Remarks: Excellent Location, Excellent Condition 5 bedrooms with an in-law suite separate from the other bedrooms. This room is also well suited as an office or flex room. Expansive 27x17 foot eat in modern kitchen with granite counters and a four stool breakfast bar. Featuring a new roof in 2013. In addition to the stated living area you have a glassed in back porch measuring over 300 square feet also with a 2013 Roof. The yard is magnificent with a large circular driveway. In addition there is lots of room to easily park your RV or Boat or both on this property. There is also a flex room that measures 15.2x11.8 located just outside the three bedrooms. If your having difficulty getting financing but your income and job history is strong the seller will consider holding rare owner financing.

Remarks: Huge Tomoka Oaks, golf course, pool home w/In-law suite. There is room to roam and tons of potential in this single story, block home. Just under 4,000 sq.ft. of living. Currently utilized as a 4 bedroom but, could easily be a 5 bedroom. Double entry doors, fireplace, family room and kitchen overlooking the pool area. The in-law suite was added in 2006 and has a sitting area, plus an office. Many closets and storage areas. Updated Electrical and New roof. Electric hurricane shutters. Circular driveway. Beautiful, park like, landscaping and outdoor sitting areas. Short drive to the beach, shopping, restaurants, and banking. This is a must see!

Remarks: This well maintained 4 Bedroom home is located in the beautiful neighborhood of Tomoka Oaks. As you aproach the home you will notice the extra large lot (1/2 acre) with a very long driveway to the oversized side entry garage. The home features a split plan design with a living room, dining room and a family room. The family room has beautiful wood floors and gorgeous, antique stain glass windows across the back of the room and in the doors leading out to the family room from the living room. The master bedroom is generous in size and has double closets. The additional bedrooms and bath are located on the opposite side of the home with plenty of closets including 2 linen closets in the hallway. There is a workshop in the backyard with electric.

Remarks: SHOW STOPPER Standing out amongst the Stately Oaks backdrop, this Florida Contemporary home radiates light and warmth throughout. Greeting you with a circular pavered drive nicely straddling a lusciously landscaped corner. From the tall,vaulted, warm, teak walls and ceilings to the inviting tropical oasis of the enormous private pool... this one of a kind home gives a nod to the 70's, honoring flashes of retro while also splashed with modern cues and palatial entertainment areas. Indulgent? Maybe. Fun? Definitely. Seven sets of wooden French doors lead out to the spectacular brick pavered pool deck featuring a six person gas heated spa, summer kitchen with char-broiler, gas stove, flat grill,ice maker and refrigerator. Abundant seating for 24 outside with cozy stone fireplace.

Remarks: Enjoy beautiful views of the golf course from this very well maintained 3BR/2BTH executive home. Enjoy a cup of coffee or a glass of wine from your private rear patio. There is so much to love about this home! Here is what I love: All the rooms are very spacious. There is no issue with full sized adult furniture in any of the bedrooms or accommodating the whole family in either of the living areas or the formal dining room. The home flows very well from room to room. Perfect for entertaining. The home is concrete block & stucco. No rotten siding to worry about here. The kitchen, family room and master bedrooms all have large windows that offer beautiful views of the golf course. The home has been meticulously maintained and lovingly updated. The kitchen was updated a few years

Remarks: The large front yard and long pavered driveway welcome you to this meticulously maintained brick, golf course home with a brand NEW ROOF. Step inside and you will notice the bright and airy open floorplan. You will love the look and easy to maintain tile that runs throughout the main living space. The updated kitchen is modern and sleek with granite countertops and stainless steel appliances. There is ample cabinet and counter space making meal prep and organization easy. Enjoy a casual meal or breakfast at the long breakfast bar. At the end of a long day take a break and enjoy a good movie in the media room. Just off of the family room is the spacious master bedroom which can easily accommodate a king set. French doors in the family room lead to the extra-large enclosed Florida room.

Remarks: Great home in the heart of Tomoka Oaks and close to everything in Ormond Beach including the worlds most famous Beach. This 4 bedroom 2 1/2 bath sits on a lager lot backing up to the golf course that features large rooms, stone wood burning fireplace, room for that pool table, Terracotta Tile floors, solid wood doors, remolded master bath, solid wood cabinets in kitchen, terrific covered patio featuring grill, wood burning oven, refrigerator and a great back yard. Home has custom ceiling fans, large laundry room, and a expanded 2 car garage with fantastic storage cabinets. All this plus all glass French doors everywhere in the back. Front drive is circular with plenty of parking. This can be a shining star with some polishing up,.

Remarks: Large and impeccably maintained family home centrally located in Tomoka Oaks subdivision. This stately home has so much to offer including two oversized 2-car garages, one being air conditioned. 5 bedrooms, 3 full baths, 2 half baths, crown molding, granite countertops, tall baseboards, coquina fireplace, heated pool and spa, paver driveway and patio are to just name a few. All bedrooms are nicely sized and the master suite is something to see at over 500 square feet in size and the bathroom being completely updated. This home offers a junior master suite with a completely updated en suite bathroom as well. Outdoor living includes a beautiful front porch sitting high on the hill, breezeway with tongue and groove wood ceiling and built in gas fireplace.

Remarks: Plenty of room to stretch out in this 4 bedroom 3 bath home. Overlook the Backyard paradise and pool from the 700sqft covered Patio. Home has a roughly 2 year old Roof and A/C. Two main living areas downstairs and a cozy fireplace. Upstairs has a Large Bonus room over the garage that can be for any number of uses and has its own entrance. Bedrooms are roomy and Master is separate from the others. Home backs up to , what was once a the 9th hole at Tomoka Oaks golf course, but now feels like a wonderful park that you can walk and enjoy. Close to Schools, Shopping and the Highway. All information in MLS is deemed accurate but cannot be guaranteed.

Remarks: INVESTOR ALERT! - Don't miss this huge property with excellent potential for a great return. HOA is voluntary! Permitted Re-Roof in 2008 and HVAC in 2009. Needs updating throughout, but can easily become a 4bd/2ba. Nearly 600sq/ft over-sized garage and plenty of land, for privacy, at over 1/2 acre with mature trees. Main living room is approx 25x25, great for movies or game night. Highly sought after neighborhood, close to everything in Ormond. Feel like you are in the country, but actually minutes from the heart of town. Sold "As-Is". Seller will not make repairs or give closing credits. No FHA/VA unless 203k. Termite Bond maintained since 2010.

Remarks: Welcome to 21 North Saint Andrews Drive!! This Ormond Beach neighborhood was where the original GE Executives built their uniquely designed homes to raise their families and put down their roots. The tradition has carried on generation after generation. Here the soil is turning over once again to open the opportunity for new growth. It is rich and ready for planting seeds for the most beautiful flowers and families. This is only the second family to ever own this home. It has been coveted and beautifully loved and maintained. Its walls tell stories of many happy times with family and friends. The latest improvements will capture most any type of potential homeowner. Featuring four bedrooms, an office by the front door with a

VIA ELECTRONIC MAIL

Doug Thomas, Chairman
Ormond Beach Planning Board
22 South Beach Street
Ormond Beach, Florida 32174

Re: ***Tomoka Reserve – PRD-2022-043***

Dear Chairman Thomas & Planning Board Members:

Our law firm represents Carolyn Davis and a consortium of homeowners within the Tomoka Oaks Country Club Estates subdivision in Ormond Beach, Florida ("Tomoka Oaks"). At its regular meeting on ***Thursday, July 13, 2023***, the Ormond Beach Planning Board ("Planning Board") is scheduled to consider the above-referenced project, which seeks to rezone and convert the existing Tomoka Oaks golf course into 276 single-family residential lots. For the reasons discussed herein, our clients oppose the proposed redevelopment of the golf course property and respectfully request that the Planning Board recommend ***denial*** of the proposed rezoning.

A. General Factual Overview

Briefly stated, in April 2021, Triumph Oaks of Ormond Beach, LLC ("Triumph Oaks"), purchased the Tomoka Oaks Golf & Country Club ("Golf Club") for approximately $2,600,000. Thereafter, Triumph Oaks filed an application with the City of Ormond Beach ("City") seeking to rezone the golf course property to Planned Residential Development (PRD) and redevelop the golf course with 276 single-family residential lots. Based upon such rezoning application and Triumph Oaks' proposed plans to permanently close the Golf Club and convert the golf course into 276 single-family lots, the issue has arisen as to whether the property is restricted to use as a golf course, either expressly or impliedly.

As discussed herein and based upon the historical and recorded documentation relating to Tomoka Oaks, our clients maintain that the Golf Club property is subject to either an express covenant or an implied covenant limiting the use of the property to a golf and country club, golf course, and related recreational uses. Accordingly, our clients assert that the proposal to convert

the Golf Club property into 276 single-family residential lots is not permissible and the requested rezoning should be ***denied***.

B. The Golf Club Restriction

In 1961, the City approved plats for both the Golf Club (f/k/a Sam Snead Golf & Country Club) and Tomoka Oaks Country Club Estates Unit 1.[1] The Plat for Unit 1 of the Tomoka Oaks Country Club Estates subdivision contained 105 residential lots, including approximately 55 residential lots bordering the golf course.[2]

In conjunction with the development of Unit 1 of Tomoka Oaks, the developer recorded "Restrictions Tomoka Oaks Country Club Estates, Unit #1, Ormond Beach, Florida" ("Unit 1 Covenants").[3] Notably, Paragraph 10 of the Unit 1 Covenants states:

> The Grantee [*i.e.*, lot owner] shall automatically become a member of the Tomoka Oaks Homeowners Association, a non-profit corporation comprised of all lot owners in Tomoka Oaks Country Club Estates . . . .

Paragraph 11 of the Unit 1 Covenants expressly prohibited the developer from releasing in whole or in part any restriction or reservation set forth in Paragraph 10.

Thereafter, on or about January 1, 1963, Tomoka Oaks, Inc., entered a 99-year "Lease" with Tomoka Oaks Golf and Country Club, Inc., for the golf course property.[4] Paragraph 3 of the Lease, entitled "Use," provided in pertinent part:

> ***The demised premises shall be used perpetually for a country club and related uses***. . . . ***This provision shall survive the lease*** and be included in any deed but the deed restriction may be waived by a resolution of two-thirds (2/3) of the Board of Directors of the Lessee with the concurrence of two-thirds (2/3) of the members of said Lessee and the concurrence of two-thirds (2/3) of the members of Tomoka Oaks Homeowners Association. . . .[5]

On or about October 30, 1963, Tomoka Oaks Golf and Country Club, Inc., executed a "Surrender of Lease."[6] As noted above, however, the limitation that the subject property be "used perpetually for a country club and related uses" survived the Lease per the express terms of Paragraph 3 therein.

---

1 *See* Book 25, Page 61, Official Records of Volusia County, Florida; *Id*. at Book 25, Page 58.
2 *See id*. at Book 25, Pages 58 and 59.
3 *See id*. at Book 431, Page 32.
4 *See id*. at Book 516, Page 360.
5 *See id*. at Page 362 (emphasis supplied).
6 *See id*. at Book 585, Page 155.

Following the Surrender of Lease, Tomoka Oaks, Inc., conveyed the golf course property to Ralph B. Frederick, Trustee, via Warranty Deed dated December 12, 1963 ("1963 Warranty Deed").[7] Notably, the 1963 Warranty Deed for the golf course property provided in pertinent part:

> ***The above described property shall be used perpetually for purposes of a golf and country club, golf course, and related uses***, and in the event that party of the second part, or its successors in interest, ***fail to utilize said property exclusively as a golf and country club, golf course, and related uses***, and the property not be sold to Tomoka Oaks, Inc., Tomoka Oaks Golf and Country Club, Inc. or Tomoka Oaks Homeowners Association as specified in the preceding paragraph, ***then the above described property shall automatically revert*** to and become the property of party of the first part . . . .
>
> ***The aforesaid reverter clause specified in the last preceding paragraph may be released or modified*** by resolution concurred in by two-thirds of the entire board of directors of Tomoka Oaks, Inc. at any time after ten years after the date of recording of this Deed; provided that if Tomoka Oaks, Inc. shall have disposed of four-fifths (4/5) of the lots in Tomoka Oaks Country Club Estates, then the foregoing right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks Homeowners Association, Inc., to be exercised by resolution of two-thirds (2/3) of the Board of Directors of the Tomoka Oaks Homeowners Association, Inc.[8]

Consistent with the terms of the surrendered Lease, the 1963 Warranty Deed expressly provided that the subject property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." Moreover, while the 1963 Warranty Deed included language and a process for the release or modification of the "reverter clause," there is no language in the 1963 Warranty Deed authorizing the release or modification of the actual restrictive covenant limiting the use of the property to a "golf and country club, golf course, and related uses."

On or about February 18, 1969, Tomoka Oaks, Inc., purported to pass a "Resolution" to effectuate the sale of the golf course property to Ormond Ocean Homes, Inc.[9] Therein, Tomoka Oaks, Inc., purported to "release . . . its right of first refusal" and "further releases the reverter clause contained in [the 1963 Warranty Deed], such release of reverter to become effective December 13, 1973, the release date specified in such reverter clause."[10] Relying upon such Resolution, Tomoka Oaks, Inc., executed a "Release" on or about June 16, 1971, purporting to

---

[7] *See id*. at Book 585, Page 157. At the time of such conveyance, Ralph B. Frederick was also apparently the President of Tomoka Oaks, Inc.

[8] *See id*. at Page 159 (emphasis supplied).

[9] *See id*. at Book 1238, Page 246.

[10] *See id*. at Page 248.

release its "right of first refusal" and the "reverter clause contained in [the 1963 Warranty Deed], such release of reverter to become effective December 13, 1973, the release date specified in such reverter clause."[11]

Based upon the foregoing Resolution and Release, Triumph Oaks and/or its representatives have suggested to the City that the use restriction imposed upon the golf course property is no longer valid or in effect. Our clients maintain that this view is legally flawed and without merit.

As reflected above, the 1963 Lease for the golf course property expressly provided that "[t]he demised premises shall be used perpetually for a country club and related uses" and that such "provision shall survive the lease." Additionally, and consistent with the 1963 Lease, the 1963 Warranty Deed expressly provided that the property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." While the 1963 Lease mentions a process by which such use restriction could potentially be waived, the historical documentation presented to our office does not establish that such process was ever followed – *i.e.*, concurrence of two-thirds of the Lessee and its members and two-thirds of the members of the Tomoka Oaks Homeowners Association.[12]

Further, while the 1963 Warranty Deed included language and a process for the release or modification of the "reverter clause," there is no language in the Warranty Deed authorizing the release or modification of the actual restrictive covenant limiting the use of the property to a "golf and country club, golf course, and related uses." Rather, the 1963 Warranty Deed unambiguously states that the subject property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses."

Lastly, reliance upon the 1969 Resolution and the 1971 Release to claim that the use restriction was somehow waived or released is misplaced. Even assuming the 1969 Resolution and the 1971 Release are valid – which is questionable – neither document purports to release, waive, or otherwise modify the use restriction.[13]

---

[11] *See id*. at Book 1307, Page 89.

[12] The historical documentation provided to our office, including newspaper articles, reflect the existence of a "Tomoka Oaks Homeowners Association" during the subject timeframe.

[13] The 1969 Resolution and the 1971 Release are of questionable validity given that they purport to "prospectively" release the "right of reverter." By its own terms, the 1963 Warranty Deed provided that Tomoka Oaks, Inc., could release or modify the reverter clause only by resolution "at any time ***after*** ten years ***after*** the date of recording of this Deed" and only if Tomoka Oaks, Inc., had not yet disposed of four-fifths (4/5) of the lots in Tomoka Oaks at such time. *See* Book 585, Pages 158-59, Official Records of Volusia County (emphasis supplied). Contrary to the plain language of the 1963 Warranty Deed, Tomoka Oaks, Inc., purported to pass a resolution more than four (4) years ***before*** the ten (10) year anniversary of the recording of the 1963 Warranty Deed seeking to release the right of reverter. Further, the fact that the 1969 Resolution and the 1971 Release purported to "delay" the effectiveness of such release until December 13, 1973 (*i.e.*, ten (10) years after the 1963 Warranty Deed was recorded) is irrelevant. Not only does it ignore the fact that the 1963 Warranty Deed required the resolution itself to occur ten (10) years ***after*** the

As discussed above, the 1969 Resolution and the 1971 Release purport to release the "right of first refusal" and the "reverter clause." Nothing in the express language of the 1969 Resolution or the 1971 Release, however, purports to waive, release, or otherwise modify the use restriction providing that the property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." Accordingly, based upon the foregoing and the plain and unambiguous language in the 1963 Lease and the 1963 Warranty Deed, our clients maintain that such use restriction is valid and effective and was never lawfully released, waived, or otherwise terminated. On this basis alone, the proposed conversion of the golf course into 276 single-family residential lots would be prohibited and the Planning Board should recommend ***denial*** of the proposed rezoning.

C. Implied Restriction Limiting The Tomoka Oaks Property To Use As A Golf Club

In addition to the above, it is well established that a "restrictive covenant" may "arise by implication from the conduct of parties or from the language used in deeds, plats, maps, or general building development plans."[14] In this regard, courts have recognized:

> If there is a common plan of development that places restrictions on property use, then such restrictions may be enforced in equity. "A court's primary interest in equity is to give effect to the actual intent of the grantor . . . by looking not only to language in deeds, but variously to matters extrinsic to related written documents, including conduct, conversation, and correspondence."[15]

Consistent with the above, Florida courts have held that use restrictions may also be implied based upon notations denoted on plats or maps:

> Whenever the owner of a tract of land subdivides the same into lots and blocks, lays off streets and other public ways and designates portions of said lands to be parks[,] playgrounds[,] or similar facilities or uses similar words calculated to encourage prospective purchasers to buy said lots, and actually sells lots with reference to the plat, he becomes bound to his grantees by the plat and the representations thereon. As the maker of the plat and the one who selects the words used thereon it will be construed against him.

---

recording of the Deed, but it ignores the fact that Tomoka Oaks, Inc., did not have any authority to adopt any such resolution if four-fifths (4/5) of the lots in Tomoka Oaks had been disposed of by such time.

[14] *See Skyline Woods Homeowners Ass'n. v. Broekmeier*, 805, 758 N.W.2d 376, 387 (Neb. 2008).

[15] *See id*. (citation omitted); *see also Strader v. Oakley*, 410 So. 2d 954, 955-56 (Fla. 1st DCA 1982) (recognizing implied restriction that limited construction to only single-family residences).

> Common honesty requires that he perform that which at the time of conveyance he represented he would perform.[16]

Turning to the instant case, several courts have examined implied restrictions and the requirement to maintain or operate property as a golf course when developed in conjunction with a surrounding residential subdivision. For example, in *Shalimar Association v. D.O.C. Enterprises*, 688 P.2d 682 (Az. Ct. App. 1984), the court held that there was an implied restrictive covenant to maintain property as a golf course even though there were no express covenants burdening the golf course property on behalf of the adjoining homeowners. The court concluded that the common plan of development, which included a golf course, combined with the representations made to the purchasers about the maintenance of the golf course and the adjoining homeowners' express covenants, created an implied restrictive covenant that the land be used only as a golf course.

Similarly, in *Ute Park Summer Homes Association v. Maxwell Land Grant Co.*, 427 P.2d 249 (N.M. 1967), the New Mexico Supreme Court found that an implied restriction existed requiring the subject property to be used as a golf course. In so doing, the court focused on the representations made to prospective purchasers and the materials used in the sales of the lots which pictured an area marked "golf course." The court reiterated that, when a map or plat showing a park or other open area is used to sell property, "the purchaser acquires a private right, generally referred to as an easement, that such area shall be used in the manner designated," and such private right "is not dependent on a proper making and recording of a plat for purposes of dedication."[17]

Numerous other courts have concluded that the facts surrounding the initial development of properties as golf course communities and the marketing of lots in such communities to prospective purchasers created an "implied restrictive covenant" limiting the use of the subject properties to a golf course. In reaching this conclusion, the courts have examined such things as: (1) the plats, maps, and drawings of the community; (2) advertisements, brochures, and marketing materials; (3) common schemes or plans of development; (4) recorded covenants; (5) general informational documents regarding the community; and (6) lot premiums and purchasers' reliance upon the existence of the golf course in acquiring their lots.[18]

---

[16] *McCorquodale v. Keyton*, 63 So. 2d 906, 910 (Fla. 1953); *see also Boothby v. Gulf Props. of Ala.*, 40 So. 2d 117 (Fla. 1948). A common plan or scheme of development is a well-recognized principle in Florida law. *See Hagan v. Sabal Palms, Inc.*, 186 So. 2d 302, 307 (Fla. 1966).

[17] *Ute Park Summer Homes Association v. Maxwell Land Grant Co.*, 427 P.2d 249, 253 (N.M. 1967).

[18] *See Knight v. City of Albuquerque*, 794 P. 2d 739 (N.M. Ct. App. 2014) (holding property denoted on subdivision plats as a golf course must remain either a golf course or open space, stating "a developer will not be allowed to induce purchasers to buy property by purporting to include open space such as parks or golf course in a subdivision plat, only to subsequently change the uses of those open space areas"); *In re Heatherwood Holdings, LLC v. HGC, Inc.*, 746 F.3d 1206 (11th Cir. 2014) (holding evidence of common scheme of development that included golf course property as an integral part and as an inducement to purchasers of residential lots

Here, the historical documentation relating to Tomoka Oaks and the Golf Club establishes the following: (1) a common developer (Tomoka Oaks, Inc.) with a plan of development for a residential community surrounding an 18-hole championship golf course; (2) an approved unified master plan for Tomoka Oaks, which included the golf course and the residential lots; (3) references to "golf course" on the recorded plats for various portions of Tomoka Oaks; (4) recorded restrictions, as previously discussed, providing that the golf course property shall be used "for purposes of a golf and country club, golf course, and related uses"; (5) recorded residential covenants that reference the golf course and authorize reduced setbacks to take advantage of the adjoining golf course; (6) marketing and sales materials for the residential lots depicting the common development plan, including the golf course; (7) evidence of lot premiums being charged for residential lots with golf course frontage; and (8) evidence that successors developers had actual, as well as constructive, notice of the approved master plan and common plan of development. Additionally, it is indisputable that residents within Tomoka Oaks purchased their properties in reliance upon or because of the Golf Club.

Accordingly, even assuming the express covenant restricting use of the subject property to a golf and country club is no longer valid as Triumph Oaks has erroneously suggested, the above-summarized facts and cited case law would establish that, at a minimum, the use of the Golf Club property is limited to a golf course or similar open space purposes by virtue of an implied restrictive covenant. Simply put, whether by an implied grant, implied restriction, or estoppel, such restriction would prevent the subdivision and development of the Golf Club property with 276 single-family residential lots as currently proposed. Thus, on this additional basis, the Planning Board should recommend ***denial*** of the proposed rezoning.

D. Conclusion

In sum, as discussed herein, nothing in the express language of the 1969 Resolution or the 1971 Release purports to waive, release, or otherwise modify the use restriction imposed via the 1963 Lease and the 1963 Warranty Deed that the property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." Thus, based upon the foregoing and the plain and unambiguous language in the 1963 Lease and the 1963 Warranty Deed that the use

---

therein created an implied restriction limiting the use of such property to a golf course); *Ponderosa Pines Golf Course, LLC v. Ponderosa Pines Prop. Owner's Ass'n*, 2013 WL 4515569 (N.M. Ct. App. 2013) (holding "equitable servitude in favor of the individual subdivision property owners precluded Plaintiff from changing the use of the golf course"); *Skyline Woods Homeowners Ass'n.*, 758 N.W.2d at 390 ("We conclude that homeowners who bought their property relying on the proximity and existence of the golf course should be protected by implied restrictive covenants that the property be maintained as a golf course. We therefore agree with the district court that an implied restrictive covenant requiring that it be used only as a golf course burdens and runs with the golf course property."); *see also Victorville W. Ltd. P'ship v. Inverrary Ass'n*, 226 So. 3d 888 (Fla. 4th DCA 2017) (refusing to cancel golf course covenant even though course had become unprofitable, concluding that "the golf course preserves the character of the community and provides residents with a pleasant view" and, thus, "must be enforced because it remains a 'substantial value to' the surrounding residences").

restriction was to be "perpetual," our clients maintain that such use restriction is still valid and in effect. Accordingly, on this basis alone, our clients respectfully submit that the Planning Board should recommend ***denial*** of the proposed rezoning, which seeks to improperly convert the Golf Club property into 276 single-family residential lots, or otherwise table the matter until such time as a judicial determination is made regarding the continued validity of the express restrictive covenant.

Further, even assuming the express restrictive covenant is no longer valid and in effect, as Triumph Oaks has erroneously suggested, our clients maintain that the Golf Club property is nevertheless subject to an implied restrictive covenant, thereby limiting the use of such property to a golf and country club, golf course, and related recreational uses. On this additional basis, our clients respectfully submit that the Planning Board should recommend ***denial*** of the proposed rezoning or otherwise table the matter until such time as a judicial determination is made regarding such implied restriction.

Our clients appreciate the Planning Board's attention to this matter of great community importance to the residents of Tomoka Oaks and respectfully request that the Planning Board recommend ***denial*** of the proposed rezoning. Please do not hesitate to contact me if you have any questions or need additional information,

Sincerely,

S. Brent Spain

SUBJECT: CONVERSION OF GOLF COURSE TO RESIDENTIAL USES FP CASE #2021_08_03

Dear Mr. Spraker:

I am a professional planner, AICP #051,330. I have been retained by my clients, the TOMOKA OAKS HOMEOWNERS' ASSOCIATION (TOHA), John Power, President, to provide professional land use advice and to appear on their behalf as an expert witness in future hearings concerning the conversion of this 130-acre course, which my clients advise me was designed by the late legendary Sam Snead.

My client group is divided on this matter. While some categorically oppose any and all future residential development on this property, others are willing to consider alternatives. All of them have relied in good faith for decades on the representations of the original developer and the City of Ormond Beach. Their property tax rates have been predicated upon the assumption that they and their successors in interest would continue to enjoy their proximity to an outstanding golf course in a serene and attractive natural setting with a high-quality open space amenity, designed in coordination with their individual properties and the other design components of their subdivision. The purpose of this letter is to open a dialogue with the City of Ormond Beach and the applicant prior to the filing of the anticipated application.

Research performed in preparation for this letter. In preparing this letter, my clients and I have researched the history of the subject property. We have made close reading of the following reports and documents, among others:

- *Daytona Beach News Journal* May 10, 2021 article "Residents riled up over former golf course's fate" by Clayton Park.

- *Ormond Beach Observer* May 21, 2021 article "Developers host first 'pre-neighborhood' meeting for Tomoka Oaks golf course project" by Jarleene Almenas.

- *Ormond Beach Observer* July 22, 2021 article "Early concept: 318 homes on former golf course" by Brian McMillan.

- August 3, 2021 Community Meeting slide presentation.

- Memorandum dated August 30, 2021 from Tom Harowski of TMH Consulting. (Mr. Harowski is a Tomoka Oaks resident and a professional land use planner.)

History of the Course. According to Mr. Park's *News Journal* article, the Tomoka Oaks Golf & Country Club, with its 130-acre course was opened in 1964, and was sold by its original developers in 1979 to Dick Ryals, a local radiologist who owned and managed the course as a family business until 2010. Based upon my conversations with affected Tomoka Oaks neighbors, I concluded that they were generally satisfied with the Ryals family's management of the course. The course was subsequently acquired and managed by Oakland Raiders veteran placekicker Sebastian Janikowski and has since been acquired by an ownership group headed by Ray Barshay and Carl Veile.

Considerations not addressed by the anticipated applicant.

1. The Ormond Beach Land Development Code contains no provisions for regulating the adaptive reuse of former golf courses, and specifically their conversion to residential uses. Some local governments, including Collier County and the City of Bonita Springs in Lee County have adopted ordinances which define a detailed process for conversion of golf courses. The Collier County ordinance was adopted after a study of the challenges of golf course conversion. Both the ordinance and the study may be of value to Ormond Beach in designing its own procedures for golf course conversion.

2. The City of Ormond Beach has the option to impose a moratorium on the conversion of golf course properties to residential uses in order to have time to study the challenge of conversion and its effects on the neighborhood.

Recommended Findings of Fact

The existing golf course was designed by the late Sam Snead. Since it opened in 1964, the course has been a defining feature the Tomoka Oaks neighborhood, providing high quality recreation and open space amenities.

1. The 130-acre golf course was a vital and irreplaceable component of the original Tomoka Oaks development project and has continued to be a vital and irreplaceable component of the neighborhood as it now exists. Tomoka Oaks would be a very different community without this golf course and the open space amenities which it provides.

2. There is a distinction between a freestanding golf course, e. g. a traditional membership country club or a municipal course, and a course that was co-designed as an integral part of a residential development, such as Tomoka Oaks. In such cases, the golf course is an integral part of the entire development, and not a mere amenity, such as a bocce court or a card room. The golf course itself is subject to many constraints which inform the design process—soil types, elevations, species, for example. The golf course is not simply a vacant space which was not considered desirable for residences or ancillary amenities.

3. The residential portions of a golf course development are designed concurrently, and in unity with, those of the course itself, which attracts golfers and prospective lot purchasers and residents, for whom the golf course provides both a recreational and an open space amenity. Golf courses of this sort are designed to maximize the edge that forms the frontier between the residential lots and the course thereby enhancing the premium expected over non-frontage lots.

4. Since 1964, the original residents and their successors and assigns have contributed to the profitability of the original developer and have enriched the City's tax base with their remittances of fees and taxes. They were motivated by their **investment-backed expectations** that a well-managed golf course in the heart of their community would allow them to continue to enjoy Tomoka Oaks as it was originally designed.

5. The anticipated applicant has an existing entitlement on this property which was granted by the City Commission. The City has no obligation to grant any number of additional residential units to replace the golf course.

6. In granting the original development order, the City Commission approved a ratio of residential development to recreation and open space, which has remained in place for more than half a century. The conversion of the golf course, or any portion of it to residential will increase the residential to recreational/ open space ratio accordingly.

7. To the extent that the City of Ormond Beach may consider allowing some residential development within the existing golf course footprint, it is incumbent upon the City's decisionmakers, as its highest priority, to **maintain the open space amenity** which current residents and their predecessors in interest have enjoyed and which has been maintained for them since 1964. This enjoyment can be maintained in part through the use of greenbelts and opaque barriers with a minimum 100 foot width.

8. As an equally high priority to #7 above, the City's decision-makers must assure that any future residential development within the 130-acre footprint of the existing golf course are **compatible** with the existing residential lots and units of the Tomoka Oaks subdivision as defined in Sec. 163.3164(9) of Florida Statutes.[1] To achieve this compatibility, the HOA proposes a minimum 100-foot buffer between the existing homes and the new homes. The HOA further proposes that lots at the perimeter of the project should be larger to match the lot size of the existing homes more closely.

9. As a secondary, but significant, priority in addition to findings # 7 and # 8 above, the City's decision-makers must assure that a significant portion of the 130 acre golf course footprint, be maintained as a **recreational amenity** to serve the needs and preferences of existing and future residents. An example of such facilities would be a par-3 (executive) golf course of 9 or 18 holes. This can be maintained in part through the use of greenbelts and opaque barriers.

10. As a tertiary, but significant, priority in addition to # 7, 8, and 9 above the City's decision-makers must assure that protected species are identified and their habitats placed under conservation easement held by a third party, preferably a not-for-profit land trust.

[1] "(9) 'Compatibility' means a condition in which land uses or conditions can coexist in relative proximity to each other in a stable fashion over time such that no use or condition is unduly negatively impacted directly or indirectly by another use or condition."

11. Open space can be preserved by reducing the Applicant's proposed lot depth of 120 feet was offered as a means of protecting some of the existing tree cover (based on their

12. statement at the "reveal" meeting). Trees preserved on residential lots are at a much higher risk for removal unless some type of special protection is given such as tree protection easements. Reducing lot depth to **110 feet** would provide at least 10 additional feet that could be devoted to buffer area.

13. Existing residential units in the Tomoka Oaks neighborhood tend to exceed 2,000 square feet in conditioned floor area, and many are much larger. The minimum floor area in the 2,000 square foot range with a two-car garage and other items such as porches added to that base, is acceptable for new residential units.

14. The diversity of housing types and designs is key to the aesthetic appearance and curb appeal of Tomoka Oaks. To maintain compatibility with those existing units, the following guidelines should be considered for new residences within the 130-acre footprint of the historic golf course:

    - Limit the width of front facing garages to one-third of the house width unless the garage is set back from the front façade of the house by at least 10 feet. No limit would be imposed on side-entry garages to encourage this style in the neighborhood.

    - Roof lines will be variable using varied roof styles, pitches, projections, gables, dormers and similar design elements so that the new units do not look like the tent designs that seem so popular in newer subdivisions.

    - A limitation on how frequently a floor plan can be repeated along with limits on the exterior design repetition. The front façade should include four to six individual design elements and blank walls should be prohibited. Newer home designs frequently use blank walls or nearly blank walls on the sides of homes. A mixture of one-story and two-story product will be encouraged.

Given the great long term impact of the conversion of longstanding golf course land to residential use, the City's decision makers must make all reasonable efforts to assure that existing residents and property owners have an opportunity to participate in any redesign of the existing golf course property.

My clients and I look forward to working with City staff to assure that any conversion of the golf course property will enhance the aesthetics and lifestyle of this great neighborhood and be a benefit the entire community. I welcome any comments or questions you may have.

Sincerely,

LIESURE AND CONTENTMENT

TOMOKA OAKS

COUNTRY CLUB ESTATES

P.O. BOX 307 ORMOND BEACH, FLORIDA / 677-5931

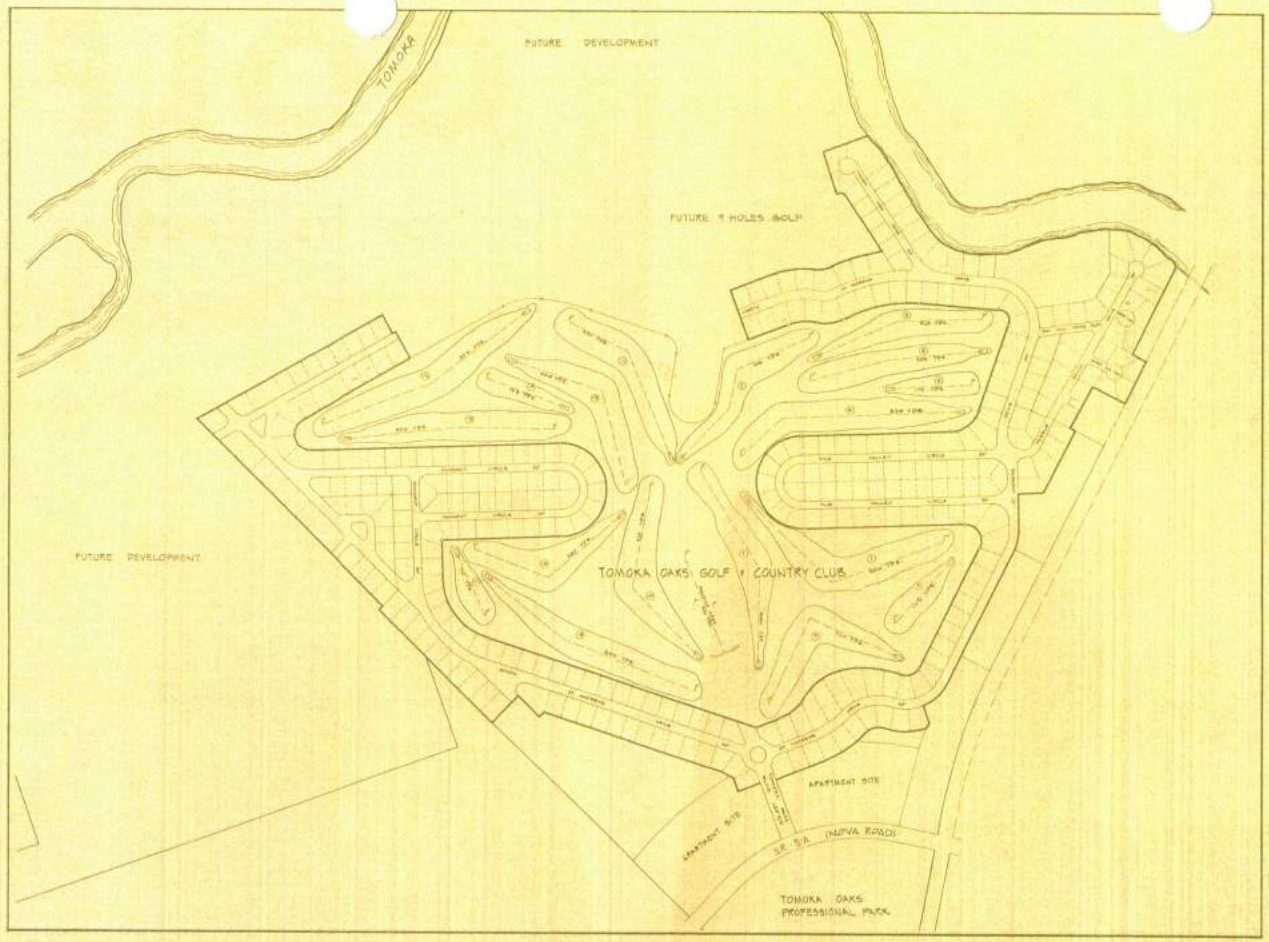
1965

Beautiful Championship Tomoka Oaks Golf Course.

- High, Rolling, Wooded Lots. Up to 40 Feet Elevation.
- Sanitary Sewers.
- Storm Drains.
- Paved Streets.
- City Water.
- Community Fountains and Parks.
- Mail Delivery.
- School Bus.

A planned residential community located in the famous Ormond-Daytona Beach Resort Area for those seeking a true suburban atmosphere with protected property values. Complete facilities nearby: 5 minutes to shopping and churches; 10 minutes to beach, downtown, hospitals and schools.

- Tennis Courts.
- Olympic-size Pool.
- Driving Range.
- Water Skiing.
- Grill and Bar.
- Dining and Dancing.
- Steam Room.
- Boating Marina.
- Fishing Areas.



TOMOKA OAKS

COUNTRY CLUB & ESTATES

FLORIDA'S FINEST RESIDENTIAL LIVING

- Wooded Golf Course Lots
- Lovely Off Course Lots
- High Riverfront Lots
- All City Conveniences
- All Improvements Furnished
- Conceded to be the finest residential area in Northern Florida
- Surrounding the fabulous Tomoka Oaks Country Club
- Some memberships available in the country club
- Your inquiry is solicited
- An established area — with more than 150 lovely homes in the price range of $35,000 to $110,000 in value

Lots available now at Investment Prices

Subject: Tomoka Oaks Golf & Country Club

You asked the following question relative to TOG&CC: must it be maintained exclusively as a golf course? The following documents may be pertinent to any review:

a) Warranty Deed from Milton Pepper to RTH, Inc., dated February 14, 1979 (and recorded at Book 2052, Page 1019, Public records of Volusia County).

b) Any Development Order that may have been issued by the city for the development of the land.

c) Other restrictions place upon the land by virtue of privately recorded instruments of record, including any agreements or covenants between RTH, Inc., and members of TOG&CC.

d) Restrictions in an purchase money note held by any financial lender.

I have only been provided the Warranty Deed to review. An ownership and encumbrance search by a title company could verify the existence or non-existence of other related instruments that may have also been recorded regarding the use and/or any restrictions pertaining to the land.

The Warranty Deed indicates that RTH, Inc., took fee simple title to the land subject to:

a) taxes, easements and restrictions of record. (Comment: a title or ownership & encunbrance search would have to be conducted to make this determination); and

b) Lifetime Membership Agreement dated Ocotber 10, 1972 (recorded at OR Book 1487, Page 629, PRVC) (Comment: I do not have a copy of that instrument and therefore cannot make a determination relative thereto); and

c) Rights or claims to lifetime memberships of R.W. McFall, Richard I. Shelter, George L. Haller, and James P. Callahan and respective spouses. (Comment: I do not know whether or not any of these people may have an interest such that TOG&CC must be maintained exclusively as a golf course); and

d) Rights of members of TOG&CC. (Comment: I do not know whether or not there is a membership agreement that may (or may not) contain use restrictions); and

e) A reverted clause during the term of the purchase money note, which provides as follows: *"During the term of the purchase money note and wrap around mortgage executed of even date herewith by grantee to grantor, or for a period of 18 years in the event the said mortgage is prepaid in full, the above described property* ***shall revert to grantor upon the condition that any portion of said property is used for any purpose other than a golf course with club house and appurtenant amenities."***

(Comment: In the event the land was used for anything other than a golf course with country club and amenities during the prescribed period, the land would revert back to the grantor as stated in the **bold print** language.

The underlined language indicates there was a "reverter" clause, and that it was effective during the term of the mortgage or for a period of 18 years in the event the mortgage is paid off. Eighteen (18) years has certainly transpired since the date of the Warranty Deed (and deed indicates the mortgage was executed on the same date as the deed was executed), so one might assume that the reverter clause is no longer in effect. I would likewise assume that the mortgage has since been paid off, but I have not been provided any documents to verify that one

8/11/2005

Per Carolyn Davis - I submitted a Public Records Request for the complete 2 page email, but I was informed emails are deleted after 3 years.

Attachment J

Mayor Costello stated whatever name was attached, be it a ditch or tributary, what was important was that this project can not stop water flowing onto the land. He asked if the height of the fence would be at a low point compared to the road.

Mr. Ervin stated the maximum height of the fence would be six feet along the property line. He explained the industrial parcel closest to US1 would have an extensive amount of fill and would be four feet higher at a finished floor elevation than the homes in Ormond Lakes, and the project would have a six foot wall at that location along with landscaping with the finished grade approximately two to three feet below the top of the wall. Mr. Ervin recommended a condition be added to correlate the fencing to the elevation of the roadway.

Mayor Costello advised it was very dark in front of the McDonalds west of I-95 where the lights were shielded, but was very bright after passing the screening which proved the screening does work well.

Commissioner Kelley moved, seconded by Commissioner Gillooly, to approve Resolution No. 2006-222, approving the Special Exception to include the indoor pool as presented and the wall height to extend six feet above the elevation of a road entering or surrounding the property.

Call Vote:

Commissioner Kelley	yes
Commissioner Partington	yes
Commissioner Gillooly	yes
Commissioner Kent	yes
Mayor Costello	yes

Carried.

Mayor Costello called for a short break at 9:30 p.m. and he reconvened the meeting at 9:37 p.m.

Hearing no objection, Mayor Costello closed the public hearing on Item #9(E).

Item #9(F) - "Ormond Beach Commercial Complex"

RESOLUTION NO. 2006-223

A RESOLUTION AUTHORIZING THE EXECUTION AND ISSUANCE OF A DEVELOPMENT ORDER FOR "ORMOND BEACH COMMERCIAL COMPLEX" SPECIAL EXCEPTION ON A SITE LOCATED AT 500 WEST GRANADA BOULEVARD WITHIN THE B-9 (BOULEVARD) ZONING DISTRICT; BY AUTHORIZING A WAIVER OF THE MASONRY BUFFER WALL REQUIREMENTS ALONG THE REAR PROPERTY LINE, BY ALLOWING THE USE OF AN EXISTING SIX FOOT HIGH WOOD FENCE IN LIEU THEREOF; ESTABLISHING CONDITIONS AND EXPIRATIONS OF APPROVAL; AND SETTING FORTH AN EFFECTIVE DATE.

Commissioner Kelley moved, seconded by Commissioner Partington, to approve Resolution No. 2006-223, as read by title only.

Call Vote:

Commissioner Partington	yes
Commissioner Gillooly	yes
Commissioner Kent	yes
Commissioner Kelley	yes
Mayor Costello	yes

Carried.

Hearing no objection, Mayor Costello closed the public hearing on Item #9(F).

Item #9(G) – "The Tomoka Oaks Golf Village"

ORDINANCE NO. 2006-17

AN ORDINANCE AMENDING SUBSECTION A, ZONING MAP, OF SECTION 2-03, OFFICIAL ZONING MAP AND ZONING DISTRICT, OF CHAPTER 1, ARTICLE II, ESTABLISHMENT OF ZONING DISTRICTS AND OFFICIAL ZONING MAP, OF THE LAND DEVELOPMENT CODE, BY AMENDING THE OFFICIAL ZONING MAP TO REZONE A 147-ACRE PARCEL OF REAL PROPERTY FROM R-2 (SINGLE-FAMILY LOW DENSITY) TO PRD (PLANNED RESIDENTIAL DEVELOPMENT), SAID REAL

PROPERTY BEING LOCATED WITHIN THE LIMITS OF THE EXISTING TOMOKA OAKS GOLF COURSE; ESTABLISHING BOUNDARIES; AUTHORIZING REVISION OF THE OFFICIAL ZONING MAP; APPROVING A DEVELOPMENT ORDER FOR "THE TOMOKA OAKS GOLF VILLAGE" PLANNED RESIDENTIAL DEVELOPMENT (PRD); REPEALING ALL ORDINANCES AND PARTS THEREOF; AND SETTING FORTH AN EFFECTIVE DATE.

Mr. Ervin stated this was a rezoning for a 147 acre parcel from R-2 to Planned Residential Development (PRD). He noted there was a revised development order on the dais that identified the three items from the Planning Board recommendation that could be incorporated into the final development order. Mr. Ervin pointed out many comments from the Planning Board were recommendations for staff to check certain items such as water pressure and landscaping; therefore, they could not be identified in the development order; but the City Attorney culled through those comments to come up with specific requirements that could be incorporated into the development order, and they were addressed by staff. He stated the reuse availability, which was a major capital undertaking, was not feasible at this time. Mr. Ervin reported the landscaping plan was reviewed, and many of the trees being planted were already above and beyond the minimum requirement. He stated traffic improvements would be incorporated into site plan, and the applicant had agreed to those improvements. Mr. Ervin noted these improvements would include striping, signage, and cautionary signage. He advised staff contacted the Utilities Department regarding water presser concerns at least three times to verify whether or not water pressure problems were being experienced in the Tomoka Oaks area; but the pressures were meeting minimum requirements, and no specific problems were identified. Mr. Ervin stated there would not be any dead-end systems and would actually loop back into the existing system; therefore, water pressure should be maintained.

Mr. Ervin advised the development order would include notification to purchasers by a note on the plat that they were within proximity of the airport and within the flight plan of the airport. He stated the golf course shall remain a golf course and would not be able to be converted to any other use without approval by the City Commission. Mr. Ervin reiterated this property was Low Density Residential with an R-2 zoning; therefore, a developer could, in theory, develop the entire golf course for 600 homes, but considering the contours 300 single-family homes would be more realistic. He explained the proposal was for multi-family homes consisting of three and four story condominiums, town homes, and three single-family homes.

Mr. Rob Merrell, 1638 John Anderson Drive, representing the applicant, provided a visual presentation of the project. He reported he would rely on Mr. Ervin's conclusions in his staff report concerning Comprehensive Plan consistency, compliance with all of the City's Land Development Code requirements, and other issues. Mr. Merrell pointed out the Planning Board recommended unanimous approval with conditions that they have accepted. He stated there were issues everyone agreed on regarding some Smart Growth principles, and this project represented some of those principles such as the concept of urban renewal, proximity to services, clustering development, and the preservation of open space. Mr. Merrell explained this project was for 122 residential units, a new club house, pro shop, tennis center, tennis courts, and many amenities. He stated the property owner made a concession to cluster a lower number of units that would allow a great deal of open space. Mr. Merrell reported there would be a total of 84 condominium units, 35 townhouse units, and three residential units. He presented a computer rendering of the development proposed superimposed on the aerial photograph and pointed out the various elements of the proposed plan along with renderings of the buildings and landscaping. Mr. Merrell reported there would be considerable improvements to the lake system and the green for the golf course as a result of retrofitting the golf course for reuse water. He advised this request was for a planned redevelopment rezoning.

Mr. Harry Wendelstedt, 88 South St. Andrews, stated he has been a resident of Tomoka Oaks for 35 years, which was one of the finest residential developments in Volusia County. He stated he believed this would adversely affect the residents who live along the golf course. Mr. Wendelstedt reported people were told when purchasing their property that this golf course would remain for 99 years. He expressed a concern regarding property values; however, he has been informed that should not be a concern. Mr. Wendelstedt stated Tomoka Boulevard was two lanes, and he expressed concern regarding what would happen should another natural disaster occur such as the fires of 1998. He recommended placing a traffic light at the end of Tomoka Boulevard and Nova Road. Mr. Wendelstedt noted residents may have had a different view if the renderings and information were made available to the people earlier than this evening. He stated he opposed the development because the homeowners would loose the site of the rolling green fairways.

Ms. Joan Deemer, 86 South St. Andrews Drive, stated she lived in Tomoka Oaks for 28 years and opposed the recommended changes. She expressed concern that this would adversely affect the area with too many people and too many cars taking away the charm of Tomoka Oaks.

Ms. Zella Wilen, 48 Oakmont Circle, stated in the Fall of 1970 a request to rezone this property to R-5 was rejected at the Planning Board and in October 6, 1970, the Land Use Map was adopted by the Commission and that map showed Tomoka Oaks, including the golf course and undeveloped wooded areas, to be Single-family Residential Low Density zoned R-2, making Tomoka Oaks some of the largest lots in Ormond Beach. She reported that at the recent Planning Board meeting she objected to the entire rezoning change, stating Tomoka Oaks Boulevard should not be approved for an extension or a connection to any planned or named street within this area. Ms. Wilen voiced an objection to any overnight lodging should that be considered. She stated she opposed the increased traffic through Tomoka Oaks to the South St. Andrews area and noted this would add additional traffic to the Trails as well. Ms. Wilen reported the City Attorney in 1970 talked about spot zoning, cautioning the Planning Board that the golf course was a conditional use and would be able to request certain updating and remodeling, and that statement was relevant today. She noted restrooms were a problem due to vandalism, but were needed. Ms. Wilen pointed out the club house and garage areas could have been upgraded at any time in the past 36 years. She reported this change would impact the entire Tomoka Oaks area, not only those living on the golf course or within the 300 foot notification area. Ms. Wilen equated the 1970 R-5 request to this PRD request and opposed the change. She advised part of the selling point for homes in this area was that this would remain a golf course for 99 years, and she urged the zoning remain the same and the project be stopped.

Mr. Rob Merrell stated the property owner made a commitment to maintain the open space of the golf course in perpetuity. He pointed out the entire property was currently zoned for home sites; however, the development order under this proposal would indicate that the golf course would remain open space, and the City would then be able to enforce that as an element of the development order. Mr. Merrell reported speakers mentioned a 99-year provision, but there was no such covenant; however, this proposal would include a commitment to cluster 122 units in areas designed to be the least intrusive along with a recorded covenant to keep the golf course.

Mr. Hayes concurred that there was no covenant of record regarding the golf course; therefore, the applicant had a right to request this redevelopment of the Commission. He noted the City could now go back to try to do what some of the homeowners believed they already had for some 30 years.

Mr. Merrell advised the Commission received a complete traffic report in their information packet, and no failures in the transportation network were found, but several improvements were being proposed. He reported he met with as many people as possible prior to this meeting. Mr. Merrell advised that many people saw the pictures in advance of the Planning Board meeting, and there was a full-house at the Planning Board meeting. He noted many of those people did not come to make an objection tonight because they went away from the meeting satisfied that their questions and concerns were answered. He reported a DOT warrant would be needed for a traffic light, but the requirements for a light would not nearly be met. Mr. Merrell stated this was very different from what occurred in the 1970s because what was being shown now was what would occur if approved by the Commission, and it could not be changed.

Commissioner Kelley moved, seconded by Commissioner Partington, to approve Ordinance No. 2006-17, on first reading, as read by title only.

Commissioner Kent reported he met with the developers a year ago, and the plans had not changed a great deal. He expressed concern regarding buffering for the current residents; however, the presentation showed this was addressed, and he could support this proposal.

Commissioner Gillooly stated the concept had merit, but she questioned what protection the people who purchased a home on a golf course would have. She noted people needed to be aware when purchasing a home what could occur to the property surrounding their home. Commissioner Gillooly pointed out nothing was uncovered that would protect the people to have this remain a golf course. She stated Tomoka Oaks was and remains a premier community in the City, but the golf course had not keep up to that premier status. Commissioner Gillooly suggested this development would bring in new residents, but at a greatly reduced rate than was permitted. She noted the design was thoughtful in that it kept the buffer, and the improvements may help bring the premier status back to the homes, increasing the value of the

existing homes. Commissioner Gillooly informed Mr. Merrell that she would like to assure the residents this would be the last residential plan for the Tomoka Oaks community. She advised she also told Mr. Merrell that she noted the developer planned the project with surrounding green space and improvements to the golf course, but she needed additional assurances that this would remain intact. Commissioner Gillooly reported the reply she received was an iron clad commitment. She stated the developer had a right to develop this property in a residential manner, and all of the above-noted improvements would to be made, which would make the overall project better.

Commissioner Partington advised he met with the developer last year and would vote for this for some of the same reasons as Commissioner Kent and Commissioner Gillooly previously mentioned. He noted this project would improve the entire subdivision, and this development set the standard for developments in other areas. Commissioner Partington reported he was comfortable this developer would make this project as high a quality, if not a higher quality, than he had done previously.

Commissioner Kelley reported he also met with the developer and saw a presentation last year. He stated this answered many questions; and while it would not answer the questions of those who want the land to stay exactly as it was, it did answer the question of whether there would be residential buildings constructed directly behind someone who now had a golf course view. Commissioner Kelley advised the placement of the development would not adversely impact the visual effect. He pointed out this would provide assurance that this would never come back to an R-2, R-3, or R-4 and would be dedicated. Commissioner Kelley reported the owner had prospective buyers come to him years ago to develop the property, but chose not to sell because he wanted to keep the golf course. He advised the proposal would only improve the value of all of the property in the area. Commissioner Kelley stated he shared a concern relative to the traffic, but was convinced the people would not come through the Trails because it would be faster to go to Nova Road and turn west to Clyde Morris Boulevard. He noted the only difficulty he could envision was the time it would take to exit on to Nova Road, particularly eastbound. Commissioner Kelley reported this project would be an improvement to the entire neighborhood, and it would assure the golf course would remain.

Mayor Costello reported he met with the developer a year ago, and the reality of the situation was that this was a residential piece of land that could hold 600 units and could realistically only hold 300 units without a golf course, but this proposal was for 122 homes with a golf course. He stated the choice was that in order to keep the golf course, the owner would have to make some money. Mayor Costello explained the alternative was, because the land was poorly permitted years ago, a developer had the right to construct 300 single-family homes and remove the golf course. He pointed out that in this development order the only thing permissible was the golf course open space. Mayor Costello recommended the developer set aside the finances for a traffic light even if it was not warranted at this point in that he believed traffic to be a valid concern. He asked if DOT would permit a light if the money was available.

Mr. Sans Lassiter, Traffic Engineer, replied if a traffic light was installed that does not meet the DOT warrants and an accident was caused by the fact the signal was installed, it would make the one installing the light liable. He explained traffic lights are a major liability issue because they increase rear end accidents and are meant to avoid right angle accidents which are more severe. Mr. Lassiter advised that due to this particular entrance on this particular road, most of the turns from Nova Road would be northbound left turns entering the parcel and most exiting from this project would be eastbound or outbound right turns, and those movements do not conflict with each other; therefore, this would not meet DOT's requirement for a traffic signal, and they would not allow it to be installed without a significant change in development such as a build-out of area. He reported the count at the peak hours did not meet the warrant, and the requirement was to meet eight hours to warrant a signal.

Mayor Costello stated the City had hired Mr. Lassiter on numerous occasions, and he was known to be honorable and would not state anything that could later be refuted. He assured Ms. Wilen the plan did not include any hotel/motel type proposal.

Call Vote:

Commissioner Gillooly	yes
Commissioner Kent	yes
Commissioner Kelley	yes
Commissioner Partington	yes
Mayor Costello	yes

Carried.

Hearing no objection, Mayor Costello closed the public hearing on Item #9(G).

Attachment K

businesses along A1A were permitted to have pole signs. He pointed out this was an older building with an architectural design that was somewhat limiting to allow for horizontal signs at or below 20 feet, and staff was trying to follow what was done previously at the other two sites referenced.

Commissioner Gillooly stated Commissioner Partington received an e-mail today questioning the fairness on how the Commission judged special exceptions. She requested Mr. Ervin explain what constituted a special exception.

Mr. Ervin stated the Land Development Code was specifically amended for this particular situation. He explained in the mid 1990s there was a prohibition of all signs over 20 feet, and Peninsula Hospital indicated they could not get a 20-foot sign, but it was imperative to have a sign. Mr. Ervin reported that rather than going through a variance procedure, the Planning Board recommendation was to make a special exception for applicants to go through a public hearing process at the Development Review Board and at the City Commission level. He pointed out that the concept behind a special exception was what was being requested may not work everywhere in the district but may be appropriate in certain locations. Mr. Ervin reported this was regulatory relief granted toward existing structures built along the beachfront and in the hospital zoning districts because it would deal with more institutional buildings that would typically be taller and did not have the architecture to support typical signage.

Mayor Costello asked why the parrot had to be removed from the hotel but this could stay.

Mr. Ervin stated this would meet the sign area requirements while the parrot exceeded the size limitation, and the parrot was considered a graphic representation used for commercial free speech; therefore, interpreted as a sign. He noted there was also a prohibition against murals.

Mayor Costello reported he worked hard to keep the parrot, and he did not understand why this was recommended for approval while the parrot had to be removed.

Commissioner Partington stated he also appreciated the pole sign on A1A. He summarized that Mr. Ervin was indicating that in order to be consistent with what was previously approved staff was recommending this be approved. Commissioner Partington noted he considered that to be an important factor.

Commissioner Kelley stated there was a very clear difference that the Development Review Board considered and assessed incorrectly which was that a special exception was granted to B-7 for a Planned Business Development (PBD). He pointed out the hospital had no place for a sign, but this applicant did have a place for a sign. Commissioner Kelley reported the sign would not be obtrusive, but the exception granted was meant to apply in those situations where there was no place for a sign, which was not the case in this instance; therefore, he would vote against this request.

Call Vote:

Commissioner Partington	yes
Commissioner Gillooly	no
Commissioner Kent	no
Commissioner Kelley	no
Mayor Costello	no

Failed.

Hearing no objection, Mayor Costello closed the public hearing on Item #9(A).

Item #9(B) - "The Tomoka Oaks Golf Village"

ORDINANCE NO. 2006-17

AN ORDINANCE AMENDING SUBSECTION A, ZONING MAP, OF SECTION 2-03, OFFICIAL ZONING MAP AND ZONING DISTRICT, OF CHAPTER 2, ARTICLE I, ESTABLISHMENT OF ZONING DISTRICTS AND OFFICIAL ZONING MAP, OF THE LAND DEVELOPMENT CODE, BY AMENDING THE OFFICIAL ZONING MAP TO REZONE A 147-ACRE PARCEL OF REAL PROPERTY FROM R-2 (SINGLE-FAMILY LOW DENSITY) TO PRD (PLANNED RESIDENTIAL DEVELOPMENT), SAID REAL PROPERTY BEING LOCATED WITHIN THE LIMITS OF THE EXISTING TOMOKA OAKS GOLF COURSE; ESTABLISHING BOUNDARIES; AUTHORIZING REVISION OF THE OFFICIAL ZONING MAP; APPROVING A DEVELOPMENT ORDER FOR "THE TOMOKA OAKS GOLF VILLAGE" PLANNED RESIDENTIAL DEVELOPMENT (PRD); REPEALING ALL

INCONSISTENT ORDINANCES AND PARTS THEREOF; AND SETTING FORTH AN EFFECTIVE DATE.

Commissioner Kelley moved, seconded by Commissioner Partington, to approve Ordinance No. 2006-17, on second reading, as read by title only.

Item #11(A) - Signage for Professional Office Uses in the Greenbelt Overlay District

ORDINANCE NO. 2006-19

AN ORDINANCE AMENDING CHAPTER 3, PERFORMANCE CRITERIA, ARTICLE IV, SIGN REGULATIONS, SECTION 3-48, SPECIALIZED SIGN STANDARDS, OF THE *LAND DEVELOPMENT CODE* BY ALLOWING FOR ADDITIONAL SIGNAGE FOR PROFESSIONAL OFFICE USES IN THE GREENBELT OVERLAY DISTRICT, SUBJECT TO MINIMUM CRITERIA; REPEALING ALL INCONSISTENT ORDINANCES OR PARTS THEREOF; PROVIDING FOR SEVERABILITY; AND SETTING FORTH AN EFFECTIVE DATE.

Mr. Ervin stated this was an administratively initiated amendment to the Land Development Code to address a concern identified to the Commission from a local land developer. He reported there was a concern that the current land development regulations do not provide enough sign flexibility for larger office complexes located along the major thoroughfares of Granada Boulevard, Clyde Morris Boulevard, Williamson Boulevard and Hand Avenue. Mr. Ervin noted staff had been in discussion with this developer to determine what options were available in that there were no sign variances for new construction, so developers have two options: rezone their property to PBD where they would have some flexibility or to go forward with straight zoning and comply with the minimum established standards. He explained the current minimum standards call for monument signage, and the size of the sign would be based on the frontage of the property with a maximum number of six tenant panels in addition to the name of the facility. Mr. Ervin reported the applicant was concerned this was not meeting the needs of today's real estate market and identified that the purchasers need additional signage. He noted staff had some concerns relative to applying the regulations City-wide. Mr. Ervin pointed out staff was not indicating the proposal was unattractive, and the applicant did point out

Steven – for the reasons described below, there is no covenant requiring the golf course to be used in perpetuity.

From: McKee, Scott <Scott.McKee@ormondbeach.org>

To: Hayes, Randy <Randy.Hayes@ormondbeach.org>
Subject: Tomoka Oaks- Historical Recorded Documents

Randy,

As I mentioned earlier, I reviewed the public record archives pertaining to the Tomoka Oaks golf course, specifically as to the issue whether there were any recorded documents containing language that the property was "to be used as a golf course in perpetuity". I searched for any covenants/restrictions that would include such language. There was a document recorded at Book 431, beginning at page 32, titled "Restrictions", which was applicable to Tomoka Oaks Country Club Estates, Unit #1, and provided restrictions regarding the use of the residential properties by the individual homeowners,(i.e., such as only using the property for residential use, only buildings for private dwellings, no animals except for domestic animals, etc.) but the restrictions contained no such language pertaining to the use of the golf course property in perpetuity.

I was able however, to locate a document containing the language restricting the use in perpetuity as a golf club, as referenced in the detailed packet of materials containing the history of the development provided to planning staff by Carolyn Davis. The referenced clause is in a warranty deed executed in December of 1963, which conveyed the property from Tomoka Oaks, Inc., to an individual, Ralph Frederick, trustee. This 1963 warranty deed contained three paragraphs of notable interest. The first paragraph contained a right of refusal for Tomoka Oaks, Inc. to re-purchase the property in the event Mr. Frederick decided to sell the golf course. The second paragraph contained the referenced language that the property shall be used as a golf and country club, golf course, or related use, in perpetuity, or revert back to the seller. The third paragraph contained express conditions and provided a mechanism to release or modify the express conditions. Subsequent recorded documents including a corporate resolution adopted by the Tomoka Oaks, Inc. board of directors in 1969, and a release, recorded in 1971, were located that indicate the parties were released from the conditions of the 1963 warranty deed, which shall be discussed in detail below.

As a brief history, during the early development of the Tomoka Oaks subdivision, the golf course property was owned by Tomoka Oaks, Inc., a Florida corporation, and was initially leased in January of 1963 to Tomoka Oaks Golf and Country Club Inc., a non-profit, for a term of 99 years. For whatever reason, the lease was surrendered in October of the same year, and the golf course property was sold in December by Tomoka Oaks, Inc., to Ralph Frederick, Trustee. The golf course property was conveyed by warranty deed for consideration, executed on December 12, 1963, and recorded in the public records of Volusia County on December 13, 1963, at Book 585 beginning on page 157. As previously mentioned the warranty deed contained; 1) a right of first refusal in the event Mr. Frederick decided to sell the golf course property and received a good faith offer; 2) a reverter clause that the property would be used as a golf and country club, golf course, and related use in perpetuity; and 3) a paragraph expressing conditions of the right of first refusal and providing

a provision to allow the parties a release of the reverter clause if express conditions were met.

1963 Warranty Deed Conditions

Language of Right of First Refusal

The warranty deed executed on December 12, 1963 contained the following language, giving Tomoka Oaks, Inc., the right of first refusal to re-purchase the property should the grantee (party of second part) ever decide to sell the property and get a good faith offer.

> "*This conveyance is subject to the express conditions that should party of the second part (grantee), or his successors in interest, desire to sell or convey the above described property to any person, firm or corporation other that a subsidiary of party of the second part, any good faith offer acceptable to such owner must be referred to party of the first part (grantor) for its acceptance or rejection for a period of thirty days, and in the event of its rejection or failure to accept such offer, said offer shall then be presented to Tomoka Oaks Golf and Country Club, Inc., a Florida non-profit corporation, for its acceptance or rejection for a period of thirty days, such acceptance or rejection to be subject to the approval of party of first part (grantor). Such right to accept or reject said offer is transferable and may be transferred by either party of the first part or Tomoka Golf and Country Club, Inc. to the Tomoka Oaks Homeowners Association within said thirty day period and must be acted upon within said period*."

Language of Reverter Clause

The second condition in the 1963 warranty deed contained a condition that the property shall be used as a golf and country club, golf course and related uses by the grantee or its successors in interest or revert back to the seller. The language of the reverter clause is as follows:

> "*The above described property shall be used perpetually for purposes of a golf and country club, golf course, and related uses, and in the event that party of second part, or its successors in interest, fail to utilize said property exclusively as a golf and country club, golf course, and related uses, and the property not be sold to Tomoka Oaks Homeowners Association as specified in the preceding paragraph, then the above described property shall automatically revert to and become the property of the first part, and all rights therein of party of the second part, or its successors in interest, shall immediately terminate unless party of the second part, or its successors in interest, shall within ninety days after the day of mailing to said party of the second part, or its successors in interest, at is last known address by certified mail, by Tomoka Oaks Inc., or Tomok Oaks Homeowners Association, a written notice to utilize said property as a gold and country club, golf course, and related uses, complies with said reverter clause and continues to use said property as a golf and country club, golf course, and related uses.*"

Release of Modification of the Reverter Clause

The paragraph immediately following the reverter clause in the warranty deed allows the parties to be released from the reverter clause provided express conditions are met. The language is as follows:

> "The aforementioned reverter clause specified in the last preceding paragraph may be released or modified b resolution concurred in by two-thirds of the entire board of directors of Tomoka Oaks, Inc. at any time after ten years after the date of recording of this Deed; provided that if Tomok Oaks, Inc. shall have disposed of four-fifths (4/5) of the lots in

Tomoka Oaks Country Club Estates, then the foregoing right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks Homeowners Association, Inc., to be exercised by resolution of two-thirds (2/3) of the Board of Directors of the Tomoka Oaks Homeowners Association, Inc."

1969 Corporate Resolution and 1971 Release

A few years after the golf course property was conveyed from Tomoka Oaks, Inc. to Ralph Frederick, a sale of the golf course was pending to the entity, Ormond Ocean Homes, Inc. On February 18, 1969, the board of directors for Tomoka Oaks, Inc., held a special meeting and adopted a corporate resolution, by unanimous vote, which recited the reservations and restrictions contained in the December 1963 warranty deed, specifically the right of first refusal and the reverter clause. The resolution stated, "*it is within knowledge of Tomoka Oaks, Inc. at this time that the above described golf course property is under contract for sale to Ormond Ocean Homes, Inc., and Tomoka Oaks, Inc. has rejected its right to purchase said property and is agreeable to the said sale to Ormond Ocean Homes, Inc., and Tomoka Oaks, Inc. has not transferred the right to accept or reject said offer, and whereas, Tocc, Inc., the present owner of the aforesaid property, had requested Tomoka Oaks, Inc. to formalize its consent to the sale of the above described property to Ormond Ocean Homes, Inc., and Tocc, Inc., with the understanding that Tomoka Oaks, Inc. intends to liquidate and dissolve, has also requested Tomoka Oaks, Inc. to release forever its right of first refusal set forth in the aforesaid deed of conveyance and to also release the reverter clause contained in said deed, the release of the reverter clause to become effective December 13, 1973, the release specified in such reverter clause*." The corporate resolution adopted by the board of directors for Tomoka Oaks, Inc., was recorded in the public records of Volusia County October 22, 1970, at Book 1238, page 246. It is important to note that this resolution was adopted by the board of directors unanimously, and the date the release of the reverter clause was to become effective, December 13, 1973. As the warranty deed provided the reverter clause could be modified or released by a two-thirds vote by the board of directors *at any time after 10 years of the date of recording of the deed* (which was December 13, 1963). It appears the conditions were met. On June 16, 1971, a Release was filed in the public records of Volusia County at Book 1307, page 89, which acknowledged the corporate resolution adopted by the board of directors and recorded in the public records, further releasing the reverter clause contained in the 1963 deed, becoming effective December 13, 1973, the release date specified in the reverter clause, and stating the release is given for good and valuable consideration. In summary, the records confirm the existence of a document recorded in the public records that provided the property be used for purposes of a golf course in perpetuity. In this case, the document was not contained covenants and restrictions provided by a homeowners' association, but rather in a warranty deed, and as stated previously, subsequent records confirm the reverter clause containing the language was properly released by a recorded corporate resolution and release, and therefore no longer valid. I have attached and combined the three referenced documents as a scanned PDF, and highlighted key provisions for your review.

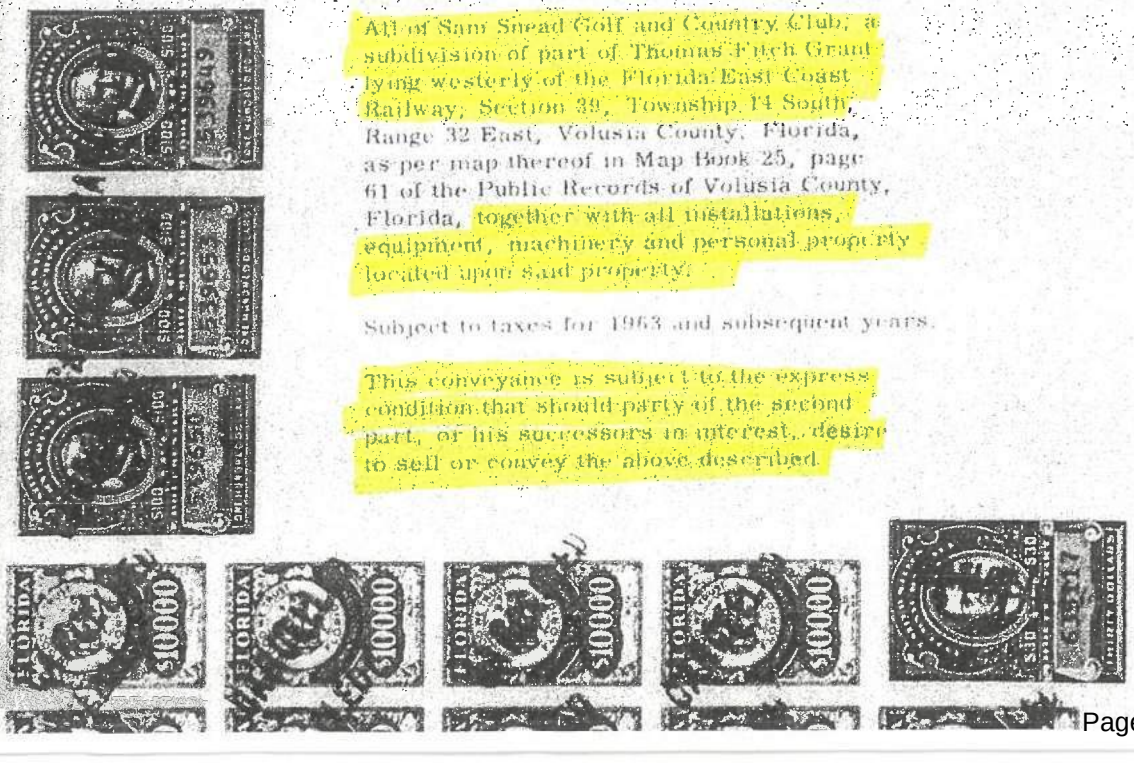
WARRANTY DEED



THIS INDENTURE made this 12th day of December, A. D., 1963, between TOMOKA OAKS, INC., a corporation existing under the laws of the State of Florida, having its principal place of business in the County of Volusia and State of Florida, party of the first part, and RALPH R. FREDERICK, TRUSTEE, of 945 John Anderson Drive, Ormond Beach, County of Volusia and State of Florida, party of the second part.

WITNESSETH: That the said party of the first part, for and in consideration of the sum of Ten Dollars ($10.00) to it in hand paid by the said party of the second part, the receipt whereof is hereby acknowledged, has granted, bargained and sold to the said party of the second part, his heirs and assigns forever, the following described land situate, lying and being in the County of Volusia and State of Florida, to-wit:

All of Sam Snead Golf and Country Club, a subdivision of part of Thomas Fitch Grant lying westerly of the Florida East Coast Railway, Section 39, Township 14 South, Range 32 East, Volusia County, Florida, as per map thereof in Map Book 25, page 61 of the Public Records of Volusia County, Florida, together with all installations, equipment, machinery and personal property located upon said property.

Subject to taxes for 1963 and subsequent years.

This conveyance is subject to the express condition that should party of the second part, or his successors in interest, desire to sell or convey the above described

property to any person, firm or corporation other than a subsidiary of party of the second part, any good faith offer acceptable to such owner must be referred to party of the first part for its acceptance or rejection for a period of thirty days, and in the event of its rejection or failure to accept such offer, said offer shall then be presented to Tomoka Oaks Golf and Country Club, Inc., a Florida non-profit corporation, for its acceptance or rejection for a period of thirty days, such acceptance or rejection to be subject to the approval of party of the first part. Such right to accept or reject said offer is transferable and may be transferred by either party of the first part or Tomoka Oaks Golf and Country Club, Inc. to the Tomoka Oaks Homeowners Association within said thirty day period and must be acted upon within said period.

The above described property shall be used perpetually for purposes of a golf and country club, golf course, and related uses, and in the event that party of the second part, or its successors in interest, fail to utilize said property exclusively as a golf and country club, golf course, and related uses, and the property not be sold to Tomoka Oaks, Inc., Tomoka Oaks Golf and Country Club, Inc. or Tomoka Oaks Homeowners Association as specified in the preceding paragraph, then the above described property shall automatically revert to and become the property of party of the first part, and all rights therein of party of the second part, or its successors in interest, shall immediately terminate unless party of the second part, or its successors in interest, shall within ninety days after the day of mailing to said party of the second part, or its successors in interest, at its last known address by certified mail, by Tomoka Oaks, Inc., Tomoka Oaks Golf and Country Club, Inc., or Tomoka Oaks Homeowners Association, a written notice to utilize said property as a golf and country club, golf course, and related uses, complies with said reverter clause and continues to use said property as a golf and country club, golf course, and related uses.

The aforesaid reverter clause specified in the last preceding paragraph may be released or modified by resolution concurred in by two-thirds of the entire board

of directors of Tomoka Oaks, Inc, at any time after ten years after the date of recording of this Deed; provided that if Tomoka Oaks, Inc. shall have disposed of four-fifths (4/5) of the lots in Tomoka Oaks Country Club Estates, then the foregoing right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks Homeowners Association, Inc., to be exercised by resolution of two-thirds (2/3) of the Board of Directors of the Tomoka Oaks Homeowners Association, Inc.

And the said party of the first part does hereby fully warrant the title to said land, and will defend the same against the lawful claims of all persons whomsoever.

IN WITNESS WHEREOF, the said party of the first part has caused these presents to be signed in its name by its proper officers, and its corporate seal to be affixed, attested by its Secretary, the day and year above written.

Signed, Sealed and Delivered

RESOLUTION

WHEREAS, TOMOKA OAKS, INC., a Florida corporation, made, executed, and delivered to Ralph R. Frederick, Trustee, a deed to certain property described as follows:

> All of Sec Sneed Golf and Country Club, a subdivision of part of Thomas Fitch Grant lying westerly of the Florida East Coast Railway, Section 39, Township 14 South, Range 32 East, Volusia County, Florida, as per map thereof in Map Book 25, page 61, of the Public Records of Volusia County, Florida, together with installations, equipment, machinery and personal property located upon said property.

which deed was duly recorded on December 13, 1963 in Official Records Book 585, page 157, Public Records of Volusia County, Florida, and

WHEREAS, such deed of conveyance contained the following reservations and restrictions:

> "This conveyance is subject to the express condition that should the party of the second part (Ralph R. Frederick, trustee), or his successors in interest, desire to sell or convey the above-described property to any person, firm, or corporation other than a subsidiary of party of the second part, any good faith offer acceptable to such owner must be referred to party of the first part for its acceptance or rejection for a period of thirty days, and in the event of its rejection or failure to accept such offer, said offer shall then be presented to Tomoka Oaks Golf and Country Club, Inc., a Florida non-profit corporation, for its acceptance or rejection for a period of thirty days, such acceptance or rejection to be subject to the approval of the party of the first part (Tomoka Oaks, Inc.) Such right to accept or reject said offer is transferable and may be transferred by either party of the first part or Tomoka Oaks Golf and Country Club, Inc. to the Tomoka Oaks Homeowners Association within said thirty day period and must be acted upon within said period.
>
> The above described property shall be used perpetually for purposes of a golf and country club, golf course, and related uses, and in the event that party of the second part, or its successors in interest, fail to utilize said property exclusively as a golf and country club, golf course, and related uses, and the property not be sold to Tomoka Oaks, Inc., Tomoka Oaks Golf and Country Club, Inc. or Tomoka Oaks Homeowners Association as specified in the preceding paragraph, then the above described property shall automatically revert to and become the property of the party of the first part, and all rights therein

of party of the second part, or its successors in interest, shall immediately terminate unless the party of the second part, or its successors in interest, shall within ninety days after the date of mailing to said party of the second part, or its successors in interest, at its last known address by certified mail, by Tomoka Oaks, Inc., Tomoka Oks Golf and Country Club, Inc., or Tomoka Oaks Homeowners Association, a written notice to utilize said property as a golf and country club, golf course, and related uses, complies with said reverter clause and continues to use said property as a golf and country club, golf course, and related uses.

The aforesaid reverter clause specified in the last preceding paragraph may be released or modified by resolution concurred in by two-thirds of the entire board of directors of Tomoka Oaks, Inc. at any time after ten years after the date of recording of this Deed; provided that if Tomoka Oaks, Inc. shall have disposed of four-fifths of the lots in Tomoka Oaks Country Club Estates; then the foregoing right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks Homeowners Association, Inc., to be exercised by resolution of two-thirds of the Board of Directors, of the Tomoka Oaks Homeowners Association, Inc."

end

WHEREAS, it is within the knowledge of Tomoka Oaks, Inc. at this time that the above-described Golf Course property is under contract for sale to Ormond Ocean Homes, Inc., and Tomoka Oaks, Inc. has rejected its right to purchase the said property and is agreeable to the said sale to Ormond Ocean Homes, Inc., and Tomoka Oaks, Inc. has not transferred the right to accept or reject said offer, and

WHEREAS, Tocc, Inc., the present owner of the aforesaid property, has requested Tomoka Oaks, Inc. to formalize its consent to the sale of the above-described property to Ormond Ocean Homes, Inc., and

WHEREAS, Tocc, Inc., with the understanding that Tomoka Oaks, Inc. intends to liquidate and dissolve, has also requested Tomoka Oaks, Inc. to release forever its right of first refusal set forth in the aforesaid deed of conveyance and to also release the reverter clause contained in said deed, the release of reverter to become effective December 13, 1973, the release date specified in such reverter clause,

RECORDED & RECORD VERIFIED
1238 PAGE 246
OCT 22 PM 1 20

NOW, THEREFORE, the following resolutions are hereby adopted:

"BE IT RESOLVED: That inasmuch as it has been submitted to Tomoka Oaks, Inc. that Tocc, Inc. has contracted to sell the following described property to Ormond Ocean Homes, Inc.:

All of Sam Snead Golf and Country Club, a subdivision of part of Thomas Fitch Grant lying westerly of the Florida East Coast Railway, Section 39, Township 14 South, Range 32 East, Volusia County, Florida, as per map thereof in Map Book 25, page 61, of the Public Records of Volusia County, Florida, together with installations, equipment, machinery, and personal property located upon said property,

Tomoka Oaks, Inc. does hereby reject its right to exercise any option to purchase the aforesaid property and is in full accord with the sale of the aforesaid property to Ormond Ocean Homes, Inc. and that the said sale is hereby ratified and approved and that Tomoka Oaks, Inc. evidences its consent to the said sale by the action of its board of directors taken at this duly convened, authorized meeting of the board of directors of said corporation.

BE IT FURTHER RESOLVED: That since Tomoka Oaks, Inc. intends to liquidate and dissolve, Tomoka Oaks, Inc. does hereby release any and all rights reserved unto it in that certain deed of conveyance recorded in Official Records Book 585, page 157, Public Records of Volusia County, Florida, particularly its right of first refusal set forth in said deed, and Tomoka Oaks, Inc. further releases the reverter clause contained in the aforesaid deed, such release of reverter to become effective December 13, 1973, the release date specified in such reverter clause, and the president and/or secretary of this corporation are hereby authorized and empowered to execute any and all further instruments which may be required in order to effect the releases herein referred to."

I HEREBY CERTIFY that the above and foregoing is a true and correct copy of a resolution passed by a unanimous vote of the board of directors of Tomoka Oaks, Inc. at a special meeting of the board of directors held on the 18th day of February, A. D. 1969, the said meeting having been duly convened and a quorum being present.

DATED: This 19th day of October, 1970.

Donald W. Acer, Jr. - Secretary of Tomoka Oaks, Inc.

Ormond Beach City Commission:

DENISTY MATTERS

Executive Summary

The fact that Tomoka Reserve will affect the surrounding neighborhoods is undeniable. To what extent depends heavily on the density and development that is ultimately approved. While the developer is arguing that Tomoka Oaks has a density of 2.09 homes/acre, this number is highly circumspect and should be examined before any development density is considered. The next several pages will go through some of these considerations. As you will see there is a solid and consistent argument that Tomoka Oaks actually has a density of 1.11 homes/acre. This would reduce Tomoka Reserve to a comparable density of 165 homes from their current 272. Unfortunately, you will not find quippy one-liners or jokes in this analysis. What you will find are facts and numbers that affect the future of Tomoka Oaks and Ormond Beach. Hopefully, this information helps inform your deliberations concerning Tomoka Reserve.

History and Information

Since the announcement of Tomoka Reserve and the first Neighborhood Meeting, the residents of Tomoka Oaks, and Ormond Beach at large, have been worried about the impact this project would have on our quality of life and the character of the surrounding neighborhood. A copy of my letter supplied to the developer at that first meeting referencing these concerns is attached for your reference (Exhibit 1). As the process has proceeded, there have been many concerns discussed. Some have been addressed, while the larger quality of life issues including traffic, further crowding and strain on our school and hospital systems, property value loss, loss of recreational and green space, and environmental concerns have been mostly unresolved.

When you distill these concerns down to their root cause, you arrive at one aspect of the proposed development that, if altered, helps reduce every one of the major concerns. DENSITY. This issue has been discussed at every meeting concerning Tomoka Reserve including the three Planning Board meetings where one of the main reasons for the board's denial position was the overall property density. We can argue the appropriate density, but a good place to start is the density of the surrounding neighborhood, Tomoka Oaks.

Analysis

The land development code defines density as follows:

> Density means the total number of dwelling units per gross acre of land. For purposes of computing density allowances, the total amount of unbuildable area, including wetlands, retention ponds, and inaccessible areas shall not exceed ten percent (10%) of the gross acreage. Density, in turn relates to the total population load on the land in terms of families or persons per acre. In calculating maximum potential densities for any given parcel of property, such calculations shall be exclusive of that existing portion which is considered to be submerged lands.

This definition was verified and expanded on in a February 9, 2023, email from Steven Spraker, copy included, where he stated, "The overall subdivision size includes all aspects of the subdivision (roads, stormwater, parks, natural areas)."(Exhibit 2) This definition would indicate that all land, other than that considered to be submerged would be included in the calculation of a given property's density. Based on this definition and using available public records from the Volusia County Property Appraiser's Office, the 547 lot owners in Tomoka Oaks own 282.846 acres. Unfortunately, this does not include the acreage contained within common islands, roadways, or the golf course. These numbers yield a Tomoka Oaks density of 1.93 homes/acre. For comparison, currently, the developer and City Staff report that Tomoka Oaks has a density of 2.09 homes/acre.

Following the July 13, 2023, Planning Board meeting, at which I and others spoke about density, I asked for further clarification in an email to Steven Spraker, copy included, concerning the density calculations being used (Exhibit 3). In his response, he indicated that the total acreage of Tomoka Oaks according to the city Geographic Information System (GIS) was 343.37 acres. This number is inclusive of all areas including roads, common areas, and landscape area. This analysis, however, only yielded 542 units. Based on this and the definition provided above, one would believe the calculated density of Tomoka Oaks to be 1.58 homes/acre, however, as previously mentioned, the reported density is 2.09 homes/acre. You may ask, "Why the difference?" In Mr. Spraker's response he explains that 84.30 acres of the 343.37 acres in Tomoka Oaks must be removed from the density calculation because its land use designation is "Open Space/Conservation". He further included future land use panels E3 and E4 that generally show the West side of Tomoka Oaks and Future Land Use Element Goals Objectives and Policies (FLUE), page 6 with section 5, "Recreation/Open Space, 'Density: Not permitted.'" boxed in illustrating the rationale for the removal of 84.30 acres from the land area of Tomoka Oaks (Exhibit 4). While Mr. Spraker's email narrative calls out an "Open Space/Conservation" land use designation as not being able to be counted in the density calculation, we are left to conclude that the language existing in the "Recreation/Open Space" section equally applies under this rationale. Unfortunately, several issues exist when using this rationale to calculate the land area and thus density of Tomoka Oaks.

1. This interpretation of the FLUE is flawed. According to the definition available in the LDC and further clarified by Mr. Spraker, all land is included in the density calculation except for submerged land.
2. You would be removing land that Tomoka Oaks residents own, pay taxes on, and can improve with a board walk and/or dock from the land area of Tomoka Oaks.

This leads us to conclude that the density of Tomoka Oaks based on City and developer analysis should be 1.58 homes/acre. This, however, is still a flawed analysis.

If you take the Tomoka Oaks neighborhood as a whole, you also have to consider the original developers intended land use. The golf course property was placed in the middle of the neighborhood to act as a recreation green space for Ormond Beach and more specifically the tax paying property owners of Tomoka Oaks much as the developer claims the pocket parks and recreation space of the proposed Tomoka Reserve will serve its residents. This adds 148 acres of land to Tomoka Oaks resulting in 490.37 acres and a density, as constructed, of 1.11 lots/acre.

Conclusion

You may ask why nailing down a true and accurate interpretation of Tomoka Oaks density is important. The developer has claimed through the LDC they could construct over 625 homes on the 148 acres of the golf course property. They have used this inflated, impossible to construct number of homes to justify that their originally submitted proposal already compromised by reducing their legally allowable density by half. They have also resolutely stated 100-foot lots are not marketable to justify their 60-80 foot lots, but still have an application pending for straight R2 zoning, which would contain, according to the developer, unmarketable 100-foot wide lots, they are using as a threat to push through their submitted proposal.

As density plays a major role in the negative impacts imposed on Tomoka Oaks and Ormond Beach from this development, showing an incompatibility in density with Tomoka Oaks justifies the neighborhood's request for fewer and larger lots. The chart below shows how many lots could be placed on the golf course property at different density levels to be compatible with Tomoka Oaks:

	Tomoka Oaks Density	Tomoka Reserve Homes
Developer	2.09	307
Property Owned	1.93	284
Full GIS	1.53	232
Full GIS & Golf Course	1.11	165

As you can see, which density number is accurate changes the number of lots, if developed to a density compatible with Tomoka Oaks, by 142 lots. Reductions in density of 100 to 142 lots should have a significant impact on the larger quality of life issues still outstanding.

There is one more major consideration when looking at the comparable densities of Tomoka Oaks and Tomoka Reserve. If you do not accept the rationale above that the land contained within Tomoka Oaks with a future land use of "Open Space/Conservation" and the golf course should be included in the denominator of the density calculation, I would ask that you apply the same standard to the proposed Tomoka Reserve development. Based on their last PRD submission, if approved, of Tomoka Reserve's 147.94 acres, 67.84 would have a future land use consistent with "Recreation/Open Space" or "Open Space/Conservation" (Exhibit 5). Using the same logic applied to remove 84.30 acres of "Open Space/Conservation" acreage from Tomoka Oaks would leave Tomoka Reserve 80.1 acres to use in their density calculation. This puts the density of Tomoka Reserve at 3.40 lots/acre which is significantly above the Tomoka Oaks density of 2.09 using the same rationale. The current rationale

would leave the commission voting to approve a site plan that in discussion has a developer reported density of 1.84 lots/acre, but immediately after approval, which will change the future land use to some form of conservation, would have a density of 3.40. Density cannot and should not change based on a simple vote of the commission. Not using an apples-to-apples comparison on density exposes the existing Tomoka Oaks neighborhood to an unwarranted change in character and should not be allowed or condoned.

As you can see there is more than one way to look at the density of Tomoka Oaks and Tomoka Reserve. The current methodologies allow the developer to present lower numbers for their development while inflating that of Tomoka Oaks and surrounding neighborhoods. As a commissioner, please ensure that when you are presented with density numbers for Tomoka Oaks and Tomoka Reserve you are getting apples-to-apples comparisons. As the title indicates, density matters! How it is calculated changes the comparable Tomoka Oaks/Tomoka Reserve densities which ultimately determines the impact of the proposed Tomoka Reserve development on Tomoka Oaks and Ormond Beach.

Please feel free to contact me if you have any questions concerning the information contained herein.

Respectfully:

Tyler Brown

Tomoka Oaks Golf Course Development

As development of the existing Tomoka Oaks Golf Course progresses, it is imperative that the developer mitigate impacts and maintains the nature/culture of the existing neighborhoods. Unlike most developments that abut existing neighborhoods, this development will be completely enveloped by existing and established neighborhoods. While it is understood that there has been no official plan submitted to the city there are several concerns that if not accounted for in any future development plan, could fundamentally alter the nature of several existing Ormond Beach neighborhoods.

1. Tomoka Oaks and The Trails contain an architecturally diverse housing stock situated on 1/3 to ½ acre lots with substantial tree cover which helps shape the appearance of the neighborhood. Construction of a development of cookie cutter homes, on minimally sized lots, with a minimal tree canopy would alter the fundamental nature of the neighborhood. Care should be given to ensure that the lots and subsequent construction located closest to the existing neighborhood, not alter the feel of the neighborhood. This can be done though the inclusion of various floor plans, materials, and roof lines in any new development. Varying and increasing lots sizes as the development approaches existing homes would also help retain character and appearance.
2. Larger lot sizes, walking/bicycle trails, and the golf course located in the neighborhood reduces residential density helping to ensure there is significant green space to allow wildlife and the environment to flourish. It helps keep our summer temperatures down and provides noise barriers for Nova Road, US1, and each other. If the new development would clear cut the golf course trees and build the currently allowable density of 4.3 home per acre, it would fundamentally alter the nature of the neighborhood by reducing green space while having possible significant environmental impacts. Condensing housing density to the core of the development through the use of smaller lots and possibly multi-story units, such as condominiums, while not exceeding the reasonable number of housing units that could have occupied the development in its current R-2 zoning, would allow for greater greenspace retention. This has the benefit of retained green space, the possibility of reduced construction prices, and increased values due to the desirability of the neighborhood resulting from extra green space.
3. The homes currently located on the golf course have the enjoyment of added space behind their homes. This space adds value and desirability, many times, allowing these owners to look across hundreds of feet before seeing the next home. This fact greatly impacted many home buying choices. This new development could definitively harm these owners and deprive them of a large benefit currently available by fundamentally altering the nature of the neighborhood. The use of substantial buffers between the existing homes and the new development consisting of open space, landscaped berms, walking/bicycle trails for the use of the new and existing developments, water retention ponds, etc. will help mitigate the impact of the new development on the existing homes. Many residences bordering the golf course, that do not currently have pools in their back yards, have no fences along golf course. Efforts should be made to allow this to remain an option for these owners through the use

of these buffers instead of the new development necessitating the installation of 6-8 foot privacy fencing.

4. Traffic loads through the community are currently manageable. Even with the expansion of vehicle ownership since Tomoka Oaks was first started, there is not a constant parade of vehicular traffic into and out of the development. Adding this new develop within the current neighborhood will certainly increase the number of vehicles traversing roads that were never intended to have such loads. The whole of Tomoka Oaks Blvd. from the current "roundabout" to Nova Road will need to be examined thoroughly to ensure safety of vehicular, pedestrian, and bicycle traffic. A traffic light at the development entrance/exit onto Nova Road will probably be required to promote adequate safety. If traffic concerns are not addressed and minimized this new development could fundamentally alter the nature of the neighborhood.

Without any submission from the developer, it is difficult to be specific about mitigation efforts needed to ensure minimal impact upon the existing neighborhoods. Obviously, the new development will affect the neighborhood in some way. How much will be determined by the density and design of the development. As time progresses and I obtain better information about the intended development through submissions to the city and conversations with the developer, I intend to be involved to ensure that the quality of life in Tomoka Oaks, The Trails, and Escondido remains high. When going through preliminary development discussions internally and with the community, I ask that you consider the current nature of the neighborhood. Our neighborhood was not built around profit margins, trying to cut cost by building as many and as similar of homes as possible. It is as a refuge from the hustle of daily life with trails, quiet natural green spaces, and low density, diverse construction. Hopefully, any development considers these items and helps preserve and enhance our neighborhood.

I look forward to working with the developer, city staff, the Planning Board, and the City Commission to move forward while not altering the fundamental nature of a neighborhood many have grown to love.

Respectfully,

Tyler Brown

Density Calculation

Spraker, Steven <Steven.Spraker@ormondbeach.org> Thu, Feb 9, 2023 at 8:56 AM
To: Tyler Brown <tlb1720@gmail.com>

Good morning,

The Land Development Code defines density as:

> "Density means the total number of dwelling units per gross acre of land. For purposes of computing density allowances, the total amount of unbuildable area, including wetlands, retention ponds, and inaccessible areas shall not exceed ten percent (10%) of the gross acreage. Density, in turn relates to the total population load on the land in terms of families or persons per acre. In calculating maximum potential densities for any given parcel of property, such calculations shall be exclusive of that existing portion which is considered to be submerged lands."

So, the density would be the overall subdivision size in acreage divided by the number of lots. The overall subdivision size includes all aspects of the subdivision (roads, stormwater, parks, natural areas).

Thank you

Steven

Mr. Spraker:

First, thank you for attending the entire meeting last night. I know that was a large time commitment and it was noticed.

While I intend to draft a letter concerning the meeting last night, I am hoping you can assist me with understanding a portion of the meeting. Obviously, density of the proposed project, which is a direct driver of many of the other concerns including traffic, environment, views, etc., is a major concern. During conversations on density, Mr. Merrell indicated that not all math is the same. He later walked this back, as he did many things, indicating that there could be differences in definition. Further stating that it depends on what goes into the numerator and denominator.

An example would be the 300 lots proposed by the developer being built on roughly 147 acres that encompasses the previous golf course. 300 lots / 147 acres would yield 2.04 lots/acres.

Having a science background and understanding that definitions and units matter, my question, and what I hope you can assist me with, is the definition of density for this proposed development. What exactly goes into the numerator (which should be either homes or lots) and the denominator (which should be the number of acres developed or being developed). If there are further considerations such as the removal of roads, green space, buffers, pocket parks, retention ponds, etc. from the acreage number, I certainly want to make sure the developer and I are in concert and comparing apples to apples.

Thank you in advance.

Tomoka Oaks Density Calculation

Tyler Brown <tlb1720@gmail.com> Fri, Jul 14, 2023 at 8:56 AM
To: "Spraker, Steven" <Steven.Spraker@ormondbeach.org>

Mr. Spraker:

Thank you for your work last night. I am sure that was a long day for you. You conducted yourself professionally throughout the entire meeting. My inquiry can certainly be answered next week.

The density calculations for Tomoka Oaks still seem to be inconsistent with readily available public data. The developer says that Tomoka Oaks is 2.09 units/acre. Using information from the county property appraiser for just the land owned by Tomoka Oaks homeowners on their lots (547 units and 282.85 acres), I get 1.93 unit/acre. I have attached an Excel Spreadsheet with the information used so you can verify the 282.85 acres if you so desire. This does not include roads or islands as the property appraiser does not have this info.

I understand that you cannot render an opinion on the "previous golf course" land being included in a density calculation for TOHA, but golf course inclusive, I am at 1.27 units/acre. This is a substantial departure from Tomoka Reserves numbers.

While this can seem like a minor issue, the developer continues to use density numbers to justify the number of units they are proposing. This was done last night to the point of Carl Velie mentioning they would be the least dense development in our area of Ormond Beach. In my opinion, facts matter and math is math.

Again, thank you.

Tomoka Oaks Density Calculation

Spraker, Steven <Steven.Spraker@ormondbeach.org> Fri, Jul 14, 2023 at 9:50 AM
To: Tyler Brown <tlb1720@gmail.com>

Good morning,

Thank you for your e-mail. Staff reviewed the applicant's density analysis, it is below and attached:

PLAT NAME	ACRES	LEGAL	OS/C	UNITS (Property Appraiser)	YEAR
Tomoka Oaks CC Estates Unit 1	51.81	MB 25 PG 58-59		103	1961
Tomoka Oaks CC Estates Unit 1B	12.93	MB 28 PG 129		26	1966
Tomoka Oaks CC Estates Unit 1C	12.37	MB 31 PG 165		27	1972
Tomoka Oaks CC Estates Unit 1D	2.32	MB 31 PG 168		5	1972
Tomoka Oaks CC Estates Unit 2	8.07	MB 31 PG 166		19	1973
Tomoka Oaks CC Estates Unit 3	14.34	MB 29 PG 81		41	1969
Tomoka Oaks CC Estates Unit 3A	22.91	MB 27 PG 285		53	1965
Tomoka Oaks CC Estates Unit 4	23.36	MB 31 PG 167		51	1972
Tomoka Oaks CC Estates Unit 5	6.53	MB 34 PG 142	1.42	12	1977
Tomoka Oaks Unit 6	6.05	MB 35 PG 130	1.54	11	1978
Tomoka Oaks Unit 7A	85.98	MB 34 PG 162-164	37.65	88	1977
Tomoka Oaks Unit 7B	48.46	MB 34 PG 200-201	22.43	57	1978
Tomoka Oaks Unit 7C	48.24	MB 35 PG 46-47	21.26	49	1978
TOTAL:	**343.37**		**84.30**	**542**	

Total Gross Acreage	**343.37**
Open Space/Conservation land area	**84.30**
Net Tomoka Oaks land area	**259.07**
Final Density (Minus OS/C)	**2.09**

The analysis obtained the land area from each plat and was calculated by the city Geographic Information System (GIS). All areas (roads, common areas, landscape areas) are included in the density calculation. Staff pulled each subdivision from the property appraiser information and used the original plat. The total of all Tomoka Oaks subdivision land area is 343.37 acres. Of the 343.37 acres, **84.30 has a land use designation of "Open Space/Conservation"** (See FLU E3 and E4) and these land areas **cannot be counted in the density calculation** (see attached). The density is 259.07 acres divided by 542 units or **2.09 units per acre**.

Please let me know if you have any questions. Thank you

B. **Heavy Industrial**

Purpose: To depict those areas of the City that are now developed, or appropriate to be developed, in a general industrial manner and location consistent with surrounding use, transportation facilities, and natural resource characteristics. Heavier industrial land uses are generally appropriate to locations with sufficient size to encourage either an industrial park type arrangement with provision for internal service access or as a stand-alone industrial location, both of which incorporate adequate buffering of adverse noise, odor, or emissions; with minimal adverse impact on adjoining uses; and served directly by an arterial road network as well as by transit.

Density: Not permitted.

Maximum FAR: 0.75

5. **Recreation/Open Space**

A. **Recreation/Open Space (R/OS)**

Purpose: To provide land for public, semipublic, or privately-owned areas intended for active recreational uses. Permitted uses within this category include ball fields, golf courses, archery ranges, sports complexes, outdoor recreation areas, contoured golf courses, public parks, picnic areas and gymnasiums. Recreation uses are provided for in all zoning districts as principal uses or special exceptions depending on the specific districts and whether they are public or private and indoor or outdoor.

Density: Not permitted.

Maximum FAR: 0.5

6. **Open Space/Conservation**

A. **Open Space/Conservation (OS/C).**

Purpose: This category includes two (2) subcategories: Parks, which includes public areas used for passive recreation, and Conservation which consists of areas within the City that have significant limitations to development, related to elevations, soils, probability of flooding, relationship to a major water body, wetland characteristics, or similar factors. This category of land use is applicable to all zoning districts.

Density: Not permitted.

Maximum FAR: 0.5

B. **Activity Center**

Purpose: To encourage the development of master planned, mixed-use developments that serve as a catalyst for economic development opportunities and provide for balanced, integrated communities. Density and intensity standards are listed under Policy 1.7.7 of the Future Land Use Element.

[External Email-Use Caution] - OB/IT Helpdesk

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Good afternoon Mayor Partington and esteemed City Commissioners,

My name is Susan Klippel and I live at 303 Rio Pinar Road in Tomoka Oaks. My lot is adjacent to the former Tomoka Oaks Golf Course and planned residential Tomoka Reserve development. I would like to take this opportunity to voice my deep opposition to this project.

As an Ormond Beach native, born at Halifax Hospital in 1964, I have seen a lot of changes throughout our beloved "small town". I left the area for college and early career choices, but choose to return to Ormond to raise my family here. My husband and I are both Seabreeze High School graduates. I am all for progress and keeping our city up to date, but am deeply concerned with the amount of rapid commercial and residential growth, desecrating green space, creating traffic and in my opinion, decreasing the value of living in our beautiful city. The addition of this planned residential development in my literal back yard is beyond disappointing and if approved, would directly affect not only my property value, but my quality of life in this neighborhood.

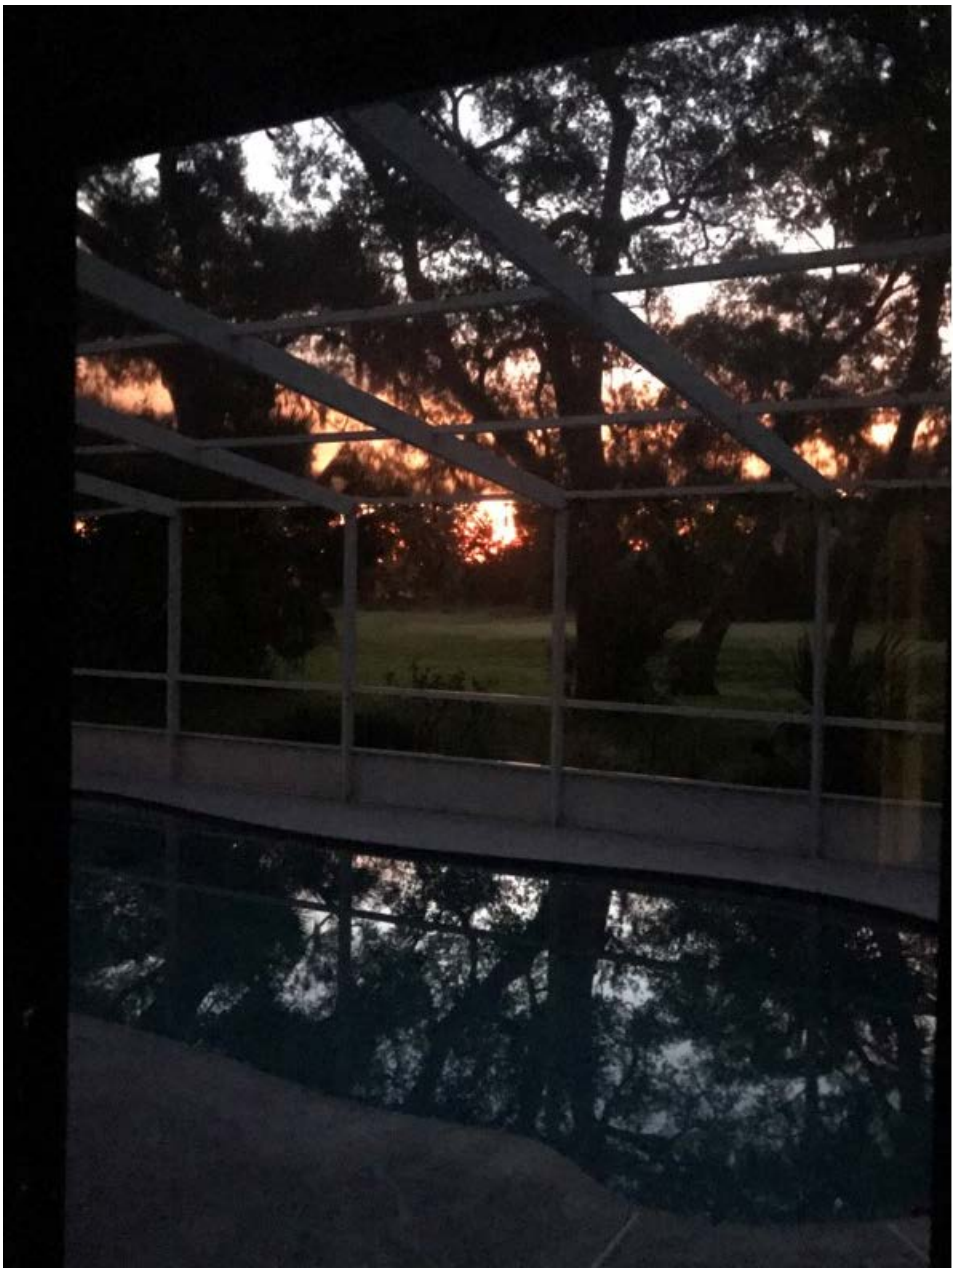
My greatest concerns with the project are many of which you have heard over and over from Ormond Beach residents– traffic, safety, removal of green space, noise, congestion, overcrowded hospitals, and schools, etc. However, on a very personal note, the biggest loss for me would be the project taking away my beautiful back yard view. If I may reshare why this is so important to me … I remember the first time my husband and I walked through this home as if it were yesterday. With vaulted ceilings (my husband was 6' 7" and a vaulted ceiling was much appreciated), plenty of room for our family and in a neighborhood near our work, the beach, grocery, play ground etc. it was a great fit. The neighborhood was full of young families and all the homes had unique character. We walked to the back of the house and my husband saw the view and looked me in the eye and said "we are going to buy this house, aren't we? We immediately agreed and put an offer in that day. We were in love with this home. We moved in and then it happened…the "piece de resistance" … the sunrise. The home is set up to capitalize on the unobstructed golf course view, as I believe the majority of homes on the golf course are. A view that we quickly realized included the most unbelievable sunrises amongst stunning enormous oak trees. It was my husband's absolute favorite thing.

He would get up early to sit in the back room or on the back porch to capture the sunrise views. Sometimes the fog would linger in the trees and make the view more spectacular. We even had disagreements over whether to add blinds to the back windows, because he did not want anything obstructing the view. Anything. Tragically, my husband passed away very unexpectedly five years ago. He left for work, never to return. Now, that unobstructed view with beautiful sunrises is my connection to him. Not a day goes by that I do not say good morning to him while I look out my back sliders as the sun rises. I understand that "life goes on" as brutal as it can be at times, but if I can help protect this special, beautiful, memory filled space in any way, I will. I have included a few of my sunrise and backyard view photos in this correspondence.

I also would like to note that at the time the new development plans were announced we were asked if any homeowner would be interested in purchasing land behind their home. The Tomoka Oaks HOA board spent the time to research and compile a list of those interested. That map is attached. After this work was completed, we were told this option was off the table. The opportunity offered to briefly appease golf course lot owners now seems like an empty tactic used to try to win our approval of the project. I and I am certain many home owners on the golf course, have irrigation installed and maintain the property behind my home, although it is not included in my deed. I would gladly purchase this land. I am very concerned based on the way the property surrounding the land is being maintained now, how they maintain a buffer. A buffer will also take years to fill in.

I believe adding homes behind our golf course lots will greatly decrease property values. We purchased this home knowing it was on a golf course with a beautiful view and were told it was to remain a golf for in perpetuity for at least 99 years. However, often value is not about money. It is about memories made and memories to come. Time outdoors in green space, less stress with less congestion, less noise…. all of these are valuable. Let us not let greed get in the way of protecting what it truly valuable to our community and future generations of Ormond Beach residents.

I believe you have a choice to GREATLY impact our quality of life in Ormond Beach. Please, I urge you to do what is best for your citizens and vote NO to this development.



Thank you for your time and consideration,

Susan Klippel

Re: Development of Tomoka Oaks Golf Course Property

Please consider requiring some or all of the following restrictions pertaining to the development of this property:

1. Limit the construction hours of operation from 8 am to 5 PM, Monday through Friday, instead of the 7 to 7 - 6 days per week.
2. Consider 100 ft. frontage on new lots, to match Tomoka Oaks.
3. Require traffic circle/round-a-bout at the intersection of North and South St. Andrews and Tomoka Oaks Blvd.
4. Consider requiring a Round-a-bout on Nova at the entrance to Tomoka Oaks instead of a mechanical traffic control device. Besides **low maintenance and high safety benefits**, a traffic circle would slow down traffic and make right turns out of Tomoka Oaks easy, even during times when the railroad crossing is blocked. Northbound traffic will be delayed during times when the train is passing regardless of whether there is a mechanical traffic signal or a round-a-bout. A 20-mph speed limit at the traffic circle will move traffic more efficiently, with **less noise and exhaust pollution** than a signalized intersection.
5. Require sidewalks on both sides of Tomoka Oaks Boulevard from Nova, connecting to sidewalks in the new development. Require raised tables at pedestrian crosswalks within Tomoka Oaks.
6. Install traffic calming speed bumps or other devices on North and South St. Andrews Drive.
7. Explore sidewalks on North and South St. Andrews Drive.
8. Delay approval of any development until all legal challenges to the existing title restrictions have been settled.

Thank you for your consideration.

[External Email-Use Caution] - OB/IT Helpdesk

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Next week, each of you will formally have the Development of my beloved neighborhood on your Agenda.

I have appeared at the last few Commission Meetings to point out concerns and encourage all of you to do your research and really dig into the information that is being presented by the Applicant - there are a number of things that continue to be provided to you and spoken to general public and media that are flat out not true or a mathematical manipulation.

Density calculations are normally a pretty straightforward thing. But, all of a sudden you are being asked to look at a proposed plat and comparing it to the existing Tomoka Oaks plat and being told the calculations show the density is going to be similar. That is not possible. My husband and I own one of the lots the Applicant is cutting short on the lot size. We back up to the River - we own the land, pay taxes on the land, and most importantly could install a dock to increase the value of our home. ALL of the green space needs to be counted in the calculations for both communities so you are comparing apples to apples. I hope each of you will take the time to read and digest the amazing Executive Summary prepared by Tyler Brown addressing this very issue.

In addition, I hope that you keep in mind that the Tomoka Oaks Golf Course Development Committee has met with the Applicant **many** times and the result always seems to be the same - they say they hear our concerns, yet there is no meaningful movement on their part to address them. One example was an original consideration to sell land behind the existing golf course homes to allow current residents to own more of a buffer that they can control. We went through a great deal of time and expense to line up the interested parties only to be told that the Applicant is no longer willing to do that.

My primary concern from the start has been the density of the project. That concern is echoed by EVERY single person, whether they are a resident of Tomoka Oaks or not, that I have spoken to regarding this proposal. What are the odds of that in today's society where it is extremely hard to get people to agree the sky is blue, that there is not one legitimate person standing up in favor of these new homes? To be clear, I refuse to count the recent renter who stood up at the last Planning Board meaning to say how much he loved the idea, but immediately exited and mysteriously has never been seen or heard from again. And let's not forget Mr. Jim Cameron who spoke at a Planning Board Meeting but did not disclose he was hired by the Applicant. I personally called him myself to verify my understanding that he was making calls on his Clients' behalf trying to drum up support and he admitted that was correct. To put it bluntly, other than the professionals being employed by the Applicant and making a fortune in billable hours, NOT one person in OUR community feels it is appropriate to fill the "donut hole" of our community in this way.

When the Applicant decided to purchase this land, I am sure they were aware it had always

previously been a golf course and at one point had a PRD for 122 homes AND the golf course remaining in place for 100 years. In my opinion, they are not entitled to any expectation beyond that. Back in 2006 when the PRD was put in place, there were educated, caring, compassionate, and logical professionals - many whom I am sure you know and admire to this day - sitting in the seats you currently occupy. They spent a lot of time making sure that the existing Tomoka Oaks Residents would not be negatively impacted because we have property rights TOO. Since 2006, our population has increased, our roads continue to be overcrowded when project after project is approved with what can only be deemed "flawed" Traffic Studies (frequently by Sans Lassiter who is currently working for the Applicant) because the evidence of errors is in front of our eyes every day we attempt to travel on Granada, Nova, Clyde Morris, and the constantly congested Williamson.

In closing, I respectfully request that you ASK a lot of questions of the Applicant at this meeting and not feel pressured to make a decision.
This is among the most important decisions you will make and I beg of you to take all of the time you need.

With Respect and Warm Regards,

Michelle C. Zirkelbach

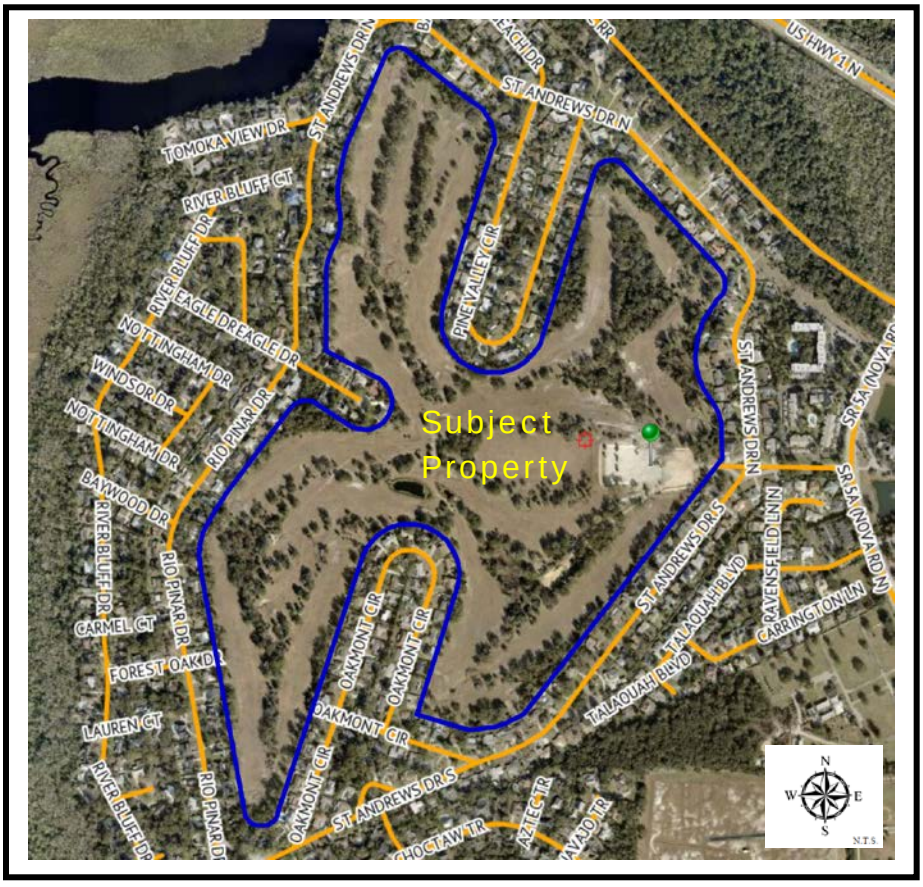
STAFF REPORT

City of Ormond Beach
Department of Planning

MEETING DATE: September 26, 2023

SUBJECT: Tomoka Reserve– Issuance of a development order

APPLICANT: Robert A. Merrell III, Esquire, Cobb Cole on behalf of the property owner, Triumph Oaks of Ormond Beach I, LLC



NUMBER: PRD 2022-043

PROJECT PLANNER: Steven Spraker, AICP, Planning Director

SECTION 1, INTRODUCTION:

This is an application submitted by Robert A. Merrell III, Esquire, Cobb Cole on behalf of the property owner, Triumph Oaks of Ormond Beach I, LLC, for the issuance of a development order for the Tomoka Reserve subdivision. The application seeks to allow the issuance of a development order for 272 single-family lots on approximately 147.94 acres under certain conditions and associated subdivision improvements. The subject property is currently zoned as PRD, Planned Residential Development, and is located at 20 Tomoka Oaks Boulevard. The subject property is shown in Exhibit 1.

EXHIBIT 1:
Location Map

The Tomoka Reserve project was reviewed by the Planning Board on July 13, 2023 and August 21, 2023. This report has been updated based upon a site plan submittal on September 6, 2023. The project attachments have been re-organized and information that is no longer applicable is included as ATTACHMENT 13.

SECTION 2, BACKGROUND:

The subject property has a land use designation of "Low Density Residential" (LDR) and the zoning classification of Planned Residential Development. Maps of the subject property are included in ATTACHMENT 2. The land area for the application was platted in 1961 as the Sam Snead Golf and Country Club. The Tomoka Oaks Golf & Country Club included an 18-hole golf course, clubhouse, cart barn, and maintenance barn. On September 19, 2006, the City Commission approved Ordinance 2006-17 that authorized the following:

A. Zoning map amendment from R-2, Single-Family Low Density to PRD, Planned Residential Development;
B. The Tomoka Oaks Golf Village development order;
C. Development of 119 multi-family units (townhomes and condominiums) and 3 single-family homes, along with a re-designed golf course;
D. The property owner was to provide for covenants and restrictions that restrict the golf course to open space and golf course use with the development of the residential use; and
E. A phasing plan for site development.

The project development order expired in 2014 based on no permit activity. Because there was no construction, none of the development order conditions, including the covenant and restrictions for a golf course, were implemented. The applicant purchased the property in 2021 and has sought to implement a new development order to provide zoning entitlements for the property.

The uses around the subject property are as follows:

EXHIBIT 2: Land uses and zoning

Direction	Current Land Uses	Future Land Use Designation	Zoning
North	Single-Family Residential	"Low Density Residential"	R-2, Single-Family Low Density
South	Single-Family Residential	"Low Density Residential"	R-2, Single-Family Low Density
East	Single-Family Residential	"Low Density Residential"	R-2, Single-Family Low Density
West	Single-Family Residential	"Low Density Residential"	R-2, Single-Family Low Density

In 2022, all on-site structures were demolished and there are no existing buildings on-site. On May 4, 2023, the applicant applied for a zoning map amendment for the subject property seeking to go from PRD, Planned Residential Development, to the R-2, Single-Family Low-Density zoning designation. The applicant indicated that if the issuance of a development order application was unable to gain approval, the intent was to seek the original zoning designation of R-2, Single-Family Low Density and develop under those zoning district standards.

The Planning Board hearing on July 13, 2023 reviewed the project submitted that included 276 residential lots that included 50', 60', and 80' wide lots under certain conditions. The Planning Board completed the following parts of the public hearing:

1. Staff presentation;
2. Applicant presentation;
3. Tomoka Oaks Homeowners' Association presentation;
4. Audience/public comments;
5. Tomoka Oaks Homeowners' Association summary/rebuttal; and
6. Applicant summary/rebuttal.

The meeting was continued until August 21, 2023. The Planning Board meeting minutes are included in ATTACHMENT 11, Section A.

On August 16, 2023, Planning staff received an updated submittal that included submittal of 60' wide lots (117), 80' wide lots (101), 90' wide lots (10), and 100' wide lots (46). City staff advised the Planning Board that the additional information provided on August 16, 2023 should be considered a material change and the submittal had not been reviewed or advertised. At the August 21, 2023 Planning Board meeting, the Planning Board concurred that the August 16, 2023 submittal was a material change that required a new public hearing. Planning Board members provided broad direction on the project. The Planning Board minutes for the August 21, 2023 meeting are included in ATTACHMENT 11, Section B.

SECTION 3, PROJECT PROCESS:

The zoning map amendment to designate the Tomoka Reserve land area to the Planned Residential Development zoning category occurred in 2006. The 2006 development order has expired and the subject property does not have a standard zoning designation or an active development order. The purpose of the application is to provide a zoning designation through the issuance of a development order that details what is allowed on the property. Since the previous golf course use has been vacant for longer than six (6) months, the property does not have any allowed zoning uses. If the development order is denied, the applicant has indicated that they would pursue a zoning map amendment back to the original zoning designation of R-2, Single-Family Low Density.

Below are the steps for development within a Planned Residential Development:

A. Planned Residential Development (PRD) Development Order: This process requires the applicant to provide a holding capacity analysis, flood zone information, proposed lot layout, recreation areas, generalized areas of

stormwater, road layouts, and landscaping buffers. **The PRD development order does not require the applicant to provide detailed engineering information regarding the application. The detailed engineering work is not done until the preliminary plat approval process**. The application for a development order is reviewed under criteria within the analysis section and the application can be approved, approved with conditions, or denied based on the evaluation of the criteria.

Under the City's Land Development Code, the PRD becomes the zoning district of the project site. The zoning designation for this property occurred in 2006, and no development order is associated with the Planned Residential Development. The PRD development order becomes a contract between the developer and the city and identifies the overall development concept, the number and size of lots, and the location of the lots. The process for the issuance of the development order is depicted in Exhibit 3 as follows:

EXHIBIT 3: Application process

Reviewing entity/action	Date	Required advertising
Pre-application community meeting	May 20, 2021	Not required
Pre-application community meeting	July 15, 2021	Not required
SPRC submittal	April 13, 2022	SPRC review: May 3, 2022
Neighborhood meeting	February 8, 2023	1. Mail notice, 600' radius. 2. Newspaper advertisement.
SPRC comments (2nd review)	January 19, 2023	SPRC review: February 21, 2023
SPRC comments (3rd review)	April 30, 2023	SPRC review: May 11, 2023
SPRC comments (4th review)	June 7, 2023	SPRC Review: June 28, 2023
Planning Board	**July 13, 2023**	**1. Mail notice, 300' radius. 2. Newspaper advertisement. 3. Site posting.**
Planning Board	**August 21, 2023**	**1. Mail notice, 300' radius. 2. Newspaper advertisement. 3. Site posting.**
SPRC comments (5th review)	September 6, 2023	SPRC Review: September 13, 2023
Planning Board	**September 26, 2023**	**1. Mail notice, 300' radius. 2. Newspaper advertisement. 3. Site posting.**
City Commission	To be determined	1. Mail notice, 300' radius. 2. Newspaper advertisement.
If approved, proceed to preliminary plat (see below)	To be determined	To be determined

B. Preliminary Plat: After a PRD development order has been approved, the applicant's engineer performs detailed work regarding stormwater design, utilities, lot grading, and road layout. The preliminary plat requires review and a recommendation from the Planning Board and review/action by the City Commission. There are two (2) options for development once a preliminary plat has been approved:

   Option 1 - Proceed with the submittal of construction drawings for completion of the required improvements prior to recording the final plat per Section 4-18(8)(a) of the Land Development Code. When the required off-site and on-site improvements are constructed and inspected, the final plat would be submitted by the applicant to the Site Plan Review Committee (SPRC). The final plat would be acted upon by the Planning Board and City Commission, and, if approved, recorded with the Volusia County Clerk of the Court.

   Option 2 - Proceed with final plat review and approval process, with the completion of required improvements after recording the plat per Section 4-18(8)(b) of the Land Development Code. With this option, the applicant files surety documents guaranteeing that such improvements will be installed. All guarantees are incorporated in a bonded agreement for the construction of the required improvements in the form acceptable to the City Attorney. The final plat would be recorded and the applicant would then construct the improvements.

C. Final Plat: The final plat is a legal document that is reviewed by an independent City Surveyor and the City's Legal Department to ensure compliance with State Statutes. Under Option 1 above, the Planning Board and City Commission would review and act on the plat after all improvements have been constructed. Under Option 2, above the Planning Board and City Commission would review and act on the final plat with the preliminary plat.

The proposed Tomoka Reserve subdivision is seeking only the PRD development order approval at this time. If the issuance of a development order is approved, detailed engineering plans would need to be reviewed by the Site Plan Review Committee and forwarded to the Planning Board and City Commission for review and action when appropriate.

SECTION 4, PROJECT DESCRIPTION:

The application seeks to allow the issuance of a development order for 272 single-family lots on approximately 147.94 acres under certain conditions and associated subdivision improvements. The attachments detail the subdivision proposal and include a traffic impact analysis (ATTACHMENT 4), environmental information, (ATTACHMENT 5), applicant provided documents (ATTACHMENT 9), and the proposed site plans (ATTACHMENT 10). The project is summarized below:

1. The total project size is 147.94 acres.
2. The subdivision density is proposed at 1.84 units per acre or 272 single-family lots. The "Low Density Residential" land use allows 4.3 units per acre. The holding capacity analysis (ATTACHMENT 9) shows the property could support 887 total units.

3. The project shall be required to obtain a preliminary plat and provide detailed engineering plans with review by the Planning Board and final action by the City Commission prior to the issuance of a site construction permit. The applicant has agreed to a requirement of a neighborhood meeting for the preliminary plat.
4. The project narrative letter states that the proposed subdivision density of 1.84 units per acre is lower than the existing Tomoka Oaks subdivisions, which have an average density of 2.09 units per acre.
5. The subdivision phasing is proposed to be developed with the construction plans and may be modified with the review and approval of the Site Plan Review Committee.
6. The subdivision plan indicates the maximum number of lots to be 272. Within the subdivision process, the project can increase the lot widths from the site plan shown on PD2 (ATTACHMENT 10), but cannot reduce the lot size below the sizes shown.
7. The project is proposed to have a gated access point for vehicles and to allow pedestrian access into the subdivision. Private, gated subdivisions are required to provide easements to the city through the platting process for access and maintenance of the project utilities. The streets, sidewalks, and stormwater system would be privately owned and maintained by the Tomoka Reserve Homeowners' Association.
8. There have been inquiries as to whether the Live Local Act would be applicable to the subject property. The Tomoka Reserve project with a "Low Density Residential" land use would not qualify for the Live Local Act. The Live Local Act states: A municipality must authorize multifamily and mixed-use residential as allowable uses in any area zoned for commercial, industrial, or mixed use if at least 40 percent of the residential units in a proposed multifamily rental development are, for a period of at least 30 years, affordable as defined in Florida Statutes 420.0004.
9. The project proposes 16 model homes within the subdivision. Model homes are allowed to be started after a stabilized road is constructed and water and sewer clearances have been obtained which may be before final subdivision acceptance by the Site Plan Review Committee. No certificate of occupancies would be released until after all subdivision improvements are completed.
10. An emergency access connection point is shown on the site plan (ATTACHMENT 10) and is designed for emergency access only. The area would have a stabilized base and a grass surface. Construction details of the emergency access connection point would occur during the preliminary plat process, including the number of lots that would require the construction of the emergency access connection.
11. Sheet PD2 (ATTACHMENT 10) shows the following lot sizes:

EXHIBIT 4: Proposed lot sizes

Lot Width	Lot Depth	Lot square footage	Number of Lots	Location within subdivision	Lot Percentage of 272 total
60’	120’	7,200	115	Interior of subdivision	42.3%
80’	125’	10,000	157	Perimeter, generally abutting existing Tomoka Oaks lots.	57.7%

Additional discussion on the lot size is included in section 6 of this report.

12. School concurrency for the zoning action is provided in ATTACHMENT 6. Additional school concurrency would be required for the plat (detailed construction plans).
13. There are no wetlands on the property.
14. The property lies within Flood Zone X (area of minimal flood hazard).
15. ATTACHMENT 5 contains a summary of an environmental assessment performed by Ayden Environmental, LLC and approved by the Florida Department of Environmental Protection. The summary letter from Ayden Environmental, LLC states: “All work will be completed in accordance with Chapter 62-780 of the Florida Administrative Code, which is Florida’s regulatory framework for environmental cleanup.”
16. The project proposes a fifty-foot vegetation buffer around the exterior of the property abutting the existing Tomoka Oaks subdivision. This area is approximately 3.3 miles in length. The applicant has provided a “Buffer Planting & Maintenance Plan” for the fifty-foot buffer (see ATTACHMENT 10). Additional discussion on the planting plan is provided in section 6 of this report.
17. The project narrative letter states that 16 historic trees within the property will be saved.
18. The site plan shows areas for stormwater. The project seeks to use a low-impact development technique of berming around existing areas (keeping existing vegetation) to create stormwater retention areas. While the stormwater final design is part of the construction plans, the project team has indicated that the stormwater will exceed state and local stormwater regulations.
19. The site plans indicate a five (5’) foot sidewalk on both sides of the internal subdivision streets. The project also proposes a sidewalk outside of the property along both sides of Tomoka Oaks Boulevard to connect with Nova Road, which is not a required sidewalk. The addition of sidewalks to both sides of Tomoka Oaks Boulevard was a request from residents and added with the September 6, 2023 site plan submittal.
20. Throughout the site plan process, the applicant has indicated a willingness to connect the proposed Tomoka Reserve subdivision, via a sidewalk, to existing areas of the Tomoka Oaks subdivision. Any pedestrian connection would need the approval of the property owner(s) of the individual Tomoka Oaks subdivision lots.

21. The project has provided multiple areas for outdoor recreation. The amenities are proposed to be detailed in the construction drawings (preliminary plat). Some recreation areas provide access to the stormwater area for maintenance purposes.
22. The Planned Residential Development requirements include a provision for 20% of the property to be dedicated for natural preservation. The project is required to provide 29.6 acres and shows 34 acres dedicated to natural preservation.
23. Subdivision architectural requirements have been updated are provided in ATTACHMENT 10, sheet PD8.
24. A traffic impact analysis was performed and is included in ATTACHMENT 4. The project traffic engineer has provided a technical memorandum dated August 31, 2023 regarding the impact of the proposed Nova Road improvements. Additional discussion is included in section 6 of this report.
25. The traffic analysis determined a traffic signal was warranted at Nova Road and Tomoka Oaks Boulevard. The project traffic engineer has provided the Florida Department of Transportation a Traffic Warrant Analysis Study and correspondence has indicated verbal approval of a traffic signal.
26. The diamond intersection at St. Andrews Drive and Tomoka Oaks Boulevard has been the source of much discussion. Throughout the site plan process, there have been many concerns regarding the existing configuration and the Tomoka Reserve proposed project trips to the intersection. The traffic analysis determined that the intersection would operate at an acceptable level of service after the build out of the Tomoka Reserve subdivision and has not recommended any modifications. The applicant has agreed to provide improvements to be engineered at the preliminary plat to modify the existing drive aisle to resolve turning radii conflicts for emergency vehicles and provide additional landscaping.
27. The project is proposing two re-use irrigation ponds for landscape irrigation. These ponds would be supplemented with a well as needed.
28. The project would be required to provide water and sewer connections. Water lines would be looped to improve water pressure for Tomoka Oaks and Tomoka Reserve subdivisions.
29. The development order expiration would be five (5) years from the date of City Commission approval. If the development order were to expire, a zoning map amendment would need to occur to ensure the property had a city zoning designation.

SECTION 5, RESIDENTIAL PERMITTING:

Exhibit 5 details the residential permitting within Ormond Beach. In order to construct a single-family home, the lot must be platted. Exhibit 5 shows a decrease in the number of platted lots each decade as the city has been built out. The city has annexed the Plantation Oaks Planned Residential Development, which will lead to the ability to plat and construct residential units. The city has also seen applications that are utilizing commercially zoned properties for multi-family uses (Tymber Creek Apartments, Regal multi-family, and Ormond Enclave).

EXHIBIT 5: Residential permitting

(2) SFH lots plat are taken from the Volusia County Clerk of Court website, http://app02.clerk.org/or_plats/

(3) Single-Family, multi-family, manufactured and mobile home permits from the Ormond Beach Building Department.

(4) 2023 permitting information from January 1, 2023 to September 1, 2023.

SECTION 6, ANALYSIS:

The original staff report identified key issues and identified options for the review of the Planning Board. At the August 21, 2023 Planning Board meeting, the applicant agreed to a number of conditions recommended by the Site Plan Review Committee. Based on the review of the site plan submittal, the remaining key issues unresolved are (1) the proposed lot widths and (2) perimeter 50-foot planting plan and irrigation source.

The application has several key issues which are discussed below. The applicant and the Site Plan Review Committee have been unable to reach a consensus on several issues. These issues are policy issues that need a recommendation from the Planning Board and final action from the City Commission.

Key issue 1: development ability of the former golf course: The subject property was platted in 1961 as the Sam Snead Golf and Country Club. A key question is whether there is an ability to develop the property as a use other than a golf course. The city designated land use is "Low Density Residential" and the zoning is Planned Residential Development. The existing land use allows several uses, including a golf course and single-family homes.

Questions regarding private covenants and restrictions have been raised throughout the process. In 2006, with the original Planned Residential Development, there were no private covenants and restrictions that prevented the 122 residential units from being approved. The 2006 development order required that covenants and restrictions be placed on the subject property for the golf course use in order to build the 122 residential units. The project was never built and the property owner at the time did not restrict the use of the subject property for a golf course use only.

Included in ATTACHMENT 8 are four (4) documents: (1) letter dated July 12, 2023 from Attorney Brent Spain of Theriaque & Spain Law Firm, (2) June 2022 document prepared by resident Ms. Davis, (3) June 30, 2022 analysis from the City Attorney's office, and (4) February 23, 2023 analysis from Matthew Welch, Cobb Cole, and a title insurance document.

The documents examine if there is a private covenant and restriction or another legal document that restricts the use of the subject property to a golf course.

A letter was received from Attorney Brent Spain of Theriaque & Spain Law Firm on July 12, 2023, just prior to the original Planning Board meeting. The letter is now included with ATTACHMENT 8 and the letter states:

> "Further, even assuming the express restrictive covenant is no longer valid and in effect, as Triumph Oaks has erroneously suggested, our clients maintain that the Golf Club property is nevertheless subject to an implied restrictive covenant, thereby limiting the use of such property to a golf and country club, golf course, and related recreational uses. On this additional basis, our clients respectfully submit that the Planning Board should recommend **denial** of the proposed rezoning or otherwise table the matter until such time as a judicial determination is made regarding such implied restriction."

The City Attorney's Office analysis, included in ATTACHMENT 4, concluded:

> "In summary, the records confirm the existence of a document recorded in the public records that provided the property be used for purposes of a golf course in perpetuity. In this case, the document was not contained covenants and restrictions provided by a homeowners' association, but rather in a warranty deed, and as stated previously, subsequent records confirm the reverter clause containing the language was properly released by a recorded corporate resolution and release, and therefore no longer valid."

The city's land use classification does not prevent the development of the property for single-family uses or other uses within the "Low Density Residential" land use. The zoning needs either (1) an active development order or (2) a zoning map amendment back to the R-2, Single-Family Low-Density zoning designation. City staff are not aware of any private document that requires the subject property to be utilized as a golf course only.

Key issue 2: lot size/density/compatibility: The applicant originally (July 13, 2023) proposed lots with varying lot widths of 80' (abutting existing Tomoka Oaks lots), 60', and 50' with a density of 1.87 units per acre. On August 16, 2023, Planning staff received an updated submittal that included submittal of 60' wide lots (117), 80' wide lots (101), 90' wide lots (10), and 100' wide lots (46). The current submittal (September 6, 2023) shows two types of lots: (1) 60' X120' (115 lots) that are interior to the subdivision and (2) 80' X125' (157 lots) along the perimeter of the property. The proposed density is 1.84 units per acre.

The narrative letter (ATTACHMENT 9) analyzed the density of the existing Tomoka Oaks subdivision at 2.09 units per acre. In reviewing the Tomoka Oaks subdivision, the individual subdivisions were platted in the 1960s and 1970s and did not include common open space, recreational areas, or stormwater management systems which were not required at the time of platting. The Tomoka Reserve site plans show 67.84 acres or 46% of the site dedicated to landscape buffers, open space, stormwater, and recreational areas to support the subdivision. The project has clustered the lots in order to provide landscape buffers, open space, stormwater, and recreational areas.

Planned Residential Developments typically use the existing zoning district as a basis for allowed uses and dimensional standards. This property had a zoning map amendment in 2006 from the R-2, Single-Family Low-Density zoning designation to PRD, Planned Residential Development. Based on the previous zoning designation and the surrounding properties also being zoned R-2, Single-Family Low Density, this zoning district is being used as the basis for the review of the Tomoka Reserve project. The Planned Residential Development allows the ability to request alternative lot sizes or more intensive uses in a development order. Section 2-35(b) of the Land Development Code states: "More intense uses (e.g., townhouses in a single-family district, or apartments in a townhouse district) may be allowed, provided that their visual and functional impact on neighboring districts is minimized by providing adequate buffering and screening, and all the requirements of this section are met." The allowance is discretionary with the term "may" used in the standard and requires adequate buffering and screening.

Planned Residential Developments (Marshside, Pineland, Creekside) in the West Ormond Beach area previously sought lower lot dimensions than the SR, Suburban Residential zoning district minimum of 80'. The applications for smaller lot sizes were

either denied or amended to the 80’ lot width minimums. Staff sees similarities between the Tomoka Reserve and the Planned Residential Developments of West Ormond Beach. Throughout the application process, concerns have been raised about the lot sizes and the compatibility of the Tomoka Reserve application.

Staff continues to recommend the lots along the project perimeter abutting the Tomoka Oaks subdivision be 100’ in lot width and at least 10,000 square feet in lot area. The lot size and desire to match the existing residential lots has been identified as a key issue since the pre-submittal neighborhood meetings. Requirements for a larger lot size may lead the applicant to seek a zoning map amendment to the R-2, Single-Family Low-Density zoning designation. Staff concerns are that development within the R-2 zoning designation does not include the 50’ buffer (6’ landscape buffer is required) and the potential loss of additional natural areas and outdoor recreational areas. Review under the R-2 zoning district would require compliance with the Land Development Code requirements with no additional public benefits.

Key issue 3: Planting of the 50’ natural buffer: As part of the site design, a 50-foot buffer around the perimeter totaling approximately 3.3 miles is proposed. The buffer was designed to provide a natural area for both Tomoka Oaks and Tomoka Reserve lots. All existing natural vegetation will remain and areas with no vegetation would be planted. A key point of the project application has been the planting of the areas that do not have existing natural vegetation. Site Plan Review Committee staff have recommended a type 6 buffer planting plan that requires seven (7) trees, 70 shrubs & 70 ground covers per 100' linear feet with irrigation to the newly planted areas.

The applicant has created a Tomoka Reserve Planting and Maintenance Plan, dated September 6, 2023 (ATTACHMENT 9). The Site Plan Review Committee review of this plan is as follows:

1. The plan does not demonstrate meeting compliance with the type 6, 50' landscape buffer which requires 7 trees, 70 shrubs and 70 ground covers per 100' lineal feet.
2. Staff does not support the "modified buffer" of 5 trees and 50 shrubs.
3. The proposed planting plan does not meet the requirement that all landscape buffers require a minimum of 5' foot wide visual screen constructed of plant materials which are selected, located, and maintained to provide a visual barrier that is designed to achieve forty percent (40%) opacity within (3) years from the time of installation between three feet (3') and six feet (6') above the average ground level of the landscaped buffer area when viewed horizontally.
4. The proposed planting does not appear to comply with the Land Development Code requirement that trees shall be established along the entire length of and contiguous to any property line at a maximum spacing of fifty feet (50') on-center.
5. Staff supports the native/xeric landscape concepts like the Edge Plantings at Cherrylake project (referenced in the submittal), however this project was installed with an irrigation system which is essential for success.
6. Staff is not supportive of hand watering for establishment of plant materials/trees. A 26 weeks or 6 month establishment period is not long enough to establish a 2.5" caliper tree and longer for larger calipers. Planting establishments for trees can

take 1 to 2 plus years depending on the caliper size of the trees. Based on the University of Florida research, 3 gallons of water per caliper inch and establishment rates are based on 3 month per inch of trunk caliper. To establish a 30 gallon tree (8 gallons of water) or 45 gallon tree (9 gallons of water) at 2.5" caliper would take 8-12 months. You would need to water daily for 1-2 months and every other day for 4 months and weekly for the next 6 months until establishment. A permanent irrigation system needs to be in place for the establishment of the trees and plant materials as per Section 3-05(e) of the Land Development Code.

If the irrigation system is designed "strategically", then there would be no distance challenges to pump the water or installing long lengths of irrigation pipe. Irrigating a project of this size (3.3 lineal miles) with hand watering is very inefficient and time consuming. The best approach to watering plant materials is with an efficient irrigation system using "low volume" techniques where water can be applied "directly" to the root ball. Directing water to 100% of the root ball in a manner that water can be absorbed into the root ball when water is needed is critical to optimum tree establishment. Proper irrigation immediately after transplant will influence root growth; therefore, the diameter of the tree's irrigation pattern should increase, especially for sandy soils, as the tree's roots expand into the native soil. Efficient irrigation is critical and takes the guess work out with everything being automated and precise compared to hand watering. With frequent drought events as we experience with our weather, supplemental watering will be necessary to keep this buffer alive and maintaining positive health.

7. Regarding the maintenance responsibilities, staff is not supportive of a 2-year maintenance bond. Additionally, staff is not supportive of an 80% plant survivability but will support 100%. Assuming 20% or greater of the plant materials in the buffer dies that would not be complying with the Type 6 buffer standards, but also placing a huge burden on the Tomoka Reserve HOA, Tomoka Oaks and the City.

   If the Planning Board and City Commission desire is to allow hand watering, staff would suggest a maintenance bond of 6 years for each phase built. After each 2 years of each phase planted plant materials failed will be replaced by the Tomoka Reserve HOA. If the maintenance bond is implemented, it shifts reasonability to the Tomoka Reserve HOA to replace the buffer back per the approved plans and the City staff to conduct inspections for compliance after each 2-year period.

In summary, staff recommends planting the Type 6 landscape buffer and irrigation of the buffer area as needed for the new plantings.

Key issue 4: Setback plan: The original setback plan has been modified and the Site Plan Review Committee has no objections to the proposed setback plan provided on September 6, 2023 shown on sheet PD7. Key items on the setback plan include:

A. Building height = 35 feet.

B. Maximum building coverage is 50%. The R-2 zoning district maximum building coverage is 35%.

C. *Structure setbacks:*

Lot type	Lot width	Lot depth	Lot SF	Front	Rear	Side	Side Street	Porch
Park House	60’	120’	7,200	25’	20’	7.5’	15’	15’
Custom House	80’	125’	10,000	25’	20’	8’/20’	20’	15’

The R-2 zoning requirement is a front yard setback of 30’, rear yard setback of 25’, side yards setbacks of a minimum of 8’ to total 20’ between both setbacks, and a side corner setback of 20’.

Key issue 5: Sheet PD6 note on lot separation: The previous Sheet PD6 included a note with the lot separation table that stated, “The lot separation width shown on this sheet may be subject to change at the time of permitting. The represented distances are from existing residential lots in the Tomoka Oaks neighborhood and proposed lots within Tomoka Reserve.”

With the September 6, 2023 submittal, the note on Sheet PD6 on ATTACHMENT 10 states “The buffer abutting the Tomoka Oaks existing residential lots and areas called out as natural preservation shall not be modified and shall always be vegetative areas.” It is important to note that the natural preservation is not only the 50’ buffer but also includes additional land area outside the 50’ buffer.

Key issue 6: Traffic review, including St. Andrews Drive and Tomoka Oaks Boulevard diamond:

ATTACHMENT 4 includes (1) Traffic Impact Analysis, (2) Response to comments, dated June 7, 2023, and (3) a technical memorandum, dated June 7, 2023. The project traffic engineer has provided a technical memorandum dated August 31, 2023 regarding the impact of the proposed Nova Road improvements. The June 7, 2023 technical memorandum is designed to summarize the traffic analysis for the project. Traffic impact analysis focuses on the impacts of traffic to intersections and roadways. Where intersections and roadway segments fail as a result of project trips, state law allows the project to pay its proportionate fair share to mitigate the project impacts. The project traffic analysis seeks to review and determine if a project diminishes the adopted level of services below the level of services adopted in the city’s Comprehensive Plan. An independent traffic engineer, employed by the city, has reviewed and provided comments on the traffic impact analysis. The traffic analysis went above the city requirements and analyzed the local road traffic impact of the proposed development based upon citizens’ concerns and questions.

Key aspects of the study include the following:

A. Traffic counts were performed in March of 2023 to update the original traffic analysis.

B. The technical memorandum states, “Due to the proposed location of the project’s access, peak hour data and transportation model results, it is anticipated that 96% of the project trips will utilize Tomoka Oaks Boulevard and 4% will use Iroquois Trail for external access. 4% of traffic (111 total daily, 8 total AM and 11 total PM) are expected to use this route to access SR 40.”

C. The traffic analysis has identified the need for a traffic signal at Nova Road and Tomoka Oaks Boulevard (see Table 10 of the TIA). The traffic analysis states that a Traffic Warrant Analysis Study was conducted and submitted to the Florida Department of Transportation. The response to comments states that the Florida Department of Transportation has verbally accepted the traffic signal as a treatment option for the intersection level of service.

   With the September 6, 2023 submittal, the applicant agreed to a voluntary condition that within 30 days of the phase 1 plat approval, the developer will initiate an application to FDOT to construct a traffic signal at the intersection of Nova Road and Tomoka Oaks Boulevard. Prior to the issuance of the first certificate of occupancy within the Tomoka Reserve Development, the traffic signal at Nova Road and Tomoka Oaks Boulevard has to be completed and functioning or fully bonded and/or the full cost of constructing said traffic signal system must be deposited with the City of Ormond Beach.

D. Table 10 of the Traffic Impact Analysis details the Level of Service for the unsignalized intersections, including the local intersections along Tomoka Oaks Boulevard, St. Andrews Drive, Rio Pinar Trail, and Iroquois Trail. All intersections operate at a Level of Service of “A” or “B” where the adopted Level of Service is “D”. Again, the analysis does not state that there will not be traffic. The analysis shows that the proposed traffic is within the Level of Service standards adopted by the city’s Comprehensive Plan.

E. St. Andrews Drive and Tomoka Oaks Boulevard diamond. The Traffic Impact Analysis (pages 17 & 18 of the TIA) provides a detailed analysis of the existing diamond intersection. The analysis concludes that the existing configuration is expected to operate within the adopted Level of Service and no improvements are proposed. There have been no crashes around the diamond within the last three (3) years. The diamond intersection is awkward, and in staff’s opinion, confusing and potentially dangerous as additional trips are added.

   With the September 6, 2023 submittal, the applicant has agreed to a modification of the existing drive aisle to resolve turning radii conflicts for emergency vehicles and the provision of additional landscaping. The final design of the diamond would be performed at the preliminary plat (which is reviewed by the Planning Board and acted upon by the City Commission). A final design may include some use of local road impact fee credits.

F. The response comments provided a draft proportionate fair share calculation.

G. In comments received from residents, there has been a desire to see sidewalks on both sides of Tomoka Oaks Boulevard. With the September 6, 2023 submittal, the applicant has proposed sidewalks on both sides of Tomoka Oaks Boulevard.

It is understood that traffic is a key part of the subdivision. From a technical perspective, the applicant has demonstrated compliance with the city’s Comprehensive Plan and state law regarding traffic concurrency. The analysis resulted in a traffic signal being required. The traffic analysis does not state that the project would not create additional trips, but instead that the project trips are within the Level of Services adopted by the

Comprehensive Plan and project traffic improvements will be made.

Key issue 7: Recreational areas: Section 2-35(h) of the Land Development Code details the recreational requirements for a Planned Residential Development. The Land Development Code allows a process to provide additional outdoor recreational area in lieu of indoor recreation which has been allowed for the Tattersall and RidgeHaven residential projects. Based on the size of the parcel, the Land Development Code requirement is 24,840 square feet of recreational area and the project has provided 140,000 square feet of recreational area throughout the subject property. The final details of the recreational amenities would be required with the construction drawings. The site plans show a multi-purpose field, pickle-ball courts, playgrounds, pavilions, an outdoor exercise area, and picnic tables. Staff recommends approval of the proposed subdivision areas with final details to occur with the preliminary plat.

Key issue 8: Environmental: The Tomoka Oaks Golf & Country Club included an 18-hole golf course, clubhouse, cart barn, and maintenance barn. Ayden Environmental was hired by the applicant to provide an environmental assessment of the golf course and to develop a remedial plan to address the conversion of the golf course to residential uses. Ayden Environmental has provided a summary that is included in ATTACHMENT 5. Key summary points are as follows:

A. Ayden Environmental submitted site assessment reports and a Soils Management Plan to the Florida Department of Environmental Protection.

B. All work will be managed by Ayden Environmental with Florida Department of Environmental Protection oversight. All work will be completed in accordance with Chapter 62-780 of the Florida Administrative Code.

C. The Florida Department of Environmental Protection approved the site assessment reports and Soils Management Plan in a letter dated November 16, 2022.

D. In the ATTACHMENT 5 cover sheet, a link is provided to the Florida Department of Environmental Protection website page for the project's submittals and reviews.

SECTION 7, INPUT RECEIVED:

The project team performed two (2) neighborhood meetings prior to the submittal of the project on May 20, 2021 and July 15, 2021. The applicant summarized "mentions" in these meetings that included traffic, density, lot size, cookie cutter homes, tree removal, and a large buffer. A neighborhood meeting was held on February 8, 2023 with a summary included in ATTACHMENT 7. Written correspondence has been received for this project and is included in ATTACHMENT 3.

Key concepts, ideas, and thoughts include:

A. Proposed development is not compatible with the existing Tomoka Oaks, including the smaller lot sizes. TMH Consulting, Inc. provided an analysis of development compatibility.

B. Property values will be diminished with the loss of the golf course land area. The development would alter the character of the Tomoka Oaks subdivisions.

C. Loss of quality of life.

D. The golf course was designed as part of Tomoka Oaks and should be used in perpetuity as a golf and country club, golf course, and related uses.

E. Concerns with the existing configuration of the diamond intersection at St. Andrews Drive and Tomoka Oaks Boulevard and no proposed improvements.

F. Potential backups along Tomoka Oaks Boulevard impacting the Escondido condominiums.

G. Development would not be in character with the existing neighborhood.

H. Construction traffic will have a negative impact on existing residents.

I. Traffic impacts of the proposed project.

J. Project traffic using the Trails subdivision (Iroquois Trail and Rio Pinar Trail).

K. Design concerns with smaller lots.

L. Only one sidewalk proposed on Tomoka Oaks Boulevard – should be on both sides of the street.

M. The timing of the traffic light should be in place before the development project on the golf course starts. TMH Consulting, Inc. states: "The applicant should be required to submit the application to FDOT for installation of the signal concurrent with the first application for subdivision design and prohibit the issuance of any residential building permits until the signal is approved and installation initiated."

N. Concerns over stormwater.

O. Concerns over Tomoka Reserve HOA and the ability to manage common areas, including the 50' buffer.

P. Location of the emergency access easement.

Q. Impacts on wildlife that exist on the golf course property.

Written correspondence received is included in ATTACHMENT 3. Correspondence related to each Site Plan Review Committee review is available at https://www.ormondbeach.org/1013/Tomoka-Reserve. Any additional correspondence received after publication of the staff report would be provided to the Planning Board by e-mail with a hard copy provided at the Planning Board meeting.

SECTION 8, CRITERIA FOR REVIEW:

The following are the review criteria for Planned Residential Developments from the Land Development Code:

Planned Residential Development Criteria

Section 2-35, Chapter 2, Article II of the Land Development Code details the requirements of a Planned Residential Development:

1. Section 2-35(d)(3) of the Land Development Code states: "All structures shall be set back a minimum of forty feet (40') from the project's perimeter boundaries unless natural or manmade features, such as lakes, creeks, wooded or conservation areas are present. Where a project abuts a collector or arterial street, the setback requirement may be increased if an

effective buffering treatment cannot be provided between the street and residential use."

The project has established a 50' vegetative buffer around the entire perimeter of the property and meets this requirement.

2. Section 2-35(h)(3) of the Land Development Code states, "Thirty (30) square feet of indoor recreation floor area, including exercise rooms, all-purpose space, dining areas and similar uses shall be provided for each dwelling unit, unless waived by the City Commission and replaced at a minimum as provided below:
   a. Subdivisions of 200 dwelling units or less may provide, at a minimum, an additional 30 square feet per unit of outdoor active recreation space in compliance with this Section in lieu of the indoor recreation floor area requirement.
   b. Subdivisions that do not provide indoor recreational facilities are not eligible for park and recreation impact fee credits.
   c. The open space and/or additional outdoor facilities must be compatible with adjacent properties and the recreational facilities must be consistent with the needs of the project.
   d. The Planning Board and City Commission determine, after reviewing the proposed development plan, that the preservation of natural resources and/or provision of additional recreation facilities is appropriate and that indoor recreational facilities can be waived."

   The applicant is providing additional square footage as outdoor recreation as permitted under Subsection 3a (above) in lieu of the indoor recreation requirement. The conversion of required indoor recreation to outdoor recreation has been permitted in other Planned Residential Developments such as Creekside, Southern Pines, Pineland, Tattersall, and RidgeHaven.

3. Section 2-35(h)(4) of the Land Development Code states, "Sixty (60) square feet of outdoor active recreation space (exclusive of parking, landscaping, retention/detention ponds and other site features), including pools, pool decks, shuffleboard courts, tennis courts, and fishing piers and similar uses, shall be provided for each dwelling unit. Impact fee credits for any specific outdoor recreation site shall be limited to three hundred (300) dwelling units."

   The project is required to provide a total of 16,560 square feet of outdoor recreation area. The additional 30 square feet of outdoor recreation area in lieu of the indoor recreation (8,280 square feet), requiring a total of 24,840 square feet of outdoor recreation area. The project is proposing 9.34 acres of recreational area throughout the project. The recreational amenities shown are a multi-purpose field, pickle-ball courts, playgrounds, pavilions, an outdoor exercise area, and picnic tables with the final design occurring at the preliminary plat.

4. Section 2-35(h)(7) of the Land Development Code states, "Thirty (30) square feet of common accessible, open space shall be provided for each dwelling unit.
   a. Common open space shall be available to all the residents of the development. At the option of the developer, subject to the approval of the City Commission, common open space may be dedicated to the use of the general public.

b. Common open space must be adequately landscaped and irrigated.

c. Natural features worthy of preservation shall be left in a natural state.

d. Waterbodies may be utilized to meet twenty-five percent (25%) of the available open space requirement, provided significant recreational use of the waterbody can be demonstrated. Water retention and wetlands areas may not be included in this calculation."

The project is required to provide 8,280 square feet of common space. The applicant has provided the common open space throughout the project.

5. Section 2-35(h)(8) of the Land Development Code states: "Twenty percent (20%) of the project shall be left in a natural state. This may include designated conservation areas within lots or common areas, but shall not include classified wetlands and required upland buffers."

   The project is proposing that 34 acres of the site remain in a natural state where the Land Development Code requirement is 29.6 acres. The project proposes a natural buffer around the boundary of the site.

6. Other Uses. Section 2-35(b)(2) of the Land Development Code allows other uses within planned residential developments.

   The only use proposed is single-family residential. No other uses are proposed.

Section 2-35(j)(4) of the Land Development Code states, "In considering an application for a PRD, the planning board may recommend approval, approval with conditions, or disapproval and the city commission may base its conditions of approval or denial of the issuance of a development order on the extent to which the development offers site amenities above that normally found for permitted uses in the district with regard to the following:"

a) Innovative Site Design

In ATTACHMENT 9, the applicant states: "In designing the proposed redevelopment plan, the Applicant took great measures to ensure the project would complement the surrounding area and integrate with the surrounding residential neighborhood." The proposed application provides additional site amenities above and beyond what a standard subdivision would provide, including open space, recreational facilities, architectural and landscape design for the lots. The project proposes off-site sidewalks (both sides) along Tomoka Oaks Boulevard to Nova Road.

In review by the Site Plan Review Committee, there have been comments regarding the perimeter lot size, buffer plantings, and setbacks. The use of the buffer to provide a natural area is an innovative site design. However, the planting material and long-term maintenance are critical to the buffer's long-term viability. The issue regarding the lot size has been discussed repeatedly, including at the pre-application meeting, neighborhood meeting, and Site Plan Review Committee meetings. Staff's recommendation is for 100' wide lot size along the Tomoka Reserve perimeter. The applicant has made a number of changes of the site plan (setbacks, reduction of units, notes on plans, traffic related, and site design) with the September 6, 2023 submittal.

b) Coordinated Architectural Design

The Tomoka Reserve project shall have an Architectural Control Committee tasked with enforcing the architectural design guidelines detailed in the plan set (see ATTACHMENT 10). The September 6, 2023 submittal has updated architectural standards on sheet PD8.

c) Open Space, Recreation, Common Areas

The project has exceeded the space required for open space, recreation, and common areas. The project has preserved 23% of the project land area. As discussed under the Planned Residential Development section, the applicant is providing a recreation area and common open space. The total area for open space, recreation, and stormwater is 67.84 acres or 46% of the overall property.

d) Coordinated Streetscape Elements

The site plan shows the subdivision entry feature (PD4 – ATTACHMENT 10). The project would be required to provide streetscape elements such as street tree plantings.

The project has a unique site design with natural preservation and recreation areas. The key issues in the review of the project's design revolve around the lot sizes and buffer planting. Throughout public meetings, it has been stated that the proposed lot dimensions are not consistent with the existing developed subdivision. One key decision for the Planning Board is to determine if the interior lot widths proposed at 60' wide are appropriate.

Section 1-15(e) of the Land Development Code states: "In its review of any application requiring a development order, planned developments, special exceptions and LDC amendment applications, the board shall consider:"

1. **The proposed development conforms to the standards and requirements of this Code and will not create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare, or quality of life.**

   The applicant has provided the required information in terms of lot sizes and layout, street locations, buffer requirements, traffic impacts, stormwater planning, and Planned Residential Development requirements. Please note that site-specific information (stormwater, lighting details, and landscaping details) shall be provided with preliminary and final plat applications. The application exceeds the requirements of site buffering, recreational amenities, and common space.

   Section 2-35(b) of the Land Development Code states: "More intense uses (e.g., townhouses in a single-family district, or apartments in a townhouse district) may be allowed, provided that their visual and functional impact on neighboring districts is minimized by providing adequate buffering and screening, and all the requirements of this section are met." The July 13, 2023 staff report conclusion of the Site Plan Review Committee was that modifications to the application are needed (lot size, buffer material, traffic mitigation, and revised setbacks) to recommend approval of the proposed site plan. The applicant has committed to a number of changes with the

September 6, 2023 site plan submittal. The key issues remaining are the lot size and the buffer planting plan. Site Plan Review Committee staff does not believe that the application submitted is compatible with the existing Tomoka Oaks subdivisions development pattern regarding lot sizes around the perimeter of the property. Additionally, there are concerns with the buffer planting plan in terms of the quantity of material and long-term maintenance.

2. The proposed development is consistent with the Comprehensive Plan.

The property is designated "Low Density Residential" on the City's Future Land Use Map. The Future Land Use Element of the Comprehensive Plan states:

Low Density Residential (LDR)

Purpose: To protect and encourage the continued development of typical single-family residential areas and stabilize and protect the character of such neighborhoods. Institutional uses may be permitted in accordance with the maximum floor area ratio.

Density: up to 4.3 units per acre

Maximum FAR: 0.2

The following is a list of the Comprehensive Plan Objectives and Policies pertaining to the proposed PRD:

Future Land Use Element

GOAL 1. LAND USE DISTRIBUTION

FUTURE DEVELOPMENT AND REDEVELOPMENT ACTIVITIES SHOULD BE DIRECTED IN APPROPRIATE AREAS AS DEPICTED ON THE FUTURE LAND USE MAP TO MEET THE LAND USE NEEDS OF THE ANTICIPATED POPULATION, IN A MANNER CONSISTENT WITH SOUND PLANNING PRINCIPLES, THE GOALS, OBJECTIVES AND POLICIES CONTAINED HEREIN, AND THE DESIRED COMMUNITY CHARACTER.

THE FUTURE LAND USE ELEMENT SHOULD ALLOW LIMITED COMMERCIAL EXPANSION, PROMOTE INDUSTRIAL USE, AND MAINTAIN CURRENT RESIDENTIAL DENSITIES IN THE CORE AREA WHILE ESTABLISHING LOWER DENSITIES IN THE PERIMETER AREAS, FOCUSING REDEVELOPMENT IN THE DOWNTOWN COMMUNITY REDEVELOPMENT AREA, US1, AND SRA1A, AND PROVIDING FOR A CONTINUED HIGH LEVEL OF OPEN SPACE. FUTURE GROWTH SHALL BE TIMED AND LOCATED TO MAXIMIZE EXISTING PUBLIC INFRASTRUCTURE.

OBJECTIVE 1.1. RESIDENTIAL LAND USE

Ensure the availability of adequate lands to meet the residential land use needs of the community.

POLICY 1.1.3.

Preserve the character of existing neighborhoods by not allowing intrusion of land uses that would threaten to alter the neighborhood character and by encouraging voluntary rehabilitation and sound maintenance programs in viable neighborhoods which are capable of self-renewal

and establishing code enforcement or public redevelopment activities in areas not capable of self-renewal.

POLICY 1.1.5.

Encourage innovative design measures for new residential developments and ensure that adequate provision is made for neighborhood facilities suitable to the type of development proposed.

POLICY 1.1.6.

Provide the opportunity, through zoning and other land use controls, for the development of a variety of housing types (i.e., single-family, duplex, townhouse, multi-family) in both conventional, planned unit and cluster type developments, that will meet the varied needs of the citizens of Ormond Beach.

POLICY 1.1.14.

Enhance community livability in the central core and older sections of the City by encouraging infill as appropriate, transit-oriented development, and walkable residential areas.

POLICY 2.4.7.

Encourage cluster development which promotes the efficient use of open space and reduces development costs, in areas where services and facilities exist or are planned.

Housing Element

GOAL 1. HOUSING SUPPLY

ENSURE THE AVAILABILITY OF SAFE AND ADEQUATE HOUSING UNITS OF DIFFERENT TYPES, SIZES, AND PRICE RANGES TO MEET THE NEEDS OF ALL CURRENT AND FUTURE RESIDENTS.

OBJECTIVE 1.1. HOUSING SUPPLY

The City shall continue to facilitate the private production of a housing supply, including adequate sites for mobile homes or manufactured housing and low and moderate-income housing, which will meet future community needs and offset housing deficiencies as noted in this Element.

OBJECTIVE 1.2. PROVISION OF ADEQUATE SERVICES AND FACILITIES

Each existing housing development and residential neighborhood along with all new housing development shall meet the existing adopted level of service standards.

POLICY 1.2.1.

The general residential development pattern in the city should be in accord with the community's growth strategy for residential densities, as stipulated within the Future Land Use Element.

The Comprehensive Plan contains policies that can support the proposed project or be used to deny the project. It is important to note that the land use density allows 4.3 units per acre and the proposed density is 1.84 units per acre. The project concern is focused on the Land Development Code zoning regulations regarding lot sizes and setbacks.

3. The proposed development will not adversely impact environmentally sensitive lands or natural resources, including but not limited to waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells.

The project has prepared an environmental summary included in ATTACHMENT 5. The property would be subject to environmental remediation from the former golf course that would be monitored by the Florida Department of Environmental Protection. The subject property does not have any on-site wetlands or floodplains. The project is seeking to use reuse water for irrigation. A Biological Assessment and Environmental Site Assessment is provided in ATTACHMENT 9.

4. The proposed use will not substantially or permanently depreciate the value of surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties.

The land use and original zoning designation of R-2, Single-Family Residential, provides a variety of allowed uses, including single-family houses (permitted) and a golf course (Special Exception). Supporters of the application would state that the development of the golf course with a new subdivision that provides open space, natural areas, buffers, stormwater management, and recreational area would increase the land's value and abutting property's value. Single-family houses abutting single-family houses should be considered similar uses and would not cause depreciation of surrounding property values. The applicant has stated that the lesser lot sizes are needed to provide the buffering, natural areas, and recreational amenities. The applicant provided an analysis of the "Economic Impact of Redeveloping Tomoka Oaks Golf & Country Club" that is within ATTACHMENT 9, Section B.

