shall be 50 feet wide, will contain 5 trees and 50 shrubs.

For each 100 linear feet of buffer, where there are less than 5 exiting trees in the buffer, (trees having a DBH of at least 6 inches), trees will be installed to meet the buffer requirements or the fraction thereof. Where gaps of 50 feet or more occur between existing trees, even if there are 5 or more existing trees, landscape trees will be planted. The total number of buffer trees needed to meet the intent of this buffer plan is 396, Appendix D.

Where appropriate, native palms (*Sabal palmetto*) may be used as part of the overall planting requirements. All native palms that will be retained will count towards our tree requirement for each 100' buffer section. Over the length of a buffer zone, three palms will equal one hardwood tree. Palms shall have a minimum overall height of ten feet (10') at the time of planting. There are 110 existing palms within the buffer, which equates to 36 trees (110 palms /3 palms equal 1 hardwood tree = 36 hardwood trees). Overall, the total number of require trees will be reduce by 36 to represent the contribution of palms to the buffer tree planting requirements.

For each 100 linear feet of buffer, 50 shrubs will be installed where no shrubs are present. For each 100-foot section where shrubs exist in the buffer, existing shrubs will be assessed and shrubs will planted so that the number of shrubs in each 100' section will equal meet the required number for that buffer section.

Since ground cover plants already exist, we will not be planting any species of ground covers as part of the Buffer Planting Plan. The Tomoka Reserve Development Team recognizes the importance of native plants and to that end, native wildflower seed will be spread in select areas of the buffer. Florida native wildflower seed will be purchased from the Florida Wildflower Cooperative and spread by hand.

The landscaped buffer area shall include a minimum five-foot (5') wide visual screen constructed of plant materials which are selected, located, and maintained to provide a visual barrier that is designed to achieve forty percent (40%) opacity within three (3) years from the time of installation between three feet (3') and six feet (6') above the average ground level of the landscaped buffer area when viewed horizontally.

Each tree and shrub that will be planted will have a ring of ground cover removed to install each plant. All planting rings around trees and shrubs will be mulched with 3-inches of natural mulch to retain soil moisture.

This Buffer Planting Plan exceeds the requirements set forth in Section 3.05 (c)(2) Landscape design standards by using in excess of 50% xeric or drought tolerant plant species.

B. Standards for success

The property owner will provide a maintenance bond in favor of the City equal to the certified cost estimate of the landscaping improvements in order to guarantee the survival of the plantings for a period of two (2) years. During the two-year grow-in period, trees and shrubs that are not living will be replaced to meet the legal requirement of the bond. The maintenance bond will be released after two years when it has been demonstrated that 80% of all plant material is alive. Release of the bond will occur when the development team provides a report to the City on a raw count of all planted trees and shrubs such there will be 80% or better plant survival. It is expected that Tomoka Reserve will be built in phases where each phase will have its own bond for the plant material in the buffer of that section.

IV. Buffer Maintenance

A. Short Term Maintenance

Plants will be monitored and watered on a regular schedule. Over the short term, we have developed a regular watering schedule that will require plants to be watered multiple times over a seven-day period. Over the long term, we have developed a watering plant that will span 26 weeks. Based on the recommendations from the arborist and landscape architect, we will extend watering if they determine the plants need more water for the plants to

survive. This watering plan exceeds the recommendations of the University of Florida's webpage on Gardening Solutions publication Planting and Establishing Trees.

The plants being used for this project will be either native or Florida Friendly Landscape™ plants. Since the species being used are adapted to this climate and these soils, they will adapt and grow without difficulty since we are using the Right Plants in the Right Place concepts (https://ffl.ifas.ufl.edu/about-ffl/9-principles/principle-1-right-plant-/) as described by the Institute of Food and Agricultural Sciences Extension (UF/IFAS Extension) and the Florida Department of Environmental Protection.

Watering will be accomplished with a large water tank on a truck such that each plant will receive water from a person who will be able to confirm that enough water is provided. Since there are many species of wildlife that live in the buffer, we will not be installing above or below-ground irrigation.

The process of digging and trenching irrigation lines could displace, or harm protected species/existing flora. Additionally, hand-watering the buffer plantings will also the development team to more closely monitor plant health and establishment and will not waste water, which would be detrimental to the health of the aquifer. There are several challenges to using a pump-driven irrigation system, one is the distance to the buffer planting; if the distance is too great, we will not be able to effectively push water that far. The second issue is that the site currently does not have a power supply to run well pumps.

Trees and shrubs will be inspected at regular intervals to assess their health and level of establishment. If trees or shrubs die during the watering period, they will be replaced as outlined in the maintenance bond in favor of the City. A key component to the success of the plantings will be to maintain soil moisture. To achieve maximum soil moisture, we will not remove large swaths of ground cover; we will only remove enough existing plant material to install the buffer planting material, which will then be covered with mulch.

B. Watering Schedule

A watering schedule has been developed and provided below. Each watering event will be accomplished through the use of a truck and hand watering to ensure that each plant receives adequate water. If heavy rain events occur, the watering schedule will be

modified so we are not over-watering or wasting water. The objective of each watering event will be to provide approximately 4-6 gallons of water to each tree during Phase I and 2-gallons during Phases II & III. Shrubs will be given approximately 3 gallons of water in Phase I and 2 gallons in Phases II & III.

Buffer Tree, Shrub, and Bunch Grass Watering Schedule

Plant Material Watering will span six-months (26 weeks)

Phase I – Water 5 times per week, once a day for **five weeks** if plants are installed in the fall and winter (water twice a day if plants are installed between May and September) and monitor plant establishment.
– Monday, Tuesday, Wednesday, Friday, & Saturday

Phase II – Water 3 times per week for **ten weeks** and monitor plant establishment.
– Monday, Wednesday, & Friday

Phase III – Water 2 times per week for **11 weeks** and monitor plant establishment.
– Monday & Thursday

* Watering frequency and volume of water may be adjusted depending on rainfall and how well plants are becoming established, which will be determined by the arborist or landscape architect.

C. Vegetation Maintenance

The most important aspect of maintaining the newly installed trees and shrubs will be managing the ground cover around the plants so they do not overtop the new plantings. Most of the buffer has an intact tree canopy and sparse ground cover due to the shade. Maintenance in areas where there is shade will be less intense and will revolve around removing weeds and ground covers that are outcompeting the new plants. Most of the maintenance work will be accomplished through hand-pulling weeds and spraying the weeds with a mixture of vinegar, salt, soap, and water.

In areas where the buffer is largely absent, maintenance will include mowing the ground covers around the installed plants. Due to the spacing between trees and shrubs, a lawn mower will be used to suppress the ground cover to limit competition when necessary. Most of the maintenance work will be accomplished through hand-pulling weeds and spraying the weeds with a mixture of vinegar, salt, soap, and water.

D. Long-term Buffer Maintenance

The long-term maintenance of the buffer will take place after the two-year buffer survival bond is satisfied. The long-term buffer maintenance will be managed by the Tomoka Reserve Homeowners Association (TRHOA).

TRHOA buffer maintenance activities shall include the removal of dead and hazardous trees, mowing grass that occurs between the buffer vegetation and the rear lot lines of the Tomoka Reserve homes, noxious plant removal as defined by and vine management.

Long-term Buffer Maintenance Schedule:

TRHOA will mow the grass in the buffer monthly between May 1 and October 31 each year. TRHOA will remove dead or hazardous trees as needed. For a tree to be removed, an International Society of Arboriculture (ISA) arborist will need to provide a report stating the tree in question is an “unacceptable risk” for the tree to be removed.

After the formation of the TRHOA, vines will be managed as needed. Once the initial vine maintenance occurs, TRHOA reserves the right to retreat vines after the initial site on a three-year cycle.

When possible, vines should be pulled from trees unless it will cause damage to the tree. When vines are removed, they will be cut just above the ground and treated with a herbicide to kill the underground roots. Whenever herbicides are being used, Florida law requires the herbicide applicators must have or be working for an individual who possesses a valid Florida Pesticide Applicator license.

Serenoa repens	Saw palmetto	20' x 10'	Evergreen
GRASSES			
Muhlenbergia capillaris	Muhly grass	3' x 3'	Evergreen
Spartina bakeri	Smooth cordgrass	3' x 4'	Evergreen
Tripsacum dactyloides	Fakahatchee grass	5' x 6'	Evergreen
WILDFLOWERS			
Baptisia albescens	Spiked wild indigo		Perennial
Coreopsis lanceolarta	Tickseed		Perennial
Coreopsis tinctoria	Plains coreopsis		Perennial
Galliardia pulchella	Blanket flower		Annual
Helianthus debilis	Beach sunflower		Biennial
Salvia coccinea	Scarlet Sage		Perennial
Solidago altissima	Tall goldenrod		Perennial
Solidago sempervirens	Seaside goldenrod		Perennial

* This plant list is not all-inclusive, additional native and Florida Friendly plants may be used based on the recommendcation of the landscape architect and arborist.

All plants listed are species native to Florida and commonly found in Volusia County.

Project Conditions – Tomoka Reserve

1. ***Lot Layout*:** The total number of lots proposed are 272. As shown in Exhibit "C", page PD2, the lot sizes along the perimeter of the exiting Tomoka Oaks subdivision are a minimum of 80' in width by 125' in depth and the interior lots are a minimum of 60' in lot width and 120' in lot depth. The actual count, location, and layout of the developed areas within the development shall be determined during subdivision review of the Preliminary Plat. The maximum lot count shall not exceed 272 units. The lot widths can deviate from the provided ranges if they increase in lot width or depth. No reduction in lot width or total square footage shall be permitted. The request for 272 single-family units or 1.84 units per acre as shown, described, and depicted in Exhibit "C" to the Planned Residential Development (PRD) Development Order is hereby granted.
2. ***Preliminary Plat Required*:** The project shall be required to obtain a Preliminary Plat and provide detail engineering plans with review by the Planning Board and action by the City Commission prior to the issuance of a site construction permit. A neighborhood meeting shall be required after the first Site Plan Review Committee submittal and prior to the Planning Board meeting for the Preliminary Plat.
3. ***Density*:** The proposed gross density is 1.84 units per acre (147.94 acres divided 272 units). The density permitted in the "Low Density Residential" land use is 4.3 units per acre.
4. ***Phasing*:** The subdivision phasing is to be developed with the Preliminary Plat and may be modified with the review and approval of the Site Plan Review Committee as a minor amendment.
5. ***Model homes*:** A maximum of 16 model homes are allowed within the subdivision. Model homes are allowed to be started after a stabilized road is constructed and water and sewer clearances have been obtained which may be before final subdivision acceptance by the Site Plan Review Committee. No certificate of occupancies would be released until after all subdivision improvements are completed.
6. ***Gated community*:** The project is proposed to have a gated access point for vehicles and to allow pedestrian access into the subdivision. Private, gated subdivisions are required to provide easements to the city through the platting process for access and maintenance of the project utilities. The streets, sidewalks, and stormwater system would be privately owned and maintained by the Tomoka Reserve Homeowners' Association. Changing from a gated to non-gated (public) subdivision would be considered a minor amendment.
7. ***Pedestrian access from Tomoka Oaks*:** Additional pedestrian access may be provided by Tomoka Reserve to lots within the existing Tomoka Oaks subdivision with an easement or other legal document approved by the individual Tomoka Oaks property owner(s).
8. ***Emergency Access Easement*:** As shown in Exhibit "C", page PD2, emergency access is required for the project. The easement area would be required to have a stabilized base and a grass surface for emergency vehicle use only. Construction details of the emergency access connection point would occur during the preliminary plat process and be subject to

approval of the Fire Chief, including the number of lots that would require the construction of the emergency access connection.

9. ***Dimensional standards:*** The setbacks for the project shall be:

   60' wide by 120' deep lots

   a) Rear: 20'
   b) Rear (accessory): 5'
   c) Side: 7.5'
   d) Side (accessory): 5'
   e) Side Corner: 15'
   f) Front Yard: 25'
   g) Porch: 15'
   h) Maximum building coverage shall be 50%.
   i) Maximum lot coverage shall be 75%.
   j) Maximum building height shall be 35 feet.
   k) Minimum square footage of house: 1,700 square feet

   80' wide by 125' deep lots

   l) Rear: 20'
   m) Rear (accessory): 5'
   n) Side: Minimum 8' to total 20' – both sides.
   o) Side (accessory): 5'
   p) Side Corner: 20'
   q) Front Yard: 25'
   r) Porch: 15'
   s) Maximum building coverage shall be 50%.
   t) Maximum lot coverage shall be 75%.
   u) Maximum building height shall be 35 feet.
   v) Minimum square footage of house: 1,700 square feet

10. ***Environmental:*** Ayden Environmental, LLC has performed an environmental analysis of the former golf course property and has obtained an approved remediation plan by the Florida Department of Environmental Protection. The summary letter from Ayden Environmental, LLC states: "All work will be completed in accordance with Chapter 62-780 of the Florida Administrative Code, which is Florida's regulatory framework for environmental cleanup." The required remediation plan would be implemented with an approved Preliminary Plat and its associated construction drawings.

