Signalized Intersection Analysis

The existing operating conditions at the signalized intersection was analyzed using HCS, which utilizes the procedures outlined in Chapter 19 of the *Highway Capacity Manual 6th Edition*, titled "Signalized Intersections". **Table 2** shows the existing LOS and volume to capacity ratios (v/c) at the study area intersections. The signal timings are provided in **Appendix E** and the HCS summary sheets are provided in **Appendix F**.

Table 2
Existing AM and PM Peak-Hour LOS - Signalized Intersections

Roadway Segment Analysis

Roadway LOS describes the operating condition determined from the number of vehicles passing over a given section of roadway during a specified time period. It is a qualitative measure of several factors which include speed, travel time, traffic interruptions, freedom to maneuver, driver comfort, convenience, safety and vehicle operating costs. Six LOS categories have been established as standards by which to gauge roadway performance, designated by the letters A through F. The LOS categories are defined as follows:

Level of Service A: *Free flow, individual users virtually unaffected by the presence of others*
Level of Service B: *Stable flow with a high degree of freedom to select operating conditions*
Level of Service C: *Flow remains stable, but with significant interactions with others*
Level of Service D: *High-density stable flow in which the freedom to maneuver is severely restricted*
Level of Service E: *This condition represents the capacity level of the road*
Level of Service F: *Forced flow in which the traffic exceeds the amount that can be served*

The Average Annual Daily Traffic (AADT) for the study roadway segments was obtained from the Volusia County 2021 Average Annual Daily Traffic & Historical Counts spreadsheet. The existing LOS for the study area road segments during the peak-hour are provided in **Table 3**.

Table 3
Existing PM Peak-Hour LOS - Roadway Segments*
Ridgehaven Residential

Roadway	Segment		No. of Lanes	Adopted LOS	Peak-Hour Two-Way Capacity at Adopted LOS	2021 AADT	Existing PM Peak-Hour Two-Way Volume	Existing PM Volume Exceed Adopted LOS?
Plantation Oaks Boulevard	US 1	Old Dixie Highway	2	E	1,230	-	307	No
Old Dixie Highway	Pine Tree Drive	Plantation Oaks Boulevard	2	E	1,860	3,410	290	No
	Plantation Oaks Boulevard	Walter Boardman Lane	2	E	1,860	3,410	290	No

**Adopted LOS, capacity, existing AADT, and existing PM Peak-Hour Two-Way Volume obtained from the 2021 Volusia County Traffic Count Spreadsheet.*
***Existing PM Peak-Hour Two Way Volume for Plantation Oaks Boulevard was determined using collected TMCs.*

As indicated, all of the study area roadway segments currently operate within the adopted LOS.

3

FUTURE TRAFFIC CONDITIONS

Traffic in the area is expected to grow due to local government approvals. The following section documents the methods used to project future 2027 traffic conditions by using either historical growth rates and/or vested trip information and anticipated project traffic.

2027 Background Traffic

The growth rate for each study area roadway segment was determined using Volusia County's Segment Growth Rates and Vested Trips Policy from August 2020, the vested trips as identified by Volusia County's latest vested trips table, received October 6th, 2022, and the 2021 Volusia County AADT spreadsheet. Due to development approvals issued within the immediate study area, the City of Ormond Beach has requested that the following projects be included in background traffic at the study area intersections:

- Plantation Oaks residential development (Approximately 4% of the development has been constructed; therefore, the project trips were reduced by 4% in the analysis)

The historical annual growth, vested trips, and the applied growth method used in the analysis for the study area roadway segments are provided in **Table 4**. The FDOT *Traffic Trends* analysis worksheets are attached as **Appendix G**. The vested trip information provided by Volusia County and the City of Ormond Beach is attached as **Appendix H**.

Table 4

4

2027 BACKGROUND ROADWAY ANALYSIS

The study area intersections and roadway segments were analyzed based on the future roadway conditions to determine potential impacts and to investigate mitigation requirements. **Figures 3** graphically depict the 2027 background volumes. The results of the analysis are presented below.

Unsignalized Intersection Analysis

The unsignalized intersection was analyzed to determine the operating conditions under 2027 background conditions and the results are presented in **Table 5**. The HCS summary sheets are included in **Appendix I**.

Table 5
2027 Background AM and PM Peak-Hour LOS - Unsignalized Intersections
Ridgehaven Residential

Intersection	Adopted LOS	AM Peak-Hour			PM Peak-Hour		
		Delay (sec.)	LOS	V/C greater than 1.0?	Delay (sec.)	LOS	V/C greater than 1.0?
Old Dixie Highway at Plantation Oaks Boulevard	E	NB	10.9	B	NB	11.5	B

As indicated in the table above, under background conditions, the unsignalized study area intersection is anticipated to operate within the adopted LOS.

Signalized Intersection Analysis

The signalized intersection was analyzed to determine the operating conditions under 2027 background conditions and the results are presented in **Table 6**. The HCS summary sheets are included in **Appendix J**.

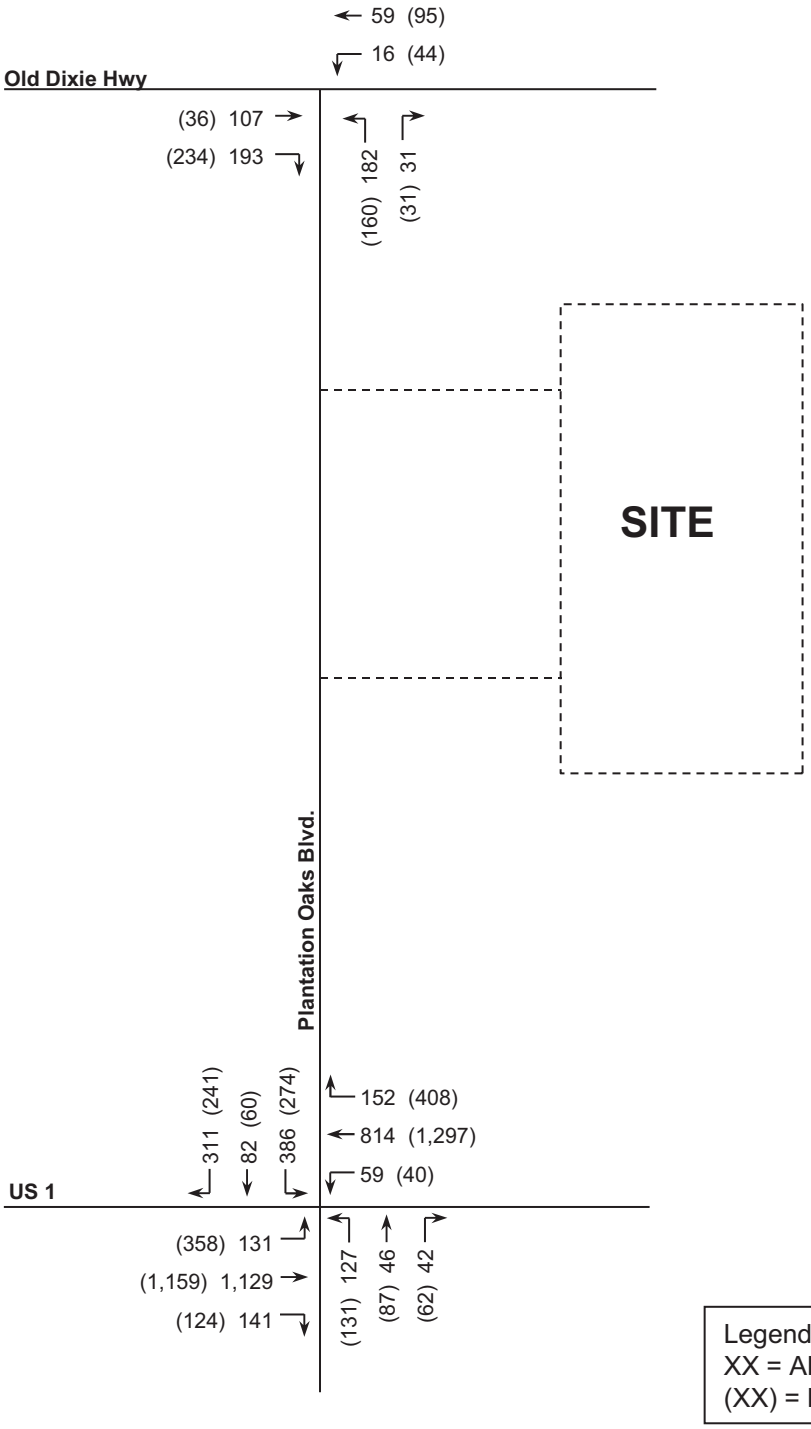
Table 6
2027 Background AM and PM Peak-Hour LOS - Signalized Intersection
Ridgehaven Residential

Intersection	Adopted LOS	AM Peak-Hour			PM Peak-Hour		
		Delay (sec.)	LOS	V/C greater than 1.0?	Delay (sec.)	LOS	V/C greater than 1.0?
US 1 at Plantation Oaks Boulevard	D	42.3	D	No	69.7	E	Yes

As indicated in the table above, under background conditions, the intersections of US 1 at Plantation Oaks Boulevard is anticipated to operate outside the adopted level of service and with v/c ratios greater than 1.0. The following improvements are recommended to achieve an acceptable LOS and a v/c ratio less than 1.0:

US 1 at Plantation Oaks Boulevard

- Add southbound left-turn lane (dual lefts)
- Optimize signal timings



As requested by the City staff, the proposed improvements were analyzed incrementally to demonstrate the need for each recommendation. The HCS summary sheets and results depicting the incremental analysis are provided in **Appendix K**. The analysis of the intersections with all of the proposed improvements is provided in **Table 7**.

The LOS or v/c ratio will be exceeded due to background conditions without the addition of project trips; therefore, in accordance with Florida Statute 163.3180, the project is not responsible for mitigating the deficiencies caused by background conditions.

Table 7
2027 Background AM and PM Peak-Hour LOS - Signalized Intersection Improved
Ridgehaven Residential

Intersection	Adopted LOS	AM Peak-Hour			PM Peak-Hour		
		Delay (sec.)	LOS	V/C greater than 1.0?	Delay (sec.)	LOS	V/C greater than 1.0?
US 1 at Plantation Oaks Boulevard	D	-	-	-	40.1	D	No

As indicated in the table, the signalized intersections are anticipated to operate within the adopted level of service and with v/c ratios less than 1.0 with the recommended improvements under background conditions.

Roadway Segment Analysis

The study area roadway segments were analyzed under 2027 background conditions to determine the anticipated two-way peak-hour LOS. The results are provided in **Table 8**. As indicated, all study area roadway segments currently operate within their adopted LOS with the exception of Plantation Oaks Boulevard from US 1 to Old Dixie Highway. The following improvements are recommended to improve the LOS deficiency:

Plantation Oaks Boulevard from US 1 to Old Dixie Highway:

- Widen from 2-lanes to 4-lanes

The improved roadway segment analysis for the deficient segments is provided in **Table 8**.

Table 8
2027 Background PM Peak-Hour LOS - Roadway Segments
Ridgehaven Residential

Roadway	Segment		No. of Lanes	Adopted LOS	Peak-Hour Two-Way Capacity at Adopted LOS	Existing PM Peak-Hour Two-Way Volume	Applied Growth Rate	High Growth ? Y/N	Vested Trips	Growth Method Applied	2027 Total Background Volume	Background PM Volume Exceed Adopted LOS?

5

2027 BUILD-OUT - FUTURE ROADWAY ANALYSIS

The study area intersections and roadway segments were analyzed based on the roadway conditions at the time of project build-out to determine potential impacts of project-generated trips and identify mitigation requirements. The improvements recommended in background conditions have been included in the 2027 build-out analysis for those applicable intersections and roadway segments.

Project Trip Generation

The daily, A.M., and P.M. peak hour trip generation for the development presented in **Table 9** was determined using the Institute of Transportation Engineers (ITE) 11th Edition of the *Trip Generation Manual*.

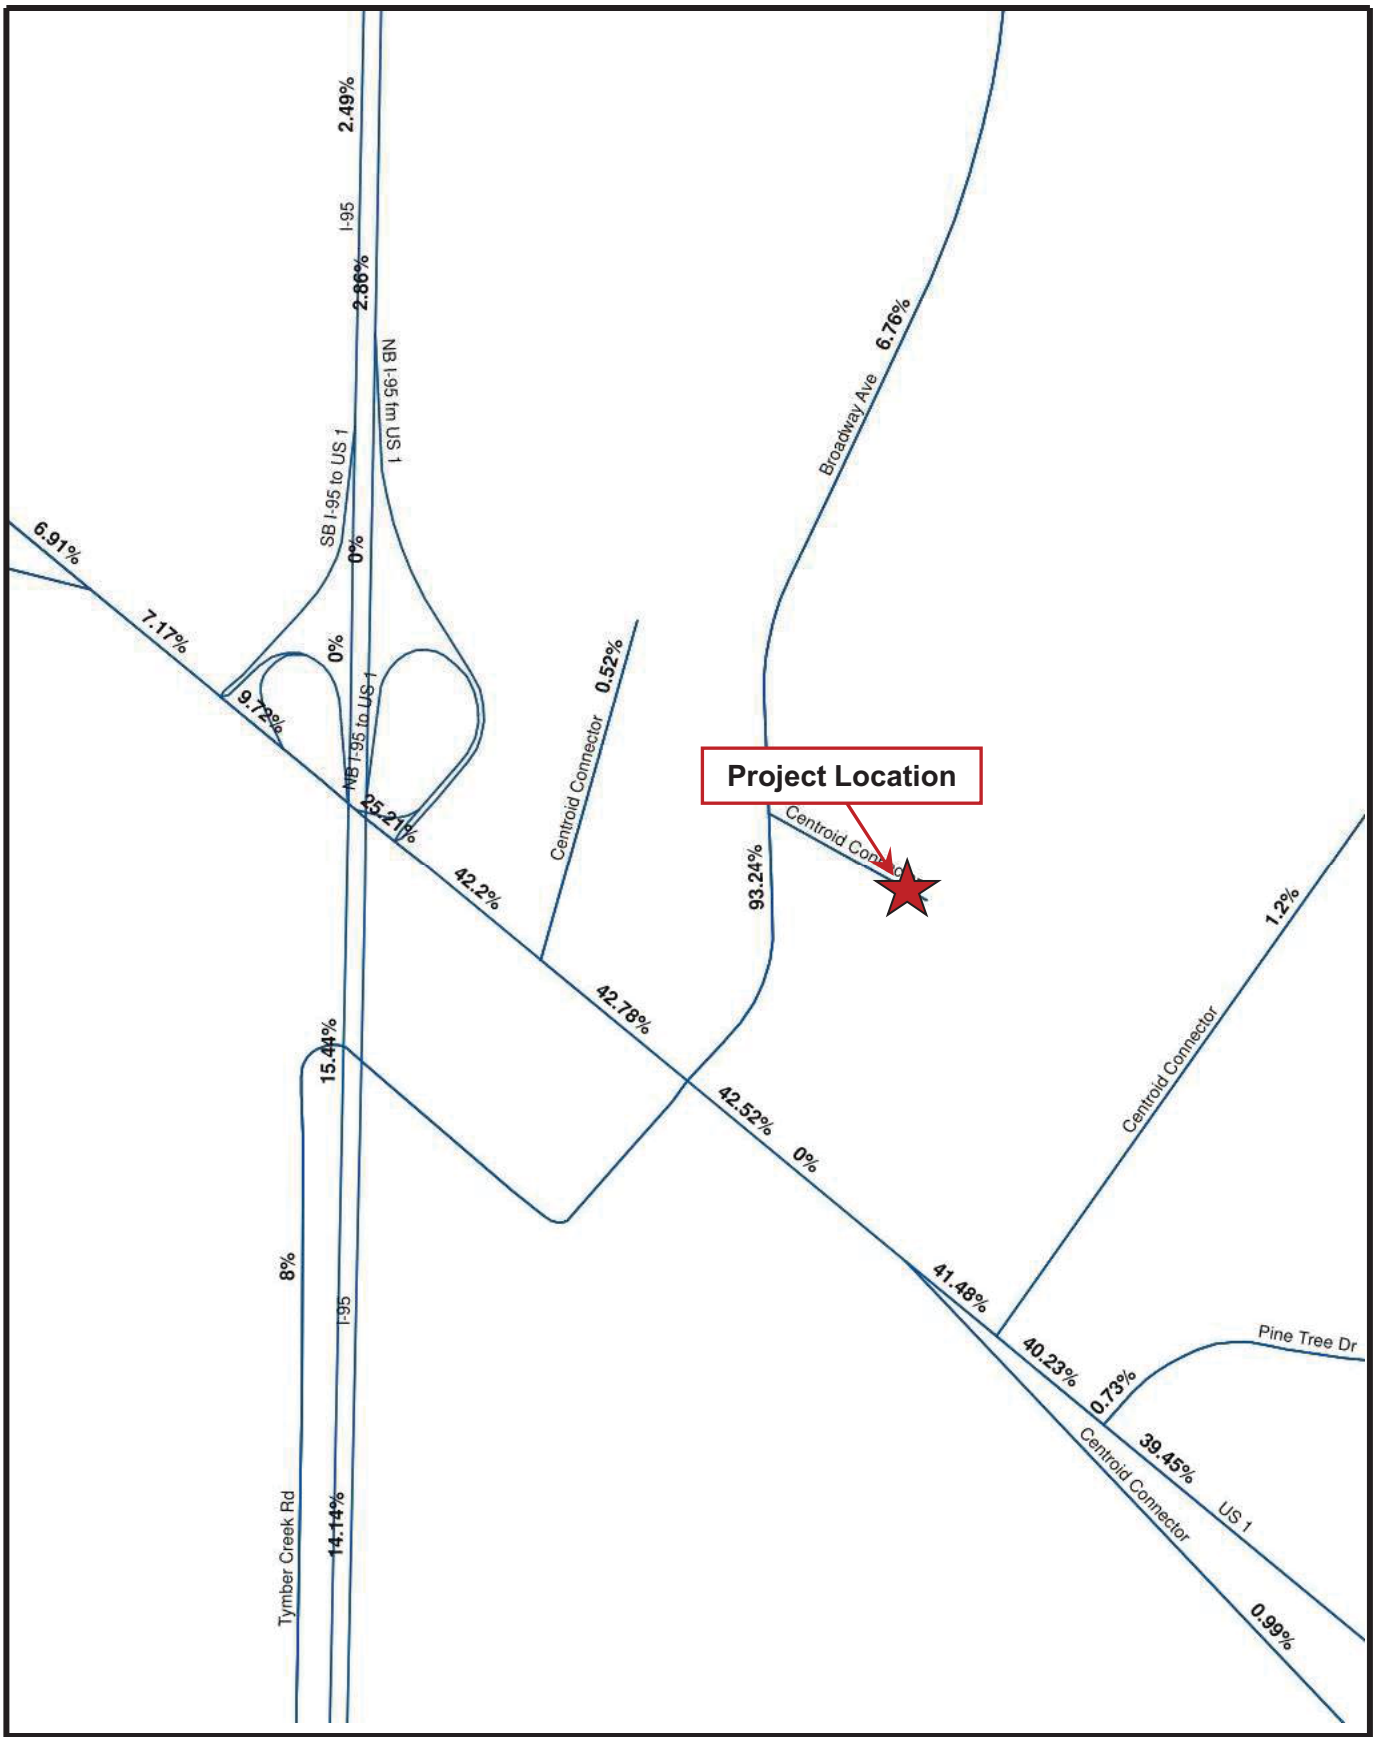

Table 9
Project Trip Generation
Ridgehaven Residential

Project Trip Distribution and Trip Assignment

The Central Florida Regional Planning Model, version 7 (CFRPM) was used to obtain the project trip distribution for the proposed development. A select zone analysis was completed and resulted in the project trip distribution shown in **Figure 4**.

Using the trip distribution, the A.M. and P.M. peak hour project trips were assigned to the study area roadway network. **Figures 5A-5B** graphically depict the 2027 total background traffic and project trips at the study area intersections.

Ridgehaven Residential	N NTS	**Trip Distribution**	LTG Engineering & Planning

Unsignalized Intersection Analysis

The unsignalized intersections and project driveways were analyzed to determine the operating conditions under 2027 build-out conditions, and the results are presented in **Table 10**. The HCS summary sheets are included in **Appendix L**.

Table 10
2027 Build-Out AM and PM Peak-Hour LOS – Unsignalized Intersections
Ridgehaven Residential

Intersection	Adopted LOS	AM Peak-Hour			PM Peak-Hour		
		Critical Approach	Delay	LOS	Critical Approach	Delay	LOS
Old Dixie Highway at Plantation Oaks Boulevard	E	NB	11.0	B	NB	11.6	B
Plantation Oaks Boulevard at Full Access Driveway 1	E	WB	30.4	D	WB	43.0	E
Plantation Oaks Boulevard at Full Access Driveway 2	E	WB	41.7	E	WB	61.7	F

As indicated, under build-out conditions, the unsignalized intersections are anticipated to operate with an acceptable LOS with the exception of Plantation Oaks Boulevard at Project Driveway #2 during the P.M. peak-hour. It is typical for minor approaches to operate with high delays when confronted with high volumes along the major street. Since the v/c ratio is less than 1.0 for the westbound approach, this delay is considered acceptable, and no improvements are recommended at this time.

Signalized Intersections Analysis

The signalized intersections were analyzed to determine the operational LOS under build-out conditions, including the improvements identified during 2027 background conditions, and the results are presented in **Table 11**. The HCS summary sheets are contained in **Appendix M**.

Table 11
2027 Build-Out AM and PM Peak-Hour LOS - Signalized Intersection
Ridgehaven Residential

Intersection	Adopted LOS	AM Peak-Hour			PM Peak-Hour		
		Delay (sec.)	LOS	V/C greater than 1.0?	Delay (sec.)	LOS	V/C greater than 1.0?
US 1 at Plantation Oaks Boulevard	D	50.5	D	No	47.7	D	No

As indicated, the signalized intersection is anticipated to operate with v/c ratios less than 1.0 during the P.M. peak-hour under build-out conditions.

Roadway Segment Analysis

The study area roadway segments were analyzed under build-out conditions, including the improvements identified during 2027 background conditions, to determine the anticipated LOS and the results are presented in **Table 12**. As indicated, all study area roadway segments are expected to operate within the adopted LOS.

Table 12
2027 Build-Out PM Peak-Hour LOS - Roadway Segments
Ridgehaven Residential

Roadway	Segment		No. of Lanes	Adopted LOS	Peak-Hour Two-Way Capacity at Adopted LOS	Existing PM Peak-Hour Two-Way Volume	2027 Background Volume	Project Distribution	Project Trips	2027 Total Build-Out Volume	2027 Build-Out Volume Exceed Adopted LOS?
Plantation Oaks Boulevard	US 1	Northern Project Driveway	4	E	3,410	307	1,699	93.0%	229	1,928	No
	Northern Project Driveway	Old Dixie Highway	4	E	3,410	307	1,699	7.0%	17	1,716	No
Old Dixie Highway	Pine Tree Drive	Plantation Oaks Boulevard	2	E	1,860	290	685	0.2%	0	685	No
	Plantation Oaks Boulevard	Walter Boardman Lane	2	E	1,860	290	685	6.1%	15	700	No

Queue Length and Turn Lane Analysis

A queue length analysis was conducted to determine the recommended storage lengths for existing turn lanes at the study area intersections that are impacted by project traffic. The HCS results were used to obtain the 95th percentile queue lengths expected for each exclusive turn lane during the A.M. and P.M. peak-hours. Turn lane requirements were evaluated using the Volusia County LDC Section 72-619, Table VI and FDOT Design Manual 212. The resulting recommended turn lane lengths for the intersections are provided in **Table 13**. As indicated in the table, all turn lanes that do not meet the required standard lengths do so in existing conditions or due to background conditions in either the AM or PM peak-hours and not due to project trips except for the following turn lanes:

US 1 at Plantation Oaks Boulevard

- Extend eastbound left-turn lane by 75-feet

Alternate Mode Analysis

An alternative mode analysis has been conducted to determine existing and proposed alternate modes of transportation within the immediate project study area.

Votran, Volusia County's public transportation system, provides transportation alternatives to all urban areas of the county via fixed route buses and paratransit vehicles. The frequency of most routes is one hour, with a few operating on the half-hour. Standard daily service is provided from 6:00 a.m. to 7:00 p.m., Monday through Saturday, with a limited fixed route service at night and on Sunday. Currently, there is 1 bus stop within 0.25-miles of the development, located just west of US 1 at Plantation Oaks Boulevard. Route 3C services stops from Airport Road to east of I-95, with a connection to the Votran Transfer Plaza for additional connectivity.

Bicycle and Pedestrian Analysis

Per Ormond Beach Land Development Code (LDC) 3-53(d), a detailed analysis of the bicycle and pedestrian facilities within a one (1) mile radius of the development is required. Currently, there is an existing sidewalk provided along the westside of Plantation Oaks Boulevard, providing access to amenities and services on US 1. There are no sidewalks immediately adjacent to the proposed development. Per Ormond Beach LDC 3-55(1.d), the development will be required to install sidewalks 5-feet in width along Plantation Oaks Boulevard adjacent to the development boundary. Based on prior discussions with City staff, the developer has agreed to install sidewalk extending from the northern project driveway to existing sidewalk network at the intersection of US 1 and Plantation Oaks Boulevard (see **Appendix N**). An existing bike path is provided along the eastside of Plantation Oaks Boulevard, providing access for bicyclists to US 1 and Old Dixie Highway. There are no schools or public parks within a two (2) miles radius of the proposed development currently. In the future, the developer for Plantation Oaks has allotted space to the County for public park amenities, which will be accessible via the Planation Oaks Boulevard sidewalk network. **Figure 6** graphically depicts the project location in relation to the existing sidewalk, existing bike path, and proposed sidewalk network.

**Based upon Volusia County LDC Section 72-619 Table VI and FDOT Design Manual 212*

Site Access Analysis

Access to the development will be provided via 2 full access driveways along Plantation Oaks Boulevard. The need for turn lanes was determined utilizing the Volusia County Land Development Code (LDC) Section 72-619. Per the Volusia LDC, a right-turn lane is required when the speed limit equals or exceeds 35 miles per hour or if the development will generate 100 or more right-turn movements during the peak hour. A left-turn lane shall be provided at each driveway when the average daily trip ends of the driveway is 1,000 vehicles or more and/or the average peak hour inbound left-turn volume is 25 vehicles or more, with no queue length required if the peak hour entering volume is 75 vehicles in the peak hour or less. Based on this criterion and an adjacent speed limit of 35 miles per hour (mph), the following turn lanes are required at new access points:

Plantation Oaks Boulevard at Full Access Driveway 1:

- A 155-ft (includes 50-ft taper) northbound right-turn lane

Plantation Oaks Boulevard at Full Access Driveway 2:

- A 155-ft (includes 50-ft taper) northbound right-turn lane

Proportionate Share (PS)

Based on the current Florida Statue and procedures outlined in the R2CTPO TIA guidelines, the proportionate share shall be calculated based upon the number of trips from the proposed development being approved. The project traffic is then divided by the change in roadway capacity resulting from the recommended improvements to result in a PS percentage. The total estimated construction cost for the improvement is multiplied by the PS percentage to determine the applicant's PS contribution.

The PS formula is to be applied only to those facilities that are determined to be significantly impacted by the project traffic under review. The recommended improvements eligible for PS determination, the estimated improvements costs and PS calculation are to be negotiated once the TIA has been approved.

6

CONCLUSION AND RECOMMENDATIONS

This study was conducted to evaluate the impact the proposed Ridgehaven Residential development would have on the surrounding roadway network in the City of Ormond Beach. The results of the study are summarized in **Table 14 and Table 15**, below.

Table 14
Recommended Improvements - Intersections
Ridgehaven Residential

Intersection	When Improvement Required	
	2027 Background	2027 Build-Out
US 1 at Plantation Oaks Boulevard	• Add southbound left-turn lane (dual lefts) • Optimize signal timing splits The LOS or v/c ratios will be exceeded due to background conditions without the addition of project trips; therefore in accordance with Florida Statute 163.3180, the project is not responsible for mitigating the deficiencies caused by background conditions.	

Table 15
Recommended Improvements - Segments
Ridgehaven Residential

Segment	Limits		When Improvement Required	
	From	To	2027 Background	2027 Build-Out
Plantation Oaks Blvd	US 1	Northern Project Driveway	4L	
	Northern Project Driveway	Old Dixie Highway	4L	

Based on the criterion in the Volusia County LDC Section 72-619 and an adjacent speed limit of 35 mph, the following turn lanes are required at new access points:

Plantation Oaks Boulevard at Full Access Driveway 1:
- A 155-ft (includes 50-ft taper) northbound right-turn lane

Plantation Oaks Boulevard at Full Access Driveway 2:
- A 155-ft (includes 50-ft taper) northbound right-turn lane

If deemed necessary by the agencies, the recommended improvements caused by build-out project traffic eligible for proportionate share (PS), the estimated improvement cost, and PS calculations are to be negotiated once the TIA results are accepted by the City of Ormond Beach and Volusia County. Based on the results of the TIA and recommended improvements, the proposed Ridgehaven Residential development is recommended for approval.

Re: Ridgehaven Residential - Traffic Impact Analysis Methodology

Dear Mr. Spraker:

LTG, Inc. (LTG) has been retained by Ridgehaven, LLC. to prepare a Traffic Impact Analysis (TIA) for the proposed development known as Ridgehaven Residential. The development is located north of Addison Drive and east of Plantation Oaks Boulevard in the City of Ormond Beach. Access is proposed via two full access driveways along Plantation Oaks Boulevard. Build-out of the proposed development is anticipated by 2027. **Figure 1** shows the location of the project relative to the surrounding road network. A layout of the proposed site is attached as **Exhibit A**. The development will consist of the following land uses:

- Single-Family Detached Housing = 202 Dwelling Units
- Single-Family Attached Housing = 96 Dwelling Units

The City of Ormond Beach has adopted the River to Sea Transportation Planning Organization (R2CTPO) TIA guidelines. In accordance with these guidelines, this letter outlines the proposed methodology by which the analysis will be conducted. The analysis will be based on the latest concurrency information as obtained from the Volusia County Traffic Engineering Department, the City of Ormond Beach Public Works and/or Development Services Departments, and the Florida Department of Transportation (FDOT).

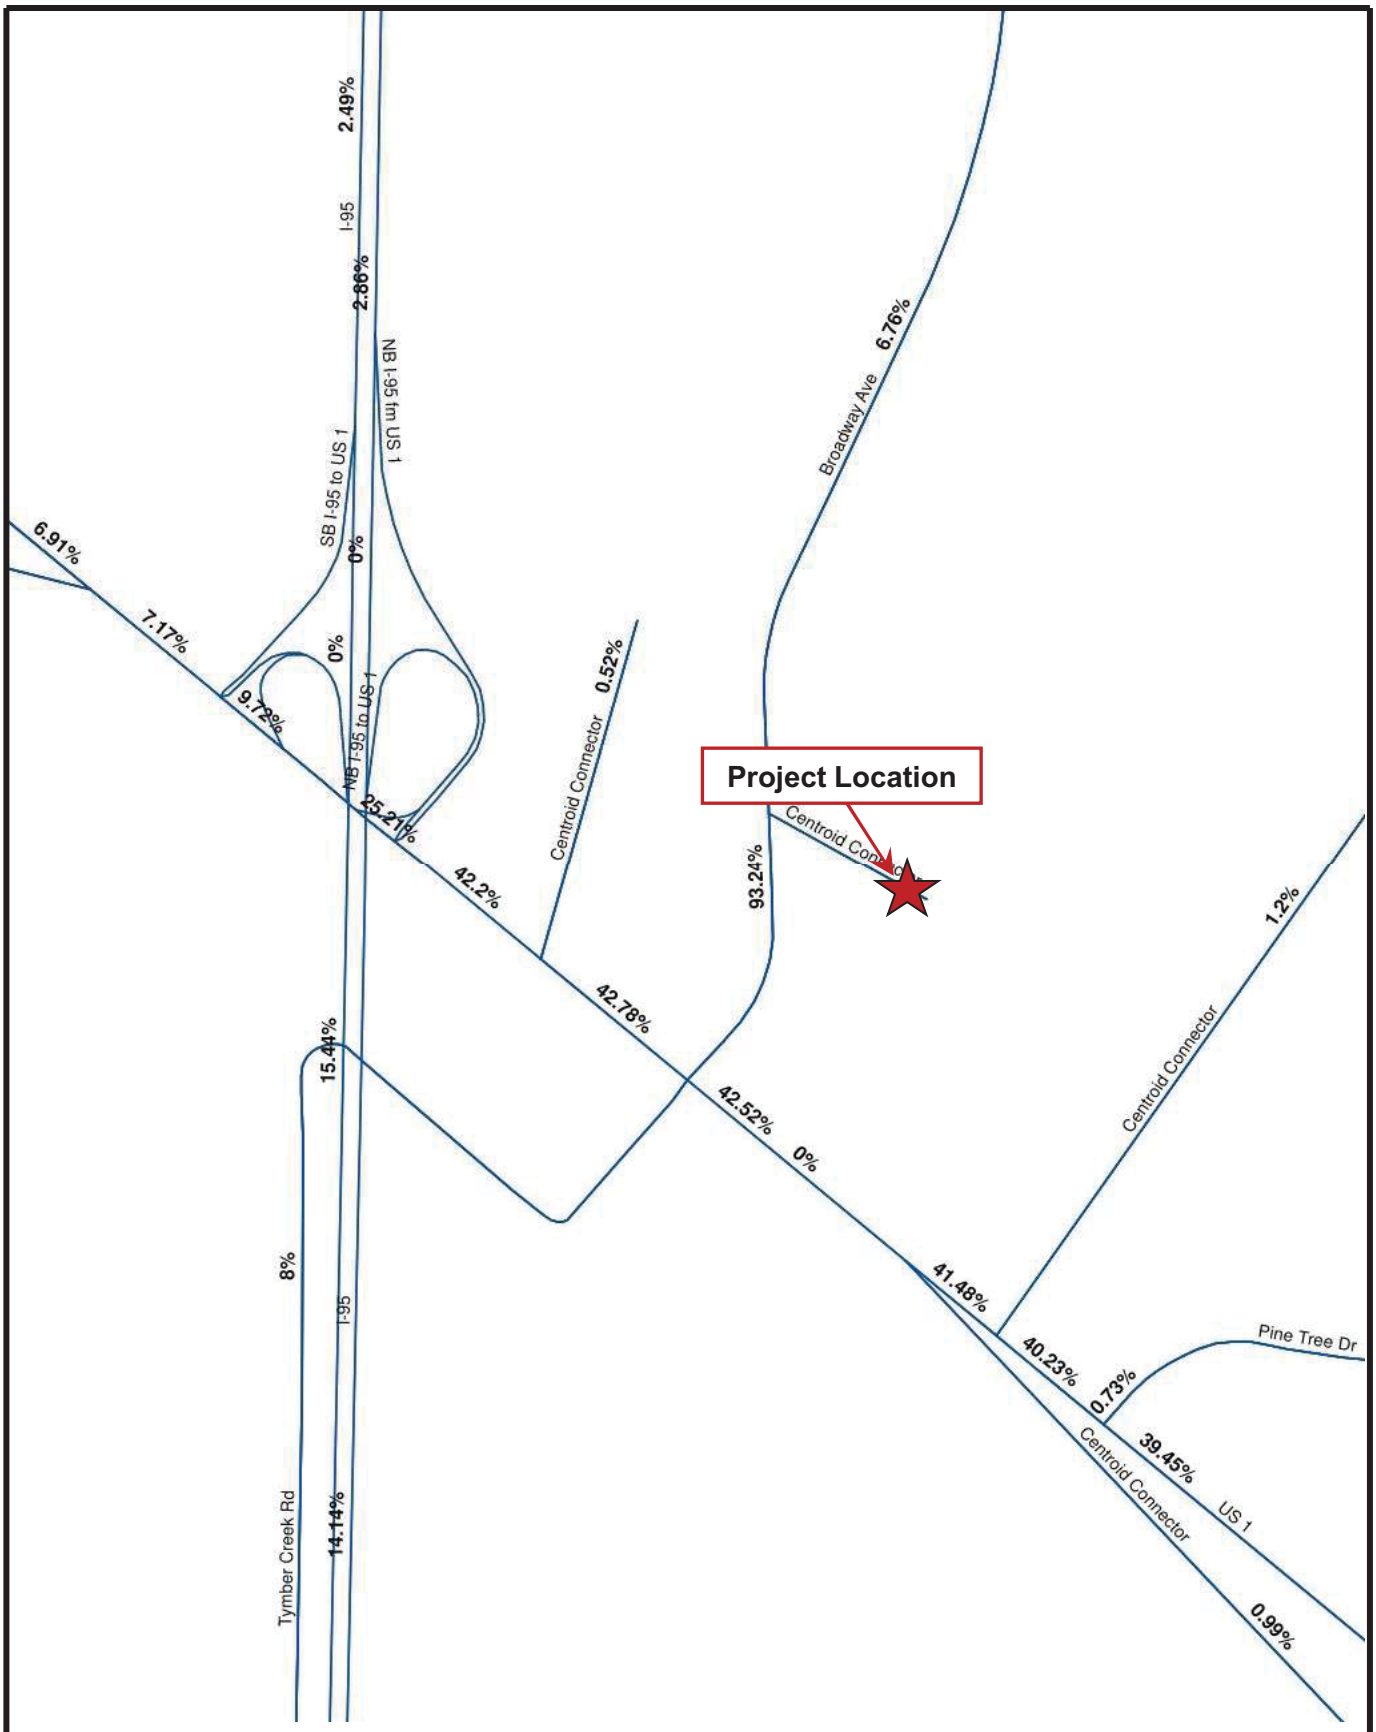
Analysis Period

Roadway segments will be analyzed based on peak-hour two-way traffic and intersections will be analyzed for a.m. and p.m. peak-hours. The analysis will be conducted under 2022 existing conditions and 2027 build-out conditions. The a.m. and p.m. peak-hour turning movement counts will be collected on a typical weekday (Tuesday, Wednesday, or Thursday) between the hours of 7:00 a.m. - 9:00 a.m. and 4:00 p.m. – 6:00 p.m. The existing traffic counts will be adjusted by the FDOT Seasonal Factor (SF) specified for the week the data is collected.

Planned Roadway Improvements

Information on programmed or planned roadway improvements in the area of interest will be obtained from the FDOT Five-Year Work Program, Volusia County, the R2CTPO Long Range Transportation Plan (LRTP), and previously approved projects.

Project Trip Generation



The daily, a.m., and p.m. peak-hour trip generation for the build-out of the development was determined using the Institute of Transportation Engineers (ITE) 10th edition of the *Trip Generation Manual*. The proposed trip generation is summarized in **Table 1**.

Project Trip Distribution

The Central Florida Regional Planning Model version 7 was used to obtain the project trip distribution for the project. The proposed project trip distribution is attached as **Figure 2**. Additional distribution printouts are included in **Exhibit B**.

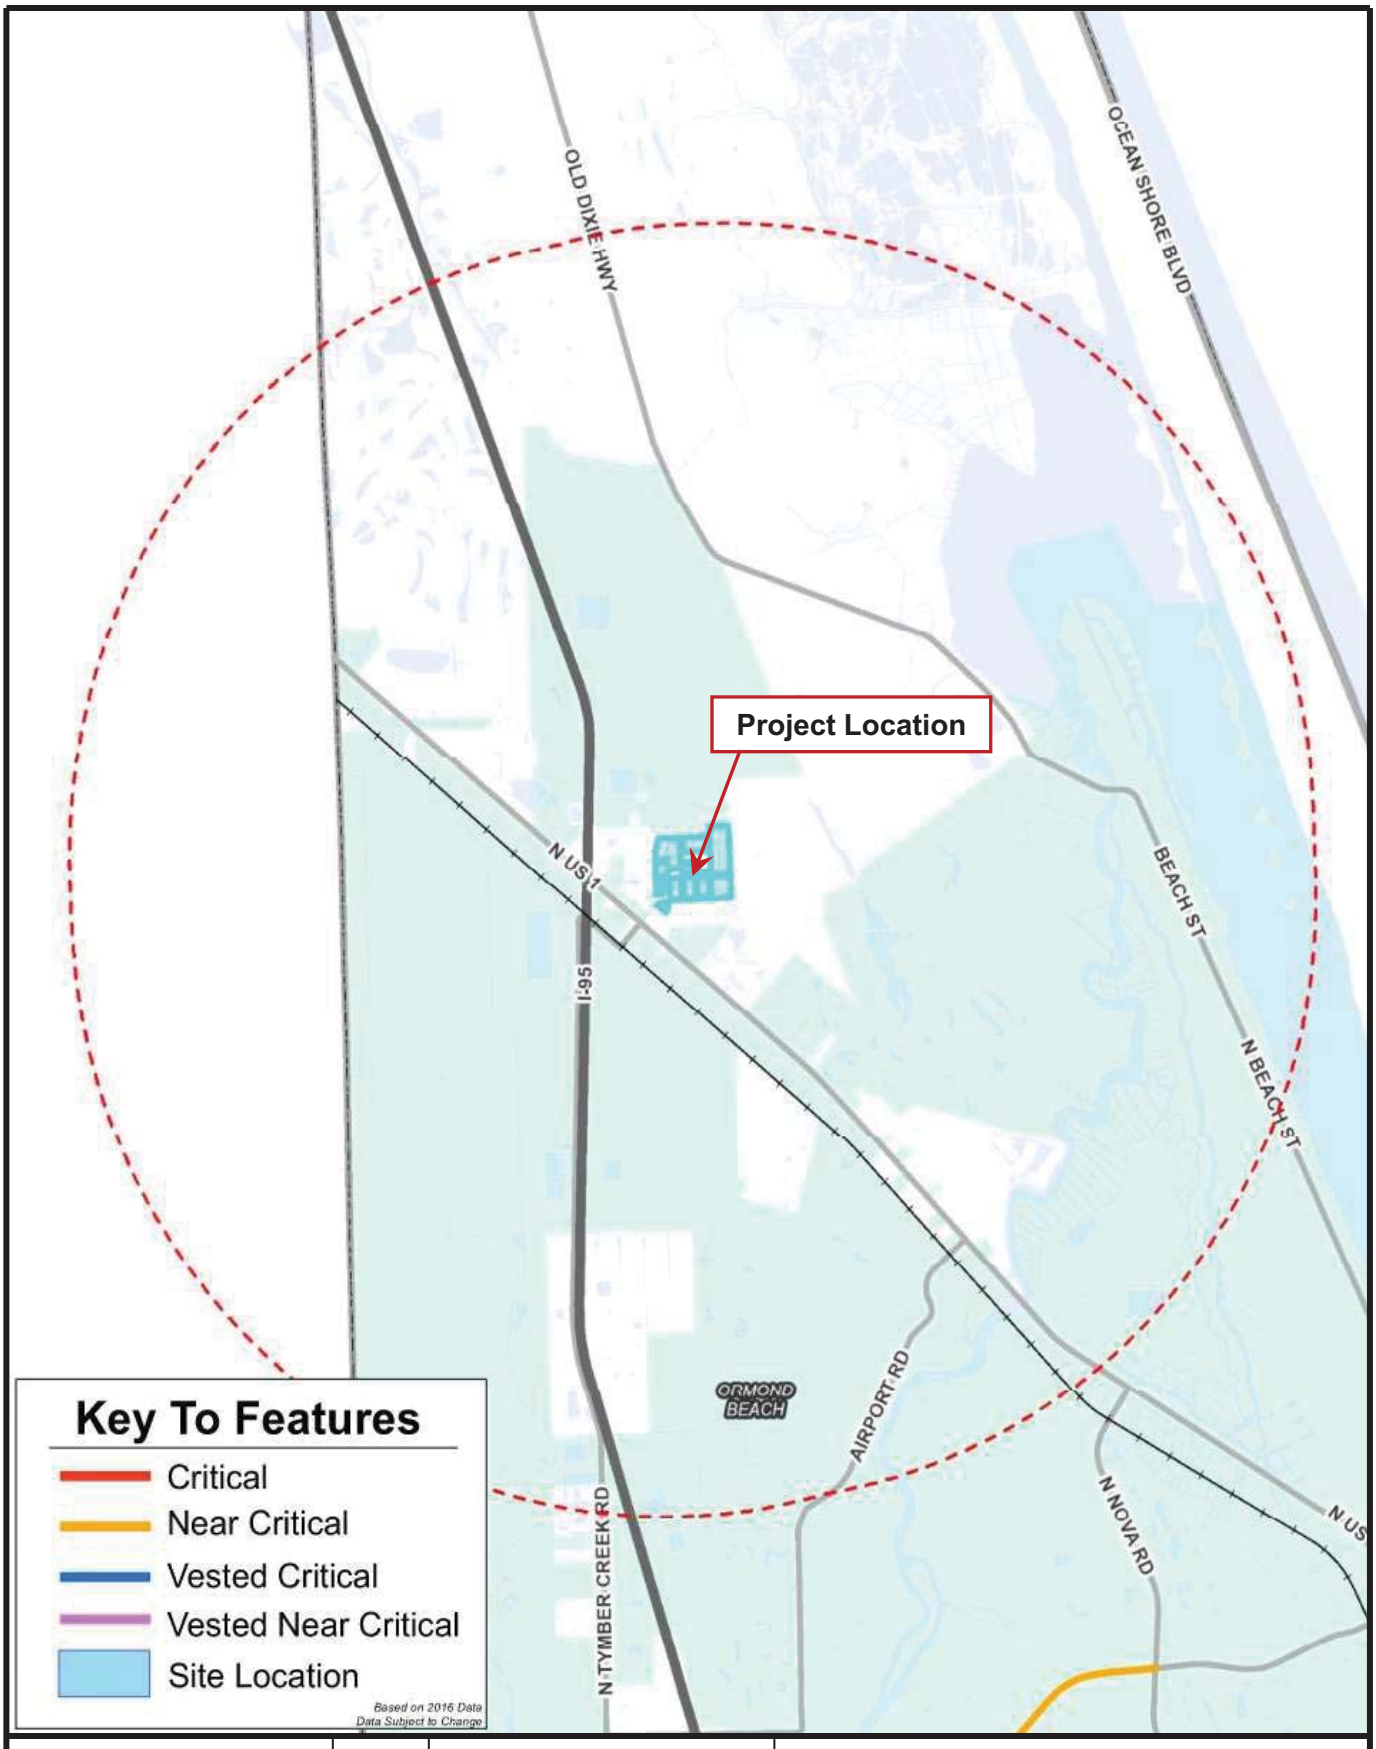
Study Area

Per the R2CTPO guidelines, projects must include all roadway segments to which the site has direct connections, that are impacted by the proposed project to within three percent or greater of the peak-hour two-way adopted level of service (LOS) capacity, major intersections along the significant segments, and roadway segments that have been designated as “critical” or “near critical” within the site traffic influenced segments.

Critical and near critical roadways are defined by Volusia County as roadways with a volume to capacity (v/c) ratio that is equal to or greater than 1.0 and 0.90, respectively. **Figure 3** depicts the critical and near critical roadway segments within the area.

Using the project trip distribution, p.m. peak-hour project trips were assigned to the roadway network to determine the roadway segments that are impacted by the proposed project to within three percent or greater of the peak-hour two-way adopted level of service (LOS) capacity. **Table 2** presents the significance test on area roadways for the proposed development.



As indicated in **Table 2**, the project traffic is significant on one area roadways. Therefore, the following intersections and roadway segments will be included in the study:

Roadway Segments:

- Plantation Oaks Boulevard from US 1 to Old Dixie Highway (provides access, significant)
- Old Dixie Highway/Beach Street from Pine Tree Drive to Walter Boardman Lane (requested by the City)

Intersections:

- US 1 at Plantation Oaks Boulevard
- Old Dixie Highway at Plantation Oaks Boulevard
- Plantation Oaks Boulevard at Project Driveways (future conditions)

Build-Out Traffic

The build-out traffic will be developed by the sum of the background traffic (derived from historical growth rates and vested trips as identified by Volusia County) and the estimated project traffic. Growth rates for each study area roadway segment will be determined using the following method:

- Historic growth trends calculated based upon the last five years of historic count data to determine a roadway segment's applicable trend growth rate using the best fitted regression analysis.
- If the R^2 value is less than 0.70, then ten (10) years of historical traffic data will be used to determine the trends growth rate using the best fitted regressions analysis.
- If the R^2 is still less than 0.70, the R^2 for the adjoining northbound and southbound segments will be analyzed. Then the growth rate shall be determined by the trend fitted curve. If the overall trend fitted curve is positive,1% or 2% shall be used. If the overall trend fitted curve is negative, then a 1% growth rate will be applied.
- In no case shall the growth rate be negative.
- Vested trips will be applied in addition to growth rates where applicable.
- If the R^2 value is greater than 70%, and the growth rate is greater than 3%, the background growth will be determined using either vested trips or the growth rate, whichever is more conservative.
- If the R^2 value is greater than 70%, and the growth rate is greater than 3%, and there is a high number of vested trips to be applied by multiple vested projects with various land uses, a request may be made to reduce vested traffic by 30% if the vested traffic is 30% of the total background growth.
- Per recent Volusia County directive, exponential regression will not be used to determine growth rates.

The results of the trends analysis and vested trips as identified by the County's latest vested trips table, is provided in **Table 3**. At the request of the County, Exponential Regression was not used to determine growth rates. All improvements funded for construction within the first three years of the five-year work program will be considered in the future analysis. It is understood that this methodology will remain valid for a period of six (6) months from the date of approval.

Segment Analysis – P.M. Peak-Hour (Existing, Background, and Build-Out Conditions)

If the future projected volume is expected to exceed the maximum service volume of a roadway segment, a transportation analysis may be conducted to determine service volume specific to that segment, if authorized by the applicant. The procedures documented in the latest version of the FDOT *Quality/Level of Service Handbook* will be used to determine specific capacity, if necessary.

Intersection Analysis – A.M. & P.M. Weekday Peak-Hour (Existing, Background, and Build-Out Conditions)

The operating conditions for both the existing and future conditions at the unsignalized intersections will be analyzed using the *Highway Capacity Software (HCS)*. This software utilizes the methodology outlined in Chapter 20 of the Highway Capacity Manual, Version 2022, titled "Two-Way Stop Controlled Intersections." The operating conditions for both the existing and future conditions at the signalized intersections will be evaluated using HCS and/or *Synchro 10*. This software utilizes the methodology outlined in Chapter 19 of the 2010 Highway Capacity Manual, titled "Signalized Intersections".

Alternative Mode Analysis

An alternate mode analysis will be conducted which will evaluate present and programmed bike and pedestrian within 1 mile of the development in accordance with Section 3-53 of the Ormond Beach Land Development Code. Votran shall be notified of the proposed project (land use and intensity), and comment shall be requested for potential future routes.

Table 3
Trends Growth and Vested Trips
Ridgehaven Residential

Roadway	Limits		5-Year			10-Year			Applied Growth Rate	High Growth? Y/N	Vested Trips	Existing Peak-Hour Volume	Existing AADT Year	Build-Out Year	Growth Method Applied
	From	To	Best Fit Regression	R^2 Value	Historical Growth Rate	Best Fit Regression	R^2 Value	Historical Growth Rate							
Plantation Oaks Blvd	US 1	Old Dixie Hwy	NA	NA	NA	NA	NA	NA	2.00%	N	0	*	2021	2027	Historical Growth

**Existing PM Peak-Hour Volume will be determined using collected turning movement counts*

Site Access Analysis

A site access analysis based on the proposed preliminary plan and driveway geometry will be included in the analysis. The current driveway spacing and turn lane criteria standards adopted by the maintaining agency will be used to evaluate any necessary access improvements or recommendations.

Improvement Mitigations

All proposed mitigation improvements must be consistent with the appropriate city and county comprehensive plans transportation element. In particular, if a proposed mitigation improvement is to widen a county roadway beyond that which is indicated on the county's adopted Future Number of Lanes Map (or allowed by the CTE since a county map amendment is pending), an alternative mitigation improvement project must be proposed. Any additional traffic evaluations or studies required to provide recommendations for improvement will also be identified in the report. Full execution of additional analyses required to implement or include the improvement in the mitigation plan for the project will be submitted under separate cover.

Please review and advise if the City is in agreement with this proposed methodology or provide comments relating to preferred revisions. If you have any questions, please contact me at 386.257.2571.

Sincerely,
LTG, Inc.

George A. Galan, PE
Director of Traffic Operations

Straight Line Growth Option	

Volusia County's Segment Growth Rates and Vested Trips Instructions Policy

AND

IF there are - Vested Trips

Negative Growth (Use Minimum 1%):

\+ Vested Trips

Low to Medium Growth (<= 3%)(Use Minimum 1%):

\+ Vested Trips

High Growth (> 3%):

Use the Highest # of the two (growth rate or vested trips). Need to submit supporting documentation & justification

HIGH GROWTH & HIGH VESTED TRIPS

If there are Vested Trips from multiple approved projects on segment.
And, Vested Trips comprise of multiple uses that would normally have significant interaction (residential, retail, office, restaurant, etc…).

And, Vested Trips make up more than 30% of the total future background traffic.

Then, Vested Trips can be reduced by 30% upon request by the Applicant

RE: PROPOSED ROW VACATION OF PLATTED RIGHT-OF-WAY NATIONAL GARDENS, MAP BOOK 10, PAGES 250-253. ADJACENT TO PARCEL NUMBERS: 313601010020; 31360100012; 313601330110; 313601330080; 313601230060; 313601240060; 31361240050 AND 313601250010.

To Whom It May Concern:

This letter is in response to a request to Charter Communications - Spectrum to vacate the above referenced "Easements" which is also described in the attached survey map.

Spectrum has **"no objection"** to the vacation of the ROW easement of the above mentioned property as described in the attached "Exhibit A" and survey map.

If you have any questions regarding this, please contact me.

Sincerely,

Stacy R. Stafford

Re: Waivers and Benefits for RidgeHaven PRD

Dear Steven:

I am writing to set forth the waivers we are requesting from the City's Land Development Code (LDC) for the RidgeHaven PRD and also to detail benefits of the proposed planned development. Waivers and Benefits are as follows:

Waivers

1. **Waiver from LDC Section 2-35(h)(3) requiring at least thirty (30) square feet per residential unit of indoor recreation floor area within a PRD.**

We are requesting a waiver from LDC Section 2-35(h)(3) to permit less than the required thirty (30) square feet per residential unit, or 8,940 sq. ft., of indoor recreation floor area. As far as indoor facilities, RidgeHaven will have a 750 sq. ft. pool cabana with restrooms in the amenity area; however, there are a number of justifications for the requested waiver. To begin with, RidgeHaven will have a large, 33,000 sq. ft. outdoor amenity area for residential recreation. Those outdoor amenities include a pool with spacious pool deck, a dog park, a playground and activity fields. The 33,000 sq. ft. of outdoor active recreation exceeds the required 60 sq. ft. per unit, or 17,880 sq. ft., resulting in a surplus of 15,120 sq. ft. of active outdoor recreation. Additionally, there will be two walking trails in the subdivision, one being in a wooded area at the southeast corner of the property (50,921 sq. ft.) and another one along a lake and natural buffer at the northeast corner (8,500 sq. ft.). The large amount of high-quality, outdoor recreation and amenity features proposed for RidgeHaven will more than offset the smaller amount of indoor recreation area and acts as a good justification for the requested waiver.

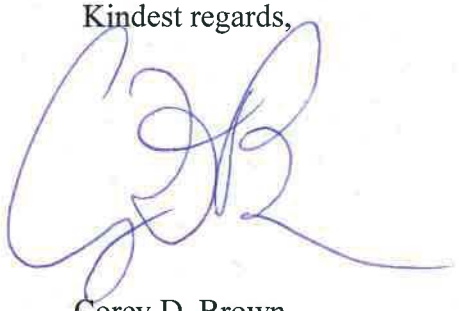
2. **Waiver from City of Ormond Beach Standard Detail 5, Wet Detention, which requires pond depths to be between 8 and 12 feet deep.**

We are requesting a waiver from City of Ormond Beach Standard Detail 5, Wet Detention, to permit a detention pond depth of +/- 15 feet in lieu of the required 8 to 12 feet deep. The

excess depth is due to the need for additional fill to construct RidgeHaven. Pond depths exceeding 12 feet are common for projects across Volusia County, especially when fill from those ponds is used for the development, and a SJRWMD ERP will be obtained that includes approval of the proposed pond depth. A major benefit of the waiver for increased pond depth is a reduction in truck traffic to the property that is required when importing fill dirt from another location. Another justification is that RidgeHaven will recycle stormwater from these wet detention ponds for irrigation of lawns and landscaping, which reduces stormwater runoff and nutrient pollution. Stormwater not only gets another chance to percolate into the groundwater supply but also can be absorbed by lawns and plants, along with the nutrients in the recycled water, which plants can use to grow.

3. Waiver from LDC Section 2-35(d)(3) requiring a minimum 40-foot perimeter building setback.

We are requesting a waiver from LDC Section 2-35(d)(3) in order to permit a minimum perimeter building setback of: 15 feet next to Lot 285; 20 feet next to Lots 157-163, 213 and 214; and 30 feet next to Lot 227. There are several justifications for this waiver. First, both the outparcel properties and the proposed Lots are residential in nature, so there is less need to separate these uses than if the outparcels were a conflicting use like industrial or commercial. Another justification, as mentioned in Section 2-35(d)(3), is that "wooded or conservation areas" lie between some of the proposed RidgeHaven lots and the adjacent properties, including a 15-foot tree preservation buffer next to Lots 213, 214 and 277. Setback areas not on lots or in designated tree preservation buffers will be left natural if possible. The fact that the outparcel properties are wooded, along with the RidgeHaven property, means there should already be some natural vegetative buffering in these areas. Other perimeter areas also have increased natural vegetative buffers, with one example being the 38-foot tree preservation area behind Lots 189-206, where only a 10-foot buffer is required.



Benefits

The RidgeHaven PRD will have numerous benefits to the community that justify the requested waivers. To begin with, there will be a huge decrease in permitted residential density, from at least 866 units on the property to 284 units for the proposed PRD. There will also be a variety of sizes, types and price points for homes in RidgeHaven, from 30-foot duplex lots to 75-foot estate lots. At least 25.52 acres, or 24.67% of the PRD Property, will remain as natural vegetation (including wetlands and upland buffers), 298 new street trees, along with 1,254 trees on lots, will be planted throughout RidgeHaven, and all historic trees will be retained. Potable water and sanitary sewer service will be brought into the PRD, and stormwater runoff will be recycled for lawn irrigation. This eliminates the need for wells and septic tanks and reduces nutrient pollution. RidgeHaven will have Common Open Space and outdoor active recreation areas that exceed requirements for PRDs in the LDC and include a pool with deck and cabana, a dog park, a playground, open activity fields and multiple walking trails. There will also be a 35-foot natural wooded buffer between RidgeHaven and the Village of Pine Run, and a 38-foot natural wooded buffer behind Lots 189-206, reducing impacts to neighbors. Finally, RidgeHaven will

have an upscale aesthetic and "Neo-Eclectic" coordinated architectural theme, with up-scale entry signage and FPL Standard LED, ornamental streetlights and ornamental sign poles to help tie everything together

Please let me know if you have any questions about the proposed waivers for the RidgeHaven PRD.

Kindest regards,

Corey D. Brown

Re: RidgeHaven PRD Requirements / Responses to Selected Comments / Low Impact Development

Dear Steven:

I am writing to respond to several of your comments on the RidgeHaven PRD application. This includes responses about how the PRD meets the review requirements for PRDs in Sections 2-35(j)(4), 1-15(e) and 2-35(h) of the Land Development Code, as well as details on Low Impact Development techniques used in the PRD.

Comment 74: Please provide a letter detailing how the criteria of the Planned Residential Development have been met, including Section 2-35(j)(4) of the Land Development Code that states:

In considering an application for a PRD, the planning board may recommend approval, approval with conditions, or disapproval and the city commission may base its conditions of approval or denial of the issuance of a development order on the extent to which the development offers site amenities above that normally found for permitted uses in the district with regard to the following:

a. Innovative site design.

RidgeHaven will include several innovative site design features. The developer wants to ensure that the project is proportioned for the size of the property and this part of the City. As such, density has been reduced from a possibility of at least 866 units to a maximum of 284 units. Those units are divided among several different types and sizes of lots and homes, with 84 35-foot duplex lots, 136 50-foot single-family lots, and 66 75-foot single-family estate lots, as opposed to a single lot size throughout as is often typical for new

subdivisions. This provides for a variety of different price points and will result in different types and sizes of families living in RidgeHaven.

RidgeHaven is built around preserving a large wetland and upland buffer area in the central portion of the development. This is good for the environment, the wildlife and the quality of life for residents. When adding natural vegetation and tree preservation areas with preserved wetland and upland buffers, RidgeHaven will leave approximately 25.52 acres, or 24.67%, of the PRD property in its natural state and undisturbed. Another environmentally friendly and innovative design feature is the use of stormwater retention ponds for irrigation. All of the irrigation water for the site will come directly from stormwater runoff collected and held in the stormwater ponds, which allows excess nutrients to be sucked up by lawns and unused water to be filtered back into the aquifer. As such, no groundwater wells for irrigation, or otherwise, are required.

b. Coordinated architectural design.

RidgeHaven will have a common, "Neo-Eclectic" architectural theme so that there are no clashing, inconsistent building designs in the community, including within the amenity area.

c. Open space, recreation, common areas.

RidgeHaven will exceed required tree preservation area by having 25.52 acres of tree preservation area in lieu of the 15.52 acres required by the Land Development Code. RidgeHaven also exceeds the requirement for Common Open Space by having over 50,000 sq. ft. of outdoor recreation area, which includes two walking trails, in lieu of the 8,940 sq. ft. that is required. There will also be a natural, 35-foot tree preservation / landscape buffer between the Village of Pine Run properties and the new lots in RidgeHaven.

RidgeHaven will have a common area for active recreation of over 33,000 square feet. This amount exceeds the required 60 sq. ft. per unit, or 17,040 square feet. Enhanced amenities for recreation include a swimming pool and cabana, dog park, playground and activity fields. This is supplemented by a trail through a beautiful tree preservation area at the southwest corner of the property, and another walking path along a large pond at the northeast corner of the property. The paths and trails connect to a sidewalk system with sidewalks on both sides of the streets throughout. An off-site, 6-foot sidewalk is proposed for the development to the sidewalk on U.S. 1.

d. Coordinated streetscape elements.

RidgeHaven will have up-scale entry signage and FPL Standard LED, ornamental street lights and ornamental sign poles to help tie everything together with an up-scale aesthetic. Additionally, approximately 298 street trees will be planted throughout the development.

Please provide in the letter an analysis of the development order criteria of Section 1-15(e) of the Land Development Code:

(1) The proposed development conforms to the standards and requirements of this Land Development Code and will not create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare or quality of life.

RidgeHaven meets or exceeds requirements for a Planned Residential Development in Ormond Beach. There is a large decrease in density with the Comprehensive Plan Future Land Use amendments and proposed rezoning for 284 units. The previous Comp. Plan densities in the County added up to at least 866 units, or 8.37 units per acre. New Comp. Plan designations are contingent upon no more than 284 units, or 2.74 units per acre, within the PRD. That is a decrease of at least 582 units from the previous FLU to the proposed FLU and PUD. The project will recycle stormwater so it can be used for irrigation, eliminating the need for any irrigation wells. No potable water wells or septic tanks will be used, either, due to use of City potable water and sanitary sewer service. Accordingly, there will be no impact on public health due to draw down or pollution of groundwater. First-class recreational amenities, including a swimming pool, dog park, playground, activity fields and multiple walking trails through natural areas, which, when combined with ample wetland and tree preservation areas, will benefit the residents' quality of life. There will also be a 35-foot landscape buffer of existing, natural vegetation between new lots in RidgeHaven and the Village of Pine Run, as well as no road connection to Addison Drive, which will eliminate impacts to the neighborhoods south and east of RidgeHaven.

(2) The proposed development is consistent with the comprehensive plan.

RidgeHaven will be consistent with the City's Comprehensive Plan, which was revised specifically with the RidgeHaven PRD in mind, with a corresponding large reduction in residential density.

(3) The proposed development will not adversely impact environmentally sensitive lands or natural resources, including, but not limited to, waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells.

RidgeHaven will utilize City of Ormond Beach potable water and sanitary sewer service so that no potable water wells or septic tanks are required. The project will also recycle stormwater so it can be used for irrigation, eliminating the need for any irrigation wells. Accordingly, there will be no impact to the environment and adjacent residential potable wells to the east of the development (Village of Pine Run) caused by a draw down or pollution of groundwater. RidgeHaven also preserves a large wetland area with upland

buffer in the middle of the subject property. Combining all of the natural areas, including wetlands /upland buffers, RidgeHaven will leave approximately 25.52 acres, or 24.67%, of the PRD property in its natural state and undisturbed. Furthermore, none of the project existing historic trees will be removed from the property.

(4) The proposed use will not substantially or permanently depreciate the value of surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare or visual impacts on the neighborhood and adjoining properties.

RidgeHaven will not decrease surrounding property values or create any nuisances for the neighboring property owners. The up-scale, new housing in RidgeHaven, with estimated price points of $300,000 to $600,000, and including 75-foot estate lots adjacent to the Village of Pine Run, should increase area property values. In addition, RidgeHaven will have attractive entry features and fountains in three lakes, including some that are visible from adjoining properties. A natural wooded buffer of at least 35 ft. will remain on the east side of the subdivision adjacent to the Village of Pine Run. Coupled with the existing canal in a 40-foot canal easement on the Village of Pine Run property adjacent to the RidgeHaven property, neighboring residents will be at least 100 to 150 feet away from new homes in RidgeHaven, which should be difficult to see due to the remaining trees and natural vegetation. The property to the north of the project is common area / wetlands that will not be built on, and roads abut the project on its south and west sides. RidgeHaven will not have a vehicular entry/exit point onto Addison Drive, which will keep additional traffic out of the neighborhoods to the south and east.

(5) There are adequate public facilities to serve the development, including, but not limited to, roads, sidewalks, bikepaths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds.

RidgeHaven will have two street access points onto Plantation Oaks Blvd., which is a major road linking to US 1 and nearby I-95. There will be no road connection to Addison Drive, which will eliminate potential traffic in the neighborhoods to the south and east. A traffic study is currently underway. Plantation Oaks Blvd. has a 6-foot sidewalk and an internal 6-foot paved bike lane that will connect into the sidewalk system in RidgeHaven. In addition, a new 6-foot sidewalk along the east side of Plantation Oaks Blvd. will be constructed from Foresthaven Rd. to U.S. 1 so that RidgeHaven will connect to the sidewalks and crosswalk at U.S. 1. Improvements will include a new ADA crosswalk at the intersection of Plantation Oaks and Atlantic Rd. The subdivision will include 5-foot sidewalks on each side of the internal roads that connect to two walking trails, one in a wooded area and the other around a large lake. Sidewalks and trails also connect to the 33,000 sq. ft. amenity area, which includes a swimming pool and cabana/restrooms, dog

park and playground and activity fields. The City of Ormond Beach Hull Road Sports Complex is just a few miles away.

The City has sufficient water and sewer capacity, as well as fire and police services, for RidgeHaven, and there is sufficient school capacity in local schools for the new families that will make RidgeHaven their home.

(6) Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe. This finding shall be based on a traffic report where available, prepared by a qualified traffic consultant, engineer or planner which details the anticipated or projected effect of the project on adjacent roads and the impact on public safety.

A traffic impact analysis is underway. Traffic patterns will be designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe.

(7) The proposed development is functional in the use of space and aesthetically acceptable.

As mentioned previously, RidgeHaven will result in a major decrease in potential residential density, preserves large natural areas and wetlands, will have beautiful, landscaped entry features and lakes with fountains, will feature a variety of home types and lot sizes with an attractive architectural theme, and will preserve many specimen trees and all historic trees on-site.

(8) The proposed development provides for the safety of occupants and visitors.

The City has sufficient police, fire and emergency services to safeguard new residents in RidgeHaven. Additionally, there will be sidewalks on both sides of the roadways, and all sidewalks, crosswalks and roads will be public and constructed to City of Ormond Beach standards.

(9) The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area.

RidgeHaven will have up-scale entry features and a common architectural theme called "Neo-Eclectic" that will complement architecture in neighboring areas.

<u>Comment 81</u>: Section 2-35 PRD Requirements – Recreation

Section 2-35(h)(3): Thirty (30) square feet of indoor recreation floor area.

RidgeHaven will have a 750 sq. ft. pool cabana with restrooms at the amenity center. We are requesting a waiver for the additional required indoor recreation area due to the large amount of active recreation and common open space within the community. The amenity area is 33,000 sq. ft. in area, not including parking areas, and includes a pool with spacious pool deck, a dog park, a playground and activity fields. This is not to mention the two walking trails in a wooded area and along a lake.

Section 2-35(h)(4): Sixty (60) square feet of outdoor active recreation space.

RidgeHaven's 33,000 sq. ft. amenity area will have a swimming pool and pool deck, dog park, playground and other open areas for sports, picnicking, and other active recreation. This amount exceeds the required 60 sq. ft. per unit, or 17,040 square feet, as well as the minimum recreational site size of 8,000 sq. ft. per Section 2-35(h)(6).

Section 2-35(h)(7) Sixty (60) square feet of common open space.

In addition to the amenity center, RidgeHaven will have more than the required 17,040 sq. ft. of common open space. The wooded common area with walking trail at the southwest corner of RidgeHaven is 50,921 sq. ft., while the walking trail at the northeast corner along the lake and natural buffer is 8,500 sq. ft., totaling 59,431 sq. ft. of common open space.

<u>Comment 86</u>: Low Impact Development – At the Volusia County Council meeting there was a commitment to seek to use Low Impact Development techniques. Please describe, either on a plan sheet or in a separate letter what aspects of Low Impact Development have been used. Please be sure to include the reduction in density at the land use stage of development.

RidgeHaven has numerous Low Impact Development techniques incorporated into its design. Low Impact Development (LID) can be defined as:

> Stormwater management and the comprehensive approach to land development required to mimic the inherent nature of a site's hydrology and the interface of the subject property with the lands, waters, and natural systems downstream from the property.

To begin with, density has been lowered significantly from what was entitled before the proposed PRD. The County zoning entitled the construction of at least 866 residential units, or 8.37 units per acre, across the PRD property. We are proposing only 284 units, or 2.74 units per acre, within the PRD. That is a decrease of at least 582 units, meaning less impervious surfaces and less runoff.

Another major LID technique is the use of stormwater for irrigation. All of the irrigation of residential lots and common areas will utilize excess stormwater taken from the stormwater ponds. This gives the stormwater a chance to percolate back into the groundwater supply and

allows the lawns and other plants to suck up nutrients and pollutants in the water. Use of stormwater for irrigation means that no irrigation wells will be required in RidgeHaven, which further preserves the supply groundwater. The site also features some grassed treatment swales to permit additional percolation and removal of nutrients. Overall, the stormwater management system will permit retention of more stormwater on-site than is currently retained by the natural landscape.

Because RidgeHaven will connect to the City's potable water and sanitary sewer system, there will be no potable water wells or septic tanks in the PRD property. This will prevent the surficial aquifer from being drawn down by wells and/or polluted by septic tank discharges.

The preservation of a large area of wetlands and upland buffer in the central part of the property is another LID technique. Rainwater falling in these areas is able to naturally percolate into the ground, as opposed to being collected and redirected. The same is true for precipitation on the natural vegetation / tree preservation areas of the property. When combining the natural open space, tree preservation and wetland/upland buffer acreage, approximately 25.52 acres, or 24.67% of the PRD property, will be left as natural vegetation.

Due to all of the onsite preservation areas, and water from the impervious surfaces being recycled for irrigation, stormwater will have a better chance to percolate into the ground. In addition, at least 298 new trees along streets and 1,254 new trees on lots will soak up more water. Leaving all historic trees in place, encouraging Florida-friendly and native landscaping, and planting on pond banks are other techniques that are beneficial to groundwater supply and reduction of stormwater runoff.

Please let me know if you have any questions or concerns about any of the above responses to comments or specific features of the RidgeHaven PRD.

Kindest regards,

Corey D. Brown

RidgeHaven - samples of what potential homes could look like

Duplex

50' single family lots

75' single family lots

RIDGEHAVEN ARCHITECTURAL SPECIFICATIONS

ALL HOMES WILL HAVE COMMON "ARCHITECTURAL" SERIES ROOF SHINGLE COLOR, STYLE AND MANUFACTURE, ROOF PITCH SHALL BE a 3" ON 12" MINIMUM.

ALL PAINT COLORS WILL BE SUBMITTED TO THE HOA ARCHITECTURAL BOARD FOR REVIEW. EACH EXTERIOR PAINT SCHEME SHALL CONSIST OF AT LEAST THREE DIFFERENT PAINT COLORS FOR THE HOMES' BODY, HARDIBOARD, TRIM, AND FRONT DOOR

COMMON WHITE FASCIA AND ALUMINUM SOFFIT.

SOME OF THE SINGLE FAMILY DETACHED HOMES SHALL HAVE A FRONT PORCH

NO FULL "STUCCO ONLY" FRONT ELEVATION DESIGNS WILL BE ACCEPTED NOR ANY REPETITION OF THE SAME ELEVATION FOR THE SINGLE-FAMILY DETACHED HOMES MORE OFTEN THEN EVERY 3 HOUSES

ALL WINDOWS TO BE WHITE FRAME. FRONT ELEVATON WINDOWS AND DOORS SHALL HAVE CONTRASTING RAISED DIMENSIONAL BANDING AND DIMENSIONAL WINDOWSILLS.

RAISED DIMENSIONAL BANDING AND DIMENSIONAL WINDOWSILLS.

ALL HOMES WILL HAVE A 2-CAR GARAGE DOOR.

MINIMUM LIVING AREA 1,300 SQ FT.

ROOF OVERHANGS WILL BE MINIMUM OF 12 INCHES.

MAXIMUM BUILDING HEIGHT IS 35 FEET.

EACH SINGLE-FAMILY HOME SHALL HAVE A BRICKPAVED DRIVEWAY AND LEADWALK

EACH HOME SHALL BE LANDSCAPED CONSISTENT WITH THE LANDSCAPE DESIGN STANDARD PER THE LDC.

the same are of a type approved by the Association; and (ii) the Owner has obtained the prior written consent of the ARC for the installation thereof.

(x) **Fences/Walls**. No wall or fence may be erected on a Lot without the prior written consent of the ARC, which consent may be determined on a case-by-case basis. No chain link fencing of any kind shall be allowed. Fences are not permitted on duplex Lots. In no event may a fence be placed in the area between the front of a Dwelling and the street at the front of the Lot on which the Dwelling is situated. Fences shall not be installed flush to the ground so that drainage will be blocked in any way. In the event a fence is installed within a drainage easement area, with prior written ARC approval, the Owner is solely responsible for fence repair or replacement if the drainage easement area needs to be accessed for repairs or as otherwise provided herein. All fences shall be black painted aluminum not exceeding six (6) feet in height. Owners shall be responsible for maintaining all fences in a good state of repair pursuant to Section 9.06, below.

(y) **Lighting.** No exterior lighting fixtures for flood lights and/or spot lights shall be installed on any Dwelling or Lot without adequate and proper shielding of fixtures and without prior written approval of the ARC.

(z) **Swimming Pools.** Any swimming pool, screening, or fencing related thereto to be constructed on any Lot shall be subject to the approval and requirements of the ARC. Above-ground swimming pools shall not be permitted.

9.05 **Other Restrictions Established by the Association.** The Association shall have the right and authority, as hereinabove expressed, from time to time to include within its promulgated residential planning criteria other restrictions as it shall deem appropriate. Said restrictions shall be governed in accordance with the criteria hereinabove set forth for residential planning criteria promulgated by the Association. However, once the Association promulgates certain restrictions, same shall become as binding and shall be given the same force and effect as the restrictions set forth herein until the Association modifies, changes, or promulgates new restrictions set forth by the Association.

9.06 **Property Maintenance.** Each Owner shall maintain such Owner's Lot, including the vegetation, landscaping, and all improvements thereon in good repair and in a neat and attractive condition.

(a) The minimum, but not exclusive, standard for maintenance of improvements shall be consistent with the approved plans and specifications for those improvements and with the general appearance of the other Lots in the Property as a whole. The maintenance obligation of each Owner as to building improvements shall include, without limitation, maintenance of all exterior surfaces and roofs, facias and soffits, awnings, trellises, fences, decorative facades, screens, windows, and doors. Owners shall clean, repaint or restain, as appropriate, the exterior portions of the building improvements (with the same colors as initially approved or with other colors upon ARC approval), including exterior surfaces of garage doors, as often as is necessary to comply with the foregoing standards.

(b) Each Owner shall also keep, maintain, and irrigate the trees, shrubbery, grass, and other landscape and vegetative material on such Owner's Lot in good repair and in a neat and attractive condition. Care must be exercised in the landscaping and in

PRELIMINARY PLAT & CONSTRUCTION PLANS

ORMOND BEACH, FLORIDA

GENERAL NOTES

1.) ALL WATER MAINS TO BE P.V.C. DR-18, C-900.

2.) ALL SANITARY SEWER MAINS SHOWN ARE PVC SDR 26 @ 0.40% FOR 8". 0.30% FOR 10" UNLESS OTHERWISE NOTED. SANITARY SERVICES ARE 4" SDR 26 @ MINIMUM 2.0% RESIDENTIAL CONNECTION. SANITARY FORCE MAIN TO BE PVC, DR-18, C-900.

3.) CABLE T.V., TELEPHONE AND ELECTRIC SERVICES TO BE UNDERGROUND.

4.) CONTRACTOR TO VERIFY EXISTING UTILITIES PRIOR TO CONSTRUCTION AND TO REPORT ANY DISCREPANCIES TO DESIGN ENGINEER.

5.) WATER AND SEWER IMPROVEMENTS TO MEET CITY OF ORMOND BEACH STANDARDS.

6.) DOWNLIGHTS (STREET LIGHTS) TO BE FP&L STANDARD & CONTEMPORARY LIGHTS TO BE FP&L STANDARD LED, (CONTEMPORARY LIGHT) AND BLACK FIBERGLASS POLES, STREET LIGHTS AND POLES TO BE PROVIDED BY FPL.

7.) ELEVATIONS REFER TO MEAN SEA LEVEL NAVD 1988 DATUM.

8.) MINIMUM FINISH FLOOR GRADE PER CITY OF ORMOND BEACH REQUIREMENTS.

9.) SHOP DRAWINGS FOR POTABLE WATER AND SEWER TO BE SUBMITTED TO AND APPROVED BY CITY OF ORMOND BEACH AND DESIGN ENGINEER PRIOR TO CONSTRUCTION.

10.) POTABLE WATER SERVICE TO BE SUPPLIED BY CITY OF ORMOND BEACH.

11.) SANITARY SEWER SERVICE TO BE PROVIDED BY CITY OF ORMOND BEACH.

12.) ALL DISTURBED AREAS TO BE SEEDED AND MULCHED.

13.) WHERE SANITARY FORCE MAINS CROSS POTABLE WATER LINES, THE FORCE MAIN IS TO BE CONSTRUCTED OF PVC SDR-18 FOR 20 FEET CENTERED ON THE POTABLE WATER MAIN.

14.) OFFSITE UTILITIES WILL BE CONSTRUCTED UNDER THE APPROPRIATE PHASE AND MUST BE COMPLETE PRIOR TO ISSUANCE OF CERTIFICATE OF OCCUPANCY. PROJECT TO BE BUILT IN ONE PHASE.

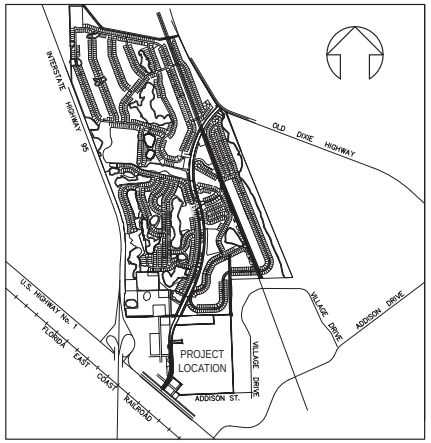
15.) PRIOR TO CERTIFICATE OF OCCUPANCY ALL OFFSITE EASEMENTS (IF REQUIRED) NEED TO BE RECORDED AND REFERENCED BY PLAT OR O.R. BOOK AND PAGE AND RECORDED UNDER SEPARATE INSTRUMENT.

16.) ONSITE SEWER AND POTABLE WATER INFRASTRUCTURE TO BE OWNED AND MAINTAINED BY THE CITY OF ORMOND BEACH. OFFSITE SYSTEM WILL BE OWNED AND MAINTAINED BY THE CITY OF ORMOND BEACH (UNLESS OTHERWISE NOTED).

17.) ALL STOP SIGNS, SPEED LIMIT AND STREET SIGNS REQUIRED TO BE PROVIDED BY DEVELOPER TO CITY OF ORMOND BEACH SPECIFICATIONS. ALL TRAFFIC CONTROL SIGNS SHALL BE FABRICATED IN ACCORDANCE WITH THE MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES USING 3M BRAND "SCOTCHLITE" SHEETING (ENGINEER GRADE) ON MINIMUM 0.080 GAUGE 5052-H38 ALUMINUM BLANKS. ALL STOP SIGNS SHALL BE HIGH INTENSITY 30" OR 36" OCTAGON INSTALLED ON 3"x 12' ROUND ALUMINUM POSTS. "U" CHANNEL POSTS MAY BE USED FOR ALL SIGNS SMALLER THAN 36" x 48". ALL WARNING SIGNS SHALL BE 30" X 30". ALL STREET NAME SIGNS SHALL BE 9" IN HEIGHT WITH 5" HIGH UPPER & LOWER CASE WHITE LETTERS ON A GREEN BACKGROUND WITH A MIN. 30" LENGTH. PROVIDE 24" WIDE WHITE THERMOPLASTIC STOP BARS ADJACENT TO ALL LOCAL STREET 30" STOP SIGNS. WHERE 12" WIDE WHITE CROSSWALK STRIPING IS PROVIDED, THE STOP BAR AND 30" STOP SIGN MUST BE 4' IN ADVANCE OF THE CROSSWALK IN ACCORDANCE WITH FDOT STANDARD INDEX #17346. IN ALL LOCATIONS, THE 30" STOP SIGN AND 24" WIDE WHITE STOP BARS SHOULD BE LOCATED 10' IN ADVANCE OF THE EDGE OF THE TRAVELED WAY AT THE STREET INTERSECTION. SEE DETAIL SHEETS FOR PROPOSED ORNAMENTAL POLES.

18.) ALL MAINTENANCE OF ALL COMMON AREAS, LAKES, AMENITY AREAS, LANDSCAPE AND IRRIGATION TO BE THE SOLE RESPONSIBILITY OF RidgeHaven H.O.A. INC.

19.) OUTDOOR CONSTRUCTION ACTIVITY SHALL ONLY OCCUR FROM 7 AM TO 7 PM MONDAY THROUGH SATURDAY.



20.) EXCEPT WITHIN THE EXISTING FPL EASEMENT, ALL UTILITIES ARE TO BE INSTALLED UNDERGROUND, INCLUDING THE SERVICE DROPS TO INDIVIDUAL BUILDINGS OUTSIDE OF ALL REQUIRED LANDSCAPE BUFFERS, WETLANDS AND WETLAND BUFFER AREAS.

21.) DRIVING AND/OR STAGING OF CONSTRUCTION VEHICLES IS NOT PERMITTED ON ANY SIDEWALKS IN THE RIGHT-OF-WAY. ANY DAMAGE TO SIDEWALKS WILL BE REPAIRED AND/OR REPLACED IN THE LIKE KIND BY THE CONTRACTOR.

Scale: 1" = 100'
Job No: 21-70

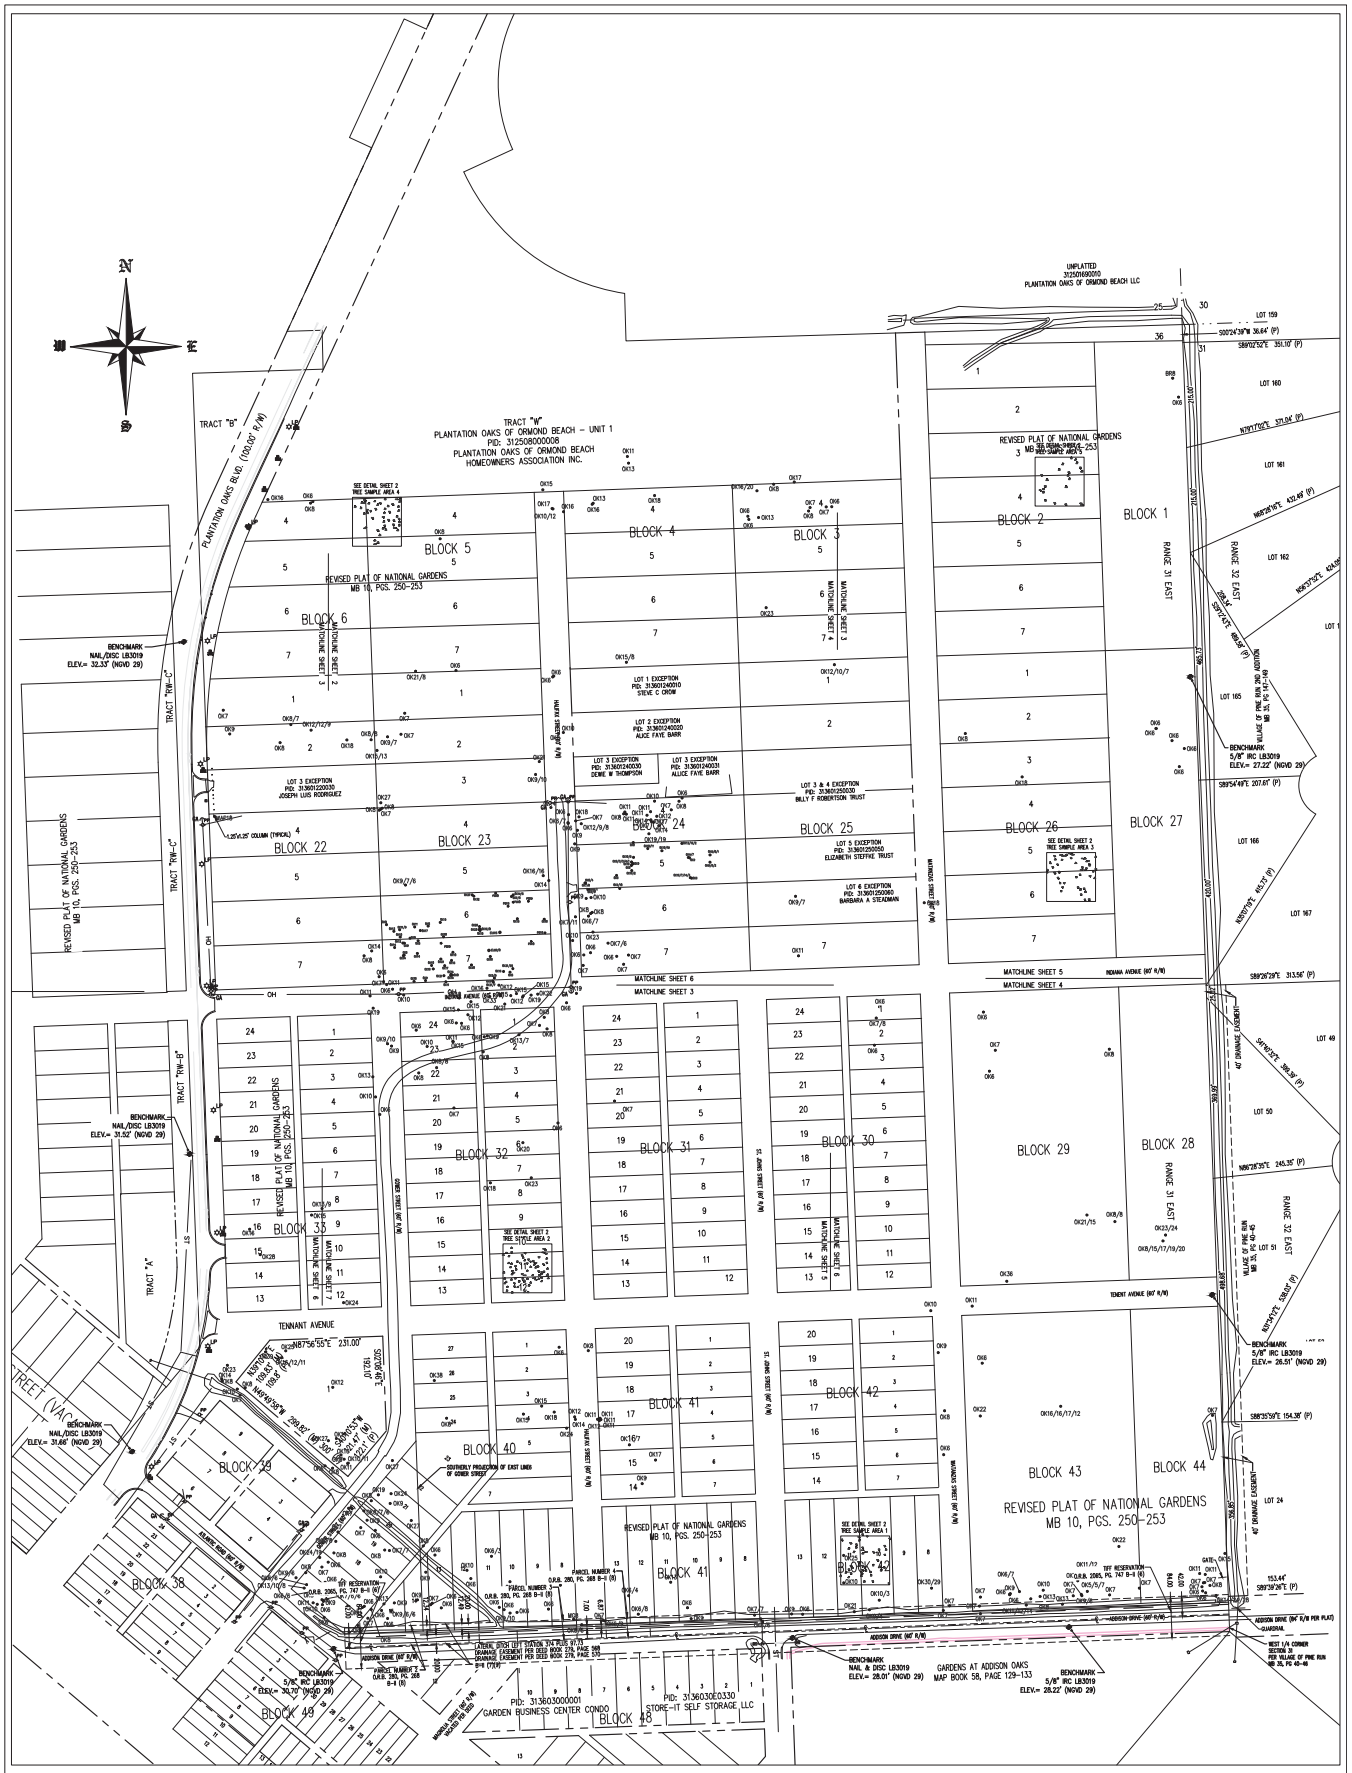
RIDGEHAVEN DESCRIPTION:
ALL OF BLOCKS 1, 2, 23, 26, 27, 28, 29, 30, 31, 32, 33, 40, 41, 42, 43 AND 44, AND THOSE PORTIONS OF BLOCKS 3, 4, 5, 6, 22, 24, 25 AND 39 AND THE PUBLIC AND VACATED ROADS AND ALLEYS, REVISED PLAT OF NATIONAL GARDENS, AS RECORDED IN MAP OR PLAT BOOK 10, PAGES 250 THROUGH 253, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA, IN SECTION 36, TOWNSHIP 13 SOUTH, RANGE 31 EAST, VOLUSIA COUNTY, FLORIDA, LYING WITHIN THE FOLLOWING DESCRIBED BOUNDARY:

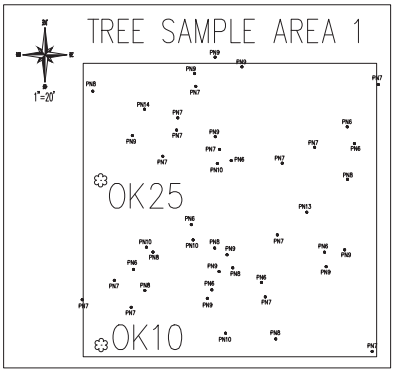
BEGIN AT THE NORTHEAST CORNER OF SAID REVISED PLAT OF NATIONAL GARDENS, BEING ALSO THE NORTHEAST CORNER OF SECTION 36, TOWNSHIP 13 SOUTH, RANGE 31 EAST; THENCE RUN S02°04'17"E ALONG THE EASTERLY LINE OF SAID REVISED PLAT OF NATIONAL GARDENS AND THE EAST LINE OF SAID SECTION 36, A DISTANCE OF 2615.20 FEET TO THE NORTHERLY RIGHT OF WAY LINE OF ADDISON DRIVE; 60.00 FOOT WIDE RIGHT OF WAY PER SAID REVISED PLAT OF NATIONAL GARDENS; THENCE S87°52'25"W ALONG SAID NORTHERLY RIGHT OF WAY LINE, 1804.88 FEET TO THE NORTHERLY RIGHT OF WAY LINE OF ATLANTIC ROAD, A 60.00 FOOT WIDE RIGHT OF WAY PER SAID REVISED PLAT OF NATIONAL GARDENS; THENCE N49°49'07"W ALONG SAID NORTHERLY RIGHT OF WAY LINE, 149.89 FEET TO THE EASTERLY RIGHT OF WAY LINE OF GOWER STREET, 60.00 FOOT WIDE RIGHT OF WAY PER SAID REVISED PLAT OF NATIONAL GARDENS; THENCE N40°10'53"E ALONG SAID EASTERLY RIGHT OF WAY, 256.33 FEET TO THE EASTERLY EXTENSION OF THE SOUTHWESTERLY LINE OF LOT 1, BLOCK 39, SAID REVISED PLAT OF NATIONAL GARDENS; THENCE N50°41'00"W ALONG SAID EASTERLY EXTENSION AND ALONG THE SOUTHWESTERLY LINE OF SAID LOT 1, A DISTANCE OF 426.05 FEET TO THE BEGINNING OF A NON-TANGENT CURVE AND A POINT ON THE EASTERLY RIGHT OF WAY LINE OF PLANTATION OAKS BOULEVARD, FORMERLY BROADWAY, 100.00 FOOT WIDE RIGHT OF WAY PER SAID REVISED PLAT OF NATIONAL GARDENS; SAID NON TANGENT CURVE BEING CONCAVE NORTHWESTERLY, HAVING A RADIUS OF 763.96 FEET, A CENTRAL ANGLE OF 18° 21'39" AND A CHORD BEARING OF N07°02'04"E; THENCE NORTHERLY ALONG SAID EASTERLY RIGHT OF WAY LINE AND THE ARC OF SAID CURVE, 244.82 FEET TO THE POINT OF TANGENCY; THENCE N02°08'46"W ALONG SAID EASTERLY RIGHT OF WAY LINE, 874.48 FEET TO THE MONUMENTED SOUTHERLY LINE OF LOT 3, BLOCK 22, SAID REVISED PLAT OF NATIONAL GARDENS; THENCE N87°48'07"E ALONG SAID SOUTHERLY LINE, 345.12 FEET TO THE MONUMENTED SOUTHEAST CORNER OF SAID LOT 3; THENCE N02°07'59"W ALONG THE EASTERLY LINE OF SAID LOT 3, A DISTANCE OF 90.47 FEET TO THE MONUMENTED NORTHEAST CORNER OF SAID LOT 3; THENCE S87°51'51"W ALONG THE MONUMENTED NORTHERLY LINE OF SAID LOT 3, A DISTANCE OF 345.14 FEET TO THE EASTERLY RIGHT OF WAY LINE OF SAID PLANTATION OAKS BOULEVARD; THENCE N02°08'46"W ALONG SAID EASTERLY RIGHT OF WAY LINE, 20.19 FEET TO A BEING THE BEGINNING OF A TANGENT CURVE, CONCAVE EASTERLY, HAVING A RADIUS OF 1096.00 FEET, A CENTRAL ANGLE OF 26°52'48" AND A CHORD BEARING N11°17'38"E; THENCE NORTHERLY ALONG SAID EASTERLY RIGHT OF WAY LINE AND ALONG THE ARC OF SAID CURVE, 514.18 FEET TO THE POINT OF TANGENCY ; THENCE N24°44'02"E ALONG SAID EASTERLY RIGHT OF WAY LINE, 31.37 FEET TO THE SOUTHERLY LINE OF TRACT "W", SAID PLANTATION OAKS OF ORMOND BEACH – UNIT 1, RECORDED ON MAP BOOK 59, PAGES 138–154; THENCE N87°55'16"E ALONG SAID SOUTHERLY LINE, 1308.48 FEET TO THE EASTERLY LINE OF SAID TRACT "W" AS NOW MONUMENTED; THENCE N02°05'34"W ALONG SAID MONUMENTED EASTERLY LINE, 298.88 FEET TO THE NORTHERLY LINE OF SAID REVISED PLAT OF NATIONAL GARDENS AND THE NORTH LINE OF SAID SECTION 36; THENCE N88°20'29"E ALONG SAID NORTHERLY LINE, 585.53 FEET TO THE POINT OF BEGINNING.

LESS AND EXCEPT LOTS 1, 2 AND 3, BLOCK 24 AND LOTS 3, 4, 5 AND 6, BLOCK 25, SAID REVISED PLAT OF NATIONAL GARDENS, MORE PARTICULARLY DESCRIBED AS THE FOLLOWING:
BEGIN AT THE NORTHWEST CORNER OF SAID LOT 1, BLOCK 24; THENCE RUN N88°21'33"E, 345.20 FEET TO THE NORTHEAST CORNER OF SAID LOT 1; THENCE S02°06'23"E, 180.76 FEET TO THE SOUTHEAST CORNER OF SAID LOT 2, BLOCK 24, BEING THE NORTHWEST CORNER OF SAID LOT 3, BLOCK 25; THENCE N88°19'26"E, 345.16 FEET TO THE NORTHEAST CORNER OF SAID LOT 3; THENCE S02°05'34"E, 361.11 FEET TO THE SOUTHEAST CORNER OF SAID LOT 6, BLOCK 25; THENCE S88°15'13"W, 345.07 FEET TO THE SOUTHWEST CORNER OF SAID LOT 6; THENCE N02°06'23"W, 271.15 FEET TO THE NORTHWEST CORNER OF SAID LOT 4, BLOCK 25, BEING THE SOUTHEAST CORNER OF SAID LOT 3, BLOCK 24; THENCE S88°18'23"W, 345.14 FEET TO THE SOUTHWEST CORNER OF SAID LOT 3; THENCE N02°07'12"W, 271.46 FEET TO THE POINT OF BEGINNING.

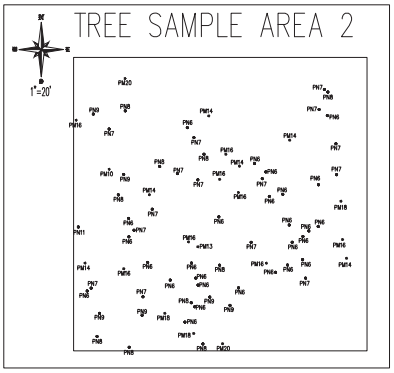


THE NET AREA OF THE ABOVE DESCRIBED BEING 103.450 ACRES, MORE OR LESS.

SURVEYORS NOTES



1. NOTICE: THIS SURVEY WAS PREPARED WITH BENEFIT OF A COMMITMENT FOR TITLE INSURANCE ISSUED BY OLD REPUBLIC NATIONAL TITLE INSURANCE COMPANY, COMMITMENT #1016422; ISSUING OFFICE #3714601, FILE #2832–17 DATED FEBRUARY 10, 2021 AT 11:00 PM..
2. DIMENSIONS ARE SHOWN IN FEET AND DECIMALS THEREOF.
3. BEARING STRUCTURE BASED ON NAD 83, FLORIDA STATE PLANE, EAST ZONE, U.S. SURVEY FOOT, WITH THE BEARING ON THE EAST LINE OF SECTION 36 BEING S02°04'48E.
4. UNDERGROUND FOUNDATIONS, IF ANY, NOT LOCATED.
5. ELEVATIONS REFER TO N.A.V.D. OF 1988, PER NGS MONUMENT DESIGNATION X–226 HAVING A PUBLISHED ELEVATION OF 29.48' NAVD 88. (NGVD 30.573 FEET)
6. THIS PROPERTY IS LOCATED IN FLOOD INSURANCE RATE MAP (F.I.R.M.) ZONE "X". THIS LOCATION IS DETERMINED BY SCALING FROM F.I.R.M. MAP NO. 12127C0203K. MAP EFFECTIVE DATE: SEPTEMBER 29, 2017. APPROXIMATE SCALE: 1"=500'.
7. "NOT VALID WITHOUT THE SIGNATURE AND THE ORIGINAL RAISED SEAL OR ELECTRONIC SIGNATURE OF A FLORIDA LICENSED SURVEYOR AND MAPPER."
8. UNLESS OTHERWISE SHOWN, RECORD DISTANCES AND DIRECTIONS AND FIELD MEASURED DISTANCES AND DIRECTIONS ARE THE SAME.
9. THE PORTION OF PENNSYLVANIA AVENUE SHOWN HEREON AS VACATED (PER ORB 5498, PAGE 1745)(VOLUSIA COUNTY RESOLUTION 2005–15) HAS BEEN INCLUDED IN THIS BOUNDARY SURVEY ALTHOUGH IT WAS NOT INCLUDED IN THE DESCRIPTION PROVIDED BY THE TITLE COMPANY IN THE COMMITMENT SHOWN IN NOTE #1 ABOVE.
10. THE VERTICAL RELIEF SHOWN HEREON IS BASED ON A GROUND SURVEY PERFORMED BY SLIGER & ASSOCIATES, INC.



TOTAL GROSS LAND AREA:
3,092,627 SQUARE FEET OR
70.997 ACRES, MORE OR LESS

DRAFT

Planning Board minutes from April 13, 2023

ITEM:

DO-2022-061(B)

RidgeHaven subdivision

Issuance of a Development Order

V. APPROVAL OF MINUTES

March 09, 2023

Mr. Scudiero moved to approve the March 09, 2023 Minutes. Mr. Railsback seconded the motion. Vote was called, and the motion was approved (6-0).

VI. PLANNING DIRECTOR'S REPORT

No report.

VII. PUBLIC HEARINGS

A. ZMA 2022-061(A), RidgeHaven subdivision, Zoning Map Amendment

Mr. Spraker explained that all three RidgeHaven agenda items will be shared together and suggested that the Board vote on one at a time.

Mr. Spraker, Planning Director, reviewed the first request from RidgeHaven, LLC., with authorization of the property owner, Snilloc Family Limited Partnership Number One, for a zoning map amendment from Volusia County R-4, Urban Single-Family Residential and Ormond Beach B-8, Commercial to Ormond Beach PRD, Planned Residential Development, for 103.45 acres. Mr. Spraker continued that the proposed RidgeHaven subdivision is located south of Plantation Oaks Boulevard, east of Addison Drive, north of the Village of Pine Run subdivision, and west of the Plantation Oaks subdivision and included the following Volusia County parcel numbers: 3136-01-01-0011, 3136-01-01-0012, 3136-01-33-0110, 3136-01-25-0010, 3136-01-24-0060, 3136-01-33-0080, 3136-01-01-0020, 3136-01-23-0060, and 3136-01-24-0050.

Mr. Spraker stated that this property went through a Land Use Amendment where the majority of the property was in unincorporated Volusia County. There was a minimum of four residential units per acre (337 units) and allowed up to eight residential units per acre (674 units). He added that there were already 19.19 acres that were already in the city that allowed eight residential units per acre. The total residential units for the project was 827 units under previous land uses. Mr. Spraker continued that as the project moved on it had to be decided on whether to develop in unincorporated Volusia County and get utilities from the City of Ormond Beach or annex into the City of Ormond Beach for the entire subdivision process. It was decided to go through the City of Ormond Beach for the process and as part of the Land Use Amendment and the residential units were decreased to 298 residential units. Mr. Spraker noted that the existing land use today is "Low Density Residential" and "Medium Density Residential" is along Addison Drive. He explained that there are outparcels in which the RidgeHaven subdivision owners do not own, therefore they are not part of the zoning map amendment. They have designated zoning through the Interlocal Service Boundary Agreement (ISBA) process. Mr. Spraker stated that the zoning map does not approve any site plans, as it is the framework to allow the process for a development order.

Mr. Spraker concluded that the Site Plan Review Committee (SPRC) is recommending approval of the zoning map amendment and reviewed the tentative

DRAFT

City Commission meeting dates May 16, 2023 for first reading and June 6, 2023 for second reading.

B. <u>DO 2022-061(B), RidgeHaven subdivision, Issuance of a Development Order</u>

Mr. Spraker, Planning Director, continued with an explanation of the next RidgeHaven request, the issuance of a development order for 286 residential lots on 103.45 acres and associated site improvements. He expounded on the development order and how it is a zoning document, and expressed how unique RidgeHaven is as they have done both the zoning document and the preliminary plat together as well as provided detailed construction drawings. Mr. Spraker commented how the project started with the Site Plan Review Committee (SPRC), they had a neighborhood meeting in July 2022, it is now before the Planning Board, an advisory board appointed by the City Commission and then will go before the City Commission May 16, 2023 and June 6, 2023. He reviewed past applications that the project has gone through from the ISBA amendment, land use map amendment, and annexation.

Mr. Spraker stated that the gross density is 2.76 units per acre for the proposed subdivision. Taking out the wetlands, the net density is 2.95 units per acre. He added that the applicants have done an innovative design that has mixed housing types with duplex units along Addison Drive, consistent with the Gardens of Bella Vita, and they have done 136 interior lots of 50' wide, and 66 larger lots at 75' wide, along the Village of Pine Run. Mr. Spraker showed where the outparcels are and reiterated that they are not part of the overall plan. Outparcels will have platted access to their property. Mr. Spraker stated that the access points are along Plantation Oaks Boulevard. There is no access on Addison Drive. Mr. Spraker added that the project has provided school concurrency, a traffic analysis was provided, and a proportionate fair share agreement is required. He continued that stormwater was analyzed and the project will have less stormwater rate and volume post-development than in pre-development conditions. A St. Johns permit was issued for both the wetlands and the stormwater. The stormwater will be used for irrigation of the subdivision. A master irrigation will be done out of the stormwater with no individual wells. Mr. Spraker added that there is a ditch partially located along the interface of the Village of Pine Run that will be placed in the easement. It is 10' on the RidgeHaven property and then goes off onto the Village of Pine Run property.

Mr. Spraker continued that the three historic trees onsite are being preserved. The Village of Pine Run property interface has a 35' natural landscape buffer, and the LDC requires a 6' landscape buffer. The project design also exceeded the buffer requirements along Plantation Oaks Boulevard, Addison Drive and on the third phase of Plantation Oaks. Mr. Spraker stated that the project has proposed 24.67 percent of the site as natural preservation. The LDC requires only 15 percent under straight zoning and 20 percent under the Planned Development. He added that there are approximately 8 acres of wetlands of which they are impacting 1.75 acres. Sidewalks are being put in on both sides internally and also connecting to U.S. Highway 1. Mr. Spraker stated that the project has recreational improvements including a 33,000 square foot outdoor amenity area including a pool and pool deck, a dog park, playground and activity field. Walking trails are also part of the recreational improvements.

Mr. Spraker went over the development order waivers. One of them is for outdoor recreation in lieu of indoor recreation, which he explained is allowed in a Planned

Residential Development. A wet detention of the depth for the pond, to maintain the fill onsite for the stormwater irrigation. A 40' buffer building setback is also required. Mr. Spraker reviewed the development order benefits from the reduction in density, the innovative site design, natural preservation, landscape buffers, and additional recreation of amenities.

Mr. Spraker reviewed the two notices of concern; one from Mr. Lehman, 1135 Benton Street, who is not in support of the application; and a neighbor to the property, Mr. Rodriguez, who is interested in screening from the project.

Mr. Spraker concluded that the SPRC is recommending approval of this application. It is planned that the item will go before the City Commission for first reading on May 16, 2023 and second reading on June 6, 2023.

C. PP 2022-061(C), RidgeHaven subdivision, Preliminary Plat

Mr. Spraker, Planning Director, continued with the RidgeHaven request for a preliminary plat for 286 residential lots on 103.45 acres and associated site improvements. He explained that a preliminary plat is a document that subdivides land. The SPRC recommends approval of the preliminary plat.

Applicant's presentation

Mr. Glenn Storch, P.A., Storch Law Firm, 420 S. Nova Road, Daytona Beach, Representative, reviewed the history of other applications this project went through. The annexation of the project now allows reduction in permitted density, clustering, preservation of wetlands, municipal utilities and creative design. Mr. Storch explained that the applicant for the project stipulated for the Comprehensive Plan Amendment that was approved by the City and DEO. The limited number of units was limited to 298 for the entire parcel, no more than 3 units per acre. The PRD reduces the number now to 286 units. This reduced the density by 754 units and from 8 units per acre. Mr. Storch explained the diversity of the residential community further by detailing the plan for 84 duplex lots, 135 single-family 50' wide lots, and 66 single-family 75' wide estate lots.

Mr. Storch reviewed the environmental quality of life goal for the project stating that they will preserve a large wetland and upland buffer area in the center of the community, natural vegetation and tree preservation area, and explained how they are exceeding the required tree preservation. He added that most of the lots will have connections to natural vegetation in the community. Twenty-five percent of the land will remain untouched. Mr. Storch reiterated the inclusion of over 50,000 square feet of outdoor recreation area, in which the 33,000 square feet that was aforementioned is included..

Mr. Storch reviewed the effective water management part of the project with the minimization of water use. He covered that the irrigation will be from the use of the stormwater retention ponds, explained the aquifer recharge, and no groundwater wells or septic tanks, as the project will utilize the City of Ormond Beach potable water and sanitary sewer services. Mr. Storch stated that there will be no impact to the adjacent residential potable wells (Village of Pine Run) caused by a draw down or septic pollution of groundwater. He noted that the project is not within the 100-

year floodplain. In regards to protecting the adjoining neighbors, Mr. Storch mentioned that to the east of the project there will be a natural wooded buffer of at least 35', adjacent to the Village of Pine Run, and coupled with the existing canal, neighboring residents will be at least 100' to 150' away from new homes in RidgeHaven. He continued that to the south on Addison Drive, there is no access and only a vegetated buffer. To the north, there is a common area and wetlands and to the west is Plantation Oaks Boulevard. The entrances direct traffic towards the U.S. Highway 1 signal and away from existing residential.

Mr. Storch touched on some of the design of the community and displayed a landscaped entry sign and added that there will be ornamental streetlights and sign poles to provide an up-scale aesthetic. 298 street trees will be planted throughout the development along the streets, and in addition every lot will have trees planted, totaling 1,552 new trees in addition to the preserved trees. Mr. Storch added that the Homeowners' Association (HOA) will maintain and manage the natural areas and remove invasive species, and also added that there will be retention of more stormwater onsite than existing conditions – *more retention than required*. There will be less stormwater going off the site than what is on there presently.

Ms. Shull opened it up to the Board.

Board Questions

Mr. Railsback asked if the outparcels are vacant and if there are any improvements on them. Mr. Storch replied that there is a house on one of them and their access will be maintained and will provide them an easement. He added that they will have a paved road for the project portion and suggests that in the future it would be beneficial to them to annex into city water and sewer.

Mr. du Moulin expressed concern with guarantee of the HOA's responsibility with governing the irrigation system for the retention ponds. He referenced his experience with being part of an HOA and how they are mostly run by the members of the community. Mr. Storch replied that St. John's River Water Management District (SJRWMD) manages the permitting of the ponds and sets requirements through their permitting process. He commented that HOAs typically contract a company to maintain the ponds. He added that the ponds will be nice with fountains in them, which requires less maintenance. It was said that if the ponds are not maintained, the City, SJRWMD and homeowners have rights to take action. Mr. Storch stated that the invasive species are analyzed annually and taken care of. The HOA document is being drafted to address the matters and inform the home purchasers.

Mr. Railsback concurred with the comments and suggested that the responsibilities be clear in the covenants.

Mr. Jorczak questioned what the lot sizes are on the adjacent developments of Village of Pine Run and Plantation Oaks. Mr. Storch replied that Plantation Oaks are 50' by 100' which is consistent with what is being built. It was mentioned that there are smaller parcels and multi-family townhouses off of Addison Drive. There are also townhouses to the west of the development. Mr. Storch added that Village of Pine Run are approximately one acre and they have septic tanks and wells.

Mr. Scudiero inquired about the recreation areas planned for the development and why there is not more of a focus on indoor recreation area, like that of the outdoor recreation. Mr. Storch answered that the size of any recreation area is bases off of the number of units, therefore the indoor recreation area would have to be vast. He concluded that there would be no need for a fitness center with the amount of outdoor area, the pool and walking trails.

Mr. Scudiero asked if the natural areas on the map presented showed area that has been clear-cut. It was confirmed by Mr. Storch that the project was not clear-cutting due to clustering.

Mr. Jorczak inquired about the target-market price range of the homes. Mr. Storch replied that there will be a diverse market of approximately $300,000 for a duplex, and $400,000, $500,000, $600,000, and up to $700, 000 for the homes.

Ms. Shull asked if the property was out of flood zone X. Mr. Storch confirmed it is. Ms. Shull inquired about the rental restrictions for short-term rentals for the HOA. Mr. Storch will work on creating rental restrictions that reflect not allowing short-term rentals in the covenants and restrictions. There was discussion about rental communities and how it is not the goal for this project to be one.

Mr. du Moulin inquired about the stormwater. Mr. Storch stated that there will be less stormwater post-development and explained how the project will maintain more stormwater on the site than presently goes off of the property.

Mr. Storch addressed the earlier inquiry regarding a property on the cul-de-sac with a lighting concern, and requested a vinyl fence or hedge be installed and stated that the request will be adhered to.

Audience Comments

Mr. Luis Rodriguez, 1155 Plantation Oaks Boulevard, commented in regards to him being the individual who requested the fence. He stated that he prefers both the vinyl fence and vegetation (hedges). He stated that he worked at Sea Ray Boats and referenced a similar situation take place there where a parking lot was cleared out and at 5:00 a.m., the headlights came in. Mr. Rodriguez expressed concern with the pesticides being close to his home and family. He noted that he has a well. He requested that it not be possible for "drifters" and RVs to park close to him. He asked if the lot at the upside of the cul-de-sac can be eliminated, allowing the cul-de-sac to move back further for more safety and privacy. Mr. Luis explained that he hopes the water does not go his way in the event of a storm and hopes it is worked out in the .elevation planning. He concluded that he hopes that no one else can live on the cul-de-sac.

Mr. Charles Genter, 58 Indianhead Drive, Ormond Lakes, stated that he is a board member and Past President of the Ormond Lakes HOA. He noted that he wants to address the dilemma that Ormond Lakes faces with increasing amount of stormwater resulting from continuing land development and water shed. Mr. Genter continued that Ormond Lakes has no control over how much stormwater is being sent to them. Ormond Lakes is working diligently to optimize their stormwater system by spending $145,000 on a stormwater system since the storms in October and November 2022.

He added that the estuaries were back-washing that overwhelmed the Ormond Lakes storm distribution culverts. As a result, raw sewage was in the street due to lift station and street flooding. Several residents had water reach their garage. He continued that the Ormond Beach water shed is 5 square miles from the north and west and is expanding through development. Mr. Genter stated that there are six new developments and several more in the planning stage and each new project will send water downhill to the Ormond Lakes system using the open ditch system. Ormond Lakes is the last stop for stormwater before the estuaries. Mr. Genter emphasized that water runs downhill and a significant amount of stormwater enters their system. He asks how much water is coming and if a study has been done. He remarked that he asked that question in 2019 and 2020 and the answer is the same then as it is today, no one knows. He expressed frustration with the Planning Board, city engineers and City Commissioners for their misunderstanding of the problem stormwater management is. He pleaded for assistance from the City of Ormond Beach.

Mr. Tom Gaynor, 22 Rocky Bluff Drive, Ormond Lakes, concurred with Mr. Genter, commenting that Ormond Lakes has problems. He continued that each new development will affect the flooding as all of the surrounding areas to Ormond Lakes do. He added that during a 100 or 500-year storm the flood will become one, according to Mr. Gaynor. He stated that when North Beach Street floods, the water backs up to the Ormond Lakes exit. Last November the estuaries overran the exits and back flushed the area. Mr. Gaynor commented that when the engineers look at it, the data looks fine but when there is a big storm there is a problem. He inquired about the directional flow of the water and noted that they are at 8' above sea level, and that the ponds are at 29' above sea level. Mr. Gaynor stated that they need help from the City as they are out of money.

Ms. Shull asked Mr. Spraker if staff has met with the Ormond Lakes HOA before. Mr. Spraker replied that he and Mr. David Allen, Civil Engineer, met with them after the hurricane. He stated that there is a Stormwater Master Plan that has a study for the Ormond Lakes areas and that the Ormond Lakes complaints are not being ignored. The RidgeHaven subdivision is discharging less in the post development stage, in terms of rate and volume, then the pre-development condition. Mr. Spraker concluded that the applicant will give additional information on the matter and Mr. Allen will follow with his stormwater observations.

Mr. Parker Mynchenberg, Parker Mynchenberg & Associates, 1729 Ridgewood Avenue, stated that when the ponds are dug deeper, it does not create additional storage. It is when the area gets bigger that you get the additional storage. He explained that a wetland is being preserved in Plantation Oaks that abuts the site to the north. He further explained that when Plantation Oaks Boulevard was built, a new outfall was created that runs along the Village of Pine Run, easterly to 2,000 acres in the natural gardens that was sold to the state. There is a discharge easement to the park at 8' to 9' elevation. Mr. Mynchenberg remarked that he knows the area and drainage well, being that he designed Ormond Lakes, Halifax Plantation and Plantation Oaks. He added that he met with Mr. Allen regarding the RidgeHaven impacts to Ormond Lakes and Pine Run and did some research. There is a big ditch along Addison Boulevard and between the subject property and the Village of Pine Run. A ditch was built along the north property line on Plantation Oaks Boulevard. Mr. Mynchenberg stated that when it rains on the current site, it drains in all three directions. The initial design had outfalls to the lakes to the various ditches. It has

since been redesigned so that the runoff that leaves the site, goes into the outfall ditch on Plantation Oaks Boulevard, leaving 15 percent more storage than what is required. The 25-year and the 100-year storm event were analyzed and it demonstrated that the existing pre-development conditions are not exceeded. In a 500 year storm, the Tomoka Basin comes up to elevation 8.

Mr. Mychenberg added that the big lake in Ormond Lakes was preserved as well as wetlands. The wetlands hold water during the summer though and he mentioned that he has been working with Ormond Lakes for 20 years to resolve things for them. He concluded that the stormwater is directed to the east away from Ormond Lakes.

Mr. David Allen, Civil Engineer, City of Ormond Beach, remarked that upon receipt of the subject property project, they were already working with Ormond Lakes, their two ponds and entrance off of Pine Tree Drive. He commented that he was concerned about the water that makes its way to the two lakes and the canal off of Addison Drive, going north, and the swale behind the first row of houses on Addison Drive. He added that the predeveloped site has a significant number of depressions that hold water and that he found out through Mr. Mynchenberg's Stormwater Plan that the predeveloped rate that left the site was after the depressions were filled up. There is a small amount of storage volume in it predevelopment, therefore when starting with the design, Mr. Allen noted that he was looking at how the predeveloped storage was increased in the three ponds. He said that he discussed wetland concerns and changing how much flow goes directly toward Village of Pine Run with Mr. Mychenberg and found that as the design is now, after the area is filled, the back of the lots on Addison Drive will drain to the interior of the project. The water will be controlled in how it is ran through the three ponds, and the wetland, prior to going into the larger pond, and will go into the east-west ditch along the northern property line. Mr. Allen stated that staff has gone through significant review about the ditch and what the capacity of it is, as well as the ditch that runs north along the western edge of Village of Pine Run.

Mr. Allen added that when he met with Ormond Lakes, they referenced the ditch between Village of Pine Run and RidgeHaven flows to the south to the ditch behind the first interior of lots in Village of Pine Run, and as aforementioned the area that goes that way has been decreased. There are additional plans in review from Mr. Mynchenberg, received early this week on Monday to ensure that there is a blockage of the ditch at the corner so that no water will go south to Village of Pine Run unless there is a huge rain. Mr. Allen stated that engineers for the state have to design to certain standards. He referenced a storm event like that of what happened in Fort Lauderdale where they received 23" in 24 hours, in which no one can design for, but assured that they look at 100-year storm, 11.5" inches in a 24-hour period. Mr. Allen explained that they have attempted to force the water to go north, then along the northern edge of Village of Pine Run, into the wetland. He addressed the inquiry of when the Planning Board will address stormwater and take action, and answered that he informed Ormond Lakes that the master stormwater plan was approved in February 2023 with two studies for the northern U.S. 1 area and another for Ormond Lakes and the entrance at Pine Tree Drive. He further explained that in the stormwater master plan, they were scheduled for year two and was told that it recently changed and it is to be done in the first year.

Ms. Shull opened it up to the Board for discussion and entertained a motion.

Mr. du Moulin asked Mr. Allen who maintains the ditches and canals over time. Mr. Allen replied that the County maintains the ditch between Village of Pine Run and RidgeHaven, the Addison canal and once it gets to a certain point in Plantation Oaks, it will then be managed by Plantation Oaks HOA.