Individuals seeking denial of the application state that the proposed development (1) takes away open space that was to be used for the existing development and (2) proposes lots that are smaller in width and overall lot size to Tomoka Oaks existing lots. Multiple correspondences received detail that the proposed project is not similar to the existing development patterns of the area.

The Site Plan Review Committee concludes that the proposed design is not consistent with the lot patterns of the Tomoka Oaks development and could cause nuisances or have visual impacts on adjoining properties. There are site design modifications (lot size and buffer planting types/irrigation) that could lead to support from the Site Plan Review Committee.

5. There are adequate public facilities to serve the development, including but not limited to roads, sidewalks, bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds.

There are adequate public facilities to serve the development. Traffic and sidewalks were discussed earlier in the staff report. With the September 6, 2023 site plan submittal, the applicant agreed to sidewalks on both sides of Tomoka Oaks Boulevard and reworking of the intersection of Tomoka Oaks Boulevard and Saint Andrews Street. Based on traffic study data and analysis, there was a conclusion on the impacts

on roadways and the intersection, that they operate at an acceptable level of service at build-out. Based upon state statutes any impacts of the project above the adopted level of services would be required to provide a proportionate fair share agreement. There is adequate water and wastewater capacity to serve the project. Finally, the project was reviewed by the Volusia County School Board and a concurrency certificate is shown in ATTACHMENT 6.

6. **Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe. This finding shall be based on a traffic report where available, prepared by a qualified traffic consultant, engineer, or planner which details the anticipated or projected effect of the project on adjacent roads and the impact on public safety.**

   ATTACHMENT 4 includes a (1) Traffic Impact Analysis, (2) Response to comments, dated 06.07.2023, and (3) a technical memorandum, dated 06.07.2023. The technical memorandum is designed to summarize the traffic analysis for the project. It is important to note that the subject property has a land use that allows residential uses at 4.3 units per acre. Traffic analysis is focused on the impacts of traffic on intersections and roadways. Where intersections and roadway segments fail as a result of project trips, state law allows the project to pay its proportionate fair share to mitigate the project impacts. The analysis seeks to review and determine if a project diminishes the adopted level of services below the level of services adopted in the city's Comprehensive Plan. An independent traffic engineer, employed by the city, has reviewed and provided comments on the traffic impact analysis. The traffic analysis went above the city requirements and analyzed the local road traffic impact of the proposed development.

   Key aspects of the study are summarized in section 6 of this report.

   It is understood that traffic and its impacts are a large part of any development. A professional traffic engineer has prepared an analysis of the project impacts that has been reviewed by a professional traffic engineer hired by the city. The analysis shows certain required improvements and a responsibility to pay a proportionate share for project impacts as required by state law. The analysis does not state that there will not be an increase in traffic impacts as the result of the Tomoka Reserve proposed subdivision. The analysis does state that the increased impacts of the Tomoka Reserve subdivision are within the Level of Service standards allowed by the city and payment of proportionate share as allowed by state law.

7. **The proposed development is functional in the use of space and aesthetically acceptable.**

   Natural and landscaped areas are provided around the entire perimeter of the project to provide natural areas. The project is using a low impact development technique of berming around the stormwater area. The site design is functional and uses the land area effectively.

8. **The proposed development provides for the safety of occupants and visitors.**

   The overall design indicates safe movement on the site. The proposed road and access layouts would be reviewed during the construction drawings of the preliminary plat.

9. **The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area.**

   The project is required to utilize a Homeowners' Association (HOA), which will institute an Architectural Control Committee to review construction plans within the development. The site plan exhibits outline regulations governing the construction of buildings and landscaping on individual lots, in order to encourage aesthetics and harmony within the development.

10. **The testimony provided at public hearings**.

    There have been two Planning Board meetings on July 13, 2023 and August 21, 2023. The meeting minutes for the project are within ATTACHMENT 11.

SECTION 9, RECOMMENDATION:

The Planning Board has the following options for a recommendation on the application for the issuance of a development order:

1. Approve the application as submitted;
2. Deny the application as submitted; or
3. Approve with conditions.

The applicant has made significant revisions to the original site plan. Key remaining considerations for deliberation of a recommendation include lot sizes and the planting/irrigations of the 50' natural buffer. The traffic impacts of this project have been analyzed and determined to be within the Level of Services adopted by the City's Comprehensive Plan, with the provision of a traffic signal at Nova Road and Tomoka Oaks Boulevard.

In reviewing the application, the Planning Board should consider:

1. Application submittal;
2. Staff report and Site Plan Review Committee comments;
3. Written correspondence provided;
4. Criteria of the Land Development Code contained within the staff report; and
5. Testimony provided at the Planning Board public hearing.

It is recommended that the Planning Board recommend **DENIAL** for the issuance of a development order for 272 single-family lots on approximately 147.94 acres under certain conditions and associated subdivision improvements based on criteria 1 and 4 analyzed above. Specific recommended changes in the site plan from the Site Plan Review Committee would include:

1. Requiring the Tomoka Reserve perimeter lots to be at least 100' in width and total 10,000 square feet of lot area.

2. A type 6 landscape buffer for the perimeter 50' buffer and irrigation of the buffer area as needed for the new plantings.

If there is a belief that the project has complied with the development order criteria, then the project should be recommended for approval. No City Commission date has been set for the project at this time.

ATTACHMENT 1

Outstanding Site Plan Review Committee comments dated September 13, 2023

Note: former comments from the July 13, 2023 Planning Board packet in Section 13, Section B

Project Name: PZ-22-043
Project Description: Tomoka Reserve
Review Comments List Date: 9/13/2023

Ref. # 62, Landscape Architect, Cara Culliver, 1/25/23 3:25 PM, Cycle 2, Unresolved
Markup: Buffer Type, Tomoka Reserve PD Plans 5 -Buffer plan.pdf

- Staff is supporting a Type 6 landscape buffer which is consistent with the 50' buffer width & requires 7 trees, 70 shrubs & 70 ground covers per 100' lineal feet.

Ref. # 134, Landscape Architect, Cara Culliver, 6/12/23 5:00 PM, Cycle 4, Unresolved
Markup: High Density Buffer Planting, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf

- A Type 6 buffer which is 50' foot depth requires 7 trees, 70 shrubs & 70 ground covers per 100' lineal feet. The document states 30 shrubs and the planting depth is 20 foot which is inconsistent with Section 3-06(d)(1)(2) of the Land Development Code.

- The elevation & plan view drawings shall be to scale and should show a typical 100 foot length & 50' foot depth planting design. This applies to all of the Typical Buffer Sketches.
- There is no reference to the keyed out plant materials and not able to determine what's being proposed?

- The plan view sketch only shows 5 trees and the requirement is 7 trees per 100 lineal foot. Also, the shrub requirement is 70 and only 30 are shown.

- Spacing trees 15 feet apart doesn't give enough room for growth and you have a 50' foot wide buffer to work within.

- The wildflower areas should be shown in more natural shape.

Ref. # 135, Landscape Architect, Cara Culliver, 6/13/23 10:39 AM, Cycle 4, Unresolved
Markup: Master Buffer Plan, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf

- Need to reference on the master buffer plan where these 3 different typical buffer planting would occur.

- Ultimately, the 3 different planting sketches/specifications will have to be incorporated on 24x36 scaled drawing and included in the ZevCohen landscape plans.

Ref. # 136, Landscape Architect, Cara Culliver, 6/13/23 10:43 AM, Cycle 4, Unresolved
Markup: Tree Mitigation for Specimen & Protected Trees, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf

- Tree mitigation if applicable could drive the density of the buffers and tree caliper sizes. This will have to be worked out with final future detailed drawings.

Ref. # 137, Landscape Architect, Cara Culliver, 6/13/23 10:50 AM, Cycle 4, Unresolved
Markup: Medium Density Buffer & Intact Buffer Plantings Sketches, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf

- The medium and intact buffer sketches would need to be applied to the actual site to determine what needs to be planted back.

- There is a ground cover requirement and no mention of this in the written text for both of these sketches.

Ref. # 138, Landscape Architect, Cara Culliver, 6/13/23 11:01 AM, Cycle 4, Unresolved
Markup: Planting Details, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf

- Please use the City standard planting details.

Ref. # 139, Landscape Architect, Cara Culliver, 6/13/23 11:13 AM, Cycle 4, Unresolved
Markup: Watering Schedule, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf

- Staff is not supportive hand watering for establishment of plant materials/trees. A permanent irrigation system needs to be in place for the establishment of the trees and plant materials as per Section 3-05(e) of the Land Development Code.

- The watering requirement of trees wouldn't be the same as watering requirement for shrubs/ground covers. For example and based on the University of Florida research, 3 gallons of water per caliper inch and establishment rates are based on 3 month per inch of trunk caliper. To establish a 30 (8 gallons of water) or 45 gallon tree (9 gallons of water) at 2.5" caliper would take 8-12 months. You would need to water daily for 1-2 months and every other day for 4 months and weekly until establishment. This is not an efficient way to water a project of this size and there will be limited to no access to this 50 foot buffer when the project is developed. Also, we frequently experience drought which is going to be a factor in keeping this natural buffer alive.

Ref. # 140, Landscape Architect, Cara Culliver, 6/13/23 3:41 PM, Cycle 4, Unresolved
Markup: Intact Buffer, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf
- When 7 existing trees are not present with this buffer type, than Understory trees would be more appropriate than more shade canopy trees.

Ref. # 141, Landscape Architect, Cara Culliver, 6/13/23 3:52 PM, Cycle 4, Unresolved
Markup: Suggested Tree List, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf
- The intent is to provide screening please limit the amount of deciduous trees used in this plant palette.

- This project would have Canopy and Understory trees. Please add a category for native Understory Trees. Might want to call the Medium tree an Understory tree on the sketches.

- I don't think the American Olive, American Hornbeam, Redbud and Sugarberry are available to meet the cities minimum tree size of 10' foot height and 2.5" caliper, please check availability and revise list as necessary.

- The Florida Privet is semi-evergreen and can shed its leaves in the winter.

Ref. # 142, Landscape Architect, Cara Culliver, 6/14/23 8:37 AM, Cycle 4, Unresolved
Markup: Tree Size & Spacing, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf
- The minimum tree size is 10' foot height and 2.5" caliper per Sec.3-05(d)(2).

- Spacing trees 15 feet apart especially for canopy trees doesn't not provide enough room for growth. You have a 50' buffer depth and greater spacing can be achieved with a staggered spacing.
Ref. # 143, Landscape Architect, Cara Culliver, 6/14/23 9:02 AM, Cycle 4, Unresolved
Markup: Wildflowers, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf
- For the success of the wildflower seeds they are installed a certain way, during the fall season, type of seed mix and what's the application rate. Please provide more detailed specifications.
Ref. # 144, Landscape Architect, Cara Culliver, 6/14/23 9:16 AM, Cycle 4, Unresolved
Markup: Existing Turfgrass, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf
- The existing turfgrass will need to be removed for the plantings of the trees and shrubs. The existing grass is going to compete with the establishment of the shrubs and most likely grow over the shrubs and choke them out. This will become a long-term maintenance issue if the grass is left.

Once the plant materials are installed a 3" inch mulch layer (suggest using Pine Bark) will retain the soils moisture.
Ref. # 155, Landscape Architect, Cara Culliver, 9/8/23 10:05 AM, Cycle 5, Unresolved
Markup: Plans Preparation, 2023 09 06 Buffer Tree Planting Locations.pdf

- Per Section 3-05(b)(1),a landscape plan prepared by a person registered as a landscape architect under F.S. ch. 481, part II, shall be submitted in conjunction with any development requiring site plan approval. The plan shall include all items related to trees and tree protection, as well as the grade, type, size, and location of plant materials. All landscape plan sheets shall be signed and sealed.

Ref. # 156, Landscape Architect, Cara Culliver, 9/8/23 10:05 AM, Cycle 5, Unresolved
Markup: 50' Buffer Requirement (Applies To All Sheets BT-100-BT-108), 2023 09 06 Buffer Tree Planting Locations.pdf

- This plan does not demonstrate meeting compliance with the Type 6, 50' landscape buffer which requires 7 trees, 70 shrubs and 70 ground covers per 100' lineal feet. Five trees & 50 shrubs per 100 lineal feet doesn't meet Type 6 buffer requirements.

- Existing palms trees are three to one ratio (3:1), meaning 3 palms equals one required tree. A single palm can't be counted as a required tree.

- All plant materials shall be keyed out showing type, size and locations of plant materials, including a plant list with specifications.

- The landscaped buffer area shall include a minimum five-foot (5') wide visual screen constructed of plant materials which are selected, located, and maintained to provide a visual barrier that is designed to achieve forty percent (40%) opacity within three (3) years from the time of installation between three feet (3') and six feet (6') above the average ground level of the landscaped buffer area when viewed horizontally.

- Trees shall be established along the entire length of and contiguous to any property line at a maximum spacing of fifty feet (50') on-center.

- Abutting residential lot information needs to be show and referenced on this plan.

Ref. # 157, Landscape Architect, Cara Culliver, 9/8/23 10:18 AM, Cycle 5, Unresolved
Markup: Trees Required Chart, 2023 09 06 Buffer Tree Planting Locations.pdf

- This project buffer is 3.3 miles long which equals 17,424 L.F. divided by 100 (x) 7 required trees = 1,220 Required Trees for this buffer, 12,197 Shrubs & 12,197 ground covers.

- This 50' landscape buffer would require 1,220 trees and not 396 as per the chart and submitted plan.

- Please keep in mind protected and specimen tree mitigation might affect buffer density and design.

Ref. # 158, Landscape Architect, Cara Culliver, 9/8/23 11:44 AM, Cycle 5, Unresolved
Markup: Buffer Area Planting Requirements, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

- Staff will not be supporting the "modified buffer" of 5 trees and 50 shrubs. We will be supporting the Type 6, 50' landscape buffer which requires 7 trees, 70 shrubs and 70 ground covers per 100' lineal feet.

- In addition to these requirements all landscape buffers require a minimum of 5' foot wide visual screen constructed of plant materials which are selected, located, and maintained to provide a visual barrier that is designed to achieve forty percent (40%) opacity within (3) years from the time of installation between three feet (3') and six feet (6') above the average ground level of the landscaped buffer area when viewed horizontally.

- Also, trees shall be established along the entire length of and contiguous to any property line at a maximum spacing of fifty feet (50') on-center.

Ref. # 159, Landscape Architect, Cara Culliver, 9/8/23 11:48 AM, Cycle 5, Unresolved
Markup: Ground Cover Requirement, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

- The design team has submitted no documentation of existing ground covers. This will be determined when full design plans are submitted.

- Ground covers will be required as per the Type 6 buffer requirements.

Ref. # 160, Landscape Architect, Cara Culliver, 9/8/23 11:56 AM, Cycle 5, Unresolved
Markup: Standards for Success, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

- The revised plans submitted did not have a phasing plan. Please submit phasing plan for review.

- Staff will not be supporting a 2 year maintenance bond. We will not be supporting 80% plant survivability but will support 100%. Assuming 20% or greater of the plant materials in the buffer dies that would be a huge burden on Tomoka Reserve, Tomoka Oaks & the City. The question is who would be responsible for establishing "replaced" trees and shrubs after the 2 year period?

- Staff would support a maintenance bond of 6 years for each phase built. After each 2 years of each phase planted plant materials failed will be replaced by Tomoka Reserves HOA. If the maintenance bond is implemented the Tomoka Reserves HOA would be responsible to replace the buffer back per the approved plans and the City staff will conduct necessary inspections for compliance after each 2 year period.

Ref. # 161, Landscape Architect, Cara Culliver, 9/8/23 12:57 PM, Cycle 5, Unresolved
Markup: Short Term Maintenance, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

- Staff is not supportive hand watering for establishment of plant materials/trees. A permanent irrigation system needs to be in place for the establishment of the trees and plant materials as per Section 3-05(e) of the Land Development Code.

- A 26 weeks or 6 month establishment period is not long enough to establish a 2.5" caliper tree. Based on the University of Florida research, 3 gallons of water per caliper inch and establishment rates are based on 3 month per inch of trunk caliper. To establish a 30 (8 gallons of water) or 45 gallon tree (9 gallons of water) at 2.5" caliper would take 8-12 months. You would need to water daily for 1-2 months and every other day for 4 months and weekly until establishment another 6 months. The larger the tree caliper the longer the establishment period.

Ref. # 162, Landscape Architect, Cara Culliver, 9/8/23 1:13 PM, Cycle 5, Unresolved
Markup: Irrigation System, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

- If the irrigation system is designed "strategically" than there would be no distance challenges to pump the water or installing long lengths of irrigation pipe.

Ref. # 163, Landscape Architect, Cara Culliver, 9/8/23 1:16 PM, Cycle 5, Unresolved
Markup: Existing Turfgrass, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

- The existing turfgrass will need to be removed for the plantings of the trees, shrubs & ground covers within the planting bed areas. All planting beds shall be prepped to remove all turfgrasses, weeds and unsuitable materials prior to planting. Leaving the existing grass is not the industry standard & going to compete with the establishment of the shrubs & ground covers and most likely grow over the shrubs and choke them out. This will become a long-term maintenance issue if the grass is left & hinder the success of establishing plant materials. Once the plant materials are installed a 3" inch mulch layer (suggest using Pine Bark) will retain the soils moisture.

Ref. # 164, Landscape Architect, Cara Culliver, 9/8/23 1:26 PM, Cycle 5, Unresolved
Markup: Watering, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

- Why would watering trees in Phase 1 be 4-6 gallons and less in Phase II & III with 2 gallons? The also applies to the shrubs. This is not based on University of Florida's research, "Planting & Establishing Trees" publication as noted in this report. A 2.5" caliper tree needs 9 gallons of water, 3.5" caliper needs 11 gallons, 4.5" caliper needs 17 gallons & 6" caliper needs 30 gallons of water.

Ref. # 165, Landscape Architect, Cara Culliver, 9/8/23 1:30 PM, Cycle 5, Unresolved
Markup: Irrigation System, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

Irrigating a project of this size (3.3 lineal miles) with hand watering is very inefficient and time consuming. The best approach to watering plant materials is with an efficient irrigation system using "low volume" techniques where water can be applied "directly" to the root ball. Directing water to 100% of the root ball in a manner that water can be absorbed into the root ball when water is needed is critical to optimum tree establishment. Proper irrigation immediately after transplant will influence root growth; therefore the diameter of the tree's irrigation pattern should increase, especially for sandy soils, as the tree's roots expand into the native soil. Efficient irrigation is critical and takes the guess work out with everything being automated and precise.

Ref. # 166, Landscape Architect, Cara Culliver, 9/8/23 1:41 PM, Cycle 5, Unresolved
Markup: Vegetation Maintenance, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

- Before an area is planted it is stripped to bare soil removing all competing vines, weeds, unsuitable materials & turfgrasses. This eliminates the initial competing of weeds with the new plant materials. The applicant wants to keep all the turfgrass intact which is not the industry standard for establishing plant materials within large buffer areas. Staff will not be supportive of keeping turfgrasses intact within the landscape buffer.

Ref. # 167, Landscape Architect, Cara Culliver, 9/8/23 1:56 PM, Cycle 5, Unresolved
Markup: Long-term Buffer Maintenance, 2023 09 06 v2 Buffer Planting Maintenance Plan.pdf

- The applicant described this buffer as being natural and grass mowing in the buffer contradicts this concept? It would be a maintenance nightmare to mow around and between the trees, shrubs and ground covers. As stated already this buffer would be stripped prior to planting and then topped dressed with 3" mulch layer. There would be no mowing within the buffer and only weed/vine control & pruning of deadwood from trees as described in this plan.

- Other long-term maintenance items would be trimming the existing palms trees and removing the dead fronds, palm boots & seed heads. Also, newly planted trees/plant materials need fertilizer and should be part of the maintenance plan.

Ref. # 168, Landscape Architect, Cara Culliver, 9/8/23 4:48 PM, Cycle 5, Unresolved
Markup: Notes #7 & #8 Modified Buffer, PD1_21067 COV-C1.pdf

- Note #7, staff will not be supporting the "modified buffer" of 5 trees and 50 shrubs. We will be supporting the Type 6, 50' landscape buffer which requires 7 trees, 70 shrubs and 70 ground covers per 100' lineal feet.

- Note #8, an approved buffer plan will be in-place to identify where supplemental plantings will be required.

Ref. # 169, Landscape Architect, Cara Culliver, 9/8/23 4:57 PM, Cycle 5, Unresolved
Markup: Tree Replacement Note, PD2-PD6_21067 ODP-PD5.pdf

- Specimen trees removed will not be on a one to one replacement basis. Mitigation Chart A will determine how many trees will be replaced at 4.5" caliper based on the caliper removed.

Ref. # 65, Civil Engineer, David Allen, 1/31/23 4:34 PM, Cycle 2, Unresolved
Markup: Civil-Operating tables, 21067 Tomoka Reserve Storm Package.pdf

How were the discharge rates established for these tables.

Ref. # 103, Civil Engineer, David Allen, 2/21/23 9:50 AM, Cycle 2, Unresolved
Markup: Civil-=Emergency Access, Autoturn Analysis.pdf

Provide a detail that shows the island and the pavement widths for North St Andrews Drive. Provide the vehicle turn exhibit for this connection as well as the connection within the subdivision.

Ref. # 105, Civil Engineer, David Allen, 2/21/23 11:47 AM, Cycle 2, Unresolved
Markup: Civil-Lot Size, Tomoka Reserve PD Plans 6- typical lot layout.pdf

In the Neighborhood meeting, the width of the lot adjacent to the buff,(existing lots) was a significant question. The width was more important than the square footage of the lot. Please provide rationale for the proposed lot sizes.

Markup: Civil-Dry Retention, 21067 PD-04-28-23.pdf

Dry retention ponds were indicated as allowing infiltration to meet the time related requirements for stormwater management. The borings for the ponds indicated a layer of organics and top soil. How will the ponds function after several rain events have compacted the top layer into an impervious layer at the bottom of the pond.

If the pond bottom is being counted as natural preservation, these organics will seal the pond bottom. If the organics are removed then it should not count towards the natural preservation.

Provide time table of acceptable water stage on the trees within the dry retention.

TECHNICAL COMMENT FOR THE PRELIMINARY PLAT

A recent evaluation for the lift stations within the Tomoka Oaks Subdivision shows a significant increase in run-times for the Lift Station 8M1. The proposed gravity system is shown to direct the flow from the new subdivision to this lift station. After discussion with the Utility Manager, we request that the gravity collection system be directed to the Lift Station 8M, Nova Road.

Markup: 50' Landscape Buffer, PD2-PD6_21067 ODP-PD5B.pdf

- Staff will be supporting a Type 6 buffer plantings within the 50' landscape buffer. Response comments indicate plantings to be a type 4 buffer which will include existing natural vegetation with temporary irrigation is being proposed. Staff is not supportive of a type 4 buffer type and the information provided to date has not made staff supportive of the plant materials or temporary irrigation. A permanent irrigation system needs to be in place for establishment of the trees which can take years depending on the caliper size and drought situations. Staff also have concerns with the long-term maintenance of the buffer area and survivability of the plants with temporary irrigation.

Ref. # 150, Planning Director, Steven Spraker, 6/27/23 10:00 AM, Cycle 4, Unresolved
Comment:
Key policy issues:

1. **Lot Sizes:**

Applicant: mixture of 80', 60' and 50' lots. 80' wide lots abut existing Tomoka Oaks lots.

Staff recommendation: Staff recommends 100' wide lots to total at least 10,000 square feet abutting the perimeter of the existing Tomoka Oaks single-family houses.

2. **Buffer abutting existing Tomoka Oaks single-family houses:**

Applicant: See Tomoka Reserve Buffer Planting and Maintenance Plan, dated June 6, 2023.

Staff recommendation: Staff recommends typical planting (type 6) and irrigation plan. See city Landscape Architect's comments.

~~3. **Setback plan:**~~

~~Applicant: See Sheet PD7.~~

~~Staff recommendation: Staff not supportive of building coverages or proposed setbacks. Staff recommended setbacks included in the review.~~

~~4. **PD6 note on lot separation.**~~

~~Applicant: Note states: The lot separation width shown on this sheet may be subject to change at the time of permitting. The represented distances are from existing lot in Tomoka Oaks neighborhood and proposed lots within Tomoka Reserve.~~

~~Staff recommendation: The 50' buffer abutting the Tomoka Oaks existing residential lots and areas called out as natural preservation shall not be modified and shall always be vegetative areas.~~

~~5. **St. Andrews and Tomoka Oaks Boulevard "diamond".**~~

~~Applicant: Traffic Impact Analysis, response to comments, Item 3 states the existing diamond is expected to operate within the adopted level of service during the peak hours. No improvements are proposed.~~

~~Staff recommendation: The diamond is awkward and in staff's opinion's confusing and potentially dangerous as additional trips are added. Staff recommends that a diamond reconfiguration be required at the construction (preliminary plat) phase of the development.~~

~~6. **Recreation – additional outdoor recreation.**~~

~~Applicant: See sheets PD10 and PD3 where 9.06 acres of outdoor recreation is provided throughout the subdivision.~~

~~Staff recommendation: Staff supportive of the request. Similar request have been approved – RidgeHaven subdivision was the last similar request.~~

MEMORANDUM

TO: City of Ormond Beach Planning Board
FROM: Thomas Harowski, AICP
SUBJECT: Tomoka Preserve Proposed Development
DATE: June 28, 2023

The applicants are seeking to construct 278 single-family homes on the former Tomoka Oaks golf course. This proposed project will have a significant impact on the existing neighborhood in terms of compatibility between the new development and the existing neighborhood, traffic impacts from the proposed development, and the type and style of housing proposed for development. I, along with many of my neighbors, have invested a substantial amount of time over the past 12 to 24 months in meetings with the applicants in an effort to end up with a project that is supportable by both sides. While progress, in my opinion, has been made in this area, the project as currently proposed still falls short of a fully compatible development and neighborhood asset.

In this memo I am offering the board members my comments on the project and how I believe the proposal needs to be improved. Many of my neighbors believe the property should remain as community open space. However, absent a change in the current situation with regard to the property, I expect some development will occur, and we need to get the best possible product on this site. While some will agree with my comments, I suspect many will not. I have worked in community planning in Volusia County for most of the last 50 years. I have attached a resume at the end of this submittal as evidence of my qualifications. As a neighborhood resident, I felt that it was inappropriate for me to serve as the expert witness in planning for this application, but my resume and experience shows I am qualified to do so. I think that this background adds some weight to my comments.

It is clear from the future land use designation applied to the subject property that some development other than open space is likely. My comments assume that a mandatory linkage betweeen the existing neighborhood and the former golf course has been severed. However, that does not mean the proposed project is appropriate for the site as it is currently designed. The issues that need to be further considered are:

- What makes the two developments compatible?
- How can traffic impacts be addressed?
- What buffering is appropriate?
- What lot sizes are appropriate?

- Are there other plan revisions that can improve the overall project?
- How can the application package be constructed so it is an effective regulatory document?

(Please note that these comments are based on the June 8, 2023 submittal. The applicants submitted a last minute plan revision on June 28, 2023, and there is no indication of what changes were made. My cursory review of the latest submittal found that significant changes were not evident, and the comments offered in this report are still applicable.)

DEVELOPMENT COMPATIBILITY

From their submittals the applicants would have us believe that because their project proposes single-family homes at a density that approximates the existing neighborhood, they have proved their case for compatibility. The applicants also claim the project is desireable infill development.

- The claim of compatibility with the existing neighborhood is overstated. Compatibility includes more than housing type and residential density as discussed below. The declared compatibility in density is questionable.

- While the proposed project has some aspects of infill development, it differs from more general infill in that it creates a new community core rather than adding development adjacent to existing residential neighborhoods.

Compatibility Analysis

When looking at compatibility it is important to remember that this project is not an extension of a development pattern where the proposed subdivision is the next parcel to be developed in a linear growth pattern. When development is more linear, adequate buffering between existing and proposed development and proper management of access and public services is likely sufficient to mitigate impacts from the new development on existing neighborhoods. In this case the project is an injection into the heart of the community. It is not only a new development with impacts to surrounding properties, but it becomes the new heart of the neighborhood. As such, development in the new core will have wide ranging impacts on the character of the neighborhood. If the new development is substantially different than the existing neighborhood, it will affect how the entire neighborhood is viewed.

In the most recent submittal package, the applicants for the proposed development have stated that the new project is compatible with the existing neighborhood based on three factors. First the proposed use as single-family housing is the same. Secondly the gross density of the proposed development is approximately the same as the current Tomoka Oaks development; and third that the proposed layout includes approximately the same number of housing units at the perimeter of the project as exist adjacent to the old golf course property. These statements are debatable.

Housing Type: Not all single-family dwellings are equal. Substantial differences in factors such as lot size, setbacks and lot coverage can result in a significantly different character. The applicants propose larger lots at the periphery of the project and small lots toward the center. This is sound design, but there is still a gap in lot sizes between existing and proposed lots at the project periphery. This gap is not insignificant.

Residential Density: The applicants claim that the proposed residential density at 2.04 units/acre is nearly the same as the developed residential neighborhood and substantially below the maximum allowable density based on the comprehensive plan. Therefore, the proposed development is compatible with the existing neighborhood. This conclusion is debatable on several points. While the project gross density and the existing residential area density (approximately 1.93 units/acre) are similar, the applicant's calculation excludes the community open space which for Tomoka Oaks was the golf course in its original design. If the former golf course area is included in the calculation per the original community design, the original neighborhood single-family density is closer to 1.27 units/acre. Also, by the applicant's own calculation, the maximum unit yield for the subject property based on R-2 zoning is 336 units. Therefore, the proposal is building at 89% of the attainable density. Without a substantial change in the project (along with a substantial change in the character and compatibility of the new project) the reference to the allowable density based on the comprehensive plan is irrelevant.

Perimeter Residential Units: The applicant notes that the proposed development has a similar number of housing units at the perimeter of the new development as are existing along the boundary of the old golf course property. Presumably, this factor is cited to suggest that with a similar number of units the new development will be compatible with the existing neighborhood. Factors such as lot size, setbacks and lot coverage are much more directly related to compatibility. The proposed plan has smaller lots on an interior line which yields a suggested compatibility that is not in fact present.

There are four other fundamentals of neighborhood design that are applicable. These are:

Function: Is the community effective in providing convenience and comfort for its users as measured by access and/or interaction among the components of the community.

The Ormond Beach comprehensive plan calls for low density residential use applied when Tomoka Oaks, including the golf course, was long established and there was no thought that the golf course might have to be replaced with other uses. The proposed development even at the proposed density will negatively affect access and interaction within the existing neighborhood by the sheer volume of new development. Neighborhood safety and security afforded by the current comfortable lot sizes with ample yards and personal space will be

reduced as smaller and denser lots are introduced. Even with a buffer as proposed the proposed project design will not fully mitigate these concerns.

Order: Order refers to balance including the continuity and sequence of design.

Order is a rhythm that is achieved when lots are similar in size, streets are similar in size and layout, where structures have relatively uniform setbacks, mass, and orientation to the street. The existing neighborhood development patten was based on R-2 minimum lots with the golf course as community open space, and the existing neighborhood development reflects this sense of order. Accepting that some new development is likely to occur on the subject property, the sense of order suggests that at least perimeter development follow the original patterns as established in the neighborhood. Buffers can address some of the transition, but fully compatible lot sizes in conjunction with the buffer will carry the sense of order into the new portions of Tomoka Oaks.

Identity: the design of the community should be distinctive and recognizable in the elements which give the community its sense of place.

The identity of Tomoka Oaks was defined by the golf course and the suburban nature of the residential portion of the neighborhood. With the failure of the golf course there is a threat to the neighborhood identity as first the open space nature of the community and now the residential character is disturbed. The continuation of the existing suburban character of the neighborhood including replication of the existing lot sizes will support neighborhood identity.

Appeal: The community should be attractive and defined by scale.

Unit design and placement (similar scale) are critical factors defining neighborhood appeal. A sense of order and appeal comes from a similarity in setbacks, heights, and lot configuration. The current neighborhood is a leafy subdivision with generous lots and plenty of private open space. The design anticipated by the proposed dimensional standards will potentially result in large units closely spaced on smaller lots.

The applicants admit as much when they propose minimum building coverages of 50% and minimum impervious coverages of 75%. In the existing neighborhood the average building coverage of all units is about 16% according to the property appraiser records. For the most typical one-third acre lots the building coverage is 20% to 25%. For the proposed lot sizes the building mass will be close to two times greater with full development of the planned units.

As a second comparison I looked at the largest units in the existing neighborhood as these should represent the most building mass in comparison with the proposed units. There are five units in the neighborhood which exceed 6,000 square feet in building area and one unit just under 6,000 square feet. Excluding the house on River Bluff where the riverfront lots are very large, the building coverages ranged from 21% to 41%. In other words, the exceptional units in the

existing neighborhood have 10% to 30% less building mass than the expected standard design for the newly proposed housing units. The variance in building mass is an element of incompatibility.

Lot Sizes and Housing Design

As noted in the discussion above, the most compatable outcome results from a design where the perimeter units have the same lot sizes and building massing. Units located toward the center of the project could include designs with somewhat smaller lots. The city staff has taken the position that perimeter units should be on lots with 100 foot lot widths and that lots interior to the project should have lot widths of 60 feet or above. Much of the neighborhood supports this lotting pattern. In addition to making the overall project more compatible with the exising neighborhood, the overall number of units will necessarily be reduced. A smaller project will make negative traffic impacts less severe, limit the negative impacts of restricted emergency services access, and provide for less impacts on other public services.

In addition to the total number of units and applicable lot sizes, the actual design of the new homes is important as well. One of the character defining elements of the existing Tomoka Oaks neighborhood is the wide diversity in housing styles, building materials, articulation of the exterior house design, and management of site elements such as garage placement. Current development is typically characterized by the same design elements throughout. Houses are usually stucco on block with a hip roof design and garage forward placement. Most projects have few models resulting a monolithic neighborhood appearance. A project that offers this design result will certainly clash with the existing neighborhood.

The applicants have recognized this issue and provided a set of design guidelines which offer a positive point of departure, but these proposed guidelines need additional work. On June 15, 2023 I submitted a report to the Ormond Beach planning staff reviewing in detail the plan set that is before the Planning Board for consideration. (Copy attached.) Beginning on page five of that report, I offer specific suggestions regarding improvements that are needed to create a set of effective and meaningful design guidelines. Key among these suggestions are:

- The spacing between the same unit designs is inadequate. An alternative methodology is suggested. Note: flipping the floor plan or changing the exterior design does not consitutue a different model.
- The range of models offered needs to include models with varied exterior materials, varied roof lines, and varied garage placements.
- The modifications language needs to be eliminated or substantially revised to prevent the applicant from simply discarding the design criteria once the project is approved. The current language allows for neighborhood architectural review board to modify the criteria at will at any time. The developer will be the neighborhood ARB for much of the development term and will have unlimited ability to change or discard the design criteria.

50-Foot Lot Design Issues

Of particular concern in terms of design are the proposed 50-foot wide lots. If these lots remain a part of the overall project, the city should require that they be done with alley access. A currently proposed, the 50-foot lot area will be a 17 lot long string of "snout houses" with a projecting garage and a very narrow unit frontage facing the street. Based on the standards proposed by the applicant, the buildable lot width on a 50-foot wide lot is 35 feet of which 18-22 feet will be occupied by the garage access. This leaves 13 to 17 feet for the front door and hopefully a window for whatever room is placed at the front of the house. Design freedom will be limitied to whether the garage is on the left or the right side of the unit.

There is an alternative using alley access that will allow for full design freedom for the unit by placing the garage at the rear of the lot using an alley as access. On page 8 of my June 15th memo I have picture of a single-family design with the unit placed forward on the lot and fully detailed and landscaped providing a street frontage that would be an asset in any neighborhood. The photo on the next page shows the alley access noting that the driveways accommodate two cars in off-street parking along with the garage. The alleys have one-way traffic, reducing land demand and construction cost. In this project each alley is 300 feet long serving 12 units. These examples come from Venetian Bay in west New Smyrna Beach where the housing type has been popular with somewhere in the range of 15 to 20 blocks developed in this style. If the applicants are truly committed to a quality project, this is a model they should emulate.

TRAFFIC CONSIDERATIONS

The traffic study identifies a project traffic generation of over 2,700 vehicles per day. The study notes five road segments (3 on Granada, 1 on Hand and 1 on Williamson) with failing traffic conditions before the addition of project traffic. The study recommends road improvements to address the deficiencies – none of which are funded and only two of which (Hand Avenue and Williamson) have any prospect of making an entrance into a work program at some point. Fortunately Table 14 of the study declares that all will be well at the project build out in 2028 assuming these unfunded roads are constructed.

The study affirms that a traffic signal is required at the intersection of Tomoka Oaks Boulevard and Nova Road. The big question with regard to the traffic signal is the timing for installatiion of the signal. The development agreement for the project needs to specify when the traffic signal will be installed as, according to the applicant's information the signal is currently warranted. The applicant should be required to submit the application to FDOT for installation of the signal concurrent with the first application for subdivision design and prohibit the issuance of any residential building permits until the signal is approved and installation initiated. The planning board should also recommend the City Commission make every effort to support the signal application and timely issuance of a permit by FDOT. The study also recommends turn lane adjustments at three locations which also need to be part of the FDOT application.

On June 27, 2023, the Tomoka Oaks Homeowners Association president participated in an online call with FDOT, City, County, and local business interests regarding the revamping of Nova from US-1 to Granada. Basically, FDOT is proposing to revise a major portion of Nova Road from Granada north. This segment is proposed to be reduced from seven lanes down to four lanes with widened sidewalks, bike lanes, and a raised, landscaped median. The signalized proposal for Tomoka Oaks Blvd. wasn't mentioned, nor was the proposed development and, due to time constraints of the meeting organizer, our president did not get an opportunity to raise the issue. The traffic study for the project did not assess the segment between Wilmette Avenue and Granada Boulevard (despite our requests to do so) because the impact volume was just a fraction below the cut-offline. The Wilmette to Granada section is the one most likely to be impacted by the Tomoka Preserve project as this is the segment that would lose three lanes under the FDOT proposal. North of Wilmette the impacts are more likely be to the medians in order to widen sidewalks and add bike lanes. The applicants should be directed to modify the traffic study to assess these impacts.

Of equal importance to most Tomoka Oaks residents is the functioning of the intersetion of Tomoka Oaks Boulevard with North and South St. Andrews Drives. The intersection is complicted by an unusual diamond shaped island with essentially unrestricted traffic movements around the island. The applicants were asked to assess functioning of the intersection with the project impacts considered. The applicants did this assessment and report that while the report stated that a roundabout would be the safest and most effective design, the intersection will function within the level of service with no improvements needed. This does not mean that there will not be more traffic and the associated risk for more traffic safety incidents due to the project. It only means that the artificial level of service designation will not be exceeded.

There are some concerns about the output from this analysis. The study reported 18 conflict points (12 major and 6 minor) but a map showing the conflict points was not located in the traffic study material. I have some concern that the model run did not capture all of the legal turning movements through the intersection. I did an overlay of the legal traffic movements as I understand them and counted 15 potential conflict points not including the seven driveways. It would be comforting to know if the model fully included the allowable traffic movements.

In addition to the potential conflict points, the model may not have factored into the analysis the restricted turning radii at the east and west end of the diamond. The turning radii in these locations are so tight that anything other than a staandard sedan or small SUV has trouble turning around these two points. Delivery vans, service providers with trailers, and most any kind of larger truck will have to make more than one attempt to complete the turn or drive over the curb. These are turning movements that are relatively easily accommodated now given the current traffic volume and the lower volume of vehicles attempting these restricted turns. Adding another 2,700+ trips to the intersection can only aggrivate these issues. At a minimum the applicant should be required to improve the turning radii at the east and west points of the island. Ideally the diamond island should be replaced with a roundabout.

The applicant is proposing to construct a sidewalk on the south side of Tomoka Oaks Boulevard from the project entrance to Nova Road. The Tomoka Oaks neighborhood is very active with walkers, joggers, and cyclists, and the addition of 2,700+ trips will increase pedestrian exposure. Again, remember that operating within the designated service does not mean no increase in potential accidents involving pedestrians. The project should be required to provide sidewalk on both sides of Tomoka Oaks Boulevard from Nova Road to the project entrance.

PROJECT NARRATIVE COMMENTARY

As part of the application package, the applicants supplied a narrative that touts the wonderful benefits the project will bring to Ormond Beach and discusses how the proposed project supports the goals, objectives and policies of the City's comprehensive plan. This section will discuss some of these policy statements.

- The applicant response to Policy 1.1.2 assumes that sound planning for residential areas includes only recreation facilities and pedestrian amenities. More is involved as we discuss in our section on compatibility. The project will provide recreation area (although they are seeking exemption for the indoor recreation requirement) and sidewalks on the neighborhood streets. The 8-foot wide trail cited in the narrative response is no where to be found on the concept plan.

- The applicant commentary on Policy 1.1.6 cites infill development and a mix of lot sizes and unit types. The limitations on the benefits of the project as infill development have been previously discussed. The project includes a variety of proposed lot sizes, but the project does not propose a variety of housing types as stated in the narrative. Only single-family units are proposed.

- The applicant commentary on Policy 1.1.14 exagerates the project benefits. As proposed, the project is no more walkable than any other neighborhood where sidewalks are required by City code. A proposed multi-use path is not in evidence on the proposed cocnept plan. The response assumes that repurposing open space (the golf course) as housing, even if infill housing, is a community benefit.

- The applicants cite Policy 2.2.5 as supporting open space by providing infil development. Apparently the open space that is being preserved is somewhere else in Ormond Beach. While the proposed project does have signnificant open space as part of serveral elements of the plan, the overall open space serving Tomoka Oaks will necessarily be reduced.

- The applicants' citation in Policy 2.4.7 and 2.4.10 continues to reference benefits (multi-use trails, varied housing types) that are not evident in the concept plan submitted for consideration.

The applicants' case for support of the comprehensive plan policies is weak and cites only selective aspects of the development rather than a full accounting of the project consistency with the policies.

OTHER ISSUES OF CONCERN

A project of this size and complexity will have a number of concerns and issues both major and minor. The preceding discussion focused on the most significant neighborhood concerns, but there are other items the Planning Board needs to consider before a recommendation should be made to the City Commission. These items include:

- The plan package includes a number of provisions which allow the developer to self-amend the plan without any standards or conditions that would allow the staff to insist the project be completed as approved. For example:

    - We cited the provision in the design guidelines that allows the development to amend the design provisions at will.
    - The concept plan includes a note that the lot sizes are conceptual and can be modified to presumably change lot sizes from those shown on the plan in areas other than those that abut the perimeter buffer.
    - The natural preservation and buffer plan includes a note that allows the developer to modify any open space area by up to 20% without any reason or standard to support the revision. This provision applies to all areas except the 50-foot buffer.

    These self-amending provisions need to stricken from the plan or modified so that they are tied to specific standards that allow the staff to follow through on the construction of the plan as it may be finally approved.

- The buffer design seems to be over complicated. The applicants are proposing a Type 4 buffer and the staff is requesting a Type 6 buffer which the neighborhood supports. Whichever design is finally approved, the buffer planting should be brought up to standard for any area of the buffer that is deficient. Plantings should include basic native species and trees that already grow on the property. If this is done, eventually watering needs should be reduced or eliminated and maintenance of the buffer area limited to mowing and periodic shrub management. The proposed plan seems like a way to avoid maintenance and reduce landscaping costs.

- The applicants spent a lot of effort on a layout of perimeter lots comparing the view areas with 80-foot wide lots and 100-foot wide lots. They claim that the 80-foot lot configuration offers more viewing gaps between units. This may be true, but the argument misses the point that existing housing abutting the project has no interest in how many times they can peek between the new units. The valuable open space views will occur between the existing and new units, while any view between units from the existing neighborhood is only going to provide a view of other houses in most cases.

MEMORANDUM

TO:	Steve Spraker, AICP, Planning Director
CC:	Tomoka Oaks Golf Course Committee
FROM:	Thomas Harowski, AICP, President
SUBJECT:	Tomoka Reserve April 28, 2023, Submittal
DATE:	June 15, 2023

As I have with earlier versions of the Tomoka Reserve I have reviewed the June 8, 2023 submittal from the applicants for the development on the former Tomoka Oaks golf course. The comments I have offered in this memo are mine alone based on my knowledge of the neighborhood, past plan review and planning practice. Some of the comments may seem minor, but it is my understanding that this set of documents will become the regulatory document for the project if approved. I think it is important thst the approved plans be clear and correct so that enforcement of the project requirements will be as effective and complete as possible. I have presented my comments in page order.

Cover Page

- I repeat a comment from my last review regarding the number of model homes. The plan limits the model homes to 16. Is there a specific reason why there is a cap on the number of model units? Does model refer to the number of distinct unit designs or does it refer to the number of units the applicant plans to build as "models" without regard to floor plans and the exterior design? This term should be clarified.

- Note 5 states that the building setback shall be no less than 50 feet from the project boundary. Since each lot has a rear yard setback defined elsewhere in the plan set, what is the purpose of this note? The 50-foot perimeter buffer is clearly delineated elsewhere in the plan set.

- The cover sheet again calls out the Type 4 buffer plantings when the City staff and neighborhood have supported the Type 6 buffer. Is it the staff intent to pass the buffer type determination to Planning Board and City Commission as a policy decision item?

Overall Development Plan

- I saw staff comments to the effect that minimum lot widths in planned developments have, by policy, been kept the same as the underlying zoning (assumed R-2 in this case). Again I assume this item will be referred to the Planning Board and City Commission as a policy decision item.

- If the 50-foot wide lot product remains a part of the final development plan, I strongly urge the city to insist on alley access for these units. Given the dimensional standards listed elsewhere in the plan set, the maximum unit width on a 50-foot wide lot is 35 feet. Assuming a 2-car garage width of 18 to 22 feet, the only practical design is a snout house with the garage dominating the façade. This condition is one of the design outcomes that the neighborhood is hoping to avoid, espcially with a string of 17 consecutive lots. Using an alley product will move the garage to the rear of the unit. The front of the unit can be moved forward on the lot to allow sufficient room for driveway access. (See photos at the end of the report.)

- The plan shows the sidewalk connect between the project and the Nova Road intersection as only located on the south side of Tomokas Oaks Boulevard. The sidewalk shold be provided on both sides. The south side has three single-family units and the north side has two single-family units and the condominium. Both sides deserve safe pedestrain access when in excess of 2,700 new trips are proposed.

- The concept plan still includes the vague note that lot sizes are conceptual and will comply with the ranges provided in the plan. The lot size ranges have been removed so I am not clear on what this note is to accomplish. Is the note intended to allow lots designated as one size to be changed to another size lot so long as the overall lot total is not exceeded? This note needs to be explained and clarified or deleted.

- The location of some of the park areas seems haphazzard. More comment on this item is provided below.

- What purpose does the emergency access threshold serve? Is this a timing mechanism for mandatory installation of the emergency access?

Open Space Plan

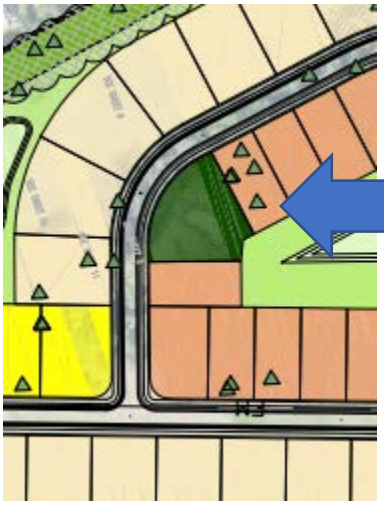
- The placement of the smaller park areas seems a little random. It does not appear that locating the smaller parks with trees to be preserved was a primary factor in all cases, and some of the smaller parks just seem to be left over space they decided to call a park.

- The applicants are asking for a waiver of the indoor recreation requirement. Is this waiver typically an automatic grant, or is some specific justification required?

- The typical road way cross-section continues to show the roadway as 24 feet when four feet of this area is curb that is not typically used a travel area. The cross-section should be corrected.

Sign Plan

No comments.

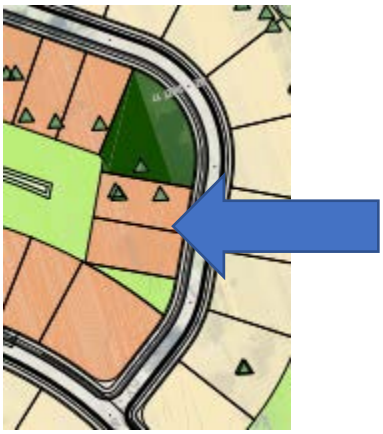


Natural Preservation and Buffer Plan

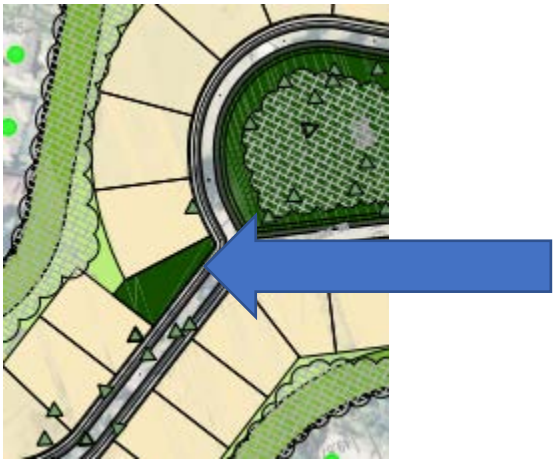
A lot of the designated "natural preservation area" has no trees meeting the standards for inclusion in the tree survey. Is the city aware of other trees and natural plantings in these areas. Absent trees or other plantings does this area qualify as natural preservation area?

The lot breakout by "depth of buffer" is misleading. The buffer area that solely serves the purpose as a buffer is 50 feet in all locations. There are lots where other open space and retention area provides more distance between existing and proposed units, but these areas serve other functions in the plan and have lesser landscaping and potentially less permanence.

The note remains that allows the applicant to modify areas outside the 50-foot buffer by up to 20% without any standard to support the modification. (See the note above regarding the permanance of the claimed buffer.) Does the modification of the open space and stormwater areas by up to 20% compromise any of the standards for the 20% natural preservation area and the stormwater functions?



Relocating some of the proposed park area could easily be done to preserve more of the existing tree canopy. Some examples follow.



Shifting the park area to the right by one lot will preserve four additional trees.

Moving the park area to the other end of the row of lots will preserve 7 or 8 additional trees and provide a more direct link between the main recreation area and the open space area in the center of the adjacent block.

This open space should be swapped with the two adjacent lots to provide a complete through link mid-block. Walking areas and other passive recreation options can be more fully developed.

Is the goal of this green space tail to link open spaces? What purpose does this small area serve given the adjacent larger common park area. This space might be better used to increase lot size.

Typical Lot Layout

- Is the 75% impervious area allowed for each lot used as the basis for calculating the stormwater runoff volume?

- The chart still has typos that need to be corrected (Front z) (Front 5)

- Note 2 calls for a maximum front yard setback measurement, but no maximum setback is proposed in the chart.

- Note 3 allows garages to be front loaded or side loaded, but as a practical matter only the 80 foot wide lots have sufficient width to allow for a side loaded garage on any interior lot. As noted earlier the 50-foot lot diemnsions essentially mandate a snout house front-loaed garage. Trying to do a side entry on a 60 foot lot is difficult to do with the turning radius of anything other than a small sedan.

- Note 1 specifies a specific measurement protocol for building height. Why is this needed?

- For corner lots there is no specific setback for a garage. Is the setback the same as for the principal structure? Is the applicant likely to claim the noted side setback applies to interior and corner lots? If so, why should a garage on a corner lot project further into the secondary side yard than the principal structure?

Architectural Exhibit

- The provision for allowing a repeat of home designs every other lot is insufficient to support a diversity of dwelling unit types equivalent to the existing neighborhood. Having a diversity of housing styles is an essential element of compatibility of the proposed project with the existing neighborhood. Units should be limited within a "block face" dimension which includes both sides of the street. A block face of 400 feet is reasonable. Allowing the same unit two times within a given block face promotes diversity of housing styles while at the same time not demanding too many models. With 80-foot lots (10 units on the block face) a minimum of five models are required. The cover page proposes 16 models so it does not appear to be a hardship. When I have used a rule of this type in other communities, typically a waiver to the repeat rule is allowed when the project gets to the last five or ten percent of the lots to allow for the smooth close out of the projejct, and by then sufficient diversity is built into the project.

- Why exclude brick from the allowable exterior materials? Brick is a very common exterior cladding in the neighborhood.

- Under driveways what is contemplated with decorative concrete? Is this colors, textures, banding, something else? Maybe a better definition is needed.

- The applicants should be required to propose a minimum number of residential designs with front entry and side entry gargages to ensure that residents have a reasonable choice. Front entry designs should include recessed garages and arage designs even with the front façade as well as projecting garage designs. It is not uncommon to have a rule like the one proposed and then simply not offer units in all of the options.

- How are any of these rules on driveways and garages going to apply to the 50-foot wide lots?

- The modifications landguage needs to be removed or substantially modified. The language in this sections allows the ARB to dismiss all of the standards at their whim. Remember the applicant will be the ARB for most of the development period

Vehicle Turn Plan

The vehicle turn plan omits the diamond intersection where the turning radii at the east and west end of the diamond are very restrictive for anything but standard sedan. People do drive around the island in this manner and more will do so with the added traffic. The turning radii at the intersection need to be improved.

Stormwater and Utility Plan

No comments.

Amenity Plan

Landscaping. The best tree selection is to use what is growing on the property now.

Is a street tree program proposed? Required?

Parks should be modified based on earlier comments.

The proposed park designs should be strenghted beyond just random notes about picnic tables. There are several opportunties to create valuable community spaces using the proposed parks and designated open space areas. Walking trails are an option to add diversity for walkers, joggers and cyclists beyond just using the street areas.

Traffic Concerns

The applicants contend, that other than a traffic signal, their modeling shows no improvements are needed. They contend that the diamond interchange will work effciently with only stop sign controls and they claim their modeling shows that traffic backing up from the Tomoka Oaks Boulevard intersection with Nova Road will not block the driveway intersection for the Escondido condominium project. They also fail to provide sidewalk on both sides of Tomoka Oaks Boulevard from the project entrance to Nova Road. My comments are as follows:

1. Any project approval needs to include a specific timeline for installation of the traffic signal at Nova Road. Traffic impacts will begin with the initiation of subdivision construction affecting an interesection at Nova Road that the applicants have publicly stated already meets the standards for a signal. Application to FDOT for a permit to construct the signal should be required concurrent with the submital of any subdivisions plans seeking approval.

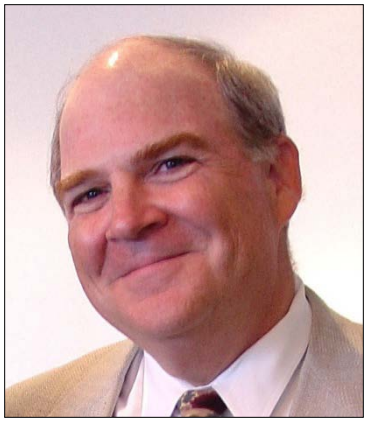
2. The diamond interchange is a difficult design to manage. The model tends to assign trips to the logical direction (bearing right) when exiting the project, but both right and left exits are permitted by the current traffic control. The model also does not recognize that the turning radii available at the east and west ends of the diamond are insufficient for any vehicles except standard sedans and smaller pick-up trucks and SUVs. Any larger vehicle or vehicle with a trailer, which are commen in the neighborhood, usually requires some jostling to make the turn. This movement is limited in the current condition to vehicles crossing between North and South Saint Andrews and there are relatively few vehicles making this maneuver. However, when vehicles make this turn, they cause delays for other motorists and these impacts will be much more common with the added project traffic. At a minimum the applicants should be required to improve the turning radius at these two locations.

3. The applicants have stated in our meetings with them that traffic stacking west from Nova Road on Tomoka Oaks Boulevard will not block any driveway access. Anecdotally I can report I personally witnessed an occasion in the past week where traffic waiting to exit the project stacked back past the Escondido driveway. This situation might improve with a traffic signal, but the benefits of the traffic signal in exit timing may be off-set with the higher traffic volumes from the project. It might be appropriate to consider moving the Escondido driveway further to the west and closing the existing driveway. In any event the modeling used by the applicant to predict the stacking should be carefully reviewed including the assumptions applied.

4. If sidewalks are to be provided from the project entrance to Nova Road, they need to be on both sides of Tomoka Oaks Boulevard. The applicants are proposing only the south side.

Alley Lot Design

This is a sample of a single-family detached unit on a 50-foot wide lot. This photo is from a neighborhood in Venetian Bay where alley access lots have been designed for an area of somewhere between 15 and 20 blocks. Each block is 300 feet long with six lots on each side of the alley. The units are diverse designs and sit forward on the lots to allow adequate space in the rear for garage access and off-street parking.



This is a view of the alley serving the house pictured above. The alley is a one-way design that allows for a reduced alley width. The picture shows access to garages is provided with sufficient driveway area to accommodate two vehicles while keeping the alley clear for traffic.

On-street parking is still possible in front of the units for guests and functions such as deliveries.

CITY AND REGIONAL PLANNING – DEVELOPMENT SERVICES

CAREER PROFILE:

- Extensive background in directing advanced planning services including comprehensive planning, zoning and development regulation, building inspection services and code compliance; conducting small area and neighborhood studies, annexation studies and topical studies; presenting information to City Commission and Planning Boards; reviewing land use proposals; administering development regulations and formulating urban development strategies.

- Experience in implementing major capital construction projects through municipal capital improvements programs and tax-increment funded community redevelopment programs.

- Experience in grant writing and grant management for a wide range of local, State and Federal programs.

- Proven ability to manage professional, technical and support personnel, encouraging new ideas and cultivating a creative team atmosphere.

CAREER DEVELOPMENT:

TMH Consulting, Inc., Ormond Beach, FL 32174 2005 - present

President

- Provide planning, development and growth management services to an array of public and private clients.

City of New Smyrna Beach, FL 1991-2005
Director of Development Services
Community Redevelopment Agency Director

- Responsible for comprehensive planning activities including long and short range planning; engineering design of municipal road, drainage and recreation projects; construction management for all of the City's public construction, and oversight of the citizen code enforcement program.
- Manage a staff of 15 planners, engineers, and support staff and an annual budget of $3.5 million.

- Prepare and manage the City's comprehensive plan including plan amendments, special studies, annexations, and interlocal coordination efforts.

- Instrumental in planning a new development area of 10,000 acres that incorporates traditional neighborhood design concepts. This program requires multiple properties to develop in an integrated manner to produce a new urban development. Work included detailing the planning concepts, obtaining State and local development approvals, negotiating interlocal agreements, and approving specific construction plans.

- Successfully completed the Community Redevelopment Agency's key projects which include two major streetscape renovations, reconstruction of four major park facilities, a major bicycle/pedestrian facility, façade grant programs, economic incentive programs and business training.

- Prepare and manage a variety of grant programs that have generated in excess of $3 million in capital construction funds for parks, streetscape projects and a variety of other public improvements.

- Serve as the City's representative on Metropolitan Planning Organization technical advisory committees including the long-range transportation plan, TIP and UPWP.

PRIOR EXPERIENCE:

City of South Daytona 1987-1991

As Planning Director, responsible for long-range and current planning activity and oversight of construction permitting and inspection. Supervised staff of three. Planning work included preparation of the City's comprehensive plan, a detailed parks master plan, and a complete revision of the City's development regulations.

Florida Production Engineering 1984-1987

Responsible for inside sales coordination, purchasing and inventory management for a company manufacturing automotive components. Obtained certification in inventory and production management while at FPE.

Independent Planning Consultant 1983-1986

Completed reports and studies for a variety of public sector clients. Work included fiscal impact analyses, community development block grant programs and comprehensive planning studies.

Daytona Beach Area Chamber of Commerce 1983-1984
Served as staff to volunteer committees working on issues of interest to the local business community. Developed statistical reports on the Daytona Beach area.

Russell & Axon Consulting Engineers, Planners, Architects 1977-1983
Senior planner responsible for developing comprehensive plans, CDBG programs and special studies for public sector clients ranging in population from over 70,000 to under 1,000.

City of St. Petersburg, FL 1976-1977
Developed land use plan for a predominantly minority area of the City. Assisted with future land use plans for other sectors of the City.

Volusia County Planning Department/Volusia Council of Governments 1973-1976
Completed a variety of Section 701 planning studies on topics of countywide interest and served as contract planner for current planning needs in several small communities in Volusia County.

EDUCATION:

Masters Degree: City and Regional Planning, Rutgers University, 1973
BA Degree: Social Relations, Colgate University, 1971
University of Central Florida: Classes in marketing and management
Daytona Beach Community College: Classes in accounting

PROFESSIONAL CERTIFICATIONS AND AFFILIATIONS:

American Institute of Certified Planners, 1981 – active member
American Planning Association – active member
Florida Chapter of the American Planning Association – active member and past Secretary
Florida Planning and Zoning Association – active member and section board member
Eta Chapter, Phi Beta Kappa – member
AICP Continuing Education Certification

[External Email-Use Caution] - OB/IT Helpdesk

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

To Whom It May Concern,

In regards to the final planning board meeting for Tomoka Reserve (Tomoka Oaks Golf Course) scheduled on July 13, 2023, please accept this email in opposition of the development.

The Tomoka Reserve project is one of questionable substance and has been so since its initial proposal. The idea of wedging a neighborhood within a neighborhood like a nesting doll is strange, and the superfluous nature of the proposed buildout, stranger still. These developers have no interest in preserving the character of Tomoka Oaks or Ormond Beach. They have been uncompromising in their lot sizes and unconcerned about the hazardous traffic issues they will cause. Allowing them to proceed with this buildout will diminish home values and rob those of us in Tomoka Oaks of our peaceful community.

The proposed development is not compatible with the existing Tomoka Oaks. The lot sizes are smaller which allows for approximately one and a quarter homes for each existing lot in Tomoka. My property is on the golf course and holds a premium value because of the expanse of greenspace we back up to. The value of my home, and those like mine on the golf course, will be drastically diminished if the development is allowed to proceed. Future buyers much prefer expansive views of greenspace to that of home, after home, after home, as far as the eye can see. Furthermore, during the most recent SPRC meeting, the developers expressed that they wanted a large, gated, entrance to the community that will be within Tomoka Oaks.The current entrance to Tomoka Oaks is a modest sign that leads to our community. Under the developers plan, you would pass our modest sign and see within our entrance a secondary entrance, with elaborate architectural features and a gate. How is this compatible? How does this blend in?

The addition of nearly 300 new homes and their residents will create undue crowding in the area. The Trails Shopping Center is already congested. Most days involve a fight for a parking spot if a trip to Publix is needed. On the weekends, parking at The Magic Forest Playground is already a struggle without the addition of new residents. Ever tried to get out of the neighborhood using the exit on Main Trail and Granada when school is about to start? You'll be backed up past the condos and well into the Trails subdivision. This will not improve when more families move in and are driving to school and/or work first thing in the morning.

To add approximately 600+ new vehicles to the constantly flowing traffic in and out of Tomoka Oaks is daunting to say the least. The developers stated at the last SPRC that they will not be doing anything to address the diamond at the front of the neighborhood. This means that these proposed 600+ vehicles will have to navigate around the diamond and feed into the steady stream of cars that already abound at this unique roadway feature. If you have ever driven around it, you would be hard pressed that this will not be an issue. The developers also

stated no interest in devising a right turn lane from Tomoka Oaks Blvd onto Nova Rd. How do they propose that all of us get out of the neighborhood? The queue to leave backs up past Escondido at present, and would undoubtedly be much farther back with the addition of new residents. A traffic light is proposed for the future, but our ability to safely and efficiently exit our neighborhood will be rendered impossible until such a time as that traffic light is installed. Also, how can the installation of a traffic light be suggested so close to the train tracks? Cars going northbound on Nova Rd. routinely back up past the neighborhood entrance when a train rolls through. With the addition of traffic light, cars coming southbound will now also be stacking up, creating a scenario seen often in Lake Mary (Seminole County) where cars don't get clear of the tracks and are hit by the train.

In my opinion as a resident of Ormond Beach and Tomoka Oaks, we are at capacity in this quadrant of the city. We do not have adequate shopping and recreation facilities to support adding more residents. If anything, more recreation should be added to increase the quality of life for those of us who already call Ormond Beach home. Are you aware that most of the local golf courses are on a waitlist for new members? These include Halifax Plantation, Oceanside, and Riviera Country Club. There is a high demand by your current tax paying residents for facilities that provide outdoor entertainment, not a high demand for more people to congest our already busy town.

Your time and consideration of the above concerns are much appreciated.

Sincerely,

Kelsey Kipi

Subject: For Planning Board - Tomoka Reserve
Date: Friday, June 23, 2023 5:35:07 PM

[External Email-Use Caution] - OB/IT Helpdesk

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear SPRC and Planning Board -

1) Combining house construction and Tomoka Oaks Blvd road changes will create an unsafe and congested roadway. We would like to see Tomoka Oaks Blvd design be specified and most work completed before houses are built in Tomoka Reserve. Otherwise the combination of ripping up the roadbed and current traffic, Tomoka Reserve construction/utility trucks, bicycles, golf carts, walkers, etc. will be unsafe.

2) The Tomoka Oaks Golf Course entrance was designed to safely allow about 100 vehicle trips daily to Nova Road. Tomoka Reserve will add about 2700 daily trips on the same Tomoka Oaks Blvd. This is clearly unsafe and should not be allowed by the Planning Board and City Commission.

3) At the Dec 1, 2022 meeting Tomoka Reserve indicated that FDOT reported the Nova signal would take about two years to install. Without a traffic light all the construction vehicles on Tomoka Oaks Blvd, plus new electrical, sewage, water lines installed will paralyze Tomoka Oaks Blvd.

4) Speeding traffic is already a problem in Tomoka Oaks and the OB Public Works department is installing a speed table to slow down drivers. Pedestrians have been killed/injured on old Tomoka Oaks roads. These low volume roads were designed with beautiful curving landscaped narrow single lanes with multiple islands that have no sidewalks. On a typical day there are bicyclists, baby carriages, skate boarders, scooters, golf carts, dog walkers and parked cars/trucks sharing the Tomoka Oaks and Trails roads with drivers weaving around the obstructions, many times above the 25 mph speed limit.

5) Much of the current traffic and new Tomoka Reserve traffic will be redirected through the Trails on Iroquois and Rio Pinar causing a dangerous situation on the Trails' narrow, sight-line constrained roads with multiple islands that have no sidewalks.

6) Tomoka Reserve should install two sidewalks from their new development to Nova Road. At this point their plan only includes one sidewalk on the South side of Tomoka Oaks Blvd. a) This penalizes the houses on the South side by routing all walkers, baby carriages, skaters, bicycles, runners, etc. on their side of the street. b) all non car/truck traffic from N St Andrews will have to use the street to get to the single sidewalk and will result in unsafe movement across the already dangerous traffic diamond.

7) The traffic diamond proposed by Tomoka Reserve, causing all traffic to stop/go controlled

only by four stop signs is inadequate and dangerous. The current intersection is dangerous enough (I've witnessed several near collisions) with the current level of foot, bicycle, cars and trucks. Adding the Tomoka Reserve traffic and construction vehicles to the mix will injure/kill people. The traffic diamond will also look much worse than the current grassed and treed center island.

8) TOHA and Tomoka Oaks residents are unable to find any traffic engineers willing to rebut the findings of the Tomoka Reserve traffic engineer because no outside engineers are willing to testify against a large developer that could hire them for future jobs. This gives the developer an unfair advantage in the development review. Please appoint an independent outside traffic engineer to examine the Tomoka Reserve traffic study.

9) Houses on the golf course will lose value when their backyard view becomes another house instead of the open fairway. No one can argue otherwise. Homeowners on the golf course should be compensated for their loss in value and their property taxes should be reduced.

10) The Tomoka Reserve plan is required to design for a 25 year flood by code. The latest hurricanes have rated at least 500 year floods in Ormond Beach by the authorities. This means that current homes that are downhill from Tomoka Reserve will be flooded in the next large hurricane because of the new impermeable surfaces in the development. How can Ormond Beach responsibly accept this outcome?

Thanks for listening,

Tom Fitzgibbon and Denise Corley | 3474648531 | 51 S St Andrews Drive, Ormond Beach, FL

[External Email-Use Caution] - OB/IT Helpdesk

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Planning Board members, Mr. Spraker, Major Partington, and Commissioners,

My name is Denise Corley, my husband and I own a house on S. St. Andrews, #51.

After a long search we bought our house in December of 2019. In February 2021 we heard the golf course had been quietly sold to a developer.

We joined a group of neighbors who formed the Golf Course Committee to find out how we could prevent the golf course from being developed, were there covenants surrounding the golf course and the 2006 PDR, and/or try to have a better outcome, for our property investment and our community.

One neighbor at the community meeting in February said it best, this news of the development was like finding out our community had a cancer metastasizing right in the heart of it.

I see very few changes in this proposal in comparison to the last one.
Ormond Beach has never had a development proposal like this one where every border is going to affect an existing homeowner-the size and scale and disruption to so many people is unconscionable.

Quality of life will be ruined.

- For the residents who paid a higher premium to live on the golf course, this sale and development plan has felt like a betrayal of public trust. The 178 homeowners that are on the perimeter are looking at a Williamson Blvd type construction site in their backyard. Bulldozing of trees, earthmovers upending toxic soil, noise and dust. Unrest, from 7am-7pm six days a week.
- What is the community benefit? Does the city of Ormond Beach need these homes? Does the city have the services to cover this addition right now? This project will increase the use of schools, hospitals, city services, police and fire departments and more traffic on already crowded roads. I noticed the schools are running at 100% capacity or more, but more students from this and other projects does not seem to change capacity.
- There are 546 homes in Tomoka Oaks and an additional 276 is 50% more cars and traffic on our quiet narrow streets.
- Tomoka Oaks Blvd, the ONLY Entrance and Exit with the diamond configuration leading into this badly designed project is going to cause congestion, traffic, wait time increases and noise. The amount of traffic traveling on S. St. Andrews heading to Rio Pinar or Irquois is going to change the character of the neighborhood.
- Despite the traffic report commissioned by the applicant, Tomoka Oaks Blvd will have to be redesigned to squeeze through another 300 cars in peak traffic hours. And why do taxpayers have to fund this bill, when this project is being imposed upon them? The developer should pay for the design of Tomoka Oaks Blvd. It is an example of why this development is ill suited for this location.
- Timelines are not on the table now but I think the traffic light at Tomoka Oaks Blvd and Nova should be in

place before the development project on the golf course gets started. The need for a redesign of the Tomoka Oaks Blvd will become obvious. This proposal is bringing problems with it.

- If approved I would hope city planners would support the immediate planting of the buffer to start the screening of the invasive construction that is being set upon so many.
- This project is projected to last 5 years in a phased plan that is yet unknown.
- More traffic driving through the neighborhoods to get to Granada Blvd on narrow streets often blocked by lawn care services and other service vehicles will be twice as dangerous. People riding bikes, walking and pushing baby carriages often have to walk past the blindside to get around a vehicle on the street.
- The soil report- revised Updated TIA revised 06-07-2023 states arsenic and organochlorine toxins in the soil of the golf course will require strenuous remediation before houses can be built. Let sleeping dogs lie.
- It appears demolition of the existing buildings took place before the submission of the soil samples. While the samples were taken before the demolition of the club house, golf shack, toilets and the Golf Course Maintenance building. Further examination of the report points to several remediation steps that need to be performed for the "Soil Cleanup Target Levels" to meet standards for residential housing.
- The recommendation that the toxic soil be transported and piled on the open space and amenity areas of the proposal gives no comfort to the existing residences living close to the open spaces. Even the air-borne toxins released by moving soil is discomforting. Who will be monitoring the soil remediation? Does the city hire a firm to oversee the process of remediation of the soil because it's an important health issue? Will the soil containing unacceptable levels of Arsenic, Organochlorine (banned in the 1970's), Chlordane, Dieldrin, Heptachlor epoxide and Toxaphene be removed off site or mixed with other soil?
- This project is proposing 7 stormwater drainage ponds mainly on the perimeter of the property many abutting the 50 foot buffer of the Tomoka Oaks residence. These dry ponds will be surrounded by a berm. I hope this berm isn't the toxic soil piled up right behind all of our houses in a concentrated form, rather than what it is now spread over the course with the heaviest toxicity on the greens and around the maintenance shed.
- The dry stormwater ponds will direct stormwater runoff into close proximity with the homes of Tomoka Oaks. Nobody really knows how this system will work but we do know that runoff of fertilizers, poisons, animal feces, petroleum products and rubbish will end up in these ponds. Tomoka Oaks is located on a ridge built by the Tomoka river which lies below grade of the Tomoka Oaks subdivision and the golf course. Water doesn't just travel down, it will move to the lowest grade. The ecological logic would be good if this site weren't a golf course with decades of chemicals being used on the soil.
- One way water will travel to the stormwater dry ponds the proposed swale ditches behind the property line of the houses. These open air water drains are known to be mosquito habitats along with the stormwater dry ponds. Tomoka Oaks does not utilize dry ponds, it seems to have a pipe system.
- The developer hasn't decided if this is a gated community or not. The HOA of this proposed community is being heavily burdened with the maintenance of 7 dry stormwater ponds, a 50ft landscape buffer around the entire perimeter of the project, 2 ponds, and 8 acre amenities area and pickleball courts, a couple of proposed pavilions and 8 open space areas with picnic tables and the maintenance of the entryway lawns and structure and insurance of course. I am concerned that the HOA can just vote to change their by-laws and do away with some of these responsibilities? What assurances can be implemented to protect the 50' buffer and other HOA responsibilities?
- Almost 2,000 trees, 21 species counted and identified by Zev-Cohen. 16 trees were identified as historic. The proposal states they will make every possible effort to save these 16 trees. Many other trees located

in the buffer most likely will not be bulldozed. Other large trees that are bulldozed will be replaced with a 10' 2.5 caliper replacement. The point is, it will change the character of the entire subdivision when starter trees replace grand trees.

- Is the plan so loose that they don't know at this point what they are clearing and what is not being cleared. We need a count of how many trees are being saved and how many are being cleared. We do not want to see another Granada Blvd clear cut and city planners saying whoops. Please ask for specific details on this plan!
- Unlike Tomoka Oaks where 100' lots widths are average with varying square footage homes throughout the subdivision, this proposal sandwiches in the center cavity of the proposal the smallest tightly packed housing products. There doesn't seem to be room for a garage and I don't think I've even seen any conceptual pictures of what these "Village" houses would look like. So this area is not diverse and then the area in the northern corner seems to be larger lots with more open space or more upscale and a community unto itself. Claims of diversity are sketchy at best.
- The proposal touts the fact that the "centrally located smaller width homes are appropriately screened from the existing neighborhood" points to the fact that they are less desirable and not compatible or appropriate in the neighborhood.
- The proposal keeps referring to this project as some sort of gallant saving of a neighborhood, calling it "urban infill". This was a failed golf course, why it failed we don't know, bad management? Golf is on the rise. We know that this golf course functions as Open Space and recreational space in an established suburban neighborhood for decades. It is our Central Park. Calling it "infill" makes it sound as though it was a ghetto in an urban city. I think the use of this term "infill" is to diminish the value of this gem that is a piece of land functioning in a healthy and wealthy community, even in its recent natural state.
- I disagree with the statement that people do not want large lots. Some want large lots and large houses. The quarantine of the pandemic is over and people want to be outside and enjoy nature's blessings.
- If this is the zoning plan approval why are the lot sizes not marked and the square footage of the homes not marked on this submittal?
- Page 3 in the table has 300 as the number of homes. I believe that is incorrect.
- Why is the Typical Pavement selection not determined? Isn't this the point when the plan is nailed down and approved- to know what exactly is being approved.
- On page 6, a Note states, the buffer width shown on this sheet "May be subject to change at the time of permitting". The represented widths may be reduced or enlarged by no more than 20% but maintain the minimum 50' buffer. This is too open ended. Where on the map is this flexibility needed?
- Page 7, Lots are too small, setbacks aren't large enough from the street. Lot sizes should be consistent with the Tomoka Oaks. Where are all the cars going to be parked?
- Page 8, "Preferred architectural themes" does not sound like a commitment, it sounds wishful thinking instead of submitting an actual plan. Blank walls look bad and shouldn't be allowed, plantings will not hide the fact of an undesirable feature.
- It may or may not be a zoning platt question but no clue has been given about the structural building materials cinder block or stick wood. If this is a quality project I believe the material will be cinder block. With the various decorative elements described.
- Do we know whether the developer will be installing fences in the neighborhood? I am in favor of the new house lots should have a backyard fence marking the end of their property and the beginning of the buffer

Page 9, why should this developer be granted the ability to remove a tree and an Island in Tomoka Oaks neighborhood? He should not have bought a house for the second emergency exit that didn't give him the turning radius needed for a firetruck.

- Pages 14-31, It is unclear by the illustrations of the buffer plants where the plants are located in the buffer. The plantings appear vaguely in a straight line maybe 15' wide. Will these plant screens be on the far edge of the 50' buffer or at the property line of the Tomoka Oaks homeowners backyard?
- Keep in mind the original plan when developed called for the golf course to have a 99 year covenant. Even Dr. Rylas planned PRD put a covenant on the golf course remaining a golf course or open space for perpetuity. That PRD plan had to expire before the perpetuity clause would expire which it did in 2014. In 2021 the land was sold to a residential developer.
- I pray that Mr.Rubin will see that this proposal is wrong for all the reasons listed above and will offer the land to the city or make a philanthropic donation to the city of Ormond Beach, maybe a matching grant to recover his investment.

Subject: For Planning Board - Proposed Tomoka Oaks Development
To: <comdev@ormondbeach.org>

I am respectfully requesting your careful consideration of the development proposal being put forth by Mr. Rubin and Company to create a new and completely different neighborhood in the middle of my much beloved already existing neighborhood.

1. Traffic is a MAJOR concern and I do not see how anyone such as yourselves who live and work in Ormond Beach and travel on Granada, Nova, Clyde Morris, and Williamson can possibly approve putting more cars on our already crowded roads.

2. If I understand correctly, there is a FDOT approved project that will occur in the not too distant future that involves the revamping of Nova from US-1 to Granada. Basically, a major portion of Nova from Granada north is going to be reduced from 7 lanes down to 4 with widened sidewalks and bike lanes with raised and landscaped medians. How is that going to work with the contractor traffic on Nova and altered traffic patterns that will result at the Trails traffic light? Traffic studies have been done, but they do not seem to accurately reflect the impact of a LOT of existing Tomoka Oaks residents seeking alternate routing through The Trails to avoid proposed construction traffic.

3. Isn't it time for someone to start questioning the "models" that the Traffic Engineers continue to put forth indicating acceptable impact from proposed development?
Isn't it time to ask if what they say makes sense? Studies were done that said a proposed apartment project would have less of an impact on Williamson than the previous movie theater. REALLY? An apartment where people live and have to go to work and maybe take children to school at regularly scheduled work/rush hours is going to be less of an impact than customers attending a movie ... most of which are after 6 pm or on the weekend? Along the way, some governing bodies saw the same style report that has been presented to you and they made approvals based in part on that information, but surely you can see with your own eyes that the "models" have not proven to be accurate and we are all paying the price any time we need to travel on Williamson north to Granada and those apartments haven't even been built yet!

4. Speaking of Williamson, have you or a loved one or a friend's family member had to go to Advent Hospital lately? The horror stories are real - excessive traffic to get through; 6 hour, 8

hour, 10 hour waits; leaving the Emergency Department at midnight without ever being seen by a doctor; a lack of bed space so consistent that there are patient white boards with privacy draping permanently set up in the halls; and no current proposal for expansion ... despite the fact exponential residential units are in the pipeline, thus bringing more people that cannot be adequately served by the existing system.

5. The most recent proposals from Mr. Rubin do not reflect compatibility with the existing neighborhood. Our community is distinctive and has character and large lots and trees and random architecture - and those things were likely a driving force when people chose to purchase their homes here. How can an outside developer come in with what some are calling an "Infill Project" with units on 60 foot lots and completely destroy the aesthetic of current citizens' homes? A February 2023 Article from Lobo Investments makes the following observations about "Infill":

Increased congestion

Infill development can increase traffic congestion in dense neighborhoods and put additional strain on existing infrastructure and services.

Neighborhood character

Infill development can alter the character of existing neighborhoods, leading to concerns about loss of historic or cultural significance. Furthermore, infill development can reduce the amount of available open space and green areas in already developed areas.

As it relates to the issue at hand, I hope you will agree that the word "can" should be replaced with "will" in the above comments because there is no doubt in anyone's mind that there will be increased congestion, additional strain on resources, altered character, and reduced green space.

6. Since they mentioned "green space", let's remember the City has repeatedly spent money on surveys and OB Life activities to learn what Citizens want. Please go back and review the results. People want more green space, walking trails, parks, areas for active recreation, and places where pets are welcome. Does this current project advance any of those directives? You ask for the information, but then what do you do with it? Isn't it time to start walking the walk and talking the talk to demonstrate to your community that you understand what they want and start incorporating it in future development?

I understand that we have a highly desirable community and quality of life in Ormond Beach and that is something special new people will want to be a part of.
As a result, I am realistic enough to understand that growth is inevitable. I, and a lot of other people, are of the opinion your strategy should be focused on smart growth.
So what if you decided to do growth differently than how it has been done in the past? What if the City of Ormond Beach decided to adopt a "Field of Dreams" growth plan

and "**Build it FIRST BEFORE** they come"?
This thought process would prevent stress on our infrastructure and avoid destroying the lives of people who love our current way of life.

I look forward to hearing your thoughts on this and supporting you in doing what is right not only for the Residents of Tomoka Oaks, but for ***all*** the Citizens of Ormond Beach that you work on behalf of or represent.

With Warm Regards,

Michelle C. Zirkelbach

To whom it may concern,

As a resident of the Trails I'm concerned about the additional traffic that will occur with the proposed Tomoka Oaks New Home Development. In addition to the Traffic Light at the Tomoka Oaks Entrance, adding/extending Grass Boulevards in the middle of Nova Rd from Granada Blvd to US 1 would eliminate current traffic with uncontrolled left turns.

[External Email-Use Caution] - OB/IT Helpdesk

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Planning Board, and Staff:

My name is Ashley DuFrene and I live at 118 N. St Andrews Drive in Tomoka Oaks on the Golf Course.

I am writing to express why I think you should vote no and demand less density to the proposed development of Tomoka Reserve. The planned development is requesting to literally squeeze a new neighborhood into an existing neighborhood that has been part of this community (Ormond Beach) since the 1960s. A community that for decades was advertised as a golf course community, where people bought homes on a golf course expecting that their view will always be green or part of a fairway.

Policy 1.1.3 of the Ormond Beach Comprehensive Plan lists criteria that you must abide by when you cast your vote and I am here to articulate why this proposed planned community is under the the criteria of how a new development must NOT 1) Alter the character of Tomoka Oaks or existing neighborhoods 2) Create undue crowding 3) Adversely affect the public health, safety, welfare or quality of life and 4) Present potential adverse environment impacts

1. **This development must NOT alter the character of Tomoka Oaks or existing neighborhoods**

As mentioned in my above statement this development is literally being squeezed into a current neighborhood that has had a specific charm and character about it since the 1960s. At the heart of the neighborhood was a golf course / green space that many throughout the decades enjoyed. Also those homes on a golf course were bought due to the views they received. With this new development it will alter the current charm of the neighborhood, especially those who live on the course, by replacing their green views with a wall of boxed homes.

Not the mention the years of construction that will occur in people’s backyards, which definitely alters the tranquility of the neighborhood

2.

Must NOT create undue crowding

With nearly 280 homes, that is over 900 trips a day to and from the neighborhood through ONE entrance and exit, spewing out on Tomoka Oaks Blvd. in front of homes that line the entrance and exit area (not to mention another community - Escondido Condos). This will also add to the traffic that has grown over the past 5 years throughout Ormond Beach.

Also with the construction occurring on Tomoka Oaks Blvd, and it being the one entrance and exit out of this new community, many people will divert their driving through The Trails causing undue crowding to another neighborhood.

3.

Must NOT adversely affect the public health, safety, welfare or quality of life

I don’t know if you have heard the horror stories of how overcrowding is affecting our healthcare system. I know a few people (including myself) who needed the emergency room and were met by hours of waiting, causing some to leave and not get the treatment necessary to survive. A person who lived on the Tomoka Oaks Golf Course was one of these people and unfortunately due to not getting the proper medical attention, he died this year.

Adding more homes and more population will only increase and adversely affect the public health of Ormond Beach.

4) Must NOT present potential adverse environment impacts

I feel this one is pretty self explanatory. The Golf Course is home to hundreds of variations of wildlife, from deer, to foxes, to gopher turtles, bald eagles and more. The chopping down of the trees, and disturbing the animals' space will definitely have an adverse environmental impact.

Also to consider is the Tomoka River that runs straight through the neighborhood. When we have heavy rains each summer and hurricanes throughout the years, where do you think the water will run off to? The Tomoka River. Currently the ground acts as a sponge and absorbs most if not all of the water that hits its grass blades. With 280 roof tops, asphalt streets and sidewalks, the water will no longer have the space needed to be absorbed.

The water retention system they have planned will most likely fail, like it has with many other developments throughout Florida. After Hurricane Ian, the amount of flooding that occurred throughout the state should have been a wake up call that development should slow.

Also be aware that the developer, who is from South Florida - Rubin - does not care about Ormond Beach. He cares only about making money. He would squeeze 30 foot lots on this property if he could (as we saw in a rendering previously). I know he is threatening the city with straight R2 zoning, but I know we don't have to abide by that. YOU have the power to ensure his threats if he does not get his way fall by the waist side. YOU have the power to determine what can be built on this land. Listen to your community's cries and ensure YOU are doing what is right for Ormond Beach. Not for a developers pocket who is not even from the area.

And I want to end on this note:

The previous 2006 PRD had a strong emphasis on this concept and multiple references to City Staff having concerns about the negative impacts to the existing homeowners. Specifically, it states *"The proposed use will not substantially or permanently depreciate the value of surrounding property, create a nuisance, or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties."*

I hope I articulated that what is currently proposed will in fact do what 2006 City of Ormond Beach was trying to prevent. We need our city officials to know they are about to embark on something that will affect hundreds, if not thousands, of those who live in, near or close to this proposed new development.

I appreciate your attention and look forward to you addressing these matters.

Sincerely,
Ashley DuFrene
118 N. St. Andrews Drive

To: City of O.B. Planning Board

My name is Mary Greenlees. My husband and I have been residents of Ormond Beach for over 50 years, and have resided on the Tomoka Oaks golf course , for the past 21 years .

We moved from Breakaway Trails , as we were drawn to the architectural diversity of the neighborhood , in addition to the abundance of historical trees.

I understand that many of the letters included in this packet , are addressing issues relative to compatibility , access, safety , traffic , healthcare, and the lack of remaining green space .

I have personally attended several meetings that included Steven Spraker and his team , and would like to personally thank them for their professionalism and patience throughout this process .

What I am asking the Ormond Beach Planning Board to consider when reviewing the respective data presented , is to keep in mind that this project is the FIRST of it's kind in Ormond Beach .

I have confirmed with Steven Spraker , that neither him or anyone on his staff , has tackled this kind of project . Again, Steven and his staff have been extremely helpful , but this is new territory for all of us.

I am requesting that careful thought be considered , when decisions are made, going forward .

The idea of developing a new neighborhood , within an existing neighborhood , that includes residences around a perimeter of an existing golf course , in the center of Ormond Beach, needs special attention .
Let's think about what's good for the community , what's fair for the developers taking a risk, and create something that Ormond Beach can be proud of .

I think we all agree that Ormond Beach , and or the residents of Tomoka Oaks had a " Missed Opportunity " , in not exploring other options , or being properly informed , but this old news , and we have to deal the issue at hand .

Lastly , I would like to thank the Ormond Beach Planning Board for your countless volunteer hours , in reading over the information presented .

Mary Greenlees

94 N Saint Andrews Drive

June 28, 2023

Dear City of Ormond Beach Planning Board,

My name is Carolyn Davis, and I live at 46 Oakmont Circle. I have been a visible and vocal advocate for preventing residential development of the Tomoka Oaks golf course property.

You may be familiar with the newsletter I began publishing in December 2022 called the ***Tomoka Oaks Times*** whose purpose is to educate residents regarding the proposed development and provide steps they can take to voice opposition. One of those steps was inviting residents to provide letters to me explaining why they are against the Tomoka Reserve application. Those 48 letters are attached. Please note that I confirmed with Steven Spraker that having residents provide letters directly to me, with the understanding I would provide as a group effort to the City, was an acceptable method approved by Steven.

Purchasing property does not guarantee development, yet many residents are under the misguided impression that the development of the golf course property is a "done deal" awaiting a green light from the city. As you know, this is a misconception. The city has checks and balances to ensure responsible evaluation of development applications, and residents must be able to count on the Planning Board to filter out Applicant claims that do not align with the city's Comprehensive Plan and the city's Land Use Code.

I respectfully request that you take the time necessary to thoroughly read each letter. Each represents the thoughtful concerns of the 48 residents who invested their time to communicate directly with their Planning Board members, and these residents are placing their trust and faith in the Board's responsibility to evaluate their concerns when determining whether or not to recommend the Tomoka Reserve PRD application to the Commission.

Lastly, of note, not one of these 48 residents expressed support of any aspect of the Tomoka Reserve PRD application.

Carolyn Davis

Not giving in or up,

Carolyn Davis

Tomoka Oaks Times - Public Hearing Notice

Inbox × Golf Course/City of Ormond/Hearing Letters June and July 2023 ×

Robert Banker Jun 23, 2023, 4:48 PM (5 days ago)

to me

Carolyn,

Many thanks for your email, and even more thanks for all your hard work. Not sure how to proceed as I have never done this before. But, here goes.

In regards to the development of the old Tomoka Oaks golf course area, I believe there are many issues that have not been sufficiently addressed.

-- Depreciation of property values
-- Creation of undue overcrowding
-- Adverse affects to public health, safety, welfare and quality of life
-- Potential adverse environmental impact
-- Traffic flow
-- Wild life habitat area's
-- Emergency access (keys to a gate??? how long does it take to find who has the key? unlock a gate? etc.)
-- Hurricane evacuation criteria
-- Adequate facilities and services for schools, roads, storm water runoff, police and fire protection, ems services
-- Impact of attempting to find parking and entering the local Publix, and surrounding stores (most assuredly overcrowded parking)
-- Single access and exit point to the development area in question

All of these ideas as well as the general and most obvious idea....WE, THE PEOPLE, who live closest to the planned development...DO NOT WANT THIS DEVELOPMENT TO PROCEED IN ANY WAY SHAPE OR FASHION.

Sincerely,

Robert and Susan Banker

1 Tomoka Oaks Blvd #135
Ormond Beach, Fla. 32174

Proposed Golf course development?

Golf Course/City of Ormond/Hearing Letters June and July 2023 ×

S. Banker Fri, Jun 23, 5:57 PM (5 days ago)

Hi Carolyn,

Don't know if I need to write a separate letter about the potential golf course development since my husband did, but I will add to what he said. We bought a condo in the Tomoka Oaks complex initially to be snowbirds, but liked it so much here that we decided to stay! We bought a first floor condo in Escondido to live here permanently. We haven't been here very long, and now see what the proposal is to put in this ridiculous development, when there's just enough room to get in and out of our development the way it is right now, without all those extra homes to contend with.

If this proposal goes through it will have a tremendously negative impact on this area. Horrible overcrowding of hospitals, schools, traffic jams so that emergency vehicles and fire trucks won't be able to get where they need to go quickly, and it will be a crowded nightmare. We are so close to Nova Rd., that we will never be able to turn left out of our complex to get out to Nova. Why don't the developers use the golf course for something positive for the community such as a community center or a place for kids to go to give them a place to go after school or in the summer, to keep them busy and out of trouble, instead of overcrowding it with more homes and traffic. Not to mention the fact that all these potential homes are anxiety inducing emotionally.

These are just some of my personal thoughts in addition to what my husband explained.

Thanks so much for all the hard and I'm sure exhausting work that you've been doing to try and save our living area and homes! We appreciate all of it much more than we can express!

Sincerely,

Susan Banker
1 Tomoka Oaks Blvd #135
Ormond Beach, Fla. 32174

Re: Letter to Planning Board

Golf Course/City of Ormond/Hearing Letters June and July 2023 ×

Carolyn Brenner Mon, Jun 19, 9:54 AM (9 days ago)

to me

Ormond Beach Planning Commission:

I am writing so you are aware of the concerns of many of my fellow Tomoka Oaks residents as we approach the development of the golf course.

Currently, I reside in Escondido after owning a home on Oakmont Circle for more than 20 years. On many occasions, I have observed a line of cars hastily approaching Nova Road and have had to wait to exit the only entrance/exit to Escondido. I have not seen any proposed solution to this situation which will undoubtedly become more difficult with the addition of a large number of homes with an average of 2 cars per home.

I am asking that the City Planning Board takes into consideration before approval that a hazardous traffic situation currently exists within Tomoka Oaks. I have family and friends within the neighborhood and have frequent occasions to travel North and South St. Andrews by car, foot and bicycle. The streets are poorly lit, curving, with long straightaways where drivers feel enabled to increase their speed well beyond the 25-mile speed limit. For the safety of the current residents, there is a need for speed tables as the neighborhood exists now.

Additionally, a large number on new homes will necessitate the removal of many historic trees and put a strain on the aquifer and other environmental resources. Tomoka Oaks has long been known for the large size of the property lots.

Many of the residents have lived in Tomoka Oaks since its development and have supported the city with their taxes for many years. By allowing a large number of homes to be built on the golf course they were assured would remain a golf course for 99 years will certainly decrease their property values. We have already started to see property values decrease.

Citizens from all over Volusia County are concerned about congestion and lack of resources including roads, schools, hospitals, and doctors to name a few. An additional development where one should not exist will only exacerbate the drain on all of these resources.

Thank you for your consideration.

Sincerely,
Carolyn Brenner

Re: Tomoka Oaks Development

Greetings.

My name is Dan Caldwell and the purpose of this letter is to address the proposed development of the former Tomoka Oaks Golf course.

I am well aware that the reality of our situation is that something will be built on the old golf course. I am in favor of, and would support, any development that will retain the character of the existing Tomoka Oaks neighborhood. Specifically, the architectural style and lot size should be consistent with the existing properties.

However, I am still very concerned with two issues that as yet have yet to be properly addressed. One is traffic, and the other is flooding.

Regarding traffic, the ingress and egress from Tomoka Oaks from Nova Road is already very difficult. The addition of hundreds of new vehicles utilizing that intersection is a great safety concern. I have only lived in Tomoka Oaks for two years, and already I have seen two serious wrecks at that intersection. As I understand a traffic study has been done, but I am not privy to the results of that study. In my opinion at the very least a traffic light should be installed at this intersection in the future.

Regarding flooding, Tomoka Oaks Golf Course in it's current design is specifically engineered to drain effectively. Once the former golf course is covered in new houses, concrete and asphalt, drainage will obviously be altered. While I cannot recall the exact number of inches of rainfall that the new design will be built to accommodate, the engineer at the last public meeting indicated that drainage will be able to handle anything short of a hundred year flood, and identified the recent Hurricane Ian as an extraordinary event.

However, this ignores the fact that since the year 2004, this specific area has been hit by five hurricanes which caused extensive flooding. Hurricane Charley in August of 2004 (a category 4 storm); Hurricane Ivan in September of 2004 (a category 3 storm); Hurricane Jean in September of 2004 (a category 3 storm); Hurricane Matthew in 2016 (a category 5 storm); and Hurricane Ian (a category 4 storm) just this past year. Five hurricanes in eighteen years means that this area, on average, has a major flooding event every 3.6 years. Therefore, the flippant remark that the recent storm was an exception ignores the history of the area.

I hope that these concerns will be addressed in the future at the July 13th planning board meeting. Thank you for your consideration.

/S/ Dan Caldwell

Hello Carolyn,

Please find attached my letter to turn into the city, regarding the development in Tomoka Oaks. I really appreciate you putting all of these together for our community. If you are able, can you please let me know if this was received.

Thank you,
Melonie Caldwell

(Emailed by Melonie Caldwell to Carolyn Davis on 6/26/23 for inclusion in Planning Board letters from residents)

Ormond Beach Planning Board,

My name is Melonie Caldwell my Husband and I own and reside at 18 Oakmont Circle, Ormond Beach, FL. I am writing to you in regards of the development proposed within 20 Tomoka Oaks Boulevard.

I understand that growth and development are in our future. However, I have major concerns with this area being zoned for 276 more houses. With only one way in and out of this area there are safety concerns for all residents of Tomoka Oaks. The single entrance is also located on a small roundabout that will get backed up at the inter section Tomoka Oaks Blvd and Nova Road.

I see proposed emergency access points that will cut through the lots of the existing Tomoka Oaks residents. If these access points have to be created, doesn't it seem that the proposed development is too large for the area that they are trying to squeeze it into? All these factors along with excessive traffic, drainage issues, and wildlife relocation concern me.

During the last meeting, questions about the character of the new development were not answered directly. This is because they strictly want to plat the land and sell it. Do they even really know what the developers will do once the land is plated and sold?

The residents of this area want to keep the integrity of our neighborhood and the surrounding ones. As residents, we work extremely hard to maintain and upkeep our properties. The fact that we do not want to lose the peaceful, safe community and value we have created here is not unreasonable.

This development needs to mirror the surrounding areas for safety. Larger lots will cut back on traffic, drainage concerns, and less wildlife relocation.

This is why I oppose the large development that is being proposed.

Thank you for your time and consideration.

Best Regards,

Melonie Caldwell

Re: It's Really Happening! Planning Board Hearing July 13

Golf Course/City of Ormond/Hearing Letters June and July 2023 ×

Donald Cardone Sun, Jun 25, 9:10 PM (3 days ago)

For Carolyn Davis and Ormond Planning Board:

We are long-time residents of The Trails community adjacent to Tomoka Oaks and the proposed Tomoka Reserve project.

We are especially concerned about the increased traffic congestion and its attendant safety issues that the new development will engender. Ormond Beach residents have already discovered that they can take a "short cut" through Main Trail and avoid the traffic light at Nova Rd and Granada if they wish to go west on Granada Blvd by exiting at The Trails Granada exit. It will not take Ormond Reserve (clarification per Carolyn - Tomoka Reserve) residents long to emulate this. Speeding is already a concern along this route.Presently, this exit is quite congested at start and end of the school day due to the proximity of Tomoka Elementary School across the street. One can only wonder what further safety concerns this increased traffic flow will engender.

We only see negative effects for safety and quality of life for present and future residents of Tomoka Oaks and The Trails and strongly oppose this project in its present form.

Donald M. Cardone, M.D.
Arlene A. Cardone
24 Twelve Oaks Trail
Ormond Beach, Fl 32174

Hi Donald,

Thank you for taking the time to email me your concerns. I truly appreciate your effort and agree 100% with your observations.

BTW: Reality is that I am one of those Tomoka Oaks residents who uses Trails streets 3-4 times a week when I travel on Granada. Just yesterday, when I was going to church at 9:00 am (church is off Hand), I stopped at Rio Pinar and S. St. Andrews to wait for 4 separate bicyclists to ride through the intersection, 2 people walking 2 dogs, and one other car. Two of the people on bicycles continued onto Rio Pinar Trail, and I had to be extra cautious as I drove past them. I waited for them to clear an island before I felt comfortable driving even 15 mph around these cyclists.

I will be providing all letters and emails to the city this week.

Not giving in or up,
Carolyn Davis

Caitlyn Casey-Parker <... Tue, Jun 27, 11:18 AM (1 day ago)

to CarolynDavis3@gmail.com

To Planning Board

My name is Caitlyn Parker and I live at 32 Pebble Beach Dr. I have lived in Tomoka Oaks for most of my life (about 40 years).

I have many concerns about our quality of life if this development moves forward. Not withstanding the wildlife that inhabitants the green space.

This development will impact our lives in only a negative direction. There are absolutely no benefits to any of the residents of Tomoka Oaks or the city.

The biggest impact will be traffic. There is no way to mitigate the traffic issue and not impact the residents.

The next impact will be rain water runoff. Residents who have never flooded will likely incure some water damage. This is being see througout the county due to over development. It will happen in Tomoka Oaks if you pave over everything. Retention ponds don't work!

Another issue will likely be our property values. They will drop! Mostly due to the impacts listed above.

Continues on next page

Wildlife will also be negatively impacted. Let's face it, they will die or relocate to our propertys. I have counted over 100 active Gopher Tortoise dens on the golf course, a keystone species that is protected. The tortoises that survive may relocate to our propertys and tunnel under our homes.
I also think there might be an issue with the disposal of chemicals at the storage shed. The soil should be tested and may require mitigation.

Another negative impact will be litigation. Homeowners will sue the developer and the city to recoup their losses.

I believe the city and/or county are missing out on a rare opportunity to preserve this green space. It could be connected to the Central Park trail system. A crowning achievement that the city could be proud of.

The green space should be preserved! A natural space for wildlife and residents will be only be a benefit. And it is the right thing to do!

Do the right thing, and do NOT approve this development!

Thank You
Caitlyn Parker

Diane Chanfrau Sat, Jun 24, 12:02 PM (4 days ago)

City of Ormond Beach Planning Board

Reference to Tomoka Oaks Golf Course Property

To Whom it may concern ,

As a resident of the Trails I am against the proposed Development of the Golf Course. The increased volume of traffic would disrupt the environment forever. These roads are not adequate for that volume of traffic. Autos cutting through the Trails from Granada to Wilmette are already an issue and 600 more cars coming on to the Trails narrow winding roads to Tomoka Oaks would be a disaster for the Trails residents.

The state of affairs now, these roads are often blocked by repair men, lawn services, garbage pickup causing traffic stops and passing difficulties. More traffic would hurt everyone's property values not only for Tomoka Oaks but for the Trails too. We as residents could vote City Commissioners out of office but then that would be too late to save our community. Why should 5 developers have precedence over hundreds of established home owners?

Impact fees are in the spot light now more than ever and bad decisions linger on long after the developer has moved on. Developers seem to escape the full affect, pushing expenses higher on the existing residents. No amount of impact fees could cover the depreciation of existing properties. This proposed development would affect every aspect of the areas quality of life.

The visual impact to existing surroundings would be devastating . The existing owners property values would be negatively impacted, even if they did not directly abut the golf course property.

Developers should not be able to hurt for many just to make more money for themselves at our expense.

June 27, 2023

For Planning Board, RE Developing the Tomoka Oaks Golf Course Property

This is to serve as my objection to totally changing the character of the beautifully planned and maintained development of Tomoka Oaks Estates merely to cram in additional un-needed housing and line the pockets of a few developers who don't care that they are ruining a beautiful area of Ormond Beach.

Tomoka Oaks was approved with a golf course by a previous planning board. People who moved there had a reasonable expectation of being protected by the city who approved this plan. We keep hearing how developers have their rights. They do not have a right to a zoning change – they know what the zoning is when they purchase a property and should not assume that they will have an automatic right to get it approved for a change. On the other hand, homeowners have rights too and both the planning board and the city commission should be protecting them. I am not seeing this happen. At the very least the former golf course should be either redeveloped as a golf course or left as an open area.

The proposed plan does not enhance either the residents of Tomoka Oaks nor the residents of Ormond Beach. Adding a potential of 600 more daily vehicles using Nova Road is beyond dangerous. There have already been multiple deaths and accidents on that stretch of road. One can make a study say anything but those of us who drive that road and ever need to make a left turn anywhere along it, or have someone pull out from the side and cross multiple lanes of traffic know that this road is already suicide alley.

Tomoka Oaks as well as The Trails are beneficial assets for Ormond Beach and definitely a desirable residential area for new residents because of its openness, large old trees, large lots and well-planned amenities. Stuffing additional housing in where it was never intended to be lowers the value and attractiveness of these areas. Please protect both the residents of Tomoka Oaks and the livability of this area.

Connie Colby
108 Roble Lane
Ormond Beach, Florida 32174

(Hand delivered by Ellen Cook to Carolyn Davis on 6/26/23 for inclusion in Planning Board letters from residents)

To:

Planning Board - Mayor - Commissioners

Subject: Tomoka Reserve Subdivision.

This proposed and Planned Residential Development is not of the same character of Tomoka Oaks Golf Course.

It will create a hardship on Neighbor and Association in the entire area. The addional Cars and service Vehicles will lead to clogged Roads that were not designed for this much traffic.

The proposed Traffic Light at Tomoka Oaks Blvd. and Nova Road, will make traffic worse as it is not at same timing with the Railroad Signal. Cars are backed up at times past Tomoka Oaks Blvd. No left turn for any Car until Train has passed. Cars will be stacked on Nova, RD. Tomoka Oaks Blvd, and Residents at Escondido will be trapped. I have seen big Trucks make a U-turn on Nova RD. because of a long Train and the wait was to long. It will be a negative effect on other Services and create undue crowding.

Sincerely
Ellen L. Cook

1 Tomoka Oaks Blvd. Unit 120
O. B. Fla. 32174

For Planning Board- Comments on submittal 6-7-2023

Golf Course/City of Ormond/Hearing Letters June and July 2023 ×

Denise Corley Sun, Jun 25, 9:36 PM (3 days ago)

Dear Planning Board members, Mr. Spraker, Major Partington, and Commissioners,

My name is Denise Corley, my husband and I own a house on S. St. Andrews, #51.

After a long search we bought our house in December of 2019. In February 2021 we heard the golf course had been quietly sold to a developer.

We joined a group of neighbors who formed the Golf Course Committee to find out how we could prevent the golf course from being developed, were there covenants surrounding the golf course and the 2006 PDR, and/or try to have a better outcome, for our property investment and our community.

One neighbor at the community meeting in February said it best, this news of the development was like finding out our community had a cancer metastasizing right in the heart of it.

I see very few changes in this proposal in comparison to the last one.
Ormond Beach has never had a development proposal like this one where every border is going to affect an existing homeowner-the size and scale and disruption to so many people is unconscionable.

Quality of life will be ruined.

- For the residents who paid a higher premium to live on the golf course, this sale and development plan has felt like a betrayal of public trust. The 178 homeowners that are on the perimeter are looking at a Williamson Blvd type construction site in their backyard. Bulldozing of trees, earthmovers upending toxic soil, noise and dust. Unrest, from 7am-7pm six days a week.
- What is the community benefit? Does the city of Ormond Beach need these homes? Does the city have the services to cover this addition right now? This project will increase the use of schools, hospitals, city services, police and fire departments and more traffic on already crowded roads. I noticed the schools are running at 100% capacity or more, but more students from this and other projects does not seem to change capacity.
- There are 546 homes in Tomoka Oaks and an additional 276 is 50% more cars and traffic on our quiet narrow streets.

- Tomoka Oaks Blvd, the ONLY Entrance and Exit with the diamond configuration leading into this badly designed project is going to cause congestion, traffic, wait time increases and noise. The amount of traffic traveling on S. St. Andrews heading to Rio Pinar or Irquois is going to change the character of the neighborhood.

- Despite the traffic report commissioned by the applicant, Tomoka Oaks Blvd will have to be redesigned to squeeze through another 300 cars in peak traffic hours. And why do taxpayers have to fund this bill, when this project is being imposed upon them? The developer should pay for the design of Tomoka Oaks Blvd. It is an example of why this development is ill suited for this location.

- Timelines are not on the table now but I think the traffic light at Tomoka Oaks Blvd and Nova should be in place before the development project on the golf course gets started. The need for a redesign of the Tomoka Oaks Blvd will become obvious. This proposal is bringing problems with it.

- If approved I would hope city planners would support the immediate planting of the buffer to start the screening of the invasive construction that is being set upon so many.

- This project is projected to last 5 years in a phased plan that is yet unknown.

- More traffic driving through the neighborhoods to get to Granada Blvd on narrow streets often blocked by lawn care services and other service vehicles will be twice as dangerous. People riding bikes, walking and pushing baby carriages often have to walk past the blindside to get around a vehicle on the street.

- The soil report- revised Updated TIA revised 06-07-2023 states arsenic and organochlorine toxins in the soil of the golf course will require strenuous remediation before houses can be built. Let sleeping dogs lie.

- It appears demolition of the existing buildings took place before the submission of the soil samples. While the samples were taken before the demolition of the club house, golf shack, toilets and the Golf Course Maintenance building. Further examination of the report points to several remediation steps that need to be performed for the "Soil Cleanup Target Levels" to meet standards for residential housing.

- The recommendation that the toxic soil be transported and piled on the open space and amenity areas of the proposal gives no comfort to the existing residences living close to the open spaces. Even the air-borne toxins released

by moving soil is discomforting. Who will be monitoring the soil remediation? Does the city hire a firm to oversee the process of remediation of the soil because it's an important health issue? Will the soil containing unacceptable levels of Arsenic, Organochlorine (banned in the 1970's), Chlordane, Dieldrin, Heptachlor epoxide and Toxaphene be removed off site or mixed with other soil?

- This project is proposing 7 stormwater drainage ponds mainly on the perimeter of the property many abutting the 50 foot buffer of the Tomoka Oaks residence. These dry ponds will be surrounded by a berm. I hope this berm isn't the toxic soil piled up right behind all of our houses in a concentrated form, rather than what it is now spread over the course with the heaviest toxicity on the greens and around the maintenance shed.

- The dry stormwater ponds will direct stormwater runoff into close proximity with the homes of Tomoka Oaks. Nobody really knows how this system will work but we do know that runoff of fertilizers, poisons, animal feces, petroleum products and rubbish will end up in these ponds. Tomoka Oaks is located on a ridge built by the Tomoka river which lies below grade of the Tomoka Oaks subdivision and the golf course. Water doesn't just travel down, it will move to the lowest grade. The ecological logic would be good if this site weren't a golf course with decades of chemicals being used on the soil.

- One way water will travel to the stormwater dry ponds the proposed swale ditches behind the property line of the houses. These open air water drains are known to be mosquito habitats along with the stormwater dry ponds. Tomoka Oaks does not utilize dry ponds, it seems to have a pipe system.

- The developer hasn't decided if this is a gated community or not. The HOA of this proposed community is being heavily burdened with the maintenance of 7 dry stormwater ponds, a 50ft landscape buffer around the entire perimeter of the project, 2 ponds, and 8 acre amenities area and pickleball courts, a couple of proposed pavilions and 8 open space areas with picnic tables and the maintenance of the entryway lawns and structure and insurance of course. I am concerned that the HOA can just vote to change their by-laws and do away with some of these responsibilities? What assurances can be implemented to protect the 50' buffer and other HOA responsibilities?

- Almost 2,000 trees, 21 species counted and identified by Zev-Cohen. 16 trees were identified as historic. The proposal states they will make every possible effort to save these 16 trees. Many other trees located in the buffer most likely will not be bulldozed. Other large trees that are bulldozed will be replaced with

a 10' 2.5 caliper replacement. The point is, it will change the character of the entire subdivision when starter trees replace grand trees.

- Is the plan so loose that they don't know at this point what they are clearing and what is not being cleared. We need a count of how many trees are being saved and how many are being cleared. We do not want to see another Granada Blvd clear cut and city planners saying whoops. Please ask for specific details on this plan!

- Unlike Tomoka Oaks where 100' lots widths are average with varying square footage homes throughout the subdivision, this proposal sandwiches in the center cavity of the proposal the smallest tightly packed housing products. There doesn't seem to be room for a garage and I don't think I've even seen any conceptual pictures of what these "Village" houses would look like. So this area is not diverse and then the area in the northern corner seems to be larger lots with more open space or more upscale and a community unto itself. Claims of diversity are sketchy at best.

- The proposal touts the fact that the "centrally located smaller width homes are appropriately screened from the existing neighborhood" points to the fact that they are less desirable and not compatible or appropriate in the neighborhood.

- The proposal keeps referring to this project as some sort of gallant saving of a neighborhood, calling it "urban infill". This was a failed golf course, why it failed we don't know, bad management? Golf is on the rise. We know that this golf course functions as Open Space and recreational space in an established suburban neighborhood for decades. It is our Central Park. Calling it "infill" makes it sound as though it was a ghetto in an urban city. I think the use of this term "infill" is to diminish the value of this gem that is a piece of land functioning in a healthy and wealthy community, even in its recent natural state.

- I disagree with the statement that people do not want large lots. Some want large lots and large houses. The quarantine of the pandemic is over and people want to be outside and enjoy nature's blessings.

- If this is the zoning plan approval why are the lot sizes not marked and the square footage of the homes not marked on this submittal?

- Page 3 in the table has 300 as the number of homes. I believe that is incorrect.

- Why is the Typical Pavement selection not determined? Isn't this the point when the plan is nailed down and approved- to know what exactly is being approved.

- On page 6, a Note states, the buffer width shown on this sheet "May be subject to change at the time of permitting". The represented widths may be reduced or enlarged by no more than 20% but maintain the minimum 50' buffer. This is too open ended. Where on the map is this flexibility needed?

- Page 7, Lots are too small, setbacks aren't large enough from the street. Lot sizes should be consistent with the Tomoka Oaks. Where are all the cars going to be parked?

- Page 8, "Preferred architectural themes" does not sound like a commitment, it sounds wishful thinking instead of submitting an actual plan. Blank walls look bad and shouldn't be allowed, plantings will not hide the fact of an undesirable feature.

- It may or may not be a zoning platt question but no clue has been given about the structural building materials cinder block or stick wood. If this is a quality project I believe the material will be cinder block. With the various decorative elements described.

- Do we know whether the developer will be installing fences in the neighborhood? I am in favor of the new house lots should have a backyard fence marking the end of their property and the beginning of the buffer.

- Page 9, why should this developer be granted the ability to remove a tree and an Island in Tomoka Oaks neighborhood? He should not have bought a house for the second emergency exit that didn't give him the turning radius needed for a firetruck.

- Pages 14-31, It is unclear by the illustrations of the buffer plants where the plants are located in the buffer. The plantings appear vaguely in a straight line maybe 15' wide. Will these plant screens be on the far edge of the 50' buffer or at the property line of the Tomoka Oaks homeowners backyard?

- Keep in mind the original plan when developed called for the golf course to have a 99 year covenant. Even Dr. Rylas planned PRD put a covenant on the golf course remaining a golf course or open space for perpetuity. That PRD plan had to expire before the perpetuity clause would expire which it did in 2014. In 2021 the land was sold to a residential developer.

- I pray that Mr.Rubin will see that this proposal is wrong for all the reasons listed above and will offer the land to the city or make a philanthropic donation to the city of Ormond Beach, maybe a matching grant to recover his investment.

-Denise Corley

PS- I have included some of my pictures of beautiful Land, Trees and some Wildlife on the Tomoka Oaks Golf Course (per Carolyn a video was attached to the email but for technical reasons it is not a part of the packet of resident letters prepared by Carolyn Davis for the Planning Board.)

June 25, 2023

Dear Planning Board,

My name is Carolyn Davis and I live at 46 Oakmont Circle in Tomoka Oaks. I am opposed to the residential development of the Tomoka Oaks golf course property because of the adverse impact it will have on the character of our neighborhood.

Goal 1, Policy 1.1.3 of the Ormond Beach Comprehensive Plan states new development must: "*Preserve the character of existing neighborhoods by not allowing intrusions of land uses that would threaten to alter the neighborhood's character.*" I spent much time thinking about what that specific city goal means in relation to the proposed Tomoka Reserve development which will be completely surrounded by the Tomoka Oaks neighborhood. My conclusion was influenced by hundreds of hours reading *Daytona Beach News Journal* archives and sifting through deeds at the Volusia County Records Office in Deland to piece together how our landmark Tomoka Oaks neighborhood came into existence. It was the process of accumulating this information that led to one very definitive conclusion: **Our HISTORY is our CHARACTER. Preserving the historical green space in the center of our historical neighborhood is key to preserving the heart of our character.**

Our "character" is the vision of men such as Milton Pepper, William McElroy, and Sam Snead who began planning our co-existing golf course and residential neighborhood back in the late 1950's and early 1960's. It is the multitude of golfers who played among the course's moss draped greens. It is the thousands of homeowners, who, over the years, purchased homes believing the golf course property was to be used in perpetuity as a golf course or recreational area. It is generations of families such as the Maybecks, Jacobsens, and Huhtas who have occupied the same homes since building in Tomoka Oaks in the 60's and 70's.

Our "character" comes from the magnificent variety of bird species who have lived on the golf course property year-upon-year or who migrate here year-after-year, taking refuge in the arms of the hundreds upon hundreds of trees that still grace the property. It is the gopher tortoises, perhaps some older than our neighborhood, who burrow under our stately oaks and give birth to their next generation. It is the deer, coyotes, foxes, snakes, racoons, armadillos, and tree frogs who have freely roamed the 147 acres of natural land in the center of Tomoka Oaks since our neighborhood's inception.

Our "character" is our history. It is our story. And you cannot add a new character into the middle of our story and not damage the very essence of who we are. During the 1960's when our golf course and homes were being built, one of the most popular books of the time was *To Kill a Mockingbird* with its iconic characters of Atticus, Scout, Jem and Boo Radley. To add a new chapter into the middle of this book, and introduce a new character such as Harry Potter to the dynamics of the existing characters, would forever alter the soul of *To Kill a Mockingbird*.

And to add a new neighborhood, Tomoka Reserve, into the very heart and center of Tomoka Oaks would forever alter our story and result in the loss of our established, cherished, iconic character.

The Merriam-Webster dictionary defines "character" as: *the aggregate of features and traits that form the individual nature of a person or thing*. Please recommend denial of this PRD application and preserve the established and future character of Tomoka Oaks.

Thank you.

Carolyn Davis

June 27, 2023

Dear Planning Board,

My name is Steven Denslow and I live at 317 Rio Pinar Dr in Tomoka Oaks. I am very much opposed to the development of the golf course property because of the negative impact it will have on the neighborhood and my property.

I have resided at my current address in Tomoka Oaks for 24 years, before that I lived at 25 Oakmont Circle in Tomoka Oaks and before that 70 S St Andrews in Tomoka Oaks were I lived as a child with my parents. I have lived most of my life in the Tomoka Oaks community. My wife and I have raised all three of our children in this community.

Tomoka Oaks is a beautiful community, and the golf course is part of what makes it that way. If the golf course were to be developed it would be devastating to the community. With the added stress of 276 homes and the increased traffic the community would not be the same.

I purchased my current home because it is located on the golf course, and I have no doubt that if the golf course is allowed to be developed and my backyard overlooks another backyard instead of the golf course it will reduce the value of my property and the lure of the community. I urge you to please vote against the development of the Tomoka Oaks Golf Course.

Sincerely,

Steven Denslow

317 Rio Pinar Dr

Ormond Beach Fl. 32174

to me

The amount of building going on in Volusia County is out of control. The wildlife that keeps getting pushed out of their natural habitat is just beyond outrageous and downright cruel. Building on the golf course will most certainly cause an enormous amount of traffic coming and going in an otherwise very quiet and peaceful community I do understand that they will have their own entrance but since when has that stopped people from cutting through neighborhoods. Changing the landscape of Tamoka Oaks golf course would be a very big mistake.

Ormond Beach Needs a Public Golf Course

Dear Editors,

Please challenge anyone who says golf is not popular in Ormond Beach. I received these numbers from a friend of the Meyers Family, owners of Riviera Golf Club in Holly Hill.

Since the closing of Riverbend in Ormond Beach and quite a few public courses nearby, the Riviera Golf Club is going gangbusters. Ormond Beach is full of avid golfers that would support a decently run public course. Golf got more popular because of covid and is staying popular.

Right now at the Riviera Country Club:

1) Eric Meyers owns the course and Ryan Meyers (son) runs the course
2) has a 75 person waiting list for memberships
3) each day has 225 rounds of 18 holes
4) has no tee times, only first come, first serve
5) has a busy driving range (I was there several days ago)

So if anyone tells you that Ormond Beach can't support a public course, just give them the numbers. Ormond Beach has extensive baseball, soccer, tennis, pickleball, etc., but no public golf course! Tomoka Oaks would be perfect with its wide fairways and convenient tees. The two nine hole fairways all begin and end in one location.

Dear SPRC and Planning Board -

1) Combining house construction and Tomoka Oaks Blvd road changes will create an unsafe and congested roadway. We would like to see Tomoka Oaks Blvd design be specified and most work completed before houses are built in Tomoka Reserve. Otherwise the combination of ripping up the roadbed and current traffic, Tomoka Reserve construction/utility trucks, bicycles, golf carts, walkers, etc. will be unsafe.

2) The Tomoka Oaks Golf Course entrance was designed to safely allow about 100 vehicle trips daily to Nova Road. Tomoka Reserve will add about 2700 daily trips on the same Tomoka Oaks Blvd. This is clearly unsafe and should not be allowed by the Planning Board and City Commission.

3) At the Dec 1, 2022 meeting Tomoka Reserve indicated that FDOT reported the Nova signal would take about two years to install. Without a traffic light all the construction vehicles on Tomoka Oaks Blvd, plus new electrical, sewage, water lines installed will paralyze Tomoka Oaks Blvd.

4) Speeding traffic is already a problem in Tomoka Oaks and the OB Public Works department is installing a speed table to slow down drivers. Pedestrians have been killed/injured on old Tomoka Oaks roads. These low volume roads were designed with beautiful curving landscaped narrow single lanes with multiple islands that have no sidewalks. On a typical day there are bicyclists, baby carriages, skate boarders, scooters, golf carts, dog walkers and parked cars/trucks sharing the Tomoka Oaks and Trails roads with drivers weaving around the obstructions, many times above the 25 mph speed limit.

5) Much of the current traffic and new Tomoka Reserve traffic will be redirected through the Trails on Iroquois and Rio Pinar causing a dangerous situation on the Trails' narrow, sight-line constrained roads with multiple islands that have no sidewalks.

6) Tomoka Reserve should install two sidewalks from their new development to Nova Road. At this point their plan only includes one sidewalk on the South side of Tomoka Oaks Blvd. a) This penalizes the houses on the South side by routing all walkers, baby carriages, skaters, bicycles, runners, etc. on their side of the street. b) all non car/truck traffic from N St Andrews will have to use the street to get to the single sidewalk and will result in unsafe movement across the already dangerous traffic diamond.

7) The traffic diamond proposed by Tomoka Reserve, causing all traffic to stop/go controlled only by four stop signs is inadequate and dangerous. The current intersection is dangerous enough (I've witnessed several near collisions) with the current level of foot, bicycle, cars and trucks. Adding the Tomoka Reserve traffic and construction vehicles to the mix will injure/kill people. The traffic diamond will also look much worse than the current grassed and treed center island.

8) TOHA and Tomoka Oaks residents are unable to find any traffic engineers willing to rebut the findings of the Tomoka Reserve traffic engineer because no outside engineers are willing to testify against a large developer that could hire them for future jobs. This gives the developer an unfair advantage in the development review. Please appoint an independent outside traffic engineer to examine the Tomoka Reserve traffic study.
9) Houses on the golf course will lose value when their backyard view becomes another house instead of the open fairway. No one can argue otherwise. Homeowners on the golf course should be compensated for their loss in value and their property taxes should be reduced.

10) The Tomoka Reserve plan is required to design for a 25 year flood by code. The latest hurricanes have rated at least 500 year floods in Ormond Beach by the authorities. This means that current homes that are downhill from Tomoka Reserve will be flooded in the next large hurricane because of the new impermeable surfaces in the development. How can Ormond Beach responsibly accept this outcome?

Thanks for listening,

Tom Fitzgibbon and Denise Corley | 3474648531 | 51 S St Andrews Drive, Ormond Beach, FL

Re: Last Call for Planning Board Letters

Len Gaspary

I am attaching my sentiments on the newsletter on the next public hearing issues.

Criteria City Considers When Voting

*The new development must **NOT**:*

- Alter the character of Tomoka Oaks or existing neighborhoods such as The Trails, Escondido, or Talaquah.
  - Eliminating the golf course substantially alters the character of the existing neighborhood by replacing open area with lots that in general are smaller than existing residential lots making the subdivision have density that is greater than any of the surrounding sub-divisions.
- Substantially and permanently depreciate the value of the surrounding property.
  - Lots and homes with golf and riverfront frontages have traditionally been higher in value than other lots without such frontage.
  - I have lived in a golf course frontage home for almost 40 years. Initially, I paid more for my lot than non-golf course lots were selling for.
  - I have built 6 homes in Tomoka Oaks and rebuilt 1 during my time as a home builder. Three of the new homes I built were on the golf course and I selected those lots because they were more saleable.
- Create undue crowding.
  - If approved the density of the area would be greatly increased, causing an overall decrease in the quality of life.
- Adversely affect the public health, safety, welfare or quality of life.
  - There are no provisions for additional entrances or exits which will cause health, safety, and quality of life issues.
- Present potential adverse environmental impacts.
  - Currently, there is a great deal of wildlife that makes their home on the golf course. Although I haven't seen them for awhile, the course had been home to a fox den. There are several birds including hawks, and owls that inhabit the course.

*The new development **MUST**:*

- Ensure safe and convenient traffic flow.
  - Traffic flow will definitely be adversely affected unless an additional entrance/exit is added.
- Protect wildlife habitat areas.
  - Wildlife in the area has included foxes, rabbits, several species of birds, and other wild life.
- Be compatible with Tomoka Oaks i.e., lot widths, architectural styles, property setbacks.
  - Lot widths and depths in general are smaller than current lots.

Continues on next page

- Have adequate emergency access.
  - One entrance to the additional homes can cause severe problems when emergency access is required.
- Meet hurricane evacuation criteria.
  - One entrance/exit to increased density seems like it could cause a dangerous environment during hurricanes or other severe weather.
- Maintain adequate facilities and services: schools, roads, stormwater management, police and fire protection, EMS, and evacuation facilities.
  - Sub-divisions in the past have had to prove that they will add adequate facilities and services to support any new developments. I have seen nothing to that effect.

Tomoka Oaks v4

Golf Course/City of Ormond/Hearing Letters June and July 2023 × Golf Course/City of Ormond/Public Hearings ×

Richard Golhair Wed, Jun 21, 4:21 PM (7 days ago)

As a resident of The Trails, I have many concerns regarding the residential development of the Tomoka Oaks golf course property; traffic is major.

Only Tomoka Oaks Blvd. will be utilized for construction vehicles, which leaves Main Trail off Nova and off Granada to absorb the overflow traffic into and out of Tomoka Oaks and the new Tomoka Reserve development. UPS, Fedex, Amazon, food deliveries, waste trucks – in addition to homeowners and contractors driving wider and larger pickups – can create overflow hazardous situations for The Trails and Tomoka Oaks regarding school buses, joggers, walkers alone and with dogs, children on bicycles and families. Please note the Granada entrance at Main Trail now serves as a school crossing point, and it can take as long as 15 minutes for traffic to navigate into and out of Main Trail. This will only increase if Tomoka Reserve is developed. Plus, the construction trucks will tear up both The Trails and Tomoka Oaks streets and create additional hazards.

Main Trail off Nova Rd. will be the only alternate entrance/exit for the numerous Tomoka Oaks and Tomoka Reserve drivers who will want to avoid construction traffic at Tomoka Oaks Blvd. Main Trail off Granada will suffer the same consequences. And what about the increased traffic into The Trails shopping Center; has Publix, the property manager, and Nova Community Center been notified to make arrangements to anticipate traffic bottlenecks?

In the real world, who wants to drive behind a large construction truck entering and exiting the new development? What's the maximum size truck allowed? Are 18 wheelers allowed? Do the trucks need a special permit to access a residential area? Will the trucks be able to maneuver around narrow streets without damaging property and if they do damage, who's liable? What legal recourse do residents have as a result of accidents or negligence ? What about increased property taxes and insurance premiums? What happens to appraised and resale home values? If there's a traffic incident because of the new development, does that have to be disclosed by the seller on a home sale? Has anyone considered increased pollution? Construction will be allowed Monday-Saturday from 7:00 am – 7:00 pm. How will this impact the quality of life for residents of both communities if construction vehicles don't adhere to the mandated construction traffic entrance on Tomoka Oaks Blvd and affect Saturday activities, a time traditionally set aside for families?

Insurance Commissions in each state collect the data of claim payouts so all carriers are analyzing the same information to adjust rates. This includes construction debris, rocks, and flat tires. Remember - The Trails is 40 years old – the streets are narrow. For traffic using the Granada entrance accessing Main Trail to Iroquois and Rio Pinar, there's a sharp curve on Main Trail near Rocky Creek that can be dangerous, especially, for large trucks. Also, what are the effects of increased traffic on the city maintained Misners Branch bridge over time? Will the city, county or state be contacted to adjust the timing of the traffic signals at both Main Trail entrances to even out the increased flow, especially during school hours? Is someone prepared to notify parents of school children to wake them up 15 minutes earlier so they can sit in traffic on their school bus? Are commuters willing to do the same?

These are some of the many concerns residents are asking the Planning Board and Commission to take into consideration before approving any residential development of the Tomoka Oaks golf course property.

Thank you,

Richard Goldhair

to CarolynDavis3

I have lived in this area over 24 years and I see what is happening to our once beautiful city and we have to keep the golf course open for recreational activities.

More people and less land is being sold out by greed.

Tomoka Oaks residents deserve the respect of the powers that make decisions.

Please use common sense.

In an emergency like the fires that ravaged parts of Palm Coast and Ormond Beach, people could not escape from subdivisions because of one road entrance and exit!

Please use common sense in this regard and I have not mentioned the loss of natural beauty and animals.

The Heading family on 11 Sherwood

Hi Robert and DJ,

I received your postcard and handwritten letter today regarding the possible residential development of the golf course in Tomoka Oaks. I truly appreciate the effort you made to write me this letter.

Coincidentally, I had just sent out an email to all people on my Tomoka Oaks Times list asking them to provide me letters regarding their concerns about the development. I will be compiling all letters into one packet which I will provide the Planning Board next week. The date for the Planning Board hearing has been confirmed for July 13, and the receipt of your letter to me is perfect timing. Do I have your permission to include your letter? Let me know!

Not giving in or up,

BOB HENRY 9:50 AM (4 hours ago)
to me

Carolyn, you absolutely have our permission to share our response letter.

Dear Carolyn,

Your concerns are spot on. This is about "Traffic" and our quality of life, including safety.

We've lived in the Trails for over 30 years. Our driveway is on Rio Pinar.

Historically, we have had great difficulty backing out without other drivers blowing their horns at us or driving right up on our bumpers.

Also, no one, including the police, drives 25 mph.

over

South St. Andrews will become a freeway.

Iroquis and Rio Pinar will become feeder streets for those using Iroquis + Rio Pinar to cut through the Trails to get to Granada Blvd.

Thanks for your efforts and good luck.

Bob + DJ Henry

Golf Course/City of Ormond/Hearing Letters June and July 2023 ×

dhoislba@gmail.com Tue, Jun 27, 9:49 AM (1 day ago)

Hi Carolyn,
Diane Hoislbauer from 1 Eagle Drive.

Here is one of my main concerns for the new development:

New Development MUST:
Maintain adequate facilities and services: schools, roads, storm water management, police and fire protection, EMS, and evacuation facilities.

From: Land Development Code Chapter 1
Adequate school capacity means the circumstance where there is sufficient school capacity by school type, based on adopted level-of-service standards (LOSS), to timely accommodate the demand created by a proposed residential development.

Where has the developer shown that current school capacity will be able to handle the new residents and their children? No new schools have been built to accommodate, thus impacting our children.

From: Land Development Code Chapter 1
Adequate police and fire protection means there is sufficient police and fire protection to timely accommodate the demand created by a proposed residential development.

Where has the developer shown that current police and fire protection will be able to accommodate the increased demand with the new development? According to Ormond Police and Fire, there are no new job openings for employment, thus impacting our response time and the elderly living in Tomoka Oaks.

New Development MUST NOT create UNDUE CROWDING.
There is an over crowding issue in Ormond Beach and it's getting worse. Adding 300 homes, up to 600+ new residents and possibly more than that creates HUGE UNDUE CROWDING. Main Trail Publix now cannot handle current traffic in and out. Has the City of Ormond and the new developer taken that into consideration?

I respectfully believe the new development will continue to add to the decline of Ormond Beach. Keep the golf course and turn it into a public park with a swimming pool. Just my opinion.

Thanks,
Diane Hoislbauer

Paul W Hughes
4 Lauren Court
Ormond Beach, FL 32174

Objections to destruction of Green Space and conversion of Sam Snead Country Club land/facilities. Also additional points to consider.

To the Planning Board and all citizens concerned:

We moved back to Ormond 30 years ago after much consideration selecting a family home in the rear area of what is called Tomoka Oaks. Our criteria was based on many family factors to include green/open space as well as traffic safety around the neighborhood, schooling facilities, as well as normal issues, shopping, hospitals, amenities. Now a profit motive is proposed at the cost of original homeowner voters. Altering 6+ decades of road planning, ingress egress, electrical, water, gray water, noise etcetera is a huge undertaking. We believe the developers are creating an adverse environment and will leave an underfunded long term nightmare at the burden of local citizens. Most think it's not their neighborhood so why bother? Fact is every new home alters many older homes, especially with risk and insurances.

The neighborhood and all homes were planned around a known "superstar of the golf world" (Sam Snead) with a Country Club & Golf Course to include other social activities nested on 150 +/- acres that all could enjoy from avid golfers to strolling individuals. The golf course was designed as the heart and soul of all plats, lots, and homes in the original Tomoka Oaks subdivision. The course was diligently planned so as to harmonize with nature and the environment. Each individual plat was intentionally designed so local indigenous wildlife as well as humans could coexist. Watersheds and grounds watering was handled on the property. House setbacks were planned so as to eliminate fencing. Your backyard was the course. Today, current homeowners are exposed to neglected tall grass, mosquitos and a general altered state of a 60+ year co-relationship between the golf course property and nature.

In order for the proposed development to be fair and compatible with current Tomoka Oaks homes, the acreage of proposed Tomoka Reserve homes (on the perimeter and in the interior) must be similar in their characteristics; this similarity cannot be accomplished with the current Tomoka Reserve site plan. To enrich their financial return, the Applicant has placed an unreasonable burden of incompatibility on Tomoka Oaks homeowners who will now face diminished returns on their home investments. For example, sidewalks were not needed throughout Tomoka Oaks as the original plans of the 1950/60's allowed road widths adequate for single family homes with one+ car per family and kid's bikes. In addition to traffic safety, Tomoka Oaks residents will lose their legal right to quiet enjoyment; a right they have consistently counted on.

The original Tomoka Oaks now has 2 to 3 cars per family home, numerous bicycles, golf carts and boats. This can be verified via code enforcement and/or a simple driving or perhaps an aerial view. There is only one ingress/egress entrance into Tomoka Oaks via Nova Road. There are 2 "back door" exits which feed into the "Trails". (There is also a "sneaky" emergency access onto S. St

Andrews from the Talaqua gated neighborhood.) The proposed Tomoka Reserve will add to the current mix of traffic and increase safety concerns.

The Applicants road surveys avoided particular facts of current surrounding neighborhoods which will result in unsafe and inconvenient traffic flow. For example, Tomoka Elementary which has a significant impact on traffic at Main Trail and Granada was razed this week and is being rebuilt with a re-opening date of August 2024. How will this construction impact traffic into and out of the Trails and Tomoka Oaks and the proposed Tomoka Reserve and therefore compound the construction traffic generated by Tomoka Reserve? Was the temporary relocation of students factored into the Applicant's traffic analysis? Simply put, one cannot put 10 pounds of rocks in a one pound bag without something giving way. A new development on the 150 golf course acres would add "another 20 pounds".

The developers committed to a traffic signal at Nova road but have yet to put their money where their mouth is. Why not push the safety issue now? How committed are they? Nova road was altered a decade or so ago for Disaster Evacuation which has not been addressed. The state must look into a huge traffic alternative for all of us. Electrical power has only been altered with above ground poles. How many blackouts do we experience now, regardless of hurricanes? If we had true concern, utility code enforcement would reveal wires hanging below the standard 14 foot height, so as trucks will not pull wires (as happens often). Construction traffic has not been fully considered as to Nova Road or the wooden bridge in the Trails. There are tonnage requirements which the bridge could easily exceed and then it's done, needing replacement. The midroad "islands" in the Trails barely allow EMS now, not to mention on-street parking. So how would the equipment needed for earth removal and building supplies navigate Trails/Tomoka Oaks? The developer has not fully considered the impact of a full neighborhood within a neighborhood. Would they simply tie up traffic getting onto Nova Road?

Water and "Gray" water. Both during construction and after, dust, dirt and airborne particulates would cause harm to the original neighborhood and its occupants, pets and local wildlife. Gray water and atomization has not been studied. Anyone that deals with a breathing issue for themselves, babies or elderly, read this again! The demand for fresh or treated water on or in the proposed development cannot be handled by the city. Trucking in water would cause more road concerns for safety, congestion, wear and tear of existing roads thus destroying the main entrance. How heavy are those heavily laden trucks with water?

Widening of the entrance would involve severe hardship plus encroachment of several homeowners and the long-establish Escondido Condominium neighborhood and their exit. Most of the occupants are seniors on a fixed income which are afforded extra protection under the laws for the elderly. Yet, the developers has not "noticed" the occupants with official letters explaining their development. This highly localized entrance on Tomoka Blvd or into/out of Nova Road has been ignored as to planning signs or site plan documentation. If the developers have "nothing to hide" why are they not advertising their intentions via signage at the location? Place a few 4x8 full signs showing the road and alterations! One has to ask, why not!

The city or developers need to immediately install a traffic light at the Nova Road Tomoka Blvd entrance and to alter all appropriate signage and directorial traffic signs into and out of the

connected neighborhoods to include Granada and Nova Road. The developers have stated they would pay for the installation. The City should advance the costs and the Traffic Lights, and, if appropriate, balance the cost with the developer's future thoughts and plans. Is safety only timely after an accident?

The developer should delay or alter any planning so as to address all traffic concerns with ALL complexes, all neighborhoods, all landowners or tenants, to include Certified mailings and notices to elderly or special needs individuals and, as a suggested guideline, to any and all within 300 feet of any alteration and allow adequate time for response. The developer should erect large 4x8 foot signage with font sizes easily read from a road side distance to include boundary posts in any and all lands from Nova Road to the old Country Club parking lot. Several homes and the Escondido residences have had "open and notorious use" of properties, lawns and driveways. These owners will have "Title" issues and should be able to properly see and acknowledge what might be a "taking". Let all see now what others will lose.

The City should develop a plan for road widening and sidewalks throughout the original Tomoka Neighborhood so as to allow for street parking, and concurrent EMS distances needed "between the sidewalks". This should match the balance of the developers proposal. ALL utilities from Nova Road inward should be buried so as to balance both neighborhoods with both adequate utilities that consider amperage, water usage and sewage, hydrants and all other utilities, known or unknown as technology evolves. The costs should be balanced against the developers and current residents budgets. For most residents who wonder why there is no cell signal strength, imagine what will happen with all the new users. It gives you thoughts as to all of them flushing a toilet while you are taking a shower . . . you get the point.

The city needs to establish road usage from the NEW Tomoka Elementary school before rendering any decisions. Residents that have experienced the grid lock during school hours, especially drop off and pick up will attest to times in excess of half an hour so as to block the Trails ingress/egress. This also should be studied with road guards who disrupt the signals as appropriate for pedestrian crossing and safety. Also, folk ... what happens if the school is not finished on time? Plan your beachside driving appropriately.

The city and state need to study the adverse effect of alteration to the insurance modeling of homeowners insurance because of the adverse effect of numerous housing and the lack of increased services of (and on) the municipality and the balance of safety versus more housing, risk and resource analysis. This will increase the rates to existing homeowners and possibly place an unnecessary need on any new risks or structures. Insurance companies will subtract old homes when new homes show up. Ask your agent, they know what your chances are of losing your homeowners insurance because your carrier would rather drop you and pick up a Tomoka Reserve policy.

The city needs to develop a fair and reasonable "exit" plan to buy out the developers interests so as to convert the 150 acres back for use as community green space. This will eliminate future costs associated with the current Applicant's actions. It's possible that this project could fail for a number of reasons including mortgage rates and lack of insurance.

These are just a few of my family's thoughts. We assume others will either concur or submit their own concerns as appropriate. Please ask the hard questions now. Business is risk and reward; a see-saw balance that we need working for us rather than against us.

Humbly submitted,

Paul W Hughes

Hi Lauren,

As you may have seen, the Planning Board is hearing the golf course development application at their meeting on July 13. I am compiling letters from residents that I will provide to the Planning Board next week, and I would love to include your earlier letter printed in the April newsletter. Do I have your permission to do that? Also, can I include the email your mom sent me?

Let me know!

to me

Hello,
Thanks for keeping us in the loop. At this time, I plan on being there July 13.

Yes, you have my permission to use my earlier letter printed in the April newsletter. My mom, Pam Huhta, also says you have permission to include her e-mail.

Lauren Huhta
Sent from my iPhone

(Email sent by Lauren Huhta to Carolyn Davis on 4/2/23. Lauren provided permission to Carolyn Davis on 6/24/23 to provide her letter to the Planning Board.)

Hello,

Like many people, we are extremely concerned with the construction mess/debris from trucks and traffic from the unneeded development within the golf course.

One thing to consider is that the existing Tomoka Oaks is a mixture of retirees that may not drive as much and then families with multiple cars, including driving teenagers. When the last traffic study was done, not only was it during COVID-19 when less people were driving, but also when some elderly people like my grandfather were still alive and not driving. My grandfather, who designed the house here in Tomoka Oaks, lived to be 93 years old. One of his last wishes was to keep the house in the family. Now, I'm the third generation. My grandfather didn't drive for the last few years of his life, but now I live here with my partner and he also drives. Now, that's two extra drivers missing from the traffic study. I know many younger families have moved in within the past few years. Other people can move to get away from all this mess, but I will not.

A traffic light is going to be a total nightmare. If The Trails puts up gates, there is going to be a significant increase of the bottleneck effect at the main entrance of Tomoka Oaks to Nova Road. Cars will be zooming, or speeding, to get through Tomoka Oaks to Nova Road with extra time added to their commutes. We all know that when there is an increase of traffic, pedestrians are at risk of getting injured or killed. It's completely unacceptable to be fearful of walking around for exercise in fear of increased traffic and worrying about more cars zooming/speeding past. That's not quality of life.

Also, if they did the last traffic study during the summer months a few years ago, they probably did not consider school buses. Some of the bus stops are by our main entrance. When the school bus has its lights on, the traffic ceases and builds up.

My dad, Ned Huhta, had one of his car tires slashed from debris from a big truck when they were demolishing the club house last year. I have asked him to try to look back to send evidence photos if he still has them. New tires can be expensive. This shouldn't be an added expense for us in regards to something that shouldn't be happening in the first place.

Nobody in Tomoka Oaks wants this new, unneeded development. We are an established neighborhood with unique homes. A cookie cutter neighborhood of two-story houses creeping down on us is completely unacceptable and inconsiderate. Many of our homes along the golf course have big windows looking out to the golf course, now the windows will overlook pathetic buffers and two-story houses glaring down at us. No privacy. Not to mention the destruction of established wildlife is unacceptable. What are they going to do about the gopher turtles?

Lauren Huhta, MEd & Christopher Jaime, DPT
30 Pine Valley Circle
Ormond Beach, FL 32174

(Emailed by Sam Kennel to Carolyn Davis on 6/26/23 for inclusion in Planning Board letters from residents)

Dear Ormond Beach Planning Board,

My grandmother, June Jacobsen, has lived in Tomoka Oaks since 1968. First buying a house on Pine Valley Circle, they enjoyed the neighborhood so much that they decided to build a home at 44 Oakmont Circle. One of the main reasons they decided to build at Oakmont Circle was to live on the golf course. For nearly sixty years my family has enjoyed the view of the golf course and its natural beauty. Being able to look out the back window at the greenery and enjoy the trees and wildlife has brought us great joy. The construction of the house reflects this, with large windows built across the back of the house which face the golf course. My grandmother enjoys this view so much she has constructed a patio area outside, filled with her religious statues that she calls her place of serenity. It is here we have enjoyed the beauty and tranquility of the golf course.

For us, the current residents of 44 Oakmont Circle, the proposed development on the golf course is entirely incompatible with the City's Land Use Development Code. The view of the greens and the tranquility of the golf course we have enjoyed from our home is a "significant aesthetic feature" that would certainly be destroyed by the proposed development. To have the spacious view and quietness of the golf course replaced by a fence and the noise pollution of three hundred homes would be a significant reduction in our quality of life and the lives of all those who live in Tomoka Oaks, Escondido, and The Trails.

Sincerely,

Sam Kennel

Josie Kennel

Jonathan Kennel

June Jacobsen

For Planning Board - Tomoka Reserve

Golf Course/City of Ormond/Hearing Letters June and July 2023 ×

Kelsey Kipi Wed, Jun 14, 9:37 PM

Carolyn - Please include the following letter with those you are compiling in opposition of the development. ...

To Whom It May Concern,

In regards to the final planning board meeting for Tomoka Reserve (Tomoka Oaks Golf Course) scheduled on July 13, 2023, please accept this email in opposition of the development.

The Tomoka Reserve project is one of questionable substance and has been so since its initial proposal. The idea of wedging a neighborhood within a neighborhood like a nesting doll is strange, and the superfluous nature of the proposed buildout, stranger still. These developers have no interest in preserving the character of Tomoka Oaks or Ormond Beach. They have been uncompromising in their lot sizes and unconcerned about the hazardous traffic issues they will cause. Allowing them to proceed with this buildout will diminish home values and rob those of us in Tomoka Oaks of our peaceful community.

The proposed development is not compatible with the existing Tomoka Oaks. The lot sizes are smaller which allows for approximately one and a quarter homes for each existing lot in Tomoka. My property is on the golf course and holds a premium value because of the expanse of greenspace we back up to. The value of my home, and those like mine on the golf course, will be drastically diminished if the development is allowed to proceed. Future buyers much prefer expansive views of greenspace to that of home, after home, after home, as far as the eye can see. Furthermore, during the most recent SPRC meeting, the developers expressed that they wanted a large, gated, entrance to the community that will be within Tomoka Oaks.The current entrance to Tomoka Oaks is a modest sign that leads to our community. Under the developers plan, you would pass our modest sign and see within our entrance a secondary entrance, with elaborate architectural features and a gate. How is this compatible? How does this blend in?

The addition of nearly 300 new homes and their residents will create undue crowding in the area. The Trails Shopping Center is already congested. Most days involve a fight for a parking spot if a trip to Publix is needed. On the weekends, parking at The Magic Forest Playground is already a struggle without the addition of new residents. Ever tried to get out of the neighborhood using the exit on Main Trail and Granada when school is about to start? You'll be backed up past the condos and well into the Trails subdivision. This will not improve when more families move in and are driving to school and/or work first thing in the morning.

To add approximately 600+ new vehicles to the constantly flowing traffic in and out of Tomoka Oaks is daunting to say the least. The developers stated at the last SPRC that they will not be doing anything to address the diamond at the front of the neighborhood. This means that these proposed 600+ vehicles will have to navigate around the diamond and feed into the steady stream of cars that already abound at this unique roadway feature. If you have ever driven around it, you would be hard pressed that this will not be an issue. The developers also stated no interest in devising a right turn lane from Tomoka Oaks Blvd onto Nova Rd. How do they propose that all of us get out of the neighborhood? The queue to leave backs up past

Escondido at present, and would undoubtedly be much farther back with the addition of new residents. A traffic light is proposed for the future, but our ability to safely and efficiently exit our neighborhood will be rendered impossible until such a time as that traffic light is installed. Also, how can the installation of a traffic light be suggested so close to the train tracks? Cars going northbound on Nova Rd. routinely back up past the neighborhood entrance when a train rolls through. With the addition of traffic light, cars coming southbound will now also be stacking up, creating a scenario seen often in Lake Mary (Seminole County) where cars don't get clear of the tracks and are hit by the train.

In my opinion as a resident of Ormond Beach and Tomoka Oaks, we are at capacity in this quadrant of the city. We do not have adequate shopping and recreation facilities to support adding more residents. If anything, more recreation should be added to increase the quality of life for those of us who already call Ormond Beach home. Are you aware that most of the local golf courses are on a waitlist for new members? These include Halifax Plantation, Oceanside, and Riviera Country Club. There is a high demand by your current tax paying residents for facilities that provide outdoor entertainment, not a high demand for more people to congest our already busy town.

Your time and consideration of the above concerns are much appreciated.

Sincerely,

Kelsey Kipi

RE: It's Really Happening! Planning Board Hearing July 13

Golf Course/City of Ormond/Hearing Letters June and July 2023 ×

Joe LaTorre Sun, Jun 25, 11:16 AM (3 days ago)

Hi Carolyn,

I'm Joe LaTorre, and I live on 11 Tomoka View Drive. I've lived here since 2000 with my wife Sue, and our two children, Gena and Mario. They were both raised in this outstanding neighborhood of Tomoka Oaks. I feel the impending greed filled money grab will destroy the character and quality of life that has been a long standing staple of living here. I find it interesting that some of the major players in this deal actually once lived here. In fact, they raised their families right here in our neighborhood. Is anyone surprised that they have sold their properties and moved out? How convenient, and how shameful. What a legacy they will leave. Do they really want to be remembered as those responsible for destroying the character of this great neighborhood where they raised their own kids? I write this in the hopes that they will read it and reconsider what is really important in our lives. Your legacy and your family name is on the line here. For gods sake do the right thing. Not everything and everyone has to have a price.

Now, onto more practical issues. As I began writing this my plan was to select the criteria I believed this proposed development violated. But as I read the criteria I began to chuckle. It was blatantly obvious that the proposed development violates all the criteria! How on earth did this proposal even get this far along in the process? The responses below will detail how each of these criteria are inconsistent with city's own standards.

Criteria City Considers When Voting

*The new development must **NOT**:*

- Alter the character of Tomoka Oaks or existing neighborhoods such as The Trails, Escondido, or Talaquah.

  My goodness, the neighborhood is called Tomoka oaks. Don't you think removing over 100 oak trees is going to alter the character of the neighborhood. Also the added traffic will forever change the look and feel of our community. It's already hard to take a bike ride without dodging the cars and navigating all the service vehicles that have to park on the side of the road. This development will simply make this neighborhood less livable.

- Substantially and permanently depreciate the value of the surrounding property.

  More cars, more traffic, less desirable place to live. That equates to less demand and depreciating property values. It's really that simple.

- Create undue crowding.

  This one is actually laughable. We're already crowded, adding these extra homes will worsen the situation. Also where are these new folks going to go for healthcare? Advent is maxed out beyond capacity. I know this first hand as my neighbor had to sit in the hall without a bed as he awaiting heart surgery. Don't take my word for it. Please consult with the healthcare professionals at the hospital about this issue. This reason alone should be enough to halt this development in its tracks.

- Adversely affect the public health, safety, welfare or quality of life.

  Please see above.

- Present potential adverse environmental impacts.

  I love the Tomoka River. It's why I bought my house. I used to sit on my dock and write as I watched massive schools of snook swim by. The brackish water made an incredibly diverse ecosystem that included an incredible variety of both salt and freshwater marine life. It was not uncommon to see dolphins and manatees sharing the river in a single day. That has changed. Ask any fisherman that loves the Tomoka and we will tell you the salinity levels have dropped. This is due to recent development near the headwaters of the Tomoka. It really hard to catch snook, snapper, trout, flounder, jacks and any other saltwater species. Now a typical catch is mudfish, alligator garr, carp, and snapping turtles. I don't' have anything against these freshwater species, but more development will lead to more stormwater runoff. Where is it going to go? We all the answer is the Tomoka River. We must not let this happen.

*The new development **MUST**:*

- Ensure safe and convenient traffic flow.

  It sure won't be convenieht. Even with re-design the entrances and exists will be a safety hazard.

- Protect wildlife habitat areas.

  The entire golf course has become a wildlife habitat area. Eagles, ospreys, cranes, owls, foxes, deer, wild turkeys, and bears all live in that space. If it get's

developed they will have nowhere to go. This will cause irreversible harm to this wildlife and cause more dangerous encounters with humans.

- Be compatible with Tomoka Oaks i.e., lot widths, architectural styles, property setbacks.

  I assume the developers will have to adhere to agreed upon standards.

- Have adequate emergency access.

  I am not qualified to comment on this requirement.

- Meet hurricane evacuation criteria.

  I am not qualified to comment on this requirement.

- Maintain adequate facilities and services: schools, roads, stormwater management, police and fire protection, EMS, and evacuation facilities.

  Please see my comment above about overcrowding of our health care facilities. This is a serious problem and it will only be exasperated with the addition of new development.

Carolyn, on a personal note, thanks for fighting the good fight. Your efforts will be remembered and revered regardless of the ultimate outcome. God bless you and yours.

OVERBUILDING Golf Course/City of Ormond/Hearing Letters June and July 2023 ×

Paul R. McCauley-Cumminggs Sat, Jun 24, 1:03 PM (4 days ago)

CAROLYN,

AS A VIA MENTALLY OPPOSED LONG-TERM CITIZEN OF TOMOKA OAKS THE FOLLOWING INFORMAITION IS SUBMITTED FOR CONSIDERATION IN THE PROPOSED BUILDING PROJECT .

CURRENTLY THERE IS NO EVIDENCE TO SHOW THAT THE PROJECT DOES ANYTHING TO IMPROVE THE QUALITY OF LIFE WITHIN THE COMMUNITYS OF TOMOKA OAKS,TRAILS, ESCONDIDO NOR THE CITY OF ORMOND BEACH. MOREOVER, THE OVERBUILDING INTRINSICALLY INVITES MORF TRAFIC WITH OVERCROWDING TO INCLUDE ADDITIONAL REQUIREMENTS FOR CITY SERVICES IN POLICE,FIRE AND OTHER EMERGENCY SERVICES. UNNECESSARY STRAIN ON WATER RESOURCE MANAGEMENT TO INCLUDE STORM WATER RUNOFF AND SALT WATER INTRUSION ISSUES. EACH OF THESE CONSIDERATIONS HAVE NEVER BEEN ADDRESSED IN THE PLANNING PROCESS AS TEY REQUIRE A DIRECT COSTS TO THE TAXPAYERS.

MAY REVORD SPEAKS FOR ITSLF AS A FORMER MEMBER OF THE QUALITY OF LIFE, ENVIRONMENTAL AND DEVELOPMENT REVIEW BOARDS IT IS FELT THAT MY POSITION HOLDS EXCEPTIONAL MERIT AND SHOULD BE CONSIDERED. ADDITIONALLY, AFTER 36 YEARS IN TOMOKA OAKS, S ERVING ON THE HOME OWNERS BOARD AND PRESIDENT AT A TIME WHEN THE HOMEOWNERS ASSOCIATION WAS IN A STATE OF DISREPAIR AND ALMOST NON -EXISTENT WE NOW ENJOY A FUNCTIONAL BOARD WITH COMMUNITY SUPPORT. WE HAVE BEEN INSTRUMENTAL IN STOPPING EXTREME HIGH RISE CONSTRUCTION WHICH ENHANCES THE ASTHETICS OF ORMOND BEACH.

THERE IS MUCH ORE TO SAY AND DO IN THE PROCES. THANK YOU FOR YOUR INPUT AND ALL THE BEST.

REGARDS,
PAUL R. McCAULEY

Dear Ms. Davis,

We are extremely grateful for your work to save us from the development plan currently under consideration for the former Tomoka Oaks golf course. Our three children grew up at 62 S. St. Andrews Drive, and our grandchildren visit frequently. We have lived here since the spring of 1988. We want to maintain the character and pleasant circumstances of this established community, and fear this proposed development will change it permanently for the worse.

We oppose the development under the current plan for several reasons, the first and in our view most important being the increase in traffic which would have the effect of making the exit on to Nova Road a bottleneck. It is not uncommon these days to see four or five cars waiting on a break in the Nova Road traffic, and the addition of hundreds of homes will bring in hundreds of personal vehicles, construction machines, delivery vehicles, and service vehicles, which will then go out again, creating chokepoints periodically every day. In the event of downed tree or serious accident blocking that intersection, there would be no good way in or out of the new development, and it is not hard to imagine cars and trucks lined up on South St. Andrews Drive clear to our house as part of the resulting traffic jam.

Furthermore, it does not appear to us that the development as proposed would do anything but lower our property values. Reasonable people can differ on this, and we would want to study the issue more closely before taking a firm position, but the smaller lot sizes as planned in this development would be inconsistent with the lots in Tomoka Oaks. We do not see how the cramming together of hundreds of homes in the center of an established neighborhood can have a positive effect. Factoring in the traffic problem, I see a drop in the attractiveness of our neighborhood and a resultant reduction in our property values.

We are also concerned about the environment and fear the impact this development would have on wildlife. What we heard at the meeting at Temple Beth-el did not encourage us; houses on small lots with concrete all around is not friendly to turtles, tortoises, rabbits, foxes, frogs and other animals.

The owners of this property seem to have purchased it without conducting an investigtion to determine what they could do while preserving the quality of Tomoka Oaks living. An exercise in due diligence would have shown them that this plan would not work. It is unfortunate that they would lose money, if that is what happens, but it would be better than having the Tomoka Oaks community sustain an ongoing an irreparable injury to the residents who have made their homes here for many years.

Please tell us what we can do to help prevent this ill-conceived plan from being implemented, and, again, thank you.

Harry McConnell

The traffic impact already from Tomoka Oaks pass thru traffic on rio pinar is terrible.
We have almost been hit by cars and trucks while trying to mow our lawns on the street side.
The increased traffic from the golf course development will directly affect us in the worst way.
It will ruin property values along rio pinar, congest peak hour travel, and pose a real safety threat to pets and people,
We stand firmly against this irresponsible decision to develop the golf course.
It will destroy our neighborhood.

Paula Mousikos Tue, Jun 27, 11:16 AM (1 day ago)

This email is really for everyone who is involved with Ormond Beach decision making.

I have lived on the golf course for 29 years. It's very sad that it closed but it is what it is. The idea of homes being built on any of it is bad enough but 300+ is ridiculous and obscene for so many reasons. I'm sure you've been made aware of most of them by my neighbors and others in this lovely community.

As a retired teacher, I'm also thinking of Tomoka Elementary having to absorb so many more students. Class sizes will be larger and more units will be needed in general. My daughter was a music teacher at Mims Elementary for 5 years. When that district closed some schools over 100 new students were sent to Mims. A couple ESE units were added. My daughter stuck it out for 2 more years after that then quit teaching in the public school setting. Mims Elementary went from a sweet little neighborhood school to a place where she no longer enjoyed being the music teacher. She teaches privately now and works with the Flagler Youth Orchestra. Tomoka Elementary is one of the best schools in the district. It needs to stay that way.

So traffic, which has never been an issue in Tomoka Oaks, certainly will be if a huge development like this is added in the middle of this beautiful long established neighborhood. I don't want to look at a buffer either with houses peeking through. There is no way to disguise or hide what will happen if this development is allowed to proceed.

I realize all plans are tentative and nothing has been submitted to the city yet so I just wanted to express myself as a resident in this wonderful neighborhood and city.

Sincerely yours,

Paula Mousikos

Tue, Jun 13, 2:49 PM

Dear Members of the Ormond Beach Planning Board and City Commission,

I live at 219 Rio Pinar Drive, a home that backs up to the Tomoka Oaks Golf Course. I chose to settle in this area for its beautiful green space, abundance of trees, serene atmosphere, safe environment for pedestrians and cyclists, balanced harmony between development and nature, varied architectural styles, large lot widths, and high property values stemming from these aspects. As such, I am writing to respectfully request that you deny the recently proposed residential development plan of the Tomoka Oaks Golf Course, as it threatens to disrupt and dismantle the current living conditions and violate Ormond Beach Comprehensive Plan and the City's Land Use Development Code.

The proposed plan of 276 lots of widths ranging from 50', 60' and 80' in place of the golf course will substantially alter the character of Tomoka Oaks and threaten the integrity of its aesthetic and natural features. It is not compatible with the present 100'-width lots, and that quantity of homes in this area will create undue crowding and an increase in traffic and noise. The heightened noise and chaotic traffic flow will likely have adverse effects on public safety and quality of life of residents, as it will no longer be a safe place for children to walk to the bus stop or for people to go running or cycling.

The development presents several harmful environmental impacts. Our backyards and golf course are home to important wildlife, such as gopher tortoises, a crucial protected Florida Keystone Species. Gopher tortoises' burrows house and protect hundreds of other species, like burrowing owls and the endangered indigo snake. Not only is it illegal to destroy their habitats without having a professional first safely relocate the tortoise, if we relocate or destroy these animals, countless other species could be threatened and lost to development.

We would also lose many beautiful trees, plants, and land formations that protect us from flooding and hurricane winds. The overdevelopment of lands, especially in coastal areas, can significantly alter natural drainage patterns, as has been noted by the United States Environmental Protection Agency, the United Nations Environment Programme (UNEP), and the National Oceanic and Atmospheric Administration (NOAA), among other environmental organizations and scholars. Forests, marshes, and wetlands help absorb and store water during heavy rainfall or storm events. With less of these and a higher quantity of impervious surfaces from development, rainfall will accumulate more rapidly and can overwhelm drainage system, leading to flooding, increased runoff, and erosion of natural protective barriers. As we have seen following the storms of last year, many areas of Florida that were not previously prone to flooding are now considered flood zones.

This altering of the neighborhood's character will substantially and permanently depreciate the value of surrounding property. Our current golf course/green space and the beauty and tranquility associated with it sustains our property values. If the green space is developed into houses, our property values will plummet.
We have seen this scenario before, and it was handled expertly. During the past review of the 2006 application for residential development of Tomoka Oaks Golf Village, city staff, the mayor, commissioners, the city attorney, the applicant, and the applicant's attorney unanimously decided that the proposed home development could not occur adjacent to existing homes due to the imminent threat posed to Tomoka Oaks home values and deemed the golf course property restricted in perpetuity to remain a golf course or recreational area as per the development order. These experts understood well the importance of protecting the character of Tomoka Oaks by reinforcing this covenant, and I implore you to say "no" to contradicting our 60-year historical character as a landmark Ormond Beach development. Allowing this development to move forward would be a total contradiction of it.

As a community, we would love an opportunity to talk about more reasonable approaches for maintaining the golf course area while preserving the integrity of our community. Rebuilding, cleaning up, and maintaining the golf course for the purpose of playing golf would be a welcome idea. If someone wanted to turn the golf course into a nature preserve, community garden, or manicured green space, many of us would support it. Better yet, give *us* the opportunity to execute this collectively. If this is impossible, at least give us all an opportunity to buy an acre or more behind our houses. I believe we can come up with very feasible alternatives.

I sincerely thank you for taking the time to read this letter and trust that your team of ethical professionals will keep the value of our homes and the wellbeing of our ecosystem and natural wildlife habitats in mind while making this paramount decision. If you have any questions or wish to contact me, please do not hesitate to do so.

Warm regards,

To Maka Oak Times Public Hearing

We have consistently requested no new development. Shame on you.
However, against residence requests.
We cannot allow the character of our neighborhoods and depreciation of all surrounding areas and property including the Loop.

The infrastructure is not in place, Police, Fire Station, storm water issues, traffic on our 2 lane roads and wildlife. Pollution and environmental impacts.
Traffic flow is horrible and will become worse with this development.

We do not need to ~~for~~ over build & over populate our small area. You are ~~destroying~~ ruining our area.

What about evacuation when required by hurricanes? More problems.

(1)

We have no urgent care or hospital in OBS and you allow more people.

It is not necessary. You are ruining our area & we respectfully ask you to STOP.

Again, please say no to this development.

We need less density in our area. There are serious concerns about drainage, stormwater run off, no infrastructure in place to handle traffic issues and our prized animals & wild life.

We want more foliage, trees, wildlife, normal traffic, [redacted] and peaceful surroundings. Parks and residential activities for residents.
We don't have enough police or fire or roads to handle this amount of impacts.

Very disappointed in each of you. Reconsider!

Hi Carolyn,

Juan and Caroline Prados.
My family lives at 44 River Ridge Trail.

We are strictly against the new development in Tomoka Oaks for these reasons.

- The new construction is not in keeping with the environment around it.
- It will surely devalue the prices of the existing houses around it which people have paid a premium for, being on the golf course.
- It will increase traffic flowing from Tomoka Oaks through the Trails in direction of the I95.
- This land should be for recreation only as it was originally planned.

Sincerely, Caroline Prados

to me

Hi Carolyn,
First, thank you for your hard work and commitment to a well worthy cause for all of us.
Yes we are very fine with you using my letter. We appreciate your efforts and look forward to seeing you at the meeting.