    There are no wetlands on the subject property and the property lies within flood zone X (area of minimal flood hazard).

11. ***50 foot vegetative buffer:*** The project proposes a fifty-foot vegetation buffer around the exterior of the property abutting the existing Tomoka Oaks subdivision. This area is approximately 3.3 miles in length. Existing vegetation in this buffer areas would count towards the landscape requirements. The buffer planting plan as shown, described, and depicted in Exhibit "D" to the PRD Development Order is hereby granted.

12. ***Natural preservation:*** Section 2-35(h)(8) of the Land Development Code states: "Twenty percent (20%) of the project shall be left in a natural state. This may include designated conservation areas within lots or common areas, but shall not include classified wetlands and required upland buffers." The project is required to provide 29.6 acres and Exhibit "C", sheet PD6 shows 34 acres dedicated to natural preservation. The 50' buffer abutting the Tomoka Oaks existing lots and area called out for natural preservation shall not be modified and shall always be vegetative areas. Maintenance and replanting as necessary in the 50' vegetative buffer area is allowed with written authorization of the City Landscape Architect.

13. ***Recreational area:*** In lieu of the indoor recreation floor area requirement, the development may provide, at a minimum, an additional thirty (30) square feet per unit of outdoor active recreation space in compliance with Section 2-35(h) of the Land Development Code. The project is required to provide 24,840 square feet of outdoor recreational area. The proposed 9.34 acres of outdoor recreational area exceeds the Land Development Code requirements and is hereby accepted. The final design of the recreational areas shall be provided as part of the Preliminary Plat site plan. The recreational plan to utilize additional outdoor area instead of indoor recreation floor area as shown, described, and depicted in Exhibit "C" to the PRD Development Order is hereby granted.

14. ***Sidewalks:*** The developer shall construct a sidewalk in Phase 1 of the project development along both sides of Tomoka Oaks Boulevard as shown in Exhibit "C." Internal sidewalks are required on both sides of the streets within the subdivision.

15. ***Stormwater:*** The project seeks to use a low-impact development technique of berming around existing areas (keeping existing vegetation) to create stormwater retention areas. The final stormwater design shall be provided with the Preliminary Plat site plan application.

16. ***Fences:*** The fencing requirements for the Tomoka Reserve subdivision are included in Exhibit "C" on sheet PD8. The requirements state:

    > The following fence materials are permitted: wood, black wrought iron, high-quality aluminum, and white PVC. Perimeter fencing along rear or side (from front of the house to rear property line shall be a maximum height of 6 feet. Fencing along the front property line or side property lines from the front of the house to the front property line shall have a maximum height of 4 feet. This "front yard" fencing must be decorative (no solid fences) and if wood is utilized it must be painted.

17. ***Architecture:*** Home designs shall be consistent with the architectural elevations provided in Exhibit "C" on sheet PD8 and an architectural review committee for the subdivision is required. Submittal of new homes or modifications for building permits shall include written documentation from the architectural review committee that all architectural conditions have been satisfied.

18. ***Traffic:*** The project submittal for the issuance of a development order includes a Traffic Impact Analysis (TIA).

    A. Traffic signal at Nova Road and Tomoka Oaks Boulevard: The traffic analysis has identified the need for a traffic signal at Nova Road and Tomoka Oaks Boulevard. The applicant has agreed to a voluntary condition that the applicant will make application for the permits for the signal within 30 days of phase 1 plat approval (Preliminary Plat), the developer will initiate an application to the Florida Department of Transportation to construct a traffic signal at the intersection of Nova Road and Tomoka Oaks Boulevard. Prior to the issuance of first certificate of occupancy within the Tomoka Reserve Development, the traffic signal at Nova Road and Tomoka Oaks Boulevard has to be completed and functioning or fully bonded, and/or the full cost of constructing said traffic signal system must be deposited with the City of Ormond Beach.

    B. Intersection of Saint Andrews Drive and Tomoka Oaks Boulevard: The applicant has demonstrated that the diamond intersection meets the required level of service. The applicant has agreed to provide improvements to be engineered at the Preliminary Plat to modify the existing drive aisle to resolve turning radii conflicts for emergency vehicles and provide additional landscaping. The Preliminary Plat site plan shall be reviewed by the SPRC and Planning Board, and a recommendation provided to the City Commission on the geometry of this intersection.

19. ***Hours of construction:*** Hours of outside construction activities shall be from 7:00 a.m. to 7:00 p.m. Monday through Saturday, with no outside construction activities on Sundays.

20. ***Utilities*:** Detailed water and sewer connection shall be provided at the time of the Preliminary Plat. The project intends to use re-use irrigation, as available, with a supplemental well as needed.

DRAFT Planning Board minutes

September 26, 2023

M I N U T E S

ORMOND BEACH PLANNING BOARD

Regular Meeting

September 26, 2023 6:08 PM

Calvary Christian Center
1687 West Granada Boulevard
Ormond Beach, FL 32174

PURSUANT TO SECTION 286.0105, FLORIDA STATUTES, IF ANY PERSON DECIDES TO APPEAL ANY DECISION MADE BY THE PLANNING BOARD WITH RESPECT TO ANY MATTER CONSIDERED AT THIS PUBLIC MEETING, THAT PERSON WILL NEED A RECORD OF THE PROCEEDINGS AND FOR SUCH PURPOSE, SAID PERSON MAY NEED TO ENSURE THAT A VERBATIM RECORD OF THE PROCEEDING IS MADE, INCLUDING THE TESTIMONY AND EVIDENCE UPON WHICH THE APPEAL IS TO BE BASED.

PERSONS WITH A DISABILITY, SUCH AS A VISION, HEARING OR SPEECH IMPAIRMENT, OR PERSONS NEEDING OTHER TYPES OF ASSISTANCE, AND WHO WISH TO ATTEND CITY COMMISSION MEETINGS OR ANY OTHER BOARD OR COMMITTEE MEETING MAY CONTACT THE CITY CLERK IN WRITING, OR MAY CALL 677-0311 FOR INFORMATION REGARDING AVAILABLE AIDS AND SERVICES.

I. ROLL CALL

Members Present	Staff Present
Angie Shull, Vice Chair	Claire Whitley, Assistant City Manager
G.G. Galloway	Steven Spraker, Planning Director
Al Jorczak	Cara Culliver, Landscape Architect
Mike Scudiero	Robin Gawel, Senior Planner
Barry du Moulin	Sarah Cushing, Senior Planner
Troy Railsback	David Allen, Planning Civil Engineer
Doug Thomas, Chair	Randy Hayes, City Attorney
	Marcella Miller, Recording Technician

II. INVOCATION

Chairman Thomas led the invocation.

III. PLEDGE OF ALLEGIANCE

IV. NOTICE REGARDING ADJOURNMENT

NEW ITEMS WILL NOT BE HEARD BY THE PLANNING BOARD AFTER 9:00 PM UNLESS AUTHORIZED BY A MAJORITY VOTE OF THE BOARD MEMBERS PRESENT. ITEMS WHICH HAVE NOT BEEN HEARD BEFORE 9:00 PM MAY BE CONTINUED TO THE FOLLOWING THURSDAY OR TO THE NEXT REGULAR MEETING, AS DETERMINED BY AFFIRMATIVE VOTE OF THE MAJORITY OF THE BOARD MEMBERS PRESENT (PER PLANNING BOARD RULES OF PROCEDURE, SECTION 2.7).

DRAFT

V. APPROVAL OF THE MINUTES

Mr. Jorczak motioned to approve the August 21, 2023 Minutes. Mr. Galloway seconded it. Vote was called, and the motion was approved (7-0).

Chairman Thomas opened the Public Hearing.

Attorney Hayes explained the continuation of the August 21, 2023 Planning Board meeting on Tomoka Reserve. Recommendations were made by staff, Planning Board, and the HOA attorney to allow more time to analyze the previous set of new plans. Tonight, the Planning Board can make a recommendation to the City Commission or request additional information. Attorney Hayes added that the recent material submitted, according to the applicants, is consistent with the Comprehensive Plan and Land Development Code (LDC) regulations and staff disagrees and recommends that the application be denied. He concluded that the witnesses are not required to be re-sworn and directed for those wishing to speak to announce their name and whether or not they have been sworn in.

Chairman Thomas and the Planning Board discussed the allotted speaking time for residents and audience members and it was determined to allow three minutes per person. Chairman Thomas opened the public hearing.

VI. PUBLIC HEARINGS

A. PRD 2022-043, Tomoka Reserve – Issuance of a Development Order – continuation of the July 13, 2023 meeting

Staff Presentation

Mr. Spraker, Planning Director, thanked Calvary Christian Center for hosting the meeting and stated that the application is for the issuance of a development order for the Tomoka Reserve subdivision, at 20 Tomoka Oaks Boulevard. He continued that the existing land use is "Low Density Residential" and the existing zoning is Planned Residential Development (PRD). The zoning district does not have a development order associated with it any longer and has since expired, the reason for the public hearing.

Mr. Spraker continued that the project has gone through two pre-application meetings, the Site Plan Review Committee (SPRC),a neighborhood meeting, and today, the third Planning Board meeting. Mr. Spraker stated that if there is a recommendation tonight, the tentative City Commission meeting date will be November 07, 2023 at Calvary Christian Center. Mr. Spraker explained the issuance of a development order review process. A PRD is a zoning document that shows lots, landscape buffers, open areas, recreational areas, and architectural standards. A PRD does not require engineering construction plans that include stormwater and utilities, which will come later with a preliminary plat. The preliminary plat would go through a neighborhood meeting, Planning Board and City Commission.

Mr. Spraker displayed a recap of the July 13, 2023 site plan with the proposal of 276 units, a mixture of 50', 60', 80' wide lots. He explained the August submittal that was before the Planning Board, with a mixture of 60', 80', 90', and 100' wide lots, but because it was submitted after it was advertised, it required a new public hearing. He continued that the applicant agreed with some SPRC recommendations, including

the building coverage, setbacks, note for lot separation, Tomoka Oaks diamond improvements, sidewalks on both sides of Tomoka Oaks Boulevard, neighborhood meeting for the preliminary plat, the timing of the traffic signal, updated architectural design language and the removal of the cut-through of amenity space parking area.

Mr. Spraker stated that a new site plan was submitted on September 06, 2023, and the changes are primarily the mixture of lot sizes along the perimeter of the boundary of the project of 80' wide lots and interior, 60' wide lots. Other aspects of the site plan that did not change were the gated vehicular access of the subdivision, it is not in the wetlands or floodplain. Mr. Spraker added that other characteristics that did not change were the environmental assessment provided, the 34 acres of natural preservation, recreational areas, 50' buffer around the site, preservation of historic trees, the school concurrency and Traffic Impact Analysis provided.

Mr. Spraker stated that the two remaining key issues are the perimeter lot sizes and the material and irrigation of the 50' buffer. The SPRC continues to recommend 100' wide lots on the perimeter where the site plan shows 80' wide lots as the former and surrounding zoning district of R-2 are 100' wide lots.

Mr. Spraker continued that the existing conditions today with the 3.3 mile buffer in the planting plan states that there are native trees and shrubs that will provide screening between the existing homes and the proposed development. Another existing condition is the existing vegetation to be able to use and gaps of landscaping to be planted, and 70 percent of the 50' buffer with trees and shrubs for visual screening. Mr. Spraker stated that the proposed plan shows that the buffer shall be 50' wide containing five trees and 50 shrubs. No groundcover was proposed in the plan. The existing vegetation would be used for gaps of landscaping to be planted. Mr. Spraker added that watering would be provided by a large water tanker truck, not permanent irrigation. The plan offered a maintenance bond for two years and requires an 80 percent survival rate to release the bond.

Mr. Spraker delivered an overview of staff's recommendations, including the City's Landscape Architect, of a type 6 buffer of seven trees, 70 shrubs, and 70 ground cover plants. The proposed plan does not meet the visual screen requirement of the LDC. He stated that staff is supportive of the use of native/xeric plantings. He added that that the irrigation by water tanker truck does not comply with the LDC. Mr. Spraker expressed concerns with the fact that the watering plan shifts compliance to the future HOA. It can involve additional maintenance and costs, as well as the 2-year bond and 80 percent survival plant rate.