Mr. Storch addressed Mr. Rodriguez's request and replied that it will be noted as a stipulation for the arrangement of his fencing and hedges installation to be taken care of.

Mr. Galloway inquired about Mr. Rodriguez's desire to connect or not connect to city sewer and septic.

Mr. Mynchenberg stated that there is a 12" waterline that runs in the right-of-way (ROW). He added that Mr. Rodriguez has potable water that can be tapped into. Regarding gravity sewer, there is a proposed lift station as well as another lift station for the townhouse project across the street on Destiny Drive, where the sewer was stubbed. Mr. Mychenberg further explained that the duplexes work by gravity into the existing lift station that service that project. A new lift station is also by the cul-de-sac, and the project would have to be designed to provide gravity sewer to an outparcel. Mr. Mynchenberg concluded that Mr. Rodriguez could connect if he wanted to.

Mr. Jorczak asked about the trees being planted and inquired about trees that are lost. Mr. Storch answered that there are guarantees on the trees that they will live for a year, until being well-established. A provision can be included that specifies that the trees will be maintained.

Mr. Scudiero commented that he will support the unique project that it is not clear-cut. The project is consistent to the area in terms of greenery and the townhome portion. He noted the reduction in density to what can go in there. The County-version could have been almost 1,000 units, and under the City-standard could have been 515 units, and the proposed project is now down to 286 units.

Mr. Railsback concurred with Mr. Scudiero and commented that he appreciates the increase in effort from the developer to not further impact the stormwater issues in the area.

Mr. du Moulin noted that he appreciates the reduction of density but cannot support due to HOA concerns as well as other aspects.

Mr. Jorczak concurs that the project is unique and expressed that it is well thought-out. He noted that he also likes the clustering and reduction of density, as well as the different housing to provide a diverse environment. He added that the rental issues is also of concern to him as well. Mr. Jorczak urged when writing the covenants and restrictions to guarantee that the vegetation is not lost after three to four years. Mr. Storch replied that the City regulates it.

Mr. Jorczak commented that the developer and staff have done an admirable job redirecting the water away from Ormond Lakes as well as the work being done in the

stormwater management plan. He concluded that he likes the project for the diversity and how it fits with the surrounding communities and will support.

Mr. Galloway expressed the importance of the input from the neighbors. He directed his compassionate comments at Mr. Genter and Mr. Gaynor regarding flooding and expressed satisfaction that staff is working on a stormwater master plan for the growing community. He referenced Mirror Lakes and Chelsea Place and ensured that the developer at that time corrected the problem. Mr. Galloway commented that he hopes that the redirection of the water now going north, uphill will resolve the issue. He concluded that he is in support of the project now after the third time, as everything that was asked for regarding improvements was done.

Ms. Shull agreed with Mr. Galloway and commented that the Board has to work with the developers and do the best that they can with it. People are moving to Florida by the thousands. She commended the developer for working with the Board and staff on the drainage and greenspace. She reiterated her concern regarding rentals and the HOA not allowing *short-term* rentals. Ms. Shull concluded that she is in support of the project. She asked Mr. Spraker to explain the three waivers.

Mr. Spraker reiterated that there is three separate items, the first being the zoning map. Waivers are a part of the issuance of a development order. One waiver is the outdoor recreation in lieu of the indoor recreation. A lot of outdoor recreation is being proposed in place of indoor recreation. The detention pond is to allow the fill to be onsite as to not import fill which will provide greater stormwater management for the property. He concluded that there are areas that will not meet the 40' buffer. Not every space will have the 40' buffer, therefore they are asking for a waiver of that requirement in return for providing the benefits that were listed in the staff report and provided earlier.

Mr. Jorczak motioned to approve ZMA 2022-061(A), RidgeHaven subdivision, Zoning Map Amendment. Mr. Railsback seconded it. Vote was called, and the motion was approved (5-1), with Mr. du Moulin against.

Board discussion ensued.

Mr. Storch added that regarding the next vote, that he will provide language that will include the vinyl fencing and landscaping for it at the end of the cul-de-sac.

There was Board-City Attorney discussion explaining the item B vote further.

Mr. Scudiero motioned to approve DO 2022-061(B), RidgeHaven subdivision, Issuance of a Development Order, including the three waivers and the additional provision for the fence and landscaping at the end of the cul-de-sac. Mr. Jorczak seconded it. Vote was called, and the motion was approved (5-1), with Mr. du Moulin against.

Mr. Railsback motioned to approve PP 2022-061(C), RidgeHaven subdivision, Preliminary Plat. Mr. Scudiero seconded it. Vote was called, and the motion was approved (5-1), with Mr. du Moulin against.

DRAFT

Board Comments

Mr. Galloway commented that he hopes that the applicant/developer go the extra mile to take care of any concerns aforementioned.

Mr. Railsback reflected on HOA responsibility with short-term rentals and his experience with his HOA and short-term/Airbnb rentals and its effect. There was no language in his HOA contract regarding any rentals and urged that this be addressed so that it does not happen with RidgeHaven. He added the provision about the tree and parking matters in the contract as well.

Mr. du Moulin commended Mr. Storch on his presentation and noted that the developer is exceeding what most developers do.

Attorney Hayes touched on the rental matter, and explained that the City of Ormond Beach generally does not allow rentals in residential areas, but that there has been a push in the Florida Legislature to allow short-term rentals in every jurisdiction, regardless of whether or not those jurisdictions have an ordinance that has been grandfathered in, that prohibits rentals. He urged not to be surprised if in a year, or two, or three if there is a law that preempts the ability to do so. Attorney Hayes stated that the request will be treated as a voluntary concession by the applicant and not an imposition by the City. In the document it will be reflected that it is not being required as a condition for approval, but that the applicant has voluntarily agreed to take care of it.

Mr. Railsback added that in the last few sessions, the Legislature has excluded deed-restricted communities from the aforementioned home-rule, the roll back of the grandfathering of rentals. He emphasized the importance of capturing the specifics in the deed-restrictions in the contract as it is binding and will not be bound to Legislature addressing something in a municipality area.

D. FLUM 2023-032, 1755 North U.S. Highway 1, Future Land Use Map Amendment

Mr. Spraker, Planning Director, explained the request from Wayne's Solar, Inc. for a Land Use Map Amendment from LIC, "Low Intensity Commercial" to "Light/Industrial/Utilities" for a 3.06 acre parcel located at 1755 North U.S. Highway 1. It is currently a vacant parcel of land. He reviewed the wide range of commercial uses that the land use allows. Mr. Spraker stated that the property owner has indicated a desire to construct a business warehouse. Mr. Spraker stated the use is consistent with the surrounding area and staff recommends approval.

Applicant's presentation

Mr. Richard Hardy, Representative, 975 S. Ponce de Leon Blvd., St. Augustine, stated that he is a builder and developer and explained that Wayne's Solar is desiring to move to the proposed location.

Ms. Shull opened it up to the Board for discussion and entertained a motion.

Mr. Galloway asked if this property would be the business site for Wayne's Solar and Mr. Hardy confirmed that is the plan.

Dear Steven Spraker, Planning Director

I will not be able to attend the zoning amendment hearing on Thursday, April 13, 2023 at 6:00PM. But I still want my position on this important issue be communicated and heard publicly and my vote counted if there is a vote tally for or against amending in the chambers. I am enclosing two copies of my letter presentation.

Sincerely Yours.

Thomas Lehman

Thomas Lehman

1135 Benton Street

Ormond Beach, Fl. 32174

Mr. Steven Spraker, Planning Director

Ormond City Hall

22 South Beach Street

Ormond Beach, Fl. 32174

Just before writing this letter presentation, I made a tour of my neighborhood as it stands today. I started by driving through the Lakes and Village of Pine Run communities and was impressed that even after decades of use they are fresh, clean, well maintained, where the mature coastal hammock and pine flatwood communities still exists within the developments. Individual lots are spacious, homes are quality built to hold up against seasonal strong winds, heavy rains, and flooding conditions. Volusia County got the zoning and development plans right for the area; the density is just right to create a living space that people enjoy living their lives out and raising families.

After making a tour of the new development areas behind me and to the North of my property I personally think all the qualities I just mentioned that appeal to me above do not exist within these new developmental areas and that the habits of development are destructive to the life support systems that remain here. Therefore, I do not endorse, and I would never approve a zoning change that would allow Ridge Haven to be built in a flood prone area.

I fail to see the ridge in Ridge Haven, since the development site is low flat Pine Flatwoods that floods six to eight months out of the year with an average height of 31 feet above sea level dotted by lower wetlands in the form of swamps and wet grassy marshes. So, I assume 80% of the site will be denuded and an artificial ridge will be created to make a hot, arid desert-like sand box for people to live in. The high density will produce large amounts of waste in various forms to mix with seasonal flood waters lowering the quality of life as the water has to be dumped somewhere in the nearby surroundings fouling the nest. Many issues concerning this development need to be addressed and I hope they are being discussed at this hearing that keep me from supporting this zoning change.

A better use of this 130-acre plot would be for all parties involved is to use the current Volusia County rural zoning and create a Village of Pine Run II extension. Building construction that harmonizes with what is already here and that has a lesser environmental impact and more human appeal. Or have Ormond Beach city hall authorize the design of another Central Park to create a natural barrier relief for storing flood waters and recharging the aquafer, while creating a recreational complex that buffers the area from the commercial to the residential use zones that transition here.

So, there you have my own personal response to this special exception zoning request, I see the Ridge Haven plans as undesirable urban sprawl in a flat, flood prone area not suitable for a sustainable community without special restrictions that are simply being omitted or not being addressed before any development order should be issued. What's the big hurry, push city hall? Let's talk and debate what is best for my neighborhood. Another way to state my position is to view the Volusia County Zoning Classification on the second page of the City of Ormond Beach mailing, no change is needed, no amending is required because this zoning is in the best interest for this locale. I would like to see the stewardship for this development turned back over to Volusia County so they can complete the good works they started over fifty years ago with less impact and more balance between neighboring communities.

Respectfully Yours.

Thomas Lehman

Meeting Date: 6/6/2023	**AGENDA ITEM**		**Number:** 8.E
Section:	PUBLIC HEARINGS		
Item Category:	Public Hearing - Ordinances	**Res./Ord. No:**	2023-27
Strategic Goal:	Transportation & Community Development - Other		
Department :	Planning & Building		
Subject:	1755 North U.S. Highway 1, Comprehensive Plan Future Land Use Map Amendment (SECOND READING)		
Budget Impact:	There is no budget impact as the result of this land use amendment.		
Summary:	This is a request from Wayne's Solar, Inc., property owner, for a Land Use Map Amendment from LIC, "Low Intensity Commercial" to LI/U, "Light/Industrial/Utilities" for a 3.06-acre parcel located at 1755 North U.S. Highway 1. The Planning Board recommended approval of the application with a 6-0 vote.		
Recommended Action:	The Planning Board recommended the City Commission approve the Future Land Use Map amendment for approximately 3.06 acres located at 1755 North U.S. Highway 1 from LIC, "Low Intensity Commercial" to LI/U, "Light/Industrial/Utilities".

CITY MANAGER
MEMORANDUM

To: The Honorable Mayor Partington and City Commissioners

Through: Joyce Shanahan, City Manager

From: Steven Spraker, Planning Director

Date: June 6, 2023

Subject: 1755 North U.S. Highway 1, Comprehensive Plan Future Land Use Map Amendment (SECOND READING)

Commission Goal: Transportation & Community Development - Other

Introduction

This is a request from Wayne's Solar, Inc., property owner, for a Land Use Map Amendment from LIC, "Low Intensity Commercial" to LI/U, "Light/Industrial/Utilities" for a 3.06-acre parcel located at 1755 North U.S. Highway 1.

Background

The property has an existing city land use of "Low Intensity Commercial" and a city zoning designation of B-7, Highway Tourist Commercial. The subject property is within the North U.S. Highway 1 Interlocal Service Boundary Agreement (ISBA). The North US 1 ISBA between the City of Ormond Beach and the County of Volusia established a municipal service area designed to:

- Encourage intergovernmental coordination in planning, service delivery, and boundary adjustments;
- Reduce intergovernmental conflicts and litigation between local governments;
- Promotes sensible boundaries that reduce the costs of local governments;
- Avoid duplicating local services;
- Increase political transparency and accountability; and
- Prevent inefficient service delivery and an insufficient tax base to support the delivery of those services.

The City Commission adopted the original North US 1 ISBA on August 19, 2014 per Ordinance No. 2014-27. Volusia County Council adopted the ISBA on August 21, 2014 by Volusia County Ordinance No. 2014-12. Ordinance 2015-05 established the land use amendments for the ISBA and was adopted on January 20, 2015. As part of the land use map amendment adoption, a map annotation that limits density to eight (8)

units per acre and a maximum floor area ratio (FAR) of 0.50 for retail uses and 0.55 for all other non-residential uses. Ordinance 2015-13 established the city zoning designations for properties within the ISBA and was approved on April 7, 2015.

The application seeks a Land Use Map Amendment from LIC, "Low Intensity Commercial" to LI/U, "Light/Industrial/Utilities". There is a separate item for review for the related Zoning Map Amendment from B-7, Highway Tourist Commercial to I-1, Light Industrial. The applicant has conducted a pre-application meeting with the Site Plan Review Committee and indicated a desire to construct a business warehouse.

Discussion

Existing Land Use:
The City of Ormond Beach Comprehensive Plan provides the directive text for the existing City land use of "Low Intensity Commercial" that states the following:

Purpose: A multi-use land use category to depict those areas of the city that are now developed, or appropriate to be developed, for retail, office and professional services, residential, and restaurants consistent with the surrounding uses, transportation facilities and natural resource characteristics of such areas. For projects that propose a mixture of residential and non-residential uses, the minimum FAR should be 0.2.
Density: Maximum 10 units per acre.
Maximum FAR: 0.6

Policy 9.1.4. of the Future Land Use Element of the Comprehensive Plan contains table 4 that provides land use map annotations as follows:

- Low Intensity Commercial (LIC): Density shall not exceed 8 dwelling units per acre. Maximum FAR shall not exceed 0.50 for Retail or 0.55 for all other Nonresidential uses.
- Light Industrial/Utilities (LI/U): Maximum FAR shall not exceed 0.60.

Proposed Land Use
City of Ormond Beach Comprehensive Plan provides the directive text for the proposed City land use of "Light Industrial/Utilities" (LI/U) that states the following:

Purpose: To provide for the location of light industrial operations and similar uses and would generally include the I-1 (Light Industrial) type of development as stipulated in the zoning district regulations. This land use category also includes areas of the City which will be used for public utilities such as water and wastewater treatment plants, water tanks, and power stations and transit.
Density: Not permitted.
Maximum FAR: 0.8

Policy 9.1.4. of the Future Land Use Element of the Comprehensive Plan contains table 4 that provides land use map annotations that would be applicable and impose a Floor Area Ratio limitation of 0.60.

Industrial land use designations exist to the north and across North U.S. Highway 1. The proposed use of a business warehouse is consistent with the North U.S. Highway 1 corridor. Land development regulations require a 36' landscape area along North U.S. Highway 1 and the building frontage along the roadway to be architecturally treated.

Planning Board
The Planning Board reviewed the amendment at the April 13, 2023 meeting and recommended approval with a 6-0 vote. There were no individuals who spoke for or against the amendment. The Planning Board minutes are attached to this item.

Budget Impact

There is no budget impact as the result of this land use amendment.

Citizen Impact

No citizen impact is expected as the result of this request. The ISBA area contains both commercial and industrial areas. The change to an industrial use is consistent with the city's Comprehensive Plan.

Recommendation

The Planning Board recommended the City Commission approve the Future Land Use Map amendment for approximately 3.06 acres located at 1755 North U.S. Highway 1 from LIC, "Low Intensity Commercial" to LI/U, "Light/Industrial/Utilities".

ORDINANCE NO. 2023-27

AN ORDINANCE AMENDING THE FUTURE LAND USE ELEMENT OF THE COMPREHENSIVE PLAN OF THE CITY OF ORMOND BEACH BY AMENDING THE FUTURE LAND USE MAP TO CHANGE THE DESIGNATION OF ONE PARCEL OF REAL PROPERTY TOTALING 3.06± ACRES LOCATED AT 1755 NORTH U.S. HIGHWAY 1 (VOLUSIA COUNTY PARCEL NUMBER 3126-00-00-0150) FROM "LOW INTENSITY COMMERCIAL" TO "LIGHT INDUSTRIAL/UTILITIES"; PROVIDING FOR CONFLICT; AUTHORIZING TRANSMITTAL; AND SETTING FORTH AN EFFECTIVE DATE.

WHEREAS, Wayne's Solar, Inc., a Florida For Profit Corporation ("Applicant/Property Owner") is the fee simple owner of certain real property consisting of approximately 3.06 acres located at 1755 North U.S. Highway 1 (Volusia County parcel number: 3126-00-00-0150), which is legally described and depicted in Exhibit "A" ("Property") attached hereto and incorporated herein, and

WHEREAS, the Applicant/Property Owner has submitted an application to amend the City's Comprehensive Land Use Plan *("Comprehensive Plan"*) by changing the Future Land Use Map designation for the Property described and depicted in Exhibit "A", from "Low Intensity Commercial" to "Light Industrial/Utilities" for approximately 3.06 acres, as depicted in Exhibit "B" attached hereto and incorporated herein, and

WHEREAS, the Applicant has requested the proposed small-scale land use *Comprehensive Plan* amendment be reviewed and acted upon concurrently with the accompanying zoning map amendment application (Ordinance No. 2023-28) pursuant to Section 163.3184(12), *Florida Statutes*, and

WHEREAS, under the statute, the change in zoning is contingent upon the proposed *Comprehensive Plan* amendment becoming effective, and

WHEREAS, the City Commission has approved Ordinance No. 90-36, as subsequently amended, adopting a *Comprehensive Plan* in accordance with Part II, Chapter 163, *Florida Statutes*, and

WHEREAS, the proposed *Comprehensive Plan* amendment involves a use of fifty (50) acres or less, and

WHEREAS, the proposed *Comprehensive Plan* amendment does not involve a text change to the goals, policies, and objectives of the City's *Comprehensive Plan*, but only proposes a land use change to the Future Land Use Map for small scale development activity, and

WHEREAS, the proposed *Comprehensive Plan* amendment is not located within an area of critical state concern, and

WHEREAS, the Planning Board, as the City's local planning agency, duly held a public hearing, with due public notice, and recommends approval of the proposed *Comprehensive Plan* amendment, and

WHEREAS, the City Commission has conducted public hearings on the proposed *Comprehensive Plan* amendment, as described in §163.3184(11), *Florida Statutes*, and

WHEREAS, the City Commission finds that approval of the proposed *Comprehensive Plan* amendment will preserve the internal consistency of the City's *Comprehensive Plan* pursuant to §163.3177, *Florida Statutes*, and

WHEREAS, the proposed *Comprehensive Plan* amendment shall be submitted to the Volusia Growth Management Commission for a determination of consistency in accordance with Section 202.3 of the Charter of Volusia County, Florida, now therefore,

BE IT ENACTED BY THE PEOPLE OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:

SECTION ONE. The foregoing recitals are incorporated herein by reference as the legislative findings of the Ormond Beach City Commission.

SECTION TWO. The Future Land Use designation of one parcel of real property totaling 3.06± acres located at 1755 North U.S. Highway 1, Ormond Beach, Florida (Volusia County parcel number: 3126-00-00-0150), as legally described and depicted in Exhibit "A" and the Future Land Use Map of the City of Ormond Beach *Comprehensive Plan* attached hereto, is changed from "Low Intensity Commercial" to "Light Industrial/Utilities" for approximately 3.06 acres, as described and depicted in Exhibit "B".

SECTION THREE. In order to make the City of Ormond Beach Comprehensive Plan, as hereby amended, available to the public, a certified copy of the enacting Ordinance, as well as certified copies of the City of Ormond Beach Comprehensive Plan and the amendments thereto, shall be located in the Planning Department of the City of Ormond Beach. The Planning Director shall also make copies available to the public for a reasonable reproduction charge.

SECTION FOUR. The Planning Director is hereby authorized and directed to transmit copies of this Ordinance, and the public hearing notice within ten (10) business days of the date of approval hereof, to the Volusia County Growth Management Commission in

accordance with Section 202.3 of the Charter of Volusia County, Florida; and to the Florida Department of Economic Opportunity, and to any other person or entity requesting a copy.

SECTION FIVE. All Ordinances or parts of Ordinances in conflict herewith are hereby repealed to the extent of such conflict.

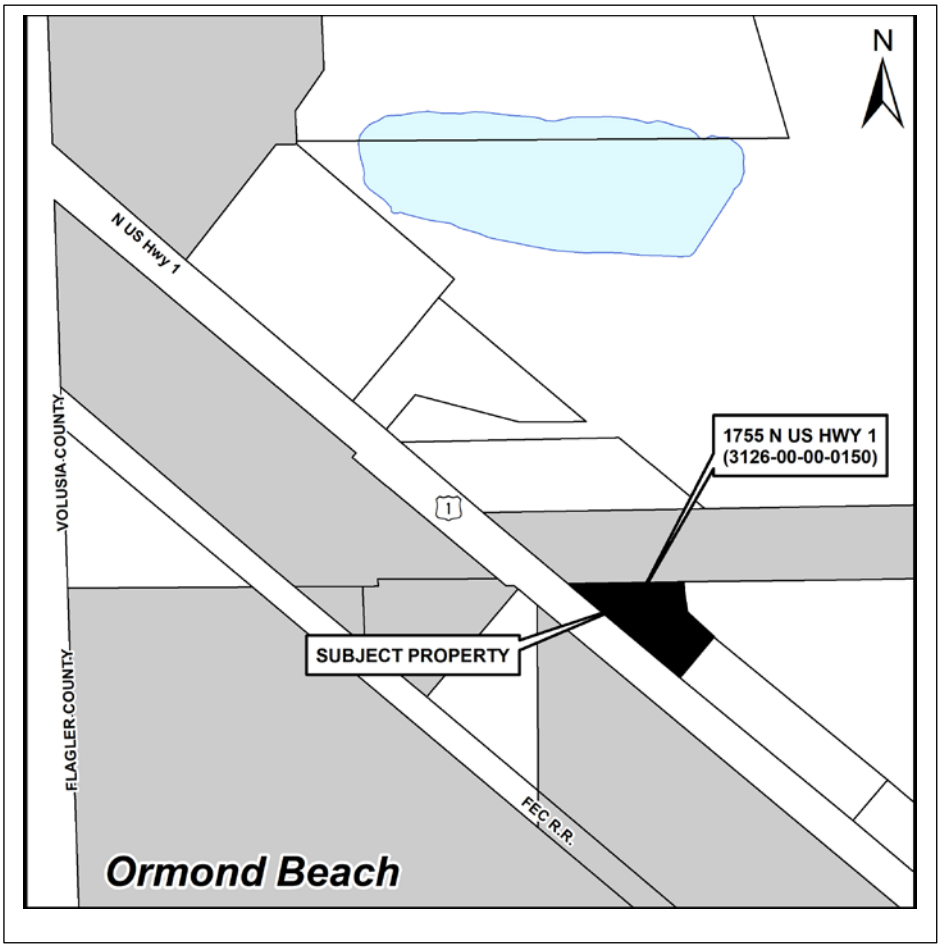
SECTION SIX. Pursuant to §163.3187(5)(c), *Florida Statutes*, the effective date of this *Comprehensive Plan* amendment shall be 31 days after the adoption of this ordinance (July 7, 2023); provided, however, that if challenged within 30 days after adoption (July 6, 2023), this *Comprehensive Plan* amendment shall not become effective until the Department of Economic Opportunity or the Administration Commission, if applicable, issues a final order determining that the adopted small scale development amendment is in compliance with the Local Government Comprehensive Planning and Land Development Regulation Act; and pursuant to Section 202.3 of the Charter of Volusia County, Florida will become final upon a certification of consistency from the Volusia Growth Management Commission.

PASSED UPON at the first reading of the City Commission, this 16th day of May, 2023.

PASSED UPON at the second and final reading of the City Commission, this 6th day of June, 2023.

BILL PARTINGTON
Mayor

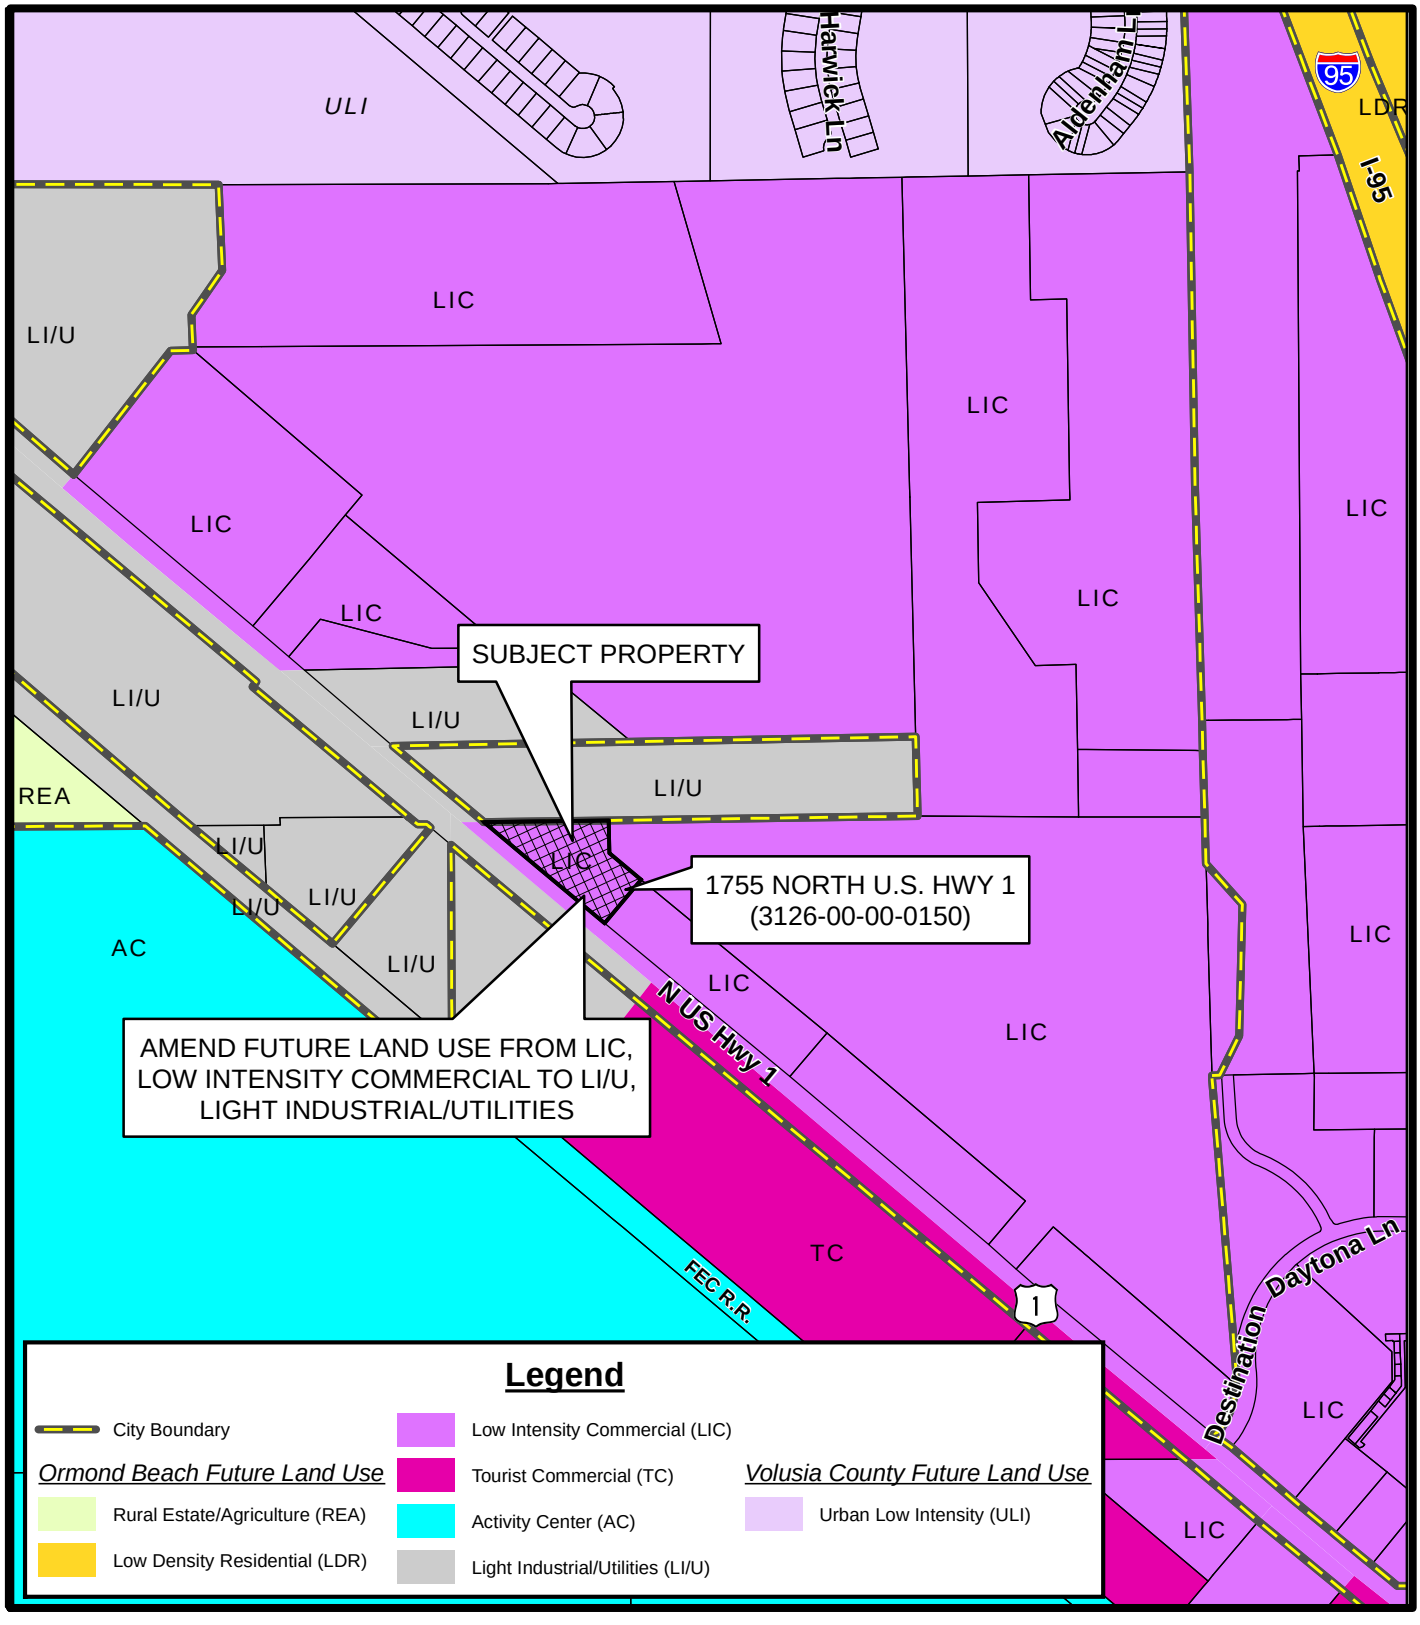
ATTEST:



SUSAN CARROLL DAUDERIS
City Clerk

Legal Description
from Book 8101, Page 299

THAT PARCEL OF LAND DESCRIBED IN OFFICIAL RECORD BOOK 3836 AT PAGE 3526 OF THE PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA AND BEING MORE PARTICULARLY DESCRIBED AS FOLLOW:
THAT PORTION OF THE SOUTH ONE-HALF OF SECTION 26, AS IS SITUATED NORTHEASTERLY OF U.S. HIGHWAY 1, TOWNSHIP 13 SOUTH, RANGE 31 EAST, VOLUSIA COUNTY, FLORIDA, BEING MORE PARTICULARLY AS FOLLOWS:
BEGINNING AT A POINT IN THE CENTERLINE OF SECTION 26, TOWNSHIP 13 SOUTH, RANGE 31 EAST, SAID POINT BEING LOCATED A DISTANCE OF 2651.18 FT. S 01°10'30" E, FROM THE QUARTER-CORNER ON THE NORTH LINE OF SAID SECTION 26; RUN THENCE N 89°40' E, ALONG THE NORTH LINE OF SAID SOUTH ONE-HALF OF SECTION 26, A DISTANCE OF 86.39 FT. TO A POINT THEREIN; THENCE S 1°10'30" E. PARALLEL TO THE SAID CENTER-LINE OF SECTION 26, A DISTANCE OF 110.12 FT. TO A POINT ; THENCE S 49°55' E. AND PARALLEL TO THE 160 FT. RIGHT-OF-WAY OF U.S. HIGHWAY #1, AS THE SAME IS NOW OCCUPIED AND RECOGNIZED, A DISTANCE OF 176.45 FT. TO A POINT; THENCE S 40°05' W, A DISTANCE OF 238 FT. TO A POINT IN THE NORTHEASTERLY LINE OF SAID U.S. HIGHWAY #1; THENCE N 49°55' W, ALONG SAID NORTHEASTERLY LINE, A DISTANCE OF 626.31 FT. TO A POINT BEING AT THE INTERSECTION WITH THE AFORESAID NORTH LINE OF THE SOUTH ONE-HALF OF SECTION 26; THENCE N 89°40' E, ALONG SAID NORTH LINE, A DISTANCE OF 408.79 FT. TO THE POINT OF BEGINNING THE DESCRIBED TRACT.



LESS AND EXCEPT THAT PARCEL OF LAND DESCRIBED IN QUIT CLAIM DEED RECORDED IN OFFICIAL RECORD BOOK 3974, PAGE 2773, OF THE PUBLIC RECORDS OF SAID VOLUSIA COUNTY AND BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:
BEGIN AT A POINT ON THE WEST LINE OF THE SOUTHEAST ONE-QUARTER OF SECTION 26, TOWNSHIP 13 SOUTH, RANGE 31 EAST. SAID POINT BEING THE INTERSECTION OF SAID WEST LINE OF THE SOUTHEAST ONE-QUARTER AND THE EASTERLY RIGHT OF WAY LINE OF U.S. HIGHWAY # 1, A 125 FOOT WIDE RIGHT OF WAY AS NOW LAID OUT, HAVING 75 FEET OF SAID RIGHT OF WAY ON THE EASTERLY SIDE OF THE CENTERLINE OF SAID HIGHWAY PAVING; THENCE N40'05'E, A DISTANCE OF 273 FEET TO THE CENTERLINE OF AN IRRIGATION DITCH, SAID DITCH BEING APPROXIMATELY 15 FEET IN WIDTH; THENCE S49°55'E ALONG THE CENTERLINE OF AFORESAID DITCH, A DISTANCE OF 1000 FEET; THENCE S40°05'W A DISTANCE OF 273 FEET TO A POINT IN EASTERLY RIGHT OF WAY LINE OF AFORESAID U.S. HIGHWAY #1; THENCE N49°55'W A DISTANCE OF 1000 FEET TO THE POINT OF BEGINNING. EXCEPTING THEREFROM THE WESTERLY 35 FEET THEREOF, USED TO WIDEN U.S. HIGHWAY #1.

Department of Planning

MEETING DATE:	April 13, 2023
SUBJECT:	1755 North U.S. Highway 1, Small-Scale Land Use Map Amendment
APPLICANT:	Wayne's Solar, Inc., property owner
NUMBER:	LUPA 2023-032
PROJECT PLANNER:	Steven Spraker, AICP, Planning Director

INTRODUCTION: This is a request from Wayne's Solar, Inc., property owner, for a Land Use Map Amendment from LIC, "Low Intensity Commercial" to LI/U, "Light/Industrial/Utilities" for a 3.06-acre parcel located at 1755 North U.S. Highway 1. The subject property is shown in Exhibit 1:

EXHIBIT 1: Subject property, 1755 North U.S. Highway 1:

BACKGROUND: The property has an existing city land use of "Low Intensity Commercial" and a city zoning designation of B-7, Highway Tourist Commercial. The subject property is within the North U.S. Highway 1 Interlocal Service Boundary Agreement (ISBA). The North US 1 Interlocal Service Boundary Agreement between the City of Ormond Beach and the County of Volusia established a municipal service area designed to:

- Encourage intergovernmental coordination in planning, service delivery, and boundary adjustments;
- Reduce intergovernmental conflicts and litigation between local governments;
- Promotes sensible boundaries that reduce the costs of local governments;
- Avoid duplicating local services;
- Increase political transparency and accountability; and
- Prevent inefficient service delivery and an insufficient tax base to support the delivery of those services.

The City Commission adopted the original North US 1 Interlocal Service Boundary Agreement (ISBA) on August 19, 2014 per Ordinance No. 2014-27. Volusia County Council adopted the Interlocal Service Boundary Agreement on August 21, 2014 by Volusia County Ordinance No. 2014-12. Ordinance 2015-05 established the land use amendments for the ISBA and was adopted on January 20, 2015. As part of the land use map amendment adoption, a map annotation that limits density to eight (8) units per acre and a maximum floor area ratio of 0.50 for retail uses and 0.55 for all other non-residential uses. Ordinance 2015-13 established the city zoning designations for properties within the ISBA and was approved on April 7, 2015.

The application seeks a Land Use Map Amendment from LIC, "Low Intensity Commercial" to LI/U, "Light/Industrial/Utilities". There is a separate item for review for the related Zoning Map Amendment from B-7, Highway Tourist Commercial to I-1, Light Industrial. The applicant has conducted a pre-application meeting with the Site Plan Review Committee and indicated a desire to construct a business warehouse.

Existing Land Use:

The City of Ormond Beach Comprehensive Plan provides the directive text for the existing City land use of "Low Intensity Commercial" that states the following:

> Purpose: A multi-use land use category to depict those areas of the city that are now developed, or appropriate to be developed, for retail, office and professional services, residential, and restaurants consistent with the surrounding uses, transportation facilities and natural resource characteristics of such areas. For projects that propose a mixture of residential and non-residential uses, the minimum FAR should be 0.2.
>
> Density: Maximum 10 units per acre.
>
> Maximum FAR: 0.6

Policy 9.1.4. of the Future Land Use Element of the Comprehensive Plan contains table 4 that provides land use map annotations as follows:

- Low Intensity Commercial (LIC): Density shall not exceed 8 dwelling units per acre. Maximum FAR shall not exceed 0.50 for Retail or 0.55 for all other Nonresidential uses.
- Light Industrial/Utilities (LI/U): Maximum Floor Area Ratio shall not exceed 0.60.

Proposed Land Use

City of Ormond Beach Comprehensive Plan provides the directive text for the proposed City land use of "Light Industrial/Utilities" (LI/U) that states the following:

> Purpose: To provide for the location of light industrial operations and similar uses and would generally include the I-1 (Light Industrial) type of development as stipulated in the zoning district regulations. This land use category also includes areas of the City which will be used for public utilities such as water and wastewater treatment plants, water tanks, and power stations and transit.
>
> Density: Not permitted.
>
> Maximum FAR: 0.8

Policy 9.1.4. of the Future Land Use Element of the Comprehensive Plan contains table 4 that provides land use map annotations that would be applicable and impose a Floor Area Ratio limitation of 0.60.

Application process: The proposed land use amendment schedule of the subject property is as follows:

EXHIBIT 2: Tentative land use map amendment schedule:

Action	Date
Planning Board	April 18, 2023
City Commission, 1st Reading	May 16, 2023
City Commission, 2nd Reading	June 6, 2023

The applicant has submitted a letter (ATTACHMENT 3) requesting that the land use and zoning applications be heard together at the City Commission per Section 163.3184(12), *Florida Statues*. The zoning map amendment would not be effective until the final approval of the land use amendment.

The following public notices have or are required to occur:

EXHIBIT 3: Public Notice:

Public Notice	Date	Notes
Planning Board	March 27, 2023	300' radius
Newspaper advertisement for Planning Board	March 31, 2023	
Abutter letters for City Commission meetings	April 1, 2023	300' radius
Newspaper advertisement for City Commission, 2nd reading	May 26, 2023	

The project information has also been posted on the city website under the Planning Department at: (1) Development Reports, https://www.ormondbeach.org/247/Development-Projects and (2) Public Hearing Advertisements and Notices, https://www.ormondbeach.org/1000/Public-Hearing-Advertisements-and-Notice.

ANALYSIS:

The application seeks an amendment from a commercial land use designation to an industrial land use designation with the goal of constructing a business warehouse use.

Policy 2.5.2. of the Future Land Use Element of the Comprehensive Plan provides the criteria listed below to review land use amendments:

1. Whether the future land use amendment is consistent with the Comprehensive Plan Goals, Objectives and Policies.

The Interlocal Service Boundary Agreement area contains both commercial and industrial areas. The change to an industrial use is consistent with the city's Comprehensive Plan. The amendment is consistent with the goal, objective, and policies of the Future land Use Element as shown below:

GOAL 1. LAND USE DISTRIBUTION

FUTURE DEVELOPMENT AND REDEVELOPMENT ACTIVITIES SHOULD BE DIRECTED IN APPROPRIATE AREAS AS DEPICTED ON THE FUTURE LAND USE MAP TO MEET THE LAND USE NEEDS OF THE ANTICIPATED POPULATION, IN A MANNER CONSISTENT WITH SOUND PLANNING PRINCIPLES, THE GOALS, OBJECTIVES AND POLICIES CONTAINED HEREIN, AND THE DESIRED COMMUNITY CHARACTER.

THE FUTURE LAND USE ELEMENT SHOULD ALLOW LIMITED COMMERCIAL EXPANSION, PROMOTE INDUSTRIAL USE, AND MAINTAIN CURRENT RESIDENTIAL DENSITIES IN THE CORE AREA WHILE ESTABLISHING LOWER DENSITIES IN THE PERIMETER AREAS, FOCUSING REDEVELOPMENT IN THE DOWNTOWN COMMUNITY REDEVELOPMENT AREA, US1, AND SRA1A, AND PROVIDING A CONTINUED HIGH LEVEL OF OPEN SPACE. FUTURE GROWTH SHALL BE TIMED AND LOCATED TO MAXIMIZE EXISTING PUBLIC INFRASTRUCTURE.

2. Whether the proposed plan amendment meets the criteria established in the Florida Statutes.

In accordance with Chapter 163.3187(1), Florida Statutes, any local government Comprehensive Plan amendments directly related to proposed small-scale development activities may be approved without regard to statutory limits on the frequency of consideration of amendments to the local Comprehensive Plan. A small-scale development amendment may be adopted only under the following conditions:

a. The proposed amendment involves a use of 50 acres or fewer.

The subject property is 3.06± acres (less than 50 acres).

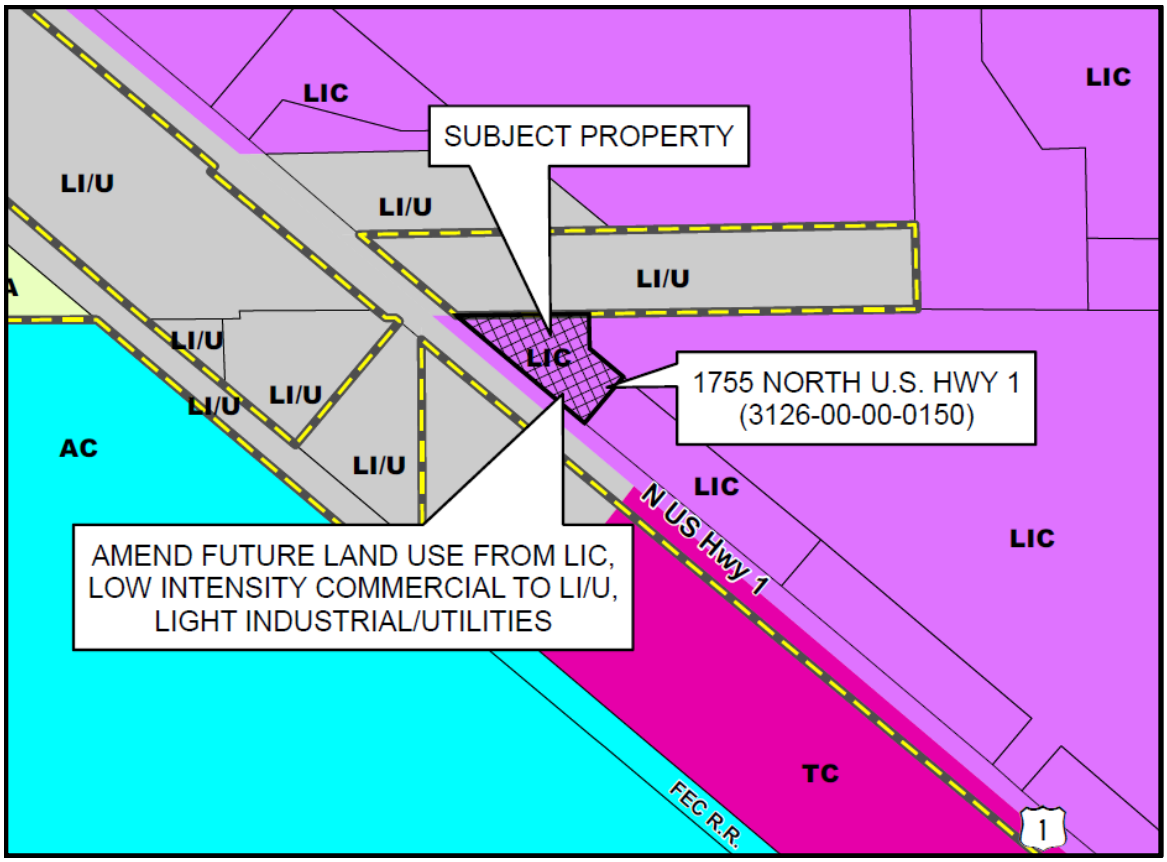
b. The proposed amendment does not involve a text change to the goals, policies, and objectives of the local government's Comprehensive Plan, but only proposes a land use change to the future land use map for a site-specific small-scale development activity. However, text changes that relate directly to, and are adopted simultaneously with, the small-scale future land use map amendment shall be permissible under this section.

The proposed amendment is solely for the Future Land Use Map and does not propose any text amendments to the City's Comprehensive Plan.

c. The property that is the subject of the proposed amendment is not located within an area of critical state concern, unless the project subject to the proposed amendment involves the construction of affordable housing units meeting the criteria of s. 420.0004(3), and is located within an area of critical state concern designated by s. 380.0552 or by the Administration Commission pursuant to s. 380.05(1).

This criterion is not applicable as the site location is not located within an area of state critical concern.

3: Whether the land use is an appropriate use of the land.



Industrial land use designations exist to the north and across North U.S. Highway 1. The proposed use of a business warehouse is consistent with the North U.S. Highway 1 corridor. Land development regulations require a 36' landscape area along North U.S. Highway 1 and the building frontage along the roadway to be architecturally treated.

The adjacent land use designations and zoning classifications are shown in Exhibit 4 and the Existing Future Land Use designations are shown in Exhibit 5 below:

EXHIBIT 4: Land use and zoning designations:

Land Use and Zoning Designations of Adjacent Property			
	Current Land Uses	**Existing Future Land Use Designation**	**Existing Zoning Classifications**
North	House of Worship	"Light Industrial/Utilities"	I-1, Light Industrial
South	Vacant & RV resort	"Low Intensity Commercial"	B-7, Highway Tourist Commercial
West	Vacant and industrial	"Light Industrial/Utilities"	I-1, Light Industrial
East	House of Worship & RV resort	"Low Intensity Commercial"	B-7, Highway Tourist Commercial

EXHIBIT 5: Existing Future Land Use map for the area:

4. Whether there is adequate infrastructure to serve the proposed land use.

The analysis of infrastructure needs for a comprehensive plan amendment is different from a concurrency review for a site plan. The impact analysis examines the maximum expected impacts of the current designation versus the requested designation based on a preliminary development scenario. This analysis is not meant to replace or contradict the findings of a Concurrency Management Review. However, the relative differences between designations can provide useful information in the long-range planning process. The analysis is based on 3.06 acres with the existing land use of "Low Intensity Commercial" and the proposed land use of "Light Industrial/Utility" (LI/U)

EXHIBIT 6: Impact analysis:

Property acreage = 3.06 acres		
Allowed entitlements	**Existing LIC land use**	**Proposed LI/U land use**
Maximum density (residential) units per acre*	8	0
Maximum density (residential)	24 units	0
Maximum floor area ratio*	0.50	0.60
Maximum building square footage (SF)	66,647 SF	79,976 SF

*Based upon map annotations in the Interlocal Service Boundary Agreement area

The existing land use of "Low Intensity Commercial" would allow a maximum of 24 residential units and a maximum building of 66,647 square feet. The proposed land use does not allow residential units and the maximum building size is 79,976 square feet.

EXHIBIT 7: Water and Sewer impact analysis:

Existing		
Land Use	**Water (gallons per day)**	**Sewer (gallons per day)**
"Low Intensity Commercial"	9,997	8,498
Proposed		
Land Use	**Water (gallons per day)**	**Sewer (gallons per day)**
"Light Industrial/Utilities"	11,997	10,198
INCREASE	**+2,000**	**+1,700**

Notes:

- Commercial/Industrial water = (square feet/100) X 15 gallons of water per day
- Commercial/Industrial sewer = Water gallons per day X 85%

The existing wastewater treatment plant is currently permitted for a rated capacity of 8 million Gallons per Day (MGD) for wastewater influent flow from the sanitary sewer collection system. The most recent annual period average daily flow to the facility is 4.98 MGD. The most recent annual period average daily treated effluent flow for reuse customers is 3.30 MGD. Approved development projects proposed, 0.58 MGD for wastewater treatment added with current wastewater plant flow is estimated at 5.56 MGD at build out. The plant capacity remaining is 2.44 MGD if all approved projects are built out. The LOS for sanitary sewer continues to be met.

The City operates a single water treatment plant having a permitted and rated capacity remaining at 12 million Gallons per Day (MGD). The existing demand for water use during the most recent annual period is 5.50 MGD. When the proposed projects of 0.55 for the city's service area are added to the existing demand, the total is 6.05 MGD. There is a remaining capacity of 5.95 MGD if all approved projects are built out. The LOS for potable water service continues to be met.

Traffic:

The proposed land use amendment would reduce the theoretical maximum development by 1,843 average daily trips.

EXHIBIT 8: Traffic impact analysis:

Existing		
Land Use	**ITE land use category**	**Trip Generation**
"Low Intensity Commercial"	#820, Shopping Center	36
Total existing land use average daily trips		2,400
Proposed		
Land Use	**ITE land use category**	**Trip Generation**
""Light Industrial/Utilities"	#110, Light Industrial	6.97
Total proposed land use average daily trips		557
	NET REDUCTION	**1,843**

Stormwater Management: The site development of each land development area has designed a stormwater management system.

Solid Waste: Solid waste provision would be addressed at the time of site development.

Schools: The proposed amendment reduces the allowed residential use from 24 residential units to zero which decreases the need for school facilities.

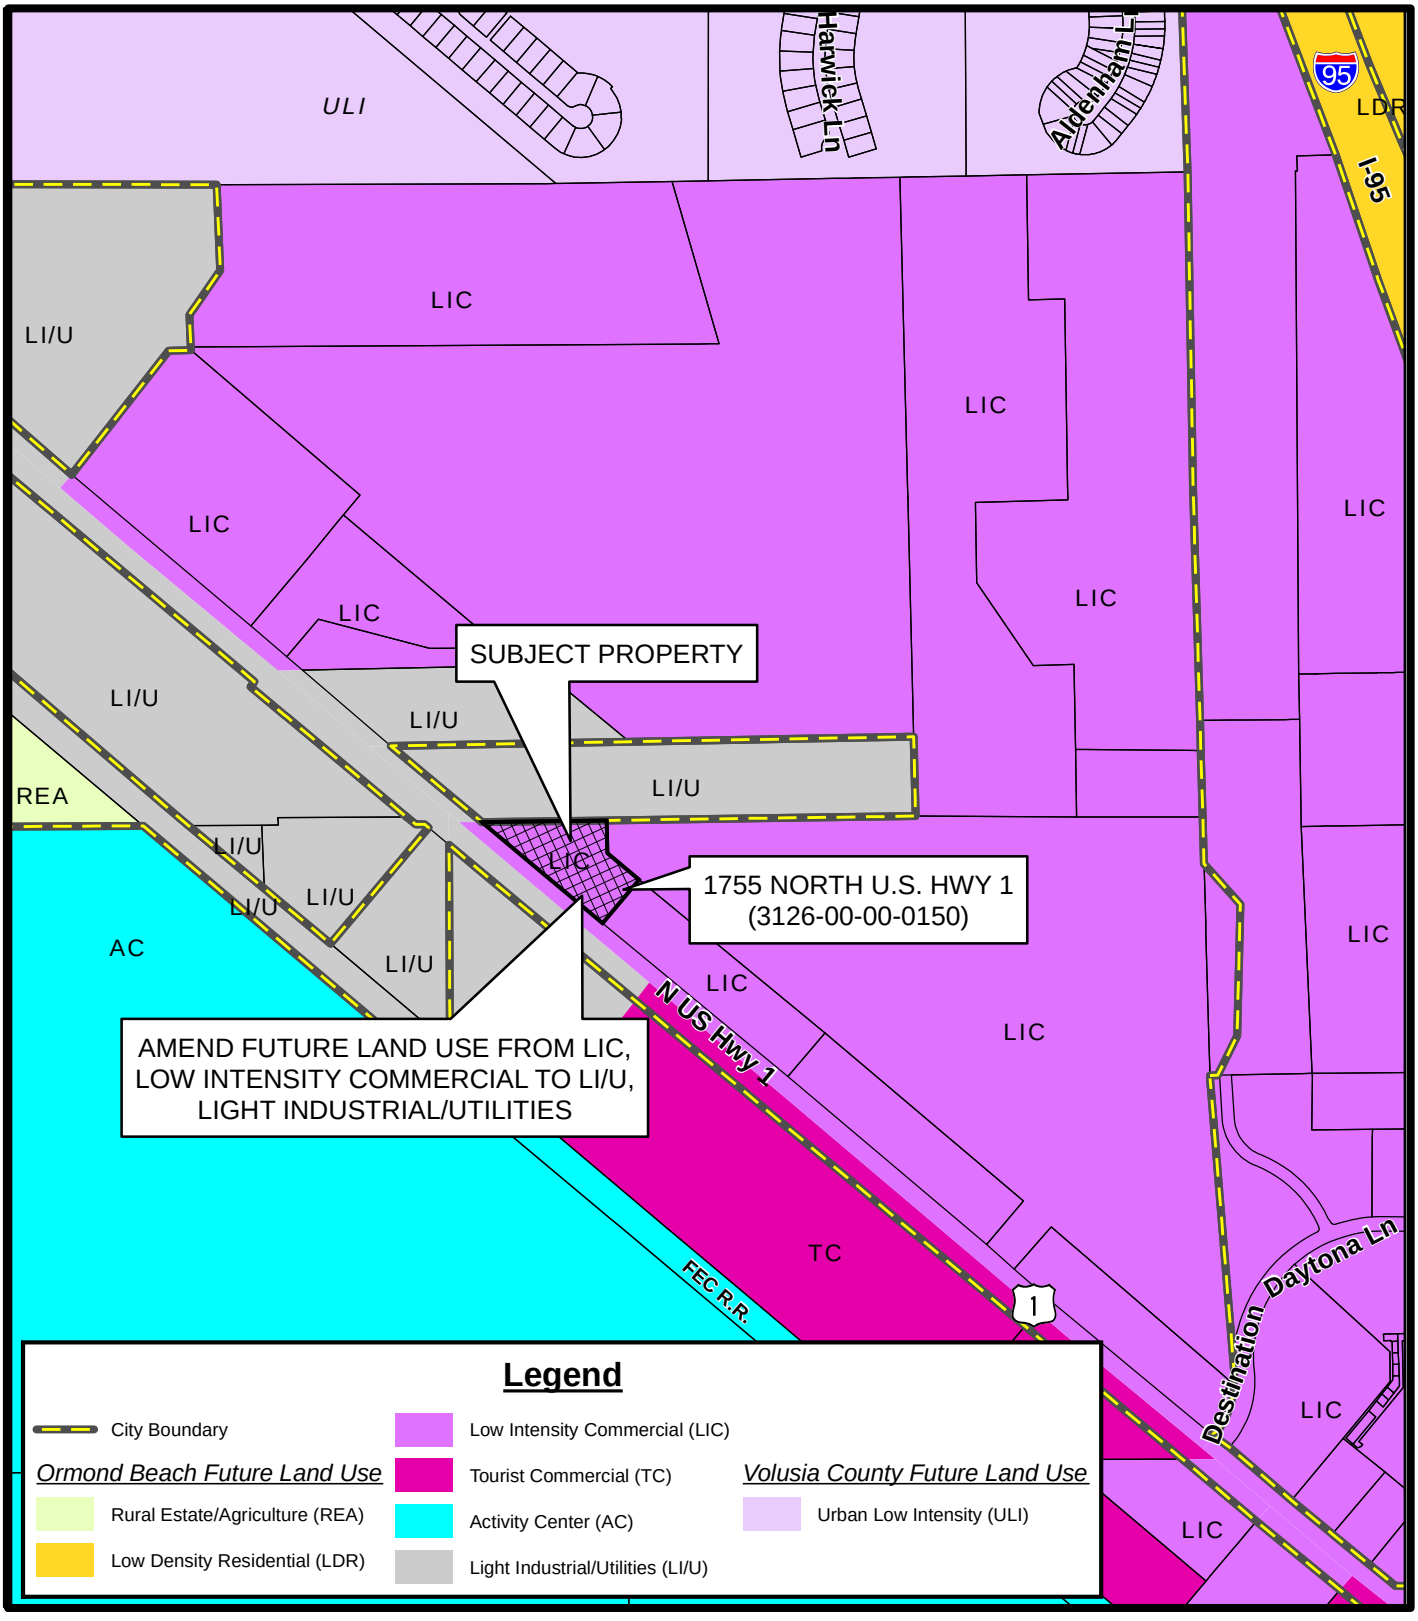
Recreation: Ormond Beach has approximately 602 acres of parkland and facilities and the proposed amendment would have no impact on the city recreation level of service. Based on a city population of 44,671 acres and a required 13 acres of parkland per 1,000 residents, 580.72 acres of parkland is required. The city is in the process of acquiring 901 Airport Road to add an additional 18.60 acres of parkland.

Other Services: City police and fire protection services serve this area. The parcel is located within an approximate 4-5-minute response time from emergency facilities. There is no impact to other city services.

5. Whether the proposed map amendment impacts surrounding jurisdictions.

The proposed land use amendment is not expected to impact surrounding jurisdictions.

RECOMMENDATION:



Staff recommends that the Planning Board recommend **APPROVAL** for a Small-Scale Comprehensive Plan Land Use Map amendment from LIC, "Low Intensity Commercial" to LI/U, "Light/Industrial/Utilities". The tentative City Commission dates are May 16, 2023 and June 6, 2023.

RE: Concurrent Review Request of the Annexation, Comprehensive Plan Amendment & Zoning Amendments for:
1755 US 1 North, Ormond Beach
Waynes Solar, Inc.

Mr. Steven Spraker

Thank you for the opportunity to work with you on the above referenced project. The purpose of this letter is to request that the City of Ormond Beach [City] consider the application for the Small-Scale Land Use Map Amendment concurrently with the accompanying rezoning application for the purpose of the City Commission hearings & decision making, in accordance with FL Stat.

If there is any other information we can provide to assist in review of this request, please do not hesitate to reach out.

Richard L. Hardy

Introductory Letter for Land use & Zoning Changes

Dear Steven,

Wayne Phillips has been an active licensed solar contractor in Ormand Beach for more than 25 years. His company, Wayne's Solar, Inc. has been based in various locations in Ormond area the entire time. The companies continued growth has necessitated acquiring a larger property to expand into. The company plans on running the day-to-day solar operations from this location once a building is completed.

If there is any other information I can provide you to assist this request, please do not hesitate to reach out. Thank you for your consideration.

Sincerely,

Skip Wooden
General manager

DRAFT

Planning Board minutes from

April 13, 2023

ITEM:

LUPA 2023-032

1755 North U.S. Highway 1, Small-Scale Land Use Map Amendment

Board Comments

Mr. Galloway commented that he hopes that the applicant/developer go the extra mile to take care of any concerns aforementioned.

Mr. Railsback reflected on HOA responsibility with short-term rentals and his experience with his HOA and short-term/Airbnb rentals and its effect. There was no language in his HOA contract regarding any rentals and urged that this be addressed so that it does not happen with RidgeHaven. He added the provision about the tree and parking matters in the contract as well.

Mr. du Moulin commended Mr. Storch on his presentation and noted that the developer is exceeding what most developers do.

Attorney Hayes touched on the rental matter, and explained that the City of Ormond Beach generally does not allow rentals in residential areas, but that there has been a push in the Florida Legislature to allow short-term rentals in every jurisdiction, regardless of whether or not those jurisdictions have an ordinance that has been grandfathered in, that prohibits rentals. He urged not to be surprised if in a year, or two, or three if there is a law that preempts the ability to do so. Attorney Hayes stated that the request will be treated as a voluntary concession by the applicant and not an imposition by the City. In the document it will be reflected that it is not being required as a condition for approval, but that the applicant has voluntarily agreed to take care of it.

Mr. Railsback added that in the last few sessions, the Legislature has excluded deed-restricted communities from the aforementioned home-rule, the roll back of the grandfathering of rentals. He emphasized the importance of capturing the specifics in the deed-restrictions in the contract as it is binding and will not be bound to Legislature addressing something in a municipality area.

D. FLUM 2023-032, 1755 North U.S. Highway 1, Future Land Use Map Amendment

Mr. Spraker, Planning Director, explained the request from Wayne's Solar, Inc. for a Land Use Map Amendment from LIC, "Low Intensity Commercial" to "Light/Industrial/Utilities" for a 3.06 acre parcel located at 1755 North U.S. Highway 1. It is currently a vacant parcel of land. He reviewed the wide range of commercial uses that the land use allows. Mr. Spraker stated that the property owner has indicated a desire to construct a business warehouse. Mr. Spraker stated the use is consistent with the surrounding area and staff recommends approval.

Applicant's presentation

Mr. Richard Hardy, Representative, 975 S. Ponce de Leon Blvd., St. Augustine, stated that he is a builder and developer and explained that Wayne's Solar is desiring to move to the proposed location.

Ms. Shull opened it up to the Board for discussion and entertained a motion.

Mr. Galloway asked if this property would be the business site for Wayne's Solar and Mr. Hardy confirmed that is the plan.

Ms. Shull inquired about what was presented regarding the existing land use being 10 maximum units per acre, and the proposed reflecting that the density is not permitted. Mr. Spraker explained that the "Light/Industrial" land use does not allow residential uses.

Mr. Scudiero motioned to approve FLUM 2023-032, 1755 North U.S. Highway 1, Future Land Use Map Amendment. Mr. Galloway seconded it. Vote was called, and the motion was approved (6-0).

E. ZMA 2023-033, 1755 North U.S. Highway 1, Zoning Map Amendment

Mr. Spraker, Planning Director, stated that this request from Wayne's Solar, Inc. is for a Zoning Map Amendment from B-7, Highway Tourist Commercial to I-1, Light Industrial for a 3.06 acre parcel located at 1755 North U.S. Highway 1. Mr. Spraker continued that the zoning designation needs to be consistent with the land use. Mr. Spraker remarked that staff recommends approval.

Ms. Shull opened it up to the Board for discussion and entertained a motion.

Mr. Jorczak motioned to approve ZMA 2023-033, 1755 North U.S. Highway 1, Zoning Map Amendment. Mr. du Moulin seconded it. Vote was called, and the motion was approved (6-0).

F. LDC 2023-043, Land Development Code Amendment: Section 2-21, T-2, Manufactured Home, Special Standards

Mr. Spraker, Planning Director, explained the administrative request to amend Chapter 2, District and General Regulations, Section 2-21, T-2, Manufactured Home zoning district of the Land Development Code (LDC) to re-establish the special standards to allow replacement of manufactured/mobile homes, located within previously established mobile home parks, with new manufactured/mobile homes. Mr. Spraker commented that this standard existed in 2015 and a LDC amendment took it out is because it was believed that there was no existing manufactured or mobile home communities that had the T-2 zoning. Mr. Spraker detailed that there is a property with a T-2 zoning designation that needs the special standards to allow the replacement of existing mobile homes. Mr. Spraker concluded that staff recommends approval.

Board Questions

Mr. Galloway asked if this amendment was specifically for one property. Mr. Spraker confirmed that it was for the Ridgecrest Mobile Home park on North Yonge Street which has a T-2 zoning designation.

Mr. Railsback questioned if the amendment would seek additional areas of the city zoned T-2. He stated his understanding was that it was for existing properties zoned T-2. Mr. Spraker confirmed that the amendment was only for existing T-2 zoned properties.

CITY MANAGER
MEMORANDUM

To: The Honorable Mayor Partington and City Commissioners

Through: Joyce Shanahan, City Manager

From: Steven Spraker, Planning Director

Date: June 6, 2023

Subject: 1755 North U.S. Highway 1, Zoning Map Amendment (SECOND READING)

Commission Goal: Transportation & Community Development - Other

Introduction

This is a request from Wayne's Solar, Inc., property owner, for a zoning map amendment from B-7, Highway Tourist Commercial to I-1, Light Industrial for a 3.06-acre parcel located at 1755 North U.S. Highway 1.

Background

The property has a land use designation of "Low Intensity Commercial" and a city zoning designation of B-7, Highway Tourist Commercial. The subject property is within the North U.S. Highway 1 Interlocal Service Boundary Agreement (ISBA). The North US 1 Interlocal Service Boundary Agreement between the City of Ormond Beach and the County of Volusia established a municipal service area designed to:

- Encourage intergovernmental coordination in planning, service delivery, and boundary adjustments;
- Reduce intergovernmental conflicts and litigation between local governments;
- Promotes sensible boundaries that reduce the costs of local governments;
- Avoid duplicating local services;
- Increase political transparency and accountability; and
- Prevent inefficient service delivery and an insufficient tax base to support the delivery of those services.

The City Commission adopted the original North US 1 ISBA on August 19, 2014 per Ordinance No. 2014-27. Volusia County Council adopted the Interlocal Service Boundary Agreement on August 21, 2014 by Volusia County Ordinance No. 2014-12. Ordinance 2015-05 established the land use amendments for the ISBA and was adopted on January 20, 2015. As part of the land use map amendment adoption, a

map annotation that limits density to eight (8) units per acre and a maximum floor area ratio of 0.50 for retail uses and 0.55 for all other non-residential uses. Ordinance 2015-13 established the city zoning designations for properties within the ISBA and was approved on April 7, 2015.

There is a companion land use map amendment to this zoning map amendment that seeks to amend the subject property from LIC, "Low Intensity Commercial" to LI/U, "Light/Industrial/Utilities". **The purpose of this application is to assign a zoning designation consistent with proposed the LI/U, "Light/Industrial/Utilities" land use.** The applicant has requested, as allowed by state statute, that the land use amendment and zoning map amendment be heard by the City Commission at the same hearings. The zoning map amendment would not be approved until the land use map amendment for the property is effective, typically 31 days after the second City Commission meeting. The applicant has conducted a pre-application meeting with the Site Plan Review Committee and indicated a desire to construct a business warehouse.

Discussion

The purpose of the zoning map amendment is to make the subject property of 3.06 acres consistent with the LI/U, "Light/Industrial/Utilities" land use. The existing zoning designation is B-7, Highway Tourist Commercial and allows a broad range of commercial uses including, retail sales, multi-family, restaurants, personal services, and transient lodging. The proposed zoning designation is I-1, Light Industrial which allows industrial use such as warehouse and business warehouses.
Chapter 1, Article II, Section 1-18(e)(3) of the Land Development Code states that the City Commission shall consider rezonings based on the consistency with the Comprehensive Plan. The zoning map amendment is consistent based upon the following points:

- The impacts on facilities and services be less as a result of the requested zoning map amendment from the existing zoning district designation from B-7, Highway Tourist Commercial to I-1, Light Industrial; and
- The zoning request is consistent with the compatibility matrix outlined in the Land Development Code for the Future Plan Map designation of LI/U, "Light/Industrial/Utilities".

Planning Board
The Planning Board reviewed the amendment at the April 13, 2023 meeting and recommended approval with a 6-0 vote. There were no individuals who spoke for or against this application. The Planning Board minutes are attached to this item.

Budget Impact

There is no budget impact as the result of this zoning map amendment.

Citizen Impact

No citizen impact is expected as the result of this request. The ISBA area contains both commercial and industrial areas. The change to an industrial use is consistent with the city's Comprehensive Plan and the proposed zoning designation is consistent with the land use of LI/U, "Light/Industrial/Utilities".

Recommendation

The Planning Board recommended the City Commission approve a zoning map amendment for a 3.06-acre parcel located at 1755 North U.S. Highway 1 from B-7, Highway Tourist Commercial to I-1, Light Industrial. The zoning map amendment would not be approved until the land use map amendment for the property is effective, typically 31 days after the second City Commission meeting.

ORDINANCE NO. 2023-28

AN ORDINANCE AMENDING PARAGRAPH C, OFFICIAL ZONING MAP, OF SECTION 2-01, ESTABLISHED, OF ARTICLE 1, ESTABLISHMENT OF ZONING DISTRICTS AND OFFICIAL ZONING MAP, OF CHAPTER 2, DISTRICT AND GENERAL REGULATIONS, OF THE CITY OF ORMOND BEACH *LAND DEVELOPMENT CODE*, BY AMENDING THE OFFICIAL ZONING MAP TO REZONE ONE PARCEL OF REAL PROPERTY TOTALING APPROXIMATELY 3.06 ACRES LOCATED AT 1755 NORTH U.S. HIGHWAY 1 (VOLUSIA COUNTY PARCEL NUMBER 3126-00-00-0150), FROM B-7, HIGHWAY TOURIST COMMERCIAL, TO I-1, LIGHT INDUSTRIAL; AUTHORIZING REVISION OF OFFICIAL ZONING MAP; REPEALING ALL INCONSISTENT ORDINANCES OR PARTS THEREOF; AND SETTING FORTH AN EFFECTIVE DATE.

WHEREAS, Wayne's Solar, Inc., a Florida For Profit Corporation ("Applicant/Property Owner") is the fee simple owner of certain real property consisting of approximately 3.06 acres located at 1755 North U.S. Highway 1 (Volusia County parcel number: 3126-00-00-0150), which is legally described and depicted in Exhibit "A" ("Property") attached hereto and incorporated herein, and

WHEREAS, the Applicant/Property Owner has submitted an application to the city to re-zone the Property from B-7, Highway Tourist Commercial, to I-1, Light Industrial, and

WHEREAS, the Property to be re-zoned is less than ten contiguous acres, consisting of approximately 3.06 contiguous acres, and

WHEREAS, the Applicant has requested the proposed zoning map amendment be reviewed and acted upon concurrently with the accompanying small-scale land use *Comprehensive Plan* amendment pursuant to Section 163.3184(12), *Florida Statutes*, and

WHEREAS, the proposed rezoning shall be contingent upon the proposed *Comprehensive Plan* amendment becoming effective, and

WHEREAS, the Planning Board held a public hearing regarding this matter as required by Chapter 1, Article II, Section 1-15(d)(3), of the *Land Development Code*, and

WHEREAS, the City Commission held a public hearing regarding this matter as required by Section 166.041(3)(c)(1), *Florida Statutes*, and

WHEREAS, all applicable legal notice requirements have been complied with, and

WHEREAS, the City Commission finds the proposed rezoning to be consistent with the Future Land Use Element, and the Future Land Use Map, of the City's adopted *Comprehensive Plan*, now therefore,

BE IT ENACTED BY THE PEOPLE OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:

SECTION ONE. The foregoing recitals are incorporated herein as the findings of the City Commission.

SECTION TWO. Paragraph C, Official Zoning Map, of Section 2-01, Established, of Article I, Establishment of Zoning Districts and Official Zoning Map, of Chapter 2, District and General Regulations, of the *Land Development Code* of the City of Ormond Beach, Florida is hereby amended by amending the Official Zoning Map, to change the zoning designation of one parcel of property located at 1755 North U.S. Highway 1 (Volusia County parcel number: 3126-00-00-0150), as more particularly described and depicted in Exhibit "A" from B-7, Highway Tourist Commercial, to I-1, Light Industrial, as shown and depicted in Exhibit "B".

SECTION THREE. All Ordinances or parts of Ordinances in conflict herewith are hereby repealed to the extent of such conflict.

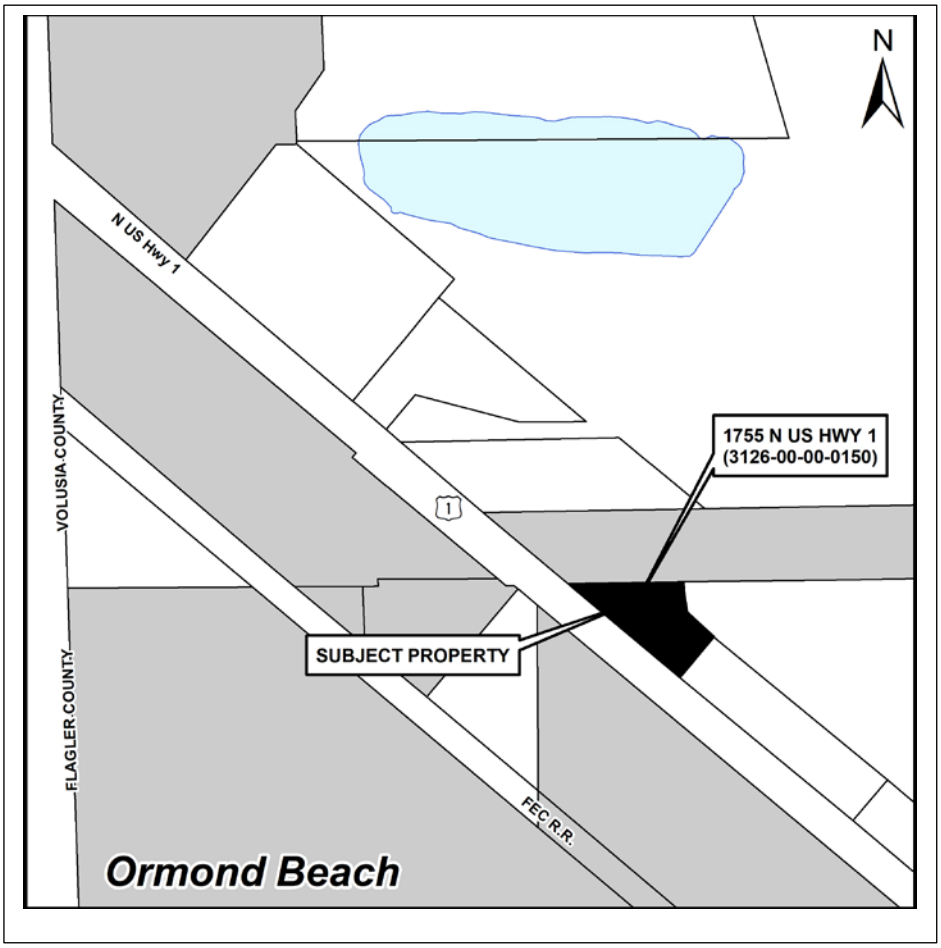
SECTION FOUR. Based upon the Applicant's request, the application for zoning changes is being concurrently reviewed and acted upon with the *Comprehensive Plan* land use amendment as authorized by Section 163.3184(12), *Florida Statutes*. The change in zoning is contingent, and shall become effective, upon the proposed *Comprehensive Plan* amendment (Ordinance 2023-27) becoming effective.

PASSED UPON at the first reading of the City Commission, this 16th day of May, 2023.

PASSED UPON at the second and final reading of the City Commission, this 6th day of June, 2023.

BILL PARTINGTON
Mayor

ATTEST:



SUSAN CARROLL DAUDERIS
City Clerk

STAFF REPORT

City of Ormond Beach
Department of Planning

MEETING DATE: April 13, 2023
SUBJECT: 1755 North U.S. Highway 1, Zoning Map Amendment
APPLICANT: Wayne's Solar, Inc., property owner
NUMBER: LUPA 2023-033
PROJECT PLANNER: Steven Spraker, AICP, Planning Director

INTRODUCTION: This is a request from Wayne's Solar, Inc., property owner, for a zoning map amendment from B-7, Highway Tourist Commercial to I-1, Light Industrial for a 3.06-acre parcel located at 1755 North U.S. Highway 1. The subject property is shown in Exhibit 1:

EXHIBIT 1: Subject property, 1755 North U.S. Highway 1:

BACKGROUND: The property has a land use designation of "Low Intensity Commercial" and a city zoning designation of B-7, Highway Tourist Commercial. The subject property is within the North U.S. Highway 1 Interlocal Service Boundary Agreement (ISBA). The North US 1 Interlocal Service Boundary Agreement between the City of Ormond Beach and the County of Volusia established a municipal service area designed to:

- Encourage intergovernmental coordination in planning, service delivery, and boundary adjustments;
- Reduce intergovernmental conflicts and litigation between local governments;
- Promotes sensible boundaries that reduce the costs of local governments;
- Avoid duplicating local services;
- Increase political transparency and accountability; and
- Prevent inefficient service delivery and an insufficient tax base to support the delivery of those services.

The City Commission adopted the original North US 1 Interlocal Service Boundary Agreement (ISBA) on August 19, 2014 per Ordinance No. 2014-27. Volusia County Council adopted the Interlocal Service Boundary Agreement on August 21, 2014 by Volusia County Ordinance No. 2014-12. Ordinance 2015-05 established the land use amendments for the ISBA and was adopted on January 20, 2015. As part of the land use map amendment adoption, a map annotation that limits density to eight (8) units per acre and a maximum floor area ratio of 0.50 for retail uses and 0.55 for all other non-residential uses. Ordinance 2015-13 established the city zoning designations for properties within the ISBA and was approved on April 7, 2015.

There is a companion land use map amendment to this zoning map amendment that seeks to amend the subject property from LIC, "Low Intensity Commercial" to LI/U, "Light/Industrial/Utilities". **The purpose of this application is to assign a zoning designation consistent with proposed the LI/U, "Light/Industrial/Utilities" land use.** The applicant has conducted a pre-application meeting with the Site Plan Review Committee and indicated a desire to construct a business warehouse.

Application process: The proposed zoning map amendment schedule of the subject property is as follows:

EXHIBIT 2: Tentative zoning map amendment schedule:

Action	Date
Planning Board	April 18, 2023
City Commission, 1st Reading	May 16, 2023
City Commission, 2nd Reading	June 6, 2023

The applicant has submitted a letter (ATTACHMENT 3) requesting that the land use and zoning applications be heard together at the City Commission per Section 163.3184(12), *Florida Statues*. The zoning map amendment would not be effective until the final approval of the land use amendment.

The following public notices have or are required to occur:

EXHIBIT 3: Public Notice:

Public Notice	Date	Notes
Planning Board	March 27, 2023	300' radius
Newspaper advertisement for Planning Board	March 31, 2023	
Abutter letters for City Commission meetings	April 1, 2023	300' radius
Newspaper advertisement for City Commission, 2nd reading	May 26, 2023	

The project information has also been posted on the city website under the Planning Department at: (1) Development Reports, https://www.ormondbeach.org/247/Development-Projects and (2) Public Hearing Advertisements and Notices, https://www.ormondbeach.org/1000/Public-Hearing-Advertisements-and-Notice.

CONCLUSION/CRITERIA FOR APPROVAL:

Section 1-15(D)(3) of the Land Development Code states that the Planning Board shall review non-planned development rezonings based on the Development Order criteria in Section 1-15(E) (1-10) of the Land Development Code which are analyzed below:

1. **The proposed development conforms to the standards and requirements of this Code and will not create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare, or quality of life.**

   The purpose of the zoning map amendment is to make the subject property of 3.06 acres consistent with the LI/U, "Light/Industrial/Utilities" land use. The existing zoning designation is B-7, Highway Tourist Commercial and allows a broad range of commercial uses including, retail sales, multi-family, restaurants, personal services, and transient lodging. The proposed zoning designation is I-1, Light Industrial which allows industrial use such as warehouse and business warehouses.

   The Future Land Use Map designation is undergoing an amendment to LI/U, "Light/Industrial/Utilities". Section 2-02 of the Land Development Code, Future land use map designations and zoning districts, provides the following compatible zoning districts with the "Residential, Office, Retail":

   EXHIBIT 4: Section 2-02 of the Land Development Code, compatible land use designation and zoning districts:

Industrial/Utilities	I-1, Light Industrial
	I-2, Reserved
	PID, Planned Industrial Development

The I-2 zoning district is reserved and the PID, Planned Industrial Development requires a minimum of ten (10) acres. The I-1, Light Industrial is the sole zoning district consistent with the LI/U, "Light/Industrial/Utilities" land use.

2. **The proposed development is consistent with the Comprehensive Plan.**

   The zoning map amendment is consistent with the goal, objective, and policies of the Comprehensive Plan. There is the same LI/U, "Light/Industrial/Utilities" land use and I-1, Light Industrial zoning designation abutting the property and across US1. A business warehouse use would be an appropriate use at the subject property.

3. **The proposed development will not adversely impact environmentally sensitive lands or natural resources, including but not limited to waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells.**

   Site development applications are required to provide analysis of environmentally sensitive lands or natural resources, including but not limited to water bodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells. The zoning map amendment does not approve a specific development plan and this criterion would be reviewed as part of a development application.

4. **The proposed use will not substantially or permanently depreciate the value of surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties**.

   The proposed zoning map amendment is consistent with the property's proposed future land use designation and staff does not believe the project would depreciate the value of surrounding vacant property. There is the same LI/U, "Light/Industrial/Utilities" land use and I-1, Light Industrial zoning designation abutting the property and across US1. The project does not abut any residential uses. The project will not create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties.

5. **There are adequate public facilities to serve the development, including but not limited to roads, sidewalks, bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds.**

   Adequate public facilities to serve the proposed development, including roads, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds would be reviewed at the submission of a site plan. The zoning map amendment does not approve a specific development plan and this criterion would be reviewed as part of a development application reviewed by the Site Plan Review Committee.

6. **Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe. This finding shall be based on a traffic report where**

available, prepared by a qualified traffic consultant, engineer or planner which details the anticipated or projected effect of the project on adjacent roads and the impact on public safety.

The zoning map amendment does not approve a specific development plan and this criterion would be reviewed as part of a development application reviewed by the Site Plan Review Committee. The analysis with the land use amendment determined that the land use and zoning map amendments reduce the maximum traffic impacts allowed.

7. **The proposed development is functional in the use of space and aesthetically acceptable.**

   There is no development proposed so the criterion is not applicable.

8. **The proposed development provides for the safety of occupants and visitors**.

   There is no development proposed so the criterion is not applicable.

9. **The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area.**

   There is no development proposed so the criterion is not applicable.

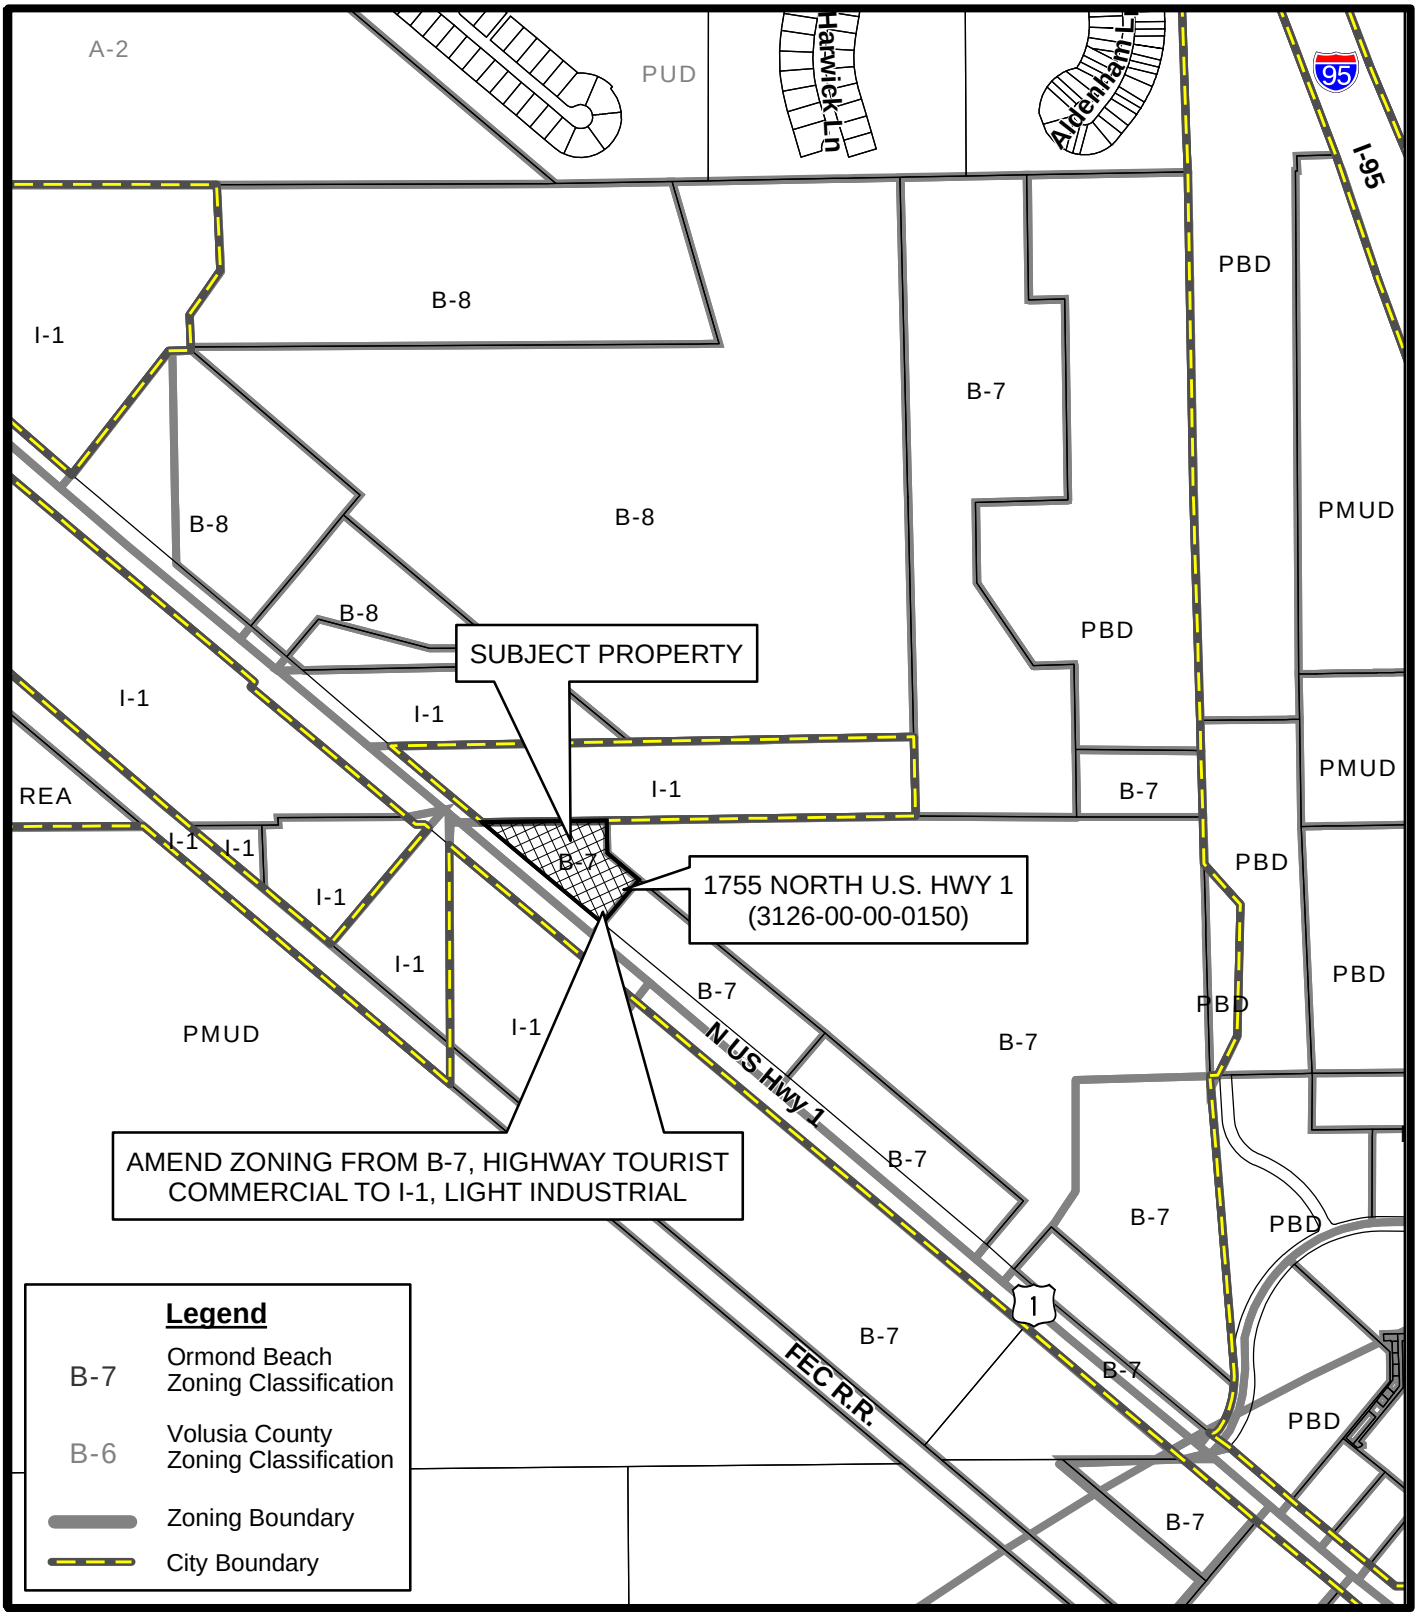
10. **The testimony provided at public hearings**.

    There has not been a public hearing at this time. The comments from the Planning Board meeting will be incorporated into the City Commission packet.

Chapter 1, Article II, Section 1-18(e)(3) of the Land Development Code states that the City Commission shall consider rezonings based on the consistency with the Comprehensive Plan. The zoning map amendment is consistent based upon the following points:

- The impacts on facilities and services be less as a result of the requested zoning map amendment from the existing zoning district designation from B-7, Highway Tourist Commercial to I-1, Light Industrial; and
- The zoning request is consistent with the compatibility matrix outlined in the Land Development Code for the Future Plan Map designation of LI/U, “Light/Industrial/Utilities”.

RECOMMENDATION:



Staff recommends that the Planning Board recommend **APPROVAL** to the City Commission for a zoning map amendment for a 3.06-acre parcel located at 1755 North U.S. Highway 1 from B-7, Highway Tourist Commercial to I-1, Light Industrial.

RE: Concurrent Review Request of the Annexation, Comprehensive Plan Amendment & Zoning Amendments for:
1755 US 1 North, Ormond Beach
Waynes Solar, Inc.

Mr. Steven Spraker

Thank you for the opportunity to work with you on the above referenced project. The purpose of this letter is to request that the City of Ormond Beach [City] consider the application for the Small-Scale Land Use Map Amendment concurrently with the accompanying rezoning application for the purpose of the City Commission hearings & decision making, in accordance with FL Stat.

If there is any other information we can provide to assist in review of this request, please do not hesitate to reach out.

Introductory Letter for Land use & Zoning Changes

Dear Steven,

Wayne Phillips has been an active licensed solar contractor in Ormand Beach for more than 25 years. His company, Wayne's Solar, Inc. has been based in various locations in Ormond area the entire time. The companies continued growth has necessitated acquiring a larger property to expand into. The company plans on running the day-to-day solar operations from this location once a building is completed.

If there is any other information I can provide you to assist this request, please do not hesitate to reach out. Thank you for your consideration.

Sincerely,

Skip Wooden
General manager

Section 2-32, I-1, Light Industrial zoning district

Sec. 2-32. I-1, Light Industrial Zoning District.

A. PURPOSE:	The purpose of the I-1, Light Industrial Zoning District is to provide sites in appropriate locations for light industrial operations which do not generate objectionable on- or off-site impacts including odors; smoke; dust; refuse; electromagnetic interference; or noise (in excess of that customary to loading, unloading, and handling of goods and materials beyond the lot on which the facility is located); or which would have an adverse impact on the city's wastewater treatment system; or result in hazardous environments for workers or visitors. Consistent with the city's comprehensive plan, the I-1 zoning district is intended to implement comprehensive plan policies for managing light industrial land uses. This district is not intended to accommodate heavy industrial activities such as those identified herein as prohibited, nor is it intended to accommodate other heavy industrial uses.

DRAFT

Planning Board minutes from

April 13, 2023

ITEM:

LUPA 2023-033
1755 North U.S. Highway 1,
Zoning Map Amendment

Ms. Shull inquired about what was presented regarding the existing land use being 10 maximum units per acre, and the proposed reflecting that the density is not permitted. Mr. Spraker explained that the "Light/Industrial" land use does not allow residential uses.

Mr. Scudiero motioned to approve FLUM 2023-032, 1755 North U.S. Highway 1, Future Land Use Map Amendment. Mr. Galloway seconded it. Vote was called, and the motion was approved (6-0).

E. ZMA 2023-033, 1755 North U.S. Highway 1, Zoning Map Amendment

Mr. Spraker, Planning Director, stated that this request from Wayne's Solar, Inc. is for a Zoning Map Amendment from B-7, Highway Tourist Commercial to I-1, Light Industrial for a 3.06 acre parcel located at 1755 North U.S. Highway 1. Mr. Spraker continued that the zoning designation needs to be consistent with the land use. Mr. Spraker remarked that staff recommends approval.

Ms. Shull opened it up to the Board for discussion and entertained a motion.

Mr. Jorczak motioned to approve ZMA 2023-033, 1755 North U.S. Highway 1, Zoning Map Amendment. Mr. du Moulin seconded it. Vote was called, and the motion was approved (6-0).

F. LDC 2023-043, Land Development Code Amendment: Section 2-21, T-2, Manufactured Home, Special Standards

Mr. Spraker, Planning Director, explained the administrative request to amend Chapter 2, District and General Regulations, Section 2-21, T-2, Manufactured Home zoning district of the Land Development Code (LDC) to re-establish the special standards to allow replacement of manufactured/mobile homes, located within previously established mobile home parks, with new manufactured/mobile homes. Mr. Spraker commented that this standard existed in 2015 and a LDC amendment took it out is because it was believed that there was no existing manufactured or mobile home communities that had the T-2 zoning. Mr. Spraker detailed that there is a property with a T-2 zoning designation that needs the special standards to allow the replacement of existing mobile homes. Mr. Spraker concluded that staff recommends approval.

Board Questions

Mr. Galloway asked if this amendment was specifically for one property. Mr. Spraker confirmed that it was for the Ridgecrest Mobile Home park on North Yonge Street which has a T-2 zoning designation.

Mr. Railsback questioned if the amendment would seek additional areas of the city zoned T-2. He stated his understanding was that it was for existing properties zoned T-2. Mr. Spraker confirmed that the amendment was only for existing T-2 zoned properties.

CITY MANAGER
MEMORANDUM

To: The Honorable Mayor Partington and City Commissioners

Through: Joyce Shanahan, City Manager

From: Steven Spraker, Planning Director

Date: June 6, 2023

Subject: Land Development Code Amendment, T-2 Zoning District, Special Standards (SECOND READING)

Commission Goal: Transportation & Community Development - Other

Introduction

This is an administrative request to amend Chapter 2, District and General Regulations, Article II, District Regulations, Section 2-21, T-2, Manufactured Home zoning district of the Land Development Code, to re-establish the special standards to allow replacement of manufactured/mobile homes, located within previously established mobile home parks, with new manufactured/mobile homes. The purpose of the amendment is to permit replacement of manufactured/mobile homes, located within established manufactured/mobile home parks, with new manufactured/mobile homes as needed.

Background

Section 2-21, T-2, Manufactured Home zoning district of the Land Development Code previously contained language that allowed replacement of existing mobile home in conformance with Uniform Fire Safety Standards for mobile home parks and recreational vehicle parks, Rule 69A-42-001. The regulation was designed to allow the replacement of existing mobile homes in mobile home parks that may not meet the existing zoning district standards. One benefit of this regulation is that older mobile homes are able to be replaced as needed.

There was a 2015 Land Development Code amendment that deleted the section that is now proposed to be added back into the Land Development Code. Staff's review of the issue and the 2015 Land Development Code amendment resulted in the following conclusions:

1. The 2015 amendment did not realize or identify the existing T-2, Manufactured Home zoning of the Ridgecrest Mobile Home at 170 North Yonge Street.
2. One solution would be to amend the zoning from T-2, Manufactured Home to T-1, Manufactured/Mobile Home.

3. Another solution would be to amend the Land Development Code to place back the special standards language that was deleted in 2015 for the T-2, Manufactured Home zoning district.

Staff has elected to amend the Land Development Code to re-establish the language under the special standards section.

Discussion

The proposed amendment seeks to add the special standards back to the T-2, Manufactured Home zoning district prior to Ordinance 2015-23. The goals of this amendment are to:

1. Re-establish the Special Standards to the T-2, Manufactured Home zoning district. The addition of special standards for previously existing mobile home parks will ensure that replacement of mobile homes in mobile home communities will be able to replace their homes with new mobile homes without creating dimensional non-conformities;
2. Maintain the provisions of the Uniform Fire Safety Standards for mobile home parks. At a minimum, mobile homes must maintain a certain distance between each home as specified in the Uniform Fire Safety Standards for Mobile Home Parks;
3. To re-establish that existing mobile home parks with the T-2, Manufactured Home designation can maintain the existing number of mobile homes and to allow the change out of individual units with new units as necessary; and
4. It is not the intent of this amendment to expand the use of the T-2, Manufactured Home zoning district to vacant land, but instead to allow previously existing mobile home parks to replace existing units with new units without creating dimensional non-conformities.

Planning Board

The Planning Board reviewed the Land Development Code amendment at the April 13, 2023 meeting and recommended approval with a 6-0 vote. There were no individuals who spoke for or against the Land Development Code amendment. The Planning Board minutes are attached to this item.

Budget Impact

There is no budget impact as the result of this Land Development Code amendment.

Citizen Impact

No citizen impact is expected as the result of this request.

Recommendation

The Planning Board recommended the City Commission approve an amendment to

Chapter 2, District and General Regulations, Article II, District Regulations, Section 2-21, T-2, Manufactured Home zoning district of the Land Development Code to re-establish the special standards to allow replacement of manufactured/mobile homes, located within previously established mobile home parks, with new manufactured/mobile homes.

ORDINANCE NO. 2023-29

AN ORDINANCE AMENDING CHAPTER 2, DISTRICT AND GENERAL REGULATIONS, ARTICLE II, DISTRICT REGULATIONS, SECTION 2-21, T-2, MANUFACTURED HOME ZONING DISTRICT, OF THE CITY OF ORMOND BEACH LAND DEVELOPMENT CODE, BY CREATING SPECIAL STANDARDS FOR PREVIOUSLY EXISTING MANUFACTURED/MOBILE HOME PARKS; REPEALING ALL INCONSISTENT ORDINANCES OR PARTS THEREOF; PROVIDING FOR SEVERABILITY; AND SETTING FORTH AN EFFECTIVE DATE.

WHEREAS, this is a request to amend Chapter 2, District and General Regulations, Article II, District Regulations, Section 2-21, T-2, Manufactured Home Zoning District, of the City of Ormond Beach *Land Development Code* to re-establish the special standards to allow the replacement of manufactured/mobile homes located within previously established mobile home parks, with new manufactured/mobile homes, and

WHEREAS, the local planning agency, being the Planning Board of the City of Ormond Beach, has conducted a public hearing on April 13, 2023, on the requested amendments and has made recommendations thereon to the City Commission, and

WHEREAS, all applicable notice requirements of Section 166.041(3)(a), *Florida Statutes*, have been complied with, and

WHEREAS, the City Commission finds the amendment to be consistent with the provisions of the *Comprehensive Plan* of the City of Ormond Beach, and in the overall best interest of the public health, safety and welfare, now therefore,

BE IT ENACTED BY THE PEOPLE OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:

SECTION ONE. Section 2-21, T-2, Manufactured Home Zoning District, of Article II, District Regulations, of Chapter 2, District and General Regulations, of the City of Ormond Beach *Land Development Code* is hereby amended as follows:

Sec. 2-21. T-2, Manufactured Home Zoning District.

A. PURPOSE ****No change to existing text****

B. DIMENSIONAL STANDARDS ****No change to existing text****

C. PERMITTED USES ****No change to existing text****

D. CONDITIONAL USES ****No change to existing text****

E. SPECIAL EXCEPTION USES ****No change to existing text****

F. OTHER STANDARDS ****No change to existing text****

G. PERMITTED ACCESSORY USES: ****No change to existing text****

H. SPECIAL STANDARDS:

Previously Existing Manufactured/Mobile Home Parks. The provisions of this section notwithstanding, individual units within manufactured home parks which were in operation on July 1, 1984, and which have continued in operation without abandonment or closure for 6 months, and which manufactured home parks do not comply with one or more of the dimensional requirements set forth in subsection (b) of this section, may be replaced with new units provided there is no greater nonconformity than existed with prior unit and provided that the Uniform Fire Safety Standards for Mobile Home Parks, as set forth in F.A.C. 69A-42.0041, as the same may be amended from time to time, are fully complied with.

The following dimensions shall apply to lots of record in existence on November 6, 1996, that are located within the T-2 Manufactured Home zoning district, when such lots are used for a mobile home, a single-family modular dwelling unit or a single-family dwelling unit:

a. Lot Width: 50'.
b. Lot Area: 5,500 square feet.

SECTION TWO. All Ordinances or parts of Ordinances in conflict herewith are hereby repealed to the extent of such conflict.

SECTION THREE. In the event any word, phrase, clause, sentence, paragraph, term, or provision of this Ordinance shall be held to be invalid by a court of competent jurisdiction, such judicial determination shall not affect any other word, clause, phrase, sentence, paragraph, term or provision, of this Ordinance, and the remainder of this Ordinance shall remain in full force and effect.

SECTION FOUR. This Ordinance shall take effect immediately upon its adoption.

PASSED UPON at the first reading of the City Commission, this 16th day of May, 2023.

PASSED UPON at the second and final reading of the City Commission, this 6th day of June, 2023.

STAFF REPORT

City of Ormond Beach
Department of Planning

DATE: April 13, 2023

SUBJECT: Land Development Code Amendment: Section 2-21, T-2, Manufactured Home zoning district – re-establishing special standards for previously existing manufactured/mobile home parks

APPLICANT: Administrative

NUMBER: LDC 2023-43

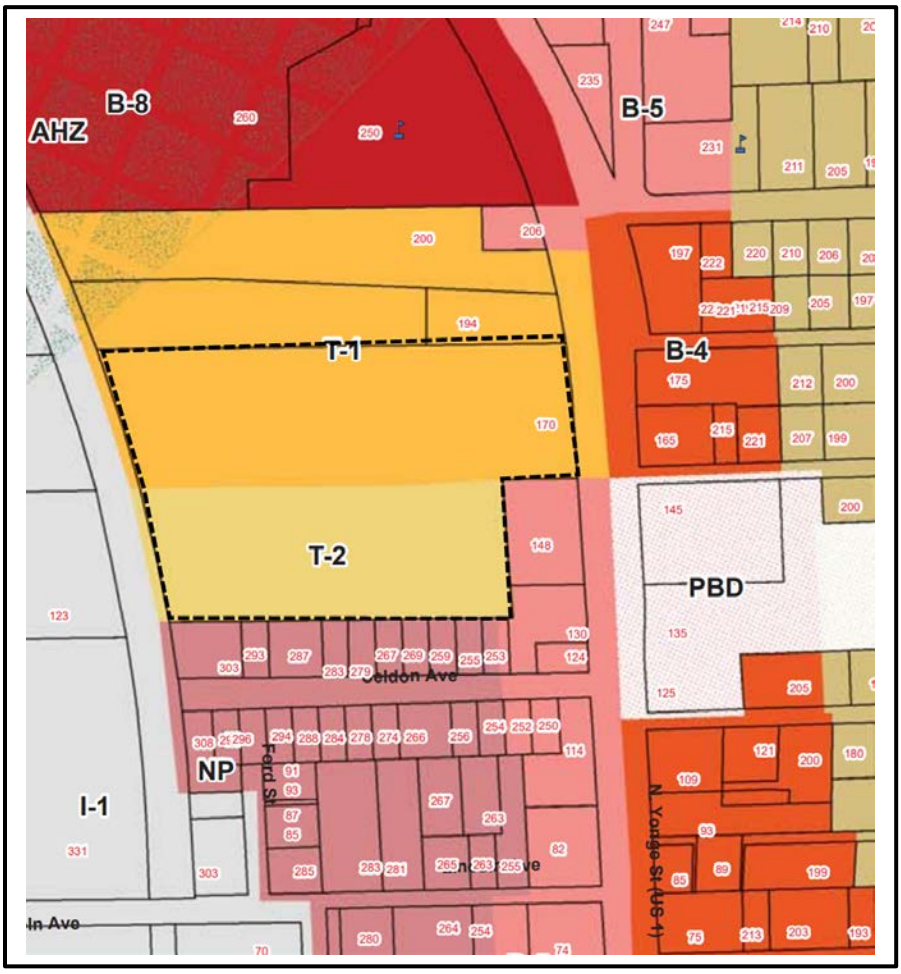
PROJECT PLANNER: Steven Spraker, AICP, Planning Director

SECTION 1, INTRODUCTION:

This is an administrative request to amend Chapter 2, District and General Regulations, Article II, District Regulations, Section 2-21, T-2, Manufactured Home zoning district of the Land Development Code, to re-establish the special standards to allow replacement of manufactured/mobile homes, located within previously established mobile home parks, with new manufactured/mobile homes. The purpose of the amendment is to permit replacement of manufactured/mobile homes, located within established manufactured/mobile home parks, with new manufactured/mobile homes as needed.

SECTION 2, BACKGROUND:

Section 2-21, T-2, Manufactured Home zoning district of the Land Development Code previously contained language that allowed replacement of existing mobile home in conformance with Uniform Fire Safety Standards for mobile home parks and recreational vehicle parks, Rule 69A-42-001. The regulation was designed to allow the replacement of existing mobile homes in mobile home parks that may not meet the existing zoning district standards. One benefit of this regulation is that as older mobile homes are able to be replaced as needed.



On June 2, 2015, the City Commission adopted Ordinance 2015-23 that:

1. Amended Chapter 2, District and General Regulations, Article II, District Regulations, Section 2-21, T-2, Manufactured Home zoning district of the Land Development Code **to delete** the special standards to allow replacement of manufactured homes, located within previously established Manufactured Home Parks, with new manufactured homes.

2. Amended Chapter 2, District and General Regulations, Article II, District Regulations, Section 2-20, T-1, Manufactured/Mobile Home Zoning District of the Land Development Code **to add** special standards to allow replacement of manufactured/mobile homes, located within previously established Manufactured/Mobile Home Parks, with new manufactured/mobile homes.

The analysis of the 2015 report stated: “Since the City of Ormond Beach only permits manufactured/mobile home parks under the T-1 Zoning District, the special standards that are proposed for elimination under the T-2 Zoning District should be added to the T-1 Zoning District.”

The 2015 report was correct in that manufactured/mobile parks are only allowed in the T-1, Manufactured/Mobile Home zoning district. The T-2, Manufactured Home zoning district is designed to allowed manufactured or mobile homes on fee simple lots (where the property owners own both the land and manufactured or mobile home). An issue has arisen with the Ridgecrest Mobile Home Park that has a split zoning designation of T-1, Manufactured/Mobile Home and T-2, Manufactured Home. The zoning map of 170 North Yonge Street is shown below:

There is concern regarding the ability of the Ridgecrest Mobile Home Park replacing and updating existing mobile homes based upon the removal the special standards. Staff’s review of the issue and the 2015 Land Development Code amendment resulted in the following conclusions:

1. The 2015 amendment did not realize or identify the existing T-2, Manufactured Home zoning of the Ridgecrest Mobile Home at 170 North Yonge Street.

2. One solution would be to amend the zoning from T-2, Manufactured Home to T-1, Manufactured/Mobile Home.
3. Another solution would be to amend the Land Development Code to place back the special standards language that was deleted in 2015 for the T-2, Manufactured Home zoning district.

Staff has elected to amend the Land Development Code to re-establish the language under the special standards section.

SECTION 3, ANALYSIS:

The proposed amendment seeks to add the special standards back to the T-2, Manufactured Home zoning district prior to Ordinance 2015-23. The goals of this amendment are to:

a. Re-establish the Special Standards to the T-2, Manufactured Home zoning district. The addition of special standards for previously existing mobile home parks will ensure that replacement of mobile homes in mobile home communities will be able to replace their homes with new mobile homes without creating dimensional non-conformities;
b. Maintain the provisions of the Uniform Fire Safety Standards for mobile home parks. At a minimum, mobile homes must maintain a certain distance between each home as specified in the Uniform Fire Safety Standards for Mobile Home Parks;
c. To re-establish that existing mobile home parks with the T-2, Manufactured Home designation can maintain the existing number of mobile homes and to allow the change out of individual units with new units as necessary; and
d. It is not the intent of this amendment to expand the use of the T-2, Manufactured Home zoning district to vacant land, but instead to allow previously existing mobile home parks to replace existing units with new units without creating dimensional non-conformities.

The amendment proposes the same text that was deleted with Ordinance 2015-23 and exists within the T-1 Manufactured/Mobile Home zoning district, as shown below:

H. SPECIAL STANDARDS:

Previously Existing Manufactured/Mobile Home Parks. The provisions of this section notwithstanding, individual units within manufactured home parks which were in operation on July 1, 1984, and which have continued in operation without abandonment or closure for 6 months, and which manufactured home parks do not comply with one or more of the dimensional requirements set forth in subsection (b) of this section, may be replaced with new units provided there is no greater nonconformity than existed with prior units and provided that the Uniform Fire Safety Standards for Mobile Home Parks, as set forth in F.A.C. 69A-42.0041, as the same may be amended from time to time, are fully complied with.

The following dimensions shall apply to lots of record in existence on November 6, 1996, that are located within the T-1 Manufactured/Mobile Home zoning district,

when such lots are used for a mobile home, a single-family modular dwelling unit or a single-family dwelling unit:

a. Lot Width: 50'.
b. Lot Area: 5,500 square feet.

SECTION 4, CONCLUSION:

There are certain criteria that must be evaluated before adoption of an amendment. According to the Land Development Code, the Planning Board must consider the following criteria when making their recommendation.

1. **The proposed development conforms to the standards and requirements of this Code and will not create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare or quality of life.**

   The proposed Land Development Code amendment will not create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare or quality of life. The purpose of the amendment is to re-establish the text that was existing prior to Ordinance 2015-23. The Land Development Code amendment will allow replacement of old units with new units under the T-2, Manufactured Home zoning district without creating dimensional non-conformities. In cases where existing units do not meet the T-2, Manufactured Home zoning district dimensional standards, an old unit will be allowed to be replaced with a new unit provided the standards of the Uniform Fire Safety Standards for Mobile Home Park can be met.

2. **The proposed development is consistent with the Comprehensive Plan.**

   The proposed Land Development Code amendment is consistent with the Comprehensive Plan. Objective 2.1 of the Future Land Use Element of the Comprehensive Plan discussed the need to update Land Development Code regulations. The amendment is a matter of housekeeping to include special standards for previously existing manufactured/mobile home parks.

3. **The proposed development will not adversely impact environmentally sensitive lands or natural resources, including but not limited to waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells.**

   The proposed Land Development Code amendments will not have an adverse impact on environmentally sensitive lands.

4. **The proposed use will not substantially or permanently depreciate the value of surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties.**

   The proposed Land Development Code amendments will have no adverse effect on surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare or visual impacts on adjoining properties.

5. There are adequate public facilities to serve the development, including but not limited to roads, sidewalks, bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds.

The proposed Land Development Code amendments are not applicable to public facilities.

6. Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe. This finding shall be based on a traffic report where available, prepared by a qualified traffic consultant, engineer or planner which details the anticipated or projected effect of the project on adjacent roads and the impact on public safety.

The proposed Land Development Code amendments will not result in a hazardous situation for adjoining property owners.

7. The proposed development is functional in the use of space and aesthetically acceptable.

There is no development proposed for this amendment. The application pertains to a Land Development Code amendment.

8. The proposed development provides for the safety of occupants and visitors.

There is no development proposed for this amendment. The application pertains to a Land Development Code amendment.

9. The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area.

There is no development proposed for this amendment. The application pertains to a Land Development Code amendment.

10. The testimony provided at public hearings.

The comments from the Planning Board meeting will be incorporated into the City Commission packet.

SECTION 5, RECOMMENDATION:

It is recommended that the Planning Board **APPROVE** an amendment to Chapter 2, District and General Regulations, Article II, District Regulations, Section 2-21, T-2, Manufactured Home zoning district of the Land Development Code to re-establish the special standards to allow replacement of manufactured/mobile homes, located within previously established mobile home parks, with new manufactured/mobile homes. The tentative City Commission public hearing dates are May 16, 2023 and June 6, 2023.

T-2 Manufactured Home Zoning

DRAFT

Planning Board minutes from

April 13, 2023

ITEM:

LDC 2023-43

Land Development Code Amendment: Section 2-21, T-2, Manufactured Home zoning district – re-establishing special standards for previously existing manufactured/mobile home parks

Ms. Shull inquired about what was presented regarding the existing land use being 10 maximum units per acre, and the proposed reflecting that the density is not permitted. Mr. Spraker explained that the "Light/Industrial" land use does not allow residential uses.

Mr. Scudiero motioned to approve FLUM 2023-032, 1755 North U.S. Highway 1, Future Land Use Map Amendment. Mr. Galloway seconded it. Vote was called, and the motion was approved (6-0).

E. ZMA 2023-033, 1755 North U.S. Highway 1, Zoning Map Amendment

Mr. Spraker, Planning Director, stated that this request from Wayne's Solar, Inc. is for a Zoning Map Amendment from B-7, Highway Tourist Commercial to I-1, Light Industrial for a 3.06 acre parcel located at 1755 North U.S. Highway 1. Mr. Spraker continued that the zoning designation needs to be consistent with the land use. Mr. Spraker remarked that staff recommends approval.

Ms. Shull opened it up to the Board for discussion and entertained a motion.

Mr. Jorczak motioned to approve ZMA 2023-033, 1755 North U.S. Highway 1, Zoning Map Amendment. Mr. du Moulin seconded it. Vote was called, and the motion was approved (6-0).

F. LDC 2023-043, Land Development Code Amendment: Section 2-21, T-2, Manufactured Home, Special Standards

Mr. Spraker, Planning Director, explained the administrative request to amend Chapter 2, District and General Regulations, Section 2-21, T-2, Manufactured Home zoning district of the Land Development Code (LDC) to re-establish the special standards to allow replacement of manufactured/mobile homes, located within previously established mobile home parks, with new manufactured/mobile homes. Mr. Spraker commented that this standard existed in 2015 and a LDC amendment took it out is because it was believed that there was no existing manufactured or mobile home communities that had the T-2 zoning. Mr. Spraker detailed that there is a property with a T-2 zoning designation that needs the special standards to allow the replacement of existing mobile homes. Mr. Spraker concluded that staff recommends approval.

Board Questions

Mr. Galloway asked if this amendment was specifically for one property. Mr. Spraker confirmed that it was for the Ridgecrest Mobile Home park on North Yonge Street which has a T-2 zoning designation.

Mr. Railsback questioned if the amendment would seek additional areas of the city zoned T-2. He stated his understanding was that it was for existing properties zoned T-2. Mr. Spraker confirmed that the amendment was only for existing T-2 zoned properties.

DRAFT

Mr. Jorczak asked if existing building codes would impact replacement mobile homes. Mr. Spraker stated that the amendment was solely related to setbacks and all building code requirements would be applicable.

Mr. Galloway asked if this would apply to the mobile home park along U.S. Highway 1, north of Granada Boulevard. Mr. Spraker stated that this property was zoned as B-4, Central Business, and this amendment would not be applicable to that property.

Ms. Shull ensured that no one from the public was present to speak on the subject, then opened it up to the Board for discussion and entertained a motion.

Mr. Scudiero motioned to approve LDC 2023-043, Land Development Code Amendment: Section 2-21, T-2, Manufactured Home, Special Standards. Mr. du Moulin seconded it. Vote was called, and the motion was approved (6-0).

G. LDC 2021-019, Land Development Code Amendment: Impact Fee Study Update – Connection, Mobility, and Impact Fee Amendments

Mr. Spraker, Planning Director, explained the administrative amendment to the Land Development Code (LDC), to implement the recommendations of the impact fee study update. Mr. Spraker recalled this item was discussed at the March Planning Board meeting. Mr. Spraker displayed a PowerPoint of the proposed amendments that included the following key points:

1. Water and sewer: Changed terminology from impact fees to connection fees.
2. Water: Connection fee amended from $2,902 to $2,333 for an equivalent living unit (one single-family house).
3. Sewer: Connection fee amended from $2,829 to $3,577 for an equivalent living unit.
4. Stormwater: Delete stormwater impact fee and rely on stormwater connection fee.
5. Park & Recreation: Amended parks & recreation impact fee from $1,312.24 to $2,500 for a single family residential unit.
6. Discussed the mobility fee and there may be a desire to reduce the selected option because it assesses the maximum fee that can be justified.
7. Updated the local road impact fee based on use categories.
8. Created police and fire impact fees.

Mr. Spraker reviewed the total changes which were primarily the local road and park and recreation impact fee for a single-family house. Mr. Spraker detailed the project scheduled and stated that there is a 90-day effective period for the implementation of the impact fees. Mr. Spraker concluded that staff recommends approval.

Ms. Shull opened it up to the Board for discussion and entertained a motion.

Board Questions

Meeting Date: 6/6/2023	**AGENDA ITEM**		**Number:** 8.H
Section:	PUBLIC HEARINGS		
Item Category:	Public Hearing - Ordinances	**Res./Ord. No:**	2023-30
Strategic Goal:	Transportation & Community Development - Other		
Department :	Planning & Building		
Subject:	Land Development Code Amendment, Connection, Mobility and Impact Fees (SECOND READING)		
Budget Impact:	Impact fees are an important component of the city's comprehensive planning process and a necessary tool to ensure that new growth pays its fair share of capital improvement costs. The update of the connection, mobility, and impact fees provide the most recent data and analysis to assess development related fees. In general, the connection, mobility, and impact fees are proposed to increase based on level of service standards and increase in construction costs.		
Summary:	These are administrative amendments to the LDC to update connection, mobility, and impact fees.		
Recommended Action:	The Planning Board recommended the Commission approve the amendments to the LDC to update connection, mobility, and impact fees based on (1) "Water and Wastewater Utility System Connection Fee Study", (2) "Municipal Impact Fee Study" and (3) "Police and Fire Impact Fee Study" as perfomed by Raftelis consultants. If approved, the amendments would be effective on September 4, 2023.		
Staff Contact:	Steven Spraker, Planning Director, (386) 676-3341

CITY MANAGER
MEMORANDUM

To: The Honorable Mayor Partington and City Commissioners

Through: Joyce Shanahan, City Manager

From: Steven Spraker, Planning Director

Date: June 6, 2023

Subject: Land Development Code Amendment, Connection, Mobility and Impact Fees (SECOND READING)

Commission Goal: Transportation & Community Development - Other

Introduction

This is an administrative amendment to the Land Development Code (LDC), to implement the recommendations of the impact fee study update, by amending **(1)** Section 1-25, Reserved, of Article IV, Schedule of Development Review and Impact Fees, of Chapter 1, General Administration to implement the water and wastewater utility system connection fee study by creating the water and wastewater connection fee section, **(2)** Section 1-26, Mobility fee, of Article IV, Schedule of Development Review and Impact Fees, of Chapter 1, General Administration to amend the person trip mobility fee per the municipal impact fee study, **(3)** Section 1-27, Impact fees, of Article IV, Schedule of Development Review and Impact Fees, of Chapter 1, General Administration to delete the stormwater impact fee, amend the local road impact fee, and create police and fire impact fee per the municipal impact fee study and police and fire impact fee study, **(4)** Section 1-30(d)(6)(e), Certificate of concurrency required, of Article V, Concurrency Management, of Chapter 1, General Administration, **(5)** Section 3-57, Potable water system, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, **(6)** Section 3-59, Sanitary sewer systems, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, **(7)** Section 3-60, Reclaimed water systems, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, **(8)** Section 3-61, Utility line extension, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, **(9)** Section 3-62, Wholesale sale of potable water, sewage treatment or reclaimed water, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, and **(10)** Section 3-65, Interim package-type wastewater treatment facilities, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards to implement the recommendations of the water and wastewater utility system connection fee study, municipal impact fee study, and police and fire impact fee study.

Background

Impact fees are collected from builders or developers for new construction to help pay for increased infrastructure demands created by the new growth. The City of Ormond Beach has assessed impact fees for water and sewer since 1974. An impact fee for recreational facilities was added in 1987 and a comprehensive impact fee ordinance was adopted in 1990. The 1990 ordinance included impact fees for the full range of capital facilities (administrative facilities, conservation land, cultural facilities, fire protection, law enforcement, local roads, solid waste, road/drainage maintenance and stormwater).