Greig and Beth Rabitaille
Sent from my iPhone

(Email sent by Greig Rabitaille to Carolyn Davis on 3/28/23. Greig provided permission to Carolyn on 6/25/23 to provide his letter to the Planning Board)

Hi Carolyn,

My name is Greig Rabitaille and we live next to Shon on Rio Pinar Trail. He is 100% correct that we nearly get hit by cars and trucks on the daily thoroughfare in front of our homes, and although not all are Trails homeowners, most of the existing traffic is coming from and going to Tomoka Oaks.

The traffic impact with the addition of another subdivision will make it more dangerous and will negatively impact the value of our homes. The entrance to the Trails at Granada Blvd. is already at capacity, especially when schools are in session and cannot bear another 200-300 cars daily(1/3-1/2 potential cars). The traffic studies performed during Covid were so grossly misinterpreted and we all fear that because the developer is paying the bill for the study, the results will be misinterpreted this time as well.

My wife and I routinely ride our bikes in the evening in the Trails and Tomoka Oaks neighborhoods. The increase in traffic would make it significantly more dangerous, given the lack of patience to drivers in general these days.

As for the impact of the quality of life as we know it in Ormond Beach, the one Mom at the second meeting (which we attended), hit it on the head as she explained trying to park now in the Publix parking lot, and how difficult it is to find a spot now. Adding potentially 600 cars would put a huge burden on all of us who shop there.

We find nothing beneficial about the additional subdivision for anyone and shame on the City of Ormond Beach City Commissioners who vote to proceed just to increase tax revenue. We all know that the developers will sell as soon as they get approval, commissioners will be long gone, and who will be held accountable in the long run. Nobody! And we will be stuck in the middle.

Thank you for your hard work and please continue to fight this. We appreciate it!

Greig Rabitaille

jrrhoades@c Mon, Jun 26, 7:20 PM (2 days ago)

Here is my letter, I hope its okay. John Rhoades 39 N St Andrews Dr

Dear Planning Board,

My name is John Rhoades and I live at 39 N St Andrews Dr, Ormond Beach, FL. I am against the redevelopment of the Tomoka Oaks Golf Course as it will change our entire neighborhood for the worse.

To start with there are too many new units that will be going in for the amount of ingress and egress that is available. The traffic system in this area was never meant to accommodate this amount of traffic load. The residents of the area will suffer from construction noise and dirt for years to come. This comes down to the reason that most people bought here. An established neighborhood with mature trees and lots of a size that you are not right on top of your neighbor, In other words peace and quiet. This new development will cause undue hardship for current residents with noise and construction equipment from morning to night 7 days a week. With the number of heavy trucks (such as cement), the entrance road will be torn up in no time. Again, this will be an undo hardship for current residents.

Let's talk about water, sewers, and electricity. It will have to come from somewhere. More than likely I see it either coming from the entrance or through existing residents' property through the use of easements. What a mess this will be, big ditches dug through residents' yards. The electric Company setting numerous power poles. All this just because there is no other way to do it. This is not what current residents thought would happen when they bought in Tomoka Oaks. This will negatively impact our Quality of Life.

I urge you to vote NO, this is not the place for a residential community of that size and scope to be built inside an existing residential community. Please give consideration to the residents of your city who call this home.

Thank You,

John Rhoades

39 N St Andrews Dr

Ormond Beach, FL 32174

Rick Rickards Jun 27, 2023, 7:44 AM (1 day ago)

to me

Hi, Carolyn;

I've made some tweaks on my letter, and I'm resubmitting it to you in pdf form. If you need a different format, just let me know.

Thanks,

Rick Rickards

(Emailed by Rick Rickards to Carolyn Davis on 6/26/23 for inclusion in Planning Board letters from residents)

June 26, 2023

To the Planning Board and all concerned;

My wife and I relocated to the Escondido condominiums in the fourth quarter of 2022, and shortly thereafter heard about the plans to build housing on the former Tomoka Oaks Golf Course.

We are opposed to developing homes on the former golf course for the following reasons:

1) First and foremost, I believe that building homes on the former golf course is a flagrant violation of trust. The people who bought homes on the golf course (or at least in a golf course community) were promised that the golf course would remain in perpetuity. To now build on that property because of some shady under-the-table dealings is completely dishonest and despicable. I don't live on the golf course myself, but I sympathize with the people who do, because they're being unfairly railroaded and taken advantage of.

2) It's undeniable that building on the golf course will significantly alter the character of Tomoka Oaks, The Trails, and Escondido. How could it not? Currently these are communities built around a grand open space. To drop 300 homes into that space will create an entirely different environment with a different character, thus reducing the quality of life of current residents.

3) Traffic flow in and around the existing developments will be severely impacted by the proposed development for two reasons. First, all the main circulating roads in the development, most notably St. Andrews, are narrow and without sidewalks or even shoulders. Even as things are now, it's dangerous to walk or bicycle along these existing roads — surely adding 500 or 600 or more cars to the traffic flow will make walking or biking even more precarious. Secondly, there are only three streets that provide ingress or egress to the development, and adding 500 or 600 or more cars will make it more difficult to safely get into or out of the development. In particular, the single entry/exit to the Escondido Condominiums dumps directly onto Tomoka Oaks Blvd. about 200 feet from Nova Road. If additional traffic is introduced onto Tomoka Oaks Blvd., it will make it much more difficult to exit the Escondido condos. Indeed, it will be necessary in most cases to rely on the courtesy of drivers on Tomoka Oaks Blvd. to allow us to pull out of our development.

I believe there are only two equitable uses for the former golf course from a zoning point of view:

1) To redevelop the property as a golf course.

2) To create a public park on the property, thus preserving the open space and wildlife habitat.

The former Tomoka Oaks Golf Course is a prime piece of property that the City of Ormond Beach Planning Commission should realize is a unique parcel in a centralized area that could benefit all residents of Ormond Beach. It should be committed to public use rather than squandering it by submitting it to housing development at the expense of existing residents' quality of life.

Thank you for considering my viewpoint in this matter.

Sincerely,

Rick Rickards

to me

Fri, Jun 23, 10:20 PM (5 days ago)

CITY OF ORMOND BEACH
PLANNING BOARD MEETING
THURSDAY, JULY 13TH, 2023
RE: TOMOKA RESERVE PROJECT

TO ALL PLANNING BOARD MEMBERS, CITY OF ORMOMD BEACH:

My name is Marcia Rudman. I reside in Escondido.

At this time, I would like to state my reasons why I cannot under any circumstances support the approval of the proposed Tomoka Reserve development. I have several reasons why I do not support the development.

First and foremost, Ormond Beach already has too much development. Excessive development over the years has contributed to diminishing our quality of life in this beautiful city. Traffic is horrendous almost all day on the major roads and there are a lot of accidents.

Another important reason for my opposition is that we cannot keep developing or we will run out of potable water. It will reach the point where a desalination plant will have to be built and no one will be able to afford their water bill. The environmental impact of the proposed development of 300 homes will be very serious. Another concern regarding water would be stormwater runoff during a heavy rain or a hurricane when the water has nowhere to go.

Also, the character of our neighborhoods will be negatively impacted (I'm including Escondido, the Trails and Talquah), They are beautiful neighborhoods, each with their very own character. None of us want to see bulldozers and the attendant construction activity.

In addition, since there is only one entrance to Tomoka Oaks how will emergency vehicles access the neighborhood during construction? How will existing residents and their visitors enter the neighborhood during construction?

I understand the owners would like to see some kind of return on their investment. There must be an equitable and fair solution which will please everyone (or almost everyone) that doesn't include all of the negatives I have highlighted. It seems that the city always approves pending development as they want to see the increased property tax money come in. We existing residents pay taxes also and should have a say.

Please think long and hard about your decision before voting on this proposed development.

Thank you.

Sincerely,

Marcia A. Rudman

June 23, 2023

Dear Carolyn,

I find it difficult to limit my comments to ONE topic!

Maintaining the golf course as such is vitally necessary from too many aspects to count. It provided a recreational facility for a segment of our population who is living on a fixed income and cannot afford the $2,500.00 - $10,000,00 initiation fee and $5,000.00 - $10.000.00 annual dues of the nearest competitor.

We provided jobs for literally hundreds of Ormond Beach citizens over the 30+ years of my involvement.

There are 100+ acres of unfettered land providing recharge capability for the aquifer in the geometric center of Ormond Beach.

Literally tens of thousands of dollars have been raised over the years from charity golf tournaments.

As a tourist attraction we had to hire French speaking employees during winter months to accommodate our Canadian visitors, many of whom bought 6 month memberships adding to the economy of Ormond Beach.

As a wildlife habitat I have personally encountered white-tailed deer, red fox, red hawk, owls with 6 feet of wing span, racoon, and giant piliated woodpeckers, among many others.

I am NOT opposed to development on the golf course!!!...I am unalterably opposed to the irresponsible development as presently structured,

Yours truly,

John Richard Ryals

May 23 2023

To Steven.Sprager@ormondbeach.org.

Planning Department City of Ormond Beach

I have lived in the Award Winning Trails community for over 50 years, I live on Main Trail. I have witnessed the heavier and heavier increase in traffic am and pm on the "cut thru" passing my door on Main Trail every single day. With the proposed development of Tomoka Oaks golf course and an increase of at least 1200 + cars from the Tomoka Course development and more from developments all around route 1 using the Trails "cut" thru to Granada. Today it should be called "International Main Trail expressway". Because that's what it is. I walk multiple times a week in and around Tomoka Oaks and the Trails, I see people driving at least 40 to 60 plus mph, Tomoka Oaks has no sidewalks, residents have to walk on the side of the road, that's darned dangerous. Going back many years ago to what the City did to screw up the award winning Trails, by allowing Wilmette Ave to go thru over Nova Road into Main trail by putting a traffic light there, instead of an island. The reason was "to take the pressure off Granada Blvd" but look what that has done, nothing to take the pressure off Granada Blvd. It has ruined the serenity of the trails development and done nothing to ease traffic flow on Granada Blvd. At certain times of the day Granada Boulevard is a traffic disaster and getting worse and worse. Introduction of The bright new 25 MPH speed limit signs and "no thru road" signs on Main Trail have had no impact whatsoever on reduction of speed or to discourage the use of Main Trail as a "cut thru". The Trails is a beautiful development but increase in "Cut thru traffic', noise from big trucks, garden equipment trucks, heavy duty tractor trailers and light trucks, loud Motor bikes, loud radios from cars racing thru at way higher than posted speeds, has transformed the development. There is now a need to put in more 4 way stop streets, islands called "round abouts" and speed bumps. These "devices" should help slow down and discourage the "cut thru people", Cut thru drivers should rightfully respect the neighborhood and lower their loud noise and illegal high speeds. They should Please respect that this is a community development with people out walking on the paths, walking their dogs, children on walk paths walking to the public park, people riding bikes to and from the Trails community Pool and tennis courts, now golf carts and scooters, school students being picked up and dropped off by school buses daily. Main Trail is now extremely dangerous. Cross walks have not been maintained or added where they should be, (ie to and from Dairy Queen and the nearby Restaurants from the city park), there is no **cross walk**, it's highly dangerous, it looks like no one cares! Some cross walks on Main trail are not clearly visible to oncoming traffic, some are even worn out and badly need signage and be re painted.

There is enough "affordable housing" for all levels of income being built in our area, there is a "gem" of a course that is Tomoka Oaks and I am against the course being developed because of the obvious high impact on the Trails, and its asset value to Ormond Beach, which not too many politicians seem to care about or are aware of or even mention. I've been in the golf business all my life, owning two local successful public golf courses. Ocean Palm GC and Hidden lakes. Tomoka Oaks GC will make money. Golf is booming today, there are many examples of City owned golf courses making money. The real answer to why Tomoka Golf Course failed? Tomoka Oaks was a badly run course owned by people who did not know the business of golf, with no money to reinvest to upgrade, this caused the playing conditions to deteriorate and discouraged play, the core supporting group of players went somewhere else. Tomoka is a winner and should be given a chance to reopen with modern upgrades. Those that say it can't make

money are absolutely wrong, it's all about the condition. it's a "gem" a treasure waiting for the right time, that time is now.

In the past some area golf courses failed because there weren't enough people living here to support all of them. The courses were ahead of their time, build and they will come did not happen. Times have dramatically changed, today with 32 million people playing golf and people moving to Florida, Ormond Beach growing like a weed. Now is the time. Tomoka GC, a "gem" not to be lost for monitory greed. This "in Town treasure" will thrive for the Ormond community, a treasure to offer our community and winter season visitors. Once gone that means forever, that would be a travesty, a sad day for the residents of Ormond Beach.

Respectfully submitted

to Krystal

Hi Krystal,

As you may have seen, the Planning Board is hearing the golf course development application at their meeting on July 13. I am compiling letters from residents that I will provide to the Planning Board next week, and I would love to include your earlier letter printed in the April newsletter. Do I have your permission to do that?

Let me know!

Not giving in or up,
Carolyn Davis

Re: I Need Your Safety and Traffic Concerns

Golf Course/Tomoka Oaks Times/Traffic ×

Krystal Ahmad <kdsonsky@gmail.com> Sun, Mar 28, 9:52 PM

to me

So what do I need from you?

- Your first and last name.
  Krystal Ahmad & David Sonsky

- The street you live on. (Specific address number is optional.)
  30 S St Andrews Drive, Ormond Beach, FL 32174

- A short explanation of how you or a family member's or pet's safety was threatened by current traffic issues while driving, walking, playing, or biking on our streets.
  Csrs frequently/all day like to speed down my street. I have almost been hit while walking my dogs and child in a stroller (literally jumping int o the grass shoving the stroller and almost falling over with my son), and stopped by drivers to harass me because I have a sign on my stroller that says "Please slow down." There have been people on my street that have been struck by vehicles and even someone that has died.

  In front of my house cars speed at probably 40+mph and I cried the day my husband and I ran full speed down my driveway at my toddler that was heading for the road. We never take our son to the front yard or let him walk himself to our car due to the fear of him getting struck by a car. We both know he wouldn't survive.

  This new development is going to add diverse housing that will bring my property value down, lots bigger than my 60x100 lot, and add an enormous amount of traffic that our neighborhood cannot sustain at a safe level. Also, if they conducted the traffic report in May or June when school was out then they are missing a lot of traffic in their report.
  If a 3rd lane is added to the entrance, which will remove all the nice grass sides when you drive up to our development downgrading our development's appearance and value from the moment you drive up, there will be an alarming increase of danger as Escondido residents will have to cross over to the 3rd lane to get out. It also won't be safe anymore for anyone to walk to the entrance to get to the sidewalk on Nova to walk to the nearby Rainbow Park. People will be shooting out from Escondido to try to get across. It'll be dangerous for all.

- A short explanation of your first-hand account where your property or vehicle was damaged or in danger of being damaged due to any current traffic-related circumstances.
  My street gets bombarded with worker trucks that park on the street. It's not a big deal except that even that is dangerous because you always have a person who for some reason has to race by them because they cannot wait.
  We had a car parked right in front of our driveway to allow some landscape work to be done and within 30 minutes it was struck by a driver. The card had major damage, had to get a rental car, and since Florida is a no-fault state the car insurance went up even though it was the other driver's fault. He was texting while driving and slammed into a parked car.
  Another incident was a big truck that was driving up our street and pulled over to the side of the road and smashed our mailbox because he was trying to allow traffic to get through.

- A picture of any damage sustained to your property or vehicle resulting from traffic issues.
  Sorry, don't have these photos anymore.
  I can send a picture of my mailbox if you'd like

- A picture of any portion of our neighborhood or your property, along with a short explanation of how that picture is representative of safety concerns should any level of new residential development be approved.
  I'd have to send a photo of the development entrance and my street. It's the connecting street to get to The Trsils development and S St Andrews also leads out of our development along with N St Andrews. Tons of residents pass/fly by my house all day long. I know I have videos somewhere on my phone recording drivers speeding down my street. If not I can get one anytime, any day because it happens daily.

- Krystal Ahmad & Dave Sonsky

Golf Course/Tomoka Oaks Times/Traffic ×

ian tafel Sun, Mar 26, 9:06 PM
to me, M

Good evening Carolyn,

First off thank you very much for all of your work on this, we greatly appreciate it. My wife and I, with our 3 children under 5, moved into this community in June 2022. Since we have moved in we have noticed increased traffic especially at the main entrance to our community and at/on Nova road. It's almost impossible to turn left out onto Nova road and turning left into the community from Nova road during morning and evening commutes is concerning because of the amount of traffic on Nova and coming out of the community.

When we bought the house we were told there were discussions about developing the old golf course, but that it would probably never happen. We do not see how adding even more houses to an already overstrained system is going to benefit anyone. Additionally, I am a Neurosurgeon at Halifax Hospital and take trauma call, so I am concerned about any more traffic getting out of the community as this would have a direct impact on my ability to get to the hospital for emergencies. We are currently 16 minutes away without traffic so even 4 or 5 more minutes of traffic could make a huge difference (this would put me out of the 20 minute radius from the hospital and may make us have to move).

Thank you again and please let us know if there is anything we can help with.

Sincerely,
Dr. Tafel

See next page for a second letter.

Hi Carolyn,

Here is my letter. I tried to kindly address all of the "must have" and "must not" points in your email. I think it's very clear any development of the golf course flagrantly violates these terms. My letter is included below in this email. Thank you again.

---

*The new development must **NOT**:*

- Alter the character of Tomoka Oaks or existing neighborhoods such as The Trails, Escondido, or Talaquah.
    - The development of the golf course will fundamentally change not only the character of Tomoka Oaks, but the surrounding neighborhoods by virtue of the addition of a preposterous amount of new houses and the subsequent increase in traffic and massive increase in population density. Volusia county is running out of green space, open space. My family and I moved to Tomoka Oaks from Miami due to the massive increase in population and erosion of what Miami used to be due to this. With 3 children at ages 5 and under we sought out this neighborhood for its distance from traffic, congestion and its seclusion. When we purchased the house we were told by the sellers realtor that "the golf course has been considered for development for years, but it would never happen." If we had known then what we know now, then we would have not considered this area for a home. Developing the golf course will back up traffic throughout the area and will force many of the Tomoka Oaks residents to choose alternate pathways, including through the trails and surrounding neighborhoods. With the development of the golf course we would no longer be the "Estates at Tomoka Oaks", we would simply be another over congested neighborhood yearning for a time when the golf course had the potential to be a green space for this area to enjoy.

- Substantially and permanently depreciate the value of the surrounding property.
    - Any further development of the golf course would undoubtedly decrease the property value of all of the homes in Tomoka Oaks. As I stated above, if we had known there was a massive development being planned at the golf course then we would not have purchased our home here. I am not alone in that sentiment.

- Create undue crowding.
    - Simply put, 300 houses with 300-600 or more cars (assuming 1-2 cars per household), would turn the entrance to Nova road into a parking lot. The traffic already backs up into Nova and into the surrounding communities during rush hour and this will only get worse with more development.

- Adversely affect the public health, safety, welfare or quality of life.
    - Increased population density and the loss of green space would affect public health given the increase in pollution from more people living here. Safety would be affected

due to the increase in traffic. Our quality of life in the small, quiet area of Tomoka Oaks would be destroyed by the increase in traffic and population.

- Present potential adverse environmental impacts.
    - This goes without saying, that any development of the open green space of the golf course would destroy the natural beauty of the area. We are quickly running out of green spaces in this area. My drive from Tomoka Oaks to Halifax hospital, along Clyde Morris boulevard, attests to this every day. We do not need to put houses on every open field. Additionally, will these new houses tap in to the same underground wells that we have access to? Will their increase well water consumption force us to have to pay tens of thousands of dollars to dig these wells deeper? What about the natural aquifers that are in the golf course? Once disturbed, that natural beauty cannot be made back to what it was.

*The new development **MUST**:*

- Ensure safe and convenient traffic flow.
    - The traffic flow is already unsafe and inconvenient. I am at a loss to understand how adding more houses here with more people and vehicles will make this better.

- Protect wildlife habitat areas.
    - Chopping up the golf course and making tiny islands of "undisturbed" areas for wildlife amongst a sea of new construction that will occur for potentially years, is in no way, shape or form, protecting wildlife here. Has any analysis been completed on any at risk or endangered species that now call the golf course home after its been vacant for so long?

- Be compatible with Tomoka Oaks i.e., lot widths, architectural styles, property setbacks.
    - Part of the beauty of Tomoka Oaks is the individuality and character of each of the houses. Almost every one is different and wonderful. Cookie cutter, tooth pick houses will ruin the aesthetics of this area.

- Have adequate emergency access.
    - One road into the golf course, would not provide adequate access for emergency response vehicles. What if there is a broken down truck in that single roadway? The construction group has floated the idea of tearing down some of the existing houses in Tomoka Oaks to make room for new roads into the golf course. Yes, that would make emergency access better for the golf course, but it would increase traffic for Tomoka Oaks and ruin the best selling feature of this development.

- Meet hurricane evacuation criteria.
    - The increased population resulting from houses on the golf course would back up traffic and create an unnecessary hazard for Tomoka Oaks and surrounding neighborhoods evacuations.

- Maintain adequate facilities and services: schools, roads, stormwater management, police and fire protection, EMS, and evacuation facilities.
    - There is already not enough spaces in schools for our children. We were on a waitlist for months for the school and barely made it into a daycare here. We are not planning to increase our schools, police, EMS, fire, etc. for these houses are we? At the very least we need to stop a cart before the horse process of being in the position of needing these services before we have them available. For instance, at the hospital, it's a venerable war zone. We are barely covering the influx of people already here, let alone adding another 300 families to the golf course, plus all the other developments going up around here. We are not an unlimited resource.

In summary, I am seriously concerned about significant detrimental effects to Tomoka Oaks and the surrounding neighborhoods in the development of the golf course. Florida has had a massive increase in population, and we are struggling to accommodate the influx of people in every facet of life. All I am asking is for all of us to slow down and really consider what kind of Volusia County and Tomoka Oaks we want to leave to our children. For me and my family, we bought a house here with the intention of living here for generations and becoming a real part of this community, but overdevelopment, especially at the golf course, threatens to push us and other good people away. I implore you to please consider designating the golf course a wildlife sanctuary, as was the original intention of the area. Thank you for your time and consideration.

Dr. Tafel

Over-development

Charles Thomas ... Mon, Jun 26, 6:55 PM (2 days ago)

to CarolynDavis3

Development on Tomoka Oaks Golf course will increase hectic Granada traffic. Already, many drivers cut through The Trails to bypass congestion. Because of earlier development, roadways are much more heavily trafficked than ten years ago and nothing has been done to abate it. Vote in the people's interest; the infrastructure won't support limitless expansion.

Tomoka Oaks Golf Course Development

Nell Thomas <nmthomas0... Jun 26, 2023, 6:49 PM (2 days ago)
to CarolynDavis3

Development of the Tomoka Oaks Golf Course will severely impact traffic around and through The Trails where we live. Already, people cut through the community to avoid the congested area around the Nova Road / Granada Avenue intersection. Because of other developments, these two roads are much more heavily trafficked now than ten years ago and little has been done to accommodate the increased population. Please don't add to the problems by more building without supporting infrastructure.

Thank you,

Nell Thomas

Tomoka Oaks letter- 219 Rio Pinar dr

Golf Course/City of Ormond/Hearing Letters June and July 2023 ×

L VT Tue, Jun 27, 8:42 AM (1 day ago)

I am a resident of Rio Pinar Drive, residing in a property that overlooks the Tomoka Oaks Golf Course. I deliberately chose this location for its remarkable greenery, peaceful ambiance, pedestrian and cyclist-friendly environment, harmonious blend of development and nature, unique homes, spacious lot sizes, and the high property values. With utmost respect, I write to request that you kindly reject the recently proposed residential development plan as it currently is drawn for the Tomoka Oaks Golf Course, as it poses a significant threat to the existing living conditions and violates both the Ormond Beach Comprehensive Plan and the City's Land Use Development Code.

When the Tomoka Oaks neighborhood was built, the golf course was considered as part of the drainage system of the neighborhood. By taking away the golf course they would be taking away a significant part of our drainage system and not making up for it. The proposed water retention pond only addresses the need of the new 276 units and does not make up for our loss of drainage system.

Moreover, the proposed plan brings in 276 home units, adding 33,000 gallons/day more of water into our saturated sewer system, which has already proven to be problematic during the last two tropical storms that hit us in 2022. Those two storms were baby storms compared to what we could be experiencing in the near future. As a result our home insurance increased at least by 33 percent this year, and some are even requiring flood insurance for some of our homes that are as high as 40 feet above the water. Can you imagine what 33,000 gallons more per day in our sewer system would do to our saturated system—especially, during a hurricane?

Needless to say, good development is important and crucial in our society, but poor planning and development has led to multiple catastrophes that could have been easily prevented by simply not overdeveloping areas and better preparing for these events.

The proposed plan entails replacing the golf course with 276 lots of varying widths (ranging from 50', 60', and 80'), fundamentally altering the character of Tomoka Oaks and compromising its aesthetic and natural features. It lacks compatibility with the current 100'-width lots, leading to overcrowding and an inevitable surge in traffic and noise levels, which will likely jeopardize public safety and the quality of life for residents and lead to safety issues for walkers and cyclists.

Moreover, this development would have adverse environmental repercussions. Our backyards and the golf course itself serve as crucial habitats for a range of wildlife, including protected Florida Keystone Species such as gopher tortoises, whose shelters provide protection to numerous other species. It is essential to note that destroying their habitats without professional relocation is illegal, and such actions could threaten countless other species in the area. Additionally, the loss of beautiful trees, plants, and natural formations would leave us more vulnerable to flooding and hurricane winds.

This transformation of the neighborhood's character would undoubtedly lead to a depreciation in the value of surrounding properties. Our current golf course and green space, along with the associated beauty and serenity, significantly contribute to the value of our homes. If this green space were to be replaced by houses, it would have a detrimental effect on property values.

Previously in 2006 upon the review of an application for residential development of the Tomoka Oaks Golf Village, our city staff, the mayor, commissioners, the city attorney, the applicant, and the applicant's attorney collectively determined that the plan posed a threat to Tomoka Oaks home values. Consequently, the golf course property was legally restricted to remain a golf course or recreational area as specified in the

development order. These experienced professionals recognized the importance of safeguarding the character of Tomoka Oaks by reinforcing this covenant. I implore you to honor this precedent and uphold our 60-year history as a prominent Ormond Beach development. Allowing this development to proceed would contradict our established principles. I firmly believe that together we can propose viable alternatives to this plan, whether it entails allowing residents to purchase the land behind their houses or establishing a manicured community garden or park.

Thank you for your time. I have faith in the ethical professionalism of your team as you consider this crucial decision. I remain confident that you will prioritize the value of our homes as well as our beautiful natural surroundings that make our neighborhood so pleasant and valuable. If you have any questions or would like to speak further on this matter, do not hesitate to contact me.

Best regards,
Leonardo Valdivieso-Torres PhD

Joan Van Lancker Jun 24, 2023, 5:41 PM (4 days ago)
to me

Yes, of course.

(Emailed by Joan Van Lancker to Carolyn Davis on 3/28/23. Joan provided permission on 6/24/23 to provide her letter to the Planning Board)

Hello Carolyn,

First, May I say "Thank You" for all your work & dedication you have done & continue to do for our community, Tomoka Oaks.

My name is Joan Van Lancker. My husband, L.J. Van Lancker ["Van"] & I live at 15 N.St. Andrews Dr. We are the 1st. property next to Escondido.

We have lived here 34 yrs. & would not choose to live anywhere else. Unfortunately, over these many years, we have had cars & trucks driving onto our property & damaged many sprinkler heads & grass. Also, trash has been dropped on our lawn, and 4 yard ornaments [statues] have been stolen. Still, we very much enjoy this community & the residents who live here.

Needless to say, the proposed plan to increase the traffic with over 300 more homes concerns us very much. The road passing by our triple car driveway is at the most narrow point facing the island on N. St. Andrews Dr. We have not succeeded in convincing the city not to have the school buses stop & leave the children on & off at this very spot, so I know how much more unsafe this situation would be with increased traffic.

Personally, we must be extremely cautious when pulling out from the driveway. Vehicles coming down S. St. Andrews sometimes round the island in front of our home and onto N. St. Andrews. At times, I am backing out onto the street when I see them, only at the last possible safe minute, crossing behind my car onto N. St. Andrews. It's scary!

There are times now, we must wait 3-5 mins. in our vehicle before being able to leave our home. Imagine with even more traffic the safety of lives & property will be greatly compromised! There are times when our 5 children & 8 grandchildren come to visit. Van most often will go into the street & direct traffic so their vehicles can safely back out onto the street.

Finally, with more homes & obviously more vehicles & traffic directly passing in & out of our property, we are unhappy knowing our property value will surely go down. This is not a pleasant fact for seniors, or any homeowner to accept.

Again, thank you, & if you'd like to contact us for further details, please do not hesitate to let us know.

Best WIshes,
L.J. & Joan Van Lancker
15 N. St. Andrews

FW: I Need Your Safety and Traffic Concerns

Golf Course/City of Ormond/Hearing Letters June and July 2023 ×

Laura Weast 10:28 AM (7 hours ago)

Hi Carolyn,

Thank you again for your hard work and dedication to protecting our neighborhood. Please let me know how I can help.

1) Not knowing if the islands and narrow streets will be protected, my main concern has to do with emergency vehicles being able to navigate the subdivision quickly during emergencies; i.e., medical emergencies, fire emergencies, hurricane evacuations and flooding emergencies. If that golf course is developed with over 300 homes or buildings...it will flood. And so will the rest of the neighborhood due to the downward path of the water flow toward the Tomoka River. Have the fire departments, police departments, EPA and SJRWM been consulted??? I doubt it.

2) The native species of wildlife that inhabit the current golf course is abounding: protected gopher tortoises, the protected American bald eagles, as well as the numerous other species of birds. Residents have noticed American white tail deer, raccoons, opossum, grey and red squirrels (there is also a white one I hear), grey and red fox, and the all important scary, yucky snakes. (Yes, they are important to the environment-ugh)

3) This should be number 2 perhaps: The massive oak trees on the golf course help prevent flooding as certain species of oaks can absorb over 100 gallons of water per day. According to www.americanforests.org, a large tree (25' tall), in a single **day**, **can** soak up about **100 gallons of water** out **of** the ground.

I will think about this more before the 2nd and send more info if needed for your presentation.

Thank you again,

Laura

June 14, 2023

Dear Planning Board Members,

My husband and I have lived in The Trails for 30 years. I am writing to respectfully ask that you **not** approve residential development on the Tomoka Oaks golf course.

The concept of building any homes in the middle of a historic development that would also impact 4 other communities: (The Trails [also historic], Escondido Condos, Tomoka Oaks North Condos and Talaquah) is beyond comprehension.

I have to laugh when the developers try to list ways that their development will enhance our neighborhoods. Really???? I think our neighborhoods are quite wonderful the way they are. There will only be negative consequences with this development.

I think of a professional photographer my husband and I met while on a walk through Tomoka Oaks. He has documented and photographed approximately 118 different species of animals, insects and birds on the golf course over the last 14 years. He has done everything but give each one a name and for all I know he has done that also.

I have to laugh when I read through the 266 pages of The City of Ormond Beach Parks and Recreation Master Plan 2022. According to the 2-year study that cost the City $125,000, people want more green space, more parks and a golf course. The National Recreation Parks Association recommends a median benchmark of 13.2 acres of park land per 1,000 people. Where will this land come from after we desecrate every last bit of it?

Yes, there's a lot to laugh about such as each time the developers submit a site plan that causes us to have more questions than answers. If I were not so busy laughing I'd probably be crying for the 147 acres of beautiful land that truly is an asset to our neighborhoods.

>
> I have lived in the Award Winning Trails community for over 50 years, I live on Main Trail. I have witnessed the heavier and heavier increase in traffic am and pm on the "cut thru" passing my door on Main Trail every single day. With the proposed development of Tomoka Oaks golf course and an increase of at least 1200 + cars from the Tomoka Course development and more from developments all around route 1 using the Trails "cut" thru to Granada. Today it should be called "International Main Trail expressway". Because that's what it is. I walk multiple times a week in and around Tomoka Oaks and the Trails, I see people driving at least 40 to 60 plus mph, Tomoka Oaks has no sidewalks, residents have to walk on the side of the road, that's darned dangerous. Going back many years ago to what the City did to screw up the award winning Trails, by allowing Wilmette Ave to go thru over Nova Road into Main trail by putting a traffic light there, instead of an island. The reason was "to take the pressure off Granada Blvd" but look what that has done, nothing to take the pressure off Granada Blvd. It has ruined the serenity of the trails development and done nothing to ease traffic flow on Granada Blvd. At certain times of the day Granada Boulevard is a traffic disaster and getting worse and worse. Introduction of The bright new 25 MPH speed limit signs and "no thru road" signs on Main Trail have had no impact whatsoever on reduction of speed or to discourage the use of Main Trail as a "cut thru". The Trails is a beautiful development but increase in "Cut thru traffic', noise from big trucks, garden equipment trucks, heavy duty tractor trailers and light trucks, loud Motor bikes, loud radios from cars racing thru at way higher than posted speeds, has transformed the development. There is now a need to put in more 4 way stop streets,

islands called “round abouts” and speed bumps. These “devices” should help slow down and discourage the “cut thru people”, Cut thru drivers should rightfully respect the neighborhood and lower their loud noise and illegal high speeds. They should Please respect that this is a community development with people out walking on the paths, walking their dogs, children on walk paths walking to the public park, people riding bikes to and from the Trails community Pool and tennis courts, now golf carts and scooters, school students being picked up and dropped off by school buses daily. Main Trail is now extremely dangerous. Cross walks have not been maintained or added where they should be, (ie to and from Dairy Queen and the nearby Restaurants from the city park), there is no **cross walk**, it’s highly dangerous, it looks like no one cares! Some cross walks on Main trail are not clearly visible to oncoming traffic, some are even worn out and badly need signage and be re painted.

There is enough “affordable housing” for all levels of income being built in our area, there is a “gem” of a course that is Tomoka Oaks and I am against the course being developed because of the obvious high impact on the Trails, and its asset value to Ormond Beach, which not too many politicians seem to care about or are aware of or even mention. I’ve been in the golf business all my life, owning two local successful public golf courses. Ocean Palm GC and Hidden lakes. Tomoka Oaks GC will make money. Golf is booming today, there are many examples of City owned golf courses making money. The real answer to why Tomoka Golf Course failed? Tomoka Oaks was a badly run course owned by people who did not know the business of golf, with no money to reinvest to upgrade, this caused the playing conditions to deteriorate and discouraged play, the core supporting group of players went somewhere else. Tomoka is a winner and should be given a chance to reopen with modern upgrades. Those that say it can’t make money are absolutely wrong, it’s all about the condition. it’s a “gem” a treasure waiting for the right time, that time is now.

In the past some area golf courses failed because there weren’t enough people living here to support all of them. The courses were ahead of their time, build and they will come did not happen. Times have dramatically changed, today with 32 million people playing golf and people moving to Florida, Ormond Beach growing like a weed. Now is the time. Tomoka GC, a “gem” not to be lost for monitory greed. This “in Town treasure” will thrive for the Ormond community, a treasure to offer our community and winter season visitors. Once gone that means forever, that would be a travesty, a sad day for the residents of Ormond Beach.

Respectfully submitted

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

As usual, I'm a day late and a dollar short. I'm sending this regardless and hoping that it can included.

I moved to Tomoka Oaks last year, had a beautiful house built. It took us forever to figure out the plans on the property due to all the rules, regulations and set backs. We spent a lot of money on this house so it could accommodate my 95 year old mother to be with us. Now we are facing having a minimum of 600 cars racing past our home on a daily basis, that's if there are only 2 people to a household. It could be 1200 being more realistic. The traffic in this area is already ridiculous before this venture is even started. It will feel like we are on I 95. The value of my house will be in the toilet !!!

Why should some elite millionaire be allowed to barge in just because he has the big bucks, and all of sudden the rules change. Houses jammed in on tiny 50 ft or 40 ft frontages. People live here for a reason, now it looks like there is no concern for the people that have been here but whoever has the biggest pocketbook wins. It's sad but it's the new norm.

Ormond Beach, Florida 32174

Re: ***Tomoka Reserve – PRD-2022-043***

Dear Chairman Thomas & Planning Board Members:

Our law firm represents Carolyn Davis and a consortium of homeowners within the Tomoka Oaks Country Club Estates subdivision in Ormond Beach, Florida ("Tomoka Oaks"). At its regular meeting on ***Thursday, July 13, 2023***, the Ormond Beach Planning Board ("Planning Board") is scheduled to consider the above-referenced project, which seeks to rezone and convert the existing Tomoka Oaks golf course into 276 single-family residential lots. For the reasons discussed herein, our clients oppose the proposed redevelopment of the golf course property and respectfully request that the Planning Board recommend ***denial*** of the proposed rezoning.

A. General Factual Overview

Briefly stated, in April 2021, Triumph Oaks of Ormond Beach, LLC ("Triumph Oaks"), purchased the Tomoka Oaks Golf & Country Club ("Golf Club") for approximately $2,600,000. Thereafter, Triumph Oaks filed an application with the City of Ormond Beach ("City") seeking to rezone the golf course property to Planned Residential Development (PRD) and redevelop the golf course with 276 single-family residential lots. Based upon such rezoning application and Triumph Oaks' proposed plans to permanently close the Golf Club and convert the golf course into 276 single-family lots, the issue has arisen as to whether the property is restricted to use as a golf course, either expressly or impliedly.

As discussed herein and based upon the historical and recorded documentation relating to Tomoka Oaks, our clients maintain that the Golf Club property is subject to either an express covenant or an implied covenant limiting the use of the property to a golf and country club, golf course, and related recreational uses. Accordingly, our clients assert that the proposal to convert

the Golf Club property into 276 single-family residential lots is not permissible and the requested rezoning should be ***denied***.

B. The Golf Club Restriction

In 1961, the City approved plats for both the Golf Club (f/k/a Sam Snead Golf & Country Club) and Tomoka Oaks Country Club Estates Unit 1.[1] The Plat for Unit 1 of the Tomoka Oaks Country Club Estates subdivision contained 105 residential lots, including approximately 55 residential lots bordering the golf course.[2]

In conjunction with the development of Unit 1 of Tomoka Oaks, the developer recorded "Restrictions Tomoka Oaks Country Club Estates, Unit #1, Ormond Beach, Florida" ("Unit 1 Covenants").[3] Notably, Paragraph 10 of the Unit 1 Covenants states:

> The Grantee [*i.e.*, lot owner] shall automatically become a member of the Tomoka Oaks Homeowners Association, a non-profit corporation comprised of all lot owners in Tomoka Oaks Country Club Estates . . . .

Paragraph 11 of the Unit 1 Covenants expressly prohibited the developer from releasing in whole or in part any restriction or reservation set forth in Paragraph 10.

Thereafter, on or about January 1, 1963, Tomoka Oaks, Inc., entered a 99-year "Lease" with Tomoka Oaks Golf and Country Club, Inc., for the golf course property.[4] Paragraph 3 of the Lease, entitled "Use," provided in pertinent part:

> ***The demised premises shall be used perpetually for a country club and related uses***. . . . ***This provision shall survive the lease*** and be included in any deed but the deed restriction may be waived by a resolution of two-thirds (2/3) of the Board of Directors of the Lessee with the concurrence of two-thirds (2/3) of the members of said Lessee and the concurrence of two-thirds (2/3) of the members of Tomoka Oaks Homeowners Association. . . .[5]

On or about October 30, 1963, Tomoka Oaks Golf and Country Club, Inc., executed a "Surrender of Lease."[6] As noted above, however, the limitation that the subject property be "used perpetually for a country club and related uses" survived the Lease per the express terms of Paragraph 3 therein.

---

1 *See* Book 25, Page 61, Official Records of Volusia County, Florida; *Id*. at Book 25, Page 58.
2 *See id*. at Book 25, Pages 58 and 59.
3 *See id*. at Book 431, Page 32.
4 *See id*. at Book 516, Page 360.
5 *See id*. at Page 362 (emphasis supplied).
6 *See id*. at Book 585, Page 155.

Following the Surrender of Lease, Tomoka Oaks, Inc., conveyed the golf course property to Ralph B. Frederick, Trustee, via Warranty Deed dated December 12, 1963 ("1963 Warranty Deed").[7] Notably, the 1963 Warranty Deed for the golf course property provided in pertinent part:

> ***The above described property shall be used perpetually for purposes of a golf and country club, golf course, and related uses***, and in the event that party of the second part, or its successors in interest, ***fail to utilize said property exclusively as a golf and country club, golf course, and related uses***, and the property not be sold to Tomoka Oaks, Inc., Tomoka Oaks Golf and Country Club, Inc. or Tomoka Oaks Homeowners Association as specified in the preceding paragraph, ***then the above described property shall automatically revert*** to and become the property of party of the first part . . . .
>
> ***The aforesaid reverter clause specified in the last preceding paragraph may be released or modified*** by resolution concurred in by two-thirds of the entire board of directors of Tomoka Oaks, Inc. at any time after ten years after the date of recording of this Deed; provided that if Tomoka Oaks, Inc. shall have disposed of four-fifths (4/5) of the lots in Tomoka Oaks Country Club Estates, then the foregoing right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks Homeowners Association, Inc., to be exercised by resolution of two-thirds (2/3) of the Board of Directors of the Tomoka Oaks Homeowners Association, Inc.[8]

Consistent with the terms of the surrendered Lease, the 1963 Warranty Deed expressly provided that the subject property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." Moreover, while the 1963 Warranty Deed included language and a process for the release or modification of the "reverter clause," there is no language in the 1963 Warranty Deed authorizing the release or modification of the actual restrictive covenant limiting the use of the property to a "golf and country club, golf course, and related uses."

On or about February 18, 1969, Tomoka Oaks, Inc., purported to pass a "Resolution" to effectuate the sale of the golf course property to Ormond Ocean Homes, Inc.[9] Therein, Tomoka Oaks, Inc., purported to "release . . . its right of first refusal" and "further releases the reverter clause contained in [the 1963 Warranty Deed], such release of reverter to become effective December 13, 1973, the release date specified in such reverter clause."[10] Relying upon such Resolution, Tomoka Oaks, Inc., executed a "Release" on or about June 16, 1971, purporting to

---

[7] *See id*. at Book 585, Page 157. At the time of such conveyance, Ralph B. Frederick was also apparently the President of Tomoka Oaks, Inc.

[8] *See id*. at Page 159 (emphasis supplied).

[9] *See id*. at Book 1238, Page 246.

[10] *See id*. at Page 248.

release its "right of first refusal" and the "reverter clause contained in [the 1963 Warranty Deed], such release of reverter to become effective December 13, 1973, the release date specified in such reverter clause."[11]

Based upon the foregoing Resolution and Release, Triumph Oaks and/or its representatives have suggested to the City that the use restriction imposed upon the golf course property is no longer valid or in effect. Our clients maintain that this view is legally flawed and without merit.

As reflected above, the 1963 Lease for the golf course property expressly provided that "[t]he demised premises shall be used perpetually for a country club and related uses" and that such "provision shall survive the lease." Additionally, and consistent with the 1963 Lease, the 1963 Warranty Deed expressly provided that the property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." While the 1963 Lease mentions a process by which such use restriction could potentially be waived, the historical documentation presented to our office does not establish that such process was ever followed – *i.e.*, concurrence of two-thirds of the Lessee and its members and two-thirds of the members of the Tomoka Oaks Homeowners Association.[12]

Further, while the 1963 Warranty Deed included language and a process for the release or modification of the "reverter clause," there is no language in the Warranty Deed authorizing the release or modification of the actual restrictive covenant limiting the use of the property to a "golf and country club, golf course, and related uses." Rather, the 1963 Warranty Deed unambiguously states that the subject property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses."

Lastly, reliance upon the 1969 Resolution and the 1971 Release to claim that the use restriction was somehow waived or released is misplaced. Even assuming the 1969 Resolution and the 1971 Release are valid – which is questionable – neither document purports to release, waive, or otherwise modify the use restriction.[13]

---

[11] *See id*. at Book 1307, Page 89.

[12] The historical documentation provided to our office, including newspaper articles, reflect the existence of a "Tomoka Oaks Homeowners Association" during the subject timeframe.

[13] The 1969 Resolution and the 1971 Release are of questionable validity given that they purport to "prospectively" release the "right of reverter." By its own terms, the 1963 Warranty Deed provided that Tomoka Oaks, Inc., could release or modify the reverter clause only by resolution "at any time ***after*** ten years ***after*** the date of recording of this Deed" and only if Tomoka Oaks, Inc., had not yet disposed of four-fifths (4/5) of the lots in Tomoka Oaks at such time. *See* Book 585, Pages 158-59, Official Records of Volusia County (emphasis supplied). Contrary to the plain language of the 1963 Warranty Deed, Tomoka Oaks, Inc., purported to pass a resolution more than four (4) years ***before*** the ten (10) year anniversary of the recording of the 1963 Warranty Deed seeking to release the right of reverter. Further, the fact that the 1969 Resolution and the 1971 Release purported to "delay" the effectiveness of such release until December 13, 1973 (*i.e.*, ten (10) years after the 1963 Warranty Deed was recorded) is irrelevant. Not only does it ignore the fact that the 1963 Warranty Deed required the resolution itself to occur ten (10) years ***after*** the

As discussed above, the 1969 Resolution and the 1971 Release purport to release the "right of first refusal" and the "reverter clause." Nothing in the express language of the 1969 Resolution or the 1971 Release, however, purports to waive, release, or otherwise modify the use restriction providing that the property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." Accordingly, based upon the foregoing and the plain and unambiguous language in the 1963 Lease and the 1963 Warranty Deed, our clients maintain that such use restriction is valid and effective and was never lawfully released, waived, or otherwise terminated. On this basis alone, the proposed conversion of the golf course into 276 single-family residential lots would be prohibited and the Planning Board should recommend ***denial*** of the proposed rezoning.

C. Implied Restriction Limiting The Tomoka Oaks Property To Use As A Golf Club

In addition to the above, it is well established that a "restrictive covenant" may "arise by implication from the conduct of parties or from the language used in deeds, plats, maps, or general building development plans."[14] In this regard, courts have recognized:

> If there is a common plan of development that places restrictions on property use, then such restrictions may be enforced in equity. "A court's primary interest in equity is to give effect to the actual intent of the grantor . . . by looking not only to language in deeds, but variously to matters extrinsic to related written documents, including conduct, conversation, and correspondence."[15]

Consistent with the above, Florida courts have held that use restrictions may also be implied based upon notations denoted on plats or maps:

> Whenever the owner of a tract of land subdivides the same into lots and blocks, lays off streets and other public ways and designates portions of said lands to be parks[,] playgrounds[,] or similar facilities or uses similar words calculated to encourage prospective purchasers to buy said lots, and actually sells lots with reference to the plat, he becomes bound to his grantees by the plat and the representations thereon. As the maker of the plat and the one who selects the words used thereon it will be construed against him.

---

recording of the Deed, but it ignores the fact that Tomoka Oaks, Inc., did not have any authority to adopt any such resolution if four-fifths (4/5) of the lots in Tomoka Oaks had been disposed of by such time.

[14] *See Skyline Woods Homeowners Ass'n. v. Broekmeier*, 805, 758 N.W.2d 376, 387 (Neb. 2008).

[15] *See id*. (citation omitted); *see also Strader v. Oakley*, 410 So. 2d 954, 955-56 (Fla. 1st DCA 1982) (recognizing implied restriction that limited construction to only single-family residences).

> Common honesty requires that he perform that which at the time of conveyance he represented he would perform.[16]

Turning to the instant case, several courts have examined implied restrictions and the requirement to maintain or operate property as a golf course when developed in conjunction with a surrounding residential subdivision. For example, in *Shalimar Association v. D.O.C. Enterprises*, 688 P.2d 682 (Az. Ct. App. 1984), the court held that there was an implied restrictive covenant to maintain property as a golf course even though there were no express covenants burdening the golf course property on behalf of the adjoining homeowners. The court concluded that the common plan of development, which included a golf course, combined with the representations made to the purchasers about the maintenance of the golf course and the adjoining homeowners' express covenants, created an implied restrictive covenant that the land be used only as a golf course.

Similarly, in *Ute Park Summer Homes Association v. Maxwell Land Grant Co.*, 427 P.2d 249 (N.M. 1967), the New Mexico Supreme Court found that an implied restriction existed requiring the subject property to be used as a golf course. In so doing, the court focused on the representations made to prospective purchasers and the materials used in the sales of the lots which pictured an area marked "golf course." The court reiterated that, when a map or plat showing a park or other open area is used to sell property, "the purchaser acquires a private right, generally referred to as an easement, that such area shall be used in the manner designated," and such private right "is not dependent on a proper making and recording of a plat for purposes of dedication."[17]

Numerous other courts have concluded that the facts surrounding the initial development of properties as golf course communities and the marketing of lots in such communities to prospective purchasers created an "implied restrictive covenant" limiting the use of the subject properties to a golf course. In reaching this conclusion, the courts have examined such things as: (1) the plats, maps, and drawings of the community; (2) advertisements, brochures, and marketing materials; (3) common schemes or plans of development; (4) recorded covenants; (5) general informational documents regarding the community; and (6) lot premiums and purchasers' reliance upon the existence of the golf course in acquiring their lots.[18]

---

[16] *McCorquodale v. Keyton*, 63 So. 2d 906, 910 (Fla. 1953); *see also Boothby v. Gulf Props. of Ala.*, 40 So. 2d 117 (Fla. 1948). A common plan or scheme of development is a well-recognized principle in Florida law. *See Hagan v. Sabal Palms, Inc.*, 186 So. 2d 302, 307 (Fla. 1966).

[17] *Ute Park Summer Homes Association v. Maxwell Land Grant Co.*, 427 P.2d 249, 253 (N.M. 1967).

[18] *See Knight v. City of Albuquerque*, 794 P. 2d 739 (N.M. Ct. App. 2014) (holding property denoted on subdivision plats as a golf course must remain either a golf course or open space, stating "a developer will not be allowed to induce purchasers to buy property by purporting to include open space such as parks or golf course in a subdivision plat, only to subsequently change the uses of those open space areas"); *In re Heatherwood Holdings, LLC v. HGC, Inc.*, 746 F.3d 1206 (11th Cir. 2014) (holding evidence of common scheme of development that included golf course property as an integral part and as an inducement to purchasers of residential lots

Here, the historical documentation relating to Tomoka Oaks and the Golf Club establishes the following: (1) a common developer (Tomoka Oaks, Inc.) with a plan of development for a residential community surrounding an 18-hole championship golf course; (2) an approved unified master plan for Tomoka Oaks, which included the golf course and the residential lots; (3) references to "golf course" on the recorded plats for various portions of Tomoka Oaks; (4) recorded restrictions, as previously discussed, providing that the golf course property shall be used "for purposes of a golf and country club, golf course, and related uses"; (5) recorded residential covenants that reference the golf course and authorize reduced setbacks to take advantage of the adjoining golf course; (6) marketing and sales materials for the residential lots depicting the common development plan, including the golf course; (7) evidence of lot premiums being charged for residential lots with golf course frontage; and (8) evidence that successors developers had actual, as well as constructive, notice of the approved master plan and common plan of development. Additionally, it is indisputable that residents within Tomoka Oaks purchased their properties in reliance upon or because of the Golf Club.

Accordingly, even assuming the express covenant restricting use of the subject property to a golf and country club is no longer valid as Triumph Oaks has erroneously suggested, the above-summarized facts and cited case law would establish that, at a minimum, the use of the Golf Club property is limited to a golf course or similar open space purposes by virtue of an implied restrictive covenant. Simply put, whether by an implied grant, implied restriction, or estoppel, such restriction would prevent the subdivision and development of the Golf Club property with 276 single-family residential lots as currently proposed. Thus, on this additional basis, the Planning Board should recommend ***denial*** of the proposed rezoning.

D. Conclusion

In sum, as discussed herein, nothing in the express language of the 1969 Resolution or the 1971 Release purports to waive, release, or otherwise modify the use restriction imposed via the 1963 Lease and the 1963 Warranty Deed that the property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." Thus, based upon the foregoing and the plain and unambiguous language in the 1963 Lease and the 1963 Warranty Deed that the use

---

therein created an implied restriction limiting the use of such property to a golf course); *Ponderosa Pines Golf Course, LLC v. Ponderosa Pines Prop. Owner's Ass'n*, 2013 WL 4515569 (N.M. Ct. App. 2013) (holding "equitable servitude in favor of the individual subdivision property owners precluded Plaintiff from changing the use of the golf course"); *Skyline Woods Homeowners Ass'n.*, 758 N.W.2d at 390 ("We conclude that homeowners who bought their property relying on the proximity and existence of the golf course should be protected by implied restrictive covenants that the property be maintained as a golf course. We therefore agree with the district court that an implied restrictive covenant requiring that it be used only as a golf course burdens and runs with the golf course property."); *see also Victorville W. Ltd. P'ship v. Inverrary Ass'n*, 226 So. 3d 888 (Fla. 4th DCA 2017) (refusing to cancel golf course covenant even though course had become unprofitable, concluding that "the golf course preserves the character of the community and provides residents with a pleasant view" and, thus, "must be enforced because it remains a 'substantial value to' the surrounding residences").

restriction was to be "perpetual," our clients maintain that such use restriction is still valid and in effect. Accordingly, on this basis alone, our clients respectfully submit that the Planning Board should recommend ***denial*** of the proposed rezoning, which seeks to improperly convert the Golf Club property into 276 single-family residential lots, or otherwise table the matter until such time as a judicial determination is made regarding the continued validity of the express restrictive covenant.

Further, even assuming the express restrictive covenant is no longer valid and in effect, as Triumph Oaks has erroneously suggested, our clients maintain that the Golf Club property is nevertheless subject to an implied restrictive covenant, thereby limiting the use of such property to a golf and country club, golf course, and related recreational uses. On this additional basis, our clients respectfully submit that the Planning Board should recommend ***denial*** of the proposed rezoning or otherwise table the matter until such time as a judicial determination is made regarding such implied restriction.

Our clients appreciate the Planning Board's attention to this matter of great community importance to the residents of Tomoka Oaks and respectfully request that the Planning Board recommend ***denial*** of the proposed rezoning. Please do not hesitate to contact me if you have any questions or need additional information,

Sincerely,

S. Brent Spain

June 23, 2023

To Whom It May Concern:

We have lived in Tomoka Oaks on the golf course for 18 years. We have enjoyed the view, wildlife and the peaceful surroundings of nature. Building a new development of this size is extremely concerning. Our concerns for the new development are as follows:

- Congested traffic with only one entrance into the development.
- Construction vehicles will be a nightmare going in and out of development.
- Possible crime in Tomoka Oaks with the number of construction employees possibly eyeing existing residents' homes.
- Possibly 600 more cars/trucks in and out of the development.
- Depreciation of property values.
- Inadequate emergency access.
- Inadequate hurricane evacuation.
- All lot sizes of new homes are not equivalent to existing lots in Tomoka Oaks
- Loss of green space & wildlife.
- Buffers behind existing homes on the golf course should be increased.
- Overcrowded schools, hospitals,
- Safety of current residents that walk and ride bikes in the neighborhood with all the additional traffic.

Like all residents of Tomoka Oaks, we do not want this major disruption to our beautiful neighborhood. Please take into consideration all of our concerns with this new development.

Regards,

Donald & Katherine Izor

Member of the Ormond Beach Planning Board:

I would like to see consideration given to a round-a-bout or traffic circle where North St. Andrews, South St. Andrews and Tomoka Oaks Blvd. intersect. I think this area is now described as "the diamond".

Additionally, I think it would be a real win if we could get a traffic circle at N Nova Road and Tomoka Oaks Blvd. The traffic lanes on Nova could be put on a road diet, narrowing the lanes. The need for a suicide lane goes away. The current lanes on Nova approaching this intersection are the same width as the interstate highway. The speed limit on Nova is currently 45 MPH. As a traffic circle, many of the current problems we have when entering and exiting Tomoka Oaks would be eliminated and the cost to construct and operate a traffic circle would be much lower than a mechanical (electronic) signalized intersection. There may be a some room on the East side of Nova to expand this intersection if we needed it. Traffic flows better with circles and there is less noise and pollution from cars and trucks because of less starting and stopping. The Island in the middle can be "mountable" so large trucks will never have a problem navigating through the circle. Because the operation speed of the circle is about 20 MPH, a large tree in the middle can be focal point that will psychologically notify all drivers of the upcoming intersection. The distance to the railroad tracks is sufficient for stacking traffic during movement of the trains. These would be all positive improvements to the intersection and roadway in each direction.

Bill Partington II, (Sr) 4 Pine Valley Circle, Ormond Beach, Florida 32174 386-566-3004

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

I am a 32 year resident of Beautiful Tomoka Oaks. I beg you to not allow hundreds of homes to be built in our neighborhood of large custom homes.
Our beautiful tree canopy at the entrance will be lost
Our green areas gobbled up to make the roads larger
Getting in and out of our neighborhood will be more difficult
We will suffer the damage and noise from years of construction
My home will lose value as our neighborhood's uniqueness is damaged and is replaced with noisy, construction, and damage.
I walk my neighborhood every day, more traffic will make my walks more dangerous
Nova Road will be even more dangerous
My fear is that many of these houses will become corporate rentals adding a transient population to our neighborhood, and encouraging multiple renters in one house, bringing on more traffic. Corporate landlords are not good neighbors
Our neighborhood is single family homes
The small lots in the proposed will provide little parking
The golf course land if full of pesticides. How will the run off from construction spread them?
The developers could use the land to build 50 estate homes, and make their money that way.
Residents who have paid taxes for years for the privilege of the privacy of living on the golf course will have dozens of neighbors.
Thank you for your consideration
Mary Pat Whiteside
29 N St. Andrews Dr.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Director Spraker,

As a resident of the Tomoka Oaks Community and a registered voter, I am writing to express my opposition to the development of the Tomoka Oaks Golf Course.

Tomoka Oaks is a beautiful community, and the golf course is part of what makes it that way. If the golf course were to be developed it would be devastating to the community. With the added stress of 276 homes and the increased traffic the community would not be the same.

Please vote against the development of the Tomoka Oaks Golf Course.

Sincerely,

Steven Denslow

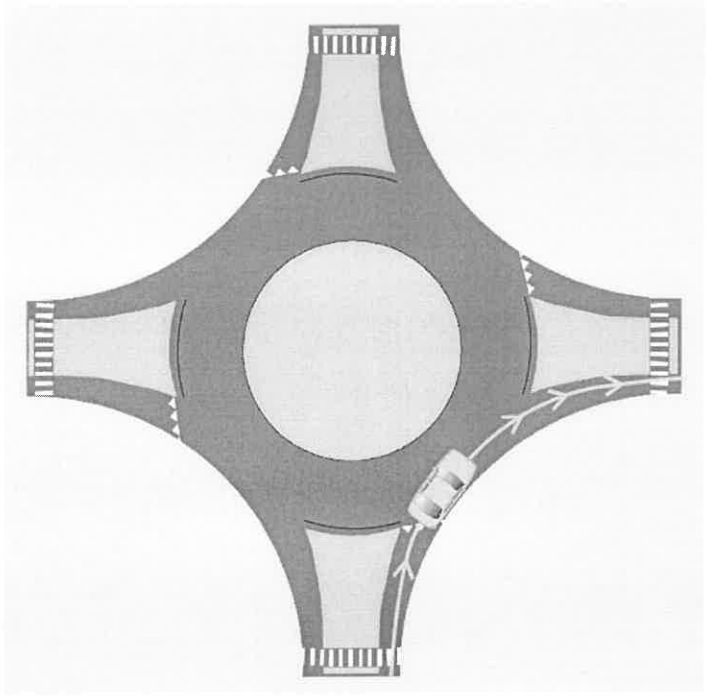
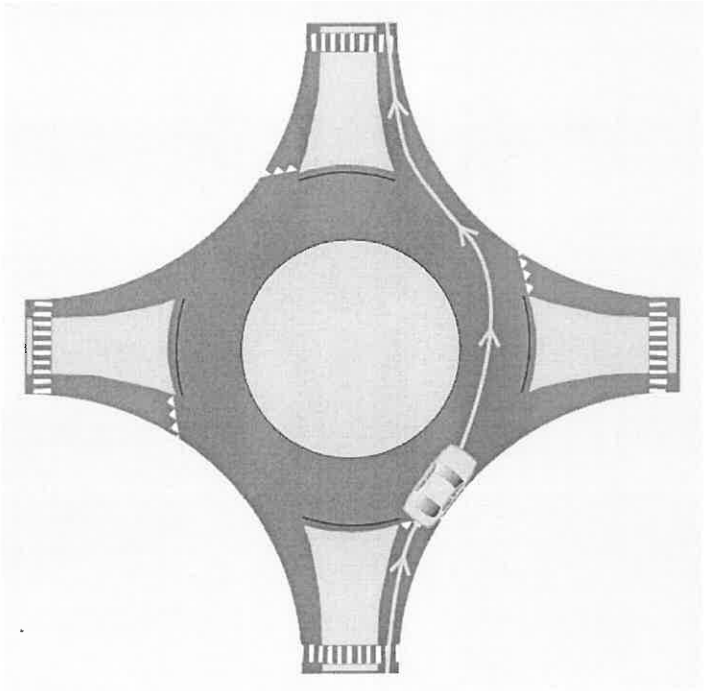
Home Topics Roundabouts



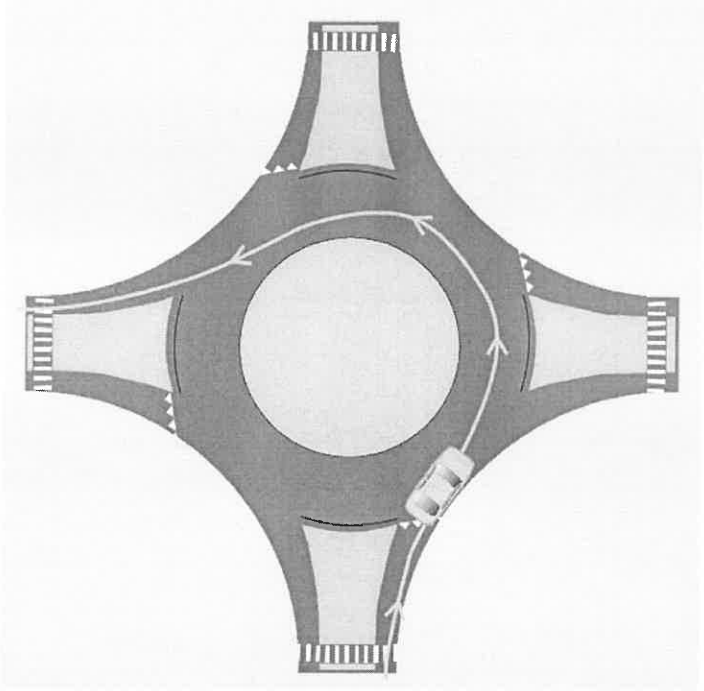
Roundabouts

Roundabouts are a safer alternative to traffic signals and stop signs. The tight circle of a roundabout forces drivers to slow down, and the most severe types of intersection crashes — right-angle, left-turn and head-on collisions — are unlikely.
Roundabouts improve traffic flow and are better for the environment. Research shows that traffic flow improves after traditional intersections are converted to roundabouts. Less idling reduces vehicle emissions and fuel consumption.
Roundabouts generally are safer for pedestrians. Pedestrians walk on sidewalks around the perimeter and cross only one direction of traffic at a time. Crossing distances are relatively short, and traffic speeds are lower than at traditional intersections.



Roundabouts defined

The modern roundabout is a circular intersection with design features that promote safe and efficient traffic flow. It was developed in the United Kingdom in the 1960s and now is widely used in many countries, including the United States, where its use is growing.
At roundabouts in the U.S., vehicles travel counterclockwise around a raised center island, with entering traffic yielding the right-of-way to circulating traffic. In urban settings, entering vehicles negotiate a curve sharp enough to slow speeds to about 15-20 mph; in rural settings, entering vehicles may be held to somewhat higher speeds (30-35 mph). As vehicles circulate within the roundabout, slow and consistent speeds are maintained by the deflection of traffic around the center island and the relatively tight radius of the roundabout and exit lanes.
Slow speeds help vehicles move smoothly into, around, and out of a roundabout. Drivers approaching a roundabout must reduce their speeds, look for potential conflicts with vehicles already in the circle and be prepared to stop for pedestrians and bicyclists. Once in the roundabout, drivers proceed to the exits they need.



Common traffic maneuvers at roundabouts

Right turn

Straight through

Left turn

Modern roundabouts are much smaller than older traffic circles — also known as rotaries — and require vehicles to negotiate a sharper curve to enter. As a result, travel speeds in roundabouts slower than speeds in traffic circles.

Because of the higher speeds in older traffic circles, many are equipped with traffic signals or stop signs to help reduce potential crashes. In addition, some older traffic circles and rotaries operate according to the traditional "yield-to-the-right" rule, with circulating traffic yielding to entering traffic.

Modern roundabout

Older traffic circle

The first modern roundabouts in the United States were constructed in Nevada in 1990. Since then, many more have been built, although the precise number is unknown. Roundabouts are much more common in some other countries, including Australia, the United Kingdom and France.

Although some states and cities have been slow to build roundabouts, they are gaining more popularity in the United States. Roundabouts are one of the evidence-based safety countermeasures recommended by the Federal Highway Administration. Some states, such as New York and Virginia, have adopted "roundabout first" policies requiring that roundabouts be considered a preferred alternative when building new intersections or upgrading older ones if feasible (*New York State Department of Transportation, 2011*; *Virginia State Department of Transportation, 2009*).

Roundabouts are appropriate at many intersections, including high-crash locations and intersections with large traffic delays, complex geometry (more than four approach roads, for example), frequent left-turn movements, and relatively balanced traffic flows. Roundabouts can be constructed along congested arterials and at freeway exits and entrances, in lieu of traffic signals.

Sometimes space constraints or topography make it impossible to build a roundabout. Geometric design details vary from one site to another and must take into account traffic volumes, land use, topography and other factors. Roundabouts often require more space in the immediate vicinity of the intersection than comparable traditional intersections. However, because roundabouts can reduce delays and queue lengths, they require less space on the approaching roads than comparable intersections controlled by stop signs or traffic signals.

An intersection with highly unbalanced traffic flows (that is, a very high traffic volume on the main street and very light traffic on the side street) may not be an ideal candidate for a roundabout. The same is true for isolated intersections in a network of traffic signals.

While the initial construction cost of a roundabout varies site by site, its maintenance usually is cheaper than for intersections with signals. The service life of a roundabout is significantly longer, approximately 25 years, compared with 10 years for a typical traffic signal (*Rodegerdts et al., 2010*).

Safety benefits

At traditional intersections with stop signs or traffic signals, some of the most common types of crashes are right-angle, left-turn, and head-on collisions. These types of collisions can be severe because vehicles may be traveling through the intersection at high speeds. With roundabouts, these types of potentially serious crashes are essentially eliminated because vehicles travel in the same direction and at low speeds.

The vehicle-to-vehicle conflicts that do occur at roundabouts generally involve a vehicle merging into the circular roadway. In the case of multilane roundabouts, conflicts may also occur as vehicles exit.

- Studies of intersections in the United States converted from traffic signals or stop signs to roundabouts have found reductions in injury crashes of 72-80 percent and reductions in all crashes of 35-47 percent (*Retting et al., 2001*; *Eisenman et al., 2004*; *Rodegerdts et al., 2007*).
- A study of 19 higher-speed rural intersections (speed limits of 40 mph or higher) that originally had stop signs on the minor approaches and were converted to roundabouts found a 62 percent reduction in all crashes and an 85 percent reduction in injury crashes (*Isebrands & Hallmark, 2012*).
- Studies of intersections in Europe and Australia that were converted to roundabouts have reported 25-87 percent reductions in injury crashes and 36-61 percent reductions in all crashes (*Rodegerdts et al., 2010*).

Based on the results of a 2004 study (*Eisenman et al., 2004*), it's estimated that the conversion of 10 percent of the signalized intersections in the United States to roundabouts would have prevented approximately 51,000 crashes in 2018, including 231 fatal crashes and about 34,000 crashes involving injuries.

Most U.S. studies have focused primarily on single-lane roundabouts. When included, two-lane roundabouts have been associated with smaller reductions in crashes compared with single-lane roundabouts (*Retting et al., 2001*; *Eisenman et al., 2004*; *Rodegerdts et al., 2007*) or with increases in crashes (*Isebrands & Hallmark, 2012*; *Wang & Cicchino, 2022*).

A 2019 IIHS study, however, showed that the safety of two-lane roundabouts improves over time, as drivers become more familiar with them (*Hu & Cicchino, 2019*). The researchers looked at roundabouts built in Washington state between 2009 and 2015. They found that crashes at two-lane roundabouts decreased an average of 9 percent a year. At the same time, the odds that a crash at a two-lane roundabout involved an evident or incapacitating injury decreased by nearly one-third annually.

In addition to having fewer serious conflicts between vehicles than traditional intersections, roundabouts are generally safer for pedestrians as well. In a roundabout, pedestrians walk on sidewalks around the perimeter of the circular roadway. If they need to cross the roadway, they cross only one direction of traffic at a time. In addition, crossing distances are relatively short, and vehicle speeds tend to be low.

Studies in Europe indicate that, on average, converting conventional intersections to roundabouts can reduce pedestrian crashes by about 75 percent (*Brilon et al., 1993*; *Schoon & van Minnen, 1994*). Single-lane roundabouts, in particular, have been reported to involve substantially lower pedestrian crash rates than comparable intersections with traffic signals (*Brude & Larsson, 2000*).

Crossing at multi-lane roundabouts can be more difficult for pedestrians than crossing at single-lane roundabouts. A study found that motorists failed to yield to pedestrians 2-3 times more at multi-lane roundabouts than at single-lane roundabouts (*Rodegerdts et al., 2007*). Another study found that drivers exiting a roundabout were less likely to yield to pedestrians than drivers entering a roundabout (*Hourdos et al., 2012*).

Safety challenges

Despite the demonstrated safety benefits of roundabouts, some crashes still occur. An IIHS study of crashes at 38 roundabouts in Maryland found that four crash types — run-off-road, rear-end, sideswipe, and entering-circulating — accounted for almost all crashes (*Mandavilli et al., 2009*). Another common crash type involved a vehicle colliding with the central island. These crashes, which often involved unsafe speeds, accounted for almost half of all single-vehicle run-off-road crashes. Some drivers may not have seen the roundabout in time to slow down sufficiently.

A review of crashes at 39 roundabouts in the United States found that entering-circulating, exiting-circulating and rear-end collisions were the most common crash types (*Rodegerdts et al., 2007*). A large majority of crashes at the single-lane roundabouts were entering-circulating crashes. At multi-lane roundabouts, the majority of crashes were exiting-circulating.

A review of fatal crashes at roundabouts in the United States and injury crashes at roundabouts in Washington and Wisconsin found that motorcycle crashes, fixed object crashes, and crashes involving impaired driving were overrepresented (*Schroeder et al., 2015*).

Design features that encourage drivers to slow down are the key to optimizing roundabout safety.

Signs — including speed limits posted well in advance of roundabouts and larger "roundabout ahead" and yield signs — pavement markings and lighting help make sure drivers know they are approaching a roundabout and therefore need to slow down.

Center island landscaping can promote slower speeds and focus drivers' attention on the roadway close to them by limiting their through vision.

Islands separating the approach and exit lanes, known as splitter islands, should extend far enough from the roundabout to provide pedestrian refuge and to delineate the roundabout.

Other design features such as adequate curvature of approach roads far enough in advance of roundabouts and the alignment of approaching roads with the center island also may aid in reducing speeds.

Multilane roundabouts are more challenging. A study of a pair of two-lane roundabouts near Bellingham, Washington, found that confusion about some aspects of navigating the roundabouts persisted one year after the construction ended (*Hu et al., 2014*). More than 40 percent of drivers said it wasn't clear from signs and pavement markings what speed to drive, which lane has the right of way when exiting or that they shouldn't drive next to large trucks in the roundabouts.

At multilane roundabouts, signs and pavement marking should remind drivers of the correct yielding patterns and help them choose the appropriate lanes. At two-lane roundabouts, for example, signs need to convey clearly that entering traffic must yield to both lanes of traffic.

The photos below show sample signs and pavement markings used at roundabouts.

Yield sign

Pavement markings

Traffic flow benefits

Several studies conducted by IIHS and others have reported significant improvements in traffic flow following conversion of traditional intersections to roundabouts.

- A study of three intersections in Kansas, Maryland and Nevada where roundabouts replaced stop signs found that vehicle delays were reduced 13-23 percent and the proportion of vehicles that stopped was reduced 14-37 percent (*Retting et al., 2002*).

A study of three locations in New Hampshire, New York and Washington state where roundabouts replaced traffic signals or stop signs found an 89 percent average reduction in vehicle delays and a 56 percent average reduction in vehicle stops (*Retting et al., 2006*).

A study of 11 intersections in Kansas found a 65 percent average reduction in delays and a 52 percent average reduction in vehicle stops after roundabouts were installed (*Russell et al., 2004*).

An Institute study of two-lane roundabout conversions at two intersections near Bellingham, Washington, found substantial declines in vehicle delays on the minor roads (33 percent and 90 percent) and the proportion of vehicles waiting in queues (35 percent and 43 percent) (*Hu et al., 2014*). Overall intersections delays increased (12 percent and 22 percent), due to slightly longer delays on the major approaches as vehicles slowed to enter the roundabouts.

Because roundabouts improve the efficiency of traffic flow, they also reduce vehicle emissions and fuel consumption. Installing roundabouts in place of traffic signals or stop signs has been found to reduce carbon monoxide emissions by 15-45 percent, nitrous oxide emissions by 21-44 percent, carbon dioxide emissions by 23-34 percent and hydrocarbon emissions by 0-40 percent (*Hu et al., 2014*; *Várhelyi, 2002*).

Constructing roundabouts in place of traffic signals or stop signs reduced fuel consumption by an estimated 23-34 percent (*Hu et al., 2014*; *Várhelyi, 2002*; *Höglund & Niittymäki. 1999*).

A 2005 Institute study documented missed opportunities to improve traffic flow and safety at 10 urban intersections suitable for roundabouts where either traffic signals were installed or major modifications were made to 10 intersections with signals (*Bergh et al., 2005*). It was estimated that the use of roundabouts instead of traffic signals at these intersections would have reduced vehicle delays by 62-74 percent.

Based on the results of that study, we estimate that the conversion of 10 percent of the signalized intersections in the United States to roundabouts would have reduced vehicle delays by more than 981 million hours and fuel consumption by more than 654 million gallons in 2018.

Public opinion

Drivers may be skeptical of or even opposed to roundabouts when they are proposed. However, several IIHS studies show that opinions quickly change when drivers become familiar with them.

In three communities where single-lane roundabouts replaced stop sign-controlled intersections, 31 percent of drivers supported the roundabouts before construction, compared with 63 percent shortly after (*Retting et al., 2002*).

In three other communities where a one- or two-lane roundabout replaced stop signs or traffic signals, 36 percent of drivers supported the roundabouts before construction compared with 50 percent shortly after (*Retting et al., 2006*).

Follow-up surveys conducted in these six communities after roundabouts had been in place for more than one year found the level of public support increased to about 70 percent on average (*Retting et al., 2007*).

When two intersections near Bellingham, Washington, were converted to two-lane roundabouts, support for the roundabouts went from 34 percent before construction to 51 percent six months after and 70 percent more than one year after (*Hu et al., 2014*).

Effect on older drivers

Older drivers are more likely than other drivers to be wary of roundabouts, but they also are particularly likely to benefit from them in terms of improved safety. Relative to other age groups, senior drivers are over-involved in crashes occurring at intersections. In 2021, multiple-vehicle crashes at intersections accounted for 39 percent of fatal crash involvements among drivers 80 and older, compared with 22 percent for drivers ages 16-59.

Older drivers' intersection crashes often are due to their failure to yield the right-of-way (*Mayhew et al., 2006; Braitman et al., 2007*). Since all traffic flows in the same direction at roundabouts and more slowly than at traditional intersections, the consequence for failing to yield is likely less severe at roundabouts. Particular problems for older drivers at traditional intersections include left turns and entering busy thoroughfares from cross streets. Roundabouts eliminate these situations entirely.

Although safety effects of roundabouts specifically for older drivers are unknown, a 2001 IIHS study of 23 intersections converted from traffic signals or stop signs to roundabouts reported the average age of crash-involved drivers did not increase following the installation of roundabouts. This suggests roundabouts don't pose a problem for older drivers (*Retting et al., 2001*).

A study in six communities where roundabouts replaced traditional intersections found that about two-thirds of drivers 65 and older supported the roundabouts (*Retting et al., 2007*). A study of two intersections converted to roundabouts near Bellingham, Washington, found that about two-thirds of drivers 70 and older favored the roundabouts one year after construction (*Hu et al., 2014*). In both studies, the older drivers were less likely to favor roundabouts than younger drivers.

In another study, signs and pavement markings that improve the path and operational guidance were found to increase the comfort, confidence and perception of safety for drivers ages 65 and older (*Lord et al., 2007*). For example, a yield sign could have a plaque underneath reading "to traffic in circle," and an advance warning sign could have a plaque with the word "roundabout."

Dear Mr Spraker,

Part of my family lives in Ormond Beach, that's four votes against more development!!
I have been looking to purchase a residence in Ormond Beach over the past couple of years to be closer to my family, this continued development of clear cutting properties has sickened me to purchase in the area. Stop this overdevelopment of every square inch of land. I've been a licensed Real Estate Broker for some to be 34 years, what I am seeing isn't what we need without building up our infrastructure at the same time. You are making Ormond Beach unaffordable, traffic is ridiculous and what will be the end??
Thank you for your time!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Hello,
Like many Tomoka Oaks residents, I am very concerned with the development of the golf course. Safety, loss of trees/nature, displaced wildlife, flooding and traffic are the main concerns.

I am the THIRD generation in my house in Tomoka Oaks. My grandparents designed and built the house in 1978, my father lived in the house going to high school, and now I own the same house filled with love and memories. It was my grandparents' wish to keep the house in the family. When my grandparents built the house, they were promised that if anything happened to the golf course, it would be green space. Now here I am, wondering what happened with that promise. It seems like the developers are more concerned with the green in their pockets.

My house, like many others along the golf course, were designed with big windows overlooking the green space. Tomoka Oaks has charm. We don't want another "cookie cutter" neighborhood with two-story homes looking down on our unique houses.

I am a proud Ormond Beach resident. I was born and raised here. I teach in the historical building of Ormond Beach Elementary, just down the road. I am captivated every day by the beauty our city has. Oak trees and greenery are what we are known for. Let's keep the appeal and charm alive, let's not keep building "cookie cutter" houses crammed together to appease some developers. Please consider the current residents like me of Tomoka Oaks and the wonderful city of Ormond Beach with your decision. Other people can move away from all this, but I will not. This is the house I plan on passing down to my future children.

We don't want Ormond Beach to start looking like Daytona Beach with over development too.

Please consider saving the green space of the old Tomoka Oaks golf course. Please consider the promise that was made to us.

Attached is a picture of my grandparents, Hoot and Mary Lou Huhta, behind our house in Tomoka Oaks.

Thank you for your time.

July 17, 2023

To: The Ormond Beach Planning Board
From: Frank Agliata
Tomoka Oaks Resident
1 Bay Hill Dr.
Ormond Beach, FL 32174

I attended the meeting held at he Calvary Christian Center last Thursday, July 13th. I was not able to speak at that time however I wanted to express my views as they relate to your evaluation of the Tomoka Reserve development.

It is obvious that you have a difficult decision to digest and not everyone will be happy with whatever you decide. Your attorney asked that we keep our comments to facts not opinions. With that in mind I only have one thing to ask you.

The Tomoka Reserve developers have made it clear that they have no plans to address the intersection "diamond" of Tomoka Oaks Blvd and North and South St. Andrews Drive. I have two articles included with this letter. One from the DOT/ FHWA Highway Safety Program and the other from the Insurance Institute for Highway Safety and the Highway Loss Data Institute. Facts not Opinion. They both state clearly that a ROUNDABOUT is best and safest way to handle this issue.

I ask that whatever decision you make that you require the developers of Tomoka Reserve to be responsible for the construction of a **Full and Formal Roundabout.** Furthermore I ask that this Roundabout be constructed before any other aspect of this project.

This Roundabout solution will address the most important aspects on traffic for the existing homeowners of Tomoka Oaks, Escondido, and the Trails. It also will be a welcome solution to any residents that may buy a home in this development – should you decide to approve some sort of housing.

Thank you for your attention.

Frank Agliata

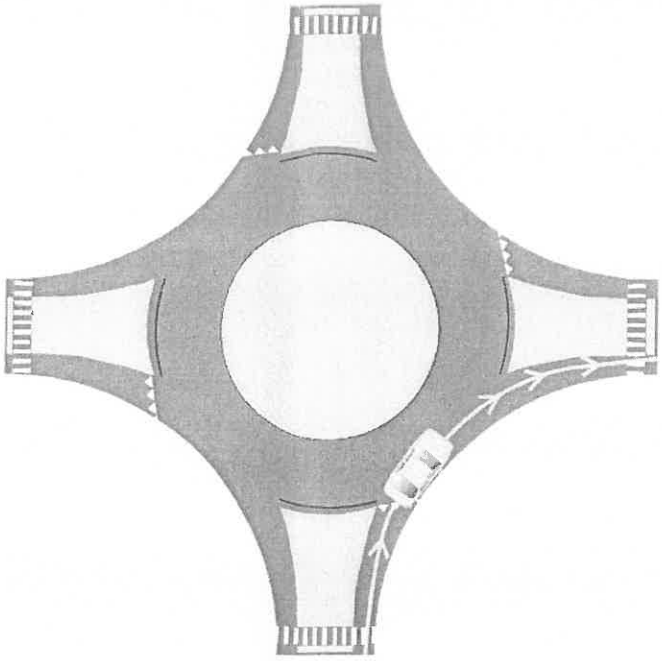
Roundabouts

Roundabouts are a safer alternative to traffic signals and stop signs. The tight circle of a roundabout forces drivers to slow down, and the most severe types of intersection crashes — right-angle, left-turn and head-on collisions — are unlikely.

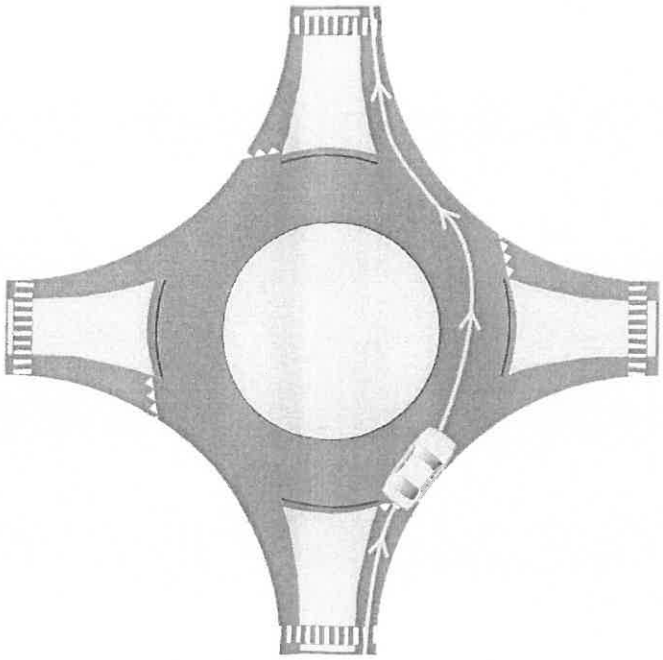
Roundabouts improve traffic flow and are better for the environment. Research shows that traffic flow improves after traditional intersections are converted to roundabouts. Less idling reduces vehicle emissions and fuel consumption.

Roundabouts generally are safer for pedestrians. Pedestrians walk on sidewalks around the perimeter and cross only one direction of traffic at a time. Crossing distances are relatively short, and traffic speeds are lower than at traditional intersections.



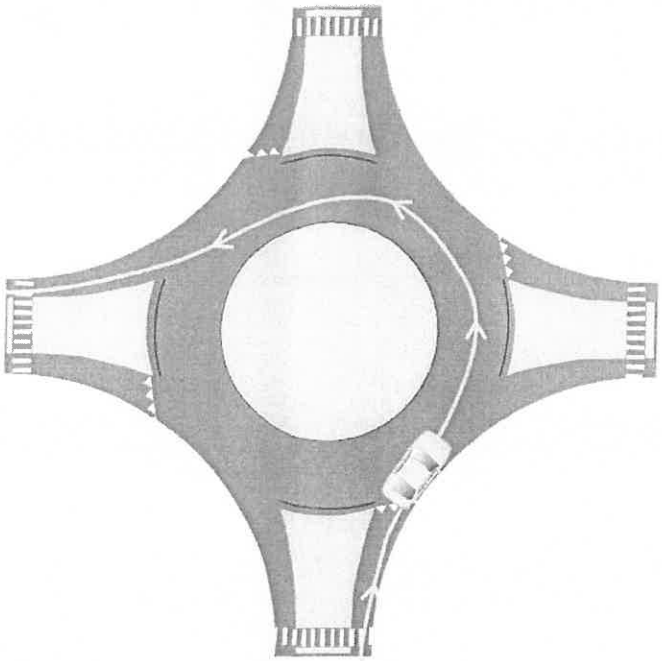
Roundabouts defined

The modern roundabout is a circular intersection with design features that promote safe and efficient traffic flow. It was developed in the United Kingdom in the 1960s and now is widely used in many countries, including the United States, where its use is growing.



At roundabouts in the U.S., vehicles travel counterclockwise around a raised center island, with entering traffic yielding the right-of-way to circulating traffic. In urban settings, entering vehicles negotiate a curve sharp enough to slow speeds to about 15-20 mph; in rural settings, entering vehicles may be held to somewhat higher speeds (30-35 mph). As vehicles circulate within the roundabout, slow and consistent speeds are maintained by the deflection of traffic around the center island and the relatively tight radius of the roundabout and exit lanes.

Slow speeds help vehicles move smoothly into, around, and out of a roundabout. Drivers approaching a roundabout must reduce their speeds, look for potential conflicts with vehicles already in the circle and be prepared to stop for pedestrians and bicyclists. Once in the roundabout, drivers proceed to the exits they need.



Common traffic maneuvers at roundabouts

Right turn

Straight through

Left turn

Modern roundabouts are much smaller than older traffic circles — also known as rotaries — and require vehicles to negotiate a sharper curve to enter. As a result, travel speeds in roundabouts slower than speeds in traffic circles.

Because of the higher speeds in older traffic circles, many are equipped with traffic signals or stop signs to help reduce potential crashes. In addition, some older traffic circles and rotaries operate according to the traditional "yield-to-the-right" rule, with circulating traffic yielding to entering traffic.

Modern roundabout

Older traffic circle

The first modern roundabouts in the United States were constructed in Nevada in 1990. Since then, many more have been built, although the precise number is unknown. Roundabouts are much more common in some other countries, including Australia, the United Kingdom and France.

Although some states and cities have been slow to build roundabouts, they are gaining more popularity in the United States. Roundabouts are one of the evidence-based safety countermeasures recommended by the Federal Highway Administration. Some states, such as New York and Virginia, have adopted "roundabout first" policies requiring that roundabouts be considered a preferred alternative when building new intersections or upgrading older ones if feasible (*New York State Department of Transportation, 2011*; *Virginia State Department of Transportation, 2009*).

Roundabouts are appropriate at many intersections, including high-crash locations and intersections with large traffic delays, complex geometry (more than four approach roads, for example), frequent left-turn movements, and relatively balanced traffic flows. Roundabouts can be constructed along congested arterials and at freeway exits and entrances, in lieu of traffic signals.

Sometimes space constraints or topography make it impossible to build a roundabout. Geometric design details vary from one site to another and must take into account traffic volumes, land use, topography and other factors. Roundabouts often require more space in the immediate vicinity of the intersection than comparable traditional intersections. However, because roundabouts can reduce delays and queue lengths, they require less space on the approaching roads than comparable intersections controlled by stop signs or traffic signals.

An intersection with highly unbalanced traffic flows (that is, a very high traffic volume on the main street and very light traffic on the side street) may not be an ideal candidate for a roundabout. The same is true for isolated intersections in a network of traffic signals.

While the initial construction cost of a roundabout varies site by site, its maintenance usually is cheaper than for intersections with signals. The service life of a roundabout is significantly longer, approximately 25 years, compared with 10 years for a typical traffic signal (*Rodegerdts et al., 2010*).

Safety benefits

At traditional intersections with stop signs or traffic signals, some of the most common types of crashes are right-angle, left-turn, and head-on collisions. These types of collisions can be severe because vehicles may be traveling through the intersection at high speeds. With roundabouts, these types of potentially serious crashes are essentially eliminated because vehicles travel in the same direction and at low speeds.

The vehicle-to-vehicle conflicts that do occur at roundabouts generally involve a vehicle merging into the circular roadway. In the case of multilane roundabouts, conflicts may also occur as vehicles exit.

Studies of intersections in the United States converted from traffic signals or stop signs to roundabouts have found reductions in injury crashes of 72-80 percent and reductions in all crashes of 35-47 percent (*Retting et al., 2001; Eisenman et al., 2004*; *Rodegerdts et al., 2007*).

A study of 19 higher-speed rural intersections (speed limits of 40 mph or higher) that originally had stop signs on the minor approaches and were converted to roundabouts found a 62 percent reduction in all crashes and an 85 percent reduction in injury crashes (*Isebrands & Hallmark, 2012*).

Studies of intersections in Europe and Australia that were converted to roundabouts have reported 25-87 percent reductions in injury crashes and 36-61 percent reductions in all crashes (*Rodegerdts et al., 2010*).

Based on the results of a 2004 study (*Eisenman et al., 2004*), it's estimated that the conversion of 10 percent of the signalized intersections in the United States to roundabouts would have prevented approximately 51,000 crashes in 2018, including 231 fatal crashes and about 34,000 crashes involving injuries.

Most U.S. studies have focused primarily on single-lane roundabouts. When included, two-lane roundabouts have been associated with smaller reductions in crashes compared with single-lane roundabouts (*Retting et al., 2001*; *Eisenman et al., 2004*; *Rodegerdts et al., 2007*) or with increases in crashes (*Isebrands & Hallmark, 2012*; *Wang & Cicchino, 2022*).

A 2019 IIHS study, however, showed that the safety of two-lane roundabouts improves over time, as drivers become more familiar with them (*Hu & Cicchino, 2019*). The researchers looked at roundabouts built in Washington state between 2009 and 2015. They found that crashes at two-lane roundabouts decreased an average of 9 percent a year. At the same time, the odds that a crash at a two-lane roundabout involved an evident or incapacitating injury decreased by nearly one-third annually.

In addition to having fewer serious conflicts between vehicles than traditional intersections, roundabouts are generally safer for pedestrians as well. In a roundabout, pedestrians walk on sidewalks around the perimeter of the circular roadway. If they need to cross the roadway, they cross only one direction of traffic at a time. In addition, crossing distances are relatively short, and vehicle speeds tend to be low.

Studies in Europe indicate that, on average, converting conventional intersections to roundabouts can reduce pedestrian crashes by about 75 percent (*Brilon et al., 1993*; *Schoon & van Minnen, 1994*). Single-lane roundabouts, in particular, have been reported to involve substantially lower pedestrian crash rates than comparable intersections with traffic signals (*Brude & Larsson, 2000*).

Crossing at multi-lane roundabouts can be more difficult for pedestrians than crossing at single-lane roundabouts. A study found that motorists failed to yield to pedestrians 2-3 times more at multi-lane roundabouts than at single-lane roundabouts (*Rodegerdts et al., 2007*). Another study found that drivers exiting a roundabout were less likely to yield to pedestrians than drivers entering a roundabout (*Hourdos et al., 2012*).

Safety challenges

Despite the demonstrated safety benefits of roundabouts, some crashes still occur. An IIHS study of crashes at 38 roundabouts in Maryland found that four crash types — run-off-road, rear-end, sideswipe, and entering-circulating — accounted for almost all crashes (*Mandavilli et al., 2009*). Another common crash type involved a vehicle colliding with the central island. These crashes, which often involved unsafe speeds, accounted for almost half of all single-vehicle run-off-road crashes. Some drivers may not have seen the roundabout in time to slow down sufficiently.

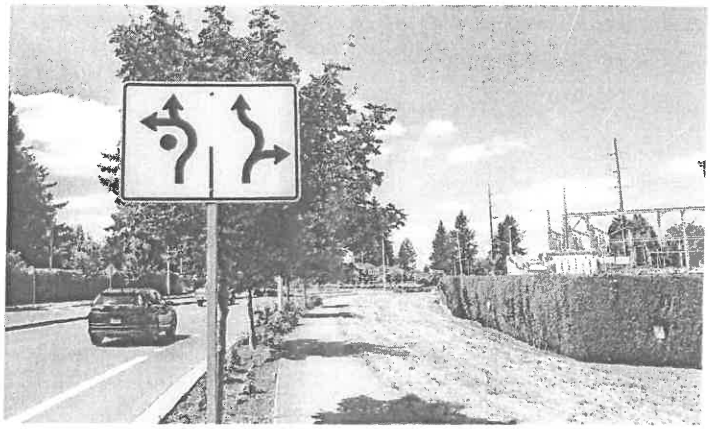
A review of crashes at 39 roundabouts in the United States found that entering-circulating, exiting-circulating and rear-end collisions were the most common crash types (*Rodegerdts et al., 2007*). A large majority of crashes at the single-lane roundabouts were entering-circulating crashes. At multi-lane roundabouts, the majority of crashes were exiting-circulating.

A review of fatal crashes at roundabouts in the United States and injury crashes at roundabouts in Washington and Wisconsin found that motorcycle crashes, fixed object crashes, and crashes involving impaired driving were overrepresented (*Schroeder et al., 2015*).

Design features that encourage drivers to slow down are the key to optimizing roundabout safety.

Signs — including speed limits posted well in advance of roundabouts and larger "roundabout ahead" and yield signs — pavement markings and lighting help make sure drivers know they are approaching a roundabout and therefore need to slow down.

Center island landscaping can promote slower speeds and focus drivers' attention on the roadway close to them by limiting their through vision.

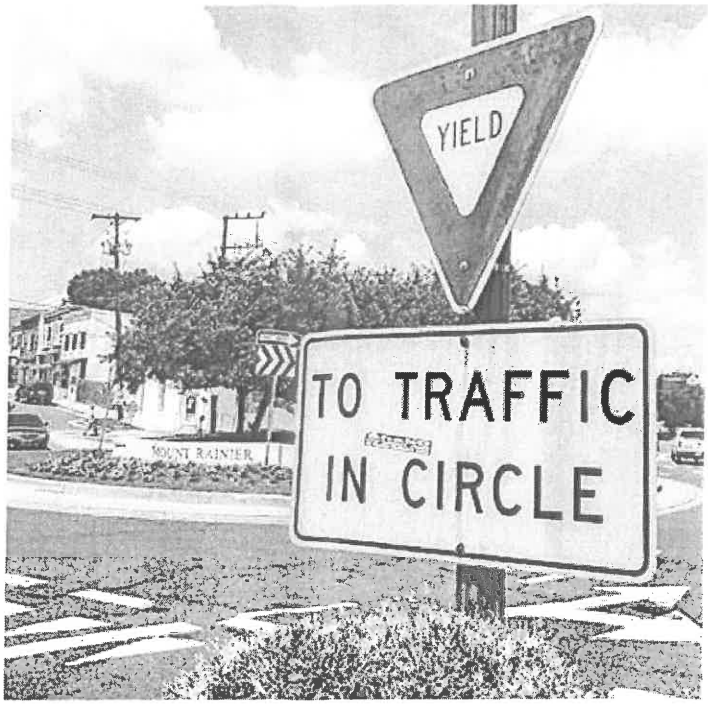


Islands separating the approach and exit lanes, known as splitter islands, should extend far enough from the roundabout to provide pedestrian refuge and to delineate the roundabout.

Other design features such as adequate curvature of approach roads far enough in advance of roundabouts and the alignment of approaching roads with the center island also may aid in reducing speeds.

Multilane roundabouts are more challenging. A study of a pair of two-lane roundabouts near Bellingham, Washington, found that confusion about some aspects of navigating the roundabouts persisted one year after the construction ended (*Hu et al., 2014*). More than 40 percent of drivers said it wasn't clear from signs and pavement markings what speed to drive, which lane has the right of way when exiting or that they shouldn't drive next to large trucks in the roundabouts.

At multilane roundabouts, signs and pavement marking should remind drivers of the correct yielding patterns and help them choose the appropriate lanes. At two-lane roundabouts, for example, signs need to convey clearly that entering traffic must yield to both lanes of traffic.



The photos below show sample signs and pavement markings used at roundabouts.

Roundabout sign

Yield sign

Pavement markings

Traffic flow benefits

Several studies conducted by IIHS and others have reported significant improvements in traffic flow following conversion of traditional intersections to roundabouts.

- A study of three intersections in Kansas, Maryland and Nevada where roundabouts replaced stop signs found that vehicle delays were reduced 13-23 percent and the proportion of vehicles that stopped was reduced 14-37 percent (*Retting et al., 2002*).

A study of three locations in New Hampshire, New York and Washington state where roundabouts replaced traffic signals or stop signs found an 89 percent average reduction in vehicle delays and a 56 percent average reduction in vehicle stops (*Retting et al., 2006*).

A study of 11 intersections in Kansas found a 65 percent average reduction in delays and a 52 percent average reduction in vehicle stops after roundabouts were installed (*Russell et al., 2004*).

An Institute study of two-lane roundabout conversions at two intersections near Bellingham, Washington, found substantial declines in vehicle delays on the minor roads (33 percent and 90 percent) and the proportion of vehicles waiting in queues (35 percent and 43 percent) (*Hu et al., 2014*). Overall intersections delays increased (12 percent and 22 percent), due to slightly longer delays on the major approaches as vehicles slowed to enter the roundabouts.

Because roundabouts improve the efficiency of traffic flow, they also reduce vehicle emissions and fuel consumption. Installing roundabouts in place of traffic signals or stop signs has been found to reduce carbon monoxide emissions by 15-45 percent, nitrous oxide emissions by 21-44 percent, carbon dioxide emissions by 23-34 percent and hydrocarbon emissions by 0-40 percent (*Hu et al., 2014*; *Várhelyi, 2002*).

Constructing roundabouts in place of traffic signals or stop signs reduced fuel consumption by an estimated 23-34 percent (*Hu et al., 2014*; *Várhelyi, 2002*; *Höglund & Niittymäki, 1999*).

A 2005 Institute study documented missed opportunities to improve traffic flow and safety at 10 urban intersections suitable for roundabouts where either traffic signals were installed or major modifications were made to 10 intersections with signals (*Bergh et al., 2005*). It was estimated that the use of roundabouts instead of traffic signals at these intersections would have reduced vehicle delays by 62-74 percent.

Based on the results of that study, we estimate that the conversion of 10 percent of the signalized intersections in the United States to roundabouts would have reduced vehicle delays by more than 981 million hours and fuel consumption by more than 654 million gallons in 2018.

Public opinion

Drivers may be skeptical of or even opposed to roundabouts when they are proposed. However, several IIHS studies show that opinions quickly change when drivers become familiar with them.

In three communities where single-lane roundabouts replaced stop sign-controlled intersections, 31 percent of drivers supported the roundabouts before construction, compared with 63 percent shortly after (*Retting et al., 2002*).

In three other communities where a one- or two-lane roundabout replaced stop signs or traffic signals, 36 percent of drivers supported the roundabouts before construction compared with 50 percent shortly after (*Retting et al., 2006*).

Follow-up surveys conducted in these six communities after roundabouts had been in place for more than one year found the level of public support increased to about 70 percent on average (*Retting et al., 2007*).

When two intersections near Bellingham, Washington, were converted to two-lane roundabouts, support for the roundabouts went from 34 percent before construction to 51 percent six months after and 70 percent more than one year after (*Hu et al., 2014*).

Roundabouts

Roundabouts are a Proven Safety Countermeasure because they can substantially reduce crashes that result in serious injury or death. Roundabouts can:

- Improve safety
- Promote lower speeds and traffic calming
- Reduce conflict points
- Lead to improved operational performance
- Meet a wide range of traffic conditions because they are versatile in size, shape, and design

Effect on older drivers

Older drivers are more likely than other drivers to be wary of roundabouts, but they also are particularly likely to benefit from them in terms of improved safety. Relative to other age groups, senior drivers are over-involved in crashes occurring at intersections. In 2021, multiple-vehicle crashes at intersections accounted for 39 percent of fatal crash involvements among drivers 80 and older, compared with 22 percent for drivers ages 16-59.

Older drivers' intersection crashes often are due to their failure to yield the right-of-way (*Mayhew et al., 2006; Braitman et al., 2007*). Since all traffic flows in the same direction at roundabouts and more slowly than at traditional intersections, the consequence for failing to yield is likely less severe at roundabouts. Particular problems for older drivers at traditional intersections include left turns and entering busy thoroughfares from cross streets. Roundabouts eliminate these situations entirely.

Although safety effects of roundabouts specifically for older drivers are unknown, a 2001 IIHS study of 23 intersections converted from traffic signals or stop signs to roundabouts reported the average age of crash-involved drivers did not increase following the installation of roundabouts. This suggests roundabouts don't pose a problem for older drivers (*Retting et al., 2001*).

A study in six communities where roundabouts replaced traditional intersections found that about two-thirds of drivers 65 and older supported the roundabouts (*Retting et al., 2007*). A study of two intersections converted to roundabouts near Bellingham, Washington, found that about two-thirds of drivers 70 and older favored the roundabouts one year after construction (*Hu et al., 2014*). In both studies, the older drivers were less likely to favor roundabouts than younger drivers.

In another study, signs and pavement markings that improve the path and operational guidance were found to increase the comfort, confidence and perception of safety for drivers ages 65 and older (*Lord et al., 2007*). For example, a yield sign could have a plaque underneath reading "to traffic in circle," and an advance warning sign could have a plaque with the word "roundabout."

July 21, 2023

To: Planning Director Steven Spraker, Planning Board Chair Doug Thomas and Planning Board Members GG Galloway, Mike Scudiero, Angie Shull, Barry Dumoulin, Alan Jorczak and Troy Railsback,

Thank you in advance for reviewing the following research I have done regarding how the Government (County and City) and Citizens of Seminole County saved the "green space" of their struggling golf courses:

Twin Rivers Golf Club

2100 Ekana Drive, Oviedo (Seminole County) (407) 366-1211

The City of Oviedo purchased the struggling Twin Rivers Golf Club for $5 million in early 2017. It was a way to protect the land from being turned into homes, apartments and stores. It now serves to provide an important function through its designation as open space and provides an important function in the City's Community Rating System (CRS). The City is also able to provide a discount of 10% for those in flood hazard areas. Without the golf course, the discount reduces to 5%. The golf course has been awarded a Certificate of Achievement for Environmental Planning Certificate by Audubon International.

Rolling Hills Community Park Project

1749 Art Hagan Place, Longwood (Seminole County)

The Seminole County Board of County Commissioners purchased the former Rolling Hills Golf Course (established in 1926) in 2018 for $3.95 million and it is being converted to a 98-acre public park with recreational amenities. They bought it from developers who were intent on building houses compatible with the existing homes but their plan was met with opposition from residents angered at the prospect of losing the green space.

Turning it into a park would protect it from development and the commission chambers were packed with residents hoping to preserve their precious green space corridors. The park will include crosswalks, traffic-calming features, roundabouts and stormwater considerations. Teams are ensuring that the design details prioritize safety, meet permit requirements and are cost-efficient before construction begins. Seminole County Leisure Services crews and contractors continue to maintain the park. New trees have been planted to replace the loss of aging vegetation and dead or aging trees are being removed. The project is expected to be completed by 2024.

Deer Run Park and Country Club (Used to be Deer Run Golf Course that opened in 1971)

300 Daneswood Way, Casselberry (Seminole County) (407) 799-9592

The Save Deer Run campaign for the nearly 3,000 homes which would be affected by residential development on the golf course was headed up by Deborah Bauer. The land was bought for $13,500,000 (along with Wekiva Golf Course) by the County. The golf club building turned into a Country Club for the residents and the land is now a park. The citizens formed a group and agreed to pay a self-imposed tax yearly for 15 years of $65 to $130 to keep this land as green space. The County is looking for a multi-million dollar savings in the long run which involves "water" that is underneath what used to be the golf course. "Those wells have something called a consumption of use permit, the right to pull water out of the ground," according to Seminole County Commissioner Bob Dallari. The Deer Run Golf Course can pull about 200,000 gallons of water a day.

Casselberry Golf Club

300 S. Triplet Lake Drive, Casselberry FL (Seminole County) (407) 699-9310.

Opened in 1947, the City of Casselberry bought the golf course for $2.2 million in 2018 and the golf course has continued operating as a golf course.

Wekiva Golf Course

4100 Wekiva Club Court, Longwood (Seminole County) (407) 862-5113

Opened in 1972. Bought along with the Deer Run Golf Course (now Deer Run Park and Country Club, see above) by the County for $13,500,000 plus citizen's self-imposed tax of $65 to $130 a year for 15 years. It is still a working golf course. According to Commissioner Dallari, before they bought it he felt it was a high recharge area for water and that water would be valuable to the county.

It has been brought to my attention that Winter Park Golf Course (Orange County) in the heart of Winter Park (opened in 1914) was revived in 2016 after it long being a "budgeted-for" six-figure annual loss. It was brought to life again by "a couple of young, unheralded course designers," Keith Rhebb and Riley Johns, who won their bid for the project, in part, with the tag line, "This isn't a golf course; it's a community park with pin flags." This golf course is listed on the U.S. National Register of Historic Places.

Thank you again.

Darla Widnall
The Trails
7 Shawnee Trail
Ormond Beach

STEVEN SPRAGER

City of Ormond Beach Planning department

July 25th 2023.

Second letter; of deep concerns and suggestions about the impact on the Trails from any proposed building on Tomoka Oaks Golf Course.

Whatever happened to what "the people think", is anyone really listening, does it count any more or do we allow a small committee of people duly elected yes, but to make "critical" decisions for the thousands of Ormond Residents. The Tomoka Reserve is a "critical" decision. This decision affects everyone in the City of Ormond Beach one way oR another. The City of Ormond has stirred up the ant hill by the possibility of allowing the Tomoka Reserve project. Incidently "Reserve" is farthest from what it would or will be! Ormond is rapidly changing to an over crowded mess. Its time to rethink development before its too late and we become a Ft Lauderdale of a mess.

I mentioned before, Main Trail where I have lived for over 50 years, has become an "Expressway" especially between the hours of 6.30am and 9.30pm and 3.30pm and 7pm very **fast** cars and especially **huge** trucks along with **noisy** motor bikes are dangerously exeeding the 25mph speed limit. I walk the paths on Main Trail three to four times a week to the Ormond Park, drivers have absolutely no regard for the limit, they just want to get thru to Granada and miss the back ups at the corners of Granada and Nova Road. We used to have Ormond Police that patrolled for speeders on Main Trail but the city has done nothing to curb speeding that have made any difference, do any of the City Commisioners care?

I realise that Main Trail is a "cut thru now", to take "the load off Granada" , that's poor planning and a joke. Main Trail will be more of a cut thru if the "Reserve" goes thru (ruining the award winning Trails) The cut thru has to be made into a safer slower driving road that people will repect, they are driving thru a community, not on an expressway. We have two areas of four way stop streets that should be added on Main Trail, all it takes are stop signs. An example is Wilmet where the city has 4 sections of 4 way stop streets to slow traffic before you get to Beach street from Nova Road, they do slow traffic. Main Trail needs at least two or three more stop streets added. When you get onto main trail from Nova or Granada, there is only one stop sign **on** Main trail, where most drivers make a "rolling stop". Speed bumps are another solution but never popular.

Thank you for passing on my first letter of concerns to the powers that be..

Respectfully submitted

Craig Shankland

Resident/Owner 409 Main Trail Ormond Beach 32174

Consider; 3 or 4 way stop streets on Main trail. First 4 way at Main trail, Timberline and Autumn wood. Second 4 way at Main Trail, Pine Cone and Iraquois. Third 3 way at Main Trail, Rio pinar. There are two school bus pick up sights at the first two intersections.

July 26, 2023

Re: Economic Impact Report of proposed Tomoka Reserve 6/30/23

I began my research of this report with calling Fishkind Litigation Services (FLS) in Orlando, Florida. My concern was whether they were a legitimate business and if so, do they use A.I. (Artificial Intelligence) to write their reports. Their report seemed very disconnected from our situation in Ormond Beach with the proposed building on the Tomoka Oaks Golf Course. It was as if they were given a couple of key words and figures and those were then plugged into a standard report that they could then send out to anyone who wants to justify building on a golf course. The lady who answered the phone was very nice and said they do not use A.I. and that their business employs economists and CPA's.

The following is my analysis of the Executive Summary of the Economic Impact of Redeveloping Tomoka Oaks Golf & Country Club written by Fishkind Litigation Services regarding the proposed Tomoka Reserve:

FLS belief: "All its (proposed Tomoka Reserve Development) traffic will be directed through Tomoka Oaks Boulevard to Nova."

My belief: I don't think any of us believe that.

FLS belief: "Shuttered golf courses depress the values of surrounding residential properties. This is proven in the professional literature."

My belief: Please refer to my research on Seminole County's (5) struggling golf courses along with (1) in Orange County dated 7/21/23 that I sent to all Planning Board Members, the Mayor and Commissioners. These golf courses were revived and are now successfully functioning either as green space, parks or golf courses enhancing the values of the homes around them. I am sure I could find more.

FLS belief: "The redevelopment of the Club into a modern community with homes valued at $550,00 to over $763,000, surrounded by a large landscaped/open space buffer will enhance the values of the surrounding neighborhood.

My belief: I believe the development will devalue the homes around it.

FLS belief: "The redevelopment project will also generate a substantial surplus for the City's budget."

My belief: At what cost? Perhaps using up our last bit of green space and stretching the limits of our

infrastructure. It would permanently take away the implied or stated perpetuity of the green space which will affect not only our historic Tomoka Oaks residents who bought on the golf course but (4) other surrounding communities, one of which is also historic. Our City might better enjoy the money coming from tourists who flock to our golf courses and businesses, especially during tournaments.

FLS belief: "That the pandemic reversed a 30-year decline in golf rounds played." "The volume of rounds on an 18-hole equivalent basis increased significantly in 2020 and rose to almost 40,000 in 2021." In addition to that, the FLS graph Figure 3 shows that we are now equal to the amount of golfers we had in 1986. Further down in the report it states, "The rebalancing of the golf market does not mean that all areas of the country have returned to equilibrium nor does this imply that a stand-alone golf course can once again become a viable business operation. This is particularly true of Florida."

My belief: Please explain how this is particularly true of Florida. A constant stream of retirees and younger folks are looking for lower costs of living or similar political minds here in Florida which will ensure our need for golf courses. We have 20 viable golf courses operating within 20 miles of us. Your analysis of annual income of a revived Tomoka Oaks Golf Course of $1,575,00 minus annual costs of $983,069 equals $591,931 net operating income. If the City or County bought the land in conjunction with ECHO, Volusia Forever, etc. or private investment, this may work. We also have investors who may be interested in the golf course. We do not have a willing seller at this time, but I am discussing this since you brought it up.

FLS belief: "Course closure exposes the surrounding real estate to the blight of an abandoned course."

My belief: This land could be green space, a park or a golf course. Please note that our 2022 Parks and Recreation survey revealed that we may need to buy additional park land in the next 10 years to meet the recommendation of the National Recreation Parks Association median benchmark of 13.2 acres per 1000 people. They also highlighted the area of the Tomoka Golf Course as needing a park to accommodate the recommendation that all residents be able to access a quality park within 1/2 mile of their home.

FLS belief: The Boca Flores Condominium Community (See Figure 5 showing an aerial view) is comparative to the proposed Tomoka Reserve development.

My belief: Picture putting a development inside a development, picture a donut with a development inside of it and having a 450-foot road being the only exit for both the donut community and the new development to leave the development. You are comparing apples to oranges. Boca Flores appears to have many accessible roads.

The following is my favorite part of the Executive Summary by FLS:

Analysis of Concerns by the Surrounding Property Owners cited by the Tomoka Oaks Homeowners Association:

1. **HOMEOWNERS FEAR THAT THE DEVELOPMENT WILL DECREASE PROPERTY VALUES.**

FLS belief: Homeowners cited no particular facts to support this concern.

My belief: They do not need facts, just common sense and the history of what we know increases the value of homes and it is not a development jammed inside another development. Think donut hole.

2. HOMEOWNERS POINT OUT INCOMPATIBILITY.

FLS belief: The combination of lots 60 feet to 80 feet on the periphery coupled with the large, landscaped buffer mitigates any concern over compatibility.

My belief: Their message tells me, don't believe your lying eyes. That 50' buffer with houses crammed behind it is the same as looking out on a green space/golf course so shut up.

3. CONCERN FOR ADEQUATE PUBLIC FACILITIES.

FLS belief: "The relatively small number of additional homes in the project will not stress existing facilities and infrastructure." "Moreover, new housing with modern conveniences and design will invigorate older homes to be updated, which may also be a benefit to homeowners against potential property losses from extreme weather-related storm events, as well as the City of Ormond providing hurricane relief expenses to an older outdated neighborhood. Hospital facilities and school space is adequate relative to the increment of demand from the redevelopment. Finally, as demonstrated in the fiscal impact analysis, the redevelopment project will generate very substantial financial surpluses to the City that can be tapped to fund any additional public facilities."

My belief: Let's keep our green space while we still have it so we don't have to tap into funds received from a development to fund future public facilities that we have no land to put them on and give the residents what they believed they would have (implied or stated) for perpetuity. Please don't insult our beautiful historic Tomoka Oaks Community by saying they need new houses to inspire them to repair their homes. And by the way, our schools and hospitals are already overtaxed.

3. STORMWATER RUNOFF CONCERNS.

FLS belief: "The redevelopment of the Club will provide adequate stormwater detention and treatment facilities."

My belief: Yes, the best laid plans. These stormwater detention and treatment facilities do not always work as planned. The Tomoka Oaks Golf Course land in and of itself is on the highest elevation in East Volusia County. Its coquina limestone base soaks water in very quickly providing a filter for all water that might reach our aquifer and already "impaired" Tomoka River.

4. HOMEOWNERS TRAFFIC CONCERNS.

FLS belief: "The project is engineered to direct all its traffic via Tomoka Oaks Boulevard to Nova Road. Project traffic may exit the community on alternative roadways; however those are longer and circuitous. Additionally, the alternative longer routes will provide emergency ingress and egress."

My belief: It is obvious you did not do your homework. Tomoka Oaks residents already use the "longer and circuitous" roadways through The Trails Development. What will stop the new residents from doing the same? Now that you mention emergency ingress and egress, that is something that was not addressed by the traffic study.

5. QUALITY OF LIFE CONCERNS.

FLS belief: TOHOA is concerned over traffic and noise during the development period. As noted above, the traffic is routed via Tomoka Oaks Boulevard to Nova Road and internally does not go through the existing neighborhood. Again, the direct route to the collector roads is out to Nova Road.

My belief: I repeat, you did not do your homework. At least look at an aerial view of the area in question.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Members of the Planning Board
I did not speak at the meeting at Calvary as there were so many Tomoka residents who deserved that time. There is the possibility that you may not permit further speakers at the meeting on Hand Ave. I do not live in Tomoka Oaks but there are a few issues that do affect me anyways.
Nova Road - from my house we go past the entrance to Tomoka Oaks to get to US1 and 95. As you are aware, it is already a death trap and the addition of hundreds of new vehicles is a recipe for disaster.
The school concurrency is flawed. They suggest about 80 new kids from nearly 300 homes. Tomoka Elementary is already above capacity. But worse than that is that the kids in my neighborhood who live about 1.7 miles from TE are in a pocket of OB (east and south of the school) that is assigned to Pine Trails Elementary – 7 miles from here. Yet, the new kids who would be in Tomoka Reserve will be assigned to Tomoka Elementary while our kids continue to ride by both Tomoka Elementary and Tomoka Reserve on their 7 mile ride to school each day. Most of these kids are driven to school as they would be on the bus all day or waiting for the bus in the dark. Some people have made a special request to allow their kids to go to the school to which they should already be assigned. Wouldn't it be more fair to put the local kids in their local school and OOPS if there isn't room for these new kids assign them out of the area? As we know, you can make numbers say just about anything. Traffic study looks about the same. I believe I heard only about 18 more cars coming out of the entrance on Granada.
Which brings up the question….will a school bus come to that area? They do not go into gated communities and the suggestion of kids waiting at the diamond shaped area is scary.

Next… the distances between these houses is somewhere between 7 ½ to 8' as I read it. The city of Ormond Beach and private communities do not permit parking boats, campers, etc on a driveway- only in backyards and side yards that are fenced. This plan does not appear to have a storage area for people to

park these vehicles. There is not enough room between houses for this either.

The plan does not show a vehicle emergency entrance or exit should there be any type of blockage at the only entry/exit location. I don't know if there is any law about this- there is for manufactured home communities – but could be a disaster.

They addressed (and poo-pooed) the possibility of affordable housing in their development order. I'm attaching what they say on page 10 about apartments and townhouses. They leave it open for coming back and requesting this change. This could only be done with a PRD. If approved and the developer comes back for a change for apartments (rentals) in my opinion (having read all of 102) there wouldn't be a choice but to accept it.
Tomoka Oaks was advertised as having a golf course and people spent additional money to live on those lots. It was part of the development. A city should protect the residents from carpetbaggers like these and assure that promises made are kept. Developers have rights but more importantly, residents have rights. It appears that this may be settled in a courthouse.
Im attaching pictures of the two school zones that I've referenced and also page 10 of the development order where the developer wants to give himself permission to come back and change his plans.

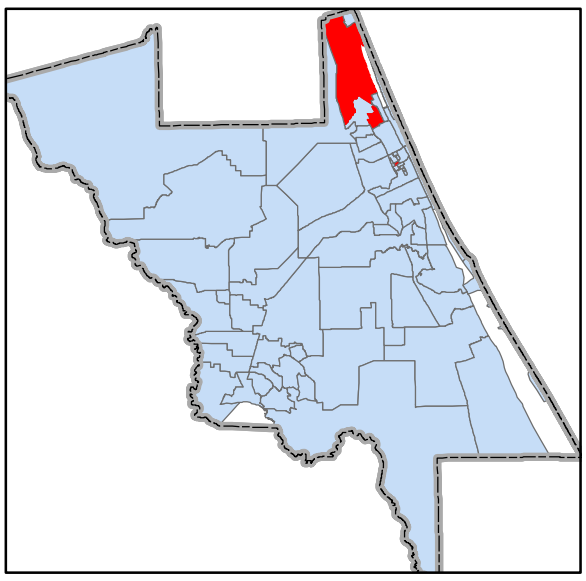
1.87 units per acre. The narrative letter (ATTACHMENT 10) analyzed the density of the existing Tomoka Oaks subdivision at 2.09 units per acre. In reviewing the Tomoka Oaks subdivision, the individual subdivisions were platted in the 1960s and 1970s and did not include common open space, recreational areas, or stormwater management systems which were not required at the time of platting. The Tomoka Reserve site plans show 78.28 acres or 53% of the site dedicated to landscape buffers, open space, stormwater, and recreational areas to support the subdivision. The project has clustered the lots in order to provide landscape buffers, open space, stormwater, and recreational areas.

Planned Residential Developments typically use the existing zoning district as a basis for allowed uses and dimensional standards. This property had a zoning map amendment in 2006 from the R-2, Single-Family Low Density zoning designation to PRD, Planned Residential Development. Based on the previous zoning designation and the surrounding properties also being zoned R-2, Single-Family Low Density, this zoning district is being used as the basis for the review of the Tomoka Reserve project. The Planned Residential Development allows the ability to request alternative lot sizes or more intensive uses in a development order. Section 2-35(b) of the Land Development Code states: "More intense uses (e.g., townhouses in a single-family district, or apartments in a townhouse district) may be allowed, provided that their visual and functional impact on neighboring districts is minimized by providing adequate buffering and screening, and all the requirements of this section are met." The allowance is discretionary with the term "may" used in the standard and requires adequate buffering and screening.



Planned Residential Developments (Marshside, Pineland, Creekside) in the West Ormond Beach area previously sought lower lot dimensions than the SR, Suburban Residential zoning district minimum of 80'. The applications for smaller lot sizes were either denied or amended to the 80' lot width minimums. Staff sees similarities between the Tomoka Reserve and the Planned Residential Developments of West Ormond

Dear Marcella Miller,

My name is Denise Corley, my husband and I bought a house in Tomoka Oaks because it was on a golf course. It was the open space and view of trees that made the sale. I spoke at the July 13th planning boarc meeting about the toxic soil and tightly packed " housing products". I hope you have had the time to read the Environmental Report submitted. The SPRC board accepted the planned remediation for the soil that is laid out in the Soil remediation plan.

How many residential developments have you been asked to approve that need this much oversight into the soil remediation?

Steve Spraker and his team have been doing a thorough job of responding to the developers and the community that will be directly affected by this development.
The SPRC board has recommended that you do NOT approve this plan.

I have not seen a new submittal from the developer with the changes the SPRC has been asking for even though Rob Merrell says tell me what you want. SPRC has over and over, but nothing happens, they have a price point that Carl Veile needs to hit. Does the city of Ormond Beach care if the developer hits his desired price points?

A "subperb" plan would be a Preserve, keeping this land open space and part of the community not a gated community.

Some of you on the planning board have said, "Something is going to be built there". May that something should be something that enhances the Quality of Life in Ormond Beach.

Please read Clay Henderson's book "Forces of Nature" just published. This book describes the people, like Walter Boardman who through their love and wisdom of the fragile natural beauty of Florida with its unique ecosystem, plants and wildlife and water unique in the world, fought with their money and influence to help Preserve Florida's unique environment.

This golf course is toxic, let's let the land heal. Let's put environmental health over individuals' wealth.

Let's keep Ormond beach unique and not overrun by development.
Please vote NO on this plan.
Send a message to developers that Ormond Beach wants to stay unique among this raging over development taking place everywhere else.

Thank you for your service to the community of Ormond Beach,

Denise Corley

SUBJECT: Former Tomoka Oaks Golf Course
20 Tomoka Oaks Boulevard
Ormond Beach, Volusia County
Soil Management Plan (Amended), September 2022
Site ID: ERIC_18037

DATE: October 25, 2022

The document *Soil Management Plan (Amended)* dated September 2022 for the above referenced site has been reviewed by the Florida Department of Environmental Protection (FDEP) District and Business Support Program (DBSP). Review observations and comments are provided to assist the Central District Office staff with their review of this document and should not be inferred to be an approval of the subject document. DBSP offers the following observations:

1. General:

   a. The site is slated to be redeveloped into single-family residential lots (298 lots), retention stormwater management areas, roadways, amenity and open space areas. The submittal notes that the intent is to comply with residential soil cleanup target levels (SCTLs) in both the residential and non-residential areas of the site.

   b. The original Soil Management Plan (SMP) was previously reviewed by DBSP and the University of Florida. Response to comments were submitted and have been reviewed under separate cover.

   c. Prior soil sampling identified chlordane, dieldrin, heptachlor epoxide, and toxaphene as soil contaminants of concern (COCs) within the greens. Arsenic, dieldrin and toxaphene were identified as soil COCs within the tees. Arsenic was identified as the soil COC within the driving ranges and fairways.

2. Soil Management Plan (SMP):
    a. Additional soil assessment within the former course greens is proposed to further define organochlorine pesticide (OCP) impacts. The submittal proposes stockpiling the upper two feet of unsaturated soil from each green into 1,000 cubic yard (cy) stockpiles. Each stockpile will be sampled for total and synthetic precipitation leaching procedure (SPLP) dieldrin and toxaphene analyses, and for total arsenic analyses at a frequency of 5 soil samples per 1,000 cy.
        i. Soil with dieldrin and/or toxaphene residential SCTL exceedances will be disposed of at a licensed landfill facility.
        ii. Soil with concentrations of dieldrin and/or toxaphene above the leachability SCTL but below the residential SCTL will be mixed with clean onsite soil and resampled. Once reuse sample results meet the leachability SCTL the soil will be managed based on corresponding arsenic concentrations.
        iii. Soil with concentrations of dieldrin or toxaphene below residential and leachability SCTLs will be placed within appropriate future land uses based on corresponding arsenic concentrations.
    b. The submittal recommends excavation and transportation of arsenic-impacted soil within the fairways, driving range, tees, Golf Course Maintenance Area (GCMA) and greens to non-residential areas (open space and amenity areas) within the site for placement below engineering caps with a minimum of two feet cover.
    c. Five composite soil samples per 1,000 cy will be sampled and analyzed for arsenic from imported fill material not from a certified quarry or from excavated onsite soil. Each composite sample will be comprised of a minimum of 10 aliquots collected from various heights and depths of the stockpile.
3. Post Soil Excavation Certification Sampling:
    a. Former green areas: Former green areas are impacted with OCPs and arsenic and assessment soil samples were not collected below 2 feet below ground surface (bgs). The submittal proposes collecting a series of three discrete soil samples from the excavation floor of each green at a depth of 2 feet for arsenic and OCP analysis following the removal of impacted soil. This process (soil removal followed by sampling) would be repeated until SCTLs were achieved.
    b. Non green areas: Four soil samples per an acre are proposed from a depth of 0-2 feet bgs for arsenic analysis for a total of 592 discrete soil samples across the site. Based on the analytical results soil will be classified as arsenic-impacted or soil requiring no further assessment or remediation. This process (soil removal followed by sampling) would be repeated until SCTLs were achieved.
4. Site Grading Procedures:
    a. Imported fill or soil sampled and determined to meet residential and leachability SCTLs will be used within the site to meet geotechnical requirements and for site grading and flood protection within the development areas.
    b. A two-feet minimum soil cap of clean fill is proposed as an engineering control for the open space/amenity areas (non-residential).
5. In-Situ Certification Testing
    a. Two soil samples collected from random location within each single-family building lot at depths of 0-2 feet bgs and 2-4 feet bgs are recommended for arsenic analysis. A total of 1,192 confirmation samples are estimated within the single-family lots.

b. Five soil samples collected from random locations within each acre of open space are proposed at a depth of 0-2 feet bgs for arsenic analysis.

DBSP offers the following comments:

1. According to the Site Assessment Report (SAR) for this site in addition to dieldrin and toxaphene, chlordane and heptachlor epoxide were detected in soil collected from the greens. These COCs are included in the confirmation sampling of the excavation floor of the former green areas but are not included in the stockpile sampling or in-situ characterization sampling.
   a. According to SAR Exhibit 5: Individual Greens OCP Data chlordane was detected in approximately 30% (16 out of 54) and heptachlor epoxide was detected in approximately 11% (6 out of 54) of the samples collected from the greens. Therefore, DBSP recommends that the in-situ characterization sampling include these COCs in locations where soil from the greens is re-used.
2. While stockpile sample results may be useful in characterizing the placement and/or blending of soil, they are not included in the consideration for a no further action decision because they may under or overestimate the actual concentration of COCs within the re-used soil.
   a. DBSP concurs that following the stockpiling, blending, grading, etc. of soil, the approach outlined in the in-situ certification for the finished lot sampling and amenity/open space sampling appears to be reasonable to verify that blended soils meet applicable SCTLs.
   b. The areas where an engineering control is implemented will need to be clearly defined following redevelopment activities. A survey will need to be conducted and included with a Declaration of Restrictive Covenant (DRC) documenting these areas. An engineering control maintenance plan (ECMP) will need to be prepared and will be reviewed upon submittal.
3. The submittal notes that a 95% upper confidence limit (UCL) may be calculated for arsenic in soil within each of the open space/amenity areas. Depending on the proposed decision unit(s) this may be a reasonable approach for evaluating arsenic concentrations in soil within the open space/amenity areas.

If you have any questions, please contact me at 850-245-8717 or at Leah.J.Smith@FloridaDEP.gov.

Date: Monday, August 14, 2023 7:16:00 AM

Good morning,

The July 25, 2023 e-mail was sent to Randy Hayes and I was copied. There was no indication that the e-mail was intended for the Planning Board and was not marked For Planning Board. Staff is happy to provide to the planning board and include in the Planning Board packet. For future e-mails, if you can indicate somewhere that the e-mail is intended for the Planning Board or City Commission, staff will include in the packet.

Thank you

Steven

Hi Steven,

RE: Attachment 15: Additional Correspondence - 07.13.2023 to 08.10.2023
https://www.ormondbeach.org/DocumentCenter/View/24875/Attachment-15-Correspondence-from-071323-to-08102023

I noticed my email sent on 7/25/23 was not included in the link for Planning Board hearing correspondence received during 7/13/23 - 8/10/23. Perhaps its omission was due to the fact it was addressed to both Steven and Randy.

I am including all members of the Planning Board on this email as I wish to ensure they are all made aware of my concerns that the Planning Board gave the appearance that **DENIAL** was not an option being considered by the Planning Board. There are legitimate uses for the property that are exclusive of residential development and are supported by a large core group numbering 500+ residents of Ormond Beach; over half living in Tomoka Oaks. This core group is not desiring the property go unused or left to grow wild but rather be used by the applicant for purposes of green space recreational use as was originally intended by the 1963 developers of Tomoka Oaks. And we are relying on the integrity of the Planning Board to sift through applicant claims that do not support our Land Use Code criteria thus denying the application should just one criteria not be met.

How many chances is the Planning Board prepared to provide the applicant? It appears as many as possible until the board can recommend approval. This does not sit well with our core group who testified that denial is the best outcome.

The attached *Tomoka Oaks Times* newsletter provides a concise summary of resident testimony objections on page 3 which should not be summarily dismissed by the "opinion" of the Planning Board Chair prior to evaluation of all hearing testimony. I am requesting that the Chair recognize his opinion, when stated in a public forum, carries as much weight and influence with our citizens as does his final recommendation to the Commission.

Thank you,

Carolyn Davis

Hi Randy,

Re: the 7-13-23 Planning Board hearing for the Tomoka Reserve application PRD-2022-043

I want to thank you for requiring the sworn oath acknowledgement for speakers at this meeting. Chairman Doug Thomas was diligent in assuring that each speaker acknowledged whether they took the oath requiring they tell the truth. Each Planning Board member took the oath as well.

As you know, the Planning Board determined it needs to continue this hearing to August 21, 2023, as the board was unable to render a recommendation. In his closing remarks addressing the not-yet-approved development order for the golf course property, Chairman Thomas stated verbatim -

> *But I think that developers have rights, the land owners have rights, but you know who else has rights, all these people out here. All these people out here have rights. And whatever goes in there is going to impact their life. It's gonna impact their happiness. And Randy has cautioned me not to talk about certain things, but like GG said, "something's going in there." Something is going to go in there. And so we've got to compromise, we've got to find something because there is a hard core group of residents who don't want anything in there. But I'm gonna tell you something, that is just not going to happen cause something will go in there.*
> Minute markers 4:51:41 - 4:52:13
> https://www.youtube.com/watch?v=ZtdFx0FIdq8

Such a definitive statement by the Planning Board Chairman prior to any formal, public board recommendation is gravely troubling and goes against the spirit of the hearing. This statement implies the Planning Board has already made a determination to negotiate a development and is willing to review as many site plans as needed until one is acceptable.

Please note my concern for the public record that the Chairman's remarks at the end of the July 13, 2023 hearing casts a shadow on the ability and responsibility of the Planning Board to remain unbiased. It clearly indicated a recommendation of denial was not an option being considered by the Planning Board.

Please acknowledge receipt of this email.

ORMOND BEACH

Issue 7 - August 2023

Tomoka Oaks Times

An Independent Newsletter Focused on Preventing Residential Development of the Tomoka Oaks Golf Course

What happened at the Planning Board Hearing held July 13, 2023?

A lot happened at the hearing. But first let's back up and talk about the city's **Staff Report** which was received by each Board member for review prior to the hearing. This 802 page report can be viewed at https://www.ormondbeach.org/Archive.aspx?ADID=10425

The report is separated into different areas such as the traffic analysis, site plans, correspondence received, environmental analysis, and the City staff's recommendation to the Planning Board.

Keep in mind, the Planning Board only makes a recommendation to the City Commissioners on whether the Planning Board believes the Commission should accept or deny the development application.

The City Staff Report advised the Planning Board recommend **DENIAL** of the issuance of a development order based on certain conditions and staff requests for associated site plan improvements.

Page 11 of the report contains an Analysis which identifies 8 key issues the Site Plan Review Committee and the Applicant (Developer) were unable to agree on (see box below).

Key unresolved issues with potential for resolution by the Applicant include: lot sizes, density, compatibility, planting of the 50' natural buffer, project setbacks, lot separation note (sheet PD6), key traffic issues (diamond intersection at St. Andrews Drive & Tomoka Oaks Boulevard, and sidewalks on both sides Tomoka Oaks Boulevard), and acceptance of outdoor recreation areas.

The **Staff Report** provides options, where available, to assist the Planning Board in their formulation of the policy direction and their resolution of key issues. Alternative options can also be created through the public hearing process. And the Planning Board's recommendation to the Commission can be to 1) approve, 2) approve with conditions, or 3) deny the application.

With this understanding of the function of the **Staff Report**, we can examine the Planning Board hearing held July 13, 2023. Highlights of the hearing begin on page two of the *Tomoka Oaks Times*.

NOTE: Links to articles written by local journalists Clayton Park, ***Daytona Beach News-Journal*** and Jarleene Almenas, ***Observer*** contain comprehensive coverage.

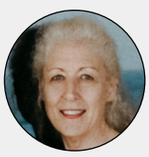
Carolyn's Message

Dear Neighbors,

Well, we did it again! We united and we came out in force at the July 13 Planning Board hearing. Hundreds of us attended to express concern and opposition to the PRD zoning application for residential development of the Tomoka Oaks golf course property.



During the hearing, passionate residents from Tomoka Oaks, Escondido, The Trails and other Ormond Beach neighborhoods, spoke with conviction as to why we oppose building 276 homes in the "green heart" of our established Tomoka Oaks neighborhood.

And prior to the hearing, 48 of you sent me letters which I proudly had included in the City's 802 page Planning Board packet. Our letters begin on page 127 of the packet.

Much has happened in a short amount of time. This newsletter provides highlights related to our efforts to prevent this intrusive development.

It also provides links to several resources so you can educate yourself on the many factors that impact where we are at the time I am writing our August newsletter.

In the future, you may see more short email blasts, rather than full issues of the ***Tomoka Oaks Times***, as I strive to keep you up-to-date on new information.

Not giving in or up,

Carolyn Davis
46 Oakmont Circle
CarolynDavis3@gmail.com

v1

Key Unresolved Issues

The applicant and the Site Plan Review Committee have been unable to reach a consensus on several issues. These issues are policy issues that need a recommendation from the Planning Board and final action from the City Commission.

- Key issue 1: Development ability of the former golf course (more on this on page 2 of the *Tomoka Oaks Times*)
- Key issue 2: Lot size, density, and compatibility
- Key issue 3: Planting of the 50' natural buffer
- Key issue 4: Setback plan
- Key issue 5: Sheet PD6 note on lot separation
- Key issue 6: Traffic review, including St. Andrews Drive and Tomoka Oaks Boulevard diamond
- Key issue 7: Recreational areas
- Key issue 8: Environmental

Highlights of the Planning Board Hearing Held July 13th

The entire 5 hour audio and Power Point slides from the Planning Board hearing held July 13, 2023 are located at https://www.youtube.com/watch?v=ZtdFx0FIdq8 Obviously there is a lot to listen to. Here are some highlights.

Some Quick Facts

- Length of the July 13, 2023 hearing: 5 hours
- Hearing Outcome: Continued to August 21, 2023
- Number of attendees: 300 +/-
- Number of residents who addressed the Planning Board: 30
- Total number of hours of resident testimony: 1.5
- Number of pages in the Planning Board packet: 802
- Number of resident opposition letters contained in the packet: 56
- Number of Key Issues unresolved between the SPRC and the Applicant that need to be addressed by the Planning Board: 8
- Staff's Recommendation to the Planning Board: **DENIAL** based on certain conditions and staff requests for associated site plan improvements.
- Date, time and location of next Planning Board Hearing:

  Monday, August 21, 2023 at 6:00 pm

  Tomoka Christian Church, 1450 Hand Ave, Ormond Beach, FL 32174 (map)

A group oath was administered requesting people who were testifying to swear to tell the truth. Why? Is that normal procedure?

No, it has never been normal procedure. City Attorney Randy Hayes asked witnesses to take the oath to preserve the record for a judge in anticipation of any legal challenges that might follow.

Brent Spain, an attorney retained by Carolyn Davis and a consortium of homeowners, provided a Letter of Opinion to Chairman Thomas and the City the day before the hearing. What did it say? And why was it not allowed at the hearing?

Mr. Spain informed the Chairman and the City that cited case law would establish that, at a minimum, the use if the golf club property is limited to a golf course or similar open space purposes by virtue of an implied restrictive covenant. City Attorney Randy Hayes advised the Planning Board that if there are legal issues raised by a legal analysis, then it is incumbent on the party represented by that attorney to initiate their own civil action. (Read Spain's Letter of Opinion)

Note from Carolyn: The legal opinion of attorney Brent Spain is a separate legal effort and is not associated with our voluntary HOA's development mitigation efforts represented by attorney Dennis Bayer. I am a member of our voluntary HOA, but I chose to research a separate path focusing on historical and legal records that present legal challenges to residential development of the golf course property. I disclose in every issue of the *Tomoka Oaks Times* my belief that both the voluntary HOA efforts and my efforts are necessary to address all aspects of this potential development.

What did our voluntary HOA's attorney have to say at the hearing?

Dennis Bayer presented the following concerns still unresolved after extensive HOA negotiations:

- Excess traffic volume
- Inadequacies in the perimeter landscape buffer, it's lack of irrigation, and lack of an enforcement mechanism
- Lot sizes and unit density
- Loopholes allowing the applicant to self-amend lot sizes and number of lots without any official review.
- Applicant's identification of the project as "infill" which is taking a blighted area with rundown houses and putting in a new development. This application is not infill; it is filling a green space with residential development.
- Argues a PRD denial should not allow straight R-2 zoning. "Its current zoning is PRD, it's not R2, this does not behold it from process."

What is the difference between PRD and R-2?

If the developer's PRD application is denied, the developer has a back up application for an R-2 zoning map amendment. The City Attorney ruled against any Planning Board discussion of the R-2 alternative, although the applicant attorney raised the R-2 threat throughout the hearing.

Note from Carolyn: This newsletter does not contain enough space to address the differences between PRD and R-2. At a very basic level:

- The PRD application increases the buffer between existing Tomoka Oaks golf course homes and the proposed development. But is reduces the rear set back of the new homes so there is less footage at the back of the structure where it backs up to the buffer. By contrast, an R-2 has a smaller buffer between the new homes and the existing Tomoka Oaks homes, but the rear setback of the R-2 home requires more footage between the home's rear structure and the buffer.
- The PRD allows smaller lot sizes such as 50' - 80' widths. But the R-2 requires all lots be 100' wide as is standard in Tomoka Oaks.
- The PRD has requirements for recreational areas; R-2 does not.
- The PRD requires 20% natural preservation of the land; R-2 requires 15%.
- Prior to issuing a development order, the PRD requires a Neighborhood Meeting, Site Plan Review Committee submissions, and public hearings by the Planning Board and Commission. The R-2 does not have these same requirements but still must meet city codes and technical criteria.
- With a PRD, the Preliminary Plat review is the next step after the Commission has approved a development order, whereas the Preliminary Plat review is the first step in the R-2 process. Neighborhood meetings are suggested (but not required) at this step for both PRD and R-2.
- The last step for both the PRD and the R-2 is review and approval of the Final Plat by the Planning Board and Commission. Public comments regarding plat details are allowed.

Why didn't the Planning Board render a recommendation to the Commission?

Planning Board Chairman Doug Thomas indicated that during his 33 years on the board, this is in the top five of the most important issues he has ever heard. And he is not going to go along with forcing this through even if it takes the board two or three months.

Chairman Thomas also stated at the end of the five hour hearing that, "Something is going to go in there, and so we've got to compromise. We've got to find something because there is a hard core group of residents who don't want anything in there. But I'm gonna tell you something, that is just not going to happen cause something *will* go in there." *Meeting Minute Marker 4:51:50 - 4:52:13*

Note from Carolyn: I emailed City Attorney Randy Hayes expressing my concern the Chairman's comments implied "denial" was not an option this board was considering.

Mr. Hayes responded in part, "Chairman Thomas was only stating his personal opinion . . . And I customarily provide cautionary advice to all decision-makers not to pre-determine an outcome prior to receiving all evidence at a public hearing."

Our "core group" currently numbering 500+ households (over half living in Tomoka Oaks and many being members of the voluntary HOA such as I am) believes the Planning Board should heed Mr. Hayes' advice.

Public Comments - July 13 Planning Board Hearing

Members of the audience were allowed 3 minutes to make public comments. All 30 speakers are listed in the order they testified along with a brief summary of their comments. Only 1 speaker was in favor of the PRD.

1. **Carolyn Davis** (Tomoka Oaks): Reported Attorney Brent Spain's letter of opinion which questions the legality of any development, PRD or R-2.

2. **Stephanie Cox** (Volusia County): Board should seriously consider problems of growth, traffic, schools and infrastructure.

Provided by Tomoka Oaks resident djcorley

3. **Len Gaspery** (Tomoka Oaks): Builder of original custom Tomoka Oaks homes stated golf course lots were substantially more expensive.

4: **Jeff Boyle** (Ormond Beach): Identified development issues that are in conflict with 7 of the City's Comprehensive Plan policies.

5: **Denise White** (Trails): Has issues with traffic analysis not accurately assessing flow and impact on the Trails two-lane, narrow roads laden with medians.

6. **Ashley Dufrene** (Tomoka Oaks): Purposely paid more for a golf course-fronting home. Proposed use will violate all aspects of OB LDC 1-15, article 2.

7. **Michelle Zirkelbach** (Tomoka Oaks): Is a real estate agent who never had a buyer ask to, "find me a house on a 50', 60' or 80' lot." Proposal seeks max profits/acre without regard for quality of life of current residents.

8. **Ellen Cook** (Escondido): Current traffic impacted by RR crossing on Nova will only get worse and result in excess stacking and accidents.

9. **Adele Shaw** (Escondido): The sign for "Tomoka Reserve" makes her think of nature, not a residential development.

10. **Tom Fitzgibbon** (Tomoka Oaks): Traffic concerns with a) FDOT expecting 2 years to install traffic light at Nova & Tomoka Oaks Blvd. b) FDOT rebuild of Nova during Tomoka Reserve development, and c) inaccurate analysis of traffic at Granada & Main Trail.

11. **Denise Corley** (Tomoka Oaks): Concerned soil remediation may simply redistribute toxic golf course chemicals to open space, berms, rec areas, and drainage ponds.

12: **Jane Eddy** representing **Julie Freidus** (Tomoka Oaks): Lack of critical medical care infrastructure, including physician shortage, creating life threatening hardships for current Ormond Beach population.

13. **Scott Ryals** (Tomoka Oaks): as a former golf course owner family member involved in the 2006 PRD application, he understands current developer's mitigation promises might later be identified as "not doable" resulting in unforeseen approvals of developer alterations. Residents' individual freedoms will decrease over time.

14. **Peter Tupas** (Tomoka Oaks): Real estate broker for 30 years disagrees with appraiser's valuation that golf course-fronting homes won't depreciate in any way. In the real estate business, anything that happens behind you will change the value of your property. Plus more traffic on our 2 lane-roads will impinge upon infrastructure.

15. **Ned and Lauren Huhta** (Tomoka Oaks): Second and third generation living in golf course home built by Len Gaspery supported all points made by Dennis Bayer. Believe applicant should fund 100% of Tomoka Oaks Blvd reconfiguration since they are the cause for it.

16. Richard Goldhair (Trails): Construction traffic lasting 3-5 years, 7am-7pm, Monday - Saturday will adversely impact the safety and quality of the Trails and compromise Misner Branch bridge as residents and contractors avoid the construction entrance at Tomoka Oaks Blvd. and use Trails roads instead.

17. **Barbara Doliner** (Tomoka Oaks): "We do not want cookie cutter homes. This just doesn't fit our community. This Cinderella will never have that shoe fit, no matter how many different ways its going to be packaged to us, it doesn't fit."

18. Jim Cameron (Ormond Beach): Only audience member to support this development. "It's important that we hopefully find a happy medium that everybody can agree on."

19. **Renee Herrero** (Tomoka Oaks): Moved here with expectation of always being outdoors and playing the Tomoka Oaks golf course. That changed, but golf is not going anywhere. Could relaunch the 18 hole course if accompanied by a financially supported development.

20. **Caroline Herrero** (Tomoka Oaks): Grew up in a Tomoka Oaks home built by Len Gaspery. Loves being outside in our neighborhood and taking evening walks with her grandmother, but the years of growth in Ormond Beach have changed the experience of living here. Does not want proposed density.

Provided by Tomoka Oaks resident djcorley

21. **Adam Kipi** (Tomoka Oaks): His background in environmental mitigation makes him question how contaminated soil will be mitigated and how 2 feet of clean fill will create drainage issues if not sloped and graded properly. Also bought home believing the golf course property would not be built on.

22. **Tyler Brown** (Tomoka Oaks): Developer's density numbers (1.87/acre) do not accurately represent their claims of compatibility with Tomoka Oaks density (which they claim is 2.09/acre). Tomoka Oaks originally built around 147 acres of a green space golf course which results in original Tomoka Oaks density of 1.27/acre which is quite a bit lower than the applicant's claim of 2.09/acre.

23. **Missy Herrero** (Tomoka Oaks): Asked Board to clarify whether any sworn witnesses who were recruited and paid by the applicant should disclose that when testifying. Board and City Attorney stated they had no evidence of paid testimony and did not answer what the City's hearing policy is on this issue.

Ms. Herrero shared that an overburdened medical infrastructure compromised hospital care for her critically ill father. And a shortage of hospice nurses resulted in a 5 day care gap requiring the family to provide home care unaided until medical professionals arrived prior to his passing.

24. **Paul Hughes** (Tomoka Oaks) Logic is missing regarding emergency, back door access which ultimately leads vehicles back to the main Tomoka Oaks Blvd entrance. If the main entrance is blocked during a natural disaster, any traffic flowing from the emergency exit still faces the main entrance bottleneck. This impacts Escondido too. Also, residents paid dearly for golf course-fronting property and should remain entitled to that green space right.

25. **Janice Rose** (Tomoka Oaks): Development order should contain provision Tomoka Reserve HOA be required to preserve and maintain the buffer. Tomoka Oaks residents should have right to sue if not maintained.

26. **Leah Washington** (Tomoka Oaks): She and her husband are a military family who purchased in Tomoka Oaks for the peaceful stability it affords their children. This will be gone forever if the property is developed. Also, finding *local* pediatric medical care is extremely challenging.

27. **Logan Pigliacampi** (Tomoka Oaks): The beauty of nature and the serene green space of the Tomoka Oaks golf course property are critical to our fundamental way of living. They should not be compromised by industrialization and money.

28. **Darla Widnall** (Trails): The City spent $125,000 for a Parks & Recreational Survey which identified the Top 10 needs for Ormond Beach; 8 of those needs can be solved by retaining the golf course green space for uses such as parks and a golf course.

29. **Debra Gatz** (Tomoka Oaks): Buffer will contain existing trees which go down during storms and are overgrown with invasive vines that grow onto her property. This is not acceptable. Tomoka Reserve HOA should have responsibility for maintaining the buffer.

30. **Beth Rabitaille** (Trails): Sees, firsthand, vehicles speeding down Rio Pinar Trail to Tomoka Oaks. It will get even busier and less safe with new development. Questioned accuracy of traffic analysis which did not report on Rio Pinar Trail impacts.

An Open Letter to the Applicant

Dear Partners of Triumph Oaks of Ormond Beach I, LLC,

You have a lot on your plates at the moment regarding your Tomoka Reserve application. You have a Planning Board saying this current site plan is just not going to cut it. Do you increase your lot sizes? Do you irrigate the buffer? Are you willing to accept lower profits? Do you throw in the towel on the PRD application and push forward with R2? Decisions, decisions.

I understand you are in this to make a profit. And you want a zoning that maximizes that profit. But you are facing a lot of resistance.

What if you could still realize a profit and, at the same time, become respected partners with the citizens of Ormond Beach? If you could pay off the Mortgage and Security Agreement, make a few million in profit, PLUS have your names identified as part of a positive legacy in the history of Ormond Beach, would you be willing to add that to your plate of options? How might this look?

What if you retained the Tomoka Reserve property as dedicated green space? You could sell the Reserve's ***Naming Right*** *to one of our local businesses or private philanthropic residents who desires to keep this area green.*

Would you consider partnering with businesses who could help design and fund the green space? The property could provide:

- *The Sheldon Rubin Environmental Education Center where visitors could learn about the value of nature and preserving the environment.*
- *Perhaps the grounds surrounding the Center could be showcased with the Emily Rubin Rose Garden.*
- *Maybe the Center could contain the Velie Sustainable Living exhibit where visitors could learn how to reduce their ecological footprint when building or redesigning homes.*
- *And there could be a Barshay Community Vegetable Garden where residents can grow and share food for themselves and the less fortunate.*

What other ***Naming Opportunities*** *could provide revenue for your company which is aptly named Triumph Oaks?*

- *A botanical garden perhaps maintained by one of our state universities*
- *Separately designed walking paths and bike paths*
- *Recreational areas for tennis and swimming as were original amenities for Tomoka Oaks*
- *A recreational and educational area designed specifically for our special needs residents*
- *A children's playground and learning area*
- *A dog park*
- *An outdoor plaza and fountain*
- *A meditation garden*
- *A butterfly house*
- *A caretaker's cottage*

Once Triumph Oaks and any potential business partners have realized a return on investment, perhaps the property could be sold to the City? And the city might be able to use grants and/or Parks and Recreation funds for buying and maintaining the land, structures, and legacy naming rights?

And of course, the last obvious option to consider - what about restoring the golf course, or a portion of it? If partners came forward to fund and manage the restoration, would Triumph Oaks like to partner with them? Or outright sell to them?

Please know this "Open Letter to the Applicant" is meant with respect. As I told Mr. Rubin months ago, my home is always open to him. And that invitation is extended to Ms. Emily Rubin, Mr. Barshay and Mr. Velie.

Nothing has been decided yet. Nothing has been set in stone. As hockey legend Wayne Gretzky said, "You miss 100% of the shots you don't take." So I am taking a shot and reaching out to suggest options for the win-win being sought by the Planning Board, the City, our residents, and yourselves.

Respectfully,

Carolyn Davis

Commission Corner

Dear Mayor and Commissioners,

Public sentiments expressed at the July Planning Board hearing itemized concerns with traffic, density, medical infrastructure, and the lose of implied restrictions protecting our green space.

City planning staff recommended denial of the application on a number of key issues, still unresolved after four site plans. With the Planning Board hearing now in a 39-day recess, these issues are currently being negotiated out of the public sunshine. That concerns me. Residents will find out at the next Planning Board hearing on August 21 the results of these closed-door negotiations.

What will the Board ultimately place in your hands to vote on?

Carolyn

The *Tomoka Oaks Times* is an independent newsletter whose goal is to prevent residential development of the Tomoka Oaks Golf Course property. This newsletter is separate from the voluntary Tomoka Oaks HOA Golf Course Committee whose efforts are directed only at mitigating development. It is our belief that our development opposition is necessary to accurately and fairly represent Tomoka Oaks residents who desire no **residential** development.

Hi Steven,

RE: Tomoka Reserve PRD Hearing Continuation on 8/21/23

A screen shot attached of the city's website at https://www.ormondbeach.org/1013/Tomoka-Reserve informs that the public comment section of the Tomoka Reserve hearing is closed.

During the time period of July 14 - through the end of the hearing on August 21, 2023:

- If the Tomoka Reserve applicant present any modification(s) to their application or site plan
- Or if the applicant or their representatives or any planning board member disclose that the applicant or their representatives had meetings with any city staff, planning board members, commissioners, or any party to the proceeedings out of the public sunshine,
- Then I want to go on record stating:

    1. Details of those conversations should be fully communicated during the 8/21/23 hearing to comply with Florida Sunshine laws regarding matters before the Board for the Board's action.
    2. The refusal to hear any resident's public comments at the 8/21/23 hearing regarding any applicant modifications or meetings that occur out of public sunshine is a violation of due process; a right of every resident of Ormond Beach at this PRD hearing.

Please include this email in any future links to resident correspondence received during the Tomoka Reserve hearing process.

Regards,
Carolyn Davis

Dear Mr. Spraker,

I should also be sending this to all the other planning board members but I can't find their emails. At this point I am sad, frustrated, exhausted, angry, depressed and I could go on.....
I've lived in Ormond for about 20 years and luckily have my whole family here with me. We sold our 2 story house in Mallard's Reach and took all our savings to be lucky enough, so I thought to be in Tomoka Oaks, so I could have my 95 yr old mother live with us. It took a longer time than we had hoped to build jumping through all the hoops with set backs, clearances , trees, this rule, that rule but followed all the rules. My front lawn is so big I could be a park ! We ended up with a beautiful home.

Now along comes big money people and it seems they don't need the same set backs or have to follow the rules that we did. I didn't work my whole life to have to settle for having a housing complex with squished together homes plopped out of nowhere right down the road from me. I will literally have over 600 plus vehicles going past my home back and forth every single day and night !

What am I supposed to do with at least 5 years of building and listening to heavy trucks, having dirt and crap being thrown all over my brand new beautiful WHITE house????
That is my selfish part.....I could go on.....

I don't care what surveys they have said they've done.....they don't live here, they are not sitting in our traffic and they don't have kids in our schools and they are not trying to get Doctors here or trying to get into emergency rooms and hospital care !!!!
To say you can't stop progress is an easy way out. Since when does progress have to make everyone else's life miserable. It's just not fair and it seems that the biggest pocketbook wins.

My last chance I guess to get it off my chest. Thank you for listening.

Mr. Spraker:

While I understand the City's position that public comment has been completed concerning the continuation of the Tomoka Reserve Planning Board meeting that started July 13, 2023, if the developer has altered their proposal, taking into account recommendations from City Staff and the Planning Board, it would be my opinion that residents should be able to speak on at least those matters altered by the developer. Alterations to the project could create new and different concerns the public did not get to contemplate and comment on at the meeting held July 13, 2023.

As the Planning Board Chair mentioned, this approval could be the most important in his decades on the board. Cutting off public comment on what could be considered a new submission by the developer is a violation of our due process and should be reconsidered by the City prior to the August 21, 2023, meeting.

Subject:	Tomoka Oaks - Proposed Redevelopment
Date:	Tuesday, August 15, 2023 9:36:34 PM

[External Email-Use Caution] - OB/IT Helpdesk

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

At the last Planning Board meeting held at Calvary Christian Center, Development Partner Carl Velie - who is a licensed Realtor - struggled to clarify or satisfactorily address questions regarding why Triumph Oaks is so adamantly opposed to creating bigger lots in their proposed Tomoka Preserve Subdivision ... which is right in the center of our already established neighborhood with large lots.

In my allotted three minutes, I pointed out that in my 19 years as a Realtor I have never, ever, not even once had a Buyer ask me to find them a home on a 50, 60, or 80 foot lot. Unfortunately, in my opinion, the majority of new developments are being brought forth with more houses on less land simply to maximize Developer profits - NOT because that is what the market is demanding.

It's almost as if Mr. Velie is shying away from having to market estate style properties at a higher price point. I assure you that there are any number of Professionals within the Daytona Beach Area Association of Realtors who would relish the opportunity to be a visionary in creating a water feature on this land, throwing in some amenities, playing up the amazing central location, and selling the homes to upscale buyers who currently live west of 95 and are absolutely horrified by the thought of the additional traffic they will sitting in due to new Avalon boondoggle.

I encourage every elected official and staff member to continue to keep the best interests of ALL Citizens of Ormond Beach in mind and prohibit the current proposal. The Ryals Family previously had approval for a happy medium development that preserved green space and made an effort to offer a mix of residential units that were more desirable to the community as a whole. Since that time, our roads, schools, and hospitals have only gotten more crowded while our environment and water supply have been adversely affected at every turn - facts that should be a top priority and heavily considered before approving any more construction.

Correspondence from
August 16, 2023 to
August 21, 2023

(former attachment 19)

August 19, 2023

To: Ormond Beach Planning Board Members

From: Scott Ryals, 24 Tomoka Oaks Blvd., Ormond Beach; 50+ year resident, developer of Spivey's Court in Ormond Beach, longest running tenue as Club Manager of property being considered.

I would like to propose the Planning Board of the City appoint an exploratory committee to allow all concerned a voice and ground for compromise. Let's bring the approval and acceptance level of this project to a level we honestly say we improved our City with a "yes" vote today. As Chairman Thomas stated, this is one of the top five of the toughest issues in his thirty years on the Board. As a previous applicant for this project I feel we can soften the impact to all concerned.

Topics & Goal: Improvement of Neighborhood & Benefits to the City / Allowing Developers the Chance to a Fair Profit

Minimizing impact of Traffic / Front Island Stops to Four Way Stops / New Traffic Light on Nova Road / Long Term Traffic and Parking Impact on existing Businesses such as Hulls, Publix, Trails Shopping Stores / Baseball Fields and Nova Recreation Facilities etc. etc.

Increase in Green Zones for Recreational Facilities which could benefit all residents. Review the current proposal so that the City nor the current residents bear the long term expenses of being required to water or maintain such areas.

Guarantee that Ormond Builders be asked to partake in the lot purchases and development of the project so that our local economy will benefit.

Develop a plan to satisfy resale values and commitments to current neighborhood while offering developers the chance to earn fair profits on their investment.

Positive Actions to ensure ground water recharge zones are kept and improved to maintain future aquifer requirements placed on the City by St. John's.

Respectfully Submitted,

Scott Ryals

If there is any doubt about this project a "No Vote" should be reached.

MEMORANDUM

TO:	Ormond Beach Planning Board
CC:	S. Spraker, AICP, Planning Director
FROM:	Thomas Harowski, AICP
SUBJECT:	Tomoka Reserve July 16, 2023 Concept Plan
DATE:	August 5, 2023

Just prior to the continued public hearing on July 23, 2023, the applicants submitted a revised concept plan and summary of changes made to the proposed project in response to staff comments offered at the initial public hearing meeting. There was little opportunity to review and respond to the revised plan and other materials prior to the public hearing continuation. This report is offered as my comments on the revised concept plan and other actions.

The concept plan was revised to call out lots with a minimum width of 100-feet at the rear property line, lots with a minimum of 90-feet lot width, and the elimination of the proposed 50-foot wide lots in favor of lots with a minimum width of 60-feet. The assumption is that these changes responded to comments from planning board members questioning the inclusion of 50-foot lots and to show movement toward the staff and homeowners position that perimeter lots should meet a 100-foot minimum lot width. An analysis of the revised plans shows the new design achieves somewhat less than this outcome.

- The 46 lots with minimum 100-foot lot widths were almost all in place on the June plan presented at the first public hearing date. . Two 100-foot wide lots replaced a parks and were additional lots. There may be a couple of other instances where some green space was converted lot area and/or lot lines juggled to add a couple of lots at the 100-foot width For the most part the 100-foot wide lots were simply grouped with the 80-foot lots in the initial submittal and are now called out separately.

- The same condition applies to the 90-foot wide lots. It is clear that the rear property lines on some of the 90-foot wide lots are larger than the front lot width due to the curvature of the subdivision design. These are essentially 80-foot wide lots with a fortunate shape adding some dimension to the rear lot line.

- In part they kept the unit count up by removing five of the smaller park areas included in the original proposal. Only three of the parks removed from the plan

contributed to the creation of a 100-foot or 90-foot wide lot. The other parks were replaced with 60-foot wide lots.

- Some other former green space was removed to create additional lot area. The parks and the green space removed will change the open space calculations. While these changes may not be large, the applicants should update the data based on the new plan.

- The revised plan is really more smoke than overall subdivision improvement. The lots designated as 100-foot wide and 90-foot wide are generally located in the cul-de-sac areas where lots are almost always larger and on the outer curves of the roads where the rear property lines will be larger and might make the cut for the larger lots. A thoughtful approach would have located larger lots in the perimeter areas where only the 50-foot buffer is proposed. Absent a commitment to place 100-foot wide lots around the entire perimeter of the project, this approach would have maximized the benefit to neighboring lots by adding to the value of the 50-foot buffer.

- The removal of proposed park areas and other open space will likely not affect the Tomoka Oaks area, but it will certainly degrade the neighborhood quality for future residents.

- The applicants only submitted a revised concept plan, but if approved, the concept plan will affect many of the other pages in subdivision package.

The applicants also submitted a letter that listed the items where they agreed to make changes to conform to staff recommendations. These revisions for the most part were "easy" gives that cost little or nothing in some cases (such as revised setbacks). The most significant commitments were to the reconstruction of the diamond and the addition of sidewalk to the north side of Tomoka Oaks Boulevard. These changes were basic safety needs regardless of the outcome of any predictive traffic model. While it will cost some money to make these improvements, they were likely going to have to do them no matter what lot layout is finally approved. On the major items they really changed nothing.

- They declined the staff recommendation on the buffer and proposed their natural buffer with a bond commitment to increase the buffer design to the Type 6 if the result of their buffer is inadequate. The real key to this proposal is setting some kind of standard to measure the outcome. Without some type of standard (maybe opacity of the buffer), we just end up in an argument about the result. The city proposal of Type 6 buffer avoids this problem because a simple count of the plants determines compliance.

- On the design guidelines they took the vegetables and threw away the meat. They have some specifics about what the units look like, but they only said the same unit design could not be placed adjacent to or across the street from a particular design. This is no different than the every-other-lot proposal they

offered initially. We proposed a system that is based on a length of street where repeats are limited.

- On the traffic signal they say the application for the signal will be submitted within 30 days of the subdivision approval and that no permits for subdivision construction will be issued prior to the signal approval. I think this commitment just needs some wordsmithing. The application should be submitted concurrent with the application for subdivision approval and no building permits for houses issued until the signal is installed. This will allow the permit for the signal to work its way through the FDOT review process while the city is reviewing and approving the subdivision construction plans. The applicant would then have the period when the subdivision improvements are being constructed to finish the signal permit process and get the construction lined up.

- I have a couple of nits to pick with the building setbacks and porch setbacks, but these are minor clarifications. If we have 100-foot and 90-foot wide lots on the plan, why are they not represented in the setback tables. They also want to use the rear property line to measure the qualified lot width. This is unusual, but the applicant's argument is that the effective lot width at the rear of the property is what really matters to the neighbors. The city staff can give this argument whatever weight they think is appropriate.

As always we appreciate the opportunity to submit comments for consideration by the staff, planning board and city commission.

[External Email-Use Caution] - OB/IT Helpdesk

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Good afternoon! My name is Julie Freidus and I live at 316 River Bluff Dr in Tomoka Oaks. I have lived in Ormond Beach since 1976 (barring time out of state for college). First, I want to thank you for your service on the planning board and for your thoughtful comments and questions during the first two community meetings regarding this project.

I previously spoke with Al Jorczak who generously gave me 30 minutes of his time. My concerns with this project are many and I believe shared by the majority of you including traffic, stuffing a development inside an existing development, property values, pollution and loss of green space within our small community. However, I have one additional concern that I spoke with Al about a couple of months ago which is our communities lack of critical infrastructure to handle all of the people moving to our area.

I recently had to take my mother to the ER and we sat in the waiting area for close to 5 hours. She was finally taken to a room, but not seen by a doctor for another three hours. I had to call my neighbor, who is the CFO, of Advent Daytona for help. Turns out she was in AFIB and was a stroke risk that entire time. I have heard Halifax isn't much better. I want to be clear that I don't believe the hospitals are at fault. They are expanding as fast as possible, but my fear is we won't catch up in time with all of the future development expected. I truly fear for my mothers life who still has ongoing health concerns.

I work in the healthcare insurance industry and I also know it is very difficult for those in our community to find primary care physicians and many therefore self-refer to specialists when they can. However, specialists don't provide a wholistic review of one's health. I just wonder how long is this sustainable until some in our community suffer serious health consequences.

Have you thought about this for your own family and those you care about?

I understand the developer has rights, but I think the planning board and city commission have a responsibility to recognize significant issues in our community such as lack healthcare services for citizens and consider a more phased approach to any further development. At this point, I think the minimum possible number of homes for Tomoka reserve is very reasonable and responsible.

Thank you again for serving on the planning board and for your time in reading this email.

Julie

[External Email-Use Caution] - OB/IT Helpdesk

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear.Mr Speaker:

I Am particularly concerned with the impact to Tomoka Oaks (T.O.)mand my home and investments regarding Tomoka Reserve and The Fuel Dump.