Mr. Spraker reviewed the correspondence that was received and that was also included in the meeting packet. Some of the correspondences included the compatibility with the existing Tomoka Oaks, property value concerns, loss of quality of life, traffic concerns, golf course perpetuity and related uses, the existing configuration of the diamond intersection, Tomoka Reserve HOA concerns, wildlife concerns and buffer concerns.

Mr. Spraker delivered an overview of the Planning Board review criteria consisting of the application submittal, staff report, SPRC comments, written correspondence provided, criteria of the LDC contained within the staff report, and testimony provided at the Planning Board public hearing. He stated that staff recommends denial of the proposed site plan for the issuance of a development order, based on the

perimeter lot sizes and the buffer planting plan. Mr. Spraker continued that if the Planning Board believes that it is appropriate they can recommend approval. Either recommendation of approval or denial goes to the City Commission for the final decision.

Applicant's Presentation

Mr. Rob Merrell, Esquire, Cobb Cole Attorneys at Law, representative for the applicant, stated that Mr. Don Spence will speak again on the buffer and Mr. Michael Hoteling, on the lot widths, the two key issues. Mr. Merrell recapped on the PRD due to its custom zoning for the property. He asked the Board for suggested items in negotiation for an agreement.

Key issue: Buffer:

Mr. Don Spence, Master Arborist/Native Plant Expert, Ph.D., Native Florida Landscapes, explained that he has been working with landscaping and native design for 25 years. Three years ago he completed a tree survey for the property and beginning in January, started work on the buffer plan. Mr. Spence stated that it is based on a low density residential and a buffer planting plan that had three or four plants to fill in gaps along the shrubs. He continued that several months later, they got pushback from the City as they wanted a type 6 buffer. He explained the reasons that the team felt it was not appropriate as a type 2 buffer is outlined for low density residential. A type 2 buffer is three trees and 30 shrubs. The team proposed a bonified, meaningful type 4 buffer with five trees and 50 shrubs, to fill in the gaps to provide visual screening between the existing homes and the homes that are proposed to be built. Mr. Spence expressed his concern with the said irrigation requested, as the existing trees and trees to be planted are native and once established over the next six to seven months, will not need it, same as the existing buffer that is not being watered. He stated that the goal is to plant plants that mimic the existing trees in the buffer, claiming that if the tree dies it will be replaced per the two year bond.

Mr. Spence continued reviewing the buffer planting plan and stated that the 50' wide buffer, that would be managed by the HOA, if there are tree problems would not be able to plant across the entire buffer due to many of the homes having fences or walls. In the plan, the center 20' of the buffer would be the planting zone. He continued that trees and shrubs need full sun and cannot be planted underneath of canopies. Mr. Spence stated that space is needed for access (15' on the development side and space for neighbors on the backside). He added that access is needed behind the property lots of the homes built to manage trees and any invasive plant problems, therefore cannot plant across along the entire width of the buffer. Mr. Spence reassured that the plants will be watered and made sure of their survival at 100 percent from the initial plan of 80 percent, after two years. The site will develop in phases and the bonds will follow in phases and long-term maintenance will be driven by the legal agreement that the HOA develops. Mr. Spence reviewed a table that explains the watering phase for the trees and shrubs and stated that the plan meets and exceeds what the University of Florida recommendation is. He continued that they are not willing to dig up the buffer for ground coverings and feel it does not add to the visual screening. He pointed out that a water tanker truck is in the plan for irrigation and backed up his point with the LDC guideline specifying that if using native/xeric plants a permanent irrigation system is not required. Mr. Spence concluded that there is no standard for a type 6 buffer being applied in a residential setting and no example of an industrial buffer design against residential.

Mr. Merrell stated that the proposed buffer plan is well founded and innovative, concurring with Mr. Spence, and added that a permanent irrigation system would tear up the manicured grass.

Key issue: Lot sizes:

Mr. Michael Hoteling, MAI, Managing Partner, Moody Williams Appraisal Group, stated that he has been appraising commercial, residential, subdivision type properties for 20 years. He spoke on the appropriateness of the lot sizes and stated that most of the lots of the homes being proposed are 2,100 to 2,900 square feet and most of the lots that get sold are between 60' wide and 80' wide, with some 100' wide. Mr. Hoteling commented that this will be a nice subdivision where the homes can range from $600,000 to possibly over $1 million. He added that when pricing the homes in Tomoka Oaks three weeks ago, there were no homes for sale that exceeded $700,000, except for those along the water. Mr. Hoteling concluded that what is being proposed to be built will add value to the existing development and not detract from it.

Mr. Merrell stated that the alternative to the custom zoning is straight zoning. The subject property is low density residential in which the zoning classification does not have all of what is being offered through the proposed project. He explained the reason it was decided to go through the PRD process and propose the combination of lots is because the market does not do 'Tomoka Oaks lot sizes' at 100' by 100' anymore. Mr. Merrell added that the applicants wanted the mixture of lot sizes starting at 50' wide lots and a larger landscape buffer for separation. The minimum guidelines for the landscape buffer is required to be 50' and if adding all of the green around the outside it is an average of 129' of greenspace between both properties. Doing straight zoning at a 6' buffer requirement as opposed to the 129'. The straight zoning would have also offered only two trees and 20 shrubs as the landscaping buffer requirement. Mr. Merrell added regarding outdoor recreation, and the open space and parks, that they are a concession as part of the negotiating PRD. Mr. Merrell referenced the architectural standards and how the applicants listened to the neighbors and their dislike of cookie-cutter homes. He touched on the pedestrian connectivity being volunteered, stating that they would add sidewalks out to Nova Road. Mr. Merrell concluded that something is going to be built, whether based on custom zoning or straight zoning.

Board Questions of the Applicant

Mr. Scudiero asked what the average lot square footage is in the existing Tomoka Oaks development versus what the perimeter lots would be with the 80' wide, 90' wide, and 100' wide lot range.

Mr. Dwight Durant, Zev Cohen & Associates, stated that what is being proposed are 80' wide by 120' deep lots, approximately 10,000 square feet, and the existing typical Tomoka Oaks lot is 100' by 120', approximately 10,000 to 12,000 square feet. The inside lots are approximately 7,000 – 8,000 square feet. It was discussed that some of the proposed lots have a different rear width and can be above 10,000 square feet.

Mr. du Moulin inquired about the proposed irrigation of the buffer and if there is a specific amount of time that the water tanker truck would irrigate. Mr. Merrell replied that the detailed proposal and plan is in the board packet materials.

Chairman Thomas asked about the different proposed façades of the homes and asked for clarification on if it is every 4th house before duplicating the same façade,

expressing that he does not like every other house repeating the same design. He added that currently in Tomoka Oaks you will not see two houses within 200', 300' and 400'. Mr. Merrell replied that the same façade cannot be next to each other or across the street, and urged Chairman Thomas and the Board to be specific in what it is exactly that they would like to see. Mr. Merrell clarified that the applicant is not trying to recreate or replicate Tomoka Oaks, an older product and design, but bring forward the quality and variety that they have asked for.

Mr. Railsback referenced the elevations and colors of the homes and stated that they should be not 'cookie cutter' in design. He asked what is being done for the softening of the diamond and if it will be a roundabout instead. Mr. Merrell relied that the diamond is proposed to be reconfigured to an amoeba shape, with rounded corners, allowing better flow for vehicles, including buses, as well as adding landscaping in the island.

Mr. Jake Stehr, Zev Cohen & Associates, read the material included in the recently submitted plans that stated architectural variations in the variety of house sizes designs in the neighborhood is encouraged to facilitate it so that the two adjacent homes on the same side of the street as well as the house across the street and its two adjacent homes have to have a minimum of three different design elements of the following ten elements.

Ms. Shull asked if the plan was referencing different design elements (example brick and siding) or if the whole house is different. Mr. Stehr answered elements such as roof pitch and roof type, the skin/exterior finish material, color, garage orientation and size, porch size and location, number of stories, window sizes and shapes, window location and decorative elements. He concluded that houses cannot be mirrored across the street from one another and that options will be given to future home buyers.

Mr. Galloway asked for clarification on the buffer. Mr. Merrell explained that their idea is to leave the places that already have bushes and trees alone. The reason for not wanting to lay groundcover down is to avoid tearing the ground/landscaping up and put wild landscaping in. Mr. Merrell added that if landscaping was put in along the entire 50' buffer it would not be able to be accessed and maintained, according to Mr. Spence.

Mr. Jorczak inquired about what the average required time for the trees, based on size, that is going to be planted to be able to provide 100 percent screening in all of the areas that trees have not been supplied to fill the gaps. He commented that it will determine if it will be three, five, or ten years before the trees will provide the screening. Mr. Spence replied that different trees grow different ways and it is hard to tell. The trees are designed to provide a canopy and the shrubs will provide the visual appearance between the homes. There is not going to be 100 percent complete vegetative screening, as the code only calls for 40 percent. Mr. Spence concluded that there will be gaps for a while and in time the plants, natives and shrubs will mature and will reseed themselves in the buffer, creating a denser buffer over time.

Ms. Shull asked Mr. Spraker for explanation of the request for the 50' buffer, the irrigation, and type 6 buffer. Mr. Spraker answered that one of the key factors expressed was the buffer and the lot sizes during the pre-application neighborhood meetings and the SPRC meetings. The goal is to provide the buffer to mitigate for some of the loss of the natural buffer that is there today. Tattersall, RidgeHaven, and Tymber Creek Apartments are projects that have natural buffers. He stated that staff

is not against the native or xeric plantings, but are against taking a former golf course, developing it into residential, and leaving gaps in the buffer. He added that Ms. Culliver, Landscape Architect, is available to go through the details of the recommendation if necessary. Mr. Spraker added that staff believes that irrigation is a key source for the plantings.

Tomoka Oaks HOA Presentation

Mr. Dennis Bayer, Esquire, 109 6th Street, Flagler Beach, legal counsel of the Tomoka Oaks HOA, expressed his disappointment with the applicant's response to the HOA in negotiating the architectural standards, traffic impacts and buffers. A few of the architectural ideas were agreed upon, but not on having the different architectural styles close to one another. Another HOA request was for buffer enforcement once the two-year performance bond is over. No comments were received back from the applicants regarding if that language was acceptable or not. Mr. Bayer rebutted Mr. Merrell's comment and said that property is currently zoned PRD and the last development proposed that came to the Board was to convert the golf course, which was PRD with part of the property being a golf course, and part of it residential. He spoke on the PRD and R-2 zoning and referenced a Florida Supreme Court case, The Snyder Decision, a landmark land use decision that has been in place in the Florida Supreme Court since 1993. Based on it, he remarked that the City Commission can say that they do not want R-2 zoning and that they want it to stay PRD, given the unique circumstance presented by the property. Mr. Bayer continued that they agree with staffs comments on the issue with the buffer and stated that the buffer is typically required between the new residential development and the existing residential development and are typically at a much higher standard than residential next to residential, as the use is being surrounded, therefore a different buffer requirement. Mr. Bayer referenced the Matanzas Shores Golf Course conversion where they required a lot of different issues with the buffer that was much greater than the standard residential buffers, which is part of the golf course conversion process. He stated that this is not the standard development review and is very unique. Mr. Bayer concluded that the HOA agrees with staff on the 100' wide lots on the perimeter and the type 6 buffer, and the recommendation of denial to the City Commission.

Mr. Tom Harowski, Certified Planner and Tomoka Oaks resident, 97 N. St. Andrews Drive, expressed the resident's frustration with the developments with the late withdraw of the plan that they presented at the last meeting, and the lesser plan submitted. He spoke on the applicants list of concessions in response to staff comments and stated that it did not affect the project in size or layout. The addition of the sidewalks on Tomoka Oaks Boulevard and the modification of the island, he says are basic safety issues. Mr. Harowski commented that the basic issues remain the same since the beginning. He continued that the applicants refuse to apply the staff recommended 100' wide lots on the perimeter or offer reasonable solutions. The threatened alternative of R-2 standard zoning, which requires 100' wide lots throughout seem acceptable to the applicant as an alternative and should be acceptable for a portion of the project. Mr. Harowski remarked that they turned to the design guidelines but still need to include the requirement for diversity in garage door orientation and the way the driveway faces. The compatibility is not having clusters of units that are the same. He remarked that the design that they have seen does not get that point. Mr. Harowski spoke on the important factor of the traffic signal

application and how a 30-day period was mentioned previously and stated that the application should be made promptly.