Impact fees are an important component of the city's comprehensive planning process and a necessary tool to ensure that new growth pays its fair share of capital improvement costs. The Comprehensive Plan identifies the future growth that is projected to occur, the capital facilities required to serve that growth, and a minimum level-of-service (LOS) standard that will be provided for new development. The city has adopted LOS standards for potable water, sanitary sewer, solid waste, drainage, parks, roads and firefighting, but only collects impact fees for some of these services. The city has adjusted water and sewer impact fees annually based upon increases to the Engineering News Record Construction Cost Index (ENR CCI).

In 1996, the city reviewed its impact fee ordinance and determined that the projected capital improvement needs for the following five years did not warrant collection of certain fees. The city eliminated impact fees for administrative facilities, conservation land, fire protection, law enforcement, solid waste and road/drainage maintenance. The cultural facilities impact fee was not eliminated, but reduced to $0 because of potential conflicts with the adopted Comprehensive Plan.

In 2009, the City of Ormond Beach was designated as a Dense Urban Land Area requiring the city to adopt a financially feasible multimodal strategy. The city adopted the Mobility Strategy and 2025 Comprehensive Plan amendments in 2010. The mobility fee replaced concurrency and the imposition of city road impact fees on certain state roads in Transportation Concurrency Exception Areas (TCEA). For new development on any road facility outside the TCEA, the city's road impact fee applies. An amendment to Section 1-27 of the LDC was adopted per Ordinance No. 2015-44 to allow the City Commission to approve impact fee credit agreements that prevent credits from declining ten (10%) percent yearly over ten (10) years after the final inspection date of the demolition for land with building improvements.

On May 18, 2021, the Commission authorized Resolution 2021-86 to accept a bid proposal from Raftelis for an impact fee study update to review and amend the water, sewer, park & recreation, stormwater, local road and mobility fees. The scope-of-work also provided a task for a feasibility analysis to add fire and police impact fees and make a recommendation if these fees should be pursued with a separate work authorization. The total fee for the impact fee study is $99,445. On October 5, 2022, the Commission authorized Resolution 2022-121 that authorized $31,555 for the development of Police and Fire impact fees by Raftelis.

Impact fees and connection fees for residential uses are measured based on residential units. Water and sewer connection fees for non-residential uses are based on the number of fixtures (sinks, toilets, hose bibs). The road impact fee and mobility fee are based upon the use. Park and Recreation impact fees are assessed only for residential uses.

The impact fee update has been discussed at the following meetings:

Date	Group	Meeting Type
September 7, 2022	City Commission	Discussion item
February 21, 2023	City Commission	Discussion item
March 9, 2023	Planning Board	Discussion item
March 22, 2023	Public meeting	Extraordinary circumstance
March 27, 2023	Public meeting	Extraordinary circumstances
April 13, 2023	Planning Board	Land Development Code amendment

Documents regarding the impact fee update have been available on the city webpage: https://www.ormondbeach.org/1028/Impact-Fees.

Raftelis has performed three (3) studies that serve as the data and analysis for the LDC amendments, which include:

- Water and wastewater utility system connection fee study;
- Municipal impact fee study; and
- Police and fire impact fee study.

Separate of the LDC amendments, there is a need to amend the Code of Ordinances to implement the impact fee study updates. Amendments to the Code of Ordinances require only the City Commission review and action.

Discussion

Key details of the amendments include:

1. Water and sewer: Changed terminology from impact fees to connection fees.
2. Water: Connection fee amended from $2,902 to $2,333 for an equivalent living unit (one single-family house).
3. Sewer: Connection fee amended from $2,829 to $3,577 for an equivalent living unit.
4. Stormwater: Deleted stormwater impact fee and rely on stormwater connection fee.
5. Park & Recreation: Amended parks & recreation impact fee from $1,312.24 to $2500 for a single family residential unit.

6. Updated the local road impact fee based on use categories.
7. Created police and fire impact fees.

One area that City Commission may need to review is the mobility fee. In 2009, the Legislature passed SB 360ER. This bill designated dense urban land areas (DULAs) and one of the definitions of DULA was an area having over 1000 people per square mile. Pursuant to that bill, the Florida Legislative Office of Economic and Demographic Research transmitted to the Department of Community Affairs on July 1, 2009, a list of counties and municipalities including the City of Ormond Beach, as qualifying for DULA status. Ormond Beach as a DULA is automatically designated a Transportation Concurrency Exception Area (TCEA). A designation of a citywide TCEA means that state concurrency no longer applies to development provided the city has a multimodal strategy approved and adopted in its Comprehensive Plan within two years of the bill's passage. However, Ormond Beach elected through its home rule powers to be more stringent and to restrict the creation of TCEAs on roadway corridors which are environmentally or politically constrained.

The city adopted Multi-Modal Strategies which was approved by Ordinance 10-48A on December 7, 2010 as part of a Remedial Amendment and Stipulated Settlement Agreement with the Florida Department of Community Affairs (DCA) and included mobility fees with TCEA. The City's Comprehensive Plan and multimodal strategy was approved by the DCA on January 18, 2011. The multi-modal strategy, including mobility fees, was prepared as a balance between all roadway capacity improvements and all vehicle reduction strategies. The roadways where the mobility fees are assessed include State Road SR 40 (SR A1A to Williamson Boulevard), U.S. Highway 1 (Wilmette Avenue to the southern City limit) and SR A1A (SR 40 to the southern City limit) and are along Votran's eastside route network. In these areas, proportionate fair share contributions are replaced with a mobility fee based on a per trip basis. The city developed and adopted a multi-modal strategy for these corridors and applies the mobility fee instead of local road impact fee. Section 1-27 of the Land Development Code contains the mobility fee calculation and it includes a fee based on per person trips. The original analysis in the adoption calculated a per person trip fee of $77.82. The per person trip rate fee in 2011 was reduced to $16.00 in response to economic conditions to allow redevelopment in these corridors.

On February 21, 2023, several options were presented to the City Commission. The option selected was the full per person trip fee of $85.67. The chart below shows that the per person trip fee of $85.67 is generally higher than the proposed local road impact fee. For example, the mobility fee at a per person trip fee of $85.67 would be $1,285.05 for a single-family house versus the local road impact fee of $864.59. The comparison table is provided below:

Type of Fee	Single Family Dwelling Unit	Multi-Family Dwelling Unit	Medical office, Per 1,000 SF	Retail, Per 1,000 SF	Industrial, Per 1,000 SF	Restaurant, Per 1,000 SF
Ormond	$864.59	$548.32	$3,434.79	$3,736.72	$450.23	$5,559.09

Beach Local Road (proposed)						
Ormond Beach Mobility Fee (current)	$240.00	$130.56	$751.68	$628.64	$107.14	$1,507.70
Option 1 - Proposed full mobility fee (**$85.67**)	$1,285.05	$699.07	$4,024.78	$3,365.98	$573.65	$8,072.79
Option 2 - Proposed mobility fee (**$59.00**) - 69%	$870.00	$481.44	$2,771.82	$2,318.12	$395.06	$5,559.64
Option 3 - Proposed mobility fee (**$42.84**) - 50%	$642.60	$349.57	$2,012.62	$1,683.19	$286.86	$4,036.86
Option 4 - Proposed mobility fee (**$32.00**) - 37%	$480.00	$261.12	$1,503.56	$1,257.28	$214.27	$3,015.40
Option 5 - Proposed mobility fee (**$24.00**) - 28%	$360.00	$195.84	$1,127.52	$942.96	$160.70	$2,261.55

The mobility fee selected (option 1) is the full fee that is allowed to be charged and in most land uses exceeds the local road impact fee. The City Commission may want to consider option two, which is closer to the local road impact fee rate. If there is a desire to encourage development and redevelopment in the Transportation Concurrency Exception Areas, then option 3 should be considered. The current mobility per person

trip is $16.00.

Planning Board
The Planning Board reviewed the LDC amendment as a discussion item at the March 9, 2003 meeting. At the April 13, 2023 meeting, the Planning Board reviewed the Land Development Code amendment and recommended approval with a 6-0 vote. There were no individuals who spoke for or against the LDC amendment. The Planning Board minutes are attached to this item.

Budget Impact

Impact fees are an important component of the city's comprehensive planning process and a necessary tool to ensure that new growth pays its fair share of capital improvement costs. The update of the connection, mobility, and impact fees provide the most recent data and analysis to assess development related fees. In general, the connection, mobility, and impact fees are proposed to increase based on level of service standards and increase in construction costs.

Citizen Impact

The purpose of connection, mobility, and impact fees are to assess new development or connections to infrastructure to pay a portion of the cost to provide municipal infrastructure. Without appropriate impact fees, the existing residents would be responsible for a greater percentage of new municipal infrastructure.

Recommendation

The Planning Board recommended the Commission approve the amendments to the LDC to update connection, mobility, and impact fees based on (1) "Water and Wastewater Utility System Connection Fee Study", (2) "Municipal Impact Fee Study" and (3) "Police and Fire Impact Fee Study" as perfomed by Raftelis consultants. If approved, the amendments would be effective on September 4, 2023.

ORDINANCE NO. 2023-30

AN ORDINANCE AMENDING SECTION 1-25, RESERVED, OF ARTICLE IV, SCHEDULE OF DEVELOPMENT REVIEW AND IMPACT FEES, OF CHAPTER 1, GENERAL ADMINISTRATION, TO IMPLEMENT THE WATER AND WASTEWATER UTILITY SYSTEM CONNECTION FEE STUDY BY CREATING THE WATER AND WASTEWATER CONNECTION FEE SECTION; AMENDING SECTION 1-26, MOBILITY FEE, OF ARTICLE IV, SCHEDULE OF DEVELOPMENT REVIEW AND IMPACT FEES, OF CHAPTER 1, GENERAL ADMINISTRATION, TO AMEND THE PERSON TRIP MOBILITY FEE PER THE MUNICIPAL IMPACT FEE STUDY; AMENDING SECTION 1-27, IMPACT FEES, OF ARTICLE IV, SCHEDULE OF DEVELOPMENT REVIEW AND IMPACT FEES, OF CHAPTER 1, GENERAL ADMINISTRATION, TO DELETE STORMWATER IMPACT FEES, AMEND LOCAL ROAD IMPACT FEES, AND CREATE POLICE AND FIRE IMPACT FEES PER THE MUNICIPAL IMPACT FEE STUDY AND POLICE AND FIRE IMPACT FEE STUDY; AMENDING SECTION 1-30, CERTIFICATE OF CONCURRENCY REQUIRED, OF ARTICLE V, CONCURRENCY MANAGEMENT, OF CHAPTER 1, GENERAL ADMINISTRATION; AMENDING SECTION 3-57, POTABLE WATER SYSTEM, OF ARTICLE V, UTILITY AND INFRASTRUCTURE DESIGN STANDARDS, OF CHAPTER 3, PERFORMANCE STANDARDS; AMENDING SECTION 3-59, SANITARY SEWER SYSTEMS, OF ARTICLE V, UTILITY AND INFRASTRUCTURE DESIGN STANDARDS, OF CHAPTER 3, PERFORMANCE STANDARDS; AMENDING SECTION 3-60 RECLAIMED WATER SYSTEMS, OF ARTICLE V, UTILITY AND INFRASTRUCTURE DESIGN STANDARDS, OF CHAPTER 3, PERFORMANCE STANDARDS; AMENDING SECTION 3-61, UTILITY LINE EXTENSIONS, OF ARTICLE V, UTILITY AND INFRASTRUCTURE DESIGN STANDARDS, OF CHAPTER 3, PERFORMANCE STANDARDS; AMENDING SECTION 3-62, WHOLESALE SALE OF POTABLE WATER, SEWAGE TREATMENT OR RECLAIMED WATER, OF ARTICLE V, UTILITY AND INFRASTRUCTURE DESIGN STANDARDS, OF CHAPTER 3, PERFORMANCE

STANDARDS; AMENDING SECTION 3-65, INTERIM PACKAGE-TYPE WASTEWATER TREATMENT FACILITIES, OF ARTICLE V, UTILITY AND INFRASTRUCTURE DESIGN STANDARDS, OF CHAPTER 3, PERFORMANCE STANDARDS; OF THE CITY OF ORMOND BEACH LAND DEVELOPMENT CODE, TO IMPLEMENT THE RECOMMENDATIONS OF THE WATER AND WASTEWATER UTILITY SYSTEM CONNECTION FEE STUDY, MUNICIPAL IMPACT FEE STUDY, AND POLICE & FIRE IMPACT FEE STUDY; REPEALING ALL INCONSISTENT ORDINANCES OR PARTS THEREOF; PROVIDING FOR SEVERABILITY; AND SETTING FORTH AN EFFECTIVE DATE.

WHEREAS, the City solicited proposals (RFP No. 2021-08R) for professional services to conduct an Impact Fee Study Update ("the Study") in accordance with Section 2-300(b), *Code of Ordinances,* and in accordance with the requirements of the Florida Impact Fee Act, Section 163.31801, *Florida Statutes*, and

WHEREAS, by Resolution 2021-86 the City Commission accepted the proposal from Raftelis Financial Consultants, Inc., ("Raftelis") and executed an agreement on May 18, 2021 for the Study, and

WHEREAS, Resolution 2022-121 approved on October 5, 2022 by the City Commission accepted an amendment to the existing agreement for the development and implementation of police and fire impact fees, and

WHEREAS, Raftelis has reviewed the existing city impact fees and made recommendations in three study areas: "Water and Wastewater Utility System Connection Fee Study", "Municipal Impact Fee Study", and the "Police and Fire Impact Fee Study", and

WHEREAS, the Florida Impact Fee Act establishes criteria and procedures for adopting impact fees and impact fee increases, and

WHEREAS, the impact fee update study is designed to ensure that new growth and development, changes of uses, and expansions pay a fair share of the capital public facility costs through the payment of connection, mobility, and impact fees, and

WHEREAS, connection, mobility, and impact fees for new development and expansion of existing development are required to provide capital facilities that are required to accommodate growth as detailed in the Capital Improvement Plan and Capital Improvement Element of the Comprehensive Plan, and

WHEREAS, the following publicly noticed meetings were held to review the connection, mobility, and impact fee updates: (1) City Commission discussion item on September 7, 2022, (2) City Commission discussion item on February 21, 2023, (3) Planning Board discussion item on March 9, 2023, (4) and public meetings to discuss and consider extraordinary circumstances on March 22, 2023 and March 27, 2023, and

WHEREAS, at the public meetings to consider extraordinary circumstances, Raftelis detailed the conditions for the Parks and Recreation and Local Road impact fees that included population growth, additional needed land area for recreation purposes, and the cost per lane mile for local road construction, and

WHEREAS, the Parks and Recreation and Local Road impact fees require approval by the affirmative vote of at least two-thirds of the City Commission, and

WHEREAS, public notice in accordance with the Impact Fee Act has been provided 90 days in advance of establishing the new or amended connection, mobility, parks and recreation, local road, police and fire impact fees, which fees are necessitated by the growth and development in the city, and

WHEREAS, the city's Planning Board, which is the city's local planning agency, has conducted a public hearing on April 13, 2023, regarding the proposed fees and proposed amendments to the city's *Land Development Code*, and has made recommendations thereon to the City Commission, and

WHEREAS, all applicable notice requirements of Section 166.041(3), *Florida Statutes*, and the Impact Fee Act have been met, and

WHEREAS, the City Commission makes the following determinations:

(1) The impact fees established in this Ordinance are based on the most recent and localized data,

(2) The impact fees are proportional and reasonably connected to, or have a rational nexus with, the need for additional capital facilities and the increased impact generated by new residential or commercial construction,

(3) The data and information regarding extraordinary circumstances are approved and affirmed,

(4) All requirements of the Impact Fee Act have been met,

(5) The impact fees are established in accordance with powers conferred upon the City Commission by the Florida Constitution; Municipal Home Rule Power Act, Chapter 166, *Florida Statutes*; and the Florida Impact Fee Act, Section 163.31801, *Florida Statutes*, and

WHEREAS, the City Commission finds the amendments to be consistent with the provisions of the *Comprehensive Plan* of the City of Ormond Beach, and in the overall best interest of the public health, safety and welfare, now therefore,

BE IT ENACTED BY THE PEOPLE OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:

SECTION ONE. The foregoing recitals are incorporated herein as the findings of the City Commission.

SECTION TWO. Section 1-25, Reserved, of Article IV, Schedule of Development Review and Impact Fees, of Chapter 1, General Administration, of the City of Ormond Beach *Land Development Code* is hereby amended as follows:

ARTICLE IV. SCHEDULE OF ~~DEVELOPMENT REVIEW AND IMPACT~~ CONNECTION, MOBILITY, AND IMPACT FEES

Sec. 1-25. ~~Reserved.~~ Water and Wastewater Connection Fees.

(1) *Purpose and Authority.*

a. The purpose of the water and wastewater connection fees is to assign growth related capital costs to new development that is responsible for such costs.

b. This section is designed to ensure that new growth and development, changes of uses, and expansions pay a fair share of the capital public facility costs for water and wastewater systems.

c. The water and wastewater connection fees are levied in order to provide an adequate funding source for the capital improvements identified in the city's comprehensive plan, the need for which is generated by new development to facilitate the orderly expansion.

d. The Level of Service for water and wastewater services are established in the Capital Improvement Element of the Comprehensive Plan.

e. The Florida Impact Fee Act, Section 163.31801 of the Florida Statutes, does not apply to water and wastewater connection fees.

(2) *Adoption of the technical study as the basis of water and wastewater connection fees.* The city hereby adopts and incorporates by reference, the "Water and Wasterwater Utility System Connection Fee Study" prepared by Raftelis Financial Consultants, Inc. dated March 29, 2023.

(3) *Connection fees imposed.* The following types of connection fees are hereby imposed: water and wastewater. These utility connection fees apply within the city limits and the utility service area, including the West Ormond Water and Sewer District, Hunter's Ridge-Flagler County DRI, and North Peninsula Water District.

(4) *Connection fee obligation.* Any new development or expansion generating utility demand shall be obligated to pay water and wastewater connection fees as required by this section. The obligation to pay the water and wastewater connection fees runs with the land.

a. Exemptions. The following development or expansion activity shall be exempt from paying water and wastewater connection fees:

1. Reconstruction, expansion, or replacement of a previously existing residential structure that does not change the use from residential to commercial use and does not increase the number of dwelling units.

2. Accessory Dwelling Units shall be considered part of the single-family residential dwelling unit and are exempt from payment of water and wastewater connection fees.

3. Reconstruction, expansion, or replacement of a previously existing non-residential structure with a new non-residential structure where there is no increase in fixture units. Any increase in fixture units shall require payment of water and wastewater connection fees based on the net increase of new fixture units.

4. Public fire protection service which includes public fire hydrants and other devices used to supply potable water or reclaimed water to meet general fire-fighting requirements.

b. Expansions. For development activity which will increase the number of units or plumbing unit fixture count, the water and wastewater connection fees shall be assessed on the difference between the existing and new number of units or plumbing unit fixtures.

c. Connection Fee Credits. Land with building improvements, either past or present, shall have water and wastewater connection fee credits.

1. Connection fees shall be vested with connection fee credits and these credits shall not expire over time.

2. Connection fee credits shall run with the land/property where the credits existed and are not transferrable to other off-site property.

3. It shall be the responsibility of the property owner to provide documents demonstrating previous buildings on a property seeking connection fee credits.

4. Property owners of non-residential buildings that are proposed to be demolished shall provide the following information to the Chief Building Official for connection fee credits:

   a. Square footage and use of the building.

   b. An inventory of existing plumbing fixture units on the adopted Equivalent Living Unit (ELU) form. Non-residential buildings without an inventory of plumbing fixture units shall be provided water and wastewater connection fee credits based upon typical fixture counts for the use.

5. Residential connection fee credits shall be based upon the dwelling unit or units on the property. Property owners shall provide the Chief Building Official the number of dwelling units, type of use, and building square footage for connection fee credits.

d. Renovations. Water and wastewater connection fees shall be charged on the basis of the difference between current and future impacts for renovation projects and for sites redeveloped within five (5) years from the last date of occupancy as determined by the plumbing fixture units.

e. Properties outside city limits. Water and wastewater connection fees for services to be provided shall be paid prior to the connection to the system.

(5) *Payment of water and wastewater connection fees.* Water and wastewater connection fees shall be paid at the time of development permitting (building, utility connection, irrigation meter installation or site engineering permits). If the city identifies an impact-generating development for which the water and wastewater connection fees required by this section were not paid when due, regardless of whether a permit was issued for such development, the city shall notify the property owner that utility connection fees are due in accordance with this article. The property owner shall pay the water and wastewater connection fees due within 30 days of such notice.

(6) *Connection fee classifications.* The following classifications shall be used to determine the water and wastewater connection fee to be assessed:

a. Residential

1. Single-Family. This classification shall include where water and/or wastewater service is provided to a single-family dwelling unit, including but not limited to, single-family homes, townhouses, or duplexes located on a single lot of record.

2. Multi-Family. This classification shall include where water and/or wastewater service is provided to two (2) or more residential units, such as an apartment complex or condominium.

3. Manufactured/Mobile Home. This classification shall include where water and/or wastewater service is provided to a manufactured or mobile home on a leased area or on a platted lot.

b. Non-Residential. This classification shall include where water and/or wastewater service is provided to uses that is not residential including but is not limited to commercial, industrial, office, and institutional uses.

c. Irrigation. Potable water service that is used exclusively for outdoor irrigation purposes or watering of land for landscaping purposes. Irrigation connection fees shall include both a separate tap to a water line or a "T" off an existing meter.

(7) *Calculation of water connection fees.*

a. Residential:

1. Single-Family Residential.

(i) West Ormond Water and Sewer District: shall be assessed one (1) ELU: $2,333.00.

(ii) Hunter's Ridge-Flagler County DRI Service Area: shall be assessed one (1) ELU: $2,333.00.

(iii) North Peninsula Water District: shall be assessed one (1) ELU: $2,333.00.

(iv) All other water utility connections: shall be assessed one (1) ELU: $2,333.00.

2. Multi-Family Residential.

(i) West Ormond Water and Sewer District: shall be assessed 0.80 ELU: $1,866.00.

(ii) Hunter's Ridge-Flagler County DRI Service Area: shall be assessed 0.80 ELU: $1,866.00.

(iii) North Peninsula Water District. shall be assessed 0.80 ELU: $1,866.00.

(iv) All other water utility connections. shall be assessed 0.80 ELU: $1,866.00.

3. Manufactured/Mobile Home.

(i) West Ormond Water and Sewer District: shall be assessed 0.90 ELU: $2,099.00.

(ii) Hunter's Ridge-Flagler County DRI Service Area: shall be assessed 0.90 ELU: $2,099.00.

(iii) North Peninsula Water District: shall be assessed 0.90 ELU: $2,099.00.

(iv) All other water utility connections: shall be assessed 0.90 ELU: $2,099.00.

b. Non-Residential: For the West Ormond Water and Sewer District, Hunter's Ridge-Flagler County DRI Service Area, North Peninsula Water District, and all other water utility connections:

1. The number of ELUs shall be computed by the chief building official using the fixture unit count as defined in the most recent data published by the American Water Works Association and a ratio of one (1) ELU for every sixty (60) fixture unit valves or fraction thereof, computed to one (1) decimal place.

2. One (1) ELU shall be assessed at $2,333.00.

3. Except that in accordance with Section 5.2 of the City-Flagler County Interlocal Agreement (recorded at Book 6421, Page 2821 of the Public Records of Volusia County, Florida) connection fees shall not be charged for any Flagler County facility.

c. Irrigation.

1. West Ormond Water and Sewer District: shall be assessed one (1) ELU: $2,333.00.

2. Hunter's Ridge-Flagler County DRI Service Area: Irrigation meters not permitted.

3. North Peninsula Water District: shall be assessed one (1) ELU: $2,333.00.

4. All other irrigation utility connections: shall be assessed one (1) ELU: $2,333.00.

(8) *Calculation of wastewater connection fees.*

a. Residential:

1. Single-Family Residential.

(i) West Ormond Water and Sewer District: shall be assessed one (1) ELU: $3,577.00.

(ii) Hunter's Ridge-Flagler County DRI Service Area: shall be assessed one (1) ELU: $3,577.00.

(iii) North Peninsula Water District. shall be assessed one (1) ELU: $3,577.00.

(iv) All other wastewater utility connections: shall be assessed one (1) ELU: $3,577.00.

2. Multi-Family Residential.

(i) West Ormond Water and Sewer District: shall be assessed 0.80 ELU: $2,861.00.

(ii) Hunter's Ridge-Flagler County DRI Service Area: shall be assessed 0.80 ELU: $2,861.00.

(iii) North Peninsula Water District: shall be assessed 0.80 ELU: $2,861.00.

(iv) All other wastewater utility connections: shall be assessed 0.80 ELU: $2,861.00.

3. Manufactured/Mobile Home.

(i) West Ormond Water and Sewer District: shall be assessed 0.90 ELU: $3,219.00.

(ii) Hunter's Ridge-Flagler County DRI Service Area: shall be assessed 0.90 ELU: $3,219.00.

(iii) North Peninsula Water District: shall be assessed 0.90 ELU: $3,219.00.

(iv) All other wastewater utility connections: shall be assessed 0.90 ELU: $3,219.00.

b. Non-Residential: For the West Ormond Water and Sewer District, Hunter's Ridge-Flagler County DRI Service Area, North Peninsula Water District, and all other wastewater utility connections:

1. The number of ELUs shall be computed by the Chief Building Official using the fixture unit count as defined in the most recent data published by the American Water Works Association and a ratio of one (1) ELU

for every sixty (60) fixture unit valves or fraction thereof, computed to one (1) decimal place.

2. One (1) ELU shall be assessed at $3,577.00.

3. Except that in accordance with Section 5.2 of the City-Flagler County Interlocal Agreement (recorded at Book 6421, Page 2821 of the Public Records of Volusia County, Florida) connection fees shall not be charged for any Flagler County facility.

(9) *Alternative independent connection analysis.*

a. At the option of a property owner, water and wastewater connection fees may be computed by the use of an alternate independent connection analysis if there is a belief that the cost to mitigate the impact of the development is less than the fee established in this section. The property owner shall be responsible for preparation of a proposed alternate independent connection analysis.

b. A pre-application meeting with the Planning Director shall be required prior to the submittal of an alternate independent connection analysis. The pre-application meeting shall establish the data, information, assumptions, formulae and methodology for the independent connection analysis.

c. The property owner shall be responsible for payment of the utility connection fee calculation analysis fee established in section 8-10 of the Code of Ordinances.

d. The property owner shall submit the alternate independent connection fees analysis from an individual or firm with the qualifications to prepare an independent analysis.

e. Within thirty (30) days of the submittal of a complete independent connection analysis, the Planning Director shall accept or reject the alternate independent connection analysis based on whether the proposed water and wastewater connection fee is proportional and reasonably connected to, or has a rational nexus with, the planned utility facilities improvements and the increased impact generated by the new residential or commercial development.

f. If the property owner desires the building permit to be issued before the alternative independent connection analysis has been completed and reviewed, the property owner shall pay the following:

1. An estimate of the water and wastewater connection fees, calculated pursuant to the applicable water and wastewater connection fee schedule in this section; and

2. A non-refundable utility connection fee calculation analysis fee established in section 8-10 of the Code of Ordinances.

3. If the approved alternative impact analysis establishes the development will have less of an impact and warrants a reduction in the water and wastewater connection fees, the city shall refund the difference between the estimate paid and the amount to be paid based on the independent connection analysis.

g. A determination by the Planning Director that the alternative connection fee calculation does not satisfy the requirements of this section may be appealed to the City Commission per section 1-19 of this code.

(10) *Administration of water and wastewater connection fees.*

a. City Administration

1. Fees collected pursuant to this article shall be deposited into a separate accounting fund for the purposes paid as hereinbefore enumerated.

2. The funds in the separate accounting fund shall be used only for capital improvements and the purposes hereinbefore enumerated and necessitated by new growth and included in the capital improvement program and the capital improvements element of the comprehensive plan.

3. If any fees collected during any fiscal year are not expended or encumbered within the ten (10) fiscal years immediately following the fiscal year of payment, the city manager shall publish one (1) time in a newspaper of general circulation in the city, a notice advising those persons having paid such fees that they are entitled to a refund thereof. Any person so entitled shall have one (1) calendar year from the date of publication of the notice within which to apply to the finance director for a refund of the fees paid. Each application shall consist of:

(i) The name and address of the applicant; and

(ii) A copy of the receipt issued by the city for the fee paid, or a sworn statement that the applicant paid the fee, and the date and amount of the payment.

All refunds made will be for the full amount paid, together with the simple interest thereon of four percent (4%) per annum from the date of payment to the date of refund. If no timely application for refund is made, the funds eligible therefor shall remain in the separate accounting fund that they were paid into.

b. Refunds

1. If a permit that includes water and wastewater connection fees expires and no construction has been commenced, then the fee payer shall be entitled to a refund of the utility connection fee paid as a condition of its issuance, except that the city shall retain three percent (3%) of the funds as an administrative fee to offset the costs of collection and refund. Where no request for refund is made, the water and wastewater connection fees may be applied to any future project on a unit basis. Any request for a refund or future project credit shall be required to be made in writing to the chief building official within twelve (12) months of the permit expiration.

(11) *Connection Fee Reimbursement Agreement.*

a. Procedure for utility capital project reimbursement agreement policy.

1. In the event that any person is required by the city or desires to extend/construct water, sewer or reclaimed waterlines or improvements, including utility lines that are larger than the minimum line size required to serve a parcel or development in order to provide for anticipated future development or extensions, that person or developer may request reimbursement agreement for the cost of such extension or improvement, in accordance with the following procedures:

(i) Engineering drawings, including therewith design calculations, shall be submitted to the Site Plan Review Committee indicating:

1. The size and location of the proposed lines or the appurtenances thereto; and

2. Preliminary cost estimates showing the cost difference for construction of the proposed oversize main verses the cost for the minimum size main that would be required to serve the parcel or development in accordance with the city's minimum design standards.

(ii) Preliminary cost estimates showing the cost difference for construction of the proposed oversize main verses the cost for the minimum size main that would be required to serve the parcel or development in accordance with the city's minimum design standards.

(iii) The city may enter into an agreement for reimbursement with the person making the submittal, based on a finding that the trunk lines and appurtenances or proposed improvement thereto comply with city standards, are appropriately sized and located, and that there is adequate water and sewer treatment plant capacity for the area

anticipated to be served or a public benefit of the proposed utility improvement.

(iv) All utility connection fee reimbursement agreements require approval by the City Commission prior to the issuance of any construction permit.

b. Reimbursement.

1. Reimbursement shall be made in annual payments on January 1 of each year, up to a maximum of ten (10) years, following acceptance of the improvements by the city, and shall be limited to the amount of utility connection fees received from any development which connects to the lines or appurtenances identified in the agreement.

2. Total reimbursement shall not exceed the estimated cost difference between the installation of the oversized line and the cost to install the minimum line size that would have been required to serve the development. Cost reimbursement shall be based on construction costs only.

3. If there is more than one (1) agreement applicable to the same lines or appurtenances or extensions thereof, reimbursement shall be proportional to the impact fees collected from projects of the submitter over the preceding calendar year.

c. Construction.

1. Following the execution of a line extension reimbursement agreement, detailed construction drawings prepared by an engineer licensed by the state shall be submitted for review and approval by the City Engineer and Utilities Manager. All necessary permits and approvals shall then be obtained by the person desiring to perform the work.

2. Prior to beginning any construction activities, the contractor to perform the work, shall attend a preconstruction conference with the City Engineer or his designee and shall post a performance bond in an amount equal to one hundred ten percent (110%) of the total approved project cost in a form to be approved by the city attorney.

3. Prior to the city accepting the lines and appurtenances thereto:

(i) The lines shall meet all applicable governmental standards, have all required approvals and be ready for service to the public;

(ii) There shall be provided to the utilities manager a complete set of as-built record drawings certified by the engineer of record;

(iii) There shall be posted a one (1) year maintenance bond in an amount equal to twenty-five percent (25%) of the amount of the performance bond in a form to be approved by the city attorney; and

(iv) Except for sewer laterals, reuse service lines and potable water service lines on the customer service side of an individual or master water meter, all water, sewer and reclaimed waterlines and appurtenances thereto which are constructed by the developer or property owner shall be dedicated to the city along with an easement therefor, and thereafter maintained by the city. At the time of dedication, the developer or property owner shall provide the Finance Director with full documentation as to the actual cost of the project.

(12) *Five-year review*. At least once every five years, the Planning Director shall recommend to the City Commission whether any amendments should be made to the water and wastewater connection fee schedule as contained in this section to reflect changes in the factors that affect the fee schedule or application to the water and wastewater connection fee classifications.

SECTION THREE. Section 1-26, Mobility fee, of Article IV, Schedule of Development Review and Impact Fees, of Chapter 1, General Administration, of the City of Ormond Beach *Land Development Code* is hereby amended as follows:

Purpose. Pursuant to Ordinance No. 10-48A, a mobility fee is hereby established to implement the city's multimodal strategy. The mobility fee is mode neutral and when used effectively in combination with infill land use development densities and intensities that are transit supportive, total vehicle miles travelled and greenhouse gas emissions shall be reduced while providing enhanced mobility options.

(1) *Mobility fee components. ***No change to existing text****

(2) *Applicability. ***No change to existing text****

(3) *TCEA. ***No change to existing text****

(4) *Calculation of mobility fee.* Calculating the mobility fee is derived by multiplying the density or intensity to be developed by the assigned trip generation rate (TGR) from the latest ITE Trip Generation Manual. The net TGR (minus pass-by trips) multiplied by the average vehicle occupancy (AVO) factor of 1.502 equals the number of person trips (PT). PT is multiplied by the established mobility fee.

Formula:	Density or Intensity × TGR - Passerby × AVO × PT × the applicable mobility fee.
Where:	TGR is Trip Generation Rate.
	AVO is Average Vehicle Occupancy.
	PT is Person Trip.

Example:

Land Use	S.F.	TGR	Pass-By	AVO	PT	Mobility Fee Per PT	Total
Commercial	1000	845	75%	1.502	318	~~$16.00~~ $59.00	~~$5,079.52~~ $18,762.00

(5) *Mobility fee.* Table 2 depicts the mobility fee based on the projected costs to provide transit and non-motorized improvements identified in the multimodal strategy. The road component represents the conversion of the city's local road impact fee from an ELU to TGR and PT. The road fee is based upon the improvements specified in the city's capital improvements program. Payment of funds at building permit issuance shall be deposited by the city into each component's account according to the prescribed percentage.

Table 2. Mobility Fee

Modal Component	Cost Per PT	Mode Allocation %
Roads	~~$1.76~~ $6.49	11%
Transit	~~8.00~~ $29.50	50%
Bike/Pedestrian	~~6.24~~ $23.01	39%
Total	~~16.00~~ $59.00	100%

(7) *Applicability of Volusia County traffic impact assessment guidelines. ***No change to existing text****

SECTION FOUR. Section 1-27, Impact fees, of Article IV, Schedule of Development Review and Impact Fees, of Chapter 1, General Administration, of the City of Ormond Beach *Land Development Code* is hereby amended as follows:

Sec. 1-27. Impact Fees.

~~The purpose of this section is to ensure that new development does not impose a financial burden on existing residents by establishing comprehensive impact fees to be paid prior to the issuance of a building permit (unless otherwise provided by the Code of Ordinances), change in occupancy permit which may affect the fee schedule, or site development permit for nonstructural uses within the types of developments hereinafter specified. The said fees are levied in order to provide an adequate funding source for the capital improvements identified in the city's comprehensive plan, the need for which is generated by new development; to facilitate the orderly expansion of the city's roadway system, drainage system, water supply system, wastewater treatment system, the establishment and expansion of the reclaimed water system; and to provide for adequate park and recreation facilities, public safety and general city services.~~

~~(1) *Fees imposed*. The following types of impact fees are hereby imposed: cultural facilities, local roads, parks and recreation, stormwater, and water, sewer and reclaimed water. These fees shall be charged upon the specific types of development noted in subsections (1)a and (1)b of this section, when constructed in the city.~~

~~a. *Distribution factors for impact fees by type of use*. The amount of the fees imposed in this section shall be established by ordinance annually on the basis of a 1.0 factor assigned to single-family detached homes (also identified herein as an ELU or equivalent living unit). Fees shall be calculated based on the distribution chart in this subsection. The fees shall be charged on a per-unit basis for all dwelling units and hotel/motel uses, and the basis of one thousand (1,000) square feet of gross floor area for all other uses as being equal to one (1) ELU, except that for potable water, wastewater and reclaimed water, the fee shall be computed using the fixture unit count. For mixed use developments, the predominant use shall prevail except that categories of use exceeding twenty percent (20%) of the total floor area shall be computed under that category.~~

Type of construction	*Potable water*	*Reclaimed* Wastewater*	*Water*
Single-family	1.0	1.0	1.0
Multifamily	0.5	0.5	0.2 per 1,000 sq. ft. of irrigated area
Mobile/manufactured home	0.6	0.6	0.2 per 1,000 sq. ft. of irrigated area
All other uses, 60 plumbing unit fixture counts = one ELU for potable water and wastewater, and 0.2 ELU per 1,000 sq. ft. of area to be irrigated for reclaimed water.*West Ormond utility service area only			

b. *Distribution factors for water, sewer, reclaimed water.*

1. For the purposes of applying water and sewer and reclaimed water impact fees, ELUs shall be defined and computed as follows:

   (i) *Residential.* Each single-family residence served by the city through a single sewer service or water meter shall be considered one (1) equivalent living unit. An irrigation meter shall be considered an ELU and shall be assessed a fee equivalent to a single-family home.

   (ii) *Rooms, combination of rooms, etc*. Each residential room, combination of rooms, apartment or prepared manufactured home space that includes connection points for sewer or water service that is owner occupied, offered separately for rent as a rental unit or vacant, shall be considered one (1) equivalent living unit.

   (iii)*Nonresidential, commercial and industrial*. For nonresidential uses not specifically defined elsewhere in this section, the number of ELUs shall be computed by the chief building official using the fixture unit count as defined in the most recent data published by the American Water Works Association and a ratio of one (1) ELU for every sixty (60) fixture unit valves or fraction thereof, computed to one (1) decimal place.

2. Combination accounts. Accounts that contain both residential and commercial facilities served through a common meter may be treated as either residential or nonresidential, whichever method of computation results in the largest number of ELUs.

c. *Expansion of an existing connection*. Except for residential units charged on a per-unit basis, if a building permit is issued for an existing connection which will increase the number of units or plumbing unit fixture count, the total number of ELUs for the old and new parts of the facility shall be computed as outlined in subsections (1)b1(i) through (iii) of this section. The number of new ELUs shall be determined by subtracting the old ELUs from the total number of ELUs in the entire facility. An additional impact fee will then be assessed on the difference between number of existing and new ELUs. As an example, if an existing building contained one hundred fifty (150) fixture units and it was expanded to three hundred (300) fixture units, the impact fee would equal five (5) ELUs minus two and one-half (2½) ELUs, or two and one-half (2½) ELUs. Impact fees will be computed on the basis of the additional floor area only.

d. *Bond credits.* Credits shall be awarded to those uses which will also be paying off bonded indebtedness resulting from programs designed to meet past or existing deficiencies. The credit amount shall be determined annually and subtracted from the gross fee to calculate the net impact fee.

e. *Renovation/redevelopment projects.*

1. Impact fees shall be charged on the basis of the difference between current and future impacts for renovation projects and for sites redeveloped within five (5) years from the last date of occupancy. Cost differences shall reflect changes in occupancy or use, floor area, number of units or any other measurement used in the calculation of impact fees.
2. Land with building improvements shall be vested with impact fee credit. Such fee credit shall be reduced by ten percent (10%) each year beginning one (1) year from the date a permitted demolition occurs. Preservation of full impact fee credit may continue as an incentive to abate blighted structures beyond the date of demolition provided the city commission approves such credit through a development agreement or other acceptable legal instrument to the city.

f. *Cost-of-living adjustment.* Impact fees charges shall be in accordance with the rate schedule in the city's Code of Ordinances, which shall be adjusted annually on October 1 to reflect any change in the cost-of-living over the prior year. The amount of change shall be determined by comparing the cost-of-living index (consumer price index), all items, as published by the U.S. Department of Labor as of April 1 of each year, with the same index for the same date in the previous year. Should the city not amend the schedule on October 1, the prevailing fees shall remain in effect until such time as they are amended.

g. *Payment of fees outside city limits.* Impact fees for water, sewer or other services to be provided shall be paid prior to the connection to the system, if the property is outside the city limits.

h. *Annexations.* Developed properties annexed into the city are presumed to have paid all impact fees to the jurisdiction having issued the building permit and are further presumed to have impacted all city systems other than potable water, wastewater service and reclaimed water which are provided directly to the site. Impact fees for these uses are required to be paid along with all appropriate installation fees prior to the delivery of such services.

(2) *Administration of impact fee funds.*

a. Fees collected pursuant to this article shall be deposited into separate trust funds for the purposes paid as hereinbefore enumerated.

b. The funds in each said trust fund shall be used only to acquire lands and equipment and/or to construct new facilities for the purposes hereinbefore enumerated and necessitated by new growth and included in the capital improvements element of the comprehensive plan.

c. If a building permit expires and no construction has been commenced, then the fee payer shall be entitled to a refund of the impact fee paid as a

condition of its issuance, except that the city shall retain three percent (3%) of the funds as an administrative fee to offset the costs of collection and refund. Where no request for refund is made, the impact fee may be applied to any future project on a unit basis.

d. If any fees collected during any fiscal year are not expended or encumbered within the ten (10) fiscal years immediately following the fiscal year of payment, the city manager shall publish one (1) time in a newspaper of general circulation in the city, a notice advising those persons having paid such fees that they are entitled to a refund thereof. Any person so entitled shall have one (1) calendar year from the date of publication of the notice within which to apply to the finance director for a refund of the fees paid. Each application shall consist of:

   1. The name and address of the applicant; and
   2. A copy of the receipt issued by the city for the fee paid, or a sworn statement that the applicant paid the fee, and the date and amount of the payment.

e. All refunds made will be for the full amount paid, together with the simple interest thereon of four percent (4%) per annum from the date of payment to the date of refund.

f. If no timely application for refund is made, the funds eligible therefor shall be transferred to the general fund for infrastructure improvements citywide.

(3) *Dedications or construction of facilities in lieu of parks and recreation fee.*

a. *Public facilities.* Any person who dedicates land/facilities to the city for public parks and/or recreational use shall receive a credit against such fee in the amount hereafter specified, if the city commission finds the following conditions to be met:

   1. The land/facilities dedicated are consistent with the comprehensive plan.

   2. The land/facilities are visible and readily accessible to the general public.

   3. The land/facilities, based upon topography, soil type, elevation, size, shape and natural vegetation, are suited to the type of use proposed.

   b. *Private facilities.* Any person who dedicates active recreation facilities for the perpetual use of residents of a given development shall receive a credit against such fee in the amount hereafter specified, if the city commission finds the following conditions to be met:

   1. The facilities are not located within any required yard or setback area.

2. The common and continued ownership and recreational use of the facilities are provided for by recorded deed restrictions (which may not be amended or released absent city commission approval), or by a prospectus on file with the state, department of business and professional regulation, division of land sales, condominiums and mobile homes.
3. The facilities are appropriate for such use, will result in a lessening of demand on city recreation facilities, and will adequately serve the population for which they are designed.

c. *Procedure to obtain credit*. Any person who dedicates land and/or facilities meeting the requirements of subsection (3)a or b of this section, may apply for the credit hereby allowed on an application form available from the director of planning. The completed form shall be submitted to the city manager, who will make a recommendation to the city commission as to whether or not the credit should be granted and the amount thereof. The city commission shall determine whether or not the credit shall be granted, based on the standards set forth in subsection (3)a or b of this section, and shall approve the amount of credit. The decision of the city commission shall be final. Any appeal from this decision shall be to the circuit court, by writ of certiorari, filed within thirty (30) days of the date of the decision of the city commission.

d. *Amount of credit.*

1. *Public facilities.* Any person who dedicates land and/or recreation facilities to the city for use as a public recreation facility shall receive a credit equal to the lesser of: The total of the fair market value of the land at the time dedication occurs, as determined by an MAI appraiser selected by, and paid for, by the dedicator, plus the estimated cost of constructing the proposed facilities, which cost estimate shall be submitted to and approved by the city engineer, with a maximum amount not to exceed the total amount of recreational impact fees anticipated to be generated by the specific development; or The total amount of recreational impact fees anticipated to be generated by the development; provided, however, that if the total amount determined by this subsection is the greater amount and the city commission determines, based upon staff recommendations, that the land/facilities to which the excess is attributable are necessary for access to and full enjoyment of the overall land/facilities, then the dedicator/installer shall receive full payment for such excess. This payment shall, however, be subject to an agreement with the developer which shall include a reimbursement schedule. The city commission shall determine whether

~~to incorporate the same into the next fiscal year budget or to direct payment from the recreational impact fee fund.~~

~~2. *Private facilities.* Any person who develops active recreation facilities to be installed, which facilities are to be dedicated to the perpetual use of residents of a given development, shall receive a credit equal to the lesser of:~~

~~(i) Fifty percent (50%) of the cost of constructing active recreation facilities thereon, which cost estimate shall be submitted to and approved by the chief building official;~~

~~(ii) Fifty percent (50%) of the recreational impact fee in effect at the time of building permit issuance.~~

~~e. *Method of paying credit.* If the party dedicating the land/facilities is the party who pays for a building permit within the development, the fee hereby imposed shall be waived and applied to the total credit allowed until the full amount of the credit has been recovered. If the party dedicating the land/facilities is not the party who pays for a building permit within the development, the city shall reimburse the dedicator or his assignee, semiannually, the recreational impact fees collected from the development, until the full amount of the credit has been paid.~~

~~f. *Time limits.* Reimbursements to dedicators shall only be made from recreational impact fees collected by the city within the ten (10) years immediately following the date of the final development order.~~

~~g. *Assignment of credit.* Any person entitled to a credit hereunder may assign his credit by filing with the finance director a copy of the document making the assignment. Thereafter, all refunds/waivers shall be made to the benefit of the assignee.~~

The purpose of this section is to ensure that new development does not impose a financial burden on existing residents by establishing comprehensive impact fees. The impact fees are levied in order to provide an adequate funding source for the capital improvements identified in the city's Comprehensive Plan, the need for which is generated by new development to facilitate the orderly expansion.

(1) *Authority*. In the establishment of impact fees, the City Commission is exercising its Charter home rule powers and its local authority, including police powers, the Municipal Home Rule Powers Act, Chapter 166, Florida Statutes, as amended; and section 163.3161 et seq., Florida Statutes, as amended. The aforementioned provisions authorize and require the City to provide and finance public improvements; to provide for the health, safety, and general welfare of the city; to coordinate the provision of adequate public facilities with land

development; and to implement its Comprehensive Plan. Furthermore, the Local Government Comprehensive Planning and Land Development Regulation Act, section 163.3202, Florida Statutes, encourage the use of innovative land development regulations, including impact fees.

(2) Legislative findings, reliance on the Municipal Fees Study and Police and Fire Impact Fee Study

a. This section is intended to impose fees in an amount based upon the new costs attributable to new development and the cost of providing needed capital facilities to serve new development.

b. The city hereby adopts and incorporates by reference, the "Municipal Impact Fee Study" and "Police and Fire Impact Fee Study" prepared by Raftelis Financial Consultants, Inc. dated March 29, 2023.

c. The impact fees established herein are documented in and supported by the March 29, 2023 Municipal Impact Fee Study, have further been documented and supported by public meetings for extraordinary circumstances on March 22, 2023, and on March 27, 2023, which public meeting records are hereby incorporated by reference, and are found to comply with the Florida Impact Fee Act, Florida Statutes §163.31801.

d. This section is intended to implement and further the Goals, Objectives and Policies of the Ormond Beach Comprehensive Plan.

e. The purpose of this section is to require payment of impact fees for new development and expansion of existing development to provide capital facilities that are required to accommodate growth as detailed in the Capital Improvement Plan and Capital Improvement Element of the Comprehensive Plan.

f. Implementation of impact fees is needed to maintain Level of Service standards established by the Capital Improvement Element of the Comprehensive Plan.

(3) Impact fees imposed. The following types of impact fees are hereby imposed:

a. Parks & Recreation.

b. Local Road.

c. Police.

d. Fire.

(4) Impact Fee obligation. Any new development, change of use or expansion of uses or square footage shall be obligated to pay impact fees as required by this Section. The obligation to pay the impact fees runs with the land.

a. Exemptions. The following development or expansion activity shall be exempt from paying impact fees:

1. Reconstruction, expansion, or replacement of a previously existing residential structure that does not change the use from residential to commercial use and does not increase the number of dwelling units.

2. Accessory Dwelling Units shall be considered part of the single-family residential dwelling unit and are exempt from payment of impact fees.

3. Reconstruction, expansion, or replacement of a previously existing non-residential structure with a new non-residential structure where there is no increase in square footage or a more intensive use.

4. Public fire protection service which includes public fire hydrants and other devices used to supply potable water or reclaimed water to meet general fire-fighting requirements.

b. Expansions. For development activity which will increase the number of units or building square footage, the impact fees shall be assessed on the difference between the existing and new units or square footage.

c. Impact Fee Credits. Land with building improvements, either past or present, shall have impact fee credits as follows:

1. Impact fees shall be vested with impact fee credits and these credits shall not expire over time.

2. It shall be the responsibility of the property owner to provide documents demonstrating previous buildings on a property seeking impact fee credits.

3. Property owners of non-residential buildings that are proposed to be demolished shall provide the following information to the Chief Building Official for impact fee credits:

a. Square footage and use of the building.

4. Residential impact fee credits shall be based upon the dwelling unit or units on the property. Property owners shall provide the Chief Building Official the number of dwelling units, type of use, and building square footage for impact fee credits.

d. Renovations. Impact fees shall be charged on the basis of the difference between current and future impacts for renovation projects and for sites redeveloped within five (5) years from the last date of occupancy. Cost differences shall reflect changes in occupancy or use, floor area, number of units or any other measurement used in the calculation of impact fees.

(5) Payment of impact fees. Impact fees shall be paid at the time a building permit is issued. If the city identifies an impact-generating development for which the impact fees required by this section were not paid when due, regardless of whether a permit was issued for such development, the city shall notify the owner that impact fees are due in accordance with this article. The property owner shall pay the impact fees due within 30 days of such notice.

(6) Impact fee classifications. The following classifications shall be used to determine the impact fee to be assessed:

a. Residential

1. Single-Family Residential. This classification shall include single-family dwelling units, including but not limited to, single-family homes, townhouses, or duplexes located on a single lot of record.

2. Multi-Family Residential. This classification shall include two (2) or more residential units, such as an apartment complex or condominium.

3. Manufactured/Mobile Home. This classification shall include manufactured or mobile homes on a leased area or on a platted lot.

b. Non-Residential. This classification shall include all uses that are not residential as listed in subsection seven (7) including but not limited to commercial, industrial, office, and institutional uses.

(7) Impact fee schedules.

a. Park and Recreation Impact Fee:

1. Single-Family Residential: $2,500.00 per dwelling unit.

2. Multi-Family Residential: $2,021.00 per dwelling unit.

3. Manufactured/Mobile Home: $1,658.00 per dwelling unit.

4. Non-Residential: Not assessed.

b. Local Road Impact Fee:

1. Single-Family Residential: $864.59 per dwelling unit.

2. Multi-Family Residential: $548.32 per dwelling unit

3. Manufactured/Mobile Home: $740.33 per dwelling unit.

4. Non-Residential:

#	Land Use	Unit	Impact Fee
a.	Bank	Per 1,000 square feet	$6,782.33
b.	Church/House of Worship	Per 1,000 square feet	$790.25

c.	Day Care/child care	Per 1,000 square feet	$4,951.51
d.	General Commercial (less than 40,000 square feet)	Per 1,000 square feet	$3,736.72
e.	General Commercial (40,000 square feet to 150,000 square feet)	Per 1,000 square feet	$5,559.09
f.	General Commercial (over 150,000 square feet)	Per 1,000 square feet	$2,539.87
g.	General/Government Office	Per 1,000 square feet	$1,709.28
h.	General Recreation	Per 1,000 square feet	$2,996.69
i.	Hospital	Per 1,000 square feet	$1,114.66
j.	Hotel/Motel (Transient Lodging)	Per Room	$355.87
k.	Industrial	Per 1,000 square feet	$450.23
l.	Medical Office	Per 1,000 square feet	$3,434.79
m.	Nursing Home (Assisted Living Facility	Per Bed	$268.79
n.	Restaurant	Per 1,000 square feet	$5,593.44
o.	Schools	Per Student	$226.79
p.	Warehouse	Per 1,000 square feet	$176.56

c. Police Impact Fee:

1. Single-Family Residential: $240.00 per dwelling unit.
2. Multi-Family Residential: $ 198.00 per dwelling unit.
3. Manufactured/Mobile Home: $166.00 dwelling per unit.
4. Non-Residential:

#	Land Use	Unit	Impact Fee
a.	Industrial/Warehousing	Per Square Foot	$0.015
b.	Institutional	Per Square Foot	$0.249
c.	Transient Lodging (Hotel/Motel)	Per Room	$130.00
d.	Office	Per Square Foot	$0.191
e.	Retail	Per Square Foot	$0.336
*Should none of the above land uses adequately define a proposed non-residential development as determined by the Planning Director, the following average charge per square foot of non-residential development shall be assessed: $0.220 per square foot.			

d. Fire Impact Fee:

1. Single-Family Residential: $292.00 per dwelling unit.

2. Multi-Family Residential: $ 262.00 per dwelling unit.

3. Manufactured/Mobile Home: $ 240.00 dwelling per unit.

4. Non-Residential:

#	Land Use	Unit	Impact Fee
a.	Industrial/Warehousing	Per Square Foot	$0.019
b.	Institutional	Per Square Foot	$0.320
c.	Transient Lodging (Hotel/Motel)	Per Room	$167.00
d.	Office	Per Square Foot	$0.245
e.	Retail	Per Square Foot	$0.432
*Should none of the above land uses adequately define a proposed non-residential development as determined by the Planning Director, the following average charge per square foot of non-residential development shall be assessed: $0.454 per square foot.			

(8) Alternative independent impact analysis.

a. At the option of a property owner, impact fees may be computed by the use of an alternate independent impact analysis if there is a belief that the cost to mitigate the impact of the development is less than the fee established in this section. The property owner shall be responsible for preparation of a proposed alternate independent impact analysis.

b. A pre-application meeting with the Planning Director shall be required prior to the submittal of an alternate independent impact analysis. The pre-application meeting shall establish the data, information, assumptions, formulae and methodology for the independent impact analysis.

c. The property owner shall be responsible for payment of the alternative independent impact analysis fee established in section 8-10 of the Code of Ordinances.

d. The property owner shall submit the alternate independent impact fee analysis from an individual or firm with the qualifications to prepare an independent analysis.

e. Within thirty (30) days of the submittal of a complete independent impact analysis, the Planning Director shall accept or reject the alternate independent impact analysis based on whether the proposed impact fee is proportional and reasonably connected to, or has a rational nexus with, the planned utility facilities improvements and the increased impact generated by the new residential or commercial development.

f. If the property owner desires the building permit to be issued before the alternative independent impact analysis has been completed and reviewed, the property owner shall pay the following:

1. An estimate of the impact fee, calculated pursuant to the applicable impact fee schedule in this section; and

2. A non-refundable alternative independent impact analysis fee established in section 8-10 of the Code of Ordinances.

3. If the approved alternative impact analysis establishes the development will have less of an impact and warrants a reduction in the impact fees, the city shall refund the difference between the estimate paid and the amount to be paid based on the independent impact analysis.

g. A determination by the Planning Director that the alternative impact fee calculation does not satisfy the requirements of this section may be appealed to the City Commission per section 1-19 of this code.

(9) Administration of impact fees.

a. City Administration

1. Fees collected pursuant to this article shall be deposited into a separate account for the purposes paid as hereinbefore enumerated.

2. The funds in said separate account shall be used only for capital improvements and the purposes hereinbefore enumerated and necessitated by new growth and included in the capital improvement program and the capital improvements element of the Comprehensive Plan.

3. If any fees collected during any fiscal year are not expended or encumbered within the ten (10) fiscal years immediately following the fiscal year of payment, the city manager shall publish one (1) time in a newspaper of general circulation in the city, a notice advising those persons having paid such fees that they are entitled to a refund thereof. Any person so entitled shall have one (1) calendar year from the date of publication of the notice within which to apply to the finance director for a refund of the fees paid. Each application shall consist of:

(i) The name and address of the applicant; and

(ii) A copy of the receipt issued by the city for the fee paid, or a sworn statement that the applicant paid the fee, and the date and amount of the payment.

All refunds made will be for the full amount paid, together with the simple interest thereon of four percent (4%) per annum from the date of payment to the date of refund. If no timely application for refund is made, the funds eligible therefor shall remain in the separate account that they were paid into.

b. Refunds

1. If a permit that includes impact fees expires and no construction has been commenced, then the fee payer shall be entitled to a refund of the impact fee paid as a condition of its issuance, except that the city shall retain an administrative fee equal to the actual costs of collection. Where no request for refund is made, the impact fee may be applied to any future project on a unit basis. Any request for a refund or future project credit shall be required to be made in writing to the Chief Building Official within twelve (12) months of the permit expiration.

(10) Impact Fee Reimbursement Agreement.

a. Dedications or construction of facilities in lieu of required impact fee.

1. Any person who desires to provide or dedicate land, or capital improvements, in lieu of the required impact fee shall provide the proposal (engineered plans, property appraisal, summary of improvement and requested reimbursement schedule) to the Planning Director for review by the Site Plan Review Committee.

2. The Site Plan Review Committee shall provide a recommendation to the City Commission regarding the proposal.

3. All proposed dedications or construction of facilities by any person and related Impact Fee Reimbursement Agreement shall require approval by the City Commission based upon the following criteria:

(i) The proposed land dedication or capital facility improvement is designed to serve the needs of the general public, and not the interest of a specific parcel, subdivision, or private interest;

(ii) The proposed land dedication or capital facility improvement is consistent with the Comprehensive Plan; and

(iii) The land dedication or capital facility improvement provides a better use of the impact fee dollars than other potential capital projects.

4. The City Commission shall determine whether or not the credit shall be granted, based on the standards set forth in subsection (3) of this section, and shall approve the amount of credit. The decision of the City

Commission shall be final. Any appeal from this decision shall be to the circuit court, by writ of certiorari, filed within thirty (30) days of the date of the decision of the City Commission.

b. Reimbursement.

1. A reimbursement schedule shall be included in the Impact Fee Reimbursement Agreement. In general, reimbursement shall be made in annual payments on January 1 of each year following acceptance of the land and/or improvements by the city, and shall be limited to the amount of impact fees received from any development identified in the agreement.

2. Total reimbursement shall not exceed the estimated cost included within the Impact Fee Reimbursement Agreement.

(11) Five-year review. At least once every five years, the Planning Director shall recommend to the City Commission whether any amendments should be made to the impact fee schedule as contained in this Section.

SECTION FIVE. Subsection (d)(6), of Section 1-30, Certificate of concurrency required, of Article V, Concurrency Management, of Chapter 1, General Administration, of the City of Ormond Beach *Land Development Code* is hereby amended as follows:

(6) For purposes of public school concurrency, the following developments are considered exempt:

a. Single-family lots of record on a recorded plat, existing as such at the time the school concurrency implementing ordinance is adopted for which otherwise would be entitled to build;

b. The creation of subdivisions and/or single-family lots equal to or less than ten (10) residential units;

c. All subdivisions creating greater than ten (10) or more lots shall be reviewed for available school capacity;

d. Any residential development or any other development with a residential component that received approval of a final development order prior to the implementation date of school concurrency or is exempt from concurrency under the city concurrency regulations is considered vested for that component which was previously approved and shall not be considered as proposed new residential development for purposes of school concurrency;

e. Any unit exempted under the county school facilities impact fee ordinance as set forth in the Volusia County Code of Ordinance, section 70-181~~(a)~~0 of the Code of Ordinances; and

f. Nonresidential development.

SECTION SIX. Section 3-57, Potable water system, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, of the City of Ormond Beach *Land Development Code* is hereby amended as follows:

Sec. 3-57. Potable water system.

Potable water system construction and material standards shall comply with those set forth in the SCDCS manuals.

(1) *Water mains location/sizing. ***No change to existing text****

(2) *Gravity house tank. ***No change to existing text****

(3) *Booster pumps/fire protection systems. ***No change to existing text****

(4) *Backflow prevention devices. ***No change to existing text****

(5) *Connection/temporary connection.*

a. The owner of each lot or parcel of land within the city, upon which lot or parcel of land any building, structure, or land use occupied or proposed for occupancy by human beings for either residential, commercial or other use, shall connect or cause such building, structure or use to be connected with the public water distribution system of the city and use such facilities, at the time a certificate of occupancy is issued, or sooner with prior approval by the city. If a unit is occupied when service is made available, then the connection shall be made within one (1) year of the date service becomes available. The owner shall be liable for all ~~impact,~~ connection and meter installation fees and customer deposits; provided, however, that no connection or connections shall be required:

1. Under the conditions set forth in this article.

2. If so stated in any annexation ordinance or development order issued by the city commission.

b. Except for fire hydrants and fire protection systems, all connections to the potable water system, whether for public or private use, shall be metered, with meter installation by city forces.

c. For temporary connection to the city water system for construction not involving new lines, a metered connection to a fire hydrant is allowed following request and deposit of $1,000.00. The meter shall be supplied by the city and use charges levied in accordance with the commercial use schedule then in effect. Upon payment of the final bill, the deposit shall be refunded.

d. For temporary connection to a system containing new lines, the city shall provide and install a meter and reduced pressure backflow preventer between the city main and the new line for purposes of flushing and clearance, following submittal of a request and deposit of $1,000.00. Connection between the meter and the new line shall be made by the developer and shall remain in place until the system has passed all tests and has been inspected by the city. At that time, the developer shall remove the meter and make the permanent connection to the city main. Upon payment of the final bill, the deposit shall be refunded. All water used shall be charged in accordance with the commercial use fee then in effect.

e. The connection of heating/air conditioning units to the city water system is prohibited.

SECTION SEVEN. Section 3-59, Sanitary sewer systems, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, of the City of Ormond Beach *Land Development Code* is hereby amended as follows:

Sec. 3-59. Sanitary sewer systems.

Sanitary sewer system construction and material standards shall comply with those set forth in the SCDCS manuals.

(1) *Connection required.*

a. All existing development, located within one hundred feet (100') of a city sewer line, except single-family homes on lots larger than one (1) acre, shall connect to the city sewer system within one (1) year from the date such system becomes available and, in the opinion of the utilities manager, such connection is economically and physically feasible. The owner of the property shall be liable for all ~~impact~~ connection, installation and line extension fees.

b. Except where permitted under sections 3-63 and 3-64, all new development shall connect to the city's sewer system and pay all ~~impact~~ connection,

installation and line extension fees prior to the issuance of building permits or the initiation of service.

c. Where so stated in an adopted annexation report, connection to the city sewer system may be deferred until such time as it is deemed in the public interest to make connection mandatory due to financial or public health considerations.

d. The city hereby reserves the right to refuse waste from any lot or parcel of land upon which there is located any institutional, commercial or industrial plants, building or premises which does not comply fully with this chapter or chapter 22, article II, division 2 of the Code of Ordinances, or that does not utilize city water, or that does not supply proper metering of its waste.

e. Where lot sizes are less than two (2) acres, and septic systems are in use, an assessment district will be created for the installation of sewer mains and each property owner will be required to connect to the system if it has been determined that septic tank failures are extensive and/or a health or serious pollution problem is apparent. Property owners will be required to pay the assessment charges and installation fees.

f. The discharge of wastes into the city sanitary sewer system from air conditioning/heating units is prohibited.

(2) *Design and inspection. ***No change to existing text****

(3) *Lift (pumping) stations. ***No change to existing text****

SECTION EIGHT. Section 3-60, Reclaimed water systems, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, of the City of Ormond Beach *Land Development Code* is hereby amended as follows:

Sec. 3-60. Reclaimed water systems.

Reclaimed water system construction and material standards shall comply with those set forth in the SCDCS manuals.

(1) *Compliance with state regulations. ***No change to existing text****

(2) *New residential development.* All new residential development with a gross density of greater than one (1) unit per acre and located in close proximity to an existing reclaimed water line or one (1) that is proposed in the city's five (5) year capital improvement program of sufficient size to serve the proposed

development shall be dry lined to accept reclaimed water for irrigation purposes. All such development shall connect to the reclaimed water system at the time of development or at the time service becomes available. This requirement shall appear in all restrictive covenants and sales documents of such new development. All ~~impact and~~ connection fees shall be collected at the time of connection.

(3) *Existing development. ***No change to existing text****

(4) *Performance and design standards. ***No change to existing text****

(5) *Connection permit required. ***No change to existing text****

SECTION NINE. Section 3-61, Utility line extensions, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, of the City of Ormond Beach *Land Development Code* is hereby amended as follows:

Sec. 3-61. Utility line extensions.

(a) *Service line extension. ***No change to existing text****

(b) *Utility main extension. ***No change to existing text****

(c) *Utility main extension reimbursement policy.* Utility connection fee credits may be provided per Section 1-25 of this code.

~~(1) Procedure for utility main extension reimbursement policy. In the event that any person is required to by the city or desires to extend water, sewer or reclaimed water lines, lines that are larger than the minimum line size required to serve a parcel or development in order to provide for anticipated future development or extensions, that person or developer may request reimbursement for the cost of such extension, in accordance with the following procedures:~~

~~a. Engineering drawings, including therewith design calculations, shall be submitted to the city engineer and utilities manager indicating:~~

~~1. The size and location of the proposed lines or the appurtenances thereto;~~

~~2. Preliminary cost estimates showing the cost difference for construction of the proposed oversize main verses the cost for the minimum size main that would be required to serve the parcel or development in accordance with the city's minimum design standards.~~

b. The city engineer shall review the entire submittal and shall make a recommendation to the city commission on the eligibility of the proposal for reimbursement, based on the conformance of the proposed improvements with the city's construction design standards and with the criteria established in subsection (c) of this section.

c. The city may enter into an agreement for reimbursement with the person making the submittal, based on a finding that the trunk lines and appurtenances thereto comply with city standards, are appropriately sized and located, and that there is adequate water and sewer treatment plant capacity for the area anticipated to be served.

(2) Extension outside city. Trunk lines shall not be extended beyond the city limits unless approved by the city commission based on a finding that:

a. It is in the best interest of the city in order to improve efficiency and quality of service.

(d) *Reimbursement.*

(1) Reimbursement shall be made in annual payments on January 1 of each year, up to a maximum of ten (10) years, following acceptance of the improvements by the city, and shall be limited to the amount of impact fees received from any development which connects to the lines or appurtenances identified in the agreement.

(2) Total reimbursement shall not exceed the estimated cost difference between the installation of the oversized line and the cost to install the minimum line size that would have been required to serve the development. Cost reimbursement shall be based on construction costs only.

(3) If there is more than one (1) agreement applicable to the same lines or appurtenances or extensions thereof, reimbursement shall be proportional to the impact fees collected from projects of the submitter over the preceding calendar year.

(e) *Construction.*

(1) Following the execution of a line extension reimbursement agreement, detailed construction drawings prepared by an engineer licensed by the state shall be submitted for review and approval by the city engineer and utilities manager. All necessary permits and approvals shall then be obtained by the person desiring to perform the work.

(2) Prior to beginning any construction activities, the contractor to perform the work shall attend a preconstruction conference with the city

~~engineer or his designee and shall post a performance bond in an amount equal to one hundred ten percent (110%) of the total approved project cost in a form to be approved by the city attorney.~~

~~(3) Prior to the city accepting the lines and appurtenances thereto:~~

~~a. The lines shall meet all applicable governmental standards, have all required approvals and be ready for service to the public;~~

~~b. There shall be provided to the utilities manager a complete set of as-built record drawings certified by the engineer of record;~~

~~c. There shall be posted a one (1) year maintenance bond in an amount equal to twenty-five percent (25%) of the amount of the performance bond in a form to be approved by the city attorney; and~~

~~d. Except for sewer laterals, reuse service lines and potable water service lines on the customer service side of an individual or master water meter, all water, sewer and reclaimed water lines and appurtenances thereto which are constructed by the developer or owner shall be dedicated to the city along with an easement therefor, and thereafter maintained by the city. At the time of dedication, the developer or owner shall provide the finance director with full documentation as to the actual cost of the project.~~

(~~f~~ d) *Annexation. ***No change to existing text****

SECTION TEN. Section 3-62, Wholesale sale of potable water, sewage treatment or reclaimed water, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, of the City of Ormond Beach *Land Development Code* is hereby amended as follows:

Sec. 3-62. Wholesale sale of potable water, sewage treatment or reclaimed water.

The city, at its sole discretion, may provide potable water, sewage treatment or reclaimed water to any governmental agency or utility franchise upon approval of the city commission, provided that it is determined that:

(1) The city has adequate capacity to serve such areas and the provision of such services shall not diminish the city's long-range ability to provide such service within its corporate boundary.

(2) Such arrangements are in the best interests of the city.

(3) Arrangements are made to ensure the annexation of properties receiving such services into the city at the time they become eligible for annexation.

(4) All line extensions and appurtenances thereto are at the expense of the provider of retail service and in accordance with the procedures described in this chapter.

(5) An agreement is entered into for the collection of ~~impact~~ connection fees and fair share reimbursement for line extension.

(6) An agreement is entered into that would ensure that the rate received for such services shall be not less than the cost for producing such services including all related administrative costs.

SECTION ELEVEN. Section 3-65, Interim package-type wastewater treatment facilities, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, of the City of Ormond Beach *Land Development Code* is hereby amended as follows:

Sec. 3-65. Interim package-type wastewater treatment facilities.

(a) *Generally.* ***No change to existing text***

(b) *Design and performance standards.*

(1) Small package-type wastewater treatment plants shall not be allowed in areas where improper levels of treatment and/or inadequate effluent disposal may result in adverse impacts on water resources (e.g., groundwater aquifers and surface water systems), unless each plant's owner provides sufficient financial resources for the city at some future point in time to assume responsibility for operating and maintaining the collection, treatment and effluent disposal components in compliance with regulatory requirements and standards. The following minimum criteria and procedures shall be adhered to in the implementation of this standard:

a. Small package-type wastewater treatment plants represent prefabricated and component-assembled plants of one hundred thousand (100,000) gallons or less per day of treatment capacity, or any plant which is considered or identified to be of an interim nature.

b. The location and siting of such facilities shall be limited to areas where improperly treated effluent shall not adversely impact the

quality of regional water resources by lateral surface/subsurface flow or by downward percolation.

c. Existing package-type or interim wastewater treatment plants currently meeting treatment and effluent quality standards may continue to be operated provided that each facility is being properly operated and maintained and wastewater treatment and effluent standards are continually being met.

d. Measures shall be undertaken to ensure the provision of financial resources by wastewater treatment plant owners to adequately cover the costs of rehabilitating, operating and maintaining each wastewater treatment and disposal facility, and for connecting to regional facilities if applicable.

(2) Interim or package-type wastewater treatment facilities shall be required to connect to the municipal system when access to the system is made available. The following minimum criteria and procedures shall be adhered to in the implementation of this standard:

a. Package-type or interim wastewater treatment plants currently meeting treatment and effluent quality standards may continue to operate, provided that each facility is:

1. Properly operated and maintained and wastewater treatment and effluent standards are satisfactorily met; and

2. Phased out at the option of the city and connected to the municipal system when sufficient capacity is made available.

b. When a private facility is phased out and connected to the municipal sewer system, the cost of the connection to the system is incurred by the owner of the private facility.

(3) Where soil conditions permit, an interim package treatment plant may be allowed, provided that sewer lines and lift stations are constructed to city standards, ~~impact~~ connection fees for future connections to the city system are paid or bonded for, and the developer agrees to discontinue operation of the package plant and connect to the municipal system when available.

(4) Existing development with central wastewater treatment will be required to connect to the city system as soon as possible after the city system is available if the existing system is found to have deficiencies that would create a serious health or pollution problem. Property owners may be required to pay the ~~impact~~ connection fee then in effect.

SECTION TWELVE. All Ordinances or parts of Ordinances in conflict herewith are hereby repealed to the extent of such conflict.

SECTION THIRTEEN. In the event any word, phrase, clause, sentence, paragraph, term, or provision of this Ordinance shall be held to be invalid by a court of competent jurisdiction, such judicial determination shall not affect any other word, clause, phrase, sentence, paragraph, term or provision, of this Ordinance, and the remainder of this Ordinance shall remain in full force and effect.

SECTION FOURTEEN. This Ordinance shall take effect ninety (90) days after its adoption.

PASSED UPON at the first reading of the City Commission, this 16th day of May, 2023.

PASSED UPON at the second and final reading of the City Commission, this 6th day of June 2023.

STAFF REPORT

City of Ormond Beach
Department of Planning

MEETING DATE: April 13, 2023

SUBJECT: Land Development Code amendments: Connection, Mobility, and Impact Fee amendments

APPLICANT: Administrative

NUMBER: LDC 2021-019

PROJECT PLANNER: Steven Spraker, AICP, Planning Director

INTRODUCTION: This is an administrative amendment to the Land Development Code (LDC), to implement the recommendations of the impact fee study update, by amending **(1)** Section 1-25, Reserved, of Article IV, Schedule of Development Review and Impact Fees, of Chapter 1, General Administration to implement the water and wastewater utility system connection fee study by creating the water and wastewater connection fee section, **(2)** Section 1-26, Mobility fee, of Article IV, Schedule of Development Review and Impact Fees, of Chapter 1, General Administration to amend the person trip mobility fee per the municipal impact fee study, **(3)** Section 1-27, Impact fees, of Article IV, Schedule of Development Review and Impact Fees, of Chapter 1, General Administration to delete the stormwater impact fee, amend the local road impact fee, and create police and fire impact fee per the municipal impact fee study and police and fire impact fee study, **(4)** Section 1-30(d)(6)(e), Certificate of concurrency required, of Article V, Concurrency Management, of Chapter 1, General Administration, **(5)** Section 3-57, Potable water system, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, **(6)** Section 3-59, Sanitary sewer systems, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, **(7)** Section 3-60, Reclaimed water systems, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, **(8)** Section 3-60, Reclaimed water systems, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, **(9)** Section 3-62, Wholesale sale of potable water, sewage treatment or reclaimed water, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, and **(10)** Section 3-65, Interim package-type wastewater treatment facilities, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards to implement the recommendations of the water and wastewater utility system connection fee study, municipal impact fee study, and police and fire impact fee study.

BACKGROUND: Impact fees are collected from builders or developers for new construction to help pay for increased infrastructure demands created by the new growth. The City of Ormond Beach has assessed impact fees for water and sewer since 1974. An impact fee for recreational facilities was added in 1987 and a comprehensive impact fee ordinance was adopted in 1990. The 1990 ordinance included impact fees for the full range of capital facilities (administrative facilities, conservation land, cultural facilities, fire protection, law enforcement, local roads, solid waste, road/drainage maintenance and stormwater).

Impact fees are an important component of the city's comprehensive planning process and a necessary tool to ensure that new growth pays its fair share of capital improvement costs. The Comprehensive Plan identifies the future growth that is projected to occur, the capital facilities required to serve that growth, and a minimum level-of-service (LOS) standard that will be provided for new development. The city has adopted LOS standards for potable water, sanitary sewer, solid waste, drainage, parks, roads and firefighting, but only collects impact fees for some of these services. The city has adjusted water and sewer impact fees annually based upon increases to the Engineering News Record Construction Cost Index (ENR CCI).

In 1996, the city reviewed its impact fee ordinance and determined that the projected capital improvement needs for the following five years did not warrant collection of certain fees. The city eliminated impact fees for administrative facilities, conservation land, fire protection, law enforcement, solid waste and road/drainage maintenance. The cultural facilities impact fee was not eliminated, but reduced to $0 because of potential conflicts with the adopted Comprehensive Plan.

In 2009, the City of Ormond Beach was designated as a Dense Urban Land Area requiring the city to adopt a financially feasible multimodal strategy. The city adopted the Mobility Strategy and 2025 Comprehensive Plan amendments in 2010. The mobility fee replaced concurrency and the imposition of city road impact fees on certain state roads in Transportation Concurrency Exception Areas (TCEA). New development on any road facility outside the TCEA, the city's road impact fee applies. An amendment to Section 1-27 of the Land Development Code was adopted per Ordinance No. 2015-44 to allow the City Commission to approve impact fee credit agreements that prevent credits from declining ten (10%) percent yearly over ten (10) years after the final inspection date of the demolition for land with building improvements.

On May 18, 2021, the City Commission authorized Resolution 2021-86 to accept a bid proposal from Raftelis for an impact fee study update to review and amend the water, sewer, park & recreation, stormwater, local road and mobility fees. The scope-of-work also provided a task for a feasibility analysis to add fire and police impact fees and make a recommendation if these fees should be pursued with a separate work authorization. The total fee for the impact fee study is $99,445. On October 5, 2022, the City Commission authorized Resolution 2022-121 that authorized $31,555 for the development of Police and Fire impact fees by Raftelis.

Impact fees and connection fees for residential uses are measured based on residential units. Water and sewer connection fees for non-residential uses are based on the number of fixtures (sinks, toilets, hose bibs). The road impact fee and mobility fee are based upon the use. Park and Recreation impact fees are assessed only for residential uses.

The impact fee update has been discussed at the following meetings:

EXHIBIT 1: Impact fee update schedule

Date	Group	Meeting type
September 7, 2022	City Commission	Discussion item
February 21, 2023	City Commission	Discussion item
March 9, 2023	Planning Board	Discussion item
March 22, 2023	Public meeting	Extraordinary circumstances
March 27, 2023	Public meeting	Extraordinary circumstances

Documents regarding the impact fee update have been available on the city webpage: https://www.ormondbeach.org/1028/Impact-Fees.

Raftelis has performed three (3) studies that serve as the data and analysis for the Land Development Code amendments that are included in Attachment 3:

- Water and wastewater utility system connection fee study;
- Municipal impact fee study; and
- Police and fire impact fee study.

Separate of the Land Development Code amendments, there is a need to amend the Code of Ordinances to implement the impact fee study updates. Amendments to the Code of Ordinances require only the City Commission review and action. A draft of the Code of Ordinance amendments has been provided in Attachment 2. The PowerPoint presentations for the City Commission workshops and Extraordinary Circumstances meetings are shown in Attachment 4.

ANALYSIS: The proposed Land Development Code amendments are shown by section in Attachment 1. The analysis below details the amendment, fee amendments, key changes and policy direction received:

SECTION ONE. Section 1-25, Reserved, of Article IV, Schedule of Development Review and Impact Fees, of Chapter 1, General Administration

Details of the amendment:

Creation of water and sewer connection fees that were previously called impact fees. Section 1-25 was previously reserved.

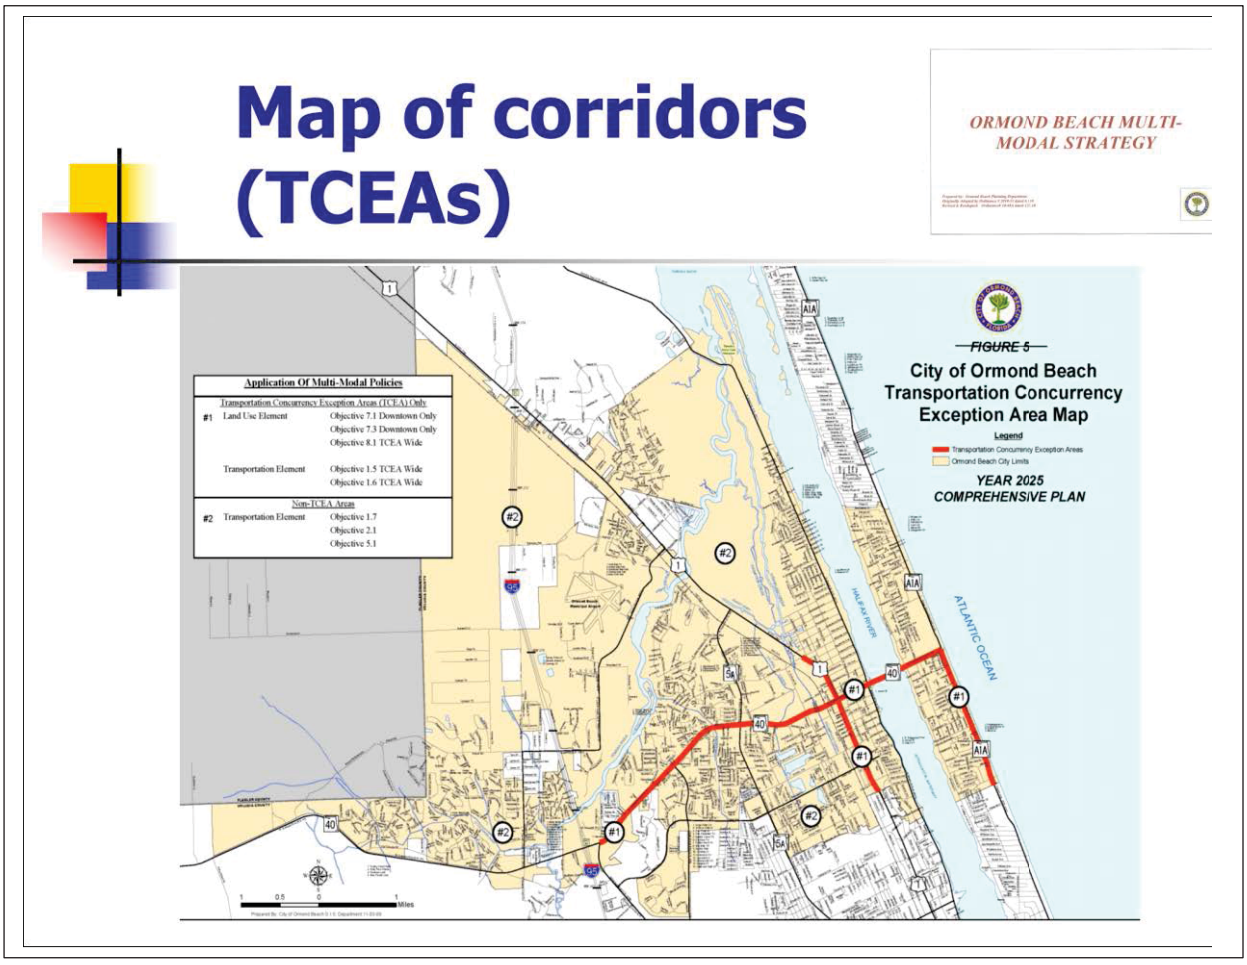
Fee amendment:

EXHIBIT 2: Water and Wastewater connection fees

Description	Proposed ELU factor	Existing Fees	Proposed Fees	Increase/ (Decrease)
Residential Water/Irrigation Connection Fees				
Single-Family, per unit	1.0	$2,902.00	$2,333.00	($569.00)
Multi-Family, per unit	0.80 (was 0.50)	$1,451.00	$1,866.00	$415.00
Mobile Home, per unit	0.90 (was 0.60)	$1,741.20	$2,099.00	$358.00
Residential Wastewater Connection Fees				
Single-Family, per unit	1.0	$2,829.00	$3,577.00	$748.00
Multi-Family, per unit	0.80 (was 0.50)	$1,414.00	$2,861.00	$1,447.00
Mobile Home, per unit	0.90 (was 0.60)	$1,697.40	$3,219.00	$1,522.00
* New non-residential utility customers charged based on an ELU factor based on a fixture count.				

Key changes/Policy Direction

1. Amendment from the term impact fee to connection fee.
2. Amendment of the Equivalent Unit Factor from 0.50 for multi-family to 0.80 and 0.60 to 0.90 for mobile home.
3. Decrease of $569.00 for a single-family residential unit or one Equivalent Living Unit (ELU).
4. Increase of $748.00 for a single-family residential unit or one Equivalent Living Unit (ELU).
5. Creation of two service area districts / zones with one being for the existing City service area and one being for the Western Service Area.
6. Establishment of the process to perform an alternative connection fee analysis.
7. Impact fee reimbursement for land or capital costs established.



SECTION TWO. Section 1-26, Mobility fee, of Article IV, Schedule of Development Review and Impact Fees, of Chapter 1, General Administration

In 2009, the Legislature passed SB 360ER. This bill designated dense urban land areas (DULAs) and one of the definitions of DULA was an area having over 1000 people per square mile. Pursuant to that bill, the Florida Legislative Office of Economic and Demographic Research transmitted to the Department of Community Affairs on July 1, 2009, a list of counties and municipalities including the City of Ormond Beach, as qualifying for DULA status. Ormond Beach as a DULA is automatically designated a Transportation Concurrency Exception Area (TCEA). A designation of a citywide TCEA means that state concurrency no longer applies to development provided the city has a

multimodal strategy approved and adopted in its Comprehensive Plan within two years of the bill's passage. However, Ormond Beach elected through its home rule powers to be more stringent and to restrict the creation of TCEAs on roadway corridors which are environmentally or politically constrained.

The city adopted Multi-Modal Strategies which was approved by Ordinance 10-48A on December 7, 2010 as part of a Remedial Amendment and Stipulated Settlement Agreement with the Florida Department of Community Affairs (DCA) and included mobility fees with TCEA. The City's Comprehensive Plan and multimodal strategy was approved by the DCA on January 18, 2011. The multi-modal strategy, including mobility fees, was prepared as a balance between all roadway capacity improvements and all vehicle reduction strategies. The roadways where the mobility fees are assessed include State Road SR 40 (SR A1A to Williamson Boulevard), U.S. Highway 1 (Wilmette Avenue to the southern City limit) and SR A1A (SR 40 to the southern City limit) and are along Votran's eastside route network. In these areas, proportionate fair share contributions are replaced with a mobility fee based on a per trip basis. The city developed and adopted a multi-modal strategy for these corridors and applies the mobility fee instead of local road impact fee. Section 1-27 of the Land Development Code contains the mobility fee calculation and it includes a fee based on per person trips. The original analysis in the adoption calculated a per person trip fee of $77.82. The per person trip rate fee in 2011 was reduced to $16.00 in response to economic conditions to allow redevelopment in these corridors.

EXHIBIT 3: Transportation Concurrency Exception Areas

[04.13.2023, Connection, Mobility, and Impact Fee LDC amendments]

Details of the amendment:

The amendment proposes to increase the cost per person trip from $16.00 to $85.67. No other changes are proposed to this Section.

Fee amendment:

The amendment proposes to increase the cost per person trip from $16.00 to $85.67.

Key changes/Policy Direction

At the February 21, 2023, several options were presented to the City Commission. The option selected was the full per person trip fee of $85.67. The chart below shows that the per person trip fee of $85.67 is generally higher than the proposed local road impact fee. For example, the mobility fee at a per person trip fee of $85.67 would be $1,285.05 for a single-family house versus the local road impact fee of $864.59. The comparison table is provided below:

EXHIBIT 4: Mobility fee options

Type of Fee	Single Family Dwelling Unit	Multi-family Dwelling Unit	Medical office Per 1,000 SF	Retail Per 1,000 SF	Industrial Per 1,000 SF	Restaurant Per 1,000 SF
Ormond Beach Local Road (proposed)	$864.59	$548.32	$3,434.79	$3,736.72	$450.23	$5,559.09
Ormond Beach Mobility Fee (current)	$240.00	$130.56	$751.68	$628.64	$107.14	$1,507.70
Option 1 - Proposed full mobility fee **($85.67)**	$1,285.05	$699.07	$4,024.78	$3,365.98	$573.65	$8,072.79
Option 2 - Proposed mobility fee **($59.00)** - 69%	$870.00	$481.44	$2,771.82	$2,318.12	$395.06	$5,559.64
Option 3 - Proposed mobility fee **($42.84)** - 50%	$642.60	$349.57	$2,012.62	$1,683.19	$286.86	$4,036.86
Option 4 - Proposed mobility fee **($32.00)** - 37%	$480.00	$261.12	$1,503.36	$1,257.28	$214.27	$3,015.40
Option 5 - Proposed mobility fee **($24.00)** - 28%	$360.00	$195.84	$1,127.52	$942.96	$160.70	$2,261.55

The per person trip rate fee in 2011 was reduced to $16.00 in response to economic conditions to allow redevelopment in these corridors. Policy confirmation is needed to confirm that the desired mobility fee should be a per person trip fee of $85.67.

SECTION THREE. Section 1-27, Impact fee, of Article IV, Schedule of Development Review and Impact Fees, of Chapter 1, General Administration

Details of the amendment:

Deletion of Section 1-27 and replaced with new impact fee section that includes local roads, park and recreation, police and fire impact fees.

Fee amendment:

1. Delete stormwater impact fee and replace with stormwater connection fee.
2. Park and Recreation

EXHIBIT 5: Impact fee update schedule

Description	Existing Fees	Proposed Fees	Increase/ (Decrease)
Single-Family, per unit	$1,312.24	$2,500.00	$655.76
Multi-Family, per unit	$1,048.42	$2,021.00	$449.00
Mobile Home, per unit	$785.74	$1,658.00	$392.26
*Fee does not apply to non-residential uses.			

3. Local Roads

EXHIBIT 6: Local Road Impact fee update schedule

Land Use	Unit	Proposed Fee	Current Fee
Single-Family	DU	$864.59	$162.61
Multi-Family	DU	$548.32	$162.61
Mobile/Manufactured Home	DU	$740.33	$162.61
Hotel/Motel	Rooms	$355.87	$114.85
General/Government Office	KSF	$1,709.28	$230.83
Medical Office	KSF	$3,434.79	$1,014.31
Hospital	KSF	$1,114.66	$212.64
Nursing Home	Beds	$268.79	n/a
Industrial	KSF	$450.23	$100.07
Warehouse	KSF	$176.56	$100.07

Land Use	Unit	Proposed Fee	Current Fee
General Commercial (<40,000)	KSF	$3,736.72	$834.64
General Commercial (40,000-150,000)	KSF	$5,559.09	$802.81
General Commercial (<150,000)	KSF	$2,539.87	$602.67
Fast-Food	KSF	$25,155.10	n/a
Restaurant	KSF	$5,593.44	$881.26
General Recreation	KSF	$2,996.69	$59.13
Schools	Students	$226.79	n/a
Church	KSF	$790.25	$150.09
Day Care	KSF	$4,951.51	$329.27
Convenience Store	KSF	$26,948.94	$1,355.44

4. Police Impact fee (new impact fee)

EXHIBIT 7: Police Impact fee schedule

Description	Impact Fee Unit	Proposed Police Impact Fee
Single-Family	Dwelling Unit	$240.00
Multi-Family	Dwelling Unit	$198.00
Mobile Home	Dwelling Unit	$166.00
Industrial	Per Square Foot	$0.015
Institutional	Per Room	$0.249
Hotel/Motel	Per Square Foot	$130.00
Office	Per Square Foot	$0.191
Retail	Per Square Foot	$0.336

5. Fire impact fee (new impact fee)

EXHIBIT 8: Fire Impact fee schedule

Description	Impact Fee Unit	Proposed Fire Impact Fee
Single-Family	Dwelling Unit	$292.00
Multi-Family	Dwelling Unit	$262.00
Mobile Home	Dwelling Unit	$240.00
Industrial	Per Square Foot	$0.019
Institutional	Per Room	$0.320
Hotel/Motel	Per Square Foot	$167.00
Office	Per Square Foot	$0.245
Retail	Per Square Foot	$0.432

Key changes/Policy Direction

1. Amendment to the expiration of impact fee credits – to be acted upon by May 2, 2023.
2. Elimination of the stormwater impact fee.
3. Parks and recreation: decision point to assess the maximum supportable fee. This increase is through the extraordinary circumstance provision in the impact fee statute.
4. Local road: decision point to include fast food use in the restaurant category and convenience store use in the general commercial category. This increase is through the extraordinary circumstance provision in the impact fee statute.

5. Establishment of a police and fire impact fees.
6. Establishment of the process to perform an alternative impact fee analysis.
7. Impact fee reimbursement for land or capital costs established.

SECTION FOUR. Section 1-30(d)(6)(e), Certificate of concurrency required, of Article V, Concurrency Management, of Chapter 1, General Administration

Details of the amendment:

Amendment to clarify that the school impact fee reference is part of the Volusia County Code of Ordinance. No fee related impacts.

SECTION FIVE. Section 3-57, Potable water system, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards

Details of the amendment:

Amendment within the potable water system section to delete reference to impact fee and maintain reference to connection fee.

SECTION SIX. Section 3-59, Sanitary sewer systems, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards

Details of the amendment:

Amendment within the sanitary sewer systems section to delete reference to impact fee and replace with the term connection fee.

SECTION SEVEN. Section 3-60, Reclaimed water systems, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards

Details of the amendment:

Amendment within the reclaim water systems section to delete reference to impact fee and replace with the term connection fee.

SECTION EIGHT. Section 3-61, Utility line extensions, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards

Details of the amendment:

Deleted the utility main extension reimbursement policy and moved the text into Section 1-25, Connection Fees.

SECTION NINE. Section 3-62, Wholesale sale of potable water, sewage treatment or reclaimed water, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards

Details of the amendment:

Amendment to delete reference to impact fee and replace with the term connection fee.

SECTION TEN. Section 3-65, Interim package-type wastewater treatment facilities, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards

Details of the amendment:

Amendments to delete reference to impact fee and replace with the term connection fee.

Cumulative connection and impact fee changes:

Exhibit 9 shows the proposed connection and impact fee changes on a single-family residential home:

EXHIBIT 9: Connection and impact fee changes, Single-Family Residential

Single-Family Residential

Fee	Existing	Proposed	Change
Water	$2,902.00	$2,333.00	-$569.00
Sewer	$2,829.00	$3,577.00	$748.00
Local Road	$162.61	$864.59	$701.98
Park & Recreation	$1,312.00	$2,500.00	$1,188.00
Police	$0.00	$240.00	$240.00
Fire	$0.00	$292.00	$292.00
Stormwater	$119.39	$0.00	-$119.39
Total	$7,325.00	$9,806.59	$2,481.59

Increase in fees: $2,481.59

CONCLUSION: Section 1-15(e) of the Land Development Code requires certain criteria must be evaluated before adoption of a Land Development Code amendment when making their recommendation, as follows:

1. **The proposed development conforms to the standards and requirements of this Code and will not create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare or quality of life.**

   The proposed amendment seeks to update the Land Development Code to assess connection, mobility, and impact fees based on three (3) studies performed by Raftelis. These fees are designed to require new development and expansions to pay a portion of the capital infrastructure costs that new development creates. It is not expected that the proposed Land Development Code amendment would create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare or quality of life.

2. **The proposed development is consistent with the Comprehensive Plan.**

   The proposed Land Development Code amendment is consistent with the Comprehensive Plan. Objective 2.1 of the Future Land Use Element of the Comprehensive Plan discussed the need to update Land Development Code

regulations. The connection, mobility, and impact fees are also consistent with the Capital Improvements Element of the Comprehensive Plan.

3. **The proposed development will not adversely impact environmentally sensitive lands or natural resources, including but not limited to waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells.**

   The proposed Land Development Code amendment does not approve any site-specific development and will not have an adverse impact on environmentally sensitive lands.

4. **The proposed use will not substantially or permanently depreciate the value of surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties**.

   The proposed Land Development Code amendment does not approve any site-specific development and will not have any impacts on surrounding properties.

5. **There are adequate public facilities to serve the development, including but not limited to roads, sidewalks, bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds.**

   The proposed Land Development Code amendment seeks to amend connection, mobility, and impact fees. The amendment would not have a negative impact to public facilities.

6. **Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe. This finding shall be based on a traffic report where available, prepared by a qualified traffic consultant, engineer or planner which details the anticipated or projected effect of the project on adjacent roads and the impact on public safety.**

   There is no development proposed as part of the proposed amendment. The application pertains to a Land Development Code amendment.

7. **The proposed development is functional in the use of space and aesthetically acceptable.**

   There is no development proposed as part of the proposed amendment. The application pertains to a Land Development Code amendment.

8. **The proposed development provides for the safety of occupants and visitors.**

   There is no development proposed as part of the proposed amendment. The application pertains to a Land Development Code amendment.

9. The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area.

There is no development proposed as part of the proposed amendment. The application pertains to a Land Development Code amendment.

10. The testimony provided at public hearings.

There has not been a public hearing at this time. The comments from the Planning Board meeting will be incorporated into the City Commission packet.

RECOMMENDATION:

It is recommended that the Planning Board **APPROVE** the administrative amendments to the Land Development Code (LDC) to update connection, mobility, and impact fees based on (1) "Water and Wastewater Utility System Connection Fee Study", (2) "Municipal Impact Fee Study" and (3) "Police and Fire Impact Fee Study" as shown in Attachment 1. It is expected that the City Commission public hearing dates will be May 16, 2023 and June 6, 2023. The amendments would be effective on September 4, 2023.

ATTACHMENT 1

Proposed Land Development Code Amendments

SECTION ONE. Section 1-25, Reserved, of Article IV, Schedule of Development Review and Impact Fees, of Chapter 1, General Administration, is hereby amended as follows:

ARTICLE IV. SCHEDULE OF ~~DEVELOPMENT REVIEW AND IMPACT~~ CONNECTION, MOBILITY, AND IMPACT FEES

Sec. 1-25. ~~Reserved.~~ Water and Wastewater Connection Fees.

(1) *Purpose and Authority.*

a. The purpose of the water and wastewater connection fees is to assign growth related capital costs to new development that is responsible for such costs.

b. This section is designed to ensure that new growth and development, changes of uses, and expansions pay a fair share of the capital public facility costs for water and wastewater systems.

c. The water and wastewater connection fees are levied in order to provide an adequate funding source for the capital improvements identified in the city's comprehensive plan, the need for which is generated by new development to facilitate the orderly expansion.

d. The Level of Service for water and wastewater services are established in the Capital Improvement Element of the Comprehensive Plan.

(2) *Adoption of the technical study as the basis of water and wastewater connection fees.* The city hereby adopts and incorporates by reference, the "Water and Wastewater Utility System Connection Fee Study" prepared by Raftelis Financial Consultants, Inc. dated March 29, 2023.

(3) *Connection fees imposed.* The following types of connection fees are hereby imposed: water and wastewater. These utility connection fees apply within the city limits and the utility service area, including the West Ormond Water and Sewer District, Hunter's Ridge-Flagler County DRI, and North Peninsula Water District.

(4) *Connection fee obligation.* Any new development or expansion generating utility demand shall be obligated to pay water and wastewater connection fees as required by this section. The obligation to pay the water and wastewater connection fees runs with the land.

a. Exemptions. The following development or expansion activity shall be exempt from paying water and wastewater connection fees:

1. Reconstruction, expansion, or replacement of a previously existing residential structure that does not change the use from residential to commercial use and does not increase the number of dwelling units.

2. Accessory Dwelling Units shall be considered part of the single-family residential dwelling unit and is exempt from payment of water and wastewater connection fees.

3. Reconstruction, expansion, or replacement of a previously existing non-residential structure with a new non-residential structure where there is no increase in fixture units. Any increase in fixture units shall require payment of water and wastewater connection fees based on the net increase of new fixture units.

4. Public fire protection service which includes public fire hydrants and other devices used to supply potable water or reclaimed water to meet general fire-fighting requirements.

b. Expansions. For development activity which will increase the number of units or plumbing unit fixture count, the water and wastewater connection fees shall be assessed on the difference between the existing and new number of units or plumbing unit fixtures.

c. Connection Fee Credits. Land with building improvements, either past or present, shall have water and wastewater connection fee credits as follows:

1. Connection fees shall be vested with connction fee credits and these credits shall not expired over time.

2. It shall be the responsibility of the property owner to provide documents demonstrating previous buildings on a property seeking connection fee credits.

3. Property owners of non-residential buildings that are proposed to be demolished shall provide the following information to the Chief Building Official for connection fee credits:

a. Square footage and use of the building.

b. An inventory of existing plumbing fixture units on the adopted Equivalent Living Unit (ELU) form. Non-residential buildings without an inventory of plumbing fixture units shall be provided water and wastewater connection fee credits based upon typical fixture counts for the use.

4. Residential connection fee credits shall be based upon the dwelling unit or units on the property. Property owners shall provide the Chief Building Official the number of dwelling units, type of use, and building square footage for connection fee credits.

d. Renovations. Water and wastewater connection fees shall be charged on the basis of the difference between current and future impacts for renovation projects and for sites redeveloped within five (5) years from the last date of occupancy as determined by the plumbing fixture units.

e. Properties outside city limits. Water and wastewater connection fees for services to be provided shall be paid prior to the connection to the system.

(5) *Payment of water and wastewater connection fees.* Water and wastewater connection fees shall be paid at the time of development permitting (building,

utility connection, irrigation meter installation or site engineering permits). If the city identifies an impact-generating development for which the water and wastewater connection fees required by this section were not paid when due, regardless of whether a permit was issued for such development, the city shall notify the property owner that utility connection fees are due in accordance with this article. The property owner shall pay the water and wastewater connection fees due within 30 days of such notice.

(6) *Connection fee classifications.* The following classifications shall be used to determine the water and wastewater connection fee to be assessed:

a. Residential

1. Single-Family. This classification shall include where water and/or wastewater service is provided to a single-family dwelling unit, including but not limited to, single-family homes, townhouses, or duplexes located on a single lot of record.

2. Multi-Family. This classification shall include where water and/or wastewater service is provided to two (2) or more residential units, such as an apartment complex or condominium.

3. Manufactured/Mobile Home. This classification shall include where water and/or wastewater service is provided to a manufactured or mobile home on a leased area or on a platted lot.

b. Non-Residential. This classification shall include where water and/or wastewater service is provided to uses that is not residential including but not limited to commercial, industrial, office, and institutional uses.

c. Irrigation. Potable water service that is metered separately from and used exclusively for outdoor irrigation purposes or watering of land for landscaping purposes.

(7) *Calculation of water connection fees.*

a. Residential:

1. Single-Family Residential.

(i) West Ormond Water and Sewer District: shall be assessed one (1) ELU: $2,333.00.

(ii) Hunter's Ridge-Flagler County DRI Service Area: shall be assessed one (1) ELU: $2,333.00.

(iii) North Peninsula Water District: shall be assessed one (1) ELU: $2,333.00.

(iv) All other water utility connections: shall be assessed one (1) ELU: $2,333.00.

2. Multi-Family Residential.

(i) West Ormond Water and Sewer District: shall be assessed 0.80 ELU: $1,866.00.

(ii) Hunter's Ridge-Flagler County DRI Service Area: shall be assessed 0.80 ELU: $1,866.00.

(iii) North Peninsula Water District. shall be assessed 0.80 ELU: $1,866.00.

(iv) All other water utility connections. shall be assessed 0.80 ELU: $1,866.00.

3. Manufactured/Mobile Home.

(i) West Ormond Water and Sewer District: shall be assessed 0.90 ELU: $2,099.00.

(ii) Hunter's Ridge-Flagler County DRI Service Area: shall be assessed 0.90 ELU: $2,099.00.

(iii) North Peninsula Water District: shall be assessed 0.90 ELU: $2,099.00.

(iv) All other water utility connections: shall be assessed 0.90 ELU: $2,099.00.

b. Non-Residential: For the West Ormond Water and Sewer District, Hunter's Ridge-Flagler County DRI Service Area, North Peninsula Water District, and all other water utility connections:

1. The number of ELUs shall be computed by the chief building official using the fixture unit count as defined in the most recent data published by the American Water Works Association and a ratio of one (1) ELU for every sixty (60) fixture unit valves or fraction thereof, computed to one (1) decimal place.

c. Irrigation.

1. West Ormond Water and Sewer District: shall be assessed one (1) ELU: $2,333.00.

2. Hunter's Ridge-Flagler County DRI Service Area: Irrigation meters not permitted.

3. North Peninsula Water District: shall be assessed one (1) ELU: $2,333.00.

4. All other water utility connections: shall be assessed one (1) ELU: $2,333.00.

(8) *Calculation of wastewater connection fees.*

a. Residential:

1. Single-Family Residential.

(i) West Ormond Water and Sewer District: shall be assessed one (1) ELU: $3,577.00.

(ii) Hunter's Ridge-Flagler County DRI Service Area: shall be assessed one (1) ELU: $3,577.00.

(iii) North Peninsula Water District. shall be assessed one (1) ELU: $3,577.00.

(iv) All other water utility connections: shall be assessed one (1) ELU: $3,577.00.

2. Multi-Family Residential.

(i) West Ormond Water and Sewer District: shall be assessed 0.80 ELU: $2,861.00.

(ii) Hunter's Ridge-Flagler County DRI Service Area: shall be assessed 0.80 ELU: $2,861.00.

(iii) North Peninsula Water District: shall be assessed 0.80 ELU: $2,861.00.

(iv) All other water utility connections: shall be assessed 0.80 ELU: $2,861.00.

b. Non-Residential: For the West Ormond Water and Sewer District, Hunter's Ridge-Flagler County DRI Service Area, North Peninsula Water District, and all other wastewater utility connections:

1. The number of ELUs shall be computed by the Chief Building Official using the fixture unit count as defined in the most recent data published by the American Water Works Association and a ratio of one (1) ELU for every sixty (60) fixture unit valves or fraction thereof, computed to one (1) decimal place.

(9) *Alternative independent connection analysis.*

a. At the option of a property owner, water and wastewater connection fees may be computed by the use of an alternate independent connection analysis if there is a belief that the cost to mitigate the impact of the development is less than the fee established in this section. The property owner shall be responsible for preparation of a proposed alternate independent connection analysis.

b. A pre-application meeting with the Planning Director shall be required prior to the submittal of an alternate independent connection analysis. The pre-application meeting shall establish the data, information, assumptions, formulae and methodology for the independent connection analysis.

c. The property owner shall be responsible for payment of the utility connection fee calculation analysis fee established in section 8-10 of the Code of Ordinances.

d. The property owner shall submit the alternate independent connection fees analysis from an individual or firm with the qualifications to prepare an independent analysis.

e. Within thirty (30) days of the submittal of a complete independent connection analysis, the Planning Director shall accept or reject the alternate independent connection analysis based on whether the proposed water and wastewater connection fee is proportional and reasonably connected to, or has a rational nexus with, the planned utility facilities improvements and the increased impact generated by the new residential or commercial development.

f. If the property owner desires the building permit to be issued before the alternative independent connection analysis has been completed and reviewed, the property owner shall pay the following:

1. An estimate of the water and wastewater connection fees, calculated pursuant to the applicable water and wastewater connection fee schedule in this section; and

2. A non-refundable utility connection fee calculation analysis fee established in section 8-10 of the Code of Ordinances.

3. If the approved alternative impact analysis establishes the development will have less of an impact and warrants a reduction in the water and wastewater connection fees, the city shall refund the difference between the estimate paid and the amount to be paid based on the independent connection analysis.

g. A determination by the Planning Director that the alternative connection fee calculation does not satisfy the requirements of this section may be appealed to the City Commission per section 1-19 of this code.

(10) *Administration of water and wastewater connection fees.*

a. City Administration

1. Fees collected pursuant to this article shall be deposited into separate trust funds for the purposes paid as hereinbefore enumerated.

2. The funds in each said trust fund shall be used only for capital improvements and the purposes hereinbefore enumerated and necessitated by new growth and included in the capital improvement program and the capital improvements element of the comprehensive plan.

3. If any fees collected during any fiscal year are not expended or encumbered within the ten (10) fiscal years immediately following the fiscal year of payment, the city manager shall publish one (1) time in a newspaper of general circulation in the city, a notice advising those persons having paid such fees that they are entitled to a refund thereof. Any person so entitled shall have one (1) calendar year from the date of

publication of the notice within which to apply to the finance director for a refund of the fees paid. Each application shall consist of:

(i) The name and address of the applicant; and

(ii) A copy of the receipt issued by the city for the fee paid, or a sworn statement that the applicant paid the fee, and the date and amount of the payment.

All refunds made will be for the full amount paid, together with the simple interest thereon of four percent (4%) per annum from the date of payment to the date of refund. If no timely application for refund is made, the funds eligible therefor shall be transferred to the general fund for infrastructure improvements citywide.

b. Refunds

1. If a permit that includes water and wastewater connection fees expires and no construction has been commenced, then the fee payer shall be entitled to a refund of the utility connection fee paid as a condition of its issuance, except that the city shall retain three percent (3%) of the funds as an administrative fee to offset the costs of collection and refund. Where no request for refund is made, the water and wastewater connection fees may be applied to any future project on a unit basis. Any request for a refund or future project credit shall be required to be made in writing to the chief building official within twelve (12) months of the permit expiration.

(11) *Connection Fee Reimbursement Agreement.*

a. Procedure for utility capital project reimbursement agreement policy.

1. In the event that any person is required by the city or desires to extend/construct water, sewer or reclaimed waterlines or improvements, including utility lines that are larger than the minimum line size required to serve a parcel or development in order to provide for anticipated future development or extensions, that person or developer may request reimbursement agreement for the cost of such extension or improvement, in accordance with the following procedures:

(i) Engineering drawings, including therewith design calculations, shall be submitted to the Site Plan Review Committee indicating:

1. The size and location of the proposed lines or the appurtenances thereto; and

2. Preliminary cost estimates showing the cost difference for construction of the proposed oversize main verses the cost for the minimum size main that would be required to serve the parcel or development in accordance with the city's minimum design standards.

(ii) Preliminary cost estimates showing the cost difference for construction of the proposed oversize main verses the cost for the minimum size main that would be required to serve the parcel or development in accordance with the city's minimum design standards.

(iii) The city may enter into an agreement for reimbursement with the person making the submittal, based on a finding that the trunk lines and appurtenances or proposed improvement thereto comply with city standards, are appropriately sized and located, and that there is adequate water and sewer treatment plant capacity for the area anticipated to be served or a public benefit of the proposed utility improvement.

(iv) All utility connection fee reimbursement agreements require approval by the City Commission prior to the issuance of any construction permit.

b. Reimbursement.

1. Reimbursement shall be made in annual payments on January 1 of each year, up to a maximum of ten (10) years, following acceptance of the improvements by the city, and shall be limited to the amount of utility connection fees received from any development which connects to the lines or appurtenances identified in the agreement.

2. Total reimbursement shall not exceed the estimated cost difference between the installation of the oversized line and the cost to install the minimum line size that would have been required to serve the development. Cost reimbursement shall be based on construction costs only.

3. If there is more than one (1) agreement applicable to the same lines or appurtenances or extensions thereof, reimbursement shall be proportional to the impact fees collected from projects of the submitter over the preceding calendar year.

c. Construction.

1. Following the execution of a line extension reimbursement agreement, detailed construction drawings prepared by an engineer licensed by the state shall be submitted for review and approval by the City Engineer and Utilities Manager. All necessary permits and approvals shall then be obtained by the person desiring to perform the work.

2. Prior to beginning any construction activities, the contractor to perform the work, shall attend a preconstruction conference with the City Engineer or his designee and shall post a performance bond in an amount equal to one hundred ten percent (110%) of the total approved project cost in a form to be approved by the city attorney.

3. Prior to the city accepting the lines and appurtenances thereto:

(i) The lines shall meet all applicable governmental standards, have all required approvals and be ready for service to the public;

(ii) There shall be provided to the utilities manager a complete set of as-built record drawings certified by the engineer of record;

(iii) There shall be posted a one (1) year maintenance bond in an amount equal to twenty-five percent (25%) of the amount of the performance bond in a form to be approved by the city attorney; and

(iv) Except for sewer laterals, reuse service lines and potable water service lines on the customer service side of an individual or master water meter, all water, sewer and reclaimed waterlines and appurtenances thereto which are constructed by the developer or property owner shall be dedicated to the city along with an easement therefor, and thereafter maintained by the city. At the time of dedication, the developer or property owner shall provide the Finance Director with full documentation as to the actual cost of the project.

(12) *Five-year review*. At least once every five years, the Planning Director shall recommend to the City Commission whether any amendments should be made to the water and wastewater connection fee schedule as contained in this section to reflect changes in the factors that affect the fee schedule or application to the water and wastewater connection fee classifications.

SECTION TWO. Section 1-26, Mobility fee, of Article IV, Schedule of Development Review and Impact Fees, of Chapter 1, General Administration, is hereby amended as follows:

Purpose. Pursuant to Ordinance No. 10-48A, a mobility fee is hereby established to implement the city's multimodal strategy. The mobility fee is mode neutral and when used effectively in combination with infill land use development densities and intensities that are transit supportive, total vehicle miles travelled and greenhouse gas emissions shall be reduced while providing enhanced mobility options.

(1) *Mobility fee components. ***No change to existing text****

(2) *Applicability. ***No change to existing text****

(3) *TCEA. ***No change to existing text****

(4) *Calculation of mobility fee.* Calculating the mobility fee is derived by multiplying the density or intensity to be developed by the assigned trip generation rate (TGR) from the latest ITE Trip Generation Manual. The net TGR (minus pass-by trips) multiplied by the average vehicle occupancy (AVO) factor of 1.502 equals the number of person trips (PT). PT is multiplied by the established mobility fee.

Formula:	Density or Intensity × TGR - Passerby × AVO × PT × the applicable mobility fee.
Where:	TGR is Trip Generation Rate.
	AVO is Average Vehicle Occupancy.
	PT is Person Trip.

Example:

Land Use	S.F.	TGR	Pass-By	AVO	PT	Mobility Fee Per PT	Total
Commercial	1000	845	75%	1.502	318	~~$16.00~~ $85.67	~~$5,079.52~~ $27,243.06

(5) *Mobility fee.* Table 2 depicts the mobility fee based on the projected costs to provide transit and non-motorized improvements identified in the multimodal strategy. The road component represents the conversion of the city's local road impact fee from an ELU to TGR and PT. The road fee is based upon the improvements specified in the city's capital improvements program. Payment of funds at building permit issuance shall be deposited by the city into each component's account according to the prescribed percentage.

Table 2. Mobility Fee

Modal Component	Cost Per PT	Mode Allocation %
Roads	~~$1.76~~ $9.42	11%
Transit	~~8.00~~ $42.84	50%
Bike/Pedestrian	~~6.24~~ $33.41	39%
Total	~~16.00~~ $85.67	100%

(6) *Applicability of Volusia County impact fees. ***No change to existing text****

(7) *Applicability of Volusia County traffic impact assessment guidelines. ***No change to existing text****

SECTION THREE. Section 1-27, Impact fee, of Article IV, Schedule of Development Review and Impact Fees, of Chapter 1, General Administration, is hereby amended as follows:

Sec. 1-27. Impact Fees.

~~The purpose of this section is to ensure that new development does not impose a financial burden on existing residents by establishing comprehensive impact fees to be paid prior to the issuance of a building permit (unless otherwise provided by the Code of Ordinances), change in occupancy permit which may affect the fee schedule, or site development permit for nonstructural uses within the types of developments hereinafter specified. The said fees are levied in order to provide an adequate funding source for the capital improvements identified in the city's comprehensive plan, the need for which is generated by new development; to facilitate the orderly expansion of the city's roadway system, drainage system, water supply system, wastewater treatment system, the establishment and expansion of the reclaimed water system; and to provide for adequate park and recreation facilities, public safety and general city services.~~

~~(1) *Fees imposed*. The following types of impact fees are hereby imposed: cultural facilities, local roads, parks and recreation, stormwater, and water, sewer and reclaimed water. These fees shall be charged upon the specific types of development noted in subsections (1)a and (1)b of this section, when constructed in the city.~~

~~a. *Distribution factors for impact fees by type of use*. The amount of the fees imposed in this section shall be established by ordinance annually on the basis of a 1.0 factor assigned to single-family detached homes (also identified herein as an ELU or equivalent living unit). Fees shall be calculated based on the distribution chart in this subsection. The fees shall be charged on a per-unit basis for all dwelling units and hotel/motel uses, and the basis of one thousand (1,000) square feet of gross floor area for all other uses as being equal to one (1) ELU, except that for potable water, wastewater and reclaimed water, the fee shall be computed using the fixture unit count. For mixed use developments, the predominant use shall prevail except that categories of use exceeding twenty percent (20%) of the total floor area shall be computed under that category.~~

Single-family	1.0	1.0	1.0
Multifamily	0.5	0.5	0.2 per 1,000 sq. ft. of irrigated area
Mobile/manufactured home	0.6	0.6	0.2 per 1,000 sq. ft. of irrigated area
All other uses, 60 plumbing unit fixture counts = one ELU for potable water and wastewater, and 0.2 ELU per 1,000 sq. ft. of area to be irrigated for reclaimed water.*West Ormond utility service area only			

b. *Distribution factors for water, sewer, reclaimed water.*

1. For the purposes of applying water and sewer and reclaimed water impact fees, ELUs shall be defined and computed as follows:

(i) *Residential.* Each single-family residence served by the city through a single sewer service or water meter shall be considered one (1)

~~equivalent living unit. An irrigation meter shall be considered an ELU and shall be assessed a fee equivalent to a single-family home.~~

~~(ii) *Rooms, combination of rooms, etc.* Each residential room, combination of rooms, apartment or prepared manufactured home space that includes connection points for sewer or water service that is owner occupied, offered separately for rent as a rental unit or vacant, shall be considered one (1) equivalent living unit.~~

~~(iii) *Nonresidential, commercial and industrial.* For nonresidential uses not specifically defined elsewhere in this section, the number of ELUs shall be computed by the chief building official using the fixture unit count as defined in the most recent data published by the American Water Works Association and a ratio of one (1) ELU for every sixty (60) fixture unit valves or fraction thereof, computed to one (1) decimal place.~~

~~2. Combination accounts. Accounts that contain both residential and commercial facilities served through a common meter may be treated as either residential or nonresidential, whichever method of computation results in the largest number of ELUs.~~

~~c. *Expansion of an existing connection.* Except for residential units charged on a per-unit basis, if a building permit is issued for an existing connection which will increase the number of units or plumbing unit fixture count, the total number of ELUs for the old and new parts of the facility shall be computed as outlined in subsections (1)b1(i) through (iii) of this section. The number of new ELUs shall be determined by subtracting the old ELUs from the total number of ELUs in the entire facility. An additional impact fee will then be assessed on the difference between number of existing and new ELUs. As an example, if an existing building contained one hundred fifty (150) fixture units and it was expanded to three hundred (300) fixture units, the impact fee would equal five (5) ELUs minus two and one-half (2½) ELUs, or two and one-half (2½) ELUs. Impact fees will be computed on the basis of the additional floor area only.~~

~~d. *Bond credits.* Credits shall be awarded to those uses which will also be paying off bonded indebtedness resulting from programs designed to meet past or existing deficiencies. The credit amount shall be determined annually and subtracted from the gross fee to calculate the net impact fee.~~

~~e. *Renovation/redevelopment projects.*~~

~~1. Impact fees shall be charged on the basis of the difference between current and future impacts for renovation projects and for sites redeveloped within five (5) years from the last date of occupancy. Cost differences shall reflect changes in occupancy or use, floor area, number of units or any other measurement used in the calculation of impact fees.~~

2. Land with building improvements shall be vested with impact fee credit. Such fee credit shall be reduced by ten percent (10%) each year beginning one (1) year from the date a permitted demolition occurs. Preservation of full impact fee credit may continue as an incentive to abate blighted structures beyond the date of demolition provided the city commission approves such credit through a development agreement or other acceptable legal instrument to the city.

f. *Cost-of-living adjustment.* Impact fees charges shall be in accordance with the rate schedule in the city's Code of Ordinances, which shall be adjusted annually on October 1 to reflect any change in the cost-of-living over the prior year. The amount of change shall be determined by comparing the cost-of-living index (consumer price index), all items, as published by the U.S. Department of Labor as of April 1 of each year, with the same index for the same date in the previous year. Should the city not amend the schedule on October 1, the prevailing fees shall remain in effect until such time as they are amended.

g. *Payment of fees outside city limits.* Impact fees for water, sewer or other services to be provided shall be paid prior to the connection to the system, if the property is outside the city limits.

h. *Annexations.* Developed properties annexed into the city are presumed to have paid all impact fees to the jurisdiction having issued the building permit and are further presumed to have impacted all city systems other than potable water, wastewater service and reclaimed water which are provided directly to the site. Impact fees for these uses are required to be paid along with all appropriate installation fees prior to the delivery of such services.