The Nova entrance cannot handle the traffic to T.O., especially when Tomoka Blvd is dug up to change out the entire infrastructure of sewer, grey water, water supply and underground utilities (as shown in the latest revision). While the new revision will require a new round of interactive meetings, full disclosure appears to be hidden. No discussion has addressed the sewage interruption, nor water. “Grey water” that will be dispersed as an airborne particulate. Grey water dispersal has not been either studied nor fully understood.

While the builders delay on providing a traffic light into/out of the Tomoka Oaks, the city is apparently endorsing this delay. Why? Is our safety a low priority? Nova Road is a State of Florida approved and widen evacuation route. The railroad is just a short distance away to the Northeast. With the county apparently planning a fuel dump of 30 million gallons, that Rail road intersection will back up traffic,even more so , at the Tomoka Oaks main point of ingress/egress. This study has not occurred, especially with consideration of anticipated fuel tankers and speed restriction afforded to such cars.

The hamlet of Escondido Condos has NOT been fully informed via proper signage for alteration to their only entrance, which they must either move West or create another entrance. Since most of the owners are of senior age, you must protect them with more requirements. Your department appears to have ignored Talequa also, as to notification. There is a requirement for posted notice at the site of the respective enterances. As you know, there is also a “back door” purposal , as is similar into Tomoka Oaks via a precarious relationship with someone’s driveway mid St Andrews.

The builders latest purposal also shows a purchase of 100 St Andrews as a “back door” to the Tomoka Reserve. How was this purposal accepted without a variance notice or meeting via the posting at the address?

What measures have been taken as to traffic flow over the Meisner Creek wooden bridge and the increase of traffic?Remeber, tonnage is cumulative in nature which means all weight on the bridge at one time. There is also concern for “humping” of the load as to the piling into the earth. What is the tonnage restriction over the bridge as to wear and tear on the surface asphalt or the under structure? The builders offer no assurance of any weight bearing soil or trash truck which easily would excesses 25 tons? (I believe the last calculation of weight bearing was 20 ton). What guarantees will the builder provide as to a bond for damages?

With Tomoka Oaks under construction for the next 2 years, what has been the altered traffic

flow numbers as to Iroquois and Rio Pinar in relation to Main Trail?

We bought our Tomoka Oaks home over 30 years ago based on the green space and traffic flows. We raised children whom bicycle the neighborhood, all based on a Country Club/Golf Course. The traffic studies were misleading as it did not include bicycles, pedestrians, golf carts with underage kids, etc…safety is paramount. Many other bought homes with a rear yard based on the course. Has the city engaged with any Title Insurance concerns with those owners? If so, what is that status?

Just a few thoughts for now. If the 30 Million plus gallon fuel farm as a tentative misuse of land just North of our neighborhood and waterways, we fear for the impact of this abusive growth. Even if the first disaster is contained to a few railroad cars at (or about) Hull road we will see Ormond Beach on CNN worldwide. With CSX and NSC railroads, their affiliates, having dismal recent records and the close proximity to our Ormond one can only imagine the nightmare that will bestowed upon all, especially folks involved with “growth”.

Sincerely,
Paul W Hughes
Tomoka Oaks resident/property owner.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

The developer for Tomoka Reserve have not listened to a single comment from Tomoka Oaks home owners. The latest site plan of 80' wide lots around the perimeter is absurd. One of the biggest concerns all along has been to have the proposed development to match up with the existing lots so current homes do not end up with 2 neighbors directly behind them instead of 1. The big redesign of the entrance traffic island is pointless. In no way shape or form will it reduce the risk of peolple from North or South St Andrews being ran into. The new development drivers will speed around the diamond and the number of accidents will increase substantially. As a home owner that walks my dog through that area it will become high risk at best. The Developers desire to cram in maximum home to increase profit is being done at the expense of the people who have lived in Tomoka Oaks for decades, paid property taxes and hopefully have the City's support and value the peaceful neighborhood over a few people trying to turn a profit.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

To Steven & the Planning Board,

After the last meeting, the commissioners requested that we come forward with new concerns and/or ideas instead of the same complaints regarding a profound disapproval for the redevelopment of the golf course. On that line of thought, I have two concerns that I have yet to hear be addressed, and one suggestion for redevelopment that would make everyone happy.

Concern #1

- The FDEP stated that the contamination of fairways on the golf course will be remedied by adding 2 feet of clean fill. Do the developers plan on digging out the contaminated soil and then adding clean fill back, or do they plan on adding the clean fill directly on top of the contaminated grounds? Should they do the latter, runoff will become an issue for those of us on golf course adjacent lots. Currently, drainage is fine, however, if you add two feet of elevation to all new homes, those of us on the golf course are going to have runoff from the new construction polluting our yards.

Concern #2

- The developers have stated emergency access will be on the back side of the property on N St Andrews, specifically 100 N St Andrews. Will they be demolishing the home that is currently there? Will they then be taking out the median and oak tree directly in front of said lot in order to have clearance for emergency vehicles at times when speedy ingress and egress from their development is necessary? Do the homeowners on either side of 100 N St Andrews have any rights regarding a thoroughfare now being next to their homes?

Suggestion

- The developers are requesting such a high density of homes be built because they need to meet their bottom line. Anything less than 272 homes nd they won't be able to make enough money to prove their investment a reasonable one. Their greed is coming at the expense of all of us here on the golf who stand to lose an estimated 3-5% of our home value based upon the National Association of Realtors stance that homes on green space hold a premium (https://www.nar.realtor/trails-and-greenways). They also claim that the sport of golf is dying even though every local course (Halifax Plantation, Oceanside, Riviera) all have waiting lists due to such high interest and not enough courses in the area. Therefore, what if they do something unique? 27 hole golf course, three 9 hole courses, like Addison Reserve in South Florida, https://www.addisonreserve.cc/golf. Courses such as this are rare, and with such a unique redevelopment of the course, popularity with both local and tourist alike is assured, and so is the

subsequent prosperity for the developers. The developers will be able to fill their pockets while leaving a legacy in our community by saving the course, rather than their current path which is leaving behind a wake of disgust and resentment.

Thank you for your time and consideration of these concerns and the solitary suggestion. I look forward to hearing more on this project on September 26th.

Best Regards,

Kelsey Kipi

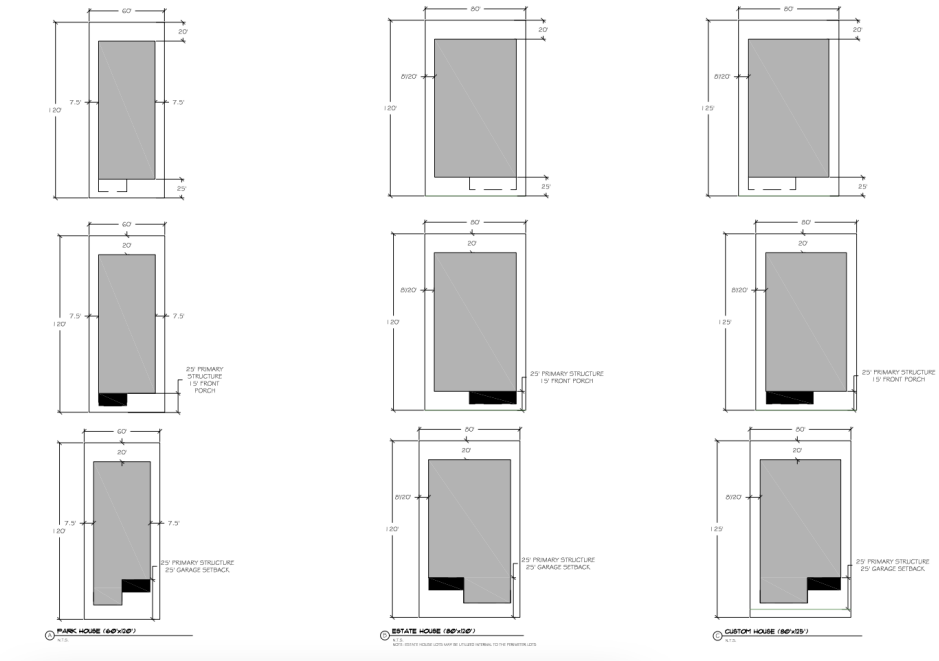
[External Email-Use Caution] - OB/IT Helpdesk

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Planning Board members,

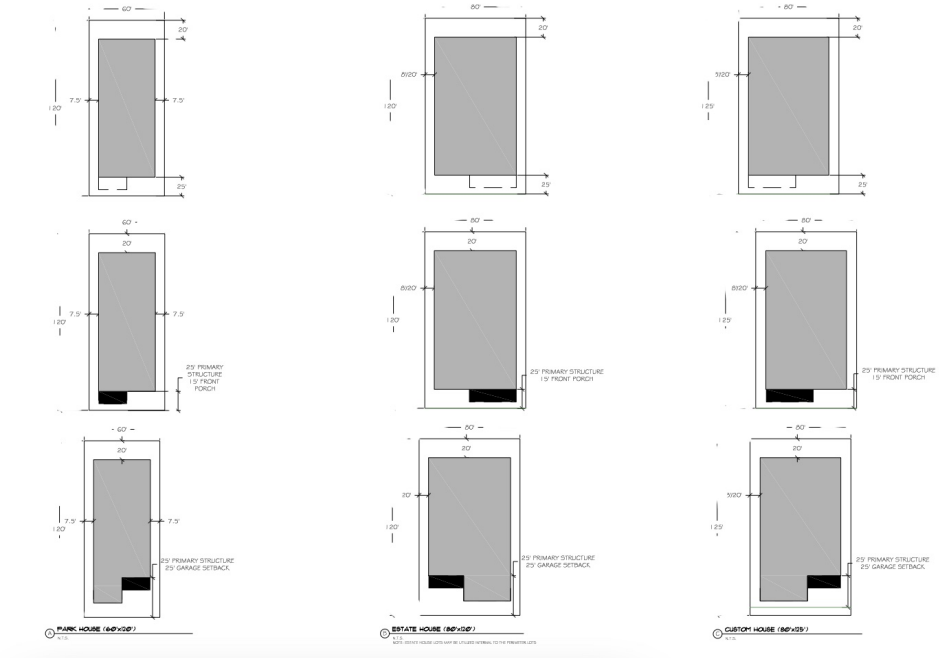
My name is Denise Corley. My husband and I own a house on the golf course at Tomoka Oaks Estates.
I have been reviewing the latest submittal by Triumph Oaks, of Ormond Beach I, LLC.

I am disappointed that Triumph Oaks, LLC, did not dramatically reduce the amount of houses that they are proposing.
The number of dwellings and tightness of their position on the landscape still make this submittal unacceptable.



The traffic, street safety, emergency vehicle access, environmental impact (toxic soil remediation, wildlife habitat displacement) all point to an incompatible plan and a huge quality of life disruption for the thousands of people directly impacted by this project.

In the succinct words of Barbara Doliner "the shoe doesn't fit", (Cinderella step-sisters) no matter how hard you squeeze.



I would like to comment on the new plan and written proposals.

1) I would like to draw your attention to the deceptive drawings of the scale of house to land diagrams-
I removed the confusing lines of the diagrams on page 7 scale drawing - what we see is the very tight urban concept being proposed.

Imagine these lots with their structure on them one after another and compare that to what Tomoka Oaks looks like with our 100' wide and 100' deep lots, spacious frontyards with houses sitting horizontally on the lot.

Below- REALITY

Please note that none of the concept photos of the homes give any clues as to how close the house next door is, in fact the homes look to be set on wide lots and with short frontages. Imagine the cars on those driveways.

2) There has been much talk about the 50 foot buffer.

I noticed Rob Merrell did not call the major ground cover of the golf course "grass" . Typically the ground cover called grass is mowed.

I would like a planning board member to ask a representative of Zev Cohen if they have ever had a client who would invest so much money in landscape plants in Florida and not plan for

irrigation.

First, I love Piet Odoulf international landscape architect, with his inspired "natural" landscapes but he will tell you that to achieve that beauty it takes much time and care and maintenance. We at Tomoka Oaks Estates are being asked to exchange the mowed groomed golf course for what sounds like a hodgepodge planting that will not be maintained or mowed but as my neighbor said will become covered in vines.

Second, after reading through the submittal it sounded like the buffer plantings (not the Type 6 asked for by the SPRC) but a modified plan was being planted in a phased manner.

The buffers' appeal is that it saves a lot of trees from clear cutting and it screens out years of construction happening in our backyards. Our onclave of Tomoka Oaks Estates was NOT supposed to be a crowded urban infill project. A phased in buffer that was never on the table.

Either the developer is committing to the buffer planting for the entire project all at once or it would seem to be a flimsy promise not intended to be kept.

Compare- Type 6 buffer recommended by the SPRC- 7 trees, 70 shrubs, 70 ground covers per 100 linear feet

Modified Buffer proposed- 5 trees, 50 shrubs, (present "grass "ground cover unmowed except near new plantings) xeriscapes can be heavily planted.

Thirdly, If a 5 foot visual screen buffer is planted it should be on the property line of the new invasive homes. The existing homes have been enjoying and paying for a spacious view from their backyard of a golf course.

According to the planting statement 80% success rate is sufficient. The 80% should be clarified to 80% of new plantings. I noticed the tree planting locations but the shrubs aren't even mentioned.

On the map, what is the difference between the care of the buffer and the care of the "Open Space", generally surrounding the stormwater dry ponds. It's my understanding that these giant swales full of runoff won't be mowed surrounded by a 3 foot tall sloping berm. Trees unaccustomed to flooding will be in the swale. Sounds like an eyesore and smelly.

3) Emergency Access doesn't seem to be a priority to Triumph Oaks, LLC. It appears the emergency vehicles barely have room to maneuver corners and it's hard to understand the colored map. Does the fire engine have to drive through the soccer field to avoid a sharp turn onto one main road of the cramped subdivision? What would happen if a car or lawn care vehicle is parked on the road? The press to cram as many houses in this urbanized infill project is dangerous, one exit/entrance and an emergency exit that can barely be called sufficient. Tomoka Oaks Estates should not have to change our islands, cut down trees just because this project is ill suited to this piece of land!

I4) In the narrative Rob Merrell says they will put sidewalks on both sides of Tomoka Oaks Blvd, but the sidewalk in the schematic doesn't appear to go all the way to the entrance of Tomoka Reserve. Do pedestrians have to cross the only exit/entrance traffic anyway? The sidewalk appears halfway on one side. Why doesn't it go all the way on both sides?

5) This developer is saddling the Triumph Reserve HOA with a lot of responsibilities and built in costs that they may not be able to afford and that is a disaster for Tomoka Oaks Estates.

Please vote No on this submittal. It is only "superb" for 4 people who won't even live there, bad for the rest of us.

Thank you for your voluntary service the our community,

Sincerely,
Denise Corley

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Mr. Spraker:

Greetings from Tomoka Oaks, Ormond Beach! My name is John Jeyaseelan. My wife, Mrs. Hema Jeyaseelan, and I are the proud citizens of our beautiful city of Ormond Beach, Florida. If you may kindly recall, I have the privilege of offering invocation at the City Council meetings at least a couple of times every year. I am proud of our city leaders who submit to the wisdom of God's guidance in all the decisions you take in every meeting.

My wife and I live at 31 Oakmont Circle, Ormond Beach in Tomoka Oaks. The new site plan for the development of 272 homes shows an emergency access point right on our property. To this date, we have neither been contacted by the developers nor the planners with regard to the access point adjacent to the property. My wife and I strongly object to the development of the new roads on our property. I have a busy travel schedule and therefore I may not be able to make it to the Public Meeting on September 26 but strongly object to the development next to our property.

I hope and pray that the leaders of the city of Ormond Beach will make the decision for the benefit and not for the detriment of the citizens to safeguard us from congestion and unstoppable traffic without outlets that the builders are proposing in their site plan.

Please feel free to contact me at any time. Thank you for your attention to this very important matter.

Most Sincerely,

John Jeyaseelan
31 Oakmont Circle

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Two questions.

1) Will the gate to the community be a slowly moving pull back gate or a quick up and down gate? Concern about backup onto Tomoka Oaks Blvd of this becomes a round about as asked by residents. Drivers coming south on N. St. Andrews going out to Nova turn right onto the roundabout and into a possible line of cars waiting for the gate during evening getting home from work time.

2) just a curiosity question.
How does the emergency access happen? Are they a road between two homes in Tomoka Oaks? Have they purchased the homes or are the present homeowners required to let a path go between their homes?

Thank you.

Natalie Weaver

Re: Tomoka Oaks Residential Traffic Analysis – Response to Comments
Ormond Beach, FL

Dear Mr. Spraker:

Thank you for your review of the Tomoka Oaks Residential Traffic Impact Analysis (TIA). LTG, Inc. is in receipt of separate comments provided by the City on May 5, 2023, regarding the updated TIA prepared for the project. The list of comments, sorted by each recipient, is presented below in plain text with our responses to those applicable topics in **bold** text.

Comments Received from Steven Spraker, AICP – City of Ormond Beach (05/05/2023):

1.) Comment: Please see the technical memorandum from Tanya N. King, P.E. of Traffic Engineering Data Solutions, Inc (TEDS).

Response: Understood. Our responses to the comments are in the following response letter.

2.) Comment: The previous site plan comments suggested a brief non-technical memorandum to detail the traffic analysis and conclusions – particularly regarding the local traffic impacts (Escondido condo access, diamond intersection, and traffic into the Trails). Staff would still suggest this.

Response: A brief summary was included in the Response to Comments letter dated April 11, 2023, for items A-G with explanation also provided in the Updated TIA. A technical memorandum explaining the history and conclusions of the traffic analysis is attached as Exhibit A.

3.) Comment: Staff is unclear what the resolution of the "diamond" at Tomoka Oaks Boulevard and North and South Saint Andrews Street. The response comments (#2) from LTG provides an analysis of the intersection and appears to recommend a roundabout design. The analysis is not part of the traffic impact analysis or conclusion. What is the design option that is proposed to be implemented. The design option needs to be included in the traffic study or project submittal.

Response: The analysis comparison, including the roundabout, was provided as supplemental data to the TIA as requested by the City. Supplemental information on the comparison analysis has been added to the text of the report and summarized in Table 12 of the revised TIA report.

Based on the future buildout results, the existing diamond is expected to operate within the adopted level of service during the peak hours (all options operate within a level B or better). From a mitigation standpoint, no improvements or modifications are required for intersections that are not deficient. At this time, the existing configuration is proposed to remain.

4.) Comment: Regarding the tree along Nova Road and Tomoka Oaks Boulevard, staff will include a condition that this tree is to remain.

Response: Understood.

Comments Received from Tanya N. King, P.E. – TEDS (05/04/2023):

1.) Comment: The existing AM and PM traffic volumes at the Tomoka Oaks Blvd at N St Andrews intersection in Figure 2 differ from the traffic volumes in the count sheet. The synchro analysis will also need to be corrected.

Response: The A.M. and P.M. peak hour for the diamond intersections (S St. Andrews Drive, East Diamond, and West Diamond) and Escondido Multifamily Driveway are consistently from 8:00- 9:00 a.m. and from 5:00 -6:00 p.m. However, the volumes at Tomoka Oaks Blvd. at N. St. Andrews show a slightly different peak hour. In order evaluate the diamond system as one complete intersection, the volumes at this intersection were balanced/adjusted for the peak hours specified. The count data detail sheets are provided as Appendix C in the Updated TIA.

2.) Comment: The existing PM volumes for the Tomoka Oaks Blvd at Tomoka Oaks Blvd (west) intersection differ from what is shown in Figure 2.

Response: Please refer to the response provided for Comment #1 above. Also, note that this intersection was not included in the existing intersection analysis as it currently operates under free-flow conditions for all approaches.

3.) Comment: The roadway segment analysis peak hour two-way capacity is not correct for the SR 5A/Nova Rd and SR 40/Granada Blvd segments.

Response: The roadway segment peak hour two-way capacity for state-maintained facilities such as SR 5A/Nova Rd and SR 40/Granada Blvd. segments were derived from the 2023 Multimodal Quality/Level of Service Handbook and based on the Context Classification identified by the FDOT.

4.) Comment: The LOS presented in the LOS summary tables for Tomoka Oaks Blvd at S. St Andrews Dr is incorrect for all analysis scenarios.

Response: The adopted LOS has been revised from LOS "C" to LOS "D", in accordance with the City's Comprehensive Plan, as requested.

5.) Comment: Based on the traffic volume tables no vested traffic trips were applied to the intersection analysis. Only the segment analysis. Vested trips need to be applied to the intersection analysis.

Response: The vested data provided by the governing agencies is limited to roadway segments in the study area; No vested trips are recorded or documented at the intersections included in the study area. Therefore, historical annual growth rates were applied to the existing data at the intersections to determine future background volumes, consistent with the segment growth determination table.

6.) Comment: For the roadway segment analysis under background conditions, several roadway segments are mentioned that need to be widened to achieve acceptable LOS. There is no mention of any planned roadway improvements for these segments. This needs to be addressed along with proportionate fair share calculations towards these improvements. In addition, provide an ARTPLAN analysis for these segments.

Response: **The recommended improvements for those segments deficient due to background traffic are shown in Table 8. Hand Ave. and Williamson Blvd. widening projects are shown in the County's Long Range Transportation Plan. No segments are shown to be deficient due to project traffic.**

The draft proportionate share calculations for those segments shown deficient due to background traffic and the anticipated transportation impact fees for the project are attached as Exhibit B. In summary, the roadway segments and turn lane mitigation cost equates to approximately $758,145.32 and the total estimated transportation impact fee equates to approximately $1.68M. It is understood that these estimates are provided for reference information only, as the values are anticipated to vary slightly due to time between the rezoning and concurrency process.

7.) Comment: For the deficient turn lanes mentioned in the report under future conditions at the Nova Rd at US 1, Nova Rd at Tomoka Oaks Blvd, and Nova Rd at Wilmette Ave intersections, the developer will need to provide costs for these improvements as well and it needs to be stated in the report that the developer will extend these turn lanes to meet the queue requirement.

Response: **The proportionate share for the deficient turn lanes, based on the number of project trips anticipated for each movement, is included in the draft proportionate share calculations attached as Exhibit A. Please note the applicant will be mitigating these impacts through transportation impact fees and PS payment process.**

8.) Comment: The diamond intersection analysis needs to be provided in the report along with a comparison LOS table of the existing conditions versus the proposed roundabout.

Response: **The supplemental analysis, of the alternative comparison has been added as an Appendix to the report, as requested.**

9.) Comment: With the 70 project trips projected to make SBR turns at Tomoka Oaks Blvd intersection, this brings the total to 131 turns. Based on FDOT guidance, this warrants an exclusive right-turn lane. Based on posted speed of 50 mph, it should be approximately 400' long.

Response: **The FDOT guidance using NCHRP Report 457, and the Access Management Guidebook provide recommendations for unsignalized intersection conditions. The Tomoka Oaks Blvd. at Nova Rd. intersection is proposed to be signalized under future buildout conditions. Under these conditions, the intersection operates within the adopted LOS under a.m. and p.m. peak hours without the exclusive right-turn lane. It is understood that final lane geometry and timing parameters will be discussed with FDOT staff at the time of design, during the pre-application meeting required as part of the permit process.**

10.) Comment: The traffic impact analysis and new signal warrant analysis should be submitted to FDOT for review.

Response: The Traffic Signal Warrant Study has been submitted to the FDOT for review and accepted verbally as an acceptable treatment option. Further discussion with FDOT on the design and layout of the proposed signal is forthcoming and pending concurrency approval.

Thank you for your review of the updated TIA, and we appreciate your cooperation and assistance as we move through the traffic concurrency process. If you have any questions or comments, please feel free to call me at (386) 257-2571.

Sincerely,

LTG, INC.

TECHNICAL MEMORANDUM

To: Steven Spraker, AICP

From: Kady L. Dearing, P.E.

Date: June 7, 2023

Subject: Tomoka Oaks Residential – Traffic Analysis Summary
Ormond Beach, FL

INTRODUCTION

LTG, Inc. has been requested by the City of Ormond Beach Staff to prepare a brief summary of the traffic analyses and conclusions that have been prepared on behalf of the proposed project known as Tomoka Oaks Residential. The following documentation provides an overview of the anticipated project impact on the road network and results and conclusions developed from the transportation analyses conducted.

TRAFFIC ANALYSIS SUMMARY

- The original Traffic Impact Analysis (TIA) included data collected in May and June of 2021. Growth factors and Florida Department of Transportation (FDOT) Seasonal Factors (SF) were used to adjust the volume to estimate 2022 volumes for the analysis. As requested by the City's traffic consultant, new data was collected in March 2023. The updated volumes did not show a significant change from the original data used.

- The updated TIA, dated April 10, 2023, concluded that traffic operations at the existing diamond configuration are expected to continue to operate within the adopted service levels under future buildout conditions. Therefore, modifications or improvement to the configuration are not required to meet concurrency.

- However, the City requested that an additional, supplemental analysis, be provided at the internal diamond configuration to determine potential design alternatives. The two alternatives include an ALL-WAY STOP intersection and a single-lane roundabout.
    - All options, including the existing configuration, result in acceptable levels of service during the a.m. and p.m. peak hours (an overall intersection delay of 10 seconds or less).
    - 95th percentile vehicular queue (stacking) not expected exceed 50 ft. under all alternatives; vehicular stacking not shown to be a concern.
    - The roundabout design reduces the number of vehicular conflict points from 18 with the existing configuration to 8. The ALL-WAY STOP design results in 32 vehicular conflict points. Reducing the number of conflict points reduces the potential for vehicular crashes.
    - Crash data reports were requested from the Ormond Beach Police Department and through Signal 4 Analytics (an interactive web-based system used to track crash reports in the State of Florida). As a result, no crashes have been reported at the internal diamond configuration.

- Due to the proposed location of the project's access, peak hour data and transportation model results, it is anticipated that 96% of project trips will utilize Tomoka Oaks Boulevard and 4% will use Iroquois Trail for external access. 4% of traffic (111 total daily, 8 total AM, and 11 total PM) are expected to use this route to access SR 40.

- The buildout network condition includes installation of a traffic signal at the Tomoka Oaks Boulevard at Nova Road intersection.
    - Signalization helps to reduce the minor street delay and vehicular queue under a.m. and p.m. peak hour conditions.
    - The future signal will also include two eastbound/outbound lanes; one shared-through left and one right-turn lane.
    - The existing tree within the median is to remain under future signal control.
    - Exclusive southbound right-turn lane not shown warranted in the TIA. However, further discussions with the FDOT regarding the lane geometry, alignment, and signal timings will occur during the permitting application process.
- The Escondido Apartment driveway was also included in the Updated TIA, as requested by City staff.
    - The future buildout results of the analysis, under signal control at the Tomoka Oaks Blvd. at Nova Rd. intersection, show the driveway operating at acceptable levels of service during the a.m. and p.m. peak hours.
    - Additionally, under future improved conditions at the Nova Rd. at Tomoka Oaks Blvd. intersection, under signal control with two outbound lanes present, the maximum eastbound/outbound vehicle queue at the intersection is expected to extend 125 ft., avoiding blockage of the Escondido driveway.

INTRODUCTION

LTG, Inc. (LTG) has been retained by Triumph Oaks of Ormond Beach I, LLC to prepare a Traffic Impact Analysis (TIA) for the Tomoka Oaks Residential development, located west of the Nova Road/Tomoka Oaks Boulevard intersection in the City of Ormond Beach, Florida**. Figure 1** shows the location of the project relative to the surrounding road network. The development will consist of 300 single family dwelling units. Build-out of the proposed development is anticipated by 2028.

Access to the development will be provided at the western leg of the Tomoka Oaks Boulevard/St. Andrews Drive intersection with primary external access at the existing Tomoka Oaks Boulevard at Nova Road intersection. A preliminary site plan is attached as Appendix A.

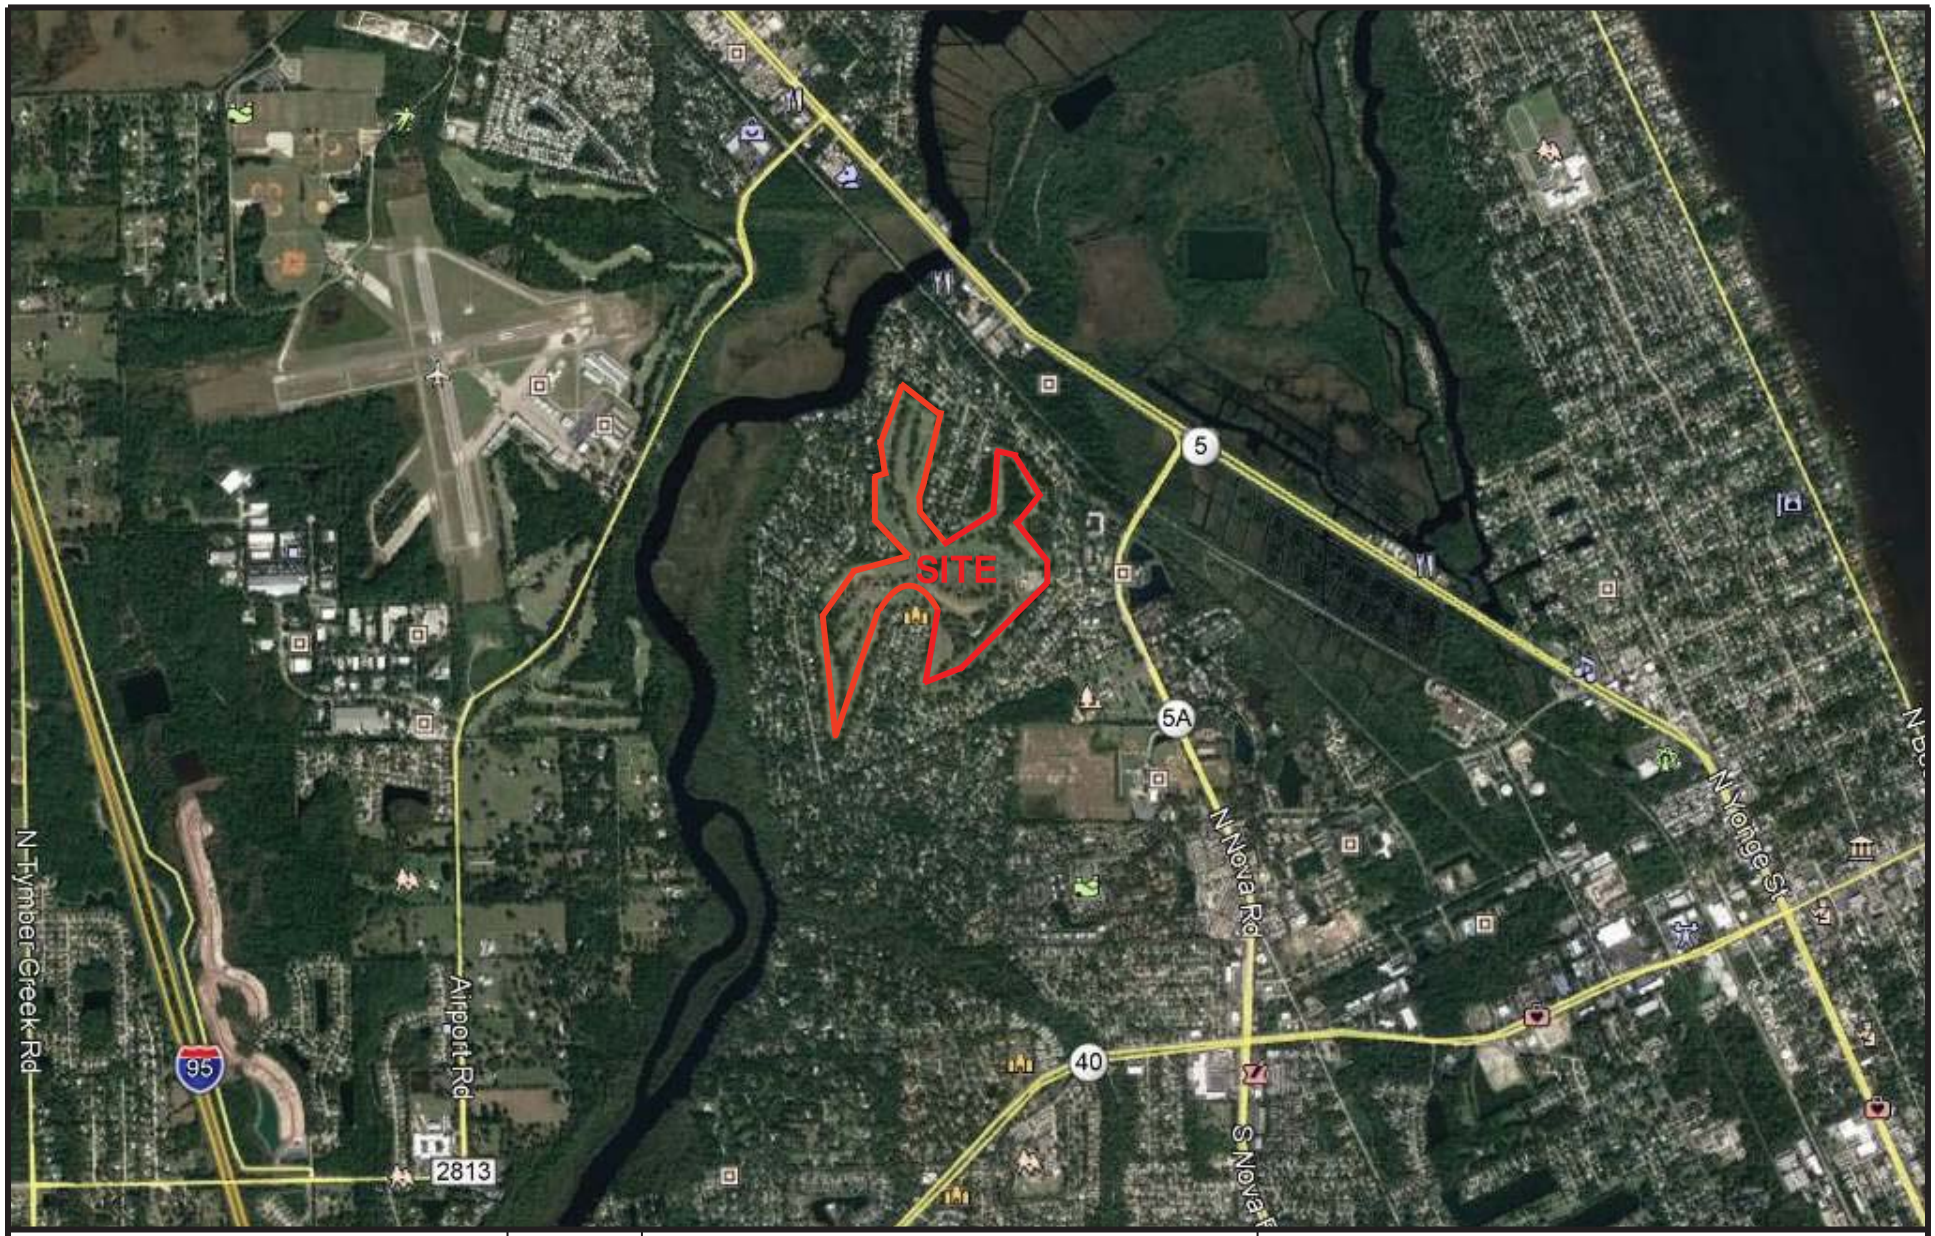
Study Area

The following roadway segments and intersections are included in the analysis, per the approved methodology (Appendix B):

Intersections:

1. Nova Road at US 1
2. Nova Road at Wilmette Avenue
3. SR 40 at Main Trail
4. Tomoka Oaks Boulevard at Nova Road
5. Tomoka Oaks Boulevard at Escondido Multifamily Driveway
6. Tomoka Oaks Boulevard at N. St. Andrews Drive
7. Tomoka Oaks Boulevard at S. St. Andrews Drive
8. Tomoka Oaks Boulevard at West Diamond
9. Tomoka Oaks Boulevard at East Diamond
10. St. Andrew's Drive at W Rio Pinar Trail
11. St. Andrew's Drive at E Rio Pinar Trail
12. St. Andrew's Drive at Iroquois Trail

Roadway Segments:



- Nova Road from US 1 to Wilmette Avenue (Significant)
- SR 40/Granada Boulevard from I-95 to Clyde Morris Boulevard (near critical)
- SR 40/Granada Boulevard from Clyde Morris Boulevard to Nova Road (near critical)
- SR 40/Granada Boulevard from US 1 to Halifax Avenue (critical)
- Hand Avenue from Clyde Morris Boulevard to Nova Road (vested near critical)
- Williamson Boulevard from Hand Avenue to Strickland Range Road (vested critical)

Study Procedures

Standard engineering and planning procedures were used to determine the impacts of the proposed project. Reference data was obtained from the Florida Department of Transportation (FDOT), the Volusia County Traffic Engineering Department, the City of Ormond Beach Planning Department, the Institute of Transportation Engineers (ITE), and the River to Sea Transportation Planning Organization (R2CTPO).

Planned Roadway Improvements

Information on programmed or planned roadway improvements in the area of interest was obtained from the FDOT Five-Year Work Program, Volusia County, the R2CTPO Long Range Transportation Plan, and previously approved projects. There are no capacity-enhancing programs currently planned within the study area.

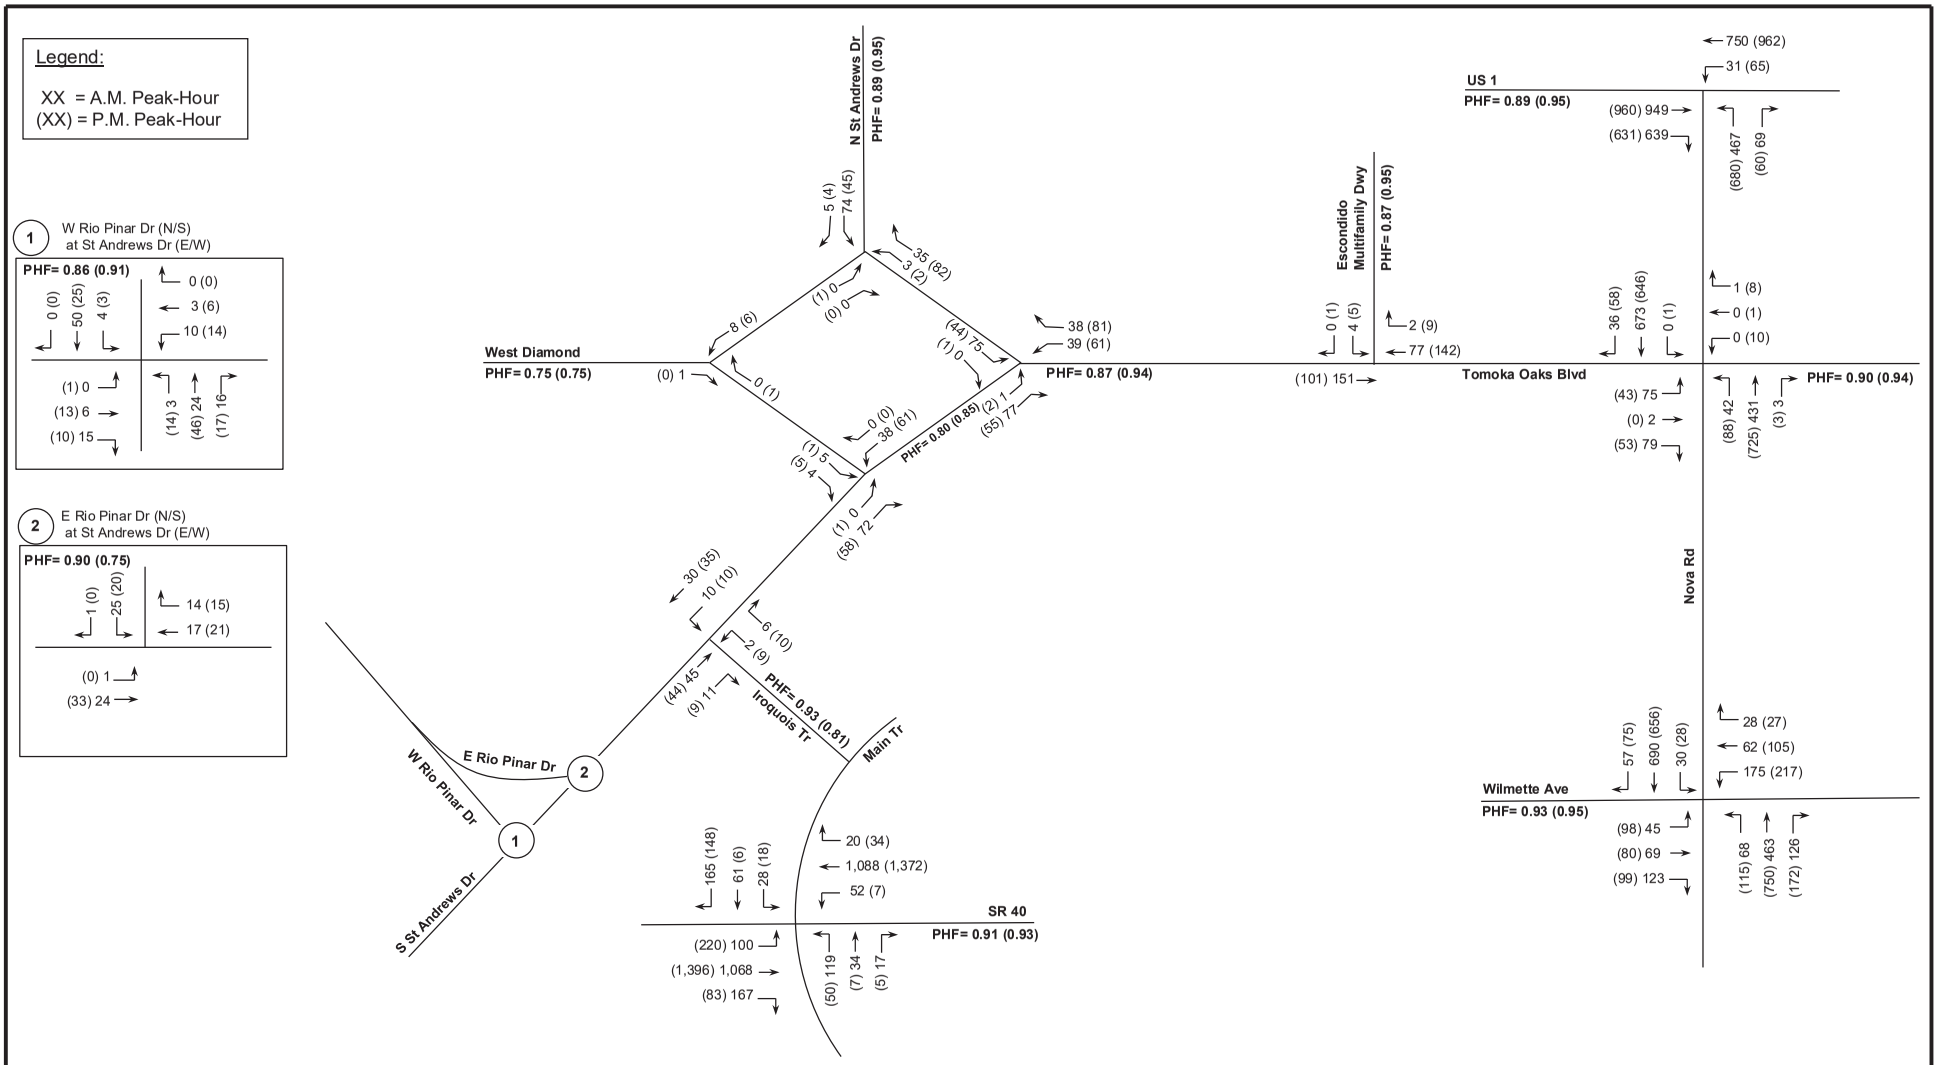
2

EXISTING ROADWAY ANALYSIS

Turning movement counts (TMCs) were conducted during the AM and PM peak-hours on March 2nd, 2023, at the study area intersections (see Appendix C). FDOT's 2021 Seasonal Factors (SF) for the corresponding dates were applied to the existing counts. Please note, if the FDOT SF was less than 1.0, a minimum SF of 1.0 was applied to the counts. The turning movement counts during the AM and PM peak-hours for Tomoka Oaks Boulevard at N. St. Andrews Drive and Tomoka Oaks Boulevard at West Diamond during the PM peak-hours were calibrated to the same peak hour as Tomoka Oaks Boulevard at the study intersections to reflect the balancing turning movements. The existing AM and PM peak-hour traffic volumes used in the analysis are depicted in **Figure 2**.

Unsignalized Intersection Analysis



The existing operating conditions at the unsignalized intersections were analyzed using *HCS 2023 or Synchro 11* at the study area intersections. This software utilizes the procedures outlined in Chapter 20 of the Highway Capacity Manual (6th Edition) titled, "Two-Way Stop-Controlled Intersections". **Table 1** shows the existing AM and PM peak-hour level of service (LOS) at the study area intersections. The HCS and Synchro summary sheets are attached as Appendix D.

Table 1
Existing AM and PM Peak-Hour LOS - Unsignalized Intersections
Tomoka Oaks Residential

Intersection	Adopted LOS	Analysis Method	AM Peak-Hour			PM Peak-Hour		
			Critical Approach	Delay (sec.)	LOS	Critical Approach	Delay (sec.)	LOS
Nova Rd. at Tomoka Oaks Blvd.	D	Synchro	EB	23.4	C	EB	20.1	C
Tomoka Oaks Blvd at Escondido Multifamily Access	D	Synchro	SB	10.0	B	SB	10.0	B
Tomoka Oaks Blvd. at N. St. Andrews Dr.	D	Synchro	SB	9.0	A	SB	8.9	A
Tomoka Oaks Blvd. at S. St. Andrews Dr.[1]	D	Synchro	NB	8.6	A	NB	8.6	A
Tomoka Oaks Blvd. at West Diamond [2]	D	Synchro	N/A	-	-	N/A	-	-
Tomoka Oaks Blvd. at East Diamond	D	Synchro	SB	9.9	A	SB	9.7	A
St. Andrew's Dr. at W Rio Pinar Tr.	D	HCS	SB	7.8	A	EB	8.9	A
St. Andrew's Dr. at E Rio Pinar Tr.	D	HCS	SB	8.9	A	SB	9.1	A
St. Andrew's Dr. at Iroquois Tr.	D	HCS	NB	8.7	A	NB	9.0	A

[1]The HCM 6th methodology is not compatible with the geometry, therefore HCM 2000 was used to report the LOS.
[2]The intersection currently operates under free-flow conditions (no stop control present) with minimal peak hour volumes; therefore, no LOS is reported.

As indicated, all unsignalized intersections are currently operating within the adopted level of service under existing conditions.

Signalized Intersection Analysis

The existing operating conditions at the signalized intersections were analyzed using *HCS 2023*, which utilizes the procedures outlined in Chapter 19 of the *Highway Capacity Manual 6th Edition*, titled "Signalized Intersections". **Table 2** shows the existing LOS and volume to capacity ratios (v/c) at the study area intersections. The signal timings are provided in Appendix E and the HCS summary sheets are provided in Appendix D.

Table 2
Existing AM and PM Peak-Hour LOS - Signalized Intersections
Tomoka Oaks Residential

Intersection	Adopted LOS	AM Peak-Hour			PM Peak-Hour		
		Delay (sec.)	LOS	V/C greater than 1.0?	Delay (sec.)	LOS	V/C greater than 1.0?
Nova Rd. at US 1	D	14.5	B	No	17.9	B	No
Nova Rd. at Wilmette Ave.	D	26.2	C	No	31.4	C	No
SR 40 at Main Trail	D	23.2	C	No	20.4	C	No

As indicated, all signalized intersections are currently operating within the adopted level of service under existing conditions.

Roadway Segment Analysis

Roadway LOS describes the operating condition determined from the number of vehicles passing over a given section of roadway during a specified time period. It is a qualitative measure of several factors which include speed, travel time, traffic interruptions, freedom to maneuver, driver comfort, convenience, safety, and vehicle operating costs. Six LOS categories have been established as standards by which to gauge roadway performance, designated by the letters A through F. The LOS categories are defined as follows:

Level of Service A: *Free flow, individual users virtually unaffected by the presence of others.*
Level of Service B: *Stable flow with a high degree of freedom to select operating conditions.*
Level of Service C: *Flow remains stable, but with significant interactions with others.*
Level of Service D: *High-density stable flow in which the freedom to maneuver is severely restricted.*
Level of Service E: *This condition represents the capacity level of the road.*
Level of Service F: *Forced flow in which the traffic exceeds the amount that can be served.*

The Average Annual Daily Traffic (AADT) for the study roadway segments was obtained from the FDOT *Traffic Online* database and Volusia County 2021 Average Annual Daily Traffic & Historical Counts spreadsheet. The existing LOS for the study area road segments during the peak-hour are provided in **Table 3**. As indicated, all roadway segments currently operate within the adopted LOS under peak hour two-way conditions.

Table 3
Existing PM Peak-Hour LOS - Roadway Segments
Tomoka Oaks Residential

Roadway	Segment		No. of Lanes	Adopted LOS	Peak-Hour Two-Way Capacity[1]	Count Source	2021 AADT	Existing Peak-Hour Two-Way Volume[2]	Existing PM Volume Exceed Adopted LOS?
SR 5A/Nova Rd.	US 1	Wilmette Ave.	4	D	3,455	FDOT	14,400	1,296	No
SR 40/Granada Blvd.	I-95	Clyde Morris Blvd.	4	D	3,455	FDOT	36,000	3,240	No
	Clyde Morris Blvd.	Nova Rd.	4	D	3,455	FDOT	35,500	3,195	No
	US 1	Halifax Ave.	4	D	3,413	FDOT	35,500	3,380	No
Hand Ave.	Clyde Morris Blvd.	Shangri La Dr.	2	E	1,540	Volusia	14,880	1,200	No
	Shangri La Dr.	Nova Rd.	4	E	3,410	Volusia	16,250	1,350	No
Williamson Blvd.	Hand Ave.	Strickland Range Rd.	2	E	1,540	Volusia	17,520	1,420	No

[1]Adopted LOS, capacity, existing AADT, and existing PM Peak-Hour Two-Way Volume obtained from the 2021 Volusia County Traffic Count Spreadsheet for County maintained facilities. FDOT Generalized Service Volume Tables, Context Classification, and adjustment factors used for FDOT roadways.
[2]Existing Peak Hour Two-Way Volume obtained from Volusia County Spreadsheet for County roadways and determined using a K-factor (0.09) for FDOT roadways.

3

FUTURE TRAFFIC CONDITIONS

Traffic in the area is expected to grow due to local government approvals. The following section documents the methods used to project future 2028 traffic conditions by using either historical growth rates and/or vested trip information and anticipated project traffic.

2028 Background Traffic

The growth rates for each study area roadway segment will be determined using the following method:

- Historic growth trends calculated based upon the last five years of historic count data to determine a roadway segment's applicable trend growth rate using the best fitted regression analysis.
- If the R^2 value is less than 0.70, then ten (10) years of historical traffic data will be used to determine the trends growth rate using the best fitted regressions analysis.
- If the R^2 is still less than 0.70, the R^2 for the adjoining northbound and southbound segments will be analyzed to determine the average growth rate of adjoining segments can be utilized.
- Then the growth rate shall be determined by the trend fitted curve. If the overall trend fitted curve is positive, 2% shall be used. If the overall trend fitted curve is negative, then a 1% growth rate will be applied.
- In no case shall the growth rate be negative.
- Vested trips will be applied in addition to growth rates where applicable.
- If the R^2 value is greater than 70%, and the growth rate is greater than 3%, the background growth will be determined using either vested trips or the growth rate, whichever is more conservative.
- If the R^2 value is greater than 70%, and the growth rate is greater than 3%, and there is a high number of vested trips to be applied by multiple vested projects with various land uses, a request may be made to reduce vested traffic by 30% if the vested traffic is 30% of the total background growth.
- Per County Directive, exponential regression will not be used to determine growth.

The growth comparison and applied growth used in the analysis are provided in **Table 4**. The FDOT *Traffic Trends* analysis worksheets, updated critical/near critical map and significant table, the vested trip information was obtained from the County's vested trip database and the spreadsheet used to develop the existing, background and build-out traffic volumes attached as Appendix F.

Note: A minimum 1% annual growth rate was used for local segments and intersections.

4

2028 BACKGROUND ROADWAY ANALYSIS

The study area intersections and roadway segments were analyzed based on the future roadway conditions to determine potential impacts and to investigate mitigation requirements. **Figure 3** graphically depicts the 2028 background volumes during a.m. and p.m. peak-hours. The results of the analysis are presented below.

2028 Background – Unsignalized Intersection Analysis

The unsignalized intersections were analyzed to determine the operating conditions under 2028 background conditions and the results are presented in **Table 5**. The HCS and Synchro summary sheets are included in Appendix G.

Table 5
2028 Background AM and PM Peak-Hour LOS - Unsignalized Intersections

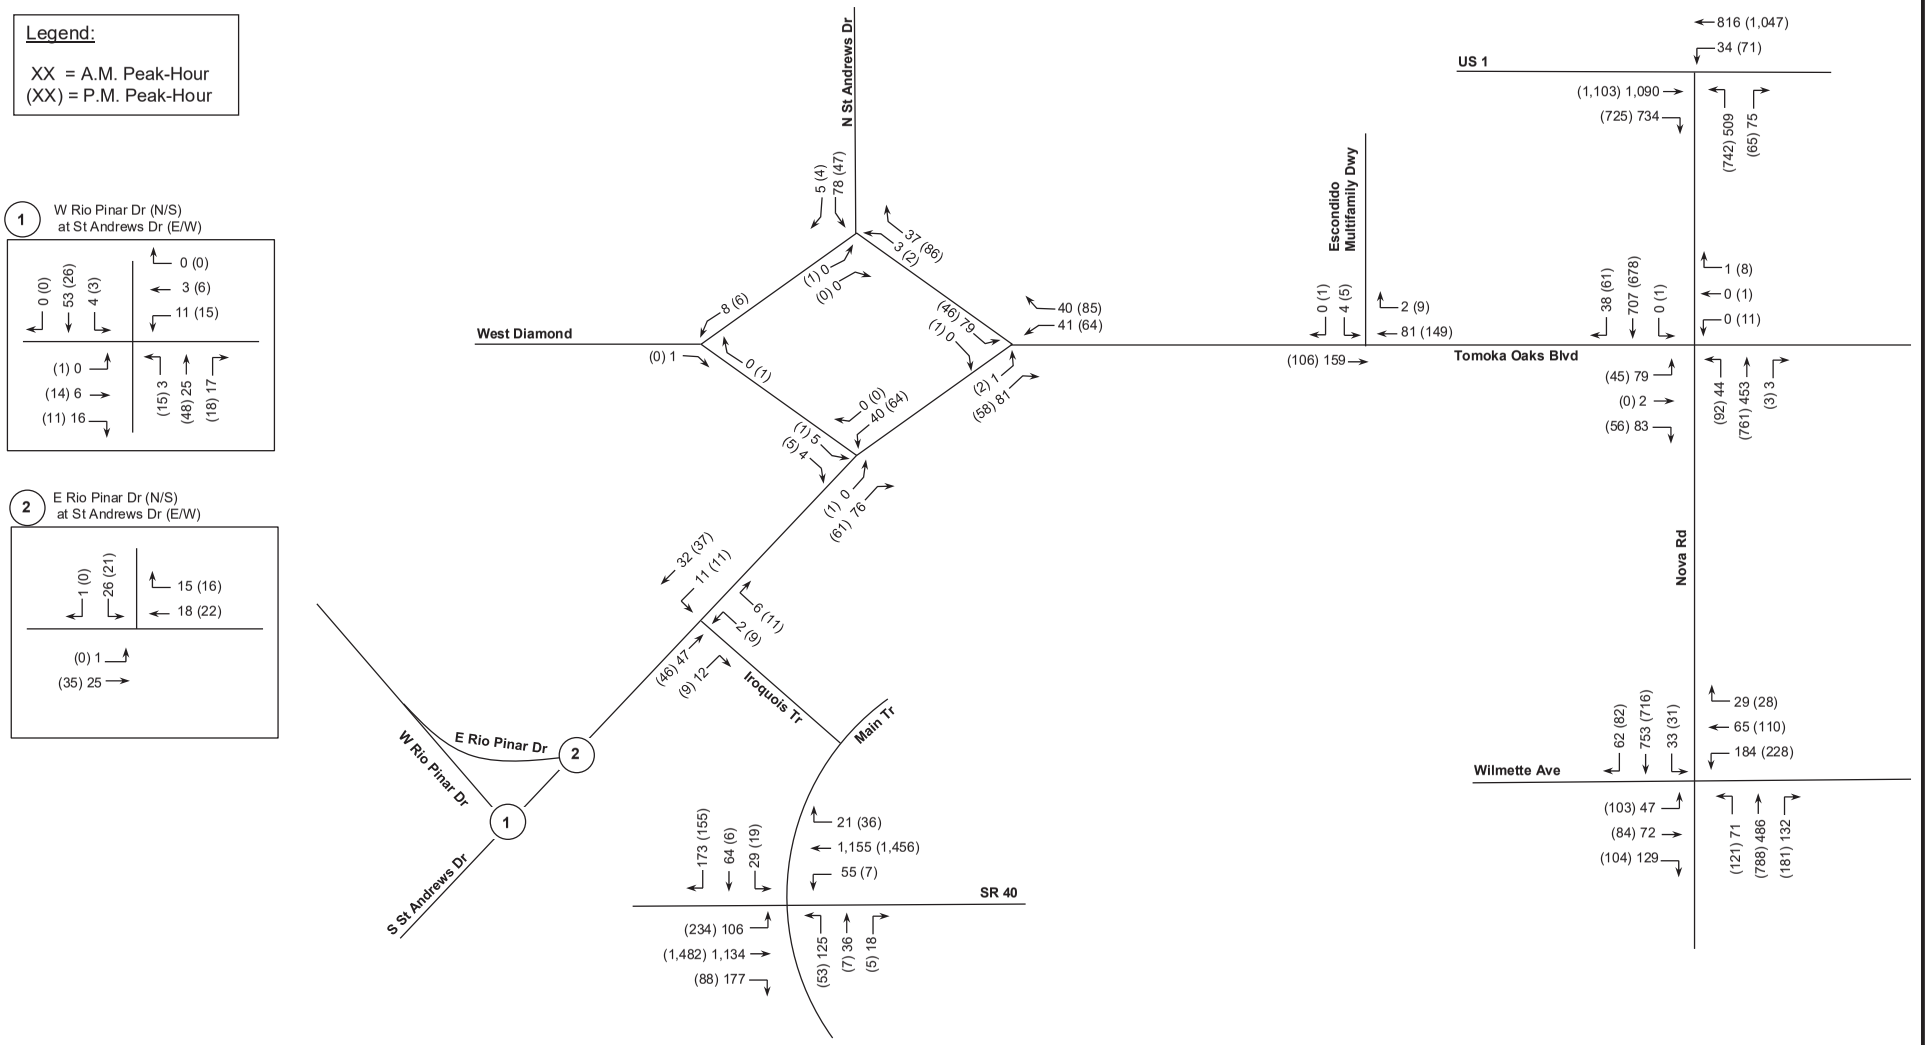
[1] Existing intersection is not currently under stop-control; no LOS reported in Synchro.

As indicated in Table 5, all unsignalized intersections are expected to operate within the adopted level of service under background conditions.



2028 Background – Signalized Intersection Analysis

The signalized intersections were analyzed to determine the operating conditions under 2028 background conditions and the results are presented in Table 6. The HCS summary sheets are included in Appendix G.

Table 6
2028 Background AM and PM Peak-Hour LOS - Signalized Intersections

2028 Background – Roadway Segment Analysis

The study area roadway segments were analyzed under 2028 background conditions to determine the anticipated two-way peak-hour LOS. The results are provided in **Table 7**. As indicated, all study area roadway segments currently operate within their adopted LOS during the PM peak-hour except for the segments of SR 40/Granada Boulevard from I-95 to Clyde Morris Boulevard, Clyde Morris Boulevard to Nova Road and US 1 to Halifax Avenue; Hand Avenue from Clyde Morris Boulevard to Shangri La Drive and Williamson Boulevard from Hand Avenue to Strickland Range Road. The following improvements are recommended to improve the LOS deficiency:

SR 40/Granada Boulevard from I-95 to Clyde Morris Boulevard:

- Widen from 4-lanes to 6-lanes.

SR 40/Granada Boulevard from Clyde Morris Boulevard to Nova Road:

- Widen from 4-lanes to 6-lanes.

SR 40/Granada Boulevard from US 1 to Halifax Avenue:

- Widen from 4-lanes to 6-lanes.

Hand Avenue from Clyde Morris Boulevard to Shangri La Drive:

- Widen from 2-lanes to 4-lanes.

Williamson Boulevard from Hand Avenue to Strickland Range Road:

- Widen from 2-lanes to 4-lanes.

The improved roadway segment analysis for the deficient segments is provided in **Table 8.**

Table 7
2028 Background PM Peak-Hour LOS - Roadway Segments
Tomoka Oaks Residential

Roadway	Segment		No. of Lanes	Adopted LOS	Peak-Hour Two-Way Capacity	Existing PM Peak-Hour Two-Way Volume	Growth Method Applied	Total Growth Applied (# of Trips)	2028 Total Background Volume	Background PM Volume Exceed Adopted LOS?

**Improved peak-hour two-way capacity determined using FDOT 2023 Generalized Service Tables and comparable capacity from Volusia County's AADT Spreadsheet; Improvements not fully funded for construction at this time.*

5

2028 BUILD-OUT ROADWAY ANALYSIS

The study area intersections and roadway segments were analyzed based on the roadway conditions at the time of project build-out to determine potential impacts of project-generated trips and identify mitigation requirements. The improvements recommended in background conditions have been included in the 2028 build-out analysis for those applicable intersections and roadway segments.

Project Trip Generation

The daily, a.m., and p.m. peak hour trip generation for the development presented in **Table 9** was determined using the Institute of Transportation Engineers (ITE) 11th Edition of the *Trip Generation Manual*.

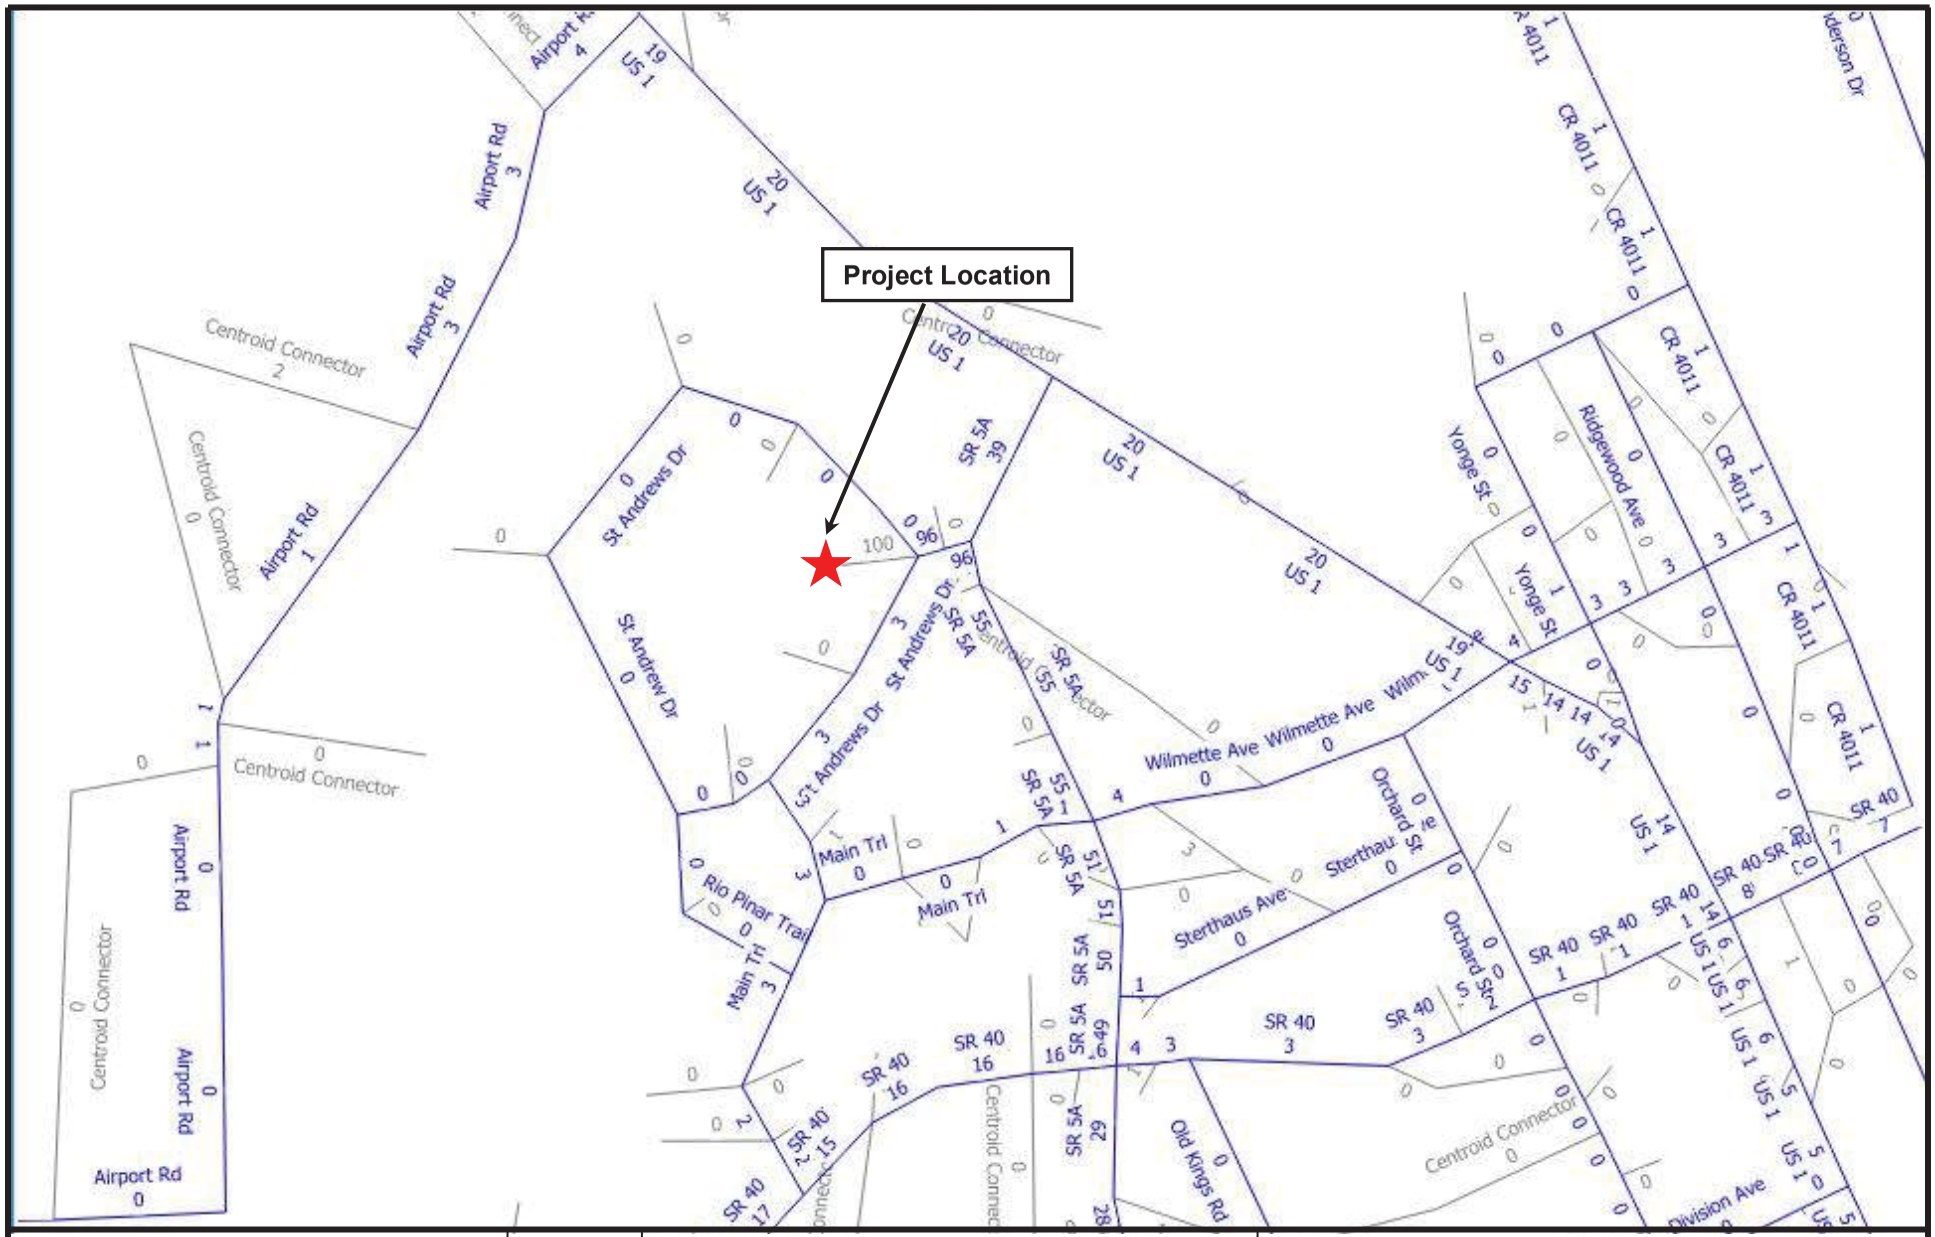

Table 9
Project Trip Generation
Tomoka Oaks Residential

Time Period	Land Use	ITE Code	Trip Rate Equation	Quantity (X)		Percent Entering	Percent Exiting	Trips Entering	Trips Exiting	Total Trips (T)
Daily	Single Family Residential	210	Ln(T) = 0.92 Ln(X) + 2.68	300	DU	50%	50%	1,387	1,387	2,774
AM Peak-Hour			Ln(T) = 0.91 Ln(X) + 0.12			26%	74%	53	149	202
PM Peak-Hour			Ln(T) = 0.94 Ln(X) + 0.27			63%	37%	176	103	279

Project Trip Distribution

The Central Florida Regional Planning Model, version 6.1 (CFRPM) was used to obtain the project trip distribution for the proposed development. A select zone analysis was completed and resulted in the project trip distribution shown in **Figure 4A**. **Figure 4B** provides a more detailed view of the model output in the vicinity of the site.

Using the trip distribution, the a.m. and p.m. peak hour project trips were assigned to the study area roadway network. **Figure 5** and **Figure 6** graphically depict the 2028 total background traffic, project trips, and resulting 2028 buildout traffic at the study area intersections.

2028 Build-Out – Unsignalized Intersection Analysis

The unsignalized intersections and the project driveway were analyzed to determine the operating conditions under 2028 build-out conditions, and the results are presented in **Table 10**. The HCS and Synchro summary sheets are included in Appendix H.

Table 10
2028 Build-Out AM and PM Peak-Hour LOS – Unsignalized Intersections
Tomoka Oaks Residential

Intersection	Adopted LOS	Analysis Method	AM Peak-Hour			PM Peak-Hour		
			Critical Approach	Delay (sec.)	LOS	Critical Approach	Delay (sec.)	LOS

St. Andrew's Dr. at Iroquois Tr.	D	HCS	NB	8.7	A	NB	9.0	A

As indicated, the unsignalized intersection of Nova Road at Tomoka Oaks Boulevard is not expected to operate within the adopted level-of-service under build-out conditions. It is common that unsignalized intersections operate at higher levels of service with extended delay on the minor street approaches during peak-hour when conflicted with high major street volumes. However, a Traffic Signal Warrant Study (TSWS) was conducted at the intersection to determine whether future signal control at the intersection is warranted. The result of the analysis indicates that Warrants 1B and 2 are met by future peak hour volumes under build-out conditions. The TSWS, dated June 2021 and previously reviewed by the FDOT, is included as Appendix I.

The analysis results of the intersection of Nova Road at Tomoka Oaks Boulevard under traffic signal control is provided in **Table 11**. The intersection modification also includes adding striping for an exclusive right-turn lane to the eastbound approach approximately 75 ft. in length in order to separate right-turns from the shared left-through movement. The Synchro summary sheets are included in Appendix J. As indicated, the intersection is anticipated to operate with an acceptable LOS and with v/c ratios less than 1.0 under build-out conditions with the installation of a traffic signal.

Table 11
2028 Build-Out AM and PM Peak Hour LOS – Intersection Improvement
Tomoka Oaks Residential

Intersection	Adopted LOS	AM Peak-Hour			PM Peak-Hour		
		Delay (sec.)	LOS	V/C greater than 1.0?	Delay (sec.)	LOS	V/C greater than 1.0?
Nova Rd. at Tomoka Oaks Blvd.	**D**	**12.4**	**B**	**No**	**16.7**	**B**	**No**

It should be noted that the intersection improvement results at Nova Road and Tomoka Oaks Boulevard does not include an exclusive southbound right-turn lane. Since the intersection is expected to operate at adopted levels of service during the a.m. and p.m. peak hours, no southbound right-turn lane is proposed at this time. Final lane geometry, alignment and signal timings for the signal shall be discussed with the FDOT during the permit application process before final design of the signal.

Site Access Analysis

Access to the development will be provided at the western leg of the Tomoka Oaks Boulevard/St. Andrews Drive intersection with primary external access at the existing Tomoka Oaks Boulevard at Nova Road. No additional turn-lanes are warranted or recommended at this location. However, adding stop control for the westbound approach will be required.

As requested by City Staff, additional analysis of the proposed site access driveway, as it relates to the existing diamond-intersection configuration, was performed. The analysis includes evaluation and comparison of two alternative intersection scenarios to determine whether improved vehicular circulation and safety could be achieved. The alternative scenarios include converting the configuration to an ALL-WAY STOP or modifying to a traditional single-land roundabout. Each alternative, including the existing scenario, were evaluated for average peak hour vehicular delay, 95th percentile queue length, the average number of stops, and number of minor and major conflict points. The results are summarized in **Table 12**. The Synchro analysis outputs are attached as Appendix K.

Table 12
Alternative Scenario Comparison – Diamond Intersection
Tomoka Oaks Residential

Build-Out Alternatives	Evaluation Criteria									
	Peak Time Period	Average Total Delay (sec.)	LOS	Max 95th Percentile Queue*			No. of Conflict Points*			Average No. of Stops*
				Approach	Veh/Lane	Length (ft.)	Major	Minor	Total	
Existing Diamond	AM	9.8	A	-	1	25	6	12	18	2
	PM	10.1	B	-	1	25				
All-Way Stop Control	AM	8.4	A	EB	1	25	16	16	32	1
	PM	9.5	A	WB	2	50				
Roundabout	AM	4.1	A	EB	1	25	0	8	8	0
	PM	4.4	A	WB	1	25				

**95th Percentile Queue reported for existing diamond configuration anticipated at each internal intersection.*

**Based on common vehicle travel paths; Major conflict points include crossing maneuvers, and minor conflicts include merge/diverge maneuvers.*

**Roundabout is designed under yield condition for all approaches.*

Comparing each alternative, we can conclude that the roundabout design slightly improves the peak hour delay and results in a lower number of conflict points than the existing and ALL-WAY STOP configurations. Reducing the number of conflict points at the intersection improves the overall safety for roadway users. Not only does the roundabout decrease the number of conflict points, but the ones that remain are classified as minor and typically aren't as server as major/crossing maneuvers. Crash data reports were requested from the Ormond Beach Police Department and through Signal 4 Analytics from year 2017 through year 2021. As a result, no crashes have been reported at the internal diamond configuration.

It should be noted that the existing configuration is expected to operate within the adopted LOS during the a.m. and p.m. peak hours. Therefore, from a mitigation standpoint, no improvements or modifications are required at intersections that are not deficient. At this time, the existing configuration is proposed to remain under future buildout conditions.

Local Road Impact Analysis

At the request of City Staff, the anticipated impact of project trips to local roads and neighborhoods (particularly the existing Tomoka Oaks and Trails Development) was examined. Due to the ease and pace of alternative travel paths, project trips utilizing South Saint Andrews Drive to Iroquois Trail and ultimately to SR 40/Granada Boulevard is expected to be minimal, approximately 4% of project traffic, which equates to 111 daily trips, 8 total a.m. peak hour trips and 11 total p.m. peak hour trips. No project traffic is expected to travel to W. Rio Pinar Trail, as no complementary uses are present. The results of the build-out intersection analyses indicate no degradation of levels of service at these intersections due to the addition of project trips.

Additionally, vehicular queues and potential blocking of the existing Escondido driveway were evaluated. In summary, the 95th percentile vehicular queue at the Nova Rd./Tomoka Oaks Blvd. intersection, under future signalized conditions, results in approximately 125 ft. in the a.m. and p.m. peak hours. The location of the Escondido

driveway is approximately 160 ft. from Nova Rd. (measured from eastbound stop bar to driveway centerline). Therefore, under the future buildout scenario, with signal control, indicated that the existing driveway will not be blocked during the a.m. and p.m. peak hours.

2028 Build-Out – Signalized Intersections Analysis

The signalized intersections were analyzed to determine the operational LOS under build-out conditions. The results are presented in **Table 13**. The HCS summary sheets are contained in Appendix H.

Table 13
2028 Build-Out AM and PM Peak-Hour LOS - Signalized Intersections
Tomoka Oaks Residential

Intersection	Adopted LOS	AM Peak-Hour			PM Peak-Hour		
		Delay (sec.)	LOS	V/C greater than 1.0?	Delay (sec.)	LOS	V/C greater than 1.0?
Nova Rd. at US 1	D	16.8	B	No	20.8	C	No
Nova Rd. at Wilmette Ave.	D	28.2	C	No	34.9	C	No
SR 40 at Main Trail	D	26.4	C	No	24.3	C	No

As indicated in Table 13, all signalized intersections are anticipated to operate with an acceptable LOS and with v/c ratios less than 1.0 under build-out conditions.

2028 Build-Out Roadway Segment Analysis

The study area roadway segments were analyzed under build-out conditions, including the improvements identified during 2028 background conditions, to determine the anticipated LOS and the results are presented in Table 14. As indicated, all study area roadway segments are expected to operate within the adopted LOS.

Queue Length and Turn Lane Analysis

A queue length analysis was conducted to determine recommended storage lengths for existing turn lanes at external study area intersections that are impacted by project traffic. The HCS results were used to obtain the 95th percentile queue lengths expected for each exclusive turn lane during the AM and PM peak-hours. Turn lane requirements were evaluated using the Volusia County LDC Section 72-619, Table VI and FDOT Design Manual Exhibit 212-1. The resulting recommended turn lane lengths for the intersections are provided in Table 15. The results are listed below:

Nova Road at US 1
- Northbound left-turn lane by 25-feet.

Nova Road at Tomoka Oaks Boulevard
- Northbound left-turn lane by 50-feet.

Nova Road at Wilmette Avenue
- Southbound left-turn lane by 15-feet.

Additionally, a circulation and queue analysis at the internal diamond intersections/St. Andrews Drive, the Escondido Multifamily Driveway access, and Nova Road along Tomoka Oaks Boulevard was conducted using SIM Traffic/Synchro Simulation Software under future AM and PM peak hour conditions. The analysis was conducted under existing roadway geometry and proposed future geometry (signal at Tomoka Oaks Blvd./Nova Rd.) to determine whether additional mitigation is recommended in order to improve safety and vehicle circulation. As a result, the vehicle queue is improved with the addition of the signal at Nova Road. The resulting 95th percentile queue length equates to 125 feet in the AM peak hour and 125 feet in the PM peak hour for the eastbound approach. The Escondido Multifamily Driveway is located approximately 160 feet west of Nova Road (measured from the eastbound stop bar to the driveway centerline), indicating that the driveway is not expected to be blocked under future improved buildout conditions.

[2]Evaluted as one shared lane during existing and background conditions; exclusive EBR and shared EBTL assumed to accommodate stacking for 2-vehicles per lane (combined queue reported).

Alternate Mode Analysis

An alternative mode analysis has been conducted to determine existing and proposed alternate modes of transportation within the immediate project study area. At this time, there is an existing sidewalk along the east and west sides of Nova Road. The project design also includes the extension of the sidewalk network out to Nova Road.

Votran, Volusia County's public transportation system, provides transportation alternatives to all urban areas of the county via fixed route buses and paratransit vehicles. The frequency of most routes is one hour, with a few operating on the half-hour. Standard daily service is provided from 6:00 a.m. to 7:00 p.m., Monday through Saturday, with a limited fixed route service at night and on Sunday. At this time, the closest Votran bus stop is 0.60 miles south of the proposed development driveway on Nova Road at Wilmette Avenue.

Proportionate Share (PS)

Based on the current Florida Statue and procedures outlined in the R2CTPO TIA guidelines, the proportionate share shall be calculated based upon the number of trips from the proposed development being approved. The project traffic is then divided by the change in roadway capacity resulting from the recommended improvements to result in a PS percentage. The total estimated construction cost for the improvement is multiplied by the PS percentage to determine the applicant's PS contribution.

The PS formula is to be applied only to those facilities that are determined to be significantly impacted by the project traffic under review. The recommended improvements eligible for PS determination, the estimated improvements costs and PS calculation are to be negotiated once the TIA has been approved.

6

CONCLUSION AND RECOMMENDATIONS

A Traffic Impact Analysis (TIA) was conducted to evaluate the potential transportation impact of the proposed Tomoka Oaks Residential development. Access to the development will be provided by the western leg at the Tomoka Oaks Boulevard and St. Andrews Drive intersection with primary external access at the existing Tomoka Oaks Boulevard at Nova Road intersection. The development is expected to generate 202 AM peak-hour and 279 PM peak-hour trips. The results of the analysis are summarized in Tables 16 and 17, below.

Table 16
Recommended Improvements - Roadway Segments
Tomoka Oaks Residential

Roadway	Segment		When Improvement Recommended		
	To	From	2023 Existing	2028 Background	2028 Build-Out

Hand Ave.	Clyde Morris Blvd.	Shangri La Dr.	-	4L	-
Williamson Blvd.	Hand Ave.	Strickland Range Rd.	-	4L	-

Table 17
Recommended Improvements - Intersection
Tomoka Oaks Residential

Intersection	When Improvement Recommended		
	2023 Existing	2028 Background	2028 Build-Out
Nova Rd. at Tomoka Oaks Blvd.	-	-	Install traffic signal; Add striping for eastbound approach for exclusive right-turn lane

Additionally, the following existing turn lanes are shown to be deficient under 2028 build-out conditions. Based on turn lane standards adopted by Volusia County and the FDOT, the deficient length due to project trips are present at the following intersections:

Nova Road at US 1
- Northbound left-turn lane by 25-feet.

Nova Road at Tomoka Oaks Boulevard
- Northbound left-turn lane by 50-feet.

Nova Road at Wilmette Avenue
- Southbound left-turn lane by 15-feet.

The 95th percentile queue for the eastbound approach at the Tomoka Oaks Boulevard and Nova Road intersection, under signal control and using 2028 build-out peak hour volumes, is anticipated to extend 125 ft. in the AM and PM peak hours. The existing Escondido Multifamily Driveway is located approximately 160 ft. west of Nova Road (measured from the eastbound stop bar to the driveway centerline), indicating that the driveway is not expected to be blocked under future improved buildout conditions during the peak hour.

If required by the reviewing agencies, the recommended improvements eligible for proportionate share (PS), the estimated improvement cost, and PS calculations are to be negotiated once the TIA results are accepted by the City of Ormond Beach.

Approved Methodology

LTG Engineering & Planning

Via Email: (Steven.Spraker@ormondbeach.org)

Ref: 5361.02

May 16, 2022

Mr. Steven S. Spraker, AICP
Ormond Beach Planning Director
22 South Beach Street
Ormond Beach, FL 32174

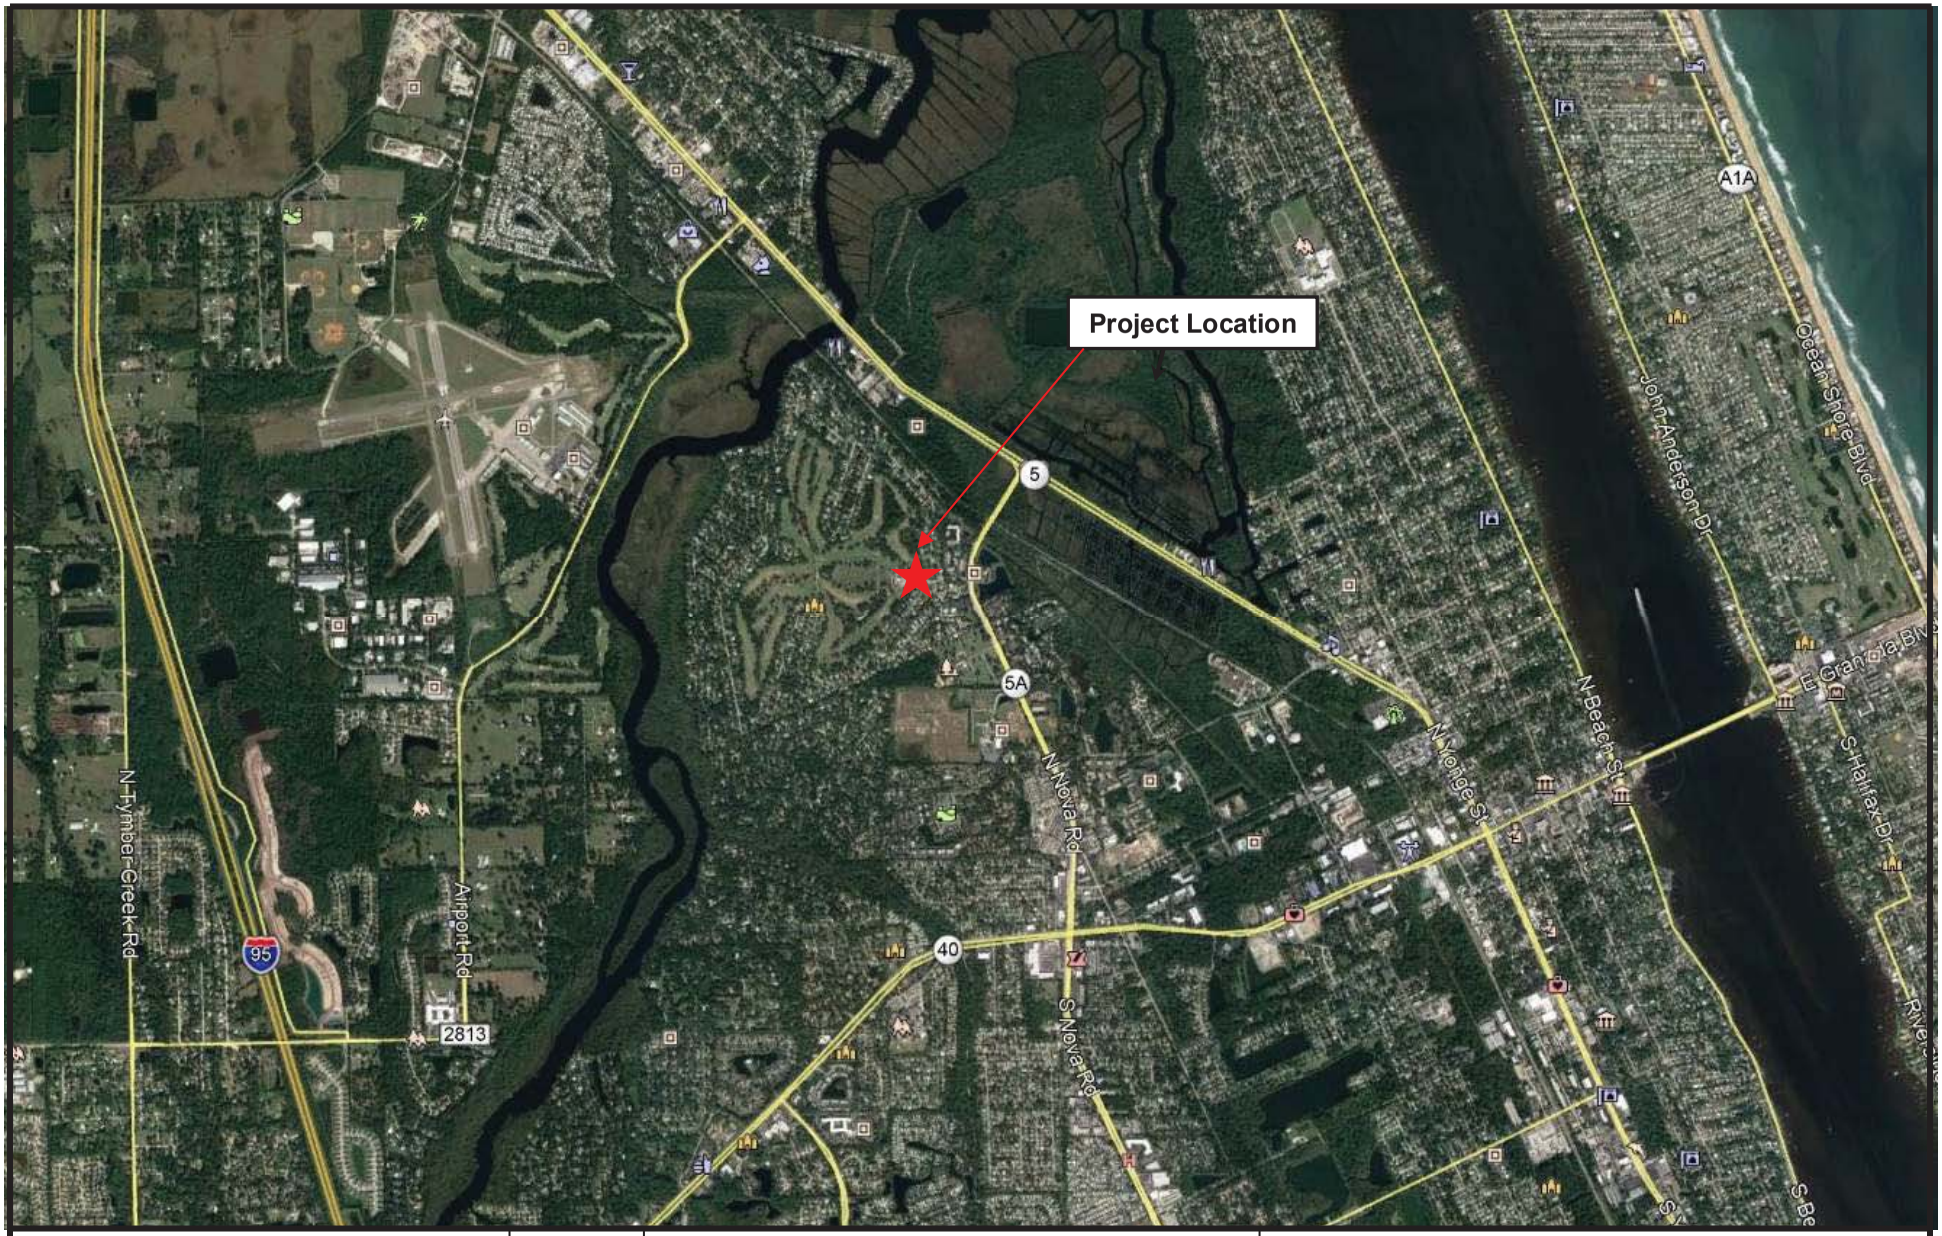
Re: Tomoka Oaks - Traffic Impact Analysis (TIA) Methodology Letter
Ormond Beach, Florida

Dear Mr. Spraker:

LTG, Inc. (LTG) has been retained by Triumph Oaks of Ormond Beach I, LLC to prepare a Traffic Impact Analysis (TIA) for the proposed Tomoka Oaks development, located west of the Nova Road/Tomoka Oaks Boulevard intersection in the City of Ormond Beach, Florida. Figure 1 shows the location of the project relative to the surrounding road network. The development consists of 300 single family dwelling units. Build-out of the project is anticipated by year 2026. Access to the site is proposed via the existing intersection of SR 5A (Nova Road) and Tomoka Oaks Boulevard. A preliminary site plan is attached as Exhibit A.

The City of Ormond Beach has adopted the River to Sea Transportation Planning Organization (R2CTPO). In accordance with these guidelines, this letter outlines the proposed methodology by which the analysis will be conducted. The analysis will be based on the latest concurrency information as obtained from the City of Ormond Beach and Volusia County Traffic Engineering Department.

Analysis Period



Roadway segments will be analyzed based on p.m. peak-hour two-way traffic and intersections will be analyzed for the a.m. and p.m. peak-hours. The analysis will be conducted under 2022 existing conditions and 2026 future build-out conditions. The a.m. and p.m. peak-hour turning movement counts will be collected on a typical weekday (Tuesday, Wednesday, or Thursday) between the hours of 7:00 a.m.-9:00 a.m. and 4:00 p.m.-6:00 p.m. The existing traffic counts will be adjusted by the 2019 FDOT Seasonal Factor (SF) specified for the week the data is collected.

Project Trip Generation

The daily, a.m., and p.m. peak-hour trip generation for the development was determined using the Institute of Transportation Engineers (ITE), 11^{h} edition of the *Trip Generation Manual*. The resulting project trip generation is summarized in Table 1.

Table 1
Project Trip Generation
Tomoka Oaks

Period	Land Use	Land Use Code	Trip Rate Equation	Size	Units	Percent Entering	Percent Exiting	Trips Entering	Trips Exiting	Total Trips
Daily	Single Family	210	Ln(T) = 0.92 Ln(X) + 2.68	300	DU	50%	50%	1,387	1,387	2,774
A.M. Peak-Hour	Single Family	210	Ln(T) = 0.91 Ln(X) + 0.12	300	DU	26%	74%	53	149	202
P.M. Peak-Hour	Single Family	210	Ln(T) = 0.94 Ln(X) + 0.27	300	DU	63%	37%	176	103	279

Tomoka Oaks	N NTS	**Project Location Map**	LTG Engineering & Planning
		Project No.: 5361.02 / Figure: 1	1450 W. Granada Blvd., Suite 2, Ormond Beach, Florida 32174 Telephone: 386.257.2571 Fax: 386.257.6996

Project Trip Distribution

The Central Florida Regional Planning Model, version 6.1 (CFRPM) was used to obtain the project trip distribution for the proposed development. A select zone analysis was completed and resulted in the project trip distribution shown in Figure 2.

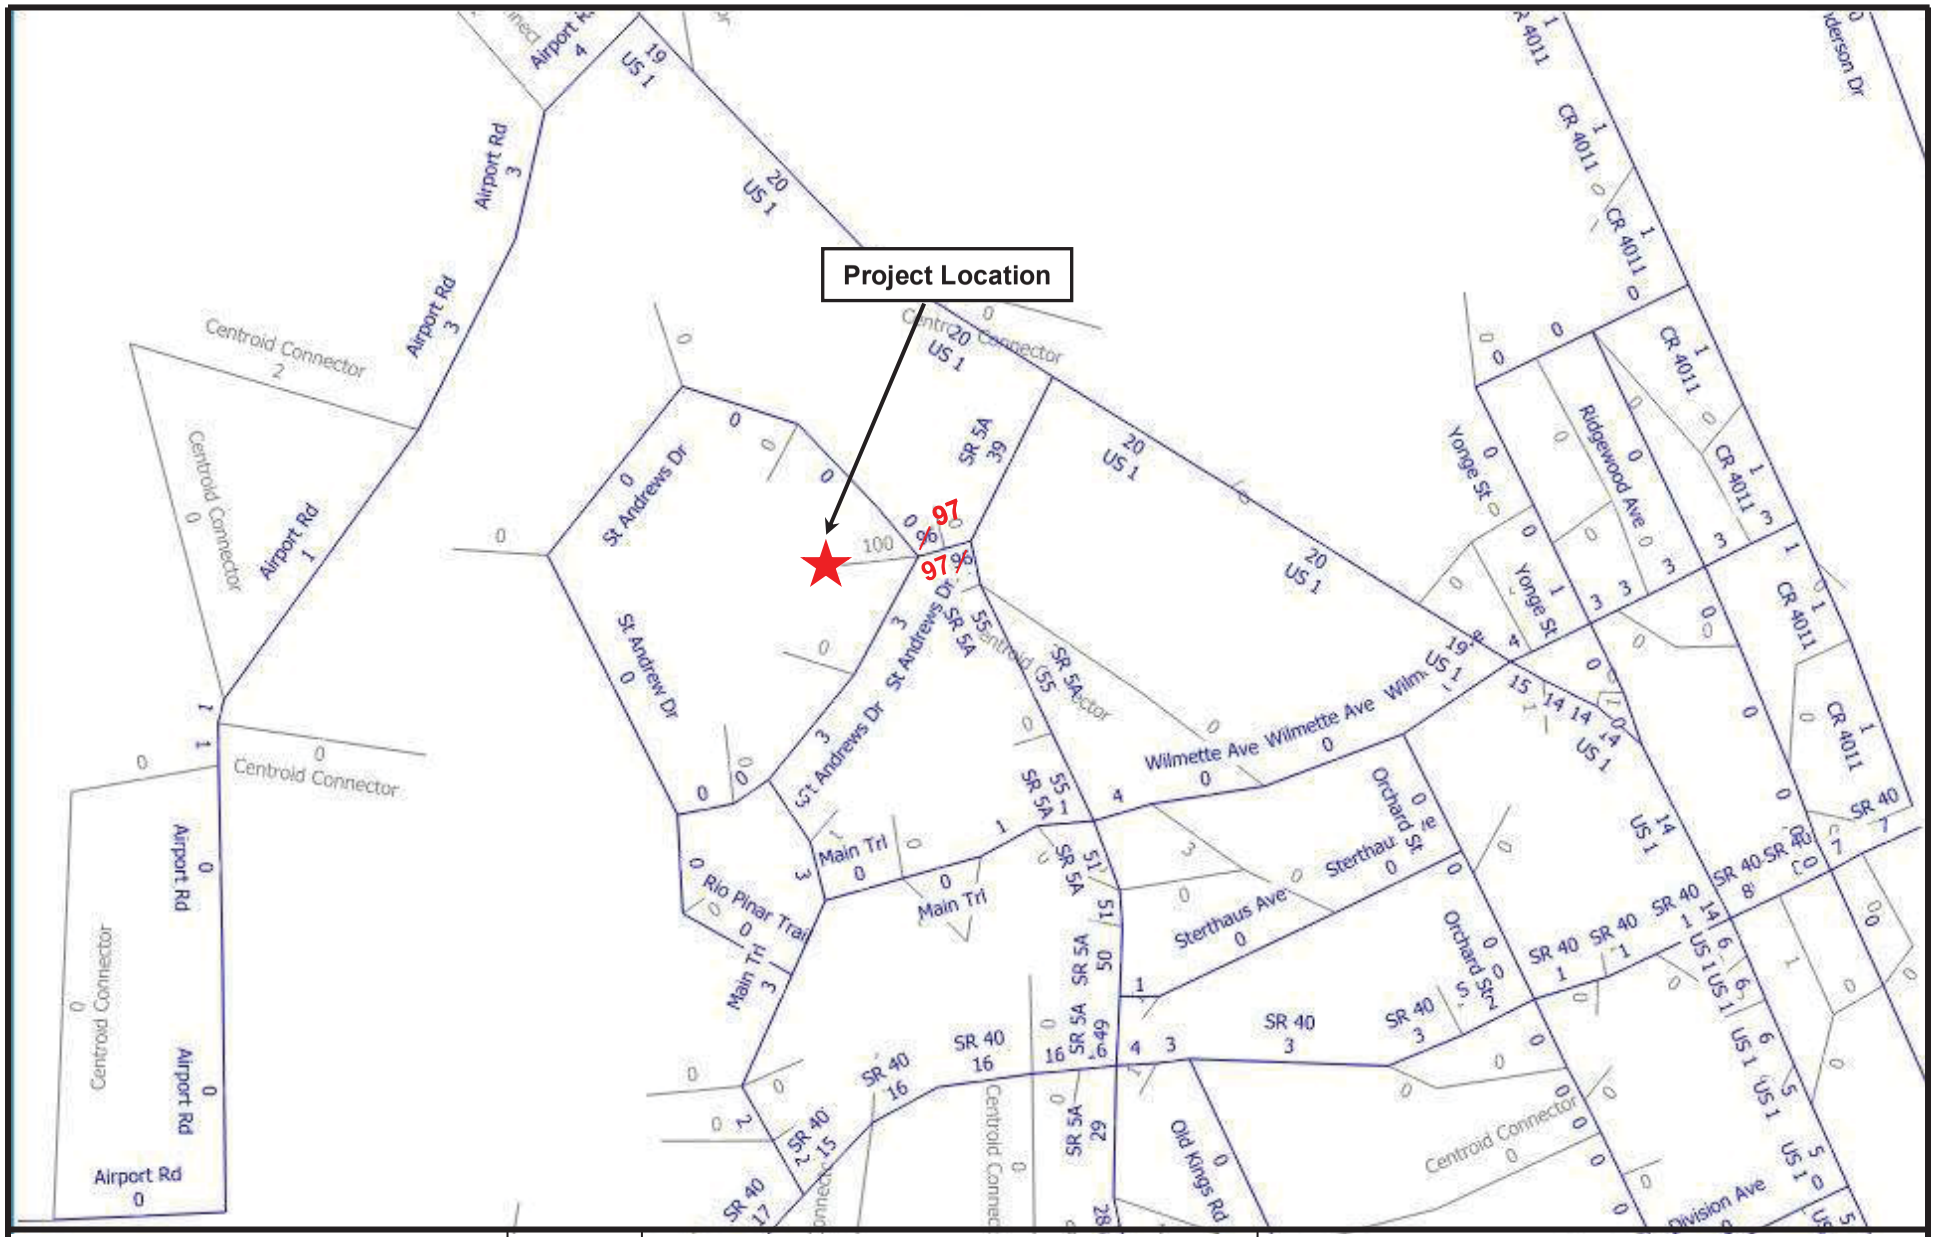
Study Area

Per the R2CTPO guidelines, projects must include all roadway segments to which the site has direct connections, which are impacted by the proposed project to within three percent or greater of the peak-hour two-way adopted level of service (LOS) capacity, major intersections along the significant segments, and roadway segments that have been designated as "critical" or "near critical" within the site traffic influenced segments.

Critical and near critical roadways are defined by Volusia County as roadways with a volume to capacity (v/c) ratio that is equal to or greater than 1.0 and 0.90, respectively. Figure 3 depicts the critical and near critical roadway segments within the area.

Using the project trip distribution, p.m. peak-hour project trips were assigned to the roadway network to determine the roadway segments that are impacted by the proposed project to within three percent or greater of the peak-hour two-way adopted level of service (LOS) capacity. Table 2 presents the significance test on area roadways for the proposed development. The following intersections and roadway segments will be included in the study:

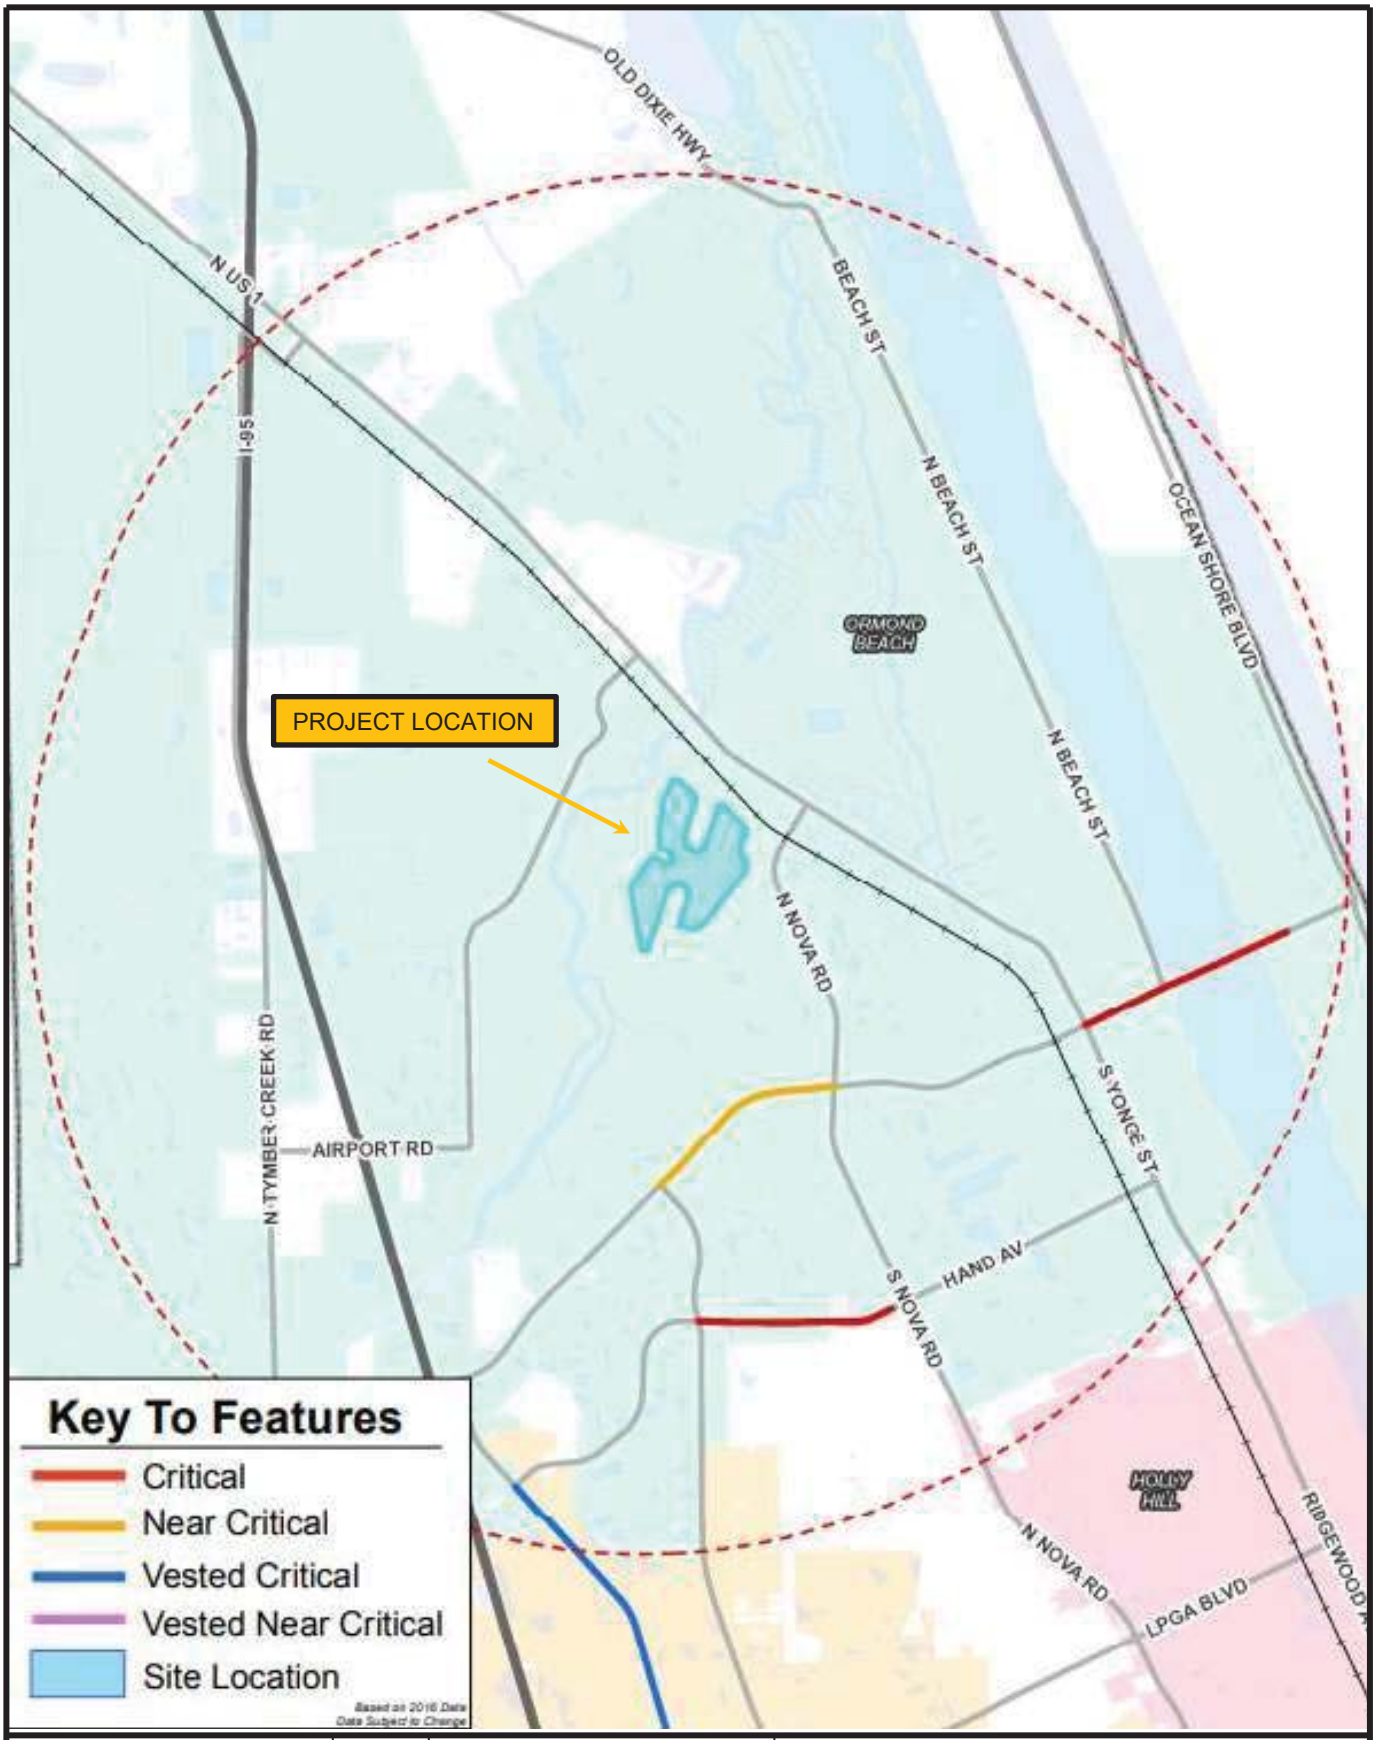
Roadway Segments:



- Nova Road from Wilmette Avenue to US 1 (Significant)
- SR 40/Granada Boulevard from Clyde Morris Boulevard to Nova Road (near critical)
- SR 40/Granada Boulevard from US 1 to Halifax Drive (critical)
- Hand Avenue from Clyde Morris Boulevard to Nova Road (critical)
- Williamson Boulevard from Hand Avenue to Strickland Range Road (vested critical)

Intersections:

- Signalized
  - SR 40 at Main Trail
  - Wilmette Ave at Nova Rd
  - US 1 at Nova Rd
- Unsignalized
  - St. Andrew's Drive at Rio Pinar Trail
  - St. Andrew's Drive at Iroquois Trial
  - Tomoka Oaks Blvd at Nova Rd
  - Tomoka Oaks Blvd at N. St. Andrews Blvd
  - Tomoka Oaks Blvd at S. St. Andrews Blvd
  - Tomoka Oaks Blvd at West Diamond
  - Tomoka Oaks Blvd at East Diamond



Build-Out Traffic

The build-out traffic will be developed by the sum of the background traffic (derived from historical growth rates and vested trips as identified by Volusia County) and the estimated project traffic. The growth rate for each study area roadway segment was determined using the method developed by Volusia County in August of 2020 (see Exhibit B), the vested trips as identified by the County's latest vested trips table, received June 2021, and the latest Volusia County AADT spreadsheet. The FDOT *Traffic Trends* summary sheets are attached as Exhibit B. Tables 3 summarize the historical annual growth, vested trips, and the applied growth method used in the analysis for the study area roadway segments and the additional segments needed for the intersection analyses.

Segment Analysis – Existing and Build-Out Conditions

If the future projected volume is expected to exceed the maximum service volume of a roadway segment, a transportation analysis may be conducted to determine service volume specific to that segment. The procedures documented in the latest version of the FDOT *Quality/Level of Service Handbook* will be used to determine specific capacity, if necessary.

Intersection Analysis – A.M. & P.M. Weekday Peak-Hour

The operating conditions for both the existing and future conditions at the signalized and unsignalized intersections will be analyzed using the *Highway Capacity Software 2022* (HCS). These software programs utilize the procedures outlined in Chapters 19 and 20 of the HCM 6th Edition *Highway Capacity Manual*, titled "Signalized Intersections" and "Two-Way Stop Control Intersections," respectively.

Alternative Mode Analysis

An alternate mode analysis will be conducted to analyze any transit stops within ¼ mile of the site, provisions for sidewalks adjacent to public roads within the limits of the site, sidewalk connectivity between parcels, provisions for any bicycle amenities, such as bike racks or lockers, and identification to any schools within 2-mile of the site.

Improvements

All improvements funded for construction within the first three years of the Volusia County and FDOT five-year work programs will be considered in the analysis. If warranted, appropriate roadway and intersection improvements will be identified. Conditions will be analyzed for improvements that are required for mitigation. Proportionate share calculations will be based on construction costs approved by Volusia County Engineering and Construction Division. Site access needs in terms of turn lane storage and deceleration shall be identified.

It is understood that this methodology will remain valid for a period of six (6) months from the date of approval. This methodology letter is a second submittal that has been updated in response to comments received from the City of Ormond Beach. Attached to those City comments was correspondence from other parties not affiliated with the City of Ormond Beach Planning Department regarding the proposed development. At the request of City Staff, that correspondence is included as Exhibit C.

Please review and advise if the City is in agreement with this proposed methodology or provide comments relating to preferred revisions. If you have any questions, please contact me at 386.257.2571.

Sincerely,
LTG, Inc.

Crystal Mercedes, PTP, RSP

Subject: Re: Former Tomoka Oaks Golf Course Redevelopment, distribution list (03.02.2022)

[External Email-Use Caution] - OB/IT Helpdesk

Mr. Spraker, hello.

Thank you for your 3/2/22 email sharing a link to the 3/1/22 Traffic Impact Analysis (TIA) Methodology Letter the City has received for the Former Tomoka Oaks Golf Course Redevelopment project.

I have reviewed the correspondence from LTG Engineering & Planning and have the following comments and issues regarding the proposed methodology.

1) The "Study Area" section includes language which says, in part, the study: "must include all roadway segments to which the site has direct connections, which are impacted by the the proposed project to within three percent or greater of the peak-hour two-way adopted level of service (LOS) capacity" ...

During the City's 2018 OB Life session regarding Transportation the City's graphic displayed Main Trail as a "Connector" roadway.

There is nothing in the proposed methodology for the project that addresses its resulting effect of increasing spillover traffic from current Tomoka Oaks residents onto Rio Pinar Trail, Iroquois Trail and Main Trail.

2) The sub-section regarding "Intersections" indicates that Tomoka Oaks Blvd at Nova Rd is "signalized". That currently is incorrect.

3) In "Exhibit B" the Traffic Trend analysis for all roadway segments in the current scope is projected from 2019 Observed Count data. The 2019 data would not seem representative of current roadway usage due to the residential and commercial development the City has experience.

Thank you for your attention to the issues I have at first reading.

Rob Bridger

Good morning,

City staff are in receipt of the Traffic Impact Analysis (TIA) Methodology Letter for this project and have uploaded the document to the city's website: https://www.ormondbeach.org/1013/Former-Tomoka-Oaks-Golf-Course-Property. The Traffic Impact Analysis (TIA) Methodology Letter is a required step to conduct a Traffic Impact Analysis which is required for this project. The project **has not submitted** a site plan to the Site Plan Review Committee or Planned Development amendment application to date. As information is submitted in the future it will be uploaded the city website.

Thank you

Steven

MEMORANDUM

TO:	Tomoka Oaks Golf Course Committee
CC:	J. Buckholz, Traffic consultant
FROM:	Thomas Harowski, AICP
SUBJECT:	Golf Course Redevelopment Traffic Study
DATE:	March 2, 2022

Let me begin by stating I am not a traffic engineer nor a traffic planning specialist, but I have reviewed a lot of traffic studies over the years. I read the submittal for the Tomoka Oaks project, and I have a few comments and questions. I am copying our traffic consultant so he can consider my comments in his review to the extent that they are warranted.

- Is the build-out time reasonable? They are projecting a 2026 build-out. If we assume the zoning decisions are complete by the end of calendar 2022, they will then need some time to complete the subdivision design and construct the subdivision improvements. If we assume they can complete this process by the end of 2023, that leaves 36 months to build out 300 units which calls for them to complete about 8 houses per month for three years? If we think this is reasonable then we can run with their number. If it takes longer then there is more background traffic to consider.

- Are the assumptions made for trip projections (Table 1) correct? This is really Mr. Buckholz's purview.

- The list of roadway segments selected for analysis does not include Nova Road from Wilmette to SR 40. This seems odd as their trip distribution shows 51% of the project traffic using this segment.

- The intersection analysis assumes a signal at Tomoka Oaks Boulevard and Nova Road where there is no signal currently. It seems to me the analysis should treat the intersection as unsignalized as it currently exists and recommend a signal if the development requires it. It looks to me that they are basing this intersection review on the previous finding that a signal is warranted, and they want to get out of paying for any of it.

- I did not see any mention of taking traffic counts on North and South Saint Andrews. How are they going to assess the intersection impacts at Tomoka Oaks Boulevard if there is no information on existing traffic volumes? There are no base traffic counts within the neighborhood as we have for the state and county road network.

- For build-out traffic, does Ormond Beach have any vested trips that are not included in the County vested trip totals? If so, should these be included as well?

- The trip distribution model assigns 100% of the South Saint Andrews trips to Iroquois and none to Rio Pinar. Does this make a difference since both roads connect to Main Trail than then finally to West Granada?

- The trip distribution tree does not add up in all areas. The 97% of trips going to Nova Road splits 39% left and 55% right. What happened to the other 3%? Then at US 1 and Nova Road we have 20% left and 20% right but only 39% of the trips arriving. Seems like they need to clean this up.

- For Mr. Buckholz's benefit at Nova and Wilmette we have a major city park (NW corner) and our local shopping center (SW corner) as traffic attractors.

- The table on the significance test includes a segment of Airport Road from Dunn Avenue to US92/ISB. This is nowhere near the project. They might mean Sunshine Boulevard to US1. Another piece of sloppy work.

- On Table 3 why do we use the greater of the vested trips versus the growth trips instead of using both? It seems unlikely to me that vested trips include all the trips expected from background growth. Why not use both or some combination of the two? (Another Buckholz question.)

- Should we be asking them to look at traffic accidents as a safety concern? I am not aware of many accidents within the neighborhood, but there have been some at the Nova Road intersection. I presume this data is available form Ormond PD.

I have maintained from the outset of our review that the critical traffic issues, assuming the project gets built, are the provision of a traffic signal at Tomoka Oaks Boulevard and Nova Road and the construction of operational improvements to Tomoka Oaks Boulevard. This latter item is a local operational concern and not really a system wide impact. They are looking at the intersections of Tomoka Oaks Boulevard with North and South Saint Andrews, but I am concerned that the wording in the study is not strong enough to demand answers to the operational concerns on Tomoka Oaks Boulevard. I assume the intersection they intend to study referenced as east and west diamond are the ends of the current island. I don't see how we maintain that island as currently configured and get any kind of reasonable and safe traffic flow. I think this whole discussion needs to be stronger. The whole segment works now with the existing traffic (including the intersection at Nova Road) so it seems to me that 100% of any operational improvements needs to be paid by the project.

*NE Volusia DRI projects – Halifax Plantation, Plantation Bay, & Plantation Oaks used a Plantation Bay Biennial Traffic Monitoring Report, Aug 2021, Daily trip rate of 4.31. VCTE staff converted to 0.61 trips in the PM Peak hour.

**Hours segment data is not available. Source is derived from TIA that shows "+total trips" in LOS column. Only to be used when other previous data is unknown.

***TCR count was not taken in 2019. Used Clear Property TIA 2019 to get cont.

****Added by LT Ghazal on Harvest approval. TIA in the study area.

PROFESSIONAL ENGINEERING CERTIFICATION

I hereby certify that I am a Professional Engineer properly registered in the State of Florida practicing with LTG, Inc., a corporation authorized to operate as an engineering business, by the State of Florida Department of Professional Regulation, Board of Professional Engineers, and that I have prepared or approved the evaluations, findings, opinions, conclusions, or technical advice attached hereto for:

PROJECT: Nova Road at Tomoka Oaks Boulevard – Preliminary Traffic Signal Warrant Study
LOCATION: City of Ormond Beach, Florida
CLIENT: Triumph Oaks of Ormond Beach, LLC
JOB #: 5361.04

I hereby acknowledge that the procedures and references used to develop the results contained in these computations are standard to the professional practice of Transportation Engineering as applied through professional judgment and experience.

Prepared by:
LTG, Inc.

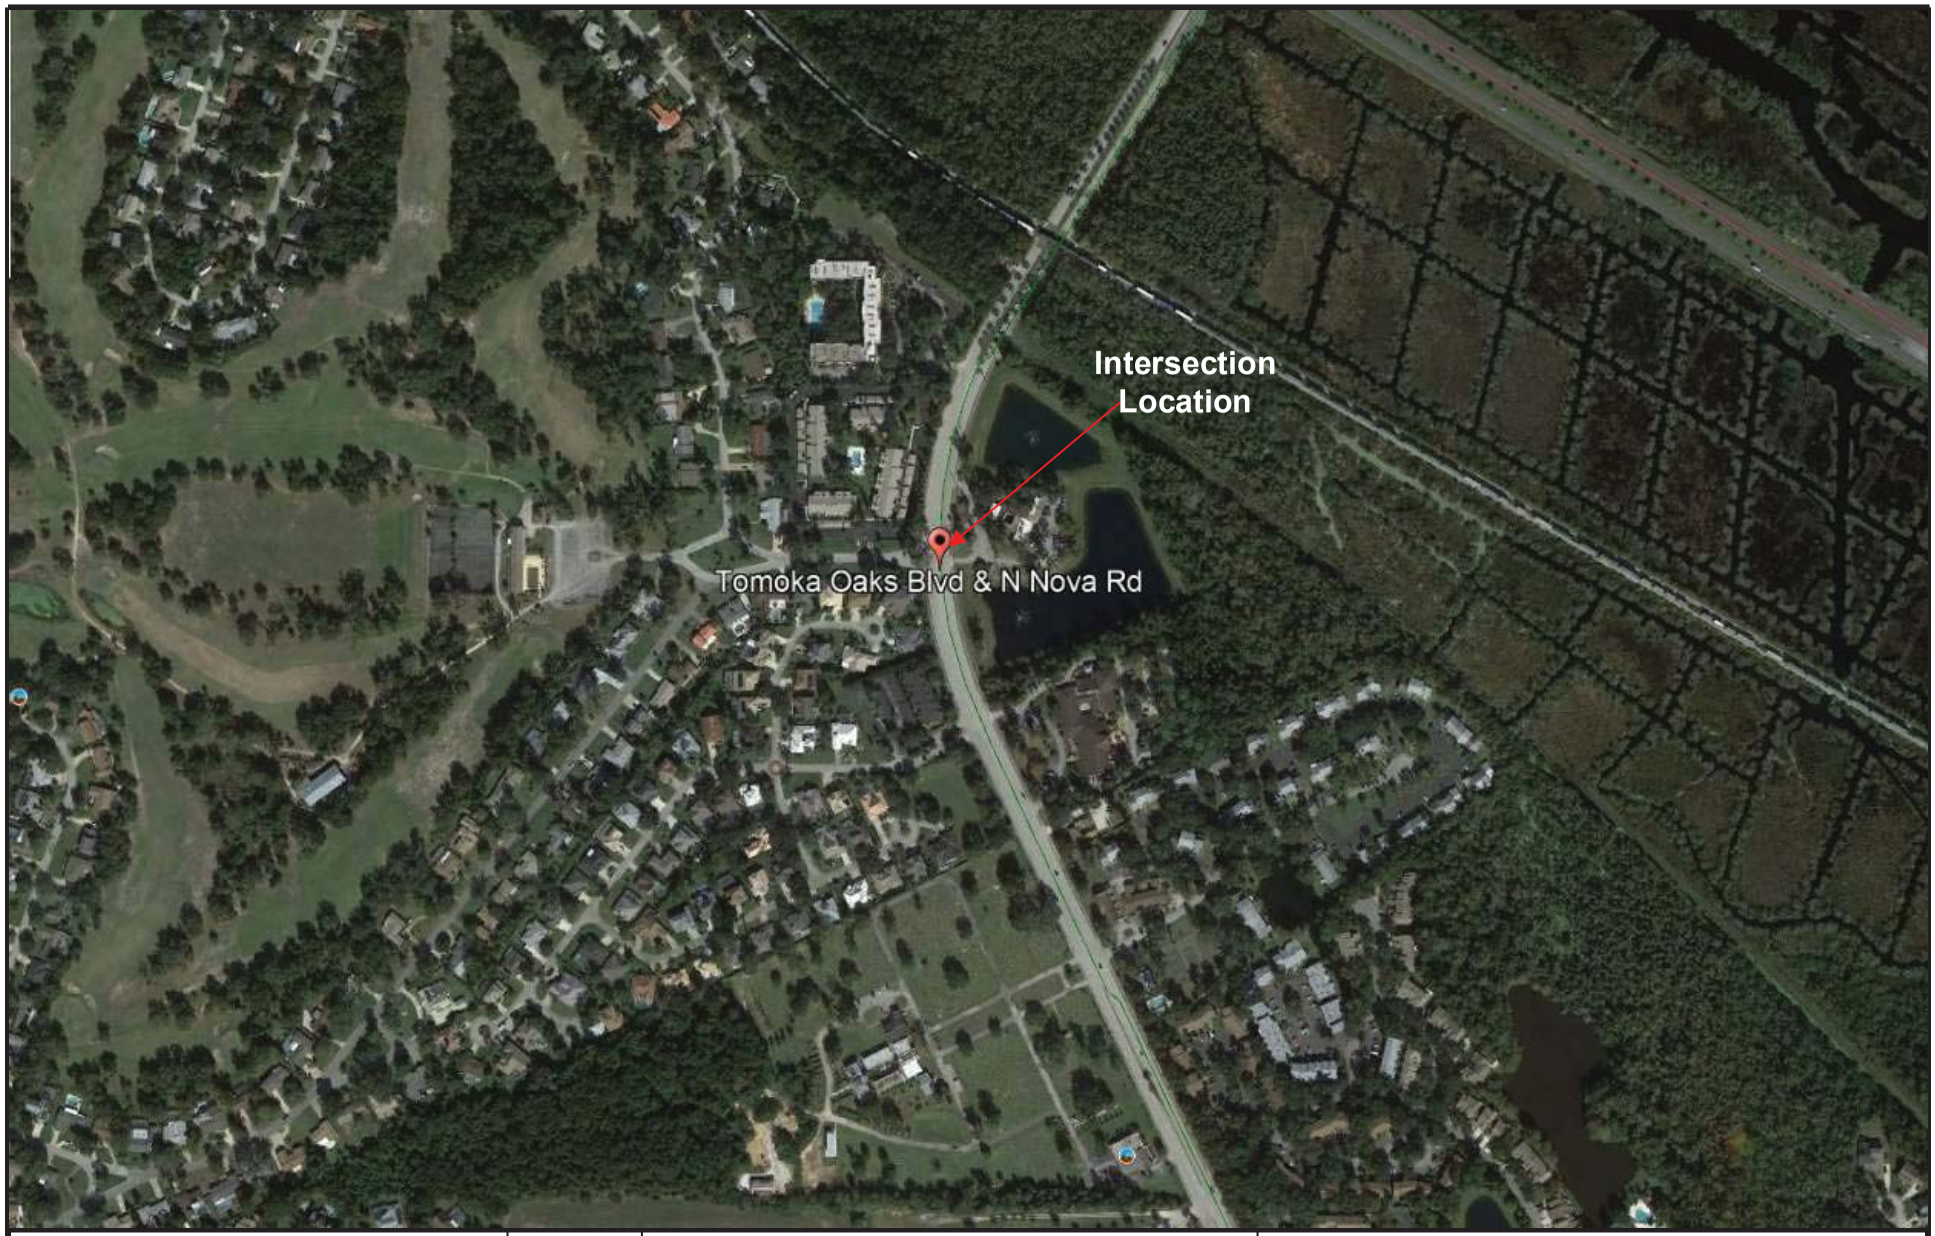
EXECUTIVE SUMMARY

LTG, Inc. has conducted a Preliminary Traffic Signal Warrant Study (TSWS) at the intersection of Nova Road and Tomoka Oaks Boulevard located in the City of Ormond Beach, Florida. Based on the results of the analysis and engineering judgment, the following recommendations and conclusions were developed:



- The intersection meets the following warrants:
  - Warrant 1B: Interruption of Continuous Traffic
  - Warrant 2: 4-Hour Vehicular Volume

LTG's analysis was based on methods which are consistent with those set forth in the *Manual on Uniform Traffic Control Devices* (MUTCD) and standard practice in the State of Florida.

INTRODUCTION

LTG, Inc. has been retained by Triumph Oaks of Ormond Beach, LLC to conduct a Preliminary Traffic Signal Warrant Study (TSWS) at the intersection of SR 5A (Nova Road) and Tomoka Oaks Boulevard, located in the City of Ormond Beach, Florida. The location of the subject intersection is shown in Figure 1.

The purpose of this study is to determine if signalized traffic control may be warranted at the intersection of Nova Road and Tomoka Oaks Boulevard upon build-out of the proposed Tomoka Oaks development. The analysis methods used in conducting this study are consistent with those set forth in the *Manual on Uniform Traffic Control Devices* (MUTCD), the *Manual on Uniform Traffic Studies* (MUTS), and Florida Department of Transportation (FDOT) guidelines and procedures. This report documents the existing conditions, future conditions, signal warrant analysis, and recommendations.

Nova Road at Tomoka Oaks Boulevard Preliminary TSWS	N NTS	**Project Location Map**	LTG Engineering & Planning
		Project No.: 5361.04 / Figure: 1	1450 W. Granada Blvd., Suite 2, Ormond Beach, Florida 32174 Telephone: 386.257.2571 Fax: 386.257.6996

EXISTING CONDITIONS

The intersection of Nova Road at Tomoka Oaks Boulevard is currently unsignalized. This section of Nova Road is currently maintained by FDOT as an Access Class 5 roadway. Significant features of the roadway are summarized in Table 1 below:

Table 1
Summary of Existing Conditions
Nova Road at Tomoka Oaks Boulevard Preliminary TSWS

Feature	Description
Main Street	Nova Road
Side Street	Tomoka Oaks Boulevard
Area Location	Volusia County
Surrounding Development	Residential and Commercial Land Uses
Land Uses at Intersection	This intersection provides access to existing residential development to the west.
Traffic Control	The eastbound approach is currently under stop-sign control.
Signal Spacing	Nearest signals: Nova Road at US 1, approximately 2,000 ft north Nova Road at Wilmette Avenue, approximately 3,300 ft south (Minimum spacing for Access Class 5 at 45 mph is 1,320 ft.)
Additional Features	Function – North-South principal arterial
	Connectivity – US 1 to the north and SR 40 to the south
	Posted Speed Limit – 45miles per hour (mph)
	Sidewalks – There are sidewalks present along both sides of Nova Road at this location.
	Utilities – There are overhead utilities along the east side of Nova Road.
	Street Lighting – Street lighting is provided along the west side of Nova Road.

Existing Traffic Volumes

The 24-hour directional volume counts were collected at the existing approaches to the subject intersection on Tuesday, May 27, 2021, prior to the end of the Volusia County school year. The eight highest hours were identified from the 24-hour volume counts. The eight highest count hours selected include 9:00 a.m. to 10:00 a.m., and 12:00 p.m. to 7:00 p.m. The existing directional approach volumes are summarized in Table 1 below, with the raw count data attached as Appendix A.

Table 2
24-Hour Approach Volumes
Nova Road at Tomoka Oaks Boulevard Preliminary TSWS

	ADT:	10,216	10,354	20,570	1,436

FUTURE CONDITIONS

The evaluation of signal warrants was based on future roadway conditions. The following presents the methods used to determine the traffic volumes for the preliminary signal warrant evaluation.

Trip Generation

The daily trip generation for the Tomoka Oaks development was calculated using the nationally accepted trip generation software, TripGen (10th Edition), prepared by the Institute of Transportation Engineers (ITE) and is shown in Table 3.

Table 3
Daily Trip Generation
Nova Road at Tomoka Oaks Boulevard Preliminary TSWS

Period	Land Use	Land Use Code	Trip Rate Equation	Size	Units	Percent Entering	Percent Exiting	Trips Entering	Trips Exiting	Total Trips
Daily	Single Family	210	Ln(T)=0.92Ln(X)+2.71	300	DU	50%	50%	1,429	1,429	2,858

Hourly Trip Variation

The Tomoka Oaks development will have site access at Nova Road at Tomoka Oaks Boulevard. The anticipated hourly project traffic utilizing the intersection was included to determine the anticipated build-out volumes. The percent of 24-hour traffic was determined using the hourly variation percentages from the existing residential development, which were derived from the 24-hour eastbound (exiting) volumes. Table 4 presents the predicted hourly variation of the project trips for the proposed development exiting through the intersection for the identified eight highest hours. Note that the distribution for left-turning (39%) and right-turning (57%) project trips was obtained from the Central Florida Regional Planning Model (CFRPM) model run used in the TIA.

The raw directional approach data was factored using FDOT's Seasonal Factor (Appendix A) and a growth rate of two percent per year, was applied to determine the 2026 background hourly traffic. Table 5 shows the resultant total mainline and minor street volumes used in the signal warrant, with the highest four hours volumes highlighted based on the minor street approach.

Table 4

Abbreviations: RD = Raw Data, SF = Seasonal Factor, and GR = Growth Rate
A seasonal Factor of 1.05 and a growth rate of 2.00% per year was applied to the data. Build-out year for Tomoka Oaks is 2026.

PRELIMINARY SIGNAL WARRANT ANALYSIS

The traffic volumes and geometric conditions were compared with the warrants for the installation of traffic signals contained in the latest edition of the *Manual on Uniform Traffic Control Devices* (MUTCD).

For the purposes of the Preliminary Signal Warrant Analysis, Nova Road was considered the major street and the eastbound approach of Tomoka Oaks Boulevard was considered the minor street. The eastbound approach of this intersection functions as two lanes since the existing lane width facilitates separation of left-turn and right-turns. However, right-turns were excluded from the minor approach warrant volumes, and the minor approach was considered a one lane roadway. The analysis was performed under 2026 build-out year conditions. The signal warrant forms are included as Appendix B. Table 6 summarizes the results of the analyses during the study hours:

Table 6
Summary of Signal Warrant Analysis
Nova Road at Tomoka Oaks Boulevard Preliminary TSWS

Warrant		Applicable	Satisfied	Comments
1A	Minimum Vehicular Volume	Yes	No	**Warrant is not satisfied.**
1B	Interruption of Continuous Traffic	Yes	Yes	**Warrant is satisfied.**
2	Four-Hour Vehicular Volume	Yes	Yes	**Warrant is satisfied.**
3A	Peak-Hour Delay	Yes	No	**Warrant is not satisfied.**
3B	Peak-Hour Volume	Yes	No	**Warrant is not satisfied.**
4	Pedestrian Volume	Yes	No	**Warrant is not satisfied.**
5	School Crossing	No	No	This warrant is not applicable.
6	Coordinated Signal System	No	No	This warrant is not applicable.
7	*Crash Experience	Yes	No	**Warrant is not satisfied.**
8	Roadway Network	No	No	This warrant is not applicable.

**Available crash data from Signal4 Analytics between December 2017 and December 2021 was reviewed and determined not to meet warrant thresholds.*

RECOMMENDATIONS

Based on the results of the Preliminary Signal Warrant Analyses and engineering judgement of projected 2026 build-out conditions at the intersection of Nova Road and Tomoka Oaks Boulevard, the following recommendations were developed:

- The intersection meets the following warrants:
    - Warrant 1B: Interruption of Continuous Traffic
    - Warrant 2: 4-Hour Vehicular Volume

Appendix B
Signal Warrants

SIGNAL WARRANT ANALYSIS

Introduction

- The Signal Warrant Analysis Spreadsheets are a tool for assisting traffic engineers when evaluating the need for a traffic signal installation
- The filled spreadsheets can be used as part of the supporting documents for the signal warrant evaluation

Note: This templates are a useful resource, but it remains necessary to apply engineering judgment and to consider specific environmental, traffic, geometric, and operational conditions

Instructions

Fill in "Orange" areas only	
Automated cells based on in Input Data in "orange" cells	
General Information	Fill in below the general information including: District, County (drop-down menu) City, Engineer, Date Major and Minor Street with corresponding number of lanes and speed limits
Enter Eight Hour Volumes	Any 8 hours of an average day. Major-street and minor-street volumes shall be for the same 8 hours; however, the 8 hours satisfied in Condition A shall not be required to be the same 8 hours satisfied in Condition B for 80% columns only. On the minor street, the higher volume shall not be required to be on the same approach during each of the 8 hours.
Enter Four Hour Volumes	Any 4 hours of an average day. Vehicles per hour on the major street (total of both approaches) and the corresponding vehicles per hour on the higher-volume minor-street approach (one direction only, not required to be on the same approach during each of the 4 hours)
Enter Pedestrian Volumes (4-hr)	Pedestrians per hour crossing the major street (total of all crossings)
Enter Peak Hour Volumes	Vehicular: Any four consecutive 15-minute periods of an average day Pedestrian: Any four consecutive 15-minute periods of an average day representing the vehicles per hour on the major street (total of both approaches) and the corresponding pedestrians per hour crossing the major street (total of all crossings)

County:	79 – Volusia	Date:	June 7, 2021
District:	Five		

Major Street:	SR 5A	Lanes:	2	Major Approach Speed:	45
Minor Street:	Tomoka Oaks	Lanes:	1	Minor Approach Speed:	25

MUTCD Electronic Reference to Chapter 4: http://mutcd.fhwa.dot.gov/pdfs/2009r1r2/part4.pdf

Volume Level Criteria

1. Is the posted speed or 85th-percentile of major street > 40 mph (70 km/h)? ☑ Yes ☐ No
2. Is the intersection in a built-up area of an isolated community with a population < 10,000? ☐ Yes ☑ No

"70%" volume level **may** be used if Question 1 **or** 2 above is answered "Yes" ☑ 70% ☑ 100%

WARRANT 1 - EIGHT-HOUR VEHICULAR VOLUME

Warrant 1 is satisfied if Condition A or Condition B is "100%" satisfied for eight hours. ☐ Yes ☑ No

Warrant 1 is also satisfied if both Condition A and Condition B are "80%" satisfied (should only be applied after an adequate trial of other alternatives that could cause less delay and inconvenience to traffic has failed to solve the traffic problems). ☐ Yes ☑ No

Condition A - Minimum Vehicular Volume

Condition A is intended for application at locations where a large volume of intersecting traffic is the principal reason to consider installing a traffic control signal.

100% Satisfied: ☐ Yes ☑ No
80% Satisfied: ☐ Yes ☑ No
70% Satisfied: ☐ Yes ☑ No

Number of Lanes for moving traffic on each approach		Vehicles per hour on major-street (total of both approaches)			Vehicles per hour on minor-street (one direction only)		
Major	Minor	100%[a]	80%[b]	70%[c]	100%[a]	80%[b]	70%[c]
1	1	500	400	350	150	120	105
2 or more	1	600	480	420	150	120	105
2 or more	2 or more	600	480	420	200	160	140
1	2 or more	500	400	350	200	160	140

[a] Basic Minimum hourly volume
[b] Used for combination of Conditions A and B after adequate trial of other remedial measures
[c] May be used when the major-street speed exceeds 40 mph or in an isolated community with a population of less than 10,000

Record 8 highest hours and the corresponding major-street and minor-street volumes in the Instructions Sheet.

Street	Eight Highest Hours							
	9:00-10:00 AM	12:00-1:00 PM	1:00-2:00 PM	2:00-3:00 PM	3:00-4:00 PM	4:00-5:00 PM	5:00-6:00 PM	6:00-7:00 PM
Major	1,653	1,788	1,899	1,875	1,982	1,827	1,783	1,701
Minor	109	86	83	70	86	78	87	70

Existing Volumes

TRAFFIC SIGNAL WARRANT SUMMARY

Condition B - Interruption of Continuous Traffic

Condition B is intended for application where Condition A is not satisfied and the traffic volume on a major street is so heavy that traffic on the minor intersecting street suffers excessive delay or conflict in entering or crossing the major street.

Applicable:	☑ Yes	☐ No
100% Satisfied:	☐ Yes	☑ No
80% Satisfied:	☑ Yes	☐ No
70% Satisfied:	☑ Yes	☐ No

Number of Lanes for moving traffic on each approach		Vehicles per hour on major-street (total of both approaches)			Vehicles per hour on minor-street (one direction only)		
Major	**Minor**	**100%[a]**	**80%[b]**	**70%[c]**	**100%[a]**	**80%[b]**	**70%[c]**
1	1	750	600	525	75	60	53
2 or more	1	900	720	630	75	60	53
2 or more	2 or more	900	720	630	100	80	70
1	2 or more	750	600	525	100	80	70

[a] Basic Minimum hourly volume

[b] Used for combination of Conditions A and B after adequate trial of other remedial measures

[c] May be used when the major-street speed exceeds 40 mph or in an isolated community with a population of less than 10,000

Record 8 highest hours and the corresponding major-street and minor-street volumes in the Instructions Sheet.

WARRANT 5 - SCHOOL CROSSING

Record hours where criteria are fulfilled and the corresponding volume or gap frequency in the boxes provided. The warrant is satisfied if all three of the criteria are fulfilled.

Applicable: ☐ Yes ☑ No

Satisfied: ☐ Yes ☑ No

Criteria				Fulfilled? Yes	Fulfilled? No
1. There are a minimum of 20 students crossing the major street during the highest crossing hour.	Students:	Hour:			
2. There are fewer adequate gaps in the major street traffic stream during the period when the children are using the established school crossing than the number of minutes in the same period.		Minutes:	Gaps:		
3. The nearest traffic signal along the major street is located more than 300 ft. (90 m) away, or the nearest signal is within 300 ft. (90 m) but the proposed traffic signal will not restrict the progressive movement of traffic.

WARRANT 6 - COORDINATED SIGNAL SYSTEM

Indicate if the criteria are fulfilled in the boxes provided. The warrant is satisfied if either criterion is fulfilled. This warrant should not be applied when the resulting signal spacing would be less than 300 m (1,000 ft.).

Applicable: ☐ Yes ☑ No

Satisfied: ☐ Yes ☑ No

Criteria	Fulfilled? Yes	Fulfilled? No
1. On a one-way street or a street that has traffic predominately in one direction, the adjacent signals are so far apart that they do not provide the necessary degree of vehicle platooning.		
2. On a two-way street, adjacent signals do not provide the necessary degree of platooning, and the proposed and adjacent signals will collectively provide a progressive operation.

WARRANT 8 - ROADWAY NETWORK

Record hours where criteria are fulfilled, and the corresponding volume or other information in the boxes provided. The warrant is satisfied if at least one of the criteria is fulfilled and if all intersecting routes have one or more of the Major Route characteristics listed.

Applicable: ☐ Yes ☑ No

Satisfied: ☐ Yes ☑ No

Criteria								Met? Yes	Met? No	Fulfilled? Yes	Fulfilled? No
1. Both of the criteria to the right are met.	a. Total entering volume of at least 1,000 veh/hr during a typical weekday peak hour.		Entering Volume:								
	b. Five-year projected volumes that satisfy one or more of Warrants 1, 2, or 3.		Warrant:	1	2	3					
			Satisfied?:								
2. Total entering volume at least 1,000 veh/hr for each of any 5 hrs of a non-normal business day (Sat. or Sun.)							← Hour				
							←Volume				

Characteristics of Major Routes		Met? Yes	Met? No	Fulfilled? Yes	Fulfilled? No
1. Part of the street or highway system that serves as the principal roadway network for through traffic flow.	Major Street:				
	Minor Street:				
2. Rural or suburban highway outside of, entering, or traversing a city.	Major Street:				
	Minor Street:				
3. Appears as a major route on an official plan.	Major Street:				
	Minor Street:				

State of Florida Department of Transportation

TRAFFIC SIGNAL WARRANT SUMMARY

City:	Ormond Beach	Engineer:	CAM1
County:	79 – Volusia	Date:	June 7, 2021
District:	Five		

Major Street:	SR 5A	Lanes:	2	Major Approach Speed:	45
Minor Street:	Tomoka Oaks	Lanes:	1	Minor Approach Speed:	25

MUTCD Electronic Reference to Chapter 4: http://mutcd.fhwa.dot.gov/pdfs/2009r1r2/part4.pdf

Approach Lane Criteria

1. How many approach lanes are there at the track crossing? ☐ 1 ☐ 2 or

If there is 1 lane, use Figure 4C-9 and if there are 2 or more, use Figure 4C-10. ☐ Fig 4C-9 ☐ Fig 4C-10

WARRANT 9 - INTERSECTION NEAR A GRADE CROSSING

This signal warrant should be applied only after adequate consideration has been given to other alternatives or after a trial of an alternative has failed to alleviate the safety concerns associated with the grade crossing.

Indicate if both criteria are fulfilled in the boxes provided. The warrant is satisfied if both criteria are met.

Applicable: ☐ Yes ☐ No

Satisfied: ☐ Yes ☐ No

Criteria	Fulfilled? Yes	Fulfilled? No
1. A grade crossing exists on an approach controlled by a STOP or YIELD sign and the center of the track nearest to the intersection is within 140 feet of the stop line or yield line on the approach; and	☐	☐
2. During the highest traffic volume hour during which the rail uses the crossing, the plotted point falls above the applicable curve for the existing combination of approach lanes over the track and the distance D (clear storage distance).	☐	☐

Use the following tables (4C-2, 4C-3, and 4C-4 to appropriately adjust the minor-street approach volume).

Inputs		Adjustment Factors from Tables
Occurrences of Rail traffic per day		
% of High Occupancy Buses on Minor-Street Approach		1.00
Enter D (feet)		
% of Tractor-Trailer Trucks on Minor-Street Approach		0.50

Table 4C-2. Adjustment Factor for Daily Frequency of Rail Traffic

Rail Traffic per Day	Adjustment Factor
1	0.67
2	0.91
3 to 5	1.00
6 to 8	1.18
9 to 11	1.25
12 or more	1.33

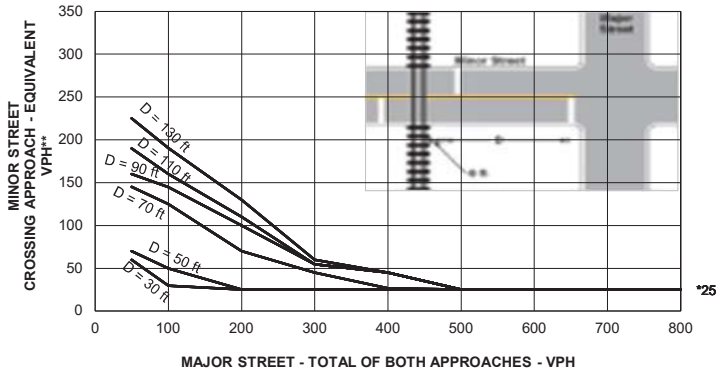
Table 4C-3. Adjustment Factor for Percentage of High-Occupancy Buses

% of High-Occupancy Buses* on Minor Street Approach	Adjustment Factor
0%	1.00
2%	1.09
4%	1.19
6% or more	1.32

* A high-occupancy bus is defined as a bus occupied by at least 20 people

Table 4C-4. Adjustment Factor for Percentage of Tractor-Trailer Trucks

% of Tractor-Trailer Trucks on Minor-Street Approach	Adjustment Factor	
	D less than 70 feet	D of 70 feet or more
0% to 2.5%	0.50	0.50
2.6% to 7.5%	0.75	0.75
7.6% to 12.5%	1.00	1.00
12.6% to 17.5%	2.30	1.15
17.6% to 22.5%	2.70	1.35
22.6% to 27.5%	3.28	1.64
More than 27.5%	4.18	2.09



Input the major and minor street volumes before adjustment factors are applied

1 Approach Lane		
D (ft)	Major Vol.	Minor Vol.

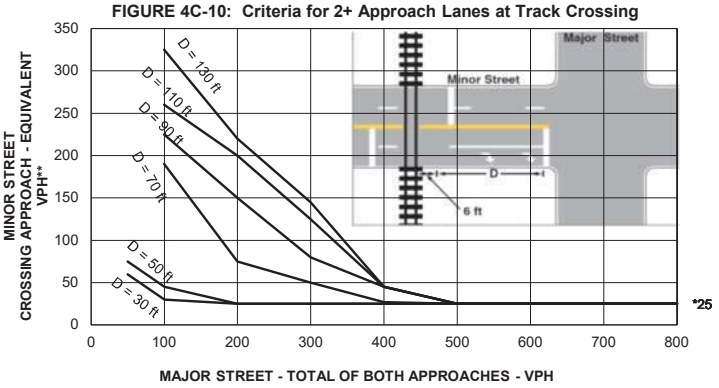
After adjustment factors are applied

1 Approach Lane w/Factors		
D (ft)	Major Vol.	Minor Vol.

FIGURE 4C-9: Criteria for 1 Approach Lane at the Track Crossing

** Note: 25 vph applies as the lower threshold volume*

** *Note: VPH after applying the adjustment factors in Tables 4C-2, 4C, and or 4C-4, if appropriate*



Input D and the major and minor street volumes before adjustment factors are applied

2 or more Approach Lanes		
D (ft)	Major Vol.	Minor Vol.

After adjustment factors are applied

2+ Approach Lane w/Factors		
D (ft)	Major Vol.	Minor Vol.

FIGURE 4C-10: Criteria for 2+ Approach Lanes at Track Crossing

** Note: 25 vph applies as the lower threshold volume*

** *Note: VPH after applying the adjustment factors in Tables 4C-2, 4C, and or 4C-4, if appropriate*

TECHNICAL MEMORANDUM

To: Steve Spraker, AICP – Planning Direction, City of Ormond Beach

From: Kady L. Dearing, P.E.

Date: August 31, 2023

Subject: Tomoka Oaks Residential – Impact of Nova Road Planned Improvement
City of Ormond Beach, Florida

INTRODUCTION

LTG, Inc. has been retained by Triumph Oaks or Ormond Beach I, LLC to prepare a technical memorandum summarizing the impacts of the planned and programmed Nova Road safety improvements proposed by the Florida Department of Transportation (FDOT). The following documentation and analysis are prepared to address residents' concerns, at the request of City Staff, regarding the effects of the proposed safety improvement in relation to the Traffic Impact Analysis (TIA) Report prepared for the Tomoka Oaks Residential project.

BACKGROUND

The FDOT is conducting a maintenance project for the segment of Nova Road with a focus on the primary segment of SR 40/Granada Boulevard to Wilmette Avenue (approximately 0.5 miles). The goal of the project is to rehabilitate the pavement and improve safety for all roadway users. As a result, the segment is expected to be revised from a 6-lane divided roadway, with shared left-turn lane, to a 4-lane divided roadway separated by a concrete median and enhanced with landscaping areas on the east and west sides of Nova Road. A copy of the project limits and proposed alternatives for the improvement project is provided as **Exhibit A**.

The TIA has been competed in accordance with the analysis standards adopted by the City of Ormond Beach, FDOT, and the River to Sea Transportation Planning Organization (R2CTPO) TIA Guidelines. As such, the study area for the analysis is based on a standard 3% project significance test and agreed upon during the methodology phase of the analysis. The part of Nova Road that will be modified by the safety improvement project was not within the 3% significant threshold for the TIA. However, the segment of Nova Road, from Wilmette Avenue to US-1, was included as part of the analysis and is expected to remain as a 4-lane divided section upon buildout of the safety improvement project. It should be noted that the segment of Nova Road from Wilmette Avenue to US-1 is expected to continue to operate within the adopted level-of-service upon buildout of the Tomoka Oaks Residential project.

SEGMENT ANALYIS

The segment of Nova Road, from SR 40/Granada Boulevard to Wilmette Avenue, was evaluated to determine the operating conditions under the existing roadway configuration and under the future planned configuration with buildout of the proposed development. The latest Annual Average Daily Traffic (AADT) count data, as released by the FDOT for the year 2022, was used. Due to the annual historical trend resulting in a negative growth, using 5-year and 10-year historical data, a 3% annual growth rate was used to determine 2028 background traffic. The results of the segment analysis are shown in **Table 1**.

Table 1
Nova Road Segment Analysis
Tomoka Oaks Residential

Roadway	Segment		No. of Lanes	Adopted LOS	Peak Hour Two-Way Capacity	Existing Peak Hour Two-Way Volume (2022)	Annual Growth Rate	2028 Background Volume	Project Trip Distribution	Project Volume	2028 Buildout Volume
Nova Rd.	SR 40	Wilmette Ave.	6	D	5,114	1,935	3%	2,283	51%	142	2,425
			4	D	3,455						

As shown in Table 1, the future 2028 volume is not expected to exceed the 4-lane divided capacity with inclusion of the proposed development. Therefore, no additional mitigation improvements or funds are required.

CONCLUSION

An additional segment analysis was conducted on Nova Road, from SR 40 to Wilmette Avenue, in order to address residents' concerns regarding the potential impact of the proposed development on the new safety improvements planned by the FDOT. In summary, the segment was not included in the original TIA, as it did not meet the significant test thresholds for analysis. In analyzing the additional segment, with and without the proposed safety improvements, the segment is expected to remain within the adopted level-of-service under 2028 future conditions with inclusion of the proposed development. Therefore, no additional mitigation improvements or funds, other than what was previously reported in the TIA, are required.

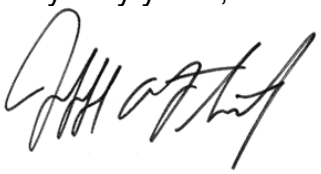
Re: Environmental Regulatory Process Summary
Tomoka Oaks Golf Course Redevelopment (the "Site")
Ormond Beach, Florida

Dear Steven:



The environmental regulatory review and approval process for the former Tomoka Oaks Golf Course is being conducted by the Florida Department of Environmental Protection (FDEP) relating to its former use as a golf course and proposed redevelopment for residential uses. During the prior operation of the golf course, it is understood by FDEP that certain agrichemicals were lawfully applied to the golf course playing areas of the Site for the purposes of turf management. The Site owner contracted with a Florida-certified environmental engineer, Jeff Flairty, P.E. of Ayden Environmental LLC, to complete the required environmental assessment of the Site and develop a remedial plan to address to support the land use change from golf course to residential land uses.

In 2022, Ayden Environmental submitted site assessment reports (i.e., an initial report and a response to FDEP comments) and a Soil Management Plan (SMP) to FDEP. The site assessment reports document the extensive soil and groundwater testing performed by Ayden Environmental and the areas of the Site requiring further site rehabilitation. The SMP details the process for additional site assessment, remediation of impacted soil, and confirmatory sampling to ensure the Site can be redeveloped for residential uses. Implementation of the SMP is intended to run parallel with the proposed redevelopment of the Site and will be managed by Ayden Environmental with FDEP oversite. All work will be completed in accordance with Chapter 62-780 of the Florida Administrative Code, which is Florida's regulatory framework for environmental cleanup. FDEP completed a review of Ayden's regulatory submittals and approved the site assessment reports and SMP in a letter dated, November 16, 2022.

FDEP will maintain review and administrative authority over environmental activities at the Site. Please note that FDEP approved an extension of time for until October 1, 2023 for implementation of the SMP. A copy of the FDEP approval letter of the SMP and the extension of time are included as attachments.

Please let me know if there is any further information I can provide to assist in review of this matter. Please do not hesitate to contact me at (954) 707-2724 or jeff@aydenenv.com.

Very truly yours,

Jeffrey A. Flairty, P.E.
President

Review of Site Assessment Report (SAR), SAR Addendum Response, and Soil Management Plan (SMP)

Dear Mr. Rubin,

The Department's District and Business Support Program (DBSP) and the University of Florida Center for Environment and Human Toxicology (UF) have reviewed the May 2022 "Site Assessment Report" (Report) that was submitted by Ayden Environmental, LLC (Ayden) on your behalf for the property referenced above (Site). Additionally, the September 8, 2022 "Updated Soil Management Plan" (SMP) as well as the September 27, 2022 "SAR Addendum Letter Response" were also reviewed. The review memos from DBSP regarding the reviewed documents were sent to Ayden on October 25, 2022.

As stated in the DBSP review memos "DBSP Response to Comments (RTC) Review" and "DBSP Updated SMP Review", it is understood that additional site assessment activities will be conducted as outlined in the SMP, with regard to the responses outlined in the DBSP review memos. Therefore, the Department approves of the submitted reports and the SMP. The DBSP review memos are attached for reference herein.

Additionally, review of the data included in the Report indicates that the necessary requirements for Site Assessment completion under Ch. 62-780.600, Florida Administrative Code (F.A.C.) have been met.

Please proceed with the implementation of the SMP with regard to the responses outlined in the DBSP review memos within 90 days of receipt of this letter, or by February 2, 2023. Pursuant to Rule 62-780.790, F.A.C., please provide the Department seven (7) days, but not less than 24-hours' notice prior to conducting field activities. The Department anticipates receiving a report detailing the

activities conducted at the site by April 2, 2023. Please submit the report in electronic format to Alex.Courneya@FloridaDEP.gov.

If you have any questions concerning this correspondence, please contact me at (407) 897-2916, or at Alex.Courneya@FloridaDEP.gov.

Sincerely,

Alex Courneya

SUBJECT: Former Tomoka Oaks Golf Course
20 Tomoka Oaks Boulevard
Ormond Beach, Volusia County
Response to SAR Comments, September 27, 2022
Site ID: ERIC_18037

DATE: October 25, 2022

The document *Response to SAR Comments* dated September 27, 2022 for the above referenced site has been reviewed by University of Florida Center for Environment and Human Toxicology (UF), and the Florida Department of Environmental Protection (FDEP) District and Business Support Program (DBSP). UF's review is attached. Review observations and comments are provided to assist the Central District Office staff with their review of this document and should not be inferred to be an approval of the subject document. In addition to UF's attached review, comments were provided in response to DBSP's comments. DBSP's original comments are provided below. The responses to comments are documented in italic font followed by DBSP's subsequent response to comments in bold font.

1. The ISM sampling standard operating procedures appear to have been performed correctly:
    i. Three replicate sample sets of 30 soil borings were collected within each decision unit (DU). Samples were sieved through a #10 sieve and subsampled utilizing the two-dimensional Japanese slabcake process prior to obtaining each ISM sample.
    ii. Results from the ISM sampling event were used to calculate 95% upper confidence limits (UCLs) for each DU and at each sample depth (0-0.5', 0.5-2', and 2-4') for each contaminant of concern (COC) using the ISM calculator.

    Response: No response required.

    DBSP concurs.

2. The SAR conclusions state that based on Phase II discrete and ISM soil sampling no arsenic impacts above residential soil cleanup target levels (SCTLs) were noted below 6-inches throughout the site, except for the greens. Based on Exhibit 1: Phase II ESA Golf Course Discrete

Soil Concentrations (mg/kg) and Sheet 6: Phase II Soil Boring Location Map, arsenic impacts appear to be present in areas identified other than greens at depths greater than 6 inches.

Response: No response required.

Finished lot sampling will be conducted within each single-family building lot including two soil samples per lot at a depth of 0-2 feet and 2-4 feet below land surface (bls). This should identify potential impacts remaining following development activities at depths greater than 6 inches bls that may need to be further addressed.

3. Several conclusions in the SAR are based on ISM sampling results, including the depth of arsenic impacts and the lack of organochlorine pesticides (OCPs) in soil above SCTLs in areas of the former golf course outside of the greens.

   Response: No response required.

   DBSP concurs.

4. The data was pooled across golf course features (e.g. greens, tees, fairways, and rough) without first demonstrating that these features had similar concentrations or distributions. Such pooling of separate datasets limits the usefulness of the pooled dataset and renders them unusable for site closure decisions.

   Response: No response required.

   It is DBSP's understanding that based on the proposed in-situ certification sampling within the finished lots and open spaces the pooled datasets will not be used for site closure decisions.

5. DUs for ISM are based on the historic use of the site as a golf course. As noted in UF's attached review, DUs should reflect future exposure units. The discrete arsenic data in comparison to the ISM arsenic data imply that the large size of the DUs may underestimate the concentrations of COCs, including arsenic and OCPs.

   i. The large size of the DUs also may make them unreliable for decision making purposes regarding delineation. Per UF's comment #2, a DU of 63.9-acres is too large to definitively state that arsenic exceedances are limited to the GCMA abutting this DU.

   Response: The relative size of SAR DUs was discussed in a conference call with FDEP, DBSP, and Ayden on August 23, 2022. It was agreed that additional certification soil sampling would be completed onsite after the removal of arsenic and OCP-impacted soil at a rate of four soil samples per acre totaling 592 additional certification soil samples prior to the placement of any clean fill material onsite. A complete description of the additional SMP soil certification sampling is provided in Section 4.4 of the revised SMP submitted to the FDEP/DBSP on September 7, 2022.

   Section 4.6 – In-Situ Certification Testing of the SMP documents that two soil samples will be collected per lot at a depth of 0-2 feet and 2-4 feet bls, and five soil samples will be collected within each acre of open space at a depth of 0-2 feet bls. With the implementation of the proposed in-situ certification sampling the DUs do not need to be re-evaluated.

6. The ISM Decision Unit Map (Sheet 13 of 29) does not identify the individual subunits for each of the golf course ISM areas. For example, Fairway 1, 2, and 3 are identified, however, the location of the subunits (F-1 through F-9) is not clear. As part of the conceptual site model it would be helpful to know where each subunit is located.

   Response: The ISM Decision Unit Map (Sheet 13 of the SAR) provides an identification of the various decision units of golf courses as follows: Driving Range, Fairway 1, 2, and 3, Green, GCMA, Tee, and Rough 1, 2 and 3. As noted within the SAR, the Green and GCMA were sampled

using discrete sampling techniques, not ISM. Within the remaining DUs, the individual subunits for each DU are defined on their respective DU sampling sheets as follows:

- *Tees: T-1, T-2, and T-3 (Sheet 14),*
- *Driving Range: DR-1, DR-2, and DR-3 (Sheet 15)*
- *Fairway 1: F-1, F-2, and F-3 (Sheet 16),*
- *Fairway 2: F-4, F-5, and F-6 (Sheet 17),*
- *Fairway 3: F-7, F-8, and F-9 (Sheet 18),*
- *Rough 1: R-1, R-2, and R-3 (Sheet 19),*
- *Rough 2: R-4, R-5, and R-6 (Sheet 20), and*
- *Rough 3: R-7, R-8, and R-9 (Sheet 21).*

Updated versions of Sheet 13 through Sheet 21 are provided as Attachment A of this response letter.

Sheets 14 through 21 have been updated with "typical soil sample location grouping" on each of the sheets.

The submittal satisfactorily addresses comments provided by UF and DBSP. If you have any questions, please contact me at 850-245-8717 or at Leah.J.Smith@FloridaDEP.gov.

Re: Review of the responses to comments regarding the Former Tomoka Oaks Golf Course, ERIC_18037

Dear Ms. Smith:

At your request, I have reviewed the *Response to SAR Comments, Former Tomoka Oaks Golf Course (the "Site"), 20 Tomoka Oaks Boulevard, Ormond Beach, Volusia County.* This document was prepared by Ayden Environmental and is dated September 27, 2022. The document includes responses to the University of Florida comment letter dated June 23, 2022 and updated tables and figures. The updated tables and figures were reviewed along with the responses. For clarity, the original comments and responses are repeated below. Follow-up comments are written in bold text.

UF Comment 1: ISM sampling was performed in eight decision units (DUs) including 1 DU for the 18 former golf course tees, 1 DU for the former driving range, 3 DUs for the former fairways with 6 fairways in each DU, and 3 DUs for the rough with each containing one-third of the non-golf course playing area. Ten of the 18 greens were sampled discretely, so the greens were not included in the ISM sampling. The DUs in this assessment reflect similar use at the time the golf course closed and do not reflect future exposures. Although the three ISM samples for the rough showed that the average concentration was below the residential SCTL, smaller areas could exceed the criteria. Houses built near those areas would have exposures above the residential SCTLs. Therefore, the DU should reflect future exposure units, not past use. As promulgated in Chapter 62-780, F.A.C., the residential exposure unit should not exceed ¼-acre unless it is demonstrated with statistically appropriate techniques that the contaminants are uniformly distributed. Although the DUs chosen were hypothesized to have uniformly distributed contaminants, the data to support this was not provided. Therefore, it is unclear whether the assessment is protective of future residents at the site.