Audience Comments

Ms. Flavia Cassasola, 21 N. St. Andrews Drive, asked if the proposal gets approved if a moratorium has been considered on the noise level, 24 hours a day/7 days a week, from sunrise to sunset. She mentioned that people walk and bike the neighborhood at all hours of the day and remarked that the Mac tucks can be driving through as well as jack hammers working at all hours of the day and night, including weekends and holidays. Ms. Flavia asked if the construction schedule has been considered. She added that the investors bought the property to make money and that she has been in opposition since the beginning as there has been no compromise in the 272 units. Ms. Cassasola concluded that it is going to impact Tomoka Oaks, the Trails and Talaquah as well as the traffic and recommends denial.

Ms. Ashley Dufrene, 118 N. St. Andrews Drive, said that she took the Oath and reminded the Planning Board that the City of Ormond Land Development Code (LDC), Section 1-18, states that the proposed use will not substantially or permanently create a nuisance, deprive adjoining properties of adequate light and air or create excessive noise, odor, glare or visual impacts on the neighborhood and adjoining properties. Ms. Dufrene remarked that she lives on the golf course and knows that all three of those will happen if the development takes place without the proper guidance that the City and HOA is providing.

Ms. Bonnie Kloepfer, 23 Tomoka Oaks Drive, did not take the Oath prior but does so now. She commented that she is at the mouth of the Tomoka Oaks Golf Course. She added that she has a brand new white house and it will get filthy from the trucks and dirt from construction. She continued that the issue of 1,100 cars per day going back and forth is insane and cannot imagine what the traffic will be like. Ms. Kloepfer commented on their sentiments on trying to make it easy for the residents and their claim of compromising. She expressed her discontent with proposed number of homes. Ms. Kloepfer referenced yesterday's newspaper in regards to the purchases of one million plus homes on the rise in Volusia and Flagler Counties. She concluded her comments with the expression "if you build it, they will come", and said that she would like a proposed development such as Tomoka Estates or Estates of Tomoka Reserve instead of jammed in houses.

Ms. Denise White, 9 Fox Run Trail, The Trails, stated that she took the Oath. She thanked the Board for their time and service. Ms. White added that a reduction of four homes does nothing for the safety, traffic, density or lifestyle issues and changes nothing whatsoever. She remarked that it will impact everyone's lives and safety. Ms. White spoke on the merit of the old adage, "just because you can build does not mean that you should."

Mr. Jeff Boyle, 614 N. Halifax Drive, took the Oath and stated that the data in numbers in Volusia County are causing loss of sight in the big picture. He referenced the Comprehensive Plan policies and goals and remarked that the latest site plan is not compatible with adjacent homes and added that the revisions protect the neighborhood character, and does not guarantee safe traffic flow. Mr. Boyle continued that the revisions do not preserve natural open space. He stated that the golf course should have been zoned Open Space/Recreation, and commented that it is a mystery why it was not. The zonings protect adjacent property rights. Rezonings threaten those rights. Mr. Boyle said that Tomoka Oaks defines everything that is

good about Ormond Beach with a quality environment, quality homes and quality people who have suffered this thread with heroic dignity after paying premium property taxes to the City for over 60 years. Mr. Boyle stated that the revised site plan disrespects the city, the spirit and intent of the land use codes, the residents of the Trails and other nearby communities and the people of Tomoka Oaks. He added that they deserve better. He concluded that the revised plan is not Ormond Beach and is not who they are.

Ms. Ronnie Ranieri, 216 Rio Pinar Trail, swears to the Oath, and expressed her concern with 272 houses with only one point of egress. Another concern expressed is the traffic in the mornings and the safety of the kids that are walking or riding bikes to Tomoka Elementary School and the private Temple school. She commented that it is a tragedy waiting to happen. Ms. Ranieri remarked that reducing the plan by four houses from 276 is not going to work. She added that hundreds of cars are going to be coming out of the neighborhood at rush hour in the morning. Ms. Ranieri commented that most families have two cars and with the number of houses that are proposed, is worried about the kids.

Ms. Connie Colby, 108 Robal Lane, stated that she is concerned about it being a gated community as school busses do not go into gated communities. The children in middle school can walk and ride their bikes but middle school busses will have to come in the community somewhere to pick the kids up and will have to park outside of the gate, near the roundabout which would stop traffic. Ms. Colby continued that in her neighborhood a lot of the parents drive their kids to the bus stop or pick them up in the afternoon which will lead to more people parking along the road, causing a traffic mess. Ms. Colby pointed out that according to one of the maps, and with her experience living in gated communities, there has to be an emergency exit for emergency vehicles and suggests that there be a plan for it. Ms. Colby concluded that a lot of the proposed properties are close together and expressed her concern for boat, trailer, and RV storage on the properties.

Ms. Kelsey Kipi, 52 Pine Valley Circle, vowed to take the Oath, and commented that the reduction of the four homes on the plan is nothing and explained how they made lots slightly larger at the expense of the greenspace. She added that the developers purchased the golf course and asked why it could not a golf course that goes in. Ms. Kipi stated that Tomoka Oaks Golf Course closed due to a lack of maintenance to the course and not a lack of interest in the sport. Two local golf courses, both Halifax Plantation and Riviera, both have waitlists, according to Ms. Kipi. She suggested to restore the course and the membership with follow and profit will be made, and the greenspace will remain. No more angry citizens and no more debating on lot sizes and buffer zones and no more FDEP requirements. Ms. Kipi concluded to restore the course or sell it to someone who is willing to do so.

Ms. Lauren and Mr. Ned Huhta, 30 Pine Valley Circle, stated that they took the Oath. Ms. Huhta stated that she is a third generation resident and her grandfather designed and built their home. She expressed their concern with the signage for Tomoka Reserve and asked for specifics of where the signage will be located. Mr. Huhta added that he grew up in the house. He asked if the reclaimed water is going to be used for the proposed neighborhood residents as well as those around the perimeter. He asked if an adjoining property owner has a say in what is planted in the buffer and can decide on something mutually agreeable. Mr. Huhta remarked that they do not like Magnolia trees.

Ms. Wendy Dedo Findes, 16 Oakmont Circle, stated that she did not take the Oath but does now, and has lived in Tomoka Oaks for 27 years. She asked if the Planning Board has visited the Tomoka Oaks Golf Course or driven through Tomoka Oaks. She added that it is a very quiet, residential community and when the kids are in school, people are walking around quietly. Ms. Dedo Findes stated to build the proposed development inside of the golf course area will be a catastrophe. She said that there are no sidewalks, therefore kids ride their bikes in the narrow streets due to the neighborhood initially tailored to an older community. Ms. Dedo Findes added that the Trails are going to be affected. She spoke on the light at Tomoka Oaks and Nova Road and how it will be a havoc, with only one ingress and one egress through Tomoka Reserve which will spread out through Main Trail, Iroquois, and Rio Pinar. She continued that are a lot more children in the community now, including her 6th grade son at Ormond Beach Middle School (OBMS). She expressed her concern for all of the kids. Ms. Dedo Findes stated that all of this should be of consideration, the children, quality of life, and the environment. Ms. Dedo Findes concluded that wildlife have been displaced because there is nowhere to go with all of the developments.

Mr. Tyler Travis, 888 Willow Run, stated that he rents in Tomoka Oaks, and just moved here from Virginia and elaborated on his experience in a dense, high-traffic area in Virginia and offered a contrary, counter-perspective, expressing his respect for the current residents. He continued that he likes his privacy but is also interested in smaller lot sizes to be able to afford a home. Larger lots and estates would price him out, according to Mr. Travis. He is interested in new construction, and spoke on the architectural designs and how the applicant plans to alternate styles throughout. With townhomes it was only door color or shutter color that changed. Mr. Travis commented on the traffic and said that as long as there are sidewalks and traffic crossing lights, just as he was in a dense area in Virginia and it was not an issue. The kids had to walk to the bus stops, other than the younger kids whose parents took them to school. He added that he has a young child and had no problem playing with them out in the streets in their neighborhood.

Mr. Robert Banker, 1 Tomoka Oaks, #135, Escondido, stated that when the HOA President raised the idea of 276 units going in, the residents wanted it changed. He agreed with the President that then it went down to 272 units, that he did not like it and that it was not much of a change. Mr. Banker continued that he would like to see the number 0, unsure if it will happen. He commented that the applicant stated that they were going to put in $600,000, $800,000, and possibly $1 million homes. Mr. Banker stated that the plan shows a section in the middle similar to appearance as a sardine can which he does not see them being 7', 8', 10', 15' to 20' apart. He suggests that they will not sell for more than $100 to $150,000. A $700,000 will not be next to a $150,000 and still maintain value. He referenced the infrastructure and commented that no one is considering what it will do to the Publix area. Mr. Banker stated that the President commented that something is going in, and he asks why and what is the hurry. He spoke on a unilateral amendment and how the language for it should be stricken. Mr. Banker asked how when the construction is going on with the trucks backing up at the traffic signal, how the traffic will be going in and out.

Ms. Michele Zirkelbach, 328 River Bluff Drive, stated that she swears to the Oath. She thanked the Planning Board members for their time. In reference to time, she added that Mr. Merrell started out his presentation with the remark that a lot of hours have gone into talking about of stuff, and the irony in the statement. She commented

that for every hour that Mr. Merrell has spent, it is a billable hour for him and the residents match him hour for hour times every resident in the neighborhood and have more invested in this in manpower hours and are ready to have a real negotiation. Ms. Zirkelbach stated that when Mr. Merrell sits at the mediation table when someone comes back with a less than 2 percent reduction, he takes it for what it is a slap in the face. She continued that is where they are, 276 homes, down to 272, is not a meaningful move on their part in which finds offensive. She continued, and referenced Chairman's remark on speaking directly to the plan that that represented, and said that she finds it unacceptable. She spoke on the previous proposal approved, keeping parcel greenspace golf course and having less homes and nothing has been proved in terms of traffic. Ms. Zirkelbach stated that if continuing with this back and forth, for the Planning Board or City Commission to ask the hard questions about the traffic study. She stated that when looking at the traffic study and its statement that one car is going to be going to Tomoka Elementary out through Nova Road, that they have more common sense. She concluded that she agrees that something is going to go in there and offered food for thought on the market out there not for smaller lots and commented that Kings Landing subdivision in Port Orange is being brokered by Realty Pros, Mr. Buzzy Porter and Mr. Bill Navarra, whom she esteems, but said they are one acre home sites that are selling for $250, 000, $267, 000 to $278,000. Ms. Zirkelbach stated that if the threat is R-2 zoning and all of the lots being 10,000 square feet that the whole concept should be reconsidered as one-acre lots. One-acre lots is where it is at!

Ms. Missy Herrero, 111 N. St. Andrews Drive, stated that she has lived there for over 30 years and residents have spent thousands of dollars for legal representation to defend their quality of life and safety of their community. She continued that they do not have money to gain in the war of attrition. She said that they have been meeting with different members of the development and Board for over two years. Mr. Ray Barshay was quoted in the newspaper for saying that they just have not been able to tell their story, and Ms. Herrero commented that she does not know what they have been doing for two years. He invited them to see the quality of the product that they wanted to build out at Plantation Bay, on 80' wide lots. Ms. Herrero asked before she took her time to do so, what was behind the 80' wide lots. The answer was a golf course. Ms. Herrero spoke directly to the new plan and said that it is still not compatible in the existing neighborhood. 60' and 80' wide lots does not fit. The proposed buffer is the most inexpensive approach to the buffer. She mentioned a comment brought up by their HOA Attorney, that it is not a neighborhood backed up to a neighborhood, it is a neighborhood where people invested in property and homes on a golf course for views and privacy and are losing that, so the buffer should not be treated as a regular Residential to Residential buffer. Ms. Herrero commented that Mr. Rubin is from South Florida where she grew up, and her friend sent her miles and miles of buffers, dense, diverse, and well-maintained examples, with no water trucks driving along the buffer. She suggested that if it has to be built to some extent that it needs to be done in the best, high-quality possible approach as the reality is that the environmentally-friendly innovative approach is the least expensive and the most profitable for the developer. Ms. Herrero commented that there is information on how when golf courses are developed it affects the value of homes, with experts that say the opposite, and she said that data can be provided for it. She added that they do not have millions of dollars to win on this and they do. She suggested that if someone had time to pick apart the experts, it does not all add up and urged the Board vote no.