(2) *Administration of impact fee funds.*

a. Fees collected pursuant to this article shall be deposited into separate trust funds for the purposes paid as hereinbefore enumerated.

b. The funds in each said trust fund shall be used only to acquire lands and equipment and/or to construct new facilities for the purposes hereinbefore enumerated and necessitated by new growth and included in the capital improvements element of the comprehensive plan.

c. If a building permit expires and no construction has been commenced, then the fee payer shall be entitled to a refund of the impact fee paid as a condition of its issuance, except that the city shall retain three percent (3%) of the funds as an administrative fee to offset the costs of collection and refund. Where no request for refund is made, the impact fee may be applied to any future project on a unit basis.

d. If any fees collected during any fiscal year are not expended or encumbered within the ten (10) fiscal years immediately following the fiscal year of payment, the city manager shall publish one (1) time in a newspaper of

~~general circulation in the city, a notice advising those persons having paid such fees that they are entitled to a refund thereof. Any person so entitled shall have one (1) calendar year from the date of publication of the notice within which to apply to the finance director for a refund of the fees paid. Each application shall consist of:~~

~~1. The name and address of the applicant; and~~

~~2. A copy of the receipt issued by the city for the fee paid, or a sworn statement that the applicant paid the fee, and the date and amount of the payment.~~

~~e. All refunds made will be for the full amount paid, together with the simple interest thereon of four percent (4%) per annum from the date of payment to the date of refund.~~

~~f. If no timely application for refund is made, the funds eligible therefor shall be transferred to the general fund for infrastructure improvements citywide.~~

~~(3) *Dedications or construction of facilities in lieu of parks and recreation fee.*~~

~~a. *Public facilities.* Any person who dedicates land/facilities to the city for public parks and/or recreational use shall receive a credit against such fee in the amount hereafter specified, if the city commission finds the following conditions to be met:~~

~~1. The land/facilities dedicated are consistent with the comprehensive plan.~~

~~2. The land/facilities are visible and readily accessible to the general public.~~

~~3. The land/facilities, based upon topography, soil type, elevation, size, shape and natural vegetation, are suited to the type of use proposed.~~

~~b. *Private facilities.* Any person who dedicates active recreation facilities for the perpetual use of residents of a given development shall receive a credit against such fee in the amount hereafter specified, if the city commission finds the following conditions to be met:~~

~~1. The facilities are not located within any required yard or setback area.~~

~~2. The common and continued ownership and recreational use of the facilities are provided for by recorded deed restrictions (which may not be amended or released absent city commission approval), or by a prospectus on file with the state, department of business and professional regulation, division of land sales, condominiums and mobile homes.~~

~~3. The facilities are appropriate for such use, will result in a lessening of demand on city recreation facilities, and will adequately serve the population for which they are designed.~~

c. *Procedure to obtain credit.* Any person who dedicates land and/or facilities meeting the requirements of subsection (3)a or b of this section, may apply for the credit hereby allowed on an application form available from the director of planning. The completed form shall be submitted to the city manager, who will make a recommendation to the city commission as to whether or not the credit should be granted and the amount thereof. The city commission shall determine whether or not the credit shall be granted, based on the standards set forth in subsection (3)a or b of this section, and shall approve the amount of credit. The decision of the city commission shall be final. Any appeal from this decision shall be to the circuit court, by writ of certiorari, filed within thirty (30) days of the date of the decision of the city commission.

d. *Amount of credit.*

1. *Public facilities.* Any person who dedicates land and/or recreation facilities to the city for use as a public recreation facility shall receive a credit equal to the lesser of: The total of the fair market value of the land at the time dedication occurs, as determined by an MAI appraiser selected by, and paid for, by the dedicator, plus the estimated cost of constructing the proposed facilities, which cost estimate shall be submitted to and approved by the city engineer, with a maximum amount not to exceed the total amount of recreational impact fees anticipated to be generated by the specific development; or The total amount of recreational impact fees anticipated to be generated by the development; provided, however, that if the total amount determined by this subsection is the greater amount and the city commission determines, based upon staff recommendations, that the land/facilities to which the excess is attributable are necessary for access to and full enjoyment of the overall land/facilities, then the dedicator/installer shall receive full payment for such excess. This payment shall, however, be subject to an agreement with the developer which shall include a reimbursement schedule. The city commission shall determine whether to incorporate the same into the next fiscal year budget or to direct payment from the recreational impact fee fund.

2. *Private facilities.* Any person who develops active recreation facilities to be installed, which facilities are to be dedicated to the perpetual use of residents of a given development, shall receive a credit equal to the lesser of:

(i) Fifty percent (50%) of the cost of constructing active recreation facilities thereon, which cost estimate shall be submitted to and approved by the chief building official;

(ii) Fifty percent (50%) of the recreational impact fee in effect at the time of building permit issuance.

~~e. *Method of paying credit.* If the party dedicating the land/facilities is the party who pays for a building permit within the development, the fee hereby imposed shall be waived and applied to the total credit allowed until the full amount of the credit has been recovered. If the party dedicating the land/facilities is not the party who pays for a building permit within the development, the city shall reimburse the dedicator or his assignee, semiannually, the recreational impact fees collected from the development, until the full amount of the credit has been paid.~~

~~f. *Time limits.* Reimbursements to dedicators shall only be made from recreational impact fees collected by the city within the ten (10) years immediately following the date of the final development order.~~

~~g. *Assignment of credit.* Any person entitled to a credit hereunder may assign his credit by filing with the finance director a copy of the document making the assignment. Thereafter, all refunds/waivers shall be made to the benefit of the assignee.~~

The purpose of this section is to ensure that new development does not impose a financial burden on existing residents by establishing comprehensive impact fees. The impact fees are levied in order to provide an adequate funding source for the capital improvements identified in the city's Comprehensive Plan, the need for which is generated by new development to facilitate the orderly expansion.

(1) *Authority.* In the creation of impact fees, the City Commission is exercising its Charter home rule powers and its local authority, including police powers, the Municipal Home Rule Powers Act, Chapter 166, Florida Statutes, as amended; and section 163.3161 et seq., Florida Statutes, as amended. The aforementioned provisions authorize and require the City to provide and finance public improvements; to provide for the health, safety, and general welfare of the city; to coordinate the provision of adequate public facilities with land development; and to implement its Comprehensive Plan. Furthermore, the Local Government Comprehensive Planning and Land Development Regulation Act, section 163.3202, Florida Statutes, encourage the use of innovative land development regulations, including impact fees.

(2) Legislative findings, reliance on the Municipal Fees Study and Police and Fire Impact Fee Study

a. This section is intended to impose fees in an amount based upon the new costs attributable to new development and the cost of providing needed capital facilities to serve new development.

b. The city hereby adopts and incorporates by reference, the "Municipal Impact Fee Study" and "Police and Fire Impact Fee Study" prepared by Raftelis Financial Consultants, Inc. dated March 29, 2023.

c. This section is intended to implement and further the Goals, Objectives and Policies of the Ormond Beach Comprehensive Plan.

d. The purpose of this section is to require payment of impact fees for new development and expansion of existing development to provide capital facilities that are required to accommodate growth as detailed in the Capital Improvement Plan and Capital Improvement Element of the Comprehensive Plan.

e. Implementation of impact fees is needed to maintain Level of Service standards established by the Capital Improvement Element of the Comprehensive Plan.

(3) Impact fees imposed. The following types of impact fees are hereby imposed:

a. Parks & Recreation.

b. Local Road.

c. Police.

d. Fire.

(4) Impact Fee obligation. Any new development, change of use or expansion of uses or square footage shall be obligated to pay impact fees as required by this Section. The obligation to pay the impact fees runs with the land.

a. Exemptions. The following development or expansion activity shall be exempt from paying impact fees:

1. Reconstruction, expansion, or replacement of a previously existing residential structure that does not change the use from residential to commercial use and does not increase the number of dwelling units.

2. Accessory Dwelling Units shall be considered part of the single-family residential dwelling unit and is exempt from payment of impact fees.

3. Reconstruction, expansion, or replacement of a previously existing non-residential structure with a new non-residential structure where there is no increase in square footage or a more intensive use.

4. Public fire protection service which includes public fire hydrants and other devices used to supply potable water or reclaimed water to meet general fire-fighting requirements.

b. Expansions. For development activity which will increase the number of units or building square footage, the impact fees shall be assessed on the difference between the existing and new units or square footage.

c. Impact Fee Credits. Land with building improvements, either past or present, shall have impact fee credits as follows:

1. Impact fees shall be vested with impact fee credits and these credits shall not expire over time.

2. It shall be the responsibility of the property owner to provide documents demonstrating previous buildings on a property seeking impact fee credits.

3. Property owners of non-residential buildings that are proposed to be demolished shall provide the following information to the Chief Building Official for impact fee credits:

a. Square footage and use of the building.

b. An inventory of existing plumbing fixture units on the adopted Equivalent Living Unit (ELU) form.

4. Residential impact fee credits shall be based upon the dwelling unit or units on the property. Property owners shall provide the Chief Building Official the number of dwelling units, type of use, and building square footage for impact fee credits.

d. Renovations. Impact fees shall be charged on the basis of the difference between current and future impacts for renovation projects and for sites redeveloped within five (5) years from the last date of occupancy. Cost differences shall reflect changes in occupancy or use, floor area, number of units or any other measurement used in the calculation of impact fees.

(5) Payment of impact fees. Impact fees shall be paid at the time of development permitting (building or site engineering permits). If the city identifies an impact-generating development for which the impact fees required by this section were not paid when due, regardless of whether a permit was issued for such development, the city shall notify the owner that impact fees are due in accordance with this article. The property owner shall pay the impact fees due within 30 days of such notice.

(6) Impact fee classifications. The following classifications shall be used to determine the impact fee to be assessed:

a. Residential

1. Single-Family Residential. This classification shall include single-family dwelling units, including but not limited to, single-family homes, townhouses, or duplexes located on a single lot of record.

2. Multi-Family Residential. This classification shall include two (2) or more residential units, such as an apartment complex or condominium.

3. Manufactured/Mobile Home. This classification shall include manufactured or mobile homes on a leased area or on a platted lot.

b. Non-Residential. This classification shall include all uses that are not residential as listed in subsection seven (7) including but not limited to commercial, industrial, office, and institutional uses.

(7) Impact fee schedules.

a. Park and Recreation Impact Fee:

1. Single-Family Residential: $2,500.00 per unit.

2. Multi-Family Residential: $2,021.00 per unit.

3. Manufactured/Mobile Home: $1,658.00 per unit.

4. Non-Residential: Not assessed.

b. Local Road Impact Fee:

1. Single-Family Residential: $864.59 per unit.

2. Multi-Family Residential: $548.32 per unit

3. Manufactured/Mobile Home: $740.33

4. Non-Residential:

#	Land Use	Unit	Impact Fee
a.	Bank	Per 1,000 square feet	$6,782.33
b.	Church/House of Worship	Per 1,000 square feet	$790.25
c.	Day Care/child care	Per 1,000 square feet	$4,951.51
d.	General Commercial (less than 40,000 square feet)	Per 1,000 square feet	$3,736.72
e.	General Commercial (40,000 square feet to 150,000 square feet)	Per 1,000 square feet	$5,559.09
f.	General Commercial (over 150,000 square feet)	Per 1,000 square feet	$2,539.87
g.	General/Government Office	Per 1,000 square feet	$1,709.28
h.	General Recreation	Per 1,000 square feet	$2,996.69
i.	Hospital	Per 1,000 square feet	$1,114.66
j.	Hotel/Motel (Transient Lodging)	Rooms	$355.87
k.	Industrial	Per 1,000 square feet	$450.23
l.	Medical Office	Per 1,000 square feet	$3,434.79
m.	Nursing Home (Assisted Living Facility	Beds	$268.79
n.	Restaurant	Per 1,000 square feet	$5,593.44
o.	Schools	Students	$226.79
p.	Warehouse	Per 1,000 square feet	$176.56

c. Police Impact Fee:

1. Single-Family Residential: $240.00 per unit.

2. Multi-Family Residential: $ 198.00 per unit.

3. Manufactured/Mobile Home: $166.00 per unit.

4. Non-Residential:

#	Land Use	Unit	Impact Fee
a.	Industrial/Warehousing	Per Square Foot	$0.015
b.	Institutional	Per Square Foot	$0.249
c.	Transient Lodging (Hotel/Motel)	Per Room	$130.00
d.	Office	Per Square Foot	$0.191
e.	Retail	Per Square Foot	$0.336

*Should none of the above land uses adequately define a proposed non-residential development as determined by the Planning Director, the following average charge per square foot of non-residential development shall be assessed: $0.220 per square foot.

d. Fire Impact Fee:

1. Single-Family Residential: $292.00 per unit.
2. Multi-Family Residential: $ 262.00 per unit.
3. Manufactured/Mobile Home: $ 240.00 per unit.
4. Non-Residential:

#	Land Use	Unit	Impact Fee
a.	Industrial/Warehousing	Per Square Foot	$0.019
b.	Institutional	Per Square Foot	$0.320
c.	Transient Lodging (Hotel/Motel)	Per Room	$167.00
d.	Office	Per Square Foot	$0.245
e.	Retail	Per Square Foot	$0.432
*Should none of the above land uses adequately define a proposed non-residential development as determined by the Planning Director, the following average charge per square foot of non-residential development shall be assessed: $0.454 per square foot.			

(8) Alternative independent impact analysis.

a. At the option of a property owner, impact fees may be computed by the use of an alternate independent impact analysis if there is a belief that the cost to mitigate the impact of the development is less than the fee established in this section. The property owner shall be responsible for preparation of a proposed alternate independent impact analysis.

b. A pre-application meeting with the Planning Director shall be required prior to the submittal of an alternate independent impact analysis. The pre-application meeting shall establish the data, information, assumptions, formulae and methodology for the independent impact analysis.

c. The property owner shall be responsible for payment of the alternative independent impact analysis fee established in section 8-10 of the Code of Ordinances.

d. The property owner shall submit the alternate independent impact fee analysis from an individual or firm with the qualifications to prepare an independent analysis.

e. Within thirty (30) days of the submittal of a complete independent impact analysis, the Planning Director shall accept or reject the alternate independent impact analysis based on whether the proposed impact fee is

proportional and reasonably connected to, or has a rational nexus with, the planned utility facilities improvements and the increased impact generated by the new residential or commercial development.

f. If the property owner desires the building permit to be issued before the alternative independent impact analysis has been completed and reviewed, the property owner shall pay the following:

1. An estimate of the impact fee, calculated pursuant to the applicable impact fee schedule in this section; and

2. A non-refundable alternative independent impact analysis fee established in section 8-10 of the Code of Ordinances.

3. If the approved alternative impact analysis establishes the development will have less of an impact and warrants a reduction in the impact fees, the city shall refund the difference between the estimate paid and the amount to be paid based on the independent impact analysis.

g. A determination by the Planning Director that the alternative impact fee calculation does not satisfy the requirements of this section may be appealed to the City Commission per section 1-19 of this code.

(9) Administration of impact fees.

a. City Administration

1. Fees collected pursuant to this article shall be deposited into separate trust funds for the purposes paid as hereinbefore enumerated.

2. The funds in each said trust fund shall be used only for capital improvements and the purposes hereinbefore enumerated and necessitated by new growth and included in the capital improvement program and the capital improvements element of the Comprehensive Plan.

3. If any fees collected during any fiscal year are not expended or encumbered within the ten (10) fiscal years immediately following the fiscal year of payment, the city manager shall publish one (1) time in a newspaper of general circulation in the city, a notice advising those persons having paid such fees that they are entitled to a refund thereof. Any person so entitled shall have one (1) calendar year from the date of publication of the notice within which to apply to the finance director for a refund of the fees paid. Each application shall consist of:

(i) The name and address of the applicant; and

(ii) A copy of the receipt issued by the city for the fee paid, or a sworn statement that the applicant paid the fee, and the date and amount of the payment.

All refunds made will be for the full amount paid, together with the simple interest thereon of four percent (4%) per annum from the date of payment

to the date of refund. If no timely application for refund is made, the funds eligible therefor shall be transferred to the general fund for infrastructure improvements citywide.

b. Refunds

1. If a permit that includes impact fees expires and no construction has been commenced, then the fee payer shall be entitled to a refund of the impact fee paid as a condition of its issuance, except that the city shall retain three percent (3%) of the funds as an administrative fee to offset the costs of collection and refund. Where no request for refund is made, the impact fee may be applied to any future project on a unit basis. Any request for a refund or future project credit shall be required to be made in writing to the Chief Building Official within twelve (12) months of the permit expiration.

(10) Impact Fee Reimbursement Agreement.

a. Dedications or construction of facilities in lieu of required impact fee.

1. Any person who desires to provide land dedication or capital improvements in lieu of the required impact fee shall provide the proposal (engineered plans, property appraisal, summary of improvement and requested reimbursement schedule) to the Planning Director for review by the Site Plan Review Committee.

2. The Site Plan Review Committee shall provide a recommendation to the City Commission regarding the proposal.

3. All Impact Fee Reimbursement Agreements shall require approval by the City Commission based upon the following criteria:

(i) The land dedication or capital facility improvement is designed to serve the general public and not a specific parcel or subdivision;

(ii) The land dedication or capital facility improvement is consistent with the Comprehensive Plan; and

(iii) The land dedication or capital facility improvement provides a better use of the impact fee dollars than other potential capital projects.

4. The City Commission shall determine whether or not the credit shall be granted, based on the standards set forth in subsection (3) of this section, and shall approve the amount of credit. The decision of the City Commission shall be final. Any appeal from this decision shall be to the circuit court, by writ of certiorari, filed within thirty (30) days of the date of the decision of the City Commission.

b. Reimbursement.

1. A reimbursement schedule shall be included in the Impact Fee Reimbursement Agreement. In general, reimbursement shall be made in annual payments on January 1 of each year, up to a maximum of ten (10) years, following acceptance of the improvements by the city, and shall be limited to the amount of impact fees received from any development identified in the agreement.

2. Total reimbursement shall not exceed the estimated cost included within the Impact Fee Reimbursement Agreement.

(11) Five-year review. At least once every five years, the Planning Director shall recommend to the City Commission whether any amendments should be made to the impact fee schedule as contained in this Section.

SECTION FOUR. Section 1-30(d)(6)(e), Certificate of concurrency required, of Article V, Concurrency Management, of Chapter 1, General Administration, is hereby amended as follows:

(6) For purposes of public school concurrency, the following developments are considered exempt:

a. Single-family lots of record on a recorded plat, existing as such at the time the school concurrency implementing ordinance is adopted for which otherwise would be entitled to build;

b. The creation of subdivisions and/or single-family lots equal to or less than ten (10) residential units;

c. All subdivisions creating greater than ten (10) or more lots shall be reviewed for available school capacity;

d. Any residential development or any other development with a residential component that received approval of a final development order prior to the implementation date of school concurrency or is exempt from concurrency under the city concurrency regulations is considered vested for that component which was previously approved and shall not be considered as proposed new residential development for purposes of school concurrency;

e. Any unit exempted under the county school facilities impact fee ordinance as set forth in the Volusia County Code of Ordinance, section 70-181~~(a)~~0 of the Code of Ordinances; and

f. Nonresidential development.

SECTION FIVE. Section 3-57, Potable water system, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, is hereby amended as follows:

Sec. 3-57. Potable water system.

Potable water system construction and material standards shall comply with those set forth in the SCDCS manuals.

(1) *Water mains location/sizing. ***No change to existing text****

(2) *Gravity house tank. ***No change to existing text****

(3) *Booster pumps/fire protection systems. ***No change to existing text****

(4) *Backflow prevention devices. ***No change to existing text****

(5) *Connection/temporary connection.*

a. The owner of each lot or parcel of land within the city, upon which lot or parcel of land any building, structure, or land use occupied or proposed for occupancy by human beings for either residential, commercial or other use, shall connect or cause such building, structure or use to be connected with the public water distribution system of the city and use such facilities, at the time a certificate of occupancy is issued, or sooner with prior approval by the city. If a unit is occupied when service is made available, then the connection shall be made within one (1) year of the date service becomes available. The owner shall be liable for all ~~impact,~~ connection and meter installation fees and customer deposits; provided, however, that no connection or connections shall be required:

1. Under the conditions set forth in this article.

2. If so stated in any annexation ordinance or development order issued by the City Commission.

b. Except for fire hydrants and fire protection systems, all connections to the potable water system, whether for public or private use, shall be metered, with meter installation by city forces.

c. For temporary connection to the city water system for construction not involving new lines, a metered connection to a fire hydrant is allowed following request and deposit of $1,000.00. The meter shall be supplied by the city and use charges levied in accordance with the commercial use schedule then in effect. Upon payment of the final bill, the deposit shall be refunded.

d. For temporary connection to a system containing new lines, the city shall provide and install a meter and reduced pressure backflow preventer between the city main and the new line for purposes of flushing and clearance, following submittal of a request and deposit of $1,000.00. Connection between the meter and the new line shall be made by the developer and shall remain in place until the system has passed all tests and has been inspected by the city. At that time, the developer shall remove the meter and make the permanent connection to the city main. Upon payment of the final bill, the deposit shall be refunded. All water used shall be charged in accordance with the commercial use fee then in effect.

e. The connection of heating/air conditioning units to the city water system is prohibited.

SECTION SIX. Section 3-59, Sanitary sewer systems, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, is hereby amended as follows:

Sec. 3-59. Sanitary sewer systems.

Sanitary sewer system construction and material standards shall comply with those set forth in the SCDCS manuals.

(1) *Connection required.*

a. All existing development, located within one hundred feet (100') of a city sewer line, except single-family homes on lots larger than one (1) acre, shall connect to the city sewer system within one (1) year from the date such system becomes available and, in the opinion of the Utilities Manager, such connection is economically and physically feasible. The owner of the property shall be liable for all ~~impact~~ connection, installation and line extension fees.

b. Except where permitted under sections 3-63 and 3-64, all new development shall connect to the city's sewer system and pay all ~~impact~~ connection, installation and line extension fees prior to the issuance of building permits or the initiation of service.

c. Where so stated in an adopted annexation report, connection to the city sewer system may be deferred until such time as it is deemed in the public interest to make connection mandatory due to financial or public health considerations.

d. The city hereby reserves the right to refuse waste from any lot or parcel of land upon which there is located any institutional, commercial or industrial plants, building or premises which does not comply fully with this chapter or chapter 22, article II, division 2 of the Code of Ordinances, or that does not utilize city water, or that does not supply proper metering of its waste.

e. Where lot sizes are less than two (2) acres, and septic systems are in use, an assessment district will be created for the installation of sewer mains and each property owner will be required to connect to the system if it has been determined that septic tank failures are extensive and/or a health or serious pollution problem is apparent. Property owners will be required to pay the assessment charges and installation fees.

f. The discharge of wastes into the city sanitary sewer system from air conditioning/heating units is prohibited.

(2) *Design and inspection. ***No change to existing text****

(3) *Lift (pumping) stations. ***No change to existing text****

SECTION SEVEN. Section 3-60, Reclaimed water systems, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, is hereby amended as follows:

Sec. 3-60. Reclaimed water systems.

Reclaimed water system construction and material standards shall comply with those set forth in the SCDCS manuals.

(1) *Compliance with state regulations. ***No change to existing text****

(2) *New residential development.* All new residential development with a gross density of greater than one (1) unit per acre and located in close proximity to an existing reclaimed water line or one (1) that is proposed in the city's five (5) year capital improvement program of sufficient size to serve the proposed development shall be dry lined to accept reclaimed water for irrigation purposes. All such development shall connect to the reclaimed water system at the time of development or at the time service becomes available. This requirement shall appear in all restrictive covenants and sales documents of such new development. All ~~impact and~~ connection fees shall be collected at the time of connection.

(3) *Existing development. ***No change to existing text****

(4) *Performance and design standards. ***No change to existing text****

(5) *Connection permit required. ***No change to existing text****

SECTION EIGHT. Section 3-61, Utility line extensions, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, is hereby amended as follows:

Sec. 3-61. Utility line extensions.

(a) *Service line extension. ***No change to existing text****

(b) *Utility main extension. ***No change to existing text****

(c) *Utility main extension reimbursement policy.* Utility connection fee credits may be provided per Section 1-25 of this code.

~~(1) Procedure for utility main extension reimbursement policy. In the event that any person is required to by the city or desires to extend water, sewer or reclaimed water lines, lines that are larger than the minimum line size required to serve a parcel or development in order to provide for anticipated future development or extensions, that person or developer may request reimbursement for the cost of such extension, in accordance with the following procedures:~~

~~a. Engineering drawings, including therewith design calculations, shall be submitted to the city engineer and utilities manager indicating:~~

~~1. The size and location of the proposed lines or the appurtenances thereto;~~

~~2. Preliminary cost estimates showing the cost difference for construction of the proposed oversize main verses the cost for the minimum size main that would be required to serve the parcel or~~

development in accordance with the city's minimum design standards.

b. The city engineer shall review the entire submittal and shall make a recommendation to the city commission on the eligibility of the proposal for reimbursement, based on the conformance of the proposed improvements with the city's construction design standards and with the criteria established in subsection (c) of this section.

c. The city may enter into an agreement for reimbursement with the person making the submittal, based on a finding that the trunk lines and appurtenances thereto comply with city standards, are appropriately sized and located, and that there is adequate water and sewer treatment plant capacity for the area anticipated to be served.

(2) Extension outside city. Trunk lines shall not be extended beyond the city limits unless approved by the city commission based on a finding that:

a. It is in the best interest of the city in order to improve efficiency and quality of service.

(d) *Reimbursement.*

(1) Reimbursement shall be made in annual payments on January 1 of each year, up to a maximum of ten (10) years, following acceptance of the improvements by the city, and shall be limited to the amount of impact fees received from any development which connects to the lines or appurtenances identified in the agreement.

(2) Total reimbursement shall not exceed the estimated cost difference between the installation of the oversized line and the cost to install the minimum line size that would have been required to serve the development. Cost reimbursement shall be based on construction costs only.

(3) If there is more than one (1) agreement applicable to the same lines or appurtenances or extensions thereof, reimbursement shall be proportional to the impact fees collected from projects of the submitter over the preceding calendar year.

(e) *Construction.*

(1) Following the execution of a line extension reimbursement agreement, detailed construction drawings prepared by an engineer licensed by the state shall be submitted for review and approval by the city engineer and utilities manager. All necessary permits and approvals shall then be obtained by the person desiring to perform the work.

(2) Prior to beginning any construction activities, the contractor to perform the work shall attend a preconstruction conference with the city engineer or his designee and shall post a performance bond in an amount equal to one hundred ten percent (110%) of the total approved project cost in a form to be approved by the city attorney.

~~(3) Prior to the city accepting the lines and appurtenances thereto:~~

~~a. The lines shall meet all applicable governmental standards, have all required approvals and be ready for service to the public;~~

~~b. There shall be provided to the utilities manager a complete set of as-built record drawings certified by the engineer of record;~~

~~c. There shall be posted a one (1) year maintenance bond in an amount equal to twenty-five percent (25%) of the amount of the performance bond in a form to be approved by the city attorney; and~~

~~d. Except for sewer laterals, reuse service lines and potable water service lines on the customer service side of an individual or master water meter, all water, sewer and reclaimed water lines and appurtenances thereto which are constructed by the developer or owner shall be dedicated to the city along with an easement therefor, and thereafter maintained by the city. At the time of dedication, the developer or owner shall provide the finance director with full documentation as to the actual cost of the project.~~

(~~f~~ d) *Annexation. ***No change to existing text****

SECTION NINE. Section 3-62, Wholesale sale of potable water, sewage treatment or reclaimed water, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, is hereby amended as follows:

Sec. 3-62. Wholesale sale of potable water, sewage treatment or reclaimed water.

The city, at its sole discretion, may provide potable water, sewage treatment or reclaimed water to any governmental agency or utility franchise upon approval of the city commission, provided that it is determined that:

(1) The city has adequate capacity to serve such areas and the provision of such services shall not diminish the city's long-range ability to provide such service within its corporate boundary.

(2) Such arrangements are in the best interests of the city.

(3) Arrangements are made to ensure the annexation of properties receiving such services into the city at the time they become eligible for annexation.

(4) All line extensions and appurtenances thereto are at the expense of the provider of retail service and in accordance with the procedures described in this chapter.

(5) An agreement is entered into for the collection of ~~impact~~ connection fees and fair share reimbursement for line extension.

(6) An agreement is entered into that would ensure that the rate received for such services shall be not less than the cost for producing such services including all related administrative costs.

SECTION TEN. Section 3-65, Interim package-type wastewater treatment facilities, of Article V, Utility and Infrastructure Design Standards, of Chapter 3, Performance Standards, is hereby amended as follows:

Sec. 3-65. Interim package-type wastewater treatment facilities.

(a) *Generally.* ***No change to existing text***

(b) *Design and performance standards.*

(1) Small package-type wastewater treatment plants shall not be allowed in areas where improper levels of treatment and/or inadequate effluent disposal may result in adverse impacts on water resources (e.g., groundwater aquifers and surface water systems), unless each plant's owner provides sufficient financial resources for the city at some future point in time to assume responsibility for operating and maintaining the collection, treatment and effluent disposal components in compliance with regulatory requirements and standards. The following minimum criteria and procedures shall be adhered to in the implementation of this standard:

a. Small package-type wastewater treatment plants represent prefabricated and component-assembled plants of one hundred thousand (100,000) gallons or less per day of treatment capacity, or any plant which is considered or identified to be of an interim nature.

b. The location and siting of such facilities shall be limited to areas where improperly treated effluent shall not adversely impact the quality of regional water resources by lateral surface/subsurface flow or by downward percolation.

c. Existing package-type or interim wastewater treatment plants currently meeting treatment and effluent quality standards may continue to be operated provided that each facility is being properly operated and maintained and wastewater treatment and effluent standards are continually being met.

d. Measures shall be undertaken to ensure the provision of financial resources by wastewater treatment plant owners to adequately cover the costs of rehabilitating, operating and maintaining each wastewater treatment and disposal facility, and for connecting to regional facilities if applicable.

(2) Interim or package-type wastewater treatment facilities shall be required to connect to the municipal system when access to the system is made available. The following minimum criteria and procedures shall be adhered to in the implementation of this standard:

a. Package-type or interim wastewater treatment plants currently meeting treatment and effluent quality standards may continue to operate, provided that each facility is:

1. Properly operated and maintained and wastewater treatment and effluent standards are satisfactorily met; and

2. Phased out at the option of the city and connected to the municipal system when sufficient capacity is made available.

b. When a private facility is phased out and connected to the municipal sewer system, the cost of the connection to the system is incurred by the owner of the private facility.

(3) Where soil conditions permit, an interim package treatment plant may be allowed, provided that sewer lines and lift stations are constructed to city standards, ~~impact~~ connection fees for future connections to the city system are paid or bonded for, and the developer agrees to discontinue operation of the package plant and connect to the municipal system when available.

(4) Existing development with central wastewater treatment will be required to connect to the city system as soon as possible after the city system is available if the existing system is found to have deficiencies that would create a serious health or pollution problem. Property owners may be required to pay the ~~impact~~ connection fee then in effect.

ATTACHMENT 2

Proposed Code of Ordinance Amendments

SECTION ONE. Section 22-29, Special provisions for water for irrigation and swimming pools, of Article I, Water, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 22-29. Special provisions for water for irrigation and swimming pools.

(a) *Separate meter authorized. ***No change in existing text****

(b) *Conditions of issuance. ***No change in existing text****

(c) *Credit for or refund of ~~impact~~ connection fee.* If the property is connected to the reclaimed water system within ten (10) years of the date the ~~impact~~ connection fee required by this Code and the land development code is paid and the irrigation meter is removed from the property, the payor shall be entitled to a pro rata refund of the ~~impact~~ connection fee based on a ten (10) - year amortization period or a credit in the amount of the said refund against any reclaimed water ~~impact~~ connection fee which may then be in effect. Only those persons paying such ~~impact~~ connection fee on and after October 1, 1990, shall be eligible for such refund or credit. Application for any refund or credit shall be made to the Finance Director at the time of connection to the reclaimed water system. There shall be no interest paid on any ~~impact~~ connection fee refunded pursuant to this subsection.

(d) *Deposit and charges. ***No change in existing text****

(e) *Water excluded in computing sewer bills. ***No change in existing text****

(f) *Charge for reading regular meter at customer request. ***No change in existing text****

(g) *Location of meters; consumer to provide connections; city's right of entry. ***No change in existing text****

SECTION TWO. Section 22-115, Fee imposed; schedule, of Article III, Impact Fee for System Extensions, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

ARTICLE III. ~~IMPACT FEE FOR SYSTEM EXTENSIONS~~ RESERVED

Sec. 22-115. ~~Fee imposed; schedule~~ Reserved.

~~(a) There is hereby imposed, in accordance with section 1-27 of the land development code, an impact fee based on the city commission's determination of the equitable portion of the cost of financing the extension of the system upon the equivalent living unit responsible for the need for additional system financing.~~

~~(b) The fees for residential units shall be imposed as follows:~~

~~(1) For each equivalent living unit connected to the system:~~

a. For properties within the North Mainland Water and Sewer Area (as described on Exhibit A of the ordinance from which this article is derived):

Water service impact fee	$2,902.00
Sewer service impact fee	$2,829.00
Total for both services	$5,731.00

b. For properties within the West Ormond Utilities Districts, as set forth in article VI of this chapter.

c. For properties within the Arroyo Parkway Subdivision Utilities Extension District (as described on Exhibit B):

Water service impact fee	$2,902.00
Sewer service impact fee	$2,829.00
Total for both services	$5,731.00

d. For properties within the Hunter's Ridge Flagler County DRI Service Area, as set forth in article IV of this chapter:

Water service impact fee	$2,902.00
Sewer service impact fee	$2,829.00
Total for both services	$5,731.00

Except that in accordance with Section 5.2 of the City-Flagler County Interlocal Agreement (recorded at Book 6421, Page 2821 of the Public Records of Volusia County, Florida) impact fees shall not be charged for any Flagler County facility.

e. For properties in other areas:

Water service impact fee	$2,902.00
Sewer service impact fee	$2,829.00
Total for both services	$5,731.00

(2) For each equivalent living unit constructed in areas served by privately owned water distribution systems using the city water supply only:

Water service impact fee	$2,902.00

(3) For each equivalent living unit with private water service connected to the sewer collection system only:

Sewer service impact fee	$2,829.00

(c) The fees for nonresidential, commercial and industrial uses, shall be based on the number of equivalent living units computed by the chief building official

DRAFT

~~using the fixture unit count as defined in the most recent data published by the American Water Works Association and a ratio of one equivalent living unit for every 60 fixture unit valves or fraction thereof, computed to one decimal place.~~

~~(d) Annual capital cost adjustment. On October 1, 2014, and on each October 1 thereafter, the impact fees set forth in this section shall be adjusted to reflect any change in the Engineering News Record Construction Cost Index (ENR CCI). The amount of any capital cost adjustment shall be determined by comparing the ENR CCI as of April 1 of each year with the same index for the same date as the previous year.~~

~~(e) Each additional equivalent living unit occasioned by changes in property usage subsequent to June 7, 1976, shall be subject to an impact fee computed in accordance with the foregoing criteria.~~

SECTION THREE. Section 22-118, Property subject to fee; method of payment; schedule, of Article III, Impact Fee for System Extensions, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 22-118. ~~Property subject to fee; method of payment~~ Reserved.

~~The above and foregoing fee shall be imposed on every equivalent living unit connected to the water or sewer system, whether those units are new or existing and inside or outside the city limits, and shall be paid in full at the time of issuance of the building permit if the property is inside the city limits, or prior to the connection to the system if the property is outside the city limits.~~

SECTION FOUR. Section 22-119, Impact fee financing, of Article III, Impact Fee for System Extensions, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 22-119. ~~Impact fee financing~~ Reserved.

~~The provisions of section 22-118 to the contrary notwithstanding, the collection of impact fees applicable to the construction of single-family owner-occupied "affordable housing," as defined in the HUD standards, within the "priority area" of the community development block grant program shall be made in the manner hereinafter described. Prior to the issuance of a certificate of occupancy for an "affordable housing" unit as aforedescribed, the owner of the real property on which the unit is constructed shall record a lien in favor of the city and equal in amount to the sum of all impact fees then applicable to the unit. The lien shall remain a lien coequal with the lien of all state, county, district, and municipal taxes, superior in dignity to all other liens, titles and claims, until paid, shall bear interest at zero percent, and shall be due and payable in full at such time as the unit is sold for consideration to a third party other than the initial occupants of the unit.~~

DRAFT

SECTION FIVE. Section 22-132, Legislative findings; purpose, of Article IV, Hunter's Ridge-Flagler County DRI Service Area, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 22-132. Legislative findings; purpose.

(a) ****No change to existing text****

(b) ****No change to existing text****

(c) ****No change to existing text****

(d) ****No change to existing text****

(e) The City-Flagler County Interlocal Agreement recognizes and provides that customers in the Hunter's Ridge-Flagler County DRI Service Area shall pay the same water and wastewater ~~impact~~ connection fees at the time application is made for the utilities and that the ~~impact~~ connection fees shall be payable at the same rate and in the same manner as customers who are located within the corporate limits of the city, except that in accordance with section 5.2 of the City-Flagler County Interlocal Agreement ~~impact~~ connection fees shall not be charged for any Flagler County facility.

(f) The City-Flagler County Interlocal Agreement provides that utility ~~impact~~ connection fees shall not be assessed against any Flagler County facility, including, but not limited to, a community park, that may be constructed in the Hunter's Ridge-Flagler County DRI Service Area because the construction of a county facility in the Service Area shall not require additional capital improvements to the city's utility system, because the county facilities will serve residents in the Service Area, and because the residents in the Service Area are required to pay utility ~~impact~~ connection fees in the same manner as utility customers located within the city's corporate limits.

(g) ****No change to existing text****

(h) ****No change to existing text****

(i) ****No change to existing text****

SECTION SIX. Section 22-133, Service Area, defined, of Article IV, Hunter's Ridge-Flagler County DRI Service Area, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

The area legally described and depicted in the City-Flagler County Interlocal Agreement is incorporated herein by reference and is established as the Hunter's Ridge-Flagler County DRI Service Area, a copy of which shall be maintained in the official records of the city clerk. The purpose of the interlocal agreement and these regulations will enable the city to provide retail water and wastewater facilities and services to customers in the service area; and will enable

the city to establish water and wastewater rates, and ~~impact~~ connection fees, for the utilization of city utility services by customers in the service area.

SECTION SEVEN. Section 22-135, Rates for water and sewer services, impact fees, of Article IV, Hunter's Ridge-Flagler County DRI Service Area, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 22-135. Rates for water and sewer services; ~~impact~~ connection fees.

(a) *Rates.* In accordance with section 4.1 of the City-Flagler County Interlocal Agreement, rates for water and wastewater services for customers in the City-Flagler County DRI Service Area shall be 125 percent of the rates that are charged to customers who reside within the corporate boundaries of the city.

(b) ~~*Impact*~~ *Connection fees.* Customers in the City-Flagler County DRI Service Area shall pay to the city the same water and wastewater ~~impact~~ connection fees at the time application is made for the utilities at the same rate and in the same manner as customers who are within the corporate boundaries of the city, except that in accordance with section 5.2 of the City-Flagler County Interlocal Agreement ~~impact~~ connection fees shall not be charged for any Flagler County facility.

SECTION EIGHT. Section 22-140, Impact fees, of Article IV, Hunter's Ridge-Flagler County DRI Service Area, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 22-140. ~~Impact~~ Connection fees.

(a) *Potable water*. There is hereby imposed a potable water service ~~impact~~ connection fee, based upon the determination by the City Commission of the equitable portion of the cost of financing the establishment and extension of the potable water system to and in the Hunter's Ridge-Flagler County DRI Service Area, to be assessed in accordance with ~~section 22-115 upon~~ section 1-25 of the Land Development Code for each ~~equivalent living unit~~ connection fee classifications located within the Hunter's Ridge-Flagler County DRI Service Area connecting to such system.

(b) ~~*Sewer*~~ *Wastewater*. There is hereby imposed a wastewater service ~~impact~~ connection fee, based upon the determination by the city commission for of the equitable portion of the cost of financing the establishment and extension of the wastewater system to and in the Hunter's Ridge-Flagler County DRI Service Area, to be assessed in accordance with section ~~22-115 upon~~ section 1-25 of the Land Development Code for each ~~equivalent living unit~~ connection fee classification located within the Hunter's Ridge-Flagler County DRI Service Area connecting to such system.

DRAFT

SECTION NINE. Section 22-162, Boundaries and purpose, of Article VI, West Ormond Utilities District, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 22-162. Boundaries and purpose.

(a) *Water and sewer.* There is hereby established the West Ormond Water and Sewer District, the purpose of which is to provide water and sewer services and establish a ~~impact~~ connection fee schedule. This district shall be composed of those lands as shown on Figures 3 and 4 included in the West Ormond Facilities Plan on file in the office of the city clerk.

(b) *Reclaimed water.* There is hereby established the West Ormond Reclaimed Water District, the purpose of which is to provide reclaimed water service and establish a~~n impact~~ connection fee schedule. This district shall be composed of those lands as shown on Figure 5 included in the West Ormond Facilities Plan on file in the office of the city clerk.

SECTION TEN. Section 22-165, Impact fees, of Article VI, West Ormond Utilities District, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 22-165. ~~Impact~~ Connection fees.

(a) *Potable water.*

(1) *Generally.* There is hereby imposed a water ~~service impact~~ connection fee~~, based on the city commission's determination of the equitable portion of the cost of financing the establishment and extension of the potable water system in the West Ormond Water and Sewer District, of $2,000.00 upon each equivalent living unit located outside of the Breakaway Trails PUD and connecting to such system~~ as provided in section 1-25 of the Land Development Code.

~~(2) *Breakaway Trails.* There is hereby imposed a water service impact fee, based on the city commission's determination of the equitable portion of the cost of financing the establishment and extension of the potable water system in the Breakaway Trails PUD, of $1,950.00 upon each equivalent living unit located in the Breakaway Trails PUD and connecting to such system.~~

(b) ~~*Sewer*~~ *Wastewater.*

(1) *Generally.* There is hereby imposed a ~~sewer service impact~~ wastewater connection fee, ~~based on the city commission's determination of the equitable portion of the cost of financing the establishment and extension of the sewer system in the West Ormond Water and Sewer District, of $1,163.00 upon each equivalent living unit located outside~~

DRAFT

~~of the Breakaway Trails PUD and connecting to such system~~ as provided in section 1-25 of the Land Development Code.

~~(2) *Breakaway Trails.* There is hereby imposed a sewer service impact fee, based on the city commission's determination of the equitable portion of the cost of financing the establishment and extension of the sewer system in the Breakaway Trails PUD, of $1,950.00 upon each equivalent living unit located in the Breakaway Trails PUD and connecting to such system.~~

~~(c) *Annual capital cost adjustment.* All of the impact fees heretofore established shall remain in effect as set forth in this section until September 30, 2008. On October 1, 2008, and on each October 1 thereafter, through October 1, 2012, the impact fees set forth in this section shall be adjusted to reflect any change in the Engineering News Record Construction Cost Index (ENR CCI). The amount of any capital cost adjustment shall be determined by comparing the ENR CCI as of April 1 of each year with the same index for the same date as the previous year. After October 1, 2012, the city commission shall conduct a review to determine the amount of any annual adjustment to the impact fees set forth in this section.~~

(~~d~~c) *Rates.* For all persons in the said districts and within the corporate limits of the city, service rates, connection fees and meter deposits shall be at the rates established for in-city customers.

SECTION ELEVEN. Section 22-168, Outside city service, of Article VI, West Ormond Utilities District, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 22-168. Outside city service.

(a) *New development. ***No change to existing text****

(b) *Existing development. ***No change to existing text****

(c) *Rates.* Service rates, connection fees and meter deposits shall be at the rates established for outside-city customers. ~~Impact~~ Connection fees shall be as established in section 1-25 of the Land Development Code ~~22-165 for other users of the same class in accordance with section 22-165. All fees shall be paid prior to the initiation of service.~~

(d) *Reimbursement of line extensions.* Nothing contained herein shall preclude the developer or owner of property located outside of the city limits from participating in the line extension reimbursement program established by section ~~4.08~~ 1-25 of the land development code.

(e) *Dedication required. ***No change to existing text****

SECTION TWELVE. Section 22-169, Connections required, of Article VI, West Ormond Utilities District, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 22-169. Connections required.

(a) *Water and sewer.*

(1) *New development.* All new development in the West Ormond Water and Sewer District shall connect to the water and sewer system at the time of development or at the time service becomes available, whichever shall first occur. This requirement shall appear in all restrictive covenants and sales documents of such new development. Dry lines and interim facilities shall comply with the provisions of the comprehensive plan. All ~~impact and~~ connection fees and meter deposits shall be collected as set forth in this chapter and ~~article XIII~~ section 1-25 of the Land Development Code, or prepaid in accordance with the comprehensive plan, as applicable.

(2) *Existing development.* All existing development in the West Ormond Water and Sewer District, having a gross density or a number of equivalent living units which is greater than one unit per acre, shall connect to such service in accordance with the provisions of F.S. §§ 381.0065—381.0067. All ~~impact and~~ connection fees and meter deposits shall be collected as set forth in this chapter and ~~article XIII~~ section 1-25 of the Land Development Code.

(b) *Reclaimed water. ***No change to existing text****

SECTION THIRTEEN. Section 8-421, Purpose and intent, of Article IX, Impact Fees, of Chapter 8, Buildings and Construction Regulations, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

ARTICLE IX. ~~IMPACT FEES~~[1] RESERVED

~~Sec. 8-421. Purpose and intent.~~ Reserved

~~The purpose of this article is to establish comprehensive impact fees to be paid upon the start of construction of the types of construction hereinafter specified in the city. The said fees are levied in order to provide for the capital improvements included in the city's comprehensive plan, the need for which is generated by new development within the city.~~

SECTION THIRTEEN. Section 8-422, Fees imposed, of Article IX, Impact Fees, of Chapter 8, Buildings and Construction Regulations, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

~~Sec. 8-422. Fees imposed.~~ Reserved

~~There are hereby imposed the following impact fees upon the following types of development constructed in the city, for which a construction contract is entered into and a building permit is applied for after October 1, 1990, in accordance with the following schedule:~~

~~Type of Construction~~	~~Gross Fee~~	~~Bond Credit~~	~~Net Fee~~
~~(1) Cultural facilities:~~			
~~Single-family~~	~~$0.00~~	~~$0.00~~	~~$0.00~~
~~Multifamily~~	~~$0.00~~	~~$0.00~~	~~$0.00~~
~~Mobile/manufactured home~~	~~$0.00~~	~~$0.00~~	~~$0.00~~
~~(2) Local roads:~~			
~~Residential~~			
~~Single-family~~	~~$90.00~~	~~$0.00~~	~~$90.00~~
~~Multifamily~~	~~$90.00~~	~~$0.00~~	~~$90.00~~
~~Mobile/manufactured home~~	~~$90.00~~	~~$0.00~~	~~$90.00~~
~~Hotel/motel~~	~~$63.00~~	~~$0.00~~	~~$63.00~~
~~Nonresidential~~			
~~General/government office~~	~~$125.00~~	~~$0.00~~	~~$125.00~~
~~Medical office~~	~~$555.00~~	~~$0.00~~	~~$555.00~~
~~Hospital~~	~~$116.00~~	~~$0.00~~	~~$116.00~~

SECTION FIFTEEN. Section 8-423, Impact fee financing, of Article IX, Impact Fees, of Chapter 8, Buildings and Construction Regulations, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

~~The provisions of sections 8-421 and 8-422 to the contrary notwithstanding, the collection of impact fees applicable to the construction of single-family owner-occupied "affordable housing," as defined in the HUD standards, within the "priority area" of the community development block grant program shall be made in the manner hereinafter described. Prior to the issuance of a certificate of occupancy for an "affordable housing" unit as aforedescribed, the owner of the real property on which the unit is constructed shall record a lien in favor of the city and equal in amount to the sum of all impact fees when applicable to the unit. The lien shall remain a lien, coequal with the lien of all state, county, district, and municipal taxes, superior in dignity to all other liens, titles and claims, until paid, shall bear interest at zero percent, and shall be due and payable in full at such time as the unit is sold for consideration to a third party other than the initial occupants of the unit.~~

SECTION SIXTEEN. Section 8-10, Application processing fees, of Article I, In General, of Chapter 8, Buildings and Construction Regulations, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

*(1) Advertising fee for public hearings. ***No change to existing text****

Water and Wastewater Utility System Connection Fee Study

March 29, 2023

RAFTELIS

RAFTELIS

March 29, 2023

Mr. Steven S. Spraker
Planning Director
City of Ormond Beach
22 South Beach Street, Room 104
Ormond Beach, FL 32175

Subject: **Water and Wastewater Utility System Connection Fee Study**

Dear Mr. Spraker:

We have completed our study of the water and wastewater utility connect fees (Connection Fees) for the City of Ormond Beach (City) and have summarized the results of our analysis, assumptions, and conclusions in this report, which is submitted for your consideration. This report summarizes the basis for the proposed water and wastewater utility connection fees, which provide funds to help meet the City's growth-related capital expenditure requirements.

During the course of the study, it was determined that the proposed Connection Fees should meet a number of goals and objectives. These goals and objectives dealt primarily with fee sufficiency and level. Specifically, the major objectives considered in this study included:

- The Connection Fees should be sufficient to fund the projected capital requirements associated with providing service to new growth and development;
- The Connection Fees should not be used to fund any capital deficiencies associated with providing services to existing customers; and
- The Connection Fees should be based upon reasonable level of service standards that meet the needs of the City, do not create an unfair burden relative to capital needs, and are similar to industry standards.

The proposed Connection Fees presented in this report are designed to meet the above objectives. As such, based on information provided by the City and the assumptions and considerations outlined in this report, Raftelis Financial Consultants, Inc. considers the proposed fees to be cost-based, reasonable, and representative of the capital funding requirements of the City.

EXECUTIVE SUMMARY AND RECOMMENDATIONS

Executive Summary

The purpose of an connection fee is to assign, to the extent practical, growth-related capital costs to those new customers responsible for such costs. Similar to most municipalities in Florida, the City of Ormond Beach (City) has recognized this capital funding strategy as being an appropriate method of funding growth-related capital requirements of the water and wastewater utility systems (hereafter referred to individually as the "Water System" and "Wastewater System" or, collectively, as the "System").

This report addresses the connection fees associated with water and wastewater utility service (Connection Fees). The City retained Raftelis Financial Consultants, Inc. (Raftelis) to review its existing Connection Fees and recommend changes as necessary.

The following is a summary of the major assumptions, considerations and conclusions developed during the preparation of the study:

1. For purposes of this report the term "Fiscal Year" is defined as the 365-day period beginning October 1 of a specific year and ending September 30 of the subsequent calendar year (e.g., October 1, 2021 to September 30, 2022 is Fiscal Year 2022).

2. The City's current method of connection fee application for water and wastewater utility connection fees is based on applying a fee per Equivalent Living Unit (ELU) times an assigned number of ELUs based on the type of construction and standard fee per ELU. Treating single-family residences as one ELU, multi-family units as 0.5 of an ELU, mobile / manufactured homes as 0.6 of an ELU, and non-residential units based on number of fixtures. For non-residential properties the total fixture value of a property (which is based on a count of the number of water fixtures in a property) is then compared to ELU ranges as set and adopted by the City to determine the number of applicable ELUs. The fee per ELU is then applied to the resulting number of applicable ELUs for the property. The utilization of these units for the application of such fees is common and is used by many public agencies across the state and it is recommended that the City continue to apply Connection Fees based on this method.

3. As of September 30, 2020, the City currently has approximately $251.5 million invested in water and wastewater system-related infrastructure and supporting equipment. The City also has $48.2 million in renewal and replacements, upgrades and other capital projects planned over the next 5 years.

4. The City owns and operates its own water treatment plant and transmission and distribution system. The water plant is designed to treat 12.0 million gallons per day on an average daily flow basis. Based on information provided by the City, the water treatment facilities are currently approximately 56% utilized leaving 44% available for new growth.

5. The City owns and operates its own wastewater treatment plant and transmission and collection system. The wastewater plant is designed to treat 8.0 million gallons per day of flow on an average daily flow basis. Based on information provided by the City, the wastewater treatment facilities are currently approximately 56% utilized leaving 44% available for new growth.

6. Based on the costs of the existing System infrastructure, the projected expansion-related capital costs anticipated by the City, and a review of the remaining water and wastewater capacity available in the System to serve new growth a fee per ELU was developed. The proposed connection fees are shown below:

Connection Fees (per ELU)			
	Existing	Proposed	Increase/(Decrease)
Water/Irrigation Services	$2,902.00	$2,333.00	($569.00)
Wastewater Service	2,829.00	3,577.00	748.00
Total	$5,731.00	$5,910.00	$179.00

Conclusions and Recommendations

Based on our assumptions, considerations, and analyses as summarized herein Raftelis offers the following findings, conclusions and recommendations for consideration by the City Commission:

- The City should consider adopting the proposed water and wastewater utility connection fees as shown above and discussed later in this report.
- The City should consider the creation of two utility service area districts or zones with one being for the existing City service area and one being for the Western Service Area and apply the proposed fees to both districts until such time as a connection fee analysis for the Western Service Area can be completed.
- The City should review the water and wastewater utility connection fees periodically (every three to five years) to account for recent development trends, changes in capital needs, and cost allocations.
- The City should maintain separate accounting for the collection and usage of the Connection Fees by fee type.
- The City should collect connection fees only once the building permit is issued and not beforehand.
- The City should set an effective date for collection of the new Connection Fees 90 days from the date of adoption. This is to allow for a "grace period" for possible in-progress development.

(Remainder of page intentionally left blank)

SECTION 1 – INTRODUCTION

General

The City of Ormond Beach (City) is located in the northeastern portion Volusia County along the Atlantic Coast. Based on information obtained from the United States Census Bureau, the permanent population of the City for 2021 is estimated to be 44,041 residents. and the City's population in 2040 is expected to be approximately 50,630 permanent residents. The City currently provides water services to approximately 24,300 accounts and wastewater service to approximately 17,800 accounts. In order to provide funding of anticipated capital needs, the City authorized Raftelis to review the water and wastewater utility connection fees in order to meet the funding goals and objectives of the City.

Authorization

Raftelis was authorized by the City to review and recommend revisions to the water and wastewater utility services connection fees pursuant to a letter of agreement between the City and Raftelis. The scope of work for this project, as defined in the letter of agreement, was to:

1. Analyze the capital requirements of the City, which are needed to meet the level of service (LOS) standards of the City. This analysis included a review of: i) the existing and future facility and equipment needs as defined by the multi-year capital improvement plan (CIP) for each utility function; and ii) the currently utilized and remaining capacities of the System facilities.

2. Develop and recommend appropriate fee levels to be charged to new development in order to recover the capital costs associated with providing utility service. This analysis includes the apportionment of costs and the development of the fee per equivalent billing unit.

3. Develop a comparison of the connection fees and associated billing attributes of similar charges imposed by other jurisdictions.

4. Prepare a report that documents our analyses, assumptions, and conclusions for consideration by the City.

Connection Fees Background

The purpose of water and wastewater connection fees are to assign, to the extent practical, growth-related capital costs to those new customers or development responsible for such additional costs. To the extent new population growth and associated development imposes identifiable capacity-related capital costs to water and wastewater utility services, modern capital funding practices include the assignment of such costs to those new residents and commercial entities responsible for those costs rather than the existing population base. Generally, this practice has been labeled as "growth paying its own way" to avoid overburdening existing users with the cost of expansion.

Connection Fee Methodology

There are several different methods generally recognized for the calculation of connection fees. The calculation is dependent on multiple variables such as cost and engineering data available, and the availability of other local data such as household and population projections, current levels of service, and other related items. The proposed connection fees reflected in this report generally considered the blending of two methods. These two methods are:

i) the improvements-driven method; and ii) and the "buy-in" method. These two methods have been utilized in the development of connection fees for local governments in Florida.

The improvements-driven method is an approach that utilizes a specific list of planned capital improvements over a period of time. For example, the fee may correspond to the level of capital improvements that have been identified in the capital improvements element of the Comprehensive Land Use Plan or capital improvement budget of the local government. The buy-in approach recognizes the existing historical investment in the currently-in-service capital facilities that have capacity available to serve new customers. The primary difference between the three methodologies is how the capital costs, which must be recovered from the application of the fee, are calculated.

The development of the Connection Fees in this report was primarily based on a hybrid or blending of these improvements-driven and System buy-in methods. This hybrid methodology recognizes the cost of existing available and unused capacity available from existing facilities, which are currently in service and available to meet near-term growth requirements, along with incremental costs for new facilities to derive a blended cost allocable to new growth over the next several years.

The following section of this report, Section 2, will address the development and design of the water and wastewater utility service connection fees. It will include a discussion on level of service requirements, capital costs, and the design of the fees themselves.

Acknowledgments

This report was prepared with the valuable cooperation and assistance of the staff of the City of Ormond Beach.

(Remainder of page intentionally left blank)

SECTION 2 – WATER AND WASTEWATER UTILITY CONNECTION FEES

General

This section provides a discussion of the development and design of the connection fee for water and wastewater services (Connection Fees). Included in this section is a discussion of the level of service requirements, capital costs, included as the basis for the determination of the fee, and the design of the fee to be applied to new growth within the City.

Water System Overview

The City's water system (Water System) includes water treatment, supply and storage, transmission mains and finished water distribution facilities. These water treatment facilities are capable of treating 12.0 million gallons per day (MGD) average daily flow (ADF). The City's water conveyance system is comprised of approximately 395 miles of transmission and distribution lines that provide service throughout the City.

Wastewater System Overview

The City's wastewater system (Wastewater System) includes wastewater treatment, transmission, and collection facilities. These wastewater treatment facilities are capable of treating 8.0 MGD ADF. The City's wastewater transmission and collection system is comprised of approximately 282 miles of gravity and force mains along with lift stations and other supporting infrastructure. Additionally, as a means of wastewater effluent disposal the City also provides reclaimed water service. The reclaimed water system is comprised of certain additional treatment processes at the wastewater plan and a reclaimed water conveyance system, which includes approximately 85 miles of transmission and distribution lines.

Level of Service Requirements

In the evaluation of the capital facility needs for providing water and wastewater utility services, level of service (LOS) standards must be established. Pursuant to Section 163.3164 of the Florida Statutes, the level of service means an indicator of the extent or degree of service provided by, or proposed to be provided by, a facility based on and related to the operational characteristics of the facility. Level of service shall indicate the capacity demand per unit for each public facility. The level of service standards are established in order to ensure that adequate facility capacity will be provided for future development and for purposes of issuing development orders or permits, pursuant to F.S. Section 163.3202(2)(g). As further stated in the statutes, each local government shall establish a LOS standard for each public facility located within the boundary for which such local government has authority to issue development orders or permits.

For water and wastewater service, the level of service that is commonly used in the industry is the amount of capacity (service) allocable to an equivalent residential connection (ERC) or Equivalent Living Unit (ELU) expressed as the amount of capacity (gallons) allocated on an average daily basis. The level of service generally represents the amount of capacity allocable to an ELU, whether or not such capacity is actually used (commonly referred to as the "readiness-to-serve"). As previously discussed, an ELU is representative of the average capacity required to service a typical individually-metered single-family residential connection. This class of users represents the largest number

of customers served by the System and generally the lowest level of usage requirements for a specifically metered account. The City's current method of connection fee application for water and wastewater utility connection fees is based on applying a fee per ELU times an assigned number of ELUs based on the type of construction and a standard fee per ELU. Treating single-family residences as one ELU, multi-family units as 0.5 of an ELU, mobile / manufactured homes as 0.6 of an ELU, and non-residential units based on number of fixtures. For non-residential properties the total fixture value of a property (which is based on a count of the number of water fixtures in a property) is then compared to ELU ranges as set and adopted by the City to determine the number of applicable ELUs. The fee per ELU is then applied to the resulting number of applicable ELUs for the property. The following table summarizes the System's LOS levels:

Existing Levels of Service for Residential Customers
Existing Service Levels:
1 Water ELU = 300 gpd (ADF)
1 Wastewater ELU = 280 gpd (ADF)

gpd = gallons per day
ADF = Average Daily Flow

These LOS standards are consistent with the capacity planning and Florida Department of Environmental Protection (FDEP) permitting requirements for the City and are also generally comparable with those utilized by other utilities throughout the state of Florida.

As mentioned previously, the City currently uses a reduced ELU factor for Multi-family and Mobile / Manufactured Homes of 0.5 and 0.6, respectively. Based on a review of the City's existing factors and historical data /class usage relationships data we would recommend an adjustment to these factors as shown below.

Existing and Proposed Residential Equivalent Living Unit Factors		
Residential Customer Class	**Existing Factor**	**Proposed Factor**
Single-family	1.0 ELU	1.0 ELU
Multi-family	0.5 ELU	0.8 ELU
Mobile/Manufactured Home	0.6 ELU	0.9 ELU

Existing Plant-in-Service

In the determination of the Connection Fees associated with the servicing of future customers, any excess capacity of the existing utility system available to serve such growth was considered. Since this capacity is available to serve the near-term customer growth of the System, it is appropriate to evaluate the cost and capacity availability of such facilities. In order to evaluate the availability of the existing utility plant-in-service to meet future capacity needs, it was necessary to functionalize the plant by specific plant requirement. The functionalization of the existing plant is necessary to: i) identify those assets that should be included in the determination of the connection fees; and ii) match existing plant type to the capital improvements to meet future service needs.

The functional cost categories are based on the purpose of the assets and the utility function that such assets serve. The following is a general summary of the functional cost categories for the utility plant-in-service identified in this report.

Functional Plant Categories		
Water Service [*]	**Wastewater [*]**	**Other Plant**
Supply/Treatment/Transmission	Treatment/Disposal/Reclaimed Treatment	General Plant
Storage/Local Distribution	Transmission/Master & Local Lift Stations	Indirect
Hydrants/Meters	Collection/Reclaimed Conveyance	Other

[*] Amounts shown would not include any assets that were contributed by a developer (primarily water distribution and wastewater collection lines) or grant funded.

It is necessary to categorize the utility plant assets into functional cost categories so that a proper fee can be developed. Generally, the costs of on-site facilities that serve a specific development or customer such as water distribution and wastewater collection lines, meters and services, and fire hydrants are usually: i) donated by a developer (a contribution of the plant); ii) recovered from the individual properties through an assessment program based on those properties that receive special benefit from such facilities or from the application of a main line extension fee to recover the specific cost of such facilities; or iii) funded from the customer directly (e.g., by a "front-foot" charge where the on-site lines were initially financed by the utility and then paid by the customer or an installation charge to recover the cost of a new service line and/or the meter) and the cost of such on-site facilities are not included in Connection Fees. Water and wastewater Connection Fees are typically based on the cost of facilities that serve the entire utility system such as bulk transmission lines and treatment plants.

The City provided Raftelis with a fixed asset register report identifying the fixed assets in service by function as of September 30, 2020 for the System. The summary of the functionalization of the existing utility plant is included in Table 1 at the end of this section. This functionalization of the existing utility plant-in-service represents the original cost of such assets (gross book value) and was based on the reported in-service values as of September 30, 2020 (the most recent Fixed Asset records available at the time of the study). The following is a summary of the functionalization of the System's existing utility plant-in-service as shown in Table 1:

System Fixed Assets				
	Water System [1]		Wastewater System [1]	
Function	Amount	Percent	Amount	Percent
Supply	$5,270,426	4.6%	$0	0.0%
Treatment Plant	66,204,344	57.7%	76,896,737	56.2%
Transmission Lines	8,606,122	7.5%	19,308,495	14.1%
Distribution/Collection Lines	19,778,945	17.3%	31,690,524	23.2%
Hydrants/Meter Services	7,347,008	6.4%	0	0.0%
Miscellaneous Departmental Capital	7,491,064	6.5%	8,936,699	6.5%
Totals	$114,697,909	100.00%	$136,832,456	100.00%

[1] Amounts as provided by City staff and found on Table 1.

Additional Capital Investment

The City's System CIP for the Fiscal Years 2021 through 2025, as prepared and estimated by the utility staff outlines the best estimate of future capital improvements for the System. These capital projects include: i) upgrades and expansion of existing assets to accommodate both new and existing customers; and ii) replacements of existing assets

or projects that generally are deemed to benefit current users of the System (e.g., existing plant renewal and replacement, reliability projects).

As shown on Tables 2 and 3 at the end of this section, The CIP totals approximately $21.6 million in capital projects to be completed over the five-year period for the Water System and $26.6 million in capital projects for the Wastewater System, totaling $48.2 million for the combined System.

In our analysis only production / treatment and major backbone transmission costs were recognized in the water and wastewater connection fee calculations. General transmission and distribution / collection project costs were not recognized because they: i) generally are not System-wide costs (i.e., distribution / collection project costs tend to benefit specific customer locale); ii) in many instances, are funded by a specific charge applied to a customer (e.g., water meter installation fee); and iii) are often contributed as part of the development process (e.g., it would not be fair for a developer who has contributed the distribution / collection assets to pay an connection fee which includes recovery of distribution / collection projects).

A summary of all the adjustments that were made in order to arrive at the treatment and major transmission costs recognized for the calculation of connection fees are shown as follows:

Derivation of Treatment and Major Transmission Capital Costs Recognized in Connection Fee Study [1]		
	Water System	Wastewater System
Projects in Utility's Five-year CIP	$21,627,758	$26,617,767
Adj. to Remove Distribution/Collection and R&R Related Projects	(8,359,690)	(20,612,194)
Total Treatment and Major Transmission Capital Costs Recognized in Connection Fees	$13,268,068	$6,005,573

[1] Amounts shown derived from Tables 2 and 3.

Western Service Area

It should be noted that the City anticipates the need for major capital projects to develop water and wastewater treatment and transmission related facilities to provide wholesale utility service to developments in the Western Service Area (which is comprised of Avalon Park) on behalf of the City of Daytona Beach, Florida (Daytona Beach) per a 2006 settlement agreement between the two cities. These projects have not been included in our connection fee analysis at this time as additional information is needed to define the entitlements and utility projects to serve these entitlements. It is our initial recommendation that the City consider creating two distinct utility system connection fee zones or districts with one being for the current City service area and one for the Western Service Area. The fees that are currently being proposed as a part of our analysis would be applied to growth in both zones. Subsequently, once the Avalon Park entitlements are clarified and the capital projects needed to serve the developments are identified, then a connection fee analysis for the Western Service Area could be completed, which would include those costs and related capacity and the fees for that zone to be updated accordingly.

Design of Water System Connection Fee

As shown on Table 4 at the end of this report, the calculated connection fee for the treatment and transmission component of the Water System is $2,333.00 per ELU. This represents a decrease in the fee of $569 or 19.6% below the current fee of $2,902.00 per ELU.

In the development of the proposed Water System Connection Fee, several assumptions were utilized or incorporated. The major assumptions utilized in the design of the calculated Water System Connection Fee are:

1. The existing assets of the Water System as provided by the City were reviewed and categorized by function in order to identify those assets that should be included in the determination of the connection fee. The major categories were: i) Supply; ii) Treatment Plant; iii) Transmission System; iv) Distribution Lines; v) Hydrants / Meter Services; and vi) Equipment. For the assets identified as Supply, Treatment Plant, and Transmission System, which benefit both existing and future users, the total cost of such assets have been recognized in the analysis.

2. The Water System capital improvement program as prepared by staff for the Fiscal Years 2021 through 2025 was reviewed and the capital costs were apportioned: i) by functional category; and ii) to existing and future users in the determination of the Water System Connection Fee. Those facilities that were considered to be allocable to growth were included in the fee determination at full cost (i.e., 100% of the total cost). For capital expenditures that were solely for the replacement of existing assets such amounts were only partially reflected (i.e., the incremental change in asset basis associated with the replacement of an old asset with a new one) as an appropriate cost to be recovered from the application of the Water System Connection Fee. The CIP capital costs recognized in the Water System connection fee analysis are shown on Table 2 and Table 4 at the end of this report.

3. For the capital improvements identified as major treatment or transmission system upgrades, which would benefit both existing and future users, the total cost of such improvements has been recognized in the analysis. These costs were allocated to existing and future customers based on the nature and purpose of the project as described to us by the City.

4. No capital facility expansion costs associated with existing distribution facilities, including meters, hydrants, on-site distribution facilities, and services, have been included in the calculation of the Water System Connection Fee since developers typically contribute such facilities or the City has adopted a separate fee (e.g., water meter installation fee) to recover the cost of such capital additions.

5. Because: i) the Water System is operated as an enterprise fund; ii) all financial resources received by the utility stay within the fund for the benefit of such system; iii) the costs reflected in the fee are at original cost and not adjusted for any fair market value to reflect current cost conditions; iv) there is no interest-expense carry in the connection fee associated with the financing of the capital investment to serve new development; and v) there are no other revenues received by the Water System from new development for the capital costs / utility plant reflected in the connection fee (e.g., ad valorem taxes on the property), no credit for the future payment of debt service allocable to the properties has been recognized. All Connection Fee funds remain in the System and the long-term capital financing costs for infrastructure construed and available to serve new growth are mitigated by using the connection fees for ongoing expansion-related capital project financing or for the direct payment of the annual expansion-related debt service payments.

As shown on Table 4 at the end of this section, the Water System Connection Fee was calculated utilizing: i) estimated capital costs for the supply, treatment and transmission system; and ii) current fixed asset and capacity data available to Raftelis regarding the Water System. By designing the Water System Connection Fee to recover costs on a prospective basis, an attempt is made to design a charge that will provide funds on a reasonable basis in order to meet the future needs of the Water System. It should be noted that in the event the construction costs,

capacity requirements, or utility service area materially change from what is reflected on Table 4, the Water System Connection Fee might need to be adjusted accordingly.

The proposed connection fee for the Water System is $2,333 per ELU. This represents a decrease in the fee of $569 or 19.6% below the current fee of $2,902 per ELU. This fee would be the per ELU amount that a new account would be charged in accordance with the City's connection fee methodology and revised ELU factors. Based on the capital facilities associated with the determination of the charge, the functional breakdown of the components of the rate is as follows:

Calculation of Water System Connection Fee	
Fee Component	Cost
Water Treatment Component	$2,085.44
Water Major Transmission Component	248.28
Total	$2,333.78
Total Proposed Water System Connection Fee (Rounded)	**$2,333.00**

Design of Wastewater System Connection Fee

As shown on Table 5 at the end of this section, the total calculated connection fee for the Wastewater System is $3,577 per ELU. This represents an increase in the fee of $748 or 26.4% when compared with the current fee of $2,829 per ELU. The reason for this increase is that the System has a higher cost per unit of capacity than what was calculated previously due to the increased costs associated with Wastewater System capacity.

In the development of the proposed Wastewater System Connection Fee, several assumptions were utilized or incorporated in the analysis. The major assumptions utilized in the design of the proposed Wastewater System Connection Fee are:

1. The existing assets of the Wastewater System as provided by the City were reviewed and categorized by function in order to identify those assets that should be included in the determination of the connection fee. The major categories were: i) Treatment Plant; ii) Transmission Lines; iii) Collection Lines; and iv) Equipment. For the assets identified as treatment plant and transmission system, which benefit both existing and future users, the total cost of such assets have been recognized in the analysis.

2. The Wastewater System capital improvement program (CIP) as prepared by staff for the Fiscal Years 2021 through 2025 was reviewed and the capital costs were apportioned: i) by functional category; and ii) to existing and future users in the determination of the Wastewater System Connection Fee. Those facilities that were considered to be allocable to growth were included in the fee determination at full cost (i.e., 100% of the total cost). For capital expenditures that were solely for the replacement of existing assets such amounts were only partially reflected (i.e., the incremental change in asset basis associated with the replacement of an old asset with a new one) as an appropriate cost to be recovered from the application of the Wastewater System Connection Fee. The CIP capital costs recognized in the Wastewater System Connection Fee analysis are shown on Table 3 and Table 5 at the end of this report.

3. For the capital improvements identified as major treatment or transmission system upgrades, which would benefit both existing and future users, the total cost of such improvements has been recognized in the

analysis. These costs were allocated to existing and future customers based on the nature and purpose of the project as described to us by the City.

4. No capital facility costs associated with the existing collection facilities, including local lift stations, manholes, laterals, and on-site collection facilities have been included in the calculation of the Wastewater System Connection Fee since the developer generally contributes such facilities, or City has adopted a separate fee (e.g., wastewater tap-on fee) to recover such capital additions. All capital improvements to such respective facilities in the CIP were also not recognized in the Wastewater System Connection Fee analysis.

5. Because: i) the System is operated as an enterprise fund; ii) all financial resources received by the System stay within the fund for the benefit of such System; iii) the costs reflected in the fee are at original cost and not adjusted for any fair market value to reflect current cost conditions; iv) there is no interest-expense carry in the impact associated with the financing of the capital investment to serve new development; and v) there are no other revenues received by the City from new development for the capital costs / utility plant reflected in the tap-on (e.g., ad valorem taxes on the property), no credit for the future payment of debt service allocable to the properties has been recognized. All connection fee funds remain in the System and the long-term capital financing costs for infrastructure construed and available to serve new growth are mitigated by using the connection fees for ongoing expansion-related capital project financing or for the direct payment of the annual expansion-related debt service payments.

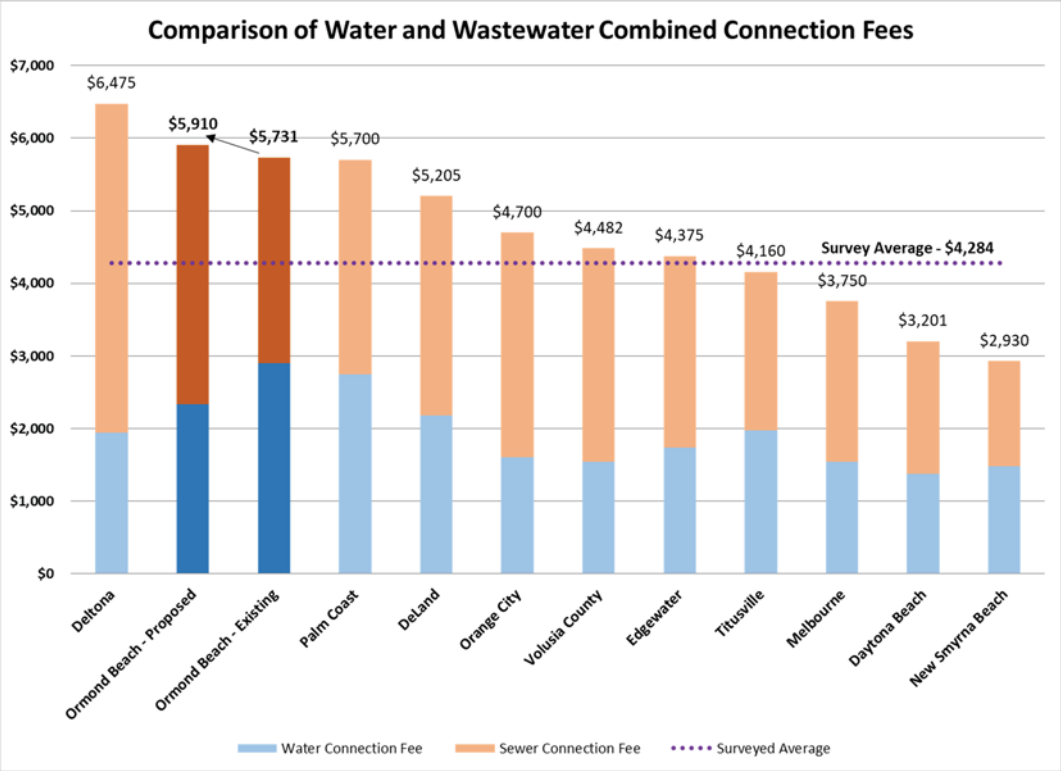
As shown on Table 5 at the end of this section, the Wastewater System Connection Fee was calculated utilizing: i) the estimated transmission-related capital costs of the Wastewater System; ii) the treatment / disposal-related capital costs for the Wastewater System; and iii) current fixed asset and plant capacity data available to Raftelis regarding the City's Wastewater System. By designing the Wastewater System Connection Fees to recover costs on a prospective basis, an attempt is made to design a charge that will provide funds on a reasonable basis in order to meet the future needs of the Wastewater System. It should be noted that in the event the construction costs, capacity requirements, or utility service area materially change from what is reflected on Tables 2, the Wastewater System Connection Fees may need to be adjusted accordingly.

As shown on Table 5 at the end of this section, the calculated Wastewater System Connection fee $3,577 per ELU, which is $748 or 26.4% higher than the existing Wastewater System Connection Fee of $2,829 per ELU. This fee would be the per ELU amount that an account would be charged in accordance with the City's connection fee application methodology and revised ELU factors. Based on the capital facilities associated with the determination of the charge, the functional breakdown of the components of the rate is as follows:

Calculation of Wastewater System Connection Fee	
Fee Component	**Cost**
Wastewater Treatment Component	$2,785.16
Wastewater Major Transmission Component	792.23
Total	$3,577.39
Total Proposed Wastewater System Connection Fee (Rounded)	**$3,577.00**

(Remainder of page intentionally left blank)

Connection Fee Comparisons



In order to provide additional information to City regarding the existing and proposed Connection Fees, a comparison of the existing and calculated fees for the City with similar related capital charges imposed by of other Florida jurisdictions was prepared. Table 6 at the end of this section, provides a comparison of the City's existing and proposed Connection Fees for single-family residential connections (i.e., one ELU of 300 gpd for the Water System and 280 gpd for the Wastewater System) with the fees or comparable charges currently imposed by other municipal / governmental water and wastewater systems located across Florida. It is important to note that utilities may be different from a facility standpoint, and the methods used in the development of the water and wastewater connection fees imposed may vary. Moreover, no analysis has been performed to determine whether 100% of the cost of new facilities is recovered from connection fees or some percentage less than 100% with the balance recovered through the user charges. Additionally, the types of capital facilities currently in service or planned for the utility may have a material impact on the fee charged by a local government. For example, the costs of wastewater effluent disposal utilizing a deep injection well system generally has a higher capital cost per unit of capacity than use of a surface water discharge such as an outfall to a bay or river. The capital costs associated with constructing reverse osmosis water treatment facilities, which treat brackish water, are higher than those of lime softening facilities, which treat freshwater.

Some reasons why connection fees differ among utilities:

- Source of Supply
- Proximity to source of supply
- Type of treatment
- Effluent disposal method
- Density of service area
- Availability of grant funding to finance CIP
- Age of system
- Utility life cycle (e.g., growth-oriented vs. mature)
- Level of service standards
- Administrative policies

As shown on Table 6, the average System Connection Fee per ELU for the 11 governmental entities selected for this comparison are $4,284 per ELU. Of the surveyed utilities, the City of Deltona has the highest combined water and wastewater fees at $6,475 per ELU. City of New Smyrna Beach with a combined fee of $2,930 had the lowest of the surveyed utilities. The proposed water and wastewater connection fees are higher than the average of similar fees charged by the surveyed utilities. Below if a comparison of the existing and proposed fees to the surveyed entities for reference.

Footnotes:

[1] Amounts shown reflect the Five-Year Capital Program as provided by the City.

[2] Downward adjustments reflect projects: i) anticipated to be funded by grants as identified by the City; ii) recognized in the existing assets summary (Fixed Asset Data and Asset Functionalization) to be consistent with existing capacity assumptions; or iii) not considered applicable to the fee determination process.

[3] Assets are categorized based on information provided by the City.

Table 4
City of Ormond Beach
Water and Wastewater System Connection Fee Study

Development of Water System Connection Fees

Line No.	Description		Water Amount
	Total Estimated Cost of Existing Water Production and Treatment Facilities:		
1	Installed Cost - Existing Facilities [1]		$71,474,770
2	Additional Costs Capitalized - CIP [2]		16,265,925
3	Less Anticipated Retirements [3]		(4,322,967)
4	Less Receipt of Grant Funds [4]		0
5	Subtotal Water Production and Treatment Facilities		$83,417,728
6	Existing Permitted Capacity of Plant Facilities (MGD) (ADF) [5]		12.000
7	Existing Average Daily Flow for FY 2016-2020 (MGD) (ADF) [6]		6.729
8	Equivalent Living Unit Factor - (GPD) (ADF) [7]		300.0
9	Estimated Dwelling Units Permitted to be Served by Existing Facilities		40,000
10	Percent Remaining Capacity of Existing Facilities		43.93%
11	Allocation of Existing Facilities to Incremental Growth		$36,644,472
12	Rate per Living Unit Associated with Existing Facilities		$2,085.44
	Total Estimated Cost of Additional Water Production and Treatment Facilities:		
13	Additional Costs Capitalized - CIP [8]		$0
14	Less Receipt of Grant Funds [4]		0
15	Cost of Additional Water Production/Treatment Facilities		$0
16	New Plant Capacity (MGD) (ADF) [9]		0.000
17	Estimated Dwelling Units to be Served by Additional Facilities		0.00
18	Rate per Dwelling Units Associated with Additional Facilities		$0.00
19	Rate per Living Units Allocable to Water Production/Treatment Facilities		$2,085.44
	Primary Transmission System:		
20	Existing Facilities [10]		$8,606,122
21	Additional Costs Capitalized - CIP [11]		3,700,000
22	Less Anticipated Retirements [3]		(2,374,889)
23	Less Receipt of Grant Funds [4]		0
24	Total Primary Transmission Facility Costs		$9,931,233
25	Estimated Dwelling Units Served by Existing Facilities [12]		40,000
26	Estimated Future Dwelling Units served by Transmission Facilities [12]		0
27	Total Estimated Dwelling Units served by Transmission Facilities [12]		40,000
28	Net Rate per Dwelling Unit of Primary Transmission Facilities		$248.28
29	Total Combined Rate per Dwelling Unit After Rate Adjustment		$2,333.72
30	**Rounded Water Fee per Living Unit**		$2,333.00
31	Cost Per Gallon		$7.78
32	Existing Rate per Gallon		$9.67
33	Existing Rate per Living Unit		$2,902.00
34	Proposed Increase / (Decrease)		($569.00)
35	Proposed Connection Fees	ELU Factor	Amount
36	Single Family Residential	1.00	$2,333.00
37	Multi-Family Residential	0.80	$1,866.00
38	Mobile Home Residential	0.90	$2,099.00

MGD = Million Gallons per Day
ADF = Average Daily Flow
GPD = Gallons per Day

Table 4
City of Ormond Beach
Water and Wastewater System Connection Fee Study

Development of Water System Connection Fees

Footnotes:

[1] Amount based on Table 1 and reflects water production and treatment assets currently in service.

[2] Amount derived from Table 2 and reflects the planned upgrades to the existing water production and treatment facilities.

[3] Amounts derived from City of Ormond Beach fixed asset data and reflect estimated fixed asset retirements due to the imposition of the capital improvement plan of the City which recognizes the replacement of such assets classified in the total treatment and/or transmission function.

[4] Total cost of facilities is reduced by grants and other outside funding sources, if any, as provided by the City.

[5] Amount reflects the rated permitted capacity of the existing facilities and is shown in detail as follows:

Description	Plant Capacity
Lime Softening Plant Capacity (MGD) (ADF)	8.000
Low Pressure Reverse Osmosis Capacity (MGD) (ADF)	4.000
Total Capacity (MDG) (MDF)	12.000

[6] Based on the average daily flow for the period fiscal year 2016-2020.

[7] Amount reflects the City's proposed level of service provided for a residential dwelling unit.

[8] Amount derived from Table 2, if any, and reflects the cost of additional water treatment capacity.

[9] Amount as provided by City staff and reflects the amount of additional water treatment capacity expressed on an average daily flow basis, if any.

[10] Amount based on Table 1 and reflects water transmission assets currently in service.

[11] Amount derived from Table 2 and reflects the planned upgrades to the existing water transmission system.

[12] Amount assumes transmission capacity is consistent with the existing and estimated future water treatment capacity.

Table 5

Ormond Beach, FL 32174

Subject: **Municipal Impact Fees Study**

Ladies and Gentlemen:

We have completed our study of the municipal impact fees for parks and recreation, stormwater, local roads, and mobility fees as well as our impact fee feasibility analysis for the police and fire departments for the City of Ormond (the "City") and have summarized the results of our analysis, assumptions, and conclusions in this report, which is submitted for your consideration. This report summarizes both the basis for the proposed impact fees in order to provide funds to meet the City's capital expenditure requirements for such services allocable to growth as well as basis for the recommendation regarding potential implementation of police and fire impact fees.

During the course of the study, it was determined that the proposed impact fees should meet a number of goals and objectives. These goals and objectives primarily deal with fee sufficiency and level. Specifically, the major objectives considered in this study include:

- The Impact Fees should be sufficient to fund the projected capital requirements associated with providing service to new growth and development;
- The Impact Fees should not be used to fund deficiencies in capital needs of the City, if any; and
- The Impact Fees should be based upon reasonable level of service standards which meet the needs of the City and are similar to industry standards.

The proposed municipal services impact fees presented in this report should meet the above objectives, as identified by the City during this study. As such, based on information provided by the City and the assumptions and considerations reflected in this report, Raftelis Financial Consultants, Inc. (Raftelis) considers the proposed fees to be cost-based, reasonable, and representative of the funding requirements of the City.

(Remainder of page intentionally left blank)

We appreciate the cooperation and assistance given to us by the City and its staff in the completion of the study.

Very truly yours,

RAFTELIS FINANCIAL CONSULTANTS, INC.

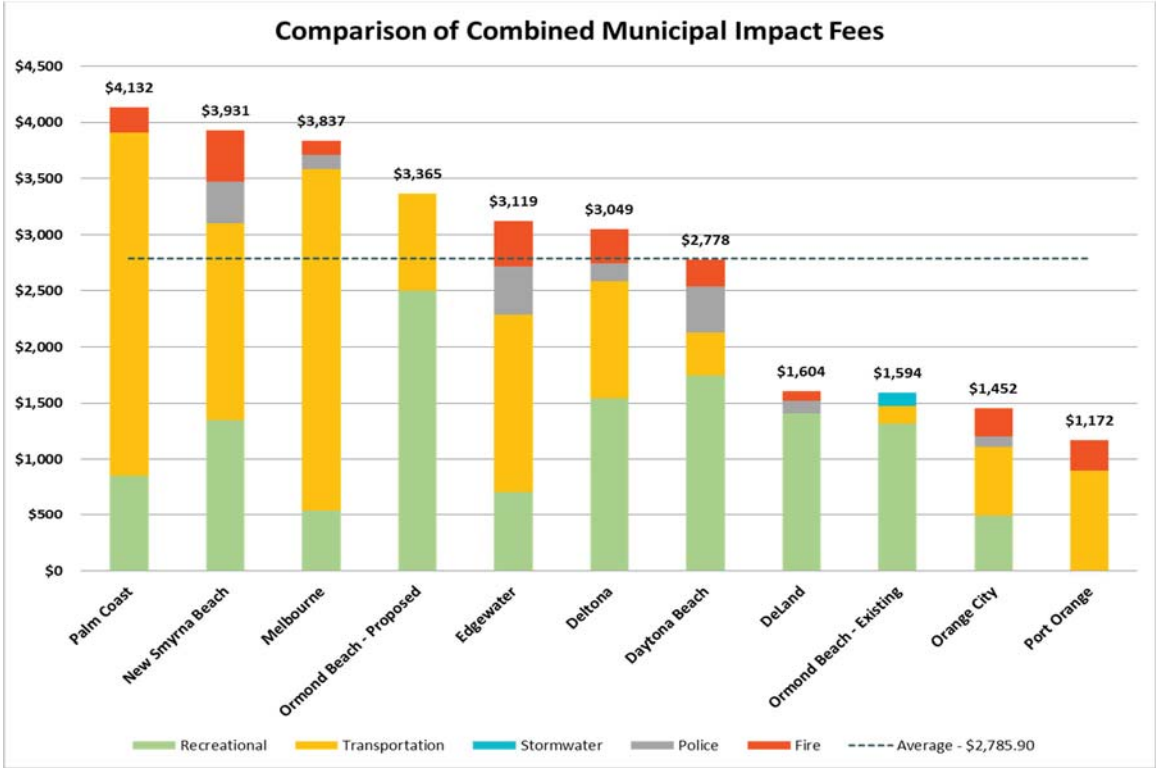
EXECUTIVE SUMMARY AND RECOMMENDATIONS

Executive Summary

The purpose of an impact fee is to assign, to the extent practical, growth-related capital costs to new development responsible for such costs. To the extent new population growth and associated development imposes identifiable capital costs to municipal services, equity and modern capital funding practices suggest the assignment of such cost to those residents or system users responsible for such costs. The City of Ormond Beach (City) has recognized this capital funding strategy as being an appropriate method of funding the certain future capital requirements of the City. The City has, in the past, adopted impact fees for the following municipal services:

- Parks and Recreation
- Stormwater
- Transportation

This report addresses the impact fees associated with parks and recreation, stormwater, and transportation (collectively, the "Municipal Services Impact Fees"). The City currently has impact fees for all these services as noted above. Raftelis Financial Consultants, Inc. (Raftelis) was retained to review and develop proposed fees, as appropriate. In addition, Raftelis was tasked to conduct a feasibility study for police and fire services in order to determine if the City should consider implementing police and fire impact fees.



Based on the subsequent discussions in this section, the following table summarizes the City's existing to proposed impact fees for the single-family residential classification as follows:

Single-family Residential Impact Fees		
	Existing Fees	Proposed Fess
Parks and Recreation	$1,312.24	$2,500.00
Stormwater	119.39	0.00
Local Roads	162.61	864.59
Total	**$1,594.24**	**$3,364.59**

Mobility Fees		
	Existing Fees	Proposed Fess
Rate per Person Trip	$16.00	$85.67

(Remainder of page intentionally left blank)

A comparison of the City's existing and proposed single-family residential impact fees levels to other local municipalities is shown below for informational purposes.

As shown above, the City's calculated impact fees are comparable to the impact fees charged other Florida communities surveyed.

The existing and proposed fee shown above for parks and recreation is only charged to residential properties, while fees for roads are also charged to non-residential properties. The non-residential fees are unique to the service requirements of each property. A detailed discussion on impact fees for both residential and non-residential properties is provided for in subsequent sections of this study report.

Findings and Recommendations

The following is a summary of the observations and recommendations following our investigation, analyses, and preparation of this report:

1. The impact fees must be reasonably related to the cost of providing capital facilities / equipment needed to accommodate new growth. The impact fees collected must be used by the City to address the capital costs related to serving new development. Based on the information made available by the City, the proposed impact fees are designed to meet these Florida legal requirements.

2. Pursuant to Florida Statutes Section 163.31801, the City must provide notice no less than 90 days before the effective date of an ordinance or resolution imposing a new or increased impact fee.

3. Collection of the fee may not be required before the issuance of the building permit.

4. In compliance with Florida Statutes the City should collect and maintain revenue from each type of municipal fee in designated sub-accounts and use such fees on those facilities designated for each purpose.

5. The City should adopt the impact fees as proposed to ensure adequate funding sources are available to fund future service expansion projects needed to provide the identified level of service to new growth.

6. The fees developed within this report reflect recovery of identified costs and the City has discretion to phase-in or otherwise adopt less than the fully calculated fees. However, the adoption of fees less than the fully calculated rates should be applied to all land uses equally in order to maintain the calculations herein in correct proportion. Adopting less than the calculated rates would increase the reliance on general fund and other revenue sources to meet the demands of growth.

7. For reasons detailed in Section 4 of this report the City should consider the discontinuation of its stormwater impact fees.

8. The City should revise its impact fee credit policy so that credits from demolitions will not have an expiration date.

9. As detailed in Sections 6 and 7 of this report, we recommend that the City consider pursuing the development and establishment of police and fire protection impact fees.

The subsequent sections of this report provide detailed discussions on the existing and proposed impact fees for parks and recreation services, stormwater service, and local roads / mobility service as well as a discussion on the police and fire feasibility analyses and recommendations.

(Remainder of page intentionally left blank)

SECTION 1 – INTRODUCTION

Introduction

The City of Ormond Beach (City) is located in Volusia County (County) north of Daytona Beach and south of Palm Coast. The City comprises 38.91 square miles and provides an array of services to year-round and seasonal residents. The municipal services in demand include parks and recreation, police, fire / EMS services, and stormwater management. Based on the published U.S. Census in 2020, the City's permanent population was 43,080. Based on historical growth trends and discussions with the City's Planning Department, the estimated 2021 population was 44,041. It is anticipated that the City will have modest growth over the next 20 years with the City's population projected to reach 50,630 with approximately 21,730 housing units by 2040 (Forecast Period). In addition to housing, the City anticipates commercial development to continue to support new residents. In order to meet this anticipated growth and development and to maintain current levels of service, the City will need to fund capital improvements to serve such development.

The City's Municipal Services Impact Fees were last updated in 1996. Although the City has indexed such rates annually thereafter, rates need to be reviewed periodically to ensure that such fees reflect current actual investments made to serve growth, and to adequately reflect additional needs required to service new developments. Therefore, the City authorized Raftelis, to evaluate the existing parks and recreation, stormwater management, and roads / mobility impact fees and to complete a feasibility analysis on potential new impact fees for police and fire protection service.

Authorization

Raftelis was authorized by the City to evaluate and develop parks and recreation and stormwater impact fees as well as preform a feasibility analysis to assess the potential for police and fire impact fees pursuant to an agreement between the City and Raftelis. The scope of work for this project, as defined in the agreement, was to:

1. For each service, review and analyze the capital requirements of the City that are needed to meet the level of service standards for the municipal function. This analysis includes a review of: i) the existing and future facility and equipment inventory of each specific municipal function; ii) service area population and development demographics and future needs; and iii) services provided by class of customers.

2. Where appropriate, develop a fee to be charged to new development in order to recover the capital costs associated with providing municipal services. This analysis includes the apportionment of costs among customer / development classifications, and the development of the fee per equivalent billing unit.

3. Make recommendations as to additional impact fees to charge for services that the City provides.

4. Develop a comparison of the impact fees and associated billing attributes for similar charges imposed by other neighboring jurisdictions.

5. Prepare a report that documents our analyses, assumptions, and conclusions for consideration by the City Manager and City Commission.

Criteria for Impact Fees

The purpose of an impact fee is to assign, to the extent practical, growth-related capital costs to those new customers that benefit from the facilities funded by such expenditures. To the extent new population growth and associated development imposes identifiable capital costs to municipal services, equity and modern capital funding practices suggest the assignment of such costs to those residents or system users responsible for such costs rather than the existing population base. Generally, this practice has been labeled as "growth paying its own way".

Historically, impact fees in Florida were a result of home rule powers with the requirements associated with the development, administration, accounting and expenditure governed by case law. However, Section 163.31801 of the Florida Statutes, known as the "Florida Impact Fee Act", was created on June 14, 2006, which placed specific requirements and limitations on that home rule authority. This statue has been amended several times since its initial adoption, including significant additional provisions in 2021 such as limiting the percentage increase for a change in impact fees. Appendix A at the end of the report includes the full Florida impact fee statute.

The statute provides specific impact fee criteria, certain precedents established by case law also constitute the legal requirements associated with impact fees. Some of the major criteria includes the following:

1. The impact fee should be reasonably equitable to all parties; that is, the amount of the fee must bear a relationship to the amount of services requested;

2. The system of fees and charges should be set up so that there is not an intentional windfall to existing users;

3. The impact fee should, to the extent practical, only cover the capital cost of construction and related costs thereto (engineering, legal, financing, administrative, etc.) for increases in or expansions of capacity or capital requirements that are required solely due to growth. Therefore, expenses due to normal renewal and replacement of a facility (e.g., replacement of a capital asset) should be borne by all users of the facility or municipality. Similarly, increased expenses due to operation and maintenance of that facility should be borne by all users of the facility; and

4. The local government must adopt a revenue-producing ordinance that explicitly sets forth restrictions on revenues (uses thereof) that the imposition of the impact fee generates. Therefore, the funds collected from the impact fees should be retained in a separate account, and separate accounting must be made for those funds to ensure that they are used only for the lawful purposes described.

Based on the criteria provided above, the impact fees herein will: 1) include local current costs of improvements associated with the capacities needed to serve new growth; 2) not reflect costs of improvements associated with the renewal and replacement (R&R) of existing capital assets or deficiencies in level of service attributed to existing development; and 3) not include any costs of operation and maintenance of the capital improvements and equipment.

This section provides only a general background regarding impact fees. Certain circumstances and issues regarding the interpretation of specific statutes or case law should be addressed by qualified legal counsel.

Impact Fee Methods

There are several different methods for the calculation of an impact fee. The calculation is dependent on the type of fee being calculated (e.g., recreational services, transportation, etc.), cost and engineering data available, and the

availability of other local data such as household and population projections, current levels of service, and other related items. The proposed Municipal Services Impact Fees reflected in this report are predominately based on three separate methods. There were three major methods of impact fee calculation considered in this analysis. These three methods were: i) the improvements-driven method; ii) the standards-driven method; and iii) the buy-in or recoupment approach. These methods have been utilized in the development of impact fees for local governments throughout Florida.

The improvements-driven method is an approach that utilizes a specific list of existing or planned capital improvements over a period of time. For example, the fee may correspond to the level of capital improvements that have been identified in the capital improvements element of the Comprehensive Plan or capital improvement budget of the entity. The standards-driven method does not utilize the cost of improvements based on anticipated needs as stated in the capital improvement plan but rather uses a set of theoretical standards to determine the cost of the improvements associated with new growth. The buy-in or recoupment method is based on this historical cost of assets, and adjustments to the basis of these assets, currently in service and the current population. The primary difference between the three methodologies is how the capital costs, which must be recovered from the application of the fee, are calculated.

The proposed impact fees herein for the municipal services include the application of these methods based on the capital facilities required to provide services and meet the City's service level standards. Where appropriate, the blending of methods occurred and a more complete discussion of the methods used for the determination of the impact fees are presented in Sections 3 through 5.

Summary of Report

In addition to Section 1, this report has been subdivided into six (6) other sections. The following is a brief discussion of the remaining sections included in this report.

Section 2 – City Demographics. This section of the report provides a general discussion of the residential land use characteristics. Also presented in this section is the forecast of the residential dwelling units and non-residential development that is necessary in the design of the impact fees for the municipal services.

Section 3 – Parks and Recreation Service Impact Fee Analysis. This section discusses the development of the recreation impact fee, including the capital requirements associated with providing parks and recreation facilities to the City's residents, the methodology for the determination of the proposed fees, assumptions utilized in the design of the fees, and other factors associated with the fee determination.

Section 4 – Stormwater Impact Fee Analysis. This section discusses the existing stormwater system, a discussion on stormwater system funding approaches, the current stormwater impact fees charged, and recommendations regarding the fees.

Section 5 – Transportation Impact Fee Analysis. This section discusses the development of the local roads and mobility impact fees, including the methodology for the determination of the proposed fees, assumptions utilized in the design of the fees, and other factors associated with fee determination.

Section 6 – Police Facilities Impact Fee Feasibility Analysis. This section discusses the feasibility of possibly developing impact fees for police services in the future, including a review of current capital costs, a comparison of police impact fees charged in neighboring communities, and a potential fee range.

Section 7 – Fire Protection Facilities Impact Fee Feasibility Analysis. This section discusses the feasibility of possibly developing impact fees for fire protection services, including a review of current capital costs for providing fire services, a comparison of fire impact fees charged in neighboring communities, and a potential fee range.

(Remainder of page intentionally left blank)

SECTION 2 – CITY DEMOGRAPHICS

General

This section provides a general discussion of the current service area, including population and housing statistics and other demographic information related to land use. Additionally, a discussion of the anticipated growth in population and associated growth in residential dwelling units is also contained in this section.

Population and Development Forecast

Regardless of the approach taken to formulate impact fees, a forecast of the population of the City is needed in order to: i) have an appropriate planning horizon to ensure that capital improvement needs and costs are apportioned over a suitable growth segment; ii) link LOS requirements to the capital facility plan; and iii) identify any deficiencies in existing capital facilities related to the LOS standards and current population served.

As shown in Table 2-1 at the end of this section, the City's total estimated population is 44,041 in 2021. Based on information provided by the City, it is estimated that the total population will approach approximately 45,829 residents by 2025 and 50,630 residents by the year 2040. Thus, the population growth anticipated by the City is expected to be moderate, approximately 1.00% on an average annual basis through the year 2030 and then conservatively by 0.50% percent through the year 2040.

Historical and Projected Population and Dwelling Units

Year	Total Population	Total Dwelling Units	Average Persons per Occupied Dwelling Unit
2020 [1]	43,080	18,489	2.33
2021	44,041	18,700	2.33
2022	44,677	19,175	2.33
2025	45,829	19,669	2.33
2030	48,167	20,673	2.33
2040	50,630	21,730	2.33

[1] Future population estimates shown based on a review of historical population growth as obtained from the U.S. Census Bureau, from projections from the University of Florida's Florida Housing Data Clearinghouse, and discussions with City staff.

To the extent the projection of future development materially changes, it would then be appropriate for the City to re-evaluate the impact fees developed in this report.

(Remainder of page intentionally left blank)

Persons per Household

In order to develop recreational impact fees based on the type of residential properties to estimate the impact on recreational facilities, Raftelis evaluated the existing residential units within the City. Based on the historical relationships of persons per dwelling unit for single-family, multi-family, and mobile home property types used in the existing fees as well as revised population and unit data from the Census Bureau an estimate of persons per unit was developed and is shown below.

- Single-family Persons per Household – 2.53
- Multi-family Persons per Household – 2.05
- Mobile Home Persons per Household – 1.68
- City Average Persons per Household – 2.33

It should be noted that with respect to Sections 6 and 7 in this report, further demographic data and related functional population analyses would be required in order to develop potential police and fire impact fees. At this time the proposed fees being calculated (the parks and recreation fees described in Section 3) do not involve this type of approach as they only apply to residential development and not nonresidential development.

SECTION 3 – PARKS AND RECREATION SERVICE IMPACT FEE ANALYSIS

General

This section provides a discussion of the development and design of the proposed impact fee for parks and recreation services. Included in this section is a discussion of the City's adopted level of service (LOS) standards, facility requirements, and related capital costs included as the basis for the fee determination, and the design of the fee to be applied to new growth within the City.

Level of Service Standards

As outlined in the City's Comprehensive Plan and Parks and Recreation Master Plan, the City has adopted Level of Service (LOS) standards for recreational facilities and activities. With respect to open space, the City has adopted a recreational open-space LOS standard of thirteen (13.00) acres per 1,000 residents in total. The City currently owns and maintains an inventory of parks. A summary of the City-owned and -operated parks (existing and under development) is summarized on Table 3-1. The City's current inventory includes 607.45 acres including neighborhood parks, mini-parks, community centers, and more. Table 3-2 provides a detailed listing of the City's current investment in the parks, including land, improvements, facilities, and equipment, which total approximately $58.1 million. As shown in Table 3-3 and based on the estimated population of 44,041 residents in 2021, the City has an existing level of service for total open space of 13.0 acres per 1,000 population, which results in the City having an existing surplus as follows:

Descriptions	Amounts
Population 2021	44,041
Open Space LOS	13.0 Acres per 1,000 Population
Required Acres	572.53 Acres
Current City Inventory	607.45 Acres
Surplus/(Deficiency)	34.92 Acres

It should also be noted that as the City's population grows over time this surplus of acreage per 1,000 population will decrease. However, the City has plans for the acquisition of additional land at multiple sites that will go towards maintaining the required parks and recreation LOS throughout the forecast window through 2040.

(Remainder of page intentionally left blank)

Existing Recreational Assets

In the determination of the fee, the historical costs of the existing assets and any grant funding for those assets was considered. The City's existing assets are categorized by type and are summarized below.

Inventory of City Parks and Recreational Facilities [1]	
Description	Historical Cost
Assets Included in Fee Calculation:	
Land	$10,599,856
Facilities	30,422,508
Activity-related	14,615,760
Subtotal	$55,638,123
Assets Excluded From Fee Calculation:	
Machinery and Equipment	$947,032
Other Excluded Assets	1,544,333
Subtotal	$2,491,365
Total Existing Investment in Parks and Recreation	$58,129,488

[1] Amounts as shown on Table 3-2.

As shown above, of the $59,129,488 in recreational assets, $55,638,123 is included in the calculation of the impact fee.

Capital Improvement Plan

In the determination of the fee, the following five- (5) year capital improvement plan was provided by the City for this project. Along with the City's existing investment in recreation assets this capital improvement plan is anticipated and designed to provide recreation services to the City's "buildout" dwelling unit level and maintain the identified level of service standards. The City's capital improvements are summarized below.

Projected Future City Investment in Recreational Facilities and Activities (Capital Plan) [1]	
Description	Amount
Total Improvements	$6,229,053
Less:	
Grant Funding	(2,149,303)
R&R Projects	(547,249)
Future Investment Included in Fee Calculation	$3,532,501

[1] Amounts as provided by City staff and are shown on Table 3-4.

As can be seen above, the City anticipates spending $3,532,501 in order to further acquire and develop the parks and recreation facilities to provide the desired level of recreation services to the City after adjustments for grants and renewal and replacement (R&R) projects.

Design of Recreational Facility Impact Fee

The method used to calculate the impact fee is a combination of the improvements-driven method and buy-in method as the recoupment of a portion of existing investments available to serve new growth and the costs associated with adding additional capacity to serve the City's future recreation needs are recognized. Table 3-5 at the end of this report summarizes the results of the impact fee calculation. The following is a brief description of the method used in this study:

- Development of Recoverable Assets – Based on the City's existing investment in recreation and park facilities, and the dwelling unit projections at "buildout", the total estimated cost of existing assets to serve residents is identified.

- Development of Total Capital Need – Based on the City's estimated capital costs of developing future park facilities, and the dwelling unit projections, the total estimated cost to serve existing residents is developed.

- Development of Equivalent Impact Fee Units – This data which was provided by Staff in the form of the City's anticipated "buildout" dwelling unit capacity. These figures are used to develop a proposed fee per dwelling unit.

- Calculation of Cost per Dwelling Unit – Once the total capital costs allocable to future resident are determined, the impact fee unit per dwelling (residence) is calculated. This calculation represents the average cost of recreation facilities per dwelling person multiplied by the estimated persons per dwelling unit for single-family, multi-family, and mobile home residential dwellings.

RECREATIONAL FACILITY IMPACT FEE ASSUMPTIONS

In the development of the recreation impact fees, several assumptions were utilized. The major assumptions used in the development of the impact fees are as follows:

1. The development of the cost for the recreation facilities impact fees was based on the City's current inventory of parks and recreational activities, the recommended level of service standards for recreational facilities, and the City's estimated capital costs to develop future facilities and activities.

2. As indicated in Table 3-5, the City has identified existing needs totaling $49,942,204, which includes a credit for grants and R&R projects, which reduced the burden by $9,855,920. The total needs were based primarily on actual investments made by the City, which should be recouped from future residential growth.

3. No credits from other revenue sources have been identified for the purposes of this calculation, as it is assumed that other funding sources generated by future users will be utilized to provide for the necessary ongoing operating and repair / replacement costs required.

(Remainder of page intentionally left blank)

IMPACT FEE CALCULATION

Based on the above-referenced assumptions, the recreation impact fee as calculated in detail on Table 3-5 was determined as follows:

Description			Amounts
Existing Investment in Parks and Recreation [1]			$55,638,123
Future Investment in Parks and Recreation [2]			4,160,001
Total Existing and Future Investment in Parks and Recreation Through 2025			$59,798,124
Previously Grant Funded/Donated Assets [3]			($9,228,420)
Planned Future Grant Funded/Donated Assets Through 2025 [3]			(627,500)
Total Grant Funded/Donated Assets Through 2025			($9,855,920)
Total Existing and Proposed Investment in Parks and Recreation			$49,942,204
Total City Population in 2040 [4]			50,630
Total Costs to be Recovered per Person			$986.41
	Single-family	Multi-family	Mobile Home
Total Costs to be Recovered per Person	$986.41	$986.41	$986.41
Estimated Persons per Dwelling Unit [5]	2.53	2.05	1.68
Total Costs to be Recovered per Dwelling Unit	$2,500.07	$2,021.49	$1,658.45
Total Costs to be Recovered per Dwelling Unit (Rounded)	$2,500.00	$2,021.00	$1,658.00

[1] Existing investment amount shown based on Table 3-2.
[2] Future investment amount shown based on Table 3-4.
[3] Amount based on information provided by City Staff.
[4] Buildout population shown based on Table 2-1.
[5] Amounts shown based on average population and housing unit data as obtained from the American Community Survey for 2019-2015 from the U.S. Census Bureau.

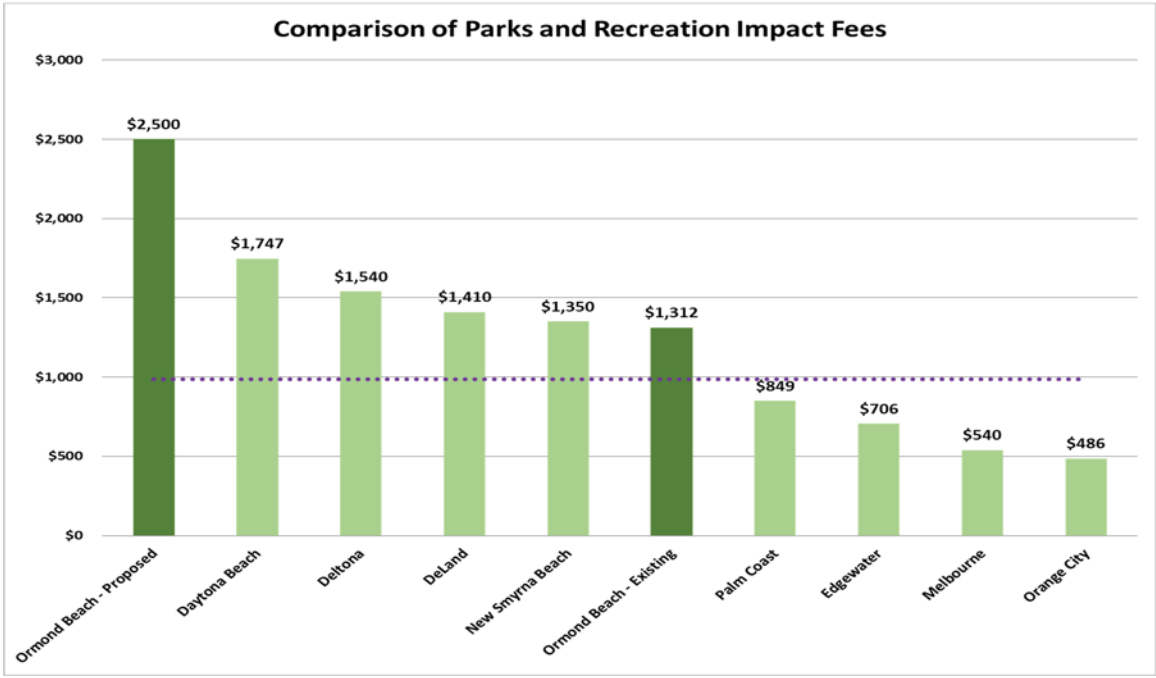
As shown above, the maximum supportable impact fees are $2,500.00, $2,021.00 and $1,658.00 per dwelling unit for single-family, multi-family, and mobile home, respectively. Each of these fees are being increased by a percentage between 90.5% and 111.01%. The recent update to Section 168.31801 F.S. added the following subsection, which provides certain limitations of how municipalities can increase impact fees:

(6) A local government, school district, or special district may increase an impact fee only as provided in this subsection.
(a) An impact fee may be increased only pursuant to a plan for the imposition, collection, and use of the increased impact fees which complies with this section.
(b) An increase to a current impact fee rate of not more than 25 percent of the current rate must be implemented in two equal annual increments beginning with the date on which the increased fee is adopted.
(c) An increase to a current impact fee rate which exceeds 25 percent but is not more than 50 percent of the current rate must be implemented in four equal installments beginning with the date the increased fee is adopted.
(d) An impact fee increase may not exceed 50 percent of the current impact fee rate.
(e) An impact fee may not be increased more than once every 4 years.
(f) An impact fee may not be increased retroactively for a previous or current fiscal or calendar year.

(g) A local government, school district, or special district may increase an impact fee rate beyond the phase-in limitations established under paragraph (b), paragraph (c), paragraph (d), or paragraph (e) by establishing the need for such increase in full compliance with the requirements of subsection (4), provided the following criteria are met:

1. A demonstrated need study justifying any increase in excess of those authorized in paragraph (b), paragraph (c), paragraph (d), or paragraph (e) has been completed within the 12 months before the adoption of the impact fee increase and expressly demonstrates the extraordinary circumstances necessitating the need to exceed the phase-in limitation.

2. The local government jurisdiction has held not less than two publicly noticed workshops dedicated to the extraordinary circumstances necessitating the need to exceed the phase-in limitations set forth in paragraph (b), paragraph (c), paragraph (d), or paragraph (e).



3. The impact fee increase ordinance is approved by at least a two-thirds vote of the governing body.

(h) This subsection operates retroactively to January 1, 2021.

With the maximum supportable impact fee being significantly higher than the City's current fees due to the current investment and future significant planned investment in the department as well as the projected new growth requiring future investment in recreation facilities to maintain its level of service, the City has decided to pursue a fee increase via the extraordinary circumstances provision of the statute.

Impact Fee Comparisons

In order to provide the City additional information about the proposed impact fees, a comparison of the proposed fees for the City and those charged by other jurisdictions was prepared. Table 3-6 at the end of this section summarizes the impact fees for recreational services charged by other communities with the proposed rates of the City. Please note that each community may establish a different LOS standard to meet its demographic needs for recreation facilities and activities. The City can anticipate variances between other communities.

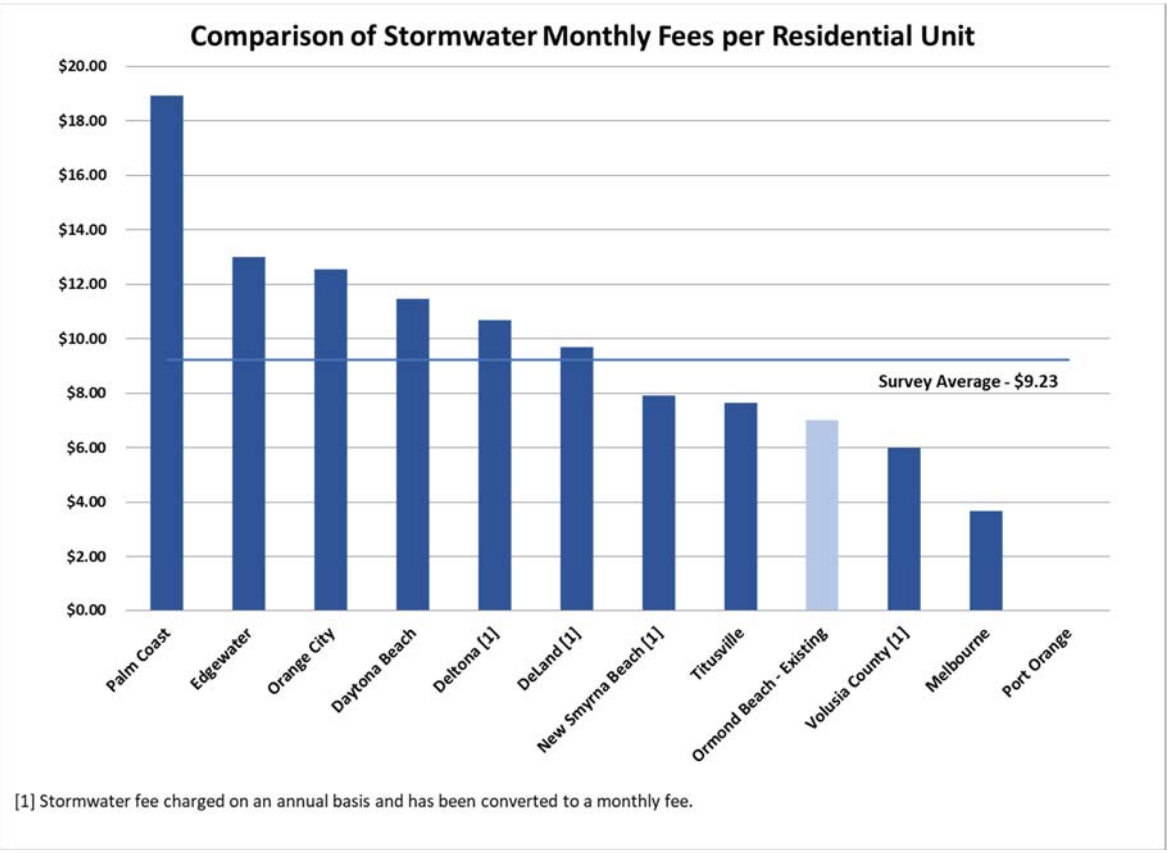
SECTION 4 – STORMWATER IMPACT FEE ANALYSIS

Background



The City maintains over 96 miles of drainage systems to mitigate flooding associated with stormwater runoff and has a street sweeping program to aid in drainage and reduce runoff contamination. The stormwater program is primary funded from user fees within a special revenue fund. The City also has a stormwater drainage impact fee fund for expansion of existing stormwater management facilities and construction of new stormwater management facilities. This section outlines our recommendation for the City to consider discontinuing the stormwater impact fee and focus on long term funding solutions through the existing monthly stormwater fee structure.

Stormwater Funding

The primary funding source used by Florida municipalities to address stormwater pollution and flooding is recurring stormwater utility fees with some communities using special assessments. The City has an established monthly stormwater fee of $7.00 per month per 3,000 feet of impervious area which generated annual stormwater fee revenue of $2,539,582 during FY 2020. This revenue is recurring and very stable since it is not dependent on the amount of development each year. The City also has a stormwater impact fee of $119.39 per single-family unit, during FY 2020 this impact fee generated $25,349. Impact fee revenues fluctuate from year to year and are subject to cumbersome administrative and legal requirements. It is generally difficult to identify growth related stormwater project costs since many projects are built to address existing needs and projected demands related to impacts from new development. The engineering analysis and other data needed to fulfill the current requirements of the Florida Impact Fee Act for stormwater impact fees may be complex and costly. We are also unaware of any other municipalities with stormwater impact fees in Florida. Most municipalities address their stormwater funding through a combination of recurring stormwater fees, grant funding, general tax revenue, and land development regulations.

(Remainder of page intentionally left blank)

A number of municipalities in Florida collect recurring stormwater fees. The following is a comparison of stormwater fees in nearby jurisdictions:

There is no comparison for stormwater impact fees included herein since we are unaware of any in the southeast United States.

Recommendation

Given the difficulties identified above with stormwater impact fees in Florida and as the City has an existing and reliable primary revenue source in its stormwater fee, we recommend the City consider discontinuing imposition of stormwater impact fees. Existing stormwater impact fee funds should be expended in accordance with the Code requirements. The City can focus on optimizing its existing stormwater fee structure to fund the stormwater program activities and infrastructure.

12	Average Fee	$10.15

[*] As of October 2021

SECTION 5 – TRANSPORTATION IMPACT FEE ANALYSIS

The City of Ormond Beach has two transportation impact fees – a local roads impact fee and a mobility fee. The Transportation Impact Fee is the fee that is applied to development and is used to increase the capacity of transportation infrastructure to support additional traffic that comes with new development. The Mobility Fee is used for specific corridors in the City which are considered capacity constrained, and thus the fee is used to increase the efficiency of the roadways and increase capacity for other modes (transit, pedestrian, bicycles) that would reduce the vehicular demand of the roadway.

Transportation fees can be calculated based off a finite set of developments / projects or based on the cost of each new trip on the roadway network. This impact fee update uses the second methodology and is thus not reliant on a specific development program or set of roadway projects.

Local Roads Impact Fee

REGIONAL MODEL UPDATES

The Central Florida Regional Planning Model (CFRPM), version 7.0, was used within this analysis. The currently approved CFRPM model was validated to account for current conditions within the City. Additionally, the developments listed in the City of Ormond Beach Commercial Development Report were reviewed, and those which added any residential development or at least 100,000 square feet of non-residential development were added to the appropriate transportation analysis zones (TAZs) in the model if they were not already reflected. The developments added to the regional model are shown in **Table 1**.

Table 1. New Development Added to Regional Model

Development Name	Residential Units (DU)	Non-Residential Area (SF)	TAZ
Perrott Depot	87	0	8431
Tymber Creek Apartments	300	0	8457
Ormond Central	0	286,000	8460
Shoppes at Granada Pointe	150	0	8461
Courtyards at Ormond	48	0	8483
Pineland – Phases IV & V	46	0	8486
The Cupola at Oceanside	12	0	8487
Plantation Oaks – Major Amendment, 2B, 2C, 2D	1,158	0	8523

DEMAND VARIABLES

The impact of new development on the roadway network, or demand for facility capacity, is defined and measured in terms of the number of estimated vehicle-miles-traveled for each unit of new development. The demand is calculated based on the following demand variables:

- Trip Generation by Land Use;
- Percentage of New Trips; and
- Average Trip Length / Assessed Trip Length

Trip Generation

Trip generation rates for the proposed local road impact fees and mobility fees are based on the ITE Trip Generation Manual, 11th Edition. Each of the land uses in the current ordinances were compared to similar land uses in the ITE Trip Generation Manual to determine the appropriate daily trip generation rate. When multiple land use codes in the Trip Generation Manual apply to the impact-fee land use, an average of the associated land uses were applied. Changes to the existing land uses are described below:

- **Single-family Residential:** The 11th Edition has added a "single-family attached" land use, which removes duplex / townhome uses (shared walls, but not shared floor/ceilings) from the multi-family land use. The single-family residential land use thus covers both attached and detached single-family homes.
- **Warehouse / Mini-Warehouse:** The mini-warehouse land use was combined with the warehouse land use. In the 11th Edition, the mini-warehouse has a daily trip generation rate (1.71), which is within the range of warehouse land uses (1.40-2.12) used to determine the trip generation rate.
- **Nursing Home:** The nursing home land use was switched from a per-thousand-square-feet calculation to a per-bed calculation to match available independent variables from the 11th Edition.
- **Commercial:** The commercial land use impact fee had been broken into categories based on the size of the development. The break points were updated to match the 11th Edition (<40 KSF, 40-150 KSF, >150 KSF).
- **CBD Sandwich Shop:** The CBD Sandwich Shop is a more specific land use than anything in the list, and thus was combined with restaurant.
- **Local Park:** The park land use was removed from the impact fee list, as municipal projects do not generally pay impact fees and trips are calculated by acre and not building square footages.
- **School / Church:** The school and church impact fees were broken into two separate categories. School impact fees will be calculated by number of students rather than building square footages.
- **Bank:** The 11th Edition does not include daily trip generation rates for the walk-in bank land use, and thus walk-in and drive-in bank were combined as a single land use.

A summary of the land uses and resulting trip generation rates is shown in Error! Reference source not found.

New Trip Percentage

Commercial and retail land uses generally attract a portion of their trips from vehicles already on the roadway network. Pass-by trips are defined as trips that are already exist on the roadway network visit the land use as part of a larger trip, rather the land use being the origin or destination. As pass-by trips are already on the roadway network, they are excluded from the calculation of rental fees, The new trip percentage is the percentage of those trips that are not impact fees. The ITE Trip Generation Handbook, 3rd Edition, was used to determine the pass-by rate, and by extension, the new trip percentage for each land use, as shown in Table 2.