Response 1: As noted in the FDEP Response 5 above, the relative size of SAR DUs was discussed in a conference call with FDEP, DBSP, and Ayden on August 23, 2022. It was agreed during this call that additional certification soil sampling would be completed onsite after the

removal of arsenic and OCP-impacted soil at a rate of four soil samples per acre totaling 592 additional certification soil samples prior to the placement of any clean fill material onsite. A complete description of the additional SMP soil certification sampling is provided as Section 4.4 of the revised SMP submitted to the FDEP/DBSP on September 7, 2022.

UF Follow-up Comment 1: The response states a revised soil management plan (SMP) was submitted to the Florida Department of Environmental Protection (FDEP) that proposes 4 additional certification soil samples per acre. I have not reviewed the SMP; however, the proposed additional sampling appears to address the exposure unit size for future residential use. I defer to the FDEP to determine whether the proposed additional sampling meets the requirements of Chapter 62-780, F.A.C.

UF Comment 2: Soil surrounding the GCMA contains arsenic concentrations greater than the residential SCTL. Section 4.2.5 states these impacts do not extend past the GCMA boundary to the surrounding rough as documented by the ISM result for Rough-3. Rough-3 is 63.9-acres in size. While the ISM result for this rough does show that a 95% UCL on the mean concentration over the DU is below the residential arsenic SCTL, it does not indicate that exceedances of the residential SCTL are limited to the GCMA and is not a substitute for the delineation of contamination. Further discussion with the Florida Department of Environmental Protection (FDEP) appears necessary to determine whether delineation is required for the arsenic exceedances in soil at the GCMA.

Response 2: Based on the incomplete delineation of arsenic impacted soil surrounding the former GCMA documented in the SAR, Ayden remobilized with JAEE Environmental Services on August 30, 2022, to locate and additional 50 supplemental soil borings outside of the previous 20 SAR SBs along the boundary between the GCMA and Rough-3 DUs (Sheet 1). Within each SB, Ayden then collected discrete soil samples from 0-6 in bls, 6-24 in bls, and 24-48 in bls soil layers using direct push drilling technology. Each soil sample were analyzed for total arsenic using EPA Method 6010.

The arsenic concentration data from all sample intervals of the supplemental discrete soil samples was compiled in Table 1. As noted on Sheet 2 depicting the arsenic concentrations of the 0-6 in bls soil layer, the August 30, 2022, supplemental soil sampling effort documented only one additional soil sample (SS-5) with an arsenic concentration exceeding the residential arsenic SCTL of 2.1 mg/kg. Within the 6-24 in bls soil layer, the August 30, 2022, supplemental soil sampling effort documented only four additional soil samples (SS-2, 3, 4, and 5) with an arsenic concentration exceeding the residential arsenic SCTL of 2.1 mg/kg (Sheet 3). No soil samples collected from 24-48 in bls during the supplemental sampling effort exceeded the residential arsenic SCTL (Sheet 4). The respective analytical data for the supplemental GCMA arsenic soil sampling effort is included as Attachment B to this response.

As depicted on Sheets 2, 3, and 4, each of the SB locations where arsenic concentrations exceed the residential SCTL are bounded by additional SB locations where arsenic concentrations are below the residential arsenic SCTL. This full delineation of arsenic impacts is achieved for both the 0-6 in bls and 6-24 in bls soil layers. No exceedances of the residential arsenic SCTL were noted within the 24-48 in bls soil layer.

UF Follow-up Comment 2: The response is satisfactory. The additional sampling completes delineation of soil exceedances in the GCMA.

UF Comment 3: Section 2.3 states no structures were present on the site at the time of the assessment. However, the figures show a clubhouse and a maintenance building still present onsite. The report should clarify whether the structures shown in the figures have been demolished or still remain in the assessment area.

Response 3: Ayden confirms that the maintenance building and clubhouse were present during the site assessment efforts in 2021. As of the time of this submission, all onsite buildings have been demolished.

UF Follow-up Comment 3: The clarification is satisfactory.

UF Comment 4: The groundwater data for pesticides were combined in Table 4 because no analytes were detected. It is unclear from this table whether the detection limits for these chemicals were below their groundwater cleanup target levels (GCTLs). The individual analytes with their detection limits could be added to the table for clarity. Alternatively, a statement could be added to Section 4.1.4 regarding whether the detection limits for the analyzed OCPs were below their respective GCTLs.

Response 4: An updated Table 4.rev (Exhibit 4 of the SAR) is provided with individual analytes and corresponding detection limits for the GCMA sample collected on November 22, 2020, as part of Phase II sampling activities. A review of the data confirms no detections of targeted OCP (EPA Method 8081) or OP pesticides (EPA Method 8141). For the EPA Method 8081 analysis, one OCP (aldrin) MDL was above the corresponding GCTL. For the EPA Method 8141 analysis, three OP pesticides (dichlorvos, EPN, and merphos) MDLs were above the corresponding GCTLs.

UF Follow-up Comment 4: The response is satisfactory.

UF Comment 5: Section 4.2 states 9 fairways were included in each of the 3 fairway DUs. This appears to be a typographical error. Each fairway DU only contained 6 fairways for a total of 18 fairways at the golf course.

Response 5: Ayden acknowledges the typographical error and confirms that each of the 3 fairway DUs only contains 6 fairways for a total of 18 fairways within the onsite golf course.

UF Follow-up Comment 5: The response is satisfactory.

UF Comment 6: In Figure 3, the triangle, pentagon, and "x" icons are not defined in the legend. It is unclear what these symbols represent.

Response 6: In their preparation of the Tomoka Reserve Planned Development Overall Development (Figure 3), the City of Ormand Beach had requested that existing trees be located on the base map of the proposed development plan. The triangle, pentagon and “x” icons represent different tree species currently present onsite.

UF Follow-up Comment 6: The clarification is satisfactory.

UF Comment 7: In Figure 12, it is unclear what the colors indicate for the sampling results. A legend should be added to the figure explaining the color scheme. It is also unclear which OCPs exceed their SCTLs at each location. It would be helpful to insert small tables in the figure at

each sample location for the four contaminants of concern (COCs) or place each OCP in a separate figure.

Response 7: An updated Sheet 5 (SAR Sheet 12.rev) is attached to this response and includes an updated legend explaining the color scheme. Additionally, individual tables of analytical results are provided in the figure at each sample location for the four contaminants of concern (COCs). Values exceeding applicable SCTLs are highlighted in red.

UF Follow-up Comment 7: The response is satisfactory.

UF Comment 8: Table 9 data labels do not match the description of the fairway DUs in Section 4.2 and Figures 16 through 18 of the document. Fairway-1, -2, and -3 each represent a different fairway DU. Fairway samples 4 through 9 are not defined. If they are replicates; it should be clearly labeled on the table. The same is true for Table 10 and Rough-1, -2, and -3 represented in Figures 19 through 21.

Response 8: As noted in the FDEP Response 6 above, the individual subunits for Fairway and Rough DUs are defined on their respective DU sampling sheets as follows:

- Fairway 1: F-1, F-2, and F-3 (Sheet 16),
- Fairway 2: F-4, F-5, and F-6 (Sheet 17),
- Fairway 3: F-7, F-8, and F-9 (Sheet 18),
- Rough 1: R-1, R-2, and R-3 (Sheet 19),
- Rough 2: R-4, R-5, and R-6 (Sheet 20), and
- Rough 3: R-7, R-8, and R-9 (Sheet 21).

Updated versions of Sheet 16 through Sheet 21 are provided as Attachment A of this response letter. Additionally, Table 9.rev and Table 10.rev have been revised to reflect the assignment of DUs and replicate IDs for the Fairway and Rough DUs, respectively.

UF Follow-up Comment 8: The response is satisfactory.

Please let me know if you have any questions regarding these responses.

Sincerely,

Leah D. Stuchal, Ph.D. .

SUBJECT: Former Tomoka Oaks Golf Course
20 Tomoka Oaks Boulevard
Ormond Beach, Volusia County
Soil Management Plan (Amended), September 2022
Site ID: ERIC_18037

DATE: October 25, 2022

The document *Soil Management Plan (Amended)* dated September 2022 for the above referenced site has been reviewed by the Florida Department of Environmental Protection (FDEP) District and Business Support Program (DBSP). Review observations and comments are provided to assist the Central District Office staff with their review of this document and should not be inferred to be an approval of the subject document. DBSP offers the following observations:

1. General:

   a. The site is slated to be redeveloped into single-family residential lots (298 lots), retention stormwater management areas, roadways, amenity and open space areas. The submittal notes that the intent is to comply with residential soil cleanup target levels (SCTLs) in both the residential and non-residential areas of the site.

   b. The original Soil Management Plan (SMP) was previously reviewed by DBSP and the University of Florida. Response to comments were submitted and have been reviewed under separate cover.

   c. Prior soil sampling identified chlordane, dieldrin, heptachlor epoxide, and toxaphene as soil contaminants of concern (COCs) within the greens. Arsenic, dieldrin and toxaphene were identified as soil COCs within the tees. Arsenic was identified as the soil COC within the driving ranges and fairways.

2. Soil Management Plan (SMP):
    a. Additional soil assessment within the former course greens is proposed to further define organochlorine pesticide (OCP) impacts. The submittal proposes stockpiling the upper two feet of unsaturated soil from each green into 1,000 cubic yard (cy) stockpiles. Each stockpile will be sampled for total and synthetic precipitation leaching procedure (SPLP) dieldrin and toxaphene analyses, and for total arsenic analyses at a frequency of 5 soil samples per 1,000 cy.
        i. Soil with dieldrin and/or toxaphene residential SCTL exceedances will be disposed of at a licensed landfill facility.
        ii. Soil with concentrations of dieldrin and/or toxaphene above the leachability SCTL but below the residential SCTL will be mixed with clean onsite soil and resampled. Once reuse sample results meet the leachability SCTL the soil will be managed based on corresponding arsenic concentrations.
        iii. Soil with concentrations of dieldrin or toxaphene below residential and leachability SCTLs will be placed within appropriate future land uses based on corresponding arsenic concentrations.
    b. The submittal recommends excavation and transportation of arsenic-impacted soil within the fairways, driving range, tees, Golf Course Maintenance Area (GCMA) and greens to non-residential areas (open space and amenity areas) within the site for placement below engineering caps with a minimum of two feet cover.
    c. Five composite soil samples per 1,000 cy will be sampled and analyzed for arsenic from imported fill material not from a certified quarry or from excavated onsite soil. Each composite sample will be comprised of a minimum of 10 aliquots collected from various heights and depths of the stockpile.
3. Post Soil Excavation Certification Sampling:
    a. Former green areas: Former green areas are impacted with OCPs and arsenic and assessment soil samples were not collected below 2 feet below ground surface (bgs). The submittal proposes collecting a series of three discrete soil samples from the excavation floor of each green at a depth of 2 feet for arsenic and OCP analysis following the removal of impacted soil. This process (soil removal followed by sampling) would be repeated until SCTLs were achieved.
    b. Non green areas: Four soil samples per an acre are proposed from a depth of 0-2 feet bgs for arsenic analysis for a total of 592 discrete soil samples across the site. Based on the analytical results soil will be classified as arsenic-impacted or soil requiring no further assessment or remediation. This process (soil removal followed by sampling) would be repeated until SCTLs were achieved.
4. Site Grading Procedures:
    a. Imported fill or soil sampled and determined to meet residential and leachability SCTLs will be used within the site to meet geotechnical requirements and for site grading and flood protection within the development areas.
    b. A two-feet minimum soil cap of clean fill is proposed as an engineering control for the open space/amenity areas (non-residential).
5. In-Situ Certification Testing
    a. Two soil samples collected from random location within each single-family building lot at depths of 0-2 feet bgs and 2-4 feet bgs are recommended for arsenic analysis. A total of 1,192 confirmation samples are estimated within the single-family lots.

b. Five soil samples collected from random locations within each acre of open space are proposed at a depth of 0-2 feet bgs for arsenic analysis.

DBSP offers the following comments:

1. According to the Site Assessment Report (SAR) for this site in addition to dieldrin and toxaphene, chlordane and heptachlor epoxide were detected in soil collected from the greens. These COCs are included in the confirmation sampling of the excavation floor of the former green areas but are not included in the stockpile sampling or in-situ characterization sampling.
    a. According to SAR Exhibit 5: Individual Greens OCP Data chlordane was detected in approximately 30% (16 out of 54) and heptachlor epoxide was detected in approximately 11% (6 out of 54) of the samples collected from the greens. Therefore, DBSP recommends that the in-situ characterization sampling include these COCs in locations where soil from the greens is re-used.
2. While stockpile sample results may be useful in characterizing the placement and/or blending of soil, they are not included in the consideration for a no further action decision because they may under or overestimate the actual concentration of COCs within the re-used soil.
    a. DBSP concurs that following the stockpiling, blending, grading, etc. of soil, the approach outlined in the in-situ certification for the finished lot sampling and amenity/open space sampling appears to be reasonable to verify that blended soils meet applicable SCTLs.
    b. The areas where an engineering control is implemented will need to be clearly defined following redevelopment activities. A survey will need to be conducted and included with a Declaration of Restrictive Covenant (DRC) documenting these areas. An engineering control maintenance plan (ECMP) will need to be prepared and will be reviewed upon submittal.
3. The submittal notes that a 95% upper confidence limit (UCL) may be calculated for arsenic in soil within each of the open space/amenity areas. Depending on the proposed decision unit(s) this may be a reasonable approach for evaluating arsenic concentrations in soil within the open space/amenity areas.

EXTERNAL MESSAGE
This email originated outside of DEP. Please use caution when opening attachments, clicking links, or responding to this email.

Good Afternoon Alex:

I am forwarding a copy of a recent email from the City of Ormond Beach documenting that the site's proposed development plan is still under review based on City and community feedback. The Project Team is hopeful that this process will be completed with the pending planning commission and city council meetings that are to come. Getting on the agenda for each group will take up to 5 months so I would request that we push back the required start date for the SMP to October 1, 2023.

Thank you.

School Adequate Capacity Determination
Finding of Adequate Capacity Letter

March 27, 2023

Mr. Robert A. Merrell III, Esq.
Cobb Cole
149 S Ridgewood Ave, Suite 700
Daytona Beach, FL 32114

RE : Tomoka Reserve RPUD – City of Ormond Beach
School Capacity Review # 23-02-24-002-A

Dear Mr. Merrell:

The County Charter requires any Comprehensive Plan Amendment or Rezoning that allows increased residential density to be effective only when adequate public schools can be timely planned and constructed to serve the projected increase in student population. The district uses this requirement as the guiding principle behind the school adequate capacity review.

District staff reviewed the updated information for the proposed Tomoka Reserve RPUD associated with 147.94+/- acres of property located at or near the intersection of N US Hwy 1 and N Nova Rd within Ormond Beach city limits. Proposed project would provide for three hundred (300) single family home units.

The district uses a county wide Student Generation Rate (SGR) of (0.273) per single family dwelling unit to calculate projected students. By applying the SGR to the use types in Table 1 below, the project could generate eighty-two (82) full time students.

Table 1

UNIT TYPE	SGR	UNIT COUNT	STUDENTS GENERATED
Single Family Dwelling Unit	0.273	300	82
Multifamily Dwelling Unit	0.127	0	0
Manufactured Home Dwelling Unit	0.047	0	0
	Total	**300**	**82**

When performing adequate capacity review district staff evaluates the effects of the proposed change compared to any remaining permanent capacity within the impacted schools, up to 100%, Table 2 (next page). The projected increase in student population may be over 100% if there are plans to serve increased student population in that planning area within the long-term planning horizon. A finding of adequate capacity may be issued in either case.

FACILITIES SERVICES
3750 OLSON DRIVE • DAYTONA BEACH, FL 32124
PHONE: (386) 947-8786 • FAX (386) 506-5056

An Equal Opportunity Employer

Table 2

Schools	SY 2022/23 Enrollment	% of Permanent Capacity	Plans for Capacity Increase Long-Term	Traditional K-12 students projected
Tomoka Elementary	690	109%	Yes	36
David C. Hinson, Sr. Middle	943	108%	No	21
Halifax CSA (Seabreeze High)	1,679	102%	No	24
Other				1

The student projections generated by this project **will** increase the existing percentage above 100% permanent capacity at all school levels. If evaluated against level of service (LOS) standards, Tomoka Elementary and Hinson Middle are at or over 100% but below 115% of current utilization rates. Tomoka Elementary is also on the school district's capital work program for a capacity increase and is included in an attendance boundary rezoning plan in the short term. At the middle school level, the use of adjacent concurrency service areas (CSAs) may also be needed at the time of school concurrency review. The high school CSA for Seabreeze High is also at or over 100% but below 120% for LOS standards. Because of the foregoing, the school district has no objections to the proposed development plan. Minimum planning considerations should include pedestrian and vehicular access, safety, connectivity, and buffering.

All future development orders, such as site plans and subdivisions, are subject to school concurrency review. School concurrency will be evaluated at the time when the impact of development is specifically quantified and known. Only funded school improvements and then current capacity will be considered at that time.

No student reservations have been made at this time.

Please note the School Board has the right to adjust the attendance boundaries to balance the student enrollment populations at these area schools. Consequently, students generated from this project may not attend the current assigned schools.

Should you need additional information, please contact me at (386) 947-8786, extension 50709.
Sincerely,

Stephanie B. Doster,
Coordinator, Planning

VOLUSIA COUNTY SCHOOLS

Finding of Adequate School Capacity

VOLUSIA COUNTY SCHOOL BOARD

Project Information	
Project Name	Tomoka Reserve RPUD
VCSB Project #	**23-02-24-002-A**
Jurisdiction Project #	
Parcel ID Numbers	3242-07-00-0010
Project Location	N US Hwy 1 and N Nova Rd
Potential Residential Units	300 Single Family Homes
Property Owner/Applicant	Robert A. Merrell III, Esq., Cobb Cole
Notes: Additional review will be required at the time of subdivision/site plan submittal(s). No Student Reservations have been made.	

Based upon the Findings of Fact, pursuant to School Board Policy 612 and Section 206 of the County Charter, the school district has determined at this time that school capacity is adequate to serve the proposed increase in residential density. This Finding shall constitute competent substantial evidence that adequate public school capacity is likely to be available at the time it is required to serve the planned new development.

Capacity is <u>not</u> being reserved with this Finding unless otherwise noted on this document. This Finding of Adequate School Capacity allows this subject project to continue through the Comprehensive Plan Amendment and/or rezoning process; however, it may be subject to additional school capacity review in the future.

Developers host first 'pre-neighborhood' meeting for Tomoka Oaks golf course project

The development process is estimated to take about two years.

By Jarleene Almenas | 12:00 p.m. May 21, 2021

ORMOND BEACH OBSERVER NEWS

Share

A marathon, not a sprint.

That is how Rob Merrell, attorney with Cobb Cole Law Firm, described the development process of the Tomoka Oaks Golf Course at the first of three community meetings held at the Ormond Beach Performing Arts Center on Thursday, May 20.

The golf course property was sold for $2.6 million and the developers — Carl Velie, Ray Barshay, Sheldon and Emily Rubin, which make up Triumph Oaks of Ormond Beach I, LLC — want to build single-family homes on the land. Velie and Barshay are locals. No site plans have been submitted to the city yet. Dwight DuRant, president of Zev Cohen and Associates, led the bulk of the two meetings, held at 4 p.m. and 6 p.m. DuRant said the purpose of the meetings was to listen to the Tomoka Oaks residents.

“We’re not selling anything tonight," DuRant said. "We want to seek your input and comments, and more specifically, your ideas. That’s most important to us. So we’re going to have big ears and small mouths.”

Some residents expected the meeting to consist of an open forum where they could voice their concerns, but DuRant explained that would likely take place in the second of the three community meetings, where they would present concepts as a result of feedback collected at the first meeting. Instead, following a short presentation, meeting attendees were instructed to split off into small groups to provide their feedback. Those attending online via Zoom were also encouraged to send in their comments.

Jim Rose, a resident of Tomoka Oaks and chairman of the homeowners association golf course committee, said he thought the meetings went well. The developers did what they said they were going to do. Certainly, he and his neighbors are not in a "great situation" — Rose's home borders the golf course — but he said it's unusual to have developers host pre-neighborhood meetings. He said residents who attended all had the opportunity to make their concerns on buffers, greenspace, tree preservation and traffic heard.

> “This is a tough situation for the 550 homes in Tomoka Oaks and the 178 on the golf course. It’s a difficult process but as a neighborhood, I think we’ll come together and try to make the best of it that we can to preserve the way of life that we’ve had there for so long.”
>
> *Jim Rose, chairman of the homeowners association golf course committee*

"We as the homeowner’s association, the golf course committee, are just trying to make the situation as palatable as possible considering that pretty much we’re sure there’s going to be development going in," Rose said.

Having lived in Tomoka Oaks for 31 years, Rose said it's a "shock to the system" to see change in their neighborhood. As outlined in the meeting, the process to develop the golf course is estimated to take about two years.

“This is a tough situation for the 550 homes in Tomoka Oaks and the 178 on the golf course," Rose said. "It’s a difficult process but as a neighborhood, I think we’ll come together and try to make the best of it that we can to preserve the way of life that we’ve had there for so long.”

City Commissioner Susan Persis, who represents Zone 3 of which Tomoka Oaks is in, attended both meetings, and said the development remains frightening for many longterm residents.

"There's a lot of feelings because they did buy on a golf course," Persis said."...People are just used to having a beautiful view and I don't think that should be taken away. I really don't."

The golf course, which spans 130 acres according to the Volusia County Property Appraiser's website, does not have a designated zoning, as a previous Planned Residential Development zoning order has since expired. It does, however, have a future land use of low density residential, which allows a maximum of 4.3 units per acre.

Persis doubts the maximum density of units could be placed on the property. More density means more traffic and she said she believes the current roads cannot handle much more. She believes there is a chance the golf course could be made into something beautiful, but that at the same time, developers want to make money. That shouldn't come at the cost of the residents' quality of life though, she said.

"The only thing I can do is, when the plan comes before the commission, vote in the best interest of those citizens," Persis said.

PRE-APPLICATION NEIGHBORHOOD MEETING

MEETING NOTES (Ormond Beach Planning staff)

6:00 P.M., July 15, 2021

Neighborhood Meeting commenced at 6:00 PM on July 15, 2021.

- Brief overview of the purpose of the meeting and results of the previous meeting were presented.

- Preliminary plan with 318 single family lots at 70' x 140', pocket parks in walkable distances, minimum 50', average 80' vegetative buffer around perimeter, street trees, pushing homes towards interior street to increase rear buffer.

- Public Comments:

    - **Overall concept:** Some residents were opposed to any development at all and some others praised the developer for sharing information above and beyond what was required. Some residents asked if the property, which was purchased for about $2.6 million could be purchased again by residents to stop the development altogether. Mr. Merrill said the property was not for sale but also that no viable offer has been made for consideration. Another resident asked the developer to consider innovative alternatives, such as an "agrihood" — a small farm surrounded by larger homes — rather than hundreds of average-sized homes. Concerns about Ormond Beach as a whole being overdeveloped. Concerns about housing values decreasing.

    - **Traffic concerns:** Concern for traffic was expressed. Sans Lassiter explained that based on the preliminary studies, a traffic signal is already warranted for the Nova intersection – without the new development. There was concerns about current traffic flow onto Nova and through the Trails Subdivision, single access onto Tomoka Oaks Blvd and existing pedestrian safety. Residents were advised to contact Shawn Finley about traffic calming solutions on S. Saint Andrews Drive.

    - **Tree preservation**- Tree assessment is ongoing. Tree preservation is high priority for design team.

    - **Buffers**- Some residents requested 100' minimum. Most residents were in favor of a trail located in the buffer area but away from existing homes.

    - **Amenities** – multiple residents expressed the desire for biking paths and trails. Concerns about access for Tomoka Oaks residents to the trails and pocket parks (access easement are needed

    - **Lot sizes**- some residents were opposed to the lot size and density by requesting larger lots widths. Most seemed in favor of lot depth however some residents suggested excess lot depth could go to increasing buffer size.

    - **Utilities**- concerns about existing electric coming in from Tomoka Oaks Blvd. Concerns about irrigation encroachment onto golf course. One resident mentioned concerns about protecting existing utilities during construction. One resident mentioned concerns of existing well supply.

    - **Architectural standards-** there were concerns about architecture however the design team is not at that stage yet.

Early concept: 318 homes on former Tomoka Oaks Golf Course

Ormond Beach Performing Arts Center hosted second of three neighborhood meetings to keep residents apprised of development.

By Brian McMillan | 8:15 p.m. July 15, 2021

ORMOND BEACH OBSERVER NEWS

After many people criticized the concept that 300 homes could be built on the former Tomoka Oaks Golf Course, another resident asked how many homes could legally be built there. The answer, 645, elicited gasps of disbelief

OPEN >
TV Plan$tronger™ It's Your Financial Future! 6PM Daily • WDSC TV-15 Your Host: David Holland

Rob Merrill, of Cobb Cole

Cobb Cole attorney Rob Merrill, representing the developers, reminded the residents that the conceptual plan presented at the meeting was preliminary: The lot size of 70 feet by 140 feet is not final, and neither is the number of homes, nor the layout.

“This is a starting point for conversation,” he said. “So if there’s something you hate about it, don’t hate it too much, because it could go away.”

Many attendees said they lived in nearby neighborhoods, Tomoka Oaks and The Trails, which were built in the 1970s and 1980s. One resident called the plan "insane," another said it was "ugliness." Others praised the developer for sharing information above and beyond what was required.

Traffic concerns

Several comments showed that residents are concerned about the traffic. Engineer Sans Lassiter said the plan was to have one entrance/exit from the proposed development onto Nova Road, which is maintained by the state. A study has shown, he said, that a traffic signal is already warranted at Nova and Tomoka Oaks.

“I don’t think this development is moving forward without a signal,” Lassiter said. He added, “We’re anticipating that the city will require us to look at much more than just the access point to Nova Road.”

Sans Lassiter, engineer

Lassiter suggested that traffic should not impact The Trails to a great degree, but he said modeling was being done to analyze the issue further.

The development will likely not be gated and likely will have its own homeowners association.

Saving trees

The developer hopes to build houses closer to the interior streets, with larger backyards and buffers, Merrill said. “Pocket parks” would add to the walkability of the new neighborhood.

Tree surveys are being conducted by Zev Cohen and Associates. Because the golf course land is at a higher elevation than most developments, fill dirt will not be needed, meaning that many more trees can be preserved than is typical.

Tomoka Oaks golf course sells for $2.6 million

April 7, 2017

Who wants a community center on the west side of Ormond Beach?

For sale?

Some residents asked if the property, which was purchased for about $2.6 million by Carl Velie, Ray Barshay and a third partner, could be purchased again by residents to stop the development altogether. Merrill said the property was not for sale.

Another resident asked the developer to consider innovative alternatives, such as an “agrihood” — a small farm surrounded by larger homes — rather than hundreds of average-sized homes.

Next steps?

The meeting on July 15 was the second of three to take place before submitting plans to the city for approval.

Dwight Durant, president of Zev Cohen and Associates

The third meeting, which has not yet been scheduled, is the first that would actually be required by the city of Ormond Beach; the first two were done as a goodwill gesture to provide transparency and solicit feedback.

“We are purposely not trying to work in the dark,” said Zev Cohen and Associates President Dwight Durant.

After the third meeting, the developer would make an application to the city; after staff input, the development would go to the Planning Board for approval, and then two votes by the City Commission.

Over 100 attended the meeting at the Performing Arts Center.

A rendering was created, Cobb Cole's Rob Merrill said, at the residents' request, but it is too early to make true plans.

Tomoka Oaks residents resigned to development

By Brent Woronoff bworonoff@hometownnewsmediagroup.com
May 27, 2021

Most Tomoka Oaks residents seem to have accepted the inevitable.

The new owners of the former Tomoka Oaks golf course will eventually build single family homes on the 147-acre property.

“We have a portion of people who hope the city of Ormond Beach or Florida Forever or Volusia Forever will (purchase the golf course) and keep it for green space,” said Jim Rose, chairman of the Tomoka Oaks Homeowners Association’s golf course committee. “I don’t think that’s going to happen, but we’re going to explore everything we can. I think most people have accepted that the development will go forward.”

Local businessmen Ray Barshay and Carl Velie bought the golf course property along with South Florida developer Sheldon Rubin and his daughter, Emily Rubin, for $2.6 million. They have yet to submit a site plan to the city.

On May 20, representatives of the new owners conducted two identical community meetings at the Ormond Beach Performing Arts Center to listen to residents’ concerns and suggestions.

Travel Places NearBy

Nearly 200 residents either attended the meetings in person or via Zoom. Dwight DuRant, president of Zev Cohen & Associates civil engineering firm, and Rob Merrell of the Cobb Cole law firm, told the attendees the purpose of the meeting was to share ideas on what the development would look like.

The residents were then broken down into small groups and all questions, suggestions and concerns were recorded, including those submitted online. The residents were told another meeting will be conducted within three months when possible plans will be discussed.

“These are not the mandated neighborhood meetings since they haven’t submitted a plan yet,” Mr. Rose said. “This is a very difficult situation, very emotional for many people. The developers know this is a fraught situation and they’ve gone above and beyond listening to what we have to say.”

Residents are most concerned about traffic problems that a possible 300 or more new homes could bring. The golf course property has a future land use designation of low density residential, which would allow up to 4.3 homes per acre.

Tomoka Oaks has one main entrance from Nova Road with a couple of smaller roads that go through The Trails subdivision.

"We're looking for a traffic light," Mr. Rose said. "And I think most people would like to see some kind of enhancement to the entrance to allow traffic to flow better."

Of the 550 homes in Tomoka Oaks, 178 are on the golf course. Those residents, especially, would like to see green-space buffers surrounding the new development. An online petition with more than 1,800 signatures requested a 100-foot conservation zone around the perimeter of the golf course property.

Peggy Brown was one of several Tomoka Oaks residents who spoke during public comments at the May 18 Ormond Beach City Commission meeting airing their concerns.

"People who purchase (their homes) on a golf course have certain expectations that they'll be living on a golf course or green space," she said. "I moved here four and a half years ago expecting that I'd have green space behind my home."

Among requests made in the break-out sessions at the community meetings were adding sidewalks – Tomoka Oaks currently has none – a nine hole golf course, which could be used as a buffer; saving the putting and driving range; adding amenities, such as a park, tennis and pickleball courts, a dog park, lighted trails and bike paths; and making sure the new homes fit the community.

"This is not a cookie-cutter neighborhood," one online commenter stated.

"Tomoka Oaks has pretty eclectic architecture," said Mr. Rose, a 31-year Tomoka Oaks resident. "It's nothing like houses you see now -- one style and close together."

The Sam Snead signature golf course opened in 1964 and closed about three years ago.

"I'm not happy with the situation," Mr. Rose said. "But I think the first pre-meeting went well and I think the people handled it well under the circumstances."

meeting

NEIGHBORHOOD MEETING
MEETING NOTES (Ormond Beach Planning staff)
February 8, 2023

Project team presentation:

1. Described lot layout and lot sizes. Larger lots planned along the project perimeter.
2. Detailed recreation and amenity areas.
3. 50-foot buffer planned with native planted buffer where gaps in the buffer exists.
4. Project provides deeper lots.
5. Description of the project stormwater and statement that the project would discharge less water than it does today.
6. Discussion by the traffic engineering firm regarding traffic. A traffic signal at Tomoka Oaks Boulevard and Nova Road is warranted.
7. Commitment to update traffic counts from original traffic study.

Meeting discussion points/comments/statements:

A. Traffic

1. Concern regarding the stacking of vehicles impacting the Escondido Condominiums.
2. Project traffic will impact the Trails subdivisions as individuals seek to access SR40.
3. Concern with the St. Andrews Drive and Tomoka Oaks Boulevard intersection.
4. Concern with construction traffic.
5. Existing traffic is dangerous and adding trips is more dangerous. It is an accident waiting to happen.
6. Inquiry on who is paying for the traffic signal.
7. Questions on the date of the traffic counts. Traffic engineer commented to performing updated traffic counts for the project.
8. Pedestrians have been hit with existing traffic in the area.
9. Live at the diamond intersection and traffic will be like I-95.
10. Sidewalks are needed.

B. Environmental

1. Increase pressure on the use of water as a result of this project.
2. Tomoka Oaks HOA should have standing to enforce buffer maintenance once planted.
3. There needs to be guarantees that vegetative buffer always to remain in place.
4. What are the impacts to existing trees of the proposed project.

C. Density/Lot Size

1. Project should be compatible with existing development.
2. Project should have less density then existing subdivisions.
3. Lot width is more important than lot depth.
4. Smaller lots are not compatible with existing Tomoka Oaks development.
5. Golf course should be included in Tomoka Oaks density calculations.
6. Multiple statements that the project, as designed, is not compatible with the existing development pattern of the area.
7. Oversized/large lots are needed.
8. Questions on the number of lots and lot sizes.

D. Stormwater

1. Concern with recent flooding events and storms.
2. How will project drainage concerns be addressed.
3. The fertilizers associated with the project lots will have negative impacts.

E. Comments

1. Shoving 10 pounds into a 5-pound bag.
2. Project should provide underground utilities.
3. Project lacks specification and there are inconsistencies.
4. Project is playing games with numbers.
5. Development in development is not good for Tomoka Oaks residents.
6. Development plans should not be self-amending.
7. Devastating impacts to schools.
8. Project will decrease the quality of life and property value for existing residents.

Tomoka Oaks residents question development of 300 homes in former golf course

The developers held two neighborhood meeting sessions on Wednesday, Feb. 8.

By Jarleene Almenas | 1:40 p.m. February 9, 2023

Tomoka Oaks resident Tom Fitzgibbon speaks during the first session of the neighborhood meeting for the development of the Tomoka Oaks golf course. Photo by Jarleene Almenas

ORMOND BEACH OBSERVER

Share

Three-hundred homes. Roughly 600 more cars. One shared entrance and exit.

"This is a community trying to be built within a community," Tomoka Oaks resident Michelle Zirkelbach said.

For the past two years, Tomoka Oaks residents have been paying close attention to what's been happening on their former golf course, located at 20 Tomoka Oaks Boulevard. When developers Carl Velie, Ray Barshay, Sheldon and Emily Rubin purchased the property in April 2021, and indicated a desire to build single-family homes on the approximately 147-acre golf course, residents went on high-alert.

And on Wednesday, Feb. 8, as representatives of Triumph Oaks of Ormond Beach I, LLC presented preliminary plans for the Tomoka Reserve development during two neighborhood meeting sessions at Temple Beth-El, residents questioned how it would impact current traffic, the proposed density and claims from the project's engineers that the proposed subdivision would be compatible with Tomoka Oaks, despite having smaller lot sizes.

"Compatible means to get along with in harmony," Zirkelbach said. "And mathematically, compatible means to be congruent, and congruent means coinciding on all points."

Density in numbers

In order to move forward with the project, the developers are seeking a rezoning of the golf course property to a Planned Residential Development. The land is currently zoned Low Density Residential, allowing 4.3 homes per acre.

By rezoning to a PRD, the developers said the proposed unit count would equate to a maximum density of 2.03 units per acre, according to the project narrative submitted to the city.

Jake Stehr, with Zev Cohen and Associates, stated that the proposed development is below the existing density of Tomoka Oaks.

The developers are proposing the construction of 300 homes in the former Tomoka Oaks Golf Course property. Courtesy of the city of Ormond Beach

"We feel like we're really trying to match what's around us, and we're doing this in a couple different ways," Stehr said. "Obviously, we're not coming in with the same units that you're seeing. We're coming with a more modern footprint, coming with park spaces distributed throughout the development. We're really trying to have a site that celebrates existing landscapes and allows for outdoor recreational opportunities."

In addition to single-family homes, the development could have quadplexes.

Stehr added that the developers will be increasing the vegetation in the buffers, with the minimum buffer length being 50 feet. A total of 17%, or 29 lots, will have that minimum buffer. The remaining 172 proposed lots along the development's edges would have buffers varying between 50 to 125 feet.

In addition, 22% of the site would be dedicated as open space, plus 11% for dry retention ponds.

'Keep new developments in check': Q+A with Zone 3 City Commissioner Susan Persis

April 5, 2023

'We have something special here in Tomoka Oaks': Residents, stakeholders weigh in on golf course development

Residents, however, expressed distrust in the developers' numbers. One resident pointed out that the numbers in the project's narrative submitted to the city, particularly concerning the Tomoka Oaks subdivision, were different than the ones presented during the meeting.

At the meeting, engineers cited Tomoka Oaks' density, with about 550 homes, was 2.6. The narrative stated it was 2.82.

"So I don't have confidence in your numbers," resident Carolyn Davis said.

Cobb Cole attorney Rob Merrill, representing the developers, directed residents to talk to Ormond Beach city staff regarding numbers.

"I think what we were trying to get across was our intent in coming up with this plan in large part was based on trying to match the density you guys had or be less than your density, Merrill said. "That's the plans we brought forth, the way we've calculated it. Everybody can differ about mathematics."

The residents hummed in disagreement.

Too many cars

To address future traffic generated by the proposed development, a new traffic signal will be constructed by the developer at Tomoka Oaks Boulevard and North Nova Road.

"Do we really think a traffic light is the solution?" Tomoka Oaks resident Caryn Baker asked. "... I don't think anybody here believes that a traffic light is going to solve the additional traffic that we're going to have to deal with."

Sans Lassiter, president of LTG Engineering and Planning, said yes. Based on simulations, a stop sign wouldn't work at Tomoka Oaks Boulevard and North Nova Road. A traffic light would, and the simulation showed queues to exit the subdivisions on Tomoka Oaks Boulevard wouldn't extend past the Escondido condominiums.

Tomoka Oaks resident Carolyn Davis holds a sign opposing the development during the first neighborhood meeting session on Wednesday, Feb. 9. Photo by Jarleene Almenas

Residents said that there would be too many cars utilizing Tomoka Oaks Boulevard once the development is built out. If the developer constructs 300 homes, and each home has an average of two cars, there will be 600 more cars on the current two-lane residential street.

"You've got a rotary that you guys are creating, then you are indicating to us that you're going to have just a simple intersection, a cross-intersection with stop signs right [at Tomoka Oaks Boulevard]," Tomoka Oaks resident Tom Fitzgibbon said. "Now, that will not handle the volume of traffic."

The only other way to exit or enter Tomoka Oaks is through The Trails.

Lassiter said they are looking at existing traffic conditions as well as projected conditions, and that the traffic analysis isn't complete yet.

"We're going to have to do an updated analysis at the time that we come in for concurrency and final approvals," he said.

Tomoka Oaks resident Mary Greenlees asked if the developers were sure they didn't want to sell the former golf course property.

"You guys have a long road ahead of you," she said. "The momentum is building. Your legal accounting, traffic engineering fees are building up."

Lot size dispute

When it comes down to proposed lot sizes, engineers said the lots adjacent to the buffers will all be 80 feet by 140 feet. Merrill said the developers were trying to be mindful of the lot sizes, but several residents voiced opposition against this, pointing out that the average lot in Tomoka Oaks is much larger, particularly in width.

Resident Missy Herrera said some lots in Tomoka Oaks could face two or three houses in their backyard. She argued against the developers' claim that their lot sizes are compatible because the square footage is similar.

"You guys are playing games with numbers," Herrera said. "But the reality is, we're talking about 100-foot lots (in Tomoka Oaks) and you're manipulating things to say, 'Oh, we're less dense.' The reality is it's not less dense. We're going to be looking at a solid wall of houses with 14 feet between them."

The developers are proposing the construction of 300 homes on the former Tomoka Oaks Golf Course land. Photo by Jarleene Almenas

Merrill responded that no one was playing games, and that they now understood width was more important, though he said that Tomoka Oaks residents would likely not see into the backyards of the new development due to the buffer and setbacks.

"Although most communities, people do live in each other's backyards, but we understand that in this case, it used to be a golf course," Merrill said. "So we get it. We understand."

Dennis Bayer, an attorney representing the Tomoka Oaks Homeowners Association, said he felt like he was in "Groundhog Day" during the meeting.

"We've talked about the 100-foot widths a year and a half ago when we first met," Bayer said. "We talked about the design on Tomoka Oaks Boulevard. I really would like to emphasize we need to see some more specifics at this point in the game before going forward."

Issues the HOA had raised months ago, Bayer said, continue to be unaddressed.

Picking up on the fact the developers are proposing a pickleball court for the new subdivision, Zirkelbach asked the developers if a court measuring 30 feet by 60 feet would be just as suitable for the sport as one measuring 10 feet by 180 feet.

"Are they both compatible for playing pickleball? The answer would be no, Mr. Merrill, you and I both know that," she said.

Tomoka Oaks neighbors don't want more neighbors in Ormond Beach

By John Bozzo jbozzo@hometownnewsmediagroup.com
Feb 16, 2023

About 250 people attended back-to-back neighborhood meetings with criticisms and questions about plans to build 300 homes on Tomoka Oaks Golf Course in Ormond Beach.

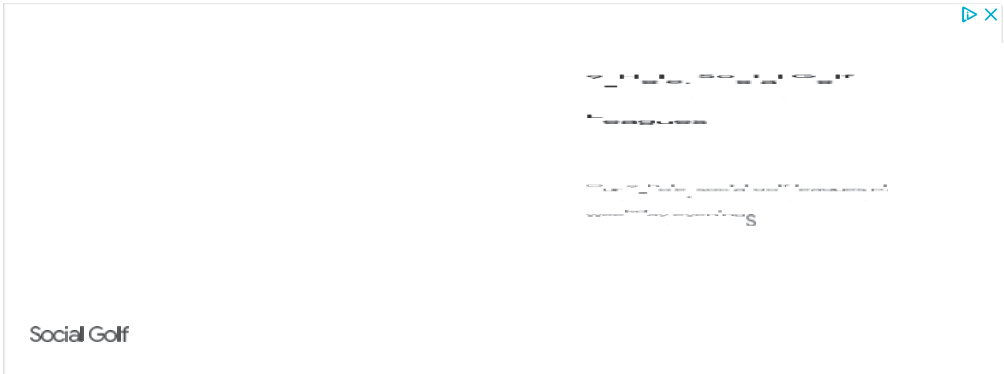
Homeowners who live around the golf course expressed outrage their homes will no longer surround one.

More than one speaker derided the idea of a "development within a development."

"Don't take this seriously, but take it seriously, we don't really want you here," resident Robert Banker said toward the end of the four-hour sessions.

A few residents wore green T-shirts asking to save the golf course and some had a small sign opposing the development.

One woman passed out a green sheet of paper with "talking points" for opponents of the Tomoka Reserve plan.



Talking points included:

•Traffic impact in an already congested area

•Fear of decreasing property value of homes originally sold as part of a golf course community

•Disputing developer claims that Tomoka Reserve would be compatible with existing homes

•Reduced quality of life from the visual impact of a neighborhood instead of a golf course, as well as years of construction noise and dust, more traffic increasing congestion and decreasing safety

•Questioning whether public infrastructure, such as hospital beds, classrooms and water are adequate

People also expressed concerns on their own without prompting from a cheat sheet, including whether the landscape buffer would be maintained, urging tree preservation and, the concern of many, stormwater runoff and flooding.

Members of the development team responded to the questions and comments, although satisfying people appeared unlikely.

Landscape buffers would be maintained by a homeowners association, home placement on lots will be done to minimize tree removal and a stormwater plan will be designed to contain rainwater and treat it on site, according to various members of the development team.

A traffic light will be placed at Tomoka Oak Boulevard and Nova Road.

In response to numerous questions about the traffic study, Sans Lassiter, president of Lassiter Transportation Group, guaranteed a traffic study performed in 2021 during the Covid-19 pandemic would be re-done.

Residents pressed for another public neighborhood meeting.

Rob Merrell, a Cobb Cole attorney representing the developer, said the Feb. 8 meeting at Temple Beth-El was the third neighborhood meeting. When he doubted whether there could be another neighborhood meeting there was a loud groan of disapproval from the audience.

Mr. Merrill explained how the proposed Tomoka Reserve project must still go through a full review with the City of Ormond Beach, including a meeting with the Site Plan Review Committee, an appearance on the Planning Board agenda and two public hearings with the City Commission.

All the meetings are public and the public may speak at the Planning Board and City Commission meetings.

Dates for those meetings have not yet been set.

Re: ***Tomoka Reserve – PRD-2022-043***

Dear Chairman Thomas & Planning Board Members:

Our law firm represents Carolyn Davis and a consortium of homeowners within the Tomoka Oaks Country Club Estates subdivision in Ormond Beach, Florida ("Tomoka Oaks"). At its regular meeting on ***Thursday, July 13, 2023***, the Ormond Beach Planning Board ("Planning Board") is scheduled to consider the above-referenced project, which seeks to rezone and convert the existing Tomoka Oaks golf course into 276 single-family residential lots. For the reasons discussed herein, our clients oppose the proposed redevelopment of the golf course property and respectfully request that the Planning Board recommend ***denial*** of the proposed rezoning.

A. General Factual Overview

Briefly stated, in April 2021, Triumph Oaks of Ormond Beach, LLC ("Triumph Oaks"), purchased the Tomoka Oaks Golf & Country Club ("Golf Club") for approximately $2,600,000. Thereafter, Triumph Oaks filed an application with the City of Ormond Beach ("City") seeking to rezone the golf course property to Planned Residential Development (PRD) and redevelop the golf course with 276 single-family residential lots. Based upon such rezoning application and Triumph Oaks' proposed plans to permanently close the Golf Club and convert the golf course into 276 single-family lots, the issue has arisen as to whether the property is restricted to use as a golf course, either expressly or impliedly.

As discussed herein and based upon the historical and recorded documentation relating to Tomoka Oaks, our clients maintain that the Golf Club property is subject to either an express covenant or an implied covenant limiting the use of the property to a golf and country club, golf course, and related recreational uses. Accordingly, our clients assert that the proposal to convert

the Golf Club property into 276 single-family residential lots is not permissible and the requested rezoning should be ***denied***.

B. The Golf Club Restriction

In 1961, the City approved plats for both the Golf Club (f/k/a Sam Snead Golf & Country Club) and Tomoka Oaks Country Club Estates Unit 1.[1] The Plat for Unit 1 of the Tomoka Oaks Country Club Estates subdivision contained 105 residential lots, including approximately 55 residential lots bordering the golf course.[2]

In conjunction with the development of Unit 1 of Tomoka Oaks, the developer recorded "Restrictions Tomoka Oaks Country Club Estates, Unit #1, Ormond Beach, Florida" ("Unit 1 Covenants").[3] Notably, Paragraph 10 of the Unit 1 Covenants states:

> The Grantee [*i.e.*, lot owner] shall automatically become a member of the Tomoka Oaks Homeowners Association, a non-profit corporation comprised of all lot owners in Tomoka Oaks Country Club Estates . . . .

Paragraph 11 of the Unit 1 Covenants expressly prohibited the developer from releasing in whole or in part any restriction or reservation set forth in Paragraph 10.

Thereafter, on or about January 1, 1963, Tomoka Oaks, Inc., entered a 99-year "Lease" with Tomoka Oaks Golf and Country Club, Inc., for the golf course property.[4] Paragraph 3 of the Lease, entitled "Use," provided in pertinent part:

> ***The demised premises shall be used perpetually for a country club and related uses***. . . . ***This provision shall survive the lease*** and be included in any deed but the deed restriction may be waived by a resolution of two-thirds (2/3) of the Board of Directors of the Lessee with the concurrence of two-thirds (2/3) of the members of said Lessee and the concurrence of two-thirds (2/3) of the members of Tomoka Oaks Homeowners Association. . . .[5]

On or about October 30, 1963, Tomoka Oaks Golf and Country Club, Inc., executed a "Surrender of Lease."[6] As noted above, however, the limitation that the subject property be "used perpetually for a country club and related uses" survived the Lease per the express terms of Paragraph 3 therein.

---

1 *See* Book 25, Page 61, Official Records of Volusia County, Florida; *Id*. at Book 25, Page 58.
2 *See id*. at Book 25, Pages 58 and 59.

4 *See id*. at Book 516, Page 360.
5 *See id*. at Page 362 (emphasis supplied).
6 *See id*. at Book 585, Page 155.

Following the Surrender of Lease, Tomoka Oaks, Inc., conveyed the golf course property to Ralph B. Frederick, Trustee, via Warranty Deed dated December 12, 1963 ("1963 Warranty Deed").[7] Notably, the 1963 Warranty Deed for the golf course property provided in pertinent part:

> ***The above described property shall be used perpetually for purposes of a golf and country club, golf course, and related uses***, and in the event that party of the second part, or its successors in interest, ***fail to utilize said property exclusively as a golf and country club, golf course, and related uses***, and the property not be sold to Tomoka Oaks, Inc., Tomoka Oaks Golf and Country Club, Inc. or Tomoka Oaks Homeowners Association as specified in the preceding paragraph, ***then the above described property shall automatically revert*** to and become the property of party of the first part . . . .
>
> ***The aforesaid reverter clause specified in the last preceding paragraph may be released or modified*** by resolution concurred in by two-thirds of the entire board of directors of Tomoka Oaks, Inc. at any time after ten years after the date of recording of this Deed; provided that if Tomoka Oaks, Inc. shall have disposed of four-fifths (4/5) of the lots in Tomoka Oaks Country Club Estates, then the foregoing right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks Homeowners Association, Inc., to be exercised by resolution of two-thirds (2/3) of the Board of Directors of the Tomoka Oaks Homeowners Association, Inc.[8]

Consistent with the terms of the surrendered Lease, the 1963 Warranty Deed expressly provided that the subject property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." Moreover, while the 1963 Warranty Deed included language and a process for the release or modification of the "reverter clause," there is no language in the 1963 Warranty Deed authorizing the release or modification of the actual restrictive covenant limiting the use of the property to a "golf and country club, golf course, and related uses."

On or about February 18, 1969, Tomoka Oaks, Inc., purported to pass a "Resolution" to effectuate the sale of the golf course property to Ormond Ocean Homes, Inc.[9] Therein, Tomoka Oaks, Inc., purported to "release . . . its right of first refusal" and "further releases the reverter clause contained in [the 1963 Warranty Deed], such release of reverter to become effective December 13, 1973, the release date specified in such reverter clause."[10] Relying upon such Resolution, Tomoka Oaks, Inc., executed a "Release" on or about June 16, 1971, purporting to

---

[7] *See id*. at Book 585, Page 157. At the time of such conveyance, Ralph B. Frederick was also apparently the President of Tomoka Oaks, Inc.

[8] *See id*. at Page 159 (emphasis supplied).

[9] *See id*. at Book 1238, Page 246.

[10] *See id*. at Page 248.

release its "right of first refusal" and the "reverter clause contained in [the 1963 Warranty Deed], such release of reverter to become effective December 13, 1973, the release date specified in such reverter clause."[11]

Based upon the foregoing Resolution and Release, Triumph Oaks and/or its representatives have suggested to the City that the use restriction imposed upon the golf course property is no longer valid or in effect. Our clients maintain that this view is legally flawed and without merit.

As reflected above, the 1963 Lease for the golf course property expressly provided that "[t]he demised premises shall be used perpetually for a country club and related uses" and that such "provision shall survive the lease." Additionally, and consistent with the 1963 Lease, the 1963 Warranty Deed expressly provided that the property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." While the 1963 Lease mentions a process by which such use restriction could potentially be waived, the historical documentation presented to our office does not establish that such process was ever followed – *i.e.*, concurrence of two-thirds of the Lessee and its members and two-thirds of the members of the Tomoka Oaks Homeowners Association.[12]

Further, while the 1963 Warranty Deed included language and a process for the release or modification of the "reverter clause," there is no language in the Warranty Deed authorizing the release or modification of the actual restrictive covenant limiting the use of the property to a "golf and country club, golf course, and related uses." Rather, the 1963 Warranty Deed unambiguously states that the subject property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses."

Lastly, reliance upon the 1969 Resolution and the 1971 Release to claim that the use restriction was somehow waived or released is misplaced. Even assuming the 1969 Resolution and the 1971 Release are valid – which is questionable – neither document purports to release, waive, or otherwise modify the use restriction.[13]

---

[11] *See id*. at Book 1307, Page 89.

[12] The historical documentation provided to our office, including newspaper articles, reflect the existence of a "Tomoka Oaks Homeowners Association" during the subject timeframe.

[13] The 1969 Resolution and the 1971 Release are of questionable validity given that they purport to "prospectively" release the "right of reverter." By its own terms, the 1963 Warranty Deed provided that Tomoka Oaks, Inc., could release or modify the reverter clause only by resolution "at any time ***after*** ten years ***after*** the date of recording of this Deed" and only if Tomoka Oaks, Inc., had not yet disposed of four-fifths (4/5) of the lots in Tomoka Oaks at such time. *See* Book 585, Pages 158-59, Official Records of Volusia County (emphasis supplied). Contrary to the plain language of the 1963 Warranty Deed, Tomoka Oaks, Inc., purported to pass a resolution more than four (4) years ***before*** the ten (10) year anniversary of the recording of the 1963 Warranty Deed seeking to release the right of reverter. Further, the fact that the 1969 Resolution and the 1971 Release purported to "delay" the effectiveness of such release until December 13, 1973 (*i.e.*, ten (10) years after the 1963 Warranty Deed was recorded) is irrelevant. Not only does it ignore the fact that the 1963 Warranty Deed required the resolution itself to occur ten (10) years ***after*** the

As discussed above, the 1969 Resolution and the 1971 Release purport to release the "right of first refusal" and the "reverter clause." Nothing in the express language of the 1969 Resolution or the 1971 Release, however, purports to waive, release, or otherwise modify the use restriction providing that the property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." Accordingly, based upon the foregoing and the plain and unambiguous language in the 1963 Lease and the 1963 Warranty Deed, our clients maintain that such use restriction is valid and effective and was never lawfully released, waived, or otherwise terminated. On this basis alone, the proposed conversion of the golf course into 276 single-family residential lots would be prohibited and the Planning Board should recommend ***denial*** of the proposed rezoning.

C. Implied Restriction Limiting The Tomoka Oaks Property To Use As A Golf Club

In addition to the above, it is well established that a "restrictive covenant" may "arise by implication from the conduct of parties or from the language used in deeds, plats, maps, or general building development plans."[14] In this regard, courts have recognized:

> If there is a common plan of development that places restrictions on property use, then such restrictions may be enforced in equity. "A court's primary interest in equity is to give effect to the actual intent of the grantor . . . by looking not only to language in deeds, but variously to matters extrinsic to related written documents, including conduct, conversation, and correspondence."[15]

Consistent with the above, Florida courts have held that use restrictions may also be implied based upon notations denoted on plats or maps:

> Whenever the owner of a tract of land subdivides the same into lots and blocks, lays off streets and other public ways and designates portions of said lands to be parks[,] playgrounds[,] or similar facilities or uses similar words calculated to encourage prospective purchasers to buy said lots, and actually sells lots with reference to the plat, he becomes bound to his grantees by the plat and the representations thereon. As the maker of the plat and the one who selects the words used thereon it will be construed against him.

---

recording of the Deed, but it ignores the fact that Tomoka Oaks, Inc., did not have any authority to adopt any such resolution if four-fifths (4/5) of the lots in Tomoka Oaks had been disposed of by such time.

[14] *See Skyline Woods Homeowners Ass'n. v. Broekmeier*, 805, 758 N.W.2d 376, 387 (Neb. 2008).

[15] *See id*. (citation omitted); *see also Strader v. Oakley*, 410 So. 2d 954, 955-56 (Fla. 1st DCA 1982) (recognizing implied restriction that limited construction to only single-family residences).

> Common honesty requires that he perform that which at the time of conveyance he represented he would perform.[16]

Turning to the instant case, several courts have examined implied restrictions and the requirement to maintain or operate property as a golf course when developed in conjunction with a surrounding residential subdivision. For example, in *Shalimar Association v. D.O.C. Enterprises*, 688 P.2d 682 (Az. Ct. App. 1984), the court held that there was an implied restrictive covenant to maintain property as a golf course even though there were no express covenants burdening the golf course property on behalf of the adjoining homeowners. The court concluded that the common plan of development, which included a golf course, combined with the representations made to the purchasers about the maintenance of the golf course and the adjoining homeowners' express covenants, created an implied restrictive covenant that the land be used only as a golf course.

Similarly, in *Ute Park Summer Homes Association v. Maxwell Land Grant Co.*, 427 P.2d 249 (N.M. 1967), the New Mexico Supreme Court found that an implied restriction existed requiring the subject property to be used as a golf course. In so doing, the court focused on the representations made to prospective purchasers and the materials used in the sales of the lots which pictured an area marked "golf course." The court reiterated that, when a map or plat showing a park or other open area is used to sell property, "the purchaser acquires a private right, generally referred to as an easement, that such area shall be used in the manner designated," and such private right "is not dependent on a proper making and recording of a plat for purposes of dedication."[17]

Numerous other courts have concluded that the facts surrounding the initial development of properties as golf course communities and the marketing of lots in such communities to prospective purchasers created an "implied restrictive covenant" limiting the use of the subject properties to a golf course. In reaching this conclusion, the courts have examined such things as: (1) the plats, maps, and drawings of the community; (2) advertisements, brochures, and marketing materials; (3) common schemes or plans of development; (4) recorded covenants; (5) general informational documents regarding the community; and (6) lot premiums and purchasers' reliance upon the existence of the golf course in acquiring their lots.[18]

---

[16] *McCorquodale v. Keyton*, 63 So. 2d 906, 910 (Fla. 1953); *see also Boothby v. Gulf Props. of Ala.*, 40 So. 2d 117 (Fla. 1948). A common plan or scheme of development is a well-recognized principle in Florida law. *See Hagan v. Sabal Palms, Inc.*, 186 So. 2d 302, 307 (Fla. 1966).

[17] *Ute Park Summer Homes Association v. Maxwell Land Grant Co.*, 427 P.2d 249, 253 (N.M. 1967).

[18] *See Knight v. City of Albuquerque*, 794 P. 2d 739 (N.M. Ct. App. 2014) (holding property denoted on subdivision plats as a golf course must remain either a golf course or open space, stating "a developer will not be allowed to induce purchasers to buy property by purporting to include open space such as parks or golf course in a subdivision plat, only to subsequently change the uses of those open space areas"); *In re Heatherwood Holdings, LLC v. HGC, Inc.*, 746 F.3d 1206 (11th Cir. 2014) (holding evidence of common scheme of development that included golf course property as an integral part and as an inducement to purchasers of residential lots

Here, the historical documentation relating to Tomoka Oaks and the Golf Club establishes the following: (1) a common developer (Tomoka Oaks, Inc.) with a plan of development for a residential community surrounding an 18-hole championship golf course; (2) an approved unified master plan for Tomoka Oaks, which included the golf course and the residential lots; (3) references to "golf course" on the recorded plats for various portions of Tomoka Oaks; (4) recorded restrictions, as previously discussed, providing that the golf course property shall be used "for purposes of a golf and country club, golf course, and related uses"; (5) recorded residential covenants that reference the golf course and authorize reduced setbacks to take advantage of the adjoining golf course; (6) marketing and sales materials for the residential lots depicting the common development plan, including the golf course; (7) evidence of lot premiums being charged for residential lots with golf course frontage; and (8) evidence that successors developers had actual, as well as constructive, notice of the approved master plan and common plan of development. Additionally, it is indisputable that residents within Tomoka Oaks purchased their properties in reliance upon or because of the Golf Club.

Accordingly, even assuming the express covenant restricting use of the subject property to a golf and country club is no longer valid as Triumph Oaks has erroneously suggested, the above-summarized facts and cited case law would establish that, at a minimum, the use of the Golf Club property is limited to a golf course or similar open space purposes by virtue of an implied restrictive covenant. Simply put, whether by an implied grant, implied restriction, or estoppel, such restriction would prevent the subdivision and development of the Golf Club property with 276 single-family residential lots as currently proposed. Thus, on this additional basis, the Planning Board should recommend ***denial*** of the proposed rezoning.

D. Conclusion

In sum, as discussed herein, nothing in the express language of the 1969 Resolution or the 1971 Release purports to waive, release, or otherwise modify the use restriction imposed via the 1963 Lease and the 1963 Warranty Deed that the property "shall be used perpetually for purposes of a golf and country club, golf course, and related uses." Thus, based upon the foregoing and the plain and unambiguous language in the 1963 Lease and the 1963 Warranty Deed that the use

---

therein created an implied restriction limiting the use of such property to a golf course); *Ponderosa Pines Golf Course, LLC v. Ponderosa Pines Prop. Owner's Ass'n*, 2013 WL 4515569 (N.M. Ct. App. 2013) (holding "equitable servitude in favor of the individual subdivision property owners precluded Plaintiff from changing the use of the golf course"); *Skyline Woods Homeowners Ass'n.*, 758 N.W.2d at 390 ("We conclude that homeowners who bought their property relying on the proximity and existence of the golf course should be protected by implied restrictive covenants that the property be maintained as a golf course. We therefore agree with the district court that an implied restrictive covenant requiring that it be used only as a golf course burdens and runs with the golf course property."); *see also Victorville W. Ltd. P'ship v. Inverrary Ass'n*, 226 So. 3d 888 (Fla. 4th DCA 2017) (refusing to cancel golf course covenant even though course had become unprofitable, concluding that "the golf course preserves the character of the community and provides residents with a pleasant view" and, thus, "must be enforced because it remains a 'substantial value to' the surrounding residences").

restriction was to be "perpetual," our clients maintain that such use restriction is still valid and in effect. Accordingly, on this basis alone, our clients respectfully submit that the Planning Board should recommend ***denial*** of the proposed rezoning, which seeks to improperly convert the Golf Club property into 276 single-family residential lots, or otherwise table the matter until such time as a judicial determination is made regarding the continued validity of the express restrictive covenant.

Further, even assuming the express restrictive covenant is no longer valid and in effect, as Triumph Oaks has erroneously suggested, our clients maintain that the Golf Club property is nevertheless subject to an implied restrictive covenant, thereby limiting the use of such property to a golf and country club, golf course, and related recreational uses. On this additional basis, our clients respectfully submit that the Planning Board should recommend ***denial*** of the proposed rezoning or otherwise table the matter until such time as a judicial determination is made regarding such implied restriction.

Our clients appreciate the Planning Board's attention to this matter of great community importance to the residents of Tomoka Oaks and respectfully request that the Planning Board recommend ***denial*** of the proposed rezoning. Please do not hesitate to contact me if you have any questions or need additional information,

Sincerely,

S. Brent Spain

Introduction Statement for City of Ormond Beach Planning Board Members

RE: Parcel 39-14-32

- The Sam Snead Golf and Country Club
- Tomoka Oaks Country Club Estates

Based on extensive research of Volusia County Records, *Daytona Beach News-Journal* archives, and current Florida Case Law involving residential development of golf course property, it is my opinion the Sam Snead Golf and Country Club has a current protected "use" as follows: **Property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.**

And I believe the Tomoka Oaks Homeowners association has been vested with Reverter rights as intended in the original protective covenants and restrictions should the golf course property not be used as restricted.

My goal with this report is to show:

1. The **Sam Snead Golf and Country Club** and the **Tomoka Oaks Country Club Estates** were designed as a **Master Planned Community** and were developed, marketed and sold as coexisting for their mutual benefit and protection.

2. Protective covenants and restrictions recorded in Book 585 Page 157 dated 12/12/1963 by the original developer, Tomoka Oaks, Inc.:

- Encumbered upon the Sam Snead Golf and Country club a restrictive covenant declaring, "**Property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.**"
- Recorded specific protective covenants and restrictions to ensure homeowners investments and rights were protected via Reverter rights should the coexisting golf course ever be sold and not used as intended.

3. Beginning in 1969, officers and stockholders in the **Sam Snead Golf and Country Club** and the **Tomoka Oaks Country Club Estates**, recorded questionable, unethical, and possibly illegal recordings with Volusia County which attempted to systematically release or negate the original protective covenants and restrictions from 1963.

4. Multiple conflicts of interest in cross-ownership invalidate the Recordings referenced in the above preceding paragraph; therefore the original 1963 protective covenants and restrictions are still in effect today and continue to:

- Protect the restricted "use" of the **Sam Snead Golf and Country Club** as follows: **Property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.**
- Grant to the Tomoka Oaks Homeowners Association the reverter right should the owners of the Sam Snead Golf and Country Club fail to utilize the property exclusively as a golf and country club, golf course, and related uses.

5. My last goal is to ensure for all time that the golf course property be protected from residential development.

Disclosures:

My research was done independent of any other homeowner in Tomoka Oaks Country Club Estates or the Tomoka Oaks Homeowners Association. Therefore all opinions expressed are my own.

I have included Citations throughout this report that reference:

- Recordings on file with Volusia Country
- Plats and Meeting Minutes on file with Volusia County and the City of Ormond Beach
- *Daytona Beach News-Journal* archives accessed at NewsBank.com

I am not an attorney or a real estate lawyer. In order to familiarize myself with the current climate around the development of vacant golf courses in Florida, I researched recent Florida judicial decisions related to this controversial topic. I was encouraged by recent rulings that parallel the current development proposal for the Sam Snead Golf and Country Club and which favor the upholding of covenants and restrictions that benefit residential estate owners, preserve the character of a community, prevent overcrowding, and provide homeowners a tranquil and pleasant view.

As stated, I am not an attorney but am in the process of identifying law firms which can represent my interests should civil litigation become necessary.

Master Planned Community

According to my research: Beginning in 1956, Tomoka Oaks, Inc. designed and developed a master planned community comprised of a coexisting golf course surrounded by residential lots:

- The Sam Snead Golf and Country Club
- Tomoka Oaks Country Club and Estates

As characteristic of a master planned community, the golf course and the estates:

1. Shared a common developer: Tomoka Oaks, Inc.

2. Were designed, developed and marketed to coexist; the golf course restricted 'use' contributed to the value of the lots that surrounded it, and restrictions on the lots contributed to the value of the golf course.

3. The planned amenities of the golf course were intended to enhance homeowners' enjoyment.

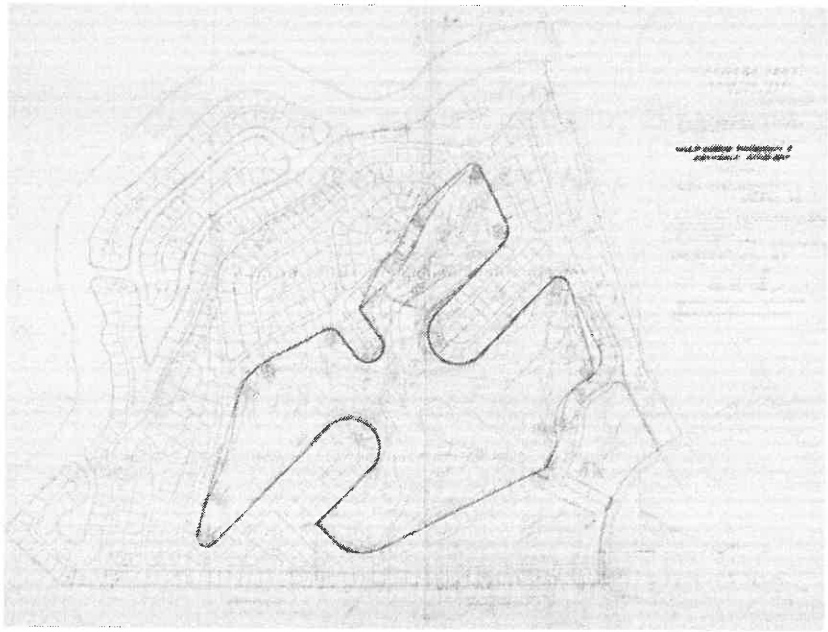
4. Were developed in phases and units that required and received Volusia County Commission approval and/or Ormond Beach City Commission approval to ensure adherence to the master plan.

5. Recorded restrictions and covenants which:

    - Encumbered golf course property use as: **Property shall be used perpetually for purposes of a golf and country club, golf course, and related uses**
    - Originally provided (and intended to provide) automatic membership in the Tomoka Oaks Homeowners Association for all lot owners.
    - Protected residential property owners' financial investments in this "exclusive, luxury" community which was purposely planned and protected to provide residents "healthful, contented living" in their enjoyment of this "magnificent natural beauty spot."

6. Differentiated lot parcel 'neighborhood descriptions' in Volusia County Property Appraisals as either:

    - Neighborhood: 2678 - TOMOKA OAKS (GOLF COURSE)*
    - Neighborhood: 2680 - TOMOKA OAKS (NON GOLF COURSE)



For the Reader's information:

- The proceeding pages of this section explain the planned development of The Sam Snead Golf and Country Club and the Tomoka Oaks Country Club Estates from 1960 - 1979. Citations for all master plan references, and the opinions I expressed above and throughout the proceeding pages, are cited on the proceeding pages as well as in the End Notes.
- All *Daytona Beach News-Journal* article citations come from www.newsbank.com accessed through the Volusia County Library.
- Throughout this "Master Plan" section, there are specific references by the Ormond Beach City Commission to the "master plan." At the end of this section of the report (just prior to Endnote citations), I provide details on the Public Records Requests I submitted to the City of Ormond Beach for all supporting documents related to the master plan.
- All opinions are my own. I did not collaborate with any other Tomoka Oaks homeowner or with the Tomoka Oaks HOA.
- *The Volusia County Property Appraiser's website now defines Neighborhood: 2678 as" TOMOKA OAKS (FORMER GOLF COURSE)." The addition of "FORMER" occurred sometime after August 2021 when I exported parcel information from https://vcpa.vcgov.org/search/real-property#gsc.tab=0 . My Excel exports from August 2021 define Neighborhood: 2678 as "TOMOKA OAKS (GOLF COURSE).

The Origination of the Master Plan

1950's – Parcel 39-14-32 (the future site of the golf course and residential estates) was in an undeveloped, unincorporated area of Volusia County.[1] A group of primarily local investors formed a private syndicate to develop the parcel[2], and on **May 21, 1956**, the Tomoka Oaks Master Plan was approved; the original Oaks architect was Milton Pepper.[3]

The **Tomoka Oaks Country Club – Estates, Golf Course Boundary and Entrance Road Map** below dated **5/21/1956** is signed by syndicate member Vernon Stepp and shows the golf course boundary and the surrounding estates:

4 areas within golf course: Commercial, Motel, Apts, Recreation

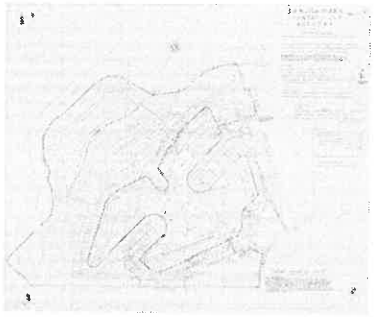
• Waterfront Lots	190
• Waterfront view lots	52
• Golf course frontage lots	177
• Golf course view lots	84
• Number of Blocks	36



June 7, 1960 - City of Ormond Beach passed an ordinance to annex 4,500 unincorporated acres which included parcel 39-14-32.[4] Prior to the ordinance passing, the private investment syndicate (referred to in paragraph 1 above) had arranged to finance an exclusive residential subdivision in the area marked for annexation. About 30 investors, most of them local, reportedly put up the money to buy the land, which would surround the 18-hole golf course. Land in the center of the tract reportedly would be given outright to the Snead Corporation which would build, maintain and operate The Sam Snead Golf and Country Club. The course would mean an immediate increase in the value of adjoining homesites.[5]

September 12, 1960 - Tomoka Oaks, Inc. was formed to manage the planned development of the golf course and residential estates in parcel 39-14-32.[6] The 545 acre subdivision, Tomoka Oaks Country Club, would be built around the 18-hole golf course, with a portion of the lots to front on the golf course.[7]

September 15, 1960 - Tomoka Oaks, Inc. presented their master planned development to Volusia County Board of Commissions and received Plat approval subject to final approval of streets, paving, and drainage.[8] Plat consists of:

- 135 acre golf course in the middle of the development. Only ingress / egress via main entrance situated off a single residential street.
- 357 Residential acres of which 175 lots front the golf course
- 53 Commercial acres

Tomoka Oaks Country Club Estates Plat Approval Dates:

- Volusia District #4 Zoning Board; Sept 7, 1960
- Volusia County Board of Commissioners; Sept 15, 1960
- Approved by City of Ormond Beach, August 1961

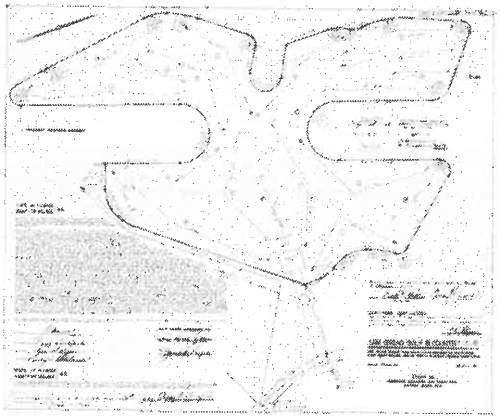
September 20, 1960 - Tomoka Oaks, Inc. purchased parcel 39-14-32 in Warranty Deed, Book 319 / Page 660.

September 22, 1960 - The approved Plat of Tomoka Oaks Country Club Estates, Unit 1 was filed for record in Map Book 25, Page 58 and 59.

Map Book 25, Page 58

Map Book 25, Page 59

Late September/Early October 1960 - Per Ordinance passed on 6/7/1960, City of Ormond Beach annexed parcel 39-14-32 and began working with Tomoka Oaks, Inc. regarding development of Tomoka Oaks Country Club and Estates. [9], [10]



1961 City of Ormond Beach Approves Development of Golf Course and Estates

- **February 1961** - Tomoka Oaks Country Club Estates launches informal groundbreaking. "The 530 acre tract will have a golf course on 135 acres in the center, surrounded by three and a half miles of lots for higher priced homes."[11]

- **April 1961** - Ormond Beach Board of Adjustment unanimously approves construction of the golf course within the Tomoka Oaks Country Club subdivision. [12]

- **August 1961** - Ormond Beach City Commission approves Golf Course plat of Tomoka Oaks Country Club Estates subdivision "provided it substantially complies with the master plan." [13]

- **August 18, 1961**, Mayor Cassen and City Clerk Althouse sign golf course plat on file with Volusia County Map Book 25, Page 61.

- **September 1961** – Agreement signed between City of Ormond Beach and Tomoka Oaks, Inc. regarding development plans for Tomoka Oaks Country Club Estates.[14] City Commission approves two sectional plats for Unit 1[15] (as shown above in Map Book 25, pages 58 and 59).

1961 - 1962 Development of both the Golf course and the Estates Begins

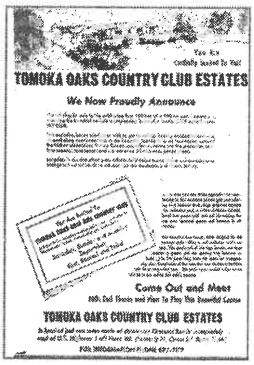
In **October 1961,** Tomoka Oaks, Inc. conveyed the Sam Snead golf course property (Warranty Deed 316/660 dated 10/10/1961) to Golf Course Developers, Inc. to build a Sam Snead Golf and Country Club which would provide a membership tie-in[16] with buyers of Tomoka Oak, Inc. lots. Therefore the golf course and country club facilities were an amenity for the enjoyment of the residential home owners. After construction of the golf course, the golf course property was sold back to Tomoka Oaks, Inc. in July 1962 due to financial issues experienced by Golf Course Developers, Inc.[17]

William R. (Bill) McElroy, president of Tomoka Oaks, Inc. stated publically in **July 1962** that a new corporation would be formed to operate the golf course. It would be a "**permanent golf club**" and, "When the new golf club corporation is formed, the land will be conveyed to the new corporation. **It will be subject to restrictions for use only as a golf club and other recreational use.**" [18]

Note: Related to the paragraph above:

- Tomoka Oaks Golf and Country Club, Inc. was filed with the Florida State Division of Corporations on 1/8/1963 and was intended to manage the golf course via a lease with Tomoka Oaks, Inc.
- In **November 1962**, Ormond Beach Board of Adjustment passed a motion to set golf course facing houses back to within fifteen feet of the rear lot line to take advantage of the adjoining golf course because, as Tomoka Oaks, Inc. secretary Ted Brousseau explained to the board, "The golf course will be there for ninety-nine years, there will be no subdivision."[19] (Per my opinion, Brousseau was in the planning stages of the forthcoming lease which is why he was able to make the "ninety-nine years" reference. The master plan intended for the "perpetual" use of the land as a golf course and country club and related uses[20] and the City Commission was aware of the master plan as demonstrated in citations throughout this section of the report.)
- **January 1, 1963,** Tomoka Oaks, Inc. signed a 99 year lease with Tomoka Oaks Golf and Country Club, Inc. on 1/1/1963 (Book 516 / Page 360) which defined Use as: **The demised premises shall be used perpetually for a country club and related uses**. (Lease was surrendered back to Tomoka Oaks, Inc. in late 1963, and Tomoka Oaks, Inc. took over management of the golf course.)

September 1962 - April 1963 Tomoka Oaks, Inc. Announces And Begins Marketing their Planned Community



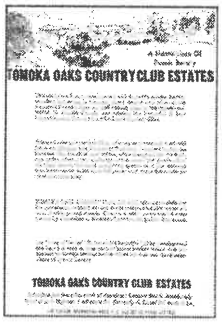
Tomoka Oaks, Inc. was the owner and developer of both the Sam Snead Golf and Country Club and the Tomoka Oaks Country Club Estates. In 1962, Tomoka Oaks, Inc. began placing marketing ads in the *Daytona Beach News-Journal* promoting the coexistence of the golf course and the luxury estates.

- **August 1962** Tomoka Oaks Country Club Estates places an Announcement/Advertisement in *Daytona Beach Morning Journal*, page 23, 8/31/1962:

Excerpts from the ad state:

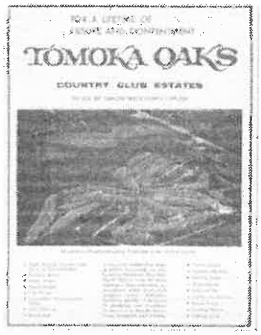
YOU ARE CORDIALLY INVITED TO VISIT TOMOKA OAKS COUNTRY CLUB ESTATES

We Now Proudly Announce
The offering for sale to the public, the first 103 lots of a 750 lot development surrounding the beautiful 18 hole championship TOMOKA OAKS GOLF AND COUNTRY CLUB.



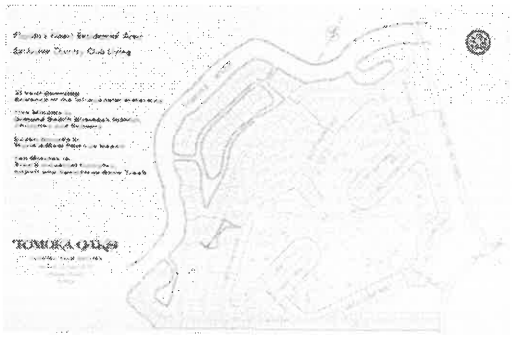
- **September 1962** Tomoka Oaks Country Club Estates places an Announcement/Advertisement in *Daytona Beach Sunday News-Journal*, page 53, 9/30/1962:

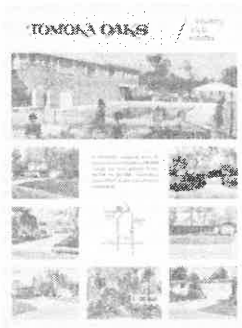
Excerpts from the ad state:



TOMOKA OAKS COUNTRY CLUB ESTATES
A Masterpiece of Scenic Beauty

This exclusive, luxury development with its gently rolling, heavily wooded homes is situation along nearly two miles of the beautiful Tomoka River on land having some of the highest elevation in Volusia County, surrounding the Beautiful 18 hole Championship Tomoka Oaks Golf and Country Club.





Tomoka Oaks Country Club Estates **Promotional Brochure** (full size copy attached) promotes the coexistence of the estates and golf course which includes these "master plan" features:

- A Lifetime of Leisure and Contentment
- Beautiful Championship Tomoka Oaks Golf Course
- Amenities include tennis, Olympic-size pool, grill and bar, dining and dancing
- **A planned residential community** located in the famous Ormond-Daytona Beach Resort Area for those seeking a true suburban atmosphere **with protected property values**.

December 1963

On 12/12/1963, Tomoka Oaks, Inc. conveys the golf course to the trusteeship of Ralph R. Frederick in Warranty Deed, Book 585 / Pages 157-159 (copy of original attached signed by Frederick as President of Tomoka Oaks, Inc). In my opinion this is the primary instrument that established the coexistence of the golf course and the estates, protected the perpetual 'use' of the golf course property, and provided protective rights and restrictions to homeowners:

- Tomoka Oaks, Inc. conveyed the Sam Snead Golf and Country Club to the trusteeship of Ralph R. Frederick [President of Tomoka Oaks, Inc.].
- This Warranty Deed encumbers property "use" as: **"The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses."**
- Warranty Deed 585/157 includes express conditions defining Referral Rights should trustee Frederick desires to sell or convey the golf course to any person, firm, or corporation other than a subsidiary of Frederick:

  Paraphrase of Referral Rights*

  - Offers acceptable to owner (Ralph R. Frederick) are referred to Tomoka Oaks, Inc. (TOI) for their acceptance or rejection for a period of 30 days.
  - If TOI rejects or fails to accept the offer, offer shall be presented to Tomoka Oaks Golf and Country Club, Inc. (TOGCC) for its acceptance or rejection for a period of 30 days. Acceptance or rejection is subject to the approval of TOI.
  - Right to accept or reject offer is transferrable and may be transferred by TOI or TOGCC to the Tomoka Oaks Homeowners Association (HOA) within 30 days and acted upon within those 30 days.

- Warranty Deed 585/157 includes a Reverter Clause should the Sam Snead Golf and Country Club not be used as intended:

  Paraphrase of Reverter Clause*

  - IF Frederick or successors in interest fail to utilize the property exclusively as a golf and country club, golf course, and related uses
  - AND the property not be sold to TOI or TOGCC or HOA as specified in preceding paragraph regarding Referral rights
  - THEN property shall automatically revert to and become the property of TOI
    - AND all rights of FREDERICK or successors in interest shall immediately terminate

      - UNLESS

      FREDERICK or successors shall within 90 days after the day of mailing to FREDERICK or successors by TOI or TOGCC or HOA a written notice to utilize said property as a golf and country club, golf course, and related uses, complies with said reverter clause and continues to use said property as a golf and country club, golf course, and related uses.

  The reverter clause may be released or modified by resolution concurred in by two-thirds of the entire board of directors of Tomoka Oaks, Inc. at any time after ten years after the date of recording of this Deed on 12/12/1963; providing that

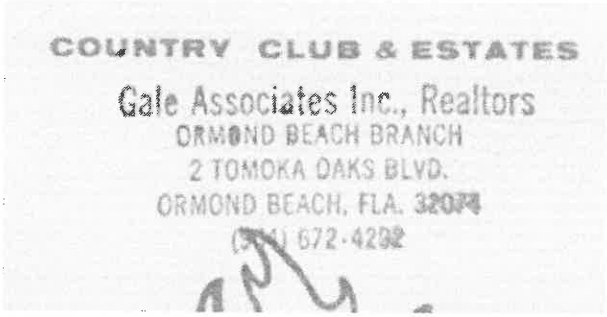
  - IF TOI shall have disposed of four-fifths (4/5) of the lots in Tomoka Oaks Country Club Estates

  - THEN the foregoing right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks HOA to be exercised by resolution of two-thirds (2/3) of the Board of Directors of the Tomoka Oaks HOA.

- Warranty Deed 585/157 is signed by Ralph R. Frederick, President [and Trustee], Tomoka Oaks, Inc.

* This paraphrased copy breaks the Deed into sections for easy readability. A copy of Deed 585/157 is attached for reference.

The section titled "Protective Covenants and Restrictions" provides more detailed information on additional covenants and restrictions recorded that are intended to protect the "use" of the golf course and protect homeowners' investments in these coexisting properties.



1963 - 1970 Home builders, brokers, and realtors market golf course home sites and lots

Tomoka Oaks provides marketing brochures to realtors where the agent can stamp the name of their brokerage (copy of original attached). Brochures inform potential buyers of:

- "Wooded Golf Course Lots"
- "Lovely Off Course Lots"
- Surrounding the fabulous Tomoka Oaks Country Club

Front Cover Inside Flap Inside Back Cover

Home builders, brokers, and realtors advertise golf course lots and homes during Tomoka Oaks, Inc. ownership of the estates. Ads make references such as:

- A perfect home on the golf course. Overlooking 7th green.[22]
- Lovely homes on large wooded lots around 18 hole golf course. [23]
- Situated on the 8th Fairway at the 9th Tee. [24]
- Area's only **planned community**. Surrounding the beautiful championship golf course.

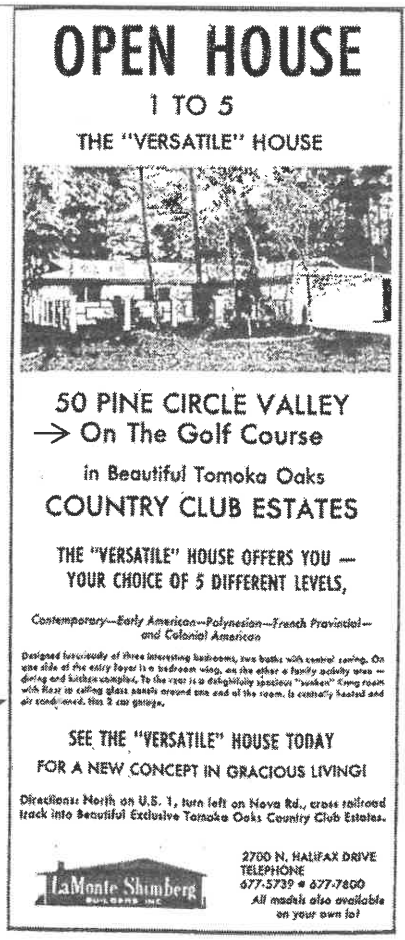
TAMPA BUILDERS PLAN TOMOKA OAKS PROGRAM



Plans for building a number of homes in Ormond Beach's Tomoka Oaks Country Club Estates were announced last week by **LaMonte-Shimberg** of Tampa.

At a meeting Thursday with 35 real estate brokers, President Charles LaMonte said the company intends to build 50 houses a year in the $21,000 to over $30,000 price range. All will be on large, tree-shaded lots and **many will border on the Tomoka golf course**, he told the group.

1966

January 10, 1966, TOCC, Inc., Ralph R. Frederick, President, signs a Mortgage Deed (Book 774 / Page 699) with First Atlantic National Bank of Daytona Beach for the Sam Snead Golf and Country Club owned by Tomoka Oaks, Inc., Ralph R. Frederick, President and Trustee.

March 3, 1966, an Agreement is filed (Book 816 / Page 206) by Tomoka Oaks, Inc. with First Atlantic National Bank of Daytona Beach which reinforces that the golf course is a valuable asset to Tomoka Oaks, Inc. as they own the residential lots surrounding the course:

Brief summary:

- Tomoka Oaks, Inc. owns a majority of the land surrounding the Golf Course
- Operation of a Golf Club and Golf Course on the greater portion of the above described property is a valuable asset to Tomoka Oaks, Inc.

- Both parties agree that Tomoka Oaks, Inc. can remedy any TOCC, Inc. default or redeem the TOCC, Inc. mortgage and receive assignment of Note.

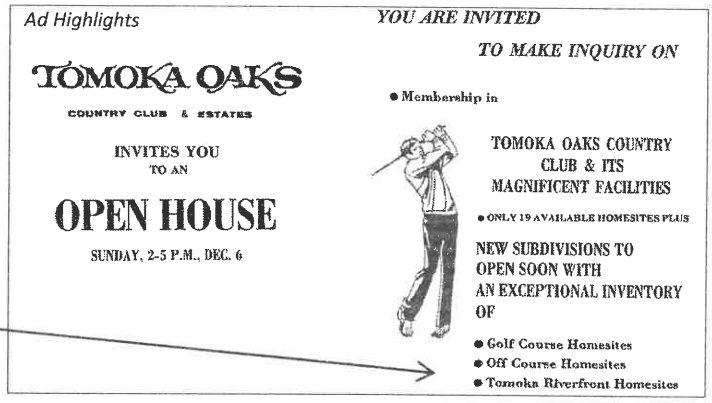
Signed by:

Tomoka Oaks, Inc.
Albert J. Gowan, President
Donald W. Acer, Jr., Sec

1970 Golf Course and the Estates sold to Ormond Ocean Homes, Inc.

On **March 5, 1970**, Ormond Ocean Homes, Inc. purchased:

- The Sam Snead Golf & Country Club from TOCC, Inc. (Book 1188 / Page 533)
- Tomoka Oaks Country Club Estates from Tomoka Oaks, Inc. (Book 1188 / Page 529)

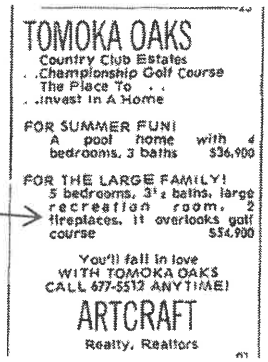


On **March 28, 1970**, Sovereign Industries, Inc. acquires all stock of Ormond Ocean Homes, Inc .
Bill Currens, manager of Sovereign's Florida holdings, states, "We will call a meeting of all club members and home owners in the Tomoka development to outline the extensive improvement program and plans for club operation . . . The members and home owners at Tomoka can expect high standards of development. **Sovereign will do everything possible to improve the home owner's investments** and to make the golf club outstanding." [25]

July 31, 1970, Sovereign Industries, Inc. presented plans for golf course and estates improvements to the present homeowners . . . Presently there are about 160 landowners in Tomoka Oaks. [26]

In **November 1970**, Sovereign Industries, Inc. purchases more acreage and states" the price of lots will range in price from $9,000 to $15,000, **depending on location with respect to the golf course** and Tomoka River." [27]

On **December 5, 1970**, Ormond Ocean Homes, Inc. (AKA Sovereign Industries, Inc.) place announcement in *Daytona Beach Morning News-Journal,* page 6, inviting the public to their **Tomoka Oaks Country Club & Estates Open House**.



The invitation ad copy states: *New Subdivision to Open Soon with an **Exceptional Inventory of Golf Course Home sites**, Off Course Home sites, Tomoka Riverfront Home sites.*

Throughout 1970 - 1971 real estate brokers and agents place marketing ads promoting **golf course home sites and lots.** (See Ormond Ocean Homes timeline for a more comprehensive list of ads.)

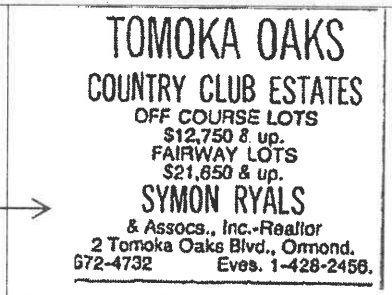
1971 Golf Course and Estates sold to PLR Development, LTD who confirms existence of a Master Plan

On **June 15, 1971**, PLR Development, LTD purchased the Sam Snead Golf & Country Club and the Tomoka Oaks Country Club Estates in Warranty Deed Book 1306 / Page 286. Milton W. Pepper, credited with writing the Tomoka Oaks Master Plan in 1956,[28] is General Manager of PLR. [29]

March 2, 1972 Ormond Beach Planning Board, at the request of the City Commission, reviewed the Tomoka Oaks **Master Plan** with PLR's attorney Kermit Coble. Coble informed the board PLR was not aware of the Master Plan submitted by previous owner Sovereign Industries (see July 31, 1970 above), and that PRL intended to develop according to **the original master plan approved by the Commission in 1961**. Any changes would be minor adjustments. [30]

Throughout **1971-1975** real estate brokers and agents place marketing ads promoting golf course home sites and lots. As shown directly below, golf course lots are 70% - 96% higher than non-course lots which reinforces the coexistence of the golf course and the estates as intended in the master plan. (See PLR Development, LTD. timeline for additional ads.)



Price of Golf Course Lots Significantly Higher than Non-Course Lots

Subsequent Sam Snead Golf and Country Club sales (golf course property only)

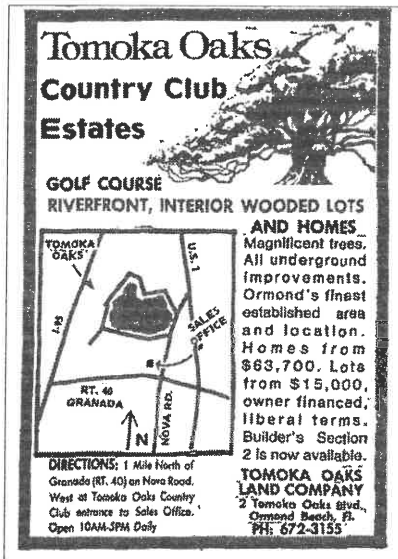
- Beginning in 1975, the golf course was sold independent of the residential Estates. In entirety, Milton W. Pepper retained an ownership interest in the golf course from June 1971 – February 1979.
  - **February 27, 1975** Book 1768 / Page 1798 - PLR (Milton W. Pepper, General Manager) sells the golf course to AKRON Enterprises, Inc. (Milton W. Pepper, President)
  - **February 27, 1978** Book 2001 / Page 382 - AKRON Enterprises, Inc. (Milton W. Pepper, President) sells the golf course to himself (Milton W. Pepper) and leases it for one year to RTH, Inc. with option to buy. [31]

- **February 14, 1979** Book 2052 / Page 1019 - Milton W. Pepper sells the golf course to RTH, Inc. via a mortgage deed which stipulates: During the term of the purchase money note and wrap around mortgage executed of even date herewith by grantee to grantor, or for a period of 18 years in the event the mortgage is prepaid in full**, the above described property shall revert to the grantor upon the condition that any portion of said property is used for any purpose other than a golf course with club house and appurtenant amenities**.
  (See section "Protective Covenants and Restrictions" for complete details.)

- See "Ownership Chart" for subsequent golf course owners.

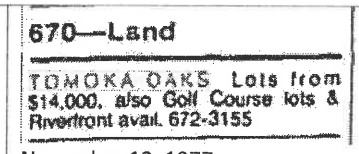
1977 Estates sold to BML Investments and PRN Investments

On **February 28, 1977** Book 1887 / Page 301 - BML Investments and PRN Investments bought the remaining lots in Tomoka Oaks Country Club Estates from PLR Development, LTD. Loan Modification Agreement with Cameron-Brown Investment Group Book 1187 / Page 320 details releases of estate lots as follows with golf course frontage prices 42% higher than non-golf course lots:



- Golf course frontage $7,000/lot
- Tomoka River frontage $5,000/lot
- All other lots in Parcel A and B $4,000/lot

Officers of BML Investments and PRN Investments (William J. Goodman and Norman A. Rossman[32]) also were officers in the following development companies that built and sold homes in Tomoka Oaks Country Club Estates. Note that all shared the same phone number:



- Residential Communities of America; phone 672-3155
- Tomoka Oaks Land Company; phone 672-3155
- Development Corporation of Switzerland; phone 672-3155

August 18, 1977 A *Daytona Beach News-Journal* article explains why the developers, BML Investments and PRN Investments, dropped their waiver request regarding development fees. The article states: "When proposed in the late 50's by Developer Milton Pepper, the more than 400 acres of the subdivision were to be **built according to a master plan** which included the water and sewer payback plan."[33]

From 1977 to final development in approximately 1981, the above developers of the estate lots continue to market coexistence of golf course and estates using text such as "golf course lots" and "golf course home sites."

Master Plan: Summary and My Opinion

I believe Tomoka Oaks, Inc.'s intent was to design, develop, and market a master planned community which contained a coexisting Golf and Country Club surrounded by exclusive, luxury residential homes. Protective covenants and restrictions recorded by the original developer, Tomoka Oaks, Inc., protected homeowners' property values by defining the Sam Snead Golf and Country Club's perpetual use as: **Property shall be used perpetually for purposes of a golf and country club, golf course, and related uses**. And Tomoka Oaks, Inc. recorded specific protective covenants and restrictions to ensure homeowners were protected via Referral and Reverter rights should the coexisting golf course ever be sold.

The master plan was approved by Volusia County and the City of Ormond Beach. Every developer of the "exclusive, luxury" Tomoka Oaks Residential Estates consistently marketed the estates as coexisting with the golf course and country club they surrounded. Homeowners purchased lots and built homes based on the premise that their investments were secure due to the coexisting golf course. And the master plan ensured the area would remain in all its natural beauty thus preserving homeowners' enjoyment of "their healthful, contented living."

Notes from Carolyn Davis about the Master Plan research:

I submitted **Public Records Request** to the City of Ormond Beach on:

- September 22, 2021
- November 9, 2021
- November 15, 2021

Each **Request** individually identified multiple separate documents and cited the sources that lead me to request the documents. The majority of my **Requests** included requests for any documents relevant to the **master plan**. Taylor Lochert, Administrative Assistant in the City Clerk's office, was very responsive and was able to fulfill most of my requests by providing me detailed plats, meeting minutes, and many supporting documents. Unfortunately, Taylor was unable to provide me a comprehensive master plan narrative submitted by Tomoka Oaks, Inc. to the City of Ormond Beach as citied throughout this Master Plan section of my report.

The documents the City of Ormond Beach could not provide are:

#1) I wrote in my **Public Records Request Form** submitted November 9, 2021, that my objective was to get the Agreement or Contract made by the City of Ormond Beach with the developers of Tomoka Oaks regarding the master plan for the subdivision and the golf course. My request form provided an excerpt from the City Commission Meeting Minutes dated April 4, 1961 (page 1069) which stated:

> *Mr. McElroy: I am representing Tomoka Oaks. When the property was annexed [September or October 1960] there was an agreement that our general plan for developing was approved by a contract with the Commission. The general plan included a Golf Course in the development.*

> Outcome of my request: I was informed in an email from Taylor Lochert dated December 20, 2021, "Please be advised that we do not have documents to fulfill your requests."

> My Opinion: Although William R. (Bill) McElroy, original Chairman of the Board of Tomoka Oaks, Inc., used the term "general plan," it is my opinion this was his synonymous reference to the "master plan." Either way, it was evident that an agreement existed and was submitted to the City of Ormond Beach regarding the development of a golf course within the residential estate subdivision, and the City was unable to locate that agreement.

#2) In **Public Records Request Form** submitted November 9, 2021, I requested copies of the master plan referred to in City Commission Minutes of August 1, 1961; page 1123 which stated:

> *Mayor Cassen: Item #9 - Plat and Data - Tomoka Oaks subdivision. City Clerk indicated that the plat show the proposed golf course submitted by Stepp Inc., and that the plat is part of a transfer of land to the golf course, and there is no dedication of public right-of-way or easements involved.*

> *Mayor Cassen advised, however, that as previously state by Mr. Hoover of the Planning Board, if this fits in with the preliminary plans as approved, there is no question about it but if it does not coincide with them, there might be some category in which something could be worked out. Discussion followed.*

Mayor Cassen asked for a motion to authorize the Mayor and the City Clerk to sign and approve the plat, provided that it meets with the approval of Briley, Wild and Associates to the point that ***it substantially complies with the master plan****. Commissioner Rizzo so moved, Commissioner Black seconded.*

Outcome of my request: I was provided the approved plat but not any Master Plan narrative. When I informed Taylor in an email dated December 16, 2021 that this document had not been provided, she replied on December 20, 2021, "Please be advised that we do not have documents to fulfill your requests."

#3) My **Public Records Request Form** submitted November 15, 2021, stated:

On March 8, 1972, the *Daytona Beach Morning- Journal* reported the City Commission "Accepted a letter from J. Kermit Coble, representing PRL Development, stating the company plans to develop Tomoka Oaks according to the **1961 master plan**, not a later plan proposed by Sovereign Industries."

I requested a copy of the Commission meeting minutes, the letter from Coble, and the 1961 Tomoka Oaks master plan.

Outcome of my request: Taylor provided me the March 7, 1972 City Commission meeting minutes; page 3078-3083 [or pages 8078-8083 as the first number was difficult to decipher as either a 3 or an 8] and the letter from Coble dated March 2, 1972. But I did not receive any Tomoka Oaks Master Plan narrative.

I emailed Taylor Lockert on December 16, 2021 informing her of the missing Master Plan document, and she replied on December 20, 2021, "Please be advised that we do not have documents to fulfill your requests."

In summary, I was expecting to receive from the City of Ormond Beach a comprehensive narrative master plan document that, based on my research, I believe existed and would have been submitted by Tomoka Oaks Inc. prior to any development. I was only provided plat layouts. The omission by the City of Ormond Beach of a master plan narrative prevents my summary from providing a complete development picture of Tomoka Oaks at its inception; therefore I relied on other sources of information as cited throughout this summary and the ownership timelines to communicate the master plan details.

Protective Covenants and Restrictions

I researched the history of parcel 39-14-32, which was developed into the **Sam Snead Golf and Country Club** and the **Tomoka Oaks Country Club Estates,** to reconstruct the sales and ownership history of these two properties and the recordings of covenants and restrictions related to the properties.

Based on this research, I have formed the opinion that:

1. In the early 1960's, Tomoka Oaks, Inc. recorded protective covenants restricting land use of the Sam Snead Golf and Country Club to be "**perpetually for use as a golf and country club, golf course, and related uses**."

2. Throughout the early 1960's, Tomoka Oaks, Inc. recorded deeds, leases, covenants, restrictions, referral rights, and reverter clauses to protect the intended perpetual use of the golf course property, as well as protect the financial interests of lot and homeowners should the golf course property not be used as recorded in the protective covenants and restrictions.

3. Beginning in 1969, conflicts of interest in cross-ownership resulted in recordings being filed with Volusia County that intentionally, systematically and possibly illegally negated or released many of the earlier protective covenants and restrictions, and eliminated rights of current and future Tomoka Oaks Country Club Estates home owners should the golf course property not be used as originally encumbered: **perpetually for use as a golf and country club, golf course, and related uses**.

4. The unethical and possibly illegal documents filed in #3 above are invalid due to cross-ownership conflicts of interest, and the protective covenants and restrictions originally recorded in the early 1960's (specifically Warranty Deed 585/157 recorded 12/12/1963 and Restrictions 431/32 recorded 1/31/1962) are in effect today.

5. There are no officially recorded Volusia County documents that modified or released the encumbered use of the golf course in 585/157 or the covenants in 431/32. Therefore reverter rights are automatically and exclusively vested in the Tomoka Oaks Homeowners Association since 4/5's of the lots in Tomoka Oaks Country Club Estates have been disposed of, and the current owner's development proposal will fail to utilize the property exclusively as a golf and country club, golf course, and related uses.

For the Reader's information:

- The preceding pages of this section contain tables detailing recordings on file with Volusia County, and articles in the *Daytona Beach News-Journal,* that are the basis for my opinions throughout this section. Tables cite the document's recording date and book and page number for each specific deed, lease, covenant, restriction, referral right, and reverter clause.

- All *Daytona Beach News-Journal* article citations come from www.newsbank.com accessed through the Volusia County Library.

- All opinions are my own. I did not collaborate with any other Tomoka Oaks homeowner or with the HOA.

Protective Covenants and Restrictions: January 1962 - December 1963

It is my opinion that:

- William R. McElroy, as the first president and Chairman of the Board of Tomoka Oaks, Inc.,[1] fulfilled his fiduciary responsibility to both Tomoka Oaks, Inc. stockholders and to the Tomoka Oaks Country Club Estate lot owners and homeowners by filing official recordings with Volusia County that:
    1. Encumbered the use of the golf course property as "**perpetually for use as a golf and country club, golf course, and related uses**."
    2. Protected Tomoka Oaks, Inc. and protected residential lot owners and homeowners by recording covenants, restrictions, referral rights, and reverter clauses should the golf course property not be used perpetually as a golf and country club, golf course, and related uses.
    3. Provided current and future residential lot owners and homeowners in Unit 1 with automatic Tomoka Oaks Homeowner Association (HOA) membership, of which said HOA:
        - Could be transferred the referral right to accept or reject Sam Snead golf course property sales offers should Tomoka Oaks, Inc. transfer to the HOA the right to accept or reject the offer.
        - Has legal standing via reverter rights should future Sam Snead Golf and Country Club owners not use the golf course property as perpetually intended.

Table 1	Official Recording Date 1/31/1962

Restrictions – Unit 1, Tomoka Oaks Country Club Estates
Recorded 1/31/1962. Book 431 / Page 32.

Verbatim Text
Tomoka Oaks, Inc. the owner and grantor of all lots, desires the lots be subject to certain restrictions for the mutual benefit and protection of said owner and to persons both natural and corporate who may hereafter purchase or acquire any interest in said property.

The owner declares and creates the following restrictions, reservations and conditions to be binding upon it and upon each and every person and corporation hereafter.

Paraphrase of Restriction Highlights

#3 Construction on lots adjoining the golf course can be within 10 feet of golf course boundary

#10 Grantee automatically a member of the Tomoka Oaks Homeowners Association

#11 Grantor reserves right to release restrictions except #10

#14 Grantor may transfer right to enforce restrictions to the Tomoka Oaks Homeowners Association

#15 Covenants binding for 25 years, then automatically extended for successive periods of 10 years unless instrument signed by majority of lot owners is recorded agreeing to covenant changes.

Submitted and signed by:
Tomoka Oaks, Inc.
W. L. McElroy, President
Ted Brousseau, Secretary

My opinion

I believe Tomoka Oaks, Inc. intended Restrictions be consistent from Unit to Unit. Therefore, restrictions recorded for Unit 1 would also be recorded for subsequent Units such as Unit 3, etc. Paragraph #11's last sentence states, "The Grantor further reserves the right to include, in any contract or deed hereafter made, any additional restrictive covenants not inconsistent with these herein contained.

During my research, I found no official recordings by the majority of the lot owners agreeing to any covenant changes or releasing any restrictions in Unit 1.

Table 2 *Daytona Beach Sunday News-Journal* 7/8/1962

Daytona Beach Sunday News-Journal, 7/8/1962, page 16
NEW TOMOKA LINKS SOLD TO McELROY GROUP

Paraphrase:

- Golf Course Developers, Inc. sold out to Tomoka Oaks, Inc. due to financial issues.
- William R. (Bill) McElroy, president of Tomoka Oaks, Inc. announced the purchase.
- McElroy said plans under way for formation of a new corporation named Tomoka Oaks Golf Club, Inc.
- McElroy said it will be a "**permanent golf club**" and "When the new golf club corporation is formed, the land will be conveyed to the new corporation. **It will be subject to restrictions for use only as a golf club and other recreational use.**"

My research shows:

- On 10/10/1961, the golf course property was conveyed by Tomoka Oaks, Inc. to Golf Course Developers, Inc., Mortgage Deed, Book 404 / Page 18.
- Golf Course Developers developed the Sam Snead Golf and Country Club during 1961-1962. As shown in the article above, Golf Course Developers sold the course back to Tomoka Oaks, Inc. The sale was finalized 8/1/1962, Mortgage Deed, Book 465 / Page 204.
- Tomoka Oaks Golf Club, Inc. was filed with Division of Corporations, State of Florida on 7/19/1962.
- Another corporation was filed 1/8/1963 called Tomoka Oaks Golf and Country Club, Inc. which was formed to handle the conveyance referred to in McElroy's article comments above. This conveyance took the form of a lease whose terms stated leased property "**shall be used perpetually for a country club and related uses**. " (See Table 3).

Table 3 Official Recording Date 1/1/1963

Golf Course Lease
Recorded 1/1/1963. Book 360 / Page 366.

Lease Start Date: 1/1/1963
Lessor: Tomoka Oaks, Inc. Signed by W. R. McElroy, President
Lessee: Tomoka Oaks Golf and Country Club, Inc. Signed by W. R. McElroy, President

Paraphrase of Lease Highlights:

- Premises: All of Sam Snead Golf and Country Club
- Term and Rental : Ninety-nine (99) years subject to termination as per terms of lease
- Use: Premises shall be used perpetually for a country club and related uses. This provision shall survive the lease and be included in the deed. Deed restrictions may be waived by two-thirds of Lessee Board of Directors with concurrence of:
    - 2/3's of the members of said Lessee
    - 2/3's of the members of the Tomoka Oaks Homeowners Association

My opinion:

- McElroy fulfilled his 7/8/1962 public statement (Table 2) to convey the Sam Snead Golf and Country Club, and that it was "subject to restrictions for use only as a golf club and other recreational use."
- McElroy fulfilled his 7/8/1962 public statement (Table 2) regarding the permanent use of the premises by incorporating into the lease deed restrictions that protected homeowners and golf club members should the property not be used perpetually for a country club and related uses.
- The lease was surrendered in late 1963 (Book 585 / Page 155) but as stated in the lease, the "use" provision survived the lease and was subsequently included in a Warranty Deed dated 12/12/1963, Book 585 / Page 157 (Table 6).
- The lease was another of the master plan elements which demonstrated the coexistence of the golf course and the residential estates.

Table 4 *Daytona Beach Sunday News-Journal* 2/23/1963

Daytona Beach Sunday News-Journal, 2/23/1963, page 15
ANNOUNCEMENT: Your Invitation to Visit Tomoka Oaks Country Club Estates

Paraphrased Excerpts

W.R. McElroy personally signed an **Invitation** as President of Tomoka Oaks Country Club Estates inviting potential home buyers to visit "the ultimate in gracious and contented living," where "from it's very inception, no effort has been spared in planning and developing . . . one of the finest exclusive residential areas in the State of Florida." The Estates are "cut from 545 beautiful wooded acres . . . Right in the center of this magnificent natural beauty spot has been built Tomoka Oaks Golf and Country Club – an eighteen hole championship Golf Course."

McElroy went on to state, "To keep this Area in all its natural beauty, **certain protective covenants have been provided** for the benefit and protection of all property owners."

And in a prior **Invitation** published on 2/16/1963, page 2, of the *Daytona Beach News-Journal*, Tomoka Oaks Country Club Estates informed potential home buyers that, "To keep this Area in all its natural beauty, **certain protective covenants are necessary** for the benefit and protection of all property owners and will be included in the deed."

My opinion

McElroy fulfilled his public assurance to include protective covenants. (See Tables 5 and 6.)
This marketing invitation was another of the master plan elements of coexistence.

Table 5 Official Recording Date 3/1/1963

Supplemental Restrictions – Unit, 1 Tomoka Oaks Country Club Estates
Recorded 3/1/1963. Book 516 / Page 358

Paraphrased Excerpts

- Whereas Tomoka Oaks, Inc., a Florida Corporation, is the owner of all lots in Tomoka Oaks Country Club Estates, Unit #1 . . .
- Whereas said owner does now wish to subject said property to certain further restrictions relating to the size of residential buildings to be build adjacent to the golf course. . .
- No principal residence shall be constructed upon any lot adjacent to the golf course . . . which shall contain less than 1500 square feet of enclosed living area and 2300 square feet of total covered area.

Submitted and signed by:
Tomoka Oaks, Inc.
W. L. McElroy, President
Ted Brousseau, Secretary

My Opinion

The Sam Snead Golf and Country Club and the Tomoka Oaks Country Club Estates shared the common developer: Tomoka Oaks, Inc.

The golf course and the residential subdivision estates were designed and intended to coexist.

Tomoka Oaks, Inc. (a Florida Profit Corporation) wanted to protect their interest by ensuring the golf course would always be surrounded by homes that contained at least 2300 square feet. The value of the golf course was tied to the value of the lots surrounding it, and the value of the lots was tied to the value of the golf course bordering those lots. McElroy incorporated these supplemental restrictions to protect both Tomoka Oaks, Inc. financial interests and homeowners' financial interests.

Table 6	Official Recording Date 12/12/1963

Warranty Deed (Copy of original deed is attached.)
Recorded 12/12/1963. Page 585 / Book 157.

Paraphrased summary separated into understandable segments

Warranty Deed - All of the Sam Snead Golf and Country Club
Between
Tomoka Oaks, Inc.; party of the first part (TOI)
AND
Ralph R. Frederick, trustee; party of the second part (FREDERICK)

[*start of Referral Rights*]

This conveyance is subject to the express condition that if FREDERICK desires to sell or convey the golf course to any person, firm, or corporation other than a subsidiary of FREDERICK, offers acceptable to owner (Ralph R. Frederick) are referred to TOI for TOI's acceptance or rejection for a period of 30 days.

If TOI rejects or fails to accept the offer, offer shall be presented to Tomoka Oaks Golf and Country Club, Inc. (TOGCC) for its acceptance or rejection for a period of 30 days. Acceptance or rejection is subject to the approval of TOI.

Right to accept or reject offer is transferrable and may be transferred by TOI or TOGCC to the Tomoka Oaks Homeowners Association (HOA) within 30 days and acted upon within those 30 days.

[*end of Referral Rights*]

The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.

[*start of Reverter clause*]

- IF Frederick or successors in interest fail to utilize the property exclusively as a golf and country club, golf course, and related uses
- AND the property not be sold to TOI or TOGCC or HOA as specified in preceding paragraph
- THEN property shall automatically revert to and become the property of TOI
    - AND all rights of FREDERICK or successors in interest shall immediately terminate
        - UNLESS

        FREDERICK or successors shall within 90 days after the day of mailing to FREDERICK or successors by TOI or TOGCC or HOA a written notice to utilize said property as a golf and country club, golf course, and related uses, complies with said reverter clause and continues to use said property as a golf and country club, golf course, and related uses.

The reverter clause may be released or modified by resolution concurred in by two-thirds of the entire board of directors of Tomoka Oaks, Inc. at any time after ten years after the date of recording of this Deed on 12/12/1963; providing that

- IF TOI shall have disposed of four-fifths (4/5) of the lots in Tomoka Oaks Country Club Estates

- THEN the foregoing right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks HOA to be exercised by resolution of two-thirds (2/3) of the Board of Directors of the Tomoka Oaks HOA.

[*end of Reverter clause*]

Deed signed by: Ralph R. Frederick, President, Tomoka Oaks, Inc.

My opinion

Deed 585/157 was the primary instrument Tomoka Oaks, Inc. recorded to encumber and protect the use of the Sam Snead Golf and Country Club to be "**used perpetually for purposes of a golf and country club, golf course, and related uses**."

I believe the intent of deed 585/157 was to protect the financial interest of Tomoka Oaks, Inc. and the financial interest of the residential homeowners in Tomoka Oaks Country Club Estates should the golf course property ever be sold.

Regarding future sales, the "referral right:"

- Gave Tomoka Oaks, Inc. the right to match the offer thus preserving the "restricted use" of the golf course property.
- AND it gave Tomoka Oaks, Inc. the right to transfer the offer to the HOA of which every lot owner (in Unit 1 at the time of deed recording) was a member (Table 1).

Regarding the restricted use of the Sam Snead Golf and Country Club property, the reverter clause:

- Ensured the golf course property would revert back to Tomoka Oaks, Inc. should the owners fail to utilize the property exclusively as a golf and country club, golf course, and related uses
- Ensured that if 4/5's of the lots had been sold (which at the time of this deed recording would have been the Unit 1 lot owners) the reverted was vested automatically in the HOA of which every lot owner (in Unit 1 at the time of deed recording) was a member (Table 1), and the right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks HOA.

I believe Tomoka Oaks, Inc. intended that HOA membership would be automatic for all lot and homeowners for every Unit in Tomoka Oaks Country Club Estates (Table 1). Therefore the language of deed 585/157 would apply to all Units even though Unit 1 was the only Unit under development during the recording of Deed 585/157.

I am not including Tomoka Oaks Golf and Country Club, Inc. (TOGCC) in my opinion here, because TOGCC surrendered their lease in late 1963. But I did find inconsistencies in TOGCC's official recordings subsequent to the lease surrender as shown in Table 13.

This deed also fulfilled McElroy's public assurance to provide protective covenants for the benefit and protection of homeowners (Table 2).

Ralph R. Frederick's Conflict of Interest in Cross Ownership

Frederick was president and the primary stock holder of TOCC, Inc. when TOCC, Inc. sold the Sam Snead Golf and Country Club to Ormond Ocean Homes, Inc. in March 1970. Frederick was also the President, General Manager, and a stockholder of Ormond Ocean Homes, Inc. at the time of the sale.

The newspaper articles in **Table 7** detail Ralph R. Frederick's cross ownership interests which, I believe, resulted in questionable and unethical filings and intentions as explained in subsequent tables in the section directly below titled: "Protective Covenants and Restrictions during Ralph R. Frederick's Ownership Interest: January 1966 - August 1969."

Table 7

Ralph R. Frederick had cross ownership interests in:

- Sam Snead Golf and Country Club
  - President, Trustee, and majority stock holder under Tomoka Oaks, Inc. from 12/12/1963 – 1/10/1966
  - President and majority stockholder under TOCC, Inc. from 1/10/1966 – 3/5/1970.
- Tomoka Oaks Country Club Estates
  - President and stock holder under Tomoka Oaks, Inc. from 12/12/1963 – 3/5/1970
- Ormond Ocean Homes
  - Stockholder, General Manager, President from 1961 - 3/28/1970 (as per news articles immediately below)

Three *Daytona Beach News-Journal* articles detail Ralph R. Frederick's ownership interest in Ormond Ocean Homes, Inc.

Sunday Issue Date 7/16/1961, page 35

ELLINOR MAKES DEAL ON NORTH HALF OF VILLAGE

- $1.5 million purchase of north section of Ellinor Village scheduled to close 9/10/1961.
- Buyers, all from Freeport, IL, will do business as Ormond Ocean Homes Inc., a Florida corporation.
- Stock held by officers and by Ralph R. Frederick of Ormond Beach who will be general manager.
- Frederick is a personal friend of the Freeport group and brought the two parties together.

Sunday Issue Date 5/30/1965, page 32

ORMOND RENTAL PROJECT GETS BIG FHA LOAN

- Ormond Ocean Homes, a 232-unit rental housing development on the Ormond peninsula, will spend $1,832,000 for modernizing, president Ralph Frederick announced last week.
- Money will be used to renovate the former north half of the Ellinor Village resort.
- Frederick will be the prime contractor
- Frederick, who heads 11 corporations here and is general manager of the Tomoka Oaks development, and Ray Gramley of Freeport, IL bought the development several years ago.

Evening Issue Date 3/6/1970, page 32

IT SAYS IT HERE by Bernard Kahn - page 16

What is brewing is negotiation by Phoenix [Arizona based Sovereign Industries, Inc. see 3/29/1970 Sunday, page 1], an investment conglomerate, to buy the Tomoka Oaks Golf and Country Club and Tomoka Oaks, Inc., the neighboring real estate development, plus Ormond Ocean Homes Apartments (the former north section of Ellinor Village.)
Hustlin' Ralph Frederick, the card playing pro motor, has the big piece of the action in all three parcels.

My Opinion

Ralph R. Frederick had a conflict of interest in ownership regarding the 3/5/1970 sale of the Sam Snead Golf and Country Club (which Frederick owned stock in under his corporation TOCC, Inc.) and the sale of Tomoka Oaks Country Club Estates (which

Frederick owned stock in under Tomoka Oaks, Inc.) to Ormond Ocean Homes, Inc. where Frederick was a stockholder, president, and general manager. Just 23 days after the sale, Sovereign Industries, Inc. acquired all stock in Ormond Ocean Homes, Inc. on 3/28/1970 (Table 10). Therefore Frederick benefitted financially from the sales of the golf course and the estates, and from the purchase of his Ormond Ocean Homes, Inc. stock. And it was in Frederick's best financial interest that prior recorded restrictions and covenants not jeopardize those sales.

Official filings recorded by Tomoka Oaks, Inc. and Tomoka Oaks Golf and Country Club, Inc. (that I see as questionable, unethical, and potentially illegal), were recorded AFTER 3/28/1970 and all relate to the systematic removal of protective covenants and/or the release of referral rights and reverter rights intended to protect golf course property "use" and protect the rights and financial interests of Tomoka Oaks lot and home owners. Tables 11, 12, 13, 15 and 16 detail these questionable filings.

Protective Covenants and Restrictions during Ralph R. Frederick's Ownership Interest: January 1966 - August 1969

Table 8	Official Recording Date 1/10/1966

Mortgage Deed
Dated 1/10/1966. Book 774 / Page 699.

TOCC, Inc., whose president and majority stockholder was Ralph R. Frederick, took possession of the Sam Snead Golf and Country Club via Mortgage Deed, Book 774 / Page 699, dated 1/10/1966.

The Note was endorsed by Ralph R. Frederick (as majority stockholder), James P. Callahan, George L. Haller, Russell W. McFall, and Richard L. Shelter who were all officers of Tomoka Oaks, Inc., and who all owned homes fronting the Sam Snead golf course.

I found no official recordings with Volusia County that reversed or modified the "restrictive use" of the Sam Snead Golf and Country Club in Deed 585/157 to be anything other than, "**The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.**"

My Opinion

This mortgage deed represents a conflict of interest in ownership as it was endorsed by officers of Tomoka Oaks, Inc. who also owned and lived in homes that fronted the Sam Snead golf course:

Ralph R Frederick	24 TOMOKA OAKS BLVD	Book 897 / Page 525
George L. Haller	23 PINE VALLEY CIR	Book 503 / Page 219
Russell W McFall	41 S ST ANDREWS DR	Book 830 / Page 396
Richard L. Shetler	66 ST ANDREWS DR	*Daytona Beach Sunday News-Journal*, 9/9/1962, pg 36 *Daytona Beach Morning Journal*, 12/21/1963, pg 11
James Callahan	Owner of lots:	
	29 S ST ANDREWS DR	*Daytona Beach Sunday News-Journal*, 10/23/1966, page 36
	33 S ST ANDREWS DR	*Daytona Beach Sunday News-Journal*, 8/18/1968, page 42

I believe this conflict carried forward in the future **Conveyance** of Tomoka Oaks Country Club Estates recorded 7/6/1970, Book 1212 / Page 70, which, in my opinion, was an unethical conveyance (Table 11).

Table 9	Official Recording Date 8/4/1969

RESTRICTIONS - Unit 3 Tomoka Oaks Country Club Estates
Dated 8/4/1969. Book 1121 / Page 556.

- Same as Unit 1 restrictions, but omitted automatic HOA membership of lot owners in Unit 3.

Signed by: Tomoka Oaks, Inc., R. W. Davis, President and Donald W. Acer, Jr., Secretary

Issues with Restrictions on Unit 3

When comparing line-for-line the Restrictions for Unit 1 (Table 1) and Unit 3, there were minor differences with two notable exceptions.

Exception 1. The entirety of paragraph #10 in the Unit 1 Restrictions was omitted in the Unit 3 Restrictions. The first sentence of paragraph #10 in Unit 1 states:

> *The Grantee shall automatically become a member of the Tomoka Oaks Homeowners Association; a non-profit corporation comprised of all of the lot owners in Tomoka Oaks Country Club Estates and shall be liable to pay such dues and/or assessments as may be required by said Association in proportion to the number of lots owned.*

Exception 2. Paragraph #11 in the Unit 1 Restrictions states:

> *The Grantor reserves the right to release in whole or in part any restrictions or reservation hereunder, except paragraph 10 immediately next preceding.*

Unit 3 Restrictions state:

The Grantor reserves the right to release in whole or in part any restrictions or reservation.

NOTE: Both Unit 1 and Unit 3 Restrictions state in their final paragraphs:

> *These covenants are to run with the land and shall be binding on all parties claiming under them for a period of 25 years from date these covenants are recorded, after which time said covenants shall be automatically extended for successive periods of 10 years unless instrument signed by a majority of the then lot owners has been recorded agreeing to change said covenants in whole or in part.*
>
> NOTE: My Volusia County research did not uncover any official records filed and recorded by lot owners or the HOA changing covenants in the Unit 1 or Unit 3 Restrictions.

My Opinion

Ralph R. Frederick was president of Tomoka Oaks, Inc. (owner of the residential estates) at the time Unit 3 Restrictions were recorded. He was also president and majority stockholder of TOCC, Inc. which owned the golf course property.

At the time Unit 3 Restrictions were recorded, Frederick knew both the golf course property and the remaining residential lots were under negotiation for sale to Ormond Ocean Homes, Inc. (of which Frederick was a stock holder - see Table 7), and he did not want the homeowners in Unit 3 to have legal recourse (as provided in Warranty Deed 157/159 reverter clause), through HOA membership that might potentially challenge any future sale by Ormond Ocean Homes, Inc. And I believe Frederick had Ralph. W. Davis sign the Restrictions as President of Tomoka Oaks, Inc. to avoid the appearance of Frederick's conflict of interest in ownership in the golf course property and residential lots as relative to the upcoming sale to Ormond Ocean Homes, Inc.

I also believe the omission of automatic HOA membership in Unit 3 was a violation of Frederick's fiduciary responsibility as the prior trustee of the Sam Snead Golf and Country Club and as the current president of Tomoka Oaks Country Club Estates. Frederick knew the intent of prior Tomoka Oaks, Inc. president W. R. McElroy was to protect homeowners if the course were ever sold and not used as a golf course, yet Frederick omitted homeowners' membership into the very Association that gave the homeowners their reverter rights and the possibility to match future sales offers via the referral right in Deed 585/157 (Table 6).

Protective Covenants and Restrictions during Ormond Ocean Homes, Inc. Ownership: March 1970 - June 1971

Table 10	Official Recording Date 3/5/1970
Warranty Deed Dated 3/5/1970. Book 1188 / Page 533. TOCC, Inc. grantor Ormond Ocean Homes, Inc. grantee All of the Sam Snead Golf and Country Club. Subject to restrictions and reservations of Record. *Deed signed by:* Ralph R. Frederick, President of TOCC, Inc.	
Warranty Deed Dated 3/5/1970. Book 1188 / Page 529. Tomoka Oaks, Inc. Grantor Ormond Ocean Homes, Inc. Grantee Deed is for lots in Tomoka Oaks Country Club Estates as detailed in Schedule A, Book 1188 / Page 530. Subject to restrictions and easements of record. *Deed signed by:* Ralph R. Frederick, President of Tomoka Oaks, Inc.	
My Opinion On 3/5/1970, the golf course property was still subject to the "use restriction" specified in Deed 585/157 which specifically stated: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.** The "use" can be inferred from the inclusion of "Subject to restrictions and reservations of Record," so it is my opinion the "restrictive use" was in effect and deemed approved in the 'subject to' statement in Deed 1188/533. The "use" restriction was also in effect at the time Sovereign Industries, Inc. acquired all Ormond Ocean Home, Inc. stock three weeks after the 3/5/1970 sale.[2] My Volusia County Records research did not find any prior officially recorded reversal of the restricted use prior to March 1970 or at any time after. On 3/5/1970, and when Sovereign acquired all Ormond Ocean Homes stock three weeks later, the referral rignts and reverter rights in Deed 585/157 were still in effect. It is my opinion, as explained in Table 11 below, that Sovereign had concerns about Deed 585/157 which resulted in the unethical systematic removal of those 585/157 rights as explained in Table 11.	

Table 11	Official Recording Date 7/6/1970
Conveyance Recorded 7/6/1970. Book 1212 / Page 70. Tomoka Oaks, Inc. conveys all holdings in Tomoka Oaks Country club Estates to Ormond Ocean Homes, Inc.	

Paraphrase of Conveyance

- Tomoka Oaks Homeowners Association has never had any being as a corporation or association.
- Tomoka Oaks, Inc. is conveying to Ormond Ocean Homes, Inc. all of its remaining holdings in Tomoka Oaks Country Club Estates.
- Tomoka Oaks, Inc. sets over, transfers, and assigns to Ormond Ocean Homes Inc. any right, title or interest in the restrictions and the right to enforce, alter, change the Restrictive Covenants dated Jan 31, 1962.

Conveyance signed by: R. W. Davis, President, Tomoka Oaks, Inc. on 3/5/1970

My Opinion

- The timeline of this Conveyance is questionable. It was signed by Tomoka Oaks, Inc. president Ralph W. Davis on 3/5/1970 which conveniently matches the date of the Warranty Deed, but the Conveyance was not recorded until 4 months later.
- The Conveyance was signed by R. W. Davis, President, Tomoka Oaks, Inc. rather than Ralph R. Frederick as President of Tomoka Oaks, Inc. which I believe was done to avoid Frederick's conflict of interest in ownership (Table 7).
- **There was an active homeowners association/club at the time of the 3/5/1970 sale of both the estates and the golf course to Ormond Ocean Homes, Inc.*** (See Table 11 A below.) Therefore it was unethical of Ralph W. Davis to sign a Conveyance stating," Tomoka Oaks Homeowners Association has never had any being as a corporation or association."
- It was unethical (and possibly illegal) of Ralph W. Davis to sign a Conveyance transferring to Ormond Ocean Homes, Inc. "any right, title or interest in the restrictions and the right to enforce, alter, change the Restrictive Covenants dated Jan 31, 1962."

  As Table 1 shows, the Unit 1 Restrictions dated 1/31/1962 stated:

  - #10 Grantee automatically a member of the Tomoka Oaks Homeowners Association
  - #11 Grantor reserves right to release restrictions except #10
  - #15 These covenants are to run with the land and shall be binding on all parties claiming under them for a period of 25 years from date these covenants are recorded, after which time said covenants shall be automatically extended for successive periods of 10 years unless instrument signed by a majority of the then lot owners has been recorded agreeing to change said covenants in whole or in part.

    Therefore, only Unit 1 homeowners could release the #10 restriction; not Tomoka Oaks, Inc., and my research did not find any recordings by lot 1 homeowners or the HOA that released the #10 automatic HOA membership.

    Also, as per #15, my research did not locate any recording by the majority of all lot owners agreeing to change said covenants in whole or in part, therefore it was unethical and possibly illegal to assign that right to Ormond Ocean Homes, Inc. because the right belongs only to the lot owners.

    I also believe that the intent of the Unit 1 restrictions, filed by William R. McElroy, was to protect homeowners. Both Ralph R. Frederick and Ralph W. Davis were aware of this intent, but filed records that negated and denied the existence of an HOA, which in turn released homeowners' reverter rights should the property not be perpetually used as a golf course, country club, and related uses.

- Sovereign Industries, Inc. acquired all Ormond Ocean Homes, Inc. stock three weeks after the 3/5/1970 sales, and, in my opinion, Sovereign wanted assurance from Tomoka Oaks, Inc. that the 3/5/1970 sale could not be challenged due to the referral rights and reverter clause in deed 585/157. And I believe Sovereign did not want to be legally bound by the referral rights and reverter clause should Ormond Ocean Homes, Inc. (aka Sovereign) decide to sell the Sam Snead Golf and Country Club at some point in the future. Therefore, Frederick had to officially justify the release of the referral rights and the reverter clause in deed 585/157, and this was done in these four documents which systematically negated the protections defined in Deed 585/157:

- Conveyance recorded 7/6/1970 (Table 11)
- Resolution recorded 10/19/1970 (Table 12)
- Affidavit recorded 11/22/1970 (Table 13)
- Release recorded 6/16/1971 (Table 15)

It is my opinion Tomoka Oaks, Inc. officers acted unethically, and possibly illegally, when they filed the above four documents which were in direct opposition of the intent of Deed 585/157.

- The following Tomoka Oaks, Inc. officers and stockholders were Tomoka Oaks homeowners whose homes bordered the golf course at the time of the Conveyance. They were aware of the homeowners association of which some officers were active participants (See Table 11 A):

Ralph R Frederick	24 TOMOKA OAKS BLVD	Book 897 / Page 525
Ralph W Davis	40 N St. Andrews Drive	Book 643 / Page 637
Russell W McFall	41 S ST ANDREWS DR	Book 947 / Page 178
James Bochhoven	5 OAKMONT CIRCLE	Book 716 / Page 551
Richard L. Shetler	66 ST ANDREWS DR	*Daytona Beach Sunday News-Journal*, 9/9/1962, pg 36 *Daytona Beach Morning Journal*, 12/21/1963, pg 11
Rockwell V Collins	28 ST ANDREWS DR	*Daytona Beach Sunday News-Journal*, 11/5/1989, page 8
James Callahan	Owners of lots:	
	29 S ST ANDREWS DR	*Daytona Beach Sunday News-Journal*, 10/23/1966, page 36
	33 S ST ANDREWS DR	*Daytona Beach Sunday News-Journal*, 8/18/1968, page 42

NOTE: The "Tomoka Oaks, Inc., Timeline" section goes into further details about each officer, the offices they held, and the residential lots/homes they had ownership in.

Table 11 A

Tomoka Oaks Homeowners Association

Two years prior to the Conveyance, there was a Tomoka Oaks Homeowners Association/Club:

Daytona Beach Evening News, 6/25/1968, page 2
The Tomoka Oaks Homeowners Club* had a Christmas Party in July and distributed gifts to the 100 or so members present. [Mrs. James Bochoven, whose husband was an officer of Tomoka Oaks, Inc., was an attendee.]

And less than one year after the Conveyance, *News Journal* articles again mention the Homeowners Association / Club:

Daytona Beach Sunday News, 4/18/1971, page 42
The Tomoka Oaks Homeowners Association had a covered dish supper at the Tomoka Oaks Country Club with about 120 attending.

Daytona Beach Evening News, 6/21/1971, page 11
The Tomoka Oaks Homeowners Club* had a buffet Supper at Tomoka Oaks Country Club for about 80.

During PLR Development, LTD's ownership, the *Tomoka Oaks Country Club Acquisition Committee* was formed in an attempt to buyout PLR. Although the acquisition attempt failed, the article below demonstrates continuance of the HOA:

Daytona Beach Evening News, 4/26/1974, page 18
Tomoka Oaks Country Club moved closer Friday to becoming a private club, owned and operated by the members . . . The original committee of eight was expanded to 14 following meetings of the Tomoka Oaks Home Owners Assn earlier in the week . . . [Rockwell Collins, former officer of Tomoka Oaks Golf and Country Club. Inc. and resident of Tomoka Oaks Country Club Estates with a golf course facing home at 28 ST ANDREWS DR, was a member of the *Tomoka Oaks Country Club Acquisition Committee*.]

My opinion

* In this context, *club* can also indicate *association*. During the 1960's, the concept of a homeowner association was gaining more prominence, but it was not as common a term as it is today. I can see where a newspaper reporter would use the word "club" as opposed to "association" and vice versa. These articles are a direct indication that Tomoka Oaks Homeowners did meet and communicate on a regular basis.

Table 12 Official Recording Date 10/19/1970

Resolution
Recorded 10/19/1970. Book 1238 / Page 248.

RE: Board of Directors Meeting held 1.75 years earlier on 2/18/1969 in which:

Paraphrase

- It has been submitted to Tomoka Oaks, Inc. that TOCC, Inc. has contracted to sell the golf course property to Ormond Ocean Homes, Inc.
- Tomoka Oaks, Inc. rejects its right to exercise any option to purchase the property, and is in full accord with the sale which is hereby ratified and approved by its Board of Directors on 2/18/1969.
- Tomoka Oaks, Inc. intends to liquidate and dissolve and releases all rights reserved it in the deed of conveyance 585/157 recorded 12/12/63.
- Release of Reverter to become effective 12/13/1973

Signed by: Donald W. Acer, Jr., Secretary

My Opinion

The timeline regarding the official filing of this Resolution is questionable.

The intent of the Resolution is unethical and possibly illegal.

1. The official recording of this 2/18/1969 Resolution was not until 10/19/1970 which was
   - 21 months after the date of the Board of Director's Meeting
   - 7 months after the sale of the golf course to Ormond Ocean Homes, Inc. by TOCC, Inc. on 3/5/1970.
2. The deed of conveyance 585/157 recorded 12/12/1963 specifically indicates:
   - The reverter clause could only be released or modified by BOD resolution at any time AFTER ten years of the 585/157 deed recording date of 12/12/1963. Therefore:
     - The earliest date the BOD could release or modify the reverter clause was 12/13/1973.
     - The BOD resolution that was passed on 2/18/1969 (which modified the clause) was only 6.25 years after 12/12/1963; not 10 years as required by 585/157.
     - BOD meeting held 2/18/1969 specified a reverter release date of 12/12/1973 which was almost 3.75 years in the future.
     - Tomoka Oaks, Inc. was dissolved by Proclamation on 7/11/1972 which was 16 months before the release of the reverter

       I question the ethics of how the Board, in 1969, could specify a reverter release date of 1973 knowing Tomoka Oaks, Inc. was liquidating and would therefore no longer be in existence should the property need to revert to Tomoka Oaks, Inc. due to Ormond Ocean Homes (aka Sovereign) not using the property

perpetually for a golf and country club, golf course, and related uses.

- If Tomoka Oaks, Inc. has sold four-fifths of the lots in Tomoka Oaks Country Club Estates, the right to release or modify the reverter clause is vested automatically and exclusively in the Tomoka Oaks Homeowners Association.

  I question how the BOD could ethically and legally release all reverter rights, including those provided to the Tomoka Oaks HOA,

  - Knowing they were releasing one of the protections McElroy publically promised in his Invitation to the Public (Table 4).
  - Not knowing if 4/5 of the lots would or would not have been sold by 12/12/1973.

3. Ralph R. Frederick had a definite conflict of interest in ownership at the time the Resolution was passed (Table 7). This conflict directly jeopardized and negated the homeowners' reverter rights (Table 6).

   In my opinion, Frederick, as president of Tomoka Oaks Country Club Estates, had a fiduciary responsibility to lot owners and homeowners to protect their financial interests. Throughout 1962 and continuing into 1970, Tomoka Oaks Country Club Estates (owned by Tomoka Oaks, Inc.) marketed the estates as coexisting with the golf course. Golf course facing lots and homesites were more desirable and therefore priced higher than non-golf course facing lots and homesites. (See Section "Master Planned Community" of this report for details and citations.) Due to this representation of coexistence, Fredericks should have included specific referral rights and reverter rights in Deed 1188/533, rather than using this Resolution to release all rights.

4. Deed 1188/533 was "subject to restrictions and reservations of Record."

   Prior to the filing of Resolution 1238/248 in October 1970, I found no official Volusia County Record filings releasing or modifying the reverter clause, or the restriction in Units 1 and 3. And I found no recorded reversal or modification of the "restricted use" defined as: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.**

Table 13	Official Recording Date 11/22/1970

Affidavit
Recorded 11/22/1970. Book 1238 / Page 244.

Summary:

- Corp has been inactive for the last 5 years
- Corp granted rights from Tomoka Oaks, Inc. while in a lease agreement regarding the golf course dated 1/1/1963
- Lease canceled by mutual consent 12/13/1963

Signed 11/5/1968 by: William R. Conway, VP, Tomoka Oaks Golf and Country Club, Inc.

My Opinion

This Affidavit was another document Ralph R. Frederick needed to prove there could be no legal challenges to TOCC, Inc.'s March 1970 sale of the Sam Snead golf course to Ormond Ocean Homes, Inc. (aka Sovereign Industries, Inc.). It is my opinion the Affidavit did not truthfully state the facts, and that Tomoka Oaks Golf and Country Club, Inc. was active after 11/5/1968 and after the Tomoka Oaks, Inc. BOD 2/18/1969 resolution approving the sale of the golf course property to Ormond Ocean Homes, Inc.

- The Affidavit was signed 11/5/1968 but not recorded with Volusia County until 11/22/1970, which was 2 years later.

- The recording date of the Affidavit was 8 months after the sale of the golf course property to Ormond Ocean Homes/Sovereign.
- Tomoka Oaks Golf and Country Club, Inc. filed two recordings with Volusia County during their stated inactive timeframe:
  - Warranty Deed recorded 9/14/1965; Book 735 / Page 428
  - Quit Claim Deed recorded 2/18/1966; Book 774 / Page 657
- Florida's Division of Corporations indicates the corporation was dissolved by proclamation on 10/21/1974, which was 6 years after their stated inactive date.

Table 14	Official Recording Date 6/15/1971

Warranty Deed
Recorded 6/15/1971. Book 1306 / Page 286.

Ormond Ocean Homes, Inc. grantor
PLR Development, LTD grantee

- All of the Sam Snead Golf and Country Club.
- Remaining lots in Tomoka Oaks Country Club Estates

Subject to restrictions, reservations, and easements of Record.

My Opinion

On 6/15/1971 the golf course property was still subject to the "use restriction" specified in Deed 585/157 which specifically stated: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.** The "use" can be inferred in 1306/286 from the inclusion of "Subject to restrictions, reservations, and easements of Record.," so it is my opinion the "restrictive use" was in effect and deemed approved in Deed 1306/286. My Volusia County Records research did not find any officially recorded reversal or modification of the encumbered use.

It is my opinion that on 6/15/1971 the golf course property was still subject to the reverter clause in Deed 585/157 despite the filings in Tables 11, 12, and 13. Ormond Ocean Homes, Inc. (aka Sovereign Industries, Inc.), still had a fiduciary responsibility to lot owners and homeowners to protect their financial interests because throughout their ownership, Ormond Ocean Homes, Inc. marketed the estates as coexisting with the golf course. Golf course facing lots and homesites were more desirable and therefore priced than non-golf course facing lots and homesites. (See Section "Master Planned Community" of this report for additional details and citations.) Due to this representation of coexistence, Ormond Ocean Homes, Inc. (aka Sovereign) had a fiduciary responsibility to uphold in Deed 1306/286 the referral rights and reverter rights in 585/157. Instead, in my opinion, Ormond Ocean Homes, Inc. and Tomoka Oaks, Inc. intentionally and unethically released the protective rights of home owners should the golf course not be perpetually used as intended: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.**

Protective Covenants and Restrictions during Milton W. Pepper's Ownership Interest: June 1971 - February 1979

It is my opinion that beginning in June 1971 through February 1979 (see Ownership Chart), Milton W. Pepper failed in his fiduciary responsibility to protect homeowners' reverter rights and potential referral rights as intended in Tomoka Oak, Inc.'s 12/12/1963 Deed 585/157 (Table 7).

1. Pepper perpetuated Tomoka Oak, Inc.'s:
   - 1970's unethical denial of the existence of an HOA (Tables 11 and 16).
   - 1970's unethical release of any and all rights reserved onto it in 585/157 (Tables 12 and 15).
   - Unethical assignment of rights, titles, or interest in all restrictions and rights to enforce, alter, change or wave Restrictive Covenants dated 1/31/1962 (Table 11).
2. Pepper included reverter rights protecting himself as the individual golf course owner, but he did not include referral or reverter protections for estate lot owners and homeowners when he sold the Sam Snead Golf and Country Club to RTH, Inc. in February 1979. (Table 19)

Table 15	Official Recording Date 6/16/1971
Release Recorded 6/16/1971. Book 1307 / Page 89. *Summary*: ▪ As per BOD meeting held 2/18/1969, Tomoka Oaks, Inc.: ○ Releases any and all rights reserved unto it in Deed 585/157, particularly its right of first refusal set forth in said deed ○ Releases the Reverter Clause contained in Deed 585/157 ▪ The release of the Reverter Clause to be effective 12/13/1973 *Release signed by:* R. W. Davis, President, Tomoka Oaks, Inc.	
My Opinion See Table 12 regarding the BOD Resolution on 2/18/1969 as Table 12 directly relates to the 1307/89 Release in Table 15. In my opinion, the major differences between Resolution 1238/248 (Table 12) and Release 1307/89 (Table 15) are that: • 1307/89 was filed and recorded one day after Ormond Ocean Homes, Inc. sold the golf course property to PLR Development, LTD. • PLR was, in my opinion, asking for legal assurance from Tomoka Oaks, Inc. that the Reverter in Deed 585/157 did not present a legal obstacle to the sale of the golf course property to PLR. • PLR did not want to be legally bound by the 585/157 reverter clause should PLR sell the Sam Snead golf course.	

Table 16	Official Recording Date 5/8/1972

Assignment
Recorded: 5/8/1972. Book 1420 / Page 159

Paraphrase

- Tomoka Oaks Homeowners Association has never had any being as a corp or association.
- Tomoka Oaks, Inc. conveyed to Ormond Ocean Homes all of its remaining holdings in Tomoka Oaks Country Club Estates and assigned all of its right, title or interest originally contained in the Restrictive Covenants dated Jan 31, 1962.
- Ormond Ocean Homes, Inc. does hereby set over, transfer, and assign to PLR any right, title or interest in all restrictions and the right to enforce, alter, change or waive any original restrictions.

Signed by Ormond Ocean Homes, Inc.

My Opinion

Ormond Ocean Homes, Inc.'s Assignment of the Estates to PLR was based on the same unethical premise as Tomoka Oaks, Inc.'s 7/6/1970 Conveyance of the Estates to Ormond Ocean Homes (Table 11). Therefore the same issues detailed in the Table 11 Conveyance carry forward to this Assignment. And my opinion remains the same:

- The timeline regarding the official filing of this Assignment is questionable as per same rationale in Table 11.
- The intent of the Assignment is unethical because there was an active HOA at the time of the Assignment as detailed in Table 11 A.

Table 17	Official Recording Date 2/27/1975

Warranty Deed
Recorded 2/27/1975. Book 1768 / Page 1798.

PLR Development, LTD grantor (Milton W. Pepper, General Partner)
AKRON Enterprises, Inc. grantee (Milton W. Pepper, President)

Sale of all of the Sam Snead Golf and Country Club to AKRON subject to easements, restrictions and reservations of record, if any.

My Opinion

On 2/27/1975 the golf course property was still subject to the "restrictive use" in Deed 585/157 (Table 6): **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.**

My Volusia County Records research did not find any officially recorded reversal or modification of the restricted use.

Table 18	Official Recording Date 2/28/1977

Warranty Deed
Recorded 2/28/1977. Book 1887 / Page 301.

PLR Development, LTD grantor
BML Investments and PRN Investments grantees

Sale of remaining lots in Tomoka Oaks Country Club Estates.
Subject to restrictions, reservations, and easements of record.

My Opinion

- I believe the Unit 1 Restrictions were still in effect at the time of the 2/28/1977 sale of Tomoka Oaks Country Club Estates, and therefore if 4/5's of the lots in Unit 1 had been sold, the reverter right would vest automatically in the HOA. (Tables 1, 11 and 16)

Table 19	Official Recording Date 2/14/1979

Warranty Deed
Recorded 2/14/1979. Book 2052 / Page 1019.

Milton W. Pepper grantor
RTH, Inc. grantee

Sale of the Sam Snead Golf and Country Club to RTH, Inc.
Subject to easements and restrictions of record, if any.

Reverter
"During the term of the purchase money note and wrap around mortgage executed of even date herewith by grantee to grantor, or for a period of 18 years in the event the mortgage is prepaid in full, the above described property shall revert to the grantor upon the condition that any portion of said property is used for any purpose other than a golf course with club house and appurtenant amenities.

My Opinion

On 2/14/1979 the golf course property was still subject to the "use restriction" specified in Deed 585/157 which specifically stated: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.** The "use" can be inferred from the inclusion of "Subject to easements and restrictions of record, if any." Therefore, it is my opinion the "restrictive use" was in effect and deemed approved in the 'subject to' statement in Deed 2052/1019.

It is my opinion that on 2/14/1979 the golf course property was still subject to the reverter clause in Deed 585/157 despite the filings in Tables 15 and 16. The intent of the Reverter was to continue to protect the original restrictive use. The reverter may have capped at 18 years upon payment of the note, but the **intent** was still **perpetual**.

Milton W. Pepper as sole owner of the golf course, and as stockholder in PLR Development, LTD., still had a fiduciary responsibility to lot owners and homeowners to protect their financial interests. Throughout its ownership, PLR marketed the estates as coexisting with the golf course. Golf course facing lots were more desirable and therefore priced 70% - 96% higher[3], [4] than non-golf course facing lots and homesites. (See Section "Master Planned Community" of this report for details and citations.) Due to this representation of coexistence, Pepper had a fiduciary responsibility to uphold in Deed 2052/1019 the referral rights and reverter rights intended in 585/157. Instead, in my opinion, Milton W. Pepper, PLR Development, LTD, and

Tomoka Oaks, Inc. intentionally and unethically released the protective rights of home owners should the golf course not be perpetually used as intended.

Also, it should be noted:

- Milton W. Pepper's son-in-law, Ben Horne, was a real estate agent who listed homes in Tomoka Oaks Country Club Estates and who placed ads in the *Daytona Beach News- Journal* advertising golf course fronting lots and homes.
- Milton W. Pepper and Ben Horne were both stockholders in Tomoka Oakwood Development Corp. which owned and developed Tomoka Oaks North condominiums of which buyers received a paid membership in Tomoka Oaks Country Club.
- The above conflicts of interest in cross ownership are detailed and cited in the section of this report titled "Conflicts of Interest in Cross-Ownership."

Recorded 12/12/2011. Book 6659 / Page 1525.

Putnam State Bank grantor
EJTS Holding, LLC grantee

Sale of Sam Snead Golf and Country Club subject to encumbrances, easements and restriction of records.
Together with all the tenements, hereditaments and appurtenances thereto belonging in any wise appertaining.

Warranty Deed
Recorded 4/21/2021. Book 8036 / Page 3448.

EJTS Holding, LLC grantor
Triumph Oaks of Ormond Beach I, LLC grantee

Sale of Sam Snead Golf and Country Club subject to reservations, covenants, conditions, restrictions and easements of record and to all applicable zoning ordinances and/or restrictions imposed by governmental authorities, if any.

Protective Covenants and Restrictions: Summary and My Opinion

Regardless of whatever entity owned (or owns) the Sam Snead Golf and Country Club:

- The golf course property was originally intended and encumbered as: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses.**
- My Volusia County Records research did not find any officially recorded reversal or modifications of the restricted, perpetual use defined in Deed 585/157. And I found no modifications to the convenants in Restrictions 431/32.
- The Reverter clause in Deed 585/157 is still current today, and due to the fact that over 4/5's of the lots in Tomoka Oaks Country Club Estates have been disposed of, the reverter is now vested automatically and exclusively with the Tomoka Oaks Homeowners Association.
- Since its inception in the early 1960's and continuing to present time, buyers in Tomoka Oaks Country Club Estates purchased lots and homes predicated on their value as related to the coexisting golf course.
- The golf course property continues to benefit the surrounding residential properties; it preserves the character of the community, and provides residents with a pleasant view.

ENDNOTE

Conflicts of Interest in Cross-Ownership

It is my opinion that throughout the ownership of the **Sam Snead Golf and Country Club** and the **Tomoka Oaks Country Club Estates**, conflicts of interest in cross-ownership resulted in questionable and unethical business practices by stockholders which ultimately jeopardized and negated the protective covenants and restrictions originally recorded to protect home values of residential estate owners and to protect the use of the golf course property as: **Property shall be used perpetually for purposes of a golf and country club, golf course, and related uses**.

Throughout the ownership of the Sam Snead Golf and Country Club and the Tomoka Oaks Country Club Estates, officers in Tomoka Oaks, Inc., TOCC, Inc., Ormond Ocean Homes, Inc., PLR Development LTD, AKRON Enterprises, Inc. and the individuals Ralph R. Frederick and Milton W. Pepper were involved in one or more of the following conflicts of interest:

1. Bought and sold lots in Tomoka Oaks Country Club Estates
2. Lived in golf course facing homes in Tomoka Oaks Country Club Estates
3. Made unethical and possibly illegal modifications to protective covenants and restrictions.
4. Jeopardized and negated homeowner rights through questionable and unethical Volusia County filings and recordings.

It is my opinion that the unethical and possibly illegal documents filed in #3 above are invalid due to cross-ownership conflicts of interest. And I believe the protective covenants and restrictions originally recorded in the early 1960's (specifically Warranty Deed 585/157 recorded 12/12/1963 and Restrictions 431/32 recorded 1/31/1962) are still in effect today.

For the Reader's information:

- All *Daytona Beach News-Journal* article citations come from www.newsbank.com accessed through the Volusia County Library.
- All opinions are my own. I did not collaborate with any other Tomoka Oaks homeowner or with the Tomoka Oaks HOA.

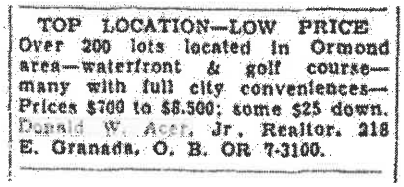
Tomoka Oaks, Inc. officers with questionable conflict of interest in cross-ownership

1. Donald W. Acer, Jr., Secretary, Tomoka Oaks, Inc.

Donald W. Acer, Jr. served as secretary of Tomoka Oaks, Inc. from 1960 - 1972 and signed many of the corporate filings on record with Volusia County. Documents that I believe are unethical and possibly illegal include:



RESTRICTIONS - Unit 3 Tomoka Oaks Country Club Estates
Dated 8/4/1969. Book 1121 / Page 556.
Full details in Table 9 "Protective Covenants and Restrictions."

Resolution
Recorded 10/19/1970. Book 1238 / Page 248.
Full details in Table 12 "Protective Covenants and Restrictions"

Acer was also very active in local real estate during the entire time he held the office of Secretary with Tomoka Oaks, Inc.[4] Therefore Acer was well versed in the ethics and fiduciary duties of real estate agents.

- Member of the Ormond Beach Board of Realtors[5]
- President of the Florida Mortgage Brokers Assn, Daytona Beach Chapter[6]
- Real Estate Agent with Key Realtor Asso Inc.[7]
- President of the Daytona Beach - Ormond Beach Board of realtors in 1970[8]

In September 1962, Acer ran a series of ads in the *Daytona Beach Morning-Journal*[9] advertising golf course lots (see right). It is my opinion Acer was marketing lots in Tomoka Oaks Country Club Estates thus creating a conflict of interest should Acer have benefitted financially due to his position on the Tomoka Oaks, Inc. Board of Directors.

TOP LOCATION—LOW PRICE
Over 200 lots located in Ormond area—waterfront & golf course—many with full city conveniences—Prices $700 to $8,500; some $25 down. Donald W. Acer, Jr., Realtor, 218 E. Granada, O. B. OR 7-3100.

As shown above, Acer was also a real estate agent with Key Realty Asso, Inc. Throughout the 1970's, Key Realty placed numerous real estate ads in *the Daytona Beach News-Journal* which promoted golf course fronting homes for sale in Tomoka Oaks Country Club Estates. Example ad text included:

- Overlooking fairway (6/23/1970; pg 19)
- On the golf course (7/14/1974; pg 41)
- Tee off from your backyard (10/15/1974; pg 19)
- Home on the 17th tee (12/30/1974; pg 30)
- On the 13th fairway (5/28/1975; pg 30)
- Overlooking 16th tee (9/25/1977; pg 59)
- Golf course home (4/8/1979; pg 53)

Acer was fully aware that Tomoka Oaks, Inc.'s Resolution 1238/248 voted on in February 1969, intended to release any and all reverter rights of Tomoka Oaks, Inc. and Tomoka Oaks Homeowners Association. If Acer served as a listing agent or buyer's agent on any of those advertised homes during his agency with Key, it was with the full knowledge homeowners' protective reverter rights were released effective 12/13/1973. In my opinion that represented a conflict of interest if Acer did not disclose the release of rights.

2. Ralph W. Davis, President, Tomoka Oaks, Inc.

Ralph W. Davis served as president of Tomoka Oaks, Inc. from 1960 - 1972 and signed questionable, and in my opinion unethical, recordings with Volusia County that negated the homeowner rights and protections recorded in Deed 585/157. Specific documents include:

RESTRICTIONS - Unit 3 Tomoka Oaks Country Club Estates

Recorded 8/4/1969. Book 1121 / Page 556.
Full details in Table 9 "Protective Covenants and Restrictions."

Conveyance

Recorded 7/6/1970. Book 1212 / Page 70.
Full details in Table 11 "Protective Covenants and Restrictions."

Release

Recorded 6/16/1971. Book 1307 / Page 89.
Full details in Table 15 "Protective Covenants and Restrictions."

Davis was also a real estate agent who listed many of the golf course facing homes for sale in Tomoka Oaks Country Club estates throughout the 1970's. Like Acer, Davis knew that Tomoka Oaks, Inc.'s Resolution 1238/248 voted on in February 1969, intended to release any and all reverter rights of Tomoka Oaks, Inc. and Tomoka Oaks Homeowners Association, yet he continued marketing golf course facing homes fully knowing homeowners' protective reverter rights were released effective 12/13/1973.

Davis also served as First Vice President of the Daytona Beach - Ormond Beach Board of Realtors during 1971[10], so he was fully aware of his ethical and fiduciary duties to home buyers. It is my opinion he did not exercise those duties when his advertisements for Tomoka Oaks Country Club Estate listings used marketing text such as:

- Overlooking number 3 Fairway (9/7/1973; pg 31)
- Tomoka Oaks Beauty on Golf Course lot (1/4/1974; pg 22)
- Choice executive home on GOLF COURSE (3/2/1974; pg 33)
- A Bit of Paradise located on the 5th Green (7/22/1974; pg 32)
- Prestige Tomoka Oaks. On golf course (10/7/1974; pg 20)
- Beautiful lot facing 16th tee (11/23/1974; pg 41)
- Located on the 17th hole (5/19/1975; pg 26)

9/7/1973; pg 31	3/2/1974; pg 33	10/7/1974; pg 20

3. Ralph R. Frederick had ownership interests in multiple corporations:

- Sam Snead Golf and Country Club
  - President, Trustee, and majority stock holder under Tomoka Oaks, Inc. from 12/12/1963 – 1/10/1966
  - President and majority stockholder under TOCC, Inc. from 1/10/1966 – 3/5/1970.
- Tomoka Oaks Country Club Estates
  - President and stock holder under Tomoka Oaks, Inc. from 12/12/1963 – 3/5/1970
- Ormond Ocean Homes
  - Stockholder, General Manager, President from 1961 - 3/28/1970 (as per news articles in Table 7 "Protective Covenants and Restrictions.")
- Tomoka Pines, Inc.
  - President per Corporate filing 7/13/1967

It is my opinion that Ralph R. Frederick's conflict of interest in cross-ownership in TOCC, Inc., Tomoka Oaks, Inc., and Ormond Ocean Homes, Inc. resulted in the intentional, systematic, and unethical removal of the prior protective covenants and restrictions in Deed 585/157 recorded on 12/12/1963 intended to protect homeowner investments in Tomoka Oaks Country Club Estates.

- During his presidency of Tomoka Oaks Country Club Estates, Frederick as an individual buyer purchased from Tomoka Oaks, Inc. multiple golf course facing lots in the Estates (see above) which he presumably then sold to other individuals or developers. One of those lots became his own personal residence at 24 TOMOKA OAKS BLVD located just west of the entrance to the Sam Snead Golf and Country Club.

- Also during Frederick's presidency of Tomka Oaks Country Club Estates, Restrictions were recorded for Unit 3 which omitted automatic HOA membership (see Table 9 in "Protective Covenants and Restrictions"). It is my opinion that Frederick's knowledge of the upcoming sale of the golf course and estates to Ormond Ocean Homes, Inc. influenced Unit 3 Restrictions because:

  a) Deed 585/157 provided reverter rights to the HOA should the golf course not be used perpetually as encumbered: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses**

  b) Frederick did not want TOCC, Inc. and Ormond Ocean Homes, Inc. and Sovereign Industries, Inc. to be bound by the 585/157 reverter clause during the upcoming sale to Ormond Ocean Homes and any future sales of the golf course by Ormond Ocean Homes/Sovereign.

  c) Unit 3 restrictions were signed by Tomoka Oaks, Inc., R. W. Davis, President and Donald W. Acer, Jr., Secretary. Frederick did not sign the Restrictions in order to avoid the obvious appearance of his conflict of interest.

- Frederick was president of Tomoka Oaks Country Club Estates, and he was president of Tomoka Oaks, Inc., which sold four residential lots to James P. Walker. Walker and Frederick were also partners in Tomoka Pines, Inc. [11] Although Walker purchased Tomoka Oaks lots as an individual, and not through Tomoka Pines, the business partnership Walker and Frederick shared in Tomoka Pines makes the Tomoka Oaks lot sales a questionable conflict of interest.

- Frederick was president and majority stock holder of TOCC, Inc. when Ormond Ocean Homes, Inc. purchased the Sam Snead Golf and Country Club on 3/5/1970 from TOCC, Inc. Frederick was a stock holder, president, and general manager of Ormond Ocean Homes, Inc. at the time of this sale (see Table 7 in "Protective Covenants and Restrictions").

- Frederick was president and stockholder in Tomoka Oaks, Inc. when Ormond Ocean Homes, Inc. purchased Tomoka Oaks Country Club Estates on 3/5/1970 from Tomoka Oaks, Inc. And Frederick was

a stock holder, president, and general manager of Ormond Ocean Homes, Inc. at the time of this sale (Table 7 "Protective Covenants and Restrictions").

- Shortly after Ormond Ocean Homes, Inc. purchased the Sam Snead golf course and the residential Estates, the stock of Ormond Ocean Homes, Inc. was acquired by Sovereign Industries, Inc. on 3/28/1970. Therefore Frederick, who owned stock in all three corporations and benefitted financially, had a definite conflict of interest in cross-ownership.

- After Sovereign acquired all Ormond Ocean Homes, Inc. stock, Tomoka Oaks, Inc. filed questionable, and unethical (and perhaps illegal) documents which released the protective covenants and reverter rights set forth in Deed 585/157 dated 12/12/1963. And it negated any existence of a Tomoka Oaks HOA therefore nullifying HOA rights in the 585/157 Reverter Clause. Documents filed are listed here and are explained in detail in Tables located in the "Protective Covenants and Restrictions" section of this report:

  - **Conveyance,** Recorded 7/6/1970. Book 1212 / Page 70. (Table 11)
  - **Resolution,** Recorded 10/19/1970. Book 1238 / Page 248. (Table 12)
  - **Affidavit,** Recorded 11/22/1970. Book 1238 / Page 244. (Table 13)
  - **Release,** Recorded 6/16/1971. Book 1307 / Page 89. (Table 15)

  It is my opinion that Sovereign wanted assurance that the Referral Rights and Reverter Rights in Deed 585/157 would not present any legal issues with Ormond Ocean Homes, Inc.'s recent purchase of the Sam Snead Golf and Country Club or with any future sale of the golf course by Sovereign. I believe officers of Tomoka Oaks, Inc. intentionally submitted the above four documents to systematically release and negate the Referral Rights and Reverter Rights recorded in Deed 585/157. These four documents went directly against the intent of Deed 585/157.

  I believe Frederick, Acer, Davis and other Tomoka Oaks, Inc. officers were complicit in removing rights and protections that were originally intended in Deed 585/157 to protect homeowners' investments and the use of the golf course as: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses**.

  And I believe Tomoka Oaks, Inc.'s acted unethically when they recorded **Conveyance** 1212/70 and **Assignment** 1420/159 which both stated: Tomoka Oaks Homeowners Association has never had any being as a corp or association. My research indicates there was an active homeowners' club/association at the time of these recordings (Table 11 A).

  - Lastly, Deed 585/157 dated 12/12/1963 made Frederick the **trustee** of the Sam Snead Golf and Country Club. The intent of 585/157 was clearly to provide referral rights and reverter rights to protect the perpetual use of the golf course property and the financial investments of homeowners who purchased lots based on the coexistence of the golf course and estates. I believe Frederick did not honor his trusteeship but instead coordinated systematic recordings that took away the very rights and protections of Deed 585/157.

ORMOND OCEAN HOMES, INC (AKA SOVEREIGN INDUSTRIES, INC.) Conflicts of Interest in Cross-Ownership
Owner of both the golf course and estates March 1970 - June 1971

Ormond Ocean Homes, Inc./Sovereign Industries, Inc. took ownership of the Sam Snead Golf and Country Club and Tomoka Oaks Country Club Estates in March 1970. Prior to the sale, Ralph R. Frederick had ownership interest in all three parcels.

As detailed above, Tomoka Oaks, Inc. officers filed recordings after the March 1970 sale to Ormond Ocean Homes that I believe were unethical and possibly illegal:

- **Conveyance,** Recorded 7/6/1970. Book 1212 / Page 70. (Table 11)
- **Resolution,** Recorded 10/19/1970. Book 1238 / Page 248. (Table 12)
- **Affidavit,** Recorded 11/22/1970. Book 1238 / Page 244. (Table 13)
- **Release,** Recorded 6/16/1971. Book 1307 / Page 89. (Table 15)

NOTE: Citations for the above opinions are included in Tables located in the "Protective Covenants and Restrictions" section of this report.