Ms. Dale Ryals, 20 Eagle Court, stated that she was not hear at the last meeting to take the Oath. She commented that her husband was in the hospital over the last month at Advent Hospital and when transported by ambulance and admitted to the Emergency Room, where he had to stay for two days due to no available room in the hospital. She continued that the hallways were lined with patients. The hospital claimed that they are not going to improve with only two hospitals. Ms. Ryals stated that when the development order was done the neighborhood was told by the City Commission that the golf course was needed for holding and draining the water to be able to put it back into the aquifer. She added putting rows of the houses with concrete and asphalt roads will have sewer drains and it will end up in the Tomoka Basin. They were told they could not add too many chemicals to the golf course so that it would not get into the Tomoka Basin. Ms. Ryals commented on the million and a half gallon water that had to be added to the reclaimed water, in which 250 of it came from St. Johns, and 250,000 came from her husband's pocket. The mylar-rubber liners was not paid for so her husband had to pay a lot of money to put the liners in, which could be an EPA problem.

Mr. John Rhoades, 39 N. St. Andrews Drive, stated that on his property, the city sewer and water/electricity come in from Nova Road through his yard/easement. He was aware when he purchased the property. He added that the infrastructure is going to have to come in from somewhere through easements or the main road which will tear up roads and create a miserable quality of life. He continued that the traffic and noise will be horrible and wants people to be aware of it when they are coming through resident's yards. Mr. Rhoades concluded that he appreciates the Boards time and trouble.

Mr. Paul Hughes, 4 Lauren Court, stated that he has taken 30 years of Oaths with the Government as an officer and added that his Oath is his bond. He commented that Tomoka Oaks is the body and the donut hole looks more like the large intestines. He remarked that hope is not a good plan for investments and added that there is no detailed entrance, drawing or plans that have put up to the gated, private, profit-motivated, smaller lot community. Mr. Hughes stated that the Escondido neighborhood has not seen any drawings to see how their lives will be altered with all of the underground utilities, sewers, that are max capacity now will all have to be altered at an extreme cost. He spoke on the northeast section where it has been cleared already on the plans and asked how they got a land use variance to alter the neighborhood standard to demolish a house or use for a rear entrance for EMS. Mr. Hughes remarked that he sees the issue with the watering for the plants and claims it will not be water that is treated. He referenced the Misners Branch Bridge and the overweight trucks that will be going over it and asked who will pay the construction costs when it has to be closed down for maintenance. He added that the plans do not include the utilities, and concluded that a person with nothing to hide, hides nothing.

Mr. John Measel, 16 Eagle Court, spoke on not irrigating the buffer and commented that if you do not water grass, you will get nothing but weeds and sandspurs. He added his concern with the traffic diamond and the thought that it will be suitable to add another 500-600 cars daily. He stated that it is not suitable now. Mr. Measel suggested to put a traffic circle and concluded that the traffic will be horrible.

Applicant's Rebuttal

Mr. Merrell thanked the residents for being there and spoke on the number of units that were reduced and stated that it started at 300 and is at 272. He reiterated the

straight zoning concept, the alternative in negotiating the zoning. He referenced the Snyder Case law and stated that it has nothing to do with rezoning of property that is surrounded by the exact same zoning. The limit of what you can ask for was talked about and it was said that you cannot think you are going to get the limit of what the Comprehensive Plan allows. Mr. Merrell referenced Mr. Spraker's report in that the Comprehensive Plan allowance is 4.3 units per acre, 632 units, which was their starting point.

Mr. Merrell referenced Mr. Harowski and thanked him and his input and suggestions on architecture and commented that they did not do all of what was suggested and remarked if the Board wants a particular thing to let the applicants know. On the traffic signal timing, Mr. Merrell remarked that if the light was not put in based on the DOT's timing that they would put the money up to have it built when the permit was issued and Mr. Lassiter will process the FDOT request. Mr. Merrell advised the Planning Board that if they feel differently to make it part of the motion.

Mr. Merrell referenced Ms. Flavia's remarks and stated that they have proposed construction time limits, on the cover sheet of the plan, Monday – Saturday, 7am – 7pm. He advised that it will not be 24/7 and it will not take place on Sundays.

Mr. Merrell refenced Ms. Lauren and Mr. Ned Huhta's inquiries on signage and answered that the plan is to have a sign like what was exhibited at the first hearing, at the entrance to the Tomoka Reserve community, not the entrance to Tomoka Oaks. The City Utility Department will have the answer on reclaimed water. Mr. Merrell stated that they are happy to discuss the types of trees.

Mr. Merrell thanked Mr. Travis for his remarks.

Tomoka Oaks HOA Rebuttal

Mr. Bayer referenced the Board members comments over the last couple of Board meetings that the project is too dense, with no significant reduction, as well as staff's comments on why the Type 6 buffer is appropriate and why it needs to be maintained and irrigated. He remarked that he understands a natural look and does not think it is a natural area with issues. Mr. Bayer spoke on the traffic circle and how it should be a requirement. He added that there has not been any substantive change since the last meeting and based on that he agrees with staff's recommendation of denial with it being time to go to City Commission. Mr. Bayer concluded that he respects the request that it go with the recommendation of the Planning Board of no, that it is not adequate and the way the property should be developed.

Live Stream Update

Mr. Spraker stated that staff is aware the livestream cut out from one link and are not able to re-establish that link. He stated a new live link has been established that is on the city's Facebook page and the city website. He stated he is aware that audience members are getting e-mails and texts and the city Public Information Officer (PIO) is also providing the new link.

Applicant's Rebuttal

Mr. Merrell stated at the end of the day, in response to Mr. Bayer, he pretty much repeated what has been talked about all along which is what to do with the lot sizes and the buffer in terms how it is planted and maintained. Mr. Merrell stated you heard a difference of opinion and they were professional opinions, very well thought out. He stated that there were hopes that the Board listened to them and looked at the

package that was in front of them, because if they said, "yes, but.." Mr. Merrell stated that is the safe route and then the City Commission knows that the Planning Board is willing to say the proposed houses can be built, but on suggested terms. Mr. Merrell continued that if the Planning Board says no for them to say why and explain because there are things in the reasons presented to you that you could say why and that it may not be the type of evidence that is needed to say no. He asked the Board to think about those things.

Break

Chairman Thomas stated that the Board is going to take a break at 8:14 p.m. The meeting resumed at 8:27 p.m.

Board Discussion

Chairman Thomas thanked all of those who spoke and for their input. He stated it is very important that the Board gets that and hopes that they all feel that over the three meetings that they have all been treated with dignity and respect and that true feeling that the Board really does care about their thoughts, wants to hear from them, and considers their opinions. Chairman Thomas stated that he wanted to remind the audience, "we are you - we are no different than you, we are just the volunteer people who sit up here and want to do what is best for our overall community." He thanked the audience for attending and for their participation. Chairman Thomas stated they are bringing the discussion up to the Board and the Board will have the discussion among themselves. He stated that the public hearing is closed, and cannot acknowledge anybody in the audience without the Board asking for them, and commented to please not raise any hands because it is closed for the public participation.

Mr. Jorczak stated that in the staff report it was discussed for the replacement of any of the plantings that may die and the two-year bond being put up to replace those issues. He stated that he noticed in some developments where there are dead trees long after the development has been completed and wondered if the city has any information with respect to developers who are responsible for going to do replacements in a certain time period and what the evidence generally is throughout the community. Mr. Jorczak stated that there have been a lot of developments that he has not gone through after they have been built to see what the propensity is for that to happen irrespective of the information that had been presented as to what it takes for the shrubbery to mature and then survive without any irrigation. Mr. Jorczak inquired if there was any data that could be shared as to an incidence of that happening and the time period to resolve it if another development was under no compunction or no city responsibility to do that replacement.

Mr. Spraker stated that staff does not have any empirical data to answer this question. He stated that typically a subdivision is constructed by a developer with inspections of landscaping at the end of construction to ensure whatever was supposed to be built is there and then it is turned over to a Homeowners' Association (HOA) for maintenance. Mr. Spraker continued if there are complaints about gaps in buffers or dead material, Neighborhood Improvement staff will investigate and look at the approved plans and seek to come to a resolution. The city Landscape Architect is often times included in the review. Mr. Spraker stated that there is a method for enforcement. Attorney Hayes stated that there are conditions in the development order and the obligations for maintenance are with the Homeowners' Association

(HOA). Staff seeks to work with the respective parties to find a solution. Attorney Hayes continued that there are enforcement provisions that code enforcement staff can enforce.

Mr. Jorczak asked if irrigation is a typical part of a development order. Mr. Spraker referenced the example of the Pineland subdivision that used a natural area that did not require new irrigation. He stated that wherever there are landscape plantings there is a requirement for irrigation.

Ms. Shull asked about long-term irrigation for other properties and referenced the applicant's request not to use an irrigation system. Mr. Spraker stated that if it is planted then there is an irrigation system and if it is a natural area, it is already established and no additional irrigation is installed. He referenced the natural areas and wetlands within the Pineland subdivision. Mr. Spraker stated that Tomoka Reserve has areas that will not need irrigation based on the natural areas. He continued that the city Landscape Architect advised that as new landscape material is planted, irrigation is required.

Ms. Shull asked why the plan did not want to include groundcover material and asked Mr. Spraker elaborate. Mr. Spraker stated that a buffer is sought between two developments and the groundcover is a tool to accomplish the buffer. Mr. Spraker stated in staff's opinion, the type 6 is an appropriate buffer. He concluded that if there is a desire to trade groundcover material for more trees or shrubs, that it is possible through the development order process. The groundcover is one of three layers that make up a landscape buffer.

Ms. Shull asked about maintenance and vine maintenance. Mr. Spraker stated that a normal course of maintenance would include managing vines and such material. He explained that he understood that the desire of the buffer is to let it grow natural and that SPRC staff are focused on the gaps in the buffer and filling the gaps. Ms. Shull inquired if the maintenance would be taken over by the HOA. Mr. Spraker confirmed that is correct.

Mr. Scudiero remarked that this is an applicant who appears before us quite often, and the least that can be done is to provide direction. Mr. Scudiero commented that he does not love the plan and did not think that was a secret. He stated that his biggest hang-up is the density. He continued, not just density in general, because of some of the lots being larger throughout the perimeter, commenting at least you cannot always see in other neighborhoods around the city where the density is higher. Mr. Scudiero stated that his concern is the references to the donut, which is not a completely inaccurate description. He stated if you are going to fill the donut in, it has to be with the same material as the rest of the donut. Mr. Scudiero stated his concern here is that the lot sizes, not just lot widths, need to be consistent throughout. He stated that would be his biggest suggestion to the attorney.

Mr. Scudiero added that when you take a neighborhood that is 50 or 60 years old, there is no way to re-create every style of home and architecture as so much has change in that time period. Mr. Scudiero stated that the homes today, even if they are the same square footage, they are vastly different than what was built originally in Tomoka Oaks. Mr. Scudiero continued that it is owed to the surrounding residents to make the development as close as possible – make the donut as contiguous as possible. He added and as consistent as possible. Mr. Scudiero concluded explaining his heartburn is that the development plan does not get anywhere close, especially with the 60' wide lots in the center, to the existing development.

Mr. Railsback commented that he concurred with Mr. Scudiero's comments. He stated that he read the application and all of the submittals. He stated that he previously lived in the Trails and was familiar with this area, which was one of the residents' concerns. He stated that he believed the Board members have a very intimate perspective of that area of the community. Mr. Railsback added that he served on the Quality-of-Life Board and that elements such as traffic and continuity are important to his decision-making process. He stated that in his review he could not ignore the fact that there is an open question of should the property always be a golf course. Mr. Railsback compared it to someone who bought on a lake or on the river and if someone was going to develop a houseboat development behind them. He stated that would invade on their original thought process of where they wanted to live and what they decided to purchase.

Mr. Railsback stated that if something goes in there that is not a golf course, considering the conformity and compatibility discussed and whether concessions were made. He commented that from the perspective of what could go there, 632 units are allowed under the land use and there are other concurrency issues that would pair that number down. Mr. Railsback stated that he is works in the area of HOA/condo unit development and has been thinking of the issues of development and what should of or could have been done that would be better for the surrounding area. He identified parking as an issue. Mr. Railsback expressed concern with so many vehicles with short driveways and two or three cars parking in the street when you have guests. He stated that he did not want this to be an afterthought and wishes there were longer driveways.