Table 2. Daily Trip Generation Rates by Land Use					
Land Use (in Ordinance)	Unit	Impact Fee Rate	ITE Code	ITE Land Use	ITE Rate
Single-family	DU	8.32	210	Single-family Detached	9.43

Average Trip Length

The total average trip length for trips that start or end within the City of Ormond Beach was calculated using the 2045 CFRPM 7.0 regional model. The traffic analysis zones (TAZs) within the City were identified and used to conduct a select zone analysis, which extracts information on just the trips from those zones. The TAZs used to define the City of Ormond Beach are shown in **Figure 1**. Using the select zone analysis, there were a total of 312,315 trips that start or end (or both) within the City of Ormond Beach, with a total Vehicle Miles Traveled (VMT) of 3,070,798. The VMT was divided by the number of trips to calculate the average trip length as 9.83 miles.

(Remainder of page intentionally left blank)

Ormond Beach Impact Fee Analysis
CFRPM Version 7 | CF 2045
Figure 1
TAZs within the City of Ormond Beach

Assessed Trip Length

The City of Ormond Beach impact fees are calculated to address needed capacity improvements on City roadways, which are the City's responsibility. State and federal funds are available to pay for improvements on the interstate highways and Volusia County collects impact fees within the City of Ormond Beach that can be used to fund projects on County roadways within the City as well. Using the select zone analysis, the percentage of the VMT that occurs within the City of Ormond Beach on City roadways is 5.9%. The rest of the VMT occurs on County/State/Federal roadways which are not the responsibility of the City of Ormond Beach but are within the City limits (31.7%) or on any roadway outside the City limits (62.4% of the VMT). Excluding all county/state roadways and roadways outside of the City limits removes the need to calculate a separate reduction for the TCEA roadways (that are not included in the impact fee) or for the interstate facilities. Thus, the assessed trip length used in the proposed impact fees for the City of Ormond Beach is 5.9% of the 9.83 mile average trip length, or 0.58 miles.

Vehicle Occupancy

The average vehicle occupancy was determined using the Bureau of Transportation Statistics *Local Area Transportation Characteristics for Households* (LATCH) *Data*, which was based on data from the Federal Highway Administration 2017 National Household Travel Survey. The LATCH data provides estimated person trips and vehicular trips for each census tract. The average vehicular occupancy was determined by dividing the person trips by the vehicle trips, and results in an average of 1.49 persons per vehicle, as shown in **Error! Reference source not found.**.

Table 10: Vehicle Occupancy using LATCH Data

Census Tract	Person Trips	Vehicle Trips	Avg. Vehicle Occupancy
804	7.57	5.14	1.47
805	6.79	4.62	1.47
806	6.4	4.35	1.47
807	7.31	5.15	1.42
808.03	7.52	5.13	1.47
808.04	6.06	3.98	1.52
808.05	7.09	4.53	1.57
808.06	7.44	4.91	1.52
808.07	6.79	4.55	1.49
832.03	8.07	5.24	1.54
Total	**71.04**	**47.6**	**1.49**

COST VARIABLES

The City does not have any appropriate recent roadway project cost data; therefore recent comparable roadway projects in Volusia County constructed or programmed for construction in the next five (5) years by the County and the State were reviewed to develop a cost per lane-mile of capacity compared to the capacity of a lane-mile to determine the cost per vehicle-mile of travel. As the Ormond Beach impact fees can only be applied to capacity projects on local roadways, the projects analyzed were limited to roadways with no more than four (4) lanes.

Roadway Costs

Roadway costs were estimated from new roadway and roadway widening projects in the River to Sea Transportation Planning Organization Transportation Improvement Program and the Volusia County Capital Improvement Plan, which provided design, right-of-way, and construction costs for projects with funds committed between FY 2021/22 – FY 2025/26. There is one project in the Ormond Beach CIP that involves construction of a new roadway, the Doug Thomas Way Extension. However, the Doug Thomas Way Extension was not included in the calculation of roadway costs, as it is a driveway through the Ormond Beach Sports Complex. As shown in **4**, the average construction cost per lane mile is $4,073,885.

Table 4. Roadway Costs in TIP/CIP

Project	Description	Length	Total Project Cost	Cost per Lane Mile	Source
SR 40 – SR 15/US 17 to SR 11	2-4 Lane	6.376	$59,007,114	$4,627,283	River to Sea TIP
SR 40 – SR 11 to Cone Rd	2-4 Lane	7.64	$65,965,724	$4,317,129	River to Sea TIP
Beresford Ave – Blue Lake Ave to MLK Jr. Beltway	New 2 Lane	0.88	$3,709,304	$2,116,396	Volusia CIP
Blue Lake Extension – Blue Lake to SR 472	New 2 Lane	0.33	$3,395,594	$5,119,571	Volusia CIP
Howland Boulevard – Providence to Elkcam	2-4 Lane	2.17	$17,528,420	$4,038,806	Volusia CIP
Orange Camp Road – MLK Blvd to I-4	2-4 Lane	1.51	$12,760,375	$4,224,124	Volusia CIP
Williamson Blvd – Strickland Range Rd to Hand Ave	2-4 Lane	1.12	$8,198,000	$3,659,821	Volusia CIP
Average Cost per Lane Mile				***$4,073,885***	
Capacity Project Not Included (6-Lane Roadways)					
SR 600 (US 17) – I-4 EB to Tomoka Farms Rd	4-6 Lane	2.197	$45,900,000	$10,446,063	River to Sea TIP
SR 40 – Breakaway Tr to Williamson Blvd	4-6 Lane	2.46	$33,900,000	$6,890,244	River to Sea TIP

Average Capacity Improvement

The average capacity per lane mile for each project was calculated using roadway capacities from Table 1 in the Florida Department of Transportation Quality / Level-of-Service Handbook, as shown in **5**.

Table 5. Capacity from Roadway Projects

Project	Description	Length	Existing Capacity	Proposed Capacity	New Capacity Lane Miles
SR 40 - SR 15/US 17 to SR 11	2-4 Lane	6.38	17,700	39,800	140,910
SR 40 - SR 11 to Cone Rd	2-4 Lane	7.64	17,700	39,800	168,844
Beresford Ave - Blue Lake Ave to MLK Jr. Beltway	New 2 Lane	0.88	0	15,600	13,671
Blue Lake Extension - Blue Lake to SR 472	New 2 Lane	0.33	0	15,600	5,173
Howland Boulevard - Providence to Elkcam	2-4 Lane	2.17	15,600	33,800	39,494
Orange Camp Road - MLK Blvd to I-4	2-4 Lane	1.51	17,700	39,800	33,380
Williamson Blvd – Strickland Range Rd to Hand Ave	2-4 Lane	1.12	17,700	39,800	24,752
Total		**20.02**			**426,224**

Dividing the new capacity lane miles by twice the length of the improvements (to account for one lane in both directions), the average capacity per lane mile of construction is 10,643.

Non-motorized Costs

Bicycle and pedestrian trips make up a small portion of the total person-miles traveled within the City of Ormond Beach due to the relatively short nature of non-motorized trips. The infrastructure for bicycle and pedestrian trips is generally attached to the roadway in the form of bicycle lanes, sidewalks, or multi-use pathways that follow the road. A 12' multi-use path was included in the cost per mile for the two roadway projects on SR 40 and a sidewalk was included in the cost per mile for the Orange Camp Road widening project. As the costs for non-motorized improvements are included in the roadway costs when applicable, no additional non-motorized costs were added into the analysis.

Transit Costs

Votran is responsible for the expansion or operation of transit services within the City of Ormond Beach. As no dedicated bus facilities exist or are proposed within the City of Ormond Beach, transit services operate within the existing roadway right-of-way, and thus cost of infrastructure to support transit within the City is included within the costs to build and/or widen a road.

CREDITS

An analysis was completed to determine the current transportation funding sources for the City of Ormond Beach based on the FY 2020 – 2021 City of Ormond Beach Capital Improvement Plan. The City of Ormond Beach spends an average of $2,618,030 per year on roadway transportation improvements and/or maintenance and $3,081,330 per year on multimodal transportation improvements. A breakdown of transportation funding sources is shown in **6**.

Table 62. Transportation Revenue Sources

Funding Source	Annual Contribution
Roadway	
Local Option Gas Tax	$225,000
Property Taxes - Transportation	$572,109
River to Sea TPO Grant Funding	$1,441,161
Transportation Fund Balance	$379,760
TOTAL	***$2,618,030***
Multimodal	
Property Taxes - TIF	$429,975
River to Sea TPO Grant Funding	$33,325
TOTAL	***$463,300***
GRAND TOTAL	***$3,081,330***

The CIP currently has 12 transportation projects, as shown in **7**. Only one of the projects includes increasing roadway capacity (Doug Thomas Way Extension), which includes paving the current dirt driveway and extending the paved driveway through the Ormond Beach Sports Complex. As the property tax revenues that will be generated by new development within the City of Ormond Beach are needed to fund safety and maintenance projects, no ad valorem tax credit will be included in the proposed local roadway impact fees.

Table 7. CIP Transportation Projects				
		Funding Source		
Project Title	Project Type	Property Taxes	TPO Grant	Transportation Fund
Neighborhood Traffic Calming	Safety	X		X
Road Rehabilitation	Maintenance	X		X
Street Light Maintenance	Maintenance	X		
Traffic Signal Maintenance	Maintenance	X		
Sidewalk Repair & Replacement	Maintenance	X		
Doug Thomas Way Extension	New Road			X
Opticom Equipment	Maintenance	X		
Tomoka Elementary Connector Sidewalk	New Sidewalk	X	X	
Williamson/Hand Ave. Pedestrian Improv.	New Crosswalk		X	X
Pineland Trail Roadway Improvements	Reconstruct / Ped Improv.		X	X
Fluhart Drive Roundabouts	Safety		X	X
US 1 North Sidewalk	New Sidewalk		X	X

Gas Tax Credit

As additional funds are generated for transportation through the gas tax, the addition of new development is anticipated to increase the funding the City receives through the gas tax. As of June 2021, the cities within Volusia County agreed to a new formula for how much each city receives in gas tax revenue each year. Under the new formula, of the $0.11 per gallon the County collects in local option fuel & gas taxes, Volusia County receives 57.2% of the revenue, while the cities divide the remaining 42.8% share by a ratio of municipal lane miles each cities manages. The formula is being phased in during the first (5) years, as shown in **8**, at which point the formula will be recalculated based on the current number of municipal lane miles. The agreement is scheduled to be in effect until 2034. Based on the projected Ormond Beach Share in 2025/2026, it was assumed that Ormond Beach would receive $0.0045 per gallon in fuel taxes.

Table 8. Ormond Beach Share of Volusia County Fuel/Gas Taxes			
Year	Ormond Beach Percentage	Volusia County Fuel Taxes per Gallon	Ormond Beach Share
9/2021 – 8/2022	4.881%	$0.11	$0.0054
9/2022 – 8/2023	4.675%	$0.11	$0.0051
9/2023 – 8/2024	4.469%	$0.11	$0.0049
9/2024 – 8/2025	4.262%	$0.11	$0.0047
9/2025 – 8/2026	4.056%	$0.11	$0.0045

This credit is calculated assuming a 25-year facility life, 365 days a year operation, a 4.5% interest rate for municipal bonds (based on current Daytona Beach municipal bonds), and the average fuel efficiency of vehicles on the roadway system. The fuel efficiency of vehicles was set at 18.2 miles per gallon, based on the Federal Highway Administration Highway Statistics 2020, Table VM-1.

LOCAL ROAD IMPACT FEE CALCULATION

The local road impact fee was calculated based on the following formulas:

$$Total\ Impact\ Cost = \frac{(Daily\ Trips * Assessed\ Trip\ Length * \%\ New\ Trips)}{2} * \frac{Lane - Mile\ Cost}{Lane\ Mile\ Capacity}$$

$$Capital\ Improvement\ Credit = \frac{Daily\ Trips * Avg\ Trip\ Length * \%\ New\ Trips}{2} * 365 * \frac{Gas\ Tax}{Fuel\ Efficiency}$$

$$Impact\ Fee = Total\ Impact\ Cost - Capital\ Improvement\ Credit$$

The total impact cost uses the assessed trip length to limit the impact to just City-controlled facilities. However, the capital improvement credit uses the full trip length, as the gas tax collected by Volusia County is divided between the County and Cities, taking into account the proportion of trips within each City. The detailed calculations are shown in **Appendix A**. A summary of the existing local road impact fees and proposed local road impact fees by land use is shown in **Table 99**.

Table 9. Local Road Impact Fees by Land Use

Land Use	Unit	Proposed Fee	Current Fee
Single-family	DU	$864.59	$162.61
Multi-family	DU	$548.32	$162.61
Mobile/Manufactured Home	DU	$740.33	$162.61
Hotel/Motel	Rooms	$355.87	$114.85
General/Government Office	KSF	$1,709.28	$230.83
Medical Office	KSF	$3,434.79	$1,014.31
Hospital	KSF	$1,114.66	$212.64
Nursing Home	Beds	$268.79	n/a
Industrial	KSF	$450.23	$100.07
Warehouse	KSF	$176.56	$100.07
General Commercial (<40,000)	KSF	$3,736.72	$834.64
General Commercial (40,000-150,000)	KSF	$5,559.09	$802.81
General Commercial (<150,000)	KSF	$2,539.87	$602.67
Restaurant	KSF	$5,593.44	$881.26
General Recreation	KSF	$2,996.69	$59.13
Schools	Students	$226.79	n/a
Church	KSF	$790.25	$150.09
Day Care	KSF	$4,951.51	$329.27
Bank	KSF	$6,782.33	$1,355.44

With the maximum supportable impact fee being significantly higher than the City's current fees due to the cost of future investment as well as the projected new growth requiring future investment in additional infrastructure, the City has decided to pursue a fee increase via the extraordinary circumstances provision of the statute.

(Remainder of page intentionally left blank)

MOBILITY FEE

In 2013, the City of Ormond Beach introduced a mobility fee for selected corridors. From the Ormond Beach Multi-Modal Strategy report, dated December 7, 2010:

> *It was clear that the City, County, and State could no longer afford to continue widening roads within Ormond Beach without substantial cost both in terms of right-of-way and business damages. As such, staff indicated that a more balanced approach to the future transportation needs of Ormond Beach was needed. Less emphasis on roadway capacity improvements and increased emphasis on making existing roads more efficient while improvements to transit and non-motorized roads as well better intermodal connections and network connectivity was needed.*

Three roadways were selected as Transportation Concurrency Exception Areas (TCEAs) from Votran's Eastside spine network, and the roadways are considered constrained as it relates to capacity improvements. Thus, along S.R. 40 (A1A to Williamson), U.S. 1 (Wilmette Avenue to the southern city line), and A1A (S.R. 40 to the city line), proportionate share fair contributions are replaced with a mobility fee.

Per Ordinance No. 2013-02, the mobility fee for a project is determined by calculating the number of person trips generated by the development and multiplying the number of person trips by the mobility fee rate. By ordinance, person trips are calculated by multiplying the development intensity by the vehicular trip rate in the latest ITE Trip Generation Manual and the average vehicle occupancy. Starting with the 10th Edition ITE Trip Generation Manual, person trip rates for some land uses are available. It is recommended that the ordinance be updated to allow for use of the person trip rates as applicable and available and keep the current method of estimating person trips (using the average vehicle occupancy) for those land uses without a person-trip rate.

The mobility fee is calculated on a person-trip basis:

$$\frac{Total\ Impact\ Cost}{Person - Trip} = \frac{(Assessed\ Trip\ Length)}{2 * Vehicle\ Occupancy} * \frac{Lane - Mile\ Cost}{Lane\ Mile\ Capacity}$$

$$\frac{Total\ Impact\ Cost}{Person - Trip} = \frac{0.58}{2 * 1.47} * \frac{\$4{,}073{,}885}{9{,}381} = \$85.67$$

Based on the current improvement costs and local roadway data, the mobility fee is $85.67 per person-trip for a new development. With the maximum supportable impact fee being significantly higher than the City's current fee due to the cost of future investment as well as the projected new growth requiring future investment in additional infrastructure, the City has decided to pursue a fee increase via the extraordinary circumstances provision of the statute.

SECTION 6 – POLICE FACILITIES IMPACT FEE FEASIBILITY ANALYSIS

General

This section provides a discussion of our feasibility analysis with respect to the potential design and implementation of impact fees for police facilities and capital equipment. The feasibility evaluation summarized herein is based on i) a review of the availability of data required to calculate the fees; ii) the configuration of the department in terms of staffing and Level of Service (LOS) goals, existing and planned investment in assets to satisfy Florida legal requirements for impact fees criteria; iii) the potential estimated financial benefit to the City of adopting the fees; and iv) our recommendation as to whether or not the City should consider implementing this fee type.

Data Availability

As the first step in our feasibility analysis, we developed a comprehensive information request in support of an impact fee calculation analysis and provided it to the City in order to ascertain whether or not the City could provide the required supporting data that would be necessary to calculate proposed police impact fees. This detailed information request included, but was not limited to, detailed fixed asset records including all assets used and in service for the department, a detailed listing of all officers currently employed by the City including sworn, unsworn and support positions, the department's targeted Level of Service (LOS), planned capital expenditures, historical and planned capital grant funding, and historical response call data. After reviewing the detailed data provided by the City in response to these requests, we believe that the City does maintain and can provide the required supporting information required to develop the fees.

Department Configuration

LEVEL OF SERVICE AND DEPARTMENT STAFFING

In the evaluation of the capital facility needs for providing municipal services such as police protection, a level of service (LOS) standard should be developed. Level of service is an indication of the capacity per unit of demand for each public facility and capital equipment.

Based on information provided by the City's Police Department, there currently are 24.5 support positions and 73 sworn positions as shown on Table 6-1. These positions serve a total population of approximately 44,000 permanent residents as shown in Table 2-1. The current level of service provided by the department is 1.42 full-time sworn officers per 1,000 population served with a target LOS of 1.95 officers per 1,000 population served. However, based upon current staffing plans in the City's 2022 budget, there are plans to fund additional positions to reach a LOS of 1.75 officers per 1,000 population served. The City's currently level of service is comparable with police staffing guidelines as published by state and national law enforcement agencies as follows:

- The Federal Bureau of Investigation, U.S. Department of Justice, Uniform Crime Report that indicated an average achieved standard of 2.6 police officers and support personnel per 1,000 inhabitants for population areas in the southern United States.

- The Florida Department of Law Enforcement recognizes a state average of 2.36 officers per 1,000 population for police departments.

EXISTING INVESTMENT IN DEPARTMENT

As a part of our feasibility analysis, the original costs of the existing assets and any grant funding or contributions towards those assets were considered. This portion of the analysis was to ensure that there were significant capital assets that could be includable in a potential future fee calculation. The City's existing assets are categorized by major type and are summarized below.

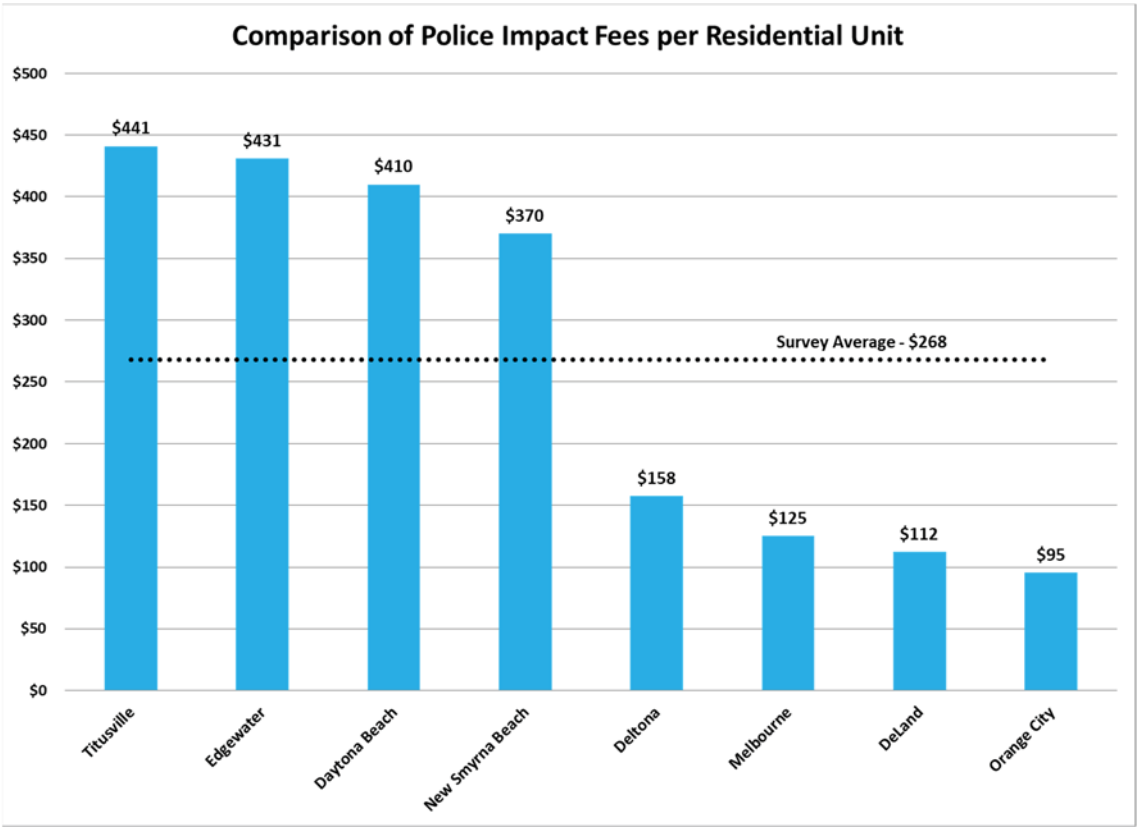
Existing City Investment in Police Assets	
Description	Original Cost
Machinery and Equipment	$241,609
Major Vehicles	2,735,613
Other Capital Equipment and Facilities	3,802,827
Subtotal	$6,780,049
Grant Funded Assets	($696,370)
Net Recoverable Costs	**$6,083,679**

[*] Amounts as shown on Table 6-2.

As shown above, of the $6.8 million in police assets, approximately 10% is has been funded from grants and other outside sources.

PLANNED FUTURE INVESTMENT IN DEPARTMENT

The following capital improvement requirements were provided by the City in support of the feasibility analysis. Along with the City's existing investment in police assets, these capital requirements are anticipated and designed to maintain the department's ability to provide service to the City's near term population level and fulfill the budgeted level of service standards. The City's capital requirements are categorized by type of expenditure and are summarized below.



Projected Future City Investment in Police Assets (Capital Plan through 2025)	
Description	Amount
Machinery and Equipment	$291,000
Major Vehicles	1,015,000
Other Capital Equipment and Facilities	718,000
Planned Future City Investments in Police Assets	$2,024,000

[*] Amounts as shown on Table 6-3.

As can be seen above, the City anticipates spending $2,024,000 in order to further develop and replace the police assets and facilities to provide the desired level of service to the City as it grows through 2025. To the extent these planned investments are replacement of existing facilities, vehicles, and equipment then these cannot be funded from impact fees.

Potential Financial Benefit

A survey of police impact fees for eleven (11) neighboring municipalities was prepared as a part of the feasibility analysis for the City. Below is a graph showing the results of the comparison for the eight (8) municipalities that were able to obtain police impact fee information on.

As can be seen in the above graph, the police impact fees for the surveyed municipalities averaged at approximately $268 per residential unit with the highest being the City of Titusville at $441 per residential unit and the lowest being the City of Orange City at $95 per residential unit.

In order to project the potential residential impact fees that could be collectible we have assumed a proposed fee of $250 (which would be slightly lower than the surveyed average of $268 per residential unit) applied to the projected growth forecast of approximately 3,000 units through 2040 as shown in Table 2-1. Based on these assumptions the project potential residential impact fee revenues collected could be as high as about $760,000 over that 19-year period of time. It should be noted that this estimate does not include the revenues potentially collectible from non-residential growth as said growth and the associated fees could vary greatly between non-residential property types and application methodologies. It should be noted that any actual fee calculated could differ materially from the assumed fee of $250 per residential unit based on usage of the City's data as opposed to an approximation from a survey.

(Remainder of page intentionally left blank)

Recommendation

It is our opinion that based on the City's ability to provide the necessary data required to support and calculate the fees, the configuration of the department (in terms of staffing, LOS, and significant existing and planned investment), and the potential benefit to the City as well as discussions our team has had with the City's Planning, Finance, and Police Departments that the City should consider developing and implementing police impact fees. It should be noted that further analysis and effort would be required to calculate the fees and ensure that such fees are cost justified based on recent and local data to ensure that the fees charged match the benefit provided to new development.

SECTION 7 – FIRE PROTECTION FACILITIES IMPACT FEE FEASIBILITY ANALYSIS

General

This section provides a discussion of our feasibility analysis with respect to the potential design and implementation of impact fees for fire protection facilities and capital equipment. The feasibility evaluation summarized herein is based on i) a review of the availability of data required to calculate the fees; ii) the configuration of the department in terms of staffing and Level of Service (LOS) goals, existing and planned investment in assets to satisfy Florida legal requirements for impact fees criteria; iii) the potential estimated financial benefit to the City of adopting the fees; and iv) our recommendation as to whether or not the City should consider implementing this fee type.

Data Availability

As the first step in our feasibility analysis, we developed a comprehensive information request in support of an impact fee calculation analysis and provided it to the City in order to ascertain whether or not the City could provide the required supporting data that would be necessary to calculate proposed police impact fees. This detailed information request included, but was not limited to, detailed fixed asset records including all assets used and in service for the department, a detailed listing of all fire personnel currently employed by the City, the department's targeted Level of Service (LOS), planned capital expenditures, historical and planned capital grant funding, and historical response call data. After reviewing the detailed data provided by the City in response to these requests, we believe that the City does maintain and can provide the required supporting information required to develop the fees.

Department Configuration

LEVEL OF SERVICE AND DEPARTMENT STAFFING

In the evaluation of the capital facility needs for providing municipal services such as fire protection, a level of service (LOS) standard should be developed. Level of service is an indication of the capacity per unit of demand for each public facility and capital equipment.

There is currently no formally adopted level of service for the City's fire protection services; however, it is the City's intent to maintain staffing levels that provide services to all developed areas in order to be able to respond to service calls within a specified time period to maintain the City's Insurance Service Organization (ISO) property insurance rating of 3/3X in the community. As a practical matter, this response time standard (four minutes with a one-minute turnout or less) is based upon recognized industry standards not only having to do with property protection, but also in providing Emergency Medical Support services (EMS). In each case, it is necessary to reach property and residents of the City within the response time standard to maximize the effectiveness of fire suppression activities and/or emergency medical care. In discussions with City staff, it was determined that the existing staffing levels of the City are able to provide adequate fire rescue services for the existing and future daily average population of the City.

(Remainder of page intentionally left blank)

Presently, the City has 48 full-time primary personnel budgeted for 2022 as shown on Table 7-1 and below.

Primary Personnel	Summary of Existing Personnel
Fire Chief	1.0
Deputy Fire Chief	1.0
Fire Battalion Commander	3.0
Captain	12.0
Driver Engineer	12.0
Firefighters	18.0
Office Manager (Support)	1.0
Total Current Full-Time Personnel	**48.0**

Based on the primary personnel listed above the level of service in terms of the number of direct fire personnel per 1,000 residents is about 1.07.

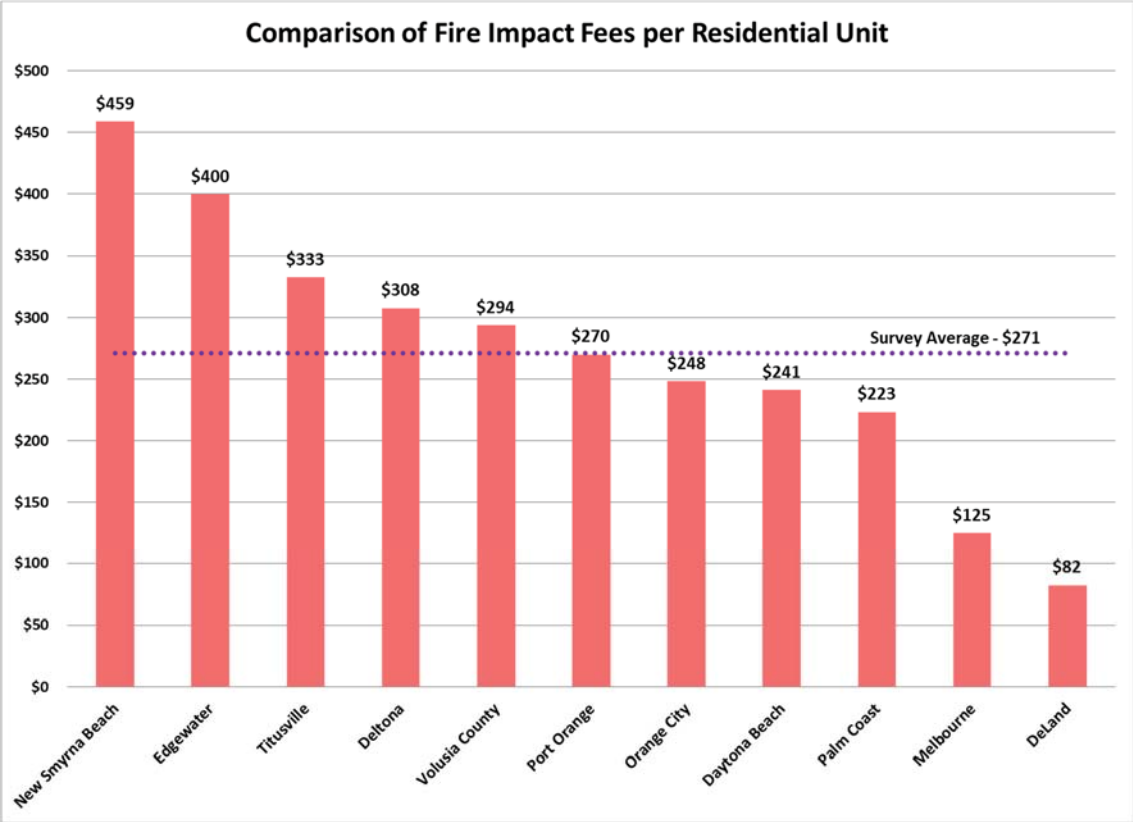
EXISTING INVESTMENT IN DEPARTMENT

As a part of our feasibility analysis, the original costs of the existing assets and any grant funding or contributions towards those assets were considered. This portion of the analysis was to ensure that there were significant capital assets that could be includable in a potential future fee calculation. The City's existing assets are categorized by major type and are summarized below.

Existing City Investment in Fire Assets	
Description	Original Cost
Machinery and Equipment	$656,223
Major Vehicles	2,402,548
Other Capital Equipment and Facilities	5,076,563
Subtotal	$8,213,671
Grant Funded Assets	($78,337)
Net Recoverable Costs	**$8,135,334**

[*] Amounts as shown on Table 7-2.

As shown above, of the $8.1 million in police assets, approximately 1% is has been funded from grants and other outside sources.



PLANNED FUTURE INVESTMENT IN DEPARTMENT

The following capital improvement requirements were provided by the City in support of the feasibility analysis. Along with the City's existing investment in fire assets, the City has certain planned capital expenditures which are anticipated and designed to maintain the department's ability to provide service to the City's near term population level and fulfill the budgeted level of service standards. The City anticipates spending over $1.8 million related to vehicle and apparatus replacements in addition to other capital expenditures to further develop the fire assets and facilities to provide the desired level of service to the City as it grows through 2025. These other capital expenditures

are not fully known at this time and are dependent on how growth occurs in the City and will be developed in the future by the fire department as needed.

Potential Financial Benefit

A survey of fire impact fees for eleven (11) neighboring municipalities was prepared as a part of the feasibility analysis for the City. Below is a graph showing the results of the comparison for the eleven (11) municipalities that were able to obtain fire impact fee information on.

As can be seen in the above graph, the fire impact fees for the surveyed municipalities averaged at approximately $271 per residential unit with the highest being the City of New Smyrna Beach at $459 per residential unit and the lowest being the City of Deland at $82 per residential unit.

In order to project the potential residential impact fees that could be collectible we have assumed a proposed fee of $250 (which would be slightly lower than the surveyed average of $271 per residential unit) applied to the projected growth forecast of approximately 3,000 units through 2040 as shown in Table 2-1. Based on these assumptions the project potential residential impact fee revenues collected could be as high as about $760,000 over that 19-year period of time. It should be noted that this estimate does not include the revenues potentially collectible from non-residential growth as said growth and the associated fees could vary greatly between non-residential property types and application methodologies. It should be noted that any actual fee calculated could differ materially from the assumed fee of $250 per residential unit based on usage of the City's data as opposed to an approximation from a survey.

Recommendation

It is our opinion that based on the City's ability to provide the necessary data required to support and calculate the fees, the configuration of the department (in terms of staffing, LOS, and significant existing and planned investment), and the potential benefit to the City as well as discussions our team has had with the City's Planning, Finance, and Fire Departments that the City should consider developing and implementing fire impact fees. It should be noted that further analysis and effort would be required to calculate the fees and ensure that such fees are cost justified based on recent and local data to ensure that the fees charged match the benefit provided to new development.

COUNTY ORGANIZATION AND INTERGOVERNMENTAL RELATIONS

Chapter 163
INTERGOVERNMENTAL PROGRAMS

View Entire Chapter

163.31801 Impact fees; short title; intent; minimum requirements; audits; challenges.—

(1) This section may be cited as the "Florida Impact Fee Act."

(2) The Legislature finds that impact fees are an important source of revenue for a local government to use in funding the infrastructure necessitated by new growth. The Legislature further finds that impact fees are an outgrowth of the home rule power of a local government to provide certain services within its jurisdiction. Due to the growth of impact fee collections and local governments' reliance on impact fees, it is the intent of the Legislature to ensure that, when a county or municipality adopts an impact fee by ordinance or a special district adopts an impact fee by resolution, the governing authority complies with this section.

(3) For purposes of this section, the term:

(a) "Infrastructure" means a fixed capital expenditure or fixed capital outlay, excluding the cost of repairs or maintenance, associated with the construction, reconstruction, or improvement of public facilities that have a life expectancy of at least 5 years; related land acquisition, land improvement, design, engineering, and permitting costs; and other related construction costs required to bring the public facility into service. The term also includes a fire department vehicle, an emergency medical service vehicle, a sheriff's office vehicle, a police department vehicle, a school bus as defined in s. 1006.25, and the equipment necessary to outfit the vehicle or bus for its official use. For independent special fire control districts, the term includes new facilities as defined in s. 191.009(4).

(b) "Public facilities" has the same meaning as in s. 163.3164 and includes emergency medical, fire, and law enforcement facilities.

(4) At a minimum, each local government that adopts and collects an impact fee by ordinance and each special district that adopts, collects, and administers an impact fee by resolution must:

(a) Ensure that the calculation of the impact fee is based on the most recent and localized data.

(b) Provide for accounting and reporting of impact fee collections and expenditures and account for the revenues and expenditures of such impact fee in a separate accounting fund.

(c) Limit administrative charges for the collection of impact fees to actual costs.

(d) Provide notice at least 90 days before the effective date of an ordinance or resolution imposing a new or increased impact fee. A local government is not required to wait 90 days to decrease, suspend, or eliminate an impact fee. Unless the result is to reduce the total mitigation costs or impact fees imposed on an applicant, new or increased impact fees may not apply to current or pending permit applications submitted before the effective date of a new or increased impact fee.

(e) Ensure that collection of the impact fee may not be required to occur earlier than the date of issuance of the building permit for the property that is subject to the fee.

(f) Ensure that the impact fee is proportional and reasonably connected to, or has a rational nexus with, the need for additional capital facilities and the increased impact generated by the new residential or commercial construction.

(g) Ensure that the impact fee is proportional and reasonably connected to, or has a rational nexus with, the expenditures of the funds collected and the benefits accruing to the new residential or nonresidential

construction.

(h) Specifically earmark funds collected under the impact fee for use in acquiring, constructing, or improving capital facilities to benefit new users.

(i) Ensure that revenues generated by the impact fee are not used, in whole or in part, to pay existing debt or for previously approved projects unless the expenditure is reasonably connected to, or has a rational nexus with, the increased impact generated by the new residential or nonresidential construction.

(5)(a) Notwithstanding any charter provision, comprehensive plan policy, ordinance, development order, development permit, or resolution, the local government or special district must credit against the collection of the impact fee any contribution, whether identified in a proportionate share agreement or other form of exaction, related to public facilities or infrastructure, including land dedication, site planning and design, or construction. Any contribution must be applied on a dollar-for-dollar basis at fair market value to reduce any impact fee collected for the general category or class of public facilities or infrastructure for which the contribution was made.

(b) If a local government or special district does not charge and collect an impact fee for the general category or class of public facilities or infrastructure contributed, a credit may not be applied under paragraph (a).

(6) A local government, school district, or special district may increase an impact fee only as provided in this subsection.

(a) An impact fee may be increased only pursuant to a plan for the imposition, collection, and use of the increased impact fees which complies with this section.

(b) An increase to a current impact fee rate of not more than 25 percent of the current rate must be implemented in two equal annual increments beginning with the date on which the increased fee is adopted.

(c) An increase to a current impact fee rate which exceeds 25 percent but is not more than 50 percent of the current rate must be implemented in four equal installments beginning with the date the increased fee is adopted.

(d) An impact fee increase may not exceed 50 percent of the current impact fee rate.

(e) An impact fee may not be increased more than once every 4 years.

(f) An impact fee may not be increased retroactively for a previous or current fiscal or calendar year.

(g) A local government, school district, or special district may increase an impact fee rate beyond the phase-in limitations established under paragraph (b), paragraph (c), paragraph (d), or paragraph (e) by establishing the need for such increase in full compliance with the requirements of subsection (4), provided the following criteria are met:

1. A demonstrated-need study justifying any increase in excess of those authorized in paragraph (b), paragraph (c), paragraph (d), or paragraph (e) has been completed within the 12 months before the adoption of the impact fee increase and expressly demonstrates the extraordinary circumstances necessitating the need to exceed the phase-in limitations.

2. The local government jurisdiction has held not less than two publicly noticed workshops dedicated to the extraordinary circumstances necessitating the need to exceed the phase-in limitations set forth in paragraph (b), paragraph (c), paragraph (d), or paragraph (e).

3. The impact fee increase ordinance is approved by at least a two-thirds vote of the governing body.

(h) This subsection operates retroactively to January 1, 2021.

(7) If an impact fee is increased, the holder of any impact fee credits, whether such credits are granted under s. 163.3180, s. 380.06, or otherwise, which were in existence before the increase, is entitled to the full benefit of the intensity or density prepaid by the credit balance as of the date it was first established.

(8) A local government, school district, or special district must submit with its annual financial report required under s. 218.32 or its financial audit report required under s. 218.39 a separate affidavit signed by its chief financial officer or, if there is no chief financial officer, its executive officer attesting, to the best of his or her knowledge, that all impact fees were collected and expended by the local government, school district, or special district, or were collected and expended on its behalf, in full compliance with the spending period provision in the local ordinance or resolution, and that funds expended from each impact fee account were used only to acquire, construct, or improve specific infrastructure needs.

(9) In any action challenging an impact fee or the government's failure to provide required dollar-for-dollar credits for the payment of impact fees as provided in s. 163.3180(6)(h)2.b., the government has the burden of proving by a preponderance of the evidence that the imposition or amount of the fee or credit meets the requirements of state legal precedent and this section. The court may not use a deferential standard for the benefit of the government.

(10) Impact fee credits are assignable and transferable at any time after establishment from one development or parcel to any other that is within the same impact fee zone or impact fee district or that is within an adjoining impact fee zone or impact fee district within the same local government jurisdiction and which receives benefits from the improvement or contribution that generated the credits. This subsection applies to all impact fee credits regardless of whether the credits were established before or after June 4, 2021.

(11) A county, municipality, or special district may provide an exception or waiver for an impact fee for the development or construction of housing that is affordable, as defined in s. 420.9071. If a county, municipality, or special district provides such an exception or waiver, it is not required to use any revenues to offset the impact.

(12) This section does not apply to water and sewer connection fees.

(13) In addition to the items that must be reported in the annual financial reports under s. 218.32, a local government, school district, or special district must report all of the following information on all impact fees charged:

(a) The specific purpose of the impact fee, including the specific infrastructure needs to be met, including, but not limited to, transportation, parks, water, sewer, and schools.

(b) The impact fee schedule policy describing the method of calculating impact fees, such as flat fees, tiered scales based on number of bedrooms, or tiered scales based on square footage.

(c) The amount assessed for each purpose and for each type of dwelling.

(d) The total amount of impact fees charged by type of dwelling.

(e) Each exception and waiver provided for construction or development of housing that is affordable.

History.—s. 9, ch. 2006-218; s. 1, ch. 2009-49; s. 5, ch. 2009-96; s. 5, ch. 2011-14; s. 1, ch. 2011-149; s. 1, ch. 2019-106; s. 5, ch. 2019-165; s. 5, ch. 2020-27; s. 1, ch. 2020-58; ss. 1, 2, ch. 2021-63.

CITY OF

Ormond Beach

Police & Fire Impact Fees Study

March 29th, 2023

RAFTELIS

RAFTELIS

March 29, 2023

Honorable Mayor and
Members of the City Commission
City of Ormond Beach
22 South Beach Street
Ormond Beach, FL 32174

Subject: **Police and Fire Impact Fees Study**

Ladies and Gentlemen:

We have completed our study of the police and fire impact fees for the City of Ormond Beach (City) and have summarized the results of our analysis, assumptions, and conclusions in this report, which is submitted for your consideration. This report summarizes both the basis for the proposed impact fees in order to provide funds to meet the City's capital expenditure requirements for such services allocable to growth as well as basis for the recommendation regarding potential implementation of police and fire impact fees.

During the course of the study, it was determined that the proposed impact fees should meet a number of goals and objectives. These goals and objectives primarily deal with fee sufficiency and level. Specifically, the major objectives considered in this study include:

- The Impact Fees should be sufficient to fund the projected capital requirements associated with providing service to new growth and development;
- The Impact Fees should not be used to fund deficiencies in capital needs of the City, if any; and
- The Impact Fees should be based upon reasonable level of service standards which meet the needs of the City and are similar to industry standards.

The proposed police and fire impact fees presented in this report should meet the above objectives, as identified by the City during this study. As such, based on information provided by the City and the assumptions and considerations reflected in this report, Raftelis Financial Consultants, Inc. (Raftelis) considers the proposed fees to be cost-based, reasonable, and representative of the funding requirements of the City.

(Remainder of page intentionally left blank)

We appreciate the cooperation and assistance given to us by the City and its staff in the completion of the study.

Sincerely,

RAFTELIS FINANCIAL CONSULTANTS, INC.

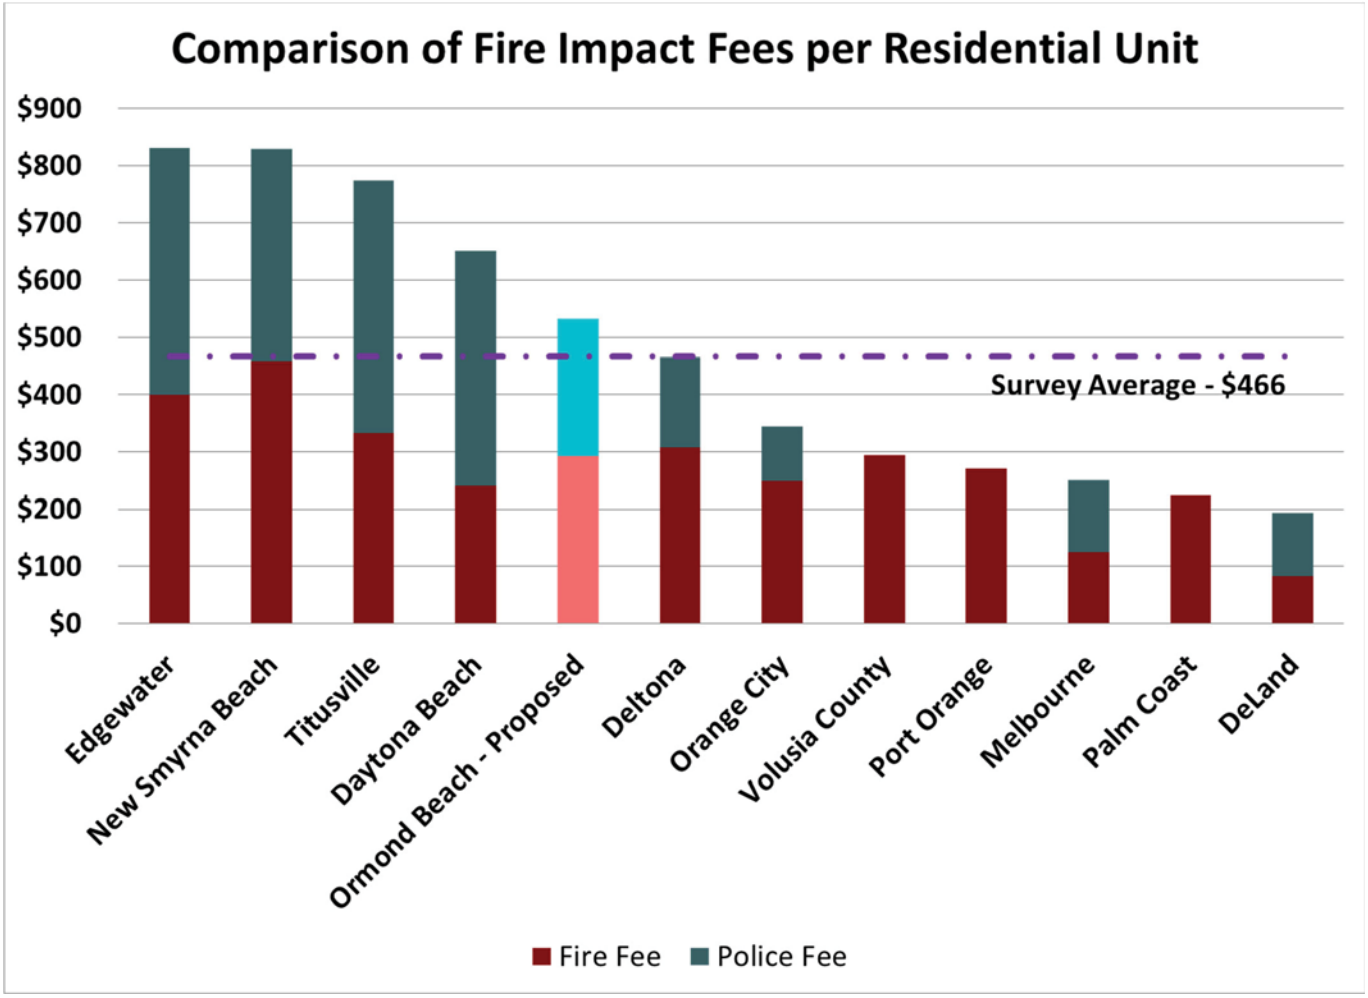
EXECUTIVE SUMMARY AND RECOMMENDATIONS

Executive Summary

The purpose of an impact fee is to assign, to the extent practical, growth-related capital costs to new development responsible for such costs. To the extent new population growth and associated development imposes identifiable capital costs to municipal services, equity and modern capital funding practices suggest the assignment of such cost to those residents or system users responsible for such costs. The City of Ormond Beach (City) has recognized this capital funding strategy as being an appropriate method of funding the certain future capital requirements of the City and has decided to pursue these fees for first time implementation.



This report addresses the proposed impact fees associated with police and fire protection facilities. As a part of the Municipal Impact Fee Study, Raftelis conducted a feasibility analysis in order to determine if the City should consider implementing police and fire impact fees. It was found that the City had ability and justification to charge police and fire impact fees.

Based on the subsequent discussions in this section, the following table summarizes the City's proposed impact fees for the single-family residential classification as follows:

Single-family Residential Impact Fees	
	Proposed Fess
Police	$240.00
Fire	292.00
Total	**$532.00**

(Remainder of page intentionally left blank)

A comparison of the City's proposed single-family residential police and fire impact fees levels to other local municipalities is shown below for informational purposes.

As shown above, the City's calculated impact fees are comparable to the impact fees charged other Florida communities surveyed.

The proposed fee shown above for police and fire will also be charged to non-residential properties. The non-residential fees are unique to the capital facilities required to provide service to the various types of developed property. A detailed discussion on impact fees for both residential and non-residential properties is provided for in subsequent sections of this study report.

Findings and Recommendations

The following is a summary of the observations and recommendations following our investigation, analyses, and preparation of this report:

1. The impact fees must be reasonably related to the cost of providing capital facilities / equipment needed to accommodate new growth. The impact fees collected must be used by the City to address the capital costs

related to serving new development. Based on the information made available by the City, the proposed impact fees are designed to meet these Florida requirements.

2. Pursuant to Florida Statutes Section 163.31801, the City must provide notice no less than 90 days before the effective date of an ordinance or resolution imposing a new or increased impact fee.

3. Collection of the fee may not be required before the issuance of the building permit.

4. In compliance with Florida Statutes the City should collect and maintain revenue from each type of municipal fee in designated sub-accounts and use such fees on those facilities designated for each purpose.

5. The City should adopt the impact fees as proposed to ensure adequate funding sources are available to fund future service expansion projects needed to provide the identified level of service to new growth.

6. The fees developed within this report reflect recovery of identified costs and the City has discretion to phase-in or otherwise adopt less than the fully calculated fees. However, the adoption of fees less than the fully calculated rates should be applied to all land uses equally in order to maintain the calculations herein in correct proportion. Adopting less than the calculated rates would increase the reliance on general fund and other revenue sources to meet the demands of growth.

The subsequent sections of this report provide detailed discussions on the proposed impact fees for police and fire facilities.

(Remainder of page intentionally left blank)

SECTION 1 – INTRODUCTION

Introduction

The City of Ormond Beach (City) is located in Volusia County (County) north of Daytona Beach and south of Palm Coast. The City comprises 38.91 square miles and provides an array of services to year-round and seasonal residents. Based on the published U.S. Census in 2020, the City's permanent population was 43,080. Based on the University of Florida's Bureau of Economic Business Research (BEBR), the 2022 population was estimated at 44,677. It is anticipated that the City will have modest growth over the next 20 years with the City's population projected to reach 50,630 with approximately 21,730 housing units by 2040 (Forecast Period). In addition to housing, the City anticipates commercial development to continue to support new residents. In order to meet this anticipated growth and development and to maintain current levels of service, the City will need to fund capital improvements to serve such development.

The City does not currently charge police or fire impact fees. As a part of the 2022 Municipal Impact Fee Study, a fee feasibility analysis was conducted to determine whether the City could potentially charge police and fire impact fees. As a result of the feasibility analysis, it was found that both the police and fire departments are generally configured in a manner that would support the charging of fees and that both departments can provide the necessary data to develop and support proposed fees. Therefore, the City authorized Raftelis to develop proposed impact fees for police and fire facilities.

Authorization

Raftelis was authorized by the City to develop police and fire impact fees pursuant to an agreement between the City and Raftelis. The scope of work for this project, as defined in the agreement, was to:

1. For each service, review and analyze the capital requirements of the City that are needed to meet the level of service standards for the municipal function. This analysis includes a review of: i) the existing and future facility and equipment inventory of each specific municipal function; ii) service area population and development demographics and future needs; and iii) services provided by class of customers.

2. Where appropriate, develop a fee to be charged to new development in order to recover the capital costs associated with providing municipal services. This analysis includes the apportionment of costs among customer / development classifications, and the development of the fee per equivalent billing unit.

3. Develop a comparison of the impact fees and associated billing attributes for similar charges imposed by other neighboring jurisdictions.

4. Prepare a report that documents our analyses, assumptions, and conclusions for consideration by the City Manager and City Commission.

Criteria for Impact Fees

The purpose of an impact fee is to assign, to the extent practical, growth-related capital costs to those new customers that benefit from the facilities funded by such expenditures. To the extent new population growth and associated development imposes identifiable capital costs to municipal services, equity and modern capital funding practices

suggest the assignment of such costs to those residents or system users responsible for such costs rather than the existing population base. Generally, this practice has been labeled as "growth paying its own way".

Historically, impact fees in Florida were a result of home rule powers with the requirements associated with the development, administration, accounting and expenditure governed by case law. However, Section 163.31801 of the Florida Statutes, known as the "Florida Impact Fee Act", was created on June 14, 2006, which placed specific requirements and limitations on that home rule authority. This statue has been amended several times since its initial adoption, including significant additional provisions in 2021 such as limiting the percentage increase for a change in impact fees. Appendix A at the end of the report includes the full Florida impact fee statute.

The statute provides specific impact fee criteria, certain precedents established by case law also constitute the legal requirements associated with impact fees. Some of the major criteria includes the following:

1. The impact fee should be reasonably equitable to all parties; that is, the amount of the fee must bear a relationship to the amount of services requested;

2. The impact fee should, to the extent practical, only cover the capital cost of construction and related costs thereto (engineering, legal, financing, administrative, etc.) for increases in or expansions of capacity or capital requirements that are required solely due to growth. Therefore, expenses due to normal renewal and replacement of a facility (e.g., replacement of a capital asset) should be borne by all users of the facility or municipality. Similarly, increased expenses due to operation and maintenance of that facility should be borne by all users of the facility; and

3. The local government must adopt a ordinance that explicitly sets forth restrictions on revenues (uses thereof) that the imposition of the impact fee generates. Therefore, the funds collected from the impact fees should be retained in a separate account, and separate accounting must be made for those funds to ensure that they are used only for the lawful purposes described.

Based on the criteria provided above, the impact fees herein will: 1) include local current costs of improvements associated with the capacities needed to serve new growth; 2) not reflect costs of improvements associated with the renewal and replacement (R&R) of existing capital assets or deficiencies in level of service attributed to existing development; and 3) not include any costs of operation and maintenance of the capital improvements and equipment.

This section provides only a general background regarding impact fees. Certain circumstances and issues regarding the interpretation of specific statutes or case law should be addressed by qualified legal counsel.

Impact Fee Methods

There are several different methods for the calculation of an impact fee. The calculation is dependent on the type of fee being calculated (e.g., recreational facilities, transportation, etc.), cost and engineering data available, and the availability of other local data such as household and population projections, current levels of service, and other related items. The proposed police and fire impact fees reflected in this report are predominately based on a combination of two (2) separate methods. These two (2) methods were: i) the improvements-driven method; and ii) the buy-in or recoupment approach. These methods have been utilized in the development of impact fees for local governments throughout Florida.

The improvements-driven method is an approach that utilizes a specific list of existing or planned capital improvements over a period of time. For example, the fee may correspond to the level of capital improvements that have been identified in the capital improvements element of the Comprehensive Plan or capital improvement budget of the entity. The buy-in or recoupment method is based on this historical cost of assets, and adjustments to the basis of these assets, currently in service and the current population. The primary difference between the two (2) methodologies is how the capital costs, which must be recovered from the application of the fee, are calculated.

The proposed impact fees herein for police and fire include the application of these methods based on the capital facilities required to provide services and meet the City's service level standards. Where appropriate, the blending of methods occurred, and a more complete discussion of the methods used for the determination of the impact fees are presented in Sections 3 and 4.

Summary of Report

In addition to Section 1, this report has been subdivided into three (3) other sections. The following is a brief discussion of the remaining sections included in this report.

Section 2 – City Demographics. This section of the report provides a general discussion of the residential land use characteristics. Also presented in this section is the forecast of the residential dwelling units and the derivation of the functional population factors used in the development of residential and nonresidential fees.

Section 3 – Police Facilities Impact Fee. This section discusses the development of the proposed impact fee for police facilities, including the capital requirements associated with providing police services, the methodology for the determination of the proposed fee, assumptions utilized in the design of the fees, and other factors associated with the fee determination.

Section 4 – Fire Protection Facilities Impact Fee. This section discusses the development of the proposed impact fee for fire protection facilities, including the capital requirements associated with providing fire and rescue services, the methodology for the determination of the proposed fees, assumptions utilized in the design of the fees, and other factors associated with the fee determination.

(Remainder of page intentionally left blank)

SECTION 2 – CITY DEMOGRAPHICS

General

This section provides a general discussion of the current service area, including population and housing statistics and other demographic information related to land use. Additionally, a discussion of the anticipated growth in population and associated growth in residential dwelling units is also contained in this section.

Population and Development Forecast

Regardless of the approach taken to formulate impact fees, a forecast of the population of the City is needed in order to: i) have an appropriate planning horizon to ensure that capital improvement needs and costs are apportioned over a suitable growth segment; ii) link LOS requirements to the capital facility plan; and iii) identify any deficiencies in existing capital facilities related to the LOS standards and current population served.

As shown in Table 2-1 at the end of this section, the City's total estimated population is 44,677 in 2022. Based on information provided by the City, it is estimated that the total population will approach approximately 45,829 residents by 2025 and 50,630 residents by the year 2040. Thus, the population growth anticipated by the City is expected to be moderate, approximately 1.00% on an average annual basis through the year 2030 and then conservatively by 0.50% percent through the year 2040.

Historical and Projected Population and Dwelling Units			
Year	Total Population	Total Dwelling Units	Average Persons per Occupied Dwelling Unit
2020 [1]	43,080	18,489	2.33
2021	44,041	18,902	2.33
2022	44,677	19,175	2.33
2025	45,829	19,669	2.33
2030	48,167	20,673	2.33
2040	50,630	21,730	2.33

[1] Future population estimates shown based on a review of historical population growth as obtained from the U.S. Census Bureau, from projections from the University of Florida's Florida Housing Data Clearinghouse, and discussions with City staff.

To the extent the projection of future development materially changes, it would then be appropriate for the City to re-evaluate the impact fees developed in this report.

(Remainder of page intentionally left blank)

Functional Population Allocation

In order to develop police and fire impact fees by land use, the capital costs need to be apportioned between residential and non-residential properties. The apportionment is accomplished through a functional population allocation method.

The use of functional population[1] to develop more equitable impact fees has widely been used in Florida since the 1980s and remains a vital tool in estimating service demands between customer classes. Specifically, this methodology is applied to apportion capital costs associated with public facilities, police protection, fire rescue, and other municipal services allocable to the non-residential classes.

The concept of functional population is incorporated in order to spread capital costs more equitably between residential and non-residential land-uses. Businesses place demands upon public infrastructure in the same manner as residents do, and it is equitable to spread these costs based on the average number of people expected to be present. For residential use, the allocation is calculated per resident based on the average amount of time spent at the residence. The resident's remaining time is then allocated as either an employee and/or visitor to the remaining non-residential classes as determined using traffic generations, employees staffed, and anticipated operations. The net result is the total number of person hours per location.

Table 2-2 provides the details used to estimate the functional population coefficients. The functional population results were used to calculate police and fire impact fees as provided in Sections 3 and 4 of this report.

Percent of Total Hours at Residence	0.6258

SECTION 3 – POLICE FACILITIES IMPACT FEE

General

This section provides a discussion of the development and design of the impact fee for police capital facilities. Included is a discussion of the level of service requirements, capital costs included in the fee determination, and the design of the impact fee for police facilities to be applied to new growth within the City.

Level of Service and Department Staffing

In the evaluation of the capital facility needs for providing municipal facilities such as police protection, a level of service (LOS) standard should be developed. As shown on Table 3-1, the City currently staffs 94.0 full-time equivalent (FTE) positions, including 74.0 sworn officers and 20.0 administrative / support staff. Using the 2022 population of 44,677, the police department currently provides a LOS of 1.66 sworn officers per 1,000 population.

Existing Investment in Department

In the development of the fee, the original costs of the existing assets and any grant funding or contributions towards those assets were considered. The City's existing assets are categorized by major type and are summarized below. Since the eligible impact fee costs under the Florida Impact Fee Act are limited to major capital items, certain costs are excluded from the impact fee analysis including items such as uniforms, radios, and other equipment items that do not have a minimum five- (5) year life.

Existing City Investment in Police Assets [1]			
Description	Original Cost	Allocation to Impact Fee	Allocated Costs
Machinery and Equipment	$422,303	0.0%	$0
Major Vehicles	3,185,118	100.0%	3,185,118
Other Capital Equipment and Facilities	3,638,947	100.0%	3,638,947
Subtotal	$7,246,368	94.2%	$6,824,064
Grant Funded Assets	($0)	100.0%	($0)
Net Recoverable Costs	**$7,246,368**	94.2%	$6,824,064

[1] Amounts as shown on Table 3-2.

As shown above, of the $7,246,368 in police department assets, $6,824,064 of major assets are included in the calculation of the impact fee. Additionally, based on information provided by the City, the department has received no grant funding and capital contributions which could offset the capital costs included in the proposed impact fees.

Planned Future Investment in Department

In the development of the proposed impact fees, the following future capital improvement requirements were provided by the City. Along with the City's existing investment in police assets, these capital requirements are anticipated and designed to maintain the department's ability to provide service to the City's existing and future

population levels and fulfill the identified level of service standards. The City's capital requirements are categorized by type of expenditure and are summarized below.

Projected Future City Investment in Police Assets (Capital Plan) [1]			
Description	Total Capital Improvements	Adjustments	Adjusted Total
Police Department Roof	$345,000	($345,000)	$0
PAL House	350,000	(350,000)	0
Police Impound Lot	150,000	0	150,000
SANS Upgrade	125,000	0	125,000
Police Vehicle Replacements	2,230,000	(2,230,000)	0
Planned Future City Investments in Police Assets	$3,200,000	($2,925,000)	$275,000

[1] Amounts as shown on Table 3-3.

As can be seen above, the City anticipates spending $275,000 in order to further develop and upgrade the police assets and facilities to provide the desired level of service to the City as it grows through 2027. This amount is net of adjustments associated with replacement related capital projects as shown on Table 3-3.

Total Capital Costs

Table 3-4 summarizes the existing and future capital investment in the police department. The total capital costs included in the calculation of the police impact fee is $7,099,064.

Summary of Capital Costs	
Description	Total Investment
Existing Investment:	
Machinery and Equipment	$0
Major Vehicles and Vehicle-related Equipment	3,185,118
Other Capital Equipment and Facilities	3,638,947
Existing Investment Subtotal	$6,824,064
Projected Future Investment:	
Proposed Capital Additions	$275,000
Total Existing and Future Investment Subtotal	$7,099,064
Grant Adjustments	($0)
Total Adjusted Costs	**$7,099,064**

[1] Amounts as shown on Table 3-4.

Design of Police Facilities Impact Fee

The method used to determine the police impact fee is a combination of the improvements-driven method and buy-in method as the recoupment of a portion of existing investments availability to serve new growth and the costs associated with adding additional capacity to service the City's future needs are recognized. This method was based

upon a three- (3) step process. Table 3-6 helps to illustrate the results of the approach. The following is a brief description of the method used in this study.

- Development of Total Capital Need – Based on discussions with the City, the existing and incremental facilities and related costs to serve the population through the forecast period reflected in the analysis were developed.

- Allocation of Capital Costs to Customer Classes – This step allocates the total capital costs to provide police facilities between residential and non-residential based upon call demand.

- Calculation of Cost per Equivalent Impact Fee Unit – Once capital costs are allocated between residential and non-residential land uses, they are summarized and presented as a unit of measure basis; per dwelling unit for residential and per 1,000 square feet for non-residential. The allocation of the non-residential land uses are based upon a "functional population." Table 3-6 provides a detailed listing of the proposed impact fees and their appropriate land use and measures.

POLICE IMPACT FEE ASSUMPTIONS

The development of the police impact fees required several assumptions. The major assumptions used in the development of the proposed impact fees are as follows:

1. In the development of the capital costs to serve growth, the total existing and projected major capital costs of providing police facilities were developed as described previously based on existing asset records and proposed capital expenditures through 2040. The total existing and projected investment of $7.1 million was the cost basis used in the development of the fees.

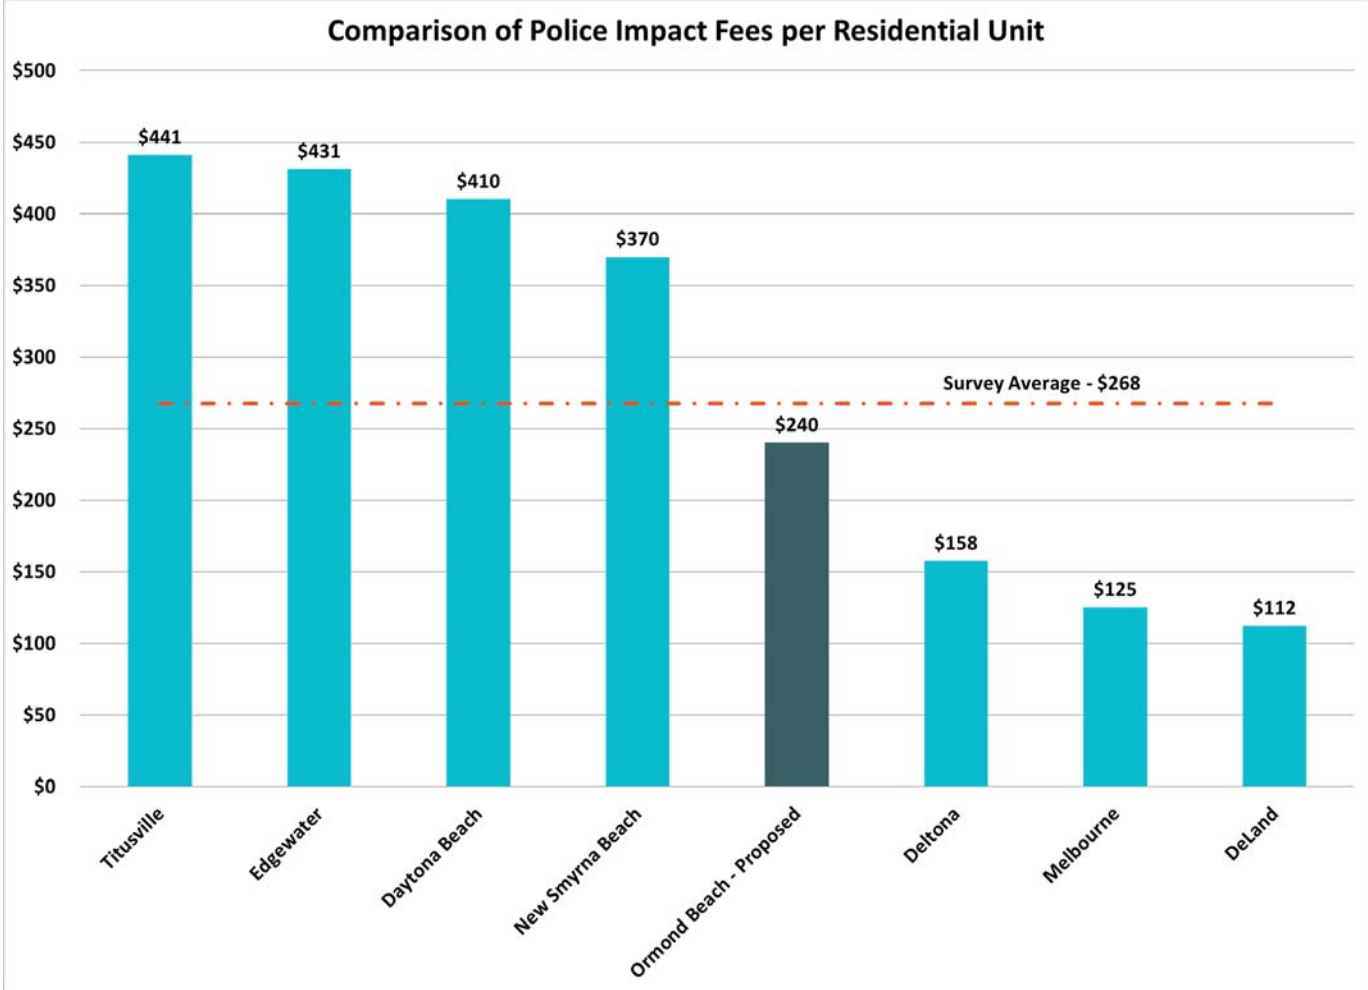
2. The estimated capital base costs or reserved service capacity, allocable to all customer classes were allocated between the residential and non-residential customer classes based on an assumed base level of service and historical call data. Non-residential classes were then allocated between five (5) customer classes: Industrial / Warehousing, Institutional, Hotel / Motel, Office Buildings, and Retail based on "functional population" estimates. The concept of functional population is incorporated in order to spread capital costs more equitably between non-residential land uses. Businesses place demands on police facilities in the same manner as residents do, and it is equitable to spread these costs based on the average number of people expected to be present. For the non-residential uses, the allocation is calculated based on the average amount of time spent at each non-residential class and is determined using traffic generations, estimated employment data, and operational details. The net result is the total number of person hours per location as derived from Table 2-2 in Section 2. The costs are calculated on a per person basis and then applied to the non-residential land-uses based upon the respective functional population coefficient.

IMPACT FEE CALCULATION

Based on the above-referenced assumptions, the allocated capital facilities considered necessary to maintain the level of service requirements, and the residential units and land use projections of the City, the police impact fees for the residential and non-residential customer classifications were estimated. As shown in Table 3-5 at the end of this section, the cost per equivalent impact fee unit by customer classification was calculated. The following summarizes the proposed police impact fees:

Proposed Residential Police Impact Fee		
Description	Impact Unit	Proposed
Single-family	Dwelling Unit	$240.00
Multi-family	Dwelling Unit	198.00
Mobile Homes	Dwelling Unit	166.00

Proposed Non-residential Police Impact Fees		
Description	Impact Unit	Proposed Fee
Industrial / Warehousing	Per Square Foot	$0.015
Institutional	Per Square Foot	$0.249
Hotel / Motel	Per Room	$130.00
Office Buildings	Per Square Foot	$0.191
Retail	Per Square Foot	$0.336



Taking into account the methodology used for the determination of the fee and the estimates associated with determining the police capital needs of the City, it is concluded that the proposed impact fees are reasonable. It should be noted that in the development of the fee per equivalent impact fee unit, that no credits associated with developer land dedication or other similar activities have been recognized. Also, it should be noted that the proposed incremental capital improvements are stated in Fiscal Year 2022 dollars and do not include any inflationary allowances.

In the development of the cost per equivalent impact fee unit, it was determined that the rate should be applied on a "per dwelling unit" basis for the residential class and primarily on a "per square footage" of commercial development for the non-residential class. These factors are common throughout the state as the equivalent impact fee unit for fee determination. The use of these equivalency factors was based on discussions with the City, comparisons of fee applicability provisions of neighboring jurisdictions, and promotion of administrative simplicity.

(Remainder of page intentionally left blank)

Impact Fee Comparisons

In order to provide the City additional information about the proposed impact fees, a comparison of the proposed fees for the City and those charged by other neighboring jurisdictions was prepared. Table 3-5 at the end of this section and the chart below summarize the impact fees for police facilities charged by other communities with the proposed rates of the City.

SECTION 4 – FIRE PROTECTION FACILITIES IMPACT FEE

General

This section provides a discussion of the development and design of the impact fee for fire capital facilities. Included in this section is a discussion of the level of service requirements and capital costs included as the basis for the determination of the fee level and the design of the fee proposed to be applied to new growth within the City.

Level of Service Requirements

There is currently no formally adopted level of service for the City's fire protection facilities; however, it is the City's intent to maintain staffing levels that provide services to all developed areas in order to be able to respond to service calls within a specified time period to maintain the City's Insurance Services Office (ISO) property insurance rating of 3/3X in the community. ISO ratings are a measure a fire departments ability to provide service to the community and are based on a survey across key areas including water supply, personnel, communication systems, etc. A score of 1 is the highest a department can achieve while 10 is the lowest. The City's rating of Class 3/3X is a hybrid and means most residences and businesses are within 5 miles of a fire station and 1,000 feet of a hydrant but some outlying areas are greater than 5 miles but not more than 7 miles from a station and still within 1,000 of a hydrant. Regarding response times, whether a call is fire or EMS related, it is necessary to reach property and residents of the City within a response time standard to maximize the effectiveness of fire suppression activities and/or emergency medical care. The City currently has an average response time of approximately 6.5 minutes with approximately 75% of calls being responded to in eight (8) minutes or less. In discussions with City staff, it was determined that the existing staffing levels of the City can provide adequate fire rescue services for the existing and future daily average population of the City.

Presently, the City has 48 full-time primary personnel budgeted for 2023 as shown on Table 4-1 and below.

Primary Personnel	Summary of Existing Personnel
Fire Chief	1.0
Deputy Fire Chief	1.0
Fire Battalion Commander	3.0
Captain	12.0
Driver Engineer	12.0
Firefighters	18.0
Office Manager (Support)	1.0
Total Current Full-Time Personnel	**48.0**

Based on the primary personnel listed above, the level of service in terms of the number of direct fire personnel per 1,000 residents is 1.05.

Existing Investment in Department

In the development of the fee, the original costs of the existing assets and any grant funding or contributions towards those assets were considered. The City's existing assets are categorized by major type and are summarized below. Since eligible impact fee costs under the Florida Impact Fee Act are limited to major capital items, certain costs are

excluded from the impact fee analysis including items such as uniforms, radios, and other equipment items that do not have a minimum five- (5) year life.

Existing City Investment in Fire Assets [1]			
Description	Original Cost	Allocation to Impact Fee	Allocated Costs
Machinery and Equipment	$703,577	0.0%	$0
Major Vehicles	3,233,125	100.0%	3,233,125
Other Capital Equipment and Facilities	5,087,047	100.0%	5,087,047
Subtotal	$9,023,749	92.2%	$8,320,172
Grant Funded Assets	($0)	100.0%	($0)
Net Recoverable Costs	**$9,023,749**	**92.2%**	**$8,320,172**

[1] Amounts as shown on Table 4-2.

As shown above, of the $9,023,749 in fire department assets, $8,320,172 of major assets are included in the calculation of the impact fee. Additionally, based on information provided by the City, the department has received no grant funding and capital contributions which could offset the capital costs included in the proposed impact fees

Planned Future Investment in Department

In the development of the proposed impact fees, the following capital improvement requirements were provided by the City. Along with the City's existing investment in fire rescue assets, these capital requirements are anticipated and designed to maintain the department's ability to provide service to the City's existing and future population levels and fulfill the identified level of service standards. The City's capital requirements are categorized by type of expenditure and are summarized below.

Projected Future City Investment in Fire Service (Capital Plan) [1]			
Description	Total Capital Improvements	Adjustments	Adjusted Total
Station Alerting	$240,000	($240,000)	$0
Fire Station 91 and 93 Generator	250,000	(250,000)	0
Point to Point Wireless Upgrades	27,000	(27,000)	0
Brush Truck Replacement	175,000	0	175,000
Bunker Gear Dryers	14,000	(14,000)	0
Quint Fire Apparatus	1,000,000	(581,831)	481,169
Brush Attack Apparatus	25,000	0	25,000
Planned Future City Investment in Fire Assets	**$1,731,000**	**($1,049,831)**	**$681,169**

[1] Amounts as provided by City staff and are shown on Table 4-3.

As can be seen above, the City anticipates spending $681,169 in order to further develop capital-related fire rescue facilities to provide the desired LOS to the City as it grows through 2040. This amount is net of adjustments associated with replacement related capital projects as shown on Table 4-3.

Total Capital Costs

Table 4-4 summarizes the existing and future capital investment in the fire rescue department. The total capital costs included in the calculation of the fire impact fee is $9,001,341.

Summary of Capital Costs [1]	
	Total Projected Investment
Machinery and Equipment	$0
Major Vehicles and Vehicle-related Equipment	3,233,125
Other Capital Equipment and Facilities	5,087,047
Subtotal	$8,320,172
Proposed Capital Additions	681,169
Subtotal	$9,001,341
Grant Adjustments	($0)
Total Allocated Costs	**$9,001,341**

Design of Fire Protection Facilities Impact Fee

The method used to determine the fire facilities impact fee is a combination of the improvements-driven method and buy-in method as the recoupment of a portion of existing investments available to serve new growth and the costs associated with adding additional capacity to service the City's future needs are recognized. This method was based upon a three- (3) step process. Table 4-6 helps to illustrate the results of the approach. The following is a brief description of the method used in this study.

- Development of Total Capital Need – Based on discussions with the City and the LOS requirements related to the maintenance of first response time, existing and the incremental facilities and related costs to serve the population through the forecast period reflected in the analysis were developed.

- Allocation of Capital Costs to Customer Classes – This step allocates the total capital costs to provide fire facilities between residential and non-residential based upon call demand.

- Calculation of Cost per Equivalent Impact Fee Unit – Once capital costs are allocated between residential and non-residential land uses, they are summarized and presented as a unit of measure basis; per dwelling unit for residential and per 1,000 square feet for non-residential. The allocation of the non-residential land uses are based upon a "functional population." Table 4-6 provides a detailed listing of the proposed impact fees and their appropriate land use and measures.

(Remainder of page intentionally left blank)

FIRE PROTECTION FACILITIES IMPACT FEE ASSUMPTIONS

The development of the fire impact fees required several assumptions. The major assumptions used in the development of the proposed impact fees are as follows:

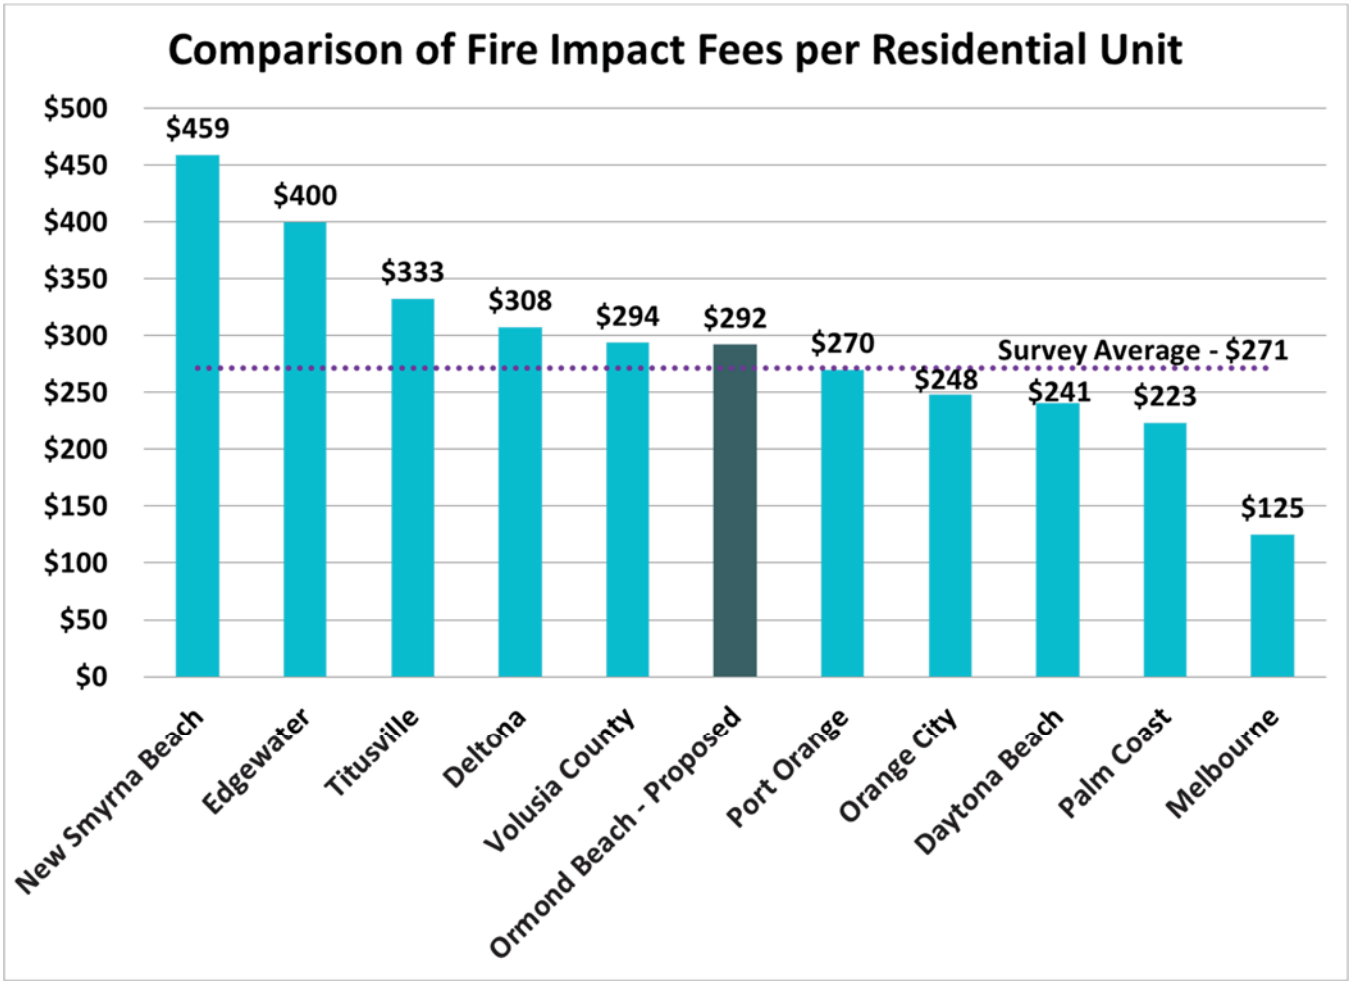
1. In the development of the capital costs to serve growth, the total existing and projected major capital costs of providing fire facilities were developed as described previously based on existing asset records and proposed capital expenditures through 2040. The total existing and projected investment of $9.0 million was the cost basis used in the development of the fees.

2. The estimated capital base costs or reserved service capacity, allocable to all customer classes were allocated between the residential and non-residential customer classes based on historical call data. Non-residential classes were then allocated between five (5) customer classes: Industrial / Warehousing, Institutional, Hotel / Motel, Office Buildings, and Retail based on "functional population" estimates. The concept of functional population is incorporated in order to spread capital costs more equitably between non-residential land uses. Businesses place demands on fire facilities in the same manner as residents do, and it is equitable to spread these costs based on the average number of people expected to be present. For the non-residential uses, the allocation is calculated based on the average amount of time spent at each non-residential class and is determined using traffic generations, estimated employment data, and operational details. The net result is the total number of person hours per location as derived from Table 2-2 in Section 2. The costs are calculated on a per person basis and then applied to the non-residential land-uses based upon the respective functional population coefficient.

IMPACT FEE CALCULATION

Based on the above-referenced assumptions, the allocated capital facilities considered necessary to maintain the level of service requirements, and the residential units and land use projections of the City, the fire impact fees for the residential and non-residential customer classifications were estimated. As shown in Table 4-6 at the end of this section, the cost per equivalent impact fee unit by customer classification was calculated. The following summarizes the proposed fire impact fees:

Proposed Residential Fire Impact Fee		
Description	Impact Unit	Proposed
Single-family	Dwelling Unit	$292.00
Multi-family	Dwelling Unit	262.00
Mobile Homes	Dwelling Unit	240.00



Proposed Non-residential Fire Impact Fees		
Description	Impact Unit	Proposed Fee
Industrial / Warehousing	Per Square Foot	$0.019
Institutional	Per Square Foot	$0.320
Hotel / Motel	Per Room	$167.00
Office Buildings	Per Square Foot	$0.245
Retail	Per Square Foot	$0.432

Taking into account the methodology used for the determination of the fee and the estimates associated with determining the capital needs of the City, it is concluded that the proposed impact fee utilizing the City's LOS standard are reasonable. It should be noted that in the development of the fee per equivalent impact fee unit, that no credits associated with developer land dedication or other similar activities have been recognized. Also, it should be noted that the proposed incremental capital improvements are stated in Fiscal Year 2022 dollars and do not include any inflationary allowances.

In the development of the cost per equivalent impact fee unit, it was determined that the rate should be applied on a "per dwelling unit" basis for the residential classes and primarily on a "per square footage" of commercial development for the non-residential class. These factors are common throughout the state as the equivalent impact fee unit for fee determination. The use of these equivalency factors was based on discussions with the City, comparisons of fee applicability provisions of neighboring jurisdictions, and promotion of administrative simplicity.

Impact Fee Comparisons

In order to provide the City additional information about the proposed impact fees, a comparison of the proposed fees for the City and those charged by other neighboring jurisdictions were prepared. Table 4-7 at the end of this section and the chart below summarize the impact fees for fire facilities charged by other communities with the proposed rates of the City.

Utility Connection Fee and Municipal Impact Fee Study

Presented – September 7th, 2022

RAFTELIS

Agenda

- Review Water and Wastewater Utility Connection Fee Analysis
- Review Municipal Impact Fee Analysis
- Questions and Answers

Overall

Background

- Fees are paid by new development and expansions that results in an increased demand
- Fees are used to pay for growth-related facilities
- Recommendation to amend water/wastewater impact fee to connection fees
- New legislation exists on impact fees - Florida Impact Fee Act
- Current fees expire on a sliding scale once a building is demolished

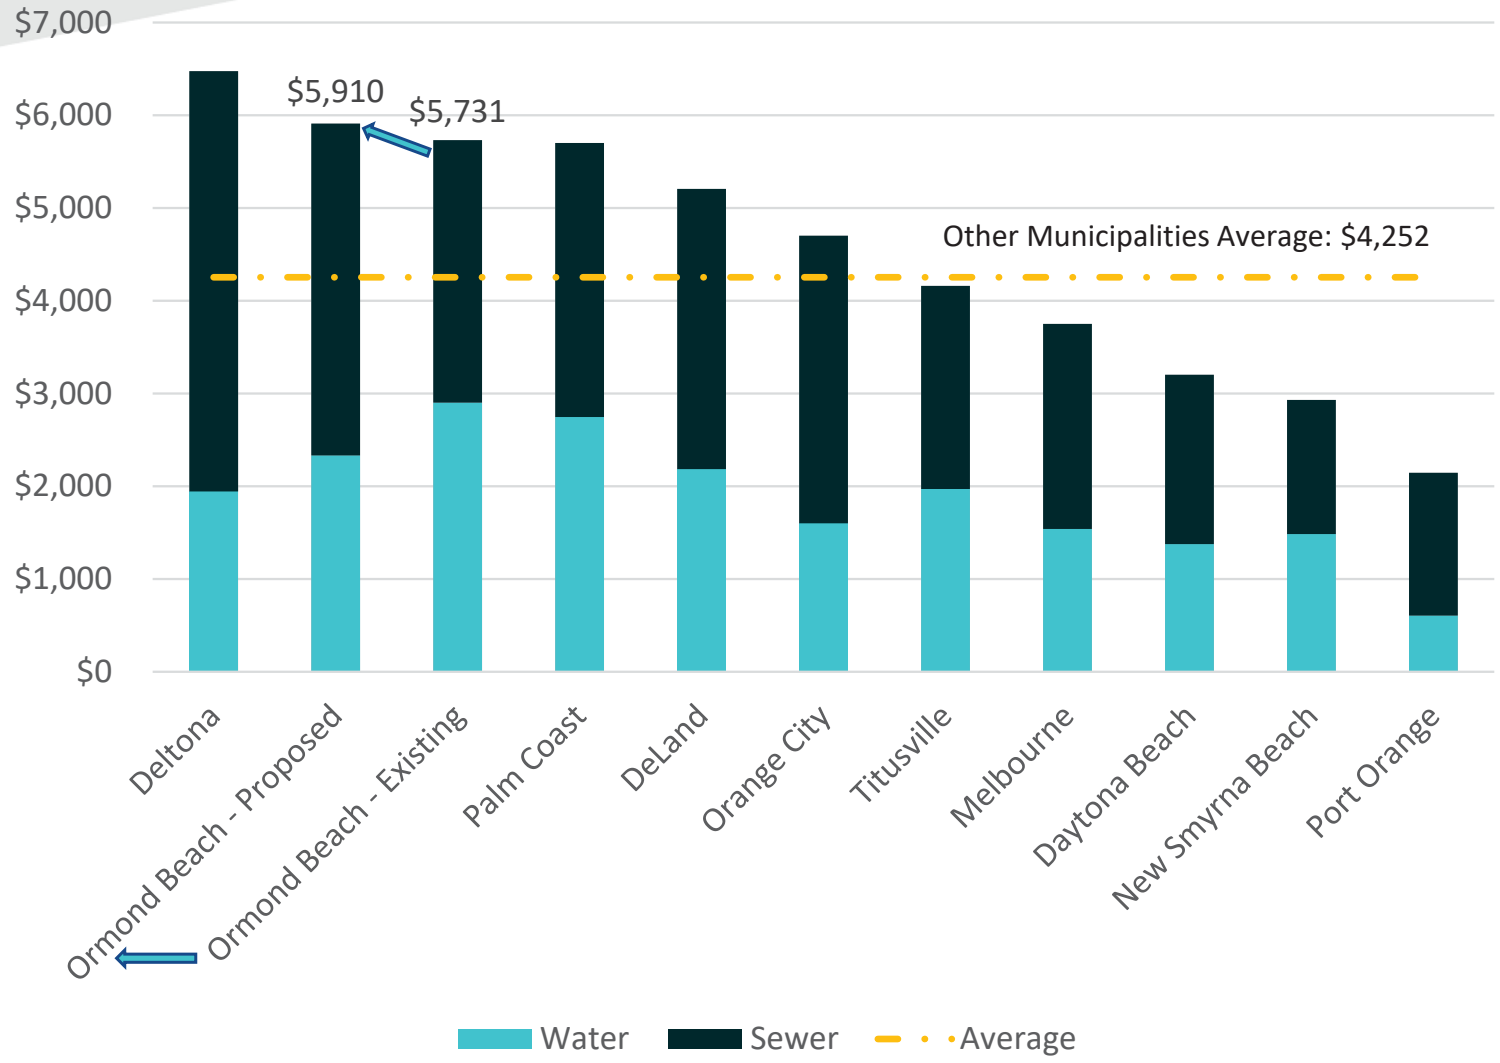
Overall Discussion/Direction Points

- **#1:** Study recommends no expiration of impact fee credits – seeking confirmation on this change.

Water and Wastewater Utility Connection Fee Analysis

Existing and Proposed Water / Irrigation Connection Fees

Description	Proposed ELU Factor	Existing Fees	Proposed Fees	Increase / (Decrease)
Residential				
Single Family per Unit	1.0	$2,902.00	$2,333.00	($569.00)
Multi-Family per Unit	0.80 (was 0.50)	$1,451.00	$1,866.00	$415.00
Mobile Home per Unit	0.90 (was 0.60)	$1,741.20	$2,099.00	$358.00



- New non-residential customers charged based on an ELU factor based on a fixture count

Existing and Proposed Wastewater Connection Fees

Description	Proposed ELU Factor	Existing Fees	Proposed Fees	Increase / (Decrease)
Residential				
Single Family per Unit	1.0	$2,829.00	$3,577.00	$748.00
Multi-Family per Unit	0.80 (was 0.50)	$1,414.00	$2,861.00	$1,447.00
Mobile Home per Unit	0.90 (was 0.60)	$1,697.40	$3,219.00	$1,522.00

- New non-residential customers charged based on an ELU factor based on a fixture count

Water and Wastewater Service Connection Fees Comparison

Western Service Area

- Avalon Park
- Consider separate service area / district
- Can be completed with separate study once capital costs and density/intensity confirmed

Recommendations

- The City should adopt the proposed water and wastewater utility connection fees
- The City should review the utility connection fees periodically
- The City should consider the creation of two service area districts / zones with one being for the existing City service area and one being for the Western Service Area
  - Apply proposed fees outlined in this presentation to both districts until a specific connection fee analysis for the Western Service Area can be completed
- Modification of ELU factors: Multifamily from 0.50 to 0.80 and mobile home from 0.60 to 0.90

Municipal Impact Fee Analysis

Purpose and Background

- Provide the basis for proposed development municipal impact fees
  - Fees are paid by new development and expansions that results in an increased demand
  - Fees are used to pay for growth-related facilities

Impact Fee Criteria

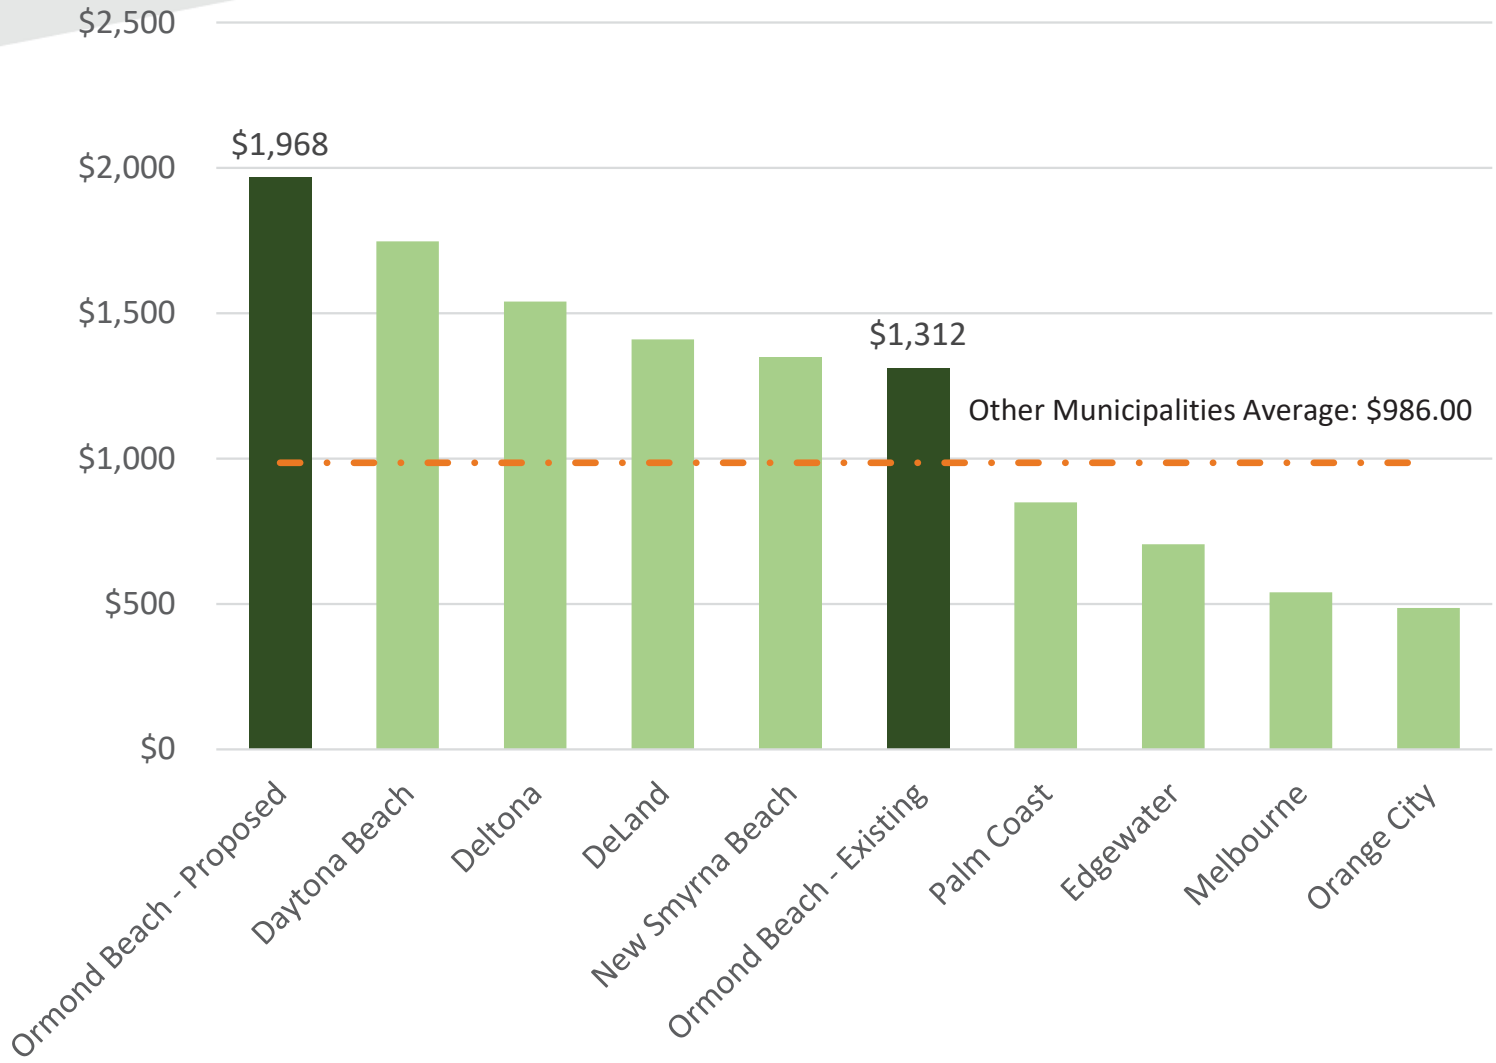
- Dual rational nexus (based on cost of capacity to serve new growth)
- Impact fees must be based on the capital cost requirements anticipated for providing service to new development
- Impact fees must be based upon reasonable level of service standards that meet the needs of the City
- Impact fees cannot be used to fund deficiencies in capital needs of the city or pay for any operating costs

City Service Area Forecast

Existing and Projected Population and Dwelling Units [1]			
Year	Total Population	Total Dwelling Units	Average Persons per Household [2]
2020	43,080	18,489	2.33
2021	44,041	18,902	2.33
2025	45,829	19,669	2.33
2030	48,167	20,673	2.33
2040	50,630	21,730	2.33

[1] Future population estimates based on a review of historical population growth as obtained from the US Census Bureau and from projections from the City.

[2] Average persons per household shown is the weighted average between single family at 2.53 persons per unit, multifamily at 2.05 persons per unit, and mobile home at 1.68.



Parks and Recreation Impact Fee Analysis

Existing and Proposed Impact Fees

Description	Existing Fees	Maximum Supportable Fees	50% Increase Proposed Fees	Increase / (Decrease)
Single Family per Unit	$1,312.24	$2,500.00	$1,968.00	$655.76
Multi-Family per Unit	$1,048.42	$2,021.00	$1,572.00	$449.00
Mobile Home per Unit	$785.74	$1,658.00	$1,178.00	$392.26

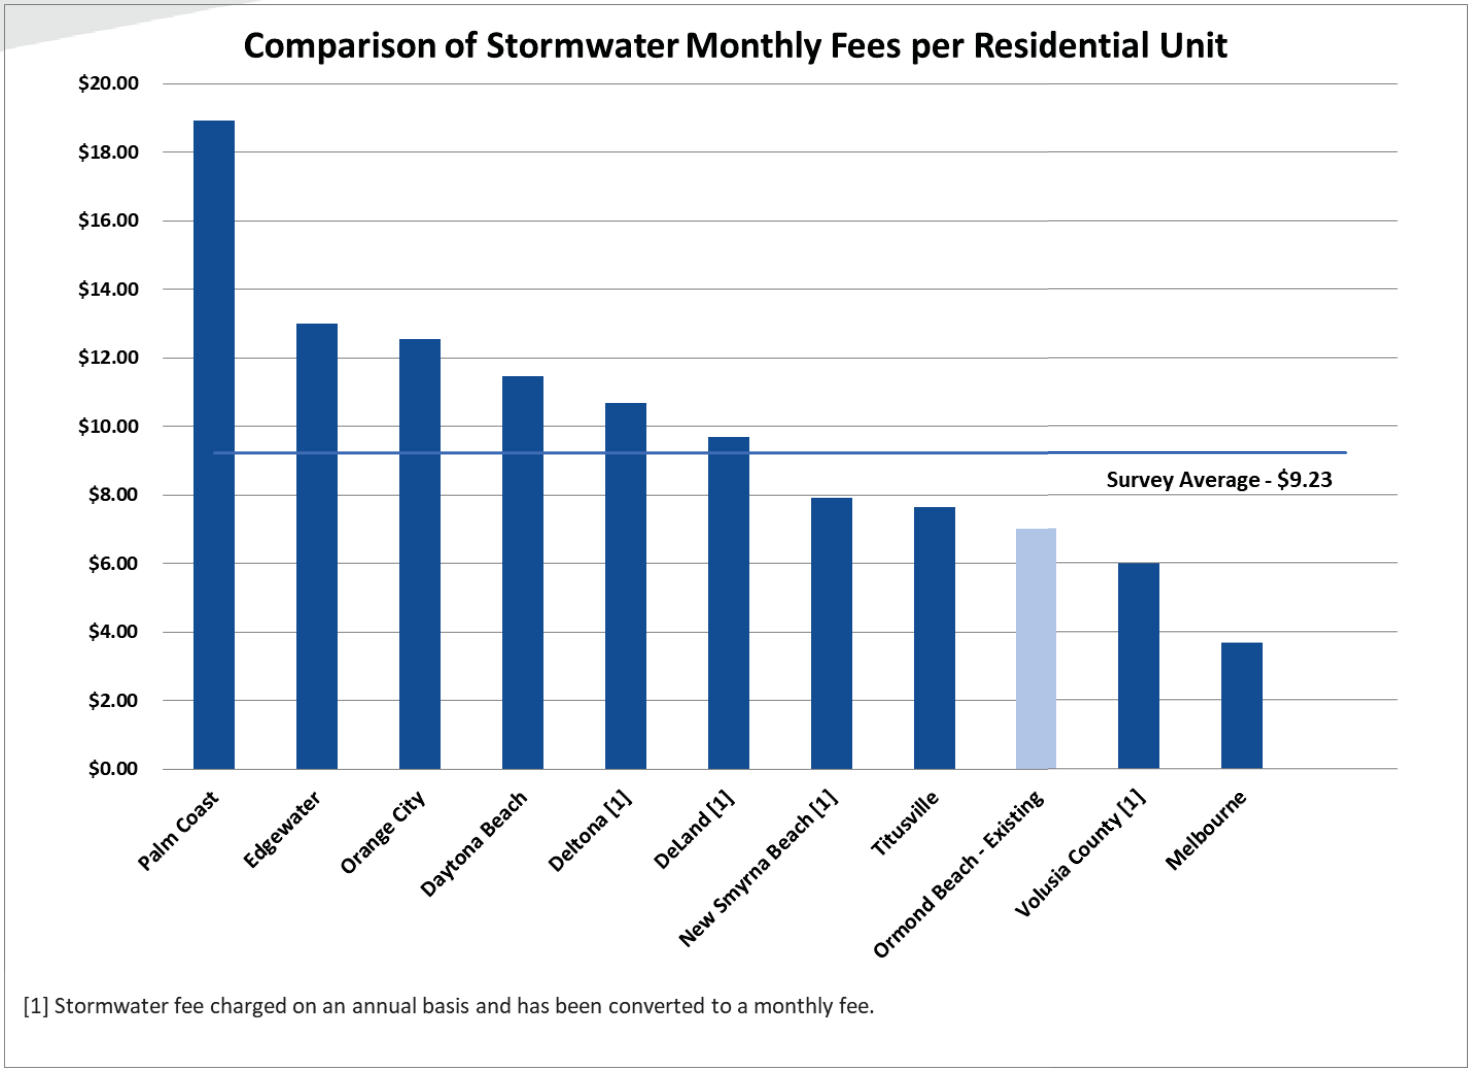
- Propose fee increase through extraordinary circumstance provisions in impact fee statutes
- Should maximum supportable fee be assessed or cap increase at 50% of maximum supportable fee considering comparability with neighboring jurisdictions?

Parks and Recreation Impact Fee Comparison – Single Family

Parks and Recreation Discussion/Direction Points

- **#2:** Should maximum supportable fee for Parks & Recreation be assessed ($2,500) or cap increase at 50% of maximum supportable fee ($1,968) considering comparability with neighboring jurisdictions?
- **#3:** Should the impact fee increase be increased over a two-year period or a one-time increase?

Stormwater Impact Fee Analysis



Overview and Recommendations

- The City currently charges a stormwater drainage impact fee of $119.39 per unit
- Due to data and other limitations, it is difficult to identify growth related projects and impacts
- Could not find any other Florida municipalities that charge stormwater impact fees
  - Most fund needs through recurring fees, grants, general tax revenues, and other sources
- Monthly stormwater fees tend to generate more consistent revenue than Impact fees

Stormwater Impact Fee Discussion/Direction Points

- **#4:** Recommendation to discontinue stormwater impact fees.

Recurring Stormwater Fee Comparison

[1] Stormwater fee charged on an annual basis and has been converted to a monthly fee.

Local Roads and Mobility Fee Analysis

Comparison of Existing & Proposed Local Road Impact Fees

Land Use	Unit	Proposed Fee	Current Fee
Single Family	DU	$864.59	$162.61
Multi-Family	DU	$548.32	$162.61
Mobile/Manufactured Home	DU	$740.33	$162.61
Hotel/Motel	Rooms	$355.87	$114.85
General/Government Office	KSF	$1,709.28	$230.83
Medical Office	KSF	$3,434.79	$1,014.31
Hospital	KSF	$1,114.66	$212.64
Nursing Home	Beds	$268.79	n/a
Industrial	KSF	$450.23	$100.07
Warehouse	KSF	$176.56	$100.07

Land Use	Unit	Proposed Fee	Current Fee
General Commercial (<40,000)	KSF	$3,736.72	$834.64
General Commercial (40,000-150,000)	KSF	$5,559.09	$802.81
General Commercial (<150,000)	KSF	$2,539.87	$602.67
Fast-Food	KSF	$25,155.10	n/a
Restaurant	KSF	$5,593.44	$881.26
General Recreation	KSF	$2,996.69	$59.13
Schools	Students	$226.79	n/a
Church	KSF	$790.25	$150.09
Day Care	KSF	$4,951.51	$329.27
Convenience Store	KSF	$26,948.94	$1,355.44
Bank	KSF	$6,782.33	$1,355.44

Local Road Impact Fee Calculations

$$Total\ Impact\ Cost = \frac{(Daily\ Trips * Assessed\ Trip\ Length * \%\ New\ Trips)}{2} * \frac{Lane - Mile\ Cost}{Lane\ Mile\ Capacity}$$

$$Capital\ Improvement\ Credit = \frac{Daily\ Trips * Avg\ Trip\ Length * \%\ New\ Trips}{2} * 365 * \frac{Gas\ Tax}{Fuel\ Efficiency}$$

$$Impact\ Fee = Total\ Impact\ Cost - Capital\ Improvement\ Credit$$

Mobility Fees

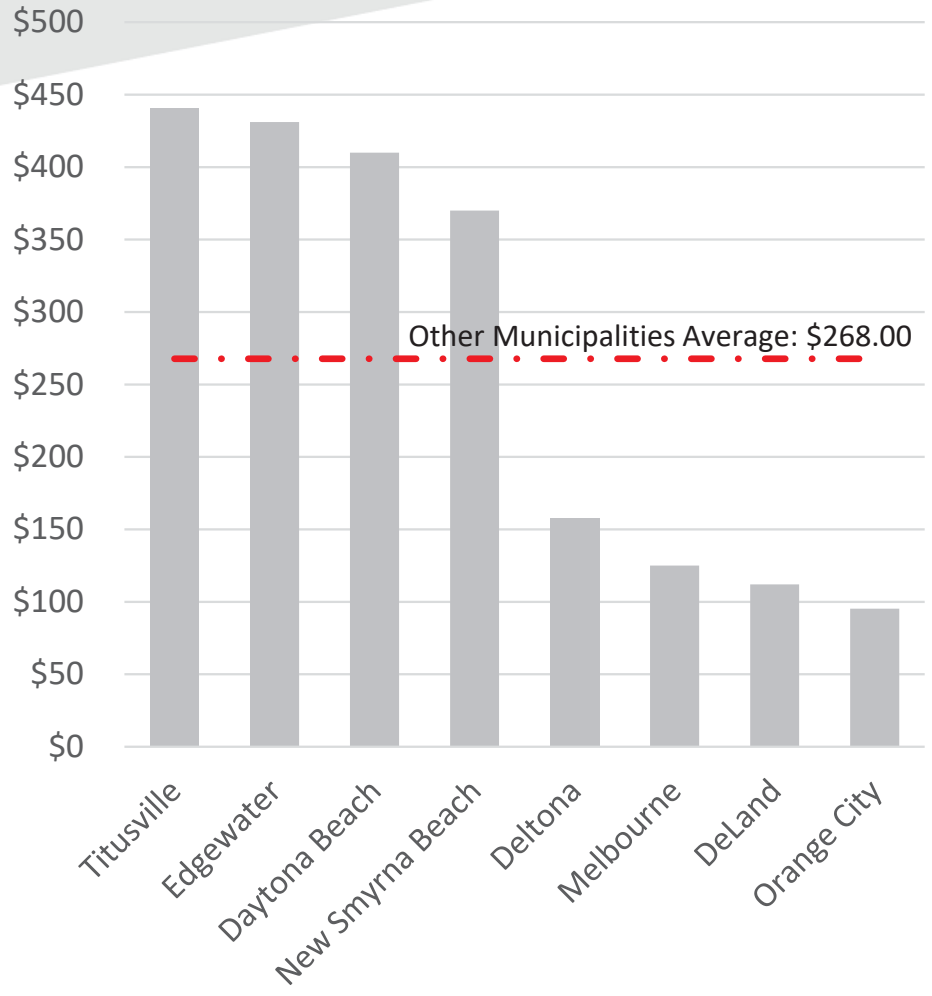
- Based off of the same variables as the local roads impact fee, but calculated on a person-trip basis
- Fee is given in number of person-trips
- Applicants can calculate person-trip generation rates for each land use using the ITE Trip Generation Manual, 11th Edition
  - Use person-trip rates when available
  - Use vehicle-trip rates when person-trip rates are not available, using the average vehicle occupancy (1.47)

$$\frac{Total\ Impact\ Cost}{Person-Trip} = \frac{Assessed\ Trip\ Length}{2*Vehicle\ Occupancy} * \frac{Lane-Mile\ Cost}{Lane\ Mile\ Capacity}$$

$$Mobility\ Fee = \frac{0.58}{2 * 1.47} * \frac{\$4{,}073{,}885}{9{,}381} = \$85.67/_{person-trip}$$

Local Roads

City	Single Family Dwelling Unit Daytona (2,000-2999 SF)	Multi-family Dwelling Unit	Medical office Per 1,000 SF	Retail Per 1,000 SF (10,000-99,999 SF)	Industrial Per 1,000 SF	Fast Food Per 1,000 SF
Ormond Beach (current)	$162.61	$162.61	$1,014.31	$834.64	$100.07	$834.64
Ormond Beach (proposed)	$864.59	$548.32	$3,434.79	$3,736.72	$450.23	$25,255.10
Daytona Beach	$380.00	$247.00	$405.00	$977.00	$292.00	$977.00
Deltona	$1,044.00	$888.00	$1,530.00	$2,975.00	$1,308.00	$4,826.00
Edgewater	$1,737.34	$1,346.96	$7,149.02	$1,999.58	$1,120.48	$8,689.68
New Smyrna Beach	$1,142.57	$844.37	$3,259.02	$1,379.71	$833.03	$12,584.79
Palm Coast	$3,139.00	$1,809.00	$3,798.00	$6,936.00	$1,773.00	$20,780.00
Port Orange	$902.00	$665.00	$2,573.00	$1,415.00	$657.00	$9,939.00



Local Roads and Mobility Fee Discussion/Decision Point

- **#5:** Should the impact fee increase be adopted in the full recommended amount and then applied based on some percentage of the total due to increase amount and comparability?

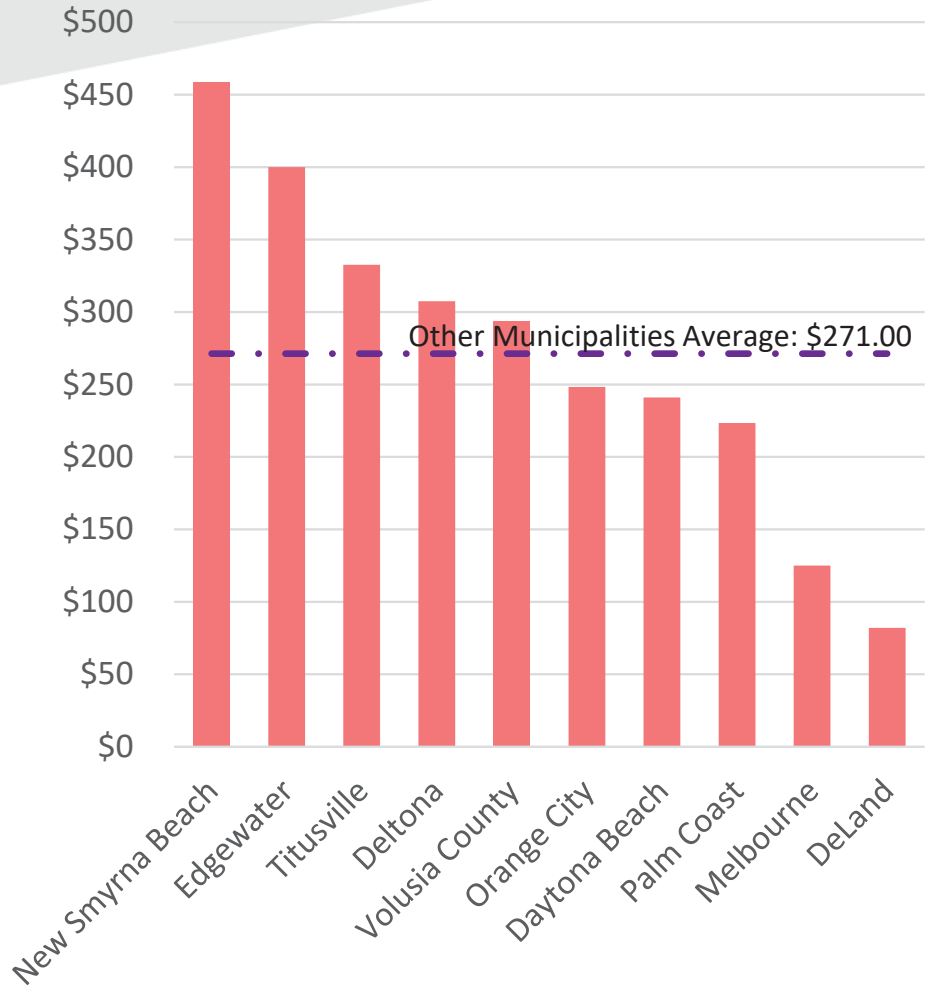
- **#6:** Should the impact fee and mobility fee increase be increased over a two-year period or a one-time increase?

Police Impact Fee Feasibility Analysis

Police Impact Fee Comparison & Estimated Financial Benefit Analysis

- Surveyed 11 neighboring communities
  - 8 charge police impact fees
- Assuming a hypothetical fee of $250 per residential unit applied to projected residential growth would provide an estimated $0.8 Million in fees by 2040

Observations and Recommendations



- The City can provide the necessary data to develop and support police impact fees
- The police department is generally configured in a manner that would support the charging of a fee
- Using an assumed fee level based on a comparison of neighboring municipalities the implementation of a fee would likely benefit the City

Police Impact Fee Discussion/Decision Point

- **#7:** It is recommended that the City consider calculating and establishing police impact fees

Fire Impact Fee Feasibility Analysis

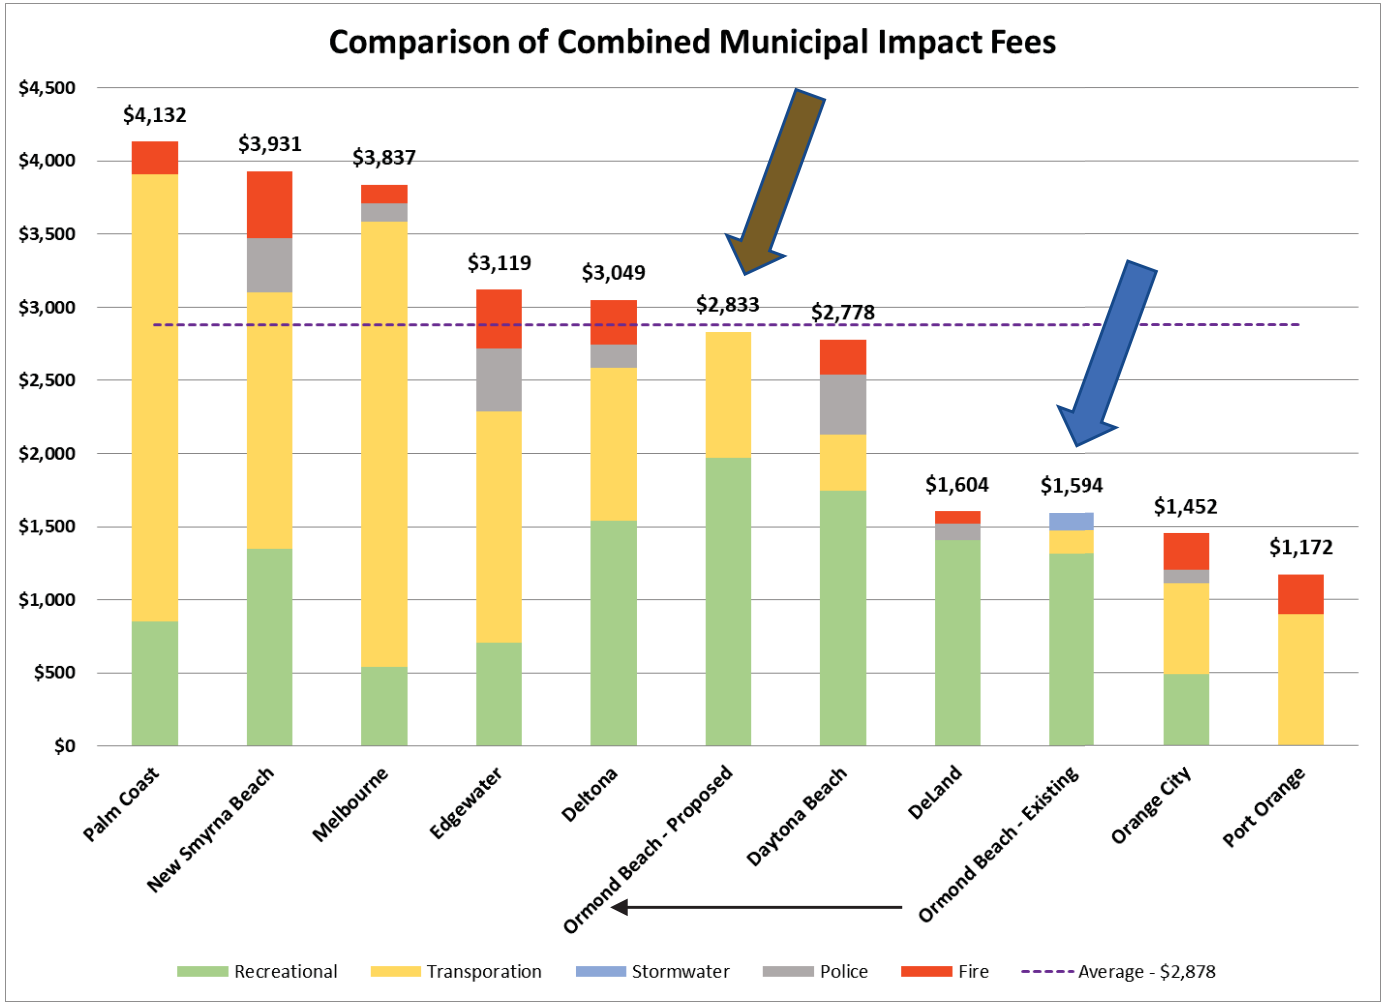
Fire Impact Fee Comparison & Estimated Financial Benefit Analysis

- Surveyed 11 neighboring communities
  - 10 charge fire impact fees
- Assuming a hypothetical fee of $250 per residential unit applied to projected residential growth would provide an estimated $0.8 Million in fees by 2040

Observations and Recommendations

- The City can provide the necessary data to develop and support fire impact fees
- The fire department is generally configured in a manner that would support the charging of a fee
- Using an assumed fee level based on a comparison of neighboring municipalities the implementation of a fee would likely benefit the City

Fire Impact Fee Discussion/Decision Point



- **#8:** It is recommended that the City consider calculating and establishing fire impact fees

Summary Results and Recommendations

Existing and Proposed Development Impact Fees

Single Family Impact Fee Type	Existing Fees	Proposed Fees	$ Amount of Change	Percent Change
Parks & Recreation	$1,312.24	$1,968.00	$655.76	50.0%
Stormwater	$119.39	$0.00	($119.39)	(100.0%)
Local Roads	$162.61	$864.59	$701.98	432.7%
Mobility Fees per P/T	$85.67	$16.00	$69.67	335.4%

Existing and Proposed Combined Municipal Impact Fees Comparison

Recommendations

- Adopt proposed municipal impact fees
  - Parks and recreation, local roads and mobility fees, and elimination of stormwater impact fee
- Consider establishment and development of police and fire impact fees
- Review fees periodically development trends
  - Level of service requirements
  - Capital needs
  - Major changes in growth projections
- 90 Day grace period from City approval to effective date

Summary of Discussion

#	Area	Discussion/Direction Point
1.	Overall	Current regulations decrease impact fee credits for demolished buildings by 10% per year until all the impact fee credits expired. The "Municipal Impact Fee Study" recommends no expiration of impact fee credits.
2.	Parks & Recreation	Should the maximum supportable fee be assessed or cap the increase at 50% of the maximum supportable fee considering comparability with neighboring jurisdictions?
3.	Parks & Recreation	Should the impact fee increase be increased over a two-year or multi-year period or a one-time increase?
4.	Stormwater	Recommendation to eliminate the stormwater impact fee.
5.	Local Roads	Should the impact fee increase be increased over a two-year or longer period or a one-time increase?
6.	Mobility Fee	Should the impact fee increase be increased over a two-year or multi year period or a one-time increase?
7.	Police	Should an additional work authorization be approved (separate Resolution presented to the City Commission) to create a police impact fee
8.	Fire	Should an additional work authorization be approved (separate Resolution presented to the City Commission) to create a fire impact fee.