PLR DEVELOPMENT, LTD. and **AKRON ENTERPRISES, INC.** and **MILTON W. PEPPER**
Conflicts of Interest in Cross-Ownership
June 1971 - Feb 1979

Milton W. Pepper had ownership interest in both the Sam Snead Golf and Country Club and in Tomoka Oaks Country Club Estates, as well as Tomoka Oakwood Development Corporation, which I believe resulted in conflicts of interest that jeopardized home owner investments in the estates:

- Sam Snead Golf and Country Club
  - General Manager and stock holder under PLR Development, LTD. from 6/15/1971 - 2/27/1975
  - President and primary stock holder under AKRON Enterprises, Inc. from 2/27/1975 - 2/27/1978
  - Individual, sole Owner from 2/27/1978 - 2/14/1979
- Tomoka Oaks Country Club Estates
  - General Manager and stockholder under PLR Development, LTD. from 6/15/1971 - 2/28/1977
- Tomoka Oakwood Development Corporation of Ormond Beach, FL
  - Secretary and Director from 4/27/1972 - 9/3/1976
- Tomoka Oakwood Development Corporation, Inc.
  - President from 8/28/1972 - 10/21/1974

Milton W. Pepper was the original architect of the Tomoka Oaks Master Plan[12]. Therefore Pepper had firsthand knowledge of the intent that the golf course and the estates were to coexist. I believe Pepper:

- Used his position to purchased lots in Tomoka Oaks Country Club estates for his personal benefit.
- Did not want to be bound by the Unit 1 Restrictions and the reverter clause in Deed 585/157 when PLR Development, LTD (of which Pepper was a stockholder) sold the Sam Snead Golf and Country Club to AKRON Enterprises, Inc. (of which Pepper was a stockholder), which in turn sold the golf course property to Milton W. Pepper as sole owner, who in turn sold the golf course to RTH, Inc.

  During all sales, I believe Pepper neglected his fiduciary duty to include homeowner reverter rights in golf course deeds. Pepper was an officer in PRL Development LTD which consistently marketed the coexistence of the golf course and residential estates.
- Used his stock ownership in multiple corporations to promote Sam Snead golf course membership as an amenity in Pepper's development of Tomoka Oaks North Condominiums.
- Created a separate corporation for himself and his son-in law, realtor Ben J. Horn, Jr., that may have enabled Horn to profit from lot sales in Tomoka Oaks Country Club Estates.
- Did intend to keep the encumbered "use" of the golf course as: **The Sam Snead Golf and Country Club property shall be used perpetually for purposes of a golf and country club, golf course, and related uses**. But failed to exercise his fiduciary responsibility to include referral and reverter clauses that protected Tomoka Oaks Country Club Estates homeowner investments.

  NOTE: Citations for the above opinions are included in the text below and in Tables located in the "Protective Covenants and Restrictions" section of this report.

On 6/15/1971, Ormond Ocean Homes, Inc. sold the Sam Snead Golf and Country Club and the Tomoka Oaks Country Club Estates to PLR Development, LTD, (Book 1306 / Page 286), of which Milton W. Pepper was a stockholder and General Manager.[13]

On 6/16/1971, the day after the sale above,

1. Tomoka Oaks, Inc., former owner of the golf course property and the residential estates, filed a **Release** with Volusia County in Book 1307 / Page 89. (Table 15)

2. The **Release** related to the Tomoka Oaks, Inc. Board of Director's Meeting held 2.5 years earlier on 2/18/1969 in which the Board:

    a. Released the right of first refusal in deed of conveyance 585/157 filed 12/12/1963
    b. Released the reverter clause to be effective 12/13/1973
    c. Release signed by R. W. Davis, President, Tomoka Oaks, Inc.

    It is my opinion that PLR, (just like former owner Sovereign Industries, Inc.), wanted officially recorded documentation that the Referral Rights and Reverter Rights in Deed 585/157 would not present any legal issues with Ormond Ocean Homes, Inc.'s recent sale to PLR of the Sam Snead Golf and Country Club or with any future sale of the golf course by PLR.

    PLR (of which Pepper was General Manager) subsequently sold the Sam Snead Golf and Country Club to AKRON Enterprises, Inc. (of which Pepper was President)[14] on 2/27/1975; Book 1768 / Page 1798. And AKRON sold the property to Milton W. Pepper as an individual on 2/27/1978; Book 2001 / Page 382.

    As stated in the "Protective Covenants and Restrictions" section Table 15, and the related Table 12, I believe this **Release** was unethical and possibly illegal based on:

    The deed of conveyance 585/157 recorded 12/12/1963 which specifically states:

    1. The reverter clause could only be released or modified by BOD resolution at any time AFTER ten years of the 585/157 deed recording date of 12/12/1963. Therefore:

        - The earliest date the BOD could release or modify the reverter clause was 12/13/1973.
        - The BOD resolution that was passed on 2/18/1969 which was only 6.25 years after 12/12/1963; not 10 years as required by 585/157.
        - BOD meeting held 2/18/1969 specified a reverter release date of 12/12/1973 which was almost 3.75 years in the future.
        - Tomoka Oaks, Inc. was dissolved by Proclamation on 7/11/1972 which was 16 months before the release of the reverter.

        I question the ethics and legality of how the Board, in 1969, could specify a reverter release date of 12/13/1973 knowing Tomoka Oaks, Inc. was liquidating and would therefore no longer be in existence should the property need to revert to Tomoka Oaks, Inc. due to any future entity not using the property perpetually for a golf and country club, golf course, and related uses prior to the 12/13/1973 release date.

2. If Tomoka Oaks, Inc. has sold four-fifths of the lots in Tomoka Oaks Country Club Estates, the right to release or modify the reverter clause is vested automatically and exclusively in the Tomoka Oaks Homeowners Association.

   I question how the BOD could ethically and legally release all reverter rights, including those provided to the Tomoka Oaks HOA,

   - Knowing they were releasing one of the protections McElroy publically promised in his Invitation to the Public (Table 4).
   - Not knowing if 4/5 of the lots would or would not have been sold by 12/12/1973

On 5/8/1972, 11 months after Ormond Ocean Homes, Inc. sold the golf course and estates to PRL, Ormond Ocean Homes, Inc. filed:

- **Assignment,** Recorded: 5/8/1972. Book 1420 / Page 159 (Table 16)
  - Negated the existence of a Tomoka Oaks HOA
  - Assigned to PLR all rights in the Restrictive Covenants dated 1/31/1962

  It is my opinion the Assignment was based off the same unethical premise as Conveyance 1212/70 (Table 11), and that PLR wanted official documentation that PLR's ownership of the golf course and any future sale could not be legally challenged by home owners in Tomoka Oaks Country Club Estates. My research did find there was an active homeowners' association/club at the time of the Conveyance (Table 11 A) and the Assignment (Table 16).

  In addition to negating the existence of the HOA, PLR wanted all rights assigned to homeowners in the Unit 1 Restrictions to be assigned to PLR. But this Assignment was not allowable as stated in Tables 1 and 11 "Protective Covenants and Restrictions":

  The Unit 1 Restrictions dated 1/31/1963 stated:

  - #10 Grantee automatically a member of the Tomoka Oaks Homeowners Association
  - #11 Grantor reserves right to release restrictions except #10
  - #15 These covenants are to run with the land and shall be binding on all parties claiming under them for a period of 25 years from date these covenants are recorded, after which time said covenants shall be automatically extended for successive periods of 10 years unless instrument signed by a majority of the **then** lot owners has been recorded agreeing to change said covenants in whole or in part.

  So, in my opinion, every lot owner in Unit 1 was automatically a member of the Tomoka Oaks Homeowners Association, and only those lot owners could change the covenants in the Unit 1 Restrictions. Therefore Ormond Ocean Homes, Inc. and Tomoka Oaks, Inc. did not have the authority to assign the rights in Unit 1 to any other entity until at least 1998. AND the covenants were still binding after 1998 unless the majority of the **then** lot owners record agreement to change the

covenants. My Volusia County research did not find any recorded instrument by the majority of the lot owners changing Unit 1 Restrictions or any subsequent Restrictions.

Cross-Ownership of Residential Lots in relation to Milton W. Pepper

The following sales show cross-ownership interest when Tomoka Oaks Country Club homes and lots were sold to individuals, officers, and corporations associated with Milton Pepper.

Seller and Sales Date	Buyer	Lot/Block	Address	Book/Page
Ormond Ocean Homes, Inc. 6/15/1971*	Milton Pepper - as an individual	6/6	75 N ST ANDREWS DR	1306/296
Ormond Ocean Homes, Inc. 6/15/1971*	Milton Pepper - as an individual	8/15	39 OAKMONT CIR	1306/296
PLR Development, LTD 2/28/1975	AKRON Enterprises, Inc[15] -Milton Pepper is a stockholder/President	12/9	42 N ST ANDREWS DR	1768/1795
PLR Development, LTD 5/2/1975	J. Kermit Coble -Attorney for PLR[16] - Director in Tomoka Oakwood Development Corp of Ormond Beach, FL[17]	10/5 11/5	17 JANET CIR	1777/1864
* These two sales occurred the same day Ormond Ocean Homes, Inc. sold the golf course and the estates to PLR of which Pepper was stockholder and General Manager.				

Lifetime Membership

On 10/10/1972, PLR Development, LTD filed a Lifetime Membership Agreement in Tomoka Oaks Golf and Country Club (Book 1487 / Page 629) for:

- Milton W. Pepper
- J. Kermit Coble

And on 2/14/1979, Milton W. Pepper as the sole owner of the Sam Snead Golf and Country Club provided Lifetime Memberships in Tomoka Oaks Golf and Country Club (Book 2052 / Page 1019) to former Tomoka Oaks, Inc. officers (Table 8):

- R. W. McFall
- Richard L. Shetler
- George L. Haller
- James P. Callahan

Lifetime memberships included:

- Right to assign one other lifetime membership
- No green fees

- No assessments or dues
- Free use of electric golf carts
- 50% off food/beverages
- Sales in Pro Shop at wholesale

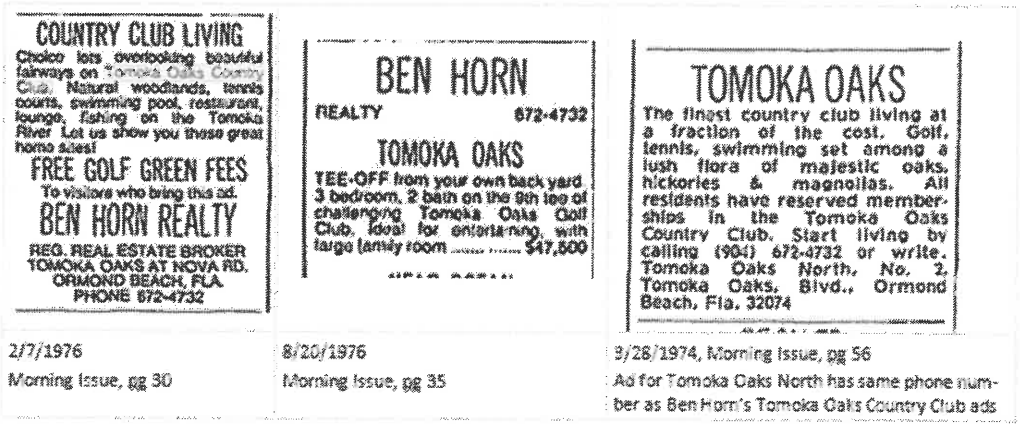
Milton W. Pepper's other cross-ownership Interests

1. Tomoka Oaks North Condominiums were owned and developed **by Tomoka Oakwood Development Corporation**[18] of which Milton W. Pepper was Secretary and Director, and J. Kermit Coble was a Director.[19] The property for the development was originally owned by Ormond Ocean Homes, which then sold the property to PLR Development, which then sold the property to Tomoka Oakwood Development Corporation.[20]

It is my opinion that Pepper intended to market the condos as coexisting with the Sam Snead Golf and Country Club and with Tomoka Oaks Country Club Estates. Tomoka Oakwood Development Corporation's marketing ads in October 1972 informed potential buyers that Tomoka Oaks North was located "adjacent to the fabulous Tomoka Oaks Country Club and Estates." It also informed readers that "**Your club membership is paid.**" [21] which establishes that the condos and the Sam Snead Golf Course and Country Club were developed and marketed to coexist.

During 1972 - 1974, multiple real estate ads published by the Tomoka Oaks North developer appeared in the *Dayton Beach News-Journal* with ad text promoting:

- Luxury Condominiums at Tomoka Oaks Country Club . . . All residents have reserved membership in Tomoka Oaks Country Club (Sunday, 1/21/1973, pg 18)
- The finest country club living at a fraction of the cost. All residents have reserved membership in the Tomoka Oaks Country Club. (Morning 2/27/1974, pg 24)
- Reserved membership in Tomoka Oaks Country Club is included for all residents. Play golf, tennis, swim ... (Morning 6/14/1974, pg 40)
- Amenities for buyers include a membership in Tomoka Oaks Country Club, swimming and wading pools and a recreation building. The developer is Tomoka Oakwood Development Co., Inc. in which Will Geiger, Orlando contractor, and Milton Pepper, shopping center owner and developer are principals. (Sunday, 4/14/1974, pg 59)



And realtor ads promoting Tomoka Oaks North contained marketing copy stating:

- Gracious Condominium Living . . . With the Advantage of Membership in Tomoka Oaks Country Club . . . Golf, Swimming, Companionship at Your Door (Sunday, 10/8/1972, pg 106)
- Luxury Condominiums at Tomoka Oaks Country Club. Country Club living at its very finest . . . Adjacent to the exclusive Tomoka Oaks Country Club and Estates. All residents of Tomoka Oaks North have reserved membership in the country club... (Sunday, 1/21/1973, pg 18)

2. **Ben J. Horn, Jr.**

It is my opinion that Ben J. Horn, Jr.'s personal connection to Milton W. Pepper presented a conflict of interest for PLR Development, LTD of which Pepper was the GM. Horn was:

- Milton Pepper's son-in law[22]
- Real estate agent who listed and marketed golf course lots in Tomoka Oaks Country Club Estates and Tomoka Oaks North.
- An officer of Tomoka Oakwood Development Corporation,[23] Inc., developer of Tomoka Oaks North Condominiums whose marketing ads promoted membership in Tomoka Oaks Golf and Country Club.[24]

Milton W. Pepper's Fiduciary Responsibility

On 2/14/1979, Milton W. Pepper sold the Sam Snead Golf and Country Club to RTH, Inc. as recorded in Book 2052 / Page 1019.

Pepper included a reverter clause as follows:
"During the term of the purchase money note and wrap around mortgage executed of even date herewith by grantee to grantor, or for a period of 18 years in the event the mortgage is prepaid in full, the above described property shall revert to the grantor upon the condition that any portion of said property is used for any purpose other than a golf course with club house and appurtenant amenities."

It is my opinion the intent of the Reverter in 2052/1019 was to continue to protect the original restrictive use. The reverter may have capped at 18 years upon payment of the note, but the **intent** was still **perpetual**. And I believe that on 2/14/1979 the golf course property was still subject to the reverter clause in Deed 585/157 related to Tomoka Oaks Country Club Estates homeowners reverter rights (table 19 "Protective Covenants and Restrictions).

I also believe Milton W. Pepper as sole owner of the golf course, and as stockholder in PLR Development, LTD. (owner of the estates), still had a fiduciary responsibility to lot owners and homeowners to protect their financial interests. Throughout its ownership, PLR marketed the estates as coexisting with the golf course. Golf course facing lots were more desirable and therefore priced 70% - 95% higher [25], [26] than non-golf course facing lots. (See Section "Master Planned Community" of this report for additional details and citations.) Due to this representation of coexistence, Pepper had a fiduciary responsibility to uphold in Deed 2052/1019 the referral rights and reverter rights intended in 585/157. But these homeowner rights were omitted.

Conflicts of Interest in Cross-Ownership: Summary and My Opinion

There are multiple instances of conflicts of interest in cross-ownership throughout the ownership of the Sam Snead Golf and Country Club and throughout the ownership of Tomoka Oaks Country Club Estates. I believe these conflicting interests resulted in unethical filings with Volusia County that released the originally intended protective covenants and restrictions in Deed 585/157 dated 12/12/1963, and which now have a direct, detrimental impact on the financial interests and enjoyment rights of present day homeowners. I believe I have demonstrated how those conflicts place into question the validity and ethical intention of those questionable recorded documents which released homeowner rights.

I also believe the restricted, encumbered use of the Sam Snead Golf and Country Club as defined in Deed 585/157 dated 12/12/1963 is still in effect today as it passed from deed to deed in the "Subject To" clause of each subsequent Warranty Deed: **Property shall be used perpetually for purposes of a golf and country club, golf course, and related uses**. I could not locate any official recordings that modified or removed the encumbrance. Therefore, it is my opinion the Reverter Clause in Deed 585/157 is still in effect, and the decision to release that clause is now vested exclusively in the Tomoka Oaks Homeowners Association.

Goal: Preservation
Of Green Space

Goal: Preservation of Green Space

As stated in my "Introduction," one of my goals with this report is to ensure the Sam Snead Golf and Country Club is never developed into a residential subdivision.

As also stated in my "Introduction," all opinions expressed in this report are solely my own. I have not collaborated with any other homeowner in Tomoka Oaks Country Club Estates or with the Tomoka Oaks Homeowner's Association.

It is my opinion that the Sam Snead Golf and Country club is currently encumbered by a restrictive covenant protecting its use: **Property shall be used perpetually for purposes of a golf and country club, golf course, and related uses**.[1] Should the current owners, Triumph Oaks of Ormond Beach, I, LLC, decide not to pursue development of the property and instead place the property up for sale, it is my opinion the property could be purchased by the City of Ormond Beach to fulfill some of the goals in the City's Parks and Recreations master plan currently being updated.[2]

On October 6, 2021, the City of Ormond held a second public meeting regarding the city's parks and recreation master plan update.[3] More nature trails, an indoor recreation center for the west side of Ormond, and new neighborhood parks were among the recommendations presented. The master plan update process conducted by Barth Associates had gathered information from over 1,100 participant surveys, public meetings, focus groups, as well as input gathered from the Leisure Services and Quality of Life advisory boards. Two primary needs were identified:

1. Provision of safe bicycle and pedestrian facilities in the city
2. Walking and hiking nature trails

Carlos Perez, parks planner with Perez Planning and Design, recommended the city build a west Ormond indoor recreation center. Perez also recommended the city explore the creation of new neighborhood parks.

And in a workshop held **March 22, 2022**, "a majority of Ormond Beach Commissions showed support for a bond issue to build a much-need community center for the city's west side."[4] (It should be noted the Sam Snead Golf and Country Club property is located in Ormond's Zone 3 which is located on the west side of Ormond Beach.)

Zone 3 Commissioner Susan Persis, said "she would back a bond issue for a community center in the west side zone she represents. She said the area is growing like crazy and something nice needs to be done out there."

Zone 4 Commissioner Rob Littleton agreed with Persis, saying, "I think the most pressing need is something on the west side of Ormond." And Zone 1 Commissioner Dwight Selby "listed a west side indoor-outdoor community recreation center as his top priority . . ."

The article went on to say the Commissioners talked about a west side recreation center six year ago, and feared they would still be talking in another six years if they didn't embrace funding options to get the ball rolling. Selby said he was totally in support for finding a dedicated funding source for Leisure Services, parks and recreation.

A sidebar located to the right of the above article in the *Ormond Beach Hometown News*, listed Ormond Beach Parks and Recreation Master Plan's top 10 list of priorities identified by residents:

1. Nature area and nature trails
2. Off-beach parking and new beach access
3. Pave multi-purpose trails
4. Indoor recreation centers
5. Improve existing Parks
6. New Parks
7. Sports facilities and programs
8. Aquatics and splash pads
9. Community events, summer concerts and programs
10. Golf

It is my opinion the Sam Snead Golf and Country Club could be a viable solution for fulfilling priorities 1, 3, 4, 6, 7, 8, 10 should the property become available for sale as I believe the current encumbrance on the golf course allows for recreational "use" of the property.

I also believe the Sam Snead Golf and Country Club property could potentially be a good fit for a west side recreation center and would merit consideration by the Commissioners if the property were to become available.

Tomoka Oaks Country Club Estates

Owners: Tomoka Oaks, Inc. 9/20/1960 - 3/5/1970

Prior to 1960, parcel 39-14-32 consisted of 572 undeveloped acres. It was part of the Thomas Fitch Grant tract of 4,500 acre . The 572 acres were north of Ormond Beach City limits. As detailed below, members of a private investment syndicate planned to finance a development called Tomoka Oaks Country Club: golf course and exclusive residential subdivision.

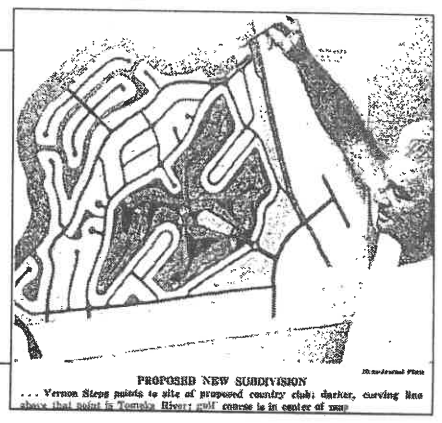
Volusia County Meeting Minutes: SEPT 15, 1960

Volusia County, FL, *Board of County Commissions* approves plat for 545 acre **Tomoka Oaks Country Club Estates** subject to the final approval of detailed streets and paving and drainage plans.



Plat consists of:

- 135 acre Golf Course
- 53 acres Commercial
- 357 acres Residential

9/16/1960

PLANS SUBDIVISION, GOLF COURSE - page 15

A new 545 acre subdivision northwest of Ormond Beach was approved tentatively yesterday by the County Commission, meeting at DeLand (subject to final approval of detailed streets, paving, drainage plans).
The subdivision, named Tomoka Oaks Country Club, will be built around an 18 hole golf course with 175 lots fronting the golf course. Local engineer Vernon Stepp, president of the development firm presented layout during meeting showing course surrounded by residential streets. (No ingress or egress)

TOMOKA OAKS SALE UNDER DISCUSSION - page 12

Brief summary

There was a closed Tomoka Oaks Club meeting to discuss future of Tomoka Oaks Golf and Country Club.

One of the attendees was Dick Shetler, former home owner and current stock holder who was one of the most active members of the Tomoka Oaks Club during his term as head of GE's operations in this area.

Another of the attendees mentioned was R. W. McFall, Western Union president, who recently purchased a home facing the course and who has stock in the club.

Ralph R. Frederick, general manager of Tomoka Oaks Golf Club and Country Club Estates has told friends he has received a "feeler" on the sale of the course from a group headed by two local amateur golfers. NEWS-JOURNAL

GOLFING by Brad Wilson - page

Bill McNall, Dave Campbell and Larry Hogan now own Tomoka Oaks CC (golf course) as of Nov 14, 1968.

The trio . . . took over management of the 130 acre Ormond Beach country club two weeks ago. Ralph Frederick was the majority stockholder of Tomoka Oaks CC.

NEWS-JOURNAL

NOTE: Per article dated 8/8/1969 - Frederick still has a substantial interest in Tomoka Oaks via mortgage and other payments in **Mortgage Deed dated 1/10/66; OFFC Records 774 Page 699—701**

1969

Resolution Recorded with Volusia County

Not until 10/19/1970, does Tomoka Oaks, Inc. officially record their **Resolution** from their Board of Directors Meeting held over 1.75 years earlier on 2/18/1969 in which:

Paraphrased

- It has been submitted to Tomoka Oaks, Inc. that TOCC, Inc. has contracted to sell the golf course property to Ormond Ocean Homes, Inc.
- Tomoka Oaks, Inc. rejects its right to exercise any option to purchase the property, and is in full accord with the sale which is hereby ratified and approved by its Board of Directors on 2/18/1969.
- Tomoka Oaks, Inc. intends to liquidate and dissolve and releases all rights reserved it in the deed of conveyance 585/157 filed 12/12/63.
- Release of Reverter to become effective 12/13/1973

Resolution signed by Donald W. Acer, Jr., Secretary, Tomoka Oaks Inc.

BOOK *1238* PAGE *248*

2/18/1969

Tomoka Oaks Inc (owner of Estates), **Board of Directors Meeting** 2/18/1969

According to: **Resolution 1238/248, filed 10/19/1970** and **Release 1307/89 filed 6/16/1971**

Tomoka Oaks, Inc. Board of Directors held a meeting on 2/18/1969 in which the board:

- Rejected its right to purchase the Sam Snead Golf and Country Club from TOCC, Inc.
- Released any and all rights reserved unto it in the deed of conveyance 585/157 filed 12/12/63.
- Release of Reverter to become effective 12/13/1973

Resolution signed by: Donald W. Acer, Jr., Secretary, Tomoka Oaks Inc.
Release signed by: R. W. Davis, President, Tomoka Oaks, Inc.

Release Recorded with Volusia County

Not until 6/16/1971 does Tomoka Oaks, Inc. officially record the **Release** voted on at their Board of Directors Meeting held over 2.5 years earlier on 2/18/1969 in which:

Paraphrased

Tomoka Oaks Inc, Board of Directors passed resolution on 2/18/1969 to:

- Releases any and all rights reserved unto it in Deed 585/157, particularly its right of first refusal set forth in said deed
- Releases the Reverter Clause contained in Deed 585/157
- The Release of the reverter clause to be effective 12/13/1973

Release signed by:
R. W. Davis, President, Tomoka Oaks, Inc.

Book 1307 Page 89

Ethical and Legal Issues with: **Resolution 1238/248, filed 10/19/1970** and **Release 1307/89 filed 6/16/1971**

See **Table 12** and **Table 15** in the section of the written narrative report titled "Protective Covenants and Restrictions" which details why, in my opinion, the Release and the related Resolution were unethical and possible illegal.

4/16/1969

OTHER COMMISSION BUSINESS - page 15

In a split vote, the Commission approved third phase of construction at Tomoka Oaks Country Club Estates.

NEWS-JOURNAL

8/14/1969

RESTRICTIONS - Unit 3

Tomoka Oaks Inc files restrictions on Unit 3 which omit that all lot owners are automatic members of Tomoka Oaks Homeowners Association as was recorded in Restrictions filed for Unit 1.
Restrictions signed by: R. W. Davis, Pres and Donald W Acer, Jr., Sec **Book 1121 Page 554**

It is my opinion that the intention of the Master Plan and the Unit 1 Restrictions were both designed to protect homeowner rights and investments. I believe Unit 3 Restrictions did not honor that intent.

See **Table 1, Table 9** and **Table 11** in the section of the written narrative report titled "Protective Covenants and Restrictions" which cite reasons for this opinion.

12/3/1969

IT SAYS HERE by Bernard Kahn - page 18

Ralph Frederick has taken back Tomoka Oaks Country Club and issued a report to members stating the decision not to foreclose on the previous owners (Bill McNall, Dave Campbell, Larry Hogan) was made in order to protect the TOCC creditors.

Seller: TOCC, INC

Signed by:

Ralph R. Frederick, President

SALE

BOOK 1188 PAGE 533

Issues with Warranty Deed

As noted in the TOCC, Inc. timeline, at the time of this Warranty Deed, Ralph R. Frederick was:

- A stockholder and president in Ormond Ocean Homes, Inc.
- President and primary stockholder of TOCC, Inc. which owned the Sam Snead Golf and Country Club.
- President and stock holder in Tomoka Oaks, Inc. which owned the Tomoka Oaks Country Club Estates surrounding the golf course.

It is my opinion this dual ownership ultimately resulted in the loss of homeowner Referral and Reverter rights as detailed in the section of the written narrative, "Conflicts of Interest in Cross-Ownership" page 4.

STOCK TRANSFER 3/28/1970

Sovereign Industries, Inc. acquires all stock of Ormond Ocean Homes, Inc. and all assets of Tomoka Oaks, Inc. and Tomoka Oaks Country Club estates

7/6/1970

CONVEYANCE Filed 7/6/1970

Tomoka Oaks, Inc. conveys all holdings in Tomoka Oaks Country club Estates to Ormond Ocean Homes, Inc.

Paraphrase

Tomoka Oaks Homeowners Association has never had any being as a corporation or association.

Tomoka Oaks, Inc. is conveying to Ormond Ocean Homes, Inc. all of its remaining holdings in Tomoka Oaks Country Club Estates.

Tomoka Oaks, Inc. sets over, transfers, and assigns to Ormond Ocean Homes Inc. any right, title or interest in the restrictions and the right to enforce, alter, change Restrictive Covenants dated Jan 31, 1962.

Signed 3/5/1970 by: R. W. Davis, President, Tomoka Oaks, Inc.

BOOK 1212 PAGE 70

Issues with Conveyance

It is my opinion this Conveyance was not truthful. The timing is questionable and the intent is unethical and possibly illegal. See **Table 11 and 11 A** in the section of the written narrative report titled "Protective Covenants and Restrictions" which cite reasons for this opinion.

3/29/1970

TOMOKA OAKS PROPERTY, FIRM SOLD

Highlights:

Arizona based Sovereign Industries, Inc. acquired:

- all of the stock of Ormond Ocean Home Inc.
- all of the assets of Tomoka Oaks, Inc. and the Tomoka Oaks County Club in an agreement finalized March 28, 1970.

Sovereign assumed control of:

- 130 acre Tomoka Country Club golf course and club
- 415 acres of the plush Tomoka Oaks real estate development

Tomoka Oaks golf course was built in 1961. The Tomoka Oaks estates began soon thereafter and number many of the most expensive homes in the area.

Sovereign will do everything possible to improve the home owner's investments and to make the golf club outstanding.

Frederick's called the Sovereign purchase "satisfying and an assurance that the high type program I started will be continued and improved." NEWS-JOURNAL

7/31/1970

NEW **LOOK UNVEILED FOR TOMOKA OAKS**

Sovereign Industries Inc., presented plans for golf course and estates improvements to the present homeowners on Thursday night. . . . Presently there are about 160 landowners in Tomoka Oaks. NEWS-JOURNAL

10/19/1970

Resolution Recorded with Volusia County

Not until 10/19/1970, does Tomoka Oaks, Inc. officially record their **Resolution** from their Board of Directors Meeting held over 1.5 years earlier on 2/18/1969 in which:

Paraphrased

- It has been submitted to Tomoka Oaks, Inc. that TOCC, Inc. has contracted to sell the golf course property to Ormond Ocean Homes, Inc.
- Tomoka Oaks, Inc. rejects its right to exercise any option to purchase the property, and is in full accord with the sale which is hereby ratified and approved by its Board of Directors on 2/18/1969.
- Tomoka Oaks, Inc. intends to liquidate and dissolve and releases all rights reserved it in the deed of conveyance 585/157 filed 12/12/63.
- Release of Reverter to become effective 12/13/1973

Resolution signed by Donald W. Acer, Jr., Secretary, Tomoka Oaks Inc.

Ormond Beach City Commission Meeting

As requested by the City Commission, the Planning Board, at its regular meeting on March 2, 1972, reviewed the Tomoka Oaks Master Plan with Mr. Kermit Coble, attorney for the developers. Mr Coble stated by letter (see below) that the present owners of the subdivision intend to develop according to the original master plan approved by the Commission in 1961, with any changes being in the form of minor adjustments as they may be needed from time to time. He stated orally that the developers have no intention of creating another golf course.

Commission Schaeffer moved, seconded by Commissioner McNary, to accept the March 2 letter from Kermit Coble, Attorney for P.L.R. which indicated the developers are reverting back to the original Master Plan, together with the accompanying report from the Planning Board and Mr Parks. Motioned carried.

March 7, 1972 Meeting Minutes Page 8078 Item #7

Letter submitted by J. Kermit Coble

March 2nd, 1972
City of Ormond Beach
Ormond Beach Florida
RE: Tomoka Oaks Master Plans

Gentlemen:

This is to notify you that P. L. R. DEVELOPMENT (Ltd.), successors of Ormond Ocean Homes and Sovereign Industries, wish to withdraw the proposed Master Plan submitted to you and revert back to the original master plan on file with your office.

I would like to state that P.L.R. had no knowledge of the proposed revised master plan or the same would have been withdrawn earlier.

Very truly yours,
J. Kermit Coble,
Attorney for P.L.R.

Lifetime Membership Agreement

Paraphrase

TOMOKA OAKS GOLF COURSE TO BE SOLD?

Arnold Mims, Tomoka Oaks member, and president of Tomoka Oaks Country Club, Inc., and owner of home adjoining the 6th fairway, wants to purchase golf course owned by Milton Pepper Associates- PRL Development Company.

Tomoka Oaks Country Club members, 90 strong, met in the clubhouse. Committee:

Temporary Chairman George Borsari (36 N St Andrew), Rocky Collins 28 St. Andrews Drive, Jack Erick, Vinal Cox, Fred Jaeger, Dr. H C Ledbetter, Ed Maybeck, John Nuckolls.

4/16/1974

TOMOKA OAKS NEARER TO BEING PRIVATE CLUB
by Brad Wilson

Rated as one of the finest golf courses in Central Florida.

The original committee of 8 was expanded to 14 following meetings of the **Tomoka Oaks Home Owners Assn**.

Tomoka Oaks Country Club Acquisition Committee:

- Arnold Mims, general chairman (34 Pine Valley Circle)
- Ed Maybeck, secretary
- George Borsari, treasurer (36 N St Andrew)

4/26/1974

BID TO BUY TOMOKA OAKS HAS FAILED

The attempt by members to raise money and purchase Tomoka Oaks Country Club has failed.

Arnold Mims, president of Tomoka Oaks Country Club, Inc., said the group which had hoped to buy the 6,900 yard part 72 championship course off Nova Road in Ormond Beach voted at a meeting Monday night to table the project indefinitely.

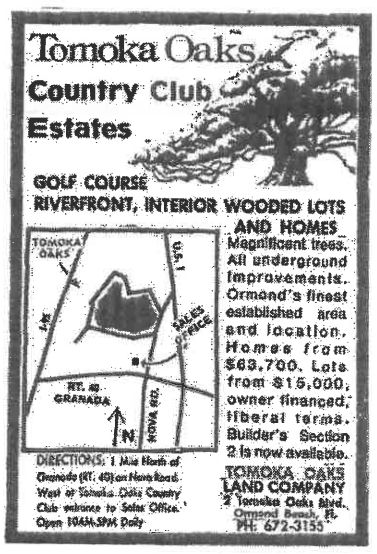
TOMOKA OAKS COUNTRY CLUB SOLD



Tomoka Oaks Country Club was sold last week to three local couples for $1,375,000.

Buyers:

- Dr. and Mrs. James F. Townsend
- Dr. and Mrs. J. Richard Ryals
- Mr and Mrs. Francis A. Hidlago

The club was the last of Pepper's holdings at Tomoka Oaks, Hidalgo observed. A partnership under Pepper's control acquired the club, along with Tomoka Oaks Estates in 1971. The estate properties have been sold in recent years.

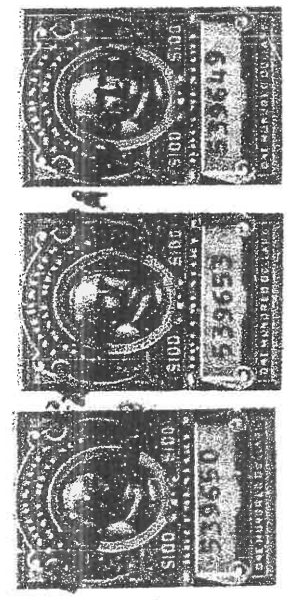
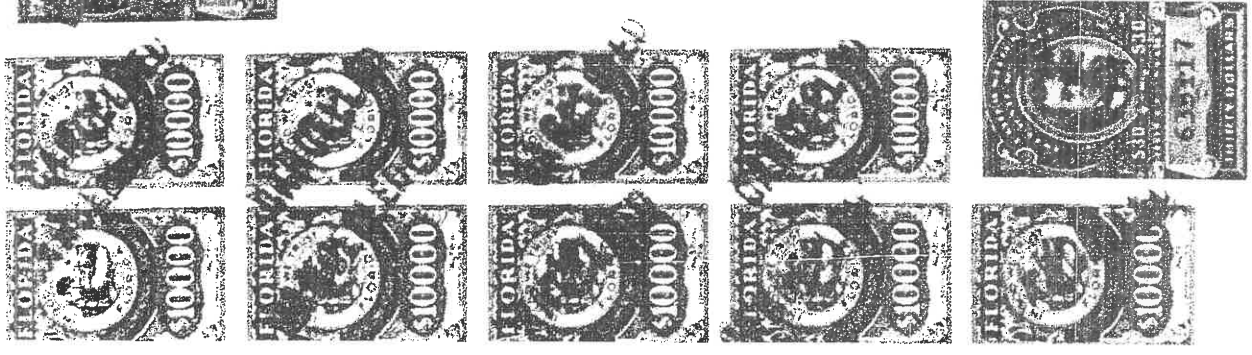
WARRANTY DEED



THIS INDENTURE made this 12th day of December, A. D., 1963, between TOMOKA OAKS, INC., a corporation existing under the laws of the State of Florida, having its principal place of business in the County of Volusia and State of Florida, party of the first part, and RALPH R. FREDERICK, TRUSTEE, of 945 John Anderson Drive, Ormond Beach, County of Volusia and State of Florida, party of the second part,



WITNESSETH; That the said party of the first part, for and in consideration of the sum of Ten Dollars ($10.00) to it in hand paid by the said party of the second part, the receipt whereof is hereby acknowledged, has granted, bargained and sold to the said party of the second part, his heirs and assigns forever, the following described land situate, lying and being in the County of Volusia and State of Florida, to-wit:

All of Sam Snead Golf and Country Club, a subdivision of part of Thomas Fitch Grant lying westerly of the Florida East Coast Railway, Section 39, Township 14 South, Range 32 East, Volusia County, Florida, as per map thereof in Map Book 25, page 61 of the Public Records of Volusia County, Florida, together with all installations, equipment, machinery and personal property located upon said property.

Subject to taxes for 1963 and subsequent years.

This conveyance is subject to the express condition that should party of the second part, or his successors in interest, desire to sell or convey the above described

property to any person, firm or corporation other than a subsidiary of party of the second part, any good faith offer acceptable to such owner must be referred to party of the first part for its acceptance or rejection for a period of thirty days, and in the event of its rejection or failure to accept such offer, said offer shall then be presented to Tomoka Oaks Golf and Country Club, Inc., a Florida non-profit corporation, for its acceptance or rejection for a period of thirty days, such acceptance or rejection to be subject to the approval of party of the first part. Such right to accept or reject said offer is transferable and may be transferred by either party of the first part or Tomoka Oaks Golf and Country Club, Inc. to the Tomoka Oaks Homeowners Association within said thirty day period and must be acted upon within said period.

The above described property shall be used perpetually for purposes of a golf and country club, golf course, and related uses, and in the event that party of the second part, or its successors in interest, fail to utilize said property exclusively as a golf and country club, golf course, and related uses, and the property not be sold to Tomoka Oaks, Inc., Tomoka Oaks Golf and Country Club, Inc. or Tomoka Oaks Homeowners Association as specified in the preceding paragraph, then the above described property shall automatically revert to and become the property of party of the first part, and all rights therein of party of the second part, or its successors in interest, shall immediately terminate unless party of the second part, or its successors in interest, shall within ninety days after the day of mailing to said party of the second part, or its successors in interest, at its last known address by certified mail, by Tomoka Oaks, Inc., Tomoka Oaks Golf and Country Club, Inc., or Tomoka Oaks Homeowners Association, a written notice to utilize said property as a golf and country club, golf course, and related uses, complies with said reverter clause and continues to use said property as a golf and country club, golf course, and related uses.

The aforesaid reverter clause specified in the last preceding paragraph may be released or modified by resolution concurred in by two-thirds of the entire board

of directors of Tomoka Oaks, Inc. at any time after ten years after the date of recording of this Deed; provided that if Tomoka Oaks, Inc. shall have disposed of four-fifths (4/5) of the lots in Tomoka Oaks Country Club Estates, then the foregoing right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks Homeowners Association, Inc., to be exercised by resolution of two-thirds (2/3) of the Board of Directors of the Tomoka Oaks Homeowners Association, Inc.

And the said party of the first part does hereby fully warrant the title to said land, and will defend the same against the lawful claims of all persons whomsoever.

IN WITNESS WHEREOF, the said party of the first part has caused these presents to be signed in its name by its proper officers, and its corporate seal to be affixed, attested by its Secretary, the day and year above written.

Signed, Sealed and Delivered in the presence of:

Steven – for the reasons described below, there is no covenant requiring the golf course to be used in perpetuity.

From: McKee, Scott <Scott.McKee@ormondbeach.org>
Sent: Thursday, June 30, 2022 11:27 AM
To: Hayes, Randy <Randy.Hayes@ormondbeach.org>
Subject: Tomoka Oaks- Historical Recorded Documents

Randy,

As I mentioned earlier, I reviewed the public record archives pertaining to the Tomoka Oaks golf course, specifically as to the issue whether there were any recorded documents containing language that the property was "to be used as a golf course in perpetuity". I searched for any covenants/restrictions that would include such language. There was a document recorded at Book 431, beginning at page 32, titled "Restrictions", which was applicable to Tomoka Oaks Country Club Estates, Unit #1, and provided restrictions regarding the use of the residential properties by the individual homeowners,(i.e., such as only using the property for residential use, only buildings for private dwellings, no animals except for domestic animals, etc.) but the restrictions contained no such language pertaining to the use of the golf course property in perpetuity.

I was able however, to locate a document containing the language restricting the use in perpetuity as a golf club, as referenced in the detailed packet of materials containing the history of the development provided to planning staff by Carolyn Davis. The referenced clause is in a warranty deed executed in December of 1963, which conveyed the property from Tomoka Oaks, Inc., to an individual, Ralph Frederick, trustee. This 1963 warranty deed contained three paragraphs of notable interest. The first paragraph contained a right of refusal for Tomoka Oaks, Inc. to re-purchase the property in the event Mr. Frederick decided to sell the golf course. The second paragraph contained the referenced language that the property shall be used as a golf and country club, golf course, or related use, in perpetuity, or revert back to the seller. The third paragraph contained express conditions and provided a mechanism to release or modify the express conditions. Subsequent recorded documents including a corporate resolution adopted by the Tomoka Oaks, Inc. board of directors in 1969, and a release, recorded in 1971, were located that indicate the parties were released from the conditions of the 1963 warranty deed, which shall be discussed in detail below.

As a brief history, during the early development of the Tomoka Oaks subdivision, the golf course property was owned by Tomoka Oaks, Inc., a Florida corporation, and was initially leased in January of 1963 to Tomoka Oaks Golf and Country Club Inc., a non-profit, for a term of 99 years. For whatever reason, the lease was surrendered in October of the same year, and the golf course property was sold in December by Tomoka Oaks, Inc., to Ralph Frederick, Trustee. The golf course property was conveyed by warranty deed for consideration, executed on December 12, 1963, and recorded in the public records of Volusia County on December 13, 1963, at Book 585 beginning on page 157. As previously mentioned the warranty deed contained; 1) a right of first refusal in the event Mr. Frederick decided to sell the golf course property and received a good faith offer; 2) a reverter clause that the property would be used as a golf and country club, golf course, and related

use in perpetuity; and 3) a paragraph expressing conditions of the right of first refusal and providing a provision to allow the parties a release of the reverter clause if express conditions were met.

1963 Warranty Deed Conditions

Language of Right of First Refusal

The warranty deed executed on December 12, 1963 contained the following language, giving Tomoka Oaks, Inc., the right of first refusal to re-purchase the property should the grantee (party of second part) ever decide to sell the property and get a good faith offer.

> "*This conveyance is subject to the express conditions that should party of the second part (grantee), or his successors in interest, desire to sell or convey the above described property to any person, firm or corporation other that a subsidiary of party of the second part, any good faith offer acceptable to such owner must be referred to party of the first part (grantor) for its acceptance or rejection for a period of thirty days, and in the event of its rejection or failure to accept such offer, said offer shall then be presented to Tomoka Oaks Golf and Country Club, Inc., a Florida non-profit corporation, for its acceptance or rejection for a period of thirty days, such acceptance or rejection to be subject to the approval of party of first part (grantor). Such right to accept or reject said offer is transferable and may be transferred by either party of the first part or Tomoka Golf and Country Club, Inc. to the Tomoka Oaks Homeowners Association within said thirty day period and must be acted upon within said period*."

Language of Reverter Clause

The second condition in the 1963 warranty deed contained a condition that the property shall be used as a golf and country club, golf course and related uses by the grantee or its successors in interest or revert back to the seller. The language of the reverter clause is as follows:

> "*The above described property shall be used perpetually for purposes of a golf and country club, golf course, and related uses, and in the event that party of second part, or its successors in interest, fail to utilize said property exclusively as a golf and country club, golf course, and related uses, and the property not be sold to Tomoka Oaks Homeowners Association as specified in the preceding paragraph, then the above described property shall automatically revert to and become the property of the first part, and all rights therein of party of the second part, or its successors in interest, shall immediately terminate unless party of the second part, or its successors in interest, shall within ninety days after the day of mailing to said party of the second part, or its successors in interest, at is last known address by certified mail, by Tomoka Oaks Inc., or Tomok Oaks Homeowners Association, a written notice to utilize said property as a gold and country club, golf course, and related uses, complies with said reverter clause and continues to use said property as a golf and country club, golf course, and related uses.*"

Release of Modification of the Reverter Clause

The paragraph immediately following the reverter clause in the warranty deed allows the parties to be released from the reverter clause provided express conditions are met. The language is as follows:

> "The aforementioned reverter clause specified in the last preceding paragraph may be released or modified b resolution concurred in by two-thirds of the entire board of directors of Tomoka Oaks, Inc. at any time after ten years after the date of recording of this Deed;

provided that if Tomok Oaks, Inc. shall have disposed of four-fifths (4/5) of the lots in Tomoka Oaks Country Club Estates, then the foregoing right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks Homeowners Association, Inc., to be exercised by resolution of two-thirds (2/3) of the Board of Directors of the Tomoka Oaks Homeowners Association, Inc."

1969 Corporate Resolution and 1971 Release

A few years after the golf course property was conveyed from Tomoka Oaks, Inc. to Ralph Frederick, a sale of the golf course was pending to the entity, Ormond Ocean Homes, Inc. On February 18, 1969, the board of directors for Tomoka Oaks, Inc., held a special meeting and adopted a corporate resolution, by unanimous vote, which recited the reservations and restrictions contained in the December 1963 warranty deed, specifically the right of first refusal and the reverter clause. The resolution stated, "*it is within knowledge of Tomoka Oaks, Inc. at this time that the above described golf course property is under contract for sale to Ormond Ocean Homes, Inc., and Tomoka Oaks, Inc. has rejected its right to purchase said property and is agreeable to the said sale to Ormond Ocean Homes, Inc., and Tomoka Oaks, Inc. has not transferred the right to accept or reject said offer, and whereas, Tocc, Inc., the present owner of the aforesaid property, had requested Tomoka Oaks, Inc. to formalize its consent to the sale of the above described property to Ormond Ocean Homes, Inc., and Tocc, Inc., with the understanding that Tomoka Oaks, Inc. intends to liquidate and dissolve, has also requested Tomoka Oaks, Inc. to release forever its right of first refusal set forth in the aforesaid deed of conveyance and to also release the reverter clause contained in said deed, the release of the reverter clause to become effective December 13, 1973, the release specified in such reverter clause*." The corporate resolution adopted by the board of directors for Tomoka Oaks, Inc., was recorded in the public records of Volusia County October 22, 1970, at Book 1238, page 246. It is important to note that this resolution was adopted by the board of directors unanimously, and the date the release of the reverter clause was to become effective, December 13, 1973. As the warranty deed provided the reverter clause could be modified or released by a two-thirds vote by the board of directors *at any time after 10 years of the date of recording of the deed* (which was December 13, 1963). It appears the conditions were met. On June 16, 1971, a Release was filed in the public records of Volusia County at Book 1307, page 89, which acknowledged the corporate resolution adopted by the board of directors and recorded in the public records, further releasing the reverter clause contained in the 1963 deed, becoming effective December 13, 1973, the release date specified in the reverter clause, and stating the release is given for good and valuable consideration. In summary, the records confirm the existence of a document recorded in the public records that provided the property be used for purposes of a golf course in perpetuity. In this case, the document was not contained covenants and restrictions provided by a homeowners' association, but rather in a warranty deed, and as stated previously, subsequent records confirm the reverter clause containing the language was properly released by a recorded corporate resolution and release, and therefore no longer valid. I have attached and combined the three referenced documents as a scanned PDF, and highlighted key provisions for your review.

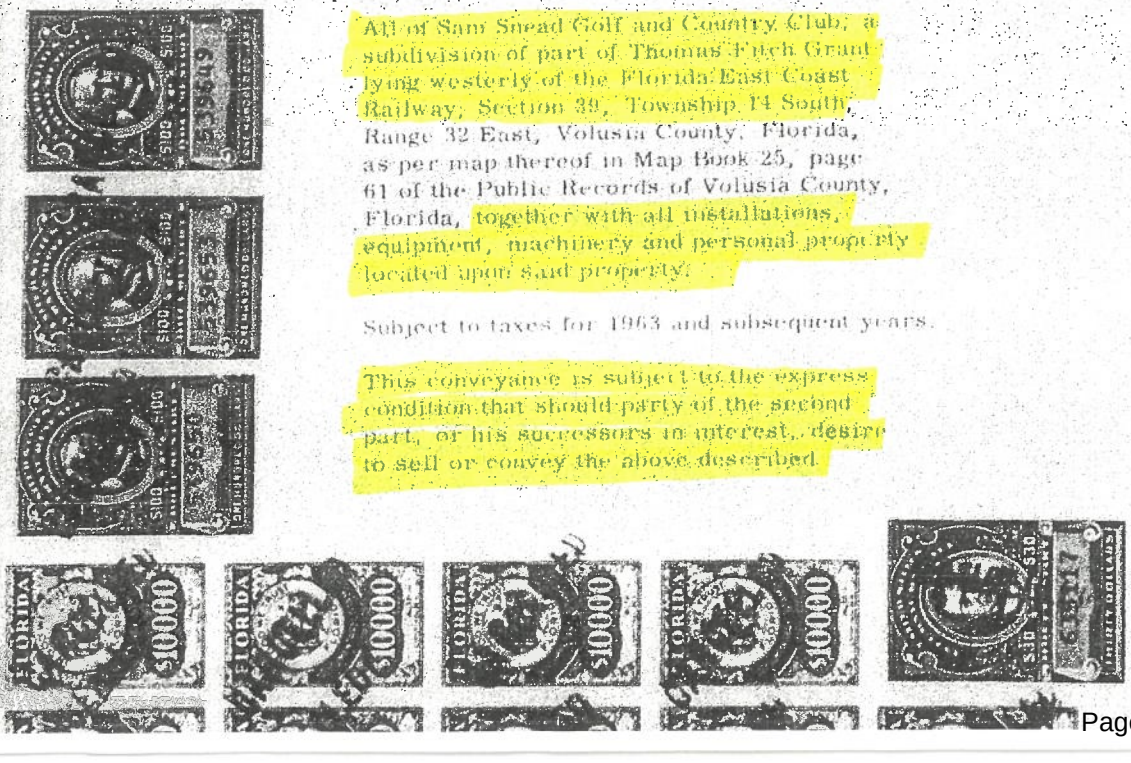
OFF'L RECS 585 PAGE 157

WARRANTY DEED



THIS INDENTURE made this 12th day of December, A. D., 1963, between TOMOKA OAKS, INC., a corporation existing under the laws of the State of Florida, having its principal place of business in the County of Volusia and State of Florida, party of the first part, and RALPH R. FREDERICK, TRUSTEE, of 945 John Anderson Drive, Ormond Beach, County of Volusia and State of Florida, party of the second part.

WITNESSETH: That the said party of the first part, for and in consideration of the sum of Ten Dollars ($10.00) to it in hand paid by the said party of the second part, the receipt whereof is hereby acknowledged, has granted, bargained and sold to the said party of the second part, his heirs and assigns forever, the following described land situate, lying and being in the County of Volusia and State of Florida, to-wit:

All of Sam Snead Golf and Country Club, a subdivision of part of Thomas Fitch Grant lying westerly of the Florida East Coast Railway, Section 39, Township 14 South, Range 32 East, Volusia County, Florida, as per map thereof in Map Book 25, page 61 of the Public Records of Volusia County, Florida, together with all installations, equipment, machinery and personal property located upon said property.

Subject to taxes for 1963 and subsequent years.

This conveyance is subject to the express condition that should party of the second part, or his successors in interest, desire to sell or convey the above described

property to any person, firm or corporation other than a subsidiary of party of the second part, any good faith offer acceptable to such owner must be referred to party of the first part for its acceptance or rejection for a period of thirty days, and in the event of its rejection or failure to accept such offer, said offer shall then be presented to Tomoka Oaks Golf and Country Club, Inc., a Florida non-profit corporation, for its acceptance or rejection for a period of thirty days, such acceptance or rejection to be subject to the approval of party of the first part. Such right to accept or reject said offer is transferable and may be transferred by either party of the first part or Tomoka Oaks Golf and Country Club, Inc. to the Tomoka Oaks Homeowners Association within said thirty day period and must be acted upon within said period.

The above described property shall be used perpetually for purposes of a golf and country club, golf course, and related uses, and in the event that party of the second part, or its successors in interest, fail to utilize said property exclusively as a golf and country club, golf course, and related uses, and the property not be sold to Tomoka Oaks, Inc., Tomoka Oaks Golf and Country Club, Inc. or Tomoka Oaks Homeowners Association as specified in the preceding paragraph, then the above described property shall automatically revert to and become the property of party of the first part, and all rights therein of party of the second part, or its successors in interest, shall immediately terminate unless party of the second part, or its successors in interest, shall within ninety days after the day of mailing to said party of the second part, or its successors in interest, at its last known address by certified mail, by Tomoka Oaks, Inc., Tomoka Oaks Golf and Country Club, Inc., or Tomoka Oaks Homeowners Association, a written notice to utilize said property as a golf and country club, golf course, and related uses, complies with said reverter clause and continues to use said property as a golf and country club, golf course, and related uses.

The aforesaid reverter clause specified in the last preceding paragraph may be released or modified by resolution concurred in by two-thirds of the entire board

of directors of Tomoka Oaks, Inc, at any time after ten years after the date of recording of this Deed; provided that if Tomoka Oaks, Inc. shall have disposed of four-fifths (4/5) of the lots in Tomoka Oaks Country Club Estates, then the foregoing right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks Homeowners Association, Inc., to be exercised by resolution of two-thirds (2/3) of the Board of Directors of the Tomoka Oaks Homeowners Association, Inc.

And the said party of the first part does hereby fully warrant the title to said land, and will defend the same against the lawful claims of all persons whomsoever.

IN WITNESS WHEREOF, the said party of the first part has caused these presents to be signed in its name by its proper officers, and its corporate seal to be affixed, attested by its Secretary, the day and year above written.

Signed, Sealed and Delivered
in the presence of:

TOMOKA OAKS, INC.

By Ralph R Frederick

RESOLUTION

WHEREAS, TOMOKA OAKS, INC., a Florida corporation, made, executed, and delivered to Ralph R. Frederick, Trustee, a deed to certain property described as follows:

> All of Sec Sneed Golf and Country Club, a subdivision of part of Thomas Fitch Grant lying westerly of the Florida East Coast Railway, Section 39, Township 14 South, Range 32 East, Volusia County, Florida, as per map thereof in Map Book 25, page 61, of the Public Records of Volusia County, Florida, together with installations, equipment, machinery and personal property located upon said property.

which deed was duly recorded on December 13, 1963 in Official Records Book 585, page 157, Public Records of Volusia County, Florida, and

WHEREAS, such deed of conveyance contained the following reservations and restrictions:

> "This conveyance is subject to the express condition that should the party of the second part (Ralph R. Frederick, trustee), or his successors in interest, desire to sell or convey the above-described property to any person, firm, or corporation other than a subsidiary of party of the second part, any good faith offer acceptable to such owner must be referred to party of the first part for its acceptance or rejection for a period of thirty days, and in the event of its rejection or failure to accept such offer, said offer shall then be presented to Tomoka Oaks Golf and Country Club, Inc., a Florida non-profit corporation, for its acceptance or rejection for a period of thirty days, such acceptance or rejection to be subject to the approval of the party of the first part (Tomoka Oaks, Inc.) Such right to accept or reject said offer is transferable and may be transferred by either party of the first part or Tomoka Oaks Golf and Country Club, Inc. to the Tomoka Oaks Homeowners Association within said thirty day period and must be acted upon within said period.
>
> The above described property shall be used perpetually for purposes of a golf and country club, golf course, and related uses, and in the event that party of the second part, or its successors in interest, fail to utilize said property exclusively as a golf and country club, golf course, and related uses, and the property not be sold to Tomoka Oaks, Inc., Tomoka Oaks Golf and Country Club, Inc. or Tomoka Oaks Homeowners Association as specified in the preceding paragraph, then the above described property shall automatically revert to and become the property of the party of the first part, and all rights therein

of party of the second part, or its successors in interest, shall immediately terminate unless the party of the second part, or its successors in interest, shall within ninety days after the date of mailing to said party of the second part, or its successors in interest, at its last known address by certified mail, by Tomoka Oaks, Inc., Tomoka Oks Golf and Country Club, Inc., or Tomoka Oaks Homeowners Association, a written notice to utilize said property as a golf and country club, golf course, and related uses, complies with said reverter clause and continues to use said property as a golf and country club, golf course, and related uses.

The aforesaid reverter clause specified in the last preceding paragraph may be released or modified by resolution concurred in by two-thirds of the entire board of directors of Tomoka Oaks, Inc. at any time after ten years after the date of recording of this Deed; provided that if Tomoka Oaks, Inc. shall have disposed of four-fifths of the lots in Tomoka Oaks Country Club Estates; then the foregoing right to release or modify the reverter shall be vested automatically and exclusively in the Tomoka Oaks Homeowners Association, Inc., to be exercised by resolution of two-thirds of the Board of Directors, of the Tomoka Oaks Homeowners Association, Inc."

and

WHEREAS, it is within the knowledge of Tomoka Oaks, Inc. at this time that the above-described Golf Course property is under contract for sale to Ormond Ocean Homes, Inc., and Tomoka Oaks, Inc. has rejected its right to purchase the said property and is agreeable to the said sale to Ormond Ocean Homes, Inc., and Tomoka Oaks, Inc. has not transferred the right to accept or reject said offer, and

WHEREAS, Tocc, Inc., the present owner of the aforesaid property, has requested Tomoka Oaks, Inc. to formalize its consent to the sale of the above-described property to Ormond Ocean Homes, Inc., and

WHEREAS, Tocc, Inc., with the understanding that Tomoka Oaks, Inc. intends to liquidate and dissolve, has also requested Tomoka Oaks, Inc. to release forever its right of first refusal set forth in the aforesaid deed of conveyance and to also release the reverter clause contained in said deed, the release of reverter to become effective December 13, 1973, the release date specified in such reverter clause,

RECORDED AND RECORD VERIFIED
OCT 22 PM 1 20

NOW, THEREFORE, the following resolutions are hereby adopted:

"BE IT RESOLVED: That inasmuch as it has been submitted to Tomoka Oaks, Inc. that Tocc, Inc. has contracted to sell the following described property to Ormond Ocean Homes, Inc.:

All of Sam Snead Golf and Country Club, a subdivision of part of Thomas Fitch Grant lying westerly of the Florida East Coast Railway, Section 39, Township 14 South, Range 32 East, Volusia County, Florida, as per map thereof in Map Book 25, page 61, of the Public Records of Volusia County, Florida, together with installations, equipment, machinery, and personal property located upon said property,

Tomoka Oaks, Inc. does hereby reject its right to exercise any option to purchase the aforesaid property and is in full accord with the sale of the aforesaid property to Ormond Ocean Homes, Inc. and that the said sale is hereby ratified and approved and that Tomoka Oaks, Inc. evidences its consent to the said sale by the action of its board of directors taken at this duly convened, authorized meeting of the board of directors of said corporation.

BE IT FURTHER RESOLVED: That since Tomoka Oaks, Inc. intends to liquidate and dissolve, Tomoka Oaks, Inc. does hereby release any and all rights reserved unto it in that certain deed of conveyance recorded in Official Records Book 585, page 157, Public Records of Volusia County, Florida, particularly its right of first refusal set forth in said deed, and Tomoka Oaks, Inc. further releases the reverter clause contained in the aforesaid deed, such release of reverter to become effective December 13, 1973, the release date specified in such reverter clause, and the president and/or secretary of this corporation are hereby authorized and empowered to execute any and all further instruments which may be required in order to effect the releases herein referred to."

I HEREBY CERTIFY that the above and foregoing is a true and correct copy of a resolution passed by a unanimous vote of the board of directors of Tomoka Oaks, Inc. at a special meeting of the board of directors held on the 18th day of February, A. D. 1969, the said meeting having been duly convened and a quorum being present.

DATED: This 19th day of October, 1970.

Donald W. Acer, Jr. - Secretary of Tomoka Oaks, Inc.

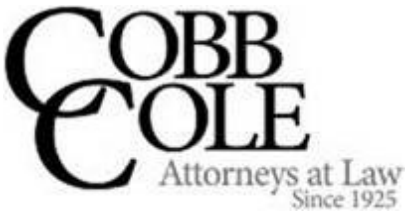
Randy:



I am a real estate and title attorney at Cobb Cole. Last year, I was asked to give an opinion on the purported issues related to the development of the old golf course property (covenants, reverter, etc.). This email shall serve to provide you with the same information I provided our client. Attached is the title insurance policy given to Triumph Oaks pursuant to the 2021 acquisition of the land. To keep things clear and focused, you may skip through pages 1 – 5, page 6 provides ownership and coverage information, page 7 is the legal description, pages 8 and 9 are the exceptions from coverage. So, if it is listed on pages 8 or 9, title insurance coverage does not exist and, based on what Steve Spraker told Sheldon Rubin, it would give the city a reason to deny the application. For now, you can disregard items 1 – 7, item 8 is the plat which does not reference any type of reverter or restriction, disregard 9 and 10, 12 and 13, and 14 and 15. That leaves us with

item 11, which is a deed that reserves unto several people and their spouses, lifetime memberships in the country club. Being a 1979 deed, I have made the assumption that they are all deceased. In any event, it goes on to say that during the term of the wrap around mortgage, or for up to 18 years if mortgage has been paid in full, the property will revert to grantor if not used as a golf course. That time period has expired. It is my opinion that the golf course requirement has terminated and there remains no reverter clause or existing lifetime memberships. I hope this helps with your analysis and approval. Best regards.

-Matt

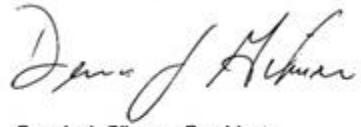
First American	Owner's Policy of Title Insurance (with Florida modifications) ISSUED BY **First American Title Insurance Company** POLICY NUMBER **5011412- 2664415**
Owner's Policy	

Any notice of claim and any other notice or statement in writing required to be given to the Company under this policy must be given to the Company at the address shown in Section 18 of the Conditions.

COVERED RISKS



SUBJECT TO THE EXCLUSIONS FROM COVERAGE, THE EXCEPTIONS FROM COVERAGE CONTAINED IN SCHEDULE B, AND THE CONDITIONS, **FIRST AMERICAN TITLE INSURANCE COMPANY**, a Nebraska corporation (the "Company") insures, as of Date of Policy against loss or damage, not exceeding the Amount of Insurance, sustained or incurred by the Insured by reason of:

1. Title being vested other than as stated in Schedule A.
2. Any defect in or lien or encumbrance on the Title. This Covered Risk includes but is not limited to insurance against loss from
   (a) A defect in the Title caused by
      (i) forgery, fraud, undue influence, duress, incompetency, incapacity, or impersonation;
      (ii) failure of any person or Entity to have authorized a transfer or conveyance;
      (iii) a document affecting Title not properly created, executed, witnessed, sealed, acknowledged, notarized, or delivered;
      (iv) failure to perform those acts necessary to create a document by electronic means authorized by law;
      (v) a document executed under a falsified, expired, or otherwise invalid power of attorney;
      (vi) a document not properly filed, recorded, or indexed in the Public Records including failure to perform those acts by electronic means authorized by law; or
      (vii) a defective judicial or administrative proceeding.
   (b) The lien of real estate taxes or assessments imposed on the Title by a governmental authority due or payable, but unpaid.
   (c) Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land. The term "encroachment" includes encroachments of existing improvements located on the Land onto adjoining land, and encroachments onto the Land of existing improvements located on adjoining land.
3. Unmarketable Title.
4. No right of access to and from the Land.

(Covered Risks Continued on Page 2)

In Witness Whereof, First American Title Insurance Company has caused its corporate name to be hereunto affixed by its authorized officers as of Date of Policy shown in Schedule A.

First American Title Insurance Company

Dennis J. Gilmore, President

Greg L. Smith, Secretary

(This Policy is valid only when Schedules A and B are attached)

Copyright 2006-2009 American Land Title Association. All rights reserved. The use of this form is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

COVERED RISKS (Continued)

5. The violation or enforcement of any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (a) the occupancy, use, or enjoyment of the Land;
   (b) the character, dimensions, or location of any improvement erected on the Land;
   (c) the subdivision of land; or
   (d) environmental protection
   if a notice, describing any part of the Land, is recorded in the Public Records setting forth the violation or intention to enforce, but only to the extent of the violation or enforcement referred to in that notice.
6. An enforcement action based on the exercise of a governmental police power not covered by Covered Risk 5 if a notice of the enforcement action, describing any part of the Land, is recorded in the Public Records, but only to the extent of the enforcement referred to in that notice.
7. The exercise of the rights of eminent domain if a notice of the exercise, describing any part of the Land, is recorded in the Public Records.
8. Any taking by a governmental body that has occurred and is binding on the rights of a purchaser for value without Knowledge.
9. Title being vested other than as stated in Schedule A or being defective
   (a) as a result of the avoidance in whole or in part, or from a court order providing an alternative remedy, of a transfer of all or any part of the title to or any interest in the Land occurring prior to the transaction vesting Title as shown in Schedule A because that prior transfer constituted a fraudulent or preferential transfer under federal bankruptcy, state insolvency, or similar creditors' rights laws; or
   (b) because the instrument of transfer vesting Title as shown in Schedule A constitutes a preferential transfer under federal bankruptcy, state insolvency, or similar creditors' rights laws by reason of the failure of its recording in the Public Records
      (i) to be timely, or
      (ii) to impart notice of its existence to a purchaser for value or to a judgment or lien creditor.
10. Any defect in or lien or encumbrance on the Title or other matter included in Covered Risks 1 through 9 that has been created or attached or has been filed or recorded in the Public Records subsequent to Date of Policy and prior to the recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The Company will also pay the costs, attorneys' fees, and expenses incurred in defense of any matter insured against by this Policy, but only to the extent provided in the Conditions.

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
      (i) the occupancy, use, or enjoyment of the Land;
      (ii) the character, dimensions, or location of any improvement erected on the Land;
      (iii) the subdivision of land; or
      (iv) environmental protection;
      or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   (a) a fraudulent conveyance or fraudulent transfer; or
   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

CONDITIONS

1. DEFINITION OF TERMS

The following terms when used in this policy mean:

(a) "Amount of Insurance": The amount stated in Schedule A, as may be increased or decreased by endorsement to this policy, increased by Section 8(b), or decreased by Sections 10 and 11 of these Conditions.

(b) "Date of Policy": The date designated as "Date of Policy" in Schedule A.

(c) "Entity": A corporation, partnership, trust, limited liability company, or other similar legal entity.

(d) "Insured": The Insured named in Schedule A.

(i) The term "Insured" also includes

(A) successors to the Title of the Insured by operation of law as distinguished from purchase, including heirs, devisees, survivors, personal representatives, or next of kin;

(B) successors to an Insured by dissolution, merger, consolidation, distribution, or reorganization;

(C) successors to an Insured by its conversion to another kind of Entity;

(D) a grantee of an Insured under a deed delivered without payment of actual valuable consideration conveying the Title

(1) if the stock, shares, memberships, or other equity interests of the grantee are wholly-owned by the named Insured,

(2) if the grantee wholly owns the named Insured,

(3) if the grantee is wholly-owned by an affiliated Entity of the named Insured, provided the affiliated Entity and the named Insured are both wholly-owned by the same person or Entity, or

(4) if the grantee is a trustee or beneficiary of a trust created by a written instrument established by the Insured named in Schedule A for estate planning purposes.

(ii) With regard to (A), (B), (C), and (D) reserving, however, all rights and defenses as to any successor that the Company would have had against any predecessor Insured.

(e) "Insured Claimant": An Insured claiming loss or damage.

(f) "Knowledge" or "Known": Actual knowledge, not constructive knowledge or notice that may be imputed to an Insured by reason of the Public Records or any other records that impart constructive notice of matters affecting the Title.

(g) "Land": The land described in Schedule A, and affixed improvements that by law constitute real property. The term "Land" does not include any property beyond the lines of the area described in Schedule A, nor any right, title, interest, estate, or easement in abutting streets, roads, avenues, alleys, lanes, ways, or waterways, but this does not modify or limit the extent that a right of access to and from the Land is insured by this policy.

(h) "Mortgage": Mortgage, deed of trust, trust deed, or other security instrument, including one evidenced by electronic means authorized by law.

(i) "Public Records": Records established under state statutes at Date of Policy for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without Knowledge. With respect to Covered Risk 5(d), "Public Records" shall also include environmental protection liens filed in the records of the clerk of the United States District Court for the district where the Land is located.

(j) "Title": The estate or interest described in Schedule A.

(k) "Unmarketable Title": Title affected by an alleged or apparent matter that would permit a prospective purchaser or lessee of the Title or lender on the Title to be released from the obligation to purchase, lease, or lend if there is a contractual condition requiring the delivery of marketable title.

2. CONTINUATION OF INSURANCE

The coverage of this policy shall continue in force as of Date of Policy in favor of an Insured, but only so long as the Insured retains an estate or interest in the Land, or holds an obligation secured by a purchase money Mortgage given by a purchaser from the Insured, or only so long as the Insured shall have liability by reason of warranties in any transfer or conveyance of the Title. This policy shall not continue in force in favor of any purchaser from the Insured of either (i) an estate or interest in the Land, or (ii) an obligation secured by a purchase money Mortgage given to the Insured.

3. NOTICE OF CLAIM TO BE GIVEN BY INSURED CLAIMANT

The Insured shall notify the Company promptly in writing (i) in case of any litigation as set forth in Section 5(a) of these Conditions, (ii) in case Knowledge shall come to an Insured hereunder of any claim of title or interest that is adverse to the Title, as insured, and that might cause loss or damage for which the Company may be liable by virtue of this policy, or (iii) if the Title, as insured, is rejected as Unmarketable Title. If the Company is prejudiced by the failure of the Insured Claimant to provide prompt notice, the Company's liability to the Insured Claimant under the policy shall be reduced to the extent of the prejudice.

4. PROOF OF LOSS

In the event the Company is unable to determine the amount of loss or damage, the Company may, at its option, require as a condition of payment that the Insured Claimant furnish a signed proof of loss. The proof of loss must describe the defect, lien, encumbrance, or other matter insured against by this policy that constitutes the basis of loss or damage and shall state, to the extent possible, the basis of calculating the amount of the loss or damage.

5. DEFENSE AND PROSECUTION OF ACTIONS

(a) Upon written request by the Insured, and subject to the options contained in Section 7 of these Conditions, the Company, at its own cost and without unreasonable delay, shall provide for the defense of an Insured in litigation in which any third party asserts a claim covered by this policy adverse to the Insured. This obligation is limited to only those stated causes of action alleging matters insured against by this policy. The Company shall have the right to select counsel of its choice (subject to the right of the Insured to object for reasonable cause) to represent the Insured as to those stated causes of action. It shall not be liable for and will not pay the fees of any other counsel. The Company will not pay any fees, costs, or expenses incurred by the Insured in the defense of those causes of action that allege matters not insured against by this policy.

(b) The Company shall have the right, in addition to the options contained in Section 7 of these Conditions, at its own cost, to institute and prosecute any action or proceeding or to do any other act that in its opinion may be necessary or desirable to establish the Title, as insured, or to prevent or reduce loss or damage to the Insured. The Company may take any appropriate action under the terms of this policy, whether or not it shall be liable to the Insured. The exercise of these rights shall not be an admission of liability or waiver of any provision of this policy. If the Company exercises its rights under this subsection, it must do so diligently.

(c) Whenever the Company brings an action or asserts a defense as required or permitted by this policy, the Company may pursue the litigation to a final determination by a court of competent jurisdiction, and it expressly reserves the right, in its sole discretion, to appeal any adverse judgment or order.

6. DUTY OF INSURED CLAIMANT TO COOPERATE

(a) In all cases where this policy permits or requires the Company to prosecute or provide for the defense of any action or proceeding and any appeals, the Insured shall secure to the Company the right to so prosecute or provide defense in the action or proceeding, including the right to use, at its option, the name of the Insured for this purpose. Whenever requested by the Company, the Insured, at the Company's expense, shall give the Company all reasonable aid (i) in securing evidence, obtaining witnesses, prosecuting or defending the action or proceeding, or effecting settlement, and (ii) in any other lawful act that in the opinion of the Company may be necessary or desirable to establish the Title or any other matter as insured. If the Company is prejudiced by the failure of the Insured to furnish the required cooperation, the Company's obligations to the Insured under the policy shall terminate, including any liability or obligation to defend, prosecute, or continue any litigation, with regard to the matter or matters requiring such cooperation.

(b) The Company may reasonably require the Insured Claimant to submit to examination under oath by any authorized representative of the Company and to produce for examination, inspection, and copying, at such reasonable times and places as may be designated by the authorized representative of the Company, all records, in whatever medium maintained, including books, ledgers, checks, memoranda, correspondence, reports, e-mails, disks, tapes, and videos whether bearing a date before or after Date of Policy, that reasonably pertain to the loss or damage. Further, if requested by any authorized representative of the Company, the Insured Claimant shall grant its permission, in writing, for any authorized representative of the Company to examine, inspect, and copy all of these records in the custody or control of a third party that reasonably pertain to the loss or damage. All information designated as confidential by the Insured Claimant provided to the Company pursuant to this Section shall not be disclosed to others unless, in the reasonable judgment of the Company, it is necessary in the administration of the claim. Failure of the Insured Claimant to submit for examination under oath, produce any reasonably requested information, or grant permission to secure reasonably necessary information from third parties as required in this subsection, unless prohibited by law or governmental regulation, shall terminate any liability of the Company under this policy as to that claim.

7. OPTIONS TO PAY OR OTHERWISE SETTLE CLAIMS; TERMINATION OF LIABILITY

In case of a claim under this policy, the Company shall have the following additional options:

(a) To Pay or Tender Payment of the Amount of Insurance.

To pay or tender payment of the Amount of Insurance under this policy together with any costs, attorneys' fees, and expenses incurred by the Insured Claimant that were authorized by the Company up to the time of payment or tender of payment and that the Company is obligated to pay.

Upon the exercise by the Company of this option, all liability and obligations of the Company to the Insured under this policy, other than to make the payment required in this subsection, shall terminate, including any liability or obligation to defend, prosecute, or continue any litigation.

(b) To Pay or Otherwise Settle With Parties Other Than the Insured or With the Insured Claimant.

(i) To pay or otherwise settle with other parties for or in the name of an Insured Claimant any claim insured against under this policy. In addition, the Company will pay any costs, attorneys' fees, and expenses incurred by the Insured Claimant that were authorized by the Company up to the time of payment and that the Company is obligated to pay; or

(ii) To pay or otherwise settle with the Insured Claimant the loss or damage provided for under this policy, together with any costs, attorneys' fees, and expenses incurred by the Insured Claimant that were authorized by the Company up to the time of payment and that the Company is obligated to pay.

Upon the exercise by the Company of either of the options provided for in subsections (b)(i) or (ii), the Company's obligations to the Insured under this policy for the claimed loss or damage, other than the payments required to be made, shall terminate, including any liability or obligation to defend, prosecute, or continue any litigation.

8. DETERMINATION AND EXTENT OF LIABILITY

This policy is a contract of indemnity against actual monetary loss or damage sustained or incurred by the Insured Claimant who has suffered loss or damage by reason of matters insured against by this policy.

(a) The extent of liability of the Company for loss or damage under this policy shall not exceed the lesser of

(i) the Amount of Insurance; or

(ii) the difference between the value of the Title as insured and the value of the Title subject to the risk insured against by this policy.

(b) If the Company pursues its rights under Section 5 of these Conditions and is unsuccessful in establishing the Title, as insured,

(i) the Amount of Insurance shall be increased by 10%, and

(ii) the Insured Claimant shall have the right to have the loss or damage determined either as of the date the claim was made by the Insured Claimant or as of the date it is settled and paid.

(c) In addition to the extent of liability under (a) and (b), the Company will also pay those costs, attorneys' fees, and expenses incurred in accordance with Sections 5 and 7 of these Conditions.

9. LIMITATION OF LIABILITY

(a) If the Company establishes the Title, or removes the alleged defect, lien, or encumbrance, or cures the lack of a right of access to or from the Land, or cures the claim of Unmarketable Title, all as insured, in a reasonably diligent manner by any method, including litigation and the completion of any appeals, it shall have fully performed its obligations with respect to that matter and shall not be liable for any loss or damage caused to the Insured.

(b) In the event of any litigation, including litigation by the Company or with the Company's consent, the Company shall have no liability for loss or damage until there has been a final determination by a court of competent jurisdiction, and disposition of all appeals, adverse to the Title, as insured.

(c) The Company shall not be liable for loss or damage to the Insured for liability voluntarily assumed by the Insured in settling any claim or suit without the prior written consent of the Company.

10. REDUCTION OF INSURANCE; REDUCTION OR TERMINATION OF LIABILITY

All payments under this policy, except payments made for costs, attorneys' fees, and expenses, shall reduce the Amount of Insurance by the amount of the payment.

11. LIABILITY NONCUMULATIVE

The Amount of Insurance shall be reduced by any amount the Company pays under any policy insuring a Mortgage to which exception is taken in Schedule B or to which the Insured has agreed, assumed, or taken subject, or which is executed by an Insured after Date of Policy and which is a charge or lien on the Title, and the amount so paid shall be deemed a payment to the Insured under this policy.

12. PAYMENT OF LOSS

When liability and the extent of loss or damage have been definitely fixed in accordance with these Conditions, the payment shall be made within 30 days.

13. RIGHTS OF RECOVERY UPON PAYMENT OR SETTLEMENT

(a) Whenever the Company shall have settled and paid a claim under this policy, it shall be subrogated and entitled to the rights of the Insured Claimant in the Title and all other rights and remedies in respect to the claim that the Insured Claimant has against any person or property, to the extent of the amount of any loss, costs, attorneys' fees, and expenses paid by the Company. If requested by the Company, the Insured Claimant shall execute documents to evidence the transfer to the Company of these rights and remedies. The Insured Claimant shall permit the Company to sue, compromise, or settle in the name of the Insured Claimant and to use the name of the Insured Claimant in any transaction or litigation involving these rights and remedies.

If a payment on account of a claim does not fully cover the loss of the Insured Claimant, the Company shall defer the exercise of its right to recover until after the Insured Claimant shall have recovered its loss.

(b) The Company's right of subrogation includes the rights of the Insured to indemnities, guaranties, other policies of insurance, or bonds, notwithstanding any terms or conditions contained in those instruments that address subrogation rights.

14. ARBITRATION

Unless prohibited by applicable law, arbitration pursuant to the Title Insurance Arbitration Rules of the American Arbitration Association may be demanded if agreed to by both the Company and the Insured at the time of a controversy or claim. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the Insured arising out of or relating to this policy, and service of the Company in connection with its issuance or the breach of a policy provision or other obligation. effect on the date the demand for arbitration is made, or, at the option of the Insured, the rules in effect at Date of Policy shall be binding upon the parties. The award may include attorneys' fees only if the laws of the state in which the Land is located permit a court to award attorneys' fees to a prevailing party. Judgment upon the award rendered by the Arbitrator(s) may be entered in any court having jurisdiction thereof.

The law of the situs of the land shall apply to an arbitration under the Title Insurance Arbitration Rules.

A copy of the Rules may be obtained from the Company upon request.

15. LIABILITY LIMITED TO THIS POLICY; POLICY ENTIRE CONTRACT

(a) This policy together with all endorsements, if any, attached to it by the Company is the entire policy and contract between the Insured and the Company. In interpreting any provision of this policy, this policy shall be construed as a whole.

(b) Any claim of loss or damage that arises out of the status of the Title or by any action asserting such claim whether or not based on negligence shall be restricted to this policy.

(c) Any amendment of or endorsement to this policy must be in writing and authenticated by an authorized person, or expressly incorporated by Schedule A of this policy.

(d) Each endorsement to this policy issued at any time is made a part of this policy and is subject to all of its terms and provisions. Except as the endorsement expressly states, it does not (i) modify any of the terms and provisions of the policy, (ii) modify any prior endorsement, (iii) extend the Date of Policy, or (iv) increase the Amount of Insurance.

16. SEVERABILITY

In the event any provision of this policy, in whole or in part, is held invalid or unenforceable under applicable law, the policy shall be deemed not to include that provision or such part held to be invalid, but all other provisions shall remain in full force and effect.

17. CHOICE OF LAW; FORUM

(a) Choice of Law: The Insured acknowledges the Company has underwritten the risks covered by this policy and determined the premium charged therefor in reliance upon the law affecting interests in real property and applicable to the interpretation, rights, remedies, or enforcement of policies of title insurance of the jurisdiction where the Land is located. Therefore, the court or an arbitrator shall apply the law of the jurisdiction where the Land is located to determine the validity of claims against the Title that are adverse to the Insured and to interpret and enforce the terms of this policy. In neither case shall the court or arbitrator apply its conflicts of law principles to determine the applicable law.

(b) Choice of Forum: Any litigation or other proceeding brought by the Insured against the Company must be filed only in a state or federal court within the United States of America or its territories having appropriate jurisdiction.

18. NOTICES, WHERE SENT

Any notice of claim and any other notice or statement in writing required to be given to the Company under this policy must be given to the Company at **First American Title Insurance Company, Attn: Claims National Intake Center, 1 First American Way, Santa Ana, California 92707. Phone: 888-632-1642**

First American	Owner's Policy of Title Insurance
	ISSUED BY

File No.: 12671-2664415

THE LAND REFERRED TO HEREIN BELOW IS SITUATED IN THE COUNTY OF Volusia, STATE OF FL, AND IS DESCRIBED AS FOLLOWS:

SAM SNEAD GOLF AND COUNTRY CLUB, A PART OF THE THOMAS FITCH GRANT, LYING WESTERLY OF THE FLORIDA EAST COAST RAILWAY, SECTION 39, TOWNSHIP 14 SOUTH, RANGE 32 EAST, ACCORDING TO THE PLAT THEREOF, AS RECORDED IN MAP BOOK 25, PAGE 61, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA.

File No.: 12671-2664415

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage and the Company will not pay costs, attorneys' fees, or expenses that arise by reason of:

1. Any rights, interests, or claims of parties in possession of the land not shown by the public records.

2. Any encroachment, encumbrance, violation, variation or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the land.

3. Any lien, for services, labor, or materials in connection with improvements, repairs or renovations provided before, on, or after Date of Policy, not shown by the public records.

4. Any dispute as to the boundaries caused by a change in the location of any water body within or adjacent to the land prior to Date of Policy, and any adverse claim to all or part of the land that is, at Date of Policy, or was previously under water.

5. Taxes or special assessments not shown as liens in the public records or in the records of the local tax collecting authority, at Date of Policy.

6. Any minerals or mineral rights leased, granted or retained by current or prior owners.

7. Taxes and assessments for the year 2021 and subsequent years, which are not yet due and payable.

8. Restrictions, dedications, conditions, reservations, easements and other matters shown on the plat of Sam Snead Golf & Country Club, as recorded in Plat Book 25, Page(s) 61, but deleting any covenant, condition or restriction indicating a preference, limitation or discrimination based on race, color, religion, sex, handicap, familial status or national origin to the extent such covenants, conditions or restrictions violate 42 USC 3604(c).

9. Development Order Issued by City of Ormond Beach recorded in Official Records Book 5944, Page 2183.

10. Easement Agreement as set forth in instrument recorded in Official Records Book 5089, Page 1438 .

11. Provisions contained in Deed recorded in Official Records Book 2052, Page 1019, including rights of life time members.

12. Terms and conditions of any existing unrecorded lease(s), and all rights of lessee(s) and any parties claiming through the lessee(s) under the lease(s).

13. Any map or diagram now or previously provided is for reference and informational purposes only. The Company and its agents expressly disclaim any liability for alleged loss or damage which may result from reliance upon such map(s) or diagram(s). The foregoing does not limit any express

coverages provided by the terms and provisions of any title insurance policy for matters which might be revealed by a survey prepared and certified in accord with Florida Statutes Section 472.027.

NOTE: Exception(s) numbered 1 - 5 above is/are hereby deleted.

14. That certain mortgage from Triumph Oaks of Ormond Beach I, LLC, a Florida limited liability company to EJTS HOLDING, LLC, dated April 23, 2021 in the original principal sum of $1,600,000.00 and the terms and conditions thereof.

15. All matters disclosed by survey prepared by: Sliger and Associates, Inc., dated April 15, 2021, Field Date: April 13, 2021. There are fences of undetermined ownership labeled E1, E2, E3, E4, E5, E7 crossing onto subject property on the West side, and fences of undetermined ownership labeled E8 and E9 crossing onto subject property on the West side, screened pool enclosure labeled E6 crossing onto subject property on the South side, asphalt drive extends beyond the East boundary line, under Job No. 21-0493.

Note: All of the recording information contained herein refers to the Public Records of Volusia County, Florida , unless otherwise indicated. Any reference herein to a Book and Page is a reference to the Official Record Books of said county, unless indicated to the contrary.

Notices - Where Sent

All notices required to be given the Company and any statement in writing required to be furnished the Company shall include the number of this policy and shall be addressed to the Company, Attention: Claims Department, 1 First American Way, Santa Ana, CA 92707.

Service, Quality and Availability

First American Title Insurance Company cares about its customers and their ability to obtain information and service on a convenient, timely and accurate basis. A qualified staff of service representatives is dedicated to serving you. A toll-free number is available for your convenience in obtaining information about coverage and to provide assistance in resolving complaints at 1-800-854-3643. Office hours are from 8:30 a.m. through 5:30 p.m. Monday through Friday.

I. Project Description

A. Title of Proposal

Tomoka Reserve Buffer Planting and Maintenance Plan

B. Location

Tomoka Oaks Blvd., Ormond Beach, FL.

C. Buffer Planting Plan and Maintenance Plan Objectives

1. Description

Tomoka Reserve is a 147.94-acre site with an approximate perimeter of 3.3 miles. As proposed, Tomoka Reserve will provide a 50-foot-wide vegetative buffer between the existing subdivisions and the perimeter lots in Tomoka Reserve. Over the long term, the buffer will be managed by the Tomoka Reserve's Homeowners Association. Today, much of the buffer contains native trees and shrubs that provide screening between the existing homes and the proposed development. In areas where the buffer is sparse or where no vegetation is present, native trees and shrubs will be planted to enhance the native buffer based on the requirements in the City of Ormond Beach Land Development Code.

2. Purpose and Need

The purpose of the Buffer Planting and Maintenance Plan is to describe how the buffer plants will be installed and maintained over the short and long term to maximize survivability. The overall objective of the buffer plantings will be to create a visual screen such that the existing homes and the new homes will have some level of screening so that each resident will have an obstructive view of the other.

The Tomoka Reserve development team is committed to keeping the ecology of the current buffer in place and increasing its integrity and diversity by using mostly native vegetation. The existing and enhanced vegetative screen will also function as a habitat for migratory birds and provide habitat for small mammals and turtles. With our commitment to using a wide variety of native species, we will be increasing the biodiversity of this already important plant community.

Another important aspect of using native plants is their ability to tolerate drought once they are established. By using regionally appropriate species, we will be removing the need for a permanent in-ground irrigation system that would draw large volumes of water out of the aquifer. The current buffer is not manicured or irrigated; this plan does not propose intensive management over the long term. The objective of this Buffer Planting and Maintenance Plan is to place trees and shrubs in the buffer to enhance the existing native vegetation.

II. Existing Conditions

A. Physical

The entirety of the site, including the 50-foot buffer, is comprised of sandy soils and there are no naturally occurring wetlands. The soils of this site are dominated by Paola fine sands, which are well-drained soils, Appendix A. The topography of the site has gentile slopes where the eastern portion of the site is higher than the north, south, and western areas. There are no physical barriers present that would prohibit us from enhancing that existing vegetative buffer.

B. Existing biotic conditions

A tree survey was conducted in 2021 that determined that there are 1,970 trees on site that are made up of 21 species of trees. The site is also home to a wide variety of insects, reptiles, amphibians, and small mammals, all of which will benefit from the installation of more native trees, shrubs, grasses, and wildflowers. Around the entire site, approximately 70% of the 50-foot buffer has trees and shrubs that act as a visual screen. However, in many places beneath the canopy, there are gaps in the understory that lack significant screening.

III. Buffer Planting Plan

A. Planting plan description and design

In areas where trees and shrubs will be installed, this plan follows the best management practices outlined in the American National Standards Institute (ANSI) 300 part 6

(Transplanting Standards) and Z60.1 (Nursery Stock Standards), additionally, the planting will follow the directions provided in Appendix B. Tree and Shrub Planting Details in Appendix B were provided by the City of Ormond Beach. The buffer design was created by

a Board Certified Master Arborist and a Registered Landscape Architect, where special consideration was given to incorporating native plants in the buffer plan, Appendix C.

Buffer Area Planting Requirements:

We will be using a modified buffer as the guidelines for the planting requirements. The buffer shall be 50 feet wide, will contain 5 trees and 50 shrubs.

For each 100 linear feet of buffer, where there are less than 5 exiting trees in the buffer, (trees having a DBH of at least 6 inches), trees will be installed to meet the buffer requirements or the fraction thereof. Where gaps of 50 feet or more occur between existing trees, even if there are 5 or more existing trees, landscape trees will be planted. The total number of buffer trees needed to meet the intent of this buffer plan is 396, Appendix D.

Where appropriate, native palms (*Sabal palmetto*) may be used as part of the overall planting requirements. All native palms that will be retained will count towards our tree requirement for each 100' buffer section. Over the length of a buffer zone, three palms will equal one hardwood tree. Palms shall have a minimum overall height of ten feet (10') at the time of planting. There are 110 existing palms within the buffer, which equates to 36 trees (110 palms /3 palms equal 1 hardwood tree = 36 hardwood trees). Overall, the total number of require trees will be reduce by 36 to represent the contribution of palms to the buffer tree planting requirements.

For each 100 linear feet of buffer, 50 shrubs will be installed where no shrubs are present. For each 100-foot section where shrubs exist in the buffer, existing shrubs will be assessed and shrubs will planted so that the number of shrubs in each 100' section will equal meet the required number for that buffer section.

Since ground cover plants already exist, we will not be planting any species of ground covers as part of the Buffer Planting Plan. The Tomoka Reserve Development Team recognizes the importance of native plants and to that end, native wildflower seed will be spread in select areas of the buffer. Florida native wildflower seed will be purchased from the Florida Wildflower Cooperative and spread by hand.

The landscaped buffer area shall include a minimum five-foot (5') wide visual screen constructed of plant materials which are selected, located, and maintained to provide a visual barrier that is designed to achieve forty percent (40%) opacity within three (3) years from the time of installation between three feet (3') and six feet (6') above the average ground level of the landscaped buffer area when viewed horizontally.

Each tree and shrub that will be planted will have a ring of ground cover removed to install each plant. All planting rings around trees and shrubs will be mulched with 3-inches of natural mulch to retain soil moisture.

This Buffer Planting Plan exceeds the requirements set forth in Section 3.05 (c)(2) Landscape design standards by using in excess of 50% xeric or drought tolerant plant species.

B. Standards for success

The property owner will provide a maintenance bond in favor of the City equal to the certified cost estimate of the landscaping improvements in order to guarantee the survival of the plantings for a period of two (2) years. During the two-year grow-in period, trees and shrubs that are not living will be replaced to meet the legal requirement of the bond. The maintenance bond will be released after two years when it has been demonstrated that 80% of all plant material is alive. Release of the bond will occur when the development team provides a report to the City on a raw count of all planted trees and shrubs such there will be 80% or better plant survival. It is expected that Tomoka Reserve will be built in phases where each phase will have its own bond for the plant material in the buffer of that section.

IV. Buffer Maintenance

A. Short Term Maintenance

Plants will be monitored and watered on a regular schedule. Over the short term, we have developed a regular watering schedule that will require plants to be watered multiple times over a seven-day period. Over the long term, we have developed a watering plant that will span 26 weeks. Based on the recommendations from the arborist and landscape architect, we will extend watering if they determine the plants need more water for the plants to

survive. This watering plan exceeds the recommendations of the University of Florida's webpage on Gardening Solutions publication Planting and Establishing Trees.

The plants being used for this project will be either native or Florida Friendly Landscape™ plants. Since the species being used are adapted to this climate and these soils, they will adapt and grow without difficulty since we are using the Right Plants in the Right Place concepts (https://ffl.ifas.ufl.edu/about-ffl/9-principles/principle-1-right-plant-/) as described by the Institute of Food and Agricultural Sciences Extension (UF/IFAS Extension) and the Florida Department of Environmental Protection.

Watering will be accomplished with a large water tank on a truck such that each plant will receive water from a person who will be able to confirm that enough water is provided. Since there are many species of wildlife that live in the buffer, we will not be installing above or below-ground irrigation.

The process of digging and trenching irrigation lines could displace, or harm protected species/existing flora. Additionally, hand-watering the buffer plantings will also the development team to more closely monitor plant health and establishment and will not waste water, which would be detrimental to the health of the aquifer. There are several challenges to using a pump-driven irrigation system, one is the distance to the buffer planting; if the distance is too great, we will not be able to effectively push water that far. The second issue is that the site currently does not have a power supply to run well pumps.

Trees and shrubs will be inspected at regular intervals to assess their health and level of establishment. If trees or shrubs die during the watering period, they will be replaced as outlined in the maintenance bond in favor of the City. A key component to the success of the plantings will be to maintain soil moisture. To achieve maximum soil moisture, we will not remove large swaths of ground cover; we will only remove enough existing plant material to install the buffer planting material, which will then be covered with mulch.

B. Watering Schedule

A watering schedule has been developed and provided below. Each watering event will be accomplished through the use of a truck and hand watering to ensure that each plant receives adequate water. If heavy rain events occur, the watering schedule will be

modified so we are not over-watering or wasting water. The objective of each watering event will be to provide approximately 4-6 gallons of water to each tree during Phase I and 2-gallons during Phases II & III. Shrubs will be given approximately 3 gallons of water in Phase I and 2 gallons in Phases II & III.

Buffer Tree, Shrub, and Bunch Grass Watering Schedule

Plant Material Watering will span six-months (26 weeks)

Phase I – Water 5 times per week, once a day for **five weeks** if plants are installed in the fall and winter (water twice a day if plants are installed between May and September) and monitor plant establishment.
– Monday, Tuesday, Wednesday, Friday, & Saturday

Phase II – Water 3 times per week for **ten weeks** and monitor plant establishment.
– Monday, Wednesday, & Friday

Phase III – Water 2 times per week for **11 weeks** and monitor plant establishment.
– Monday & Thursday

* Watering frequency and volume of water may be adjusted depending on rainfall and how well plants are becoming established, which will be determined by the arborist or landscape architect.

C. Vegetation Maintenance

The most important aspect of maintaining the newly installed trees and shrubs will be managing the ground cover around the plants so they do not overtop the new plantings. Most of the buffer has an intact tree canopy and sparse ground cover due to the shade. Maintenance in areas where there is shade will be less intense and will revolve around removing weeds and ground covers that are outcompeting the new plants. Most of the maintenance work will be accomplished through hand-pulling weeds and spraying the weeds with a mixture of vinegar, salt, soap, and water.

In areas where the buffer is largely absent, maintenance will include mowing the ground covers around the installed plants. Due to the spacing between trees and shrubs, a lawn mower will be used to suppress the ground cover to limit competition when necessary. Most of the maintenance work will be accomplished through hand-pulling weeds and spraying the weeds with a mixture of vinegar, salt, soap, and water.

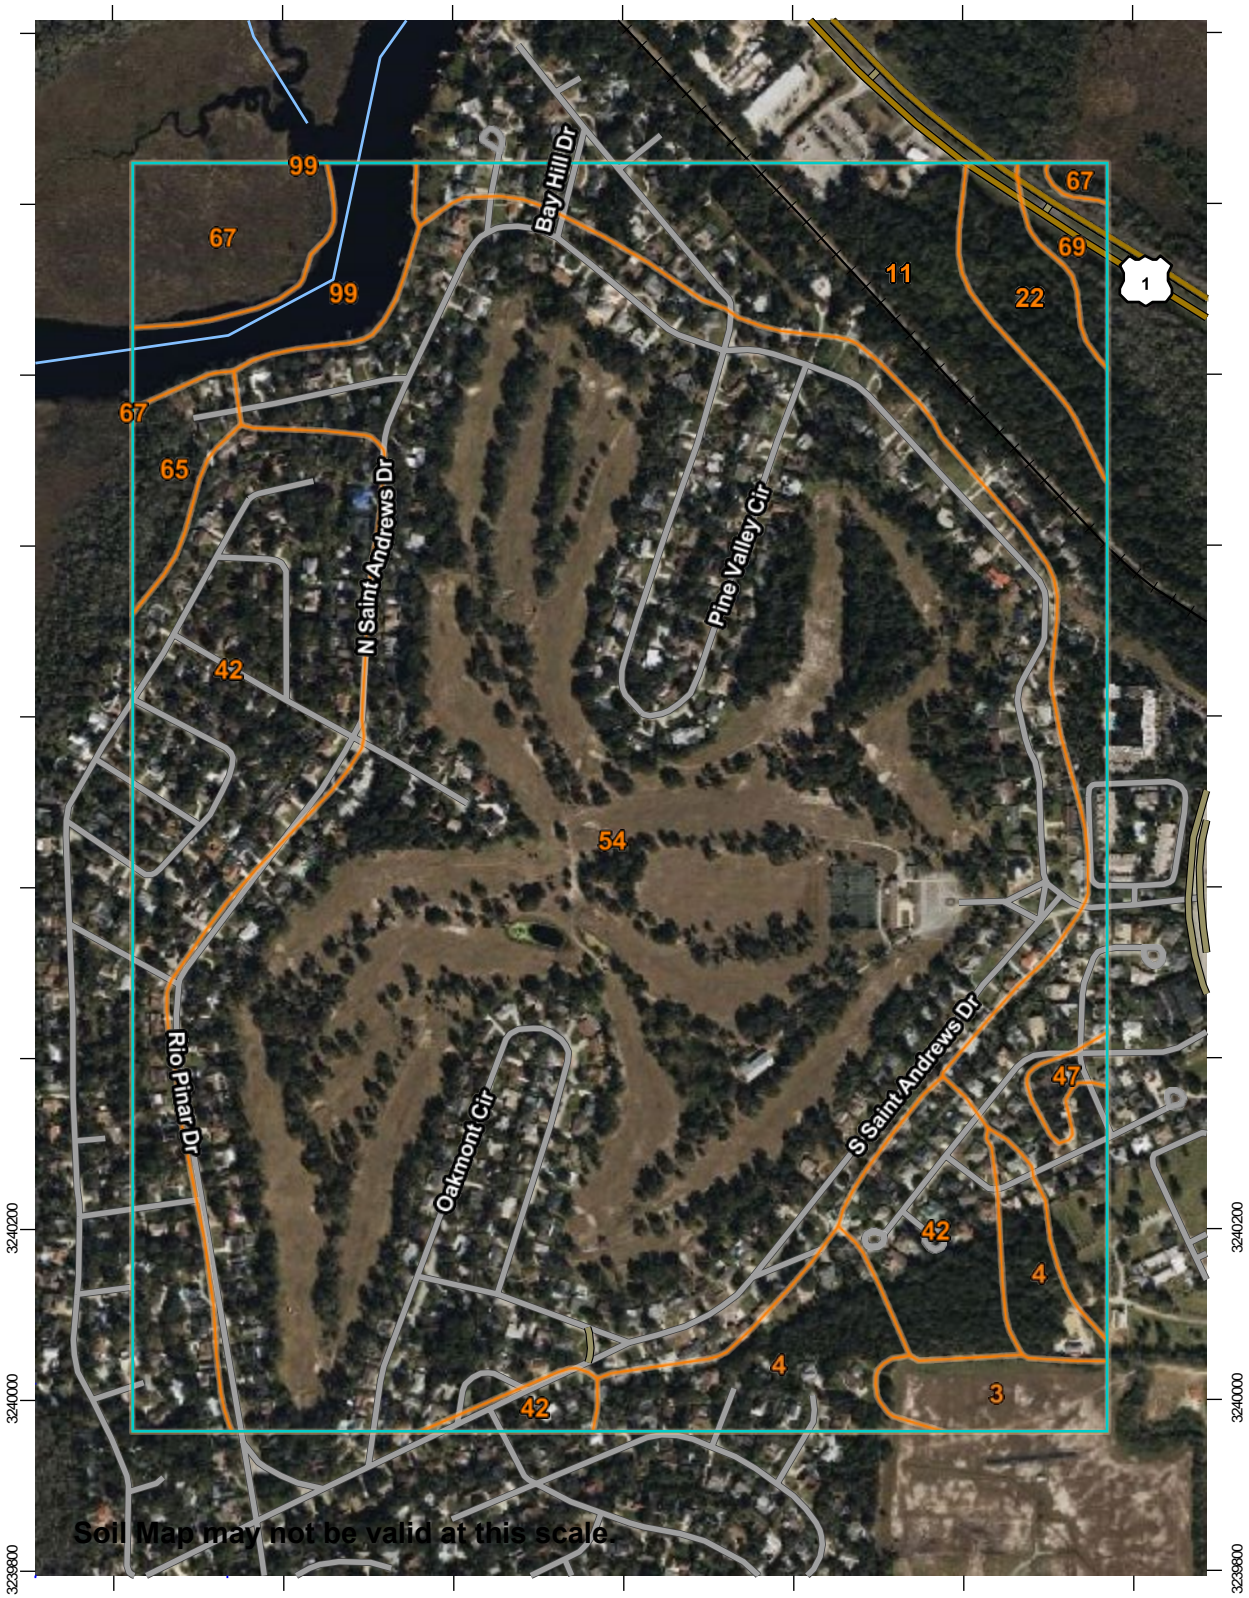
D. Long-term Buffer Maintenance

The long-term maintenance of the buffer will take place after the two-year buffer survival bond is satisfied. The long-term buffer maintenance will be managed by the Tomoka Reserve Homeowners Association (TRHOA).

TRHOA buffer maintenance activities shall include the removal of dead and hazardous trees, mowing grass that occurs between the buffer vegetation and the rear lot lines of the Tomoka Reserve homes, noxious plant removal as defined by and vine management.

Long-term Buffer Maintenance Schedule:

TRHOA will mow the grass in the buffer monthly between May 1 and October 31 each year. TRHOA will remove dead or hazardous trees as needed. For a tree to be removed, an International Society of Arboriculture (ISA) arborist will need to provide a report stating the tree in question is an “unacceptable risk” for the tree to be removed.



After the formation of the TRHOA, vines will be managed as needed. Once the initial vine maintenance occurs, TRHOA reserves the right to retreat vines after the initial site on a three-year cycle.

When possible, vines should be pulled from trees unless it will cause damage to the tree. When vines are removed, they will be cut just above the ground and treated with a herbicide to kill the underground roots. Whenever herbicides are being used, Florida law requires the herbicide applicators must have or be working for an individual who possesses a valid Florida Pesticide Applicator license.

Native Plant List

Tomoka Reserve Buffer Planting List

TREES			
Scientific name	Common name	Growth habit (height & width) ft	Comments Habit & Size
Cartrema americana	American olive	25’ x 15’	Evergreen – Medium
Carpinus caroliniana	American hornbeam	25’ x 15’	Evergreen – Medium
Carya glabra	Hickory	80’ x 35’	Deciduous – Large
Celtis laevigata	Hackberry/sugarberry	60’ x 50’	Deciduous – Large
Cercis canadensis	Redbud	30’ x 30’	Deciduous – Medium
Ilex x attenuata	Savannah holly	30’ x 15’	Evergreen – Medium
Ilex opaca	American holly	10’ x 15’	Evergreen – Medium
Magnolia grandiflora	Southern magnolia	80’ x 40’	Evergreen – Large
Juniperus virginiana	Red cedar	60’ x 30’	Evergreen – Large
Prunus angustifolia	Chickasaw plum	20’ x 20’	Deciduous – Medium
Quercus austrina	Bluff oak	40’ x 30’	Deciduous – Medium
Quercus geminate	Sand live oak	40’ x 80’	Evergreen – Large
Quercus chapmanii	Chapman’s oak	10’ x 10’	Evergreen – Medium
Quercus virginiana	Live oak	80’ x 150’	Evergreen – Large
SHRUBS			
Forestiera segregata	Florida privet	15’ x 8’	Evergreen
Ilex vomitoria	Yaupon holly	15’ x 10’	Evergreen
Lantana involucrata	Buttonsage	2.5’ x 4’	Evergreen
Myrcianthes fragrans	Simpson’s stopper	20’ x 10’	Evergreen
Myrica cerifera	Wax myrtle	20’ x 20’	Evergreen
Psychotria nervosa	Wild coffee	3’ x 4’	Evergreen
Serenoa repens	Saw palmetto	20’ x 10’	Evergreen
GRASSES			
Muhlenbergia capillaris	Muhly grass	3’ x 3’	Evergreen
Spartina bakeri	Smooth cordgrass	3’ x 4’	Evergreen
Tripsacum dactyloides	Fakahatchee grass	5’ x 6’	Evergreen
WILDFLOWERS			
Baptisia albescens	Spiked wild indigo		Perennial
Coreopsis lanceolarta	Tickseed		Perennial
Coreopsis tinctoria	Plains coreopsis		Perennial
Galliardia pulchella	Blanket flower		Annual
Helianthus debilis	Beach sunflower		Biennial
Salvia coccinea	Scarlet Sage		Perennial
Solidago altissima	Tall goldenrod		Perennial
Solidago sempervirens	Seaside goldenrod		Perennial

* This plant list is not all-inclusive, additional native and Florida Friendly plants may be used based on the recommendcation of the landscape architect and arborist.

All plants listed are species native to Florida and commonly found in Volusia County.

Re: Tomoka Reserve Redevelopment - Rezoning/Planned Residential Development – Project Revisions Following Planning Board and Resident Feedback

Dear Steven:

As you know, it is the Firm's pleasure to represent Triumph Oaks of Ormond Beach I, LLC (the "Applicant") with respect to the redevelopment and rezoning to Planned Residential Development of the property comprising the former Tomoka Oaks Golf Course. Following the Planning Board meeting held on July 13, 2023, the Applicant has revised their proposal to respond to the comments and concerns raised by the board and residents. A summary of these changes is included below, outlined in line with the staff recommendations beginning on Page 26 of the staff report:

A. Require all lots on the project perimeter with the Tomoka Oaks subdivision to be 100' in lot depth and at least 10,000 square feet in lot area – ***The Applicant has agreed to this recommendation to commit to a minimum depth of 100' and minimum lot area of 10,000 sq. ft. in lot area.***

B. Requirement of a type 6 buffer planting plan that requires seven (7) trees, 70 shrubs & 70 ground covers per 100' lineal feet – ***As noted in the hearing, the Applicant believes that the proposed planting system for the property, which includes a xeric landscaping scope that will complement and enhance areas of natural vegetation within the site, is more compatible with existing on site conditions and will act as a better screening measure for adjacent properties, while also relying on less irrigation and water consumption and supporting natural plant communities. This landscaping type has been recommended by the University of Florida's Institute of Food and Agricultural Sciences (IFAS) and***

utilized in cutting edge communities such as Sunbridge and the Edge at Cherrylake. Information relating to these communities in included herein.

However, we understand that the City is interested in ensuring adequacy of the buffer between the communities, and has agreed to the following:

i. ***Where the planting standard outlined in the PUD is utilized for a phase, a maintenance bond will be provided to ensure the survivability of planting materials for a period of two (2) years.***
ii. ***In the event that the planting materials do not survive, the buffer will be if the plantings do not survive in total at that time, as outlined in the maintenance plan, then we will go back and install irrigation to City standards with the stated plantings within the plan.***

C. Setback plan – lot width – 100' in width – ***As noted during the hearing, the Applicant does not believe it is possible to incorporate a minimum lot width of 100' throughout the site with the requested voluntary landscaping buffer and proposed open space, which we believe is a key feature for the existing and proposed residents. However, we have been able to modify the plan to create a mixture of lot types along the perimeter of the site that demonstrate a lot width along the rear setback line (as a closer measuring point to the existing residential homes) as follows:***

i. ***Of the lots along the perimeter of the site, a revised layout demonstrates that 46 of these lots are 100' in width, and 10 of these lots are at 90' in width.***
ii. ***The variable width provided with the revisions still creates a variety of housing types and transitional areas from the larger perimeter lots and the smaller footprint homes in the core of the project, while creating a larger similarity in lot size between the existing and proposed homes.***
iii. ***The minimum lot width within the core of the community has been revised from 50' lot widths to a proposed minimum lot width of 60' for the interior lot types.***

D. Setback plan – maximum building coverage – 50% across all housing types – ***The Applicant is in agreement with this condition and has made this revision.***

E. Setback plan - minimum primary structure setbacks – ***The Applicant is in agreement with this condition and has made this revision.***

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50'	20'	20'	7.5'	15'
Park House	60'	25'	20'	7.5'	15'
Estate House	80'	25'	20'	8'/20'	20'
Custom House	80'	25'	20'	8'/20'	20'

F. Setback plan - minimum garage setbacks – ***The Applicant is in agreement with this condition and has made this revision.***

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50'	20'	20'	7.5'	15'
Park House	60'	25'	20'	7.5'	15'
Estate House	80'	25'	20'	8'/20'	20'
Custom House	80'	25'	20'	8'/20'	20'

G. Setback plan - minimum front porch setbacks – ***The Applicant is in agreement with this condition and has made this revision.***

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50'	12'	20'	7.5'	15'
Park House	60'	15'	20'	7.5'	15'
Estate House	80'	15'	20'	8'/20'	20'
Custom House	80'	15'	20'	8'/20'	20'

H. Setback plan – Notes – Delete the notes. Notes 1 and 2 are contained in the Land Development Code. Staff is not supportive of a 15' front yard garage setback. - ***The Applicant is in agreement with this condition and has made this revision.***

I. Sheet PD6 note on lot separation - Amend note to state: The 50' buffer abutting the Tomoka Oaks existing residential lots and areas called out as natural preservation shall not be modified and shall always be vegetative areas. - ***The Applicant is in agreement with this condition and has made this revision.***

J. St. Andrews Drive and Tomoka Oaks Boulevard diamond - that a diamond reconfiguration be required at the construction (preliminary plat) phase of the development. – ***The Applicant has demonstrated that the diamond intersection operates within the required level of service for the site. An autoturn analysis has been undertaken to determine if there are any conflicts with emergency services to the area using the diamond intersection – the Applicant is willing to provide the following necessary improvements to this area of the property, as illustrated on the attached exhibit:***

   i. ***Modification of existing drive aisle to resolve turning radii conflicts for emergency vehicles; and***
   ii. ***Provision of additional landscaping adjacent to the right-of-way.***

K. Sidewalks on both sides of Tomoka Oaks Boulevard – require sidewalks on both sides of Tomoka Oaks Boulevard. - ***The Applicant is in agreement with this condition and has made this revision.***

L. The preliminary plat should require the conducting of a neighborhood meeting. - ***The Applicant is in agreement with this condition.***

M. **Resident Concern – Timing of Signal Permitting** – ***The Applicant understand that the residents want to ensure that permitting and installation of the signal move forward at the same time as the development. As such, the Applicant agrees to the voluntary condition that within 30 days of phase 1 plat approval, the developer will initiate an application to FDOT to construct a traffic signal at the intersection of Nova Road & Tomoka Oaks Boulevard. Prior to the issuance of first certificate of occupancy within the Tomoka Reserve Development, the traffic signal at Nova Road & Tomoka Oaks Boulevard has to be completed and functioning or fully bonded and or the full cost of constructing said traffic signal system must be deposited with the City of Ormond Beach.***

N. **Resident Concern – HOA Architectural Design Language** – ***The Applicant has coordinated with residents following the Planning Board hearing and have agreed to modify the proposed architectural standards to include the following:***

   i. ***The Architectural Review Board may not modify the architectural standards set forth in the PUD until such time that the HOA has turned control over from the Declarant to the homeowners.***
   ii. ***The Applicant has committed to compliance with the following additional landscape standards included herein.***

O. Planning Board Concern – Cut Through of Amenity Space parking lot – ***A board member noted that within a previous plan iteration, residents could utilize the amenity parking lot as a cut through drive aisle, which raised concerns on resident and child safety. This parking area has been revised to limit cut-through traffic.***

We look forward to review of this item by the Planning Board at their September 21, 2023 hearing date. If there is any additional information we can provide to assist in review, please do not hesitate to reach out.

Sincerely,

Robert A. Merrell III

Applicant Expert Testimony Qualifications

Below is a list of experts who may be expected to testify during the public hearing review of the above-referenced project. Attached to this summary page are resumes detailing each individuals' qualifications for review and as a part of the formal record.

1. Dwight Durant, P.E.
   President, Zev Cohen & Associates, Inc.
   Professional Engineer
   B.S. Civil Engineering, University of Florida

2. Mark Karet, AICP
   Director of Planning and Landscape Architecture, Zev Cohen & Associates, Inc.
   Certified by American Institute of Certified Planners
   Planner
   MA. Urban and Regional Planning, University of Florida

3. Kris Rowley, P.E.
   Senior Project Manager, Zev Cohen & Associates, Inc.
   Professional Engineer
   B.S. Civil Engineering, University of Central Florida

4. Jake Stehr, P.L.A.
   Senior Landscape Architect, Zev Cohen & Associates, Inc.
   Professional Landscape Architect
   Master of Landscape Architecture, Auburn University

5. Sans Lassiter, P.E.
   President, LTG, Inc.
   Transportation Engineer
   M.E., Transportation Engineering, University of Florida

6. Donald ("Don") Spence, Ph.D.
   Owner, Native Florida Landscapes, LLC
   Board Certified Master Arborist
   Ph.D. Plant Pathology, University of Florida

7. Jeff Flairty, P.E.
   President, Ayden Environmental
   Environmental Consultant
   B.S. Environmental Engineering, University of Central Florida

8. Bill Ray, AICP
   President, Ray and Associates
   Environmental and Planning Consultant
   B.A., Environmental Studies/Natural Sciences, Rollins College

9. Michael Hotaling, MAI
   Managing Partner, Moody Williams Appraisal Group, LLC
   State-Certified General Real Estate Appraiser
   B.S., Business Administration & Finance, University of Central Florida

10. Ronald Moody, MAI, SRA
    Founding Partner, Moody Williams Appraisal Group, LLC
    Senior Residential Appraiser
    B.A., Land Economics, University of North Florida

M. Dwight DuRant, P.E.

President

As President of Zev Cohen & Associates, Inc. (ZCA), Dwight has acquired a diverse background in site development experience with a sound working knowledge of engineering and design analysis. Dwight began his professional experience in 1983 and has worked continuously on engineering and design projects since that time. The majority of his career, 36 years, has been spent in Ormond Beach. Dwight serves both private and public clients throughout the Southeast. His ability to combine engineering design and diligent project management leads to projects under budget completed on time.
Dwight prides himself on providing personal, hands-on services to a wide variety of clients. This type of client service has become the foundation of ZCA's philosophy. Under Dwight's leadership, ZCA has become of the largest civil engineering firms in the area.

Project Experience

Daytona International Speedway Master Stormwater Plan, Daytona Beach, Florida

- Role: Principal-In-Charge
- Scope: The Daytona International Speedway consists of approximately 227 acres for which ZCA provide a Master Stormwater design and permit.

City of Fernandina Beach Community Redevelopment Area (CRA) Master Stormwater Plan, Fernandina Beach, Florida

- Role: Quality Assurance/Quality Control
- Scope: ZCA developed a Master Plan with phasing, cost estimates, and schedules for the CRA which included a Master Stormwater Plan designed for the rerouting of stormwater pipes currently directly discharging untreated runoff. The St. Johns River Water Management District (SJRWMD) worked with ZCA and the City to develop stormwater mitigation credits for use across the CRA area, allowing development within the CRA to move forward with certainty. The City can sell the credits to property owners of CRA sites at a lower rate than what construction costs would be, and without the risk and uncertainty that would come with permitting an individual site. Funds received from the sale of the credits will be used to pay off the pond improvement costs and make other CRA stormwater improvements.

West Ormond Beach Community Center, Ormond Beach, Florida

- Role: Principal-In-Charge
- Scope: ZCA was selected by the City of Ormond Beach Engineering and Leisure Services Department to further develop the Volusia County School Board (VCSB) site adjacent to and west of Pathways Elementary School to act as a joint use facility for the VCSB and provide a Community Center for west Ormond Beach.

Cypress Landings, West Melbourne, Florida

- Role: Principal-In-Charge
- Scope: Environmental investigation and permitting; design and permitting of stormwater treatment facilities, stormwater conveyance system, water, sewer, roadway, and lot grading. Cypress Landings was designed as a 141-lot single-family residential subdivision within the City of West Melbourne. Project is located within the Melbourne-Tillman Water Control District and required stormwater permitting from both it and St. Johns River Water Management District (SJRWMD).

Ormond Beach Water Main Replacement Project, Ormond Beach, Florida

- Role: Principal-In-Charge
- Scope: The 2-inch Water Main Replacement Project consisted of approximately 23,000 linear feet of main replacement upgraded the City distribution system to current City standards. Approximately 25% of the replacement line was installed by horizontal directional drilling while the remainder was installed through open pavement cut procedure. ZCA had to obtain nine (9) different Health Department Permits in order to handle to various locations and system connection points. A strong focus was placed upon site restoration following installation so the City was able to maintain their neighborhood friendly approach to construction.

Venetian Bay Master Stormwater Plan, New Smyrna Beach, Florida

- Role: Principal-In-Charge
- Scope: Master Planning, stormwater design, rezoning, site design, landscape architectural services, and permitting for 1,200-acre 1,829-unit mixed-use site which was designed in accordance with the principles of "New Urbanism". A Town Center has been designed to support many of the residents' needs which minimizes their reliance on automobiles and further strengthens the culture of this planned community.

City of Ormond Beach Downtown Master Stormwater Plan, Ormond Beach, Florida

- Role: Principal-In-Charge
- Scope: Provide the City of Ormond Beach with an evaluation of stormwater needs and implement a program of offline retention that will support intensive redevelopment of existing and future development sites within the city's Downtown Community. Services will include survey, property acquisition consulting, legal, geotechnical engineering, design, and stormwater permitting through the Community Redevelopment Agency (CRA) and St. Johns River Water Management District (SJRWMD).

Andy Romano Beachfront Park, Ormond Beach, Florida

- Role: Principle-In-Charge/Quality Control Manager
- Scope: ZCA was selected by the City of Ormond Beach to design a five-acre beachfront park. The park amenities include pavilions, picnic areas, seating, covered playground, splash park, dune restoration and native landscaping, ADA beach access, restroom and vending facilities, beachfront parking, and viewing terraces. ZCA also worked closely with the City to provide a public outreach and a community engagement plan which allowed members of the community to play a role in developing the park that would leave a lasting impression for visitors of all ages.

Hand Avenue Lake Interconnect Walkway, Ormond Beach, Florida

- Role: Principle-In-Charge/Quality Control Manager
- Scope: ZCA provided civil engineering and landscape architecture services to upgrade the Hand Avenue corridor stormwater management system. This system also included a complex lake inter-connect for flood control. This lake inter-connect will also be developed for use by canoe/kayak enthusiasts who wish to traverse the various lake systems adjacent to Hand Avenue. ZCA also assisted in expanding the existing boardwalk system which will provide clearance for kayakers and still be ADA accessible.

Vining Court Streetscape, Ormond Beach, Florida

- Role: Principal-In-Charge
- Scope: The beachfront streetscape design of the Vining Court Downtown Business District for the City of Ormond Beach. The streetscape design includes landscape beautification, sidewalks, lighting, signage, and street parking. This project is located within the City of Ormond Beach's Community Redevelopment Area (CRA) and will be funded with the use of Tax Increment Funds (TIF). ZCA has already conducted a neighborhood meeting where the Conceptual Streetscape Plans were discussed and comments from the local residents will be incorporated in the final construction documents.

Treasurer of Big, Big World Project, Inc.

Years of Experience:
35

Years with ZCA:
12

Mark has 35 years of professional experience as a planner for public agencies and private consultants. He has experience in land development regulation, entitlement coordination, comprehensive planning, zoning, community development, redevelopment, affordable housing, grant administration, capital improvement planning, budgeting, and business process improvement. He worked with Zev Cohen & Associates, Inc. (ZCA) from 2005 to 2008 as our Planning Manager and rejoined ZCA in September of 2016 as our Director of Planning and Landscape Architecture.

Project Experience

One Daytona, Daytona Beach, Florida

- Role: Project Planner
- Scope: ZCA worked with the International Speedway Corporation to develop a plan for the redevelopment of a 1960's era business/industrial park into a mixed-use development across from Daytona International Speedway which includes a 200,000 SF retail/dining/entertainment space, 2,500-seat multi-screen movie theater, residential component, and a 160-room hotel. The redevelopment project included a Comprehensive Plan Amendment, a Comprehensive Signage Plan, and rezoning. Our staff worked with the Owner and their attorney to orchestrate the complicated local and state land use and zoning entitlement process.

Comprehensive Plan, City of Lago, Florida

- Role: Project Manager
- Scope: Mark served as the primary author on the City's Housing, Natural Resource, and Intergovernmental Coordination elements. The completion of the project included an extensive civic engagement effort involving the general public, interest groups, advisory boards, and elected officials.

Comprehensive Plan, City of Edgewater, Florida

- Role: Project Manager
- Scope: Mark served as the Project Manager for a complete re-write of the City's Comprehensive Plan. Mark coordinated the efforts of City staff and multiple consultants to meet statutory requirements and develop consensus for the long-range vision of the City.

Oceanfront Development Standards, City of Daytona Beach, Florida

- Role: Project Manager
- Scope: Mark served as the Project Manager and primary author on a major land development code revision to the City's Oceanfront Development Standards. The goal of these revisions were to allow taller, thinner buildings while providing more landscaping, public access, and less shadowing of the beach. This project included an extensive civic engagement effort involving the general public, neighborhood groups, advisory boards, and elected officials.

Noise Ordinance, City of Daytona Beach, Florida

- Role: Project Manager
- Scope: Mark served as the Project Manager and primary author on a complete re-write of the City's Noise Ordinance. The City's Police Department had been issuing citations based on a "reasonable person" standard contained in the old Ordinance. The revised Ordinance established objective standards based on metered ambient noise levels. Mark led an extensive civic engagement effort that included the general public, neighborhood associations, individual business owners, merchant associations, the school board, major land owners, advisory boards and elected officials.

Process Improvement, Hillsborough County Building and Construction Services Division, Florida

- Role: Project Manager
- Scope: Mark served as the Project Manager on a review of each of the Division's major functions, including application intake, plans review, permit issuance, inspections and contractor licensing. The project resulted in recommendations for improved customer service, process maps and new standard operating procedures for each function.

Washington Catlett School Redevelopment, Wilmington, North Carolina

- Role: Project Manager
- Scope: Mark served as the Project Manager on the adaptive reuse of a historic school building originally built in 1914 with additions in the 1920's, 1930's and the 1950's. After its closure as a school, the building sat empty for twenty years. Mark oversaw the redevelopment of the historic structure into a transitional housing facility for homeless veterans.

Planner of Record, Town of Pierson, Florida

- Role: Town Planner as ZCA Consultant
- Scope: ZCA provides a full range of professional and administrative planning services to the Town of Pierson on a continuing basis. ZCA serves as the Town's "Planner of Record" advising elected officials, volunteer boards, and staff in strategic planning, comprehensive planning, visioning, and land development code administration. ZCA develops ordinances, meets with applicants, reviews applications, develops special studies, writes grant applications, and performs on-call services.

Halifax Harbor Redevelopment, Daytona Beach, Florida

- Role: Project Manager
- Scope: ZCA created a master plan for the redevelopment of Daytona Beach's Halifax Harbor Marina featuring a small commercial and civic town center. As part of this master planning effort, ZCA created 2 concept plan and streetscapes with each with separate forms and functions for this waterfront anchored project.

City Island Redevelopment Plan, Daytona Beach, Florida

- Role: Project Manager
- Scope: ZCA created a master plan for the redevelopment of Daytona Beach's City Island centered on the historic Jackie Robinson baseball stadium. The plan linked the City Island riverfront to the adjacent downtown through a walkable, pedestrian friendly design.

Mark P. Karet, AICP

(813) 727-0040 **mkaret@zevcohen.com**

Summary

Mr. Karet has more than 35 years of professional experience as a planner finboth the public agencies and private sectors. He has expertise in land development regulation, entitlement coordination, comprehensive planning, zoning, community development, redevelopment, affordable housing, grant administration, capital improvement planning, budgeting, and business process improvement.

Professional Experience

Director of Planning & Landscape Architecture, Zev Cohen & Associates Ormond Beach, Florida 2016 to Present

Zev Cohen and Associates is an established multi-disciplinary civil engineering, environmental, planning, and design firm based in Ormond Beach with a long-standing reputation for quality and performance throughout Central Florida.

- Leads Zev Cohen and Associates' planning and landscape architecture service areas.
- Responsible for the for the day-to-day operations of the planning and landscape architecture practices including business development, maintaining client contacts on all aspects of projects, growing and sustaining operations and quality control/quality assurance efforts.
- Provide planning, urban design, community engagement and project oversight for both public and private-sector clients

Director of Administrative Services, Development Services Hillsborough County, Florida 2008 to 2016

Hillsborough County is the fourth most populous county in Florida with a population of 1.3 million people. I managed administrative support groups within the Planning & Growth Management and Fiscal & Support Services Departments.

- Coordinate development services process improvement activities.
- Managed project controls, scheduling, and accounts payable for a $1 billion capital improvement program.
- Managed budget preparation and human resources for a department with $25 million in expenditures and 334 FTE's.
- Assisted client departments in successfully navigating the process of identifying, acquiring, implementing & maintaining appropriate business solutions to support their core functions.

- Managed large-scale software implementation projects including electronic plan review and agenda automation software.
- During the economic downturn, I worked with a department head and managers to identify cuts and reduced expenditures by 40% in a large fee-supported workgroup.

Planning Manager, Zev Cohen & Associates, Ormond Beach, Florida 2005 to 2008

Served as Zev Cohens & Associates' Planning Manager serving both public and private-sector clients.

- Coordinated the approval process for up to 25 separate projects at a time seeking approvals for commercial and residential developers. The projects ranged in size from single occupancy commercial buildings to large-scale mixed-use planned developments.
- Served as project manager on public sector park projects, streetscape corridors, and comprehensive plan amendments. Coordinated manpower, expenses and client satisfaction on all projects.
- Made presentations to elected officials, advisory boards, and citizen groups.
- Coordinated the development and submission of RFP responses, project budgets, and schedules.

Planning Manager, City of Daytona Beach, Florida 2000 to 2005

Daytona Beach has a year-round population of more than 60,000 people. Special events, based on the racing schedule at the Daytona International Speedway, swell the population by more than 10x that number several times a year. The City has 5 separate redevelopment districts.

- Coordinated the Development Services Department's land development review process. I significantly reduced staff development review time frames.
- Served as the primary point of contact for developers, contractors, design professionals and the general public regarding all aspects of the land development process.
- Chaired the City's Development Review Committee.
- Administered the City's land development code, zoning code, and urban design standards.
- Served as the City's primary liaison to the City's Planning and Zoning Board.
- Presented all Planning and Zoning Board recommendations to the City Commission.
- Served as Interim Director of the Development Services Department. At the time, the department had 35 FTE's and a budget of $3 million.

Community Development Manager City of Wilmington, North Carolina 1998 to 2000

Wilmington is a port city with a diversified economy and a population of 112,000. Incorporated in 1739, it has a long history of municipal administration. The City is a racially diverse community with significant numbers of residents living at or below the poverty level. The Community Development Manager was a high-profile position in Wilmington. Six hurricanes impacted Wilmington during my tenure, including the highly damaging Hurricane Floyd. I coordinated the damage assessments teams for each of those events.

- Managed the City's neighborhood planning, code enforcement, and housing programs.
- Administered the City's Community Development Block Grant and HOME Investment Partnership programs. I quickly improved the expenditure performance of both programs.
- Administered the City's economic development revolving loan fund for small businesses.

- Served as the Executive Director of Wilmington Housing, Finance and Development Corporation, a non-profit developer of affordable single-family homes and transitional housing for the homeless. I stabilized agency finances and completed development of a stalled project for a 24-bed transitional housing facility for homeless veterans.

Director of Community Development, City of Edgewater, Florida 1989 to 1997

Edgewater located in Volusia County, near Daytona Beach, has a population of 20,000 people. At the time I worked in the City, it experienced a great deal of political turmoil after the successful creation of a special assessment district that brought sewer lines to 7,200 lots.

- Responsible for the City's comprehensive planning, zoning, code enforcement, building and risk management/safety programs.
- Served as liaison to elected officials, developers, contractors, design professionals and the public regarding all aspects of the land development process.
- Organized the City's separate Planning and Zoning and Building departments into a consolidated Community Development Department.
- Frequently served as acting City Manager.
- Served as the manager's representative in negotiations with the general, police and fire employee's unions.
- Served as project manager on the construction of a detective's office and police evidence building.

EDUCATION

University of Florida **Master of Arts in Urban and Regional Planning**

Held an internship with Florida Department of Commerce creating a regional economic development organization for Glades and Okeechobee Counties.

The George Washington University **Bachelor of Arts, Public Affairs Major**

Held an internship with the Smithsonian Institution's Woodrow Wilson Center for International Scholars performing research for visiting scholars.

Kristopher, a University of Central Florida graduate, is an essential member of the Zev Cohen & Associates, Inc. (ZCA) team. With his engineering knowledge and multi-tasking abilities, Kristopher successfully handles a multitude of projects and tasks. His familiarity with site design and utility and stormwater management is conducive to a variety of projects. The level of involvement exemplified in Kristopher's work allows him to develop trusting client relationships and ensures projects are completed efficiently and on time. His strong understanding of the planning, design, and permitting process, in addition to his effective project coordination skills, allows Kristopher to produce high quality work while maintaining tight schedules and keeping up with demands.

Project Experience

Division of Blind Services Improvements and Renovations, Daytona Beach, Florida

- Role: Project Manager
- Scope: ZCA designed and permitted the 25-acre complex including a library annex, central energy plant, low-rise dormitory, dining facility, technical training building, and other miscellaneous improvements. Developed within the master stormwater system of the Blind Services Complex, ZCA met the unique demands of both a visually impaired owner and ultimate end user of the facility. This required a very "hands-on" approach and the team applied solid design philosophy while providing the ability to maintain day-to-day operations of the facility without interruption. The success of this project has led to additional Blind Services' projects by ZCA.

New Britain Avenue Stormwater Design, Ormond Beach, Florida

- Role: Staff Engineer
- Scope: Design of a Master Stormwater System (underground extraction) to treat and attenuate the stormwater run-off from several residential and commercial lots along New Britain Avenue between North Ridgewood Avenue and North Beach Street in order to promote future re-development along this corridor of roadway. This is the first Master Stormwater design to impact the City of Ormond Beach Downtown Master Stormwater Drainage program.

Ormond Beach Master Stormwater Management Plan, Ormond Beach, Florida

- Role: Staff Engineer
- Scope: The project consisted of preparing a Master Drainage Plan for the Community Redevelopment Agency Districts which provided a blueprint for future redevelopment within the Community Redevelopment Agency. ZCA has established the often unknown stormwater component of development opportunities so they can be identified and properly programmed to facilitate long-term growth and sustainability for the City. ZCA was also responsible for obtaining a Conceptual Stormwater Permit from the St. Johns River Water Management District (SJRWMD). Finally, in addition to the Master Plan and stormwater permitting, ZCA provided the City of Ormond Beach a "User's Manual" to be used by the City and developers in the design of future redevelopment sites within the Community Redevelopment area. The Community Redevelopment area boundaries encompass approximately 238 acres of land including a core Downtown for the City.

Derbyshire Park Master Plan and Implementation, Daytona Beach, Florida

- Role: Project Engineer
- Scope: Derbyshire Park is a public park and sports facility located in Daytona Beach, Florida. Through ZCA's continuing service contract with the City of Daytona Beach, we provided Master Engineering Plan design for the "full build-out" of the park. ZCA's design included master conceptual design for stormwater, utilities, parking, grading and access. ZCA designed a FDOT Grant Funded, 2,617 LF, of a 14' wide multi-use trail. The trail will provide interconnection between the park's amenities and neighborhood sidewalks. The proposed design also included lighting, decorative pavement, landscape design, bike-friendly amenities and stormwater to meet FDOT's LAP funding requirements. The design is currently at a 100% design level. Additionally, the City of Daytona Beach engaged Zev Cohen and Associates to design a FDOT grant funded 10,197 LF of 6' sidewalk within the Derbyshire Neighborhood area. The City of Daytona Beach has engaged ZCA to design a multi-purpose sports field as part of the Master Plan implementation program. The City has requested ZCA provide cost estimating for the Master Plan build out so they can plan their funding accordingly.

Coastal Woods, New Smyrna Beach, Florida

- Role: Staff Engineer
- Scope: Site development and overall master planning; comprehensive planning and annexation application; rezoning application submittals; single family/mixed-use development standards; environmental trail system/Volusia County trail system.

Brown & Brown Headquarters Building, Daytona Beach, Florida

- Role: Project Manager
- Scope: ZCA provided site design for civil and landscape components for the $40M Brown & Brown Headquarters. The redevelopment is especially rewarding as it is an urban revitalization project which is also providing brownfield remediation of a contaminated site. In addition, the project is partially funded through a public/private partnership with the City of Daytona Beach.

Halifax Medical Center Campus, Deltona, Florida

- Role: Project Engineer
- Scope: ZCA assisted with the master planning of the 31-acre hospital site that was built in 3 phases. In addition, ZCA provided civil engineering, environmental, bidding and construction, and landscape architectural services.

Daytona Beach Riverfront Esplanade, Daytona Beach, Florida

- Role: Project Manager
- Scope: ZCA provided civil engineering, landscape architectural, and environmental services to develop the design of the Daytona Beach Riverfront Park known as the Esplanade. The Esplanade Park is a 1-mile linear park. This project consists of a revitalized downtown park that will draw residents and visitors to the area. The park project will create open, pedestrian friendly pathways that will encourage visitors of the park to enjoy opportunities such as jogging, picnicking, and viewing some of the City's history, all in the same place.

Woodhaven Master Utility Plan, Port Orange, Florida

- Role: Project Engineer
- Scope: Woodhaven is a 1,500-acre commercial and residential mixed-use project located in Port Orange, Florida. The maximum uses include up to 650,000 square feet of commercial area and 1,300 residential units (single family, townhome and apartment units). Zev Cohen & Associates, Inc. (ZCA) worked with the City and property owner to successfully navigate and negotiate the comprehensive plan change and rezoning of the property to meet the needs of the City and Owner. The planning effort required close collaboration with the Client's attorneys and careful consideration of numerous design elements including environmental impacts, adjacent neighborhoods, development intensities and proper utility planning. ZCA provided master utility planning and design calculations in order to demonstrate available capacities within the existing infrastructure. In addition, the transmission and distribution systems were sized in order to accommodate phasing alternatives with efficient design while meeting life safety and Department of Environmental Protection (DEP) criteria. The scope of the utility planning included multiple sewer lift stations, force mains, gravity sewer mains, potable water mains and reclaimed water main

Trained as a Landscape Architect with a professional background in history and planning, Jake brings unique perspective and pragmatic solutions to complex projects. He is a cross-disciplinary designer who creates strong collaborations by translating between project constituencies. His expertise is in organically-integrated urban landscapes. To create constructed habitats and social spaces in these contexts, Jake employs an opportunistic and resourceful design approach. Throughout his career, he has strived to leverage a connection between the broad idea of site, history, geography and the interaction between people and place.

Project Experience

State Road 600 Daytona Median Landscape Improvement Project, Daytona Beach, Florida
- Role: Landscape Designer
- Scope: Landscape and irrigation design, construction administration and coordination with the Florida Department of Transportation (FDOT) and the City of Daytona Beach.

Florida Hospital Injector at Daytona International Speedway, Daytona Beach, Florida
- Role: Landscape Designer
- Scope: Created a dynamic entry feature which emphasizes the spirit and character of Florida Hospital.

Riverwalk Condominiums, New Smyrna Beach, Florida
- Role: Landscape Designer
- Scope: Directed the expansion of an existing landscape to accommodate the further development of a large apartment complex in the heart of New Smyrna Beach.

Kings Landing, Port Orange, Florida
- Role: Landscape Designer
- Scope: Worked on the development and layout of a residential development that attempted to preserve ecologically sensitive resources while accommodating connection with neighboring developments and social institutions.

Daytona Rising and Grandstand Redevelopment, Daytona Beach, Florida
- Role: Landscape Designer
- Scope: This exciting project consisted of the entire reconstruction of the Frontstretch Grandstands which included all facility components from the seating bowl and gates to the civil and landscape elements in front of the facility. ZCA was responsible for the design and permitting of all the civil, landscape, and hardscape improvements as well as the master stormwater design and permitting. Permits obtained for the project include approvals from the following agencies: Volusia County, City of Daytona Beach, St. John's River Water Management (SJRWMD), Army Corps of Engineers (ACOE), Florida Department of Transportation (FDOT), and the Florida Department of Environmental Protection (FDEP).

One Daytona and International Speedway Corp. (ISC)/NASCAR Office Tower, Daytona Beach, Florida
- Role: Landscape Designer
- Scope: One Daytona is designed as a mixed-use development across from Daytona International Speedway including 200,000 SF retail/dining/entertainment space, 2,500-seat multi-screen movie theater, residential component and 160-room hotel. ZCA provided landscape, hardscape, and irrigation design services.

Brown & Brown Headquarters Building, Daytona Beach, Florida
- Role: Landscape Architect
- Scope: ZCA provided site design for all civil and landscape components for the $40 million Brown & Brown Headquarters. The redevelopment is especially rewarding as it is an urban revitalization project which also provides brownfield remediation of a contaminated site. In addition, the project was partially funded through a public/private partnership with the City of Daytona Beach.

The Center at Deltona, Deltona, Florida

- Role: Landscape Architect
- Scope: ZCA provided civil engineering and landscape architectural design services for the new ±25,000 SF Community Center building and parking expansion. ZCA's tasks included stormwater, water, sewer, pacing, grading, landscape architectural design, and all site permitting. ZCA also worked with the Architect and the City to Master Plan the site for future expansion.

Mosaic, Daytona Beach, Florida

- Role: Landscape Designer
- Scope: ZCA was selected by ICI Homes, Inc. as the Prime Consultant to design the 604-acre community that utilized cluster development and low impact development principles to preserve and add value through environmental preservation to the community. ZCA's driving factor in the design was creating a matrix through which the community could develop through passive and active recreating by encouraging chance encounters and a diverse series of interactions between a diverse set of residences. This was done by developing a system of smaller parks that support smaller communities at the street level and then connecting these parks through a walkable community to an active community. Pedestrian connections were encouraged to Champion Elementary School, allowing the landscape to que the important connections.

Vadner Park, Ormond Beach, Florida

- Role: Landscape Architect
- Scope: Through a public-private partnership between the Garden Club of the Halifax Country and the City of Ormond Beach, Vadner Park was transformed into the City's first all-native plant park. The park project garnered a Founders Fund award from the Garden Club of America. ZCA partnered with the City of Ormond Beach to provide landscape architectural design as well as irrigation and hardscape design.

New Smyrna Beach Riverwalk, New Smyrna Beach, Florida

- Role: Landscape Architect
- Scope: ZCA provided civil engineering and landscape architectural design services for an infill redevelopment project that took a former grocery store site and transformed it into a multi-family development with a marina and a public trail network.

LTG Engineering & Planning

R. Sans Lassiter, PE
President

RELEVANT EXPERIENCE

R. Sans Lassiter, PE is president of LTG, Inc., offering transportation engineering, urban planning and design services. He is active in civic affairs, having chaired the Volusia & Flagler County Association for Responsible Development. He has held leadership positions with the Daytona Beach Partnership, International Speedway Boulevard Coalition, and the Central Florida Regional Coordinating Council. Mr. Lassiter sees economic development as critically important. He currently chairs the Team Volusia Investor Relations Committee.

Project Director for Continuing Service Contracts (CSC) for providing transportation planning and traffic operations/design services: Currently, LTG has over 30 continuing service contracts with various city, county, state, and specialty agencies. Mr. Lassiter serves as Principle-in-Charge of these contracts. Many of them are repeat contracts earned by consistently meeting schedules and budgets while providing quality work. Our knowledge of transportation design, planning and traffic operations are proven strengths and, in combination with our municipal contract work, our in-house public-sector experience, allows LTG to act as an extension of Department staff. This position proves advantageous to our clients by providing the added-value of having staff with an integral knowledge of the operation of the public sector, saving our clients time and money. Some project relevant CSC's are:

- City of Deltona (On-Call Transportation)
- Volusia County Planning Department
- Volusia County Traffic Engineering Dept.
- Volusia County School District
- City of Daytona Beach
- Daytona Beach Planning Department
- FDOT District 5 - TSM&O Districtwide
- City of New Smyrna Beach
- City of South Daytona
- City of DeLand
- City of Palm Coast
- St Johns County

Project Manager, Volusia County Schools Continuing Services Contract, Traffic Impact Studies: Mr. Lassiter managed the continuing services agreement to provide traffic impact studies for Volusia County Schools. The following is a listing of studies performed under this continuing services contract:

- Elementary School "W" Traffic Impact Study
- High School "DDD" - Traffic Impact Study
- Middle School "GG" Left Turn Analysis
- Elementary School "V" - Traffic Impact Study
- Daytona Beach Bus Facility Relocation - Traffic Impact Study
- Daytona Beach Transportation Facility at Airport - Traffic Impact Study
- Orange City Educational Complex - Traffic Impact Study
- Edgewater Elementary School - Traffic Impact Study
- Elementary School "D" - Traffic Impact Study

Transportation Network Conceptual Design for the Viera DRI, Brevard County: Mr. Lassiter led the original transportation system planning efforts for a New Town transportation network planned for an eventual four-interchange development program in central Brevard County. To-date, the development accesses three of the four interchanges and the overpass for the fourth is built with the future interchange ramps yet-to-be constructed. The project included the eventual extension of the Pineda Causeway to I-95 as one of the four interchanges. This roadway has since been constructed, as well.

Designation of the Functional Classification for the Arterial and Collector Road Network, Brevard County: Served as the project manager for the initial designation of arterials and collectors, as required by state statues.

OVERVIEW

Mr. Lassiter brings over 45 years of professional transportation planning and engineering experience ranging from urban area and corridor studies, comprehensive plan amendments, development of regional impact studies and transportation modeling to roadway design, ITS design and signal systems design. Mr. Lassiter is a registered Professional Engineer in the State of Florida whose technical capabilities include the knowledge of and experience using several software programs such as FSUTMS, GELS, CALA, HCS, SYNCHRO, SIDRAA, TRANSYT-7F and PASSER II. He is President of LTG, Inc. and is ultimately responsible for all of the firm's efforts.

RELEVANT EXPERIENCE CONTINUED

Project Manager, Bicycle and Pedestrian School Safety Review Studies, Volusia County: Mr. Lassiter currently manages a continuing services agreement through the Volusia County Metropolitan Planning Organization and the Volusia County School Board to provide safety studies for approximately 17 middle and elementary schools throughout Volusia County. Studies include multiple site visits for data collection and photo documentation, review of crash histories, assessment of existing conditions including sidewalks, pavement, parcel data, school zone boundaries, walker and bicyclist counts, etc., review of each school's current traffic safety program, and providing recommendations and a feasibility analysis for each school studied.

Project Manager, Emergency Redesign of 67 Mast arm Traffic Signals Following Hurricane Andrew, FDOT, District 6, Homestead, Florida: Set up and managed an expedited design process that completed 67 mast arm traffic signal redesigns in 90 days. Involved designating multiple design and field teams, and setting strict design guidelines and schedules that produced high quality plans ahead of the submittal deadlines.

Districtwide Miscellaneous Design, FDOT District 2: Mr. Lassiter provided project management for developing construction plans for several minor design projects as part of two back-to-back design contracts with District 2 as identified below:

- SR 24 School Zone Flasher, Alachua County – Developed mastarm flashing signal/advanced school crossing installations on this divided highway in Waldo.
- SR 5 (US 1) Left-Turn Lane Addition, Duval County – Designed a left-turn lane in the median of this divided four-lane highway to serve access to an elementary school.
- I-95/SR 5 (US 1) Interchange Ramp Improvement, St. Johns County – Realigned an existing exit ramp to reduce crashes. Included the addition of a left-turn storage lane in the median of US 1 to provide safer turning refuge.
- SR 111/Pearl Street Mastarm Traffic Signal Replacement, Duval County – Developed a mastarm traffic signal design for this complex, five-way intersection in an historic residential district.
- SR 221/CR 14 Flashing Signal Design, Taylor County – Developed a replacement design for a flashing signal in this rural location north of Perry.
- SR 15 (US 17)/Stiles Avenue Mastarm Traffic Signal Replacement, Clay County – Developed a mastarm traffic signal design for this aging spanwire installation in Orange Park.
- SR 10 (Atlantic Avenue) Mastarm Replacement and Interconnect Design, Duval County – Prepared six mastarm replacement designs for concrete pole/spanwire installation and designed 1.25 miles of traffic signal system interconnect cable in Jacksonville.
- SR 224 (Kingsley Avenue)/Plainfield Avenue, Clay County – Developed a mastarm traffic signal design for this aging spanwire installation in Orange Park.
- SR 24 (Waldo Road)/NE 8th Avenue Mastarm Traffic Signal Replacement, Alachua County – Developed a mastarm traffic signal design for this aging spanwire installation in Gainesville.

Districtwide Miscellaneous Design Contracts, FDOT District 5 – Mr. Lassiter was awarded two back to back districtwide design contracts with District 5 and provided project management for developing construction plans for several design projects as identified below:

- SR 3 Milling and Resurfacing, Brevard County – Prepared design plans for six miles of rural resurfacing for this major access route to the Kennedy Space Center. Worked closely with the SJRWMD to avoid extensive permitting.
- SR 40 Sidewalk, Volusia County – Developed design plans for this important missing link of sidewalk in the City of Ormond Beach.
- SR 5 (US 1)/Harrison Street Mastarm Traffic Signal Upgrade, Brevard County – Developed a mastarm replacement design which
- required a driven-pile/cap foundation due to utility conflicts.
- SR A1A Revetment Replacement, Flagler County – Worked closely with District staff to develop a replacement revetment that would better withstand erosion due to storm surges on the Atlantic Ocean in Flagler Beach. Resulted in replacing coquina rocks with granite embedded over filter fabric.
- SR 40/SR A1A Monotube Traffic Signal Design, Volusia County – Developed a unique traffic signal design for this skewed intersection located on a curve of SR A1A in Ormond Beach. Monotube design was coordinated with the Central Office's Structural Design Consultant.
- SR 464 Mill and Resurface, Marion County – Prepared resurfacing plans, including access management, drainage improvements and detour plans for this part rural/part urban facility in Ocala.

DONALD JOHN SPENCE, PH.D.

P.O. Box 2905, Ormond Beach, FL 32175
donaldjspence@gmail.com ~ 386-235-0404

EDUCATION

- Ph.D. University of Florida, Gainesville, FL., Plant Pathology
- M.S. University of Central Florida, Orlando, FL., Biology
- B.S. Stetson University, DeLand, FL., Biology

EMPLOYMENT

1996 – Present, Owner of Native Florida Landscapes, LLC. Environmental Consulting specializing in tree care.
2021 – Present, Adjunct Graduate Faculty, College of Arts and Sciences. Florida Gulf Coast University, Fort Myers, FL.
2021 – 2023, Landscape Designer/Tree Consultant, Ayres & Associates, Tampa, FL.
2016 – 2021, Assistant Professor, Bethune-Cookman University, Daytona Beach, FL.
2020 – 2021, Adjunct Professor of Horticulture, Valencia College, Orlando, FL.
2013 – 2016, AP Biology/IB Science Teacher, Spruce Creek High School, Port Orange, FL
2007 – 2009, Stetson University – Adjunct Professor of Biology
2001 – 2009, Daytona State College – Adjunct Professor of Biology
2001 – 2009, Dredging and Marine Consultants – Senior Scientist. Development of environmental resource permits for activities associated with inland and coastal wetland dredging activities, including wildlife and vegetation surveys, both upland and submerged.
1999 – 2001, Science Teacher, Ormond Beach Middle School, Ormond Beach, FL.
1999 – 2001, BCI Engineers and Scientists, Daytona Beach, FL – Senior Scientist. Development of environmental resource permits for activities associated with inland and coastal wetland dredging activities, which included wildlife and vegetation surveys, both upland and submerged.
1997 – 1998, Bowyer Singleton and Associates – Field Biologist. Development of environmental permits for land use changes associated with upland development activities, including wildlife and vegetation surveys, and wetland delineation.
1995 –1996, Volusia County Beach Department, Coastal Dune Plant Nursery – Manager.
A One-year grant funded position to establish and plant nursery that would be the staging ground for coastal restoration. Managed one to three volunteers and developed a coastal dune plant manual that outlined the techniques required to grow the major species.
1994 –1995, The Nature Conservancy – Ecological Restoration Intern
Primary responsibilities included managing and maintaining the native plant nursery, collecting data from long-term study plots, horticulture instruction for community education.
1992 –1994, Daytona Beach Community College, Southeast Museum of Photography – Senior Preparator. Responsible for overseeing the installation of photographic and multimedia exhibits. As senior staff, duties included managing and directing volunteers through various tasks for the installation and removal of exhibitions from the gallery.

1982 – 1989, U.S. Coast Guard – Enlisted, final rank E-5, Second Class
Storekeeper. Responsible for overseeing junior service members. Primary duties included budget management, stores and supply procurement, and post master for the station where I last served.

AWARDS

2019 – Bethune-Cookman University Faculty Award for Research and Scholarly Activity.
2013 – Spruce Creek High School, Unique Teaching Technique Award
2011 – Southwide Forest Disease Workshop – Outstanding Student Presentation
2006 – Florida Native Plant Society Silver Palmetto Award
2000 – December Teacher of the Month, Ormond Beach Middle School
1993/94 – Scholarship winner, New Smyrna Beach Business and Professional Women's Club
1993/94 - Vaughn-Jordan Scholarship Winner, Stetson University
1993/94 – Mortar Board National Honors and Leadership Society, Treasurer
1994 – Beta Beta Beta, National Biology Honors Society, Historian
1994 – Stetson Biology Department Service Award
1994 – Outstanding Undergraduate Biological Science Presentation. Florida Academy of Science Meeting, Tallahassee, FL.
1992 – Who's Who Among American Junior Colleges
1992 – Daytona Beach Community College Hall of Fame

MILITARY EXPERIENCE

11/8/82-10/19/89. United States Coast Guard. Final rank of E-5, Storekeeper Second Class. Job titles held: Contracting Officer, Transportation Officer, Budget Coordinator, Imprest Fund Cashier, Postal Officer, Commercial and Military Purchasing Agent, Senior Watch Officer, Petty Officer of the Watch, Law Enforcement Boat Coxswain. Auxiliary duties: Firefighter, Damage control team, helicopter landing party, shipboard photographer, law enforcement boat crewman. Stations served at: Training Center, Cape May, NJ; USCGC Steadfast WMEC 623, St. Petersburg, FL; Training Center Petaluma, Petaluma, CA; USCGC POLAR SEA WAGB 11, Seattle, WA; Loran C Station L'Estartit, Spain, Sta. Mayport, FL.

United States Coast Guard Honors:
Honorable Discharge, twice received Unit Commendation with "O" (operations) device, Meritorious Unit Commendation, Sea Service Ribbon, Antarctic Service Medal, Arctic Service Medal, Navy Unit Commendation, Navy Arctic Service Medal, Rife and .45 Pistol Marksman, Cutterman's Pin, USCG European Theater Outstanding Operations Award.

Name Jeffrey A. Flairty, P.E.

Title President

Education

University of Central Florida
Orlando, Florida
B.S. in Environmental Engineering

Accreditations

Professional Engineer:
Delaware (2012)
Florida (2013)

Professional & Civic Activities

Former Member, ASTM E50 Committee on Environmental Assessments

Former President, Florida Water Environment Association, UCF Chapter

Former Board Member, Florida Env. Assessors Association

Former Member, American Society of Civil Engineers

Former Member, National Association of Env. Professionals

Areas of Expertise

Mr. Flairty is responsible for overseeing the business development, client management, staff education and project management of corporate environmental risk assessment services provided to private and public sector clients. Specific responsibilities include: technical and operational management of risk assessment services (Phase I/II ESAs), staff development and retention, site assessment and remediation (IRA/CAP/CAR/RBCA/RI/FS), environmental regulatory compliance assessments, environmental permitting (CWA, CAA, RCRA, CERCLA, SPCC and NPDES), as well as environmental safety & health program evaluations.

Project Experience

Airgas, Inc. - Currently manages environmental risk management services for corporate nationwide acquisition and real property management program. Provided environmental due diligence services for more than 508 property and corporate acquisitions during the past ten years. Services ranged from Phase I and II ESAs, soil and groundwater contamination assessments, emergency spill responses, source removal actions, regulatory permit compliance and permit negotiations. Assisted Airgas in the development and implementation of a corporate-wide environmental management system.

Plantation Preserve & Golf Club - This is a 213-acre project which involves the City's acquisition of the former Plantation Golf Club and the subsequent design of an Audubon-certified par 72 championship golf course incorporating a linear trail recreational component within the center of the proposed golf course. Services Mr. Flairty managed included: overall project management services as well as site master planning, wetland mitigation design and environmental permitting, surveying, landscape architecture, engineering services, stormwater management, flora and fauna evaluation, archaeological coordination, and construction services.

Boca Resorts, Inc. Environmental Due Diligence - Directed the real estate environmental due diligence program for a leisure and entertainment company whose acquisition of "unique destination" resorts is valued in excess of $1.4 billion dollars. Properties such as the Boca Raton Hotel and Resort, the Registry Resort in Naples, Fort Lauderdale's Pier 66 Resort Hotel and the Arizona Biltmore Resort were acquired in the past two years. Elements of the program included initial scope, site assessments, health & safety audits, compli-ance inspections, asbestos and radon assessments, as well as sub-sequent subsurface investigations, regulatory negotiations and reme-dial efforts. Provided integral support for the purchasing contracts team. Several properties required additional assessment/remediation which was identified prior to purchase, saving the Client millions in potential cleanup costs. In addition to the ongoing acquisitions, de-signed a corporate facility compliance program for all corporate prop-erty owned by the Florida Panthers. Aspects of this program included personnel training, inspections and recommendations for remedial procedures.

WORK EXPERIENCE

2009 - Present Ray and Associates – Ocala, Florida
President/Owner
Beginning of February 2009, I established Ray and Associates, a consulting firm providing Land Use Planning, Site Design, Environmental Analysis, Environmental and Regulatory Compliance, and Land Management. We provide guidance and assistance in the preparation and processing of land use applications, planning documents, zoning changes, environmental permit applications (404 / 401 / NEPA / ESA / RCLA / NPDES / WMD / DEP) and other Federal, State and Local permits. Current projects include South Chase - project within the Meadow Woods Station TOD, Grand Island Mixed Use Development PUD with 1,650 Units of both Active Adult and Multi-Generational SF Homes, 150,000 Neighborhood Commercial, Design Guidelines and Environmental compliance, managing all entitlements. Additionally, we coordinate and oversee Site Management activities throughout Florida and the Southeast for projects currently pending or under development.

2005 – 2009 Bowyer Singleton & Assoc. - Orlando, Florida
Senior Project Manager/Office Manager
I was responsible for co-management of the Ocala Regional office of Bowyer Singleton and Associates. With minimal staff we consistently exceeded annual economic goals in office revenue and additionally shared work with other offices to increase corporate revenue without increasing local overhead. I was responsible for business development and marketing, client communications, project schedule, project budget, billings and coordinating entitlements on a wide variety of projects in the Ocala, Orlando, First Coast (Jacksonville/St. Augustine) regional offices of BSA. I maintained a public presence serving on multiple boards and professional committees. My responsibilities included Master Planning and Site Design, Public Facilitation, Environmental Site Analysis and Agricultural Site Management, along with identifying new and emerging markets, such as Public Outsourcing of services, Ecological Umbrella Banking, GIS, International Clients, and Water Quality/Aquifer Recharge Improvement-Mitigation.

2000 – 2005 LDC Design Group, Inc. / Pariti Group - Hillsboro, Oregon & Clermont, Florida
Director of Planning & Environmental Services

Our department was responsible for identifying, applying for and obtaining all planning, land use, environmental permits and regulatory approvals for all projects designed by LDC Design Group Inc. The corporate office in Hillsboro, Oregon provided support to regional offices in Washington, Idaho, California and Florida. I established and managed a local department staff of 20 in the preparation and processing of property due diligence reports, design alternative analysis, land use applications, comprehensive plans, impact fees requirements, planning documents, environmental permit applications (404 / 401 / NPDES / NEPA / ESA / CEQA) and other Federal, State and Local permits. We also prepared and reviewed site design layouts on multiple subdivisions and commercial developments incorporating local land development requirements and site constraints. My project management duties included the consistent coordination and communication with clients, coordinated contracts, invoicing, construction scheduling, construction monitoring, regulatory compliance and overall project status. I successfully developed new clients and market areas.

1985 – 2000 Ray Land and Development, Clermont, Florida & North Carolina
Director

I oversaw complete operation of an 8800 acre highly diversified private land trust and development group. I consistently worked with budgets and contracts in excess of $500,000. Duties included operational and business management, real-estate transactions, wildlife management and habitat enhancement, current and future land use planning, marketing strategies, public presentations and educational tours. Agricultural departments included; Cattle, Horses, Hay, Seed, Sod, Vegetable Farming, and Mining. My duties included management of staff ranging from 8 to 60 individuals. Designed and implemented complete restoration plans for an extensive mining and peat processing operation including the restoration of all altered wetlands and sensitive ecosystems. I obtained development approval for multiple mixed-use developments, submitted and obtained all required environmental, zoning and land use permits applications. I marketed properties, negotiated sale contracts, coordinated real-estate transactions and closing for properties owned by the group. Majority of work accomplished in one of Florida's most highly regulated and protected regions, the Green Swamp Area of Critical State Concern (GSACSC). I coordinated the sale of the groups final 2800 acres of environmentally sensitive lands to the State of Florida as integral part of an overall 84-million-dollar acquisition effort.

1982-1985 Glace and Radcliffe, Inc. – Consulting Engineers, Winter Park, Florida
Environmental Specialist

My duties included the establishment of land use, permit and environmental design requirements for all projects. Projects varied from regional transportation projects to residential and commercial development. As a project team member, I assisted in the design, permitting and implementation of an EPA-208 Water Quality Improvement Grant for the City of Altamonte Springs, Florida, establishing early state wide criteria for the treatment of stormwater runoff. I performed all fieldwork associated with site evaluation and coordinated design, submittal, public presentations, and review process with clients and regulatory agencies.

Summer of 1981 Wolf Ecology Project, Missoula, Montana
University of Montana and the U.S. Council on Environmental Quality.

Project consisted of field research to determine if the Gray Wolf *(Canis lupus)* existed west of the Mississippi River in the continental United States along the northern Rocky Mountain Corridor. A written report was presented to and published by the U. S. Council of Environmental Quality. Data and information obtained was instrumental for the successful Gray Wolf Re-Introduction program in Yellowstone National Park.

Representative Projects

Environmental-Ecological Site assessments: During the past 15 years have completed an extensive number of Environmental/Ecological site assessments for projects throughout Florida. This work effort incudes individual pedestrian site surveys, Vegetation Surveys, Habitat assessment, Florida Land Use Cover Forms and Classification System (FLUCFCS) mapping, Soil Mapping, Wetland delineations, and other required ecological-biological evaluations based upon Federal, State and local jurisdiction requirements. This work typically includes species specific surveys, permitting, capture and relocation of species listed for protection along with permitting Jurisdictional Wetland impacts.

Oak Point Preserve, Lake County Florida Provided and Environmental Analysis and Land Planning services for this 284 Acre / 29 Unit development designed to specifically meet the extensive environmental requirements of the Green Swamp Area of Critical State Concern, one of Florida's most heavily regulated areas. Innovative designs implemented included the use of enhanced Septic Systems, LID Stormwater Treatment for advanced nutrient removal from stormwater and privately owned "Open Space" throughout the community. Project involved extensive Wetland Delineations and Protected Species for both Federal and State listed Species.

The Reserve at Howey in the Hills, Howey in the Hills, Florida – This 740 Unit / 385 Acre project involved revising and updating the project for final development plan approval. Included in the master site plan individual neighborhoods were created accommodating 4 product types for Single Family and Townhome products. The project additionally included 23 Acres of commercial use in a Neighborhood Center integrated into the community. Work included coordination Architectural Design guidelines, community parks master plan and extensive environmental considerations. Final project approval involved coordinating development and funding with two additional projects necessary to facilitate a major expansion of the Town's Potable Water distribution system and Wastewater Collection and Treatment system.

Cross Florida Greenway Trail – This project involved completing Environmental/Ecological site analysis and regulatory permitting and compliance for over 16 miles of Paved Trail construction for the Cross Florida Greenway Trail. Project involved extensive wildlife surveys, consultation and permitting with both the Federal/USFWS, State/FWC and State/SWFWMD assuring regulatory compliance and listed species protection.

Whitaker Family Properties, Lake County, Florida - Complete Development Analysis, Environmental Assessments, Protected and Listed Species Habitat Determinations, Pre-Consultation with USFWS, Market Analysis and Forecasting, Entitlement Status, Identification of and Coordination with Land Development partners and buyers, drafting project specific Design Guidelines, Annexations, Change of Future Land Use, Rezoning, Development Plan approvals, and coordinated survey and engineering designs for over 600 acres of multiple properties owned by the Family in Lake County, Florida.

Heron Glenn PUD, City of Mascotte Florida – This ongoing 245 Acre / 999 Unit - Single Family development involves over 1 mile of Jurisdictional Wetland Delineation, Product Development, PUD Site Design, drafting Design Guidelines, Access Analysis, Multiple Regulatory Agency coordination, overseeing Preliminary Engineering and Management of Entitlement Process. Town of Mascotte approved the PUD February 2021.

Ruben Groves PUD, Lake County, Florida – Provided Land Planning and Environmental design services for this 131 Acre / 490 Unit Mixed Use development designed to specifically meet the need of the Mobility Impaired. In addition the development is located in the Green Swamp Area of Critical State Concern, one of Florida's most heavily regulated areas. Innovative designs implemented included the use of Bio Swales for advanced nutrient removal from stormwater and multi modal internal transportation elements throughout the community. Project was appealed by DEO requiring testimony at a DOA Hearing where Expert Witness testimony as both Land Use Planning professional and Environmental Specialist was presented supporting the project designs for ADA and Mobility Impaired Community design elements that required extensive site alteration, Compatibility Analysis providing adequacy of buffering necessary to protecting adjacent uses and innovative treatment of stormwater to provide nutrient removal that exceeds local and state requirements.

Silver Springs Community Redevelopment Area, Marion County, Florida – As part of a professional consulting team Ray and Associates was commissioned by Marion County to develop Design Guidelines and draft revisions to the Marion County Land Development Code to provide for a consistent and reliable development program in the Silver Springs CRA. Silver Springs State Park, containing the worlds largest First Magnitude Freshwater Spring is within the CRA. Upon completion these Design Guidelines and Development Code Revisions have been adopted by Marion County. Work included numerous Community meetings, coordination with 3 State Agencies, County Engineering Department, Marion County MPO, and the City of Ocala.

Loves Landing PUD, Lake & Marion County, Florida – This project required utilizing an alternative "Special Master" hearing process where we successfully negotiated and provided expert testimony for Land Use Planning and Environmental issues. A successful settlement was reached where the Developer/Land Owner has been allowed to add additional land to his project while not having to request and obtain approval of a Large-Scale Amendment to the Future Land Use Map (FLUM) for the construction of a Single Family / Private Airport Community in a Rural area.

City of Ocala / Vision 2035, Comprehensive Plan and Zoning Code Revisions, West Ocala Community Plan Marion County, Florida – For this ongoing 3-year project we have teamed with other consultants to complete a long range public vision and growth management strategic plan, together with a Parks and Recreation Master Plan which will enable the City of Ocala revise their existing Comprehensive Plan and Land Development Regulations. The Vision 2035 project and the Parks Master Plan received unanimously approval and were adopted by the City. Current work efforts are associated with the EAR process and the development of West Ocala Community Plan, formation of the West Ocala Community Redevelopment Area (CRA), Community Mobility Master Plan and a Trail Master Plan.