Mr. Railsback commented that he would like much less density and how that is his major concern. He offered the estate home concept as an alternative concept that would be more compatible. He continued that it is going to take an established neighborhood with larger lots and homes that are not 7 ½ feet offset from the property line, effectively 156' apart, then something greater than that should be in place, adding that there are no homes in Tomoka Oaks that are 15' apart or that have the same building elevations. Mr. Railsback stated in order to get his support there would need to be enhanced architectural standards that separate similar building elevations and much less density. He remarked that if you have a larger home price per square foot, rather than a ton of smaller homes, you can get to the same range and get a project that is better conforming to the area. Mr. Railsback expressed concerns about the traffic flow, including the thoroughfare leading into Rio Pinar, Iroquois, and Main Trail and out to SR40. He stated it will become a racetrack at different times of the day with safety concerns. Mr. Railsback expressed his concerns with Rio Pinar and North/South St. Andrews Drive. He expressed that a higher density project would provide additional traffic impacts and does not know how that many cars would work through that area.

Mr. Railsback stated he agreed with the donut comments. He stated the new development should be the same design or better. Mr. Railsback expressed support for greater sized lots or a greater size home and the rising tide will bring everything up.

Mr. du Moulin stated he rode his bike from Winding Woods through the area and Tomoka Oaks is a unique community with the houses beautifully maintained with its own character. Mr. du Moulin expressed that he is still shaky on the legal issues on whether or not the former golf course can be built upon. He stated that if the

developers want to be good stewards to their neighbors, the community, and to Ormond Beach that they should consider a larger scope for the housing development. Mr. du Moulin recalled at the last Planning Board meeting that there was a project called the "Enclave" which had larger lots sizes, 12 homes on 26 acres. He stated that the only problem was that it had septic systems and that is not applicable here. He suggested if something was to go on the former golf course, if it legally can go in there, the developers need to expand the acreage per lot.

Mr. du Moulin continued that he was concerned with the traffic and suggests that the traffic studies are flawed. He stated that the Fishkind study was also flawed. Mr. du Moulin expressed additional concerns with the traffic patterns and expressed that the traffic studies do not cut it. He stated the project needs to consider larger lots that would reduce the overall traffic demand and suggested a rotary at Tomoka Oaks Boulevard and Saint Andrews Drive diamond.

Mr. Jorczak stated that he has spent a considerable amount of time reviewing this project and concurs that it is unique. He expressed a concern that the proposed houses would be cookie-cutter homes which is quite a bit different than the existing neighborhood surrounding the project. Mr. Jorczak stated if this project were 5 miles from the center of town, it may be appropriate, but this is dropped into an existing residential subdivision that has an atmosphere. Mr. Jorczak stated that he understood the business model that the developer is working with and what homes that they believe that they can sell. He commented that the elephant in the room for him has been the change in lot size. Mr. Jorczak stated that this property could be even better than the existing Tomoka Oaks homes. He encouraged the developer to take a look at other potential economic models with larger lot sizes. Mr. Jorczak continued that the former golf course is such a unique piece of property and how he would like to see what is already there expanded as opposed to a standard development model.

Mr. Jorczak expressed concerns about traffic from the project and traffic in general. He stated that traffic is a common issue that happens everywhere - the infrastructure does not catch up to the level of development. Mr. Jorczak continued that traffic is astounding and getting worse by the year, and it will continue to get worse. He stated these elements have to be dealt with in a fashion to minimize the effects, including the use of larger lots. He stated that both issues of traffic and density can be helped with larger lots. Mr. Jorczak commented that the land area's limited access should also be considered. He stated that there is not one project before the Planning Board that has not discussed access. He acknowledged that the property will likely be developed in some residential fashion. Mr. Jorczak stated that density, traffic/safety, diversity of building styles, and compatibility with the surrounding neighborhood are all key issues and concerns. He concluded that the comments of the other Board members are valid comments and there needs to be a better job of mitigating the impacts of this development than what is in front of them.

Mr. Galloway commented that he wanted to be clear that he has friends, professionally and long term, on both sides of this equation. Mr. Galloway stated to the resident who asked about the board members familiarity with this area, that he and his family have spent a lot of time in Tomoka Oaks and the Trails.

Mr. Galloway stated he has done research in relation to this application and lots being built in this area. The first thing is that not a single developer has been able to develop to maximum land use density allowed. He added that it seems that developers ask for the moon and we pull back the density. He stated that 60 to 70 percent of the lots that

his company pulled were between 55' and 65' in width. He continued that 30 to 40 percent were 70' to 80' in width. Mr. Galloway stated that they could not find any new subdivisions with 100' wide lots. He stated that a 50' wide lot would probably cost the builder $100,000 today. There are no more $25,000 lots. Mr. Galloway continued that a 100' wide lot, not on the water, would likely cost between $185,000 and $250,000, and then there is the cost of the house construction.

Mr. Galloway recalled he did a tape measurement prior to the meeting and the buffer would go from the stage to the curtain at the end of the seating area. The new house would have a 30' setback, plus the 50' buffer, and the Tomoka Oaks 25' setback. Mr. Galloway stated that there would 115' from house to house. He commented that he never has seen an inner-city neighborhood have that much space between the back of the houses. He expressed his concerns including the potential of neighbors to take down trees.

Mr. Galloway stated that the applicant did what he had asked of them by putting in a combination of lot sizes. He remarked that what they did not do was listen. He continued expressing that everyone has property rights – the developer has property rights and homeowners have property rights – what they did not do was listen to the neighborhood. Mr. Galloway stated that he could vote for this project if it had less density. He continued that he thought that the project would come back with 220, 230, 240 – maybe 250 lots. Mr. Galloway stated he was a little shocked and a little disappointed that the number of lots was not less. He stated he is not sure if they are still asking for the moon or if they will take what the City Commission will give.

Mr. Galloway commented that he believed that something would be built on the property. He continued that there is always an ability to buy property, at the right price, and encouraged residents to continue the purchase option. Mr. Galloway encouraged the HOA and residents to pursue a purchase through a community development bond over 30 years. He stated it would cost about $129 a month per homeowner and that they can buy it. He asked the audience how many individuals would be willing to participate in a purchase. Mr. Galloway stated if the residents bought it, they could decide what to do with the land. He continued to encourage the residents to seek to buy the property. Mr. Galloway concluded that he is for this project, but not at this density.

Mr. Jorczak asked if every single lot was 100' in width, what would that do to reduce the density in terms of the number of lots as it currently sits. Mr. Spraker stated he believes that the applicant has done an analysis and would prefer that the applicant address this question. City staff have not reviewed any plans where all lots are 100' in width. Mr. Spraker speculated that between 280 and 300 lots would be possible. Mr. Spraker stated the applicant would likely have a better answer.

Mr. Jorczak clarified that all the other parameters would be the same. Mr. Merrell questioned which perimeters and Mr. Jorczak stated all of them. Mr. Merrell replied that they have a plan adhering to the Land Development Code that allowed 300 lots. Mr. Jorczak stated that he is not talking about the code. Mr. Merrell continued that the project engineers developed a code compliant plan for the benefit of the property owner and the answer is 300.

Mr. Jorczak stated that he is looking for the 100' wide lot within the context of the PRD application, including the buffer and recreational area. Mr. Merrell stated the question mixes apples and oranges. Mr. Merrell stated a 100' wide project would utilize a different set of standards other than the PRD and the buffers and recreation

areas. Mr. Jorczak stated his fundamental question was within the PRD development plan, if the lots were all 100' in width, what the total number be. Mr. Merrell replied that they do not have the answer to that question and concluded that they mixed the lots up and brought the other things along – these all go together.

Attorney Hayes stated that the lot number question would require other site-specific analysis which is not before the Board tonight. He continued that if it is of belief that the density is too much on this project, then the Board can talk a little bit about it, but that it is a development application under a PRD zoning. Chairman Thomas sought clarification if the question was to maintain the PRD site plan layout and require a minimum lot size of 100' in width and depth. Mr. Railsback stated it would be approximately 240 lots based on the existing lot areas in the site plan. Mr. Galloway questioned if that impacted the buffer. Mr. Railsback replied with the calculated lot sizes in the site plan (60' X 125' and 80' X 125') and then divided by 10,000 square feet which came to approximately 240 lots. Mr. Galloway confirmed that there would still be a 50' buffer.

Ms. Shull reviewed the case studies provided about other golf courses provided by the applicant. She stated the studies looked good with a 9-hole course and how one golf course added estate homes. She continued that one in Boca left the part of the golf course and added a 55+ community with 120 homes. Ms. Shull stated that other things can be done with the property. She expressed that she understood the intention was not to rebuild a golf course. She stated that the other densities are not anywhere near what is being proposed. She stated that she concurred with other board members on the density. Ms. Shull expressed concern that traffic is going to be too much, concerns with children in other neighborhoods with no sidewalks, Tomoka Reserve cut through traffic. She stated that no matter what is said, that it is 600 more cars. Ms. Shull added that the stoplight is an issue and commented that the traffic signal should be in place before the homes are finished, just as the WaWa did the traffic signal first.

Ms. Shull stated that the density is a big concern and how the buffer needs to be installed as a type 6 with irrigation. Ms. Shull remarked that the HOA should not bear the burden of future buffer costs. She added that the ground cover needs to be installed.

Ms. Shull stated that she does not like the different lot sizes of 60' and 80' in width and explained that the lot widths need to be larger. She continued that the length of the driveways and having options for side entry garages are important for neighborhoods. Ms. Shull concluded that if there is not enough parking, individuals will park on the street and the community will not look good.

Chairman Thomas stated that the traffic engineer for the project does a very good job for traffic studies, but the system is so flawed that it is unreal. He continued that the studies are not reality, totally not reality. Chairman Thomas stated the density is a concern, as well as the traffic with the biggest problem coming out Main Trail to West Granada Boulevard. He stated this will be a nightmare. He stated that when the school is rebuilt and how right now coming out of the Trails where there is no bus pickup for elementary kids so they are either taken by their parents or riding bikes – most will go by car. Chairman Thomas asked the traffic engineer if they did the traffic study at school hours with the elementary school at Main Trail to West Granada Boulevard and commented that he doubted it. Chairman Thomas acknowledged the traffic engineer nodded yes, that the study was done. Chairman Thomas stated that people are not going want to wait the time they are going to have to wait because of

the way that intersection is right now you have going out to Granada. He stated that you have people wanting to turn right and you have people wanting to go straight and people wanting to turn left. He continued if somebody wants to turn left, nobody will be able to go anywhere. Chairman Thomas stated especially when school is coming out after people drop their kids off in the morning and people are still trying to get there and to the little Christian School to the west on Granada Boulevard that also has people stacked up waiting to turn right. Chairman Thomas stated that the traffic nightmare in his opinion is not going to be at Tomoka Oaks and Nova Road, but it is going to be a nightmare because people coming out of Tomoka Oaks now are going down on Rio Pinar and turning on Main Trail or on Iroquois. Chairman Thomas stated that the school will have more kids going to it because the school will be bigger. He reiterated that traffic will be a nightmare. He asked who will pay for needed improvements at the intersection and asked if the developer is going to pay for the intersection improvements.

Chairman Thomas asked the acreage of Tomoka Oaks minus the Tomoka Reserve property. He stated that there are over 500 homes in Tomoka Oaks. Mr. Spraker recalled there was a density analysis provided that showed Tomoka Oaks had a density of 2.09 units per acre. The acreage would be 547 homes divided by 2.09 units per acre.

Chairman Thomas stated that he has a problem with the density that has been discussed several times. He agreed with the applicant that there is a demand for 50 and 60' wide lots, but he did not believe that this demand is in the heart of an existing development of 100' wide lots. Chairman Thomas recalled he was on the Board in 2006 and the development plan at that time saved the golf course, allowed 117 condominiums, and three single-family lots. He stated that the 2006 approval recognized the property as a collection point of water to recharge the aquifer. Chairman Thomas stated that he understands times have changed, costs have risen, and housing types have changed. He stated that he wished the project team could come back with a plan similar to the 2006 plans because everyone got what they wanted.

Chairman Thomas added that 117 units will not work and now he can understand 220 to 230 residential units. Chairman Thomas stated that this is zoned as PRD now and it does not necessarily need to change.

Attorney Hayes asked to summarize a few points before answering the question. He stated this is a legal proceeding and there are rules that do apply and explained the Planning Board-role as a decision maker to weigh the competent and substantial evidence that was described at the July meeting. He stated the role of the Planning Board to weigh the testimony provided and determine which evidence is more credible. Attorney Hayes stated the initial burden is on the applicant to establish the application is consistent with the Comprehensive Plan and the requirements of the Land Development Code. The Planning staff's report is part of the evidence to consider. Attorney Hayes continued that application tonight is for a development within the Planned Residential Development zoning designation. The R-2 zoning district is not applicable tonight and may be a future application, but it is not before the Board tonight.