Tentative Timeline

Date	Action
September 7, 2022	**Discussion Item**
October 2022	Police and Fire impact fee work authorization if desired
January 2023	Meetings with development community
February/March 2023	Planning Board/City Commission workshops/discussion items
April/May 2023	Presented of update impact fee Ordinance
Summer 2023	90 day effective date from adoption date

Q&A

CITY OF

Ormond Beach

Connection and Impact Fee Summary and Police & Fire Impact Fee Study

RAFTELIS

Agenda

- Study background
- Connection fee background
- Impact fee background
  - Impact fee considerations and criteria
- Recap prior presentation and decision points
- Review police and fire impact fee analyses
- Questions and answers

Study Background

- Utility connection fee and municipal impact fee study was initiated in June of 2021
- Study scope included the following tasks
  - Review and update of water and wastewater utility connection fees
  - Review and update recreation, stormwater, and transportation impact fees
  - Conduct feasibility analysis regarding potential implementation of police and fire impact fees
- Collaborative process with City Staff to develop analysis and recommendations
- Recommendations presented in September of 2022

Connection Fee Background

- Utility connection fees
  - Fees charged to new growth and redevelopment
  - Purpose of connection fees are to assign, to the extent practical, growth-related capital costs to new development responsible for such additional costs
  - Avoids passing growth-related costs from burdening existing users

Impact Fee Background

- Municipal impact fees
  - Fees are paid by new development and expansions that results in an increased demand for services
  - Fees are used to pay for growth-related facilities

Legal Considerations and Criteria

The basis for impact fees and related criterial have been developed under Florida Statutes and case law

Florida Impact Fee Act History

- Florida Legislature created section 163.31801 of the Florida Statues governing impact fees
- Created June 14, 2006
- Amended 2009, 2011, 2019, and most recently in 2021

Legal Considerations and Criteria

Florida Impact Fee Act

- Requires the calculation of impact fees to be based on the most recent and localized data
- Provides for accounting and reporting of impact fee revenues and expenditures in a separate fund
- Limits administrative charges for the collection of impact fees to actual costs
- Requires 90 days notice before imposing a new or increased fee
- Annual affidavit on compliance signed by the city
- Government has the burden of proof in any challenge of an impact fee
- Cannot be charged before issuance of building permit
- Statute also provides rules regarding fee increases, phasing-in of proposed fees, fee maximums, and frequency of fee adjustments

Legal Considerations and Criteria

- Dual rational nexus (based on cost of capacity to serve new growth)
- Impact fees must be based on the capital cost requirements anticipated for providing service to new development
- Impact fees must be based upon reasonable level of service standards that meet the needs of the City
- Impact fees cannot be used to fund deficiencies in capital needs of the city or pay for any operating costs

Prior Presentation and Decision Points

- Existing and proposed utility connection fees

Description	Proposed ELU Factor	Existing Fees	Proposed Fees	Increase / (Decrease)
Residential Water / Irrigation Connection Fees				
Single Family per Unit	1.0	$2,902.00	$2,333.00	($569.00)
Multi-Family per Unit	0.80 (was 0.50)	$1,451.00	$1,866.00	$415.00
Mobile Home per Unit	0.90 (was 0.60)	$1,741.20	$2,099.00	$358.00
Residential Wastewater Connection Fees				
Single Family per Unit	1.0	$2,829.00	$3,577.00	$748.00
Multi-Family per Unit	0.80 (was 0.50)	$1,414.00	$2,861.00	$1,447.00
Mobile Home per Unit	0.90 (was 0.60)	$1,697.40	$3,219.00	$1,522.00

- New non-residential utility customers charged based on an ELU factor based on a fixture count

Prior Presentation and Decision Points

- Utility connection fee study recommendations
  - The City should consider adopting the proposed water and wastewater utility connection fees
  - The City should review the utility connection fees periodically
  - The City should consider the creation of two service area districts / zones with one being for the existing City service area and one being for the Western Service Area
    - Apply proposed fees outlined in this presentation to both districts until a specific connection fee analysis for the Western Service Area can be completed
  - Modification of ELU factors: Multifamily from 0.50 to 0.80 and mobile home from 0.60 to 0.90
    - Based on analysis of City customer billing data and existing fee relationships

Prior Presentation and Decision Points

- Impact Fee Expiration
  - Current regulations decrease impact fee credits for demolished buildings by 10% per year until all the impact fee credits expired. The “Municipal Impact Fee Study” recommends no expiration of impact fee credits.
  - The City Commission was supportive of elimination of the impact fee expiration
  - **Should the impact fee credit revision should occur now (could be completed by May 2, 2003) versus the fall of 2023**

Prior Presentation and Decision Points

- Existing and proposed parks and recreation impact fees

Description	Existing Fees	Maximum Supportable Fees	50% Increase Proposed Fees	Increase / (Decrease)
Single Family per Unit	$1,312.24	$2,500.00	$1,968.00	$655.76
Multi-Family per Unit	$1,048.42	$2,021.00	$1,572.00	$449.00
Mobile Home per Unit	$785.74	$1,658.00	$1,178.00	$392.26

- **Decision Points:**
  - Propose fee increase through extraordinary circumstance provisions in impact fee statutes
  - Should maximum supportable fee be assessed or cap increase at 50% of maximum supportable fee considering comparability with neighboring jurisdictions?
  - Should the impact fee increase be increased over a two-year period or a one-time increase?

Prior Presentation and Decision Points

- Park and Recreation Impact Fees
  - The City Commission was supportive of maximum supportable fee.
  - The City Commission was supportive of a one-time increase, but would like to see the revenue prior to deciding.

Park and Recreation Impact Fees Options and Revenue Generation

Year	Single-Family Permits	Multi-Family Permits	Mobile Homes Permits	Existing	Maximum Supportable Fee		50% of Maximum Supportable Fee	
					Year One	**Year Two or Final One Year Amount**	Year One	**Year Two or Final One Year Amount**
NA	NA	NA	NA	**$1,312.24**	$1,906.12	**$2,500.00**	$1,640.12	**$1,968.00**
2018	66	43	0	**$131,689.90**	$191,796.45	**$251,903.00**	$164,586.95	**$197,484.00**
2019	49	41	0	**$107,284.98**	$156,322.99	**$205,361.00**	$134,084.49	**$160,884.00**
2020	134	4	7	**$185,534.02**	$270,112.01	**$354,690.00**	$231,890.01	**$278,246.00**
2021	135	18	7	**$201,524.14**	$293,504.07	**$385,484.00**	$251,873.07	**$302,222.00**
2022	47	54	18	**$132,433.28**	$194,455.64	**$256,478.00**	$165,510.64	**$198,588.00**
TOTAL	431	160	32	**$758,466.32**	$1,106,191.16	**$1,453,916.00**	$947,945.16	**$1,137,424.00**

Prior Presentation and Decision Points

- Stormwater impact fee overview and recommendations
  - The City currently charges a stormwater drainage impact fee of $119.39 per unit
  - Due to data and other limitations, it is difficult to identify growth related projects and impacts
  - Could not find any other Florida municipalities that charge stormwater impact fees
    - Most fund needs through recurring fees, grants, general tax revenues, and other sources
  - Monthly stormwater fees tend to generate more consistent revenue than Impact fees
  - **Decision Point:** Recommendation to discontinue stormwater impact fees

Prior Presentation and Decision Points

- Existing and proposed local road impact fees

Land Use	Unit	Proposed Fee	Current Fee
Single Family	DU	$864.59	$162.61
Multi-Family	DU	$548.32	$162.61
Mobile/Manufactured Home	DU	$740.33	$162.61
Hotel/Motel	Rooms	$355.87	$114.85
General/Government Office	KSF	$1,709.28	$230.83
Medical Office	KSF	$3,434.79	$1,014.31
Hospital	KSF	$1,114.66	$212.64
Nursing Home	Beds	$268.79	n/a
Industrial	KSF	$450.23	$100.07
Warehouse	KSF	$176.56	$100.07

Land Use	Unit	Proposed Fee	Current Fee
General Commercial (<40,000)	KSF	$3,736.72	$834.64
General Commercial (40,000-150,000)	KSF	$5,559.09	$802.81
General Commercial (<150,000)	KSF	$2,539.87	$602.67
Fast-Food	KSF	$25,155.10	n/a
Restaurant	KSF	$5,593.44	$881.26
General Recreation	KSF	$2,996.69	$59.13
Schools	Students	$226.79	n/a
Church	KSF	$790.25	$150.09
Day Care	KSF	$4,951.51	$329.27
Convenience Store	KSF	$26,948.94	$1,355.44
Bank	KSF	$6,782.33	$1,355.44

- Existing and proposed mobility fee
  - Existing fee - $16.00 per person trip
  - Proposed fee - $85.67 per person trip

Prior Presentation and Decision Points

- Local roads and mobility fee decision points
  - Should the impact fee increase be adopted in the full recommended amount and then applied based on some percentage of the total due to increase amount and comparability?
  - Should the impact fee and mobility fee increase be increased over a two-year period or a one-time increase?

Prior Presentation and Decision Points

- Local roads decision points
  - Concern expressed about the fast-food local road impact fee at the September 7, 2022 discussion item. An option for the fast-food local road impact is to assess the restaurant local road impact fee. The existing impact fee schedule does not call a separate fast food with drive thru local road impact fee.
  - Concern expressed about the convenience store local road impact fee at the September 7, 2022 discussion item. An option for the convenience store fee would be to assess the retail impact fee.

Prior Presentation and Decision Points

- Local roads decision points

Local Road Impact Fee - Other Jurisdictions

City	Single Family Dwelling Unit	Multi-family Dwelling Unit	Medical office Per 1,000 SF	Retail Per 1,000 SF (10,000-99,999 SF)	Industrial Per 1,000 SF	Fast Food Per 1,000 SF	Convenience Store Per 1,000 SF
Ormond Beach (current)	$162.61	$162.61	$1,014.31	$834.64	$100.07	$881.26	$834.64
Ormond Beach (proposed)	$864.59	$548.32	$3,434.79	$3,736.72	$450.23	$25,155.10 (study) $5,593.44 (restaurant)	$26,948.94 (study) $3,736.72 (retail)
Daytona Beach	$380.00 (2,000-2,999 SF)	$247.00	$405.00	$977.00	$255.00	$977.00	$977.00
Deltona	$1,044.00	$888.00	$1,530.00	$2,075.00	$1,308.00	$14,461.00	$6,968.00
Edgewater	$1,737.34	$1,001.28 (3+ story)	$7,149.02	$6,556.00	$1,120.48	$15,594.34	$23,613.52
New Smyrna Beach	$1,752.00	$632.00 (3+ story)	$4,762.00	$2,080.00	$519.00	$15,413.00	$7,814.00
Palm Coast	$3,139.00	$1,809.00	$3,798.00	$6,936.00	$1,773.00	$20,780.00	$23,830.00
Port Orange	$902.00	$665.00	$2,573.00	$1,415.00	$657.00	$9,939.00	$5,801.00

Prior Presentation and Decision Points

- Mobility fee decision points
  - The analysis determined a per person trip fee of $85.67. Policy direction is needed to determine the appropriate fee that should be assessed within the Transportation Concurrency Exception Areas.

Mobility Fee Options

Type of Fee	Single Family Dwelling Unit	Multi-family Dwelling Unit	Medical office Per 1,000 SF	Retail Per 1,000 SF	Industrial Per 1,000 SF	Restaurant Per 1,000 SF
Ormond Beach Local Road (proposed)	$864.59	$548.32	$3,434.79	$3,736.72	$450.23	$5,559.09
Ormond Beach Mobility Fee (current)	$240.00	$130.56	$751.68	$628.64	$107.14	$1,507.70
Option 1 - Proposed full mobility fee **($85.67)**	$1,285.05	$699.07	$4,024.78	$3,365.98	$573.65	$8,072.79
Option 2 - Proposed mobility fee **($59.00)** - 69%	$870.00	$481.44	$2,771.82	$2,318.12	$395.06	$5,559.64
Option 3 - Proposed mobility fee **($42.84)** - 50%	$642.60	$349.57	$2,012.62	$1,683.19	$286.86	$4,036.86
Option 4 - Proposed mobility fee **($32.00)** - 37%	$480.00	$261.12	$1,503.36	$1,257.28	$214.27	$3,015.40
Option 5 - Proposed mobility fee **($24.00)** - 28%	$360.00	$195.84	$1,127.52	$942.96	$160.70	$2,261.55

Prior Presentation and Decision Points

- Police and fire impact fee feasibility analysis
- The City can provide the necessary data to develop and support police and fire impact fees
- The police and fire departments are generally configured in a manner that would support the charging of an impact fee
- Using an assumed fee level based on a comparison of neighboring municipalities the implementation of a fee would likely benefit the City
- **Decision Point:** It is recommended that the City consider calculating and establishing police and fire impact fees

Police and Fire Impact Fee Analyses

Fee Calculation Methodology

- Identify existing and future investment to serve growth
- Determine the allocation of costs to be recovered from residential and non-residential customer classes
  - Functional population approach
  - Call data
- Rate calculated
  - Per residential dwelling unit (for single family, multi-family, and mobile home)
  - Per unit of measure for non-residential properties

Functional Population

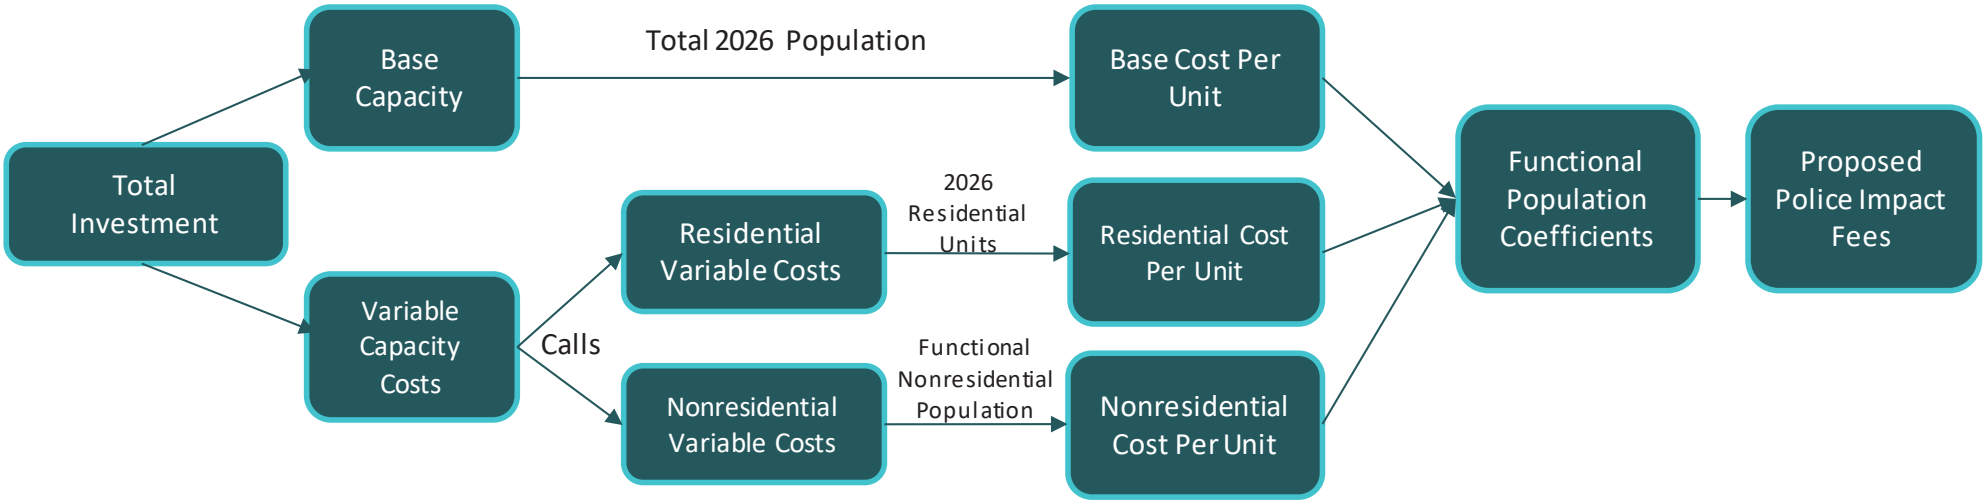
- Functional population to account for location of population over a 24-hour period
  - Functional population factors include number of trips generated, average number of people per trip, and time spent on location
- Approach differentiates between major property types / uses and recognizes that demand for services differ by property type / use
  - Residential – single family vs. multi-family vs. mobile home
  - Non-residential classes – proposes 5 different land use categories
  - Based on trip generation and City call data
    - ITE 11th Edition revised trip generation data
    - Call Data for 2021 and 2022

City Service Area Forecast

Existing and Projected Population and Dwelling Units [1]			
Year	Total Population	Total Dwelling Units	Average Persons per Household [2]
2020	43,080	18,489	2.33
2021	44,041	18,902	2.33
2022	44,677	19,175	2.33
2025	45,829	19,669	2.33
2030	48,167	20,673	2.33
2040	50,630	21,730	2.33

[1] Future population estimates based on a review of historical population growth as obtained from the US Census Bureau and from projections from the City.
[2] Average persons per household shown is the weighted average between single family at 2.53 persons per unit, multifamily at 2.05 persons per unit, and mobile home at 1.68.

Police Services



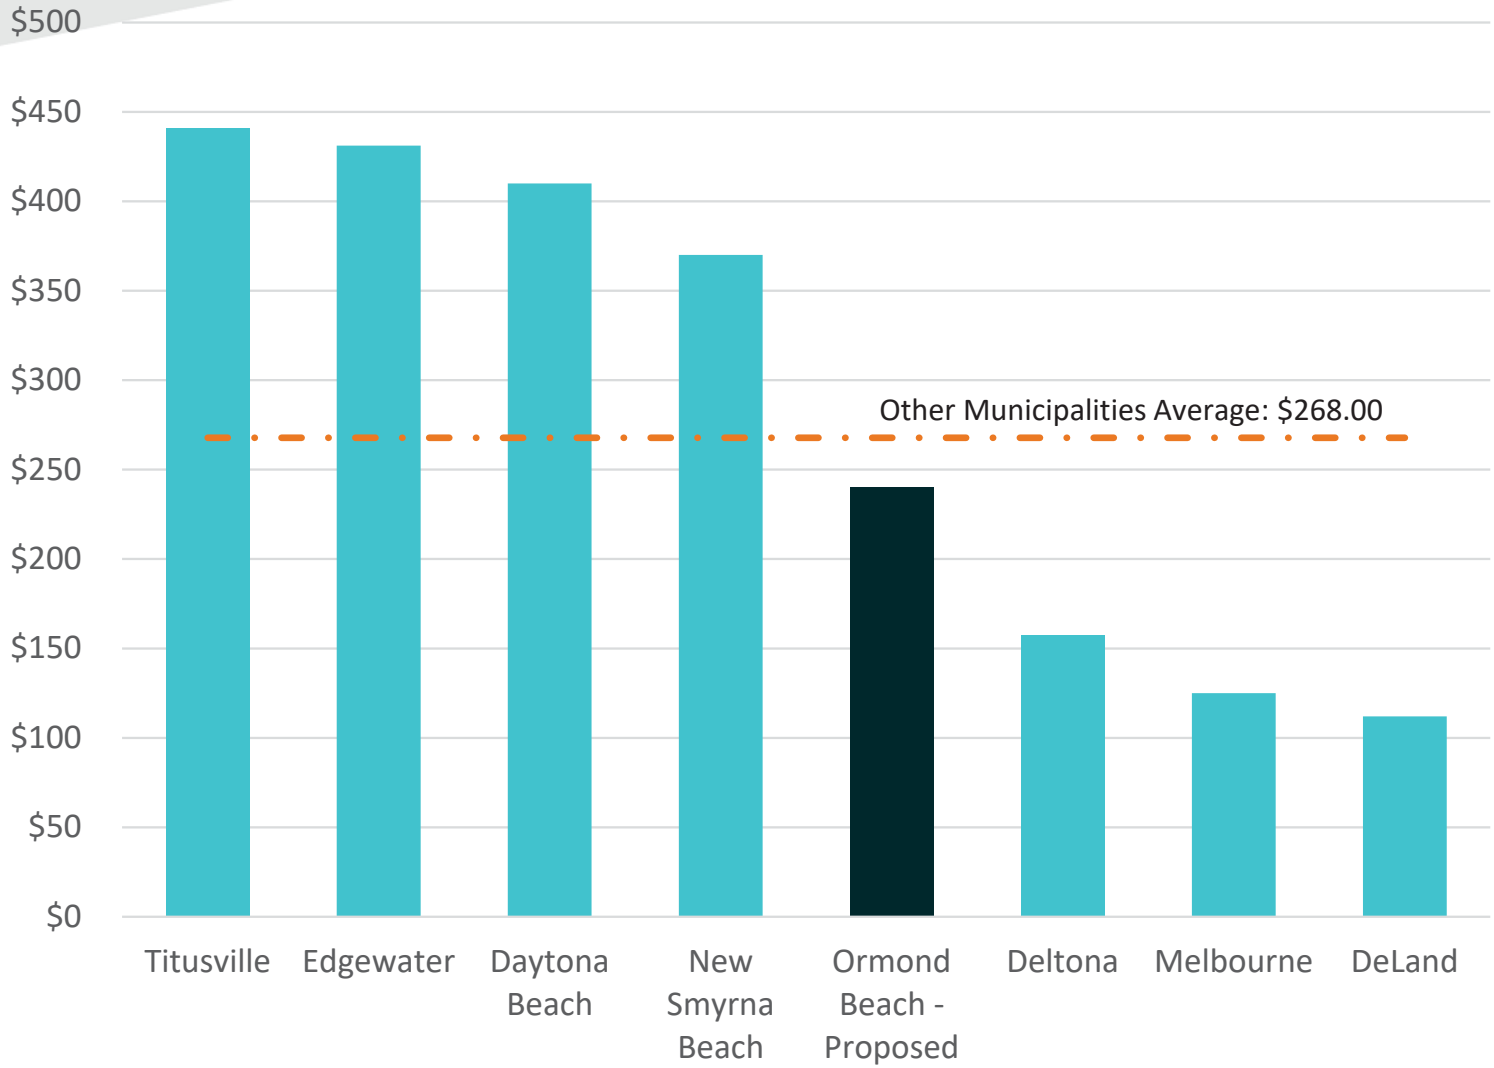
Level of Service

- Department provides law enforcement and crime prevention services to the community
- Existing level of service
  - City currently provides1.66 officers per 1,000 residents
  - Total of 94 police personnel
    - 74.0 officers – included in level of service calculation
    - 14 administrative / support staff – not included in level of service calculation

Existing and Future Investment

- Existing investment in department of $7.25 million
  - Equipment – $0.42 million
  - Vehicles – $3.19 million
  - Facilities and Other Capital Equipment – $3.64 million
- Total planned future investment of $3.2 million
  - Projects include vehicles replacements, roof replacement, police impound lot, and others
  - $0.28 million recognized to serve growth
- City does not anticipate any grants
- Total costs recognized in fee calculation – $6.82 million
  - Equipment costs have been excluded from the fee calculation per impact fee statute

Calculation Methodology



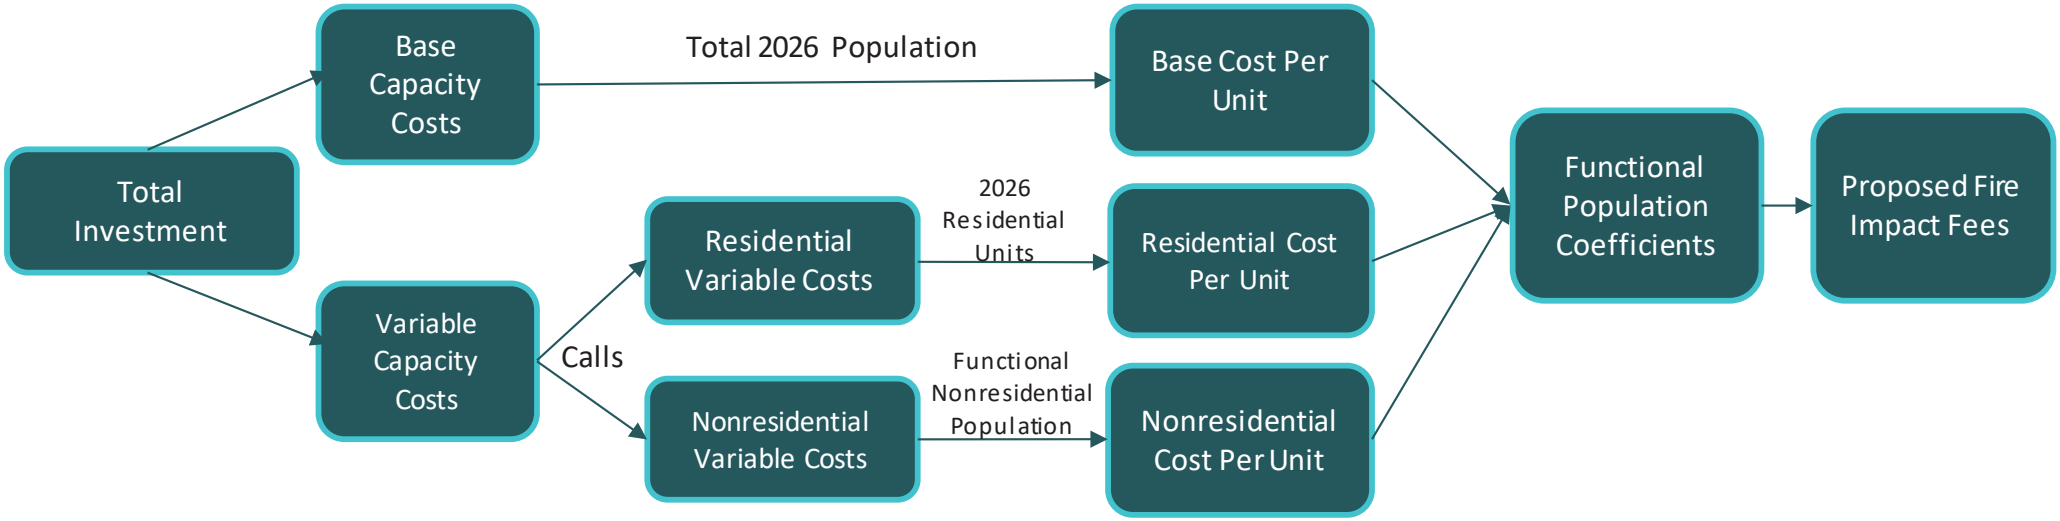
Existing and Proposed Police Impact Fees

Description	Impact Fee Unit	Proposed Fee
Residential		
Single Family	Dwelling Unit	$240.00
Multi-Family	Dwelling Unit	198.00
Mobile Home	Dwelling Unit	166.00
Non-residential		
Industrial / Warehousing	Per Sq. Ft.	$0.015
Institutional	Per Sq. Ft.	0.249
Hotel / Motel	Per Room	130.00
Office Building	Per Sq. Ft.	0.191
Retail	Per Sq. Ft.	0.336

Should none of the above land uses adequately define a proposed non-residential development as determined by the City Manager, at the Manager's discretion the following average charge per square foot of non-residential development is considered appropriate: $0.220 per sq. ft.

Police Impact Fee Comparison – Single Family

Fire Protection Services



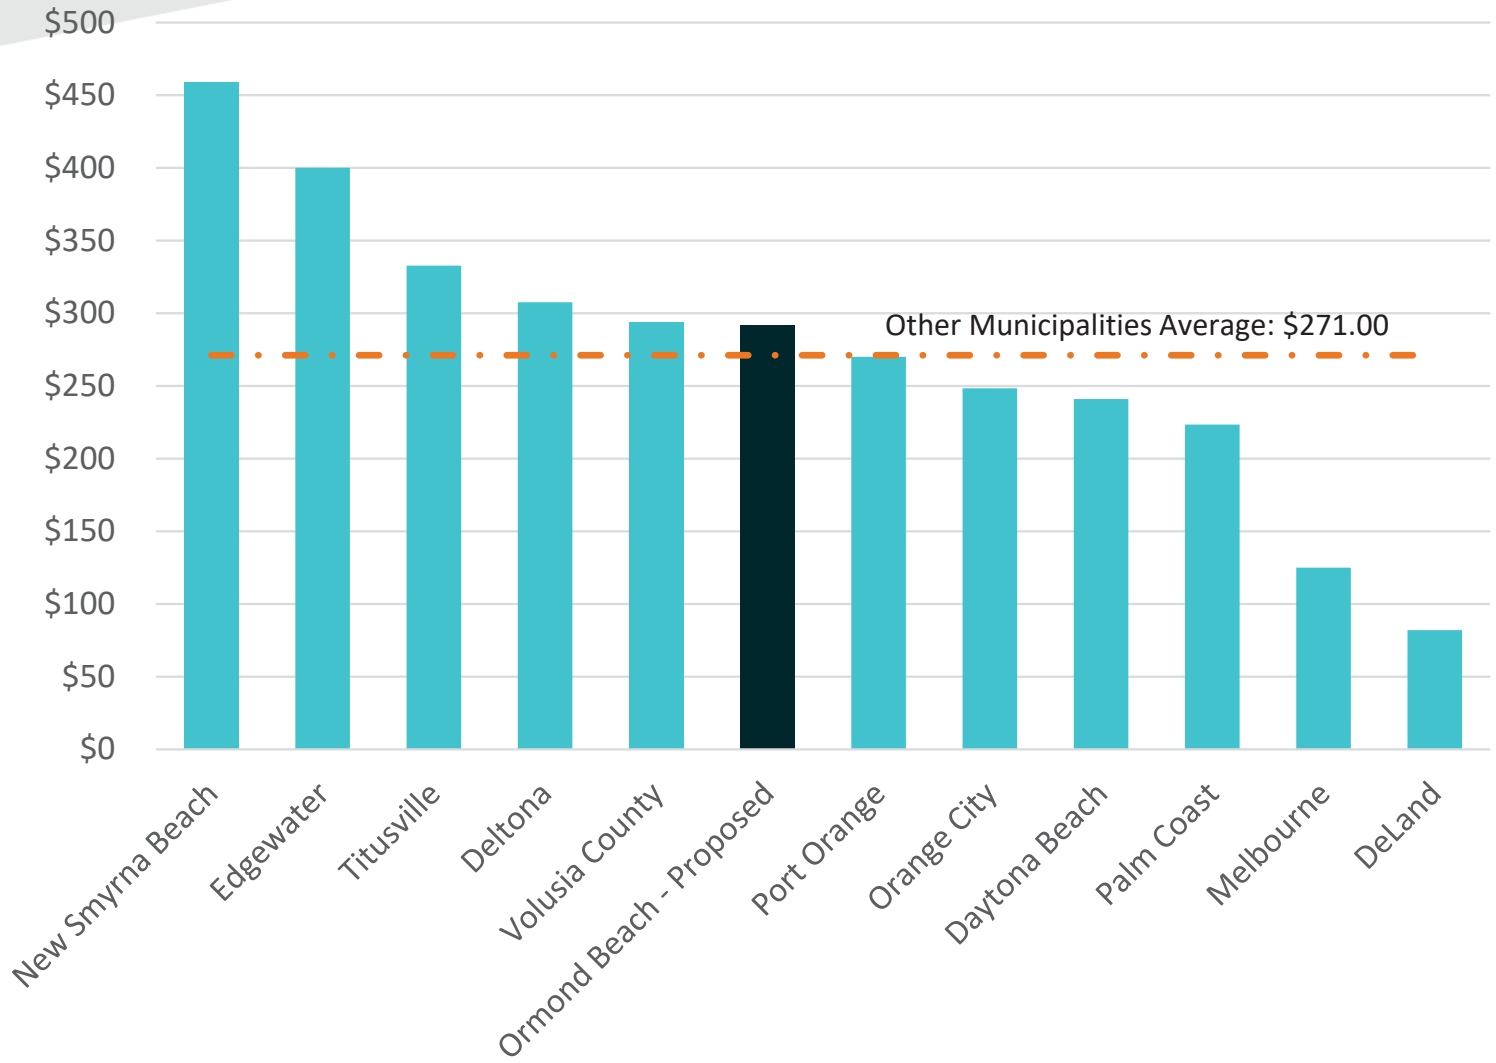
Level of Service

- Department provides fire suppression and rescue services to the community
- Existing level of service
  - Response target of four minutes with a one-minute turnout or less
  - ISO rating of 3/3X
  - City currently has a total of 48 fire department related personnel
    - 47 primary and 1 support
  - Response calls – 61.3% residential / 38.7% non-residential

Existing and Future Investment

- Existing investment in department of $9.0 million
  - Equipment – $0.70 million
  - Vehicles – $3.23 million
  - Facilities and Other Capital Equipment – $5.09 million
- Total planned future investment of $1.73 million
  - Projects include new apparatus, generators, station alerting, and others
  - $0.68 million recognized to serve growth
- City does not anticipate any grants
- Total costs recognized in fee calculation – $9.0 million
  - Equipment costs have been excluded from the fee calculation per impact fee statute

Calculation Methodology



Existing and Proposed Fire Impact Fees

Description	Impact Fee Unit	Proposed Fee
Residential		
Single Family	Dwelling Unit	$292.00
Multi-Family	Dwelling Unit	262.00
Mobile Home	Dwelling Unit	240.00
Non-residential		
Industrial / Warehousing	Per Sq. Ft.	$0.019
Institutional	Per Sq. Ft.	0.320
Hotel / Motel	Per Room	167.00
Office Building	Per Sq. Ft.	0.245
Retail	Per Sq. Ft.	0.432

Should none of the above land uses adequately define a proposed non-residential development as determined by the City Manager, at the Manager's discretion the following average charge per square foot of non-residential development is considered appropriate: $0.454 per sq. ft.

Fire Impact Fee Comparison – Single Family

Recommendations

- Adopt proposed police and fire impact fees
- Review fees periodically development trends
  - Level of service requirements
  - Capital needs
  - Major changes in growth projections
- 90 Day grace period from City approval to effective date

Tentative Schedule

Tentative Date	Meeting
March 9, 2023	Planning Board discussion item
Week of March 20, 2023	1st public meeting - Extraordinary circumstances public meeting (state statute)
Week of March 27, 2023	2nd public meeting - Extraordinary circumstances public meeting (state statute)
April 13, 2023	Planning Board -Impact Fee Ordinance (LDC portion)
May 16, 2023	City Commission (1st) - Impact Fee Ordinance
June 6, 2023	City Commission (2nd) - Impact Fee Ordinance
September 4, 2023	Effective date of Impact Fee Ordinance

Policy Direction Sought

1. Should the impact fee credit revision occur now (could be completed by May 2, 2003) versus the fall of 2023.
2. Staff is seeking verification that the desired park and recreation impact fee is the maximum supportable fee and if the fee should be implemented in one year or two years.
3. Should the local road impact fee schedule include drive thru restaurants in the restaurant fee category?
4. Should the local road impact fee schedule include convenience stores in the retail fee category?
5. What mobility fee per person trip mobility fee should be assessed?
6. Any comments/concerns on the new analysis presented for police and fire impact fees.

CITY OF

Ormond Beach

Municipal Impact Fee Study

March 22 and 27, 2023

RAFTELIS

Study Background and Objectives

- Utility connection fee and municipal impact fee study was initiated in June of 2021
- Study scope included the following tasks
  - Review and update existing water and wastewater utility connection fees
  - Review and update existing recreation, stormwater, and transportation (local roads and mobility) impact fees
  - Develop new police and fire impact fees
- Review/update fee application methods
- Review historical and planned future investment to meet demands of new growth

Impact Fee Basics

- Fees are one-time charges paid by new development and expansions that result in an increased demand for municipal services
- Fees used to pay for growth-related facilities
  - Can not be used to cure deficiencies in level of service attributed to existing development
  - Can not be used to fund operation and maintenance costs
- Adequate fee levels prevent passing growth-related costs from burdening existing residents

Legal Considerations

The basis for impact fees and related criterial have been developed under Florida Statutes and case law

Florida Impact Fee Act History

- Florida Legislature created section 163.31801 of the Florida Statues governing impact fees
- Created June 14, 2006
- Amended 2009, 2011, 2019, and most recently in 2021

Legal Considerations (cont.)

- Section 163.31801 Florida Statutes
  - Among other requirements…

(4) At a minimum, each local government that adopts and collects an impact fee by ordinance and each special district that adopts, collects, and administers and impact fee by resolution must:

a. Ensure that the calculation of the impact fee be is based on the most recent and localized data.

b. Provide for accounting and reporting of impact fee collections and expenditures and account for the revenues and expenditures of such impact fee in a separate accounting fund.

c. Limit administrative charges for the collection of impact fees to actual costs.

d. Provide notice at least 90 days before the effective date of an ordinance or resolution imposing a new or increased impact fee. A local government is not required to wait 90 days to decrease, suspend, or eliminate an impact fee...

Legal Considerations (cont.)

- Section 163.31801 Florida Statutes

(6) A local government, school district, or special district may increase an impact fee only as provided in this subsection:

a. An impact fee may be increased only pursuant to a plan for the imposition, collection, and use of the increased impact fee which complies with this section.

b. An increase to a current impact fee rate of not more than 25 percent of the current rate must be implemented in two equal annual increments beginning with the date on which the increased fee is adopted.

c. An increase to a current impact fee rate which exceeds 25 percent but is not more than 50 percent of the current rate must be implemented in four equal installments beginning with the date the increased fee is adopted.

d. An impact fee increase may not exceed 50 percent of the current impact fee rate.

e. An impact fee may not be increased more than once every 4 years.

Legal Considerations (cont.)

- Section 163.31801 Florida Statutes
  - Limitations on increasing Impact Fees

(g) A local government, school district, or special district may increase an impact fee beyond the phase-in limitations established… providing the follow criteria are met:

1. A demonstrated-need study justifying any increase in excess of those authorized in paragraph (b), paragraph (c), paragraph (d), or paragraph (e) has been completed within the 12 months before the adoption of the impact fee increase and expressly demonstrates the extraordinary circumstances necessitating the need to exceed the phase-in limitations.
2. The local government jurisdiction has held not less than two publicly noticed workshops dedicated to the extraordinary circumstances necessitating the need to exceed the phase-in limitations set forth in paragraph (b), paragraph (c), paragraph (d), or paragraph (e).
3. The impact fee increase ordinance is approved by at least a two-thirds vote of the governing body.

Extraordinary Circumstances

- Significant existing and planned future investment to provide municipal services
- Impacts of inflation on capital costs
- Additional growth through 2040 will result in additional demand on City services
  - Growth of approximately 6,000 people through 2040 (or additional 18%)
  - Will require additional capital facilities/investment to maintain levels of service
- Estimated revenue impacts (assumed residential only)

Description	Revenue Existing Fees Through 2040	Revenue Proposed Fees Through 2040	Revenue Increase
Recreation	$3.1 million	$5.9 million	$2.8 million
Local Roads	$0.4 million	$2.0 million	$1.6 million
Total	$3.5 million	$7.9 million	$4.4 million

Fee Calculation Methodology

- Develop population and unit forecast
- Review levels of service
- Identify existing investment and future projects to serve growth
- Rate calculated per residential dwelling unit (single family, multi-family, and mobile home) for parks and recreation
- Rate calculated for residential and non-residential developments uniquely based on type of customer for transportation

Service Area Forecast

Existing and Projected Population and Dwelling Units [1]			
Year	Total Population	Total Dwelling Units	Average Persons per Household [2]
2020	43,080	18,489	2.33
2022	44,677	19,175	2.33
2025	45,829	19,669	2.33
2030	48,167	20,673	2.33
2040	50,630	21,730	2.33

[1] Future population estimates based on a review of historical population growth as obtained from the US Census Bureau and from projections from the City.

[2] Average persons per household shown is the weighted average between single family at 2.53 persons per unit, multifamily at 2.05 persons per unit, and mobile home at 1.68.

Municipal Impact Fee Highlights

- Population growth of approximately 6,000 additional people through 2040 (or 18%)
- The City will need to acquire an additional 50.74 acres of open space by 2040 to maintain its level of service
- Net existing and planned future investment (after grants) in recreational facilities of $49.9 million
- Average cost per lane mile of now $4.1 million
- Updated trip generation factors per ITE 11th Edition

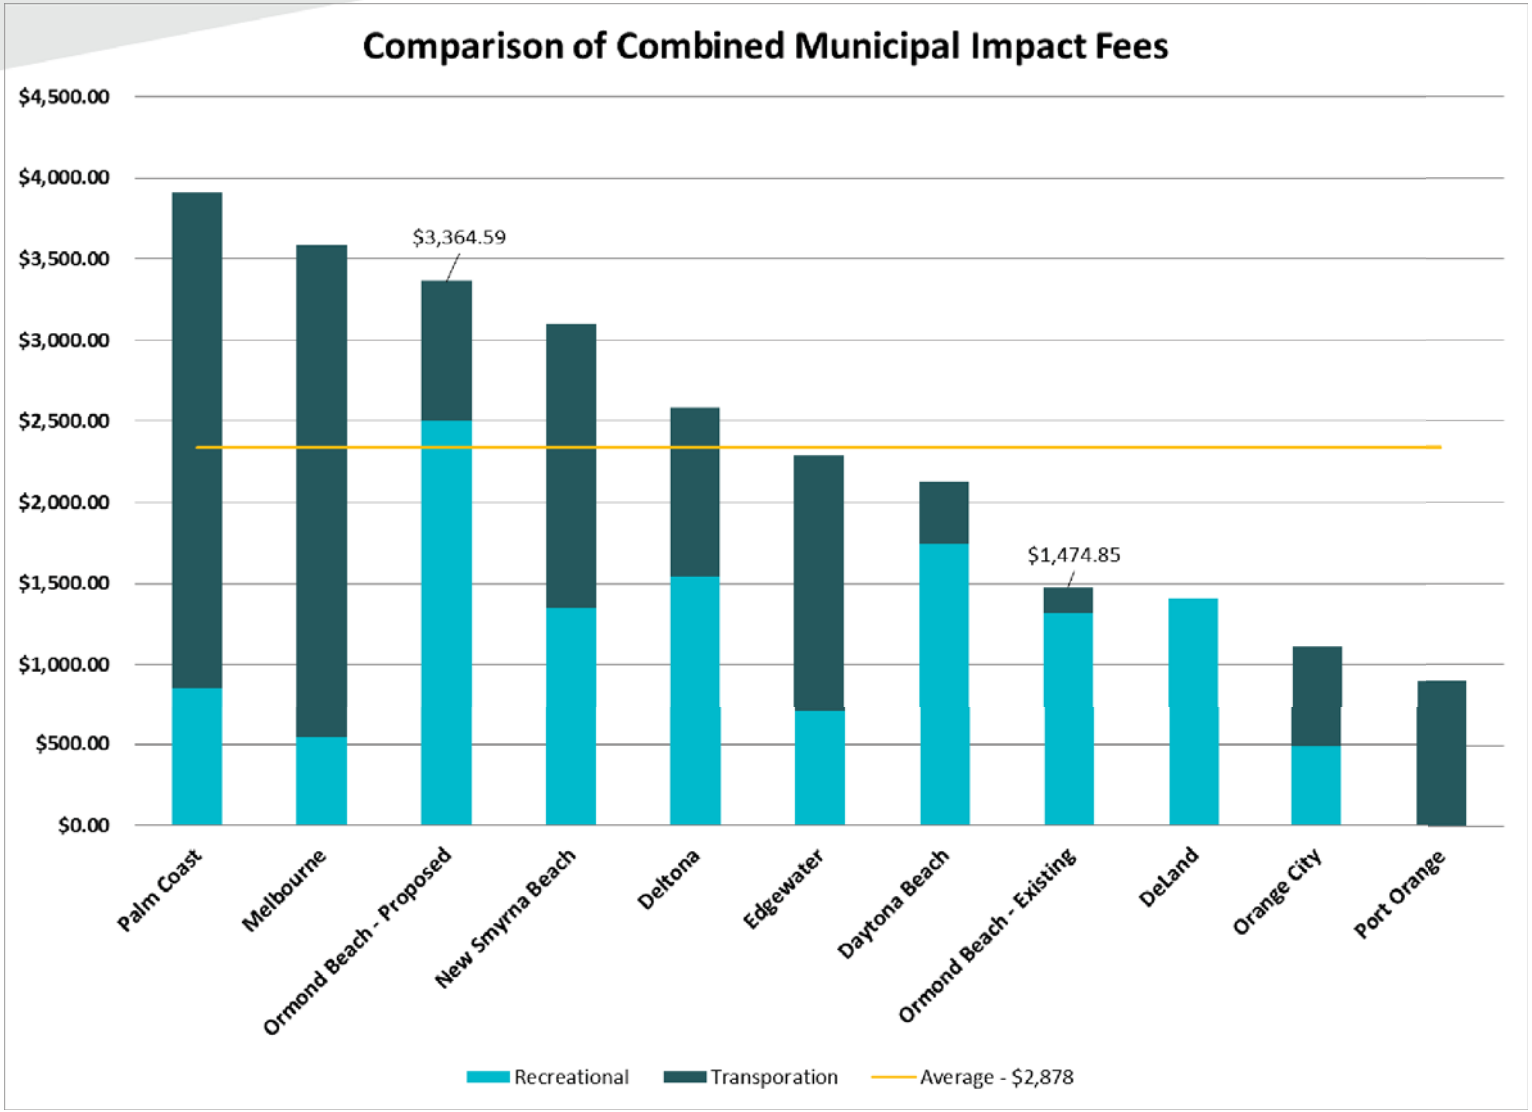
Existing and Proposed Parks and Recreation Impact Fees

Description	Existing Fees	Maximum Supportable Fees	Increase / (Decrease)
Single Family per Unit	$1,312.24	$2,500.00	$1,187.76
Multi-Family per Unit	$1,048.42	$2,021.00	$972.58
Mobile Home per Unit	$785.74	$1,658.00	$872.26

Description	Revenue Existing Fees 2040	Revenue Proposed Fees 2040	Est. Revenue Increase
Recreation	$3.1 million	$5.9 million	$2.8 million

Existing and Proposed Transportation Impact Fees

- Existing and proposed local road impact fees



Land Use	Unit	Proposed Fee	Current Fee
Single Family	DU	$864.59	$162.61
Multi-Family	DU	$548.32	$162.61
Mobile/Manufactured Home	DU	$740.33	$162.61
Hotel/Motel	Rooms	$355.87	$114.85
General/Government Office	KSF	$1,709.28	$230.83
Medical Office	KSF	$3,434.79	$1,014.31
Hospital	KSF	$1,114.66	$212.64
Nursing Home	Beds	$268.79	n/a
Industrial	KSF	$450.23	$100.07

Land Use	Unit	Proposed Fee	Current Fee
General Commercial (<40,000)	KSF	$3,736.72	$834.64
General Commercial (40,000-150,000)	KSF	$5,559.09	$802.81
General Commercial (<150,000)	KSF	$2,539.87	$602.67
Restaurant	KSF	$5,593.44	$881.26
General Recreation	KSF	$2,996.69	$59.13
Schools	Students	$226.79	n/a
Church	KSF	$790.25	$150.09
Day Care	KSF	$4,951.51	$329.27
Bank	KSF	$6,782.33	$1,355.44
Warehouse	KSF	$176.56	$100.07

Description	Revenue Existing Fees 2040	Revenue Proposed Fees 2040	Est. Revenue Increase
Residential	$0.4 million	$2.0 million	$1.6 million

- Existing and proposed mobility fees
  - Existing fee - $16.00 per person trip
  - Proposed fee - $85.67 per person trip

Recreation and Local Roads Impact Fee Comparison

Conclusions and Recommendations

- Adopt proposed recreation and transportation municipal impact / mobility fees
- Implement full fees while meeting extraordinary circumstances procedural requirements to comply with Florida Statutes
- By updating impact fees, the City minimizes the cost burden of growth to existing residents and businesses
- 90 Day grace period from City approval to effective date

From September 7, 2022
Discussion Item

City Commission Minutes

	Commissioner Kent	Yes
	Commissioner Persis	Yes
	Commissioner Littleton	Yes
Carried.	Mayor Partington	Yes

Item #11 – Discussion and Direction Items

Item #11A – Impact Fee Update Study

Mr. Steven Spraker, Planning Director, stated the discussion item was to review the Impact Fee Update study that was previously approved to be conducted. He reviewed the process if the Commission agreed to move forward. He explained where the impact fees would be utilized including growth-related facilities. He stated the first recommendation from the study was for no expiration of impact fee credits.

Mr. Tony Hairston, Raftelis Financial Consultants (Raftelis), reviewed the water and wastewater utility connection fee analysis. He discussed the existing and proposed water and irrigation connection fees as well as the wastewater connection fees and the comparison between the fees with other local municipalities. He explained the study recommended the creation of a Western Service Area.

Commissioner Selby inquired why the water connection fees were going down; whereby, Mr. Hairston stated the recommendation was based on current plans for improvements and funds needed. Commissioner Selby inquired if the city owed a refund to the citizens; whereby, Mr. Hairston stated that was not the case but could be in a few years if the fees were not amended. Commissioner Selby inquired how Raftelis came up with the equivalent living unit (ELU) factors for the multi-family and mobile homes and requested Raftelis and staff provide the calculations that justify the increased ELU factor.

Mr. Hairston reviewed the municipal impact fee analysis and the city service area forecast, parks and recreation impact fee analysis and stormwater impact fee analysis.

Mayor Partington inquired if Raftelis helped other municipalities find extraordinary circumstances; whereby, Mr. Hairston confirmed they had. Mayor Partington asked if there were examples of extraordinary circumstances; whereby, Mr. Hairston stated cost and growth increases.

Commissioner Selby stated he agreed with the stormwater impact fee removal and to start recurring stormwater fees, as the city needed a program to assist with the runoff water.

Commissioner Persis agreed with Commissioner Selby.

Ms. Stephanie Shealey, Kittleson and Associates, reviewed the local roads and mobility fee analysis. She explained there were significant increases to the local road impact fees based on current costs and new calculation methods. She reviewed the comparison of the local road fees with nearby municipalities.

Commissioner Selby inquired if the mobility impact fees were restricted to alternative methods; Ms. Shealey stated the funds could be used for methods, such as trails or parallel facilities. He inquired about the roads the city previously built; whereby, Mr. Spraker stated the extension of Division Avenue, Wilmette Avenue and local roads in the north United States Highway One (U.S.-1) corridor. Commissioner Selby inquired if there were zones related to the mobility and local road impact fees; whereby, Mr. Spraker stated there were no zones and they could be applied city wide.

Commissioner Persis inquired if a trail would be considered a road; whereby, Ms. Shealey stated it would be considered a passing improvement.

Commissioner Littleton inquired if the funds could be utilized for land acquisition; whereby, Mr. Spraker stated if the land was for road capacity improvement then it would be allowed.

Commissioner Selby reviewed the formula and inquired why the number of trips per household were so high; whereby, Ms. Shealey stated the trips included deliveries, garbage trucks, school buses and others.

Mr. Hairston reviewed the police and fire impact fee feasibility analysis and reviewed the comparison between local municipalities. He reviewed the comparison of all proposed fees combined with other local municipalities.

Mr. Spraker noted there were eight discussion points that needed direction.

Mayor Partington suggested they review each point and allow each Commissioner to comment.

The Commission supported the first discussion point of eliminating the penalty for the impact fee credit.

The Commissioners stated they could support the maximum supportable fee with the one time increase for discussion point two, noting they would like to see what the revenue would be.

Mayor Partington stated he could support the 50 percent of the maximum supportable fee over a four-year time frame, noting he would like to see the revenue before deciding on the second discussion point.

The Commission supported discussion point four, eliminating the stormwater impact fee.

Commissioner Selby inquired on discussion point five and six, if the maximum increase was over a period of time or a one time increase; whereby, Mr. Spraker stated it would be a one-time increase.

Ms. Joyce Shanahan, City Manager, explained Volusia County was undergoing an impact fee study as well, noting she did not think the city's rate increase would lead to contractors looking at other municipalities to build within.

Mr. Spraker noted with the proposed local road and mobility fee increases the City of Daytona Beach was the only local municipality at a lower rate.

Commissioner Selby inquired if the city could temporarily suspend the impact fees, if needed, in an emergency situation; whereby, Mr. Spraker stated staff would look into it.

Commissioner Kent expressed his concerns with the increases on the fast food and convenience stores local road impact fees. He stated the impact fees do need to increase but had concerns on multiple local road impact fee items.

Commissioner Littleton inquired what roads would need to be improved; whereby, Mr. Spraker stated the north U.S.-1 corridor had many roads that need improvement.

The Commission agreed on discussion points five and six for a one time increase.

Mr. Spraker explained discussion points seven and eight were for an authorization to create police and fire impact fees.

The Commission agreed to approve an authorization for police and fire impact fees as public safety was very important for new equipment, technology and vehicles.

Item #11 – Reports, Suggestions, Requests

Impact Fees
Ms. Shanahan thanked the Commission for their input and reviewed the process for moving forward.

Commissioner Selby discussed the possible local road fees for various businesses around the city and thanked staff for the creation of the Western Service Area.

Events
Ms. Shanahan informed the Commission of the Commemorative 9/11 event on September 11, 2022 at 8:30 a.m. She explained there were a couple of upcoming public meetings including a Planning Board meeting for Tattersall and neighborhood meetings for self-storage buildings and vacant properties for a hotel and single-family homes. She stated there was an email at their seats from a City of Deltona Commissioner who was starting a First Responder Challenge.

From February 21, 2023
Discussion Item

City Commission Minutes

Commissioner Persis moved, seconded by Commissioner Tolland, for approval of Resolution No. 2023-55, as read by title only.

Call Vote:	Commissioner Tolland	Yes
	Commissioner Sargent	Yes
	Commissioner Persis	Yes
	Commissioner Briley	Yes
Carried.	Mayor Partington	Yes

Mayor Partington closed the public hearings.

Item #9 – Discussion and Direction Items

Item #9A – Impact Fee Update, Including Police and Fire Impact Fees

Mr. Spraker stated the consultant would review what was discussed at the September 7, 2022 City Commission meeting, the police and fire impact fees, and noted there were five policies staff was looking for direction on.

Mr. Shawn Ocaio, Raftelis, reviewed the background on the study, connection fees, municipality impact fees, utility connection fees, impact fee credits, parks and recreation impact fees, stormwater impact fees, local road impact and mobility fees. He discussed the proposed police and fire impact fees analysis. He stated staff was looking for direction on five policies.

Commissioner Briley inquired about the drastic increase to the fees; whereby, Mr. Ocaio stated it was because of the length of time since the last update. Commissioner Briley clarified if a developer wanted to build a similar hotel to the one that was previously on the same site the developer would not have to pay the impact fee, however if the developer were to double the size of the hotel there would be impact fees on the addition.

Commissioner Persis inquired when the last impact fee update was; whereby, Mr. Spraker stated in 2011 the buildings fees were implemented, water and sewer had annual Consumer Price Index adjustments and everything else was in 1996.

Commissioner Tolland inquired what was included in the mobility fees; whereby, Mr. Ocaio confirmed trails and sidewalks would be included in the fees.

Mr. Paul Holub, 675 North Beach Street, expressed concerns regarding the fees for quick service restaurants and the Volusia County impact fees. He explained the county had a mechanism where a developer could pay under protest and identify actual trips for a reduced fee.

Mayor Partington inquired if there was similar mechanism for the city; whereby, Mr. Spraker stated there was an alternative analysis with the trip generation study to be reviewed by staff and noted if it was rejected by staff the applicant could appeal and bring it before the Commission.

Mr. Spraker stated it was a policy before the Commission tonight to decide if they would like to keep the quick service – drive-thru restaurants in their own category or be included in the restaurant category.

Mayor Partington inquired about the impact fees when the property was on a state or county road when the fees can only be used on local roads; whereby, Mr. Spraker stated the trips had impacts on local roads due to the trip generation starting points.

Commissioner Briley inquired if a drive-thru restaurant would be entitled to a refund if the actual trip generation did not meet the expected trip generation totaling the larger mobility fee amount; whereby, Mr. Spraker stated the drive-thru restaurant could apply for a refund. Commissioner Briley inquired if the developer could utilize a trip generation from a similar drive-thru restaurant; whereby, Mr. Spraker stated a similar drive-thru restaurant would be sufficient or to wait until after the restaurant opened and apply for a refund based on actual trips.

Mayor Partington stated the first policy staff was looking for direction on was if the impact fee credit revision should occur immediately or in fall of 2023; whereby, the whole Commission agreed to immediately.

Mayor Partington explained the second policy staff was looking for direction on was verification that the desired park and recreation impact fee should be the maximum supportable fee and if the fee should be implemented in one year or two; whereby, the whole Commission agreed to the maximum supportable fee implemented in one year.

Mayor Partington noted the third policy staff was looking for direction on was if the local road impact fee schedule should include drive-thru restaurants in the restaurant fee category. He stated he believed the category should be closer to $13,000 to $15,000; whereby, Commissioner Persis stated she believed $15,000 to $20,000 would be sufficient.

Mr. Spraker stated the Commission could not lower just one category, all categories would need to be lowered. He stated the Commission could recommend a lower percentage uniformly throughout the categories or could include the drive-thru restaurants in the restaurant category.

Ms. Shanahan confirmed there was a consensus for the drive-thru category to be included in the restaurant category.

Mayor Partington inquired about the fourth policy staff needed direction on, if the local road impact fee schedule should include convenience stores in the retail fee category; whereby, Commissioner Tolland stated she believed it should fall under the general commercial category, noting the category had delineations based on building size.

Mayor Partington stated the consensus of the Commission was to include the convenience stores in the general commercial category.

Mayor Partington explained the fifth policy staff was looking for direction on was what mobility fee per person trip, mobility fee should be assessed; whereby Mr. Spraker reviewed five options.

Ms. Shanahan confirmed there was a consensus for option one, proposed full mobility fee.

Mayor Partington inquired if there were any comments or concerns regarding the new analysis presented for the police and fire impact fees.

There were no further comments.

Item #10 – Reports, Suggestions, Requests

Events

Ms. Shanahan stated K-9 Rex would retire on Friday, February 24, 2023. She stated Police Chief Jesse Godfrey, Corporal Rhett Summerlot and Officer Rafael Medina would ride in the Police Unity Tour from May 8 through May 14, 2023 starting in Portsmouth, Virginia and ending in Washington D.C. She discussed the Reel in the Fun tournament, Movies on the Halifax, Art in the Park, Taste of Ormond, Celtic Festival and Walk with the manager events. She discussed the memorial for Ormond Beach Firefighter Ethan Wilson.

Commissioner Persis stated she attended the Seabreeze High School ribbon cutting for their agricultural program and the ribbon cutting at the Riverbend Natural Park.

Commissioner Briley discussed the events he attended including Economic Prosperity Hour, Riverbend Natural Park ribbon cutting, and Seabreeze High School agricultural program ribbon cutting.

Commissioner Tolland mentioned the events she attended including the ribbon cutting at the YMCA, Riverbend Natural Park ribbon cutting, Bear Creek talent show, and the Reel in the Fun fishing tournament. She stated she attended the Ormond MainStreet meeting and provided an update.

Commissioner Sargent discussed the Reel in the Fun fishing tournament. He inquired if the link to the fundraising for the Police Unity Tour could be posted to social media.

Planning Board minutes from March 9, 2023

ITEM:

LDC-2021-019

Land Development Code Amendment: Impact Fee Study Update – Connection, Mobility, and Impact Fee amendments

Discussion Item

advise given from the City's consultant that the impact fees should not be expired. If a use was there and it was demolished, the impact fees have been pain and satisfied, and the provision should be removed from the Code. The fees can be transferable by state law, therefore it is being asked for item C to be struck from the amendment.

Ms. Shull asked what impact fees pay for. Mr. Spraker replied that impact fees pay for capital facilities that new development creates, such as waterlines, sewer lines, capacity of the plant, turn-lane, sidewalk, trail, park and recreation. It allows capital facilities that are needed based on new growth. Examples were discussed.

Chairman Thomas ensured that no one from the public was present to speak on the subject, then opened it up to the Board for discussion and entertained a motion.

Mr. Railsback motioned to approve LDC 2021-019, Land Development Code Amendment: Section 1-27, Impact Fees. Mr. Galloway seconded it. Vote was called, and the motion was approved (7-0).

VIII. PUBLIC COMMENTS

The opportunity was announced and it was determined that there was no one in attendance that wished to deliver any public comments.

IX. OTHER BUSINESS

A. Impact Fee Study Update

Mr. Spraker reviewed the City of Ormond Beach Connection and Impact Fee Summary, and the Police and Fire Impact Fee Study that was in the Planning Board packet and displayed overhead that was put together with the help of the contracted company Raftelis Consultants over 2021-2023. He stated a Land Development Code (LDC) Amendment will be presented to the Board.

Mr. Spraker stated that impact fees are paid by new development and expansions for increased demand for services and as growth and new development happens there are impacts to water, sewer, roads, park and recreation, police and fire. The basis for impact fees and related criteria have been developed under Florida Statutes and case law. Mr. Spraker continued that there was a Florida Impact Fee Act that was created in 2006 and recently amended in 2021.

Mr. Spraker explained that the consultant, Raftelis, provided the conditions and parameters of impact fees and state that it has to be based on the most recent localized data, looking at the city-capital costs and what the city's population is. He added that 90 days-notice is required before imposing a new or increased fee. Regarding legal considerations and criteria, Mr. Spraker stated that there is a dual rational nexus based on the cost of capacity to serve new growth where impact fees must be based on the capital cost requirements anticipated for providing service to new development. Impact fees must be based upon reasonable level of service standards that meet the needs of the City. Mr. Spraker emphasized that impact fees cannot be used to fund deficiencies in capital needs of the city or pay for any operating costs. It can be used for a new capacity and in a specific matter.

Mr. Spraker reviewed information on water and sewer impact fees and stated that the City has had the water and sewer impact fee since 1974. It was suggested to change

the term impact fee to a 'connection fee' which has been done throughout the State of Florida. He added that it was also recommended to add a western service area. The difference in existing and proposed fees were explained, showing that the water went down and the sewer went up for single-family unit, based on capital costs.

Mr. Spraker reviewed information on stormwater impact fees. The consultant researched and discovered that they could not find another jurisdiction with a stormwater impact fee as most use stormwater fees. It was recommended to delete the stormwater impact fee and City Commission agreed.

Mr. Spraker reviewed information on park and recreation impact fee. There were questions regarding reducing the Impact Fee or extend it over time. The City Commission provided direction to go to the full maximum justifiable amount over a one-year period.

Board Comments and Questions

Chairman Thomas commented on the park and recreation impact fee, stating that the amount is justifiable due to the amount of people that are increasingly using it and the cost of the astronomical maintenance and repairs. He concluded that the City of Ormond Beach has beautiful facilities and believes that it is in the best interest of Ormond Beach to continue to maintain them.

Mr. Spraker reviewed information on the local roads impact fee. The fast-food and convenience store were included in other, larger categories as recommended by the City Commission.

Ms. Shull remarked that there is a lot of traffic from other areas that impact the City of Ormond Beach roads and inquired about the ITE (Institute of Transportation Engineers) Trip Generation. Mr. Spraker answered that the regional model is put into the model for the ITE Trip Generation for local roads, not Granada Boulevard or Volusia County-maintained roads. Ms. Shull emphasized the amount of overflow the City of Ormond Beach roads receive from other cities and expressed concern about it skewing the numbers. It was emphasized that ITE is used to determine traffic flows, now in the 11th Edition, the newest edition and is up to date.

Mr. du Moulin concurred with Ms. Shull, and commented about the growth on Williamson Boulevard and Clyde Morris Boulevard with commuters from other areas using the City of Ormond Beach roads and inquired if the study took it into account. Mr. Spraker replied that they did so through a regional model. He added that they are paying a Volusia County impact fee. The uses are paying both local roads and Volusia County, as well as their own jurisdiction.

Mr. Railsback delivered his knowledge of what he learned when he worked with Impact Fees himself, and noted that the model previously discussed, serves as the basis for defense of the reason for a specific charge, coordinating with data related to the regional entity/municipality, the County, and identifies how and why the City is charging that same user twice.

Mr. du Moulin inquired about the fire and police impact fee. Mr. Spraker explained that they do a calculation and then come up with what the City can charge at a

maximum, based on the capital facilities and new growth. He added that for police and fire, they cannot use it for operations. It can be used for new service. If setting up a new zone, they can buy a new car, truck, or part of a truck, and do existing building additions, and can do an Emergency Operations Center (EOC).

Mr. Jorczak inquired if anyone in the area is required to review and integrate the information into any decision process and bless the City's decision on the fees. Mr. Spraker answered that the blessing will come through the Ordinance and Planning Boards recommendation and the City Commission's action based on the data analysis generated from Raftelis over three studies. He reiterated that these are only Ormond Beach impact fees.

Mr. Spraker stated the report recommended that the Impact Fees be reviewed every five years so there is not such a large increase.

Mr. Galloway expressed his concern with impact fees, commenting that they are like an artificial tax, going by a different name. He continued that the end users are really the ones who

Mr. Scudiero inquired what was sought from the Board at this meeting.

Mr. Spraker stated that the City Commission has already given direction on the impact fees update, but welcomed the expression of opinions on the subject from the Planning Board, as it is not absolute yet. Mr. Spraker continued that the goal is not to surprise the Board with the Ordinance and to make all aware of the background data and analysis and to identify any concerns.

Mr. Spraker reviewed information on the mobility fees, different than local road Impact Fees and were enacted in 2011. The City adopted mobility fees for corridors physically or politically constrained; Granada Boulevard from Williamson Boulevard to Atlantic Avenue (A1A); A1A south and portions of U.S. Highway 1. Those roads are not designated to be extended. Mr. Spraker explained that in those areas, mobility fees are charged and can be used for a broader range of uses, or pay for transit, trails or sidewalks. Outside those three corridors, the local road Impact Fee would pay.

Mr. Spraker reviewed information on the police impact fees and explained that they are not assessed today. He reviewed the single-family residential change comparison and increase of fees, showing how the water and stormwater are less.

It was asked how much time has been put into the impact fee study. It was said to be a considerable amount of time to gather the data and for the study to be done itself, including staff time and consultant time. Mr. Spraker reviewed the tentative schedule regarding the Ordinance.

XI. MEMBER COMMENTS

Mr. Railsback commended the staff for their hard work and input on the impact fees update.

Mr. Jorczak asked about City property at the park next to Riverbend, and the status of how it will fit into the City plans for recreation and if since it is adjoining the study going on for the airport property, if the two will be integrated them. Mr. Spraker

DRAFT

Planning Board minutes from

April 13, 2023

ITEM:

LDC-2021-019

Land Development Code Amendment: Impact Fee Study Update – Connection, Mobility, and Impact Fee amendments

Mr. Jorczak asked if existing building codes would impact replacement mobile homes. Mr. Spraker stated that the amendment was solely related to setbacks and all building code requirements would be applicable.

Mr. Galloway asked if this would apply to the mobile home park along U.S. Highway 1, north of Granada Boulevard. Mr. Spraker stated that this property was zoned as B-4, Central Business, and this amendment would not be applicable to that property.

Ms. Shull ensured that no one from the public was present to speak on the subject, then opened it up to the Board for discussion and entertained a motion.

Mr. Scudiero motioned to approve LDC 2023-043, Land Development Code Amendment: Section 2-21, T-2, Manufactured Home, Special Standards. Mr. du Moulin seconded it. Vote was called, and the motion was approved (6-0).

G. LDC 2021-019, Land Development Code Amendment: Impact Fee Study Update – Connection, Mobility, and Impact Fee Amendments

Mr. Spraker, Planning Director, explained the administrative amendment to the Land Development Code (LDC), to implement the recommendations of the impact fee study update. Mr. Spraker recalled this item was discussed at the March Planning Board meeting. Mr. Spraker displayed a PowerPoint of the proposed amendments that included the following key points:

1. Water and sewer: Changed terminology from impact fees to connection fees.
2. Water: Connection fee amended from $2,902 to $2,333 for an equivalent living unit (one single-family house).
3. Sewer: Connection fee amended from $2,829 to $3,577 for an equivalent living unit.
4. Stormwater: Delete stormwater impact fee and rely on stormwater connection fee.
5. Park & Recreation: Amended parks & recreation impact fee from $1,312.24 to $2,500 for a single family residential unit.
6. Discussed the mobility fee and there may be a desire to reduce the selected option because it assesses the maximum fee that can be justified.
7. Updated the local road impact fee based on use categories.
8. Created police and fire impact fees.

Mr. Spraker reviewed the total changes which were primarily the local road and park and recreation impact fee for a single-family house. Mr. Spraker detailed the project scheduled and stated that there is a 90-day effective period for the implementation of the impact fees. Mr. Spraker concluded that staff recommends approval.

Ms. Shull opened it up to the Board for discussion and entertained a motion.

Board Questions

Mr. du Moulin inquired to the stormwater impact fee. Mr. Spraker stated that no other Florida jurisdictions are assessing this and instead relying on the stormwater fee as part of the utility assessments.

Mr. Jorczak asked Mr. Spraker if he was aware that the State of Florida overruled a county impact fees. Mr. Jorczak asked what the impact of a ruling like that would be. Mr. Spraker stated he was unaware of this case. He stated that the state has established perimeters and regulations regarding impact fees which is why the City hired an expert on impact fees.

Attorney Hayes explained that the State Legislature has established laws for the implementation of impact fees. Attorney Hayes stated he was not aware of the specific case referenced. Attorney Hayes stated that the city has hired a professional consultant who has performed the data and analysis to establish the proposed fees.

Mr. Railsback explained that there is a rational nexus test for proposed fees based on the infrastructure needs of a city.

Mr. Galloway stated that it is important to remember that the end user, typically homeowners, are the ones who end up paying the impact fees.

Mr. Scudiero motioned to approve LDC 2021-019, Land Development Code Amendment: Impact Fee Study Update – Connection, Mobility, and Impact Fee Amendments. Mr. Jorczak seconded it. Vote was called, and the motion was approved (6-0).

VIII. PUBLIC COMMENTS

The opportunity was announced and it was determined that there was no one in attendance that wished to deliver any public comments.

IX. OTHER BUSINESS

None.

X. MEMBER COMMENTS

Mr. Galloway expressed the importance of everyone on the Board voting and commended staff. He commented that he is anxious to hear about the outcome of Tomoka Oaks and asked if anymore Neighborhood Meetings are required. Mr. Spraker replied that no more Neighborhood Meetings are required.

Mr. Jorczak commended Mr. Storch's work on the RidgeHaven presentation and the applicant and developers efforts in solving problems.

Mr. du Moulin thanked Mr. Spraker and further expressed his HOA concerns.

Mr. Railsback commended staff and the Boards input. He added that he is in support of the preventative action of staff looking into an ordinance amendment to further support no short-term rentals so that they do not invade our community.

Mr. Scudiero thanked Mr. Spraker.

Meeting Date: 6/6/2023	**AGENDA ITEM**		**Number:** 8.I
Section:	PUBLIC HEARINGS		
Item Category:	Public Hearing - Ordinances	**Res./Ord. No:**	2023-31
Strategic Goal:	Transportation & Community Development - Other		
Department :	Planning & Building		
Subject:	Code of Ordinance Amendments, Connection, Mobility and Impact Fees (SECOND READING)		
Budget Impact:	The Code of Ordinance amendments seek to direct all references to the LDC and update terminology, and have no budget impacts.		
Summary:	This is an administrative amendment to the Code of Ordinances, to implement the recommendations of the impact fee study update. The purpose of the proposed amendments is to move all connection and impact fee assessments to the LDC and amend any reference to water or sewer impact fees to connection fees.		
Recommended Action:	It is recommended to approve the amendments to the Code of Ordinances to update connection, mobility, and impact fees based on (1) "Water and Wastewater Utility System Connection Fee Study", (2) "Municipal Impact Fee Study" and (3) "Police and Fire Impact Fee Study". If approved, the amendments would be effective on September 4, 2023.

CITY MANAGER
MEMORANDUM

To: The Honorable Mayor Partington and City Commissioners

Through: Joyce Shanahan, City Manager

From: Steven Spraker, Planning Director

Date: June 6, 2023

Subject: Code of Ordinance Amendments, Connection, Mobility and Impact Fees (SECOND READING)

Commission Goal: Transportation & Community Development - Other

Introduction

This is an administrative amendment to the Code of Ordinances, to implement the recommendations of the impact fee study update, by amending **(1)** Section 22-2, Determination of equivalent living units, of Article I, Water, of Chapter 22, Water and Sewers, **(2)** Section 22-29, Special provisions for water for irrigation and swimming pools, of Article I, Water, of Chapter 22, Water and Sewers, **(3)** Section 22-115, Fee imposed, schedule, of Article III, Impact Fee for System Extensions, of Chapter 22, Water and Sewers, **(4)** Section 22-118, Property subject to fee; method of payment, of Article III, Impact Fee for System Extensions, of Chapter 22, Water and Sewers, **(5)** Section 22-119, Impact fee financing, of Article III, Impact Fee for System Extensions, of Chapter 22, Water and Sewers, **(6)** Section 22-132, Legislative findings; purpose, of Article IV, Hunter's Ridge-Flagler County DRI Service Area, of Chapter 22, Water and Sewers, **(7)** Section 22-133, Service area, defined, of Article IV, Hunter's Ridge-Flagler County DRI Service Area, of Chapter 22, Water and Sewers, **(8)** Section 22-135, Rates for water and sewer services; impact fees, of Article IV, Hunter's Ridge-Flagler County DRI Service Area, of Chapter 22, Water and Sewers, **(9)** Section 22-140, Impact fees, of Article IV, Hunter's Ridge-Flagler County DRI Service Area, of Chapter 22, Water and Sewers, **(10)** Section 22-162, Boundaries and purpose, of Article VI, West Ormond Utilities District, of Chapter 22, Water and Sewers, **(11)** Section 22-165, Impact Fees, of Article VI, West Ormond Utilities District, of Chapter 22, Water and Sewers, **(12)** Section 22-168, Outside city service, of Article VI, West Ormond Utilities District, of Chapter 22, Water and Sewers, **(13)** Section 22-169, Connections required, of Article VI, West Ormond Utilities District, of Chapter 22, Water and Sewers, **(14)** Section 8-421, Purpose and intent, of Article IX, Impact Fees, of Chapter 8, Buildings and Construction Regulations, **(15)** Section 8-422, Fees Imposed, of Article IX, Impact Fees, of Chapter 8, Buildings and Construction Regulations, **(16)** Section 8-423, Impact Fee financing, of Article IX, Impact Fees, of Chapter 8, Buildings and Construction Regulations, **(17)** Section 8-10, Application processing fees, of Article I, In General, of Chapter 8, Buildings and Construction Regulations, to

implement the recommendations of the water and wastewater utility system connection fee study, municipal impact fee study, and police and fire impact fee study.

Background

On May 18, 2021, the Commission authorized Resolution 2021-86 to accept a bid proposal from Raftelis for an impact fee study update to review and amend the water, sewer, park & recreation, stormwater, local road and mobility fees. The scope-of-work also provided a task for a feasibility analysis to add fire and police impact fees and make a recommendation if these fees should be pursued with a separate work authorization. The total fee for the impact fee study is $99,445. On October 5, 2022, the Commission authorized Resolution 2022-121 that authorized $31,555 for the development of Police and Fire impact fees by Raftelis.

Raftelis has performed three (3) studies that serve as the data and analysis for the Land Development Code (LDC) and Code of Ordinance amendments:

- Water and wastewater utility system connection fee study;
- Municipal impact fee study; and
- Police and fire impact fee study.

The connection, mobility, and impact fees are proposed to be contained in the LDC. There are multiple references to impact fees in the Code of Ordinances. The purpose of the proposed amendments is to move all connection and impact fee assessments to the LDC and amend any reference to water or sewer impact fees to connection fees.

Discussion

There are seventeen sections of the Code of Ordinances that are proposed to be amended. A summary of the amendments is provided below:

(1) Section 22-2, Determination of equivalent living units, of Article I, Water, of Chapter 22, Water and Sewers:
Deletion of entire section and marked as reserved. The equivalent living units are contained in the LDC sections.

(2) Section 22-29, Special provisions for water for irrigation and swimming pools, of Article I, Water, of Chapter 22, Water and Sewers:
Amended term “impact” fee to “connection” fee in Section.

(3) Section 22-115, Fee imposed, schedule, of Article III, Impact Fee for System Extensions, of Chapter 22, Water and Sewers:
Deletion of entire section and marked as reserved. Section included impact fee schedule and automatic indexing of water and sewer impact fees which is not allowed under current state law.

(4) Section 22-118, Property subject to fee; method of payment, of Article III, Impact Fee for System Extensions, of Chapter 22, Water and Sewers:
Deletion of entire section and marked as reserved. Section required payment of impact

fees prior to connection, which is contained in the LDC.

(5) Section 22-119, Impact fee financing, of Article III, Impact Fee for System Extensions, of Chapter 22, Water and Sewers:
Section allowed the deference of impact fee with a lien placed on a single-family house. Staff is not aware of any instance where this occurred since 1996.

(6) Section 22-132, Legislative findings; purpose, of Article IV, Hunter's Ridge-Flagler County DRI Service Area, of Chapter 22, Water and Sewers:
Amended term "impact" fee to "connection" fee in Section.

(7) Section 22-133, Service area, defined, of Article IV, Hunter's Ridge-Flagler County DRI Service Area, of Chapter 22, Water and Sewers:
Amended term "impact" fee to "connection" fee in Section.

(8) Section 22-135, Rates for water and sewer services; impact fees, of Article IV, Hunter's Ridge-Flagler County DRI Service Area, of Chapter 22, Water and Sewers:
Amended term "impact" fee to "connection" fee in Section.

(9) Section 22-140, Impact fees, of Article IV, Hunter's Ridge-Flagler County DRI Service Area, of Chapter 22, Water and Sewers:
Amended term "impact" fee to "connection" fee in Section. Referred connection fee reference to the LDC.

(10) Section 22-162, Boundaries and purpose, of Article VI, West Ormond Utilities District, of Chapter 22, Water and Sewers:
Amended term "impact" fee to "connection" fee in Section.

(11) Section 22-165, Impact Fees, of Article VI, West Ormond Utilities District, of Chapter 22, Water and Sewers:
Amended term "impact" fee to "connection" fee in Section. Deleted references to former impact fee amounts and referred the costs of connection fees to Section 1-25, Connection Fees, of the LDC. Deleted reference to automatic cost of living increase which is no longer allowed.

(12) Section 22-168, Outside city service, of Article VI, West Ormond Utilities District, of Chapter 22, Water and Sewers:
Amended term "impact" fee to "connection" fee in Section. Referred reference to reimbursement of line extension to the LDC.

(13) Section 22-169, Connections required, of Article VI, West Ormond Utilities District, of Chapter 22, Water and Sewers:
Amended term "impact" fee to "connection" fee in Section. Referred reference to connection fees to the LDC.

(14) Section 8-421, Purpose and intent, of Article IX, Impact Fees, of Chapter 8, Buildings and Construction Regulations:
Deletion of entire section and marked as reserved. Fee schedules for connection,

mobility, and impact fees will be within the LDC.

(15) Section 8-422, Fees Imposed, of Article IX, Impact Fees, of Chapter 8, Buildings and Construction Regulations:
Deletion of entire section and marked as reserved. Fee schedules for connection, mobility, and impact fees will be within the LDC.

(16) Section 8-423, Impact Fee financing, of Article IX, Impact Fees, of Chapter 8, Buildings and Construction Regulations:
Deletion of entire section and marked as reserved. Fee schedules for connection, mobility, and impact fees will be within the LDC.

(17) Section 8-10, Application processing fees, of Article I, In General, of Chapter 8, Buildings and Construction Regulations:
Added alternative connection or impact fee analysis fee for any project/individual that desires to perform an independent connection or impact fee analysis per the LDC requirements.

Budget Impact

The Code of Ordinance amendments seek to direct all references to the LDC and update terminology, and have no budget impacts.

Citizen Impact

There is no direct citizen impact of the amendments. The amendments ensure consistency and have one place for connection, mobility, and impact fees.

Recommendation

It is recommended to approve the amendments to the Code of Ordinances to update connection, mobility, and impact fees based on (1) “Water and Wastewater Utility System Connection Fee Study”, (2) “Municipal Impact Fee Study” and (3) “Police and Fire Impact Fee Study”. If approved, the amendments would be effective on September 4, 2023.

~~(5) Water, sewer, reclaimed water: As imposed by chapter 22.~~			

SECTION FOUR. Section 8-423, Impact fee financing, of Article IX, Impact Fees, of Chapter 8, Buildings and Construction Regulations, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby repealed in its entirety and reserved for future use:

~~Sec. 8-423. Impact fee financing.~~ Reserved

~~The provisions of sections 8-421 and 8-422 to the contrary notwithstanding, the collection of impact fees applicable to the construction of single-family owner-occupied "affordable housing," as defined in the HUD standards, within the "priority area" of the community development block grant program shall be made in the manner hereinafter described. Prior to the issuance of a certificate of occupancy for an "affordable housing" unit as aforedescribed, the owner of the real property on which the unit is constructed shall record a lien in favor of the city and equal in amount to the sum of all impact fees when applicable to the unit. The lien shall remain a lien, coequal with the lien of all state, county, district, and municipal taxes, superior in dignity to all other liens, titles and claims, until paid, shall bear~~

~~interest at zero percent, and shall be due and payable in full at such time as the unit is sold for consideration to a third party other than the initial occupants of the unit.~~

SECTION FIVE. Section 22-2, Determination of equivalent living units, of Division 1, Generally, of Article I, Water, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby repealed in its entirety and reserved for future use:

Sec. 22-2. ~~Determination of equivalent living units.~~ Reserved.

~~For the purposes of this article, "equivalent living units" (E.L.U.s) shall be determined in accordance with this section:~~

~~(1) *Single-family residential.* Each single-family residence served by the city through a single sewer service or water meter shall be one equivalent living unit. Each water meter other than the first provided to serve a single-family residence as an irrigation meter will be exempted.~~

~~(2) *Rooms, combinations of rooms, etc.* Each residential room, combination of rooms, apartment or prepared mobile home space that includes connection points for sewer or water service that is owner-occupied, offered separately for rent as a rental unit, or vacant shall be one equivalent living unit.~~

~~(3) *Nonresidential, commercial and industrial.* For nonresidential uses not specifically defined elsewhere in this article, the number of equivalent living units shall be computed by the building official using the fixture unit count as defined in the most recent data published by the American Water Works Association and the following table:~~

~~Fixture Units~~	~~E.L.U.~~
~~0—15~~	~~1~~
~~16—30~~	~~2~~
~~31—60~~	~~3~~
~~61—80~~	~~4~~
~~81—100~~	~~5~~
~~101—160~~	~~6~~
~~161—240~~	~~7~~
~~241—340~~	~~8~~
~~341—480~~	~~9~~
~~481—620~~	~~10~~
~~621—800~~	~~11~~
~~801—1,000~~	~~12~~
~~1,001—1,300~~	~~13~~
~~1,301—1,651~~	~~14~~

~~For each additional increment of 750 fixture units, add one E.L.U.~~

~~(4) *Combination accounts.* Accounts that contain both residential and commercial facilities served through a common meter may be treated as either residential or nonresidential, whichever method of computation results in the largest number of equivalent living units.~~

~~(5) *Changes in occupancy*. If a building permit is issued for an existing nonresidential, commercial or industrial connection which will increase water or sewer demand, or if a building changes from residential to nonresidential occupancy, the total number of E.L.U.s for the old and new parts of the facility shall be computed as outlined in subsection (3) of this section. The number of new E.L.U.s shall be determined by subtracting the old E.L.U.s from the total number of E.L.U.s in the entire facility. The fee will be assessed on the number of new E.L.U.s. As an example, if an existing building contained 150 fixture units and it was expanded to 300 fixture units, the fee would equal eight E.L.U.s minus six E.L.U.s or two E.L.U.s.~~

~~(6) *Multiple minimum.*~~

~~a. Each equivalent living unit will be subject to a minimum charge. The minimum charge for a building complex served through one water meter will be the current E.L.U. minimum for in-city or, if applicable, out-of-city accounts, for each equivalent living unit, less $0.50 for each equivalent living unit in excess of one.~~

~~b. Monthly water allowance under the minimum billing will be equal to one current allowance for single service per equivalent living unit.~~

~~c. The equivalent living unit minimum charge applies whether all or any portion of the living units are owner-occupied, renter-occupied or vacant.~~

SECTION SIX. Section 22-29, Special provisions for water for irrigation and swimming pools, of Division 2, Rates and Charges, of Article I, Water, of Chapter 22, Water and

Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 22-29. Special provisions for water for irrigation and swimming pools.

(a) *Separate meter authorized. ***No change in existing text****

(b) *Conditions of issuance. ***No change in existing text****

(c) *Credit for or refund of ~~impact~~ connection fee.* If the property is connected to the reclaimed water system within ten years of the date the ~~impact~~ connection fee required by this Code and the land development code is paid and the irrigation meter is removed from the property, the payor shall be entitled to a pro rata refund of the ~~impact~~ connection fee based on a ten-year amortization period or a credit in the amount of the said refund against any reclaimed water ~~impact~~ connection fee which may then be in effect. Only those persons paying such ~~impact~~ connection fee on and after October 1, 1990, shall be eligible for such refund or credit. Application for any refund or credit shall be made to the Finance Director at the time of connection to the reclaimed water system. There shall be no interest paid on any ~~impact~~ connection fee refunded pursuant to this subsection.

(d) *Deposit and charges. ***No change in existing text****

(e) *Water excluded in computing sewer bills. ***No change in existing text****

(f) *Charge for reading regular meter at customer request. ***No change in existing text****

(g) *Location of meters; consumer to provide connections; city's right of entry. ***No change in existing text****

SECTION SEVEN. Section 22-115, Fee imposed; schedule, of Article III, Impact Fee for System Extensions, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby repealed in its entirety and reserved for future use:

ARTICLE III. ~~IMPACT FEE FOR SYSTEM EXTENSIONS~~ RESERVED

Sec. 22-115. ~~Fee imposed; schedule~~ Reserved.

~~(a) There is hereby imposed, in accordance with section 1-27 of the land development code, an impact fee based on the city commission's determination~~

~~of the equitable portion of the cost of financing the extension of the system upon the equivalent living unit responsible for the need for additional system financing.~~

~~(b) The fees for residential units shall be imposed as follows:~~

~~(1) For each equivalent living unit connected to the system:~~

~~a. For properties within the North Mainland Water and Sewer Area (as described on Exhibit A of the ordinance from which this article is derived):~~

~~Water service impact fee~~	~~$2,902.00~~
~~Sewer service impact fee~~	~~$2,829.00~~
~~Total for both services~~	~~$5,731.00~~

~~b. For properties within the West Ormond Utilities Districts, as set forth in article VI of this chapter.~~

~~c. For properties within the Arroyo Parkway Subdivision Utilities Extension District (as described on Exhibit B):~~

~~Water service impact fee~~	~~$2,902.00~~
~~Sewer service impact fee~~	~~$2,829.00~~
~~Total for both services~~	~~$5,731.00~~

~~d. For properties within the Hunter's Ridge-Flagler County DRI Service Area, as set forth in article IV of this chapter:~~

~~Water service impact fee~~	~~$2,902.00~~
~~Sewer service impact fee~~	~~$2,829.00~~
~~Total for both services~~	~~$5,731.00~~

~~Except that in accordance with Section 5.2 of the City-Flagler County Interlocal Agreement (recorded at Book 6421, Page 2821 of the Public Records of Volusia County, Florida) impact fees shall not be charged for any Flagler County facility.~~

~~e. For properties in other areas:~~

~~Water service impact fee~~	~~$2,902.00~~
~~Sewer service impact fee~~	~~$2,829.00~~
~~Total for both services~~	~~$5,731.00~~

~~(2) For each equivalent living unit constructed in areas served by privately owned water distribution systems using the city water supply only:~~

~~Water service impact fee~~	~~$2,902.00~~

~~(3) For each equivalent living unit with private water service connected to the sewer collection system only:~~

~~Sewer service impact fee~~	~~$2,829.00~~

~~(c) The fees for nonresidential, commercial and industrial uses, shall be based on the number of equivalent living units computed by the chief building official using the fixture unit count as defined in the most recent data published by the American Water Works Association and a ratio of one equivalent living unit for every 60 fixture unit valves or fraction thereof, computed to one decimal place.~~

~~(d) Annual capital cost adjustment. On October 1, 2014, and on each October 1 thereafter, the impact fees set forth in this section shall be adjusted to reflect any change in the Engineering News Record Construction Cost Index (ENR CCI). The amount of any capital cost adjustment shall be determined by comparing the ENR CCI as of April 1 of each year with the same index for the same date as the previous year.~~

~~(e) Each additional equivalent living unit occasioned by changes in property usage subsequent to June 7, 1976, shall be subject to an impact fee computed in accordance with the foregoing criteria.~~

SECTION EIGHT. Section 22-118, Property subject to fee; method of payment, of Article III, Impact Fee for System Extensions, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby repealed in its entirety and reserved for future use:

Sec. 22-118. ~~Property subject to fee; method of payment~~ Reserved.

~~The above and foregoing fee shall be imposed on every equivalent living unit connected to the water or sewer system, whether those units are new or existing and inside or outside the city limits, and shall be paid in full at the time of issuance of the building permit if the property is inside the city limits, or prior to the connection to the system if the property is outside the city limits.~~

SECTION NINE. Section 22-119, Impact fee financing, of Article III, Impact Fee for System Extensions, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby repealed in its entirety and reserved for future use:

Sec. 22-119. ~~Impact fee financing~~ Reserved.

~~The provisions of section 22-118 to the contrary notwithstanding, the collection of impact fees applicable to the construction of single-family owner-occupied "affordable housing," as defined in the HUD standards, within the "priority area" of the community development block grant program shall be made in the manner hereinafter described. Prior to the issuance of a certificate of occupancy for an "affordable housing" unit as aforedescribed, the owner of the real property on which the unit is constructed shall record a lien in favor of the city and equal in amount to the sum of all impact fees then applicable to the unit. The lien shall remain a lien coequal with the lien of all state, county, district, and municipal taxes, superior in dignity to all other liens, titles and claims, until paid, shall bear interest at zero percent, and shall be due and payable in full at such time as the unit is sold for consideration to a third party other than the initial occupants of the unit.~~

SECTION TEN. Section 22-132, Legislative findings; purpose, of Article IV, Hunter's Ridge-Flagler County DRI Service Area, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 22-132. Legislative findings; purpose.

(a) ****No change to existing text****

(b) ****No change to existing text****

(c) ****No change to existing text****

(d) ****No change to existing text****

(e) The City-Flagler County Interlocal Agreement recognizes and provides that customers in the Hunter's Ridge-Flagler County DRI Service Area shall pay the same water and wastewater ~~impact~~ connection fees at the time application is made for the utilities and that the ~~impact~~ connection fees shall be payable at the same rate and in the same manner as customers who are located within the corporate limits of the city, except that in accordance with section 5.2 of the

City-Flagler County Interlocal Agreement ~~impact~~ connection fees shall not be charged for any Flagler County facility.

(f) The City-Flagler County Interlocal Agreement provides that utility ~~impact~~ connection fees shall not be assessed against any Flagler County facility, including, but not limited to, a community park, that may be constructed in the Hunter's Ridge-Flagler County DRI Service Area because the construction of a county facility in the Service Area shall not require additional capital improvements to the city's utility system, because the county facilities will serve residents in the Service Area, and because the residents in the Service Area are required to pay utility ~~impact~~ connection fees in the same manner as utility customers located within the city's corporate limits.

(g) ****No change to existing text****

(h) ****No change to existing text****

(i) ****No change to existing text****

SECTION ELEVEN. Section 22-133, Service Area, defined, of Article IV, Hunter's Ridge-Flagler County DRI Service Area, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

The area legally described and depicted in the City-Flagler County Interlocal Agreement is incorporated herein by reference and is established as the Hunter's Ridge-Flagler County DRI Service Area, a copy of which shall be maintained in the official records of the city clerk. The purpose of the interlocal agreement and these regulations will enable the city to provide retail water and wastewater facilities and services to customers in the service area; and will enable the city to establish water and wastewater rates, and ~~impact~~ connection fees, for the utilization of city utility services by customers in the service area.

SECTION TWELVE. Section 22-135, Rates for water and sewer services, impact fees, of Article IV, Hunter's Ridge-Flagler County DRI Service Area, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 22-135. Rates for water and sewer services; ~~impact~~ connection fees.

(a) *Rates.* In accordance with section 4.1 of the City-Flagler County Interlocal Agreement, rates for water and wastewater services for customers in the City-Flagler County DRI Service Area shall be 125 percent of the rates that are charged to customers who reside within the corporate boundaries of the city.

(b) ~~*Impact*~~ *Connection fees.* Customers in the City-Flagler County DRI Service Area shall pay to the city the same water and wastewater ~~impact~~ connection fees at the time application is made for the utilities at the same rate and in the same manner as customers who are within the corporate boundaries of the city, except that in accordance with section 5.2 of the City-Flagler County Interlocal Agreement ~~impact~~ connection fees shall not be charged for any Flagler County facility.

SECTION THIRTEEN. Section 22-140, Impact fees, of Article IV, Hunter's Ridge-Flagler County DRI Service Area, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 22-140. ~~Impact~~ Connection fees.

(a) *Potable water*. There is hereby imposed a potable water service ~~impact~~ connection fee, based upon the determination by the city commission of the equitable portion of the cost of financing the establishment and extension of the potable water system to and in the Hunter's Ridge-Flagler County DRI Service Area, to be assessed in accordance with ~~section 22-115 upon~~ section 1-25 of the Land Development Code for each ~~equivalent living unit~~ connection fee classification located within the Hunter's Ridge-Flagler County DRI Service Area connecting to such system.

(b) ~~*Sewer*~~ *Wastewater*. There is hereby imposed a wastewater service ~~impact~~ connection fee, based upon the determination by the city commission of the equitable portion of the cost of financing the establishment and extension of the wastewater system to and in the Hunter's Ridge-Flagler County DRI Service Area, to be assessed in accordance with ~~section 22-115 upon~~ section 1-25 of the Land Development Code for each ~~equivalent living unit~~ connection fee classification located within the Hunter's Ridge-Flagler County DRI Service Area connecting to such system.

SECTION FOURTEEN. Section 22-162, Boundaries and purpose, of Article VI, West Ormond Utilities District, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 22-162. Boundaries and purpose.

(a) *Water and sewer.* There is hereby established the West Ormond Water and Sewer District, the purpose of which is to provide water and sewer services and establish ~~a~~an ~~impact~~ connection fee schedule. This district shall be composed of those lands as shown on Figures 3 and 4 included in the West Ormond Facilities Plan on file in the office of the city clerk.

(b) *Reclaimed water.* There is hereby established the West Ormond Reclaimed Water District, the purpose of which is to provide reclaimed water service and establish ~~a~~an ~~impact~~ connection fee schedule. This district shall be composed of those lands as shown on Figure 5 included in the West Ormond Facilities Plan on file in the office of the city clerk.

SECTION FIFTEEN. Section 22-165, Impact fees, of Article VI, West Ormond Utilities District, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 22-165. ~~Impact~~ Connection fees.

(a) *Potable water.*

(1) *Generally.* There is hereby imposed a water ~~service impact~~ connection fee~~, based on the city commission's determination of the equitable portion of the cost of financing the establishment and extension of the potable water system in the West Ormond Water and Sewer District, of $2,000.00 upon each equivalent living unit located outside of the Breakaway Trails PUD and connecting to such system~~ as provided in section 1-25 of the Land Development Code.

~~(2) *Breakaway Trails.* There is hereby imposed a water service impact fee, based on the city commission's determination of the equitable portion of the cost of financing the establishment and extension of the potable water system in the Breakaway Trails PUD, of $1,950.00 upon each equivalent living unit located in the Breakaway Trails PUD and connecting to such system.~~

(b) ~~*Sewer*~~ *Wastewater*.

(1) *Generally*. There is hereby imposed a ~~sewer service impact~~ wastewater connection fee, ~~based on the city commission's determination of the equitable portion of the cost of financing the establishment and extension of the sewer system in the West Ormond Water and Sewer District, of $1,163.00 upon each equivalent living unit located outside of the Breakaway Trails PUD and connecting to such system~~ as provided in section 1-25 of the Land Development Code.

~~(2) *Breakaway Trails*. There is hereby imposed a sewer service impact fee, based on the city commission's determination of the equitable portion of the cost of financing the establishment and extension of the sewer system in the Breakaway Trails PUD, of $1,950.00 upon each equivalent living unit located in the Breakaway Trails PUD and connecting to such system.~~

~~(c) *Annual capital cost adjustment.* All of the impact fees heretofore established shall remain in effect as set forth in this section until September 30, 2008. On October 1, 2008, and on each October 1 thereafter, through October 1, 2012, the impact fees set forth in this section shall be adjusted to reflect any change in the Engineering News Record Construction Cost Index (ENR CCI). The amount of any capital cost adjustment shall be determined by comparing the ENR CCI as of April 1 of each year with the same index for the same date as the previous year. After October 1, 2012, the city commission shall conduct a review to determine the amount of any annual adjustment to the impact fees set forth in this section.~~

(~~d~~c) *Rates.* For all persons in the said districts and within the corporate limits of the city, service rates, connection fees and meter deposits shall be at the rates established for in-city customers.

SECTION SIXTEEN. Section 22-168, Outside city service, of Article VI, West Ormond Utilities District, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 22-168. Outside city service.

(a) *New development. ***No change to existing text****

(b) *Existing development. ***No change to existing text****

(c) *Rates.* Service rates, connection fees and meter deposits shall be at the rates established for outside-city customers. ~~Impact~~ Connection fees shall be as established in section 1-25 of the Land Development Code ~~22-165 for other users of the same class in accordance with section 22-165. All fees shall be paid prior to the initiation of service.~~

(d) *Reimbursement of line extensions.* Nothing contained herein shall preclude the developer or owner of property located outside of the city limits from participating in the line extension reimbursement program established by section ~~4.08~~ 1-25 of the land development code.

(e) *Dedication required. ***No change to existing text****

SECTION SEVENTEEN. Section 22-169, Connections required, of Article VI, West Ormond Utilities District, of Chapter 22, Water and Sewers, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 22-169. Connections required.

(a) *Water and sewer.*

(1) *New development.* All new development in the West Ormond Water and Sewer District shall connect to the water and sewer system at the time of development or at the time service becomes available, whichever shall first occur. This requirement shall appear in all restrictive covenants and sales documents of such new development. Dry lines and interim facilities shall comply with the provisions of the comprehensive plan. All ~~impact and~~ connection fees and meter deposits shall be collected as set forth in this chapter and ~~article XIII~~ section 1-25 of the ~~l~~Land ~~d~~Development ~~c~~Code, or prepaid in accordance with the comprehensive plan, as applicable.

(2) *Existing development.* All existing development in the West Ormond Water and Sewer District, having a gross density or a number of equivalent living units which is greater than one unit per acre, shall connect to such service in accordance with the provisions of F.S. §§ 381.0065—381.0067. All ~~impact and~~ connection fees and meter deposits shall be collected as set forth in this chapter and ~~article XIII~~ section 1-25 of the ~~l~~Land ~~d~~Development ~~c~~Code.

(b) *Reclaimed water. ***No change to existing text****

SECTION EIGHTEEN. All Ordinances or parts of Ordinances in conflict herewith are hereby repealed to the extent of such conflict.

SECTION NINETEEN. This Ordinance shall take effect ninety (90) days after its adoption.

PASSED UPON at the first reading of the City Commission, this 16th day of May, 2023.

PASSED UPON at the second and final reading of the City Commission, this 6th day of June 2023.

Meeting Date: 6/6/2023	**AGENDA ITEM**		**Number:** 8.J
Section:	PUBLIC HEARINGS		
Item Category:	Public Hearing - Ordinances	**Res./Ord. No:**	2023-33
Strategic Goal:	Transportation & Community Development - Other		
Department :	Planning & Building		
Subject:	Portion of Harmony Avenue, Annexation		
Budget Impact:	There is no budget impact associated with the requested annexation.		
Summary:	This is an administrative request for a partial annexation of a portion of Harmony Avenue abutting the recently annexed Halifax Paving property at 860 Hull Road and 1399 Hull Trail. The portion of the roadway proposed to be annexed is 3.45 acres and bisects the property at 1399 Hull Trail. Based on a 2004 interlocal agreement, the city has maintenance responsibility for Harmony Avenue from Hull Road to Pineland Trail.		
Recommended Action:	It is recommended that the City Commission approve the annexation of approximately 3.45 acres of the Harmony Avenue right-of-way, based on the following: 1. The right-of-way is located in unincorporated Volusia County and is not being served by utilities from another jurisdiction, is compact, and the City of Ormond Beach is the utility provider for this area; 2. The right-of-way is currently maintained by Ormond Beach per a 2004 interlocal agreement; 3. Annexation of the property is allowed under the authority of Section 171.044, Florida Statutes; and 4. The subject property is contiguous to the city limits along the north and east right-of-way boundaries.

CITY MANAGER
MEMORANDUM

To: The Honorable Mayor Partington and City Commissioners

Through: Joyce Shanahan, City Manager

From: Steven Spraker, Planning Director

Date: June 6, 2023

Subject: Portion of Harmony Avenue, Annexation

Commission Goal: Transportation & Community Development - Other

Introduction

This administrative request is for a partial annexation of a portion of Harmony Avenue abutting the annexed Halifax Paving property at 860 Hull Road and 1399 Hull Trail. The portion of the roadway proposed to be annexed is 3.45 acres and bisects the property at 1399 Hull Trail. Based on a 2004 interlocal agreement, Resolution 2004-108, the city has maintenance responsibility for Harmony Avenue from Hull Road to Pineland Trail.

Background

As part of the review for the annexation at 860 Hull Road and 1399 Hull Trail, Volusia County staff indicated that the portion abutting Harmony Avenue should also be annexed because it is bisected by 1399 Hull Trail. Harmony Avenue is maintained by the city as part of a 2004 Interlocal Agreement related to Ormond Crossings.

Discussion

There is an existing enclave area of unincorporated Volusia County that is bounded by Hull Road, the FEC railroad and the sports complex. Halifax Paving is the first property to annex in this area based upon a utility connection. The annexation of a portion of Harmony Avenue further reduces the enclave area. There is existing water service for this area along Hull Road.

Budget Impact

There is no budget impact associated with the requested annexation.

Citizen Impact

There is no citizen impact anticipated with this annexation. Harmony Avenue is

currently maintained by Ormond Beach and the annexation will not impact the maintenance of the roadway.

Recommendation

It is recommended that the City Commission approve the annexation of approximately 3.45 acres of the Harmony Avenue right-of-way, based on the following:

1. The right-of-way is located in unincorporated Volusia County and is not being served by utilities from another jurisdiction, is compact, and the City of Ormond Beach is the utility provider for this area;
2. The right-of-way is currently maintained by Ormond Beach per a 2004 interlocal agreement;
3. Annexation of the property is allowed under the authority of Section 171.044, Florida Statutes; and
4. The subject property is contiguous to the city limits along the north and east right-of-way boundaries.

ORDINANCE NO. 2023-33

AN ORDINANCE ANNEXING A PORTION OF HARMONY AVENUE RIGHT-OF-WAY INTO THE CITY OF ORMOND BEACH, SAID PROPERTY LOCATED AT THE INTERSECTION OF HULL ROAD AND HARMONY AVENUE, BISECTING 1399 HULL TRAIL; SETTING FORTH ZONING PRIVILEGES AND OBLIGATIONS REGARDING THE RIGHT-OF-WAY; REDEFINING THE TERRITORIAL BOUNDARIES OF THE CITY OF ORMOND BEACH TO INCLUDE THE RIGHT-OF-WAY; REDESIGNATING THE BOUNDARIES OF ZONE 1 OF THE CITY OF ORMOND BEACH TO INCLUDE THE RIGHT-OF-WAY; PROVIDING FOR TRANSMISSION; PROVIDING FOR SEVERABILITY; AND SETTING FORTH AN EFFECTIVE DATE.

WHEREAS, Resolution 2004-108 approved on July 6, 2004 by the City Commission adopted an Interlocal Service Agreement providing for municipal police, fire, emergency response, and street maintenance as part of the Ormond Crossings annexation, and

WHEREAS, the Interlocal Service Agreement, Section 2, requires Ormond Beach to provide street maintenance services to Pineland and Harmony roads, which are county roads within the Service Areas, and

WHEREAS, Volusia County staff has requested that the City of Ormond Beach annex a portion of Harmony Avenue bisecting 1399 Hull Trail located in unincorporated Volusia County, Florida, described and depicted on Exhibit "A", attached hereto and incorporated herein by reference, (the "Right-of-Way"); and

WHEREAS, the Right-of-Way to be annexed consists of approximately 3.45 acres and is located at the intersection of Hull Road and Harmony Avenue, Ormond Beach, Florida; and

WHEREAS, the Right-of-Way is maintained by Ormond Beach per the 2004 Interlocal Service Agreement and annexation of the Right-of-Way is allowed under the authority of Section 171.044, *Florida Statutes*; and

WHEREAS, the requirements of Section 171.044, *Florida Statutes* have been satisfactorily met, and

WHEREAS, the City Commission of the City of Ormond Beach desires to exercise its statutory power to annex the Right-of-Way; now therefore,

BE IT ENACTED BY THE PEOPLE OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:

SECTION ONE. The City Commission of the City of Ormond Beach makes the following findings:

(a) The County of Volusia has requested that the portion of Harmony Avenue bisecting 1399 Hull Trail be annexed into the City of Ormond Beach;

(b) The City of Ormond Beach is the maintenance entity of the Harmony Avenue Right-of-Way per a 2004 Interlocal Service Agreement; and

(c) The Right-of-Way is reasonably compact and does not create any enclaves of unincorporated territory in Volusia County.

SECTION TWO. The Right-of-Way described and depicted in Exhibit "A" is hereby annexed into the City of Ormond Beach, Florida (the "City"), and the municipal boundary lines of the City are hereby changed to include the Right-of-Way.

SECTION THREE. Upon the effective date of the annexation of the Right-of-Way, and except as may be otherwise provided by law, the Right-of-Way shall be subject to all laws, ordinances and regulations of the City of Ormond Beach; and shall be entitled to the same privileges and benefits as other lands in the City.

SECTION FOUR. The boundary of City Commission Zone 1 is hereby redefined to include the Right-of-Way.

SECTION FIVE. The City Clerk is hereby authorized and directed to provide a certified copy of this Ordinance to the County Manager of Volusia County, the Clerk of Circuit Court in and for Volusia County, and the Department of State for the State of Florida, within seven (7) days of the adoption of this Ordinance as required by Section 171.044(3), *Florida Statutes*.

SECTION SIX. In the event any section or provision of this Ordinance is declared by a court of competent jurisdiction to be unconstitutional or invalid, such declaration shall not be deemed to affect the validity of this Ordinance as a whole or any other section or provision hereof.

SECTION SEVEN. This Ordinance shall take effect immediately upon adoption.

PASSED UPON at the first reading of the City Commission, this 6th day of June, 2023.

PASSED UPON at the second and final reading of the City Commission, this 18th day of July, 2023.

RESOLUTION NO. 2004-108

A RESOLUTION AUTHORIZING THE EXECUTION OF AN INTERLOCAL SERVICE AGREEMENT PROVIDING FOR MUNICIPAL POLICE, FIRE AND EMERGENCY RESPONSE SERVICES BETWEEN THE CITY OF ORMOND BEACH AND THE COUNTY OF VOLUSIA; AND SETTING FORTH AN EFFECTIVE DATE.

BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:

SECTION ONE. The Mayor and City Manager are hereby authorized and directed to execute an Interlocal Service Agreement providing for municipal police, fire and emergency response services between the City of Ormond Beach and the County of Volusia, a copy of said Agreement being attached hereto and incorporated herein by reference.

SECTION TWO. This Resolution shall take effect immediately upon its adoption.

APPROVED AND AUTHENTICATED this 6th day of July, 2004.

INTERLOCAL SERVICE AGREEMENT

THIS AGREEMENT is entered into between the City of Ormond Beach ("City"), a Florida municipal corporation, and County of Volusia ("County"), a political subdivision of the state of Florida, for the purposes described hereinbelow:

Witnesseth:

WHEREAS, Part I of Chapter 163, Florida Statutes, authorizes local government agencies to enter into interlocal agreements in order to make the most efficient use of governmental powers regarding the provision of services that affect the public health, safety and welfare of the general public; and

WHEREAS, the County and City desire to cooperate in efforts to provide police, fire, medical response, and street maintenance services throughout the Service Areas described in this Agreement; and

WHEREAS, the municipal services to be provided by the City to the Service Areas described in this Agreement will serve and protect the health, safety and welfare of the general public; and

WHEREAS, the City and the County desire to plan for the efficient and appropriate development of lands within their respective jurisdictions and to ensure the provision of public services are provided in a manner that does not negatively impact the general public or the environment; now therefore,

In consideration of the representations, covenants, terms and conditions set forth herein, all of which constitutes good and valuable consideration for entering into this Agreement, the City and County mutually agree as follows:

1. Recitals. The foregoing recitals constitute material representations and are incorporated herein by reference.

2. Purpose. The City shall, at its sole expense, provide municipal police, fire, and emergency response services to the Service Areas described in section 4 of this Agreement. The City shall also provide street maintenance services to Pineland and Harmony roads, which are county roads within the Service Areas. The City shall provide the services in the same manner that said services are provided to city residents.

3. Term. The term of this Agreement shall be perpetual until the Service Areas are annexed by the City or until the City and County mutually agrees to terminate this Agreement.

4. Service Areas. There shall be two service areas, which are depicted as "1" and "2" on the service area map attached to this Agreement as Exhibit A, said exhibit being incorporated herein and being a material part of this Agreement.

5. Regulatory Authority. Except as provided in section 2 above, the County shall retain full and sole regulatory control over all public and private lands within the Service Areas, including but not necessarily limited to planning, zoning, land use, development, code enforcement, and solid waste and recycling matters. Except as noted in section 2 above, the City shall not have any regulatory control over any public or private lands within the Service Areas.

6. Coordination of activities. The City and County shall coordinate with each other regarding the processing, presentation, consideration and approval of amendments or changes to this Agreement, the comprehensive land use plans of the City or County, the land development regulations (including zoning and land use classifications) of the City and County, other ordinances or regulations of the City and County, and the annexation of land by the City that affect or may affect the provision of municipal services by the City or County to the Service Areas. For purposes of this Agreement, "coordination" shall mean:

a) Inclusion of appropriate personnel from the City or County in any pre-application meeting to review the scope of proposed changes or proposed annexation;

b) Inclusion of appropriate personnel from the City or County as part of a technical review committee;

c) Incorporation of comments from appropriate personnel of the City or County in official staff reports; and

d) Presentation of comments by appropriate personnel of the City or County's to advisory boards, City Commission, and County Council.

7. Amendments. This Agreement may only be amended by mutual consent of the City and County, which amendment(s) must be in writing, must be approved by the governing bodies of the City and County, and must be executed by officials of the City and County that have authority to sign such amendment(s).

8. Termination. This Agreement may only be terminated upon the annexation of the Service Areas by the City, or upon the mutual consent of the City and County.

9. Liability. To the extent permitted by law, the City shall indemnify and hold harmless the County from and against any and all claims, demands, actions, proceedings, lawsuits, and damages arising from the City's negligent act(s) or omission(s) regarding the provision of municipal services provided herein by the City.

10. Sovereign Immunity. The City and County each expressly retain all rights, privileges, benefits, and limitations of sovereign immunity.

11. Third Party Beneficiary. Nothing in this Agreement shall be construed to confer any rights or benefits to anyone other than the City and County; and nothing in this Agreement is intended to confer or shall be construed to afford third party beneficiary rights or status to anyone.

12. EFFECTIVE DATE. This Agreement is contingent upon the adoption by the Volusia County Council of a resolution delegating to the City the exercise of specified county redevelopment powers regarding the Ormond Crossings project ("Redevelopment Resolution"); and upon the successful annexation of lands by the City, to be accomplished by the adoption of Ordinance No. 2004-28 ("Annexation Ordinance"), on which the Ormond Crossings project is to be developed. In the event the Volusia County Council does not or is unable to adopt the Redevelopment Resolution or the City does not or is unable to annex the subject land, then this Agreement shall be deemed null and void, inoperable, and shall have no legal effect.

This Agreement shall therefore become effective immediately after the County Council adopts the Redevelopment Resolution and after the City successfully annexes the lands that are the subject of the Annexation Ordinance.

CITY MANAGER
MEMORANDUM

To: The Honorable Mayor Partington and City Commissioners

Through: Joyce Shanahan, City Manager

From: Steven Spraker, Planning Director

Date: June 6, 2023

Subject: RidgeHaven Subdivision, Partial Plat Vacation

Commission Goal: Transportation & Community Development - Other

Introduction

This is a request from RidgeHaven, LLC, with authorization of the property owner Snilloc Family Limited Partnership Number One, for a partial plat vacation for a portion of the revised plat of National Gardens, as recorded in map or plat book 10, pages 250 through 253 of the Public Records of Volusia County, Florida associated with the RidgeHaven Subdivision. The proposed RidgeHaven subdivision is located south of Plantation Oaks Boulevard, east of Addison Drive, north of the Village of Pine Run subdivision, and west of the Plantation Oaks subdivision and includes the following Volusia County parcel numbers: 3136-01-01-0011, 3136-01-01-0012, 3136-01-33-0110, 3136-01-25-0010, 3136-01-24-0060, 3136-01-33-0080, 3136-01-01-0020, 3136-01-23-0060, and 3136-01-24-0050.

Background

The RidgeHaven subdivision includes nine parcels (Volusia County parcel numbers: 3136-01-01-0011, 3136-01-01-0012, 3136-01-33-0110, 3136-01-25-0010, 3136-01-24-0060, 3136-01-33-0080, 3136-01-01-0020, 3136-01-23-0060, and 3136-01-24-0050) that total 103.45 acres.

The City Commission adopted the original North U.S. 1 Interlocal Service Boundary Agreement on August 19, 2014 per Ordinance 2014-27. Concurrently, the Volusia County Council adopted the Interlocal Service Boundary Agreement on August 21, 2014 by Volusia County Ordinance 2014-12. The original Interlocal Service Boundary Agreement established the Municipal Service Area (MSA) and joint planning and service delivery agreement to the North U.S. Highway 1 area. The first amendment to the North U.S. 1 Interlocal Service Boundary Agreement was approved to add the land associated with Plantation Oaks Subdivision and the 13 enclaves surrounding the subdivision to the adopted Municipal Service Area. On August 20, 2019, the City Commission adopted the first amendment to the North U.S. Highway 1 Interlocal Service Boundary Agreement. The Volusia County Council subsequently adopted the

agreement on September 17, 2019. The City of Ormond Beach (December 7, 2021 with Ordinance 2021-43) and Volusia County (February 15, 2022 with Ordinance 2022-9) approved the second amendment to the North U.S. Highway 1 Interlocal Service Boundary Agreement to add the land associated with the RidgeHaven subdivision and the individually owned parcels not owned by RidgeHaven to the adopted Municipal Service Area. During the County Council presentation and discussion, the RidgeHaven representative and city staff committed to establishing a limitation of 298 dwelling units for the entire RidgeHaven area. On March 22, 2022, the City Commission approved Ordinance 2022-05 that annexed the RidgeHaven subdivision.

With the Interlocal Service Boundary Agreement and annexation approved, the next step for the RidgeHaven project was the assignment of a city land use designation. For the existing land use entitlements, Volusia County staff analysis calculated a range of residential development of 716 to 1,052 dwelling units. The existing land use required a minimum of four units per acre. The city land use designation occurred with three separate actions:

1. Ordinance 2022-14 adopted July 19, 2022: The Ordinance amended the Future Land Use Element of the Comprehensive Plan to incorporate the second Interlocal Service Boundary Agreement and provide a text limitation within Policy 9.1.4 that states the RidgeHaven land area shall not exceed 3 units per acre and no more than 298 dwelling units for the entire RidgeHaven property. The maximum theoretical residential density was reduced by 754 residential units. For the non-RidgeHaven properties, the Ordinance included the text restriction that these parcels would maintain a maximum gross residential density of eight (8) units per acre – the same density that existed in unincorporated Volusia County.
2. Ordinance 2022-18, adopted August 3, 2022: The Ordinance authorized the following actions:
    1. Amended the Future Land Use Map designation for the RidgeHaven subdivision property (totaling 84.26 acres) from Volusia County “Urban Medium Intensity” (UMI) to Ormond Beach “Low Density Residential” (LDR). The Ordinance included the map annotation that the RidgeHaven subdivision would have a density restriction of three (3) units per acre and shall not exceed 298 residential units for the entire RidgeHaven subdivision; and
    2. Amended the Future Land Use Map designation of the properties not associated with the RidgeHaven development from “Urban Medium Intensity” (UMI) to Ormond Beach “Medium Density Residential” (MDR). The Ordinance included the map annotation that these parcels would maintain a maximum gross residential density of eight (8) units per acre – the same density that existed in unincorporated Volusia County.
3. Ordinance 2022-12, adopted May 3, 2022: This Ordinance was for 19.19 acres owned by the RidgeHaven subdivision applicant that was part of the original Interlocal Service Boundary Agreement area. The Ordinance amended the Future Land Use for the property from “Low Intensity Commercial” (LIC) to “Medium Density Residential” (MDR). The Ordinance contained a condition that the density shall be restricted to eight (8) units per acre within the 19.19 acres and the RidgeHaven subdivision including the 84.26 acres shall not exceed 298

residential units.

The project is undergoing several development related applications as follows:

1. Zoning Map Amendment (City Commission meetings: May 16, 2023 and June 6, 2023). The project is seeking a zoning map amendment from Volusia County R-4, Urban Single-Family Residential and Ormond Beach B-8, Commercial to Ormond Beach PRD, Planned Residential Development, for 103.45 acres.
2. Issuance of a Development Order (City Commission meetings: May 16, 2023 and June 6, 2023). The project is seeking an issuance of a development order for 286 residential lots on 103.45 acres and associated site improvements.
3. Preliminary Plat (City Commission meeting: June 6, 2023). Section 1-22 of the Land Development Code defines a preliminary plat as "a proposed subdivision plan that in an exact and precise manner in which it may be evaluated pursuant to this Land Development Code and the comprehensive plan". Preliminary plats are not required with a planned development, however, this application has developed and submitted the preliminary plat with the zoning action. The preliminary plat contains the plat document and the detailed subdivision engineering plan.

Discussion

The purpose of this application is for a partial plat vacation of unimproved streets and alleys within the RidgeHaven subdivision. The partial plat vacation would allow a subdivision plat to occur and dedicate the streets needed to serve the proposed subdivision. The area does have outparcels which will have access guaranteed through temporary access easements. The partial plat vacation is needed to update the 1926 National Gardens plat. The partial plat vacation is a method of voiding the existing 1926 plat and the creation of a new plat with the new proposed subdivision. Section 177.101 of the Florida Statutes details the requirements for the plat vacation process as shown in bold with staff's response following the requirement:

It must be shown that the persons making an application for a vacation own the fee simple title to the whole or that part of the tract covered by the plat sought to be vacated.

The applicant has provided documentation that they are either the fee simple owner or the contract purchaser of the land area that is sought for the partial plat vacation

It must be further shown that the vacation by the governing body of the county will not affect the ownership or right of convenient access of persons owning other parts of the subdivision.

The land area for the RidgeHaven subdivision contains outparcels. All outparcels shall maintain access to their property through the subdivision process. The applicant has developed temporary access easements through the construction process to ensure access.

Persons making application for vacations of plats either in whole or in part shall give notice of their intention to apply to the governing body of the county to vacate said plat by publishing legal notice in a newspaper of general circulation in the county in which the tract or parcel of land is located, in not less than two weekly issues of said paper, and must attach to the petition for vacation the proof of such publication, together with certificates showing that all state and county taxes have been paid.

The newspaper advertisements have been performed on May 12, 2023 and May 19, 2023. As part of the application, the applicant has provided proof that all taxes have been paid.

Budget Impact

There is no budget impact as the result of the partial plat vacation.

Citizen Impact

It is not anticipated that the partial plat vacation would have negative citizen impacts.

Recommendation

It is recommended that the City Commission approve a partial plat vacation for a portion of the revised plat of National Gardens, as recorded in map or plat book 10, pages 250 through 253 of the Public Records of Volusia County, Florida associated with the RidgeHaven Subdivision.

RESOLUTION NO. 2023-108

A RESOLUTION OF THE CITY OF ORMOND BEACH, FLORIDA CITY COMMISSION, VACATING PORTIONS OF THE REVISED PLAT OF NATIONAL GARDENS, AS RECORDED IN MAP OR PLAT BOOK 10, PAGES 250 THROUGH 253 OF THE PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA; PROVIDING FOR VACATION OF PLAT; PROVIDING FOR IMPLEMENTING ACTIONS; AND SETTING FORTH AN EFFECTIVE DATE.