City of Ocala / Recreation and Parks Master Plan, Marion County, Florida - As part of a professional consulting team Ray and Associates was commissioned by the City of Ocala to develop a comprehensive Recreation and Parks Master Plan. Upon completion this plan has been adopted by the City of Ocala. There are 47 existing parks within the current Ocala parks system ranging in size from .1 acre to 180 acres. The completion of the Master Plan involved identifying current conditions and deficiencies, conduct a detailed public survey, conduct

multiple public workshops, provide recommendations and preliminary designs for remediation measures, and develop a strategic budgetary implementation plan for future development of park facilities.

Florida Horse Park and Agricultural Center, Marion County, Florida – This 500 Acre project is in Marion County, Florida. This project is located on lands owned by the State of Florida and Florida Department of Environmental Protection (FDEP) Office of Greenways and Trails. The project required review, Detailed Environmental Analysis and Habitat surveys, substantial modification and redesign to existing preliminary concept plans avoiding or minimize environmental impacts, provide for additional equestrian requirements and meet the regulatory requirements such as treatment of stormwater for local, regional and state agencies. Project was revised with Phase 1 being submitted for approval in less than 3 months.

On Top of the World Communities, Inc., Estates West & Crescent Ridge West Extension, Marion County, Florida – This 5,215 unit / 4,987 Acre Development is part of the On Top of the World DRI in Marion County, Florida. The project includes multiple residential products to be located in 9 distinct neighborhoods. The project includes extensive preservation of natural areas, golf course redesign and an integrated Greenway / Park system. Project will include construction supervision and monitoring to assure compliance.

On Top of the World Communities, Inc, Terralea, Marion County, Florida – This 4,100 Units / 1,572 Acre Development is part of the On Top of the World DRI in Marion County, Florida. The project includes both Single and Multi-Family units, 50 Acres/ 300,000 SqFt of internal Retail Commercial, 50 Acres of Active Recreation, Neighborhood Parks and pedestrian friendly design. Project will include construction supervision and monitoring to assure compliance.

The Estates at Heathbrook, Ocala, Florida – This 384 Unit / 24 Acre Development is in Marion County, Florida. This project utilized Multi-Family units designed with substantial Architectural involvement. The project required extensive negotiations with Marion County to address protection and relocation of significant Live Oak Trees up to 60 inches in diameter. Duties included construction monitoring to assure compliance. Project was designed and completed in less than 24 months.

Estates of Sorrento Springs, Lake County, Florida – This 160 Unit / 160 Acre Development is in Lake County, Florida and located in the Wekiva Study Area. The project includes multiple residential products to be located in clustered neighborhoods. Development approval required the creation of project specific “Form Based” development guidelines. Forty (40) Acres of Long Leaf Pine Habitat were identified and preserved as a Community Tree park / Environmental Education Center. Additional Trails, Parks and open space allowed the development to retain 50 % open Space while avoiding impacts to identified protected species. Project is being evaluated for a “Gold” designation under the LEEDs Neighborhood Development Rating system. Project will include construction supervision and monitoring to assure compliance.

Bridgeport Village, Tualatin, Oregon - This project is one of the preeminent lifestyle shopping center in the Pacific Northwest. Consisting of approximately 505,000 square feet of retail, entertainment, restaurant and office space, Bridgeport Village offers the finest tenant mix and an unparalleled shopping, dining and entertainment experience anywhere to be found in the Portland area. Located at the intersection of Interstate 5 and Boone's Ferry Road, Bridgeport Village will enjoy the highest daily traffic counts to be found in the State of Oregon. Duties included construction monitoring and supervision to assure compliance.

Oregon Roses, Hillsboro, Oregon - This ongoing 628-unit residential development consists of 5 product types of single-family housing. Project design incorporated “Form Based” development Guidelines, extensive neighbor park system and a strong pedestrian orientation. Coordinated and supervised an extensive environmental cleanup, wetland impacts, USACOE, ODSL, NEPA, RCRA, CERCLA, ESA-Section 7 Consultation and 15 acres of native buffer restoration. Project is adjacent to Jackson Bottom Wetlands recognized by the EPA as a nationally significant wetland.

Arbor Oaks, Washington County, Oregon - This completed 546-unit, single-family residential development incorporated over 6 product types and was the first to include “Z” Lots the Portland Metro Area. Design included neighborhood parks and a system of Nature Trails. Included in the design were off-site road and utility improvements requiring extensive wetland permitting by USACOE and ODSL, ESA-Section 7 Consultation and addressing critical stream fish-passage. Additional duties included monitoring of construction to assure permit compliance.

Beacon Rock State Park, Washington - Project involved extensive alternative analysis for the sitting and design of a bridge crossing for the Burlington Northern Railroad and locating a Day Use facility associated with Beacon Rock State Park in the Columbia River George National Scenic Area. Project required coordination with multiple Local, State and Federal agencies, NEPA/EA and SEPA compliance, ESA Section 7-Consultation, Section 106-Consultation, SHPO and NHPA (National Historic Preservation Act) compliance, construction monitoring and supervision in addition to meeting the requirements of the Columbia River George Management Plan.

Norton Lane/Three Mile Lane 24-inch Transmission Main Project, City of McMinnville Water and Light, McMinville, Oregon

Provided wetland delineation, permitting, NEPA Section 7 Consultation, construction monitoring and supervision for a 6 Mile / 24-inch diameter transmission main project crossing the Yamhill River, a significant flood plain and seasonal wetlands. Techniques employed included both “Bore and Jack” under the river, to assure ESA/NEPA compliance, and Open Trench excavation. Permits were obtained in 120 days with permit submittal / approved without alteration.

Honeymoon Island State Recreation Area, Pinellas County, Florida

This project required extensive site planning and environmental permitting including USACOE, FDEP, NEPA and ESA compliance. Project included construction supervision and compliance monitoring for 150,000 cyd dredging project associated with a ferry channel improvement and the construction of a ferry dock together with support facilities.

Caladesi Island State Park, Pinellas County, Florida

This project required extensive facility planning and environmental permitting including USACOE, FDEP, NEPA and ESA compliance. Project included construction supervision and compliance monitoring for 50,000 cyd dredging project associated the construction of a 55-slip marina and associated support facilities

Executive Summary

- Triumph Oaks of Ormond Beach, LLC ("Triumph") is planning to redevelop the closed Tomoka Oaks Golf & Country Club (the "Club").

- Triumph plans a new community composed of 276 residential homes ranging from $550,000 to over $763,000 on lot sizes from 50 to 80' wide. The community will be surrounded by a landscaped buffer/open space ranging from 50' to 125' wide. All its traffic will be directed through Tomoka Oaks Boulevard to Nova. However, alternative routes through the existing neighborhood are slower and circuitous; however, in an emergency do provide alternative ingress and egress for the all the immediate neighborhoods.

- Shuttered golf courses depress the values of surrounding residential properties. This conclusion is proven in the professional literature. Our hedonic pricing analysis supports this notion that a shuttered course depresses property values.

- By contrast, the redevelopment of the Club into a modern community with homes valued at $550,000 to over $763,000, surrounded by a large, landscaped/open space buffer will enhance the values of the surrounding neighborhood.

- The redevelopment project will also generate a substantial surplus for the City's budget.

1. Introduction

1.1. Assignment

Fishkind Litigation Services, Inc. ("FLS") was retained to analyze the economic and fiscal impacts of redeveloping the Tomoka Oaks Golf & Country Club (the "Club"). Economic impacts include: (a) feasibility of reopening the Club as a stand-alone golf course; (b) prospects for redevelopment; and (c) the effects on surrounding property values. Fiscal impacts quantify the cost and revenue effects of the proposed redevelopment on the budget of the City of Ormond Beach.

1.2. Background

The Club closed in 2018. It was purchased by Triumph on April 23, 2021 for $2,600,000. Triumph has submitted plans to redevelop the Club property into Tomoka Reserve, a 276-unit new residential community.[1]

1.3. Qualifications and Experience to Render this Expert Report

FLS has extensive experience analyzing the issues in this matter. FLS is currently engaged in the planning and financing of the redevelopment of the former World Woods Club in Brooksville by Cabot Farms.[2] The redevelopment involves fully redeveloping the 1,200 acres and restoring its two historic courses along with adding a clubhouse, amenities, and over 400 homes and lodging units.

FLS served as the Financial Advisor to the Herons Glen Recreation District in its successful, 2020, $20 million bond raise to redevelop and expand its golf course and recreational facilities. FLS helped the residents of University Park to establish their recreational district and to successfully finance their $19 million acquisition and expansion of their club and recreational facilities.

Dr. Fishkind was a founding board member of two publicly traded, real estate development companies with extensive Florida operations. He has served as an expert witness in a number of disputes related to golf course redevelopments and their financing.

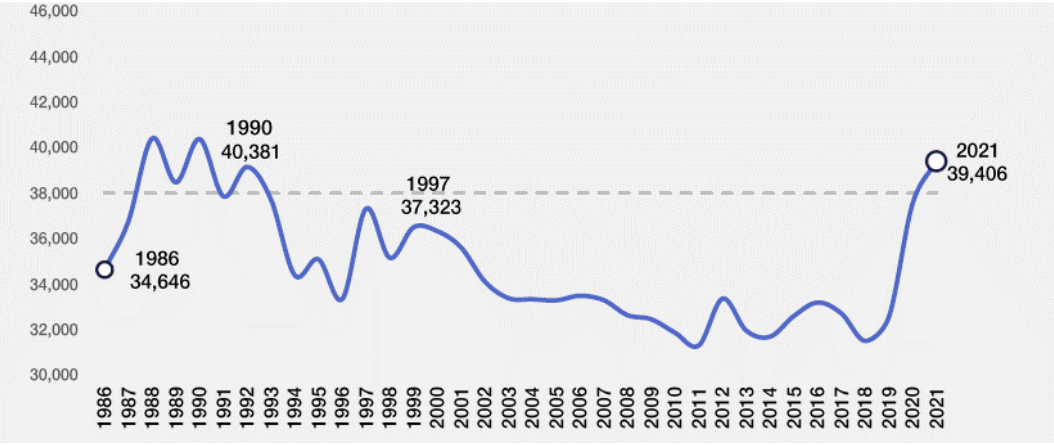
[2] https://cabotcitrusfarms.com/

1.4. Limitations on Use of this Study

This study informs the decision-making process for the redevelopment plan. Any other uses of the report are only allowed with our express written approval. All information is current as of the date of this report. FLS has not been engaged to provide updates.

2. Economic Impact of the Redevelopment Plan



2.1. The Redevelopment Plan

Triumph plans to redevelop the Club property into Tomoka Reserve ("Reserve"). Reserve is planned as a modern, 276-unit, residential community. Lots and home sizes will be varied including: (a) 240 executive and estate homes with lot sizes ranging from 60' to 80' adjacent to the existing subdivision and (b) 50' wide homesites in the interior of Reserve. Home prices are projected to range from $550,000 to over $763,000. Reserve will be surrounded by a landscape open space buffer ranging from 50' to 125' wide. Although a PRD is a negotiated zoning, Triumph is approximating 276 units. Notwithstanding, the property is 147.94 acres and therefore the proposed density per acre, at 276 units, is 1.865 homesites. Certainly, we believe this should be considered infill low density especially with all the existing services complete including roads, water, sewer, drainage, commercial development, schools and houses of worship.

2.2. Financial Feasibility of Reopening the Club as a Golf Course Business

The pandemic reversed a 30-year decline in golf rounds played as Figure 1 illustrates. The volume of rounds on an 18-hole equivalent basis increased significantly in 2020 and rose to almost 40,000 in 2021.

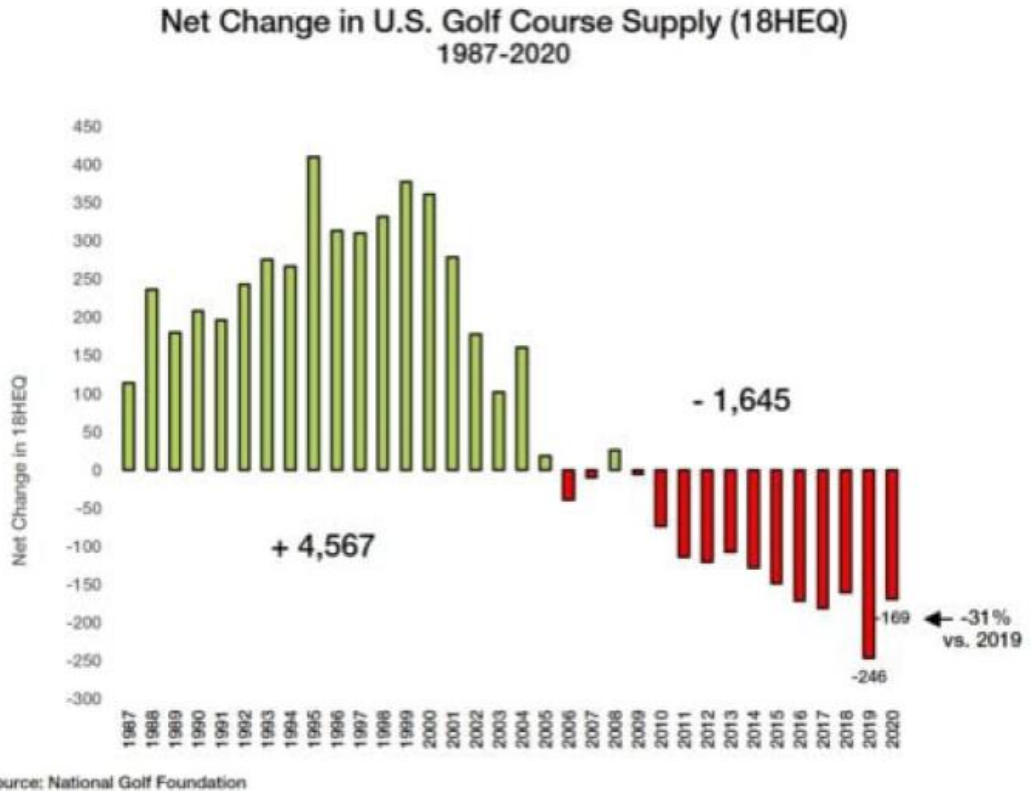


Figure 1. Golf Rounds Played in the U.S.

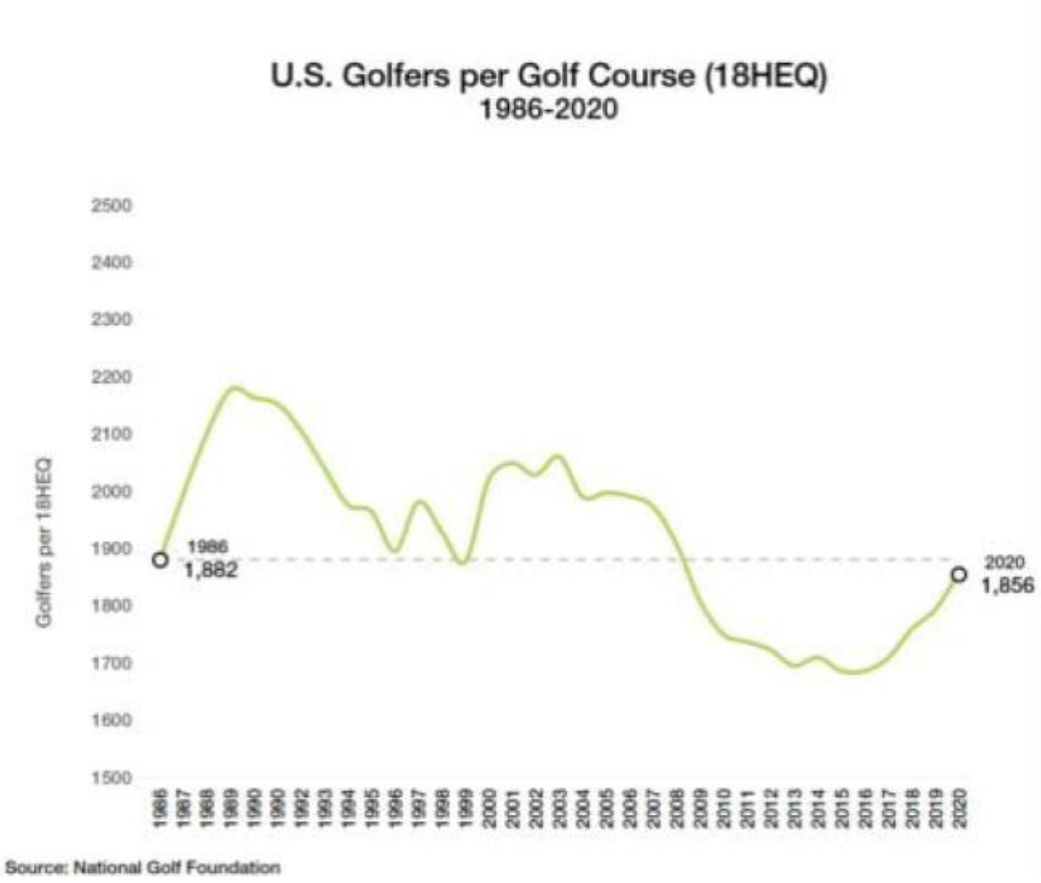
Source: National Golf Foundation

However, the recent rebound in rounds did not arrest the continuing decline in the number of golf courses. As Figure 2 shows, there were 169 closures in 2020 (the latest data available) according to the National Golf Foundation ("NGF").

Figure 2. Net Change in U.S. Golf Courses



Source: National Golf Foundation

NGF opines that the combination of the pandemic fueled surge in play and the net decline of more than 1,600, 18-Hole Equivalent (18-HEQs) golf courses since 2006 and have moved the U.S. market closer to supply/demand equilibrium. Figure 3 illustrates this. In 2020, the ratio of the number of golfers per 18-Hole Equivalent Golf Course essentially mirrors the level depicted in 1986.

However, the rebalancing of the golf market does not mean that all areas of the country have returned to equilibrium nor does this imply that a stand-alone golf course can once again become a viable business operation. This is particularly true for Florida.

Figure 3. Golf Market Moves Towards Equilibrium

Florida has the most golf courses in the U.S. NGF reports that there are 970 courses in Florida. Florida also led the nation in the number of course closures in 2020 when 13 courses closed.

Figure 4. U.S. Golf Courses

Total U.S. Courses: 16,165		Golf Facilities by State						Total 18-HEQs: 13,355	
Florida	970	Pennsylvania	605	Minnesota	424	Missouri	308	Washington	256
California	825	Ohio	599	Iowa	378	Arizona	301	Tennessee	252
New York	742	Illinois	592	Indiana	372	South Carolina	301	Colorado	236
Michigan	718	North Carolina	472	Georgia	356	Virginia	298	Kansas	231
Texas	715	Wisconsin	454	Massachusetts	346	New Jersey	271	Kentucky	231

FLS conducted a market and economic feasibility study of reopening the Club as a stand-alone business. The Club was closed in 2018 and it has not been maintained since then. The cost to rehabilitate a closed course based on our client's contemporary experiences can range from a low of $5 million at Boca Royale to as much as $20 million based on the restoration of World Woods.

As noted above, the Club was purchased for $2,600,000. To be conservative, we will assume rehabilitation costs of $5 million. The total cost is therefore $7.2 million. There are eight golf courses in the Ormond Beach MSA (area). There are also another 21 golf courses within 20 miles of Ormond Beach, including 12 public, 4 municipal, and 5 private courses.[3] The market is very well served if not oversaturated. NGF reports that the average number of rounds per golf course is 24,000. At that rate the local supply is 700,000 rounds.

FLS projects that the Club could expect the average number of rounds of 24,000 per year. The Club would average $50 per round to be competitive and attract the 24,000 rounds expected. Adding revenues from cart rentals and the pro shop brings projected annual revenue to $1,575,000.

Annual costs total $983,069 as shown in Table 1. Based on this analysis, the Club could generate net operating income of $591,931.

Table 1. Annual Operating Costs for the Reopened Club

Category	*Amount*
Maintenance	$556,613
Labor	$294,456
Water	$107,000
Equipment	$25,000
	=========
TOTAL	$983,069

Table 2 displays the economic feasibility analysis. A purchaser would evaluate the projected cash flows over a ten-year horizon and then assume a sale in year ten. The minimum required rate of return on invested capital is 15% for this class of asset.[4] As Table 2 shows, the Club cannot achieve the required return to be economically feasible. The present value of the cash flows ("Total at PV") is negative. This means that the return on investment is negative at the 15% hurdle rate.

[3] https://www.golflink.com/golf-courses/fl/ormond-beach/#:~:text=Ormond%20Beach%2C%20Florida%20Golf%20Courses&text=There%20are%208%20golf%20courses,municipal%20and%205%20private%20courses.
[4] RealtyRates.com

This result is consistent with the continuing closure of courses and the lack of new course development as stand-alone business enterprises. Finally, it is also consistent with the performance of the Club, which was closed for many years before being purchased from foreclosure.

Table 2. Analysis of Financial Feasibility for Restoring the Club

Year	*Purchase & Rehab*	Revenue	Expense	Total	Total at PV
2024	-$7,200,000	$1,575,000	-983,069	-$6,608,069	-$6,608,069
2025	$0	$1,575,000	-983,069	$591,931	$514,723
2026	$0	$1,575,000	-983,069	$591,931	$447,585
2027	$0	$1,575,000	-983,069	$591,931	$389,204
2028	$0	$1,575,000	-983,069	$591,931	$338,438
2029	$0	$1,575,000	-983,069	$591,931	$294,294
2030	$0	$1,575,000	-983,069	$591,931	$255,908
2031	$0	$1,575,000	-983,069	$591,931	$222,529

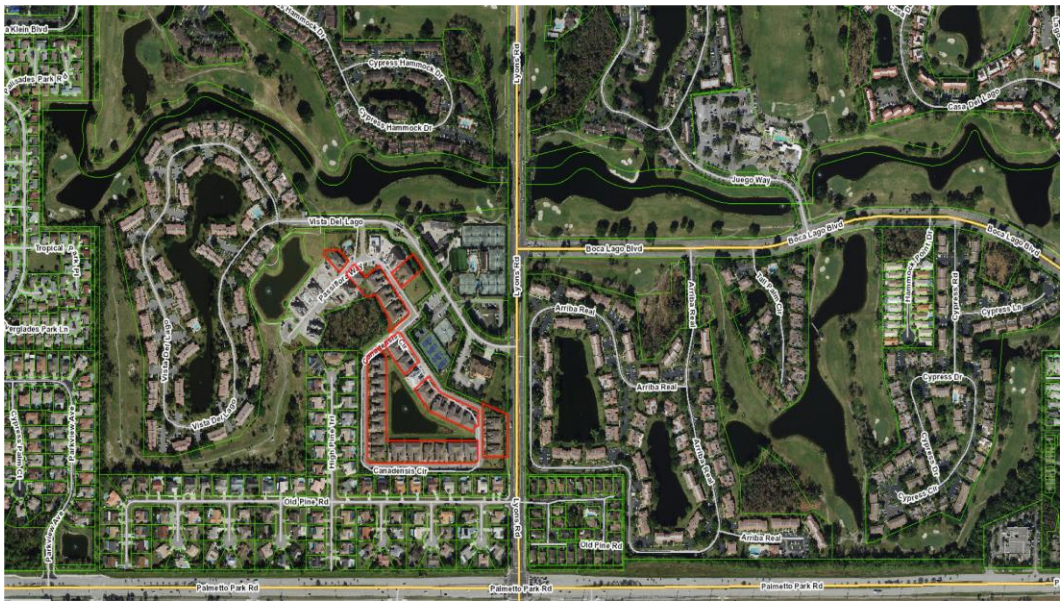
2033	$0	$1,575,000	-983,069	$591,931	$168,264
2034	$3,946,207	$1,575,000	-983,069	$4,538,138	$1,121,758
	========	========	========	========	========
Totals	-$3,253,793	$17,325,000	-$10,813,759	$3,257,448	-$2,661,862

2.3. Review of the Professional Literature on the Impact of Shuttered Golf Courses on Surrounding Property Values

There is substantial professional literature on the impact of shuttered golf courses on the surrounding real estate. The literature is consistent in finding that course closure exposes the surrounding real estate to the blight of an abandoned course. As a result, the surrounding property values are depressed.

Yates and Cowart found that course closure reduced the values of residential properties in the golf course community by 17% in Shelby County, Alabama.[5] Thomas reports that property values are projected to decline by 4% to 18% if golf courses in Oro Valley, Arizona were to close. Bonnenfant concluded that the closure of the D'Andrea course in Washoe County, Nevada caused its surrounding homes to underperform their marketplace by 30%.



2.4. Case Study of the Impact of Golf Course Redevelopment on Surrounding Property Values

Recently, FLS conducted a case study of the impact on surrounding residential property values from the redevelopment of nine holes of the previously 27-hole Boca Lago Golf course in Boca Raton. The results are representative of what FLS expects from the redevelopment of the Club.
The Boca Lago Golf & Country Club is a members-only, privately owned, non-equity club, located at the northwest quadrant of Palmetto Park Road and the Florida Turnpike in Boca Raton. The club was struggling financially because it could not generate sufficient play on its 27 holes and was in need of redevelopment.

In 2017, PulteGroup closed on a 40-acre site within the Boca Lago Country Club for approximately $8.3 million. Pulte Homes converted 9-holes of the golf course into residential development, complete with a park and a nature preserve to cater to the needs of a 55+ active community called Boca Flores. Boca Flores is a condominium community comprising 120, two-story, carriage homes (with elevators), and one-story villas. Figure 5 shows the Boca Flores community outlined in red. Notice its proximity to the surrounding residential development, much like the Club's situation.

[5] Yates (2019), page 1.

Figure 5. Boca Flores and the Remaining 18-Hole Boca Lago Golf Course

To quantify the impact of the redevelopment of Boca Flores on the surrounding property values, we utilized the Palm Beach County Property Appraiser website to collect Qualified Sales data within certain radii of a randomly selected property address within Boca Flores, 9306 Vista Del Lago A, Boca Raton, FL 33428. FLS used price per square foot of climate-controlled space as the valuation metric.

FLS collected qualified sales data within a 1-mile radius of the above cited address to serve as the control group to compare against sales data collected within a 0.25 mile radius of Boca Flores. Sales data from Boca Flores itself was excluded.

The impact of redeveloping 9-holes of Boca Lago into the Boca Flores community is quantified by comparing: (a) the growth in price per square foot within the 0.25 mile impact zone to (b) the growth in price per square foot within the 1-mile control group area. As the data displayed in Figure 6 shows, prices increased significantly faster in the 0.25-mile radius demonstrating that the redevelopment caused property values to rise much more rapidly than in the general market area. Prices increased by 26% in the 0.25-mile radius which is directly impacted by the redevelopment compared to just 13% in the 1-mile radius.

Figure 6. Impact of Redeveloping 9-Holes of Boca Lago Golf & Country Club into Boca Flores Condominiums

BOCA FLORES				
1-Mile Radius				
	Average of Sale Price	Average of SP per Sq FT	# of Transactions	
2019	$174,704	$136.46	71	
2020	$188,968	$144.55	158	5.93%
2021	$199,875	$153.11	122	5.92%
.25-Mile Radius				
	Average of Sale Price	Average of SP per Sq Ft	# of Transactions	
2019	$187,958	$125.90	12	
2020	$196,924	$132.24	33	5.03%
2021	$228,595	$158.81	26	20.09%

2.5. Hedonic Price Analysis of the Impact of Golf Course Closures on Surrounding Property Values

To further test the impact on surrounding property values from the redevelopment of closed golf courses into residential homes, FLS conducted a hedonic pricing analysis. The hedonic index approach to explaining the sales price of a home starts by recognizing that a home encompasses a bundle of tangible and intangible features that home buyers value.

Hedonic methods are widely used in housing market studies focused on measuring the contribution of various home features and characteristics to sales prices. These types of studies typically involve housing features and characteristics that consumers can readily ascertain and express preference for such as number of bedrooms, granite countertops, gated community, high-ranked public schools, access to shopping, square feet of the home, community facilities and amenities, location, and similar features. The method is widely used by housing market analysts, appraisers and by U.S. Department of the Interior [Sirmans (2003), Reichert (2002), Bateman (2001), Silver (2016), Rosen (1974)].

Following professional practice, FLS hypothesized that the sale price per square foot of a home was a function of: (a) year of sale; (b) whether the golf course was opened or closed; (c) year home was built; (d) number of bedrooms; (e) number of bathrooms; and (f) which city the home was located in (Ormond, Daytona, Holly Hill, South Daytona, Port Orange, or unincorporated).

To develop the database for the hedonic price analysis, FLS identified each single-family parcel within a 5-mile radius of Tomoka Oaks Golf & Country Club. FLS embarked on the following using a 5-step methodology:

Step 1: Download the single-family (SF) parcel map shapefile from the Volusia County Property Appraiser's website.

Step 2: Overlay the golf course shapefile into the SF parcel map shapefile.

Step 3: Select by location all the SF homes within a 5-mile radius of Tomoka Oaks Golf & Country Club.

Step 4: Identify which golf courses are currently closed or have closed previously.

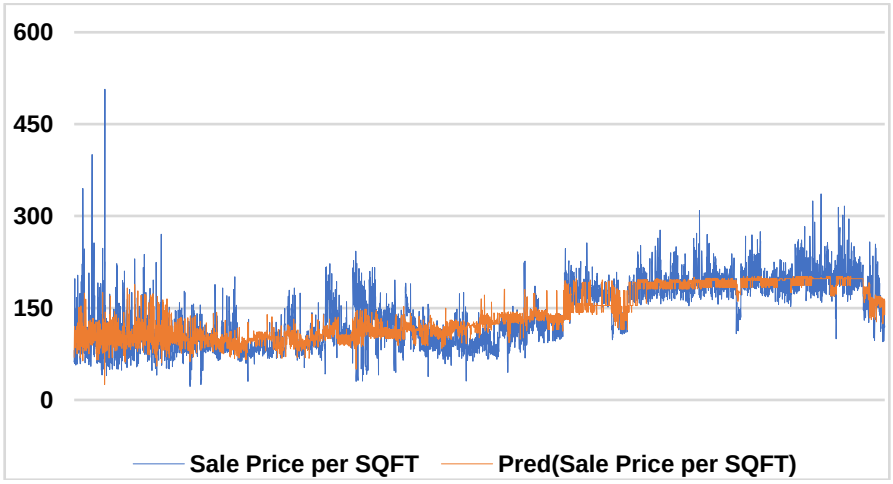
Step 5: Segment the SF parcels into two categories: (1) those where the golf course is open and (2) those where the golf course is currently closed or was closed at some point in time.

FLS identified the following golf courses that have most recently closed in Volusia County: DeLand Country Club, Sandhill Golf Course, Indigo Lakes Golf Course, River Bend Golf Course, and Tomoka Oaks Golf & Country Club. Presently, most of these golf courses are being considered for redevelopment or repurposing.

River Bend is owned by Ormond Beach. The City Commission voted unanimously on October 5, 2022 to GAI Consultants Inc. to create a conceptual redevelopment plan for the city-owned property, which is next to Ormond Beach Municipal Airport. The 219-acre property was split into three areas for conceptual planning purposes. Area 1 is reserved for either a park or for future development, Area 2 will add to the Airport Business Park, and Area 3 will be examined to determine potential uses. However, FAA regulations and restrictions are likely to limit future development.

The hedonic model's coefficients were estimated using ordinary least square ("OLS") regression. OLS provides the most reliable and unbiased coefficient estimates if its assumptions are met as discussed below. FLS selected six (6) independent variables for the hedonic analysis.

IV1: Sale Year
IV2: Did the sale occur when the golf course was open (1) or closed (0)?
IV3: Year Built
IV4: Number of Bedrooms
IV5: Number of Bathrooms (estimated by FLS because the Property Appraiser's website details bathrooms by # of fixtures across six different categories)
IV6: City Code --- for example, Ormond, Daytona Beach



FLS selected Price per Heated Sq Ft as the dependent variable, meaning the main variable we are attempting to understand or predict. FLS established a sales price floor of $75,000 and qualified warranty deed sales only to run the regression model. The model was estimated using over 5,100 observations of sales of single-family homes within 5 miles of the Club. The results are shown in Table 3. The model provides a good fit to the underlying database. The model explains 64% of the variation in price per square foot as evidenced by the Adjusted R^2. The Mean Absolute Percentage Error ("MAPE") indicates that the average percentage difference between an actual value and the value predicted by the model is 18%. The DW and Cp statistics test whether the model meets the criteria for a reliable OLS regression and will be discussed later.

Table 3. Hedonic Pricing Model Results

Statistic	*Training set*
Observations	5,175.00
Sum of weights	5,175.00
DF	5,168.00
R^2	0.64
Adjusted R^2	0.64
MSE	901.08
RMSE	30.02
MAPE	18.29
DW	1.18
Cp	7.00

Figure 7 compares the actual observations on price per square foot to their predicted values. Given the substantial degree of variability in the pricing data, the model does a reasonable job of fitting the database.

Figure 7. Actual vs. Predicted Values for Price/Square Foot

The coefficient estimates for the hedonic price model are shown in Table 4. All of the coefficient estimates are highly significant with t-values greater than 2, meaning that they are all significantly different from zero with a 99.9% degree of certainty. The coefficient for whether the golf course was opened or not in the sale year has a value of -35.63. This means that the sale price per square foot of home was depressed by $35 per square foot if the golf course was closed during the year the home sold. This translates into a penalty of about 25% based on the average sale price per square foot in the sample of $135.

Table 4. Model Coefficients

Source	Value	Standard error	t	Pr > |t|
Intercept	-5,248.91	167.89	-31.26	**<0.0001**
Sale Year	2.27	0.09	25.28	**<0.0001**
Golf Course Opened in Sale Year 1=Yes 0=No	-35.63	1.37	-26.10	**<0.0001**
Yr Built	0.44	0.04	10.84	**<0.0001**
# of Bedrooms	-11.04	0.60	-18.37	**<0.0001**
# of Full Bathrooms	-3.52	0.73	-4.79	**<0.0001**
City Code	-1.24	0.28	-4.43	**<0.0001**

We conducted a number of statistical tests on the model to assess its reliability. There are seven classical assumptions underpinning a reliable application of OLS.[6] Analysis of how well our OLS model satisfies these assumptions is summarized below. Our application of OLS in the hedonic price analysis satisfies all the seven assumptions for reliability except for serial correlation as shown by the DW statistic of 1.18.

Serial correlation does not affect the estimated value of the coefficients. In other words, serial correlation does not bias their estimates. Instead, serial correlation artificially depresses the estimate for the standard error thereby inflating the value of the t-statistic. However, in this case the modest degree of serial correlation is not an issue because the standard errors are so low that some modest increase in their values would not change the resulting conclusions that all the coefficient estimates are highly statistically significant.

2.6. Analysis of Concerns by the Surrounding Property Owners

Some of the surrounding property owners have expressed various concerns about the impact of the redevelopment plan on their property values and quality of life.[7] Six concerns in particular were cited by the Tomoka Oaks Homeowners Association ("TOHOA"). These are addressed below.

2.6.1. Impact on Property Values

TOHOA fears that the redevelopment will decrease property values. No particular facts were cited to support this concern beyond the observations that the course is closed and subject to redevelopment.

Our analysis demonstrates that the redevelopment plan will not reduce property values for TOHOA homeowners. Instead, the redevelopment will improve those values. A shuttered course depresses values. Redevelopment into home prices from $550,000 to over $763,000 will enhance values in the neighborhood.

2.6.2. Compatibility

TOHOA points out that the properties adjacent to the Club property are on lots with widths of about 100'. The redevelopment plan envisions developing lots with widths of 60' to 80' on properties along the boundaries of the Club property and homes on lots ranging from 50' in the interior of the property. Importantly, the plan shows a very large, landscaped buffer/open space surrounding the redevelopment ranging from 50' to 125' wide.

[6] Frost (2019), pages 195-203.
[7] Golf Course Meeting Talking Points at https://www.tohaweb.com/home

The combination of larger lots 60/80's on the periphery coupled with the large, landscaped buffer mitigates any concern over compatibility.

2.6.3. Adequate Public Facilities

TOHOA complains that adding 276 additional housing units will overstress public infrastructure, hospitals, schools, water, and sewer facilities. There is no basis for these claims. The relatively small number of additional homes in the project will not stress existing facilities and infrastructure. Adequate utility services are available. Moreover, new housing with modern conveniences and design will invigorate older homes to be updated, which may also be a benefit to homeowners against potential property losses from extreme weather-related storm events, as well as the City of Ormond providing hurricane relief expenses to an older outdated neighborhood. Hospital facilities and school space is adequate relative to the increment of demand from the redevelopment. Finally, as demonstrated in the fiscal impact analysis, the redevelopment project will generate very substantial financial surpluses to the City that can be tapped to fund any additional public facilities.

2.6.4. Stormwater Runoff

All new developments in Florida are not allowed to generate more runoff after development than in the pre-development state. The redevelopment of the Club will provide adequate stormwater detention and treatment facilities.

2.6.5. Traffic

Traffic is dealt with at the permitting stage. The project is engineered to direct all its traffic via Tomoka Oaks Boulevard to Nova Road. Project traffic may exit the community on alternative roadways; however, those are longer and circuitous. Additionally, the alternative longer routes will provide emergency ingress and egress.

2.6.6. Quality of Life

TOHOA is concerned over traffic and noise during the development period. As noted above, the traffic is routed via Tomoka Oaks Boulevard to Nova Road and internally does not go through the existing neighborhood. Again, the direct route to the collector roads is out to Nova Road. Concerns over greenspace is mitigated by the landscaped perimeter buffer and the PRD open space requirements.

4. Conclusions and Final Observations

The redevelopment of the Club into Tomoka Reserve will have substantial positive economic and fiscal impacts on the surrounding neighborhood and on the citizens of Ormond Beach. Our analysis demonstrates that redevelopment of shuttered golf courses can be expected to enhance the values of surrounding residential neighborhoods. The hedonic pricing analysis supports this view for Tomoka Reserve.

The redevelopment also generates significant fiscal surpluses for the City's budget. This will enhance the City's capacity to provide services and facilities to all the residents of Ormond Beach.

Golf is steadily losing players. When the Sports & Fitness Industry Association released data on the number of players in 2015, it showed the sport's lowest point in recent memory.

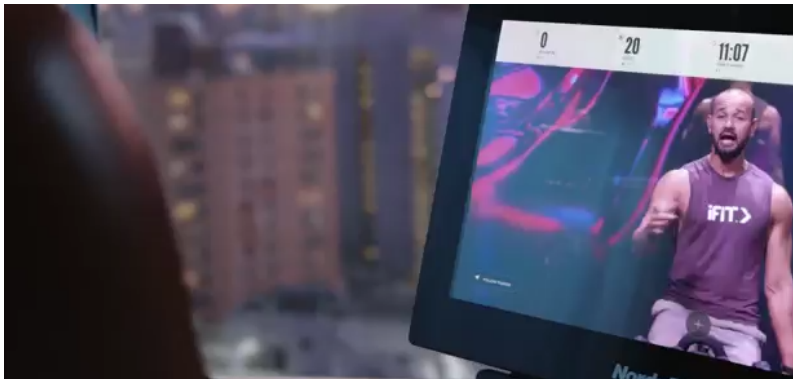
More than 800 golf courses have closed across the United States in the past decade, and millennials don't appear to be as interested in the sport as generations past.



Shifts in work culture and the economy are partly responsible for this decline in popularity, as more people

are working long hours and no longer have as much time to invest in golf.

But there's an upside to these closures: lots and lots of new space for developers.

Former golf courses are now being turned into residential areas, industrial spaces, parks, and detention ponds. Take a look at a few of the ongoing projects below.

Beyond residential units, some developers have decided to turn former golf courses into detention ponds.

Friends reunite in the middle of a flooded intersection as water continues to rise in their neighborhood following Hurricane Harvey on August 30, 2017 in Houston, Texas. Getty Images

When Hurricane Harvey hit Houston last year, it destroyed between 30,000 to 40,000 homes, damaged power lines for thousands of residents, and waterlogged roughly 500,000 cars.

POPULAR WITH SUBSCRIBERS

Real estate investing strategy, acquire property without down payment

Scientists say climate change will keep making storms like Harvey more destructive, so flood-prone areas like Houston are looking for ways to reduce future impacts.

In Clear Lake City, which is about 20 miles outside of downtown Houston, the water authority is turning a former golf course into detention ponds that can reduce flooding.

Jerry Hamby/Exploration Green

Real estate investing strategy, acquire property without down payment

Four of the ponds were not yet built when Harvey devastated the city, and the fifth one was only 80% complete. Still, that pond kept about 100 million gallons of water from reaching Houston's drainage system.

Jerry Hamby/Exploration Green

This project, which broke ground in 2016, will cost $28

million and is expected to be finished by 2021. The five detention ponds will be able to hold half a billion gallons of stormwater.

Kelly Shipley, a project manager, previously told Business Insider that about 200 nearby homes were saved from flooding due to the pond.

Jerry Hamby/Exploration Green

By the time the project is done, the five ponds will be able to protect about 2,000 homes from flooding, Shipley said.

Wilson Gee, a California businessman, shuttered the golf course, erected barbed-wire fences, and began looking for a buyer, telling reporters the land would never be a working golf course again. Homeowners, complaining he was turning the course into an eyesore in order to win approval to redevelop it into single-family homes, sued to reopen it. Gee shanked his first attempt to sell it in 2014, when one homebuilder walked away from a deal, but last year found a buyer in a Denver-based developer.

Then one night in February, the dark clouds turned to smoke, and a fire caved in the clubhouse roof.

It's a local story, defined by conditions peculiar to Ahwatukee, a community of about 80,000 separated from downtown Phoenix by a collection of 2,500-foot peaks known as South Mountain. But the dynamics that bred the deadlock between the struggling golf course's owner and its aggrieved neighbors are mirrored in communities across the country.

More than 800 golf courses have closed nationwide in the last decade, as operators grapple with declining interest in the sport and a glut of competition. Many of those shuttered courses were built on land proscribed from redevelopment by local zoning codes seeking to preserve open space—or, as with Ahwatukee, by deed restrictions intended to protect homeowners who had paid a premium to live near a golf course.

That leaves some golf course owners with the real estate equivalent of an unplayable lie: They can't make money running the course, and they can't recoup their investment by selling it.

"If you open a restaurant in a strip mall and you fail, you close shop and move on," said Jay Karen, chief executive officer of the National Golf Course Owners Association. But for golf course owners, it's much harder to pull the plug on a failing business; as courses fall into disuse, they become suburban zombies–not quite dead, yet far from alive.

"Nobody's tracking what's happening to the land," Karen said.

In April, fire ripped through the clubhouse at a shuttered western Kentucky golf course that had been the center of a lawsuit, burning through the afternoon until the roof collapsed over smoldering beams. On New Year's Day, a former volunteer firefighter lit a small fire outside the vacant clubhouse of a closed 9-hole course outside Orlando, then returned three days later to

homeowner association to pay an additional $28 a month for course upkeep, Rhoads said. The homeowners demurred, the course was shuttered, and the clubhouse became a magnet for vandals, who posted graffiti on its stucco walls and eventually burned it down. Now Rhoads worries that the owner is making an end run around the homeowner association to convert half of the course into new homes and a winery.

"This used to be one of the nicest golf courses in Reno-Sparks," he said. Now? “Our property values are already down $25,000 a home."

To some extent, all those course closures are simply a market correction: The golf industry went through a building boom in the 1990s and early 2000s, driven by developers who used golf courses as amenities to help sell homes. But the closures also reflect changing preferences for leisure activities. Participation in the sport is down 20 percent since 2003, according to data from the National Golf Foundation, and homebuilders have moved on to new types of recreational amenities, including manmade lakes and agricultural communities. Lately, the equipment business has been feeling the sting, with Nike Inc. announcing that it would stop making golf clubs and retailer Golfsmith International Holdings Inc. considering bankruptcy.

In the face of declining interest and competition driven by oversupply, course owners have gone searching for ways out. Some have donated golf course land to nature trusts and local parks, taking a tax break in return for preserving the open space. Others have inked deals with homebuilders—though those deals are often contingent on winning approval from homeowner associations or local governments.

“I’m hard-pressed to think of many cases where there isn’t a higher or better use than a golf course for the site,” said Jeff Woolson, managing director of the golf and resort group at CBRE Group. “The only clear exception would be Augusta, Ga.”—the hallowed, Bobby Jones-designed course that hosts the Masters tournament each year.

Lately, the fight in Ahwatukee has reached a new pitch. In July, a Maricopa County judge declared that deed restrictions required the "operation of a golf course" on the property. Then a local television station reported last month, citing unnamed fire department sources, that the

David Sabow, managing director at True Life Companies, said the lawsuit will be moot if the developer can win over the homeowners, but if need be, it's prepared to litigate for years.

"We spent a lot of time and effort to come up with a plan that the community would welcome," he said. "As far as I'm concerned, the property will never be a golf course again."

Gee, for his part, is glad to have washed his hands of it.

"People don't like change," he said. "But the golf industry is in even worse shape today than it was in 2013 when I closed the course."

Atlantic Beach Country Club

ATLANTIC BEACH PARTNERS

The Atlantic Beach Country Club sits a few blocks west of the Atlantic Ocean, just east of Jacksonville. On the right, Sherman Creek separates the new clubhouse, swim, tennis, and fitness facilities from the rebuilt golf course and new residences.

PROJECT SUMMARY

The Atlantic Beach Country Club rejuvenated what had been a faded 18-hole golf course in the small town of Atlantic Beach, Florida, adjacent to Jacksonville. Adding 178 new single-family houses on 50 acres in the center of the 170-acre property financed entirely new facilities for the country club, reviving the club's flagging membership. The new country club includes a redesigned 18-hole golf course and an expanded clubhouse with additional amenities. The new houses, ranging from 2,000 to 4,000 square feet, were built by both production and custom builders in a mix of regional architectural styles. The town supplied reclaimed water for irrigation in exchange for an open-space easement over the golf course.

Introduction

For decades, wrapping quarter-acre lots around a golf course was a surefire recipe for success in the suburbs. Since 2005, though, golf's fortunes have changed: the number of American golfers has shrunk by 20 percent, with an especially sharp decline among young adults. Spending four hours to play a single game—and years to master the sport—seems less enticing in an era of more fleeting pleasures. Golf's core devotees are just as enthusiastic as ever, but many country clubs are seeking broader membership bases and revenue streams to deal with rising facility maintenance costs—especially for properties that may now be 40 or 50 years old.

At many golf courses, the response has been to close the doors: 800 courses have closed nationwide since the mid-2000s. Yet redevelopment of those courses has often proved contentious; many neighbors strongly value having open space nearby, even if they are not paying for its upkeep.

Not far from the World Golf Hall of Fame, a redevelopment in Atlantic Beach, Florida, shows a different way forward. The Atlantic Beach Country Club (ABCC) shows how careful infill development can retain open space and habitat, improve the golf experience, infuse new life into country clubs, and improve local water quality, all while delivering new homes within a growing metropolitan area.

ATLANTIC BEACH COUNTRY CLUB

The front nine holes wrap around the houses. In the few areas where houses are close to the course, trees and water provide a visual and physical buffer.

ATLANTIC BEACH COUNTRY CLUB

The famed 18th hole is part of the back nine, along Sherman Creek, which has expansive views and houses on only one side.

Site and Context

In the 1960s, the Selva Marina Country Club (SMCC) was the toast of Jacksonville. The country club was built just west of Selva Marina, a subdivision of rambling ranch houses on spacious lots a few blocks behind the dunes in the sleepy seaside city of Atlantic Beach. Just beyond the SMCC's western fence were used-car lots along busy Mayport Road, but on its eastern edge only Sherman Creek and a few blocks of houses stood between it and the ocean. Within the club, members from nearby and across the growing metropolis enjoyed golf, tennis, swimming, and dining.

The Jacksonville area already had a reputation as a golf destination, but the SMCC drew curiosity seekers because it was only the second course built near the beach. Thousands of spectators turned out for an exhibition "dogfight" between Arnold Palmer and Sam Snead in 1962, for the first Greater Jacksonville Open (GJO) in 1965, and for the following GJO—when Jack Nicklaus hit the first double eagle in a televised tournament, taking the par-five 18th hole in just two strokes.

As both the Jacksonville area and the game of golf grew, attention drifted to still-greener pastures farther south. The GJO became The Players Championship and moved five miles south to Ponte Vedra Beach, while metro Jacksonville sprawled far to the southeast toward St. Augustine. The SMCC became just one of 70 golf courses scattered around northeastern Florida.

Although the SMCC may no longer have drawn crowds of spectators, it still had an enviable location for locals. Atlantic Beach sits at the northern end of the Jacksonville beaches, a trio of communities first settled as resorts by Florida's railroad magnate Henry Flagler at the turn of the 20th century. As cars supplanted trains, tourism shifted to areas along the main highways—and because Naval Station Mayport guards the mouth of the St. Johns River to the north, Florida's busy coastal highway (Route A1A) detours inland of Atlantic Beach. As a result, the city is a quiet cul-de-sac at the edge of Jacksonville, its three miles of coastline and quaint town center unburdened by through-traffic.

Unlike more commercialized areas to its south that cashed in on tourists and retirees, Atlantic Beach maintained a laid-back beach-town vibe

ERIK LARSEN

The Selva Marina Country Club before rejuvenation. Brackish irrigation water had poisoned the grass, and the flat landscape drained poorly.

and a family-friendly character. Its status as one of the few incorporated suburbs of Jacksonville (which consolidated with its county in 1968) gave it a degree of self-control unusual in the area. Also unusual was its scale: in a region where everything seems a half-hour drive away, Selva Marina residents "can ride bikes or golf carts down to the beach" or to the town center in just a few minutes, says Leed Silverfield, president of the Silverfield Group, one of the project's developers.

Atlantic Beach instead evolved into a bedroom community, 15 miles east of downtown Jacksonville and even closer to the new job centers in Jacksonville's southeast. As industries like banking, insurance, and health care grew to complement the region's core industries of logistics and defense, Atlantic Beach found new fans as investment bankers and surgeons moved to the area. Yet because the city was largely built out by the 1980s, the local housing stock was not keeping up with changing tastes.

The SMCC golf course, though, was literally dying from within. The irrigation water that the course drew from Sherman Creek, which cuts diagonally across the property, grew more brackish and gradually poisoned the grass. Even freshwater was more curse than blessing: the flat, featureless plain drained so poorly that "a one-inch rain closed the course for the next day," recalls Erik Larsen, a longtime member of the SMCC and designer of the new golf course. Prospective new members were drawn to the mushrooming competition, and existing members drifted away. "The club was in a slow downward spiral; membership dropped and maintenance was deferred, until the club was on the verge of bankruptcy," notes Larsen.

The Idea

Developers had long coveted the SMCC site because it was "one of the very few large open tracts in the beach communities," Larsen says. Silverfield calls the site "a once-in-a-generation opportunity. Atlantic Beach is a highly desirable area, but it's entirely built out." The city of Atlantic Beach also saw tremendous value in maintaining an open-space buffer at its northwestern flank and even once considered purchasing the club for a new park—but the capital investment needed for repairs proved too daunting. By a quirk of geography, most of the golf course sat beyond the city's boundaries and had been zoned by Jacksonville for multifamily development.

Yet the country club's tight-knit leadership was reticent about selling the land and disbanding the club. Its member-owners were in charge of its fate and wanted to see the club survive—but they needed money, both up front to reinvent the club in the short term and over the long term to sustain the club's finances for future generations of members. Doing so would require not just a reborn golf course but additional amenities to broaden the club's appeal: a larger clubhouse, more dining options, more fitness options, a better swimming pool, and more golf practice and training areas.

Even beyond its sentimental value, the country club still had a compelling market in Atlantic Beach. The area's continued population

ATLANTIC BEACH PARTNERS

An aerial view of the residential area, under construction. About half the houses are within a core area, and half are on culs-de-sac reaching into the course.

growth and strong golf-tourism market ensured that a rejuvenated golf course could hold its own—provided that it was part of a club that could draw on a broader market with a more diversified revenue base.

A partial land sale was another option that could split the difference and provide each of the parties with what they wanted: the club could get all-new facilities without any upfront investment, the city could retain an open-space buffer, and a developer would have country club homesites to sell. To pull such a deal together would require finding a compatible developer who understood the value that a new club would create all around. A deal came together in 2006 to develop the land as the Cove, a tight grid of formal neotraditional houses clustered on small lots at the southeast corner of the site, with a nine-hole golf course on the remainder of the site. That plan even made it through rezoning, but it collapsed amid the economic turmoil that soon followed.

Yet Atlantic Beach's intrinsic appeal meant that its housing market proved resilient in the aftermath of the 2008 recession. Prices not only rebounded, but per-square-foot prices soon rose back above replacement cost, and teardown activity resumed.

Larsen raised the idea again with Pete Rodrigues, a club leader who shepherded the process through the board. The board put out a request for proposal and began reviewing the responses. Mike Carlin, then president of the SMCC, recalls: "We had been working with several groups, and even had a draft contract prepared. Then we got a call from a member with a referral, determined that they were real, and got good references. Even though we were about to sign the deal in the next couple of days, we decided to meet—and they knocked our collective socks off with their proposal."

The dark-horse bidder was a trio of local developers who joined as Atlantic Beach Partners LLC (ABP): Silverfield Group, Wood Development Company, and W.R. Howell Company. This group's key advantage was that it shared the SMCC's vision of bringing a best-in-class country club facility to Atlantic Beach—not just to pamper the SMCC's members but also to maximize value. Silverfield says, "Other developers came up with plans that worked best for their pro forma, but we had a plan that worked for what the club wanted." According to Carlin, ABP's approach "was very unusual—they had already cut the deal and came back and asked about expanding the clubhouse. They treated it like a partnership; we both wanted this to have a certain character, to realize a vision for what this could become."

Development Team and Finance

The three firms in ABP had collectively developed over 15,000 residential lots in the market, but few with such a large upfront capital investment. They began moving quickly, moving from contract to closing in one year and to grand opening just ten months later. ABP brought Larsen on board soon after landing the contract, knowing his familiarity with the site.

Financing the construction proved to be a key sticking point. "We had a solid group of local developers with decent equity and an experienced team," recalls Silverfield, "but lenders were cagey. Especially for groups from out of town, 'golf course' was like a four-letter word—a hard sell. It didn't matter that we were tearing up the old course and putting in a new course, rather than adding to the supply. They were just concerned that golf was overbuilt." Community banks could see the appeal of an infill site close to the beach in a prime submarket, he continues, "but the dollar amount was too big. . . . National banks weren't willing to take that big a risk in a down market."

That left private debt. "We found a local group that we had connections to, a collaboration between two entrepreneurial real estate investors with opportunistic funds," notes Silverfield. "Having a local lender who knew

SITE PLAN

EUTHENICS

the demand really helped." Even then, the underwriting was rigorous: an $18.75 million loan with a 60 percent loan-to-cost ratio, a 50 percent presale requirement, and a "last dollars in" rider so that the funds disbursed only after equity and presale revenue. The lender was paid a base interest rate and a cut of each lot sold.

"It would have been nice to have all custom homes, but we needed at least one merchant builder to take down those lots quickly" and to meet the presale requirement, says Silverfield. That merchant was Toll Brothers, which purchased 90 lots; they were a "natural fit given their luxury profile—but with the purchasing power and credit of a merchant." Stacia Moore, senior project manager at Toll Brothers, echoes the sentiment: "This neighborhood is exactly Toll's brand," given its amenities and pricing. Toll's recent work was in more distant suburbs, and the firm initially had reservations about whether luxury buyers would opt for Duval County public schools. Steve Merten, division senior vice president for Toll Brothers, says that detailed research on the local buyer pool put those concerns to rest: "When we studied the whole area, we saw higher income levels due to the proximity to Jacksonville—and the beach lifestyle" was unmatched.

Another 30 lots were sold to Riverside Homes, an upstart local firm that "knew this would really launch their growth." That left 58 lots to sell at retail; some were sold to local builders for spec homes, and others were sold individually through a local brokerage.

"There was enough to do that everyone was actively involved, even without a set division of responsibilities," says Silverfield. In addition to paying the SMCC for the land, the developers spent $11.5 million to build the golf course and clubhouse.

Planning and Design

Atlantic Beach Country Club's site plan creates clusters for four distinct uses. The clubhouse, swimming pool, tennis courts, and fitness center greet visitors at the site's principal entrance from the east. Beyond a bridge over Sherman Creek, the new residences divide the golf course in two. Larsen points out that the practice area and "front nine holes wrap around the development in parallel," along the southern and western edges of the site, whereas "the back nine is a core layout, uninterrupted by roads or housing" along the creek at the eastern edge of the site. Larsen says that by clustering like uses, "the quality and value of each place goes up."

Whereas an earlier generation of country club developments sought to maximize the number of golf-frontage lots by double-loading fairways with houses on both sides, Larsen says that technique "banished the golf experience" by giving golfers an alleyscape of rooftops rather than broad views. Even where the ABCC has single-loaded fairways, Larsen continues, the course is designed so that views are "straight down the golf hole," with trees that soften the edge "and also help to pick up errant golf balls."

The layout was designed to maximize the golf experience with "varied shots, angles, tex-

Mature stands of trees were left on site, framing both the golf course and the new houses.

tures, and color" for golfers, Larsen says—both fun for casual or new golfers and "validat[ion] as challenging by area PGA Tour professionals." Not everything about the SMCC was discarded: the 18th hole was left intact, as an homage to Nicklaus's double eagle. Yet most of Selva's flat expanse was upended to vary the site's topography, taking a cue from the nearby sand dunes. Luckily, a vein of sand was hidden in the northwest corner of the site and could be mined for this purpose.

The new topography also helps with drainage—a critical issue since half the site was in a floodplain, and the flood storage volume had to be maintained. By "lifting the irrigated fairways, tees, and greens, we can carve out drainage channels between them," Larsen says, both as wet ponds and "dry drainage basins in the unirrigated rough areas between golf holes." The basins have standpipes and native plants that keep water from flooding the greens. Silverfield reports that the approach "did its job during the last hurricane."

The roughs were planted with 10,000 native plants—"sturdy vegetation that offers a great palette for the club's character," Larsen says, which also manages its water use, as it "took a bunch of the course out of irrigation." Wild grasses like muhly grass, cordgrass, and bahiagrass in the rough areas bleed directly into mulched or sandy areas.

Hundreds of existing trees already on the site were identified before grading and were retained or moved to new locations, creating a priceless instant tree canopy along the golf course with sabal palms, live oaks, coast oaks, longleaf pines, and saw palmettos. Landscape architect Kelly Elmore notes that the palms on the site "were acclimated to the soils, don't blow over, and are tolerant of high water" and were somewhat easily moved with a 90-inch spade. The site plan left other large trees standing, like a grove of maritime oaks that is now a centerpiece of the residential area, and relocated an osprey nest.

The oak grove and two ponds anchor the development's core, a compact area that accounts for half the house lots. The other half of the lots are along three culs-de-sac that branch north into the course for greater privacy. All but six of the lots back up to either a lake or the golf course.

Residential

Elmore took architectural inspiration from Atlantic Beach's charming older neighborhoods, whose durable and "timeless architectural continuity" evolved over several decades of construction. "We studied the old core and saw that we had to mix the lot sizes up." Five different lot sizes are interspersed at the ABCC, with lots ranging from 0.1 to 0.4 acres.

Considerable effort went into ensuring architectural quality and variety—including writing a pattern book that delineates four regionally appropriate styles—and making sure that every facade passes muster by an architectural review board. Merten notes that "the element of detail is unique at this small scale. Every little detail is reviewed—and then some." Builders were restrained from repeating the same elevation or plan too close together to avoid a cookie-cutter appearance.

The lots and streets are somewhat narrower than many of the local crews were used to; the streets have 50-foot rights-of-way and have to accommodate two additional utility pipes (for reclaimed water and natural gas). Planting street

PAYTON CHUNG

ATLANTIC BEACH PARTNERS

The golf course was extensively regraded to vary its topography, lifting fairways and greens and creating flood storage areas in the rough or sandy areas to the side.

trees proved impossible in that context, so instead the architectural guideline requires one shade tree in each frontyard.

Clubhouse

"To keep the club viable way out in the future, we built amenities that both the homebuyers and the [current] members will want," says Carlin, with new attractions and membership categories for nongolfers. The amenities included a zero-entry swimming pool, fitness center, and both formal and informal restaurants. As the project progressed, the scope of the clubhouse crept upward as both the club and developer agreed that expanding the club's offerings had value: from 5,000 square feet in the initial request for proposal to 12,000 square feet, and finally to 16,000 square feet. One unexpectedly popular area is a grassy, fenced-in "backyard" between the clubhouse's grille and pool deck, which has become a favorite gathering spot for neighborhood children.

Elmore recalls that "propitious timing" also allowed the clubhouse to expand. "The three-quarter-acre residential lot next to the clubhouse came up for sale. We did a third-party sale, since the owner would never sell to the club." The additional land on the east side of Sherman Creek allows the larger clubhouse, tennis courts, pool, and parking lot to all fit east of the creek.

Approvals

The site had been rezoned in 2007 with a cross-jurisdictional planned unit development (PUD) adopted by both Jacksonville and Atlantic Beach. This time around, Atlantic Beach took the lead on rezoning the entire site. The previous PUD permitted 180 houses, and the new Special Planned Area permits 200—178 were built, but another 22 could be built where the driving range sits. An impervious site coverage limit of 65 percent and a 35-foot height limit apply across the site. Elmore says that "there was good cooperation with the city," in part because the proposed plan was superior in many respects to the existing entitlements.

The golf course's secondary entrance, leading toward Mayport Road, was built with a gate at the city's request. The gate keeps cut-through traffic on the highway.

Water

The new golf course would have been impossible without a new source of freshwater—an increasingly rare resource in Florida, where groundwater supplies are strained and saltwater

ATLANTIC BEACH COUNTRY CLUB

Three "cottage courts" are among the 178 houses on site. These four-house courts sit on half-acre parcels.

intrusion threatens surface waters. According to Silverfield, "It was in the city's best interest, the club's, and ours to make the water work."

Atlantic Beach offered to extend its water supply, in exchange for a permanent recreation and green-space easement over the golf course (the driving range excepted), and cooperation with annexing the entire site to the city. Silverfield says that the easement helped both parties: "So long as the city delivers water, the course can't be used for anything other than recreation. . . . The green-space easement gave our buyers a lot of peace of mind."

For Atlantic Beach, the golf course was also a water management opportunity. The city was already obligated to upgrade tertiary treatment at its wastewater treatment plant (WWTP), just 350 feet south of the golf course's southern boundary—resulting in reclaimed freshwater suitable for irrigation. Water reclamation would keep thousands of pounds of nitrogen and phosphorus pollution out of the St. Johns River.

Yet the opportunity had three wrinkles: (a) the new treatment facility had to be squeezed into the northern margin of the WWTP site, between the existing outfall and the golf course; (b) it had to be completed very quickly (the contract was approved in May 2013, and water had to be delivered in March 2014); and (c) although the average daily volume of water would be 0.4 million gallons per day, the course would need 1 million gallons per day for the grow-in period.

The solution was to reuse existing water tanks as a temporary disinfection facility for the first eight months while new chlorination and pumping facilities were built. An unused water main already ran from the WWTP along the golf course's western edge and would deliver the reclaimed water to a new 2.5 million-gallon, clay-lined storage pond. The city spent $1.4 million in total, including a $442,000 grant from the regional water management district.

Construction

With less than one year from ground breaking to opening, the sheer scope of regrading necessary to overhaul the site required a tremendous effort. "At one point, we had the site contractor working double crews here," recalls Silverfield. Luckily, he continues, the effort paid off: "We were able to plat the first few lots before we were finished with grading and start the model homes six months before everything else was in. . . . By the time we had roads open, we already had a ton of momentum" on home sales. Elmore also credits weekly staff meetings with quick resolution of issues as they arose.

Performance, Marketing, and Management

The residential lots sold out ahead of schedule, in about 18 months, at prices above pro forma—with the final lots selling for $370,000. The homebuilders also began building out their final tranche of lots ahead of schedule.

Equally important, the country club is now thriving. From 2013 to 2015, it swung from just barely breaking even to running a first-quarter operating surplus of over $360,000, thanks to a doubling of recurring revenue. Membership has grown from fewer than 200 to nearly 800, and the formerly sleepy clubhouse is now

ATLANTIC BEACH COUNTRY CLUB

The new clubhouse draws architectural cues from buildings in historic parts of Atlantic Beach.

abuzz day and night. Furthermore, 80 percent of the SMCC's members carried over to the new club—even paying half-rate "construction dues" for an entire year without having home facilities—and an influx of new homeowners has filled the new nongolf membership categories. The club now boasts the youngest average member age among its peers.

The redesigned golf course has garnered national attention: in 2014, it was named one of the Best New Courses by *Golf Digest* and a Renovation of the Year by *Golf Inc*. In 2017, the PGA's Web.com Tour Championship will again bring crowds of spectators and live TV cameras to the SMCC's famed 18th hole.

Marketing efforts began the moment "our plans were approved and we had zoning," says Silverfield; with a tailor-made list of potential customers—"we had a member special preview event at the old clubhouse, and club members had the first shot at reserving lots." Word of mouth has continued to grow, adds Moore. "As the community comes to life, it's starting to sell itself." Elmore estimates that about half of the buyers are new to the area, and one-fifth are neighborhood residents who want a newer, lower-maintenance house. One quirk that those who relocated appreciate is that the site, unusually for Florida, has natural gas; thus, homes can have fireplaces, gas cooktops, and instant water heaters.

East-facing lots were among the first to sell, both for the view over the back nine and for the ocean breezes. Lots facing the ponds and woods were also popular, says Elmore. "Many people didn't want to be directly on the golf course but wanted open views."

Homeowners are obligated by covenant to be members of both the country club and a homeowners association. Cost-sharing agreements are in place between the club and HOA for shared elements on the property that are not owned by the club, such as the entrances, and the HOA maintains spaces like the mail kiosks.

Observations and Lessons Learned

Larsen is optimistic that the precedent set at the ABCC can be "a solution to revive hundreds, even thousands, of failing golf communities" across the country. Developing only a fraction of the land meant "the country club realized capital from the land sale, receives mandatory dues and use revenue from the new neighbors, and got an entirely rebuilt facility, all in two years—legitimately a win-win situation."

An earlier generation of golf courses were not designed with land efficiency in mind, so it is not difficult to carve anywhere from 5 to 50 acres from the interior of a course—however much land is needed for a functional development parcel. "By moving a golf hole, I can probably also make it a better, safer, and more functional" golf course, says Larsen. "This model is good for golf," he continues, since it

keeps golf courses in operation "without changing ownership and without changing use . . . and can rejuvenate a club with recurring revenue and social activity." The best candidates for a partial-infill approach would be those with high land values, strong underlying markets for golf and residential, and a parklike layout with few double-loaded fairways.

At the ABCC, the lack of adequate freshwater was a key factor that led the club to choose redevelopment. Nationwide, increasingly scarce water will require more collaboration between developers, municipalities, and major water users like golf courses. Reclaimed water (also called recycled water) particularly is growing in popularity; according to the U.S. Golf Association, it accounts for over one-fourth of all golf course water use. Recycling is also becoming more common for potable water; San Diego plans for recycled water to account for one-third of its water supply by 2035.

Silverfield credits the partial-infill approach for smoothing the development process. Keeping the club meant that "the interests were aligned between the club and developer" and contributed to "a strong relationship with the city and neighbors—so you're not swimming against the current, but with it." He continues, "The faster we sell those houses, the faster those people become members of the club—it's a symbiotic relationship." Yet finding the right balance at the ABCC took several tries: "It doesn't matter how fantastic the golf course is, if it doesn't work from a real estate standpoint. I want a neighborhood and a golf course that work together well."

PROJECT INFORMATION

Development timeline

Selva Marina Country Club built	1958
Planning started	November 2012
Land contract signed	January 2013

About the Urban Land Institute

The Urban Land Institute is a global, member-driven organization comprising more than 40,000 real estate and urban development professionals dedicated to advancing the Institute's mission of providing leadership in the responsible use of land and creating and sustaining thriving communities worldwide.

ULI's interdisciplinary membership represents all aspects of the industry, including developers, property owners, investors, architects, urban planners, public officials, real estate brokers, appraisers, attorneys, engineers, financiers, and academics. Established in 1936, the Institute has a presence in the Americas, Europe, and Asia Pacific regions, with members in 76 countries.

The extraordinary impact that ULI makes on land use decision making is based on its members sharing expertise on a variety of factors affecting the built environment, including urbanization, demographic and population changes, new economic drivers, technology advancements, and environmental concerns.

Peer-to-peer learning is achieved through the knowledge shared by members at thousands of convenings each year that reinforce ULI's position as a global authority on land use and real estate. In 2016 alone, more than 3,200 events were held in 340 cities around the world.

Drawing on the work of its members, the Institute recognizes and shares best practices in urban design and development for the benefit of communities around the globe.

More information is available at uli.org. Follow ULI on Twitter, Facebook, LinkedIn, and Instagram.

Closed Courses Spur Development Frenzy in South Florida

By Joe Barks | October 28, 2019

Shuttered golf course properties have become "the latest construction frontier," as developers look for available greenspace in a region where land scarcity has led to rising acreage costs. "If golf had stayed wildly popular, it would make it even more difficult to solve the housing problems we have in Southeast Florida," said one expert.

Construction crews soon will pour concrete over the greens and sand traps at the long-closed Oak Tree Golf Course in Oakland Park, Fla., to make way for 405 single-family homes and townhouses, ***Law.com*** reported.

The development follows the fate of the Hillcrest Golf Course in Hollywood, Fla., which is now home to over 300 residences, with more to come, ***Law.com*** reported. The story is the same at Boca Lago Country Club in Boca Raton, Fla., where one of two courses will be built on (https://clubandresortbusiness.com/developer-purchases-portion-boca-lago-cc-8-3m/).

South Florida golf courses are the latest construction frontier as developers home in on financially strained greenspace, ***Law.com*** reported. The courses are welcomed by builders facing land scarcity.

"It's probably a combination of the struggle of the golf industry, where there's just too many golf courses in South Florida, combined with the lack of developable land in South Florida, because you have natural constraints with the ocean and the Everglades," Brent Baker, who leads the Southeast Florida division of homebuilder PulteGroup Inc., told ***Law.com***.

"There's a lot of natural constraints," Baker added. "There's not a lot of land. Some of these closed golf courses become sites that developers like ourselves want to look at, to see if there's any viability in converting [them] from golf course to residential." As South Florida courses began to close, developers like Pulte started taking a hard look at them in 2015, Baker told ***Law.com***.

The former Hillcrest course near Memorial Regional Hospital South is set to become the Parkview at Hillcrest, *Law.com* reported. A total of 643 single-family homes ranging from three to six bedrooms will be built, with half already completed.

Pulte also is building the 130-home Boca Flores, a 55-and-older community on an 18-hole course at Boca Lago Country Club, *Law.com* reported. The country club kept its other18-hole golf course.

Similarly, the 152-home Enclaves at Woodmont, another Pulte project, is rising on part of the Woodmont Country Club in Tamarac, Fla., with about 20 homes, varying from two to six bedrooms, now completed. Woodmont closed nine holes where Pulte is building the homes, and kept a 27-hole course open.

Another target, *Law.com* reported, may be the 36-hole Inverrary Country Club in Lauderhill, Fla., which has said it will close next June after opening in 1970 (https://clubandresortbusiness.com/inverrary-cc-announces-shutdown-date/).

"After many years of operational losses where revenues have not been sufficient to cover the expenses, the club ownership has determined that golf course operations are no longer viable at Inverrary," said David Husman, a partner at Inverrary owner Victorville West LP. "It is time to redevelop the entire property to other permitted uses."

At the same time the course closures have accelerated due to the golf market stabilizing after its boom era in the late 1990s and early 2000s, *Law.com* reported, the land has taken on higher value as a development site.

"When courses close whether in South Florida or elsewhere, it's typically because there's enough existing supply in the area. Often, it is also tied to the value of the land itself," Eric Matuszewski of the National Golf Foundation told *Law.com*. "Many owners sell as part of a planned exit strategy, and that valuable land is then used for higher and better uses, whether that's development or open space.

Pulte paid $10.2 million for 44 acres at Woodmont, or $231,818 per acre, and $25 million for the 150-acre Hillcrest property, or $166,667 per acre, *Law.com* reported. The price is not necessarily cheaper than other land deals that don't involve golf course properties, and the houses that are built on the courses sell at market rates.

Still, golf courses making way for new housing could be good news for the affordable housing crisis by expanding the housing stock, *Law.com* reported.

Ken Johnson, a professor at Florida Atlantic University, said golf course redevelopment, although often opposed by neighbors, is generally good news for nearby property owners and public coffers.

"If you are on a course that's been poorly maintained or it's vacant, it's not helping your land value," Johnson said. "To have new housing developed around you is probably positive, as long as its quality and style is similar to what's around the golf course."

But it won't be seen as good news for existing homeowners of manicured $750,000 homes to get a next-door condominium development at $250,000 per unit, *Law.com* noted.

"Golf courses in general are a net positive to the supply of land to develop property. Without them, things would be worse than they are," Johnson said. "If golf had stayed wildly popular, then it would make it even more difficult to solve the housing problems we have in Southeast Florida."

Golf Course Communities' Double Bogey

Advertisement

Demand for Country Club Lifestyle Dries Up in Overbuilt Washington Suburbs

By Anita Huslin
Washington Post Staff Writer
Monday, August 11, 2008

It wasn't long ago that real estate developers could build a golf course community and collect a $30,000 premium from customers who might not have even played golf, but aspired to the country club lifestyle.

Not anymore. Projects have been put on hold or canceled because potential buyers are no longer willing to pay extra, can't qualify for a mortgage or can't sell their homes to trade up. Courses that were too far along to stop are struggling to find customers.

"People just can't afford the luxury of a country club. It's become much more aspirational," said Marc Montgomery, a developer who opened his third Washington area golf course community this summer. Like the other two, River Creek in Virginia and Cross Creek in suburban Maryland, his latest, Oak Creek, is the centerpiece of an exclusive luxury community. He has brought in a company from Pennsylvania to manage the golf operations but, he said, "it's hard to spend $12 million [on a course] and make it back at $50 to $100 a round."

"If you don't have enough people buying houses fast enough, it's never going to work," Montgomery said.

Sixty to 80 percent of people who live in golf communities don't play the sport, said Edward T. McMahon, a senior resident fellow at the Urban Land Institute in the District. Now that mortgage lending has tightened up and potential buyers are more price-conscious, "all of a sudden, the whole math changes," he said.

Eighteen months ago, buyers would gladly have paid a $25,000 premium for a lot on a fairway at the new Lake Presidential Golf Course, said Aref Hinedi, vice president of marketing for Texas-based Ryko Development. The course opened in May five miles from Oak Creek in Upper Marlboro. "It was simply a question of the bank giving them money," he said. "It was easy. Now the market is not there any more."

Developers are also seeing the residual shakeout of a nationwide golf construction binge that created an "unsustainable and unrealistic" number of courses at its height about eight years ago, said Joe Beditz, president of the National Golf Foundation.

In 1999, 509 new golf courses opened in the United States, compared with 113 in 2007, foundation data show. Industry officials project fewer than 50 will open this year. In addition, more golf courses have closed in the past two years than have opened, according to the NGF. "Rationality has returned to the marketplace," Beditz said.

Henry DeLozier of Global Golf Advisors, a consultancy to golf course developers and operators, said the Washington area was more overbuilt than other major metropolitan areas. About 15 courses in the planning stages at the end of 2006 have been deferred or dropped, he said.

Rounds of golf have also decreased, according to NGF data. Maryland courses reported 3.5 percent fewer rounds, and Virginia reported a 1 percent decline.

Since Lake Presidential opened in the Beechtree community in May, it has launched a variety of promotions, including senior discounts on Tuesdays, a Wednesday night women's league and a junior golf program, and hosted several fundraisers. For early joiners, there are no golf cart or range practice fees and no minimum spending requirements in the pro shop or dining room. The course bills itself as an upscale public course, with dramatic black sand bunkers, an old tobacco barn and two man-made lakes, and offers annual membership for $4,200 or daily walk-on fees of up to $95.

Membership development is coming along slowly. After more than three months, according to general manager Nathan Presnal, the club has signed about 50 members. Eventually, it hopes to have about 125.

John Shields, a past president of the National Golf Course Owners Association and current president of the Glenn Dale Golf Club in Glenn Dale, says his business is off 10 percent this year. He drives to competing golf courses from time to time, counting the number of cars in their parking lots. His club, he said, is on the losing end. He is trying to sell his property to a developer.

"My family and I have owned it for 50 years," said Shields, who said operating costs -- labor, fertilizer, irrigation, fuel for lawnmowers -- have been rising, along with competition. "It's just too difficult to earn a dollar."

He is not alone. By year's end, the owners of Beechtree Golf Course in Aberdeen plan to close it and redevelop it as a community of 735 new homes. At Hillendale Country Club in Baltimore County, members worried about the slowing economy put off a $2.7 million upgrade last year. There are no current conversations about when that might happen, club officials said.

And last summer, two pension funds bought the Leesburg-area Beacon Hill golf course at auction. They would like to sell it for redevelopment by the end of the year, according to Joseph Mayes, an attorney for the funds. But, he said, "we recognize that it's not a particularly good market at this point."

The appetite for land used by golf courses has decreased, said Global Golf Advisors' DeLozier.

"Most of the golf courses being closed and repurposed were being acquired by developers or large-volume home builders," DeLozier said. "Clearly, those folks are now on the sideline. So the elimination of golf courses we saw in 2005-6-7 has slowed because the capital market does not have an appetite."

Jack Kay, whose family has owned, developed and operated golf courses in the Washington region since 1938, closed the last one, Indian Springs in Silver Spring, two years ago, and is in the process of selling it to a developer.

"I wouldn't want to be opening up a new golf course right now," he said, noting that home builders' troubles are making life even more difficult for developers. Developers generally map out a project, sell lots to a builder, construct the golf course and then either sell it to a company that operates courses or turn it over to homeowners. That generally doesn't happen, however, until a development is well underway or completed, industry officials said.

Last Monday, one of Oak Creek's builders, Carl C. Icahn's WCI Communities, filed for Chapter 11 bankruptcy protection. It had completed several houses and a model home in Oak Creek but had not sold them all. Montgomery said he will find another builder to replace WCI, which did not return phone calls seeking comment.

"We have enough sales to offset our debt and make a little bit of profit," said Montgomery, who said that about 350 of 1,200 homes have been sold. About 50 of 400 or so club memberships have been sold, and the pace has been slower than Montgomery says he would like. "It isn't like it's coming to an end; it's just not a very good market," he said.

Golf Courses Emerge as a Fix for L.A.'s Affordable Housing Crisis

A Los Angeles architect argues that the solution to the city's housing woes might lie on the 18th green. Urban golfers don't agree.

Housing-starved Los Angeles maintains the largest municipal golf system in the United States. Should some of that land be used for something else? *Photographer: Patrick T. Fallon/Bloomberg*

The Rancho Park Golf Course is an 18-hole, par 71 municipal course in the affluent West L.A. neighborhood of Cheviot Hills, near Century City. The greens used to be the domain of a private club, but became part of a Los Angeles city park after World War II. It's the former home of the PGA's Los Angeles Open, and site of a handful of memorable golf milestones, including, in 1969, the second tour victory for Charlie Sifford, the first African-American pro to play on the PGA tour.

"It's a really pretty park," says Dermot Connell, an L.A. golfer who is very involved in the city's municipal circuit and serves as a Rancho Park board member. "From almost every point at Rancho, you can get a perspective of the city. It's unique in the sense that you're in the middle of a major metropolitan area – yet there you are, walking along a tree line in a little oasis of solitude."

ADVERTISING

Replay

However, the course looks a little different to Daniel Dunham, a designer at the Santa Monica-based Koning Eizenberg Architecture firm. To him, Rancho Park would be an ideal spot to build affordable housing.

How to Give a Modernist Icon a Makeover

Census Delays Threaten Latin America's Vulnerable

Dunham estimates that one could fit 15,000 units – homes for about 50,000 people – on the 200-acre site, which is also within walking distance of both an upcoming Purple Line extension and a station on the Expo subway line. And Rancho is just one of the 19 courses available to L.A. duffers – the city operates the largest public golf system in the United States.

"It's just such a huge use of land that I find it's pretty inexcusable in dense urban areas," Dunham says.

He runs a few numbers: Urban golf courses take up about 120 acres of land each, on average. That's about 2,300 acres of land occupied by courses within the city of L.A. alone. But there are another 68 golf courses – 12 public, 20 private, and 36 municipal – within 20 miles of Los Angeles, the course directory Golf Link says, bringing the total courses in the area to 87. Tally it all up and Greater L.A. is devoting more than 10,000 acres to the game of golf.

"If you can get something like 15,000 units in one place, then it opens up a lot of opportunities for

innovation and efficiency."

Dunham assembled this back-of-the-napkin estimate to illustrate just how much real estate is locked up in the game, even as Los Angeles continues to struggle with an affordable housing crisis. Current L.A. housing prices are averaged at 7.3 times higher than the median income, and racial disparities mean that nearly 40% of Black residents spend half their income on rent. The coronavirus is exacerbating the crisis further: In May, economists were warning of a 20% homelessness spike in L.A. alone.

But in Los Angeles, as in so many other cities, efforts to build more housing often face community resistance – a phenomenon that Dunham often sees from his perspective as a designer of multifamily housing projects. Back in 2017, Dunham worked on a five-story affordable housing development in Santa Monica that faced community backlash and concerns from residents about low-income renters bringing crime to the neighborhood. Still, the development has been in operation since 2018, housing people with an income between 30% and 60% of the area median income.

"People tend to be very supportive of affordable housing policy in L.A., but the thing that people tend to oppose is the project itself," says Dunham. "Once they see the proposal and that it's a big building in their neighborhood, then suddenly it's not good enough or not right for the neighborhood."

Efforts to build thousands of units of new housing for the city's soaring homeless population – a goal of the 2016 bond measure Proposition HHH – have fallen far short, in part because of community resistance, litigation delays, and stratospheric construction costs. The latest audit from the city controller revealed that the average cost to build a single unit stood at $531,000, as the *Los Angeles Times* recently reported, and only a small fraction of the anticipated projects have been completed.

The clear solution, according to Dunham, is to tap L.A.'s vast reservoir of municipal golf courses. He picked Rancho Park because of its strategic location and size. "The site is so huge, you could build a factory there, build the units on site, and crane them into place," he says. "If you can get

something like 15,000 units in one place, then it opens up a lot of opportunities for innovation and efficiency."

Just playing the Dunham's numbers game, a residential development in Rancho Park could accommodate most of L.A.'s nearly 60,000 homeless.

With its central location and good transit access, Rancho Park Golf Course in West L.A. might be a good candidate for housing-focused redevelopment. But the course's players don't agree. *Photographer: Bryan Chan/Los Angeles Times via Getty Images*

The idea isn't new. As the popularity of the sport fades (between 2002 and 2016, the number of players in the U.S. dropped by about 10 million people), proposals to redevelop the hundreds of shuttered and underutilized links are multiplying nationwide, and around the world. More than 200 golf courses closed in 2017 alone, according to the National Golf Foundation – a trend that some environmentalists celebrate, and that developers have tried to capitalize upon. Denver wrestled with a 2017 proposal to turn a 155-acre golf course into affordable housing units. In Kansas City, the local planning commission voted to approve a $105 million development on a vacant municipal course. New Jersey's Joint Planning Board approved 249 new dwellings on a portion of a 160-acre suburban course. And in Pennsylvania, a housing developer attempted to build 336 new family townhouses on part of a failing course's plot of land.

In all of these cases, however, the proposals were met with fierce resistance, as residents objected to potential traffic increases and loss of green space. Should Los Angeles try to repurpose any of its public courses, the opposition would be no less engaged, local players say.

Connell, for example, is not thrilled by Dunham's idea to build affordable housing units on the land now occupied by Rancho Park. "While recognizing that the homeless issue is real and that it's a very big burden on the city of Los

Angeles, I'd be personally very disappointed if they somehow managed to build on Rancho Park, or any of the city courses I play, for that matter," he says. Losing the course would remove a valuable community social center, and he predicted that nearby residents would wrap any such plan up in years-long fights for approval.

"I'm glad that people are thinking about ways to solve that problem," Connell says. "I would love it if they came up with other solutions other than knocking down Rancho Park. I just don't think it's practical."

Marc Dauber, another club member, also reacted strongly to the idea of redeveloping his local greens. Municipal courses like Rancho Park represent an affordable option for less-affluent golfers. "In order to join a private club in West Los Angeles, the cost is no less than an initiation fee of $225,000 with monthly dues of probably $1,500 a month." he says. "That obviously prices out a few people."

In comparison, a weekend round at Rancho is $45.50, although Dauber admits that it's not as well kept as some of the private clubs.

Cost isn't the only difference between country clubs and municipal golf. In this predominantly white sport, public city courses tend to be enclaves of relative racial and gender diversity, as a member of the City Park Players Club in Denver told the *Denver Post* in 2015. And they gained new value as safe sites for outdoor recreation during the coronavirus pandemic, which has at least temporarily delivered a surge of popularity to the pastime.

When Dunham's housing unit estimate was brought up to Dauber, he told me his instant reaction was to present his middle finger, and then suggested finding other solutions.

"I would use the course acreage as a last resort," he says. "I think there are other opportunities where they could find space. I'd also say that the land is worth so much, that I just

can’t see that being used for affordable housing. I’d rather see them go higher density in different places.”

But Dunham points to the fact that building housing just anywhere won’t solve the problem. “You know, L.A. has a lot of low-density areas that are really close to these trains,” he says. “We’re building these new lines that are hideously expensive, so you should want to be efficient with that money. It’s counterproductive not to put housing and offices adjacent to those lines.”

Dunham is not suggesting that redeveloping a golf course is going to be easy, even in a city that has 19 of them. But to him, the objections that the golfing community raised sound all too familiar.

“Sure, neighbors will sue. They’re going to say that it changes traffic, that it affects property value. They’ll do whatever they can,” he says. “And these kinds of people are very good at appropriating language of social justice movements, and they’ll claim that this is gentrification, or that this is displacement, which are real problems – just not so much in Cheviot Hills.”

Conceptual Master Plan for the potential phased redevelopment of 107 acres of golf course property withi

MANDATE

The Oaks of Kissimmee is a thriving master-planned residential community of 900-plus acres that was developed in the late 1980s around the Oaks National Golf Course. The property is located in unincorporated Osceola County, about 15 miles southeast of Walt Disney World Resort and on the northwestern shore of Lake Tohopekaliga.

Location

Kissimmee, Florida, United States

Services

Master Planning

During Florida's golf course development boom of the 1990s, 60 percent of courses built were tied to community developments. Developers saw golf courses as a major amenity that increased land values and sales turnover for single-family homes.

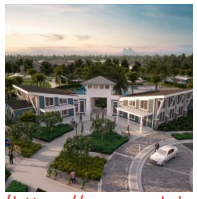
While it made business sense to subsidize the operating costs of a golf course to maximize the sales prices of lots within these communities, most developers' primary interest was in selling real estate and not in operating golf courses. As a result, many courses were not economically viable, and the golf industry was left with an oversupply that were not sustainable.

In response to the current state of the golf market, the Oaks National Golf Course owner engaged NAK Design Strategies to master plan for redevelopment options on 107 acres of golf course greens, fairways and driving range area.

Planning services by NAK's Orlando office have included amending the existing Planned Development (PD) zoning to include new Multifamily, Single-Family Residential and Commercial uses on the current golf course tracts. These uses are in line with a future land use designation of Low-Density Residential. NAK is also leading a recission of the property's DRI (Development of Regional Impact), which has become obsolete.

DESIGN INTENT

NAK and the client have taken a thoughtful approach on how to redevelop portions of golf course, without adversely impacting the comfort and property values of existing residents.



Of the 107 acres of underutilized golf course to be modified, 47 percent (51.2 acres) would be converted into new public green space, stormwater ponds and a new recreation facility for homeowners.

New playgrounds, fitness stations, playing fields, dog parks and an interconnected trail system would be introduced to the community through this redevelopment program.

Course News (/news/category/Course-News)
Top Stories (/news/category/top-stories)

Through funding provided by the United States Golf Association, researchers at the University of Minnesota and Michigan State University have reached a key milestone in the most comprehensive study ever conducted on the environmental impact that golf courses have on their communities.

The Community Values of Golf Courses project quantified the environmental benefits of 135 golf courses in the Twin Cities metropolitan area as compared with five other land uses: natural areas, city parks, suburban residential zones, urban residential zones and industrial parks.

The researchers demonstrated that properly managed golf courses provide the greatest amount of cooling among land uses, are more supportive of pollinators than urban residential or industrial areas, and retain more nutrients from stormwater runoff than suburban or urban residential areas. In general, this demonstrates that golf courses enhance surrounding communities in much the same way as city parks or open green spaces.

Correspondingly, the conversion of golf courses to residential or industrial use would sacrifice associated environmental value afforded to communities and could result in reduced biodiversity and increased temperatures and nutrient transport to surface and ground water.

A summary of preliminary conclusions from the ongoing project can be found in the **Sept. 4 edition of the Green Section Record** (https://www.usga.org/content/usga/home-page/course-care/green-section-record/58/17/ecosystem-services-provided-by-golf-courses.html), the USGA's digital magazine that offers the latest information on turfgrass culture, environmental issues, economic sustainability and research.

The research is part of the global Natural Capital Project composed of groups that have developed a systematic approach that places a value on nature and the benefits it provides to people and their communities. Formed in 2006, key collaborators include the Nature Conservancy, World Wildlife Fund, Stanford University, and the University of Minnesota's Institute on the Environment, among other leading sustainability organizations.

"This research marks a significant moment for public golf as courses around the country face the continued threat of redevelopment for residential and commercial use," USGA CEO Mike Davis said. "It is critical to the health of our communities, particularly in urban areas, that golf courses are viewed through the same lens as a city park or other similar green space, and value is placed on their environmental benefits as well as their balance sheets."

The models and methods used for the initial set of Midwest courses quantified their "natural capital" by applying globally accepted principles that quantify the value of golf courses in terms that land planners commonly employ when determining land use. The project is now being expanded to include more cities in order to document a set of community benefits of golf courses that will be applicable to most major urban areas in the country.

"As the world transitions to a more urban lifestyle, it is critical that we understand the consequences of development decisions on urban green spaces," said the University of Minnesota's Natural Capital Project program director Dr. Eric Lonsdorf.

"Examining the environmental and societal impact of changing a golf course's land footprint to a different land cover or management type can help us understand the implications of that decision on the ecosystem services provided by green spaces to the surrounding community," added Dr. Brian Horgan, a professor and the chairperson from Michigan State University's Department of Plant, Soil, and Microbial Sciences.

The work for the USGA will help golf courses – especially those owned or managed by municipalities, cities and counties – make decisions that account for the outdoor recreation they provide, the biodiversity and the habitats they offer for wildlife and food

pollinators, and the environmental benefits they deliver, including stormwater runoff mitigation, urban cooling and carbon sequestration.

The USGA signed a five-year master research agreement with the University of Minnesota in 2015 in an effort to develop solutions to golf's present and future challenges. The work was conducted by Lonsdorf, Horgan, Dr. Ben Jenke and Chris Nootenboom.

The USGA has invested nearly $400,000 into the Community Values of Golf Courses project over a three-year period as part of its annual investment in the Turfgrass and Environmental Research Program (TERP), the largest private research effort in the history of golf. Since the program's inception, the USGA has invested more than $41 million to advance golf by using science and innovation as the foundation to impact thousands of courses and millions of golfers.

Geared for outstanding assistant superintendents, the program opens its 15th edition with an online keynote.

October 15, 2020

Matt LaWell (/author/5239)

Career (/news/category/career)

Show & Event Coverage (/news/category/show-event-coverage)

After 14 years filled with live events and lots of networking, Green Start Academy teed off its Zoom Era on Wednesday afternoon.

Professional keynoter Jeff Havens delivered his signature blend of comedy and common sense, adapting his “Us vs. Them” presentation for a turfhead audience of assistant superintendents, alumni attendees, recognizable industry names, and representatives of sponsors Bayer and John Deere.

Havens delivered plenty of one-liners. He delivered plenty of practical advice, too, especially for folks working with those much younger — or much older — than themselves.

What can young people do, for instance, to meet old(er) people halfway? Appreciate that advancement is a process, for starters. Recognize and respect their experience. Talk with them to learn their strategies for success. Understand that your practices and processes exist for a good reason. Oh, and realize that not all new ideas are good ideas.

Likewise, what can old people can do to meet young(er) people halfway? Remember that loyalty should not be earned, not assumed. Appreciate that the world *seems* to be changing father for you than it does for younger workers. Realize that not all new ideas are bad ideas — and that some of those new ideas will be our best practices in three or five years, and there’s no way to predict that, so everybody needs to be a part of the conversation).

Advancement is a process that never stops. Sound advice for assistants on their way up the ladder, and sound advice for the folks closer to the end of their career than the beginning. “Nobody wants to feel like their 40 years of effort will disappear when they’re gone,” Havens said. “Old folks are looking for somebody to mentor, somebody to pass the torch to.”

Start your FREE one-year subscription to GOLF COURSE INDUSTRY to secure our next issue.

Bayer Golf customer marketing manager Mike Hirvela acknowledged that Bayer and John Deere wanted to meet attendees where they are — hard at work on the course and in the maintenance facility — to continue developing turf leaders through the Green Start Academy program.

"I know this is not how you anticipated this year going," Havens said. "I know it's not quite the same as an in-person event, but there are positives. For example, am I wearing pants right now? You don't know! I don't even have to! Maybe I am, maybe I'm not. It's so freeing and relaxing."

Green Start Academy is scheduled to continue each of the next three Wednesday afternoons and feature Carlos Arraya, assistant general manager at Bellerive Country Club in St. Louis, and veteran conference speaker Carol Rau. Other superintendent panelists include Bob Farren, of Pinehurst Resort, Lukus Harvey of Atlanta Athletic Club, Dan Meersman of Philadelphia Cricket Club, Grant Murphy, Barrie (Ontario) Country Club and PJ Salter of Riviera Country Club.

As the Highland Park Country Club golf course is converted to a more natural landscape, the Park District is taking pains to "frame" new types of grass and flowers with clear-cut margins, for both aesthetics and safety. (Park District of Highland Park)

Wildflowers spread across the Highland Park Country Club golf course in the northern suburb. Kids are welcome to run on the grass. Neighbors are invited to stroll through the park that now occupies the land, on their way to and from the city's downtown.

Golf courses are not just for golf anymore — not in communities that have figured out what to do with acreage abandoned by a shrinking sport.

With the sport of golf in a sand trap, some municipalities need to figure out what they want from foundering courses and brace for a rousing, if not bruising, community tug-of-war over what to do with the suddenly available land. A few communities, including Highland Park, played land-acquisition chess adroitly. Others are embroiled in neighbor vs. landowner controversies.

Converting golf courses to any other use is not as easy as it might seem. Regardless of the aspirations of the property owner and the ambitions of local residents, many courses are invisibly hemmed in by long-standing zoning and land-use restrictions. Protections that initially guaranteed course owners and adjacent homeowners mutually assured green space now complicate efforts to build on the land and can even undermine attempts to transform courses to parks.

But McGuire and like-minded residents quickly realized that keeping open space in their own backyards would take more than their self-interested voices. They created an advocacy group, **Concerned Citizens of Bloomingdale**, to rally other village residents around the cause of keeping the 250 acres open. After all, argue McGuire and his compatriots, the golf course was originally allowed as a package deal with adjacent development.

"That land is specifically zoned for open space. The housing that was built around it was built around an open tract," McGuire said. "It's in the comprehensive land-use plan of Bloomingdale that it stay open."

The controversy is at a stalemate. The resident-advocates don't have a recommendation as to what should happen with the former course, other than it remain open and that its current zoning remain in place, McGuire said.

Neither Bloomingdale village officials nor Hovnanian officials responded to repeated requests for comment.

In the southwest suburb of Homewood, residents and the village are debating the fate of the Calumet Country Club. Its owners want to disconnect the club and its 130-acre golf course

from the village to smooth the way for commercial and recreational development. Local residents want the course to remain open space, as reported by the Tribune in July.

Jealous golfers wanted Lisa Simpson to quit because she kept winning Park Ridge Country Club championships. Mike Ditka told her to 'keep beating their ass.' »

"We're not in favor of what they want to develop there and would not approve the zoning," said Homewood Village Manager Jim Marino. "Our expectation is that they would attempt to annex to Hazel Crest and then approach Hazel Crest about the development."

Citizens determined to prevent courses from being developed are up against formidable

more relevant facilities, he said. That new uses for many courses are dampened by decades-old land-use covenants is evidence that communities should infuse plans with more flexibility, not less, Farren said.

“The conversation should be larger than: ‘What should we do with this particular piece of property that’s now coming on the market?’ It should provoke the broader conversation of how do we zone and restrict usage of property throughout the entire municipality?” he said. “It could be a chance to rethink other big parcels. “

including affordable housing, open space, infrastructure and land for public uses, such as schools, he said. But all of that negotiation is secondary to the first and biggest one: rezoning.

“A lot of these courses are selling for $2 million or even $1 million, and the owners try to make a go of it as a business, with development as a fallback,” said Chris Charnas, a Winnetka-based commercial real estate broker who specializes in golf courses nationally.

There’s only one problem: “A lot of these courses, though they look like they are developable, are not.”

Golf courses are often where they are because the land is not suitable for residential development, according to Charnas. The parcel could be a natural or engineered wetland that helps keep adjacent houses dry. The underpinnings of the topography might not be easy to build on. And often the course narrows and widens in a layout interesting for golfers but impossible for builders, he said. “There’s often not space to put roads and houses where fairways are,” he said.

These factors plus long-ago political horse trading are why open-space zoning for golf

In 2016, he bought Turnberry, a 176-acre golf course that is one of four located in northwest suburban Lakewood, and he has been struggling ever since to turn a profit on it. A recent surge in golfers eager to get to the links after a soggy spring is a welcome respite and could signal a financial turnaround, finally, but he'd be happy to sell the course, he said.

Is Tiger Woods coming to Chicago for the BMW Championship? He has lots of golf and non-golf reasons to make the trip. »

Meanwhile, he can't give away **Chicago Golf and Tiki Tees**, the DeKalb facility he bought when adjacent homeowners couldn't muster the resources to purchase and preserve the course.

To his chagrin, the DeKalb course is zoned only to be a golf course, so "there's nothing else I can do with it," Oberoi said. "Before we shut it down, we approached the Park District to give it to them for free, but they already have two golf courses and they don't want it." Neither did the city and neither did the local forest preserve.

Oberoi continues to pay $16,000 annually in property taxes for the DeKalb course (half of what Turnberry yields to local taxing bodies), even though "that beautiful golf course has turned into a weed farm."

The city of Highland Park sidestepped many of these tripping points by acquiring its in-town golf course years ago and sharing responsibility for it with the city Park District.

Still, even municipal guardianship could not withstand the undertow of the eroding golf popularity.

Now in his third term as president of the Highland Park Park District, resident and attorney Brian Kaplan said he saw the demise of the municipally owned and operated Highland Park Country Club early on. With the equally popular municipal Sunset Valley course competing a

In 2018, the city and Park District hammered out a deal to upgrade Sunset Valley, sell Highland Park to the Park District, and convert that course to a park.

Collaborating with adjacent homeowners who were worried that their manicured views would be overrun by raucous ballgames, the Park District focused on infusing the greens with both nature and recreational areas, said Rebecca Grill, natural areas manager with the Highland Park Park District. The three-year "back to nature" project will cost $1.4 million.

"We call it 'nature with parking,' " she said. "The desire of the majority of residents in most communities is walking. This property offers vistas for walking and for bike riding. It's an amazing opportunity to start from scratch."

Desert Sun.

REAL ESTATE

Will Palm Springs area homebuyers pick parks over golf courses? Developers are betting on it

Rosalie Murphy The Desert Sun

Published 11:13 a.m. PT Mar. 23, 2017

Two pre-recession developments in the Coachella Valley were re-introduced in 2016, each with one key change: Designers had removed planned golf courses, but preserved open space.

Virada, a master-planned community in Indio with about 1,300 homes, was previously proposed as a tract with a 27-hole golf course. The updated proposal, from Palm Desert-based Family Development, arranges neighborhoods along a public park instead.

Miralon in Palm Springs is a 1,150-home development from Boston-based Freehold Communities. It replaces a pre-recession project called Avalon, where builders actually installed an 18-hole golf course a decade ago. The course never opened, and a decade of desert winds destroyed it. Miralon's developers plan to plant olive groves on the former fairways.

After all, developers and planners said, that's what buyers liked most about living on golf courses — the open space, not necessarily the game itself.

"We have been working on several (large-scale) projects as things start to come back alive again. None of them have golf course amenities," said Ron Gregory, president and founder of Palm Desert-based RGA Landscape Architects. "But instead we're developing trail systems, exercise areas, places where people might walk on some attractively designed natural-style trail to go to yoga class... what we're offering is an outdoor lifestyle, with several means of achieving that, but it's not based on the game of golf."

READ MORE: Tension rising as HOAs, golf courses look to future

Many of the desert's approximately 120 golf courses were built as real estate amenities first and courses second, National Golf Foundation chief business officer Greg Nathan said. Buyers would pay premiums for homes with fairway views, even if they didn't golf.

In the Coachella Valley, "golf was a vital amenity that helped developers sell lots and homes while also giving the property some unique identity," Nathan said in an email. "Of course not all golf courses built during the boom were related to real estate developments, but the percentage was disproportionately high."

Normally, designing open space is an expensive choice for developers — it's land that could be used for homes, after all — but golf courses also generated revenue.

Today, however, courses are no longer surefire investments. Andy Vossler, president and CEO of Landmark Golf, estimated that a new 18-hole course would cost at least $6 million to build, not counting hundreds of thousands of dollars in annual maintenance costs. Further, many courses have faced shrinking memberships and declining revenues since the Great Recession began.

"We enjoyed a 30-year, 40-year window of time where open space was being supported by golf," Vossler said. "The cost associated with golf, everything from land acquisition to operating the golf course, have reached a point that, except for unique situations, financially, golf courses can't be sustained."

READ MORE: Golf clubs turn to sports, fitness and drive-in theaters to grow membership

Vossler estimated that 33 percent to 50 percent of residents in most golf course communities actually have memberships in their clubs.

Ed McMahon, senior resident fellow at the Urban Land Insitute, a think tank focused on land use and planning, offered a slightly lower estimate — 20 percent to 40 percent. He too believes many of those buyers purchased golf course homes because they wanted to live near protected open space.

And he believes buyers are still willing to pay a premium for those lots, even if their windows overlook parks or orchards instead of tee boxes.

"When people realized you could also sell a house for a premium without designing a golf course, that really started to change the thinking," McMahon said. "A number of developers, starting even before the recession, started to realize, 'hey, I can provide something that many more people want and I can do it at much less cost.' "

Today, McMahon said, developers are exploring what that open space can look like. Many are designing parks with networks of walking trails. Others are building what McMahon called 'agri-hoods' — housing around agricultural land. The forthcoming Miralon project in Palm Springs will surround cultivated olive groves, and though developers said it won't function as a commercial farm, the homeowners association may produce olive oil for residents.

"We wanted to install a more resource-efficient land use in that open space, and two, we wanted to create something that was broadly appealing to our likely homebuyers — which is not to say that golf doesn't have broad appeal, it's just that there are golfers and non-golfers," said Brad Shuckhart, Freehold Communities' Division President for California. "Everyone we surveyed enjoys open space, particularly active open space, that they can walk in, hike in, bike in, gather socially in."

READ MORE: Bermuda Dunes considers mandatory golf club membership for homeowners

Vincent J. Barbato, principal at Family Development, said he and his colleagues made a "pretty immediate" decision to remove the planned golf course at Virada after they acquired the development. He doubted officials would have approved construction of a golf course, and if they had, it would've been an unpopular proposal mid-drought. Further, Barbato said, to make a course substantially different or better from the desert's dozens of others would have been exorbitantly expensive.

"You can make it more meaningful to more homeowners, and you can certainly make it less taxing on resources," Barbato said. "I think what's going to happen is, as leaders in this industry build communities without golf courses... the trend will shift."

Shuckhart said builders are currently repairing Miralon's infrastructure, but hope to offer Miralon lots for sale in the next few months and homes by the end of the year.

Barbato said Virada's homes will not be available this year.

MEMORANDUM

To: **City of Ormond Beach Planning Board Memo**

From: **Mark Karet, AICP**
Director of Planning and Landscape Architecture

Date: **July 13, 2023**

Re: **Review of Staff Report for Tomoka Reserve**

I have been request by the landowner to review the City's staff report dated July 13, 2023, for the Tomoka Reserve PRD. I have focused on two issues: conformance with LDC standards and consistency with the comp plan.

The primary criteria for conformance with the LDC are contained in section 1–15(e) of the City's LDC and it reads as follows:

> "The proposed development conforms to the standards and requirements of this code and will not create undue crowding beyond the conditions normally permitted in the zoning district or adversely affect the public health, safety or welfare."

The report states that the applicant has provided all the required information in terms of "lot size and layout, street locations, buffer requirements, traffic impacts, stormwater planning, and the PRD requirements. Staff correctly point out that "The application exceeds the requirements of site-buffering, recreational amenities, and common open space."

After this statement, the staff reports immediately moves to Section 2-35 (b) of LDC which addresses residential permitted use in PRDs and reads as follows:

> "More intense uses (i.e. townhouses in single family district, or apartments in a townhouse district) may be allowed provided that their visual and functional impact on neighboring districts is minimized by providing adequate buffering and screening and all the requirements of this section are met."

The staff report uses this section to justify the SPRC conclusion that modifications to the lot sizes, buffer material, traffic mitigation and revised setbacks are needed to gain staff's recommendation of approval.

The problem with relying on Section 2-35(b) is that section address the introduction of more intense uses i.e., townhomes in single family districts or apartments or townhomes in districts and this is not applicable to the Tomoka Reserve PRD which features the exact same use – single family detached housing.

The staff report goes on to recommend a standard "Type 6" buffer which is the same buffer that would be used for "Heavy Commercial" or "Industrial" uses next to single family homes. I could find nothing in the City's LDC that would indicate that single family homes next to single family homes no matter how different the lot sizes should be treated like industrial or heavy commercial next to SFR. The required buffer for single family homes next to single family is a 6 foot "Type 1" buffer.

Looking beyond the City's land development code there isn't any basis for it in modern planning practice either. Large developments are a legacy of the past when the population was younger, family sizes were larger and there was a lot more development without central utilities. There are a great many of these older large lot developments in existence and communities across the country are dealing with infill compatibility issues.

The vast majority of planning practice in this space, for well over the last decade, has been about the densification of infill development – i.e. how do you put denser development next to low density residential. In fact, a growing number of communities are eliminating zoning districts that are exclusively single family.

Section 1-15(e) also mentions overcrowding – no undue overcrowding beyond the permitted conditions. The density of the proposed PRD is less than ½ of what is permitted under the FLU designation and as a result does not constitute overcrowding beyond what is permitted the LDC. Moreover, the density of the proposed PRD is less than the density of the adjacent neighborhood. The proposed open space and buffers will create a limit on crowding by devoting more than 50% of the site to open space as shown in our exhibits and acknowledged in the staff report.

Turning to consistency with the Ormond Beach Comprehensive Plan. The staff report identifies two policies in the FLUE Policy 1.1.15 and Policy 1.1.16 that the Planning Board could rely on for a finding of consistency. It should be noted that the proposed development is supported by at least 8 goals and policies of the comprehensive plan as noted in the applicant's project narrative.

The property is located within the low density residential future land use designation. The intent of the LDR classification is to "protect and encourage the continued development of typical single-family residential area and stabilize and protect the character of such neighborhoods." The applicant is proposing singe family development well below the LDR density limit.

The City of Ormond Beach has land use classifications that if applied to this site would support an argument that this site was not intended for residential development – such as Recreation/Open Space (ROS) which would permit a golf course facility but not allow residential development.

This land use designation is seen throughout the developed areas of the City. This supports a finding that the City believed this site was appropriate for residential development under their long-term planning strategy since it was not applied to the applicant's property.

The policies that support the application include provisions regarding promoting residential uses with on-site common open space and recreation promoting infill development where urban services are available to provide for continued growth and limited urban sprawl.

Staff identified one policy – Policy 1.1.3 of the Future Land Use Element – that could be used to deny the request which reads as follows:

> "Preserve the character of existing neighborhoods by not allowing intrusion of land uses that would threaten to alter the neighborhood character and by encouraging voluntary rehabilitation and sound maintenance programs in viable neighborhoods which are capable of self-renewal and establishing code enforcement or public redevelopment continues in areas not capable of self-renewal."

The policy guidance in Policy 1.1.13 operates at the land use level of decision-making. The use is allowed or its prohibited. Policy 1.1.13 cannot be used to prohibit a land use that is specifically applied to the applicant's property by City's future land use map.

Re: Tomoka Reserve Redevelopment - Rezoning/Planned Residential Development – Project Narrative

Dear Steven:

As you know, it is the Firm's pleasure to represent Triumph Oaks of Ormond Beach I, LLC (the "Applicant") with respect to the redevelopment and rezoning to Planned Residential Development of the property comprising the former Tomoka Oaks Golf Course. The proposed redevelopment of the site will rejuvenate the vacant golf course into residential homes that will complement the caliber of existing homes in the vicinity of the former golf course and provide additional housing opportunities to residents.

This project aims to redevelop the underutilized property, which was formerly a failed golf course, by providing a residential development that will promote growth and economic investment within the area. In designing the proposed redevelopment plan, the Applicant took great measures to ensure that project would complement the surrounding area and integrate with the surrounding residential neighborhood. The proposed development plan is comprised of a maximum of 276 residential units contained within the approximately 147 acres of land. The proposed unit count equates to a maximum density of 1.87 units/acre. The existing Tomoka Oaks neighborhood is comprised of 546 single family residential units across approximately 260 inclusive acres, for an average density of 2.09 units/acre. If the existing Escondido Condominiums are also included, comprising 40 units over 4.01 acres, the density of the existing neighborhood has a density of 2.21 units/acre. The proposed residential development was intentionally limited to ensure compatibility with the existing home sites surrounding the property. The proposed density is also well beneath the maximum density set forth in the City's Comprehensive Plan for Low Density Residential land uses, which provides for up to 4.3 units/acre, which would translate to 632 dwelling units.

The Applicant also understands the importance of both preserving landscaping within the site and providing adequate buffering between the proposed and existing residential uses. The Applicant has made all efforts possible to preserve the 16 historic trees within the property. The conceptual plan provided to the City illustrates a development pattern that will preserve all historic trees within the site, and meet all City requirements for preservation and mitigation of specimen trees. In the areas of the site abutting existing residential homes, the City's LDC provisions would require a six (6) foot landscaped area between uses. The Applicant has suggested that a minimum buffer of fifty (50) feet, planted to a Type 4 buffer under the City's LDC, is appropriate between the two residential developments. The current conceptual layout includes the provision of a minimum fifty (50) foot, and average one hundred twenty-nine (129) foot green area abutting existing residential uses. The project exceeds the required natural preservation area required by the City.

Design of the project is intended to promote a residential neighborhood featuring a variety of aesthetically pleasing home types and designs, in order to promote a diverse, architecturally rich neighborhood that will complement the existing variety demonstrated in the Tomoka Oaks neighborhood. The proposed development, located centrally to existing homes, is intended to promote pedestrian pathways throughout the neighborhood's sidewalk network that will provide additional opportunities for residents to walk and bike through the neighborhood, including the voluntary installation of a sidewalk network along one side of public roadways within the project that will provide a safe area for walking, exercise, and biking. The project will also include amenity areas for residents and pocket parks located throughout the property to ensure adequate recreational areas and green space. The project design also includes the extension of the sidewalk network out to Nova Road, and accommodation of space within the site to accommodate City reuse needs.

The property does not contain any wetland systems, and will be benefitted through the addition of stormwater treatment features, as outlined herein. Development of the property includes the design and use of modern stormwater treatment systems, which will facilitate the removal of phosphorus and nitrogen travelling into the Tomoka River, which is an impaired water body. Redeveloping the site through the use of dry ponds with existing vegetation will help promote the intake and filtration of stormwater and runoff from the property by retaining the water for treatment prior to its outflow into the river. The site is currently designed to store all water from a 25 year, 24-hour storm event without discharge, exceeding state and local requirements.

Redevelopment of the site for residential uses will also remediate environmental impacts from the property's former use as a golf course, which can result in impacts to soil from the abundant application of pesticides and fertilizers. Redevelopment of the site will be in accordance with a Soil Management Plan reviewed and approved by the Florida Department of Environmental Protection.

In addition to these benefits, the proposed project also promotes the following goals and objectives of the City's Comprehensive Plan:

POLICY 1.1.2. Continue to promote sound planning for the location and design of new residential developments including on-site common open space and recreation facilities.

Response: The proposed development will include the provision of a pedestrian sidewalk network throughout the project, including the installation of an eight (8) foot wide trail, as shown on the conceptual plan along one side of public roadway within the project, that may be used by residents for walking, exercising, and biking. The proposed development also includes a central amenity area, designed to include a playground, adult recreational facilities such as pickle ball courts and exercise equipment, and outdoor seating areas.

POLICY 1.1.6. Provide the opportunity, through zoning and other land use controls, for the development of a variety of housing types (i.e., single-family, duplex, townhouse, multi-family) in both conventional, planned unit and cluster type developments, that will meet the varied needs of the citizens of Ormond Beach.

Response: The proposed development is an infill project designed to create additional housing opportunities for residents in an area where urban services are readily available. The conceptual development plan includes the provision of a mix of both lot sizes and unit types to promote compatibility with surrounding home sites on the exterior of the property and allow for a mixture of housing opportunities throughout the core of the property.

POLICY 1.1.7. Continuously review and modify development and building regulations to provide for sound residential communities and quality housing.

Response: The proposed development will be designed and constructed in accordance with the latest development and building regulations at the local and state level, to ensure that the development is comprised of residential homes of a quality and character that will promote a long-lasting, aesthetically pleasing residential neighborhood in one of the City's core areas, with a community association that will ensure continued protection of the values and aesthetics of the existing and proposed homes.

POLICY 1.1.14. Enhance community livability in the central core and older sections of the City by encouraging infill as appropriate, transit oriented development and walkable residential areas.

Response: The proposed residential development is a residential infill project that repurposes a former golf course property into a walkable, compatible residential neighborhood that complements surrounding single family homes. The proposed mulituse path within the property will promote walkability and cluster residential uses in near proximity to existing urban services. The development project includes a range of lot sizes to promote infill opportunities – as we know, the County has recently discussed the importance of flexible lot sizes to encourage infill design, and has even removed minimum lot sizes entirely within their Planned Development process.

POLICY 2.2.1. The City shall limit urban sprawl by directing urban growth to those areas where public facilities and services are available.

Response: As noted herein, the proposed project is located in an area where existing services are in place to support the development.

POLICY 2.2.5. In order to protect natural resources, new development and redevelopment shall be encouraged to infill existing developed areas

Response: The proposed residential development is a residential infill project that repurposes a former golf course property into a walkable, compatible residential neighborhood that complements surrounding single family homes. The proposed pedestrian path within the property will promote walkability and cluster residential uses in near proximity to existing urban services.

POLICY 2.4.7. Encourage cluster development which promotes the efficient use of open space and reduces development costs, in areas were services and facilities exist or are planned.

Response: The conceptual development plan includes the provision of a mix of both lot sizes and unit types to promote compatibility with surrounding home sites on the exterior of the property and allow for a mixture of housing opportunities throughout the core of the property. The clustered residential uses will allow for additional open space through the planned amenity center illustrated on the conceptual plan for the site.

POLICY 2.4.10. Direct development towards existing residential communities and planned growth areas already served by infrastructure, to utilize resources that existing neighborhoods offer, thereby conserving open space and natural resources on the urban fringe.

Response: The proposed residential development is a residential infill project that repurposes a former golf course property into a walkable, compatible residential neighborhood that complements surrounding single family homes. The proposed pedestrian path within the property will promote walkability and cluster residential uses in near proximity to existing urban services.

We recognize the importance of the standards contained in the City's Land Development Code ("LDC") and have made every commercial reasonable effort to bring forward a project consistent with the LDC. However, in this case, the project requires certain minor LDC waivers which are balanced against many significant public benefits. An outline of the requested waivers are outlined below:

Development Standards

Existing development on the property does not have an underlying zoning designation for comparison, as the former Development Agreement for the property is no longer applicable. As such, for narrative purposes, the Applicant has provided an overview of the requested development criteria in comparison to the R-2 zoning district, which makes up the zoning for the existing single

family homes in the vicinity of the property. The Applicant is modifying the development standards from the R-2 zoning district as follows:

1. Lot width: conceptual development of the property includes the provision of a minimum of 80' rear lot lines where single family homes are located directly adjacent to the proposed 50' landscape buffer, as illustrated on the conceptual plan. The Applicant is requesting the ability to provide a minimum lot width of 50' for the residential homes types located within the core areas of the property.

    a. The proposed development includes the provision of a variety of unit types to provide for a wider range of housing options with the project. The conceptual plan is set up to ensure compatibility between use types so that existing residential homes are abutting residential unit types with larger lot widths or preserved green/open areas. The smaller lot widths are intended to be located centrally to the project, in the area comprising and surrounding the former clubhouse building, where they are appropriately screened from existing residences. This approach allows the provision of housing at different size and price points to support a diversity of housing options within Ormond Beach and allows for clustering of space to allow additional green space for buffering between the existing and proposed development, and the preservation of historic trees on site.

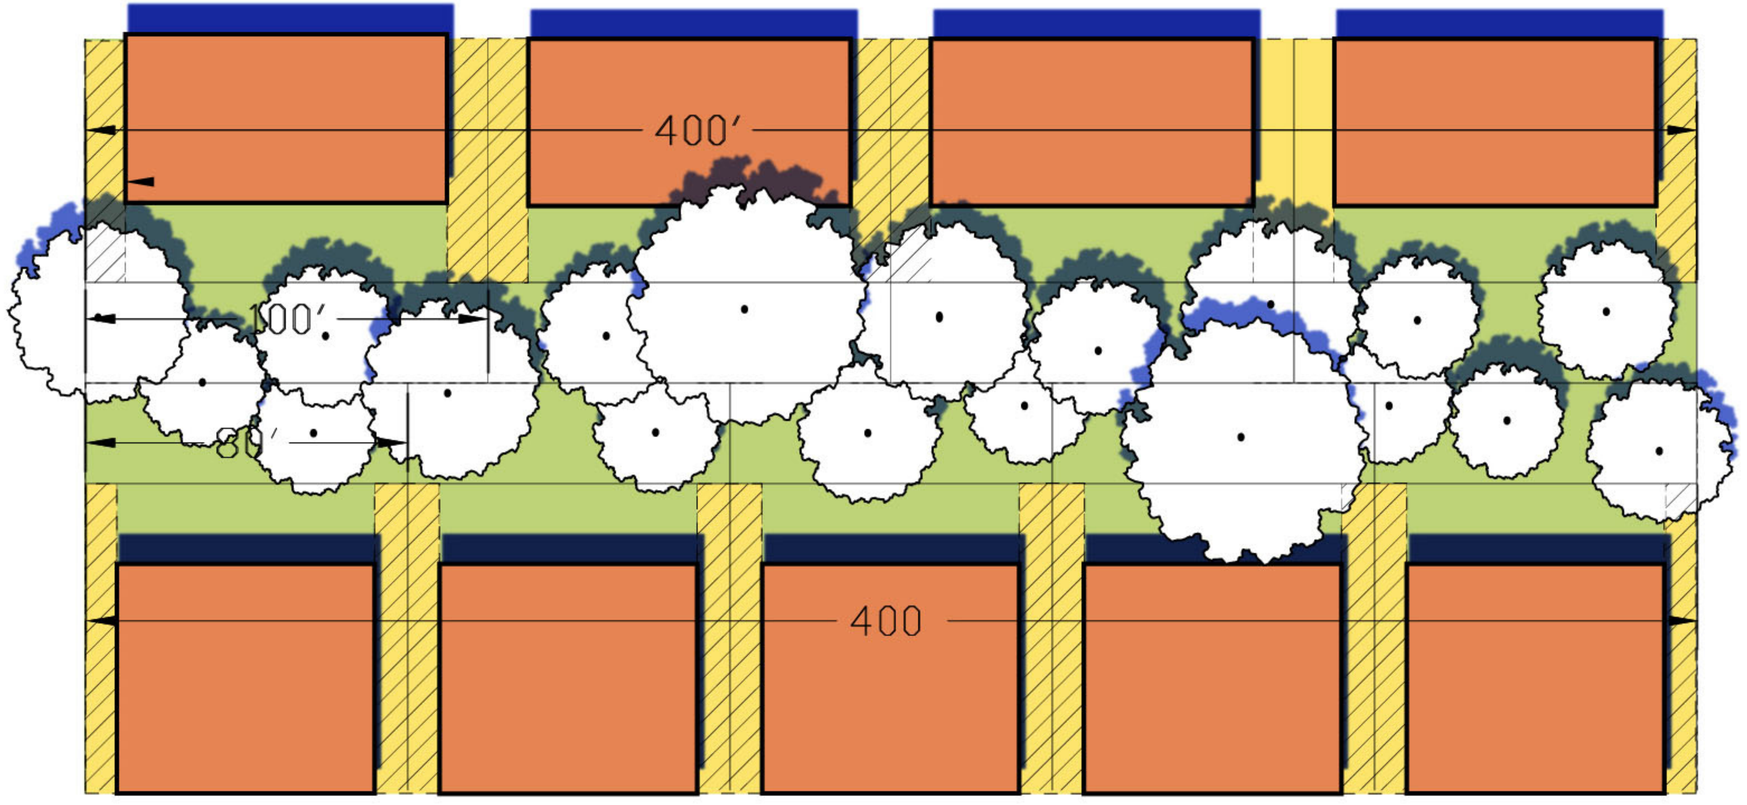
    b. The proposed development plan has a proposed minimum lot width of 80', with lot areas that are directly equivalent to the minimum required lot size within the existing neighborhood. The proposed design creates a small transitional area between the proposed homes along the perimeter of the site and the smaller lot footprint on the interior, which is proposed at a minimum of 50'. This transitional lot width will be of a lesser impact than pre-existing neighboring uses and intensities.

    c. Included with these materials is an exhibit showing the average setbacks included between lots – the exhibit illustrates that a layout of 80' lot widths along the perimeter creates the same amount of open space, or visibility corridor, as a 100' lot width would provide, which was a concern raised by the residents. Taking into account the voluntary landscaping buffer being provided by the Applicant, the visual impact of the site, when compared between 80' and 100' lots, should not result in any decrease of open space (i.e., the proposed 80' lot width will not result in an increase in visibility of linear feet of structure, when viewed from the existing neighborhood).

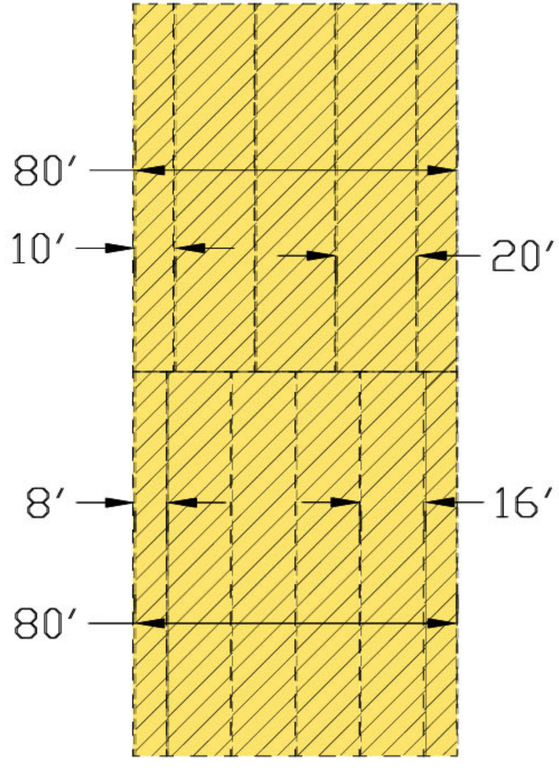
2. Lot coverage: the Applicant is requesting building coverage equal to 50% of the lot area. The shift to larger indoor living areas has become the market standard as individuals spend more time within their homes, from remote working to social activities. The impervious surface area for the site remains in line with general requirements.

3. Setbacks: the Applicant has provided a custom setback table that provides details on the requested setbacks depending on the lot size and unit type to be constructed. Typical lot details are also included for review. The proposed setback matrix is intended to provide the ability to design pedestrian friendly neighborhoods utilizing front porches and other design features that enhance social wellbeing and provide for a community feeling throughout the site. Included with these materials are examples of other areas within Ormond Beach that have utilized elements of a New Urbanism design standard to create walkable, livable front yard areas while ensuring compatibility with surrounding homes.

Indoor Recreation

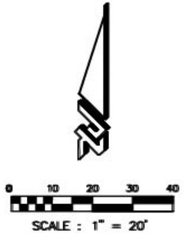


The Applicant is requesting a waiver from the requirement that indoor recreation be provided on site, so long as the square footage requirements for indoor recreation are met through additional outdoor recreational activities. Provided outdoor recreational facilities, which will comprise over 8 acres within the site, will allow for additional open space within the development and will allow for greater use of amenity areas by the existing and proposed residents.



Landscaping – Voluntary Benefit

Section 3-06 of the LDC provides for an installation of a six (6) foot buffer between the existing and proposed residential uses. The Applicant is voluntarily committing to a minimum fifty (50) foot buffer between the proposed use and the existing single family homes. The Applicant is committing to the provision of a minimum of the planting requirements set forth for the Level 4 buffer type, as detailed in LDC Section 3-06(d). The Applicant is requesting that bermed areas are permitted within the landscape buffer in order to preserve existing vegetation. Due to the high permeability of the soils on site, we do not expect the runoff to remain in the proposed bermed areas for a large period of time. We are proposing a native planting regimen equivalent to a Type 4 buffer, utilizing temporary irrigation as recommended by the USGBC. The proposed natural buffer system will provide a more natural screening area between the proposed and existing residences that is intended to be left in its natural state. An overview of the landscaping proposed for the site, along with implementation, maintenance, and monitoring procedures, is included herein.



Sincerely,

Robert A. Merrell III

I. Project Objectives

A. Title of Proposal

Tomoka Reserve Buffer Planting and Maintenance Plan

B. Location

Tomoka Oaks Blvd., Ormond Beach, FL.

C. Buffer Planting Plan and Maintenance Plan objectives

1. Description

Tomoka Reserve is a 147.94-acre site with an approximate perimeter of 3.3 miles. As proposed, there is a 50-foot-wide vegetative buffer between the existing subdivisions and the perimeter lots in Tomoka Reserve that will be managed by the Tomoka Reserve's Homeowners Association. Today, much of the buffer contains trees and shrubs that provide screening between the existing homes and the proposed development. In areas where the buffer is sparce or where no vegetation is present, native trees, shrubs, bunch grasses, and wildflowers will be planted to enhance the native buffer.

2. Purpose and Need

The purpose of the Buffer Planting and Maintenance Plan is to describe how the buffer plants will be installed and maintained to maximize survivability. The overall objective of the buffer plantings will be to create a screen such that the existing homes and the new homes will have some level of visual screening so that each resident will have an obstructive view of the other.

The Tomoka Reserve development team is committed to keeping the ecology of the current buffer in place and increasing its integrity and diversity by using native vegetation. The existing and enhanced vegetative screen will also function as a resident and migratory bird refuge and provide habitat for small mammals and turtles. With our commitment to using a wide variety of native species, we will be increasing the biodiversity of this already important plant community.

Another important aspect of using native plants is their ability to tolerate drought once they are established. By using regionally appropriate species, we will also be removing the need for an in-ground irrigation system that would draw large volumes of water out of the aquifer. Using drought tolerant species also allows us to avoid digging irrigation trenches through the site, which would further damage the ecology of the buffer and potentially have negatively impact on nesting birds, damage gopher tortoise burrows, and disrupt small mammal habitat.

II. Existing Conditions

A. Physical

The physical ecology of this area is dominated by well drained soils, Appendix G. The entirety of the site, including the 50-foot buffer, is comprised of well-draining sandy soils such that there will be no long-term standing water. The topography of the site has gentile slopes where the eastern portion of the site is higher than the north, south, and western areas. There are no physical barriers present that would prohibit us from enhancing that existing vegetative buffer.

B. Existing biotic conditions

A tree survey was conducted in 2021 that determined that there are 1,971 trees on site that are made up of 21 species of trees. The site is also home to a wide variety of insects, reptiles, amphibians, and small mammals, all of which will benefit from the installation of more native trees, shrubs, grasses, and wildflowers. Around the entire site, approximately 70% of the 50-foot buffer has trees and shrubs that act as a visual screen. However, in many places beneath the canopy there are gaps in the understory that lack shrub screening.

III. Buffer Planting Plan

A. Planting plan description and design

In areas where we will plant trees and shrubs, we will follow the best management practices out lined in the American National Standards Institute (ANSI) 300 part 6 and Z60.1, and where the planting will follow the directions provided in Appendices D & E, Tree and Shrub Planting Details. The buffer design was created by a landscape designer that specialized in native plants (Appendix F) and approved by a landscape architect. For large trees, we will use plant material that has a minimum caliper of 2.5 inches and are between ten and twelve feet tall. Medium trees will be between six and eight feet tall and shrubs will range from one and a half to two feet tall.

In areas where there are no trees in the buffer, L-101 illustrates what the High Density buffer planting (Appendix A) will look like. Seven native trees will be placed 15 feet apart in a 20-foot wide strip that will be located in the center of the buffer. For the High Density areas, we will plant 3 large and 4 medium sized trees for each 100 linear foot area. The High Density area will also contain 30 shrubs and bunch grasses that will be evenly placed in front of the trees such they receive enough sunlight. Shrubs and bunch grasses will be spaced 3 feet apart.

Where there are vegetative gaps in the buffer, we have designed a Medium Density planting (Appendix B) arrangement that can be found on L-102. Where there are vegetative gaps, combinations of trees and shrubs will be used which will be determined by the size of the vegetative gap. For each 20-foot gap, we will use one large and one medium sized tree along with 10 shrubs and bunch grasses.

In areas where the tree line in the buffer is intact, we will target areas where the understory shrubs are absent and then add a mixture of shrubs and bunch grasses that will be planted three feet apart in the buffer gap, L-103 illustrates what the planting will resemble.

To install the trees, we will cut out a 4-foot diameter circle for each tree and we will remove a 2-foot diameter circle for each shrub and bunch grass. Once the plants are installed and watered, a ring of mulch will be placed around each tree, shrub, and bunch grass to aid in water-holding capacity of the soil. In addition, we will broadcast wildflower seeds in select areas associated with the buffer plantings. This will be a passive approach to increasing biodiversity with the intent of having native wildflowers eventually re-seed themselves each year.

B. Plant spacing

Trees and shrubs will be installed following the best management practices out lined in the American National Standards Institute (ANSI) 300 part 6 and Z60.1, Appendix D. Trees will be installed no closer than 15 feet on-center. Shrubs and bunch grasses will be spaced no closer than 3-feet on center, see Appendix E.

IV. Buffer Maintenance

Plants will be monitored and watered on a regular schedule, which is being developed by Don Spence, Ph.D., Board Certified Master Arborist. Over the short term, we anticipate a regular watering schedule that will require plants to be watered multiple times over a seven-day period. Over the long term, we have developed a watering plant that will span 26 weeks. Based on the recommendations from the arborist, we will extend watering if he determines it is needed for the plants to survive. Watering will be accomplished with a large water tank on a truck such that each plant will receive water by a person that will be able to confirm that enough water is provided. Since there are many species of wildlife that live in the buffer, we will not be installing above or below ground irrigation since the process of digging and trenching could displace, or harm protected species/existing flora.

Trees and shrubs will be inspected at a regular interval to assess their health and level of establishment. If trees or shrubs die during the watering period, they will be replaced following the guidelines in III.A. A key component to the success of the plantings will be to maintain soil moisture. To achieve maximum soil moisture, we will not remove large swaths of turfgrass; we will only remove enough grass to install the plant material and space to place a ring of mulch around the base of the trees, shrubs, and bunch grasses. If we were to remove all the grass in a planting area, the heat of the day will evaporate the latent moisture in the soil, further stressing the new plant material. We will only use native plants that are indigenous to east central Florida and are commonly found in Ormond Beach, Appendix F.

A. Watering Schedule

A watering schedule has been developed and provided below. Each watering event will be accomplished through the use of a truck and hand watering to ensure that each plant receives adequate water. If heavy rain events occur, the watering schedule will be modified so we are not over-watering or wasting water. The objective of each watering event will be to provide approximately 3 gallons of water to each tree through Phase II and then 2 gallons during Phase III. Shrubs and bunch grasses will be given approximately 2 gallons of water through Phase II and 1 gallon of water during Phase III.

Buffer Tree, Shrub, and Bunch Grass Watering Schedule

Plant Material Watering will span six-months (26 weeks)

Phase I – Water 5 times per week, once a day for **five weeks** if plants are installed in the fall and winter (water twice a day if plants are installed between May and September) and monitor plant establishment.
– Monday, Tuesday, Wednesday, Friday, & Saturday

Phase II – Water 3 times per week for **ten weeks** and monitor plant establishment.
– Monday, Wednesday, & Friday

Phase III – Water 2 times per week for **11 weeks** and monitor plant establishment.
– Monday & Thursday

* Watering frequency and volume of water may be adjusted depending on how well plants are becoming established, which will be determined by the arborist.

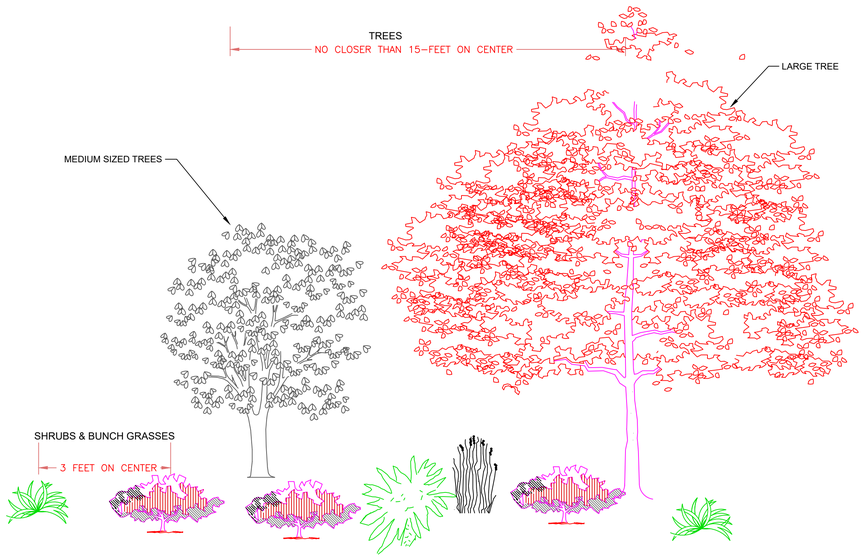
B. Vegetation Maintenance

The most important aspect of maintaining the newly installed trees, shrubs, and bunch grasses will be managing grass and weeds around the plants. Most of the buffer has an intact tree canopy and sparce ground cover due to the shade. Maintenance in areas where there is shade, maintenance will be less intense and will revolve around removing grass and weeds that are outcompeting the new plants. Most of the maintenance work will be accomplished through hand-pulling weeds and spraying the weeds with a mixture of vinegar, salt, soap, and water.

In areas where the buffer is largely absent, grass and weeds are prevalent. Due to the spacing between trees, shrubs, and bunch grasses, we will use a lawn mower to suppress the grass and weeds to limit competition. When necessary, we will use the vinegar solution to kill grasses and weeds that are encroaching into the plant material along with hand-pulling when necessary.

Appendix A

Typical Planting Layout



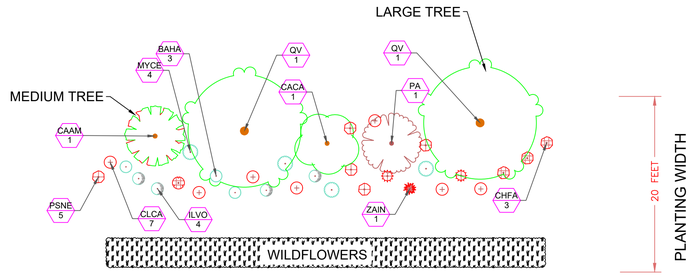
~ High density planting - no plants occur in front of homes ~

HIGH DENSITY BUFFER PLANTING - NO TREES PRESENT IN THE BUFFER

7 TREES AND 30 SHRUBS & GRASSES PER 100 LINEAR FEET. **HIGH DENSITY PLANTINGS** WILL OCCUR WHERE THERE IS LESS THAN 10% VEGETATIVE COVER IN FRONT PRIVATE PROPERTY.

- WITHIN THE 100-FOOT AREA, TREES WILL BE PLACED APPROXIMATELY 15-FEET APART WHILE SHRUBS AND BUNCH GRASS WILL BE PLACED APPROXIMATELY 3-FEET APART.
- FOR EACH 100-FOOT PLANTING AREA, THE PLANTING PATTERN WILL BE AS FOLLOWS:

  MED TREE - LG TREE - MED TREE - LG TREE - MED TREE - LG TREE - MED TREE
- FOR EACH 100-FOOT PLANTING AREA, SHRUBS & GRASSES WILL BE EVENLY SPACED.



ELEVATION (FRONT) VIEW OF PLANTING - MEDIUM DENSITY PLANTING

TREE, SHRUB, AND GROUND COVER SPECIES WILL CONSIST OF A MIXTURE OF SPECIES TO INCREASE BIODIVERSITY. FOR TREES, EACH PLANTING AREA WILL CONSIST OF THREE DIFFERENT SPECIES. FOR SHRUB AND GROUND COVER AREAS, NO MORE THAN 20% OF THE TOTAL PLANTS FOR THAT BUFFER PLANTING WILL BE THE SAME SPECIES.

POTENTIAL MEDIUM DENSITY PLANTING ARRANGEMENT

TREE AND SHRUB PLANTINGS WILL BE CONCENTRATED ON THE AREAS WHERE EXISTING NATURAL VEGETATION DOES NOT EXIST.

PLAN VIEW - HIGH DENSITY PLANTING, NO TREES IN THE BUFFER

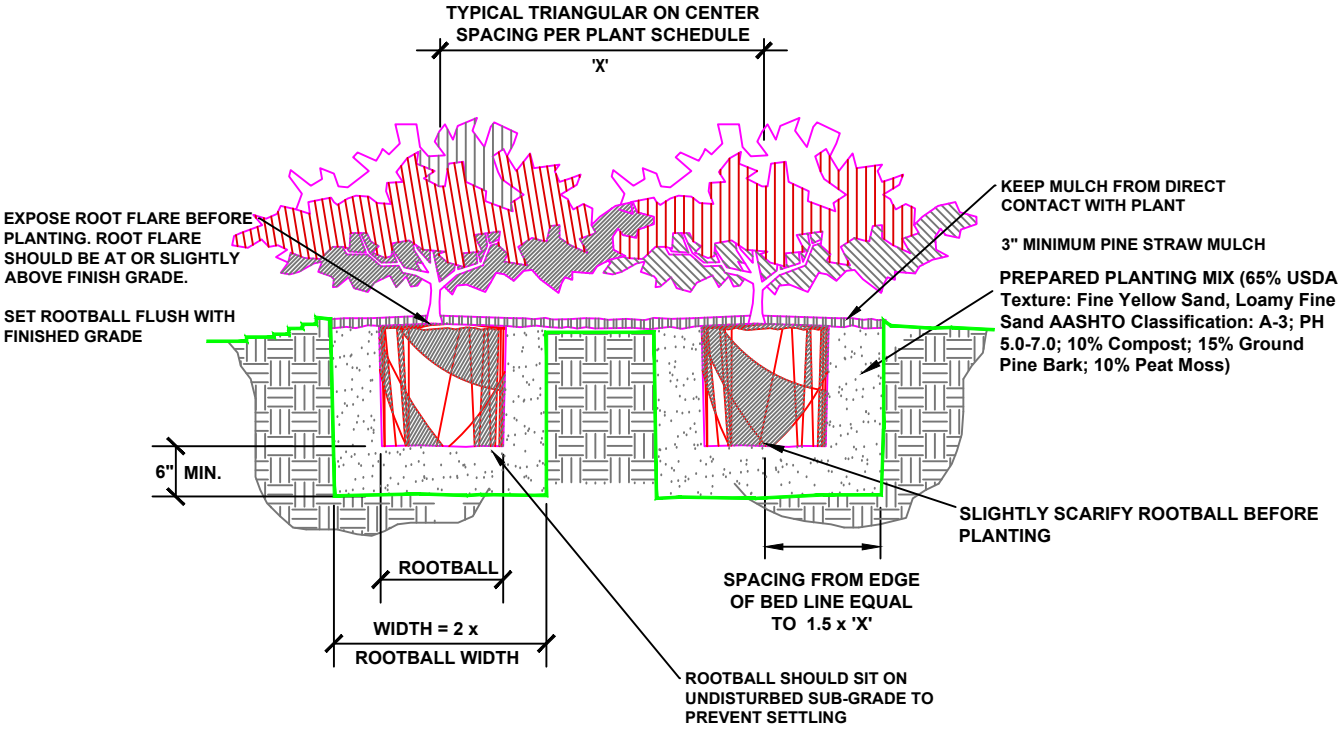
Tree Planting Detail

STAKING DIAGRAM
PLAN VIEW

NOTES:

1. ASSURE PERCOLATION OF ALL PLANTING PITS PRIOR TO INSTALLATION. SEE LANDSCAPE NOTES ON SEPARATE SHEET.
2. WATERING REQUIREMENTS ARE DIFFERRENT FOR EACH TREE SPECIES AND SOIL CONDITION. CONSULT AN ARBORIST AS TO THE APPROPRIATE WATER REGIMEN.
3. DISCARD SUBGRADE REMOVED FROM PLANTING PIT AND REPLACE WITH PREPARED SOIL MIX, PER SPECIFICATIONS. PLACE NEW SOIL MIX AROUND ROOTBALL IN SIX-INCH LAYERS, FIRMLY TAMPING AND WATERING EACH LAYER UNTIL THE PLANTING PIT IS FILLED TO FINISHED GRADE LEVEL.
4. TREES UNDER 3 INCH CALIPER DO NOT REQUIRE TO BE GUYED; HOWEVER CONTRACTOR IS RESPONSIBLE TO ENSURE TREES DO NOT BLOW OVER DURING MAINTENANCE PERIOD.

NOTES FOR ALL PLANTINGS:



1. DO NOT MOUND OR INSTALL MULCH AGAINST THE TRUNK OR STEM OF TREES AND SHRUBS OR THE CROWN OF PERENNIALS AND GROUNDCOVERS. THERE SHOULD BE FREE AND OPEN AIR CIRCULATION AROUND THE TRUNK OF THE PLANT AND THE GROUND IN THE IMMEDIATE AREA AT THE BASE OF THE TRUNK.
2. CONTRACTOR TO REMOVE ALL WIRE BASKETS AND BURLAP FROM B&B PLANTS LEAVING ONLY THE FABRIC AND WIRE ON THE VERY BOTTOM OF BALL IF IMPOSSIBLE TO REMOVE.

Subject: Bicycle & Pedestrian Analysis
Tomoka Reserve ZCA 21067

Tomoka Reserve is located west of the Nova Road/Tomoka Oaks Boulevard intersection in Ormond Beach. The proposed project consists of 300 single-family residences on the former site of the now closed Tomoka Oaks Golf Course. This one of the few remaining locations within the heart of Ormond Beach that can provide new residents with easy access to active transportation modes.

As new infill development within the Tomoka Oaks County Club Estates, Tomoka Reserve will feature sidewalks on both sides of its internal streets. The developer will install sidewalks along Tomoka Oaks Boulevard for the first time that will connect Tomoka Reserve to the existing sidewalks in Nova Road. Once on Nova Road pedestrians have easy access to a pedestrian network that has many connections and direct and convenient routing to public parks and commercial uses with few physical barriers.

Tomoka Reserve's bicyclists will have access to the project's newly constructed slow speed surface streets and the existing ones in Tomoka Oaks. Tomoka Oaks Blvd allows bicyclists a direct connection to Nova Road. Nova Road features shared lanes with no separate areas for bicycle traffic. However to the north Nova Road connects to US 1 which has a designated bike lane. To the south, Nova Road connects to Granada Blvd which has a designated bike lane as well. Once on these two roads there is connectivity to a well-developed bicycle network that provides safe access to community parks, community centers, schools and shopping.

The attached exhibit depicting active transportation facilities and the community amenities and resources located within a 2-mile radius of Tomoka Reserve was developed using data from the City's and Volusia County's geographic information system and the City's 2016-20216 Bicycle Master Plan. The exhibit illustrates that Tomoka Reserve's location allows it to leverage connections to the City's existing and planned pedestrian and bicycle network to serve its future residents active transportation needs.

I. Project Description

The subject 146.8$^{+/-}$ Acre Site is located in easter Volusia county in the City of Ormond Beach. The subject property is located in Section 42, Township 13 South, Range 32 East. The subject site is further identified by the Volusia County Property Appraiser as;

Parcel Number	Alt Key #	Acreage$^{+/-}$
324207000010	2998504	146.8
Total		**146.8$^{+/-}$**

(See Exhibit 1-Location Map and Exhibit 2-Site Aerial Map).

The total site area project consists of approximately 146.8$^{+/-}$ Acres. Starting in the early 1960s the lands was developed as a Golf course and country Club with surrounding residential development. The subject site is currently maintained as an inactive golf course. The area is continuing to develop in a Suburban manner.

The Landowner/Developer is currently maintaining the land as vacant urban land in accordance local regulations. The site has been altered extensively in the past. The owner is pursing development of the site for residential use.

Land Use surrounding and adjacent the project area is identified by FDEP as Medium density, 2>5 dwelling units per aces. The are no native or natural Land uses adjacent to the subject site. The project obtains primary access North Nova Road.

A "*Phase I Environmental Site Assessment"* may be completed by others. This report does not address CERCLA compliance or associated requirements.

Survey Methodology

Pedestrian Surveys were conducted based upon Transects parallel to the existing Fairways generally following a north-south orientation. Pedestrian Surveys were conducted on April 5th, 2021.

Surveys began on site in the early morning and continued to 4:00 PM. Temperature ranged from approximately 62° F to 78° F and in an acceptable range for wildlife observations. Skies were mostly clear.

The approximate location of the Pedestrian Transects can be seen on Exhibit 4.

Current photos of the Site and existing use can be seen on Exhibit 3.

II. Site Description

A. SOILS

Soil identified on site are per Volusia County Soils Report by the NRCS:

55 - Quartzipsamments, gently sloping
For a detailed report and description of these soils see Exhibit 6

B. PLANT COMMUNITETIES and FLORIDA LAND USE, COVER and FORMS CLASSIFICATION

Land use types located within the proposed Project Site were identified through a review of color aerials and site investigations. The on-site land use forms were classified using the Florida Land Use, Cover and Forms Classification System (FLUCFCS)) as defined by the Florida Department of Transportation (FDOT, 1999) and the Florida Land Use Cover Classification System (FLUCCS) as defined by the Florida Department of Environmental Protection (FDEP 2004-2011), see Exhibit 6 – FLUCCS Map.

General:
Site conditions are typical of those found in this region of Volusia County. The site was historically cleared, improved and developed as a Golf Course-Country Club. Through the process of normal Golf course maintenance various trees, shrubs and herbaceous vegetation have become established along the "rough", between fairways and property lines adjacent to neighboring residential lots.

The site is surrounded on the

East:	Medium density, 2>5 dwelling units per acre
South:	Medium density, 2>5 dwelling units per acre
West:	Medium density, 2>5 dwelling units per acre
North:	Medium density, 2>5 dwelling units per acre

The region is continuing to develop in a suburban/urban manner. There is One (1) Land Uses Cover identified on the subject site.

Based on information obtained from FDEP, field observations and aerial interpretation, the following land use classifications (FLUCCS) best describe the vegetative communities present on-site and adjacent to the subject site:

Subject site:

1. **FLUCCS – 1820, Golf course**
   Recreational areas are those areas whose physical structure indicates that active user-oriented recreation is or could be occurring within the given physical area. This category would include golf courses, parks, swimming beaches and shores, marinas, fairgrounds, etc. (Note: Swimming beaches are identifiable by such features as bath houses, picnic areas, service stands and large parking lots adjacent to the beach areas.) In order to make this recreational determination, supplemental information may often be required**.**

Surrounding and Adjacent Land Use:

1. FLUCCS – 1200: Medium density, 2>5 dwelling units per acre
This land use surrounds the subject site.

The site is located in a urbanized area of Volusia County. The biggest threat to the development of any high-quality wildlife habitat or sustainable natural ecosystem is primarily caused by fire exclusion. Vacant or Open lands become progressively less suitable for wildlife habitat as more non-fire resistant plants have established dominance over with time. In addition, the soil has been historically altered and compacted over time through management and normal site maintenance.

The subject has been uniformly established and maintained as a Golf course Bahia Grass and hybridized Bermuda grass are the dominant ground covers. Along fairway edges land external boundary occasional Oaks with limited shrubs and other vegetation typical of developed golf courses exhibit scatted dominance of the ca. The permitter property lines are well maintained and established.

Trees & Shrubs:

Trees and Shrubs comprise only 3.5 Acres or 1.7% of the Site

Live Oak	*(Q. virginiana)*,
Laurel Oak	*(Q. laurifolia)*
Red Oak	*(Q. falacata)*
Longleaf Pine	*(Pinis palustris)*
Slash Pine	*(Pinus elliottii)*
Carolina Laurel Cherry	*(Prunus caroliniana)*
Hercules Club	*(Zanthoxylum clava-herculis)*
Common Persimmon	(*Diospyros virginiana*)
Lantana	(*Lantana camara*),
Beautyberry	*(Callicarapa americana)*
Saw Palmetto	*(Serenoa repens)*

Groundcover:

A groundcover of improved golf course grasses covers the majority of the site;

Bahiagrass	(*Paspalum sp*.),
Bermudagrass	*(Cynodon sp.)*

<u>Common pasture weeds and fencelines;</u>

Centipedegrass	*(Eremochloa ophiuroides)*
Eastern Prickly Pear Cactus	*(Opuntia humifusa)*
Tickseeds	(*Coreopsis spp.*)
Smutgrass	*(Sporobolus indicus)*
Broomsedge	*(Andropogon virginicus)*
Greenbrier	(*Smilax* sp.)
Grapevine	(*Vitis* sp.),

Goldenrod	(*Solidago* sp.)
Bluestem	(*Schizachyrium sp*),
Blackberry	(*Rubus* spp.)
Dogfennel	(*Eupatorium capillifolium*)
Variable witchgrass	*(Dichanthelium commutatum),*
Hairy Indigo	(*Indigofera hirsute*)
Pusley	(*Richardia scabra* L.)
Poaceae	*(Saccharum alopecuroides*)

Non-Native / Invasive

Tropical Soda Apple	*(Solarum viarum)*
Chinaberry	(*Melia azedarach)*
Camphor	(*Cinnamomum camphora)*

This is not intended to be a 100% vegetative survey but rather provide a general acknowledgement of existing vegetation sufficient to provide a understanding of the existing site conditions.

In the natural condition for Florida, periodic fire is important in setting back plant succession and maintaining viable ecosystems. There was no evidence observed on site to indicate any periodic or previous fires.

The subject site is surrounded by existing development. The site is located in a urban area of Volusia County. The continual and consistent site management of the site and absence of periodic fires has prevented the establishment of native or natural ecosystems. The site contains no native habitat or scrub/shrub xeric plant communities.

Due to the Golf Course management of the site together with the adjacent residential lands and the fact that it is isolated from any other upland habitats, and not part of and regional upland wildlife corridor or ecosystem there is minimal ecological habitat value provided by the subject site. There are no other Land Uses associated with the subject site. The existing Land Cover is not Rare, Endangered or ecological unique to Central Florida or the Region.

C. TOPOPGRAPGY

The Topography of the subject site can be seen on Exhibit 7. Elevation on site is generally uniform sloping from the central eastern portion of the west and northwest. Information obtained from FDEP and Volusia County GIS indicates elevations between $40^{+/-}$ in the central southeast area to an elevation of approximately $15'^{+/-}$ in the northwest portion of the site.

D. WETLANDS

The subject site was evaluated for the presence of jurisdictional wetlands. General methodology detailed in Chapter 62-340 of the Florida Administrative Code and the 1987 US Army Corps of Engineers Wetland Delineation Manual was followed. Soils, Flood

Planes, Vegetation and other historical information was researched and analyzed during the site investigation.

A review FDEP and the National Wetlands Inventory (NWI) together with Volusia County's GIS data base do not indicate the presence of jurisdictional wetlands on the subject site. There are no hydric Soils identified on the subject site.
Site investigation and field evaluation identified two artificially created surface water features from upland soils, surrounded by uplands, each less than 0.5 acre and are associated with the Irrigation of the Golf course.

See Exhibit 8 for the general location of the jurisdictional wetlands within the region based upon NWI mapping.

E. THREANTEND and ENDANGERED SPECIES

A literature review as well as professional experience and knowledge of the region was utilized to identify federally, or state listed species most likely to be found within Volusia County, Florida. The Project Site was then evaluated for the presence of those listed species identified by the United States Fish and Wildlife Service (USFWS) and/or the Florida Fish and Wildlife Conservation Commission (FWC). Site reviews were conducted by a Ray and Associates biologist on April 5th to evaluate the property for potential presence of wildlife listed for protection.

The USFWS identifies the subject site as a Tier 5 Habitat. Tier 5 Habitats are those where we may have a measurable workload and little resource payoff. In the regulatory arena, these could be considered personnel "sinks". However, they may also present restoration opportunities to higher value habitats. These include:

- Agriculture
- Canal/Ditch
- Disturbed Transitional
- Urban/Developed

Based upon existing site conditions and observations the subject project does not propose development of any identified "higher value habitats" by the Florida Natural Area Inventory (FNAI) or Strategic Habitat Conservation Areas as identified by FDEP.

The observation of potential habitat for Three (3) species listed for protection, or their habitat, was identified on the subject site. These species and the results of regulatory analysis are found below.

Gopher Tortoise, *Gopherus polyphemus*

Active, Potentially Occupied and Abandoned, Gopher Tortoise burrows were observed on the project site. Gopher tortoises are a threatened wildlife species by the Florida Fish and Wildlife Conservation Commission (FWC) and are protected by state law, Chapter 68A–27, Florida Administrative Code. In accordance with the requirements of Rules

68A-25.002 and 68A-27.004 (F.A.C.), a permit for a gopher tortoise capture/relocation/release activity must be secured from FWC before initiating any relocation work. Gopher tortoises must be relocated or impacts to their burrows avoided in accordance with FWC Guidelines before any land clearing for development takes place. Property owners must obtain permits from the Florida Fish and Wildlife Conservation Commission before they can move or relocate any Gopher Tortoises.

It is recommended that 90 days prior to site development a physical survey for the Presence/Absence of Active, Inactive/Potential Occupied, or Abandoned Gopher Tortoise Borrows be completed in accordance with FWC Gopher Tortoise Guidelines. If Active or Potentially Active Gopher Tortoise Burrows are identified FWC regulations governing Gopher Tortoise protection, burrow excavation, relocation and mitigation are to be complied with.

USFWS CONSULTATION AREAS

The U.S. Fish and Wildlife Service establishes “consultation areas” for certain species listed for protection. As a general guideline consultation area only become an issue if USFWS consultation is required, which is typically associated with permitting through the U.S. Army Corps of Engineers. The is recognized that species presence and need for additional review may often determine to be unnecessary early in the permit review process due to lack of appropriate habitat or other conditions. However, the USFWS makes the final determination.

Consultation areas are typically regional in size, typically covering multiple counties where the species in question is known to exist. Consultation areas by themselves do not indicate the presence of a listed species. They only indicate an area where there is a potential for a listed species to occur and that additional review might be necessary to confirm or rule-out the presence of the species. The additional review typically includes the application of species-specific criteria to rule-out or confirm the presence of the species in question. Such criteria might consist of a simple review for critical habitat types. In other cases, the review might include the need for species-specific surveys using established methodologies that have been approved by the USFWS.

Florida Scrub-Jay (Aphelocoma coerulescens)

Currently the Florida Scrub-Jay is listed as threatened by the USFWS. The Florida scrub-jay has extremely specific habitat requirements. Florida Scrub Jays are largely restricted to scattered, often small and isolated patches of sand pine scrub, xeric oak, scrubby flatwoods, and scrubby coastal stands in peninsular Florida (Woolfenden 1978a, Fitzpatrick et al. 1991). They avoid wetlands and forests, including canopied sand pine stands. Optimal Scrub-Jay habitat is dominated by shrubby scrub, live oaks, myrtle oaks, or scrub oaks from 1 to 3 m (3 to 10 ft.) tall, covering 50% to 90 % of the area; bare ground or sparse vegetation less than 15 cm (6 in) tall covering 10% to 50% of the area; and scattered trees with no more than 20% canopy cover (Fitzpatrick et al. 1991).

No Scrub Jays were observed during the wildlife survey conducted by Ray and Associates. No suitable habitat was observed on the subject site. Uplands found on site contains a mixture of Oaks and Pines which of a size, height and density to not provide suitable habitat. The subject site is not mapped, or adjacent to areas mapped, by Volusia County as habitat potentially occupied by Shrub Jays. See Exhibit 10

As the site is in the Scrub Jay Consultation Area, a formal Scrub-Jay survey may be required by the USFWS to determine if Scrub Jays exist on the subject property. Formal surveys may be conducted between March 1 through October 31 and be conducted for five (5) consecutive days on calm, clear days about one hour after sunrise, and should terminate before midday heat or wind. Transects may be driven or walked and a broadcast of calls is required at each station for at least 1 minute in all four directions, emphasizing any direction in which low growing oak scrub is the predominant vegetation. A formal survey would also include a report detailing development implications and mitigation that will be required, in the event a presence was confirmed on the subject property.

Florida Bald Eagle, *Haliaeetus leucocephalus*

Information and data obtained by FWC was used to locate documented bald eagle nesting territories and to view their locations in map form.
(http://www.myfwc.com/eagle/eaglenests/nestlocator.aspx#search

No Bald Eagle Nest have been previously identified or documented by FWC within 1 mile of the subject site. During recent site investigations and ecological surveys, no Bald Eagle Nests were observed on or near the subject site.

The information contained within this database is current through the 2012-2013 nesting season; nests were surveyed by FWC from November 2012 to April 2013. Accuracy of the nest locations is estimated to be within 0.1 miles of the true location. Not all eagle nests in Florida have been documented by FWC. Non-documented nests receive the same level of protections as FWC documented nests. See Exhibit 9.

Additional protected species investigated for possible impact.

No other protected animal species were observed or identified on the subject site.

Florida Sandhill Crane	*Grus canadensis pratensis*	ST
Burrowing Owl	*Athene cuniculari*	ST
Little Blue Heron	*Egretta caerulea*	ST
Tricolored Heron	*Egretta tricolor*	ST
Wood Stork	*Mycteria americana*	FT/ST
Everglades Snail Kite	*Rostrhamus sociabilis plumbeus*	FE
Southeastern American	Kestrel *Falco sparverius Paulus*	ST
Florida mouse	*Peromyscus floridanus*	SSC
Sand Skink	*Neoseps reynoldsi*	FT

Eastern Indigo Snake	*Drymarchon corais couperi*	FT
Short-tailed snake	*Stilosome extenuatum*	ST
Florida Pine snake	*Pituophis melanoleucus mugitus*	SSC
Red Rat snake	*Elaphe guttata*	SSC
Red-cockaded woodpecker	*Picoides borealis*	FE

Plants

Britton's beargrass	*(Nolina brittoniana)*	FE
Florida bonamia	(Bonamia grandiflora)	FT
Lewton's polygala	(Polygala lewtonii)	FE
Papery whitlow-wort	(Paronychia chartacea)	FT
Pigeon Wings	(Ciltoria frangrans)	FE
Pygmy Fringe-tree	(Chionanthus pygmaeus)	FE
Scrub buckwheat	(Eriogonum longifolium var. gnaphalifolium)	FT
Scrub plum	(Prunus geniculata)	FE
Wide-leaf warea	(Warea amplexifolia)	FE

The location of Pedestrian Transects can be found on Exhibit 4

III. Conclusions and Recommendations

The Project Site is surrounded by existing Medium Density Single Family Residential development. The site was developed and mongered for over 55 years as a Golf course and Country Club. The golf course is continually maintained as open urban land in the City of Ormond Beach.

There are no areas of naturally occurring Native, Long leaf Pine Ecosystems, Scrub or Xeric plant communities, located on the subject site. There is no evidence of prescribed burning. Based upon the proximity of the surrounding residential development and the that the site is with an existing urban area of the City of Ormond Beach it is unlikely that Prescribed Burning will become an acceptable site management tool. There are no naturally occurring open sandy areas identified or observed on site. Open areas of disturbed soil are the remnants of Golf Corse sand traps and are becoming grassed over. Very minimal natural re-vegetation is occurring on site.

Potentially Occupied Gopher Tortoise burrows were observed on the subject site.