Attorney Hayes stated he wanted to point out some observations and his comments are not testimony. He continued that his role is to provide legal advice and counsel.

Attorney Hayes stated this is a unique piece of property and Tomoka Oaks was designed around this golf course and provided the following observations:

- Tomoka Oaks had an R-2 zoning designation;
- The R-2 zoning district also applied to the former golf course property for decades. The golf course operated for decades. He stated one may ask why was it not zoned separately. Attorney Hayes stated no additional zoning was in place because of restrictive covenants;
- The restrictive covenants for the former golf course were released by the HOA. The protection went away and the land continued to operate as a golf course;
- There was an application in 2005/2006 to rezone the golf course property from R-2 to PRD. This was reviewed by the Planning Board and approved by the City Commission. The approval allowed 119 multi-family units and three single-family units and certain conditions such as a covenant to restrict the use to a golf course with development;
- The 2006 development order expired with no construction. The 2006 covenant for use as a golf course was never recorded.

Attorney Hayes stated that these demonstrate the unique characteristics of this property. He continued that it is another application for development under the PRD zoning. He stated that there is probably a difference in why it is not separated out in the early years as described and how it is his speculation and it can be taken it for what it is worth. Attorney Hayes explained where the Board was and that the Board has to weigh the competent and substantial evidence and if the application is consistent with the Comprehensive Plan and the requirements of the Land Development Code. The initial burden is on the applicant and it shifts over to the HOA. Attorney Hayes stated that the Board gets to make that final determination.

Attorney Hayes stated that if the Board does not believe the application meets the criteria then the motion should be for denial. If it is believed to meet the criteria, then the motion should be for approval, and if it falls somewhere in between, a creative motion can be made, including a denial, and provide conditions. Attorney Hayes concluded that the Board has discretion, because as stated by the applicant, this a negotiated development order.

Chairman Thomas asked if there is a legal requirement if this application does not go through, does the city have to re-zone the property. Attorney Hayes stated that there is no rezoning application before the board. He continued if the Planning Board and the City Commission deny the current application, the question becomes what options does the applicant have. Attorney Hayes stated the applicant can present another PRD site plan under the PRD zoning or they can file an application to rezone the property to R-2. Attorney Hayes stated the rezoning to the R-2 is not before the board tonight.

Chairman Thomas stated he wished the applicant presented something like 2006 with some higher housing numbers. He stated at this point that he has major problems with the application.

Mr. Galloway asked Mr. Railsback what number he calculated if all were 100' wide lots. Mr. Railsback responded 240 lots. Mr. Railsback replied that it could be a little more or less based on the geometry of the property.

Mr. Galloway inquired about his interest of entertaining a motion of accepting the proposal with comments from staff for 240 homes. He stated that would give the applicant a message of where we stand and he always states that he would like to see the lot range between 220 and 240 lots. Attorney Hayes replied that the motion would require new data. Attorney Hayes commented that from what he was understanding the concern is the density. Attorney Hayes continued that a recommendation can be made for denial with details of the reasons for the denial motion so that there is a good factual basis for the recommendation. Attorney Hayes stated the detailed reasons or conditions would allow the applicant to make a decision of how they will move forward or pursue an application to R-2.

Mr. Galloway withdrew his motion.

Chairman Thomas stated his desired range was 220-225 lots. He discussed other lot range potentials and stated he would set the lot range low. He remarked that the City Commission would have some idea of what the Planning Board thought was appropriate and added at 250 lots, it is only a reduction of 22 lots.

Mr. Galloway stated he was putting a lot number out there to let the applicant know the current plan is too many lots. He commented that the City Commission will make the final determination. Chairman Thomas stated it would be in the minutes that they were looking at 220 units. Mr. Jorczak commented that if there is a denial tonight, the number is out there. Mr. Jorczak stated if the applicant wants to go to the City Commission, they can adjust the number to some extent.

Attorney Hayes stated that the Board can approve a motion with reasonable conditions. He added that the question then becomes what is reasonable based on the testimony and evidence presented. Attorney Hayes continued that it appears to that the Board does not like the density and desires something less. He stated that his recommendation is to make a motion to deny and state the reasons into the record this way the applicant has items to consider as they move forward and consider what the Board has stated.

Mr. Railsback stated that what the City Attorney and the applicant are asking the Board to do is to tell the reasons why the Board is denying the application. He provided an example that the Board denies the project because it is more than 230 units, the lack of a rotary circle, and the lots were not a minimum of 100’ in width. Mr. Railsback commented that with the recommendations, the applicant could consider the revisions for the City Commission hearing.

Ms. Shull stated that she did not know that every little detail, the sprinkler system, the things that the Planning Department has said, could be put into a motion and expressed that those are the things that the Board would like taken care of. She added that that there was a lot in there that they do not know if it has been taken care of yet because the Planning Department has not had an opportunity to go over it. She continued that they have not had the opportunity to run the numbers to see how many 100’ lots could go in there. Ms. Shull concluded that for them to sit there on a calculator and figure that it is around 220 is not a good way to put into a motion.

Chairman Thomas stated that this is true and he could go for no irrigation if the developer would pass the two years and maybe go to 5 or 7+ years that they would guarantee that those would last.

Ms. Shull stated that the motion is going to be three pages long. She stated that the City Commission will know what was discussed, read the notes, and know the points

of concern. Ms. Shull suggested a motion to deny and to please read the Planning Board minutes.

Chairman Thomas stated he believed that each City Commissioner or Mayor that appointed will be calling and seeking information from board members and that is totally legal. He stated that he knows that his commissioner talks to him about a lot of decisions made by the Planning Board.

Attorney Hayes reiterated what he heard and expressed that if he is wrong, for the Board to correct him. What the Board does not like as a basis for denial is:

- Density – believe that it is too much. There was talk about fuzzy numbers that the Board may be comfortable with under an appropriate plan;
- Traffic analysis is flawed based on evidence and testimony that you have heard and in the Boards own experiences;
- The traffic triangle should be a traffic circle; and
- The buffer and whether it should be a natural buffer or some other form of buffer and whether that buffer should have irrigation of some form.

Attorney Hayes asked if there were any other items.

Chairman Thomas stated a concern is the Main Trail and West Granada Boulevard intersection. He continued that is going to be a major problem. Attorney Hayes replied that would all be supported by the minutes and the record.

Attorney Hayes stated that if a motion is made with those parameters based on the evidence in the record that the application could be moved on up to the next level which would be the City Commission. He stated that the City Commission would take all the information under advisement, as they always do, and they will make their own determination after a legal proceeding just as this.

Mr. Railsback asked if the variety of elevations was included. Attorney Hayes stated that it was not, but that it could be included but not necessarily limited, because there are so many things. He reiterated that the Board's recommendation is advisory to the City Commission.

Chairman Thomas asked the Planning Director when the meeting minutes are written up and with the recommendation of the Board, if a synopsis could be included of the reasons that the vote was to deny it so that it would be in print that goes to the Mayor and City Commissioners.

Mr. Spraker explained that the way the minutes are done is more verbatim than a summary so that the entire scope of what is being said is reflected. He continued that staff always does a summary, usually brief, that hits the highlights. He concluded that yes, the minutes can reflect exactly what was said.

Mr. Scudiero stated that he would like to make a motion and if there is a second they can each give their articulated reasons both for the record and for the applicant's benefit.

Board Motion and Discussion

Mr. Scudiero motioned to deny PRD 2022-043, Tomoka Reserve – Issuance of a Development Order. Ms. Shull seconded it.

Chairman Thomas announced that the Board was going into discussion.

Mr. Scudiero stated his summary of concerns:

- Density;
- The plan that the applicant has come up with the buffers;
- An improved traffic rotary at the entrance;
- Instead of the 60, 80, 90 and maybe 100' wide lots, they want them all to be 100' in lot width, just like the rest of the neighborhood.

Mr. Railsback added the desire for a variety of house building elevations, including colors and roofing materials. He stated at least the minimum in the application and if a greater separation was given, his thought was that was another carrot for the City Commission.

Ms. Shull stated her issues are:

- The buffer, a desire to see a type 6 buffer;
- Would like to see the irrigation system to go in;
- Traffic signal to go in;
- Not sure about the diamond and roundabout. She noted that traffic study with the fire truck trying to get around that thing and it bothered her;
- Lot sizes are too much. The 60' wide lots are too crammed into that little space and it does not conform to the rest of the neighborhood that is already there;
- The gated community was a positive; and
- The main thing is the density because of the traffic.

Mr. du Moulin stated that he is concerned with the proposed lot sizes and the rotary.

Mr. Jorczak stated the elephant in the room for him has always been the density and he thought that it had been addressed. He added that he would like to see something less for the lots than what Mr. Railsback calculated in terms of how that is going to fit within the existing community. Mr. Jorczak discussed the architectural styles that the Board talked about and expressed that it would be nice if there was something better defined as to what the flexibility would be. He stated that he supported a no vote and concurs with what the city staff has recommended with respect to irrigation. Mr. Jorczak commented that he would recommend beyond what they had indicated in terms of just the perimeter lots being 100' in frontage. He continued that he believed that there is far less density of homes. He stated what the developer wants to do with respect to reducing that and seeing whether he has an economic model, is something that they will have to work with. Mr. Jorczak concluded that the way it is proposed today, he would vote for denial.

Mr. Galloway stated that he has a problem making them all 100' in width because of the lot radiuses with no way to get 100' wide lots on a curve. He added that he is okay with 100' wide on the back side of the lots. Mr. Galloway stated that he believed that there needed to be a flexibility of 80' and 100' wide lots. He concluded that you cannot get a 100' wide lot in a circle.

Mr. Jorczak stated that you can go above 100' in lot width and that he believed that the fewer number of homes would be better.

Mr. Galloway stated that he thought that it could be done with a combination of 80 and 100' wide lots. He stated that he would hate to tie-string them with 100' wide lots.

Chairman Thomas asked if Mr. Galloway was going to put a ratio on that, and said that what he looked at was that there was ten 100' wide lots and a few 80' wide lots. Mr. Galloway stated that he did not believe that a ratio was needed and that they should let the engineers analyze that. He stated that you can say that there should be more 100' wide lots, but you cannot tie somebody down to put all 100' wide lots in.

Mr. Railsback suggested making the lot deeper with a minimum of 10,000 square feet (80' X 125'). He stated that if you have to squeeze an 80' wide frontage lot, then it needs to be deeper. Mr. Galloway concurred and commented that the Board was doing the schematics and are not engineers. Chairman Thomas stated what we are is neighbors. Mr. Galloway concluded that in this type of property you cannot make all 100' wide lots.

Attorney Hayes sought to refocus the Board. He stated that there is a motion and second for denial. He continued that most of the comments are consistent and some are a little different. Attorney Hayes explained to the Board that you can incorporate the comments as part of the motion and second for supporting purposes of the motion to deny. He stated that these comments are not going to tie anything down specifically. Attorney Hayes restated that the Board's action is a recommendation. He stated if the maker of the motion and the seconder is okay incorporating those comments as a supporting basis for the motion to deny, all of that information would go up to the City Commission.

Chairman Thomas asked for a point of clarification if any member of the Board can call any City Commissioner or Mayor. Attorney Hayes confirmed that there is no Sunshine Law requirement for a member of the Planning Board communicating with a member of the City Commission. Attorney Hayes stated that Planning Board members cannot talk with each other.

Mr. Railsback stated for the minutes that he would like to see longer driveways as parking in the street is going to be an afterthought and that he would be remiss if he did not bring it up. He continued that he is okay with deeper lots and believes that two or three spots are needed plus the garage, not one car hanging into the road.

Attorney Hayes stated that he saw the maker of the motion and the seconder nod their heads to incorporate the item as a supporting basis for the motion.

Chairman Thomas asked if Attorney Hayes had his concerns on the list. Attorney Hayes responded that he did.

Chairman Thomas stated that there is a motion and a second. He stated that the Board has had discussion and asked the recording technician to call the vote. Mr. Galloway asked the motion be repeated. Chairman Thomas stated the motion was to deny the application. Attorney Hayes confirmed that the supporting basis in the Board comments are incorporated. Chairman Thomas asked the recording technician to call the vote.

Vote was called:

Mr. du Moulin: Yes, to deny.
Mr. Scudiero: Yes.
Mr. Railsback: Yes.

Mr. Galloway: Yes.
Mr. Jorczak: Yes.
Ms. Shull: Yes.
Chairman Thomas: Yes.

The motion for denial was approved (7-0).