WHEREAS, pursuant to Chapter 177, *Florida Statutes*, RidgeHaven, LLC, a Florida Limited Liability Company, with the authorization of Snilloc Family Limited Partnership Number One, a Florida Limited Partnership ("Petitioners") has petitioned the City of Ormond Beach to vacate a portion of the Revised Plat of National Gardens, as recorded in Map or Plat Book 10, at Pages 250 through 253 of the Public Records of Volusia County, Florida (the "Plat"), and

WHEREAS, the legal description for this partial plat vacation is attached hereto as Exhibit "A" and incorporated herein by reference, and

WHEREAS, Section 177.101(3), *Florida Statutes*, provides that "The governing bodies of the counties of the state may adopt resolutions vacating plats in whole or in part of subdivisions in said counties, returning the property covered by such plats either in whole or in part into acreage. Before such resolution of vacating any plat either in whole or in part shall be entered by the governing body of a county, it must be shown that the persons making application for said vacation own the fee simple title to the whole or that part of the tract covered by the plat sought to be vacated, and it must be further shown that the vacation by the governing body of the

county will not affect the ownership or right of convenient access of persons owning other parts of the subdivision." and

WHEREAS, Section 177.101(4), *Florida Statutes*, provides that "Persons making application for vacations of plats either in whole or in part shall give notice of their intention to apply to the governing body of the county to vacate said plat by publishing legal notice in a newspaper of general circulation in the county in which the tract or parcel of land is located, in not less than two weekly issues of said paper, and must attach to the petition for vacation the proof of such publication, together with certificates showing that all state and county taxes have been paid. For the purpose of the tax collector's certification that state, county, and municipal taxes have been paid, the taxes shall be deemed to have been paid if, in addition to any partial payment under s. 194.171, the owner of the platted lands sought to be vacated shall post a cash bond, approved by the tax collector of the county where the land is located and by the Department of Revenue, conditioned to pay the full amount of any judgment entered pursuant to s. 194.192 adverse to the person making partial payment, including all costs, interest, and penalties. The circuit court shall fix the amount of said bond by order, after considering the reasonable timeframe for such litigation and all other relevant factors; and a certified copy of such approval, order, and cash bond shall be attached to the application. If such tract or parcel of land is within the corporate limits of any incorporated city or town, the governing body of the county shall be furnished with a certified copy of a resolution of the town council or city commission, as the case may be, showing that it has already by suitable resolution vacated such plat or subdivision or such part thereof sought to be vacated," and

WHEREAS, Section 177.101(5), *Florida Statutes*, provides that "Every such resolution by the governing body shall have the effect of vacating all streets and alleys which have not become highways necessary for use by the traveling public. Such vacation shall not become effective until a certified copy of such resolution has been filed in the offices of the circuit court clerk and duly recorded in the public records of said county," and

WHEREAS, Petitioners have shown that Petitioners own fee simple title to the property, and

WHEREAS, it has been shown that the vacation of the Plat will not affect ownership or the right of convenient access of persons owning land within the Plat or the subdivision created by means of the Plat, and

WHEREAS, there are outparcels that are not owned by the Petitioners and these outparcels shall be provided access through temporary easements until the RidgeHaven subdivision improvements are complete, and

WHEREAS, notice of intention to petition for vacation of the Plat was published pursuant to Section 177.101(4), *Florida Statutes*, and

WHEREAS, certificates showing that all state, county and local taxes have been paid on the land within the plat have been provided by the Petitioners, and

WHEREAS, the petition for vacation of the Plat and the procedures and processes used by the City Commission of the City of Ormond Beach comply with Section 177.101, *Florida Statutes*, and other controlling law, now therefore,

BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:

SECTION ONE. The City Commission of the City of Ormond Beach hereby adopts and incorporates into this Resolution the recitals to this Resolution.

SECTION TWO. The City Commission of the City of Ormond Beach, Florida held a public hearing on the application of the Petitioners to vacate portions of the said Plat being more particularly described in Exhibit "A" attached hereto and incorporated herein by reference, and the same is hereby vacated and annulled and returned into acreage.

SECTION THREE. The City Clerk shall provide a certified copy of this Resolution to the Volusia County Manager.

SECTION FOUR. Further, the City Clerk shall forward a certified copy of this Resolution to be filed in the offices of the Clerk of the Circuit Court in and for Volusia County, Florida and recorded in the Public Records of Volusia County, Florida, at the expense of the Petitioners.

SECTION FIVE. This Resolution shall take effect immediately upon its adoption.

APPROVED AND AUTHENTICATED this 6th day of June, 2023.

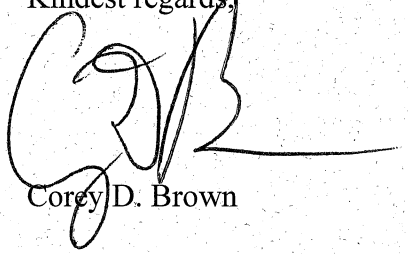
Re: Application for Partial Plat Vacation for RidgeHaven

Dear Steven:

This is an application to request the partial vacation of portions of the platted lots and rights-of-way within the bounds of the proposed RidgeHaven PRD and Plat. The plan is to vacate most of the National Gardens rights-of-way and lots, as specified on the enclosed legal description and sketch, to allow for a preliminary plat and site construction for RidgeHaven, after which the RidgeHaven Final Plat will be approved and recorded.

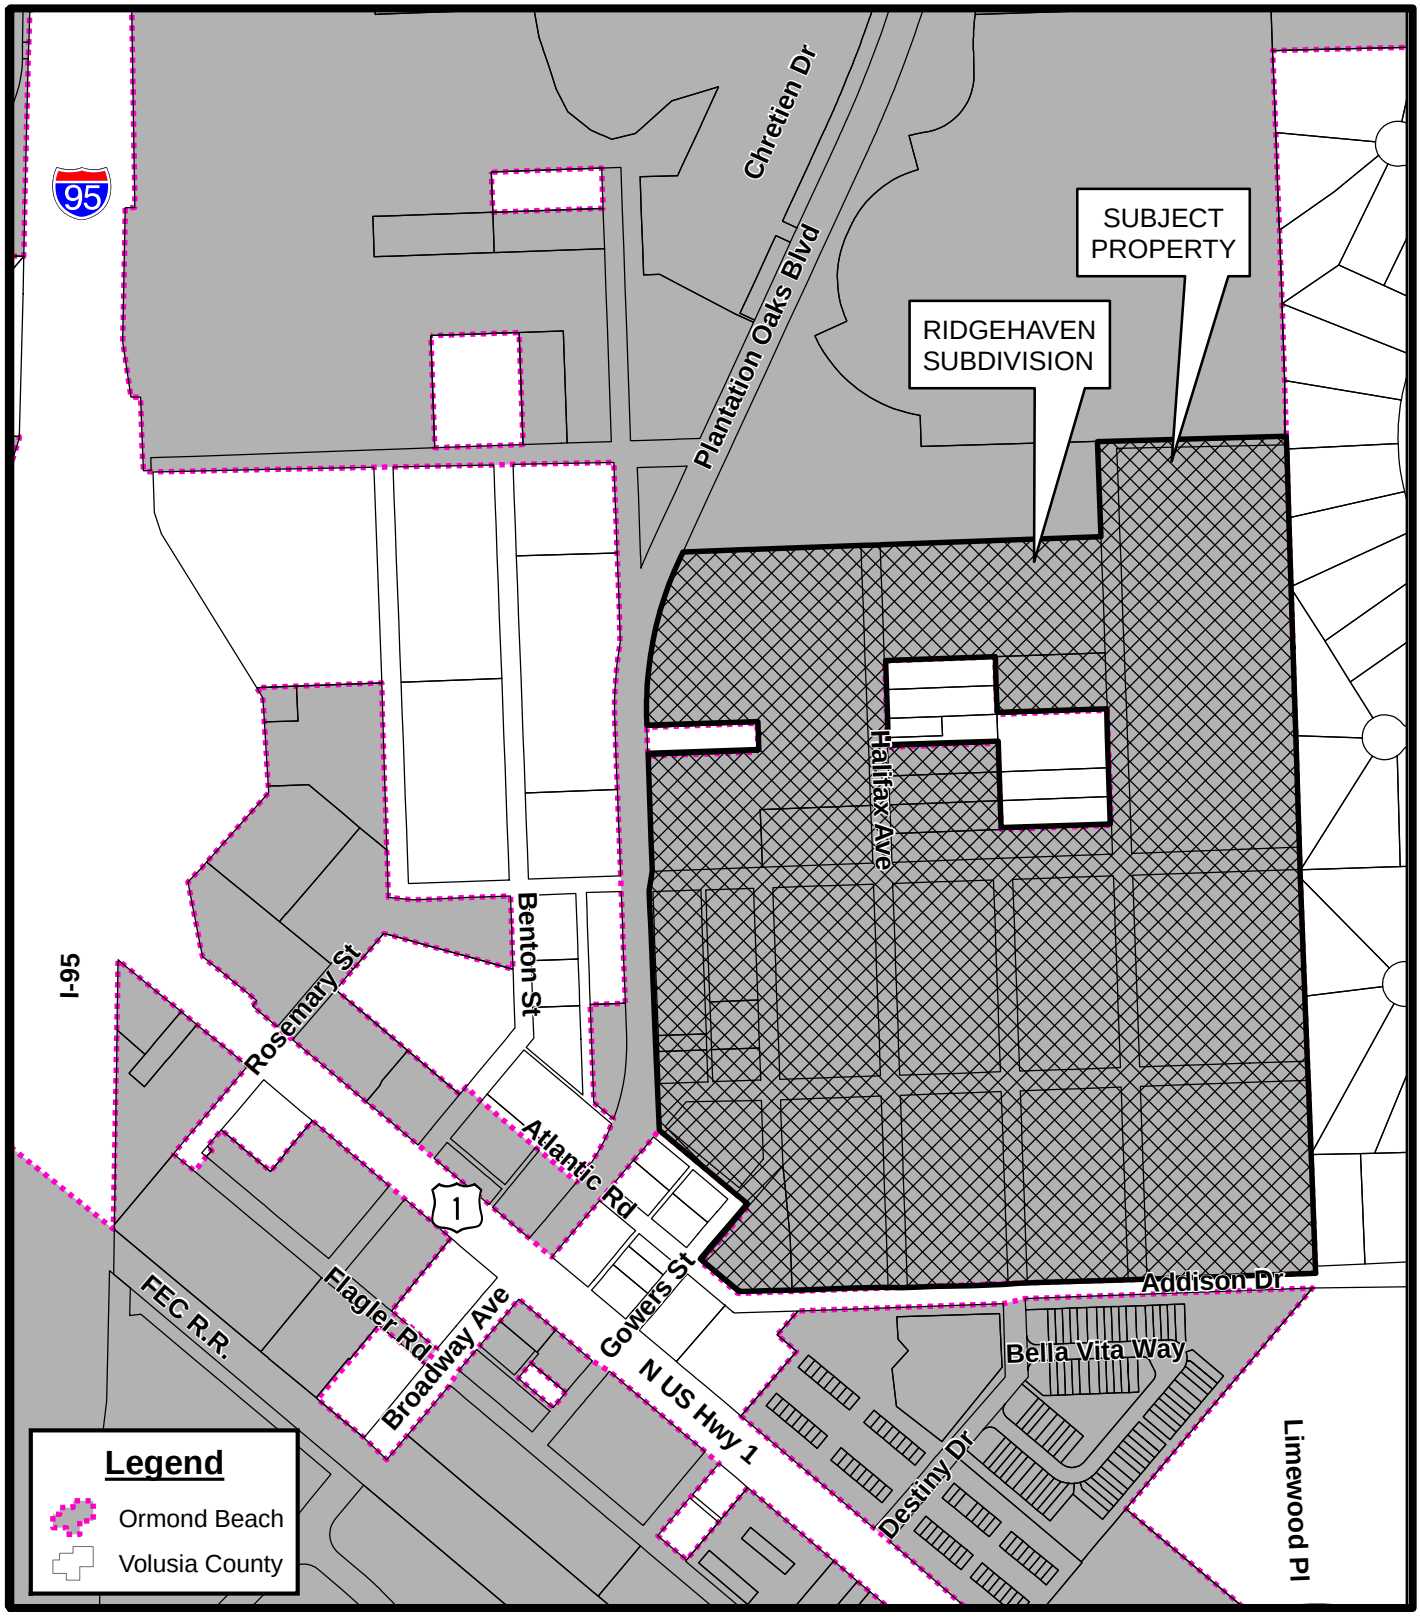
As you know, there are several "enclave" property owners that have legal or physical access to their properties via some of the rights-of-way to be vacated. We will be providing all of those owners with temporary easements to access their properties in the period between vacating the rights-of-way and recording the new RidgeHaven plat, which includes new, improved right-of-way access for those owners. Enclosed for your review is the easement form and legal description for one of the property owners, which are the same format as the easements for the other owners. This has already been reviewed by City Attorney Randy Hayes, who did not have any concerns. The owners who have physical access currently will continue to have physical access throughout the construction process via the easements. Upon recording of the new RidgeHaven plat, the temporary easements will automatically terminate. All of the property owners that do not have physical access to their property currently will gain physical access via the new roads in RidgeHaven.

Enclosed with this letter are the following application documents:



1. Signed application form;
2. Application fee in the amount of $700.00;
3. Property record cards and deeds for the subject property;
4. No objection letters;

420 South Nova Road • Daytona Beach, Florida 32114
(386) 238-8383 • (386) 238-0988 (fax)
Website: www.storchlawfirm.com



5. Signed and sealed sketch and legal description of the vacation area; and
6. Thumb drive with electronic copies of documents.

Please let me know if you have any questions or need any other documents for this application.

Kindest regards,

Corey D. Brown

GRANT OF TEMPORARY ACCESS EASEMENT

THIS GRANT OF TEMPORARY ACCESS EASEMENT (this "Easement") is given this _____ day of _____, 2023 by **RIDGEHAVEN, LLC**, a Florida limited liability company, and **SNILLOC FAMILY LIMITED PARTNERSHIP NUMBER ONE**, a Florida limited partnership (hereinafter collectively known as "Grantor"), to **BARBARA ANN STEADMAN** (hereinafter known as "Grantee").

WHEREAS, the Grantor is the fee simple owner of certain real property more particularly described in the attached Exhibit "A", which is the site of a proposed new subdivision known as RidgeHaven (hereinafter the "RidgeHaven Property"); and

WHEREAS, the Grantee owns that certain real property adjacent to the RidgeHaven Property and more particularly described in the attached Exhibit "B" (hereinafter the "Grantee's Property"); and

WHEREAS, the RidgeHaven Property and Grantee's Property are subject to the existing Revised Plat of National Gardens, as recorded in Map Book 210, Pages 250 – 253, Public Records of Volusia County, Florida (hereinafter the "Existing Plat"), which includes various rights-of-way that provide Grantee with legal access to Grantee's Property; and

WHEREAS, the Grantor desires to abandon certain portions of the Existing Plat on the RidgeHaven Property to facilitate a new plat for the RidgeHaven subdivision (hereinafter the "RidgeHaven Plat"); and

WHEREAS, the Grantor desires to provide the Grantee with a temporary access easement over the real property more particularly described in the attached Exhibit "C" (hereinafter the "Easement Property"), which will give the Grantee legal access to Grantee's Property during the period of time between the abandonment of the Existing Plat and the recording of the RidgeHaven Plat.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Grantor does hereby grant and convey unto Grantee a

DRAFT

temporary, non-exclusive access easement over, upon and across the Easement Property more particularly described in the attached Exhibit "C".

TO HAVE AND TO HOLD the same unto said Grantee and its successors and assigns until the recording of the RidgeHaven Plat in the Public Records of Volusia County, Florida, subject to the following conditions:

1. The foregoing recitals are true and correct and incorporated herein by reference.

2. Notwithstanding anything herein to the contrary, upon the recording of the RidgeHaven Plat in the Public Records of Volusia County, Florida, this Easement shall automatically terminate and be of no further force and effect, without the necessity to record any other document.

3. The Grantor reserves the right to construct any and all improvements within the Easement Property as are required for the RidgeHaven development. Said improvements may restrict the Grantee's existing physical access (if any) to its property across portions of the Easement Property, provided that other sections of the Easement Property continue to provide alternative physical access to Grantee's Property.

4. The easement granted herein shall run with the land and inure to and be for the benefit of and be binding upon the parties hereto and their respective successors and assigns.

5. Grantor represents and warrants that they have the full right, power and authority to execute, deliver and perform all of their obligations under the Easement. The invalidity of any one of the provisions of this Easement or any portion hereof shall not affect the remaining portions thereof or any part hereof and this Easement shall be constructed as if such provision had not been inserted herein. This Easement shall be governed by the laws of the State of Florida.

IN WITNESS WHEREOF, said Grantor has caused these presents to be executed and its corporate seal to be hereunto affixed by its proper officials thereunto duly authorized.

SKETCH OF DESCRIPTION

SHEET 1 OF 1

I HEREBY CERTIFY THAT THIS PLAT MEETS THE STANDARDS OF PRACTICE SET FORTH BY THE FLORIDA BOARD OF PROFESSIONAL SURVEYORS AND MAPPERS IN CHAPTER 5J-17.05, FLORIDA ADMINISTRATIVE CODE, PURSUANT TO SECTION 472.027, FLORIDA STATUTES.

JEFF W. BARNES, P.S.M. NO. 5576

March 24, 2023

Dear Property Owner,

I have the pleasure of representing Ridgehaven, LLC, which owns approximately 103 acres of property adjacent to your property in Ormond Beach, Florida. My client is seeking a PRD rezoning and plat for a new subdivision called RidgeHaven. As you may know, my client's property has been annexed into the City of Ormond Beach and has a City comprehensive plan designation for a medium density residential development. Your property was not annexed and you still maintain the existing County designation which allows higher density. However, we are now finishing the plans and proceeding through the rezoning and subdivision process.

You should be receiving a letter from the City of Ormond Beach in a few days that provides notice of an upcoming Planning Board meeting for the project, but I wanted to reach out to you first with some additional information about the proposed development and to help answer any questions.

Enclosed with this letter is the latest Master Development Plan for RidgeHaven for your information. The new subdivision will have 286 new homes on a variety of lot sizes, from 30-foot duplex lots to 75-foot estate lots. This is a major reduction in the possible number of homes in the area (previously up to 866 new homes were entitled). We have worked closely with City staff on the planning for this property. Just under 25% of the property in RidgeHaven will remain natural, all historic trees are being preserved and approximately 1,552 new trees will be planted once all of the new homes are completed. The subdivision will have City water and sewer, and stormwater runoff will be recycled for irrigation, all of which eliminate the need for new wells and septic tanks. And there will be natural buffers between the subdivision and neighboring properties.

As an adjacent property owner, there are a couple of important things for you to know. First, your property is your property, and my client is not proposing to alter or to take your property in any way. RidgeHaven has been designed to have as little impact on your property as possible. The second thing you need to know is that the RidgeHaven project will result in the construction of predominantly paved access to your property, with stabilized and maintained access for the areas adjacent to the enclaves. Obviously, this is far safer and better road access than you have now and will be better maintained. It should also significantly increase the value of your property. Some adjacent lots have physical access currently, while others do not, but all existing parcels within the boundary of RidgeHaven will have full physical and legal access to new public roads once the project is completed. There will be a period between abandonment of the existing plat

and recording of the new RidgeHaven plat when my client will be providing you with legal access to your property via easements. In addition, all lots with existing physical access will continue to have physical access via the aforementioned easements as the new roads and other infrastructure are built. When the new subdivision plat is recorded, the easements will automatically terminate, and you will have new physical access to public roads, something that many current owners do not have.

Overall, RidgeHaven is going to be a great addition to the City that will result in improved access and increased value for your property. I hope that this letter about RidgeHaven is helpful and informative, but please feel free to reach out to me using the phone number and email address on this letter with any questions or concerns about RidgeHaven and your property.

Kindest regards,

Corey D. Brown

Through: Joyce Shanahan, City Manager

From: Steven Spraker, Planning Director

Date: June 6, 2023

Subject: RidgeHaven, Preliminary Plat

Commission Goal: Transportation & Community Development - Other

Introduction

This is a request from RidgeHaven, LLC, partial property owner and with authorization of the property owner of the other land areas, Snilloc Family Limited Partnership Number One, for a preliminary plat for 286 residential lots on 103.45 acres and associated site improvements. The proposed RidgeHaven subdivision is located south of Plantation Oaks Boulevard, east of Addison Drive, north of the Village of Pine Run subdivision, and west of the Plantation Oaks subdivision and includes the following Volusia County parcel numbers: 3136-01-01-0011, 3136-01-01-0012, 3136-01-33-0110, 3136-01-25-0010, 3136-01-24-0060, 3136-01-33-0080, 3136-01-01-0020, 3136-01-23-0060, and 3136-01-24-0050. The preliminary plat is a technical review to allow the subdivision of land consistent with the Planned Residential Development that is reviewed by the Planning Board and acted upon by the City Commission as a Resolution.

Background

The RidgeHaven subdivision includes nine parcels (Volusia County parcel numbers: 3136-01-01-0011, 3136-01-01-0012, 3136-01-33-0110, 3136-01-25-0010, 3136-01-24-0060, 3136-01-33-0080, 3136-01-01-0020, 3136-01-23-0060, and 3136-01-24-0050) that total 103.45 acres. Within the RidgeHaven subdivision land area there are eight (8) parcels individually owned (not owned by RidgeHaven) totaling approximately 5.7 acres. Seven (7) parcels are vacant and one parcel fronting Plantation Oaks Boulevard is developed with a single-family home. The RidgeHaven subdivision was located in unincorporated Volusia County with a desire to construct a subdivision. Representatives of the RidgeHaven subdivision had two options for subdivision development: (1) remain in unincorporated Volusia County and have Ormond Beach provide the project utilities or (2) become part of the North U.S. Highway 1 Interlocal Service Boundary Agreement (ISBA) area and develop the subdivision in Ormond Beach. The Interlocal Service Boundary Agreement allows the annexation of land while creating enclaves that remain in unincorporated Volusia County.

The City Commission adopted the original North U.S. 1 Interlocal Service Boundary Agreement on August 19, 2014 per Ordinance 2014-27. Concurrently, the Volusia County Council adopted the Interlocal Service Boundary Agreement on August 21, 2014 by Volusia County Ordinance 2014-12. The original Interlocal Service Boundary Agreement established the Municipal Service Area (MSA) and joint planning and service delivery agreement for the North U.S. Highway 1 area. The first amendment to the North U.S. 1 Interlocal Service Boundary Agreement was approved to add the land associated with Plantation Oaks Subdivision and the 13 enclaves surrounding the subdivision to the adopted Municipal Service Area. On August 20, 2019, the City Commission adopted the first amendment to the North U.S. Highway 1 Interlocal Service Boundary Agreement. The Volusia County Council subsequently adopted the agreement on September 17, 2019. The City of Ormond Beach (December 7, 2021 with Ordinance 2021-43) and Volusia County (February 15, 2022 with Ordinance 2022-9) approved the second amendment to the North U.S. Highway 1 Interlocal Service Boundary Agreement to add the land associated with the RidgeHaven subdivision and the individually owned parcels not owned by RidgeHaven to the adopted Municipal Service Area. During the County Council presentation and discussion, the RidgeHaven representative and city staff committed to establishing a limitation of 298 dwelling units for the entire RidgeHaven area. On March 22, 2022, the City Commission approved Ordinance 2022-05 that annexed the RidgeHaven subdivision.

With the Interlocal Service Boundary Agreement and annexation approved, the next step for the RidgeHaven project was the assignment of a city land use designation. For the existing land use entitlements, Volusia County staff analysis calculated a range of residential development from 716 to 1,052 dwelling units. The existing land use required a minimum of four units per acre. The city land use designation occurred with three separate actions:

1. Ordinance 2022-14 adopted July 19, 2022: The Ordinance amended the Future Land Use Element of the Comprehensive Plan to incorporate the second Interlocal Service Boundary Agreement and provide a text limitation within Policy 9.1.4 that states the RidgeHaven land area shall not exceed 3 units per acre and no more than 298 dwelling units for the entire RidgeHaven property. The maximum theoretical residential density was reduced by 754 residential units. For the non-RidgeHaven properties, the Ordinance included the text restriction that these parcels would maintain a maximum gross residential density of eight (8) units per acre – the same density that existed in unincorporated Volusia County.
2. Ordinance 2022-18, adopted August 3, 2022: The Ordinance authorized the following actions:
    1. Amended the Future Land Use Map designation for the RidgeHaven subdivision property (totaling 84.26 acres) from Volusia County “Urban Medium Intensity” (UMI) to Ormond Beach “Low Density Residential” (LDR). The Ordinance included the map annotation that the RidgeHaven subdivision would have a density restriction of three (3) units per acre and shall not exceed 298 residential units for the entire RidgeHaven subdivision; and
    2. Amended the Future Land Use Map designation of the properties not

associated with the RidgeHaven development from "Urban Medium Intensity" (UMI) to Ormond Beach "Medium Density Residential" (MDR). The Ordinance included the map annotation that these parcels would maintain a maximum gross residential density of eight (8) units per acre – the same density that existed in unincorporated Volusia County.

3. Ordinance 2022-12, adopted May 3, 2022: This Ordinance was for 19.19 acres owned by the RidgeHaven subdivision applicant that was part of the original Interlocal Service Boundary Agreement area. The Ordinance amended the Future Land Use for the property from "Low Intensity Commercial" (LIC) to "Medium Density Residential" (MDR). The Ordinance contained a condition that the density shall be restricted to eight (8) units per acre within the 19.19 acres and the RidgeHaven subdivision including the 84.26 acres shall not exceed 298 residential units.

Discussion

The subdivision has sought a zoning map amendment and the issuance of the development order. These actions provide the zoning framework for the subdivision development. These two Ordinances are scheduled for second reading at the June 6, 2023 City Commission meeting. The preliminary plat would allow the commencement of subdivision improvements. A final plat is required to be acted upon by the City Commission in order to subdivide the subdivision land area.

The project has the following attributes:

1. The total project size is 103.45 acres.
2. The development consists of 286 lots. Any subdivision phasing may be reviewed and approved of the Site Plan Review Committee as a minor amendment.
3. The project's gross density is 2.76 units per acre.
4. The project's net density (project acreage of 103.45 minus 6.49 acres of wetlands divided by 286 residential lots) is 2.95 units per acre.
5. The subdivision features three residential types: (a) duplex lots – 84 lots with a 35-foot lot frontage along the boundary of Addison Drive. These are allocated on the former B-8, Commercial land area that has a land use of "Medium Density Residential", (b) 50-foot lots – 136 lots that are located in the interior of the subdivision, and (c) 75-foot lots - 66 lots that are located at the rear of the subdivision, abutting the 35' natural area that abuts the Village of Pine Run.
6. There are two subdivision access points from Plantation Oaks Boulevard. No access is proposed from Addison Drive.
7. A traffic study was performed and is included the applicant package and a proportionate fair share agreement is required.
8. The project proposes internal sidewalks on both sides of the streets within the RidgeHaven subdivision. The project proposes a sidewalk connection off-site to connect to North U.S. Highway 1.
9. An Environmental Assessment Analysis performed by Ecological Consulting Solutions, Inc. A total of 8.04 acres of wetlands exists on the subject property. As designed, the project would have 1.75 acres of direct impacts to on-site

wetlands.

10. Recreational improvements include a 33,000 square foot outdoor amenity area including a pool and pool deck, including a dog park, playground and activity field. The project also includes two walking trails in the southeast corner of the property and along a lake and buffer area at the northeast corner.
11. The project proposes to preserve a total of 25.52 acres as natural preservation or 24.67% of the subject property. The Land Development Code requirement for natural preservation is 15% of the property and the Planned Residential Development standard is 20% of the property.
12. There is a 35-foot natural preservation area and existing ditch between the Ridgehaven subdivision and the Village of Pine Run. The Land Development Code requirement for a landscape buffer is six (6') feet.
13. Irrigation for the subdivision will be drawn from the stormwater ponds.
14. A street tree plan has been designed with 298 street trees.
15. A five-year expiration date for phase one of the project from the date of City Commission approval is proposed.
16. For the project stormwater, the site is surrounded on three (3) sides by ditches that ultimately flow to the east. The drainage pattern of the pre-developed site flows to the Addison Canal, the canal between this project and the Village of Pine Run Subdivision, the wetland and a ditch on the north side of the project.
17. The proposed stormwater treatment methodology is wet detention with stormwater harvesting. The wet detention system has multiple ponds with an equalizer pipe system that will maintain the normal water elevation for all ponds. The drainage patterns for the post-developed site includes the landscape/natural preservation that will continue to drain into the Addison Canal and the canal between Ridgehaven and Village of Pine Run. This acreage of this area has been significantly decreased. The area that drains to the north has also been decreased in the post-development conditions. The interior of the project will be directed onto the proposed stormwater treatment facility noted above. The stormwater wet detention will have an ultimate outfall to the swale along the northern border. This swale will intersect the swale along the western edge of the Village of Pine Run that flows to the north in the Plantation Oaks Phase III. By directing the surface water runoff into the stormwater facility, there will be a delay in the surface flow exiting the site as well as reduction of the actual volume entering the canal/pipe system through the Village of Pine Run.
18. All three (3) historic trees on-site have been preserved.
19. The project buffers are as follows:
    1. Abutting Addison Drive. Required: 10'. Provided: ranges from 12' to 22'.
    2. Abutting Plantation Oaks Boulevard. Required 20'. Provided: ranges from 30', 40, and 125' depending on the buffer location.
    3. Abutting Plantation Oaks, Phase 3. Required 6'. Provided: Ranges with a minimum of 40'.
    4. Abutting Village of Pine Run. Required: 6'. Provided: 35' natural area.

<u>Planning Board</u>

The Planning Board reviewed the preliminary plat at the April 13, 2023 meeting and recommended approval with a 5-1 vote. There were three individuals who spoke before

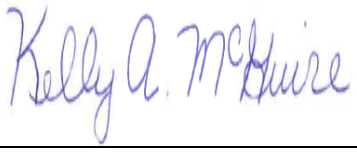
the Planning Board regarding the subdivision development. One individual sought additional screening of their property abutting a cul-de-sac which the applicant agreed with and the Planning Board made part of the approving motion for the issuance of the development order. Two individuals expressed concern regarding the project and the potential impacts on the Ormond Lakes stormwater system. The applicant detailed how the stormwater management plan reduces both the rate and volume of stormwater discharge post site development compared to the pre-development conditions. The project engineer stated that stormwater has been re-directed into the Plantation Oaks stormwater system versus the pre-development condition of discharge to the Village of Pine Run and eventually through the Ormond Lakes stormwater system. City staff also verified that the adopted Stormwater Master Plan has a planned stormwater study of the Ormond Lakes area. There were no specific comments on the preliminary plat. The Planning Board minutes are attached to this item.

Budget Impact

There is no budget impact as the result of the preliminary plat.

Citizen Impact

The project has undergone a substantial path in order to develop in Ormond Beach versus unincorporated Volusia County. The project has voluntarily reduced density of what was allowed under the Volusia County land use and zoning entitlements. It is not anticipated that the preliminary plat would have negative citizen impacts.



Recommendation

The Planning Board recommended that the City Commission approve the preliminary plat to allow 286 residential lots on 103.45 acres and associated site improvements, located south of Plantation Oaks Boulevard, east of Addison Drive, north of the Village of Pine Run subdivision, and west of the Plantation Oaks subdivision and includes the following Volusia County parcel numbers: 3136-01-01-0011, 3136-01-01-0012, 3136-01-33-0110, 3136-01-25-0010, 3136-01-24-0060, 3136-01-33-0080, 3136-01-01-0020, 3136-01-23-0060, and 3136-01-24-0050. The preliminary plat is consistent with the Planned Residential Development zoning and development order.

RESOLUTION NO. 2023-109

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF ORMOND BEACH, FLORIDA APPROVING THE PRELIMINARY PLAT FOR THE "RIDGEHAVEN" SUBDIVISION, A PLANNED RESIDENTIAL DEVELOPMENT; ESTABLISHING CONDITIONS AND EXPIRATION DATE OF APPROVAL; AND SETTING FORTH AN EFFECTIVE DATE.

WHEREAS, RidgeHaven, LLC, a Florida Limited Liability Company, and Snilloc Family Limited Partnership Number One, a Florida Limited Partnership, are the owners of nine parcels of real properties (the "Property Owners") and have submitted the preliminary plat for the "RidgeHaven" subdivision, and

WHEREAS, the Site Plan Review Committee and Planning Board have reviewed the preliminary plat and recommend approval, and

WHEREAS, the City Commission concurs with the recommendations of City staff and Planning Board, now therefore,

BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF ORMOND BEACH, FLORIDA:

SECTION ONE. The City Commission hereby approves a 286-lot preliminary plat for the "RidgeHaven" subdivision, as shown in the preliminary plat attached hereto as Exhibit

"A" and the construction plans attached hereto as Exhibit "B" and incorporated herein by reference, subject to full and continuous compliance to the Planned Residential Development Development Order as approved by Ordinance 2023-26.

SECTION TWO. The approval hereby granted shall expire automatically, in accordance with Chapter 1, Article II, Section 1-14(3)(a) of the *Land Development Code*, on **June 6, 2025**, unless the subject property is actively being developed such that permits have been issued and are continuing; or the requirements of Section 4-18 *Land Development Code* have been satisfied and a final plat has been approved by the City Commission, recorded, and the appropriate bond has been provided as required by Section 4-18(8)(c) of the *Land Development Code* for "RidgeHaven".

SECTION THREE. This Resolution shall take effect immediately upon its adoption.

APPROVED AND AUTHENTICATED, this 6th day of June, 2023.

MAP BOOK:__ PAGE:__

A REPLAT OF A PORTION OF NATIONAL GARDENS RECORDED IN MAP BOOK 10 PAGES 250 THROUGH 253, LYING SOUTHERLY OF THE NORTH LINE OF SECTION 36, TOWNSHIP 13 EAST, RANGE 31 SOUTH, WESTERLY OF THE EAST LINE OF SAID SECTION 36, NORTH OF ADDISON DRIVE, AND EASTERLY OF PLANTATION OAKS BOULEVARD, LOCATED IN ORMOND BEACH, FLORIDA.

GENERAL NOTES:

1. THE BEARINGS SHOWN HEREON ARE ASSUMED AND BASED ON THE EASTERLY LINE OF THE REVISED PLAT OF NATIONAL GARDENS, MAP BOOK 10, PAGE 250 THROUGH 253, AND THE EAST LINE OF SECTION 36, TOWNSHIP 13 SOUTH, RANGE 31 EAST, BEARING S02°04'17"E.

2. DRAINAGE AND UTILITY EASEMENTS (INCLUDING, BUT NOT LIMITED TO, FLORIDA POWER & LIGHT CO. AND ALL PUBLIC UTILITY COMPANIES), EXCEPT AS OTHERWISE SHOWN, ARE PROVIDED
AS FOLLOWS: 10 FT. ADJACENT TO ALL PUBLIC AND PRIVATE STREETS AND ON ALL LOTS, PARCELS, TRACTS AND COMMON AREAS.

3. ■ DENOTES PERMANENT REFERENCE MONUMENT (4"X4" CONCRETE MONUMENT WITH DISK STAMPED PRM, LB 3019 UNLESS OTHERWISE NOTED).

4. △ DENOTES PERMANENT CONTROL POINT (PK NAIL & DISC STAMPED PCP LB 3019 UNLESS OTHERWISE NOTED).

5. NOTICE: THIS PLAT, AS RECORDED IN ITS GRAPHIC FORM, IS THE OFFICIAL DEPICTION OF THE SUBDIVIDED LANDS DESCRIBED HEREIN AND WILL IN NO CIRCUMSTANCES BE SUPPLANTED IN AUTHORITY BY ANY OTHER GRAPHIC OR DIGITAL FORM OF THE PLAT. THERE MAY BE ADDITIONAL RESTRICTIONS THAT ARE NOT RECORDED ON THIS PLAT THAT MAY BE FOUND IN THE PUBLIC RECORDS OF THIS COUNTY.

6. THIS PLAT IS SUBJECT TO THE ARTICLES OF INCORPORATION FOR RIDGEHAVEN HOMEOWNERS' ASSOCIATION INC., RECORDED IN O.R. BOOK _____, PAGES _____ – _____, AND TO THE DECLARATION OF COVENANTS AND RESTRICTIONS FOR RIDGEHAVEN RECORDED IN O.R. BOOK _____, PAGES _____ – _____, BOTH IN THE PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA.

7. ALL LOT LINES ARE RADIAL UNLESS INDICATED AS (NR), NON–RADIAL.

8. DIMENSIONS ARE SHOWN IN U.S. SURVEY FEET AND DECIMALS THEREOF AND REFER TO THE HORIZONTAL PLANE.

9. THE UTILITY EASEMENTS REFERENCED ABOVE AND DEPICTED AS SHOWN HEREON ARE GRANTED AND CONVEYED TO ANY PUBLIC OR PRIVATE UTILITY, AND ARE SEVERABLE, NON–EXCLUSIVE EASEMENTS, GRANTING THE RIGHT TO CONSTRUCT, OPERATE, MAINTAIN AND REPAIR UNDERGROUND PUBLIC UTILITY SYSTEMS (INCLUDING WIRES, CABLES, CONDUITS AND ABOVE GROUND APPURTENANT EQUIPMENT) UNLESS OTHERWISE INDICATED.

10. ALL PLATTED UTILITY EASEMENTS SHALL PROVIDE THAT SUCH EASEMENTS SHALL ALSO BE EASEMENTS FOR THE CONSTRUCTION, INSTALLATION, MAINTENANCE, AND OPERATION OF CABLE TELEVISION SERVICES; PROVIDED, HOWEVER, NO SUCH CONSTRUCTION, INSTALLATION, MAINTENANCE, AND OPERATION OF CABLE TELEVISION SERVICES SHALL INTERFERE WITH THE FACILITIES AND SERVICES OF AN ELECTRIC, TELEPHONE, GAS, OR OTHER PUBLIC UTILITY. IN THE EVENT A CABLE COMPANY DAMAGES THE FACILITIES OF A PUBLIC UTILITY, IT SHALL BE SOLELY RESPONSIBLE FOR THE DAMAGES. THIS SECTION SHALL NOT APPLY TO THOSE PRIVATE EASEMENTS GRANTED TO OR OBTAINED BY A PARTICULAR ELECTRIC, TELEPHONE, GAS, OR OTHER PUBLIC UTILITY. SUCH CONSTRUCTION, INSTALLATION, MAINTENANCE, AND OPERATION SHALL COMPLY WITH THE NATIONAL SAFETY CODE AS ADOPTED BY THE FLORIDA PUBLIC SERVICE COMMISSION. [REPEAT]

11. THIS PLAT IS SUBJECT TO THE P.U.D. DEVELOPMENT AGREEMENT FOR _____, RESOLUTION NO. _____, RECORDED IN OFFICIAL RECORDS BOOK _____, PAGE _____, AND NOTICE OF ADOPTION OF DEVELOPMENT ORDER RECORDED IN O.R. BOOK _____, PAGE _____, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA.

12. ALL UTILITY, ACCESS, AND MAINTENANCE EASEMENTS WHERE WATER OR SANITARY SEWER GRAVITY AND/OR FORCE MAINS ARE LOCATED ARE HEREBY GRANTED TO THE CITY OF ORMOND BEACH, FLORIDA, WHO SHALL BE RESPONSIBLE FOR THE MAINTENANCE OF THESE UTILITY LINES WITHIN THE EASEMENTS.

13. DRAINAGE EASEMENTS, STORMWATER MANAGEMENT FACILITIES, DRAINAGE PIPES, PONDS, AND SWALES ARE THE MAINTENANCE RESPONSIBILITY OF THE RIDGEHAVEN HOMEOWNERS ASSOCIATION INC.

14. PORTIONS OF TRACTS A, B, C, I, L, M, F AND O, AS SHOWN HEREON ARE HERBY SUBJECT TO TREE PRESERVATION EASEMENTS IN FAVOR OF THE CITY OF ORMOND BEACH, FLORIDA.

15. ALL PONDS, STORM EASEMENTS AND ASSOCIATED DRAINAGE FACILITIES ARE HERBY SUBJECT TO AN EMERGENCY ACCESS EASEMENT FOR THE PURPOSE OF EMERGENCY MAINTENANCE.

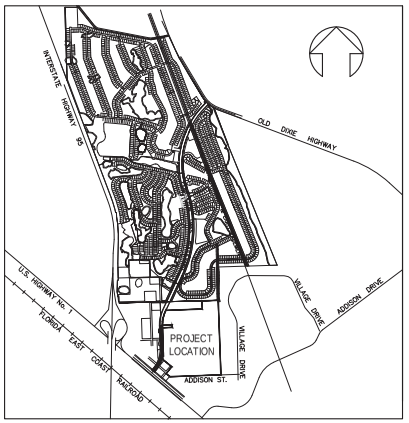
PRELIMINARY PLAT & CONSTRUCTION PLANS



ORMOND BEACH, FLORIDA

GENERAL NOTES

1.) ALL WATER MAINS TO BE P.V.C. DR-18, C-900.
2.) ALL SANITARY SEWER MAINS SHOWN ARE PVC SDR 26 @ 0.40% FOR 8", 0.30% FOR 10" UNLESS OTHERWISE NOTED.
SANITARY SERVICES ARE 4" SDR 26 @ MINIMUM 2.0% RESIDENTIAL CONNECTION.
SANITARY FORCE MAIN TO BE PVC, DR-18, C-900.
3.) CABLE T.V., TELEPHONE AND ELECTRIC SERVICES TO BE UNDERGROUND.
4.) CONTRACTOR TO VERIFY EXISTING UTILITIES PRIOR TO CONSTRUCTION AND TO REPORT ANY DISCREPANCIES TO DESIGN ENGINEER.
5.) WATER AND SEWER IMPROVEMENTS TO MEET CITY OF ORMOND BEACH STANDARDS.
6.) DOWNLIGHTS (STREET LIGHTS) TO BE FP&L STANDARD & CONTEMPORARY LIGHTS TO BE FP&L STANDARD LED, (CONTEMPORARY LIGHT) AND BLACK FIBERGLASS POLES, STREET LIGHTS AND POLES TO BE PROVIDED BY FPL.
7.) ELEVATIONS REFER TO MEAN SEA LEVEL NAVD 1988 DATUM.
8.) MINIMUM FINISH FLOOR GRADE PER CITY OF ORMOND BEACH REQUIREMENTS.
9.) SHOP DRAWINGS FOR POTABLE WATER AND SEWER TO BE SUBMITTED TO AND APPROVED BY CITY OF ORMOND BEACH AND DESIGN ENGINEER PRIOR TO CONSTRUCTION.
10.) POTABLE WATER SERVICE TO BE SUPPLIED BY CITY OF ORMOND BEACH.
11.) SANITARY SEWER SERVICE TO BE PROVIDED BY CITY OF ORMOND BEACH.
12.) ALL DISTURBED AREAS TO BE SEEDED AND MULCHED.
13.) WHERE SANITARY FORCE MAINS CROSS POTABLE WATER LINES, THE FORCE MAIN IS TO BE CONSTRUCTED OF PVC SDR-18 FOR 20 FEET CENTERED ON THE POTABLE WATER MAIN.
14.) OFFSITE UTILITIES WILL BE CONSTRUCTED UNDER THE APPROPRIATE PHASE AND MUST BE COMPLETE PRIOR TO ISSUANCE OF CERTIFICATE OF OCCUPANCY. PROJECT TO BE BUILT IN ONE PHASE.
15.) PRIOR TO CERTIFICATE OF OCCUPANCY ALL OFFSITE EASEMENTS (IF REQUIRED) NEED TO BE RECORDED AND REFERENCED BY PLAT OR O.R. BOOK AND PAGE AND RECORDED UNDER SEPARATE INSTRUMENT.
16.) ONSITE SEWER AND POTABLE WATER INFRASTRUCTURE TO BE OWNED AND MAINTAINED BY THE CITY OF ORMOND BEACH.
OFFSITE SYSTEM WILL BE OWNED AND MAINTAINED BY THE CITY OF ORMOND BEACH (UNLESS OTHERWISE NOTED).
17.) ALL STOP SIGNS, SPEED LIMIT AND STREET SIGNS REQUIRED TO BE PROVIDED BY DEVELOPER TO CITY OF ORMOND BEACH SPECIFICATIONS. ALL TRAFFIC CONTROL SIGNS SHALL BE FABRICATED IN ACCORDANCE WITH THE MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES USING 3M BRAND "SCOTCHLITE" SHEETING (ENGINEER GRADE) ON MINIMUM 0.080 GAUGE 5052-H38 ALUMINUM BLANKS. ALL STOP SIGNS SHALL BE HIGH INTENSITY 30" OR 36" OCTAGON INSTALLED ON 3"x 12" ROUND ALUMINUM POSTS. "U" CHANNEL POSTS MAY BE USED FOR ALL SIGNS SMALLER THAN 36" x 48". ALL WARNING SIGNS SHALL BE 30" X 30", ALL STREET NAME SIGNS SHALL BE 9" IN HEIGHT WITH 5" HIGH UPPER & LOWER CASE WHITE LETTERS ON A GREEN BACKGROUND WITH A MIN. 30" LENGTH. PROVIDE 24" WIDE WHITE THERMOPLASTIC STOP BARS ADJACENT TO ALL LOCAL STREET 30" STOP SIGNS, WHERE 12" WIDE WHITE CROSSWALK STRIPING IS PROVIDED, THE STOP BAR AND 30" STOP SIGN MUST BE 4' IN ADVANCE OF THE CROSSWALK IN ACCORDANCE WITH FDOT STANDARD INDEX #17346. IN ALL LOCATIONS, THE 30" STOP SIGN AND 24" WIDE WHITE STOP BARS SHOULD BE LOCATED 10' IN ADVANCE OF THE EDGE OF THE TRAVELED WAY AT THE STREET INTERSECTION. SEE DETAIL SHEETS FOR PROPOSED ORNAMENTAL POLES.
18.) ALL MAINTENANCE OF ALL COMMON AREAS, LAKES, AMENITY AREAS, LANDSCAPE AND IRRIGATION TO BE THE SOLE RESPONSIBILITY OF RidgeHaven H.O.A. INC.
19.) OUTDOOR CONSTRUCTION ACTIVITY SHALL ONLY OCCUR FROM 7 AM TO 7 PM MONDAY THROUGH SATURDAY.
20.) EXCEPT WITHIN THE EXISTING FPL EASEMENT, ALL UTILITIES ARE TO BE INSTALLED UNDERGROUND, INCLUDING THE SERVICE DROPS TO INDIVIDUAL BUILDINGS OUTSIDE OF ALL REQUIRED LANDSCAPE BUFFERS, WETLANDS AND WETLAND BUFFER AREAS.
21.) DRIVING AND/OR STAGING OF CONSTRUCTION VEHICLES IS NOT PERMITTED ON ANY SIDEWALKS IN THE RIGHT-OF-WAY. ANY DAMAGE TO SIDEWALKS WILL BE REPAIRED AND/OR REPLACED IN THE LIKE KIND BY THE CONTRACTOR.

FRONT YARD.....20'

3. DUPLEX (35'x110' MIN)

MINIMUM LOT SIZE = 3,850 SF
TOTAL NUMBER OF 35'x110' MIN LOTS = 84
MINIMUM FLOOR AREA = 1,400 SF
MAXIMUM BUILDING COVERAGE = 60%
MAXIMUM LOT IMPERVIOUS AREA = 80%
MAXIMUM BUILDING HEIGHT = 35 FT

SETBACKS:
FRONT.....20'
FRONT (NO GARAGE ACCESS).....15'
SIDE.....0'(0' COMMON WALL)
REAR.....10'
WATERFRONT.....10'

POOL PAVILION PARKING:
PAVILION.....748 SF
POOL.....3,750 SF
DOG PARK.....2,400 SF

PARKING PROVIDED:
STANDARD.....21
HANDICAPPED.....2
TOTAL.....23

TREE PRESERVATION AREA CALCULATION:

TREE PRESERVATION AREA REQUIRED = 15%
103.45 AC X 0.15 = 15.52 AC
TREE PRESERVATION AREA PROVIDED:
INCLUDING WETLANDS AND UPLAND BUFFERS = 17.153 AC + 8.370 AC = 25.523 AC = 24.672%

NATURAL OPEN SPACE CALCULATION:

NATURAL OPEN SPACE REQUIRED = 20%
ADJUSTED SITE AREA = SITE AREA - WETLAND AREA (TO REMAIN),
103.45 AC - 6.49 AC = 96.96 AC
REQUIRED OPEN SPACE = 96.96 AC X 0.20 = 19.39 AC
NATURAL OPEN SPACE PROVIDED = 19.76 AC = 20.38%

LEGAL DESCRIPTION

RIDGEHAVEN DESCRIPTION:
ALL OF BLOCKS 1, 2, 23, 24, 27, 28, 29, 30, 31, 32, 33 AND 41, 42, 43 AND 44, AND THOSE PORTIONS OF BLOCKS 3, 4, 5, 8, 9, 22, 34, 35 AND 39 AND THE PUBLIC AND VACATED ROADS AND ALLEYS, REVISED PLAT OF NATIONAL GARDENS, AS RECORDED IN MAP OR PLAT BOOK 10, PAGES 200 THROUGH 203, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA, IN SECTION 35, TOWNSHIP 13 SOUTH, RANGE 31 EAST, VOLUSIA COUNTY, FLORIDA, LYING WITHIN THE FOLLOWING DESCRIBED BOUNDARY:

BEGIN AT THE NORTHEAST CORNER OF SAID REVISED PLAT OF NATIONAL GARDENS, BEING ALSO THE NORTHEAST CORNER OF SECTION 35, TOWNSHIP 13 SOUTH, RANGE 31 EAST; THENCE RUN S01°04'17"E ALONG THE EASTERLY LINE OF SAID REVISED PLAT OF NATIONAL GARDENS AND THE EAST LINE OF SAID SECTION 35, A DISTANCE OF 2615.82 FEET TO THE NORTHWEST RIGHT OF WAY LINE OF ADDISON DRIVE, 80.00 FOOT WIDE RIGHT OF WAY PER SAID REVISED PLAT OF NATIONAL GARDENS; THENCE S87°53'25"W ALONG SAID NORTHERLY RIGHT OF WAY LINE, 1934.88 FEET TO THE NORTHERLY RIGHT OF WAY LINE OF ATLANTIC ROAD, A 60.00 FOOT WIDE RIGHT OF WAY PER SAID REVISED PLAT OF NATIONAL GARDENS; THENCE N01°04'17"W ALONG SAID NORTHERLY RIGHT OF WAY LINE, 1.00 FEET TO THE SOUTHERLY EXTENSION OF THE EASTERLY RIGHT OF WAY LINE OF LOT 1, BLOCK 23, SAID REVISED PLAT OF NATIONAL GARDENS; THENCE N01°04'17"W ALONG SAID EASTERLY EXTENSION AND ALONG THE SOUTHWESTERLY LINE OF SAID LOT 1, A DISTANCE OF 439.08 FEET TO THE BEGINNING OF A NON-TANGENT CURVE AND A POINT ON THE EASTERLY RIGHT OF WAY LINE OF PLANTATION OAKS BOULEVARD, FORMERLY PLANTATION DRIVE, 100.00 FOOT WIDE RIGHT OF WAY PER SAID REVISED PLAT OF NATIONAL GARDENS; THENCE NORTHWESTERLY, NORTHERLY AND NORTHEASTERLY ALONG A NON-TANGENT CURVE CONCAVE NORTHWESTERLY, HAVING A RADIUS OF 750.00 FEET, A CENTRAL ANGLE OF 79°28'19", AN ARC LENGTH OF 1040.39 FEET, A CHORD BEARING OF N37°20'07"E AND A CHORD DISTANCE OF 958.77 FEET TO THE POINT OF TANGENCY; THENCE N77°36'16"E ALONG SAID EASTERLY RIGHT OF WAY LINE AND THE ARC OF SAID CURVE, 244.82 FEET TO THE POINT OF TANGENCY; THENCE N03°08'46"W ALONG SAID EASTERLY RIGHT OF WAY LINE, 1.00 FEET TO THE NORTHWESTERLY CORNER OF LOT 1, BLOCK 22, SAID REVISED PLAT OF NATIONAL GARDENS; THENCE N87°44'10"E ALONG THE NORTHERLY LINE OF SAID LOT 1, BLOCK 22, SAID REVISED PLAT OF NATIONAL GARDENS, AND ALONG THE NORTHERLY LINE OF SAID BLOCK 23, AS NOW MONUMENTED, THENCE N03°03'34"W ALONG SAID MONUMENTED EASTERLY LINE, 1934.88 FEET TO THE NORTHWESTERLY CORNER OF SAID REVISED PLAT OF NATIONAL GARDENS AND THE NORTH LINE OF SAID SECTION 35; THENCE N89°26'26"E ALONG SAID NORTHERLY LINE, 1951.53 FEET TO THE POINT OF BEGINNING.

LESS AND EXCEPT LOTS 1, 2 AND 3, BLOCK 24 AND LOTS 5, 6, 7, AND 8, BLOCK 23, SAID REVISED PLAT OF NATIONAL GARDENS, MORE PARTICULARLY DESCRIBED AS THE FOLLOWING:
BEGIN AT THE NORTHWEST CORNER OF SAID LOT 1, BLOCK 24, THENCE RUN N89°41'33"E, 345.20 FEET TO THE NORTHEAST CORNER OF SAID LOT 3, BLOCK 24, BEING THE NORTHWEST CORNER OF SAID LOT 2, BLOCK 23; THENCE N89°19'26"E, 345.14 FEET TO THE NORTHEAST CORNER OF SAID LOT 2, BLOCK 23, BEING THE NORTHWEST CORNER OF SAID LOT 3, BLOCK 23; THENCE S89°19'26"E, 345.14 FEET TO THE SOUTHEAST CORNER OF SAID LOT 3, BLOCK 23, BEING THE NORTHWEST CORNER OF SAID LOT 4, BLOCK 23; THENCE N00°23'27"E, 271.73 FEET TO THE NORTHWEST CORNER OF SAID LOT 4, BLOCK 23, BEING THE SOUTHWEST CORNER OF SAID LOT 8, BLOCK 23; THENCE S89°19'23"E, 345.14 FEET TO THE SOUTHWEST CORNER OF SAID LOT 7; THENCE N00°23'27"E, 271.46 FEET TO THE POINT OF BEGINNING.

THE NET AREA OF THE ABOVE DESCRIBED BEING 103.450 ACRES, MORE OR LESS.

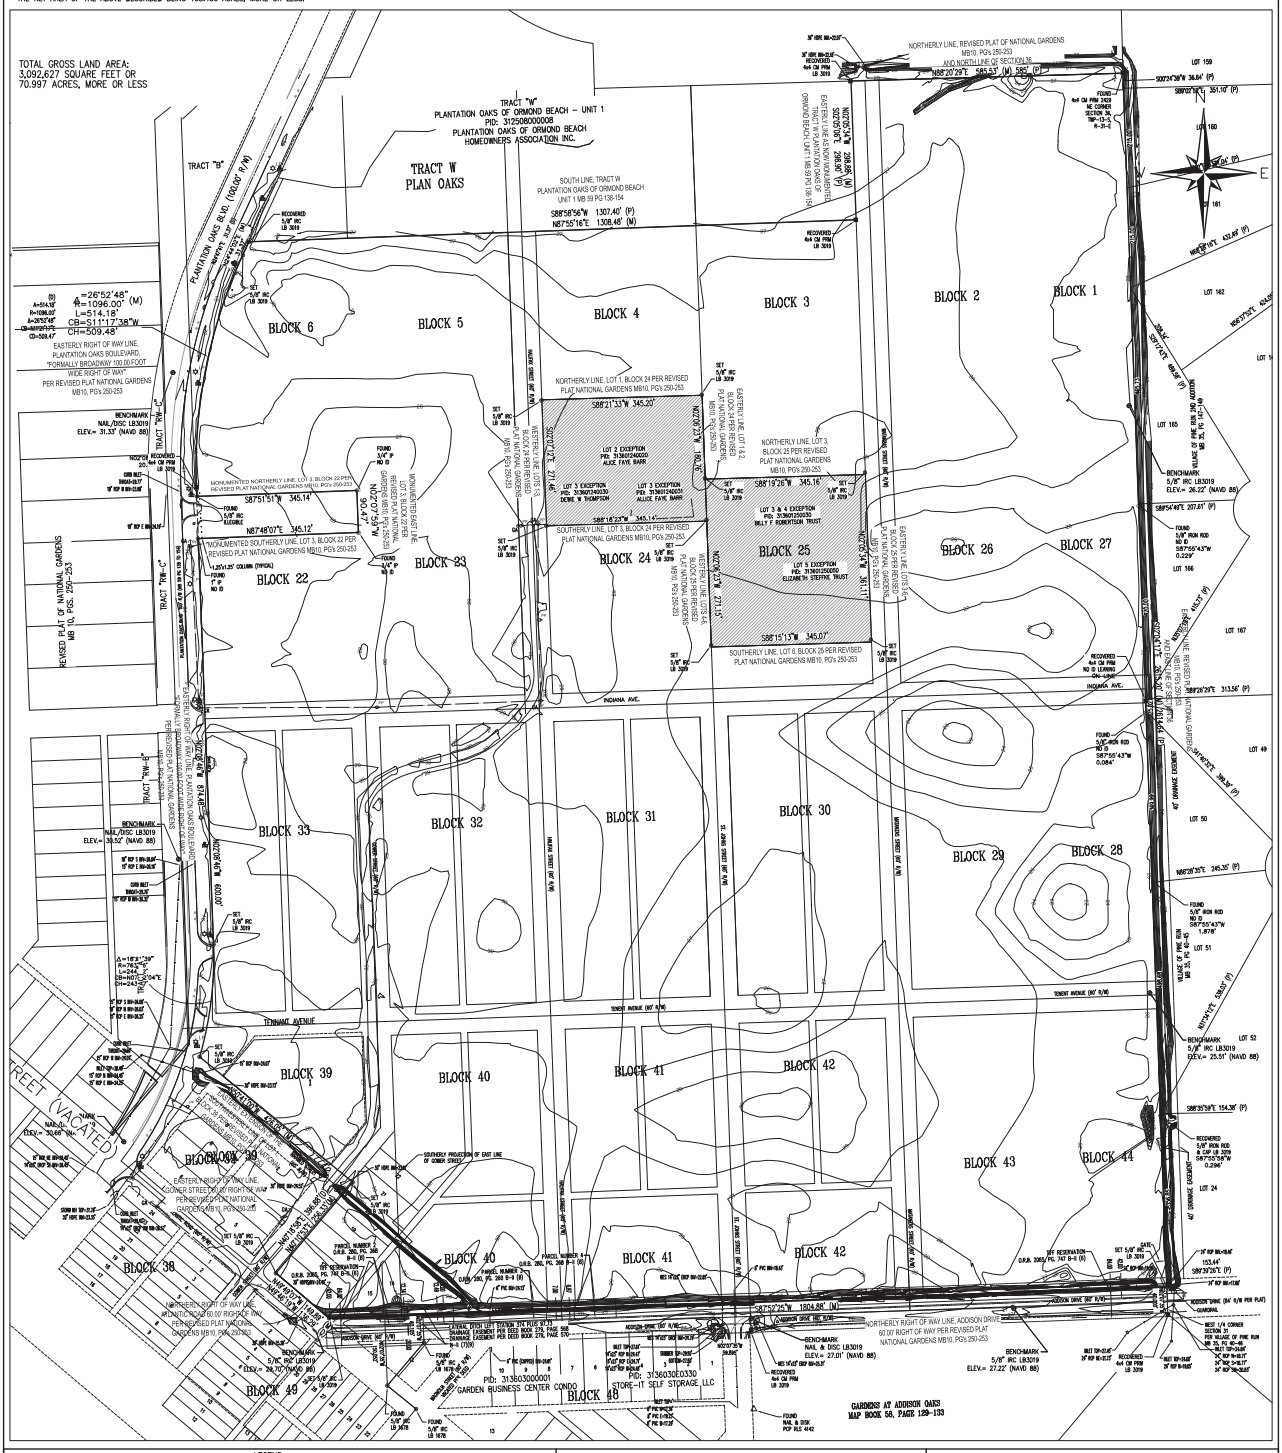
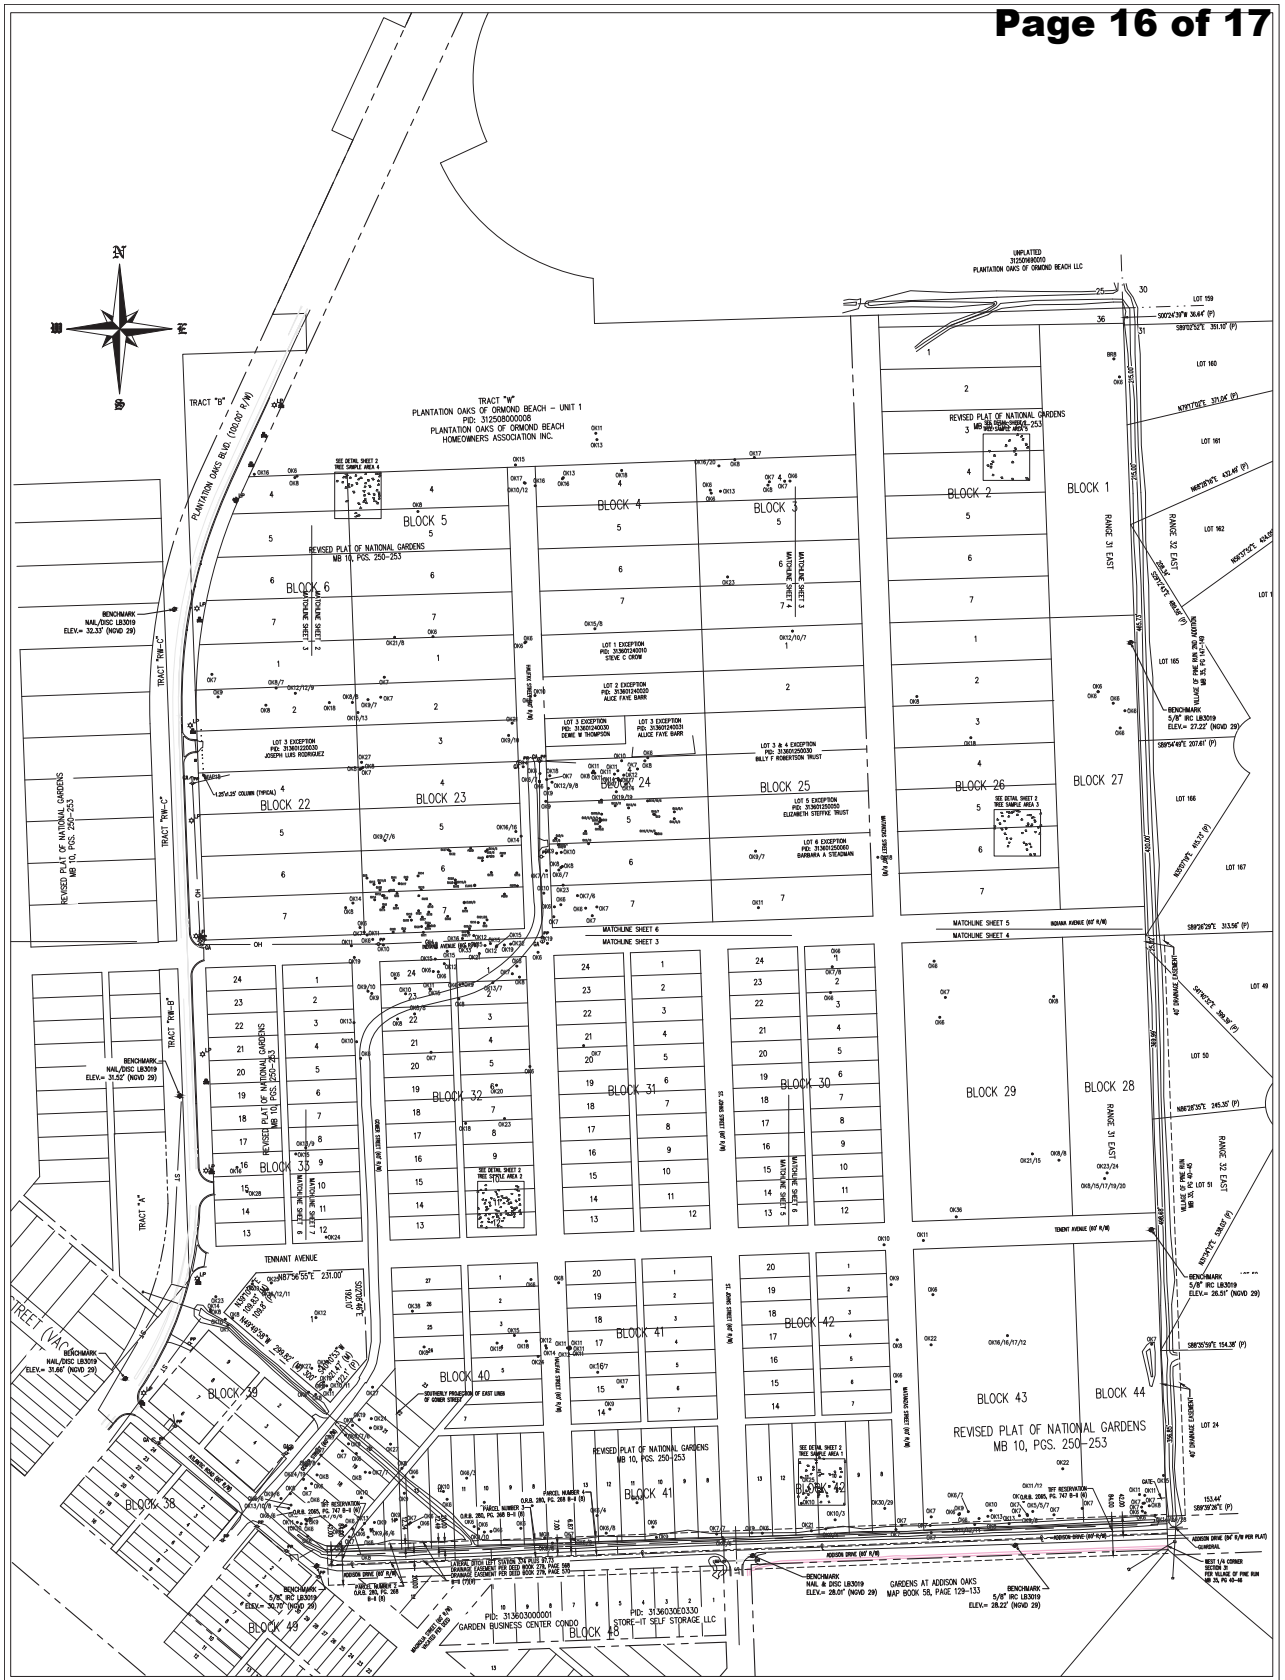
RIDGEHAVEN DESCRIPTION:
ALL OF BLOCKS 1, 2, 21, 26, 27, 28, 29, 30, 31, 32, 33, 40, 41, 42, 43 AND 44, AND THOSE PORTIONS OF BLOCKS 3, 4, 5, 6, 22, 24, 25 AND 39 AND THE PUBLIC AND VACATED ROADS AND ALLEYS, REVISED PLAT OF NATIONAL GARDENS, AS RECORDED IN MAP OR PLAT BOOK 10, PAGES 250 THROUGH 253, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA, IN SECTION 36, TOWNSHIP 13 SOUTH, RANGE 31 EAST, VOLUSIA COUNTY, FLORIDA, LYING WITHIN THE FOLLOWING DESCRIBED BOUNDARY:



BEGIN AT THE NORTHEAST CORNER OF SAID REVISED PLAT OF NATIONAL GARDENS, BEING ALSO THE NORTHWEST CORNER OF SECTION 36, TOWNSHIP 13 SOUTH, RANGE 31 EAST; THENCE RUN S02°04'17"E ALONG THE EASTERLY LINE OF SAID REVISED PLAT OF NATIONAL GARDENS AND THE EAST LINE OF SAID SECTION 36, A DISTANCE OF 2615.20 FEET TO THE NORTHERLY RIGHT OF WAY LINE OF ADDISON DRIVE; 60.00 FOOT WIDE RIGHT OF WAY PER SAID REVISED PLAT OF NATIONAL GARDENS; THENCE S87°52'25"W ALONG SAID NORTHERLY RIGHT OF WAY LINE, 1804.88 FEET TO THE NORTHERLY RIGHT OF WAY LINE OF ATLANTIC ROAD, A 60.00 FOOT WIDE RIGHT OF WAY PER SAID REVISED PLAT OF NATIONAL GARDENS; THENCE N49°07'07"W ALONG SAID NORTHERLY RIGHT OF WAY LINE, 149.89 FEET TO THE EASTERLY RIGHT OF WAY LINE OF GOWER STREET, 60.00 FOOT WIDE RIGHT OF WAY PER SAID REVISED PLAT OF NATIONAL GARDENS; THENCE N40°10'53"E ALONG SAID EASTERLY RIGHT OF WAY, 256.33 FEET TO THE EASTERLY EXTENSION OF THE SOUTHWESTERLY LINE OF LOT 1, BLOCK 39, SAID REVISED PLAT OF NATIONAL GARDENS; THENCE N50°41'00"W ALONG SAID EASTERLY EXTENSION AND ALONG THE SOUTHWESTERLY LINE OF SAID LOT 1, A DISTANCE OF 426.05 FEET TO THE BEGINNING OF A NON-TANGENT CURVE AND A POINT ON THE EASTERLY RIGHT OF WAY LINE OF PLANTATION OAKS BOULEVARD, FORMERLY BROADWAY, 100.00 FOOT WIDE RIGHT OF WAY PER SAID REVISED PLAT OF NATIONAL GARDENS; SAID NON TANGENT CURVE BEING CONCAVE NORTHWESTERLY, HAVING A RADIUS OF 763.96 FEET, A CENTRAL ANGLE OF 19° 21'39" AND A CHORD BEARING OF N07°02'04"E; THENCE NORTHERLY ALONG SAID EASTERLY RIGHT OF WAY LINE AND THE ARC OF SAID CURVE, 244.82 FEET TO THE POINT OF TANGENCY; THENCE N02°08'46"W ALONG SAID EASTERLY RIGHT OF WAY LINE, 874.48 FEET TO THE MONUMENTED SOUTHERLY LINE OF LOT 3, BLOCK 22, SAID REVISED PLAT OF NATIONAL GARDENS; THENCE N87°48'07"E ALONG SAID SOUTHERLY LINE, 345.12 FEET TO THE MONUMENTED SOUTHEAST CORNER OF SAID LOT 3; THENCE N02°07'59"W ALONG THE EASTERLY LINE OF SAID LOT 3, A DISTANCE OF 90.47 FEET TO THE MONUMENTED NORTHERLY LINE OF SAID LOT 3, A DISTANCE OF 345.14 FEET TO THE EASTERLY RIGHT OF WAY LINE OF SAID PLANTATION OAKS BOULEVARD; THENCE N02°08'46"W ALONG SAID EASTERLY RIGHT OF WAY LINE, 20.19 FEET TO A BEING THE BEGINNING OF A TANGENT CURVE, CONCAVE EASTERLY, HAVING A RADIUS OF 1096.00 FEET, A CENTRAL ANGLE OF 26°52'48" AND A CHORD BEARING N11°17'38"E; THENCE NORTHERLY ALONG SAID EASTERLY RIGHT OF WAY LINE AND ALONG THE ARC OF SAID CURVE, 514.18 FEET TO THE POINT OF TANGENCY; THENCE N24°44'02"E ALONG SAID EASTERLY RIGHT OF WAY LINE, 31.37 FEET TO THE SOUTHERLY LINE OF TRACT "W", SAID PLANTATION OAKS OF ORMOND BEACH – UNIT 1, RECORDED ON MAP BOOK 59, PAGES 138–154; THENCE N87°55'16"E ALONG SAID SOUTHERLY LINE, 1308.48 FEET TO THE EASTERLY LINE OF SAID TRACT "W" AS NOW MONUMENTED; THENCE N02°05'34"W ALONG SAID MONUMENTED EASTERLY LINE, 298.88 FEET TO THE NORTHERLY LINE OF SAID REVISED PLAT OF NATIONAL GARDENS AND THE NORTH LINE OF SAID SECTION 36; THENCE N88°20'29"E ALONG SAID NORTHERLY LINE, 585.53 FEET TO THE POINT OF BEGINNING.



LESS AND EXCEPT LOTS 1, 2 AND 3, BLOCK 24 AND LOTS 3, 4, 5 AND 6, BLOCK 25, SAID REVISED PLAT OF NATIONAL GARDENS, MORE PARTICULARLY DESCRIBED AS THE FOLLOWING:
BEGIN AT THE NORTHWEST CORNER OF SAID LOT 1, BLOCK 24; THENCE RUN N88°21'33"E, 345.20 FEET TO THE NORTHEAST CORNER OF SAID LOT 1; THENCE S02°06'23"E, 180.76 FEET TO THE SOUTHEAST CORNER OF SAID LOT 2, BLOCK 24, BEING THE NORTHWEST CORNER OF SAID LOT 3, BLOCK 25; THENCE N88°19'26"E, 345.16 FEET TO THE NORTHEAST CORNER OF SAID LOT 3; THENCE S02°05'34"E, 361.11 FEET TO THE SOUTHEAST CORNER OF SAID LOT 6, BLOCK 25; THENCE S88°15'13"W, 345.07 FEET TO THE SOUTHWEST CORNER OF SAID LOT 6; THENCE N02°06'23"W, 271.15 FEET TO THE NORTHWEST CORNER OF SAID LOT 4, BLOCK 25, BEING THE SOUTHEAST CORNER OF SAID LOT 3, BLOCK 24; THENCE S88°18'23"W, 345.14 FEET TO THE SOUTHWEST CORNER OF SAID LOT 3; THENCE N02°07'12"W, 271.46 FEET TO THE POINT OF BEGINNING.

THE NET AREA OF THE ABOVE DESCRIBED BEING 103.450 ACRES, MORE OR LESS.

SURVEYORS NOTES

1. NOTICE: THIS SURVEY WAS PREPARED WITH BENEFIT OF A COMMITMENT FOR TITLE INSURANCE ISSUED BY OLD REPUBLIC NATIONAL TITLE INSURANCE COMPANY, COMMITMENT #1074422; ISSUING OFFICE #371400, FILE #2832-17 DATED FEBRUARY 10, 2021 AT 11:00 PM.
2. DIMENSIONS ARE SHOWN IN FEET AND DECIMALS THEREOF.
3. BEARING STRUCTURE BASED ON NAD 83, FLORIDA STATE PLANE, EAST ZONE, U.S. SURVEY FOOT, WITH THE BEARING ON THE EAST LINE OF SECTION 36 BEING S02°04'46E.
4. UNDERGROUND FOUNDATIONS, IF ANY, NOT LOCATED.
5. ELEVATIONS REFER TO N.A.V.D. OF 1988, PER NGS MONUMENT DESIGNATION X-226 HAVING A PUBLISHED ELEVATION OF 29.48' NAVD 88. (NAVD 30.573 FEET)
6. THIS PROPERTY IS LOCATED IN FLOOD INSURANCE RATE MAP (F.I.R.M.) ZONE "X". THIS LOCATION IS DETERMINED BY SCALING FROM F.I.R.M. MAP NO. 12127C0203K. MAP EFFECTIVE DATE: SEPTEMBER 29, 2017. APPROXIMATE SCALE: 1"=500'.
7. "NOT VALID WITHOUT THE SIGNATURE AND THE ORIGINAL RAISED SEAL OR ELECTRONIC SIGNATURE OF A FLORIDA LICENSED SURVEYOR AND MAPPER."
8. UNLESS OTHERWISE SHOWN, RECORD DISTANCES AND DIRECTIONS AND FIELD MEASURED DISTANCES AND DIRECTIONS ARE THE SAME.
9. THE PORTION OF PENNSYLVANIA AVENUE SHOWN HEREON AS VACATED (PER ORB 5498, PAGE 1745)(VOLUSIA COUNTY RESOLUTION 2005-15) HAS BEEN INCLUDED IN THIS BOUNDARY SURVEY ALTHOUGH IT WAS NOT INCLUDED IN THE DESCRIPTION PROVIDED BY THE TITLE COMPANY IN THE COMMITMENT SHOWN IN NOTE #1 ABOVE.
10. THE VERTICAL RELIEF SHOWN HEREON IS BASED ON A GROUND SURVEY PERFORMED BY SLIGER & ASSOCIATES, INC.

SURVEYORS NOTES

1. NOTICE: THIS SURVEY WAS PREPARED WITH BENEFIT OF A COMMITMENT FOR TITLE INSURANCE ISSUED BY OLD REPUBLIC NATIONAL TITLE INSURANCE COMPANY, COMMITMENT #1016422; ISSUING OFFICE #3714601, FILE #2832-17 DATED FEBRUARY 10, 2021 AT 11:00 PM..
2. DIMENSIONS ARE SHOWN IN FEET AND DECIMALS THEREOF.
3. BEARING STRUCTURE BASED ON NAD 83, FLORIDA STATE PLANE, EAST ZONE, U.S. SURVEY FOOT, WITH THE BEARING ON THE EAST LINE OF SECTION 36 BEING S02°04'46E.
4. UNDERGROUND FOUNDATIONS, IF ANY, NOT LOCATED.
5. ELEVATIONS REFER TO N.G.V.D. OF 1929, PER NGS MONUMENT DESIGNATION X-226 HAVING A PUBLISHED ELEVATION OF 30.573 FEET (29.48' NAVD 88).
6. THIS PROPERTY IS LOCATED IN FLOOD INSURANCE RATE MAP (F.I.R.M.) ZONE "X". THIS LOCATION IS DETERMINED BY SCALING FROM F.I.R.M. MAP NO. 12127C0203K. MAP EFFECTIVE DATE: SEPTEMBER 29, 2017. APPROXIMATE SCALE: 1"=500'.
7. "NOT VALID WITHOUT THE SIGNATURE AND THE ORIGINAL RAISED SEAL OR ELECTRONIC SIGNATURE OF A FLORIDA LICENSED SURVEYOR AND MAPPER."
8. UNLESS OTHERWISE SHOWN, RECORD DISTANCES AND DIRECTIONS AND FIELD MEASURED DISTANCES AND DIRECTIONS ARE THE SAME.
9. THE PORTION OF PENNSYLVANIA AVENUE SHOWN HEREON AS VACATED (PER ORB 5498, PAGE 1745)(VOLUSIA COUNTY RESOLUTION 2005-15) HAS BEEN INCLUDED IN THIS BOUNDARY SURVEY ALTHOUGH IT WAS NOT INCLUDED IN THE DESCRIPTION PROVIDED BY THE TITLE COMPANY IN THE COMMITMENT SHOWN IN NOTE #1 ABOVE.
10. LOT 7, BLOCK 4 IS NOT MENTIONED IN TITLE COMMITMENT DESCRIPTION. PER THE VOLUSIA COUNTY TAX ASSESSOR, THE TITLE IS VESTED IN SNILLOC FAMILY LP NUMBER ONE AS A PORTION OF PARCEL 2 (TAX ID #3136010101011 - LOTS 4 TO 7 INCLUSIVE, BLOCK 4) AND HAS BEEN INCLUDED IN THIS SURVEY PER CLIENT DIRECTION.
11. THE VERTICAL RELIEF SHOWN HEREON IS BASED ON A GROUND SURVEY PERFORMED BY SLIGER & ASSOCIATES, INC.

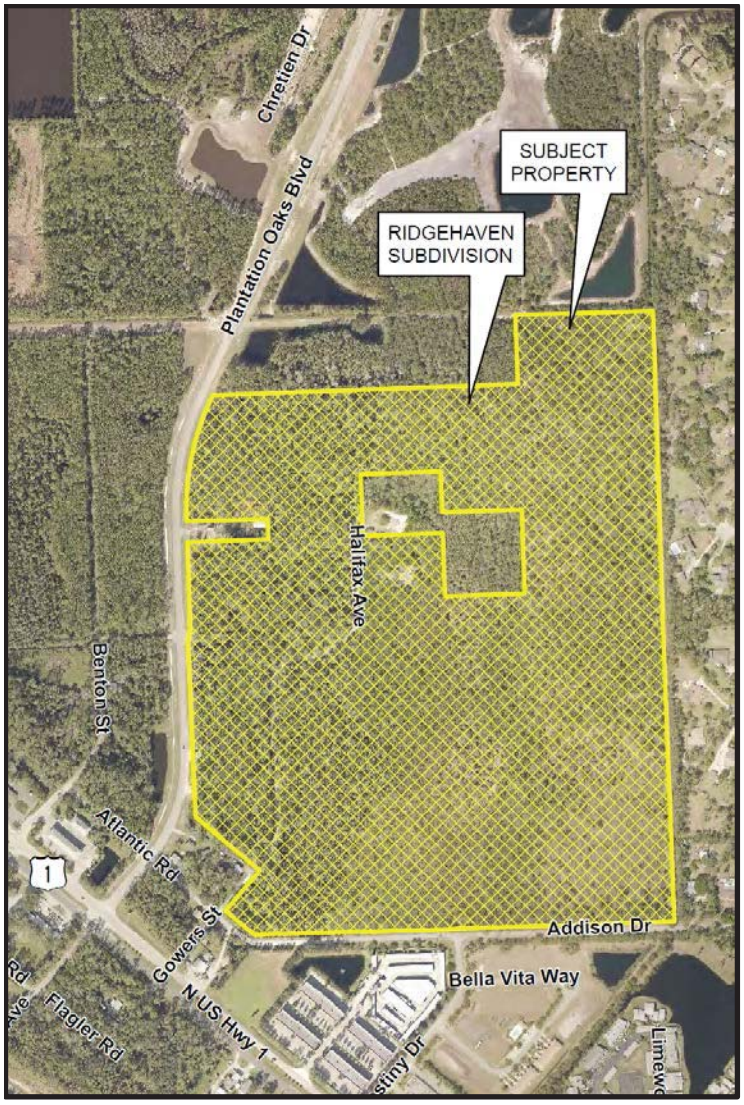
STAFF REPORT

City of Ormond Beach
Department of Planning

MEETING DATE: April 13, 2023

SUBJECT: RidgeHaven subdivision– **Preliminary Plat**



APPLICANT: RidgeHaven, LLC, with authorization of the property owner Snilloc Family Limited Partnership Number One

NUMBER: PRD 2022-061(C)

PROJECT PLANNER: Steven Spraker, AICP, Planning Director

SECTION 1, INTRODUCTION: This is a request from RidgeHaven, LLC, with authorization of the property owner Snilloc Family Limited Partnership Number One, for a preliminary plat for 286 residential lots on 103.45 acres and associated site improvements. The proposed RidgeHaven subdivision is located south of Plantation Oaks Boulevard, east of Addison Drive, north of the Village of Pine Run subdivision, and west of the Plantation Oaks subdivision and includes the following Volusia County parcel numbers: 3136-01-01-0011, 3136-01-01-0012, 3136-01-33-0110, 3136-01-25-0010, 3136-01-24-0060, 3136-01-33-0080, 3136-01-01-0020, 3136-01-23-0060, and 3136-01-24-0050. A preliminary plat is required in order to subdivide land and is required to be consistent with the development order proposed in PRD 2022-061(B). The project's location is shown in Exhibit 1.

EXHIBIT 1: RidgeHaven subdivision location map

SECTION 2, BACKGROUND: The RidgeHaven subdivision includes nine parcels (Volusia County parcel numbers: 3136-01-01-0011, 3136-01-01-0012, 3136-01-33-0110, 3136-01-25-0010, 3136-01-24-0060, 3136-01-33-0080, 3136-01-01-0020, 3136-01-23-0060, and 3136-01-24-0050) that total 103.45 acres. Within the RidgeHaven subdivision land area there are eight (8) parcels individually owned (not owned by RidgeHaven) totaling approximately 5.7 acres. Seven (7) parcels are vacant and one parcel fronting Plantation Oaks Boulevard is developed with a single-family home. The RidgeHaven subdivision was located in unincorporated Volusia County with a desire to construct a subdivision. Representatives of the RidgeHaven subdivision had two options for subdivision development: (1) remain in unincorporated Volusia County and have Ormond Beach provide the project utilities or (2) become part of the North U.S. Highway 1 Interlocal Service Boundary Agreement (ISBA) area and develop the subdivision in Ormond Beach. The Interlocal Service Boundary Agreement allows the annexation of land while creating enclaves that remain in unincorporated Volusia County.

The City Commission adopted the original North U.S. 1 Interlocal Service Boundary Agreement on August 19, 2014 per Ordinance 2014-27. Concurrently, the Volusia County Council adopted the Interlocal Service Boundary Agreement on August 21, 2014 by Volusia County Ordinance 2014-12. The original Interlocal Service Boundary Agreement established the Municipal Service Area (MSA) and joint planning and service delivery agreement to the North U.S. Highway 1 area. The first amendment to the North U.S. 1 Interlocal Service Boundary Agreement was approved to add the land associated with Plantation Oaks Subdivision and the 13 enclaves surrounding the subdivision to the adopted Municipal Service Area. On August 20, 2019, the City Commission adopted the first amendment to the North U.S. Highway 1 Interlocal Service Boundary Agreement. The Volusia County Council subsequently adopted the agreement on September 17, 2019. The City of Ormond Beach (December 7, 2021 with Ordinance 2021-43) and Volusia County (February 15, 2022 with Ordinance 2022-9) approved the second amendment to the North U.S. Highway 1 Interlocal Service Boundary Agreement to add the land associated with the RidgeHaven subdivision and the individually owned parcels not owned by RidgeHaven to the adopted Municipal Service Area. During the County Council presentation and discussion, the RidgeHaven representative and city staff committed to establishing a limitation of 298 dwelling units for the entire RidgeHaven area. On March 22, 2022, the City Commission approved Ordinance 2022-05 that annexed the RidgeHaven subdivision.

With the Interlocal Service Boundary Agreement and annexation approved, the next step for the RidgeHaven project was the assignment of a city land use designation. For the existing land use entitlements, Volusia County staff analysis calculated a range of residential development of 716 to 1,052 dwelling units. The existing land use required a minimum of four units per acre. The city land use designation occurred with three separate actions:

1. Ordinance 2022-14 adopted July 19, 2022: The Ordinance amended the Future Land Use Element of the Comprehensive Plan to incorporate the second Interlocal Service Boundary Agreement and provided a text limitation within Policy 9.1.4 that states the RidgeHaven land area shall not exceed 3 units per acre and no more than 298 dwelling units for the entire RidgeHaven property. The maximum

theoretical residential density was reduced by 754 residential units. For the non-RidgeHaven properties, the Ordinance included the text restriction that these parcels would maintain a maximum gross residential density of eight (8) units per acre – the same density that existed in unincorporated Volusia County.

2. Ordinance 2022-18, adopted August 3, 2022: The Ordinance authorized the following actions:

   A. Amended the Future Land Use Map designation for the RidgeHaven subdivision property (totaling 84.26 acres) from Volusia County "Urban Medium Intensity" (UMI) to Ormond Beach "Low Density Residential" (LDR). The Ordinance included the map annotation that the RidgeHaven subdivision would have a density restriction of three (3) units per acre and shall not exceed 298 residential units for the entire RidgeHaven subdivision; and

   B. Amended the Future Land Use Map designation of the properties not associated with the RidgeHaven development from "Urban Medium Intensity" (UMI) to Ormond Beach "Medium Density Residential" (MDR). The Ordinance included the map annotation that these parcels would maintain a maximum gross residential density of eight (8) units per acre – the same density that existed in unincorporated Volusia County.

3. Ordinance 2022-18, adopted August 3, 2022: This Ordinance was for 19.19 acres owned by the RidgeHaven subdivision applicant that was part of the original Interlocal Service Boundary Agreement area. The Ordinance amended the Future Land Use for the property from "Low Intensity Commercial" (LIC) to "Medium Density Residential" (MDR). The Ordinance contained a condition that the density shall be restricted to eight (8) units per acre within the 19.19 acres and the RidgeHaven subdivision including the 84.26 acres shall not exceed 298 residential units.

In summary, the project has:

1. Amended the Interlocal Service Boundary Agreement to allow annexation and development under Ormond Beach development standards.
2. Annexed 103.45 acres that is the RidgeHaven subdivision.
3. Amended the land uses of two land areas from Volusia County "Urban Medium Intensity" (UMI) to "Low Density Residential" (LDR) and Ormond Beach "Low Intensity Commercial" (LIC) to "Medium Density Residential" (MDR) with a maximum development scenario of 298 residential units.
4. Reduced the potential maximum residential development as allowed under the Volusia County "Urban Medium Intensity" (UMI).
5. The Interlocal Service Boundary Agreement land use amendment has amended the land use of the non-RidgeHaven outparcels to the same density (8 units per acre) as allowed under the Volusia County land use.

The following are the abutting uses to the subject properties:

EXHIBIT 2: Abutting land use and zoning designations

Land Use and Zoning Designations of Adjacent Property			
	Current Land Uses	**Future Land Use Designation**	**Zoning Classification**
North	Plantation Oaks PRD	"Low Density Residential"	PRD, Planned Residential Development
South	Across Addison Drive, Gardens of Bella Vita & MBA Business Center	"Medium Density Residential" and "Low Intensity Commercial"	PRD, Planned Residential Development and B-8, Commercial
East	Village of Pine Run	Volusia County "Rural"	Volusia County RR (Rural Residential)
West	Across Plantation Oaks Boulevard	"Medium Density Residential"	R4, Single-Family Cluster and townhouse

SECTION 3, APPLICATION PROCESS:

Application process: Preliminary plats are a technical review of the subdivision of land in compliance with the zoning district and do not have any public hearing notice requirements. The preliminary plat for this application utilizes the same site plan construction drawings as the development order and the responses to the development order criteria will be the same as the issuance of the development order. A separate action, as a Resolution, is required for the preliminary plat and requires a separate staff report. Many items in this report will be similar to project PRD 2022-061(B).

The RidgeHaven subdivision process also includes the following applications:

1. Zoning map amendment from Volusia County R-4, Urban Single-Family Residential and Ormond Beach B-8, Commercial to Ormond Beach PRD, Planned Residential Development. The zoning map amendment is the action sought for this staff report.
2. Issuance of a development order to construct 286 residential units and associated site improvements on 103.45 acres.
3. Partial plat vacation. The project is located with an existing 1926 plat with existing street layouts. The partial plat vacation would vacate portions of the 1926 plat and update to the RidgeHaven subdivision plat. The outparcels within the RidgeHaven subdivision would always have access to their property.

The project has also been posted on the city website under the Planning Department at: (1) Development Reports, https://www.ormondbeach.org/1019/RidgeHaven and (2) Public Hearing Advertisements and Notices, https://www.ormondbeach.org/1000/Public-Hearing-Advertisements-and-Notice.

Neighborhood meeting

The project conducted a required neighborhood meeting on July 26, 2022. The project team presented the development plan. Items discussed at the neighborhood meeting included:

1. Density reduction from Volusia County zoning;
2. No access proposed from Addison Drive;
3. Interface with Village of Pine Run;
4. Easement required for existing Volusia County ditch abutting Village of Pine Run;
5. Types of residential uses proposed;
6. Stormwater; and
7. Connection to city water and sewer.

SECTION 4, PROJECT DESCRIPTION:

The project has the following attributes:

1. The total project size is 103.45 acres.
2. The development of consists of 286 lots. Any subdivision phasing may be reviewed and approved of the Site Plan Review Committee as a minor amendment.
3. The project's gross density is 2.76 units per acre.
4. The project's net density (project acreage of 103.45 minus 6.49 acres of wetlands divided by 286 residential lots) is 2.95 units per acre.
5. The subdivision features three residential types: (a) duplex lots – 84 lots with a 35-foot lot frontage along the boundary of Addison Drive. These are allocated on the former B-8, Commercial land area that has a land use of "Medium Density Residential", (b) 50-foot lots – 136 lots that are located in the interior of the subdivision, and (c) 75 foot lots - 66 lots that are located at the rear of the subdivision, abutting the 35' natural area that abuts the Village of Pine Run.
6. The project lots are proposed as follows:

Standards	**Single-family, 50' by 110'**	**Single-family, 75' by 110'**	**Duplex, 35' by 110'**
Number:	136	66	84
Minimum floor area:	1,400 SF	1,500 SF	1,400 SF
Maximum building coverage:	60%	60%	60%
Maximum lot impervious area:	80%	80%	80%
Maximum building height:	35 feet	35 feet	35 feet
Setbacks:			
Front:	20 feet	20 feet	20 feet
Front (no garage access):	10 feet	15 feet	15 feet
Side:	5 feet	7.5 feet	5 feet, (0' common wall)

Rear:	20 feet	20 feet, 10 feet (lots 233-254)	10 feet
Waterfront:	20 feet	20 feet	10 feet
Accessory Structure setbacks:			
Side yard:	5 feet	7.5 feet	NA
Side yard corner:	15 feet	15 feet	NA
Rear yard:	5 feet	5 feet	NA

7. There are two subdivision access points from Plantation Oaks Boulevard. No access is proposed from Addison Drive.
8. School concurrency for the project is provided in ATTACHMENT 3.
9. A traffic study was performed and is discussed in the analysis section of this report.
10. The project proposes internal sidewalks on both sides of the streets within the RidgeHaven subdivision.
11. The project proposes a sidewalk connection off-site to connect to North U.S. Highway 1.
12. An Environmental Assessment Analysis performed by Ecological Consulting Solutions, Inc. A total of 8.04 acres of wetlands exists on the subject property. As designed, the project would have 1.75 acres of direct impacts to on-site wetlands.
13. St. Johns River Water Management District has issued permit #185591-1 for the RidgeHaven subdivision for stormwater management and proposed wetland impacts.
14. Recreational improvements include a 33,000 square foot outdoor amenity area including a pool and pool deck, including a dog park, playground and activity field. The project also includes two walking trails in the southeast corner of the property and along a lake and buffer area at the northeast corner.
15. The project proposes to preserve a total of 25.52 acres as natural preservation or 24.67% of the subject property. The Land Development Code requirement for natural preservation is 15% of the property and the Planned Residential Development standard is 20% of the property.
16. There is a 35-foot natural preservation area and existing ditch between the Ridgehaven subdivision and the Village of Pine Run. The Land Development Code requirement for a landscape buffer is six (6') feet.
17. Irrigation for the subdivision will be drawn from the stormwater ponds.
18. A street tree plan has been designed with 298 street trees.
19. The applicant has provided draft covenants and restrictions for the project that include a coordinated plan for fences. The final covenants and restrictions will be developed with the final plat. For the purposed of the Planned Development, it is desired that any fencing along the right-of-way have a common architectural pattern.

20. Architectural examples have been provided and are included.

21. A five-year expiration date for phase one of the project from the date of City Commission approval is proposed.

22. The project is expected to generate a water demand of 73,502 gallons per day and a sewer demand of 80,366 gallons per day based on the Level of Service standards in the Capital Improvements Element of the Comprehensive Plan. There is existing capacity to provide the RidgeHaven subdivision utility services. No septic tanks are proposed. Irrigation for the project is planned from the stormwater ponds.

23. For the project stormwater, the site is surrounded on three (3) sides by ditches that ultimately flow to the east. The drainage pattern of the pre-developed site flows to the Addison Canal, the canal between this project and the Village of Pine Run Subdivision, the wetland and a ditch on the north side of the project.

24. The proposed stormwater treatment methodology is wet detention with stormwater harvesting. The wet detention system has multiple ponds with equalizer pipe system that will maintain the normal water elevation for all ponds. The drainage patterns for the post developed site includes the landscape/natural preservation that will continue to drain into the Addison Canal and the canal between Ridgehaven and Village of Pine Run. This acreage of this area has been significantly decreased. The area that drains to the north also has been decreased in the post development condition. The interior of the project will be directed onto the proposed stormwater treatment facility noted above. The stormwater wet detention will have an ultimate outfall to the swale along the northern border. This swale will intersect to the swale along the western edge of Village of Pine Run that flows to the north in the Plantation Oaks Phase III. By directing the surface water runoff into the stormwater facility, there will be a delay in the surface flow exiting the site as well as reduction of the actual volume entering the canal/pipe system through the Village of Pine Run.

25. All three (3) historic trees on-site have been preserved.

26. The project buffers are as follows (see ATTACHMENT 8):

    A. Abutting Addison Drive. Required: 10’. Provided: ranges from 12’ to 22’.

    B. Abutting Plantation Oaks Boulevard. Required 20’. Provided: ranges from 30’, 40, and 125’ depending on the buffer location.

    C. Abutting Plantation Oaks, Phase 3. Required 6’. Provided: Ranges with a minimum of 40’.

    D. Abutting Village of Pine Run. Required: 6’. Provided: 35’ natural area.

SECTION 5, ANALYSIS:

Platting in the Land Development Code is a two-step process that includes a preliminary plat and a final plat. The preliminary plat shows the plat in a draft format, the site survey, and the infrastructure improvements needed to support the subdivision of land. The preliminary plat is reviewed at the Planning Board meeting and requires one hearing at the City Commission meeting as a Resolution. If approved, the Preliminary Plat allows infrastructure improvements to occur.

There are two options for development once a Preliminary Plat has been approved:

Option 1 - Proceed with the application for construction for completion of the required improvements prior to recording the final plat per Section 4-18(8)(a) of the Land Development Code. When the required off-site and on-site improvements are complete, the final plat along with the records and data would be submitted by the applicant to the City Engineer and reviewed by the Site Plan Review Committee (SPRC). The final plat would be approved by the City Commission and recorded.

Option 2 - Proceed with final plat review and approval, with the completion of required improvements after recording the plat per Section 4-18(b) of the Land Development Code. With this option, the applicant files surety documents guaranteeing that such improvements will be installed. All guarantees are incorporated in a bonded agreement for the construction of the required improvements in the form acceptable to the City Attorney. The final plat would be recorded and the applicant would then construct the improvements.

The second step for platting is a final plat. A final plat is required to be reviewed and approved by the City Commission as an Ordinance with two readings. A final plat occurs after the infrastructure improvements are completed. After approval by the City Commission, the plat is recorded with the Volusia County Clerk of the Court which allows the property owner to sell or to submit building permits for the individual lots.

The Planning Board is required to review the preliminary plat request using the following criteria established in the Land Development Code to approve, approve with conditions, or deny the rezoning amendment:

1. **The proposed development conforms to the standards and requirements of this Code and will not create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare or quality of life.**

   The proposed application meets or exceeds the Planned Residential Development requirements contained within the Land Development Code (see list of items where the Land Development is exceeded in the analysis section). The applicant has provided the required information in terms of lot sizes and layout, street locations, buffer requirements, traffic impacts, and stormwater planning and Planned Residential Development requirements. The Site Plan Review Committee has reviewed the application and concluded that it conforms to the requirements of the Land Development Code. The Site Plan Review Committee concludes that the preliminary plat will not adversely affect public health, safety, or welfare.

2. The proposed development is consistent with the Comprehensive Plan.

The Comprehensive Plan contains a land use map that provides the vision of uses and residential density and nonresidential intensity. The Comprehensive Plan is an overall guide/roadmap for development within Ormond Beach. The subject property has a land use category of "Low Density Residential" and "Medium Density Residential" as defined in the Future Land Use Element as follows:

Low Density Residential (LDR) – 84.26 acres

Purpose: To protect and encourage the continued development of typical single-family residential areas and stabilize and protect the character of such neighborhoods. Institutional uses may be permitted in accordance with the maximum floor area ratio.

Density: up to 4.3 units per acre

Maximum FAR: 0.2

Medium Density Residential (MDR) – 19.19 acres

Purpose: To allow a variety of highly aesthetic dwelling units, encouraging the establishment of recreation areas and open space and discouraging look-alike rows of dwellings. MDR also allows the development of relatively low-density duplex, townhouse and multi-family projects which emphasize open space and maintain a low profile, thus maximizing the compatibility with single-family areas. Institutional uses may be permitted in accordance with the maximum floor area ratio.

Density: Minimum 5-12 units per acre except in the Downtown Community Redevelopment Area where 5 - 15 units shall be allowed.

Maximum FAR: 0.3

The "Low Density Residential" and "Medium Density Residential" land uses would typically allow a maximum theoretical land use density of 515 residential units. The map annotation included in the land use amendments limits the maximum residential density to 298 units.

The following is a list of the Comprehensive Plan Objectives and Policies pertaining to the proposed development order:

Future Land Use Element

GOAL 1. LAND USE DISTRIBUTION

FUTURE DEVELOPMENT AND REDEVELOPMENT ACTIVITIES SHOULD BE DIRECTED IN APPROPRIATE AREAS AS DEPICTED ON THE FUTURE LAND USE MAP TO MEET THE LAND USE NEEDS OF THE ANTICIPATED POPULATION, IN A MANNER CONSISTENT WITH SOUND PLANNING PRINCIPLES, THE GOALS, OBJECTIVES AND POLICIES CONTAINED HEREIN, AND THE DESIRED COMMUNITY CHARACTER.

THE FUTURE LAND USE ELEMENT SHOULD ALLOW LIMITED COMMERCIAL EXPANSION, PROMOTE INDUSTRIAL USE, AND MAINTAIN CURRENT RESIDENTIAL DENSITIES IN THE CORE AREA WHILE ESTABLISHING LOWER DENSITIES IN THE PERIMETER AREAS, FOCUSING REDEVELOPMENT IN THE

DOWNTOWN COMMUNITY REDEVELOPMENT AREA, US1, AND SRA1A, AND PROVIDING OR A CONTINUED HIGH LEVEL OF OPEN SPACE. FUTURE GROWTH SHALL BE TIMED AND LOCATED TO MAXIMIZE EXISTING PUBLIC INFRASTRUCTURE.

OBJECTIVE 1.1. RESIDENTIAL LAND USE

Ensure the availability of adequate lands to meet the residential land use needs of the community.

POLICY 1.1.3.

Preserve the character of existing neighborhoods by not allowing intrusion of land uses that would threaten to alter the neighborhood character and by encouraging voluntary rehabilitation and sound maintenance programs in viable neighborhoods which are capable of self-renewal and establishing code enforcement or public redevelopment activities in areas not capable of self-renewal.

POLICY 1.1.5.

Encourage innovative design measures for new residential developments and ensure that adequate provision is made for neighborhood facilities suitable to the type of development proposed.

POLICY 1.1.6.

Provide the opportunity, through zoning and other land use controls, for the development of a variety of housing types (i.e., single-family, duplex, townhouse, multi-family) in both conventional, planned unit and cluster type developments, that will meet the varied needs of the citizens of Ormond Beach.

Housing Element

GOAL 1. HOUSING SUPPLY

ENSURE THE AVAILABLITY OF SAFE AND ADEQUATE HOUSING UNITS OF DIFFERENT TYPES, SIZES, AND PRICE RANGES TO MEET THE NEEDS OF ALL CURRENT AND FUTURE RESIDENTS.

OBJECTIVE 1.1. HOUSING SUPPLY

The City shall continue to facilitate the private production of a housing supply, including adequate sites for mobile homes or manufactured housing and low- and moderate-income housing, which will meet future community needs and offset housing deficiencies as noted in this Element.

OBJECTIVE 1.2. PROVISION OF ADEQUATE SERVICES AND FACILITIES

Each existing housing development and residential neighborhood along with all new housing developments shall meet existing adopted level of service standards.

POLICY 1.2.1.

The general residential development pattern in the city should be in accord with the community's growth strategy for residential densities, as stipulated within the Future Land Use Element.

The development is within the required holding capacity, and the gross density range, and the lot area is consistent and furthers the intent of the Comprehensive Plan policies.

3. **The proposed development will not adversely impact environmentally sensitive lands or natural resources, including but not limited to waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells.**

   The project has prepared an environmental assessment included in issuance of the development order project. The assessment reviews the project soils, vegetative community, wetlands, protected species, and floodplains. The project has also obtained approval from the Saint Johns River Water Management District. The applicant's letter dated March 27, 2023 states that the project would not utilize any potable water wells or septic systems. Additionally, irrigation for landscaping would come from stormwater ponds, eliminating the need for irrigation wells.

   Site Plan Review Committee staff conclude that the proposed development will not adversely impact beyond what is allowed in the Land Development Code for environmentally sensitive lands or natural resources, including but not limited to waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells.

4. **The proposed use will not substantially or permanently depreciate the value of surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties.**

   The site plan implements the land use designations of "Low Density Residential" and "Medium Density Residential" with a gross density of 2.76 units per acre and a net density of 2.95 units per acre. The project has sought to provide natural buffers next to existing residentially zoned properties including the Village of Pine Run and the outparcels within the RidgeHaven subdivision area. The applicant's letter dated March 27, 2023 states, "Coupled with the existing canal in a 40-foot easement on the Village of Pine Run property adjacent to the Ridgehaven property, neighboring residents will be at least 100 to 150 feet away from the new homes in Ridgehaven, which should be difficult to see due to the remaining trees and natural vegetation."

   The Site Plan Review Committee concludes that proposed use will not substantially or permanently depreciate the value of surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties.

5. **There are adequate public facilities to serve the development, including but not limited to roads, sidewalks, bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds.**

   There are adequate public facilities to serve the development. The proposed subdivision is required to install water and sewer facilities, sidewalks, recreational areas, and stormwater management. The development of homes would be subject to

water and sewer connection fees and local road, park & recreation, police and fire impact fees. The project was reviewed by the Volusia County School Board and a concurrency certificate is shown in ATTACHMENT 3. The Site Plan Review Committee concludes that there are adequate public facilities to serve the development, including but not limited to roads, sidewalks, bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds.

6. **Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe. This finding shall be based on a traffic report where available, prepared by a qualified traffic consultant, engineer or planner which details the anticipated or projected effect of the project on adjacent roads and the impact on public safety.**

   The applicant was required to perform a traffic impact study which followed the methodology adopted by the River to Sea Transportation Planning Organization. City staff obtained the review of a 3rd party traffic engineer who has provided comments on the traffic impact analysis. The study analysis was based on 298 residential units. The subdivision lot number was decreased to 286 through the site plan process. Table 9 of the traffic impact analysis shows the project trips as follows:

   a. Daily trips = 2,608

   b. AM peak hour trips = 185

   c. PM peak hour tips = 256

   The trip distribution map (Figure 4) show 93.24% of the trips going towards west towards U.S. Highway 1 and 6.76% going east to Old Dixie Highway. The traffic analysis concluded with the need for turning improvements on Plantation Oaks Boulevard and a proportionate fair agreement.

   The project has provided a traffic impact analysis prepared by professional engineer. City staff has contracted to have the traffic study reviewed by a traffic engineer. The RidgeHaven subdivision meets the traffic requirements of the Land Development Code.

7. **The proposed development is functional in the use of space and aesthetically acceptable.**

   The development philosophy of the subdivision has been discussed in this report. The subdivision design provides for several housing types, exceeds landscaping standards, provides natural areas as buffers, includes entry features, contains stormwater management ponds with fountains, and provides a coordinated architectural theme. The Site Plan Review Committee concludes the proposed development is functional in the use of space and aesthetically acceptable.

8. **The proposed development provides for the safety of occupants and visitors.**

   The overall design indicates safe movement on the site. The proposed road and access layouts conform to the dimensional standards in the Land Development Code.

9. **The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area.**

   The project is required to utilize a Homeowners Association (HOA), which will institute an Architectural Control Committee to review construction plans within the development. The site plan exhibits outline regulations governing the construction of buildings and landscaping on individual lots, in order to encourage aesthetics and harmony within the development.

10. **The testimony provided at public hearings**.

    The project has not been reviewed at a public hearing and no testimony has been provided. Any testimony at the Planning Board meeting would be provided in the meeting minutes for the City Commission review.

SECTION 6, RECOMMENDATION:

It is recommended that the Planning Board recommend **APPROVAL** of the preliminary plat to allow 286 residential lots on 103.45 acres and associated site improvements, located south of Plantation Oaks Boulevard, east of Addison Drive, north of the Village of Pine Run subdivision, and west of the Plantation Oaks subdivision and includes the following Volusia County parcel numbers: 3136-01-01-0011, 3136-01-01-0012, 3136-01-33-0110, 3136-01-25-0010, 3136-01-24-0060, 3136-01-33-0080, 3136-01-01-0020, 3136-01-23-0060, and 3136-01-24-0050, subject to the approval of the issuance of the development order and resolution of the outstanding Site Plan Review Committee comments. The project is tentatively scheduled for the City Commission on May 16, 2023 (first reading) and if approved on first reading, the second reading will be on June 6, 2023 (final reading).

Site Plan Review
Committee comments

Project Name: PZ-22-061
Project Description: RidgeHaven subdivision, PRD & Preliminary Plat (298 units on 103.45 acres)
Review Comments List Date: 3/31/2023

Ref. # 164, Civil Engineer, David Allen, Cycle 3
Markup: Civil-Tailwater, Stormwater Calculations.pdf
In the review of the plans and stormwater design, it appears that the existing swale invert is well above the invert to the discharge pipe from the stormwater pond in the north east corner of the site. What is any modifications to the canal will be done to ensure the flow is not impeded.

Ref. # 171, Civil Engineer, David Allen, Cycle 3
Markup: Civil-Post Basin B, Stormwater Calculations.pdf
What is the criteria for an overflow outlet for this land-locked basin. What impacts will this design have on the parcels not part of this project.

Ref. # 198, Civil Engineer, David Allen, Cycle 4
Markup: Civil-Pipe Systems, Hydraulic Grade Line Calculations.pdf
Identify the runs of pipe on a site plan to determine the actual location.

Ref. # 199, Civil Engineer, David Allen, Cycle 4
Markup: Civil-Pipe Runs-2, Hydraulic Grade Line Calculations.pdf
Identify the runs on this overall plan. Identify the nodes that appear in more than one run, such as structures at 41 and 53. Show the hydraulic grade line from both runs.

Ref. # 200, Civil Engineer, David Allen, Cycle 4
Markup: Civil-Color Code, Hydraulic Grade Line Calculations.pdf
When trying to identify the different runs, the color code on this sheet, did not match the individual runs shown on the following pages.

Ref. # 201, Civil Engineer, David Allen, Cycle 4
Markup: Civil-Wetland, Hydraulic Grade Line Calculations.pdf
In our meeting this basin was discussed, where are the connections for any overflow from this basin to the stormwater system?

Ref. # 202, Civil Engineer, David Allen, Cycle 4
Markup: Civil-Run #6, Hydraulic Grade Line Calculations.pdf
Please identify this run on the overall plan. I was unable to identify it.

Ref. # 203, Civil Engineer, David Allen, Cycle 4
Markup: Civil-Run #7, Hydraulic Grade Line Calculations.pdf
Please identify this run on the overall plan. I was unable to identify it.

Ref. # 204, Civil Engineer, David Allen, Cycle 4
Markup: Civil-Wetland Stage, Stormwater Calculations.pdf
In previous comments, this basin was noted as land-locked. Response was that there were outlets for the basin. Please indicate the stage that this wetland will reach prior to the discharge. Will this stage adversely affect the two outparcels.?
The location of the outlets appear to be on the other side of the out parcels.

Ref. # 205, Civil Engineer, David Allen, Cycle 4

Markup: Civil-Post-Tree-Pres, Stormwater Calculations.pdf
This basin appears to have multiple discharge points i.e.: north, south and east. Should this basin be divided by discharge points?

Ref. # 206, Civil Engineer, David Allen, Cycle 4
Markup: Civil-Wetland-Post Basin 'B', Stormwater Calculations.pdf
In the predeveloped condition an irregular weir separates portions of the basin. Was this removed? If not how does this affect the surface flow to the outlet structures?

Ref. # 207, Civil Engineer, David Allen, Cycle 4
Markup: Civil-Overall Stormwater, Stormwater Calculations.pdf
In our meeting, we requested the impacts to the adjacent and down stream properties be evaluated. Provide documentation that there will not be adverse impacts to the adjacent properties. Second, the drainage swale/ditch that will be the ultimate discharge appears to be less than adequate for the proposed flows.

Ref. # 215, Civil Engineer, David Allen, Cycle 5
Markup: Civil-Grading, C011-CIVIL.pdf
Flow arrows indicate a flow to the west and Inlet 110A. However, there are no grades to provide documentation of this flow.Provide information on the flow pattern of the non-paved portion of Cliffhaven Court. This area has no existing grades on the profile for Cliffhaven Court.
Will there be any grading in this area?

Ref. # 216, Civil Engineer, David Allen, Cycle 5
Markup: Civil Grading C-011, C011-CIVIL.pdf
The existing grades in this area indicate the flow to the west. How will the proposed inlet drain this area/
Will the two areas stage up to the elevation of the roadway?

Ref. # 217, Civil Engineer, David Allen, Cycle 5
Markup: Civil-Out parcels, C012-CIVIL.pdf
Provide additional grading information on the out parcels to ensure the safety of the parcel
Will the two areas hashed stage to a point of merging ? The western connecting point appears to be the low point at the 28 contour.
Are there any existing elevations available in these areas?

Ref. # 218, Civil Engineer, David Allen, Cycle 5
Markup: Civil-Ridgehave Ave., C012-CIVIL.pdf
Provide any existing elevations for the unpaved limits of Ridgehaven Ave. How will this profile make the connection between the two asphalt sections.?

Ref. # 219, Civil Engineer, David Allen, Cycle 5
Markup: Civil-H2O main, C017-UTILITY.pdf
It appears that this water main extension passes under the proposed structure for Lot 52. Please re-route this main into the open area to the west. keeping the minimum distance between H2O and sanitary sewer mains.
Relocate the valves associated with the tee connection.

Ref. # 220, Civil Engineer, David Allen, Cycle 5
Markup: Civil-Overall Questions on HGL Calc-Stormwater-Ponds and Basins, C013-CIVIL.pdf

Stormwater Management Questions

1. The hydraulic grade line calculations should begin with the tailwater of the peak stage for 25yr/24hr storm event.
2. The 25 year 24 hour stage of the ponds is elevation 28.52 or 28.53. The top of the inlets noted as the overflow for the large wetland in the interior of the project range anywhere from elevation 26.00 to 27.50. The hydraulic grade line for the pipe system that end at these inlets will be above the top of the inlet. Please model the wetland and provide a peak stage for this basin.
3. When evaluating the overall plan, Sheet 2, the only inlet directly connected to the interior wetland is 113A at elevation 27.50 top. Show how the other inlets, 31, 14, 28, 110A, 114A will accept flow without crossing the roadway or the outparcels.
4. The stage of the ponds, elev. 28.52 when compared to the rear yard elevations there could be water within the lots.
5. Run No. 5 ends at Inlet 113A, the HGL appears well above the top of the inlet. Even with out the flow area including the entire interior wetland.
6. Basin 110A, shows flow arrows from the east to the west. However, there are no grades to provide evidence that this is the actual flow pattern.
7. Post Development Drainage Basins Plan

a. Post-Tree-Pres basin should be split at the north-eastern corner to allow for the flow through Lakes of Pine Run to be shown verse the existing flow pattern. Post Basin C and the Addison Canal and the eastern boundary canal appear to drain to the canal in Lakes of Pine Run.
b. In Post Basin A-there are two depressions, between the tier of lots on west side of Brookhaven Trail and the lots on the east side of Ridgehaven Avenue. Do either of these depressions stage up during the major storm events? If so, what would be the peak stage and would the rear of the lots be in danger of water encroachment?
c. There does not seems to be any information available for Lake E. Provide any stage information.

8. Comment Regarding questions above- In comparing the Pre-Basins and the Post Development basins, it appears that the interior wetland previously drained through Pre-DEP-D which has now been severed by the filling of the lots.

Ref. # 231, Civil Engineer, David Allen, Cycle 5
Markup: Civil--Swale, C012-CIVIL.pdf
The swale appears to be on the adjacent property, please provide written authorization for the connection from Ridgehaven to swale. As well as permission for the flow to now proceed to the north in the swale.
Has the County been notified of the connection to the existing ditch and the change to the surface water flow?

Ref. # 188, Landscape Architect, Cara Culliver, Cycle 4
Markup: 14" Oak Missed, C004-EC.pdf
- Please add this missing 14" specimen Oak to the removal chart & calculations.

Ref. # 194, Landscape Architect, Cara Culliver, Cycle 4
Markup: Specimen Tree Chart, C048A-LANDSCP INFO.pdf
- Specimen trees removed = 89

- Specimen trees to remain = 56, please correct the chart.

Ref. # 210, Landscape Architect, Cara Culliver, Cycle 5

Markup: Changemark note #03, C048-TREE PLANTING.pdf
- Please add the (3) buffers sides along the parcel edges, see lineal footage for each side.

Ref. # 137, Planning Director, Steven Spraker, Cycle 2
Markup: Planning, ROW vacation, RW Vacation Exhibit.pdf
Please provide a sketch and legal description for the ROW to be vacated.

Ref. # 223, Utility 1, Mike Stephenson, Cycle 5
Markup: Eastern Channel Modifications?, C012-CIVIL.pdf
Please advise of any proposed construction activities on the eastern side of RidgeHaven within the existing channel. Verbally I have heard discussion regarding modifying the channel with the intent to prevent stormwater from the RidgeHaven outfall from traveling toward the existing channel serving the Village of Pine Run, but I have not seen any proposed plans to date.

Ref. # 224, Utility 1, Mike Stephenson, Cycle 5
Markup: RCP and CMP in Channel, C012-CIVIL.pdf
Please provide design documentation showcasing how the existing 36-inch CMP in the channel to west of RidgeHaven was sized and please advise how the 60-inch RCP under Plantation Oaks was sized.

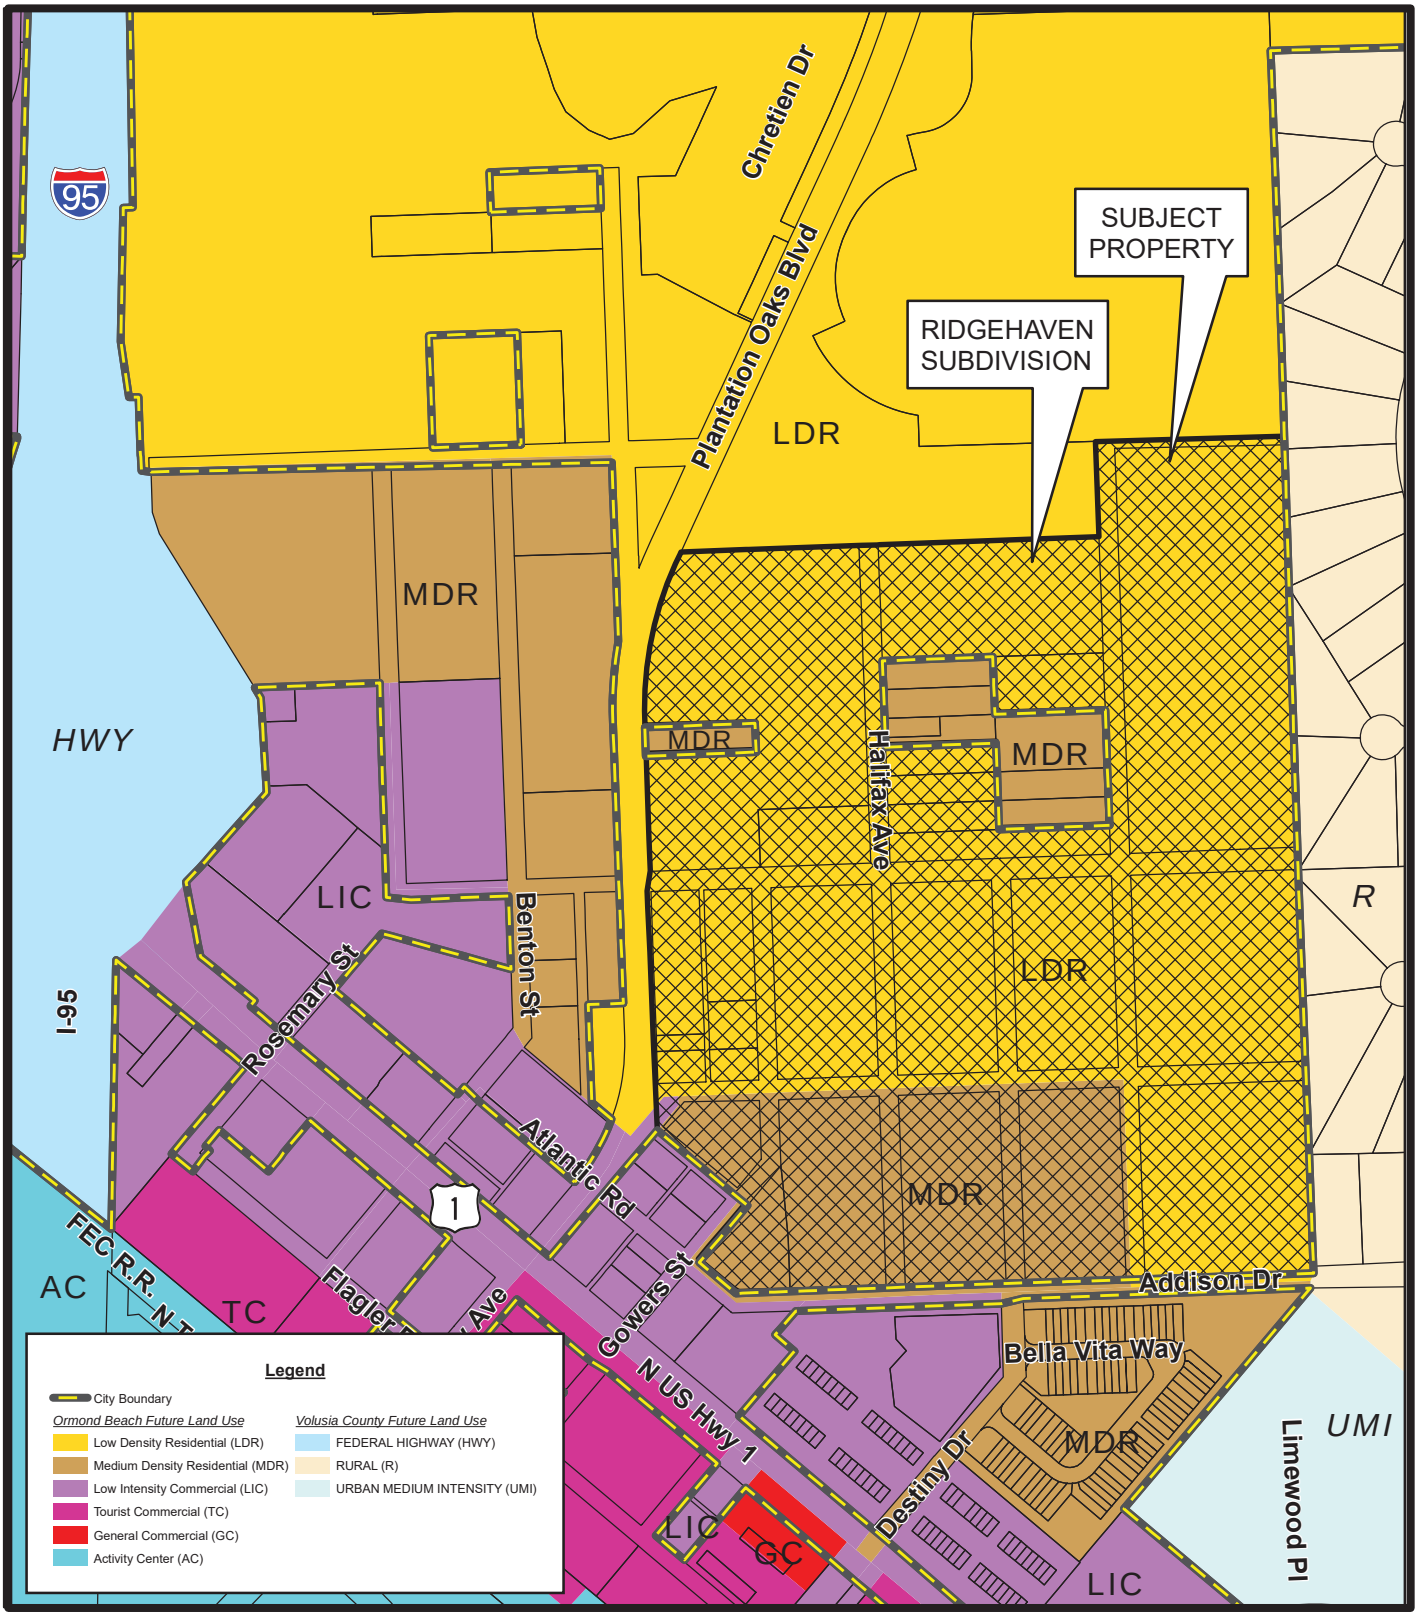
Ref. # 225, Utility 1, Mike Stephenson, Cycle 5
Markup: WM Re-route, C017-UTILITY.pdf
Please revise the proposed water main routing under unit 52 to be out from under the unit and in the right of way.

Ref. # 226, Utility 1, Mike Stephenson, Cycle 5
Markup: Sizing of Channel to Outfall Point, C012-CIVIL.pdf
Please provide design documentation showcasing how the channel leading to the outfall point was sized.

Assumptions on my end: Q = (K/n) * ((A/P)^(2/3)) * S^(1/2) * A ; K = 1.49 ; n = 0.03 ; S = 0.0005 ; A = 67.3 Ft^2 ; P = 22.8 Ft. Values of A, P, and S were calculated utilizing as-built documentation of the existing channel. Utilizing these values, I calculate a theoretical max flow rate of 154 CFS for the channel leading to the outfall point.

The current stormwater report for RidgeHaven lists the peak discharge for the 25YR-24HR event as

139.69 CFS. The Plantation Oaks storwmater report lists the peak discharge for DITCH-POST in the 25YR-24HR event as 156.59 CFS. The peak discharge for RidgeHaven West will likely be somewhere around 100 CFS for the 25YR-24HR event (assumption made by me based off of acreage). All total, this suggests the channel conveying flow to the outfall would need to be able to accommodate 396.3 CFS, which is above my assumed calculations. Please advise if my assumptions have been made in error while reviewing your supplied documentation.



Ref. # 227, Utility 1, Mike Stephenson, Cycle 5
Markup: Sizing of RidgeHaven Discharge Channel, C012-CIVIL.pdf
Please provide design documentation showcasing how the outfall channel discharge on the northside of RidgeHaven was sized.

Assumptions on my end: Q = (K/n) * ((A/P)^(2/3)) * S^(1/2) * A ; K = 1.49 ; n = 0.030 ; S = 0.0005 ; A = 54.5 Ft^2 ; P = 26.1 Ft. Values of A, P, and S were calculated utilizing as-built documentation of the existing channel. Utilizing these values, I calculate a theoretical max flow rate of 98.9 CFS for the channel.

The current stormwater report for RidgeHaven showcases a peak discharge of 139.69 CFS for the existing channel in the 25YR-24HR event, which is above my theoretical calculations. Please advise if my assumptions have been made in error while reviewing your supplied documentation.

Holly Hill, FL 32117

RE : Ridgehaven – City of Ormond Beach
School Capacity Review #22-11-28-003-A

Dear Mr. Mynchenberg:

The County Charter requires any Comprehensive Plan Amendment or Rezoning that allows increased residential density to be effective only when adequate public schools can be timely planned and constructed to serve the projected increase in student population. The district uses this requirement as the guiding principle behind the school adequate capacity review.

District staff reviewed the updated information for the proposed Ridgehaven associated with 103.45+/- acres of property located at or near the intersection of N US Hwy 1 and I-95 within Ormond Beach city limits. Proposed project would provide for two hundred and two (202) single family home units and ninety-six (96) multi-family duplex units.

The district uses a county wide Student Generation Rate (SGR) of (0.273) per single family dwelling unit and (0.127) per multi-family dwelling unit to calculate projected students. By applying the SGR to the use types in Table 1 below, the project could generate sixty-nine (69) full time students.

Table 1

UNIT TYPE	SGR	UNIT COUNT	STUDENTS GENERATED
Single Family Dwelling Unit	0.273	202	56
Multifamily Dwelling Unit	0.127	96	13
Manufactured Home Dwelling Unit	0.047	0	0
	Total	**298**	**69**

When performing adequate capacity review district staff evaluates the effects of the proposed change compared to any remaining permanent capacity within the impacted schools, up to 100%, Table 2. The projected increase in student population may be over 100% if there are plans to serve increased student population in that planning area within the long-term planning horizon. A finding of adequate capacity may be issued in either case.

FACILITIES SERVICES
3750 OLSON DRIVE • DAYTONA BEACH, FL 32124
PHONE: (386) 947-8786 • FAX (386) 506-5056

An Equal Opportunity Employer

Table 2

Schools	SY 2022/23 Enrollment	% of Permanent Capacity	Plans for Capacity Increase Long-Term	Traditional K-12 students projected
Pine Trail Elementary	690	105%	No	29
Ormond Beach Middle	989	85%	No	17
Halifax CSA (Seabreeze High)	1,679	105%	No	20
Other				3

The student projections generated by this project **will** increase the existing percentage above 100% permanent capacity at the elementary and high school levels. However, the level of service (LOS) standard for elementary school concurrency is 115% and 120% for high school concurrency service areas (CSAs). Additionally, Pine Trail Elementary is included in a rezoning effort in the near term. Based on this, the school district has no objections to the proposed development plan. Minimum planning considerations should include pedestrian and vehicular access, safety, connectivity, and buffering.

All future development orders, such as site plans and subdivisions, are subject to school concurrency review. School concurrency will be evaluated at the time when the impact of development is specifically quantified and known. Only funded school improvements and then current capacity will be considered at that time.

No student reservations have been made at this time.

Please note the School Board has the right to adjust the attendance boundaries to balance the student enrollment populations at these area schools. Consequently, students generated from this project may not attend the current assigned schools.

Should you need additional information, please contact me at (386) 947-8786, extension 50709.
Sincerely,

Stephanie B. Doster,
Coordinator, Planning

VOLUSIA COUNTY SCHOOLS

Finding of Adequate School Capacity

VOLUSIA COUNTY SCHOOL BOARD

Project Information	
Project Name	Ridgehaven
VCSB Project #	**22-11-28-003-A**
Jurisdiction Project #	
Parcel ID Numbers	3136-01-01-0011; 3136-01-01-0012; 3136-01-33-0110; 3136-01-25-0010; 3136-01-24-0060; 3136-01-33-0080; 3136-01-01-0020; 3136-01-23-0060; 3136-01-24-0050
Project Location	N US Hwy 1 and I-95
Potential Residential Units	202 Single Family Homes and 96 Multi-Family Duplex Homes
Property Owner/Applicant	Parker Mynchenberg & Associates, Inc
Notes: Additional review will be required at the time of subdivision/site plan submittal(s). No Student Reservations have been made.	

Based upon the Findings of Fact, pursuant to School Board Policy 612 and Section 206 of the County Charter, the school district has determined at this time that school capacity is adequate to serve the proposed increase in residential density. This Finding shall constitute competent substantial evidence that adequate public school capacity is likely to be available at the time it is required to serve the planned new development.

Capacity is <u>not</u> being reserved with this Finding unless otherwise noted on this document. This Finding of Adequate School Capacity allows this subject project to continue through the Comprehensive Plan Amendment and/or rezoning process; however, it may be subject to additional school capacity review in the future.

SHEET 1 OF 18

RIDGEHAVEN

MAP BOOK:__ PAGE:__

A REPLAT OF A PORTION OF NATIONAL GARDENS RECORDED IN MAP BOOK 10 PAGES 250 THROUGH 253, LYING SOUTHERLY OF THE NORTH LINE OF SECTION 36, TOWNSHIP 13 EAST, RANGE 31 SOUTH, WESTERLY OF THE EAST LINE OF SAID SECTION 36, NORTH OF ADDISON DRIVE, AND EASTERLY OF PLANTATION OAKS BOULEVARD, LOCATED IN ORMOND BEACH, FLORIDA.

GENERAL NOTES:

1. THE BEARINGS SHOWN HEREON ARE ASSUMED AND BASED ON THE EASTERLY LINE OF THE REVISED PLAT OF NATIONAL GARDENS, MAP BOOK 10, PAGE 250 THROUGH 253, AND THE EAST LINE OF SECTION 36, TOWNSHIP 13 SOUTH, RANGE 31 EAST, BEARING S02°04'17"E.

2. DRAINAGE AND UTILITY EASEMENTS (INCLUDING, BUT NOT LIMITED TO, FLORIDA POWER & LIGHT CO. AND ALL PUBLIC UTILITY COMPANIES), EXCEPT AS OTHERWISE SHOWN, ARE PROVIDED
AS FOLLOWS: 10 FT. ADJACENT TO ALL PUBLIC AND PRIVATE STREETS AND ON ALL LOTS, PARCELS, TRACTS AND COMMON AREAS.

3. ■ DENOTES PERMANENT REFERENCE MONUMENT (4"X4" CONCRETE MONUMENT WITH DISK STAMPED PRM, LB 3019 UNLESS OTHERWISE NOTED).

4. △ DENOTES PERMANENT CONTROL POINT (PK NAIL & DISC STAMPED PCP LB 3019 UNLESS OTHERWISE NOTED).

5. NOTICE: THIS PLAT, AS RECORDED IN ITS GRAPHIC FORM, IS THE OFFICIAL DEPICTION OF THE SUBDIVIDED LANDS DESCRIBED HEREIN AND WILL IN NO CIRCUMSTANCES BE SUPPLANTED IN AUTHORITY BY ANY OTHER GRAPHIC OR DIGITAL FORM OF THE PLAT. THERE MAY BE ADDITIONAL RESTRICTIONS THAT ARE NOT RECORDED ON THIS PLAT THAT MAY BE FOUND IN THE PUBLIC RECORDS OF THIS COUNTY.

6. THIS PLAT IS SUBJECT TO THE ARTICLES OF INCORPORATION FOR RIDGEHAVEN HOMEOWNERS' ASSOCIATION INC., RECORDED IN O.R. BOOK _____, PAGES _____ – _____, AND TO THE DECLARATION OF COVENANTS AND RESTRICTIONS FOR RIDGEHAVEN RECORDED IN O.R. BOOK _____, PAGES _____ – _____, BOTH IN THE PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA.

7. ALL LOT LINES ARE RADIAL UNLESS INDICATED AS (NR), NON–RADIAL.

8. DIMENSIONS ARE SHOWN IN U.S. SURVEY FEET AND DECIMALS THEREOF AND REFER TO THE HORIZONTAL PLANE.

9. THE UTILITY EASEMENTS REFERENCED ABOVE AND DEPICTED AS SHOWN HEREON ARE GRANTED AND CONVEYED TO ANY PUBLIC OR PRIVATE UTILITY, AND ARE SEVERABLE, NON–EXCLUSIVE EASEMENTS, GRANTING THE RIGHT TO CONSTRUCT, OPERATE, MAINTAIN AND REPAIR UNDERGROUND PUBLIC UTILITY SYSTEMS (INCLUDING WIRES, CABLES, CONDUITS AND ABOVE GROUND APPURTENANT EQUIPMENT) UNLESS OTHERWISE INDICATED.

10. ALL PLATTED UTILITY EASEMENTS SHALL PROVIDE THAT SUCH EASEMENTS SHALL ALSO BE EASEMENTS FOR THE CONSTRUCTION, INSTALLATION, MAINTENANCE, AND OPERATION OF CABLE TELEVISION SERVICES; PROVIDED, HOWEVER, NO SUCH CONSTRUCTION, INSTALLATION, MAINTENANCE, AND OPERATION OF CABLE TELEVISION SERVICES SHALL INTERFERE WITH THE FACILITIES AND SERVICES OF AN ELECTRIC, TELEPHONE, GAS, OR OTHER PUBLIC UTILITY. IN THE EVENT A CABLE COMPANY DAMAGES THE FACILITIES OF A PUBLIC UTILITY, IT SHALL BE SOLELY RESPONSIBLE FOR THE DAMAGES. THIS SECTION SHALL NOT APPLY TO THOSE PRIVATE EASEMENTS GRANTED TO OR OBTAINED BY A PARTICULAR ELECTRIC, TELEPHONE, GAS, OR OTHER PUBLIC UTILITY. SUCH CONSTRUCTION, INSTALLATION, MAINTENANCE, AND OPERATION SHALL COMPLY WITH THE NATIONAL SAFETY CODE AS ADOPTED BY THE FLORIDA PUBLIC SERVICE COMMISSION. [REPEAT]

11. THIS PLAT IS SUBJECT TO THE P.U.D. DEVELOPMENT AGREEMENT FOR _____, RESOLUTION NO. _____, RECORDED IN OFFICIAL RECORDS BOOK _____, PAGE _____, AND NOTICE OF ADOPTION OF DEVELOPMENT ORDER RECORDED IN O.R. BOOK _____, PAGE _____, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA.

12. ALL UTILITY, ACCESS, AND MAINTENANCE EASEMENTS WHERE WATER OR SANITARY SEWER GRAVITY AND/OR FORCE MAINS ARE LOCATED ARE HEREBY GRANTED TO THE CITY OF ORMOND BEACH, FLORIDA, WHO SHALL BE RESPONSIBLE FOR THE MAINTENANCE OF THESE UTILITY LINES WITHIN THE EASEMENTS.

13. DRAINAGE EASEMENTS, STORMWATER MANAGEMENT FACILITIES, DRAINAGE PIPES, PONDS, AND SWALES ARE THE MAINTENANCE RESPONSIBILITY OF THE RIDGEHAVEN HOMEOWNERS ASSOCIATION INC.

14. PORTIONS OF TRACTS A, B, C, I, L, M, F AND O, AS SHOWN HEREON ARE HERBY SUBJECT TO TREE PRESERVATION EASEMENTS IN FAVOR OF THE CITY OF ORMOND BEACH, FLORIDA.

15. ALL PONDS, STORM EASEMENTS AND ASSOCIATED DRAINAGE FACILITIES ARE HERBY SUBJECT TO AN EMERGENCY ACCESS EASEMENT FOR THE PURPOSE OF EMERGENCY MAINTENANCE.

RidgeHaven

PRELIMINARY PLAT & CONSTRUCTION PLANS

ORMOND BEACH, FLORIDA

GENERAL NOTES

1.) ALL WATER MAINS TO BE P.V.C. DR-18, C-900.

2.) ALL SANITARY SEWER MAINS SHOWN ARE PVC SDR 26 @ 0.40% FOR 8". 0.30% FOR 10" UNLESS OTHERWISE NOTED. SANITARY SERVICES ARE 4" SDR 26 @ MINIMUM 2.0% RESIDENTIAL CONNECTION. SANITARY FORCE MAIN TO BE PVC, DR-18, C-900.

3.) CABLE T.V., TELEPHONE AND ELECTRIC SERVICES TO BE UNDERGROUND.

4.) CONTRACTOR TO VERIFY EXISTING UTILITIES PRIOR TO CONSTRUCTION AND TO REPORT ANY DISCREPANCIES TO DESIGN ENGINEER.

5.) WATER AND SEWER IMPROVEMENTS TO MEET CITY OF ORMOND BEACH STANDARDS.

6.) DOWNLIGHTS (STREET LIGHTS) TO BE FP&L STANDARD & CONTEMPORARY LIGHTS TO BE FP&L STANDARD LED, (CONTEMPORARY LIGHT) AND BLACK FIBERGLASS POLES, STREET LIGHTS AND POLES TO BE PROVIDED BY FPL.

7.) ELEVATIONS REFER TO MEAN SEA LEVEL NAVD 1988 DATUM.

8.) MINIMUM FINISH FLOOR GRADE PER CITY OF ORMOND BEACH REQUIREMENTS.

9.) SHOP DRAWINGS FOR POTABLE WATER AND SEWER TO BE SUBMITTED TO AND APPROVED BY CITY OF ORMOND BEACH AND DESIGN ENGINEER PRIOR TO CONSTRUCTION.

10.) POTABLE WATER SERVICE TO BE SUPPLIED BY CITY OF ORMOND BEACH.

11.) SANITARY SEWER SERVICE TO BE PROVIDED BY CITY OF ORMOND BEACH.

12.) ALL DISTURBED AREAS TO BE SEEDED AND MULCHED.

13.) WHERE SANITARY FORCE MAINS CROSS POTABLE WATER LINES, THE FORCE MAIN IS TO BE CONSTRUCTED OF PVC SDR-18 FOR 20 FEET CENTERED ON THE POTABLE WATER MAIN.

14.) OFFSITE UTILITIES WILL BE CONSTRUCTED UNDER THE APPROPRIATE PHASE AND MUST BE COMPLETE PRIOR TO ISSUANCE OF CERTIFICATE OF OCCUPANCY. PROJECT TO BE BUILT IN ONE PHASE.

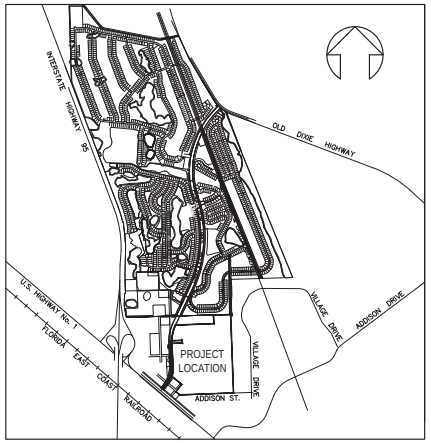
15.) PRIOR TO CERTIFICATE OF OCCUPANCY ALL OFFSITE EASEMENTS (IF REQUIRED) NEED TO BE RECORDED AND REFERENCED BY PLAT OR O.R. BOOK AND PAGE AND RECORDED UNDER SEPARATE INSTRUMENT.

16.) ONSITE SEWER AND POTABLE WATER INFRASTRUCTURE TO BE OWNED AND MAINTAINED BY THE CITY OF ORMOND BEACH. OFFSITE SYSTEM WILL BE OWNED AND MAINTAINED BY THE CITY OF ORMOND BEACH (UNLESS OTHERWISE NOTED).

17.) ALL STOP SIGNS, SPEED LIMIT AND STREET SIGNS REQUIRED TO BE PROVIDED BY DEVELOPER TO CITY OF ORMOND BEACH SPECIFICATIONS. ALL TRAFFIC CONTROL SIGNS SHALL BE FABRICATED IN ACCORDANCE WITH THE MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES USING 3M BRAND "SCOTCHLITE" SHEETING (ENGINEER GRADE) ON MINIMUM 0.080 GAUGE 5052-H38 ALUMINUM BLANKS. ALL STOP SIGNS SHALL BE HIGH INTENSITY 30" OR 36" OCTAGON INSTALLED ON 3"x 12' ROUND ALUMINUM POSTS. "U" CHANNEL POSTS MAY BE USED FOR ALL SIGNS SMALLER THAN 36" x 48". ALL WARNING SIGNS SHALL BE 30" X 30". ALL STREET NAME SIGNS SHALL BE 9" IN HEIGHT WITH 5" HIGH UPPER & LOWER CASE WHITE LETTERS ON A GREEN BACKGROUND WITH A MIN. 30" LENGTH. PROVIDE 24" WIDE WHITE THERMOPLASTIC STOP BARS ADJACENT TO ALL LOCAL STREET 30" STOP SIGNS. WHERE 12" WIDE WHITE CROSSWALK STRIPING IS PROVIDED, THE STOP BAR AND 30" STOP SIGN MUST BE 4' IN ADVANCE OF THE CROSSWALK IN ACCORDANCE WITH FDOT STANDARD INDEX #17346. IN ALL LOCATIONS, THE 30" STOP SIGN AND 24" WIDE WHITE STOP BARS SHOULD BE LOCATED 10' IN ADVANCE OF THE EDGE OF THE TRAVELED WAY AT THE STREET INTERSECTION. SEE DETAIL SHEETS FOR PROPOSED ORNAMENTAL POLES.

18.) ALL MAINTENANCE OF ALL COMMON AREAS, LAKES, AMENITY AREAS, LANDSCAPE AND IRRIGATION TO BE THE SOLE RESPONSIBILITY OF RidgeHaven H.O.A. INC.

19.) OUTDOOR CONSTRUCTION ACTIVITY SHALL ONLY OCCUR FROM 7 AM TO 7 PM MONDAY THROUGH SATURDAY.



20.) EXCEPT WITHIN THE EXISTING FPL EASEMENT, ALL UTILITIES ARE TO BE INSTALLED UNDERGROUND, INCLUDING THE SERVICE DROPS TO INDIVIDUAL BUILDINGS OUTSIDE OF ALL REQUIRED LANDSCAPE BUFFERS, WETLANDS AND WETLAND BUFFER AREAS.

21.) DRIVING AND/OR STAGING OF CONSTRUCTION VEHICLES IS NOT PERMITTED ON ANY SIDEWALKS IN THE RIGHT-OF-WAY. ANY DAMAGE TO SIDEWALKS WILL BE REPAIRED AND/OR REPLACED IN THE LIKE KIND BY THE CONTRACTOR.

AMENITY - SITE PLAN

42
SHEET NO.

Drawn By: MRB
Date: 2/20/2022
Scale: 1" = 20'
Job No: 21-70

TREE PRESERVATION AREA CALCULATION:

SITE AREA = 103.45 AC
TREE PRESERVATION AREA REQUIRED = 15%
103.45 AC X 0.15 = 15.52 AC
TREE PRESERVATION AREA PROVIDED:
(INCLUDING WETLANDS AND UPLAND BUFFERS) = 17.153 AC + 1.88 AC = 25.523 AC = 24.67%

NATURAL OPEN SPACE CALCULATION:

NATURAL OPEN SPACE REQUIRED = 20%
ADJUSTED SITE AREA = SITE AREA – WETLAND AREA (TO REMAIN),
103.45 AC – 6.49 AC = 96.96 AC
REQUIRED OPEN SPACE = 96.96 AC X 0.20 = 19.39 AC
NATURAL OPEN SPACE PROVIDED = 17.153 AC (TREE PRES.) + 1.88 AC (UPLAND BUFFERS) + 0.76 AC (PASSIVE OUTDOOR) = 19.79 AC = 20.41%

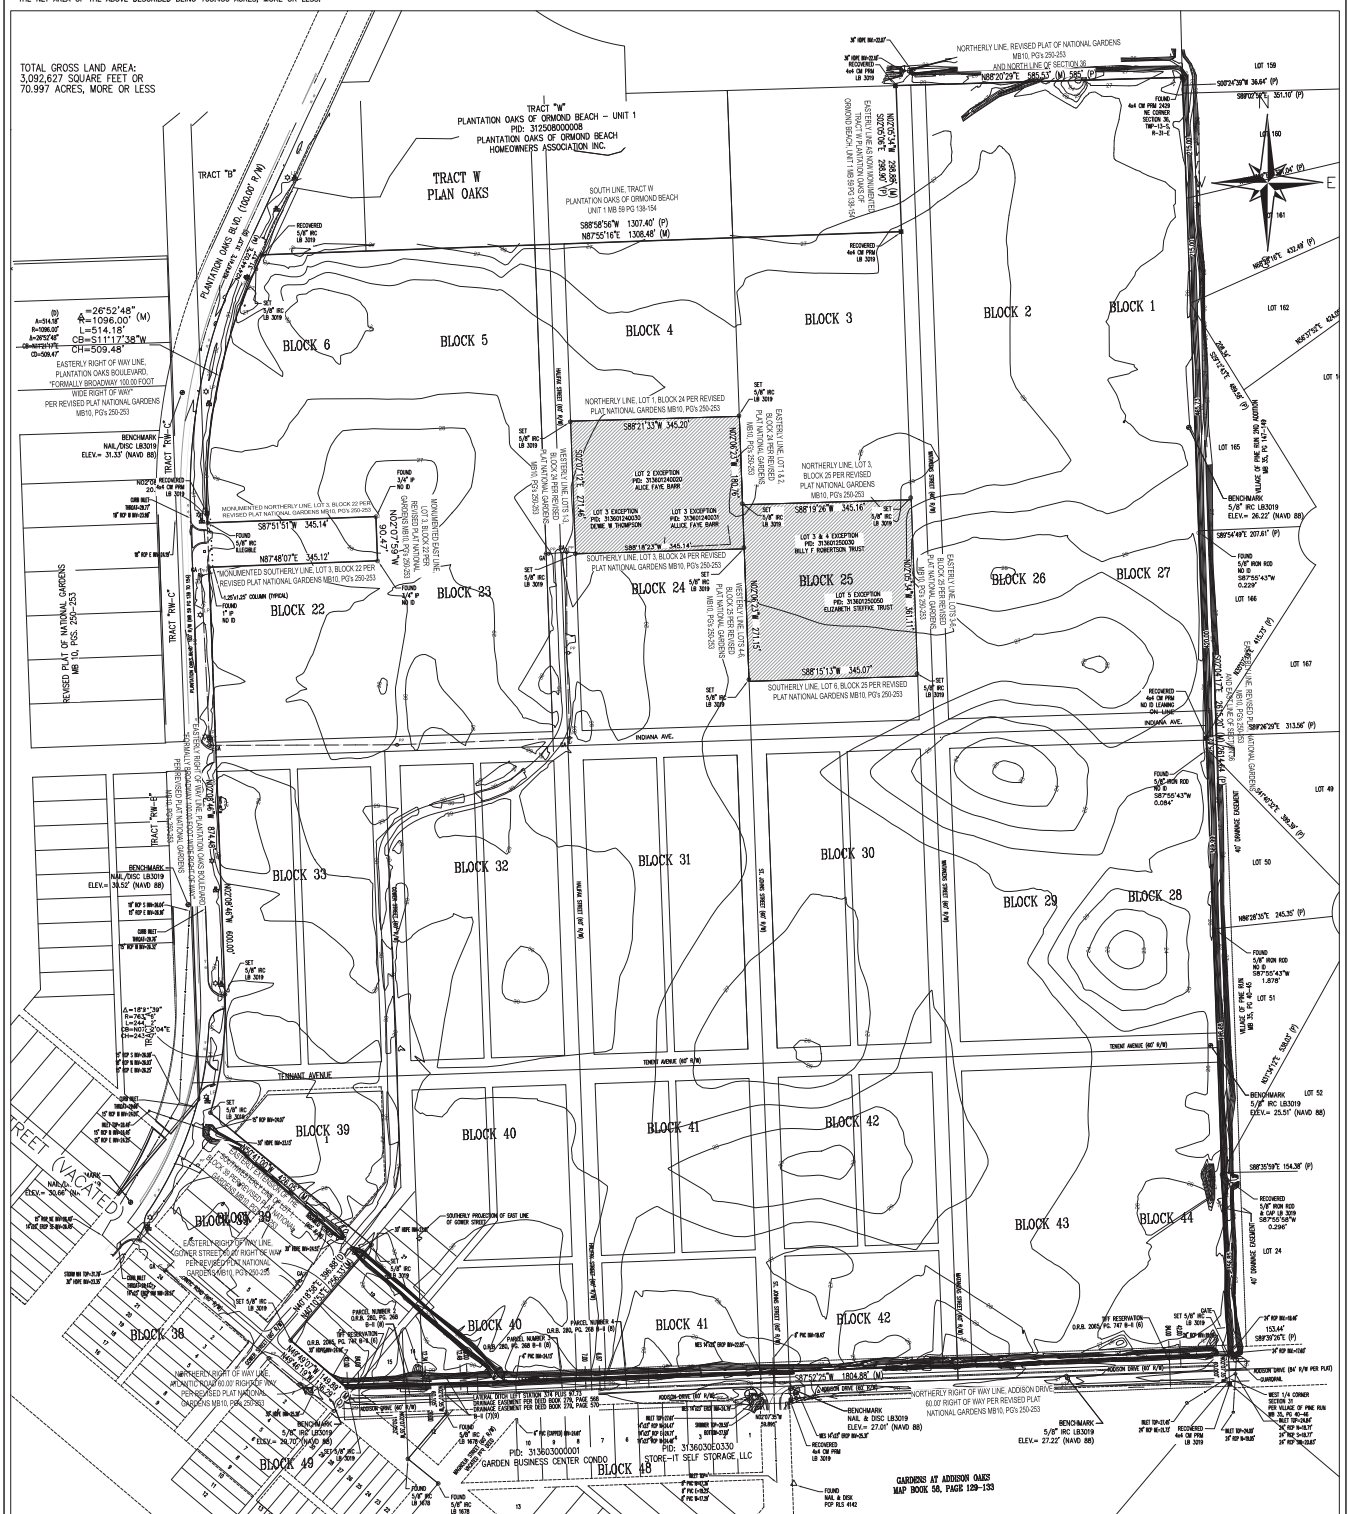
TREE PRESERVATION & COMMON AREA EXHIBIT

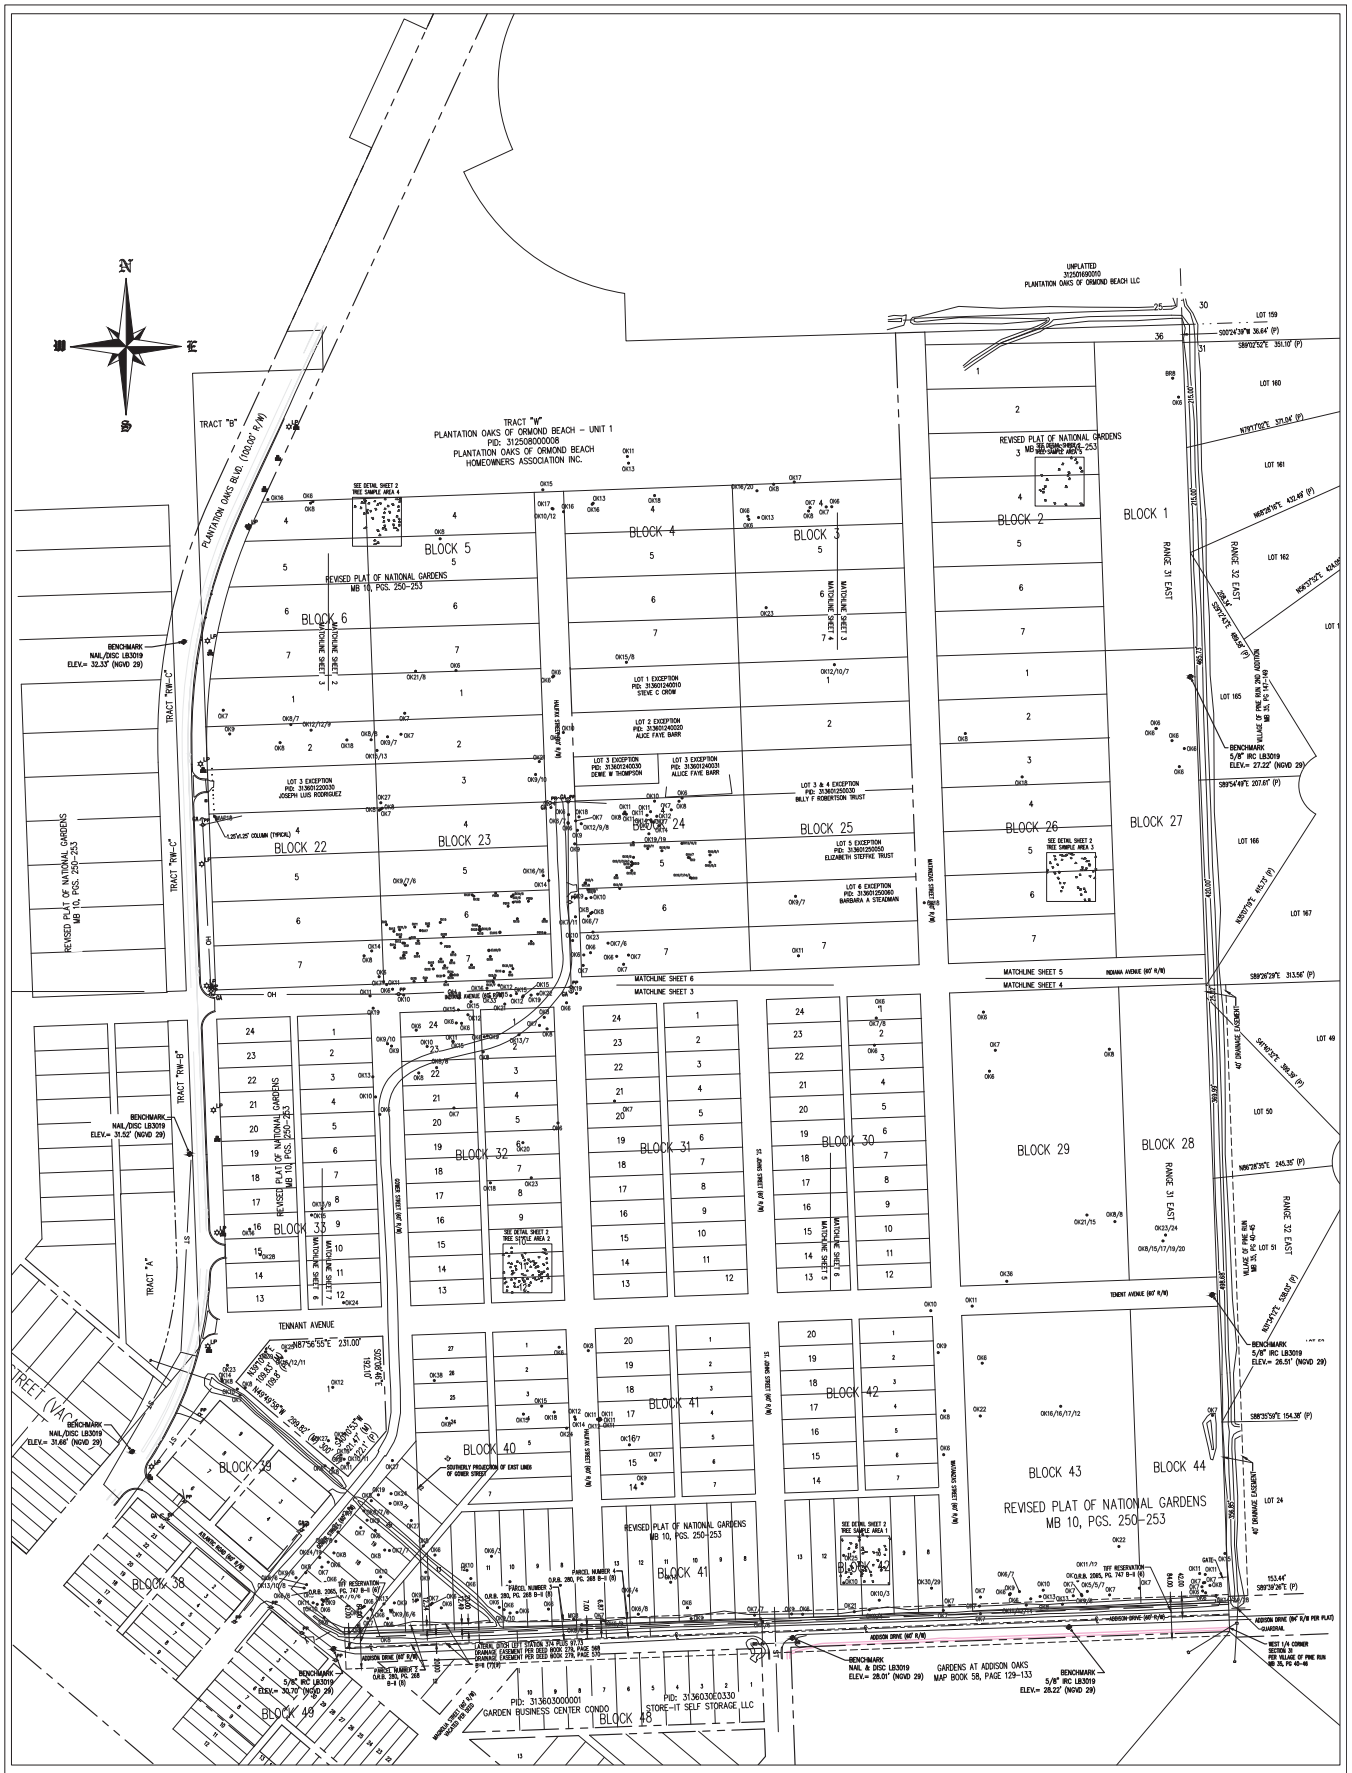
T-1
SHEET NO.

Drawn By: MRB
Date: 2/20/2022
Scale: 1" = 100'
Job No: 21-70

RIDGEHAVEN DESCRIPTION:
ALL OF BLOCKS 1, 2, 23, 26, 27, 28, 29, 30, 31, 32, 33, 40, 41, 42, 43 AND 44, AND THOSE PORTIONS OF BLOCKS 3, 4, 5, 6, 22, 24, 25 AND 39 AND THE PUBLIC AND VACATED ROADS AND ALLEYS, REVISED PLAT OF NATIONAL GARDENS, AS RECORDED IN MAP OR PLAT BOOK 10, PAGES 250 THROUGH 253, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA, IN SECTION 36, TOWNSHIP 13 SOUTH, RANGE 31 EAST, VOLUSIA COUNTY, FLORIDA, LYING WITHIN THE FOLLOWING DESCRIBED BOUNDARY:

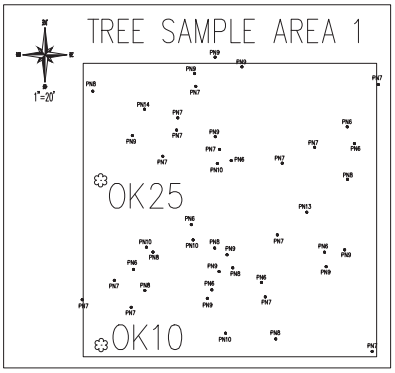


BEGIN AT THE NORTHEAST CORNER OF SAID REVISED PLAT OF NATIONAL GARDENS, BEING ALSO THE NORTHEAST CORNER OF SECTION 36, TOWNSHIP 13 SOUTH, RANGE 31 EAST; THENCE RUN S02°04'17"E ALONG THE EASTERLY LINE OF SAID REVISED PLAT OF NATIONAL GARDENS AND THE EAST LINE OF SAID SECTION 36, A DISTANCE OF 2615.20 FEET TO THE NORTHERLY RIGHT OF WAY LINE OF ATLANTIC ROAD, A 60.00 FOOT WIDE RIGHT OF WAY PER SAID REVISED PLAT OF NATIONAL GARDENS; THENCE S87°52'25"W ALONG SAID NORTHERLY RIGHT OF WAY LINE, 1804.88 FEET TO THE NORTHERLY RIGHT OF WAY LINE OF ATLANTIC ROAD, A 60.00 FOOT WIDE RIGHT OF WAY PER SAID REVISED PLAT OF NATIONAL GARDENS; THENCE N49°49'07"W ALONG SAID NORTHERLY RIGHT OF WAY LINE, 149.89 FEET TO THE EASTERLY RIGHT OF WAY LINE OF GOWER STREET, 60.00 FOOT WIDE RIGHT OF WAY PER SAID REVISED PLAT OF NATIONAL GARDENS; THENCE N40°10'53"E ALONG SAID EASTERLY RIGHT OF WAY, 256.33 FEET TO THE EASTERLY EXTENSION OF THE SOUTHWESTERLY LINE OF LOT 1, BLOCK 39, SAID REVISED PLAT OF NATIONAL GARDENS; THENCE N50°41'00"W ALONG SAID EASTERLY EXTENSION AND ALONG THE SOUTHWESTERLY LINE OF SAID LOT 1, A DISTANCE OF 426.05 FEET TO THE BEGINNING OF A NON-TANGENT CURVE AND A POINT ON THE EASTERLY RIGHT OF WAY LINE OF PLANTATION OAKS BOULEVARD, FORMERLY BROADWAY, 100.00 FOOT WIDE RIGHT OF WAY PER SAID REVISED PLAT OF NATIONAL GARDENS; SAID NON TANGENT CURVE BEING CONCAVE NORTHWESTERLY, HAVING A RADIUS OF 763.96 FEET, A CENTRAL ANGLE OF 18° 21'39" AND A CHORD BEARING OF N07°02'04"E; THENCE NORTHERLY ALONG SAID EASTERLY RIGHT OF WAY LINE AND THE ARC OF SAID CURVE, 244.82 FEET TO THE POINT OF TANGENCY; THENCE N02°08'46"W ALONG SAID EASTERLY RIGHT OF WAY LINE, 874.48 FEET TO THE MONUMENTED SOUTHERLY LINE OF LOT 3, BLOCK 22, SAID REVISED PLAT OF NATIONAL GARDENS; THENCE N87°48'07"E ALONG SAID SOUTHERLY LINE, 345.12 FEET TO THE MONUMENTED SOUTHEAST CORNER OF SAID LOT 3; THENCE N02°07'59"W ALONG THE EASTERLY LINE OF SAID LOT 3, A DISTANCE OF 90.47 FEET TO THE MONUMENTED NORTHEAST CORNER OF SAID LOT 3; THENCE S87°51'51"W ALONG THE MONUMENTED NORTHERLY LINE OF SAID LOT 3, A DISTANCE OF 345.14 FEET TO THE EASTERLY RIGHT OF WAY LINE OF SAID PLANTATION OAKS BOULEVARD; THENCE N02°08'46"W ALONG SAID EASTERLY RIGHT OF WAY LINE, 20.19 FEET TO A BEING THE BEGINNING OF A TANGENT CURVE, CONCAVE EASTERLY, HAVING A RADIUS OF 1096.00 FEET, A CENTRAL ANGLE OF 26°52'48" AND A CHORD BEARING N11°17'38"E; THENCE NORTHERLY ALONG SAID EASTERLY RIGHT OF WAY LINE AND ALONG THE ARC OF SAID CURVE, 514.18 FEET TO THE POINT OF TANGENCY ; THENCE N24°44'02"E ALONG SAID EASTERLY RIGHT OF WAY LINE, 31.37 FEET TO THE SOUTHERLY LINE OF TRACT "W", SAID PLANTATION OAKS OF ORMOND BEACH – UNIT 1, RECORDED ON MAP BOOK 59, PAGES 138–154; THENCE N87°55'16"E ALONG SAID SOUTHERLY LINE, 1308.48 FEET TO THE EASTERLY LINE OF SAID TRACT "W" AS NOW MONUMENTED; THENCE N02°05'34"W ALONG SAID MONUMENTED EASTERLY LINE, 298.88 FEET TO THE NORTHERLY LINE OF SAID REVISED PLAT OF NATIONAL GARDENS AND THE NORTH LINE OF SAID SECTION 36; THENCE N88°20'29"E ALONG SAID NORTHERLY LINE, 585.53 FEET TO THE POINT OF BEGINNING.

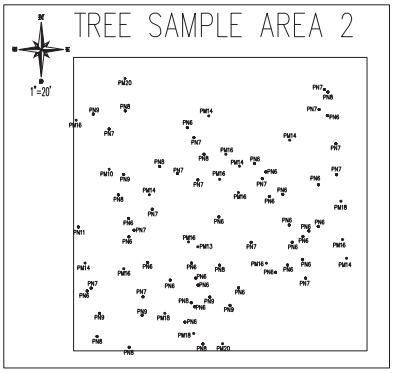


LESS AND EXCEPT LOTS 1, 2 AND 3, BLOCK 24 AND LOTS 3, 4, 5 AND 6, BLOCK 25, SAID REVISED PLAT OF NATIONAL GARDENS, MORE PARTICULARLY DESCRIBED AS THE FOLLOWING:
BEGIN AT THE NORTHWEST CORNER OF SAID LOT 1, BLOCK 24; THENCE RUN N88°21'33"E, 345.20 FEET TO THE NORTHEAST CORNER OF SAID LOT 1; THENCE S02°06'23"E, 180.76 FEET TO THE SOUTHEAST CORNER OF SAID LOT 2, BLOCK 24, BEING THE NORTHWEST CORNER OF SAID LOT 3, BLOCK 25; THENCE N88°19'26"E, 345.16 FEET TO THE NORTHEAST CORNER OF SAID LOT 3; THENCE S02°05'34"E, 361.11 FEET TO THE SOUTHEAST CORNER OF SAID LOT 6, BLOCK 25; THENCE S88°15'13"W, 345.07 FEET TO THE SOUTHWEST CORNER OF SAID LOT 6; THENCE N02°06'23"W, 271.15 FEET TO THE NORTHWEST CORNER OF SAID LOT 4, BLOCK 25, BEING THE SOUTHEAST CORNER OF SAID LOT 3, BLOCK 24; THENCE S88°18'23"W, 345.14 FEET TO THE SOUTHWEST CORNER OF SAID LOT 3; THENCE N02°07'12"W, 271.46 FEET TO THE POINT OF BEGINNING.

THE NET AREA OF THE ABOVE DESCRIBED BEING 103.450 ACRES, MORE OR LESS.



SURVEYORS NOTES



1. NOTICE: THIS SURVEY WAS PREPARED WITH BENEFIT OF A COMMITMENT FOR TITLE INSURANCE ISSUED BY OLD REPUBLIC NATIONAL TITLE INSURANCE COMPANY, COMMITMENT #1016422; ISSUING OFFICE #3714601, FILE #2832–17 DATED FEBRUARY 10, 2021 AT 11:00 PM..
2. DIMENSIONS ARE SHOWN IN FEET AND DECIMALS THEREOF.
3. BEARING STRUCTURE BASED ON NAD 83, FLORIDA STATE PLANE, EAST ZONE, U.S. SURVEY FOOT, WITH THE BEARING ON THE EAST LINE OF SECTION 36 BEING S02°04'48E.
4. UNDERGROUND FOUNDATIONS, IF ANY, NOT LOCATED.
5. ELEVATIONS REFER TO N.A.V.D. OF 1988, PER NGS MONUMENT DESIGNATION X–228 HAVING A PUBLISHED ELEVATION OF 28.48' NAVD 88. (NGVD 30.573 FEET)
6. THIS PROPERTY IS LOCATED IN FLOOD INSURANCE RATE MAP (F.I.R.M.) ZONE "X". THIS LOCATION IS DETERMINED BY SCALING FROM F.I.R.M. MAP NO. 12127C0203K. MAP EFFECTIVE DATE: SEPTEMBER 29, 2017. APPROXIMATE SCALE: 1"=500'.
7. "NOT VALID WITHOUT THE SIGNATURE AND THE ORIGINAL RAISED SEAL OR ELECTRONIC SIGNATURE OF A FLORIDA LICENSED SURVEYOR AND MAPPER."
8. UNLESS OTHERWISE SHOWN, RECORD DISTANCES AND DIRECTIONS AND FIELD MEASURED DISTANCES AND DIRECTIONS ARE THE SAME.
9. THE PORTION OF PENNSYLVANIA AVENUE SHOWN HEREON AS VACATED (PER ORB 5498, PAGE 1745)(VOLUSIA COUNTY RESOLUTION 2005–15) HAS BEEN INCLUDED IN THIS BOUNDARY SURVEY ALTHOUGH IT WAS NOT INCLUDED IN THE DESCRIPTION PROVIDED BY THE TITLE COMPANY IN THE COMMITMENT SHOWN IN NOTE #1 ABOVE.
10. THE VERTICAL RELIEF SHOWN HEREON IS BASED ON A GROUND SURVEY PERFORMED BY SLIGER & ASSOCIATES, INC.

SURVEYORS NOTES

1. NOTICE: THIS SURVEY WAS PREPARED WITH BENEFIT OF A COMMITTMENT FOR TITLE INSURANCE ISSUED BY OLD REPUBLIC NATIONAL TITLE INSURANCE COMPANY, COMMITMENT #1016422; ISSUING OFFICE #3714601, FILE #2832-17 DATED FEBRUARY 10, 2021 AT 11:00 PM..
2. DIMENSIONS ARE SHOWN IN FEET AND DECIMALS THEREOF.
3. BEARING STRUCTURE BASED ON NAD 83, FLORIDA STATE PLANE, EAST ZONE, U.S. SURVEY FOOT, WITH THE BEARING ON THE EAST LINE OF SECTION 36 BEING S02°04'46E.
4. UNDERGROUND FOUNDATIONS, IF ANY, NOT LOCATED.
5. ELEVATIONS REFER TO N.G.V.D. OF 1929, PER NGS MONUMENT DESIGNATION X-226 HAVING A PUBLISHED ELEVATION OF 30.573 FEET (29.48' NAVD 88).
6. THIS PROPERTY IS LOCATED IN FLOOD INSURANCE RATE MAP (F.I.R.M.) ZONE "X". THIS LOCATION IS DETERMINED BY SCALING FROM F.I.R.M. MAP NO. 12127C0203K. MAP EFFECTIVE DATE: SEPTEMBER 29, 2017. APPROXIMATE SCALE: 1"=500'.
7. "NOT VALID WITHOUT THE SIGNATURE AND THE ORIGINAL RAISED SEAL OR ELECTRONIC SIGNATURE OF A FLORIDA LICENSED SURVEYOR AND MAPPER."
8. UNLESS OTHERWISE SHOWN, RECORD DISTANCES AND DIRECTIONS AND FIELD MEASURED DISTANCES AND DIRECTIONS ARE THE SAME.
9. THE PORTION OF PENNSYLVANIA AVENUE SHOWN HEREON AS VACATED (PER ORB 5498, PAGE 1745)(VOLUSIA COUNTY RESOLUTION 2005-15) HAS BEEN INCLUDED IN THIS BOUNDARY SURVEY ALTHOUGH IT WAS NOT INCLUDED IN THE DESCRIPTION PROVIDED BY THE TITLE COMPANY IN THE COMMITTMENT SHOWN IN NOTE #1 ABOVE.
10. LOT 7, BLOCK 4 IS NOT MENTIONED IN TITLE COMMITMENT DESCRIPTION. PER THE VOLUSIA COUNTY TAX ASSESSOR, THE TITLE IS VESTED IN SHILLOC FAMILY LP NUMBER ONE AS A PORTION OF PARCEL 2 (TAX ID #313601010011 – LOTS 4 TO 7 INCLUSIVE, BLOCK 4) AND HAS BEEN INCLUDED IN THIS SURVEY PER CLIENT DIRECTION.
11. THE VERTICAL RELIEF SHOWN HEREON IS BASED ON A GROUND SURVEY PERFORMED BY SLIGER & ASSOCIATES, INC.

DRAFT

Planning Board minutes from

April 13, 2023

ITEM:

PP-2022-061(C)

RidgeHaven subdivision

Preliminary Plat

V. APPROVAL OF MINUTES

March 09, 2023

Mr. Scudiero moved to approve the March 09, 2023 Minutes. Mr. Railsback seconded the motion. Vote was called, and the motion was approved (6-0).

VI. PLANNING DIRECTOR'S REPORT

No report.

VII. PUBLIC HEARINGS

A. ZMA 2022-061(A), RidgeHaven subdivision, Zoning Map Amendment

Mr. Spraker explained that all three RidgeHaven agenda items will be shared together and suggested that the Board vote on one at a time.

Mr. Spraker, Planning Director, reviewed the first request from RidgeHaven, LLC., with authorization of the property owner, Snilloc Family Limited Partnership Number One, for a zoning map amendment from Volusia County R-4, Urban Single-Family Residential and Ormond Beach B-8, Commercial to Ormond Beach PRD, Planned Residential Development, for 103.45 acres. Mr. Spraker continued that the proposed RidgeHaven subdivision is located south of Plantation Oaks Boulevard, east of Addison Drive, north of the Village of Pine Run subdivision, and west of the Plantation Oaks subdivision and included the following Volusia County parcel numbers: 3136-01-01-0011, 3136-01-01-0012, 3136-01-33-0110, 3136-01-25-0010, 3136-01-24-0060, 3136-01-33-0080, 3136-01-01-0020, 3136-01-23-0060, and 3136-01-24-0050.

Mr. Spraker stated that this property went through a Land Use Amendment where the majority of the property was in unincorporated Volusia County. There was a minimum of four residential units per acre (337 units) and allowed up to eight residential units per acre (674 units). He added that there were already 19.19 acres that were already in the city that allowed eight residential units per acre. The total residential units for the project was 827 units under previous land uses. Mr. Spraker continued that as the project moved on it had to be decided on whether to develop in unincorporated Volusia County and get utilities from the City of Ormond Beach or annex into the City of Ormond Beach for the entire subdivision process. It was decided to go through the City of Ormond Beach for the process and as part of the Land Use Amendment and the residential units were decreased to 298 residential units. Mr. Spraker noted that the existing land use today is "Low Density Residential" and "Medium Density Residential" is along Addison Drive. He explained that there are outparcels in which the RidgeHaven subdivision owners do not own, therefore they are not part of the zoning map amendment. They have designated zoning through the Interlocal Service Boundary Agreement (ISBA) process. Mr. Spraker stated that the zoning map does not approve any site plans, as it is the framework to allow the process for a development order.

Mr. Spraker concluded that the Site Plan Review Committee (SPRC) is recommending approval of the zoning map amendment and reviewed the tentative

City Commission meeting dates May 16, 2023 for first reading and June 6, 2023 for second reading.

B. <u>DO 2022-061(B), RidgeHaven subdivision, Issuance of a Development Order</u>

Mr. Spraker, Planning Director, continued with an explanation of the next RidgeHaven request, the issuance of a development order for 286 residential lots on 103.45 acres and associated site improvements. He expounded on the development order and how it is a zoning document, and expressed how unique RidgeHaven is as they have done both the zoning document and the preliminary plat together as well as provided detailed construction drawings. Mr. Spraker commented how the project started with the Site Plan Review Committee (SPRC), they had a neighborhood meeting in July 2022, it is now before the Planning Board, an advisory board appointed by the City Commission and then will go before the City Commission May 16, 2023 and June 6, 2023. He reviewed past applications that the project has gone through from the ISBA amendment, land use map amendment, and annexation.

Mr. Spraker stated that the gross density is 2.76 units per acre for the proposed subdivision. Taking out the wetlands, the net density is 2.95 units per acre. He added that the applicants have done an innovative design that has mixed housing types with duplex units along Addison Drive, consistent with the Gardens of Bella Vita, and they have done 136 interior lots of 50' wide, and 66 larger lots at 75' wide, along the Village of Pine Run. Mr. Spraker showed where the outparcels are and reiterated that they are not part of the overall plan. Outparcels will have platted access to their property. Mr. Spraker stated that the access points are along Plantation Oaks Boulevard. There is no access on Addison Drive. Mr. Spraker added that the project has provided school concurrency, a traffic analysis was provided, and a proportionate fair share agreement is required. He continued that stormwater was analyzed and the project will have less stormwater rate and volume post-development than in pre-development conditions. A St. Johns permit was issued for both the wetlands and the stormwater. The stormwater will be used for irrigation of the subdivision. A master irrigation will be done out of the stormwater with no individual wells. Mr. Spraker added that there is a ditch partially located along the interface of the Village of Pine Run that will be placed in the easement. It is 10' on the RidgeHaven property and then goes off onto the Village of Pine Run property.

Mr. Spraker continued that the three historic trees onsite are being preserved. The Village of Pine Run property interface has a 35' natural landscape buffer, and the LDC requires a 6' landscape buffer. The project design also exceeded the buffer requirements along Plantation Oaks Boulevard, Addison Drive and on the third phase of Plantation Oaks. Mr. Spraker stated that the project has proposed 24.67 percent of the site as natural preservation. The LDC requires only 15 percent under straight zoning and 20 percent under the Planned Development. He added that there are approximately 8 acres of wetlands of which they are impacting 1.75 acres. Sidewalks are being put in on both sides internally and also connecting to U.S. Highway 1. Mr. Spraker stated that the project has recreational improvements including a 33,000 square foot outdoor amenity area including a pool and pool deck, a dog park, playground and activity field. Walking trails are also part of the recreational improvements.

Mr. Spraker went over the development order waivers. One of them is for outdoor recreation in lieu of indoor recreation, which he explained is allowed in a Planned

Residential Development. A wet detention of the depth for the pond, to maintain the fill onsite for the stormwater irrigation. A 40' buffer building setback is also required. Mr. Spraker reviewed the development order benefits from the reduction in density, the innovative site design, natural preservation, landscape buffers, and additional recreation of amenities.

Mr. Spraker reviewed the two notices of concern; one from Mr. Lehman, 1135 Benton Street, who is not in support of the application; and a neighbor to the property, Mr. Rodriguez, who is interested in screening from the project.

Mr. Spraker concluded that the SPRC is recommending approval of this application. It is planned that the item will go before the City Commission for first reading on May 16, 2023 and second reading on June 6, 2023.

C. PP 2022-061(C), RidgeHaven subdivision, Preliminary Plat

Mr. Spraker, Planning Director, continued with the RidgeHaven request for a preliminary plat for 286 residential lots on 103.45 acres and associated site improvements. He explained that a preliminary plat is a document that subdivides land. The SPRC recommends approval of the preliminary plat.

Applicant's presentation

Mr. Glenn Storch, P.A., Storch Law Firm, 420 S. Nova Road, Daytona Beach, Representative, reviewed the history of other applications this project went through. The annexation of the project now allows reduction in permitted density, clustering, preservation of wetlands, municipal utilities and creative design. Mr. Storch explained that the applicant for the project stipulated for the Comprehensive Plan Amendment that was approved by the City and DEO. The limited number of units was limited to 298 for the entire parcel, no more than 3 units per acre. The PRD reduces the number now to 286 units. This reduced the density by 754 units and from 8 units per acre. Mr. Storch explained the diversity of the residential community further by detailing the plan for 84 duplex lots, 135 single-family 50' wide lots, and 66 single-family 75' wide estate lots.

Mr. Storch reviewed the environmental quality of life goal for the project stating that they will preserve a large wetland and upland buffer area in the center of the community, natural vegetation and tree preservation area, and explained how they are exceeding the required tree preservation. He added that most of the lots will have connections to natural vegetation in the community. Twenty-five percent of the land will remain untouched. Mr. Storch reiterated the inclusion of over 50,000 square feet of outdoor recreation area, in which the 33,000 square feet that was aforementioned is included..

Mr. Storch reviewed the effective water management part of the project with the minimization of water use. He covered that the irrigation will be from the use of the stormwater retention ponds, explained the aquifer recharge, and no groundwater wells or septic tanks, as the project will utilize the City of Ormond Beach potable water and sanitary sewer services. Mr. Storch stated that there will be no impact to the adjacent residential potable wells (Village of Pine Run) caused by a draw down or septic pollution of groundwater. He noted that the project is not within the 100-

year floodplain. In regards to protecting the adjoining neighbors, Mr. Storch mentioned that to the east of the project there will be a natural wooded buffer of at least 35', adjacent to the Village of Pine Run, and coupled with the existing canal, neighboring residents will be at least 100' to 150' away from new homes in RidgeHaven. He continued that to the south on Addison Drive, there is no access and only a vegetated buffer. To the north, there is a common area and wetlands and to the west is Plantation Oaks Boulevard. The entrances direct traffic towards the U.S. Highway 1 signal and away from existing residential.

Mr. Storch touched on some of the design of the community and displayed a landscaped entry sign and added that there will be ornamental streetlights and sign poles to provide an up-scale aesthetic. 298 street trees will be planted throughout the development along the streets, and in addition every lot will have trees planted, totaling 1,552 new trees in addition to the preserved trees. Mr. Storch added that the Homeowners' Association (HOA) will maintain and manage the natural areas and remove invasive species, and also added that there will be retention of more stormwater onsite than existing conditions – *more retention than required*. There will be less stormwater going off the site than what is on there presently.

Ms. Shull opened it up to the Board.

Board Questions

Mr. Railsback asked if the outparcels are vacant and if there are any improvements on them. Mr. Storch replied that there is a house on one of them and their access will be maintained and will provide them an easement. He added that they will have a paved road for the project portion and suggests that in the future it would be beneficial to them to annex into city water and sewer.

Mr. du Moulin expressed concern with guarantee of the HOA's responsibility with governing the irrigation system for the retention ponds. He referenced his experience with being part of an HOA and how they are mostly run by the members of the community. Mr. Storch replied that St. John's River Water Management District (SJRWMD) manages the permitting of the ponds and sets requirements through their permitting process. He commented that HOAs typically contract a company to maintain the ponds. He added that the ponds will be nice with fountains in them, which requires less maintenance. It was said that if the ponds are not maintained, the City, SJRWMD and homeowners have rights to take action. Mr. Storch stated that the invasive species are analyzed annually and taken care of. The HOA document is being drafted to address the matters and inform the home purchasers.

Mr. Railsback concurred with the comments and suggested that the responsibilities be clear in the covenants.

Mr. Jorczak questioned what the lot sizes are on the adjacent developments of Village of Pine Run and Plantation Oaks. Mr. Storch replied that Plantation Oaks are 50' by 100' which is consistent with what is being built. It was mentioned that there are smaller parcels and multi-family townhouses off of Addison Drive. There are also townhouses to the west of the development. Mr. Storch added that Village of Pine Run are approximately one acre and they have septic tanks and wells.

Mr. Scudiero inquired about the recreation areas planned for the development and why there is not more of a focus on indoor recreation area, like that of the outdoor recreation. Mr. Storch answered that the size of any recreation area is bases off of the number of units, therefore the indoor recreation area would have to be vast. He concluded that there would be no need for a fitness center with the amount of outdoor area, the pool and walking trails.

Mr. Scudiero asked if the natural areas on the map presented showed area that has been clear-cut. It was confirmed by Mr. Storch that the project was not clear-cutting due to clustering.

Mr. Jorczak inquired about the target-market price range of the homes. Mr. Storch replied that there will be a diverse market of approximately $300,000 for a duplex, and $400,000, $500,000, $600,000, and up to $700, 000 for the homes.

Ms. Shull asked if the property was out of flood zone X. Mr. Storch confirmed it is. Ms. Shull inquired about the rental restrictions for short-term rentals for the HOA. Mr. Storch will work on creating rental restrictions that reflect not allowing short-term rentals in the covenants and restrictions. There was discussion about rental communities and how it is not the goal for this project to be one.

Mr. du Moulin inquired about the stormwater. Mr. Storch stated that there will be less stormwater post-development and explained how the project will maintain more stormwater on the site than presently goes off of the property.

Mr. Storch addressed the earlier inquiry regarding a property on the cul-de-sac with a lighting concern, and requested a vinyl fence or hedge be installed and stated that the request will be adhered to.

Audience Comments

Mr. Luis Rodriguez, 1155 Plantation Oaks Boulevard, commented in regards to him being the individual who requested the fence. He stated that he prefers both the vinyl fence and vegetation (hedges). He stated that he worked at Sea Ray Boats and referenced a similar situation take place there where a parking lot was cleared out and at 5:00 a.m., the headlights came in. Mr. Rodriguez expressed concern with the pesticides being close to his home and family. He noted that he has a well. He requested that it not be possible for "drifters" and RVs to park close to him. He asked if the lot at the upside of the cul-de-sac can be eliminated, allowing the cul-de-sac to move back further for more safety and privacy. Mr. Luis explained that he hopes the water does not go his way in the event of a storm and hopes it is worked out in the .elevation planning. He concluded that he hopes that no one else can live on the cul-de-sac.

Mr. Charles Genter, 58 Indianhead Drive, Ormond Lakes, stated that he is a board member and Past President of the Ormond Lakes HOA. He noted that he wants to address the dilemma that Ormond Lakes faces with increasing amount of stormwater resulting from continuing land development and water shed. Mr. Genter continued that Ormond Lakes has no control over how much stormwater is being sent to them. Ormond Lakes is working diligently to optimize their stormwater system by spending $145,000 on a stormwater system since the storms in October and November 2022.

He added that the estuaries were back-washing that overwhelmed the Ormond Lakes storm distribution culverts. As a result, raw sewage was in the street due to lift station and street flooding. Several residents had water reach their garage. He continued that the Ormond Beach water shed is 5 square miles from the north and west and is expanding through development. Mr. Genter stated that there are six new developments and several more in the planning stage and each new project will send water downhill to the Ormond Lakes system using the open ditch system. Ormond Lakes is the last stop for stormwater before the estuaries. Mr. Genter emphasized that water runs downhill and a significant amount of stormwater enters their system. He asks how much water is coming and if a study has been done. He remarked that he asked that question in 2019 and 2020 and the answer is the same then as it is today, no one knows. He expressed frustration with the Planning Board, city engineers and City Commissioners for their misunderstanding of the problem stormwater management is. He pleaded for assistance from the City of Ormond Beach.

Mr. Tom Gaynor, 22 Rocky Bluff Drive, Ormond Lakes, concurred with Mr. Genter, commenting that Ormond Lakes has problems. He continued that each new development will affect the flooding as all of the surrounding areas to Ormond Lakes do. He added that during a 100 or 500-year storm the flood will become one, according to Mr. Gaynor. He stated that when North Beach Street floods, the water backs up to the Ormond Lakes exit. Last November the estuaries overran the exits and back flushed the area. Mr. Gaynor commented that when the engineers look at it, the data looks fine but when there is a big storm there is a problem. He inquired about the directional flow of the water and noted that they are at 8' above sea level, and that the ponds are at 29' above sea level. Mr. Gaynor stated that they need help from the City as they are out of money.

Ms. Shull asked Mr. Spraker if staff has met with the Ormond Lakes HOA before. Mr. Spraker replied that he and Mr. David Allen, Civil Engineer, met with them after the hurricane. He stated that there is a Stormwater Master Plan that has a study for the Ormond Lakes areas and that the Ormond Lakes complaints are not being ignored. The RidgeHaven subdivision is discharging less in the post development stage, in terms of rate and volume, then the pre-development condition. Mr. Spraker concluded that the applicant will give additional information on the matter and Mr. Allen will follow with his stormwater observations.

Mr. Parker Mynchenberg, Parker Mynchenberg & Associates, 1729 Ridgewood Avenue, stated that when the ponds are dug deeper, it does not create additional storage. It is when the area gets bigger that you get the additional storage. He explained that a wetland is being preserved in Plantation Oaks that abuts the site to the north. He further explained that when Plantation Oaks Boulevard was built, a new outfall was created that runs along the Village of Pine Run, easterly to 2,000 acres in the natural gardens that was sold to the state. There is a discharge easement to the park at 8' to 9' elevation. Mr. Mynchenberg remarked that he knows the area and drainage well, being that he designed Ormond Lakes, Halifax Plantation and Plantation Oaks. He added that he met with Mr. Allen regarding the RidgeHaven impacts to Ormond Lakes and Pine Run and did some research. There is a big ditch along Addison Boulevard and between the subject property and the Village of Pine Run. A ditch was built along the north property line on Plantation Oaks Boulevard. Mr. Mynchenberg stated that when it rains on the current site, it drains in all three directions. The initial design had outfalls to the lakes to the various ditches. It has

since been redesigned so that the runoff that leaves the site, goes into the outfall ditch on Plantation Oaks Boulevard, leaving 15 percent more storage than what is required. The 25-year and the 100-year storm event were analyzed and it demonstrated that the existing pre-development conditions are not exceeded. In a 500 year storm, the Tomoka Basin comes up to elevation 8.

Mr. Mychenberg added that the big lake in Ormond Lakes was preserved as well as wetlands. The wetlands hold water during the summer though and he mentioned that he has been working with Ormond Lakes for 20 years to resolve things for them. He concluded that the stormwater is directed to the east away from Ormond Lakes.

Mr. David Allen, Civil Engineer, City of Ormond Beach, remarked that upon receipt of the subject property project, they were already working with Ormond Lakes, their two ponds and entrance off of Pine Tree Drive. He commented that he was concerned about the water that makes its way to the two lakes and the canal off of Addison Drive, going north, and the swale behind the first row of houses on Addison Drive. He added that the predeveloped site has a significant number of depressions that hold water and that he found out through Mr. Mynchenberg's Stormwater Plan that the predeveloped rate that left the site was after the depressions were filled up. There is a small amount of storage volume in it predevelopment, therefore when starting with the design, Mr. Allen noted that he was looking at how the predeveloped storage was increased in the three ponds. He said that he discussed wetland concerns and changing how much flow goes directly toward Village of Pine Run with Mr. Mychenberg and found that as the design is now, after the area is filled, the back of the lots on Addison Drive will drain to the interior of the project. The water will be controlled in how it is ran through the three ponds, and the wetland, prior to going into the larger pond, and will go into the east-west ditch along the northern property line. Mr. Allen stated that staff has gone through significant review about the ditch and what the capacity of it is, as well as the ditch that runs north along the western edge of Village of Pine Run.

Mr. Allen added that when he met with Ormond Lakes, they referenced the ditch between Village of Pine Run and RidgeHaven flows to the south to the ditch behind the first interior of lots in Village of Pine Run, and as aforementioned the area that goes that way has been decreased. There are additional plans in review from Mr. Mynchenberg, received early this week on Monday to ensure that there is a blockage of the ditch at the corner so that no water will go south to Village of Pine Run unless there is a huge rain. Mr. Allen stated that engineers for the state have to design to certain standards. He referenced a storm event like that of what happened in Fort Lauderdale where they received 23" in 24 hours, in which no one can design for, but assured that they look at 100-year storm, 11.5" inches in a 24-hour period. Mr. Allen explained that they have attempted to force the water to go north, then along the northern edge of Village of Pine Run, into the wetland. He addressed the inquiry of when the Planning Board will address stormwater and take action, and answered that he informed Ormond Lakes that the master stormwater plan was approved in February 2023 with two studies for the northern U.S. 1 area and another for Ormond Lakes and the entrance at Pine Tree Drive. He further explained that in the stormwater master plan, they were scheduled for year two and was told that it recently changed and it is to be done in the first year.

Ms. Shull opened it up to the Board for discussion and entertained a motion.

Mr. du Moulin asked Mr. Allen who maintains the ditches and canals over time. Mr. Allen replied that the County maintains the ditch between Village of Pine Run and RidgeHaven, the Addison canal and once it gets to a certain point in Plantation Oaks, it will then be managed by Plantation Oaks HOA.

Mr. Storch addressed Mr. Rodriguez's request and replied that it will be noted as a stipulation for the arrangement of his fencing and hedges installation to be taken care of.

Mr. Galloway inquired about Mr. Rodriguez's desire to connect or not connect to city sewer and septic.

Mr. Mynchenberg stated that there is a 12" waterline that runs in the right-of-way (ROW). He added that Mr. Rodriguez has potable water that can be tapped into. Regarding gravity sewer, there is a proposed lift station as well as another lift station for the townhouse project across the street on Destiny Drive, where the sewer was stubbed. Mr. Mychenberg further explained that the duplexes work by gravity into the existing lift station that service that project. A new lift station is also by the cul-de-sac, and the project would have to be designed to provide gravity sewer to an outparcel. Mr. Mynchenberg concluded that Mr. Rodriguez could connect if he wanted to.

Mr. Jorczak asked about the trees being planted and inquired about trees that are lost. Mr. Storch answered that there are guarantees on the trees that they will live for a year, until being well-established. A provision can be included that specifies that the trees will be maintained.

Mr. Scudiero commented that he will support the unique project that it is not clear-cut. The project is consistent to the area in terms of greenery and the townhome portion. He noted the reduction in density to what can go in there. The County-version could have been almost 1,000 units, and under the City-standard could have been 515 units, and the proposed project is now down to 286 units.

Mr. Railsback concurred with Mr. Scudiero and commented that he appreciates the increase in effort from the developer to not further impact the stormwater issues in the area.

Mr. du Moulin noted that he appreciates the reduction of density but cannot support due to HOA concerns as well as other aspects.

Mr. Jorczak concurs that the project is unique and expressed that it is well thought-out. He noted that he also likes the clustering and reduction of density, as well as the different housing to provide a diverse environment. He added that the rental issues is also of concern to him as well. Mr. Jorczak urged when writing the covenants and restrictions to guarantee that the vegetation is not lost after three to four years. Mr. Storch replied that the City regulates it.

Mr. Jorczak commented that the developer and staff have done an admirable job redirecting the water away from Ormond Lakes as well as the work being done in the

stormwater management plan. He concluded that he likes the project for the diversity and how it fits with the surrounding communities and will support.

Mr. Galloway expressed the importance of the input from the neighbors. He directed his compassionate comments at Mr. Genter and Mr. Gaynor regarding flooding and expressed satisfaction that staff is working on a stormwater master plan for the growing community. He referenced Mirror Lakes and Chelsea Place and ensured that the developer at that time corrected the problem. Mr. Galloway commented that he hopes that the redirection of the water now going north, uphill will resolve the issue. He concluded that he is in support of the project now after the third time, as everything that was asked for regarding improvements was done.

Ms. Shull agreed with Mr. Galloway and commented that the Board has to work with the developers and do the best that they can with it. People are moving to Florida by the thousands. She commended the developer for working with the Board and staff on the drainage and greenspace. She reiterated her concern regarding rentals and the HOA not allowing *short-term* rentals. Ms. Shull concluded that she is in support of the project. She asked Mr. Spraker to explain the three waivers.

Mr. Spraker reiterated that there is three separate items, the first being the zoning map. Waivers are a part of the issuance of a development order. One waiver is the outdoor recreation in lieu of the indoor recreation. A lot of outdoor recreation is being proposed in place of indoor recreation. The detention pond is to allow the fill to be onsite as to not import fill which will provide greater stormwater management for the property. He concluded that there are areas that will not meet the 40' buffer. Not every space will have the 40' buffer, therefore they are asking for a waiver of that requirement in return for providing the benefits that were listed in the staff report and provided earlier.

Mr. Jorczak motioned to approve ZMA 2022-061(A), RidgeHaven subdivision, Zoning Map Amendment. Mr. Railsback seconded it. Vote was called, and the motion was approved (5-1), with Mr. du Moulin against.

Board discussion ensued.

Mr. Storch added that regarding the next vote, that he will provide language that will include the vinyl fencing and landscaping for it at the end of the cul-de-sac.

There was Board-City Attorney discussion explaining the item B vote further.

Mr. Scudiero motioned to approve DO 2022-061(B), RidgeHaven subdivision, Issuance of a Development Order, including the three waivers and the additional provision for the fence and landscaping at the end of the cul-de-sac. Mr. Jorczak seconded it. Vote was called, and the motion was approved (5-1), with Mr. du Moulin against.

Mr. Railsback motioned to approve PP 2022-061(C), RidgeHaven subdivision, Preliminary Plat. Mr. Scudiero seconded it. Vote was called, and the motion was approved (5-1), with Mr. du Moulin against.

DRAFT

Board Comments

Mr. Galloway commented that he hopes that the applicant/developer go the extra mile to take care of any concerns aforementioned.

Mr. Railsback reflected on HOA responsibility with short-term rentals and his experience with his HOA and short-term/Airbnb rentals and its effect. There was no language in his HOA contract regarding any rentals and urged that this be addressed so that it does not happen with RidgeHaven. He added the provision about the tree and parking matters in the contract as well.

Mr. du Moulin commended Mr. Storch on his presentation and noted that the developer is exceeding what most developers do.

Attorney Hayes touched on the rental matter, and explained that the City of Ormond Beach generally does not allow rentals in residential areas, but that there has been a push in the Florida Legislature to allow short-term rentals in every jurisdiction, regardless of whether or not those jurisdictions have an ordinance that has been grandfathered in, that prohibits rentals. He urged not to be surprised if in a year, or two, or three if there is a law that preempts the ability to do so. Attorney Hayes stated that the request will be treated as a voluntary concession by the applicant and not an imposition by the City. In the document it will be reflected that it is not being required as a condition for approval, but that the applicant has voluntarily agreed to take care of it.

Mr. Railsback added that in the last few sessions, the Legislature has excluded deed-restricted communities from the aforementioned home-rule, the roll back of the grandfathering of rentals. He emphasized the importance of capturing the specifics in the deed-restrictions in the contract as it is binding and will not be bound to Legislature addressing something in a municipality area.

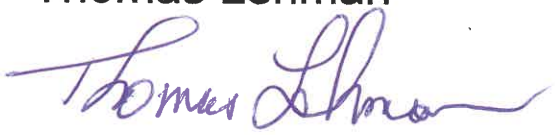
D. FLUM 2023-032, 1755 North U.S. Highway 1, Future Land Use Map Amendment

Mr. Spraker, Planning Director, explained the request from Wayne's Solar, Inc. for a Land Use Map Amendment from LIC, "Low Intensity Commercial" to "Light/Industrial/Utilities" for a 3.06 acre parcel located at 1755 North U.S. Highway 1. It is currently a vacant parcel of land. He reviewed the wide range of commercial uses that the land use allows. Mr. Spraker stated that the property owner has indicated a desire to construct a business warehouse. Mr. Spraker stated the use is consistent with the surrounding area and staff recommends approval.

Applicant's presentation

Mr. Richard Hardy, Representative, 975 S. Ponce de Leon Blvd., St. Augustine, stated that he is a builder and developer and explained that Wayne's Solar is desiring to move to the proposed location.

Ms. Shull opened it up to the Board for discussion and entertained a motion.



Mr. Galloway asked if this property would be the business site for Wayne's Solar and Mr. Hardy confirmed that is the plan.

Dear Steven Spraker, Planning Director

I will not be able to attend the zoning amendment hearing on Thursday, April 13, 2023 at 6:00PM. But I still want my position on this important issue be communicated and heard publicly and my vote counted if there is a vote tally for or against amending in the chambers. I am enclosing two copies of my letter presentation.

Sincerely Yours.

Thomas Lehman

Mr. Steven Spraker, Planning Director

Ormond City Hall

22 South Beach Street

Ormond Beach, Fl. 32174

Just before writing this letter presentation, I made a tour of my neighborhood as it stands today. I started by driving through the Lakes and Village of Pine Run communities and was impressed that even after decades of use they are fresh, clean, well maintained, where the mature coastal hammock and pine flatwood communities still exists within the developments. Individual lots are spacious, homes are quality built to hold up against seasonal strong winds, heavy rains, and flooding conditions. Volusia County got the zoning and development plans right for the area; the density is just right to create a living space that people enjoy living their lives out and raising families.

After making a tour of the new development areas behind me and to the North of my property I personally think all the qualities I just mentioned that appeal to me above do not exist within these new developmental areas and that the habits of development are destructive to the life support systems that remain here. Therefore, I do not endorse, and I would never approve a zoning change that would allow Ridge Haven to be built in a flood prone area.

I fail to see the ridge in Ridge Haven, since the development site is low flat Pine Flatwoods that floods six to eight months out of the year with an average height of 31 feet above sea level dotted by lower wetlands in the form of swamps and wet grassy marshes. So, I assume 80% of the site will be denuded and an artificial ridge will be created to make a hot, arid desert-like sand box for people to live in. The high density will produce large amounts of waste in various forms to mix with seasonal flood waters lowering the quality of life as the water has to be dumped somewhere in the nearby surroundings fouling the nest. Many issues concerning this development need to be addressed and I hope they are being discussed at this hearing that keep me from supporting this zoning change.

A better use of this 130-acre plot would be for all parties involved is to use the current Volusia County rural zoning and create a Village of Pine Run II extension. Building construction that harmonizes with what is already here and that has a lesser environmental impact and more human appeal. Or have Ormond Beach city hall authorize the design of another Central Park to create a natural barrier relief for storing flood waters and recharging the aquafer, while creating a recreational complex that buffers the area from the commercial to the residential use zones that transition here.

So, there you have my own personal response to this special exception zoning request, I see the Ridge Haven plans as undesirable urban sprawl in a flat, flood prone area not suitable for a sustainable community without special restrictions that are simply being omitted or not being addressed before any development order should be issued. What's the big hurry, push city hall? Let's talk and debate what is best for my neighborhood. Another way to state my position is to view the Volusia County Zoning Classification on the second page of the City of Ormond Beach mailing, no change is needed, no amending is required because this zoning is in the best interest for this locale. I would like to see the stewardship for this development turned back over to Volusia County so they can complete the good works they started over fifty years ago with less impact and more balance between neighboring communities.

Respectfully Yours.

Thomas Lehman

Meeting Date: 6/6/2023	**AGENDA ITEM**		**Number:** 9.A
Section:	FIRST READING OF ORDINANCES		
Item Category:	First Reading of Ordinances	**Res./Ord. No:**	2023-34
Strategic Goal:	Governance - Other		
Department :	City Attorney		
Subject:	Amendment to Code of Ordinances, Chapter 5 Animals and Fowl		
Budget Impact:	There is no impact upon the city budget.		
Summary:	The revisions to Chapter 5, Code of Ordinances, will add an additional level of animal accountability for dog owners and increased safety for all citizens.		
Recommended Action:	It is recommended that the City Commission approve the proposed amendment to the Code of Ordinances, Chapter 5, Animals and Fowl.		
Staff Contact:	Randy Hayes, City Attorney, (386) 676-3217		

Approval:

Kelly McGuire, Finance Director	5/25/2023	Kelly A. McGuire

CITY ATTORNEY
MEMORANDUM

To: The Honorable Mayor Partington and City Commissioners

From: Randal A. Hayes, City Attorney and

Justin Soard, Lead Animal Control Officer

Date: June 6, 2023

Subject: Amendment to Code of Ordinances, Chapter 5 Animals and Fowl

Introduction

This is a proposed amendment to the Code of Ordinances, Chapter 5, Animals and Fowl. The amendment mainly addresses dangerous and aggressive dogs, dogs at large, and failure to comply.

Discussion

In general, the City of Ormond Beach does not have a serious problem concerning aggressive or dangerous dogs. In the last 15 years, the city has never had more than two dangerous dog cases in one year, and most years has had one or no cases. However, because of the seriousness of any dangerous dog case, the matter deserves attention and as much regulation as reasonably possible. The city already has very high standards for ownership of dangerous dogs. For example, the city's requirement that dangerous dog owners obtain liability insurance is one of the few in the state with this requirement. The main issue facing animal control is not the number of dangerous dogs, or that the current regulations are not tough enough. The main problem is that the few dogs that have caused concerns typically have owners that are wholly irresponsible with the animals and will not abide by the city's regulations no matter how strictly written. Therefore, this amendment particularly addresses failure to comply issues, including dangerous dogs that are found "at large", mandatory impoundment and procedures for destruction. The amendment also adds provisions for liability to property owners, including landlords, that permit non-complaint dangerous dogs onto their property. In the experience of animal control, many of the dangerous dog owners do not own their property, and many are transient with property owners allowing the situation to persist. Fines related to these violations are also increased.

In addition to tightening the dangerous dog regulation, this amendment adds another class of dog to its regulation, classification of "aggressive dog" for dogs that severely injure or kill another domestic animal. There are many dogs that are non-aggressive to

people, but are very aggressive towards other animals. Under Florida law, a dog can be deemed dangerous if it seriously injuries or kills another domestic animal while off its owner's property more than once. The city is preempted by the Florida legislature from modifying this definition. Although infrequent, there have been unfortunate occasions when a dog has been at large and severely injured or killed another's pet. Because of the statutory definition of dangerous dog, the city cannot deem this dog "dangerous" for the one incident. The offending dog owner is usually cited with a "dog at large" violation (although the owner of the injured dog does have civil remedies). In essence, someone's pet was the "one free kill" under the Florida dangerous dog law. Adding a new class of "aggressive dog" does not change the definition of dangerous dog, but reasonably regulates aggressive dogs that severely injure or kill another's pet.

This amendment adds additional provisions for the city to recover costs of impoundment for all causes under Chapter 5. All impounded animals are transferred to the Halifax Humane Society (HHS) per the city's contract with HHS. The 2022 animal control cost budget was $38,000.00. Animal control reported costs of $28,000.00 in 2022, approximately 10k under budget. The 28k also included all wildlife calls. The largest cost to the department is HHS impoundment. The largest share of impoundment cost is due to owner hospitalization/death and drop off of stray or abandoned animals found in the city. Owner incarceration, although less frequent, also occurs. Although dangerous dogs are impounded, the cost of this impoundment is a very small fraction of the animal control budget because it is uncommon. Although this amendment contains additional regulation for recoupment of costs, lack of regulation is not the main problem. Recovery for impoundment for any cause is not always possible when owners are unable to pay and collection efforts would be fruitless. The city is also dependent on HHS to collect impoundment fees.

This amendment also contains a few other minor changes to reflect current practices or consistency with Florida Statutes.

Budget Impact

There is no impact upon the city budget.

Citizen Impact

The revisions to Chapter 5, Code of Ordinances will add an additional level of animal accountability for dog owners and safety for all citizens.

Recommendation

It is recommended that the City Commission approve the proposed amendment to the Code of Ordinances, Chapter 5, Animals and Fowl.

ORDINANCE NO. 2023-34

AN ORDINANCE AMENDING SECTION 5-1, DEFINITIONS, OF ARTICLE I, IN GENERAL, OF CHAPTER 5, ANIMALS AND FOWL; AMENDING SECTION 5-10, ANIMALS CONSTITUTING A NUISANCE PROHIBITED, OF ARTICLE I, IN GENERAL, OF CHAPTER 5, ANIMALS AND FOWL; AMENDING SECTION 5-13, FEEDING OF FERAL OR STRAY ANIMALS PROHIBITED, OF ARTICLE I, IN GENERAL, OF CHAPTER 5, ANIMALS AND FOWL; AMENDING SECTION 5-23, RUNNING AT LARGE PROHIBITED OF ARTICLE II, LIVESTOCK, OF CHAPTER 5, ANIMALS AND FOWL; AMENDING SECTION 5-25, NOTICE OF IMPOUNDING, OF ARTICLE II, LIVESTOCK, OF CHAPTER 5, ANIMALS AND FOWL; AMENDING SECTION 5-62, LICENSES ANNUAL; FEE, OF ARTICLE III, DOGS AND CATS; OTHER ANIMALS, OF CHAPTER 5, ANIMALS AND FOWL; AMENDING SECTION 5-67, DUPLICATE TAGS, OF ARTICLE III, DOGS AND CATS; OTHER ANIMALS, OF CHAPTER 5, ANIMALS AND FOWL; AMENDING SECTION 5-69, RUNNING AT LARGE PROHIBITED, OF ARTICLE III, DOGS AND CATS; OTHER ANIMALS, OF CHAPTER 5, ANIMALS AND FOWL; AMENDING 5-70, IMPOUNDING OF VIOLATORS, OF ARTICLE III, DOGS AND CATS; OTHER ANIMALS, OF CHAPTER 5, ANIMALS AND FOWL; AMENDING SECTION 5-72, RESPONSIBILITY FOR PAYMENT AND RECLAIMING AFTER IMPOUNDMENT, OF ARTICLE III, DOGS AND CATS; OTHER ANIMALS, OF CHAPTER 5, ANIMALS AND FOWL; AMENDING SECTION 5-78, DANGEROUS DOGS, OF ARTICLE III, DOGS AND CATS; OTHER ANIMALS, OF CHAPTER 5, ANIMALS AND FOWL; AMENDING SECTION 5-79, EXCEPTIONS, OF ARTICLE III, DOGS AND CATS; OTHER ANIMALS, OF CHAPTER 5, ANIMALS AND FOWL; AMENDING SECTION 5-80, INVESTIGATION AND DETERMINATION OF DANGEROUS DOG, OF ARTICLE III, DOGS AND CATS; OTHER ANIMALS, OF CHAPTER 5, ANIMALS AND FOWL; AMENDING SECTION 5-81, ACTION TO BE TAKEN BY OWNERS/KEEPERS OF DANGEROUS DOGS, OF ARTICLE III, DOGS AND CATS; OTHER ANIMALS, OF CHAPTER 5, ANIMALS AND FOWL; AMENDING SECTION 5-82, RESERVED, OF ARTICLE III, DOGS AND CATS; OTHER ANIMALS, OF CHAPTER 5, ANIMALS AND FOWL; AMENDING SECTION 5-83, OPTIONAL ACTION, OF ARTICLE III, DOGS AND CATS;

OTHER ANIMALS, OF CHAPTER 5, ANIMALS AND FOWL, OF THE CITY OF ORMOND BEACH CODE OF ORDINANCES; AND SETTING FORTH AN EFFECTIVE DATE.

BE IT ENACTED BY THE PEOPLE OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:

SECTION ONE. Section 5-1, Definitions, of Article I, In General, of Chapter 5, Animals and Fowl, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 5-1. Definitions.

The following words, terms and phrases, when used in this chapter, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning:

Adequate shelter means provision of and access to a secure weather-resistant shelter that is suitable for the age, height, size, breed, and type of each animal; provides adequate air ventilation and adequate space for each animal to stand up, lay down, stretch out, and turn around without being impeded by the shelter; is safe and protects each animal from injury, rain, hail, the adverse effects of heat or cold, physical suffering, and impairment of health; is properly cleaned; enables each animal to be clean and dry, except when detrimental to the species; during hot weather, is properly shaded with a covering and does not readily conduct heat; during cold weather, has a windbreak at its entrance and provides a quantity of bedding material consisting of straw, cedar shavings, or the equivalent that is sufficient to protect the animal from cold and promote the retention of body heat; and, for dogs and cats, provides a solid surface, resting platform, pad, floor mat, or similar device that is large enough for the animal to lie on in a normal manner and can be maintained in a sanitary manner. A shelter whose wire, grid, or slat floor permits an animal's feet to pass through the openings; sags under the animal's weight; or otherwise does not protect the animal's feet or toes from injury is not adequate shelter for purposes of this section.

Animal means <u>all creatures herein after defined in this section and</u> ~~every living dumb creature.~~ <u>shall have the contextual meaning of the circumstances in which the word is used.</u>

At large means off the premises of its owner and not under restraint, leash, or chain, or not otherwise controlled by a competent person.

Cat means any member of the animal species Felis Catus.

Continuous means without interruption.

Domesticated animal means any of various animals domesticated by man as to live and breed in a tame condition, such as domestic dogs or cats, and shall include as provided in F.S. §585.01, any equine or bovine, goat, sheep, swine, domestic cat, dog, poultry, ostrich, emu, rhea, or other domesticated beast or bird.

Feral means an unsocialized animal which may be one or more generations removed from a home environment and that may subsist in a colony of similar animals living on the fringes of human existence.

Frequent means happening or appearing often or at close intervals.

Habitual means a usual act, practice or manner that is acquired or displayed by frequent repetition.

Horse includes any mule, burro, pony, jack or jenny.

Kennel means the commercial business of breeding, buying, selling or boarding of dogs or cats.

Livestock means ~~any animal of the equine, bovine, or swine class, including goats, sheep, mules, horses, hogs, cattle, ostriches, and other grazing animals~~. grazing animals, such as cattle, horses, mules, sheep, hogs, goats, other hoofed animals, ostriches, emus, and rheas that are raised for private use or commercial purposes as provided in F.S. §585.01.

Owner means any person that has licensed an animal in accordance with the requirements of this chapter; or who has vaccinated such animal against rabies in accordance with F.S. § 828.30; or who otherwise has or claims ownership or a right of property in any animal~~.~~ or any custodian or other person in charge of any animal, domestic or otherwise.

Repeated means renewed or recurring again and again.

Stray means a free-roaming animal that is not owned by anyone; that has no reliable source of shelter or food from anyone claiming ownership or a right of property in the animal; and that is not licensed pursuant to this chapter, or vaccinated for rabies as required pursuant to F.S. § 828.30.

Tether shall mean a trolley cable, cord, rope, chain, strap, or any other linear thing that restrains, limits or confines the free unimpeded movement of a dog, cat, or other animal to a limited space or area.

Tethering or *tethered* shall mean the act of affixing or attaching a tether to a dog, cat, or other animal. The act of "tethering" shall not include the use of a leash or other restraint when utilized by a person while walking or exercising a dog, cat, or other animal; nor shall it include

commercial safety restraint devices that are designed for use in vehicles for the protection of animals while they are being transported from one location to another.

Unlicensed dog or cat means a dog or cat for which the license for the current year has not been paid, or to which the tag provided for in this chapter is not attached.

Wild animal means any animal not ordinarily and customarily domesticated, including, but not limited to, any skunk, raccoon, opossum, squirrel ~~or~~ ,fox, or coyote.

SECTION TWO. Section 5-10, Animals constituting a nuisance prohibited, of Article I, In General, of Chapter 5, Animals and Fowl, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 5-10. Animals constituting a nuisance prohibited.

It shall be unlawful for any person to own or keep any animal described in section 5-1 of this chapter that becomes a nuisance in the community. The term "nuisance," for the purposes of this chapter, shall include, but is expressly not restricted to the following:

(1) Frequent and repeated barking, howling, or making noise for two or more continuous intervals of at least 30 seconds during any period of ten consecutive minutes or more at any time;

(2) Barking, howling, or making noise for a continuous period of one minute or more at any time;

(3) Frequent digging into, breaking or otherwise injuring or damaging shrubbery, trees, lawns, garbage, or stored materials on public or private property not belonging to the owner or custodian of the animal;

(4) Frequent or habitual depositing of excreta on property not belonging to the owner or custodian of the animal.

(5) Running at large.

SECTION THREE. Section 5-13, Feeding of feral or stray animals prohibited, of Article I, In General, of Chapter 5, Animals and Fowl, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 5-13. Feeding of feral or stray animals prohibited.

It shall be unlawful for any person to feed a feral or stray animal within the city except by "owners," as that term is defined herein~~, and except that such feeding may take place in feral cat colonies that have been approved in writing by the police chief or his designee and such feeding of stray animals may occur temporarily while ownership of said animal, as defined in section 5-1, is re-established~~ unless the animal is part of a spay and neuter return to field program.

SECTION FOUR. Section 5-23, Running at large prohibited, of Article II, Livestock, of Chapter 5, Animals and Fowl, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 5-23. Running at large prohibited.

It shall be unlawful to allow or permit any ~~horses, mules, cattle, swine or other~~ livestock to roam or run at large within the city.

SECTION FIVE. Section 5-25, Notice of impounding, of Article II, Livestock, of Chapter 5, Animals and Fowl, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 5-25. Notice of impounding.

Immediately after impounding any ~~domesticated animal~~ livestock under the provisions of section 5-24, it shall be the duty of the animal control officer to make every reasonable effort to identify and notify the owner of the animal.

SECTION SIX. Section 5-62, Licenses annual; fee, of Article III, Dogs and Cats; Other Animals, of Chapter 5, Animals and Fowl, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 5-62. Licenses annual; fee.

Dog and cat licenses shall be issued annually by the animal control officer upon payment of a license fee ~~of $5.00 for each animal.~~ as established by the City.

SECTION SEVEN. Section 5-67, Duplicate tags, of Article III, Dogs and Cats; Other Animals, of Chapter 5, Animals and Fowl, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 5-67. Duplicate tags.

In case a dog or cat tag is lost or destroyed, a duplicate will be issued by the animal control officer, upon presentation of a receipt showing the payment of the license fee for the current year, and the payment ~~of $0.50~~ for such duplicate.

SECTION EIGHT. Section 5-69, Running at large prohibited, of Article III, Dogs and Cats; Other Animals, of Chapter 5, Animals and Fowl, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 5-69. Running at large prohibited.

(a) No owner or keeper of any animal shall permit such animal to run at large at any time, whether licensed or unlicensed. Dogs shall be on a leash not to exceed eight feet in length at all times when off the owner's property. Evidence that such owner or keeper has made an attempt to preclude the animal from running at large shall be considered by the special magistrate in its determination as to whether or not a violation of this section has occurred.

(b) A dog that has been deemed dangerous that is subsequently found at large shall be immediately impounded and the matter referred to the Special Magistrate under Section 8-83, Failure to Comply.

(c) In addition to other penalties provided by this Chapter and Florida Statutes, If a dog that has been deemed aggressive or dangerous injures a domestic animal or person while at large, the violation shall be deemed irreversible and irreparable in nature and a fine of $5,000.00, or the then highest fine allowed by law shall apply.

SECTION NINE. Section 5-70, Impounding of violators, of Article III, Dogs and Cats; Other Animals, of Chapter 5, Animals and Fowl, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 5-70. Impounding of violators.

An animal control officer has the authority to impound any animal at large, pursuant to the enforcement or violation of any ordinance of this Chapter or as provided by Florida Statutes. It shall be the duty of the animal control officer to apprehend any animal found running at large ~~and to impound such domesticated animal~~. The city shall establish and operate, either independently or in cooperation with a humane society or a veterinarian, a suitable place for the impounding, care and final disposal of all animals picked up under the terms of this ~~article,~~ Chapter and said place shall be known as the animal shelter. The animal control officer, upon receiving any animal, shall make a complete registry, entering the breed, color and sex of such animal, whether licensed or unlicensed. If licensed, he shall enter the name, address and e-mail address of the owner and the number of the license tag. Licensed dogs or cats shall be separated from unlicensed dogs or cats.

SECTION TEN. Section 5-72, Responsibility for payment and reclaiming after impoundment, of Article III, Dogs and Cats; Other Animals, of Chapter 5, Animals and Fowl, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 5-72. Responsibility for payment and reclaiming after impoundment.

The owner of any ~~dog or cat~~ animal impounded pursuant to city ordinance or Florida Statutes can reclaim such ~~dog or cat~~ animal, upon payment of a license fee and the charges hereinafter imposed, and of all costs and charges incurred by the city for impounding and maintenance of such ~~dog or cat~~ animal. No ~~dog or cat~~ animal shall be reclaimed unless the owner furnishes the animal control officer a certificate showing that the ~~dog or cat~~ animal has been vaccinated against rabies within the preceding 12 months. If the owner cannot furnish said certificate, the ~~dog or cat~~ animal shall be transported to an animal shelter or veterinarian where the appropriate vaccination can be administered prior to its release. ~~The following charges shall be paid to the city through the animal control officer: For keeping or impounding any animal, $20.00; and for each day kept, $5.00~~. Any of the duties herein imposed upon the animal control officer may be delegated to an animal shelter by a service agreement approved by resolution of the city commission. In all instances of impoundment, owners of animals are responsible for the full cost of impoundment as charged by the shelter.

SECTION ELEVEN. Section 5-78, Dangerous dogs, of Article III, Dogs and Cats; Other Animals, of Chapter 5, Animals and Fowl, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 5-78. <u>Aggressive and</u> dangerous dogs.

A dog shall be deemed "dangerous" if:

(1) According to the records of the police department, it has:

a. Aggressively bitten, attacked or endangered, or has inflicted severe injury (any physical injury that results in broken bones, multiple bites, or disfiguring lacerations requiring sutures or reconstructive surgery) on any human being lawfully on public or private property;

b. More than once severely injured or killed a domestic animal (as defined by F.S. § 585.01(10)) while off of the property of its owner or keeper; or
[**<u>A dog may be deemed "aggressive" after a single occurrence of killing or severely injuring a domestic animal without provocation]</u>**

c. When unprovoked (the victim has been conducting himself peacefully and lawfully), chased or approached a person upon the streets, sidewalks or any public grounds in a menacing fashion or apparent attitude of attack, provided that such actions are attested to in a sworn statement by one or more victims and dutifully investigated by the appropriate authority;

(2) It has been used primarily or in part for the purpose of dog fighting;

(3) It is trained for dog fighting; or

(4) It is used as a guard dog.

SECTION TWELVE. Section 5-79, Exceptions, of Article III, Dogs and Cats; Other Animals, of Chapter 5, Animals and Fowl, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 5-79. Exceptions.

(a) A dog shall not be deemed dangerous <u>or aggressive</u> if:

(1) The threat, injury or damage was sustained by a person who, at the time:

a. Was unlawfully on the property;

b. While lawfully on the property, was tormenting, abusing or assaulting the dog or its owner or a family member; or

c. The dog was protecting or defending a human being within the immediate vicinity of the dog from an unjustified attack or assault.

(2) It is owned by a law enforcement agency and used for law enforcement work.

(b) Hunting dogs are exempt from the provisions of this Code when engaged in any legal hunt or training procedure. Dogs engaged in training or exhibiting in legal sports such as obedience trials, conformation shows, field trials, hunting/retrieving trials and herding trials

are exempt from the provisions of this Code when engaged in any legal procedures. However, such dogs at all other times in all other respects shall be subject to all applicable laws. Dogs that have been classified as dangerous shall not be used for hunting purposes.

SECTION THIRTEEN. Section 5-80, Investigation and determination of dangerous dog, of Article III, Dogs and Cats; Other Animals, of Chapter 5, Animals and Fowl, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 5-80. Investigation and determination of dangerous <u>or aggressive</u> dog.

(a) An animal control officer shall investigate reported incidents involving any dog that may be a "dangerous dog," or "<u>aggressive dog</u>" as defined in section 5-78, and shall, if possible, interview the owner and require a sworn affidavit from any person, including any animal control officer or enforcement officer, desiring to have a dog classified as dangerous <u>or aggressive</u>. Any animal that is the subject of a dangerous <u>or aggressive</u> dog investigation, that is not impounded with an animal shelter, shall be humanely and safely confined by the owner in a securely fenced or enclosed area pending the outcome of the investigation and resolution of any hearings related to the dangerous <u>or aggressive</u> dog classification. The address of where the animal resides shall be provided to the police department. No dog that is the subject of a dangerous <u>or aggressive</u> dog investigation may be relocated or ownership transferred pending the outcome of an investigation or any hearings related to the determination of a dangerous <u>or aggressive</u> dog classification. In the event that a dog is to be destroyed, the dog shall not be relocated or ownership transferred.

(b) After the investigation, the animal control officer shall make an initial determination as to whether there is sufficient cause to classify the dog as dangerous <u>or aggressive</u> and shall afford the owner an opportunity for a hearing prior to making a final determination. The animal control officer shall provide written notification of the sufficient cause finding, to the owner, by registered mail, certified hand delivery, or service in conformance with the provisions of F.S. ch. 48, relating to service of process. The owner may file a written request for a hearing before a special master within seven calendar days from the date of receipt of the notification of the sufficient cause finding and, if requested, the hearing shall be held as soon as possible, but not more than 21 calendar days and no sooner than five calendar days after receipt of the request from the owner. If the owner fails to request a hearing before a special master, the determination of the animal control officer shall become final and the animal control officer shall then provide the owner with the notice required by subsection (d) of this section.

(c) At any requested hearing, a special master shall determine whether or not the subject dog is in fact a "dangerous dog," <u>or "aggressive dog</u>" as defined in section 5-78, which determination shall be based upon the evidence and testimony presented at the time of the

hearing by the owner and/or keeper, witnesses to any incident(s) which may be considered relevant to the determination, county health department personnel, humane society personnel, animal control personnel, law enforcement personnel, or any other person possessing information relevant to the determination.

(d) Once a dog is finally determined to be a dangerous or aggressive dog, the animal control officer or a special master, whoever makes the final determination, shall provide written notification to the owner by registered mail, certified hand delivery or service, and the owner may file a written request for a hearing in the county court to appeal the determination within ten business days after receipt of a written determination of dangerous dog classification and must confine the dog in a securely fenced or enclosed area pending a resolution of the appeal.

SECTION FOURTEEN. Section 5-81, Action to be taken by owners/keepers of dangerous dogs, of Article III, Dogs and Cats; Other Animals, of Chapter 5, Animals and Fowl, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 5-81. Action to be taken by owners/keepers of dangerous dogs.

(a) If a dog that has previously been declared dangerous attacks or bites a person or a domestic animal without provocation, the owner is guilty of a misdemeanor of the first degree, punishable as provided in F.S § 775.082 or 775.083. In addition, the dangerous dog shall be immediately confiscated by the police department, placed in quarantine, if necessary, for the proper length of time, or impounded and delivered to an animal shelter to be held for ten business days after the owner is given written notification under section 5-80, and thereafter destroyed in an expeditious and humane manner. This ten-day time period shall allow the owner to request a hearing under section 5-80. The owner shall be responsible for payment of all boarding costs and other fees as may be required to humanely and safely keep the animal during any appeal procedure.

(b) If a dog that has not been declared dangerous attacks and causes severe injury to or death of any human, the dog shall be immediately confiscated by an animal control authority, placed in quarantine, if necessary, for the proper length of time, or impounded and delivered to the Halifax Humane Society to held for ten business days after the owner is given written notification under section 5-80, and thereafter destroyed in an expeditious and humane manner. This ten-day time period shall allow the owner to request a hearing under section 5-80. The owner shall be responsible for payment of all boarding costs and other fees as may be required to humanely and safely keep the animal during any appeal procedure. In addition, if the owner of the dog had prior knowledge of the dog's dangerous propensities, yet demonstrated a reckless disregard for such propensities under the circumstances, the

owner of the dog is guilty of a misdemeanor of the second degree, punishable as provided in F.S. § 775.082 or 775.083.

(c) If a dog that has previously been declared dangerous attacks and causes severe injury to or death of any human, the owner is guilty of a felony of the third degree, punishable as provided in F.S. § 775.082, 775.083 or 775.084. In addition, the dog shall be immediately confiscated by an animal control authority, placed in quarantine, if necessary, for the proper length of time, or impounded and delivered to the Halifax Humane Society to be held for ten business days after the owner is given written notification under section 5-80, and thereafter destroyed in an expeditious and humane manner. This ten-day time period shall allow the owner to request a hearing under section 5-80. The owner shall be responsible for payment of all boarding costs and other fees as may be required to humanely and safely keep the animal during any appeal procedure.

(d) If the owner files a written appeal under section 5-80, the dog must be held and may not be destroyed while the appeal is pending.

(e) If the dog attacks or bites a person who is engaged in a criminal activity at the time of the attack, the owner is not guilty of any crime specified under this section.

(f) Within 72 hours after a dog has been classified as dangerous by the animal control officer or by a special master, or a dangerous dog classification is upheld by the county court on appeal, the owner of the dog must obtain a certificate of registration for the dog from the police department, and the certificate shall be renewed annually. The fee for such registration shall be ~~$250.00~~ $500.00 per year. The police department is authorized to issue such certificates of registration, and renewals thereof, only to persons who are at least 18 years of age and who present to the police department sufficient evidence of:

(1) A current certificate of rabies vaccination for the dog;

(2) A proper enclosure to confine a dangerous dog and the posting of the premises with a clearly visible warning sign at all entry points that informs both children and adults of the presence of a dangerous dog on the property. For purposes of this section, "proper enclosure" means, while on the owner's property, a dangerous dog is securely confined indoors or in a securely enclosed and locked pen or structure, suitable to prevent the entry of young children and designed to prevent the animal from escaping. Such pen or structure shall have secure sides and a secure top to prevent the dog from escaping over, under or through the structure and shall also provide protection from the elements. Such pen or other structure shall have minimum dimensions of five feet by ten feet, have secure sides and a secure top. Unless it has a bottom secured to the sides, the sides shall be embedded into the ground for a distance of no less than two feet;

(3) Permanent identification of the dog, being a tattoo of the licensing number or such other number as the police chief or his designee shall determine, on the right inside thigh, or a microchip with the licensing number or other such number as the police chief or his designee shall determine, performed by a licensed veterinarian or a licensed tattooist.

(g) The owner shall immediately notify the police department when a dog that has been classified as dangerous:

(1) Is loose or unconfined;

(2) Has bitten a human being or attacked another animal;

(3) Is sold or given away or dies;

(4) Is moved to another address.

Prior to a dangerous dog being sold or given away, the owner shall provide the name, address, e-mail address and telephone number of the new owner to the police department. The new owner must comply with all of the requirements of this Code. The police department must be notified by the owner of a dog classified as dangerous that the dog is in the city.

(h) The owner shall not permit the dog to be outside a proper enclosure unless the dog is muzzled and restrained by a substantial chain or leash~~, with a minimum tensile strength of 300 pounds and~~ no longer than three feet in length, and the dog shall be harnessed and under the control of a competent person capable of restraining the dog. The muzzle must be made in a manner that will not cause injury to the dog or interference with its vision or respiration but will prevent it from biting any person or animal. The owner may exercise the dog in a securely fenced or enclosed area that does not have a top, without a muzzle or leash, if the dog remains within his sight and only members of his immediate household or persons 18 years of age or older are allowed in the enclosure when the dog is present. When being transported, such dogs must be safely and securely restrained within a vehicle. Dangerous dogs are not permitted in any public parks, including dog parks.

(i) Within 30 days of a dog being classified as dangerous by the animal control officer or by a special master or within 30 days of a dangerous dog classification being upheld by the county court on appeal or within 30 days of a dangerous dog being moved into the city from another jurisdiction, the owner or keeper of a dangerous dog shall present to the city proof that he has procured liability insurance or surety bond in the amount of not less than $100,000.00, covering any damage or injury which may be caused by such dangerous dog. Such insurance policy shall contain a provision requiring that the city be notified immediately by the agent issuing the policy in the event that the insurance policy is canceled, terminated or expires. Liability insurance or surety bond shall be obtained prior to the issuing of a certificate of registration for the dangerous dog. The owner or keeper shall sign a statement attesting that he shall maintain and not voluntarily cancel the liability insurance policy during the 12-month period for which a certificate of registration is sought, unless he ceases to own or keep the dangerous dog prior to the expiration date of the certificate of registration.

(j) Any dog classified as dangerous shall not be used for breeding. Dogs classified as dangerous shall be spayed or neutered by a licensed veterinarian within 30 days of such classification unless:

(1) A licensed veterinarian certifies in writing that the dog is incapable of reproduction; or

(2) A licensed veterinarian certifies in writing that spaying or neutering the dog would be injurious to the dog's health; provided, however, that if the health condition of the dog is of a temporary nature, then the dog shall be spayed or neutered immediately after the health condition has been corrected.

(k) This section shall have retrospective application and apply to all dogs classified as dangerous, regardless of the date of classification.

(l) This section shall apply to all dogs classified as dangerous, regardless of the jurisdiction that classified the dog.

(m) Any property owners, including but not limited to landlords, that permit a dangerous dog to remain on their premises when the owner or keeper of the dog has not met the requirements of this section shall be held in violation of this section and for all applicable fines and costs in the enforcement thereof.

SECTION FIFTEEN. Section 5-82, Reserved, of Article III, Dogs and Cats; Other Animals, of Chapter 5, Animals and Fowl, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 5-82. ~~Reserved~~. Action to be taken by owners/keepers of aggressive dogs.

(a) Within 72 hours after a dog has been classified as aggressive by the animal control officer or by a special master, the owner of the dog must obtain a certificate of registration for the dog from the police department, and the certificate shall be renewed annually. The fee for such registration shall be $250.00 per year. The police department is authorized to issue such certificates of registration, and renewals thereof, only to persons who are at least 18 years of age and who present to the police department sufficient evidence of:

(1) A current certificate of rabies vaccination for the dog;

(2) A proper enclosure to confine an aggressive dog and the posting of the premises with a clearly visible warning sign at all entry points that informs both children and adults of the presence of an aggressive dog on the property;

(3) Permanent identification of the dog, such as a microchip with the licensing number or other such number as the police chief or his designee shall determine, performed by a licensed veterinarian.

(b) The owner shall immediately notify the police department when a dog that has been classified as aggressive

(1) Is loose or unconfined;

(2) Has injured a human being or attacked another animal;

(c) Any owner or keeper of an aggressive dog shall keep the dog muzzled, leashed, and harnessed at all times when off the owner or keeper's private property. Aggressive dogs are not permitted in any public parks, including dog parks.

(d) Any dog classified as dangerous shall not be used for breeding. Dogs classified as aggressive shall be spayed or neutered by a licensed veterinarian within 30 days of such classification unless:

(1) A licensed veterinarian certifies in writing that the dog is incapable of reproduction; or

(2) A licensed veterinarian certifies in writing that spaying or neutering the dog would be injurious to the dog's health; provided, however, that if the health condition of the dog is of a temporary nature, then the dog shall be spayed or neutered immediately after the health condition has been corrected

SECTION SIXTEEN. Section 5-83, Optional action, of Article III, Dogs and Cats; Other Animals, of Chapter 5, Animals and Fowl, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 5-83. ~~Optional action~~. Failure to comply.

(a) Any owner/keeper of a ~~dangerous~~ dog deemed dangerous pursuant to section 5-78(1)a or 5-78(1)b of this Chapter who is unable or unwilling to comply with Section 5-81 shall promptly have the dog humanely euthanized by an animal shelter or a licensed veterinarian at the owner's expense. At the time the dog is delivered to the animal shelter or veterinarian, the owner/keeper shall advise the person receiving the dog that it is a dangerous dog.

(b) If the owner fails to voluntarily euthanize the dog, animal control has authority to seize the dog and provide notice of the intention to destroy the dog to the owner or keeper of the animal due to the likelihood of a future threat to the public safety, health and welfare. Animal control shall afford the owner an opportunity for a hearing prior to making a final determination. The animal control officer shall provide written notification of the sufficient cause finding, to the owner, by registered mail, certified hand delivery, or service in conformance with the provisions of F.S. ch. 48, relating to service of process. The owner may file a written request for a hearing before a special master within seven calendar days from the date of receipt of the notification of the sufficient cause finding and, if requested, the hearing shall be held as soon as possible, but not more than 21 calendar days and no sooner than five calendar days after receipt of the request from the owner. If the owner fails to request a hearing before a special master, the determination of the animal control officer shall become final and the animal control officer shall then provide the owner with the notice required by subsection (d) of this section.

(c) At any requested hearing, a special master shall determine whether or not there has been a failure to comply with section 5-81, which determination shall be based upon the evidence and testimony presented at the time of the hearing by the owner and/or keeper, witnesses to any incident(s) which may be considered relevant to the determination, county health department personnel, humane society personnel, animal control personnel, law enforcement personnel, or any other person possessing information relevant to the determination.

(d) Once the determination that the owner or keeper of the dog is unable or unwilling to comply with section 5-82, the animal control officer or a special master, whoever makes the final determination, shall provide written notification to the owner by registered mail, certified hand delivery or service, and the owner may file a written request for a hearing in the county court to appeal the determination within ten business days after receipt of a written determination.

SECTION SEVENTEEN. This Ordinance shall take effect immediately upon its adoption.

PASSED UPON at the first reading of the City Commission, this 6th day of June, 2023.

PASSED UPON at the second and final reading of the City Commission, this 18th day of July, 2023.

Meeting Date: 6/6/2023	**AGENDA ITEM**		**Number:** 10.A
Section:	SECOND READING OF ORDINANCES		
Item Category:	Second Reading of Ordinances	**Res./Ord. No:**	2023-32
Strategic Goal:	Governance - Other		
Department :	Support Services		
Subject:	Amendment to Section 2-221 of the Code of Ordinances, Leisure Services Advisory Board - Elimination of positions for Girls' Softball and Ormond Beach Friends of Recreation (SECOND READING)		
Budget Impact:	There are no budget impacts associated with this item.		
Summary:	Presently, there are LSAB appointments in the Code of Ordinances for girls' softball and Ormond Beach Friends of Recreation, Inc. The Leisure Services Advisory Board recommends two positions be eliminated, reducing the membership count from 13 to 11 members. These changes require the Code of Ordinances to be amended.		
Recommended Action:	It is requested to approve the ordinance to amend Section 2-221 (a) of the Code of Ordinances, regulating membership of the Leisure Services Advisory Board, by eliminating the girls' softball and Ormond Beach Friends of Recreation, Inc. positions. As well as Section 2-221 (e) update which is administrative in nature.

CITY MANAGER
MEMORANDUM

To: The Honorable Mayor Partington and City Commissioners

Through: Joyce Shanahan, City Manager

From: Susan Dauderis, City Clerk

Date: June 6, 2023

Subject: Amendment to Section 2-221 of the Code of Ordinances, Leisure Services Advisory Board - Elimination of positions for Girls' Softball and Ormond Beach Friends of Recreation (SECOND READING)

Commission Goal: Governance - Other

Introduction

This is a request for approval to amend Section 2-221 (a) of the Code of Ordinances regarding membership and terms of the Leisure Services Advisory Board (LSAB), and an administrative update to Section 2-221 (e) regarding terms of appointment.

Background

At the request of the Leisure Services Advisory Board, the City Commission being asked to eliminate the girls' softball and Ormond Beach Friends of Recreation, Inc. positions on the LSAB.

Discussion

The LSAB requested the City Commission review the membership makeup of the advisory board, specifically the elimination of the girls' softball (Ormond Beach Baseball & Softball) position. The City Commission discussed the matter at the December 6, 2022 City Commission Advisory Board Workshop.

Elimination of one position requires that another position be eliminated in order to keep the membership count an odd number; currently there are 13 members. The City Commission tasked the LSAB to review and discuss what other position could be eliminated.

The LSAB reviewed the matter at their December 14, 2022 and April 12, 2023 board meetings, and recommend eliminating the Ormond Beach Friends of Recreation, Inc. and girls' softball (Ormond Beach Baseball & Softball) positions.

This change of membership requires an amendment to the composition section of Section 2-221 (a) of the Code of Ordinances, regulating membership of the Leisure Services Advisory Board. Updates to Section 2-221 (e) are administrative in nature with no change to substance. The ordinance amending the code will require two readings.

Budget Impact

There are no budget impacts associated with this item.

Citizen Impact

Updating the membership of the LSAB will benefit residents by providing more effective and consistent representation.

Recommendation

It is requested to approve the ordinance to amend Section 2-221 (a) of the Code of Ordinances, regulating membership of the Leisure Services Advisory Board, by eliminating the girls' softball and Ormond Beach Friends of Recreation, Inc. positions. As well as Section 2-221 (e) update which is administrative in nature.

ORDINANCE NO. 2023-32

AN ORDINANCE AMENDING SECTION 2-221, LEISURE SERVICES ADVISORY BOARD, OF ARTICLE VI, BOARDS, COMMISSIONS, COMMITTEES AND OTHER AGENCIES, OF CHAPTER 2, ADMINISTRATION, OF THE CODE OF ORDINANCES, BY AMENDING COMPOSITION AND TERMS; PROVIDING TERMS AND CONDITIONS; AND SETTING FORTH AN EFFECTIVE DATE.

BE IT ENACTED BY THE PEOPLE OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:

SECTION ONE. Section 2-221, Leisure services advisory board, Division 2, Enumerated, of Article VI, Boards, Commissions, Committees and Other Agencies, of Chapter 2, Administration, of the City of Ormond Beach, Florida, *Code of Ordinances* is hereby amended to read as follows:

Sec. 2-221. Leisure services advisory board.

(a) *Composition.* ~~The leisure services advisory board shall consist of 13 members all of whom shall be residents of the city. Each of the flowing organizations shall nominate one of its members to serve on the board: Youth baseball, Youth basketball, Girls softball, Youth soccer, Commission at-large, Pop Warner Youth football, Ormond beach Pride, Inc. and Ormond beach Friends of Recreation, Inc.; All such nominations must be approved by the city commission. Additionally, the mayor and each city commissioner shall nominate candidates to serve as members of the board from the general population as provided in section 2-206, and all appointments to the board shall be approved by majority vote of the city commission. Each member of the city commission, shall initially, nominate one candidate to be considered for appointment by the city commission. If any candidate is rejected by the city commission, the city commission member who nominated the candidate may nominate additional candidates in like manner; and if said city commission member chooses not to make such additional nomination(s), then one or more of the other city commission members may nominate candidates to fill the position in like manner.~~

The leisure services advisory board shall consist of eleven (11) members who shall be appointed by the city commission. All members shall be residents of the city and shall serve in accordance with section 2-206 of this *Code* and other applicable requirements.

The mayor and each city commissioner shall nominate a person to serve as members of the board, and shall by consensus nominate one person to serve at-large. In addition, the city commission shall consider nominations provided by each of the following youth sports organizations: Ormond Beach Youth Baseball & Softball Corp.; Ormond Beach Youth Basketball Association, Inc.; Ormond Beach Soccer Club, Inc.; Ormond Beach Youth Football and Cheerleaders Association, Inc.; and Ormond Beach Pride, Inc.

All members of the leisure services board shall be approved by majority vote of the city commission. In the event the city commission does not approve a nominee, the city commission member or youth sports organization that made such nomination may make such additional nominations as may be necessary to obtain approval. If the said city commission member or youth sports organization chooses not to make an additional nomination, then one or more of the other city commission members may offer a nomination.

(b) *Purpose.* (no change in text)

(c) *Meetings.* (no change in text)

(d) *Officers.* (no change in text)

(e) *Terms.* ~~The terms of office for those leisure services advisory board members that were appointed by Resolutions 2008-23, 2008-56, 2008-231, and 2009-126 shall expire the day prior to the first regularly scheduled city commission meeting in January 2011. Thereafter,~~ M~~m~~members shall be appointed or re-appointed to serve two-year terms that shall expire the day prior to the first regularly scheduled city commission meeting in January of each odd-numbered year. Any vacancy in an unexpired term shall be filled in the same manner as the original appointment for the remainder of the term. A member of the leisure services advisory board may be removed by the city commission ~~only~~ for cause ~~and~~ after being ~~given~~ provided a written statement of the charges ~~against him~~ and a public hearing thereon, if ~~he~~ so ~~requests~~ requested.

(f) *Quorum; vote requirements.* (no change in text)

(g) *Procedures.* (no change in text)

SECTION TWO. This Ordinance shall take effect immediately upon its adoption.

PASSED UPON at the first reading of the City Commission, this 16th day of May, 2023.

PASSED UPON at the second and final reading of the City Commission, this 6th day of June, 2023.