Chairman Thomas stated that when the Planning Board first started at the first meeting, he told them that this is one of the top five decisions that he had ever been involved in at the Planning Board. He stated that it can now be moved up to the number two slot. Chairman Thomas stated that the only one that proceeded it was voting to tear down the Ormond Hotel to which he regrets to this day.

Chairman Thomas thanked the audience for their patience and courtesy. He stated that these have been the biggest meetings they have had and that they are probably one of the nicest, most respectful groups ever. He stated there has been no hollering or hooting and that he thanked the audience for that because they made the Board's job easier.

VII. OTHER BUSINESS

No other business was discussed.

VIII. MEMBER COMMENTS

No member comments.

IX. ADJOURNMENT

The meeting was adjourned at 9:42 p.m.

Respectfully submitted,

_____

Steven Spraker, Planning Director

ATTEST:

_____

Doug Thomas, Chair

Minutes transcribed by Marcella Miller.

Steven, please include these pictures in the Planning Board packet. One of the outstanding concerns of SPRC https://www.ormondbeach.org/DocumentCenter/View/24979/09262023-1---SPRC-comments was never addressed.

Dry retention ponds were indicated as allowing infiltration to meet the time-related requirements for stormwater management. The borings for the ponds indicated a layer of organics and top soil. How will the ponds function after several rain events have compacted the top layer into an impervious layer at the bottom of the pond?

The pictures of flooding in The Trails dated 9/30/23 are an example of the failing of a well-meaning retention pond.

Please also include these pictures in the Commission Packet.

Thank you.

>
> Dear Mayor Partington and city commissioners,
>
> I object to the possible development of the old Tomoka Oaks Golf Course, known as Tomoka Reserve, for the following reasons:
>
> 1. Making Ormond Beach into another Orlando with cookie cutter houses and high density
> 2. The City, County or State should purchase the property and make it into a park.
> 3. Too much additional traffic
> 4. Lowering property values due to inadequate services and congestion
> 5. Jamming a large dense incompatible development into Tomoka Oaks golf course footprint
> 6. Unsafe roads (no sidewalks in Tomoka Oaks and Trails) for children, baby carriages, bikers, walkers, joggers, etc.
> 7. Inadequate emergency vehicle access
> 8. Traffic will backup at Tomoka Oaks/Nova Rd and Main Trails/Granada intersections.
> 9. Current traffic study by developer is inaccurate and inadequate
> 10. Nova Road and Granada intersections to Tomoka Oaks and Trails must be changed before the development construction
> 11. Unsafe road congestion due to parking in old and new neighborhoods.
> 12. The Planning Board and Commissioners should use the approved 2006

development plan with 122 units as a guide for future development.

13. It may not be legal to remove the golf course and fill the land with houses because of title restrictions
14. Destruction of green space and natural habitat
15. Possible flooding downhill from development. The developer only has to plan for a 25 year flood level by code.
16. Crowding of our hospitals, schools and other amenities
17. Raising of property taxes to pay for additional services (water, sewage, garbage, rec centers, etc)
18. Ruining the quality of life for our neighborhood
19. Inadequate golf course soil poisons remediation
20. Design of new dry retention ponds in development
21. 5+ years of construction noise, dust and massive vehicles in Tomoka Oaks, Trails, Escondido, Talaquah, Nova Rd and Granada
22. Inadequate plan for planting, irrigation and maintenance of landscape buffer proposed by developer
23. Lots are too small in possible new development
24. Escondido Condo residents will have no way of safely entering or leaving their homes during peak traffic periods.

Thank you for listening.

Subject:	"For Tomoka Reserve Commission Packet" - Re: Proposed Tomoka Oaks Golf Course Redevelopment
Date:	Wednesday, October 18, 2023 7:57:45 PM

[External Email-Use Caution] - OB/IT Helpdesk

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear friends of Ormond Beach!

I hope this email finds you and all your families well!
Previous I had some communication with you all in regards to the proposed Tank Farm ... which we all pray for
to be placed elsewhere.

Today, I am contacting you regarding another potentially disastrous project here in our backyard (in your district, and
wonderful Ormond Beach) - the so called Tomoka Oaks Golf Course (Redevelopment).

In my previous life I did represent (on a worldwide basis) some of the world largest corporations,
including a mega construction company, as an outside negotiator and coordinator (the 4 eyed principle) - for major
Worldwide projects, incl. city developments, hydroelectric dams, ports, water supply / waste water systems, etc. etc.

First - The legal right to change the zoning from the Golf Course designation should not stand and is illegal in my
legal opinion.

My Humble Comments to the Proposed Development:

- Rule of Thumb - Never ever construct a "land-locked" development within another already established
development. I have witnessed a myriad of potential major problems when doing so:

- Years of construction noise (6 days/week -normally from 9am to 6 pm). Often developers don't adhere
to these time restriction which often leads to police / other government interventions, as well as,
possible law suits.

- Water supply issues when new supply lines are added, problems with contaminants, brown water etc. etc. are
prevalent. Existing area resident might face non-drinkable water, having to boil water, etc.

- Groundwater Table problems. Currently both Tomoka Oaks and the Trails have

ground water table issues
where wells used for sprinkler systems etc. are running too low or being dry... A Ground Water Table Study
should be required.

- Soil / Environmental Hazard - For any construction site / area when soil is to be removed from, in this case,
an old / established golf course that most likely has been contaminated from years of fertilizers, pesticide and
other types of chemicals etc. Most of these chemical used have been banned for years, but will require an
environmental soil / abatement study. If problems are detected , EPA HAZMAT will have to be involved at the expense of the developer, as well as the City. If not taken seriously, lots of medical problems, such as cancer
etc. can and will develop... I can just see the mega law suits ...

- Flooding from Under dimension Wastewater, Sewerage and Drainage Systems (i.e. from major storms).
This is most likely bound to happen, with major impact for Tomoka Oaks and the Trails. The calculated flow /
run off rate etc. is currently based on the open Golf Course area acting as a "sponge" thus absorbing storms
and heavy rains. With any new construction this has to be carefully studied and completely re-engineered,
since only a couple of small retention ponds will not suffice. This could be a major headache and expense for
the City. (Ps. this happened when I lived in Naples when a new development was added (thanks to City
approved changed zoning) next door to already 25-30 year old existing developments = long stretches of
upgraded wastewater and sewer lines had to be implemented at a huge unforeseen cost to the City of
Naples, besides also being faced with a number of law suits from home owners that experienced flooding
issues).

- Power Network Stability - currently FPL is already FAILING us (which is another issued to also be addressed
separately) here in Tomoka Oaks /the Trails, whereas we frequently loose power, due to the fact that the
existing exiting power transmission lines are on above ground poles which always seem to get tangled up with
trees. With any new development FPL should be forced to redo parts of their existing power transmission
network.

- Cell Communications - it seems that we have only one cell tower servicing the Trails / Tomoka Oaks,
located in Tomoka Oaks. During previous storms etc. when power has been out for days we have had NO

cell communication, internet etc. (another topic to be addressed separately). When power finally returned
it was almost impossible to make a call due to this only cell towers limited capacity. By adding this proposed
new development, upgraded communication access needs to be addressed, for safety, etc. Ps. when talking
to AT&T (as far as I know the current cell tower provider) they would need to obtain various permissions etc.
to add another tower which actually, if approved, can take years.

- Required Road upgrades - according to FDOT - any entrance from or exit to a two + two lane road, such as
the larger Nova Rd. from Tomoka Oaks will require a separate traffic study and most likely installation of a
new traffic light. In addition, 2 designated entrance and exit lanes into and from Tomoka Oaks will be
required which will also entail upgrading the existing traffic configuration.
According to FDOT all this will have to be paid for by the proposed developer, which can be a steep expense,
and should be made clear to the developer in this case.

- Road Safety Issues - At this point the combined road network servicing the Trails and Tomoka Oaks are used
by both developments, and thus only engineered for the current house population. With any new additions
there will be a need to review and make needed upgrades for safety incl. most likely road pavement
resurfacing (since a large number of roads are in very poor shape), install better street lightning and speed
bumps (due to lots of speeders).
The Traffic from this proposed "new" development will also impact the Trails entrances / exits.
After talking to FDOT the Trails main entrance / exit (Main Trail / W. Granada Blvd. Rt.40) is not up to current
code and should be re-engineered and redone. As mentioned above - 2 entrance lanes + 2 exit lanes is a
current requirement for being attached to a divided 2 + 2 lane road (W. Granada). Also the Trails entrance /
exit (next to the park) will also need to be re-engineered - especially with the new, shortly to be
implemented FDOT reconstruction of Nova Road from W. Granada to the Trails entrance / exit next to the
park.....

Final Comment: It seems that there isn't **ANY** financial upside for our City to allow for this project to move forward,
especially with all unknown and potentially disastrous and / or financial problems, besides the wrath of lots of angry
residents. There are a number of other concerns, but this is a starting point for you, our city leaders to do the right

thing and **DENY** the Tomoka Oaks Golf Course redevelopment to move forward.

..... On a positive note ... Why not re-establish the Golf Course, perhaps in a smaller format with some attached green areas.....

Please feel free to contact me at your earliest convenience with any questions ....
Sincerely,

Erik Emsing

Hi my name is Heidi Nates and I live in Tomoka Oaks. I could name many reasons why the development should not be built but as an outdoor enthusiast I think the area would be better suited as property for Ormond Beach to use as a public Golf course, Pickleball courts, walking paths and bike paths. It's a beautiful piece of property! Why destroy it to put up more homes. Let's create something positive for the whole Ormond Beach
Thank you in advance for considering
Heidi Nates

Ladies and Gentlemen,

I am presenting a sincere opinion piece to you concerning the proposal to ruin the Tomoka Oaks Golf Course. It is from the owners of a home on Pine Valley Circle adjacent to the course, who really enjoy the lifestyle that was purchased by our parents back in 1968. My father purchased the builder's home, which, at the time, was Tomoka Unit 1. A short walk through the brush and big oaks and you would be on the course. My father averaged 3 days per week enjoying the course.

We are now faced with the possibility of replacing the beloved green space with some 250 plus homes that will significantly change the complexion of the entire Tomoka Oaks subdivision. I have a file containing the original promo materials used to attract potential buyers to the area, and the most impressive offering was the "on-site" golf course. Whether you were a golfer or not, there was a lot to like about having this beautiful course in your back yard. It was the centerpiece of the development.

The insufficient buffer measure is no where near enough. Some TOHA homes have a clear and unprotected view to whatever the proposed homes
look like. There should be a specific plan devised by the developer to provide distinct separation between intended construction and existing homes in Tomoka Oaks. I haven't seen anything like that from the developer.

There is considerable concern about the effect of the development on our property values. It used to be that the on-course homes had a value premium. We are not sure how that premium will coexist with the development proposal.
The many different animals that call the golf course home will certainly be displaced, to an unknown degree. That is nothing but cruel.

Traffic presents a double whammy, with the Belvedere addition and the housing in Tomoka Reserve. I don't believe proper traffic studies revealed the realistic traffic results as they would impact Tomoka Oaks residents. The traffic density will increase significantly and cause dangerous situations for kids, pets, seniors walking without sidewalks, and emergency vehicles trying to serve the folks that need their help. Nova Road will be present in the new expletives used by our residents.

Hundreds of people made the decision to purchase in Tomoka Oaks for the lifestyle, the natural surroundings, and the quiet, safe streets. All
of that seems to be in the "crush" of development.

We are facing a very negative future with the consideration of the proposal. We respectfully request the commission members take another
serious look at Mr. Spain's letter, and provide a NO vote to the application.

Thank You very much for your time. We are anxious to retain our lifestyle as we know it.....quiet and green.

Sincerely

Paul and Deb Maybeck

Dear Commissioner ,s and Mayor

My name is Denise Corley. My husband and I own a home on South St. Andrews on the golf course. I have written to you several times over the past 2 years since we purchased our home on the golf course in December of 2019.

First, we did pay a higher value for our home because it was on the golf course. There is no dispute that the golf course is an asset to home values like a waterview, it means peace and serenity and that is a value that is paid for and taxed by assessment of house values.

The golf course after the failed PDR in 2006 was sold and thus began a long mismanagement and lack of investment to the point of neglect. Was it a planned land grab? Who knows? 178 homes circling the golf course watched in slow motion as the course deteriorated. The quiet sale to an out of town developer with the help of local businessmen removed the chance of citizens or the city of Ormond Beach to step in to save the course or at least buy the property to preserve it as some form of open space as was the intention of the original planned development of Tomoka Oaks.

So far 2 strikes against this PDR, the SPRC voted no and so did the Planning Board.