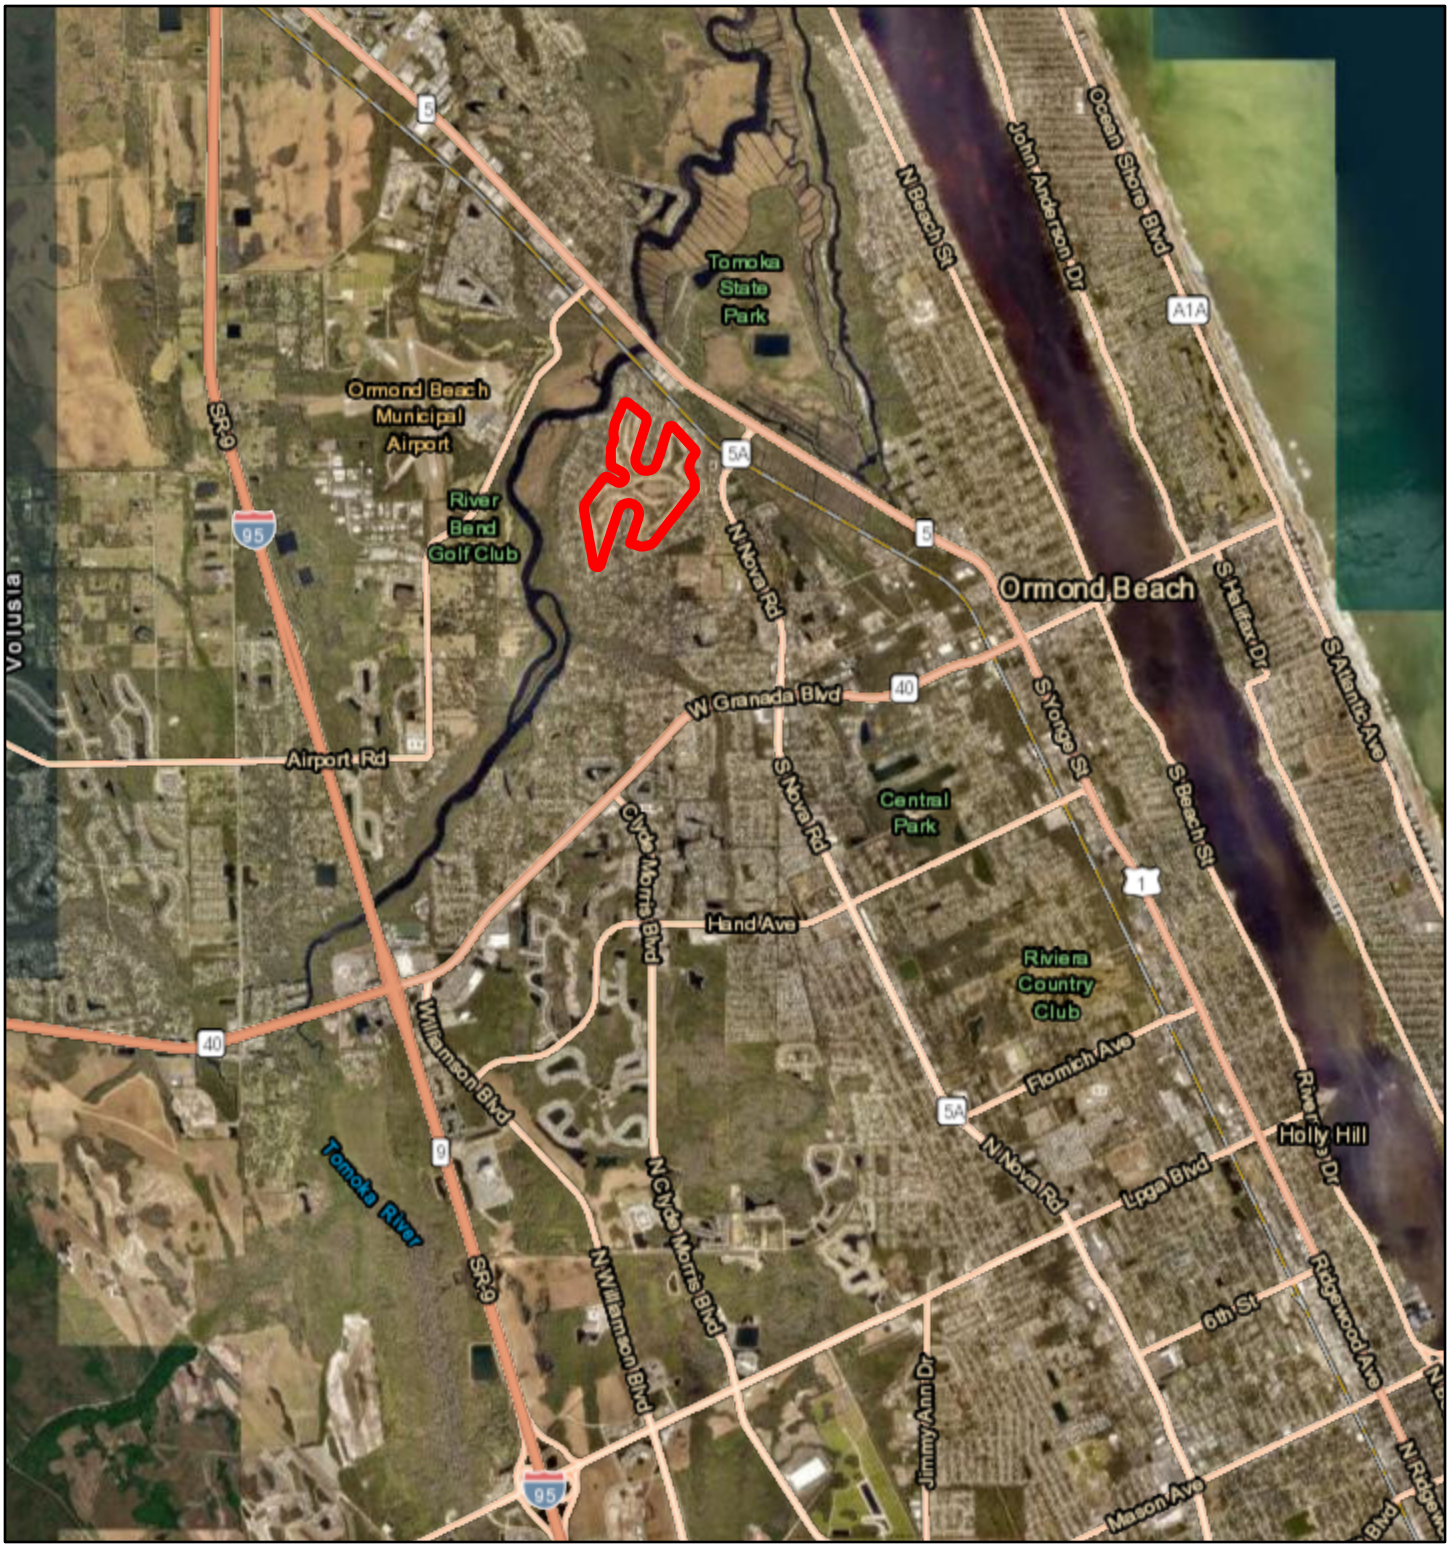
Due to the fact that Gopher Tortoises frequently move and occupy new habitat it is recommended that 90 days prior to site development a Gopher Tortoise Survey, Excavation, Capture and Relocation be completed in accordance with FWC regulations. All Active and Potentially Active Gopher tortoise burrows located in areas proposed for development should be excavated and all captured Gopher Tortoises be relocated in accordance with FWC guidelines.

The subject site is within the USFWS Scrub Jay consultation area which includes most all counties of peninsular Florida. Pre-Consultation is occurring with USFWS.

No Florida Scrub Jays were observed on the subject property.
No evidence of Florida Scrub Jays was observed.
No sustainable of higher quality Scrub Jay Habitat as observed on the subject site.
No evidence was obtained that would suggest sustainable Scrub Jay Habitat would develop in the future.

The absence of Florida scrub Jays could be due to;

- Complete lack of any site management involving Prescribed/Managed burning.
- Lack of Florida Scrub Jay's specific habitat requirements
- Site's location in an Urban/Sub-Urban Area surrounded by Single Family residential development it is highly unlikely that Prescribed-Managed Burning will be an allowed site management tool,
- Site was previously developed and managed as a Golf course-Country Club for approximately 50 years,
- Open Raptor Prey Areas and presence of Raptors, and competition with other bird species.



Updated: See Exhibit 11. On August 12th, 2021 USFWS Fish and Wildlife Biologist, Erin Gawera stated after review that the Service agrees with this Biological Assessment and Environmental Site Assessment that this site is not suitable habitat for scrub-jays and therefore scrub-jays will not be impacted by development of the site. The Service has no objection to development of the project area.

The subject site is not mapped by Volusia County as "Landcovers with Florida Scrub-jays and within Scrub Natural Communities. It is recommended that USFWS concur with the findings of this report that the site does not contain Scrub Jay Habitat and no further surveys are required.

The subject site development does not propose impact to or contain any unique or ecologically significant area of vegetation or habitat. No other protected species were observed or identified on the subject site.

It is the recommendation of Ray and Associates that the subject property prepared by be approved for development as proposed provided there is demonstration of compliance with Local, State and Federal regulations.

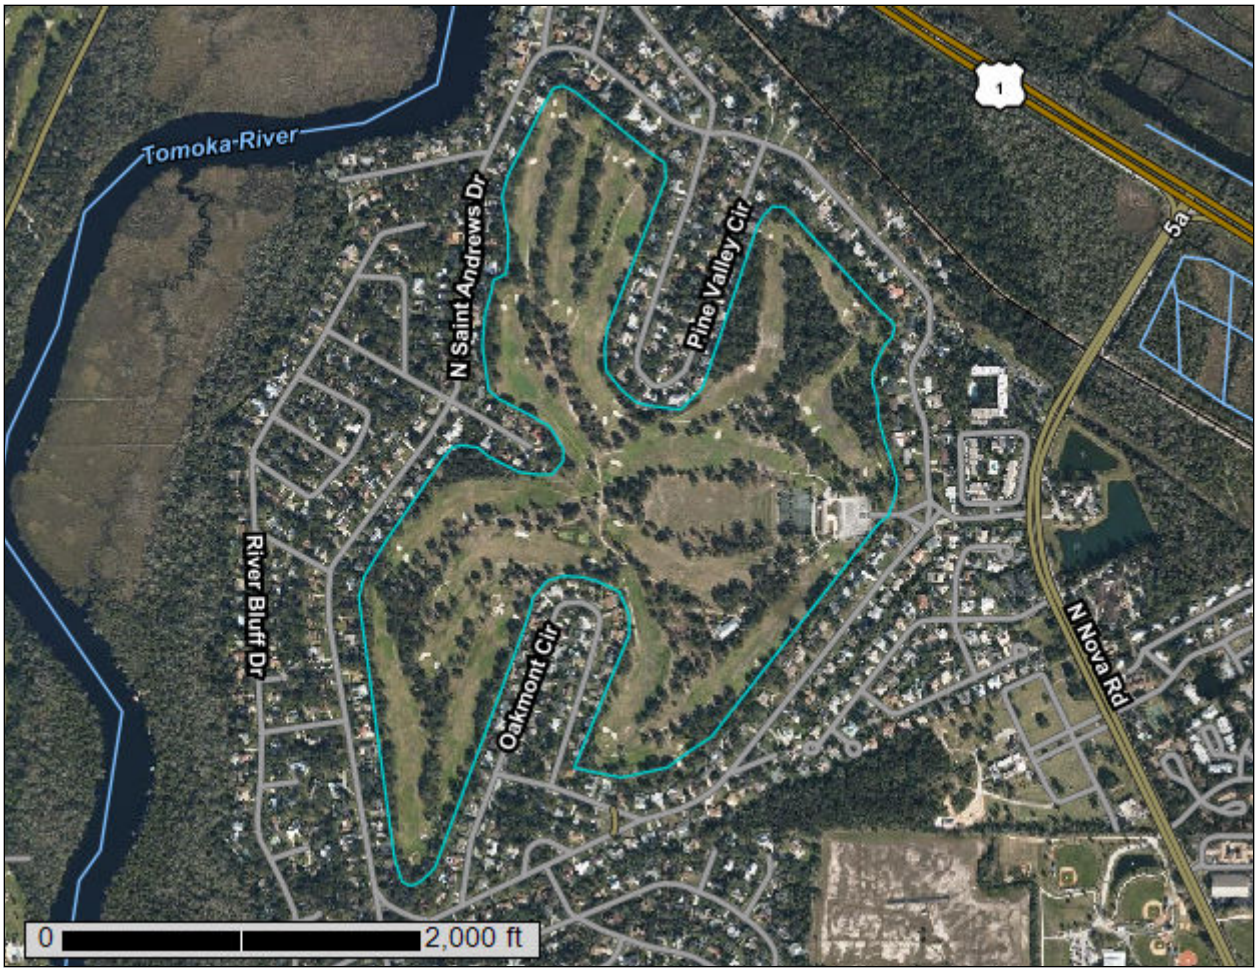
United States Department of Agriculture



NRCS

Natural Resources Conservation Service

A product of the National Cooperative Soil Survey, a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local participants

Custom Soil Resource Report for Volusia County, Florida

Ray and Associates: Exhibit 6: Soils

Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (https://offices.sc.egov.usda.gov/locator/app?agency=nrcs) or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

How Soil Surveys Are Made

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil

scientists classified and named the soils in the survey area, they compared the individual soils with similar soils in the same taxonomic class in other areas so that they could confirm data and assemble additional data based on experience and research.

The objective of soil mapping is not to delineate pure map unit components; the objective is to separate the landscape into landforms or landform segments that have similar use and management requirements. Each map unit is defined by a unique combination of soil components and/or miscellaneous areas in predictable proportions. Some components may be highly contrasting to the other components of the map unit. The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The delineation of such landforms and landform segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map. The frequency of observation is dependent upon several factors, including scale of mapping, intensity of mapping, design of map units, complexity of the landscape, and experience of the soil scientist. Observations are made to test and refine the soil-landscape model and predictions and to verify the classification of the soils at specific locations. Once the soil-landscape model is refined, a significantly smaller number of measurements of individual soil properties are made and recorded. These measurements may include field measurements, such as those for color, depth to bedrock, and texture, and laboratory measurements, such as those for content of sand, silt, clay, salt, and other components. Properties of each soil typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of characteristics for the components. The aggregated values are presented. Direct measurements do not exist for every property presented for every map unit component. Values for some properties are estimated from combinations of other properties.

While a soil survey is in progress, samples of some of the soils in the area generally are collected for laboratory analyses and for engineering tests. Soil scientists interpret the data from these analyses and tests as well as the field-observed characteristics and the soil properties to determine the expected behavior of the soils under different uses. Interpretations for all of the soils are field tested through observation of the soils in different uses and under different levels of management. Some interpretations are modified to fit local conditions, and some new interpretations are developed to meet local needs. Data are assembled from other sources, such as research information, production records, and field experience of specialists. For example, data on crop yields under defined levels of management are assembled from farm records and from field or plot experiments on the same kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on such variables as climate and biological activity. Soil conditions are predictable over long periods of time, but they are not predictable from year to year. For example, soil scientists can predict with a fairly high degree of accuracy that a given soil will have a high water table within certain depths in most years, but they cannot predict that a high water table will always be at a specific level in the soil on a specific date.

After soil scientists located and identified the significant natural bodies of soil in the survey area, they drew the boundaries of these bodies on aerial photographs and

identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.

Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:20,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Volusia County, Florida
Survey Area Data: Version 19, Jun 10, 2020

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jan 6, 2019—Feb 25, 2019

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

Volusia County, Florida

54—Quartzipsamments, gently sloping

Map Unit Setting

National map unit symbol: 1nttk
Elevation: 0 to 100 feet
Mean annual precipitation: 53 to 61 inches
Mean annual air temperature: 66 to 73 degrees F
Frost-free period: 285 to 315 days
Farmland classification: Not prime farmland

Map Unit Composition

Quartzipsamments and similar soils: 100 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Quartzipsamments

Setting

Landform: Rises on marine terraces
Landform position (three-dimensional): Rise
Down-slope shape: Convex
Across-slope shape: Linear
Parent material: Sandy marine deposits

Typical profile

C - 0 to 80 inches: fine sand

Properties and qualities

Slope: 0 to 5 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Moderately well drained
Runoff class: High
Capacity of the most limiting layer to transmit water (Ksat): High to very high (5.95 to 19.98 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Maximum salinity: Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)
Sodium adsorption ratio, maximum: 4.0
Available water capacity: Very low (about 2.4 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 6s
Hydrologic Soil Group: A
Forage suitability group: Forage suitability group not assigned (G155XB999FL)
Other vegetative classification: Forage suitability group not assigned (G155XB999FL)
Hydric soil rating: No

Hi Bill,

The Service agrees with your assessment that this site is not suitable habitat for scrub-jays and therefore scrub-jays will not be impacted by development of the site. The Service has no objection to development of the project area.

Have a great week!

Erin

Subject: [EXTERNAL] Tomoka Oaks Golf Course Scrub Jay Pre-Consultation

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.

Erin, attached please find the Biological / Environmental Site Assessment for the former 146.8 Acre - Tomoka Oaks Golf Course and Country Club in the City of Ormond Beach Volusia County.
This information is provided for Scrub Jay Pre-Consultation.

The total site area project consists of approximately $146.8^{+/-}$ Acres. Starting in the early 1960s the lands were developed as a Golf Course and Country Club with surrounding residential development. The subject site is currently maintained as an inactive golf course. The area is continuing to develop in an Urban manner.

The subject site is within the USFWS Scrub Jay consultation area which includes most all counties of peninsular Florida. The subject site is **not** mapped by Volusia County as “Landcovers with Florida Scrub-Jays and within Scrub Natural Communities".

No Florida Scrub Jays were observed on the subject property.

No evidence of Florida Scrub Jays was observed.
No sustainable of higher quality Scrub Jay Habitat as observed on the subject site.
No evidence was obtained that would suggest sustainable Scrub Jay Habitat would develop in the future.

The absence of Florida scrub Jays could be due to;

- Complete lack of any site management involving Prescribed/Managed burning.
- Lack of Florida Scrub Jay's specific habitat requirements
- Site's location in an Urban/Sub-Urban Area surrounded by Single Family residential development it is highly unlikely that Prescribed-Managed Burning will be an allowed site management tool,
- Site was previously developed and managed as a Golf course-Country Club for approximately 50 years,
- Open Raptor Prey Areas and presence of Raptors,

and competition with other bird species.

It is recommended that USFWS concur with the findings of this report that the site does not contain Scrub Jay Habitat and no further surveys are required.

Do not hesitate to contact me if you have any questions or require additional information.
Thank you for your help and assistance.

Holding capacity*; density.* Density determined in subsection (c)(1) of this section is for gross density purposes only. A more refined methodology for determining the holding capacity of a particular site proposed for development is derived from a three-tiered system based on soil characteristics related to the high seasonal groundwater tables (as derived from the SCS soil classification study); flooding potential as noted on the FEMA, FIRM maps; and the availability of central water and/or central sewer facilities. Table 2 illustrates the relationship between environmental constraints and water and sewer availability when calculating density. This table lists the coefficients for determining density in a matrix.

The procedure for determining holding capacity is as follows:

Step 1: Applicant prepares environmental constraints map for the parcel proposed for development;

Step 2: Calculate the acreage of property within each particular environmental constraints category;

Step 3: Multiply the acreage in each category by a coefficient determined by site-specific environmental constraints and availability of water and sewer as noted in table 2.

Step 4: Sum the totals for each category to achieve the holding capacity for the parcel in terms of maximum potential density.

Once the holding capacity is determined, the developer must prepare plans that are consistent with the holding capacity and environmental constraints of the subject property.

Five (5) distinct environmental constraint categories have been identified and are described below, together with their density allocations.

a.

Very Low. Areas that lie within the 100-year floodplain and where the seasonal high water table is at or above the surface or areas outside of the 100-year floodplain where the seasonal high water table is six inches (6") or more above the surface. Here, the constraints are seen as being severe, with associated environmental impacts too damaging for community development. Areas in this category are, for the most part, the riverine wetlands and cypress swamps interspersed among the pine flatwoods. Representative soils include the various mucks associated with the wetlands and more established cypress systems. A nominal standard of 0.2 units to the acre (one (1) unit per five (5) acres) is assigned as the maximum achievable density for this category, regardless of the availability of central utilities (facilities are not planned for these areas). In some cases, it is conceivable that a single development site could be located within a five-acre parcel classified entirely as "very low." However, a more likely scenario, particularly for larger parcels, would be the transfer of the density allocation to the more buildable areas of the site.

b.

Low. Includes soil types with a seasonally high water table that, at times, will reach and exceed the surface. This category includes land that falls within designated 100-year

floodprone areas and has a seasonal high water table that does not reach the surface and is not greater than six inches (6") below the surface, or lands where the water table will occasionally be at or above the surface (zero (0) to six inches (6") above) but, for various reasons, is not designated as a 100-year floodprone area. The low category encompasses the more subtle depressional features among the flatwoods. The pine/cypress vegetative community and the depressional variety of the Pomona, Immokalee, and Myakka soil series commonly occur in this category. These lands can tolerate a certain amount of mitigated modification without irreversible environmental damage. The maximum density value for this category is 0.5 units per acre (one (1) unit per two (2) acres) regardless of the availability of utilities. As with the very low category, these levels of development can be achieved only under the ideal circumstances consistent with the criteria for protection of wetlands that typically occur within this soil category. Therefore, development is not likely to occur at assigned densities within these areas but will probably be transferred to other more suitable on-site uplands.

c.

Medium Low. These are areas that are within the 100-year floodplain and the seasonal high water table is greater than six inches (6") to twenty-four inches (24") below the surface or those areas that are outside of the floodplain and the seasonal high water table does not reach the surface and is not greater than six inches (6") below the surface. Density ranges in this category are one (1) unit per two (2) acres without infrastructure; one (1) unit per acre with central water only; and three (3) units per acre with both central water and sewer. Depending upon actual vegetative system conditions, these areas may be suitable for limited development or for open space uses with on-site density transfer to more suitable areas.

d.

Medium. The criteria for designating lands in the medium category is the seasonal high water table greater than six inches (6") below the surface to twenty-four inches (24") below and outside of floodprone areas or is twenty-four inches (24") or greater below surface if in floodprone area. Extensive areas in the western and southern portion of the Pamlico Terrace are in this category. Due to the nearly level terrain in those areas within the floodplain, the water table hovers near the surface for two (2) to three (3) months a year. However, with proper drainage design and adequate infrastructure, development potential can reach up to four (4) units per acre with central water and sewer; one (1) unit per two (2) acres with no central utilities; and two (2) units per acre with central water only. Planned unit developments, with net densities in excess of one (1) unit per acre utilizing either well or septic or one (1) unit per two (2) acres utilizing well and septic may be allowed provided that minimum lot size requirements are not reduced, to achieve maximum potential density. Instead, transfer of density to a portion of the site serviced by a central system will be allowed, provided the proposed development is consistent with the zoning district requirements, level-of-service standards, and compatible with the natural resources.

e.

High. This category includes lands that are not within a floodprone area and have a water table deeper than twenty-four inches (24") below the surface. These lands generally consist of deep sandy soils and are the most suited for community development. They are in relatively short supply due to the prevailing high water tables and floodprone conditions

in the undeveloped perimeter areas of the city and the early development of the deep, sandy ridge areas. Representative soils of this category include the Tavares, Daytona, and DeLand series. Up to six (6) units to the acre (roughly the equivalent of duplex or zero-lot-line development on five thousand (5,000) square foot lots) is achievable with central utilities. With central water only, the maximum density would be three (3) units per acre if that could be achieved under health department septic standards. The location of package plants is acceptable in the medium and high categories for planned unit developments at the higher densities (e.g., greater than one (1) unit per acre) on an interim basis only where it is not economically feasible (due to and/or sewer service at the time of development. In these cases, the development shall be dry-lined and impact fees paid in advance or bonded for. Without central sewer or water, the maximum density is one (1) unit per two (2) acres (project size in relation to line extension distances) to connect to central water.

Table 1. Density Determinations

EXPAND

Development Potential	None	Water Only*	Water and Sewer
Very Low	0.2	0.2	0.2
Low	0.5	0.5	0.5
Medium Low	0.5	1.0	3.0
Medium	0.5	1.0	4.0
High	0.5	1.0	6.0

* For purposes of computing maximum potential density only; a minimum lot size of 1 acre is required for any development utilizing septic tanks. Connection to central sewer will be required whenever line extensions and appurtenances thereto are deemed economically feasible.

Table 2. Characteristics of Environmental Constraint Categories

EXPAND

Environmental Constraints	100-Year Floodplain	Seasonal High Water Table
Very Low	N/A	At or above the surface

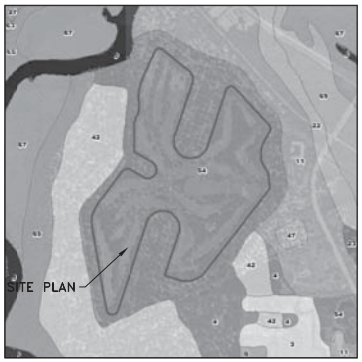
PROJECT DESCRIPTION:

ISSUANCE OF A DEVELOPMENT ORDER TO ALLOW 272 SINGLE-FAMILY LOTS AND ASSOCIATED SITE IMPROVEMENTS.

SITE INFORMATION:	
SITE ADDRESS:	20 TOMOKA OAKS BLVD., ORMOND BEACH, FL 32174
PROJECT AREA:	147.94 ACRES
TAX PARCEL I.D. #:	324207000010
ADJACENT ZONING	R2
EXISTING ZONING:	PRD-EXPIRED
PROPOSED ZONING:	PRD
EXISTING LAND USE:	VACANT
PROPOSED LAND USE:	RESIDENTIAL FAMILY
EXISTING FUTURE LAND USE:	LDR
MAXIMUM UNIT/LOT COUNT:	272
MAXIMUM MODEL HOME COUNT:	16
UNIT/LOT DENSITY:	1.83 PER ACRE
LOT TYPE	VARIES
REQUIRED LANDSCAPE BUFFER(S):	50 FT. MINIMUM
MINIMUM LOT DEPTH:	120 FT.
MINIMUM LOT WIDTH:	60 FT.
MAXIMUM BUILDING HEIGHT	35 FT.
UTILITIES:	PROVIDED BY CITY OF ORMOND BEACH



NOTES:
1. PROJECT MAY BE PHASED. PHASING PLAN WILL BE PROVIDED AT SITE PLAN APPROVAL.
2. ALL CONSTRUCTION TRAFFIC SHALL UTILIZE TOMOKA BLVD. AND NOVA ROAD ONLY.
3. CONSTRUCTION ACTIVITIES SHALL ONLY BE ALLOWED ON MONDAY THROUGH SATURDAY BETWEEN THE HOURS OF 7:00 A.M. TO 7:00 P.M.
4. PEDESTRIAN ACCESS THROUGH THE SECONDARY ACCESS MAY BE PROVIDED BUT SHALL NOT BE REQUIRED. FINAL DESIGN AND LAYOUT TO BE COORDINATED DURING SUBDIVISION REVIEW
5. THE PERIMETER BUILDING SETBACK SHALL BE NO LESS THAN 50' FROM THE PROJECT BOUNDARY PER L.D.C.
6. MODEL HOMES INCLUDED IN 272 TOTAL PROPOSED UNITS
7. TYPE 6 BUFFER AS MODIFIED PER TOMOKA RESERVE BUFFER PLANTING AND MAINTENANCE PLAN SEP. 6, 2023.
8. EXISTING VEGETATION NATURAL VEGETATION WITHIN THE BUFFER WILL BE UTILIZED TO MEET THE MINIMUM STANDARDS. AT TIME OF CONSTRUCTION IF EXISTING NATURALLY OCCURRING LANDSCAPE IS INSUFFICIENT (BY CITY OF ORMOND BEACH LANDSCAPE ARCHITECT) SUPPLEMENTAL PLANTINGS WILL BE PROVIDED.
9. PROPOSED ENTRANCE WILL BE GATED TO VEHICULAR ACCESS. PEDESTRIAN ACCESS IS STILL PROVIDED THROUGH MAIN ENTRANCE AND EMERGENCY ACCESS.

SHEET: PD7 OF 10

Tomoka Reserve Architectural Standards

I. PREFERRED ARCHITECTURAL THEMES

A. The overall architectural vision for Tomoka Reserve has been established to create a community embodying a "timeless" quality. Such a vision will be realized through a variety of classical and regional architectural styles, combined with authentic detailing and use of high-quality materials.

B. Permitted architectural styles include but are not limited to contemporary, Modern, Postmodern, coastal themed styles, Mediterranean, Mission, Cracker, Craftsman, Ranch and Tuscan styles.

II. PROHIBITED ARCHITECTURAL STYLES

A. While diversity and creativity in the design of the homes at Tomoka Reserve is encouraged, certain architectural styles are not considered appropriate. These include, but are not limited to Art Deco, A-frame, Adobe, Cabin design style, Gothic, or Southwestern/Pueblo. Buildings and their accessory structures shall be consistent with a common architectural theme.

B. The architectural theme shall be established by harmoniously coordinating the general appearance of all buildings and related structures.

III. EXTERIOR MATERIALS/ELEVATIONS

A. Architectural variation and variety of housing types and designs within the neighborhood is encouraged. To facilitate this diversity the adjacent homes (the 2 adjacent homes on the same side of the street as well as the house across the street and its two adjacent homes) have to have a minimum of three different design elements of the following 10 elements

1. Roof color/materials
2. Roof pitch roof type (cable vs hip)
3. Skin/exterior finish materials
4. Color
5. Garage orientation/size
6. Porch size/location
7. Number of stories
8. Window sizes/shapes
9. Window locations
10. Decorative elements

B. The front facade should include four to six individual design elements and blank walls shall be discouraged unless adequately landscaped. Front elevation walls cannot be all one material and/or all one color.

C. A mixture of one-story and two-story homes will be encouraged to vary the streetscapes.

D. PERMITTED EXTERIOR MATERIALS INCLUDE:

1. Stucco (cement-based or synthetic) -smooth or textured finished (including tabby finish)
2. masonry-stone, brick, split rock and a ceramic concrete block is permitted but must be finished with material that covers the concrete block and grout lines with a minimum of 3/8" thick material; Stone can be Manufactured, Natural, or Cast
3. Wood/fiber cement-timbers, boards, board and batten, tongue and groove solid wood siding and rough sawn lumber; Hardie board or other similar fiber cement products emulating wood finishes
4. Other textures and materials will be evaluated on their own merit by the ARB. Artificial, simulated or imitation materials (e.g. aluminum siding, simulated brick from stucco, Masonite or composite board, etc.) are NOT permitted on the exteriors of a residence.

IV. ROOF

A. Acceptable roof materials for consideration include, heavy weight (30 year) composition shingles with significant dimensional texture, flat tile, "S" tile, slate tile, cedar wood shake, solar shingles and a high-quality standing seam metal roof. Copper and other metal roof products acceptable to the ARB are permitted for limited applications such as bay windows, process, cupolas, and dormers, or in accordance with specific architectural styles. Thermoplastic Polyolefin, PVC membrane or other similar roofing materials/roofing systems will be considered by the ARB on a case-by-case basis for properties developed with ultramodern or contemporary homes that incorporate a flat roof.

B. Roof lines will be variable using varied roof styles, pitches, projections, gables, and hips. Roof pitches shall be between 0 to 6:12. Dormers may have a roof pitch outside the above range. Flat roofs or flat roof with a parapet may be approved if it is a part of an integral design element such as with ultra-modern or contemporary designs. The roof pitch for primary structures should reflect the selected architectural style for the home.

C. Roof structures may be conventionally framed or constructed of prefabricated trusses.

V. WALL PLATES

A. The minimum wall plate heights shall be 9'-0" in main living areas on the first floor. The second-floor wall plate height must be no less than 9'-0" above the first-floor wall plate. Garages must have a minimum plate height of 8'-0".

VI. DRIVEWAYS

A. Driveways shall be stone, paver style materials, or concrete. Asphalt is NOT permitted.

VII. GARAGES

A. Three types of garages are permitted: front-entry, side entry, and accessory garage buildings.

VIII. FENCES

A. The following fence materials are permitted: wood, black wrought iron, high-quality aluminum, and white PVC. Perimeter fencing along rear or side (from front of house to rear property line shall be a maximum height of 6 feet. Fencing along the front property line or side property lines from the front of the house to the front property line shall have a maximum height of 4 feet. This "front yard" fencing must be decorative (no solid fences) and if a wood fence is utilized it must be painted.

IX. LANDSCAPE

A. All disturbed areas on the lot must be irrigated (unless xeric plantings are utilized), and landscaped with either trees, plants or sod including to the back of curb along the street and to the edge of clearing for natural areas and the water's edge for lots along pond banks. All landscaped beds shall be mulched.

X. MODIFICATIONS

A. All modifications to the above shall be submitted to the ARB for consideration of approval. The above are general guidelines. Tomoka Reserve development will have an enhanced focus on the environment, climate change and sustainability, along with protecting and enhancing future values.

SHEET 1 ALTA SURVEY / INDEX
SHEET 2 KEY SHEET
SHEET 3-12 TREES AND TOPOGRAPHIC INFORMATION
SHEET 13 TREE LIST

SURVEYORS NOTES

1. NOTICE: THIS SURVEY WAS PREPARED WITH BENEFIT OF ALTA COMMITMENT FOR TITLE INSURANCE ISSUED BY FIRST AMERICAN TITLE INSURANCE COMPANY UNDER FILE NO. 12071-2664415 WITH AN EFFECTIVE DATE OF DECEMBER 30, 2020 AT 8:00 A.M. AS UPDATED AND REVISED ON JANUARY 12, 2021. (ISSUING OFFICE REGISTRY ID: 1141339);

2. DIMENSIONS ARE SHOWN IN FEET AND DECIMALS THEREOF.

3. BEARING STRUCTURE BASED ON NAD 83, FLORIDA STATE PLANE, EAST ZONE, U.S. SURVEY FOOT WITH THE BEARING ON THE WESTERLY LINE OF TOMOKA OAKS COUNTRY CLUB ESTATES UNIT 3A BEING S37°58'29"W.

4. UNDERGROUND FOUNDATIONS, IF ANY, NOT LOCATED.

5. THIS PROPERTY IS LOCATED IN F.I.R.M. ZONE "X", THIS LOCATION IS DETERMINED BY SCALING FROM F.I.R.M. COMMUNITY PANEL 12127C0211 & 12127C0212, MAP EFFECTIVE DATE SEPTEMBER 29, 2017, APPROXIMATE SCALE 1"=500 FEET.

6. "NOT VALID WITHOUT THE SIGNATURE AND THE ORIGINAL RAISED SEAL OR DIGITAL SIGNATURE OF A FLORIDA LICENSED SURVEYOR AND MAPPER."

7. "THE PROPERTY DESCRIBED HEREIN, CONTAINS NO GAPS OR GORES AND TAKEN AS A TRACT, CONSTITUTES ONE CONTIGUOUS PARCEL OF LAND".

8. THE LEGAL DESCRIPTION OF THE PROPERTY AS DESCRIBED IN SCHEDULE A AND ON THE SURVEY ARE IN FACT ONE AND THE SAME PARCEL OF LAND IRRESPECTIVE OF THE MINOR DISCREPANCIES IN THE COURSES AND/OR DISTANCES.

SHCEDULE B-II EXCEPTIONS PER TITLE COMMITMENT:

1. DEFECTS, LIENS, ENCUMBRANCES, ADVERSE CLAIMS OR OTHER MATTERS, IF ANY, CREATED, FIRST APPEARING IN THE PUBLIC RECORDS OR ATTACHING SUBSEQUENT TO THE EFFECTIVE DATE BUT PRIOR TO THE DATE THE PROPOSED INSURED ACQUIRES FOR VALUE OF RECORD THE ESTATE OR INTEREST OR MORTGAGE THEREON COVERED BY THIS COMMITMENT. (STANDARD EXCEPTION; NOT A SURVEY MATTER)

2. ANY RIGHTS, INTERESTS, OR CLAIMS OF PARTIES IN POSSESSION OF THE LAND NOT SHOWN BY THE PUBLIC RECORDS. (STANDARD EXCEPTION; NOT A SURVEY MATTER)

3. ANY ENCROACHMENT, ENCUMBRANCE, VIOLATION, VARIATION OR ADVERSE CIRCUMSTANCE AFFECTING THE TITLE THAT WOULD BE DISCLOSED BY AN ACCURATE AND COMPLETE LAND SURVEY OF THE LAND. (AFFECTS SUBJECT PROPERTY AND SHOWN HEREON) [FENCES LABELED E1, E2, E3, E4, E5, E7, E8, E9]; [SCREENED POOL ENCLOSURE LABELED E6]

4. ANY LIEN, FOR SERVICES, LABOR, OR MATERIALS IN CONNECTION WITH IMPROVEMENTS, REPAIRS OR RENOVATIONS PROVIDED BEFORE, ON, OR AFTER DATE OF POLICY, NOT SHOWN BY THE PUBLIC RECORDS. (STANDARD EXCEPTION; NOT A SURVEY MATTER)

5. ANY DISPUTE AS TO THE BOUNDARIES CAUSED BY A CHANGE IN THE LOCATION OF ANY WATER BODY WITHIN OR ADJACENT TO THE LAND PRIOR TO DATE OF POLICY, AND ANY ADVERSE CLAIM TO ALL OR PART OF THE LAND THAT IS, AT DATE OF POLICY, OR WAS PREVIOUSLY UNDER WATER. (STANDARD EXCEPTION; NOT A SURVEY MATTER)

6. TAXES OR SPECIAL ASSESSMENTS NOT SHOWN AS LIENS IN THE PUBLIC RECORDS OR IN THE RECORDS OF THE LOCAL TAX COLLECTING AUTHORITY, AT DATE OF POLICY. (STANDARD EXCEPTION; NOT A SURVEY MATTER)

7. ANY MINERALS OR MINERAL RIGHTS LEASED, GRANTED OR RETAINED BY CURRENT OR PRIOR OWNERS. (STANDARD EXCEPTION; NOT A SURVEY MATTER)

8. TAXES AND ASSESSMENTS FOR THE YEAR 2021 AND SUBSEQUENT YEARS, WHICH ARE NOT YET DUE AND PAYABLE. (STANDARD EXCEPTION; NOT A SURVEY MATTER)

9. RESTRICTIONS, DEDICATIONS, CONDITIONS, RESERVATIONS, EASEMENTS AND OTHER MATTERS SHOWN ON THE PLAT OF SAM SNEAD GOLF & COUNTRY CLUB, AS RECORDED IN PLAT BOOK 25, PAGE(S) 61, BUT DELETING ANY COVENANT, CONDITION OR RESTRICTION INDICATING A PREFERENCE, LIMITATION OR DISCRIMINATION BASED ON RACE, COLOR, RELIGION, SEX, HANDICAP, FAMILIAL STATUS OR NATIONAL ORIGIN TO THE EXTENT SUCH COVENANTS, CONDITIONS OR RESTRICTIONS VIOLATE 42 USC 3604(C). (AFFECTS SUBJECT PARCEL, CANNOT BE GRAPHICALLY DEPICTED)

10. DEVELOPMENT ORDER ISSUED BY CITY OF ORMOND BEACH RECORDED IN OFFICIAL RECORDS BOOK 5944, PAGE 2183. (AFFECTS SUBJECT PARCEL, CANNOT BE GRAPHICALLY DEPICTED)

11. EASEMENT AGREEMENT AS SET FORTH IN INSTRUMENT RECORDED IN OFFICIAL RECORDS BOOK 5089, PAGE 1438. (AFFECTS SUBJECT PROPERTY AND SHOWN HEREON)

12. PROVISIONS CONTAINED IN DEED RECORDED IN OFFICIAL RECORDS BOOK 2052, PAGE 1019, INCLUDING RIGHTS OF LIFE TIME MEMBERS. (AFFECTS SUBJECT PARCEL, CANNOT BE GRAPHICALLY DEPICTED)

13. TERMS AND CONDITIONS OF ANY EXISTING UNRECORDED LEASE(S), AND ALL RIGHTS OF LESSEE(S) AND ANY PARTIES CLAIMING THROUGH THE LESSEE(S) UNDER THE LEASE(S). (STANDARD EXCEPTION; NOT A SURVEY MATTER)

14. ANY MAP OR DIAGRAM NOW OR PREVIOUSLY PROVIDED IS FOR REFERENCE AND INFORMATIONAL PURPOSES ONLY. THE COMPANY AND ITS AGENTS EXPRESSLY DISCLAIM ANY LIABILITY FOR ALLEGED LOSS OR DAMAGE WHICH MAY RESULT FROM RELIANCE UPON SUCH MAP(S) OR DIAGRAM(S). THE FOREGOING DOES NOT LIMIT ANY EXPRESS COVERAGES PROVIDED BY THE TERMS AND PROVISIONS OF ANY TITLE INSURANCE POLICY FOR MATTERS WHICH MIGHT BE REVEALED BY A SURVEY PREPARED AND CERTIFIED IN ACCORD WITH FLORIDA STATUTES SECTION 472.027.

ORMOND BEACH PLANNING BOARD

Regular Meeting

July 13, 2023 6:00 PM

Calvary Christian Center
1687 West Granada Boulevard
Ormond Beach, FL 32174

PURSUANT TO SECTION 286.0105, FLORIDA STATUTES, IF ANY PERSON DECIDES TO APPEAL ANY DECISION MADE BY THE PLANNING BOARD WITH RESPECT TO ANY MATTER CONSIDERED AT THIS PUBLIC MEETING, THAT PERSON WILL NEED A RECORD OF THE PROCEEDINGS AND FOR SUCH PURPOSE, SAID PERSON MAY NEED TO ENSURE THAT A VERBATIM RECORD OF THE PROCEEDING IS MADE, INCLUDING THE TESTIMONY AND EVIDENCE UPON WHICH THE APPEAL IS TO BE BASED.

PERSONS WITH A DISABILITY, SUCH AS A VISION, HEARING OR SPEECH IMPAIRMENT, OR PERSONS NEEDING OTHER TYPES OF ASSISTANCE, AND WHO WISH TO ATTEND CITY COMMISSION MEETINGS OR ANY OTHER BOARD OR COMMITTEE MEETING MAY CONTACT THE CITY CLERK IN WRITING, OR MAY CALL 677-0311 FOR INFORMATION REGARDING AVAILABLE AIDS AND SERVICES.

I. ROLL CALL

Members Present	Staff Present
Angie Shull, Vice Chair	Claire Whitley, Assistant City Manager
G.G. Galloway	Steven Spraker, Planning Director
Al Jorczak	Becky Weedo, Senior Planner
Mike Scudiero	David Allen, Planning Civil Engineer
Barry du Moulin	Cara Culliver, Landscape Architect
Troy Railsback (Absent)	Robin Gawel, Senior Planner
Doug Thomas, Chair	Sarah Cushing, Senior Planner
	Marcella Miller, Recording Technician
	Randy Hayes, City Attorney

II. INVOCATION

Chairman Thomas led the invocation.

III. PLEDGE OF ALLEGIANCE

IV. NOTICE REGARDING ADJOURNMENT

NEW ITEMS WILL NOT BE HEARD BY THE PLANNING BOARD AFTER 9:00 PM UNLESS AUTHORIZED BY A MAJORITY VOTE OF THE BOARD MEMBERS PRESENT. ITEMS WHICH HAVE NOT BEEN HEARD BEFORE 9:00 PM MAY BE CONTINUED TO THE FOLLOWING THURSDAY OR TO THE NEXT REGULAR MEETING, AS DETERMINED BY AFFIRMATIVE VOTE OF THE MAJORITY OF THE BOARD MEMBERS PRESENT (PER PLANNING BOARD RULES OF PROCEDURE, SECTION 2.7).

Mr. Randy Hayes, City Attorney, explained the process for the public hearing. Attorney Hayes recommended that those individuals who sought to give testimony on the application be sworn in by the Board Secretary and to affirm if they took the Oath when they speak.

Attorney Hayes reviewed an outline of procedural and evidentiary matters regarding Quasi-Judicial proceedings regarding the roles of the City Attorney, Planning Board and explanation of a Quasi-Judicial hearing, competent substantial evidence, Burden of Proof, witness testimonies, and the decision making process of the Planning Board. He added that there are two stipulations that the Planning Board members must vote on to: (1) agree to stipulate that the professionals who will testify on behalf of the parties are qualified to do so, and (2) allow Tomoka Oaks HOA to participate in the proceeding as a "party-intervenor".

Attorney Hayes advised the Board that once moving into the public hearing they must vote on the two stipulations aforementioned.

Chairman Thomas stated that the Planning Board members are their neighbors and are volunteers. He continued that the Board tries to do what is best for them and the City of Ormond Beach, and have no special interest.

Chairman Thomas opened the Public Hearing.

V. PUBLIC HEARINGS

A. PRD 2022-043, Tomoka Reserve – Issuance of a Development Order

Chairman Thomas asked Ms. Miller, Recording Technician, to read the Oath. Ms. Miller read the Oath:

"Do you swear that the testimony you are about to give is the truth, the whole truth and nothing but the truth?"

Mr. Galloway motioned to approve of and accept the following stipulations: (1) the parties agree to stipulate that the professionals who will testify on behalf of the parties are qualified to do so; and (2) allow Tomoka Oaks HOA to participate in the proceeding as a "party-intervenor". Mr. Jorczak seconded it. Vote was called, and the motion was approved (6-0).

Mr. Steven Spraker, Planning Director, explained the application for the issuance of a development order for the Tomoka Reserve subdivision. The application seeks to allow the issuance of a development order for 276 single-family lots on approximately 147.94 acres under certain conditions and associated subdivision improvements. The subject property is currently zoned as Planned Residential Development (PRD), and is located at 20 Tomoka Oaks Boulevard.

Mr. Spraker stated that the property has an existing land use of "Low Density Residential" (LDR) which allows a density of up to 4.3 units per acre. He continued that the purpose of the land use is to protect and encourage the continued development of typical single-family residential areas and stabilize and protect the character of

such neighborhoods. Mr. Spraker added that institutional uses may be permitted in accordance with the maximum floor area ratio.

Mr. Spraker continued with the explanation of the existing zoning of Planned Residential Development (PRD). In 2006, there was a zoning map amendment that went from R-2, Single-Family Low Density to PRD, Planned Residential Development. A site specific development order was approved for 122 residential units and the reconfiguration of the golf course. Mr. Spraker stated that one of the conditions of approval was to provide the covenant and restrictions on the golf course because in 2006 it was determined that there was no covenant and restrictions. The development order expired. He explained the process for the issuance of a development order began with a neighborhood meeting, in which the property went through two, then Site Plan Review Committee (SPRC), Planning Board and City Commission. Mr. Spraker explained that the development order is a zoning document that provides the number of lots, landscape buffer, and recreational areas. If approved, the next step is the construction plans as preliminary plat, with detailed engineering, landscape buffers, and roadways, which also goes through the process with the SPRC, neighborhood meeting, back to the Planning Board and then on to the City Commission.

Mr. Spraker reviewed the Tomoka Reserve Site Plan. He continued that the project is approximately 148 acres, with 276 proposed units and a density of 1.87 units per acre. He stated that the project seeks to allow a gated vehicular access while allowing pedestrians to still access the project through sidewalks. Mr. Spraker stated that there is an emergency access easement noted on the plan. The project is not in a designated floodplain, and there are no wetlands on the property. He added that an environmental assessment was provided with the project. Mr. Spraker remarked that the site plan is preserving 34 acres and an additional 9 acres for recreation. A key issue expressed through the process is size of the lots, with the proposal of 80' lots in width, 60' lots in width, and 50' lots in width. He continued that there is a proposed 50' buffer around the perimeter of the site (3.3 miles). The project stormwater areas use berms around exiting vegetation which is a low impact development technique. He added that the historic trees on the property are being sought to be preserved and that they provided the required school concurrency and a Traffic Impact Analysis.

Mr. Spraker reviewed key issues included in the staff report, starting with issue 1, the development ability of the former golf course. Mr. Spraker stated the Planning Board packet included an analysis from Ms. Davis, including a letter from Mr. Brent Spain Esquire. Also included in the packet was an analysis from the City Attorney's office and from the applicant's law firm, Cobb Cole. Mr. Spraker explained the position of the city staff that there is no covenant and restrictions that would prevent the site from being used for residential purposes.

Mr. Spraker reviewed issue 2, the lot size compatibility. Mr. Spraker described the R-2 zoning district which was the original zoning on the property and the surrounding area. The R2 zoning district requires a 100'-wide lot width a 10,000 square-foot lot area size. He explained that part of the applicant's Planned Residential Development request is to provide additional buffers, recreation and open space in order to negotiate lot size. They are not increasing the overall density but reconfiguring it in order to provide additional natural preservation and additional buffer and recreation,

according to Mr. Spraker. Staff discussed its similarity to what happened with an area of west Ormond, where there were applications for subdivisions less than 80' in width. These applications were denied and the subdivisions were made to comply with the 80'-wide lots.

Mr. Spraker discussed issue 3, planting of the 50' natural buffer. The applicant is seeking to use the existing vegetation along the perimeter buffer and in the areas that do not have vegetation, they are seeking to do seven trees and 30 shrubs and grasses, per 100 linear feet, clustered in 20' spacing. The irrigation is proposed to be provided by a truck with a water tank and no permanent irrigation. Mr. Spraker continued that the position of the Site Plan Review Committee (SPRC) is that the type 6 buffer which requires seven trees, 70 shrubs and 70 ground covers per 100' linear feet with staggered planting, should be adopted by the Board as it has worked well in other applications. SPRC staff strongly objects to the use of non-permanent irrigation and believes that this will lead to future land use issues and the Homeowners' Association (HOA) would be tasked with doing the irrigation. Mr. Spraker stated the buffer should not be clustered in a 20-foot buffer depth but rather staggered over the 50-foot buffer area in order to allow for proper tree growth and spacing.

Mr. Spraker discussed issue 4, the setback plan. Mr. Spraker stated that the applicant proposed a setback plan and staff provided an analysis in the staff report. Mr. Spraker reviewed the setbacks proposed by the applicant and the recommendations of the SPRC. Staff does support the front porch setbacks, as they have been successful in Chelsea Place.

Mr. Spraker discussed issue 5, Sheet PD6 note on the lot separation. Mr. Spraker explained that the note allowed variation on the buffer width. Staff recommends that the note be amended to state that the 50' buffer abutting the Tomoka Oaks existing residential lots and areas called out as natural preservation shown on the site plan. The natural preservation area shall not be modified and shall always be vegetative areas (Option 24 in the staff report). Mr. Spraker stated the language within the development order becomes a contract and when they go to construction that is what needs to be presented in the preliminary plat.

Mr. Spraker discussed issue 6, the traffic. The applicant performed a detailed Traffic Impact Analysis (TIA). City staff had the TIA reviewed by the traffic consultants, Traffic Engineering Data Solutions (TEDS) employed by the city. After requests from citizens at the February neighborhood meeting, the applicant updated the TIA traffic counts to get current counts. The TIA concluded that 96 percent of the project trips used Tomoka Oaks Boulevard and 4 percent used Iroquois Trail for external access. He added that the traffic study found that a traffic signal is warranted at Tomoka Oaks Boulevard and Nova Road. Mr. Spraker stated that the TIA concluded that all local intersections operate at a Level of Service "A" or "B", where the adopted Level of Service is a "D". A proportionate fair share calculation was drafted, which is where state law allows them to contribute their fair share for whatever traffic impacts they have. Mr. Spraker referenced another traffic issue that is part of the SPRC review, the intersection of St. Andrews Drive and Tomoka Oaks Boulevard. The intersection is awkward and does not function well. Mr. Spraker stated staff believed that the applicant should bear some responsibility in the reconfiguration, perhaps through a joint partnership through the impact fee credits.

Mr. Spraker stated that comments were received from residents in that they desire sidewalks on both sides of Tomoka Oaks Boulevard, where the applicant only proposed a sidewalk on one side.

Mr. Spraker discussed issue 7, recreation areas. The development order seeks to provide all outdoor recreational areas with no indoor recreation provided. The project has proposed 9 acres of recreational areas, with final details to occur with the preliminary plat.

Mr. Spraker discussed issue 8, environmental analysis. Mr. Spraker states Ayden Environmental submitted site assessment reports and a Soils Management Plan to the Florida Department of Environmental Protection (FDEP), where all work will be managed by them with the oversight of the FDEP. The FDEP approved the site assessment reports and Soils Management Plan in a letter dated November 16, 2022. Mr. Spraker stated that there are no wetlands on the site and it is not in a designated floodplain, and added that any gopher tortoises onsite will be reviewed at the preliminary plat.

Mr. Spraker stated that the applicant has applied for a R-2 Zoning Map application, separate of the PRD, with the intent that if the PRD is not approved, it would be necessary to ensure that they have zoning. He reiterated that the R-2 zoning allows 100' wide lots with a 10,000 square-foot lot area minimum. The setbacks are 30' in the front yard, with the building coverage at 35 percent. Mr. Spraker stated Planned Developments have additional requirements on the natural preservation, requiring 20 percent whereas the Land Development Code (LDC) requires 15 percent. Mr. Spraker continued that the applicant is proposing a 50' buffer within the Planned Development, when only 6' is required under the R-2 zoning guidelines. Mr. Spraker detailed that the R-2 zoning district does not require a perimeter setback, where the Planned Development requires a 40' perimeter setback. The Planned Development site plan includes 9 acres of recreational area and there is no recreation requirement in R-2 zoning.

Mr. Spraker reviewed the correspondence received throughout the proposed project and advised that a city webpage is maintained that shows each project submittal site plan, in which the information and documents were also enclosed in the Planning Board packet. He explained that concerns received included the topics of lot sizes, lot compatibility, stormwater, buffer widths, impacts to the existing wildlife, and traffic. The correspondence received were included in the packet.

Mr. Spraker explained that when reviewing the PRD criteria, the Planning Board should take into consideration: (1) the application submittal, (2) staff report and SPRC comments, (3) written correspondence provided, (4) criteria of the LDC contained within the staff report, and (5) testimony provided at the Planning Board public hearing. He stated that staff recommends denial of the proposed site plan for the issuance of a development order. He continued that there are items that the applicant can do that would change the recommendation including larger lot sizes, adjusting the buffer in terms of the plantings and irrigation, revisions to the setback plan, participation in the diamond intersection with a diamond reconfiguration

requirement at the construction (preliminary plat) phase of the development, and sidewalk additions be on both sides of Tomoka Oaks Boulevard.

Mr. Spraker concluded with thanking Calvary Christian Center with allowing use of their facility for the public hearing, and reminded everyone that there were comment cards in the back for those wishing to speak on the item.

Board Discussion and Questions

Mr. Jorczak asked for clarification of the statement in the Board packet, specifying that denial of the application may lead to the movement of the R-2 Single-Family Low-Density Zoning Map Amendment to provide the property a zoning designation. Mr. Spraker replied that the property is required by state law to have a zoning. If unable to work through the Planned Residential Development (PRD) process, the property is required to have a zoning designation. Mr. Spraker states the applicant has submitted an application to amend to R-2 which allows single-family lots as an allowed use. Under the R-2 zoning, as long as the application meets the criteria in the LDC, there is nothing that the SPRC can do to deny the application. Mr. Spraker continued that they would be required to have 100' wide lots and 10,000 square feet lot sizes, and have to have stormwater and utilities, and 15 percent natural preservation.

Mr. Scudiero asked Mr. Spraker for clarification based on the 147 acres, what the number of single-family homes would be to fall under the second scenario. Mr. Spraker answered that a site plan is required to calculate the number. It has not been submitted to city staff.

Ms. Shull inquired about the 100' wide lots and if that would be throughout the entire proposed property under the R-2 zoning. Mr. Spraker confirmed yes, but commented that there are certain things that staff cannot require such as increased buffers and recreation. The entire basis of the application is the trade of the increased buffers and the natural area for smaller lots in size.

Chairman Thomas disclosed that he met with the attorney for the applicants, Mr. Rob Merrell, Esquire, Cobb Cole Attorneys at Law, at City Hall on July 12, 2023 to discuss the item.

Applicant's Presentation

Mr. Rob Merrell, Esquire, Cobb Cole Attorneys at Law, 2049 S. Ridgewood Avenue, Daytona Beach, and Representative of the developers, thanked the Planning Board and staff for their time. He reiterated the choices that are before the Board, adding the possibility of a custom choice option, if they so desire. He delivered a summary of the project and overview of the rezoning criteria in a PowerPoint presentation, including explanation of the experts testifying about the project and their qualifications.

Mr. Merrell stated that the applicants purchased the property approximately three years ago. Two neighborhood meetings were held as well as other smaller meetings with the HOA and others. He concluded that several revisions have been made to the plan in which Mr. Dwight Durant, Zev Cohen & Associates, will detail.

Mr. Dwight Durant, Zev Cohen & Associates, 300 Interchange Boulevard, stated that the overall plan is for 276 units on 147 acres, where the holding capacity density analysis allows 800 units. He reviewed the site plan and open space plan and explained the benefits of the design, including the water distribution system, versus the golf course fertilizer effects. Mr. Durant continued with details on emergency access. He added that the minimum size lot, surrounding the perimeter of the site is 80' wide by 120' long, which allows additional space between the homes. He continued with information on the lot range widths from 50' to 80', the maintenance plan for the 50' buffer, and the proposed density of 1.87 units per acre. Mr. Durant explained that the open space plan exceeds the LDC standards on preservation areas and that 53 percent of the site is dedicated to landscape buffers, open space, stormwater management systems, and recreation areas. Mr. Durant added that he took the Oath.

Mr. Merrell continued with his presentation and added that he did not take the Oath. He explained the architectural standards of the proposed project, commenting that the neighbors want quality and diversity, similar to what Tomoka Oaks currently has, and that is what is being proposed with the variety of architectural plans.

Mr. Jake Stehr, Zev Cohen & Associates, 300 Interchange Boulevard, began with advising the Board that he took the Oath. He stated that the proposed property 50' landscape buffer is approximately three miles in length. In reference to the buffers, he described the proposed landscape and irrigation plan and remarked that the project requires a six (6') foot landscape buffer which requires two shade trees, 20 shrubs and 20 ground cover per 100 linear feet, and the applicants are proposing seven (7) trees, 30 shrubs and 30 ground cover per 100 linear feet.

Mr. Donald Spence, President and Owner, Native Florida Landscapes, LLC, stated that he is also a Board Certified Master Arborist and Ph.D. of Plant Pathology, University of Florida. Dr. Spence explained that he assisted with performing the tree survey and with the proposed buffer layout design, keeping it as similar to the existing buffer as possible. The layout is designed for a native, drought-tolerant species, that will not need irrigation after establishment.

Mr. Durant reviewed the criteria met in the LDC standards and the compliance of them.

Mr. Mark Karet, Director of Planning and Landscape Architecture, Zev Cohen & Associates, 300 Interchange Boulevard, stated that he took the Oath. He added that he has 35 years of experience in both the public and private sectors, has his Master's Degree in Urban and Regional Planning from the University of Florida, and is also a member of the American Institute of Certified Planners (AICP). Mr. Karet spoke on the project's conformance with the LDC standards and consistency with the Comprehensive Plan. He commented that LDC, Section 2-35(b), deals with more intense uses, such as townhomes and apartment districts, versus what is being presented in the application. He referenced the concern of 'crowding' and noted that the density is less than one half of what is permitted under the Future Land Use designation. The open space and buffers create slight crowding, although more than 50 percent of the site is open space. Mr. Karet added that the property falls in the "Low Density Residential" Future Land Use designation and the proposal aligns with

the land use and LDC, and the application aligns with the goals, policies of the city, supports infill development, and adheres to the intended use of the property.

Mr. Durant explained that the last criteria is on trees and that Mr. Bill Ray, AICP, and Mr. Jeff Flairty, P.E., Environmental and Planning Consultant and Presidents, Ray and Associates, are in attendance for any questions. He concluded that there are no wetlands onsite, and that an Environmental Analysis was performed.

Mr. Michael Hotaling, MAI, Managing Partner, Moody Williams Appraisal Group, 1300 Riverplace Boulevard, Suite 640, Jacksonville, stated that he took the Oath. He continued that he was asked to analyze the home sales as to whether the golf course lots sold for more than the non-golf course lots. Mr. Hotaling advised that he looked through two sets of data from 2021 to current and 2016-2018, and found the only substantial price difference was in the size of the homes. Golf course fronting lots tend to have larger homes, according to Mr. Hotaling, and he found that the gross sales price tends to be higher, but the price per square foot turns out to be lower. He advised that he also analyzed the potential impact of the Planned Development on the existing homes and explained that there has been a paradigm shift in how subdivisions are developed in regulation and the local demand. Smaller lots are being sought after, with smaller yards to mow. The same size house is wanted but with less yard to maintain. More compact neighborhoods with walkability, underground utilities and community amenities are desired. Mr. Hotaling continued that essentially with golf courses, there is a stigma associated, and people pay less for the homes on the golf course because the golf course is closed.

Mr. Sans Lassiter, P.E., President, LTG Engineering and Planning, 1450 West Granada Boulevard, stated that he took the Oath. He stated that he has his Master's Degree in Transportation of Engineering from the University of Florida, and has 45 years of experience. Mr. Lassiter delivered explanation of the traffic analysis, including the warrant for a traffic signal at Tomoka Oaks Boulevard and Nova Road. The development will be going through the proportionate fair share process, with the stacking information and traffic access improvements presented.

Mr. Merrell continued with describing the 9th criteria regarding material and architectural features and standards, which is part of the negotiating process as part of the custom zoning, Planned Residential Development (PRD). He explained the difference from 'by the book' straight zoning. Mr. Merrell commented that the final, 10th criteria is happening now with the expert-testimonies.

Tomoka Oaks HOA Presentation

Mr. Dennis Bayer, Esquire, 109 6th Street, Flagler Beach, legal counsel of the Tomoka Oaks HOA, introduced himself with 35 years of experience in land use and zoning and resides in Ormond-by-the-Sea. He added that he has worked on golf course conversion cases. He stated that buffers, location of lot sizes, and compatibility with lot sizes requires flexibility. Mr. Bayer stated that he has met with the developers, consultants, and staff, and expressed his concerns with size of the significantly smaller lots, traffic and infrastructure. He commented that the HOA supports staff's recommendation.

Mr. Thomas Harowski, Certified Planner and Tomoka Oaks resident, 97 N. St. Andrews Drive, stated that he did take the Oath, and has a Master's Degree in City and Regional Planning, and is a member of the American Institute of Certified Planners (AICP), with 50 years' experience in the field. Mr. Harowski continued that he submitted an analysis of the proposed plan and spoke on compatibility between the proposed project and the neighborhood, traffic concerns, and residential design standards. He suggested the proposed project would be the first thing that people see when they go into the community and will be a defining element to the extent that the new homes will give a different impression of the neighborhood which will change Tomoka Oaks and the existing community. He reiterated the plan for bigger houses on smaller lots. The new houses will be more massive in appearance than the most exceptional in size in Tomoka Oaks now. Mr. Harowski expressed his concerns with the design of the proposed houses on the 50'-wide lot homes with the garages all protruding forward. He added that when going down the entrance street, you will see a continuous row of garages on both sides. He continued with 50'-wide lots on the project, they should be consistent. He explained that he has prepared quality alternative designs. Mr. Harowski noted that diversified design is the final element in the characteristic of Tomoka Oaks, and currently they have wood, brick, stucco and stone and the proposed neighborhood presents a more monolithic look, inconsistent with the current neighborhood. He commented on the design of the homes being repeated throughout the proposed development with 16 models throughout. Mr. Harowski referenced the traffic study and expressed his concern as well with the traffic that would come with the project, and stated that all agree a traffic signal is needed at Nova Road and Tomoka Oaks Boulevard, with an excess of 2,700 additional trips per day. He suggested that the applicant should be required to modify the study to reflect the upcoming changes to Nova Road proposed by the Florida Department of Transportation and an updated diamond intersection with an adequate turning radius. Mr. Harowski concluded with his concern about the sidewalks, with one sidewalk being proposed on only one side, commenting that there should be sidewalks for safety on both sides.

Mr. Spraker provided a reminder that anyone interested in speaking to the Planning Board would need to complete a comment card.

Chairman Thomas opened the public comments.

VI. PUBLIC COMMENTS

Each speaker is allowed three (3) minutes to address the Planning Board.

Audience Comments

Ms. Carolyn Davis, 46 Oakmont Circle, introduced herself as a resident of Tomoka Oaks and confirmed that she took the Oath. She commented that her name may be familiar from the staff report. She advised that she writes the Tomoka Oaks Times newsletter. Ms. Davis hired Attorney Brent Spain, Theriaque & Spain Law Firm, who submitted a letter of opinion citing case law, that a golf course property cannot be developed into residential homes. Ms Davis explained Mr. Spain's legal authority in that he received his J.D. from Florida State University (FSU), where he ranked #7 in his class of 214. She continued that his relevant areas of practice include land use and zoning law, land use litigation, and appellate advocacy. Ms. Davis clarified that her

prevention efforts are independent of the volunteer HOA mitigation efforts and expressed that she respects their efforts. She thanked *Jim, Dennis and Tom* for their presentations. Ms. Davis explained that she felt compelled to take a different path, based upon historical and legal records that would prevent development. She added that she noticed that the developers included their resumes and pictures, of ten professionals to lend credibility to their flawed application. She stated that it is important to let the Planning Board know that she has her own list of credible, seasoned professionals, a number higher than ten, it is the homeowners of Tomoka Oaks and the surrounding neighborhoods that purchased homes believing the golf course would always remain a green area within our neighborhood. She asked the homeowners to raise their hands until her speech was over. She stated that she wanted the Board to see the faces of her credible professionals. Ms. Davis advised that she will provide the City Commission hundreds of resumes and signed and return post cards of public opposition. She stated that Tomoka Oaks residents went to her house today as she was writing this speech to personally deliver their post cards. A realtor, Kathy, asked Ms. Davis to tell the Board that even she does not want the proposed project. Ms. Davis concluded that she agrees with the decision of the city staff and Mr. Spain that the Planning Board should recommend denial. Mr. Spain's opinion will continue to have significant relevance for the denying the R-2 application as well.

Ms. Stephanie A. Cox, 1526 Agatha Drive, Deltona, stated that she did not take the Oath but solemnly swears. She continued that she is a resident of Volusia County and is a licensed real estate broker for over 33 years. She explained that she plans to move to Ormond Beach to be closer to her 4-registered voting children. Ms. Cox expressed that she is tired of the growth, traffic, problems with the schools and infrastructure in the city, as well as the traffic that will come if this development is approved.

Mr. Len Gaspary, 7 Oakmont Circle, stated that he lives on the Tomoka Oaks golf course. He elaborated on his career as a home builder in Volusia County, including homes in Tomoka Oaks. He built four houses on the golf course, as well as four to five houses off of the golf course in Tomoka Oaks. Mr. Gaspary commented that when he was new to the neighborhood, the golf course lots were substantially more expensive then off of the golf course lots, and he chose to live at his home based on the fact that it was on the golf course. He added that 36 years ago, he paid a premium for the lot. Mr. Gaspary continued that at one time you had to get your home plans approved by an architectural review board and had to be administered by the people who developed the Trails subdivision to ensure it would fit in with the community. Mr. Gaspary expressed his feelings about if the golf course is closed, it will impact the value of the homes and lots. He feels that there must be a way to mitigate the loss and value of his house, as it changes the complete character of the community by adding 276 lots, which will add almost 800 people when all is said and done. He confirmed that he took the Oath.

Mr. Jeff Boyle, 614 N. Halifax Drive, stated that he is duly sworn and commented on the proposal having consistency issues. Comprehensive Land Use Planning, Goal 2, says that the development must be compatible with nearby homes, lot sizes and density. Policy 1.1.3. - prohibits altering the neighborhood character by squeezing a new subdivision inside an existing subdivision. Policy 2.1.1. - this project allows unsafe traffic flow, with more than 2,700 daily trips. Policy 2.4.6 - protects the environment from excessive tree removals, too much impervious surface and

stormwater that overflows into the Tomoka River. Policy 1.6.4. - states, preserve natural open space in urban areas, do not eliminate 148 acres of that open space. He continued, in the Land Development Code, Section 1-15, prohibits depreciation of adjacent property values and undue crowding. Section 2-35, requires a PRD to provide an indoor recreation amenity that is missing and substantial community benefits that justify code waivers and exemptions sought by the applicant. Mr. Boyle added that legal questions cloud this golf course conversion, early Tomoka Oaks documents promised a golf course "in perpetuity".

Mr. Boyle stated on October 3, 2006, the City Commission granted a 122-unit Tomoka development order with the condition to preserve the golf course. Everyone was unanimous on the decision, including the City Commission, including the current Mayor and two preceding Mayors, the Planning Board, the Planning Director, city staff, and the applicant's attorney all recognized that it implied unwritten golf course protection existed. He continued that in 2014, the United States Court of Appeals, 11th judicial circuit, upheld unwritten implied golf course protections. It does not have to be in writing. Mr. Boyle advised Chairman Thomas, in case law precedent and in city land use codes, we believe that the Board has solid legal grounds to deny this proposed rezoning.

Ms. Denise White, 9 Fox Run Trail, advised that she lives in the Trails subdivision and thanked the Board for their time and efforts and listening to the residents. She expressed her concern with the development is health and safety of everybody. She understands developers rights and knows why they purchased the land, but explained that thousands are impacted by the development by 450' single-road for residents to get in and out of the neighborhood, and takes issues with the traffic analysis stating that only four percent of residents will be going through the Trails. Ms. White stated that the Trails has small two-lane narrow roads that are laden with medians and that she walks the wider roads on Tomoka Oaks Boulevard. She continued that last year the question was raised by Trails residents about overflow traffic. She commented that it will affect all of them. She asked when looking at the map, at the 450' road, how it is reasonable to expect that it is not affecting everybody's lives and health and safety.

Ms. Ashley Dufrene, 118 N. St. Andrews Drive, stated that in Section 1-15, Article II, Administration Enforcement of the Ormond Beach Land Development Code, it is the Planning Board and City Commissioners' duty to ensure that the proposed use will not substantially or permanently depreciate the values of the surrounding property; create a nuisance; or deprive the adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood on the adjoining properties. Ms. Dufrene advised the Board that the current plan in front of them does everything that a proposed use should not. She said that her and her husband purchased their home in 2015 with the vision of raising their family there as generations did before them. They were looking for peace and tranquility being that they lived in major cities (Orlando, Miami, Atlanta and Washington D.C.) prior to settling in Ormond Beach. Ms. Dufrene continued that they were done with big-city-living and fell in love with Tomoka Oaks as they drove down the road and complete strangers would wave 'hello'. She explained that she felt that they were 'home'. She described that as they walked into the open house they were greeted with windows aligning the back of the home to see what they imagined 'old Florida' looked like with beautiful live oak trees lining what was the second fairway of the Tomoka Oaks

Golf Course. It was beauty that they had not seen in so many years living in congested neighborhoods and concrete jungles for all of their lives. They chose to buy the house even at the top of their price-range. Ms. Dufrene stated that they looked at a house on Rio Pinar that was $50,000 less but knew that the Tomoka Oaks home's view of the golf course was worth the extra expense. She added that eight years later, what was once their peace and tranquility as they are expecting their first child, will be destroyed by a wall of homes lining the back of their house, fifty feet from the edge of their pool. She elaborated that the new homes will block their sunrise-view and be replaced with concrete walls that are everywhere you turn nowadays. The wall of homes will not be finalized for years to come, and for the next 5+ years there will be a construction zone surrounding the beautiful land including their sleeping baby. She commented that hammering, pounding, and dust will circulate as they try to enjoy their haven of peace and privacy. Ms. Dufrene concluded that the proposed use must "not create a nuisance; or deprive adjoining properties of adequate light and air; create excess noise, odor, glare, or visual impacts on the neighborhood and adjoining properties." She closed in saying that she hopes that she illustrated that the plan will do everything that it should not. Ms. Dufrene confirmed that she took the oath.

Ms. Michelle C. Zirkelbach, 328 River Bluff Drive, expressed that she cares deeply and passionately about the home as her and her husband built the home and raised their children there. She added that she cares about her neighbors and neighborhood and cares about the City of Ormond Beach. She continued that the proposed development affects everybody as every resident travels on one of the major thoroughfares in the city. Ms. Zirkelbach stated that Ormond has grown extensively since she moved here in 1989 and she realized that a guiding force in the development is the Comprehensive Plan. She continued that the Comprehensive Plan establishes a community's policies and priorities regarding future development while aiming to preserve the environmental features and community character. She remarked that community character is something that Tomoka Oaks has in spades. The compatibility with existing character is something the developer wants the residents to believe is true. She continued that combability is just a buzzword to her at this point. Ms. Zirkelbach stated that the neighborhood is full of individual architectural design an abundance of majestic trees and established homes. She continued expressing her confusion with the applicants' claims that the proposed 50' wide, 60' wide and the 80' wide lots were compatible with the existing 100'+ lots they currently enjoy throughout Tomoka Oaks. Ms. Zirkelbach stated that her and the other residents are confused about the traffic studies. She apprised the Board that she was a former math teacher and is aware that people can make numbers say whatever they want them to, resulting in all Ormond Beach residents suffering the consequences of the traffic. Ms. Zirkelbach commented that she has been reading and studying a lot about the matter at hand and is reminded of when she studied contracts when getting her real estate license in 2004. She remarked that she never had a buyer ask her to find them a house on a 50', 60' or 80'-wide lot. She continued that they are being faced with the developers maximizing profits per acre. Ms. Zirkelbach concluded that all of the residents that raised their hands signed a contract to buy a home in a golf course community or on a golf course. She expressed lack of care about the expert that said that the home values will go up, if her quality of life goes down.

Ms. Ellen L. Cook, 1 Tomoka Oaks Boulevard, Escondido Condominiums, expressed her concern with the traffic, with her condominium building facing Nova Road. She

stated that the only thing that will not prevent anything is if the proposed development will not be built. She elaborated on the traffic that is seen stacked up and said that it is due to the railroad. She said that it does not matter how many cars are coming or going, that everyone has to stop at the railroad track. Ms. Cook remarked that putting up another traffic signal on Tomoka Oaks Boulevard is not going to matter if the railroad is closed and nobody can pass and turn left onto Nova Road or from Nova Road on to Tomoka Oaks Boulevard as everything comes to a halt. A railroad signal will not be in sync with the traffic signal, she said, and added that there will be accidents. Ms. Cook concluded that only the residents in Escondido and Tomoka Oaks know what goes on there and suggested that they pay attention because it is going to be a big issue.

Ms. Adele Shaw, 1 Tomoka Oaks Boulevard, stated that she took the Oath and lives in the Escondido Condominiums and is also concerned about the traffic. She continued that when she sees the word Reserve in the words Tomoka Reserve, she thinks of nature. Ms. Shaw that the city could have purchased the former golf course. Ms. Shaw expressed her dissatisfaction with the project and lack of natural preservation and recreation in it.

Mr. Tom Fitzgibbon, 51 S. St. Andrews Drive, stated that he lives in Tomoka Oaks and is a member of their HOA Board. Mr. Fitzgibbon confirmed he took the Oath. He expressed his concern with the traffic, stating that the new houses will add 600 vehicles or more and more than 2,700 daily trips at a minimum. The development traffic will block Escondido going in. He continued that turning left from Tomoka Oaks Boulevard onto Nova Road is already dangerous, and commented that there will be twice the amount of cars and trucks will make it worse. Mr. Fitzgibbon remarked that the traffic light may take up to two years to install. He continued that the Granada Boulevard, Main Trail-intersection, where LTG is predicting that after the development is built there, that only 18 more cars in the AM peak hour will exit onto Granada Boulevard, and referenced the part of the report that detailed that there will be 600 more vehicles where many will exit through the Trails to Granada Boulevard to Walmart, Lowes and other locations. Taking the Trails route versus Nova Road is about the same travel time. Mr. Fitzgibbon stated that he takes the route through the Trails as it is a nicer route. He expressed his concern with the data and methodology of LTG traffic study. He stated that residents could not hire a traffic expert because no local traffic agencies approved of the development. Mr. Fitzgibbon explained that none of the narrow roads have sidewalks and puts the residents and kids in danger. The Public Works Department has promised to put in speed tables on Tomoka Oaks Boulevard based on a speeding problem that radars, signs and patrols cannot fix. He commented that four houses down from his house, a female pedestrian was killed by a driver. He stated that he saw a city inspector also almost get hit by a speeding car as well as large delivery trucks that speed blindly around cars, clipping overhead wires and trees. Mr. Fitzgibbon asked the Planning Board and City Commissioners to finish the street work before house construction and to plan the possible development correctly to limit injuries and deaths.

Ms. Denise Corley, 51 S. St. Andrews Drive, stated that she took the Oath, opposes the development and spoke on her topics of compatibility and soil. She continued that the 100'-wide lots create spacious feel along with 13 islands. She added that the proposal looks urbanized with 50', 60', 80'-wide lots covering 50 percent of the land and is incompatible. The proposal tells the fact that centrally located smaller homes

are appropriately screened from the existing neighborhood and she continued that it points to the fact that village-homes on 50'-wide lots are less compatible. Ms. Corley continued that the center cavity is not diverse and the area in the north corridor is spacious, larger and upscale, and expressed that the plans for diversity are sketchy. She asked if there are assurances that the houses will be private homes or if it is a corporate rental housing development, and asked if it would be good for Ormond Beach. Ms. Corley remarked that calling the golf course an infill makes it sound as though it is the ghetto in an urban city. She expressed concerns about the soil and asked the Board to take a close reading of the environmental report where it points to several remediation steps that need to be performed for the soil clean up target levels to be met with standards for residential housing. She asked if it can be trusted that the steps will be followed in accordance to the law and if the soil will continue with unacceptable levels of harmful chemicals, be removed offsite or mixed with the other soil. Ms. Corley suggested that the recommendation that the soil will be transported and piled on open space in amenity areas of the proposal is of no comfort to the existing residents. She expressed her concerns with the fertilizers, poisons, animal feces, petroleum products, rubbish in the drainage ponds as well as the airborne toxins released by moving soil as discomforting as well. She touched on the berms, and stormwater drainage ponds on the perimeter of the proposal and those abutting the 50' buffer of the Tomoka Oaks residents, and mentioned that she hopes the berm is not toxic soil piled up behind the homes. Ms. Corley continued that the swales, ditches and dry ponds proposed are known to be mosquito habitats and that Tomoka Oaks residents utilize ground stormwater pipes. She urged that the Board vote no on the proposal.

Ms. Jane Eddy, 306 River Bluff Drive, stated that she took the Oath and read a letter from another Tomoka Oaks resident, Ms. Julie Frebis, who was unable to attend. "I would like to utilize my time this evening to discuss the overall development occurring in the City of Ormond Beach and the lack of critical infrastructure our city currently has to accommodate the needs of its citizens. I recently had to take my mother to the emergency room. She was suffering with a heart condition that without timely treatment could have easily led to a stroke. We went into the ER around noon and waited five hours for a room. Once in the room, we waited another three hours before we saw a doctor. The doctor ordered medication and due to a lack of staff, she was not given the medication until I called a high-level contact at the hospital to get extra attention. Once I called my contact, she was given the medication about 45 minutes later or almost nine hours since arriving at the ER. This concerns me a great deal. What if her condition was worse and she had a stroke? What about our citizens that do not have someone to call? How many of our current citizens are suffering severe medical consequences due to the lack of critical care infrastructure? What about the families when they need care? This is not the hospital's fault. They are working at break-neck speed to expand their services. This is simply due to having too many people move to our town in too short of a time period. It is time to step on the brake pedals. I work as the employee benefits director for a large company in the area and am acutely aware of the lack of other medical providers in our community. You need to be aware that there is a critical shortage of primary care physicians in the area. Most in our community have to wait up to six months to book a new patient appointment with a primary care provider. Also to my knowledge we only have one provider in all of East Florida that serves the under privileged or maternity care. My question to you is what is more important? Additional tax revenue for the city, and

allowing developers to build to the maximum, or the well-being of the Ormond Beach current residents? The right answer is the well-being of our current residents."

Mr. Scott Ryals, 24 Tomoka Oaks Boulevard, stated that prior to his current address he lived at 66 N. St. Andrews Drive. He stated that he had a decision to make when he saw the problems back in 2006/2008. He commented that it was a very difficult decision to put in 122 units on a golf course he played since 1970. He added that he has been in the neighborhood for 50 years. Mr. Ryals said that he knows every chemical that was put on the golf course before and got his first job there. He elaborated on his familiarity with the golf course and club house. He stated if we let a piece of our city do what's happening, to me and my family, you won't think to highly of Ormond Beach. Mr. Ryals stated that he still lives in Tomoka Oaks and he loves it. Mr. Ryals stated that he knows how mitigation takes place with numbers, and how individual freedoms are taken away over time. He stated that he was the one who stated if anything was done to the golf course property that it would remain a golf course. Mr. Ryals commented that he beat his head night and day on how he can do it. He said that they could only put in 122 units with the 2006 development and did not want to make $150 million off the development. They did not want to impact the traffic. He concluded that he hopes his perspective is understood and that he enjoys Tomoka Oaks and plans on staying there. Chairman Thomas commented that Mr. Ryals had taken the Oath.

Mr. Peter Tupas, 332 River Bluff Drive, confirmed he took the Oath. He stated that he has been a resident of Tomoka Oaks for 27 years and has been a real estate broker for 30 years. He disagrees with comment made about the golf course depreciating the value of the homes on it. He added that a lot of people paid a lot of money because the houses are on the golf course. Mr. Tupas commented on the two-lane access on Nova Road and two-lane access going from Main Trail, and adding 600 cars with rush hour, people will be stacked up. Mr. Tupas stated in the real estate business, anything behind houses impacts there value. He remarked that the traffic light may assist getting people on the road but that the access through Tomoka Oaks will be jammed up getting to the traffic light.

Mr. Ned and Lauren Huhta, 30 Pine Valley Circle, introduced himself and his daughter, and stated that he took the Oath and is a second-generation resident. He explained that he lives in a custom built home and is like none other in the neighborhood. He added that he supports the city staff denial and encourages the Board to do so. Mr. Huhta commented on his support of the Tomoka Oaks residents and remarked that the high traffic levels will be a nuisance to all who travel through the area, and believes that it promotes a lower quality of life. He suggests the applicant provide all of the funding for the configuration of the entry area if approved. He requested that if reuse water for irrigation is provided to the project, then re-use water should be provided to existing Tomoka Oaks residents. Miss Huhta confirmed that they took the Oath.

Mr. Richard Goldhair, 21 Cherokee Trail, advised that he took the Oath. He stated he desired to talk about the construction traffic that will likely last three to five years, as well as weekends on Saturdays 7:00 a.m. to 7:00 p.m. He expressed his hope that the 18-wheelers will not be allowed. If they cannot use the Tomoka Oaks entrance, will there be overflow on the two Main Trail entrances, Nova Road and Granada Boulevard. Mr. Goldhair referenced traffic, including large delivery vehicles

contending with pedestrians, skateboarders and bicyclists at the choke point off of Nova Road with the public shopping center on one side and community center on the other side with the possibility of a catastrophic situation. He continued that trucks accessing Granada Boulevard that get to Rio Pinar and Iroquois to get to the new construction site, they will have to go over the Misners Branch bridge. He expressed concern if the bridge can take the excess weight of the construction trucks and increased traffic. He questioned how the proposed project will affect real estate values and insurance premiums.

Ms. Barbara Handsman Doliner, 108 S. St. Andrews Drive, stated that she took the Oath. She explained that her family has had a thumbprint in Volusia County for 83 years and she has been a resident of the Trails and Tomoka Oaks for 35 years. She added that she raised her children there and that they are all registered voters. Ms. Doliner stated that she has been a professional volunteer in the community for 35 years and expressed appreciation to the Planning Board for volunteering. She thanked the residents for working diligently to maintain the neighborhood. She commented that she does not understand why the proposed project and the people behind the project, are so resistant to what the community has to say. Ms. Doliner stated and repeated, that it does not fit the community. She suggested building it in Miami or elsewhere and not in Tomoka Oaks where they do not want 'cookie-cutter' homes. She added that they do not care if gates or sidewalks are included in the proposal, and concluded that the shoe does not fit and this Cinderella will never have the shoe fit, no matter what way it is packaged. It does not fit. Ms. Doliner reiterated the suggestion for 100'-wide lot executive homes with 120 units. At $700,000 per home, she asked if that was enough money to make, what is the issue here. Ms. Doliner concluded that no consideration was given to increasing police, EMTs and Firefighters. She understands the shortage of doctors, the overcrowded hospitals and the going rate of over 7 hours at the emergency department. The shoe simply doesn't fit.

Mr. James Cameron, 39 Laurel Oaks Circle, stated solemnly swore that all of his comments are true in nature. He stated that he in support of the application and has worked with a local pro-business group for a number of years and has worked with the Volusia County Association for Responsible Development. He expressed the importance of all finding a happy medium that everybody can agree to and said that he talked with Planning Board members as well as with people in opposition to the issue. Mr. Cameron pointed out that he has heard a lot of people say that they have a lot of confidence in Planning staff. He concluded that he hopes a custom zoning can be agreed upon between all parties.

Mr. Renny Herrero, 111 N. St. Andrews Drive, stated that he took the Oath. He stated that he has lived in the community his entire life and is part of six generations. His grandfather was born in New Smyrna in 1918 and installed a love for surfing and golf in him. Mr. Herrero continued that he and his wife married and were excited with the expectation of being near a golf course and has played golf in Tomoka Oaks since the 1980s. He commented that he has played almost every golf course around the community and referenced the statements about 21 different golf courses within 20 miles and another questionable comment on four municipal golf courses, and remarked he did not think that it was factual information. Mr. Herrero stated that he can think of about seven golf courses within 20 miles as well as two municipal golf courses and delivered additional information on the popularity of golf courses and

educational opportunities in reviving ones that are run down. He referenced one in Atlanta where businessmen put their ideas together and put together a plan for educational opportunities for a rebuild. Mr. Herrero commented that golf is still popular and there are 60-80 people out on the LPGA Golf Course swinging a club daily even in the summer heat. He remarked that it is outside and beautiful. He added that the idea to relaunch Tomoka Oaks as a standalone 18-hole course without financial support is not financially sound. Mr. Herrero suggested considering other proposals that would keep the golf course. He concluded that the community could be behind the concept of a use that included the golf course in the redevelopment. Mr. Herrero stated to approve this plan is to settle for lack of possibilities and ideas. We can do better.

Ms. Caroline Herrero, 111 N. St. Andrews Drive, stated that she took the Oath. She stated she lived and grew up in Tomoka Oaks, and enjoyed being outside there in its beauty, ran and rode her bike there. She added that now one of her favorite parts of her daily routine is sharing it with her grandmother when they go on their evening walks. She added that they have noticed the growth of Ormond Beach and how it has changed the experience of living here. Miss Herrero continued that the Developer's Economic Impact Study states that all traffic is engineered to go Nova Road via Tomoka Oaks Boulevard with it being said that there are other alternatives and that they are longer. She clarified that if you exit the neighborhood onto Nova Road to get to Granada Boulevard where the traffic light and Main Trail connect, which is the other exit, it measures approximately two miles even and if you take the short cut through the Trails it measures 1.9 miles to get to the same intersection. She commented that it is already tricky for pedestrians and cyclists on the streets and pleaded with the Board not to approve the proposed project with this density.

8:30 p.m. Chairman Thomas announced an 8-minute break.

Mr. Adam Kipi, 52 Pine Valley Circle, stated that he took the Oath. He stated that he does environmental remediation and litigation for a living and spoke on the environmental report and asked the question of if they are going to dig 2' and then fill it in with clean fill straight over the top with the problem of going 2' just straight over the fairways because it is only affecting the fairways. He suggested that there would be other drainage issues. Mr. Kipi commented on the proposed homes and retention areas, suggesting that there will still be sloping, topography and grading issues. He touched on the traffic light and remarked that it will be an issue. He added that unless the main entrance is widened to Nova Road that they will be backed up, even with a roundabout. Mr. Kipi referenced the applicants PRD and then the addition of a part two, and added that when he moved here in 2021 he noticed on google maps still had Tomoka Oaks displaying a golf course and noticed in pictures that it had been neglected for years and had the thought that if it were to come up for sale that the residents can buy it and make it a golf course again. He suggested commercially, to take it back to a golf course and sign a Rehabilitation Completion Order. He referenced Tomoka Oaks as being a community built around a golf course and to possibly sell it to the city, stating that nobody wants the proposal or houses to be right up to the back of their fences. He suggested to go build off of Airport Road in undeveloped land. He expressed that he feels that it is going to look ridiculous and that it is going to be a nightmare.

Mr. Tyler Brown, 90 N. St. Andrews Drive, stated that he took the Oath. He expressed concern with the compatibility with Tomoka Reserve and Tomoka Oaks. He stated the applicant states the density is 1.87 units per acre for the Tomoka Reserve project and 2.09 for the Tomoka Oaks subdivision. He stated he questions these numbers. Mr. Brown stated when looking at the Volusia County Property Appraiser's (VCPA) Website, there are 547 lots in Tomoka Oaks with a land area of 282.85 acres, which he calculated at 1.93 units per acre and not 2.09 units per acre,. He commented that the number does not include roads or the islands in Tomoka Oaks and he did not have access to that specific data on the VCPA website. Mr. Brown remarked that it is the addition of 148 acres of the golf course that Tomoka Oaks was built around that was the core of the neighborhood. The number for Tomoka Oaks drops to 1.27 units per acre, lower than their proposed development, according to Mr. Brown. He then referenced the newspaper article out this morning that stated the number is closer to 1.003 units per acre at 547 homes and 545 acres. Mr. Brown commended city staff for their observation of the project and concluded that with the concerns raised by residents, the city might want to clarify the units per acre issue, and more, prior to when the Planning Board reviews any recommendation one way or another.

Ms. Missy Herrero, 111 N. St. Andrews Drive, asked if Mr. Cameron, who expressed that he was in favor of the development, was a paid witness and if so, should he have identified himself as a paid consultant?

Attorney Hayes replied that there is no evidence of Ms. Herrero's inquiry.

Chairman Thomas added that there is no proof that he was a paid witness.

Ms. Herrero stated that she has been a resident of Ormond Beach for 30 years and is a native Floridian. She commented that she is not against development and understands that they cannot fight it but we do have the power to shape it. Ms. Herrero stated that she heard from the Planning Board before that Ormond Beach residents do not want to share their sand in the sandbox with people moving to Florida. She shared her personal story about her parents illnesses with COVID in January and how she and members of her family work in the hospital, serving the community for decades. Ms. Herrero explained that they went to the hospital and both the hospital and the emergency department were full with no beds. She advised that she took her 87-year old father there for needed fluids and how they waited for eight hours in the hallway. She added that it is not the hospital or the nurses or doctors faults and that they are doing the best they can. She said that they left at midnight and that her father returned the next day by ambulance and he waited another eight hours in the hallway again. Ms. Herrero stated that they left and he continued to deteriorate, and attended an appointment via tele med and then had to return to the hospital for a third time via ambulance and was then admitted. She continued that his health deteriorated to a point that the family decided to go home on Hospice-care. Ms. Herrero reported that they did not have a Hospice nurse for five days because there was a shortage and he died three days later. Ms. Herrero explained that there is no structure for the existing residents and that this is what people are doing that are living and dying in the community today. She concluded that she hopes that the Board does not have the same experience that she did of the real life experience-data presented, and that she took the Oath and recommends denial of the plan.

Mr. Paul Hughes, 4 Lauren Court, stated that he took the Oath and expressed his concern with the missing logic, delivering history on his experience in the community in that he moved back to family here 30 years ago and bought into Tomoka Oaks Country Club and Golf Course, the greenspace, what the neighborhood offered to the kids with the opportunity to ride bikes and enjoy life. He continued that he supports all of the efforts for the greenspace and quality of life the golf course would offer by stopping the proposed development. Mr. Hughes commented that when it was up for sale he was late and offered to write a check for the 150 acres so that it would stop. He added that he thinks that there are enough people there that could come up with the money or use the city's money or other appropriate resources, including the university what would be interested in involvement to bringing it back to a greenspace, golf course, and avoid this. Mr. Hughes suggested if going through with this project design, there will be five to seven years construction with trucks that will exceed 24 tons, attempt to go over the bridge, which will limit the number of entrances into the neighborhood. He spoke on his traffic concerns, expressing his recommendation of denial, stating that there is no physical way to put 30 pounds of potatoes in a five-pound croker sac. Mr. Hughes concluded that it is too much for this community and that they bought what they bought, for the green space and what it was and have paid dearly for it.

Ms. Janice Rose, 21 Eagle Court, stated that she took the Oath and has lived on the golf course for 32 years. She asked for a provision in the Planned Development order that the Tomoka Reserve HOA is required to preserve and maintain the trees and the buffer around the development now and in the future. She continued that if they do not, the residents of Tomoka Oaks should have the right to sue. Ms. Rose commented that she may not have 30 years to see mature trees behind the property.

Ms. Leah Washington, 12 Oakmont Circle, stated that she took the Oath and that her and her family moved to Tomoka Oaks in September of 2020. She added that her husband is off serving his last tour in the military and they decided to settle down in Tomoka Oaks with their kids. She commented that they are going to call it home forever, the purpose of them not going with her husband during his last tour so that their kids can settle down and call their place 'home' in their forever home, in a place where they can grow up with kids and know the kids for longer than three years at a time. Ms. Washington stated that they live in a community that was advertised as a golf course community. She expressed that they are finding as time goes on that the peaceful community is not there anymore and is not going to exist. She explained how difficult it has been to find a pediatrician in the community going through three different pediatricians offices to get care and stay with her health insurance. She continued that specialty care for pediatrics does not exist in the community as they have had to travel to Lake Nona, Lake Mary and Orlando frequently for care. She added that they have gone through four different dental offices as well due to having to circulate insurance companies and not being able to sustain the patient load. They drop certain insurance companies in order to sustain a better count in their practices. Ms. Washington stated that all of this is happening without the development and asked what she is supposed to tell her kids when they cannot get a pediatrician or sick child appointment for three weeks, then in turn having to sit in the Emergency Room (ER) for six hours. She commented that it is negligible of the community to consider the proposed development. Ms. Washington concluded that the Florida Department of Transportation (FDOT) issued their study recently and quoted statistics that started

in 2011 that came after the area was zoned Residential in 2006. She mentioned rezoning of a particular pod of land, she thinks that changes would have had to occurred within the geographic area around the property which prevents the use of the property under its current zoning. She concluded that it seems that the community has proven that it is not possible to continue the residential zoned area and suggests denying the project all together.

Mr. Logan Pigliacampi, 31 S. St. Andrews Drive, stated that he took the Oath. He stated he lives on the golf course and attended today's meeting to witness what has been ongoing for a few years. He stated that he was born and raised here and that the golf course has been critical to his way of life. He continued that he goes to the University of Florida and feels our fundamentals of living, how we want to expand and conquer everything around us, and want to make it industrialized and improve everything, and how in part of that, the beautiful scenery is ruined. Mr. Pigliacampi mentioned that he recently took a trip across the United States and drove through approximately 23 states and noticed how the levels of air pollution and industrialized trucking and fracking contribute to asthma. He explained an experience that he had when he just cleaned his white car and then when going through Georgia, through a town that experienced something like this proposal, noticed his car was pitch black. Mr. Pigliacampi stated that these things affect him and the Tomoka Oaks residents. He concluded that he has to live the next 60-80 years with this world and issued a warning, pleading about industrializing the area. He remarked that the community needs the trees and not just the limited number of required ground cover. Mr. Pigliacampi urged the Board to vote no and said to think about long term consequences, including the lives of area residents, the wildlife, and impacts of construction.

Ms. Darla Widnall, 7 Shawnee Trail, stated that people have been trying to fight the development for two years. She commented that she heads up the people in the Trails that do not want any residential development on the golf course. She continued that the city spent $125,000 for a two-year survey for Parks and Recreation, where they came up with 10 items, greenspace, parks, and a golf course in Ormond Beach, to name a few. Ms. Widnall commented that she is not a golfer but that the Tomoka Oaks Golf Course was a beautiful one and feels that it still could be. She attended the FDOT meeting where there were experts and she elaborated on the proposed 276 homes in the middle of Tomoka Oaks, and west of Interstate 95 on Granada Boulevard where there will be 10,000 homes. Ms. Widnall stated that she advised them to change whatever they are doing to Nova Road because by 2045 due to the possibility of the 10,000 additional homes. She concluded that she did not take the Oath but swears to tell the truth.

Ms. Debbie Gatz, 32 N. St. Andrews Drive, stated that she took the Oath. She has been in Tomoka Oaks for 27 years. She inquired about the Planned Development buffer and existing trees. She added that due to living in Florida with storms, a lot of their trees have gone down. Ms. Gatz expressed concern with her existing buffer left with all of the 80' vines taking over her landscape. She encouraged the Board to look at the Planned Development to see what is in place for their HOA to take care of those buffers that have existing trees. Ms. Gatz thanked her neighbors and elaborated on her history in the area, living in the Trails prior to Tomoka Oaks. Her family walks a lot and when walking with others, people always refer to the diversity of the homes.

Ms. Beth Rabitaille, 22 Rio Pinar Trail, stated that she has lived there for 30 years and commented that the road is busy with drivers that speed down it. She questions how accurate the traffic report is. She concluded that she did not take the Oath but swears to it.

Tomoka Oaks HOA Rebuttal/Summary

Mr. Dennis Bayer, Esquire, 109 6th Street, Flagler Beach, legal counsel of the Tomoka Oaks HOA, requested that the Planning Board reflect upon what they heard tonight. When the developers were making their initial application they described this as infill. He continued that this is not infill, but instead the filling of greenspace with a residential development. He further explained that infill is where rundown houses and rundown neighborhoods are taken out and replaced with new development. Mr. Bayer reviewed the history of the property as a golf course since 1963. He commented that it is not a golf course now and it they do not get what they want with a PRD, it will not go straight zoning. He suggested reviewing the staff report and criteria and the issues that the developer needs to answer. Mr. Bayer asked how the buffer will be maintained five years from now when the vines take over all of the trees. Mr. Bayer stated that Mr. Harowski provided design options for the smaller lots. Mr. Bayer acknowledged that the issue of medical care may not be in the Land Development Code for concurrency, but it is a factor should be considered for lower density. This development is building in the heart of the existing Tomoka Oaks subdivisions. He urged the Board to go along with the staff recommendations of denial based upon the lack of information that has been given by the developer.

Applicant's Rebuttal/Summary

Mr. Merrell stated their presentation and design professionals addressed many of the questions brought up tonight. The design professionals provided information on the lot widths and the buffer types. Mr. Merrell stated that they desire to hear from the Planning Board and provide responses as needed. What has been presented are options. At the root of this issue, this property has a residential density and land use, which is an entitlement. Mr. Merrell stated an entitlement is automatic. He continued it is not a choice between nothing and the application. It is up to the Planning Board to look at the list in the staff report and provide direction on the residential development of the property. Mr. Merrell stated that they are looking for direction on the options presented.

Chairman Thomas brought the discussion up to the Board.

Board Discussion and Questions

Ms. Shull asked for clarification about the R-2. Attorney Hayes explained the development application based on the PRD zoning before them today. The R-2 is a different issue and not before the Planning Board at this time, and should not form the basis of the Board decision based on a different issue. Attorney Hayes further explained that depending on the decision of the Board, the developer will have a decision to make whether submitting another application to rezone to R-2, come back before the Planning Board, or submit another application for a PRD development order.

Ms. Shull inquired about the irrigation on the buffer and where that water would be coming from. Mr. Spraker replied that irrigation is recommended by staff. There are two reuse ponds that they are seeking to use reuse water and suggested that a well will most likely be needed to supplement the reuse ponds. Mr. Spraker stated that the irrigation water supply would be part of the preliminary plat.

Ms. Shull asked about the self-amending mention. Mr. Spraker answered that the PD6 detailed the amendment of that language. He reiterated the lot layout language that the project can make the lots wider, for examples a 50' wide lot into a 60' wide lot. Staff has no objection to making lot widths wider and the project could not exceed the overall lot total of 276 units. Mr. Spraker commented that if the Board does not like the architectural standards or if they would like something else regarding the submittal, they can discuss and recommend to change. What has been provided is consistent with other Planned Developments.

Chairman Thomas asked for clarification about irrigation and if staff is seeking in ground irrigation. Mr. Spraker explained that in the landscape proposal it is to establish a natural vegetation that after a certain point, no longer requires water. A truck with water would be used to establish the landscaped areas temporarily. Mr. Spraker commented that the concern is if there is a drought, and the buffer dies, it puts the obligation on the HOA. Staff has never seen a buffer of this size utilizing temporary irrigation.

Mr. Scudiero stated that several speakers referenced putting in a traffic signal and asked for confirmation on if it has been approved. Mr. Spraker replied that the response comments stated that it was presented to the Department of Transportation (DOT) and it was verbally approved and Mr. Lassiter may have additional information.

Mr. du Moulin thanked the Tomoka Oaks HOA. He asked if there is a possibility of a win-win type situation, referencing greenspace solar panel farming that everyone can benefit from. It would be for something other than houses. He asked if housing does go in, if they can go in with increased lot size, such as the Broadwater subdivision for million dollar homes instead. Mr. du Moulin stated he is seeking a solution where everyone wins.

Mr. Galloway disclosed that he has friends on both sides of the equation and has spoken with a few Tomoka Oaks residents, as well as Mr. Durant and Mr. Merrell. He asked for the difference between the 80' wide lot from the proposed 100' wide lots. Mr. Durant explained that with the market of what people want to buy, they are interested in the smaller lot widths. Mr. Durant added that the greenspace is the same for both. Mr. Durant stated that they want this project to be successful He continued to be blunt, our future residents don't want to look into the back of the Tomoka Oaks houses. They desire for the buffer to be successful and believe that the proposed plan will be successful. Mr. DuRant stated there is an existing, non-irrigated buffer out on the property today that we are seeking to replicate. He suggested allowing them to put the buffer in as proposed and that if it does not work out, they will try something else. He reiterated that they do not want to irrigate or fertilize and do not want to have run-off. The project is seeking to replicate what the existing buffer is and if there is a need for security, the project can bond the improvements.

Mr. Galloway asked for additional information on the proposed plans inconsistency with the Comprehensive Plan. Mr. Spraker replied that in the staff report it is not one of the reasons why staff recommended denial. It was not said that the proposed plan is inconsistent with the Comprehensive plan. He clarified that the reason for recommending denial were criteria 1 and 4, consistency with the Land Development Code (LDC), as in section 2-35 is permissive and specifies that, *'you may'* do something. He further explained that the issuance of the development order is a negotiated zoning. The area surrounding the property has 100' wide lots. Mr. Spraker continued that it is understood, the design of the project is to provide the buffer in exchange for smaller lots, which would be fine in the interior of the project, but the perimeter should stay at 100'. He also referred to Mr. Durant's comment on the setbacks at 7.5' for a side yard setback, which is smaller than a typical lot. Mr. Spraker concluded that staff did not recommend denial based upon consistency with the Comprehensive Plan.

Attorney Hayes specified that the staff report identifies the criteria that the proposal before them today should be evaluated.

Mr. Mark Karet, referenced the question as to if the plans are consistent with the Comprehensive Plan. He stated that Ormond Beach has land use categories that clearly would have not allowed residential development on the former golf course property, such as the "Recreation & Open Space" land use designation. Mr. Karet continued that the "Low Density Residential" land use allows residential development. Mr. Karet stated that the staff report indicates a policy that could be used to deny the application based on inconsistency with the Comprehensive Plan. Mr. Karet stated, as detailed earlier, the cited policy cannot be used as a reason for denial. He remarked that in order to deny the use, one would need to determine that the residential use is inconsistent and read words which are not in the policy.

Mr. Galloway stated or require 100' wide lots? Mr. Karet replied that the policy only refers to use and does not address lot sizes. Single-family lots next to single-family lots, regardless of lot size, is the same land use.

Mr. Karet stated in the application of Section 2-35 of the Land Development Code, staff is reading words in the language. He stated that what is being said tonight is that compatibility means that it has to be the same thing and that is not what the modern practice of planning says. Mr. Karet commented that compatibility has to be sensitive to the character of the community. He reiterated that it is infill development which is encouraged throughout the Comprehensive Plan. Mr. Karet states that there are many communities that are eliminating single-family only zoning.

Mr. Galloway stated he understands what Mr. Karet is stating, but there are many individuals tonight and notes that state that either they do not want the project or they want 100' wide lots. Mr. Galloway stated that the application is asking for smaller lot sizes and there are questions about compatibility. Mr. Karet stated that staff is seeking 100' wide lots next to the Tomoka Oaks existing 100' wide lots. Additionally, staff is seeking a type 6 landscape buffer of a 50' width with certain plantings that is typically required with industrial development next to low density residential uses. Mr. Karet re-emphasized that city staff is asking for both the 100' lot width and an indusial size landscape planting plan. Mr. Karet stated as a professional planner, that does not stand up.

Mr. Jorczak spoke on the diversity of the housing in the existing Tomoka Oaks community from the size and type, describing them as impressive in comparison with the newer developments out there or a cookie cutter approach. He commented that the existing community has issues with some of the people that service the neighborhood, such as the landscapers and mail carriers, and does not feel is the safest to get through with the amount of traffic there and the vehicles parked on the street. Mr. Jorczak remarked that it is a phenomenal area that we should be looking for excellence in how the piece of property is developed. He suggested that it needs to be something that blends with the existing area that has a character and a flavor and is not going to be an enclave. Mr. Jorczak commended Mr. Harowski on his research for his presentation and suggested doing a little more in researching if the proposed development should or should not go in. He remarked that he appreciates the time, efforts and money spent on creating the Board packet and all that city staff has done to point out what can be done as far as development options.

Chairman Scudiero made a motion to hold a time-certain vote, no later than 10:55 p.m. Chairman Thomas explained that he does not want to put a time-constraint on this and that it is of his top-5 most important issues ever heard in all his years of being on the Board.

Mr. Merrell stated that they appreciate the comments and expressed that the applicants are taking notes and listening to all Board suggestions. Mr. Merrell stated they are okay with a time certain continuance of the application.

Mr. Galloway stated that he has more questions and cannot vote on the issue tonight. Mr. Merrell stated that the applicant team is not seeking to rush the item and are noting all the comments.

Mr. Galloway asked if the staff recommendation of increasing lots to 100' wide around the perimeter were implemented, what would be the density (the number of units) that would be applying. Mr. Merrell replied that the project has been reviewed for a design using the straight zoning classification with 100'-wide lots, R-2. He stated that the design yielded about the same number of units. Mr. Merrell stated getting rid of the 50' buffer, you gain a lot of real estate, but the product would not be as good. Mr. Merrell stated if the project is required to provide 100' wide lots and a 50' industrial type buffer, it is just not a fair trade. Mr. Galloway stated that the project is developing in the middle of an existing neighborhood and those concerns need to be addressed. Mr. Galloway pondered why the abutting property owners did not purchase the former golf course as a community development district.

Mr. Scudiero asked the applicant, if the Board agrees to adopt all of staff and SPRC's recommendations, what the number of houses would look like. Mr. Merrell stated that they have not done this exercise.

Chairman Thomas referenced the presentation of Mr. Harowski. He asked for the design plan for the 50' wide lots and if they included an alley. Mr. Karet replied that there is room for back loaded alley ways. Chairman Thomas replied that would be the only way that he would vote for 50' lots.

Chairman Thomas asked about the open space and recreation planned for the project. Mr. Stehr answered that there would be a sports field, pavilions, pickle-ball courts,

two playgrounds, pocket parks, and added that the plan has not yet been finalized and additional open space and recreation can be added or modified.

Chairman Thomas referenced the traffic direction in between the fields and the parking lot between the areas and expressed his concern for the children's safety. Mr. Stehr advised that they would take it into consideration.

Ms. Shull inquired about the gates. Mr. Stehr stated that they are requesting electronic access gates for vehicular access only. Pedestrians are able to go through on the proposed sidewalks.

Ms. Shull asked about the lot size and density. She stated that the Tomoka Reserve project appeared to have more homes than the Tomoka Oaks subdivisions. Mr. Stehr referenced the density breakdown based on the LDC that was included in the staff report. Ms. Shull said that she agrees with the 100' wide lots around the perimeter but is unsure about the 50' and 60' wide lots in the interior. Mr. Stehr stated that there are condos and apartments abutting the existing subdivision. Chairman Thomas questioned if these were in the neighborhood. Ms. Shull stated the project is a neighborhood inside of a neighborhood. She stated her goal was to be consistent with what is in the existing neighborhood.

Ms. Shull stated she did not believe that the 50' wide lots are consistent with the neighborhood. Mr. Stehr asked if the multifamily was consistent. Ms. Shull stated that she is providing her feedback on the project.

Ms. Shull discussed the setbacks and stated from her experience, they allow for short driveways, which means cars are parked out in the street. Mr. Stehr replied that it is a 25' setback allowing for two cars in the driveway, and two in the garage. Ms. Shull commented that it is too much house on the lot.

Mr. Durant stated that the existing Tomoka Oaks lots are suffering with not enough room in their backyard, therefore they are trying to give flexibility to be able to sacrifice some of the front. He continued that the setbacks would provide additional distances between subdivisions.

Ms. Shull asked if fencing would be allowed inside of the neighborhood, even for those houses backed up to the buffer. Mr. Stehr confirmed that they are.

Ms. Shull asked why it was mentioned prior that 100' wide lots would not work, but that 80' wide lots can. Mr. Merrell replied that 100' wide lots could work, but they are not as good for the developer, and the 80' wide lots work better for the project. There is a concern that there is not a market for 100' wide lots.

Ms. Shull stated, as a realtor, she believes that 100' wide lots would be very desirable.

Chairman Thomas commented that the 100' wide lots in Tomoka Oaks do not stay on the market very long.

Mr. Carl Velie, property owner, for the proposed Tomoka Reserve development, stated that the value of property that is based on building and the land. The land is 20 to 25 percent of the property value, depending on how urbanized that it is. He remarked the bigger the lot width, the higher the cost of the house will be, based on

the house size. Most of the houses in Tomoka Oaks are selling for $400,000 to $500,000 range, and are 40 to 50 years old. Mr. Velie, stated if the project built a new home on the same sized lots then it would likely be an $800,000 home. Mr. Velie added that proposed houses on a 100' lot with 10,000 square feet in lot size will be substantially higher than the typical house in Tomoka Oaks. He stated that they are trying to match the same value on a smaller lot width with similar lot square footage.

Mr. Velie continued that they think they can sell a few 100' lots but he is not sure if they can sell two hundred of them as quick, and may have to wait 15 years. That is not what the developer wants to do. Mr. Velie stated that he does not think people want to buy million-dollar houses unless they are on the river or ocean. He said the project seeks to create a product that will sell quickly, or as good or better than what is in the neighborhood. He stated that there is a difference compatible and comparable. This project will be compatible with a residential use abutting a residential use. Comparable is going different because these will be new homes with new amenities. Mr. Velie stated that the new construction will result in better built and stronger houses. He expressed concern with have a 100' wide house with a value of $800,000 next to a 60' wide house with a value of $500,000. Mr. Velie stated if they thought that they could sell 100' wide lots, they would be all for it. But they do not think that the project can sell 100' wide lots.

Mr. du Moulin stated that if it is designed correctly it could work. Mr. Velie detailed the constraints of the existing property layout. Mr. Velie suggested that there be a quadrant area or pod where the lots are smaller at 50' or 60' lots. He remarked that the studies the applicants have done show that there is not enough demand for the million dollar homes.

Ms. Shull asked why Mr. Velie believes that they cannot sell 100' wide lots. Mr. Velie responded that the study the project has done there is not enough demand for the million-dollar homes. The concern is that there are not 200 or 250 buyers who can purchase the million dollar homes. Ms. Shull commented that they will go a lot farther with the neighbors if there is a higher quality product in the area. Mr. Velie replied that the proposed homes are planned to sell higher than any in the area, other than the riverfront properties that are in Tomoka Oaks. Mr. Velie stated that the cost per square foot is $250 to $300. For a 2,000 square foot house, that would be $600,000. For a 3,000 square foot house, it will be a million dollars and we do not see that demand in the market. Mr. Velie explained his experience in the area and stated that he moved to Florida in 1954 and moved to Ormond Beach in 1964. He was an appraiser for 40 years and learned the life cycle of a neighborhood. Mr. Velie concluded that it is to their advantage to sell the most expensive house that they can sell. Mr. Velie stated that this development will be new and modern. The newer, more expensive homes would enhance the values in Tomoka Oaks.

Chairman Thomas restated that the public participation is closed.

Chairman Thomas inquired about the 80' wide lots and the comment people do not want to have homes next to smaller homes. He stated on the proposed site plan, there are 80' wide lots across the street from 50' and 60' wide lots. Mr. Velie responded that area is the main road. Mr. Stehr answered that after numerous meetings with the neighborhood, the applicants went back to 80'wide lots by 125', matching the R-2

square footage. The 80' wide lots allow relocation of the garage to the side or to the rear.

Mr. Sheldon Rubin, property owner, added that the setback on the 80' wide lot is 25 percent. He remarked that the 10,000 square foot lots with 80' wide lots on the perimeters plus the 50' and the open space, is quite accommodating. Mr. Rubin questioned that he is not sure why everyone is stuck on the 100' wide lot. Mr. Rubin stated that they will be modern, high-priced housing with benefits and a bigger buffer, in which they agreed to the plantings for. He expressed concern for the disconnect. Mr. Rubin stated through the process there has been a desire to lock down this site plan and show exactly what is desired. He reiterated that we did not have any flexibility with the rules. So, on the inside lots we show 50' wide lots. Mr. Rubin added that if they have to put an alley on some of the 50' wide lots, that they will do so if given the opportunity. There needs to be flexibility in the design. He concluded that it is a superb site plan.

Mr. Jorczak stated that increasing lot widths would decrease the lot total and also reduce the traffic impacts. He asked if there were a catastrophic event and in an emergency evacuation for the entire area, how long would it take to get the residents out with the current road situation, with a huge number of people in a short period of time with limited road structure to do it.

Mr. Lassiter replied that they did not analyze a mass evacuation situation. He confirmed that they did a standard peak hour evaluation. He continued that without a traffic signal it will take a long time. Mr. Lassiter replied that when doing beachside analysis they do have to look at hurricane evacuation times. He continued that there is plenty of advance warning. He confirmed that the traffic analysis showed that the proposed plan works. Mr. Lassiter referenced the traffic signal and advised that what they did to the traffic signal study, and that the Department of Transportation (DOT) approved it with the following two items, (1) peak hour analysis to show that it will not work with a two-way stop; and (2) intersection control evaluation.

Mr. Jorczak expressed concern with overall traffic impacts that the city has experienced. He stated that the options to address traffic are limited based on transportation costs and funding. Mr. Jorczak stated that the Hand Avenue extension has been discussed for many years to alleviate traffic on SR40 and there is no plan to anything soon. Mr. Jorczak stated he hoped that in the planning process some of the citywide traffic problems can be addressed.

Mr. Lassiter stated that beachside developments required to perform a hurricane evacuation analysis. He stated when the PM peak hour analysis shows that it is working well, this is criteria in the hurricane evacuation analysis. Mr. Lassiter stated that the project works in the PM peak hour. Mr. Lassiter referred back to the question on the traffic signal. He stated that a signal warrant analysis was performed and FDOT verbally agreed with the analysis and are requesting the peak hour analysis and an intersection control analysis.

Mr. Jorczak asked if the warrant analysis coordinated with the railroad. Mr. Lassiter stated that is required as part of the study. Mr. Lassiter detailed how traffic signals work with emergency vehicles and train horns.

Chairman Thomas asked Mr. Lassiter if a study was done of the Trails intersection on Route 40. Mr. Lassiter replied that a statement was made earlier that the distance is close but he stated the traffic time was not. The main entrance to Tomoka Reserve is very close to Nova Road and the travel speeds to get out the Main Trail going out to State Road 40 is much slower. Mr. Lassiter stated the distribution is based on the travel time.

Chairman Thomas expressed his concern with the project traffic when going to Tomoka Elementary School at the intersection of the Trails subdivision and SR40. Chairman Thomas detailed the route from the Tomoka Reserve project onto Nova Road and West Granada Boulevard. He stated the left hand turns onto Old Tomoka Road are problematic and do not have long stacking lanes.

Chairman Thomas detailed the issue with the intersection of Main Trail and SR40 and a single lane to go straight or make turning movements. He expressed concern about the increased traffic at this intersection. Chairman Thomas added that the only solution he sees is if the city to make a right-hand turn lane out of the Main Trail onto Granada Boulevard, a southbound right turn (west onto SR40).

Mr. Scudiero accepted that a majority of the traffic from Tomoka Reserve will go to Nova Road based on its proximity. One question has arisen is what would that do to the existing Tomoka Oaks population that now does not want to deal with the backup in the morning onto Nova Road Would residents on South St. Andrews and Rio Pinar, go out through the Trails to avoid the Nova Road backup. Mr. Lassiter explained that because of how the existing homes are built, around the two relative access points, whether Main Trail or Nova Road, 64 percent of all existing traffic that has access to Main Trail and Tomoka Oaks, use Main Trail and 36 percent use Nova Road access. Mr. Lassiter added that because of the location of the proposed project, its primary impact is going to be on Nova Road, a state road, and less impact on Main Trail to SR40.

Chairman Thomas stated that there are approximately 1,000 homes that are in the Trails, 500+ homes in Tomoka Oaks, and now proposing to add 276 more lots, totaling approximately 1,800 homes. Chairman Thomas stated that there would be approximately 1,800 homes with approximately 3,600 vehicles going out three exits through Tomoka Oaks and the Trails.

Mr. Lassiter stated that we counted them all. Mr. Lassiter explained that the traffic analysis process has gone through several rounds of review by the Department of Transportation (DOT), by the City and the City's consultant, as well as the County. He stated that they all agreed we came to the right conclusion based on how traffic studies are conducted.

Chairman Thomas stated he believed that the traffic counting is flawed. Mr. Lassiter stated that traffic counting now uses video which is not flawed and is more accurate.

Ms. Shull asked if the count was done during school times. Mr. Lassiter replied yes. Ms. Shull expressed uncertainty about how the traffic analysis is performed and stated in the manor in which people drive and at the speeds they drive, she does not feel comfortable about adding additional traffic and backups to the Tomoka Oaks and Trails neighborhood areas.

Chairman Thomas inquired about the current City of Ormond Beach population. Mr. Spraker answered approximately 44,000. Mr. Spraker added that the time was approaching to conclude this meeting.

Chairman Thomas asked the Board to share additional closing comments for the applicants.

Mr. Galloway stated what he is hearing are concerns with density. He referenced it as trying to put five pounds of sugar in a one-pound bag. He continued that unless the HOA is willing to come up with a Community Development Fund to buy the property from the property owners, that something will be built there. Mr. Galloway stated that he just does not feel like 276 units is what needs to be put in that donut hole. He stated that there are 500 homes that exist and they bought with the expectation of a golf course. He spoke on the American Dream, the ability to own a home, no matter how large or how much it costs. Mr. Galloway stated that there has to be a happy medium here. The homeowners have to realize that something will be built there or there needs to be a purchase of the property from the HOA and/or residents. Mr. Galloway stated that it should not be my tax dollars paying for a park. Mr. Galloway stated that he hoped that the applicant team is listening tonight.

Mr. Velie replied that when he and the other property owners first started the process, they originally had a different engineering firm that drew up a plan for units and they declined that route as they wanted something consistent with the subdivision. He explained that he took a 1.85 mile circle on Google Earth around the neighborhood over the Trails, from Misners Branch East, Tomoka Oaks Condo North, Escondido, Tahlequah, Tomoka Meadows and Harbor Oaks. He added that he took every plat and platted it out, and found that they have less density than the Trails residential section, not including the Villas, at 1.91 units per acre and Tomoka Oaks is 2.09 units per acre. He further detailed that Mallard's Reach is 2.23 units per acre and Tahlequah is 3.06 units per acre, and considering the entire Trails subdivision is 3.4 units per acre. Mr. Velie concluded that any other subdivision in the city has higher density than what is being proposed with Tomoka Reserve.

Mr. Galloway commented that he values Mr. Spraker and thinks the City of Ormond Beach has the best city Planning Director and believes that the applicants need to reassess and come back. He added that he has faith that something will increase the value of the homes there.

Mr. Jorczak agrees with the city's comments on the issues were appropriate. On some issues, he stated he may have gone further. He continued with remarks on the influx of people moving to the area, and how things are not going to get getter with the hospitals or traffic. He commented that Ormond Beach considers themselves to be a jewel on the east coast and is a special community, therefore should not be augmenting what has been done in other major cities, but should be looking for excellence. Mr. Jorczak concluded that he would like to see a better mix on the lot sizes. He stated the wider lot widths would reduce density and ensure a higher value of houses.

Mr. du Moulin concurred with Mr. Jorczak and stated he would like to see an increase in the lot sizes.

Ms. Shull concurred with Mr. Jorczak as well on the density and lot sizes. She remarked that the homeowners are compromising and know something is going to be built there, and advised the developers to compromise as well and work with them symbiotically. Ms. Shull concluded suggesting for the developers to take into consideration the unique piece of property that it is as well as the interconnected density and traffic.

Mr. Scudiero commented that he would like to see the golf course reopened, but that compromise between the applicants and the homeowners are necessary. He concluded for the applicants to find ways to make it more palatable for everyone. Mr. Scudiero stated a compromise is needed.

Chairman Thomas referenced earlier remarks on the irrigation for the plants and stated that if the applicants cannot abide by staff's suggestions, to at least do a bond so that the homeowners are not stuck with not having the vegetation buffer as promised. He spoke on the 50'-wide lot sizes, and said that he is opposed, but that if the Board agrees with them, he will support if there is an alley and a garage in the back. Chairman Thomas stated that in Venetian Bay, there is a section that is set off by itself and where they do not have garages in the front of the houses. He added that he would love to see 100'-wide lots. He commented that both the developers and the landowners have rights. Chairman Thomas stated that the residents also have rights. Chairman Thomas remarked that whatever goes in is going to be impacting the resident's lives. Chairman Thomas agreed with Mr. Galloway that something will be built and there needs to be compromise. He stated that he understood there are residents who are seeking no development, but he believes that something He concluded that when he moved to the city 50 years ago, the population was approximately 30,000. There has been a growth of 14,000 people, and commented that the traffic reflects more than that.

VII. OTHER BUSINESS

It was discussed that the item requires a continuation for the applicants to bring other ideas and options back for another public hearing in front of the Planning Board and for the Planning Board to have more time for the support decision-making process. It was determined, taking the availability of the Planning Board, staff, and applicants, that the continuation meeting will be held on Monday, August 21, 2023 at 6:00 p.m. (location is to be determined). Mr. Spraker explained that the Planning Board is scheduled to meet on August 10, 2023 for the monthly Planning Board meeting as planned as well.

City Attorney Hayes stated that when the Board resumes this meeting, the item would be where it is now with Board member comments and discussion. The applicant and HOA attorney should be provided an opportunity to provide any updates. City Attorney Hayes stated a motion and a second would be needed for the continuation.

Chairman Thomas entertained a motion for the continuation date.

Mr. Galloway motioned for a continuation of the meeting on August 21, 2023 at 6:00 p.m. with a location to be determined. Ms. Shull seconded it. Vote was called, and the motion was approved (6-0).

VIII. MEMBER COMMENTS

Mr. Jorczak thanked the citizens of Ormond Beach for their input and expressing their opinions.

Ms. Shull thanked the audience members and staff for their input.

Chairman Thomas commented that he is interested in the City of Ormond Beach having another hospital. He added if the zoning could be amended where a hospital could be built taller than seven stories. Mr. Spraker replied that it would be a charter amendment.

IX. ADJOURNMENT

The meeting was adjourned at 10:57 p.m.

Respectfully submitted,

Steven Spraker, Planning Director

ATTEST:

Doug Thomas, Chair

Minutes transcribed by Marcella Miller.

ORMOND BEACH PLANNING BOARD

Regular Meeting

August 10, 2023 6:00 PM

City Commission Chambers
22 South Beach Street
Ormond Beach, FL 32174

PURSUANT TO SECTION 286.0105, FLORIDA STATUTES, IF ANY PERSON DECIDES TO APPEAL ANY DECISION MADE BY THE PLANNING BOARD WITH RESPECT TO ANY MATTER CONSIDERED AT THIS PUBLIC MEETING, THAT PERSON WILL NEED A RECORD OF THE PROCEEDINGS AND FOR SUCH PURPOSE, SAID PERSON MAY NEED TO ENSURE THAT A VERBATIM RECORD OF THE PROCEEDING IS MADE, INCLUDING THE TESTIMONY AND EVIDENCE UPON WHICH THE APPEAL IS TO BE BASED.

PERSONS WITH A DISABILITY, SUCH AS A VISION, HEARING OR SPEECH IMPAIRMENT, OR PERSONS NEEDING OTHER TYPES OF ASSISTANCE, AND WHO WISH TO ATTEND CITY COMMISSION MEETINGS OR ANY OTHER BOARD OR COMMITTEE MEETING MAY CONTACT THE CITY CLERK IN WRITING, OR MAY CALL 677-0311 FOR INFORMATION REGARDING AVAILABLE AIDS AND SERVICES.

I. ROLL CALL

Members Present	Staff Present
Angie Shull, Vice Chair	Steven Spraker, Planning Director
G.G. Galloway	Randy Hayes, City Attorney
Al Jorczak	Marcella Miller, Recording Technician
Mike Scudiero	
Barry du Moulin	
Troy Railsback	
Doug Thomas, Chair (Excused)	

II. INVOCATION

Mr. Railsback led the invocation.

III. PLEDGE OF ALLEGIANCE

IV. NOTICE REGARDING ADJOURNMENT

NEW ITEMS WILL NOT BE HEARD BY THE PLANNING BOARD AFTER 9:00 PM UNLESS AUTHORIZED BY A MAJORITY VOTE OF THE BOARD MEMBERS PRESENT. ITEMS WHICH HAVE NOT BEEN HEARD BEFORE 9:00 PM MAY BE CONTINUED TO THE FOLLOWING THURSDAY OR TO THE NEXT REGULAR MEETING, AS DETERMINED BY AFFIRMATIVE VOTE OF THE MAJORITY OF THE BOARD MEMBERS PRESENT (PER PLANNING BOARD RULES OF PROCEDURE, SECTION 2.7).

DRAFT

V. APPROVAL OF MINUTES

June 08, 2023

Mr. Galloway moved to approve the June 08, 2023 Minutes. Mr. Jorczak seconded the motion. Vote was called, and the motion was approved (6-0).

VI. PLANNING DIRECTOR'S REPORT

Mr. Spraker, Planning Director, updated the Board on the August 21, 2023 continuation of the Tomoka Reserve meeting. Additional correspondence e-mails were received and included in the provided Board packets as well as the July 13, 2023 Planning Board meeting minutes. If any additional correspondence is received, it will be provided to the Board. The meeting will be held at Tomoka Christian Church, 1450 Hand Avenue.

Mr. Spraker advised the Board that Item F on today's agenda is being pulled per request from staff and will be presented at a future date.

VII. PUBLIC HEARINGS

A. PP 2023-042, Bradford Lakes, Preliminary Plat

Mr. Steven Spraker, Planning Director, stated that PP 2023-042 is a request from Ridge Land Holdings, LLC for a preliminary plat for the Bradford Lakes subdivision (a portion of Phase 4 of the Plantation Oaks Planned Residential Development) consisting of 80 single-family lots on 53.12 acres. The Bradford Lakes subdivision is located on the west side of Plantation Oaks Boulevard, north of the unopened Pennsylvania Avenue right-of-way (ROW). Mr. Spraker continued that the outparcels are being designed around. There is infrastructure for future development of the outparcels if those properties choose. He displayed overhead where the offsite lift station is located that will serve proposed Bradford Lakes and proposed Bradford Park.

Mr. Spraker explained the three-step platting process which begins with the zoning in the Planned Residential Development (PRD) where it gave the details of how the project was to be developed. The next step us the preliminary plat and construction level plans so that when they go to construction it will then go to a final plat, the legal document that allows the subdivision of land. He informed the Board that this is the middle of the process. Mr. Spraker concluded that the Site Plan Review Committee (SPRC) is recommending approval.

Vice Chair Shull opened it up to the Board for questions.

Board Discussion and Questions

Ms. Jorczak asked if there is a change in density. Mr. Spraker answered that there is not and it is consistent with the zoning development order.

Attorney Hayes explained the scope of the Boards review in that when the plats come before the Board, the criteria are whether they are consistent with the development order that was approved by the Planning Board and City Commission. It comes with

recommendation from the staff and comes before the Board for input. Attorney Hayes referenced Item F, which will be back before the Board at a later date, stating that there are revisions to the platting process and the Land Development Code (LDC) which will need to be amended first by bringing options back to the Board on it.

Ms. Shull asked what happens with the unresolved items. Mr. Spraker replied that it is part of the Site Plan Review Committee (SPRC) review. The comments stay in place and applicant would resubmit, addressing any unresolved comments before going to construction. The outstanding comments would not change the proposed site plan.

Mr. du Moulin asked to see the responses. Mr. Spraker advised him that staff could provide as responses are provided.

Ms. Shull inquired about the process after the tentative approval of this item. Mr. Spraker replied that the Preliminary Plat will go to City Commission for one reading, from there the applicant will seek to resolve the SPRC comments. The applicant will obtain a site engineering permit, for construction of the subdivision improvements. The project would come back before the Planning Board and then to the City Commission for the final plat.

Applicant's Presentation

Mr. Parker Mynchenberg, Parker Mynchenberg and Associates, 1729 Ridgewood Avenue, stated that this project should be under construction in two months and then the infrastructure will be put in. He explained that halfway through the infrastructure, prior to paving the road, a performance bond will be posted for the rest of the subdivision improvements. The plat will then be recorded at 100 percent completion. He confirmed that the site plans are in good shape for this project.

Board questions

Mr. Jorczak asked Mr. Spraker about the adopted level of service for concurrency standards for the school. He referenced a recent article in the Observer noting that the city is supposedly over capacity at most schools and how they are moving kids around. He asked how this development and the balance of the buildout impact the matter. His questions pertained to how the entire project has been approved for the existing school operation, and asked about any new schools being built to handle the over-capacity situation.

Mr. Spraker answered that at Ormond Beach Middle School they are 84 percent out of 115 percent capacity in the middle schools, which is not an issue. He further explained that Pine Trail Elementary is at 102 percent out of 115 percent adopted level of service and Seabreeze High School is at 107 percent. Mr. Spraker explained the history of the project, starting with it being a Planned Residential Development (PRD), and a Development of Regional Impact (DRI), and mitigation for schools was done then. This project site was a school site and the school decided that they did not want the site so the developer of the PRD gave them a school site in Daytona Beach. They already mitigated for their school impact. Mr. Spraker continued and explained that additionally there was to be a reduction in school impact fees and it was pulled back. Every lot will pay the full school impact fee.

Mr. Spraker stated it is required for the city to provide the schools with each and every residential development over 10 units and the schools responsibility is the concurrency and how they are going to plan it through the Interlocal Service Boundary Agreement (ISBA). Any issues with the capacity call for mitigation through land, money, improvement, or building a school or an expansion. Mr. Spraker added that since January 1, 2023, 10 single-family houses have been permitted in the City of Ormond Beach. He remarked that growth has not been significant in Ormond Beach proper, but on the periphery. He concluded that this project was planned and mitigated for.

Mr. du Moulin expressed his concern with the schools staffing storage and being stopped down the road that there is a major problem. Mr. Spraker replied that concurrency does not deal with operation but with public facilities, buildings and capacity. Their impact fee will be for public facilities; a school, new classroom, something increasing the capacity of a school. According to all growth management laws and city agreements with the school board it is to do this concurrency and for them to pay impact fees and ensure that they have mitigation requirements. The operational and staffing issues cannot be solved with a preliminary plat.

Mr. Mynchenberg added that whether Flagler County or Volusia County, whenever a residential development is in the works, at the rezoning stage there is a look at capacity before something is rezoned with a Capacity Availability Letter. Once it is time for the plat, or at a final site plan for an apartment, the process is to apply to the Volusia County School Board for a Concurrency Certificate. Mr. Mynchenberg stated that he has never heard Volusia County say that there is not enough capacity, although it has happened in Flagler County. He referenced the timing of the process in that right now is the preliminary plat and construction plan phase, then 8 to 9 months of infrastructure improvements phase, and then three to five months to get houses up, and then up to 15 months before the first school kid is in the first lot (all 80 lots are not sold in one day). Mr. Mynchenberg stated that Plantation Oaks was originally age-restricted in total and now the 427 lots in the manufactured home community, that he owns, agreed to pay $1,100.00 towards school impact fees per lot when doing the rezoning. He explained that credit will be received for the school site that now is Bradford Lakes. He and his partner, Mr. Bledsoe owned a piece of property next to Westside Elementary on Jimmy Ann Drive in Daytona Beach and since the school wanted that, they expanded Westside Elementary and he and Mr. Bledsoe paid $500,000.00 and got the school site back in, and how he was able to do the 80 lots. Mr. Mynchenberg reiterated Mr. Spraker's comment about this being part of a DRI and unlike other subdivisions that do not have one, and how it has been in agreement to give a school site in which they were to get credit against the $1,100.00 per lot impact fee. It was age-restricted, therefore there are no school kids and were exempt, but going through the rezoning process, was directed by Mr. Bruno to help the school kids out in which they did and have gone beyond what was required for the school concurrency.

Mr. Jorczak inquired if they would be able to come back and ask for more. Mr. Mynchenberg replied no, they are getting every building permit before they get a Certificate of Occupancy (CO) and have to pay the School Impact Fee in which Volusia County increased. It is a significant amount and when multiplying times, the number of units, it is a lot of money towards building another school.

Mr. Scudiero stated that he has yet to see a letter from the school district that did not say that they can accommodate in Volusia County and recently noticed in this Board that there have been multiple times where it states at the bottom that even though it is over 100 percent that they are going to be rezoning the school map, alleviating what looks like overcrowding at 105 to 107 percent.

Mr. Mynchenberg commented that he worked on a project at Spirit Elementary in Deltona approximately four years ago and how the school had a decline in the number of students. It is up to the school board.

Mr. Galloway remarked that a reason that they keep it at 115 percent is because the school district is at an all-time-high of home-schooling. He continued that a private school is being built on Granada Boulevard and two to three others private schools have major enrollments and are growing. When it is said that it is at-capacity, the 115 percent it is due to not being able to use the number of children in your community because they are not all enrolled in public school and some are being home-schooled. Mr. Galloway commented that this developer has paid their dues many years ago on this project.

Attorney Hayes refocused the meeting from the discussion on topics at hand. The purpose of the item is to determine if the preliminary plat is consistent with the zoning and the development order that was approved.

Ms. Shull asked about the setback from Interstate 95. Mr. Mynchenberg replied 60' and it in place now. He reviewed the landscaping requirements and added that they leave a natural heavily-wooded buffer. The city can still direct them to plant additional material in any gaps as well.

Mr. du Moulin asked if there will be drainage problems. Mr. Mynchenberg answered that Plantation Oaks is in Zone X, outside of the 100-year floodplain, and does not have flooding problems.

Audience Comments/Input

There were no individuals who spoke on this item.

Board Recommendation

Vice Chair Shull opened it up to the Board for a motion.

Mr. Galloway motioned to approve PP 2023-042, Bradford Lakes, Preliminary Plat. Mr. Jorczak seconded it. Vote was called, and the motion was approved (6-0).

B. FP 2023-047, Archer's Mill Phase 1, Final Plat

Mr. Steven Spraker, Planning Director, stated that FP 2023-047 is a request from Forestar USA Real Estate Group, Inc., for a final plat for a 94-lot single-family subdivision on approximately 42.38 acres. The Archer's Mill Phase 1 subdivision is part of Phase 3 of the Plantation Oaks Planned Residential Development (PRD), located on the east side of Plantation Oaks Boulevard.

Mr. Spraker stated that the final plat is the last step of the process and construction is ongoing today and is at approximately 50 percent complete. He added that there is a RV and boat parking area, clubhouse and amenities as part of the project. This will go on to City Commission for two readings. Mr. Spraker concluded that staff recommends approval.

Vice Chair Shull opened it up to the Board for questions.

Mr. Scudiero motioned to approve FP 2023-047, Archer's Mill Phase 1, Final Plat. Mr. Railsback seconded it. Vote was called, and the motion was approved (6-0).

C. PP 2023-059, Archer's Mill Phase 4, Preliminary Plat

Mr. Steven Spraker, Planning Director, stated that 2023-059 is a request from Forestar USA Real Estate Group, Inc., for a preliminary plat for the Archer's Mill Phase 4 subdivision (a portion of Phase 3 of the Plantation Oaks Planned Residential Development) consisting of 111 single-family lots on 51.56 acres. The Archer's Mill Phase 4 subdivision is located on the east side of Plantation Oaks Boulevard. Mr. Spraker added that the streets are private, with portions abutting the Village of Pine Run along the south and east portion. There is a public access through Archer's Mill, Phase 3, and a public lift station in the development. Eventually it will come back before the Board with a final plat. Mr. Spraker concluded that staff recommends approval.

DRAFT

D. PP 2023-060, Archer's Mill Phase 5, Preliminary Plat

Mr. Steven Spraker, Planning Director, stated that PP 2023-060 is a request from Forestar USA Real Estate Group, Inc. for a preliminary plat for the Archer's Mill Phase 5 subdivision (a portion of Phase 3 of the Plantation Oaks Planned Residential Development) consisting of 114 single-family lots on 92.71 acres. The Archer's Mill Phase 5 subdivision is located on the east side of Plantation Oaks Boulevard. He continued that the eastern portion of the project abuts the state park and will stay natural. Access is provided through Archer's Mill, Phases 2 and 3. Mr. Spraker added that there is an Ordinance showing their overall approval for Plantation Oaks. He concluded that staff recommends approval.

Board questions

Vice Chair Shull opened it up to the Board for questions.

Vice Chair Shull asked where the property is that the County purchased. Mr. Spraker replied that it is the approximate 36 acre-area between the FPL easement and Old Dixie Highway and that now a trail now goes through there. Ms. Shull asked if the greenery and the buffer in Phase 5 is natural. Mr. Spraker confirmed that it is natural and transitions into the state park.

Mr. Mynchenberg added that the property was originally owned by National Gardens (DRI). They donated over 2,000 acres. 500+ acres next to Halifax Plantation that they also owned was sold to the State. He explained that it connects Tomoka State Park to the Bulow State Park, now a continuous 10,000-acre park.

Mr. du Moulin referenced a flooding problem from 2018 with Pine Trails and inquired about the drainage. Mr. Mynchenberg replied that they dug an outfall canal that provides drainage from Interstate 95 to a ditch and then discharges to the outfall points in the Strickland Canal and Bulow Creek. He commented that flooding is not the problem that some of the areas are. Mr. Mychenberg concluded that he lives at the end of Pine Tree Drive and enjoys living next to a wetland but during high tide and the right moon, the road to Tomoka State Park is under water and occasionally Pine Tree will get water over it, but that Plantation Oaks Boulevard is always open.

Board Recommendation

Vice Chair Shull opened it up to the Board for a motion.

Mr. Scudiero motioned to approve PP 2023-060, Archer's Mill Phase 5, Preliminary Plat. Mr. Railsback seconded it. Vote was called, and the motion was approved (6-0).

DRAFT

E. PP 2023-061, Archer's Mill Phase 6, Preliminary Plat

Mr. Steven Spraker, Planning Director, stated that PP 2023-061 is a request from Forestar USA Real Estate Group, Inc., for a preliminary plat for the Archer's Mill Phase 6 subdivision (a portion of Phase 3 of the Plantation Oaks Planned Residential Development) consisting of 78 single-family lots on 46.54 acres. The Archer's Mill Phase 6 subdivision is located on the east side of Plantation Oaks Boulevard. Mr. Spraker continued that the streets are private and the property abuts the state park on the eastern boundary. The project has an approved development order for the zoning per Ordinance 22-16. A final plat will be the next step in this projects process. Mr. Spraker concluded that staff recommends approval.

Vice Chair Shull opened it up to the Board for questions.

Board Recommendation

Vice Chair Shull opened it up to the Board for a motion.

Mr. Railsback motioned to approve PP 2023-061, Archer's Mill Phase 6, Preliminary Plat. Mr. Jorczak seconded it. Vote was called, and the motion was approved (6-0).

F. LDC 2023-075, Preliminary and Final Plats, Land Development Code amendments – This item was pulled by city staff and not heard by the Planning Board.

G. LDC 2023-050, Certificate of Use, Land Development Code amendment

Mr. Steven Spraker, Planning Director, stated that LDC 2023-050 is an administrative request for amendments to Chapter 1, General Administration, Article II, Administration and Enforcement, Section 1-14, Development Orders to establish requirements for a Certificate of Use process. He added that this was presented before the Board May 2023 with the majority of the information going into the Code of Ordinances. Following discussion with the City Attorney's Office there was a decision to put most of the information from the Code of Ordinances into the Land Development Code (LDC), which is the reason it is before the Board again today. Mr. Spraker explained it is the same information and clarifies and creates a Business Tax Receipt, Certificate of Occupancy, and a Certificate of Use, and will help the business registration process and will flow into the new permitting system that will go live October 30, 2023. Mr. Spraker concluded that staff recommends approval.

Vice Chair Shull opened it up to the Board for questions.

Board Recommendation

Vice Chair Shull opened it up to the Board for a motion.

Mr. Jorczak motioned to approve LDC 2023-050, Certificate of Use, Land Development Code amendment. Mr. Railsback seconded it. Vote was called, and the motion was approved (6-0).

VIII. PUBLIC COMMENTS

The opportunity was announced and it was determined that there was no one in attendance that wished to deliver any public comments.

IX. OTHER BUSINESS

None.

X. MEMBER COMMENTS

Mr. Galloway remarked that 477 homes were just approved over a two to three-year period and added that the community is in dire need of homes. There is not much land within the community. He continued that the city has only grown 1 percent per year.

Mr. Jorczak asked for the status on Nova Road. Mr. Galloway stated that he attended a meeting and heard that they are looking at two models and will be taking the 'suicide lane' out. Mr. Spraker added that the City Commission is seeking a workshop with the Department of Transportation (DOT) to discuss Nova Road and he will update on the information and timeline of the project.

Ms. Shull asked for an update on the apartments on U.S. Highway 1. Mr. Spraker replied that they were reviewed and approved on August 1, 2023, second reading, and there was discussion at City Commission about the roadways. No one from the public came for or against it and or the roads. No residents have contacted city staff. The next step would be a community meeting if there is interest from the residents.

XI. ADJOURNMENT

The meeting was adjourned at 6:41 p.m.

Respectfully submitted,

_____

Steven Spraker, Planning Director

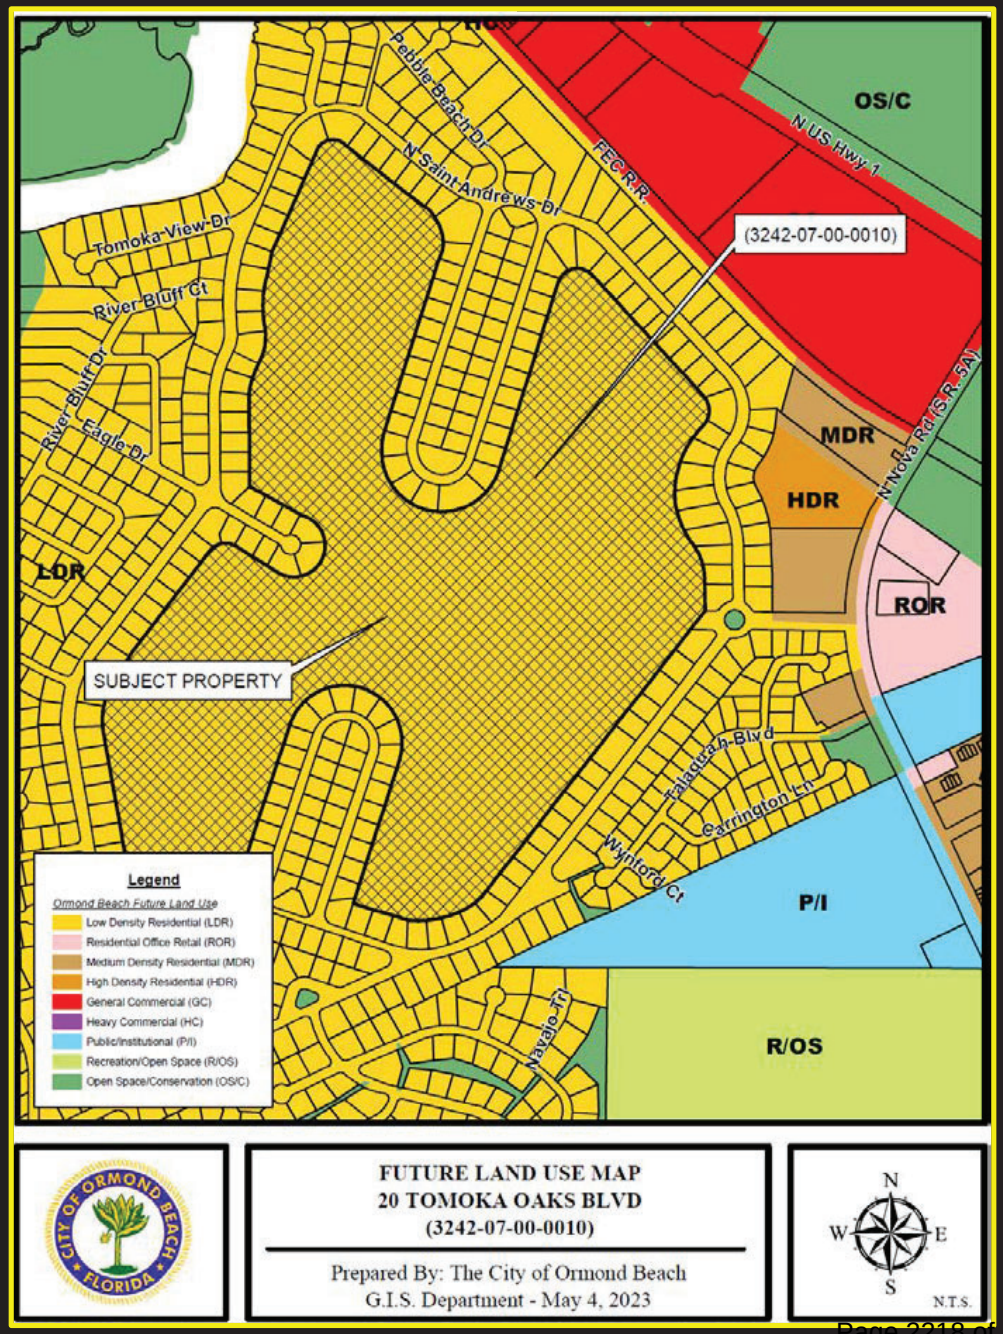
V. **Notice Regarding Adjournment**

Tomoka Reserve, Issuance of a Development Order

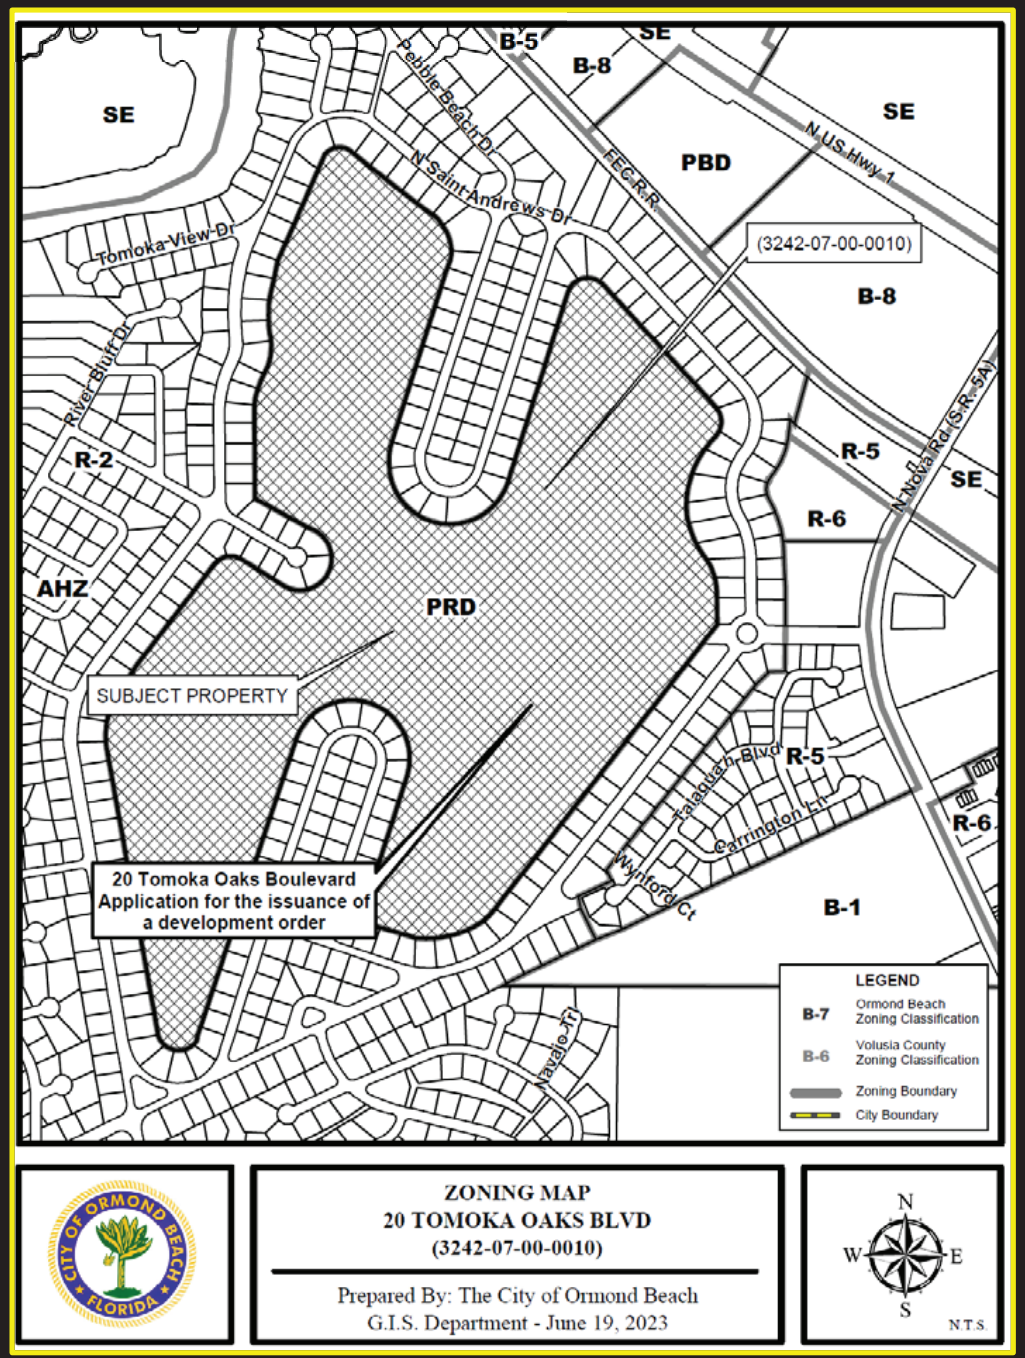


Existing Land Use

Low Density Residential (LDR)

Purpose: To protect and encourage the continued development of typical **single-family residential areas** and stabilize and protect the character of such neighborhoods. **Institutional uses** may be permitted in accordance with the maximum floor area ratio.

Density: up to 4.3 units per acre

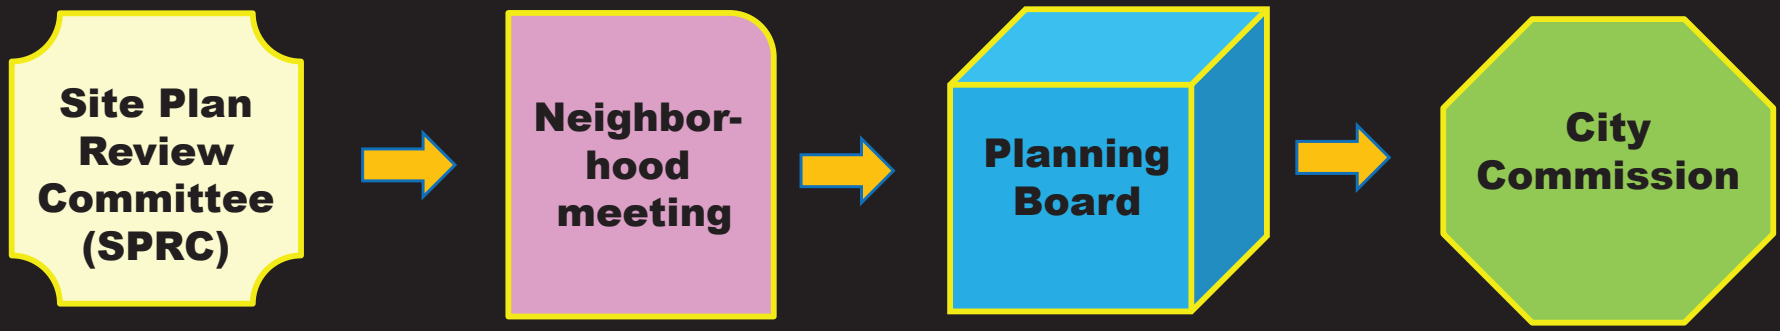


Maximum FAR: 0.2

Existing Zoning

- Ordinance 2006-17 – From **R-2, Single-Family Low Density** to PRD, Planned Residential Development.
- Approved Tomoka Oaks Golf Village development order.
- Development of **119 multi-family** units (townhomes and condominiums) and **3 single-family** homes, along with a re-designed golf course.
- The property owner **was to provide for covenants and restri**ctions that restrict the golf course to open space and golf course use with the development of the residential use.

Development Order expired



Issuance of a Development Order Review Process

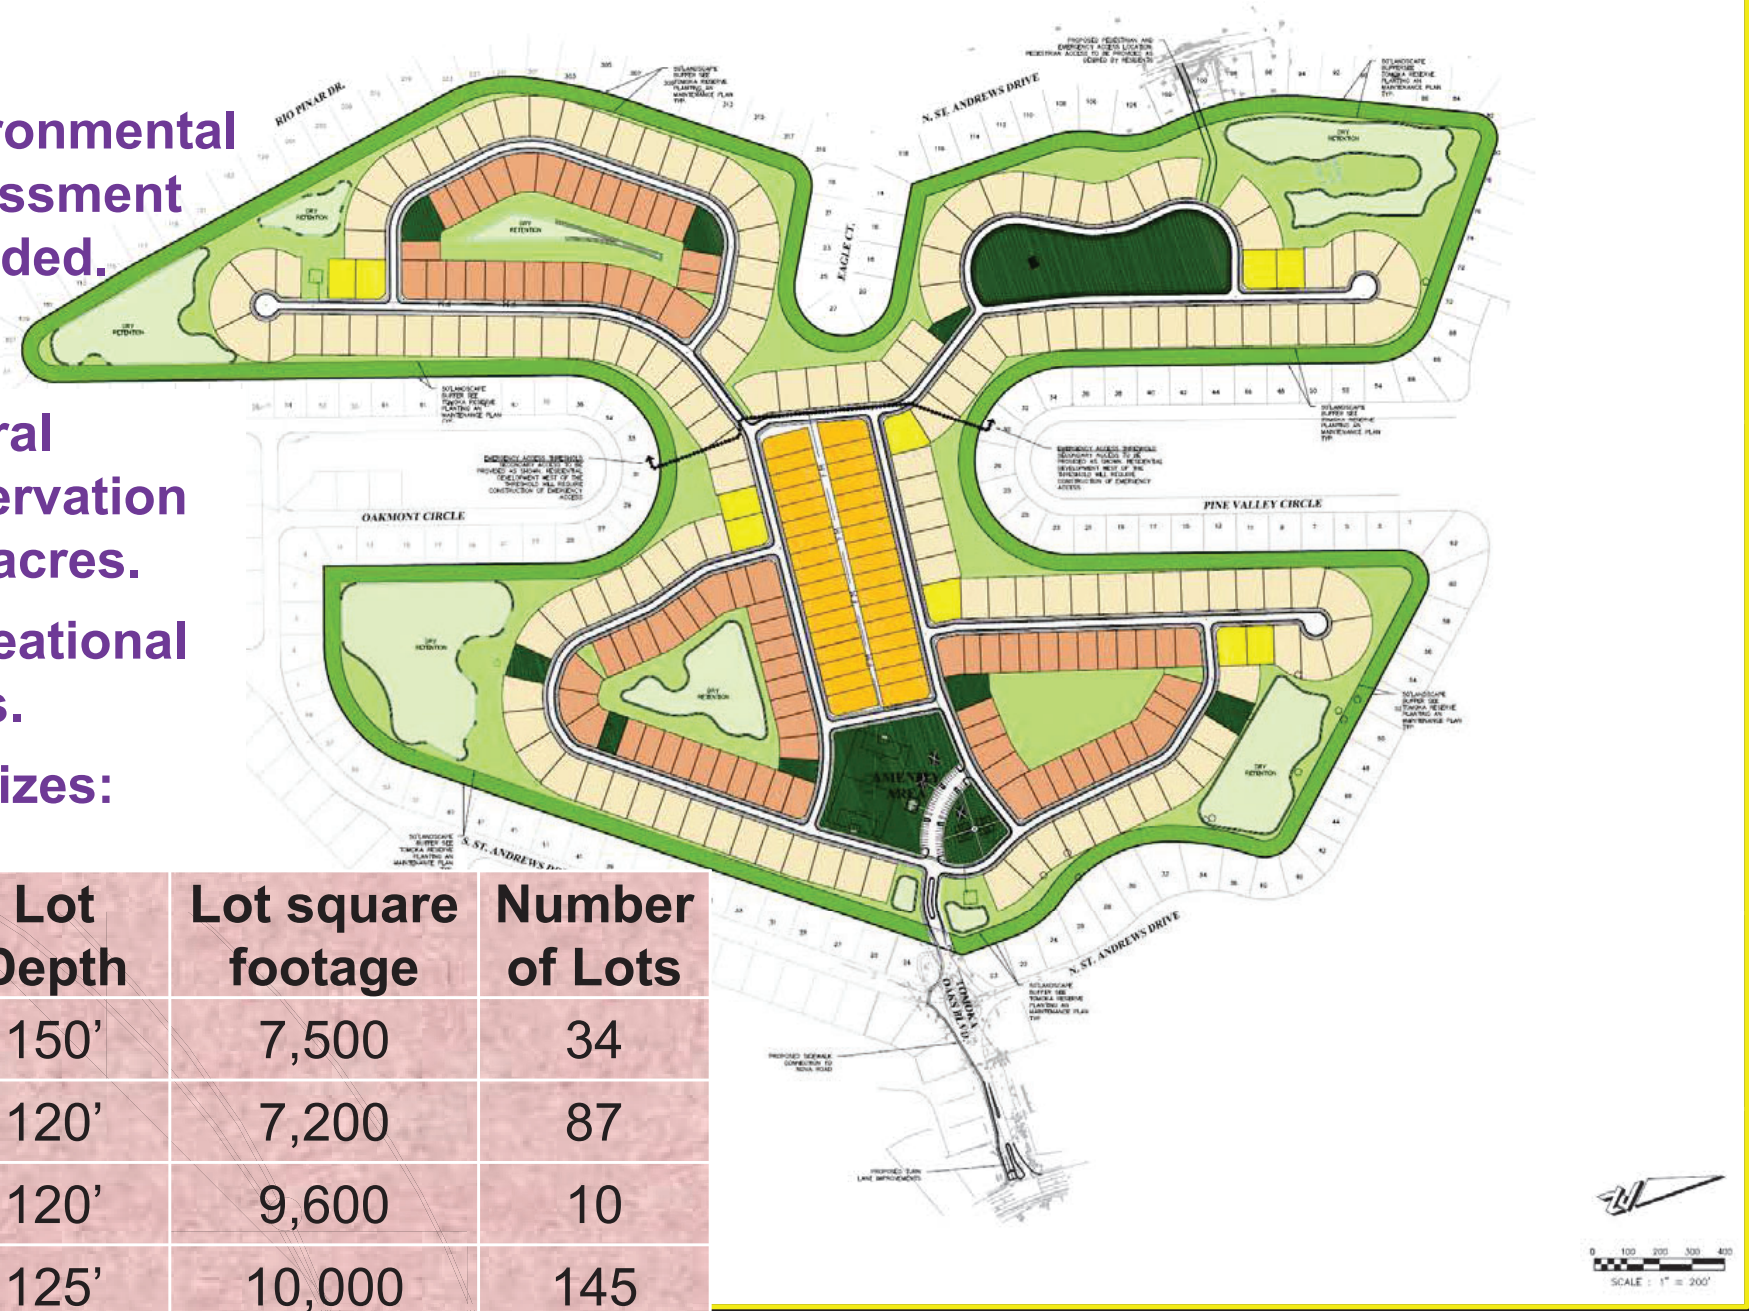
Notes:

- A PRD is a **zoning document** that shows lots, landscape buffers, open areas, recreational areas, and architectural standards.
- Project is reviewed based on criteria within the Land Development Code.
- PRD does not require engineering construction plans that include stormwater and utilities.

IF Development Order approved THEN Preliminary Plat

Notes:

- Preliminary Plat are **CONSTRUCTION SITE PLANS**.
- Leads to a Final Plat
- Must be consistent with the Development Order.



Tomoka Reserve Site Plan

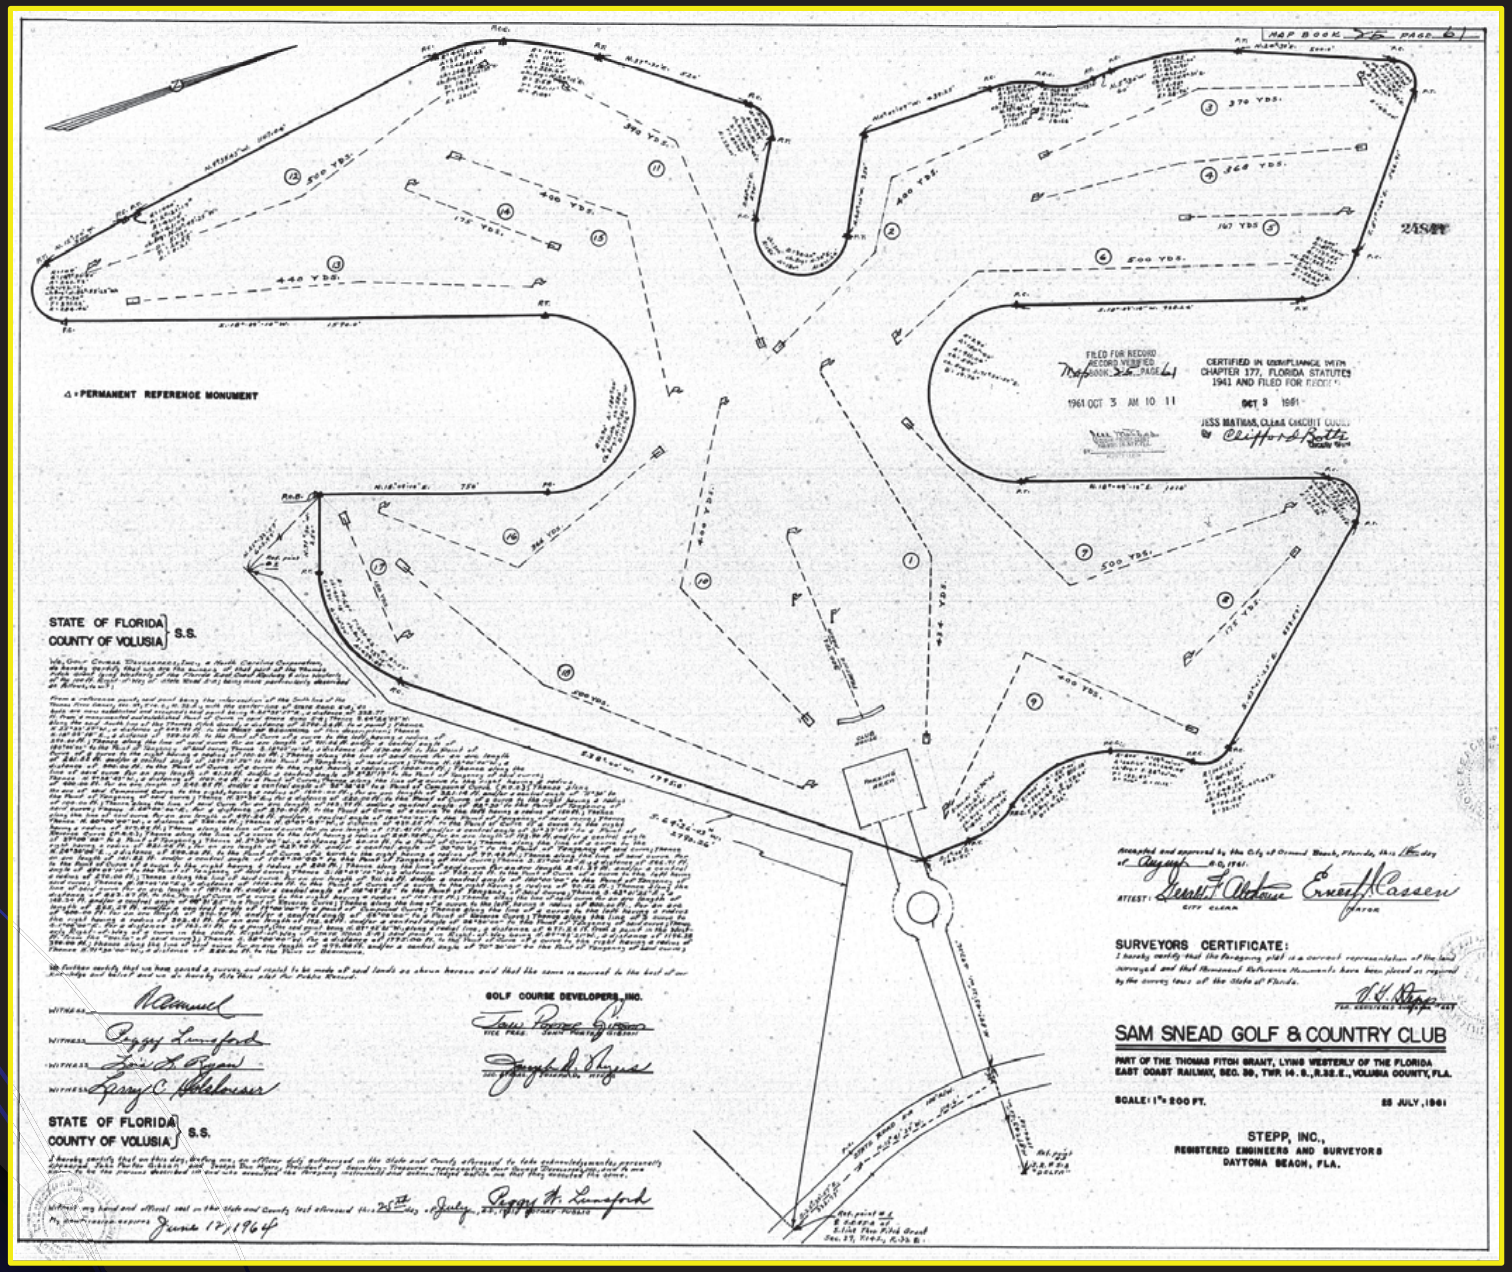
1. 147.94 acres.
2. 276 units.
3. 1.87 units per acre.
4. Plans seek to allow gated vehicular access.
5. Emergency access connection.
6. No wetlands.
7. Not in the floodplain.

Tomoka Reserve Site Plan

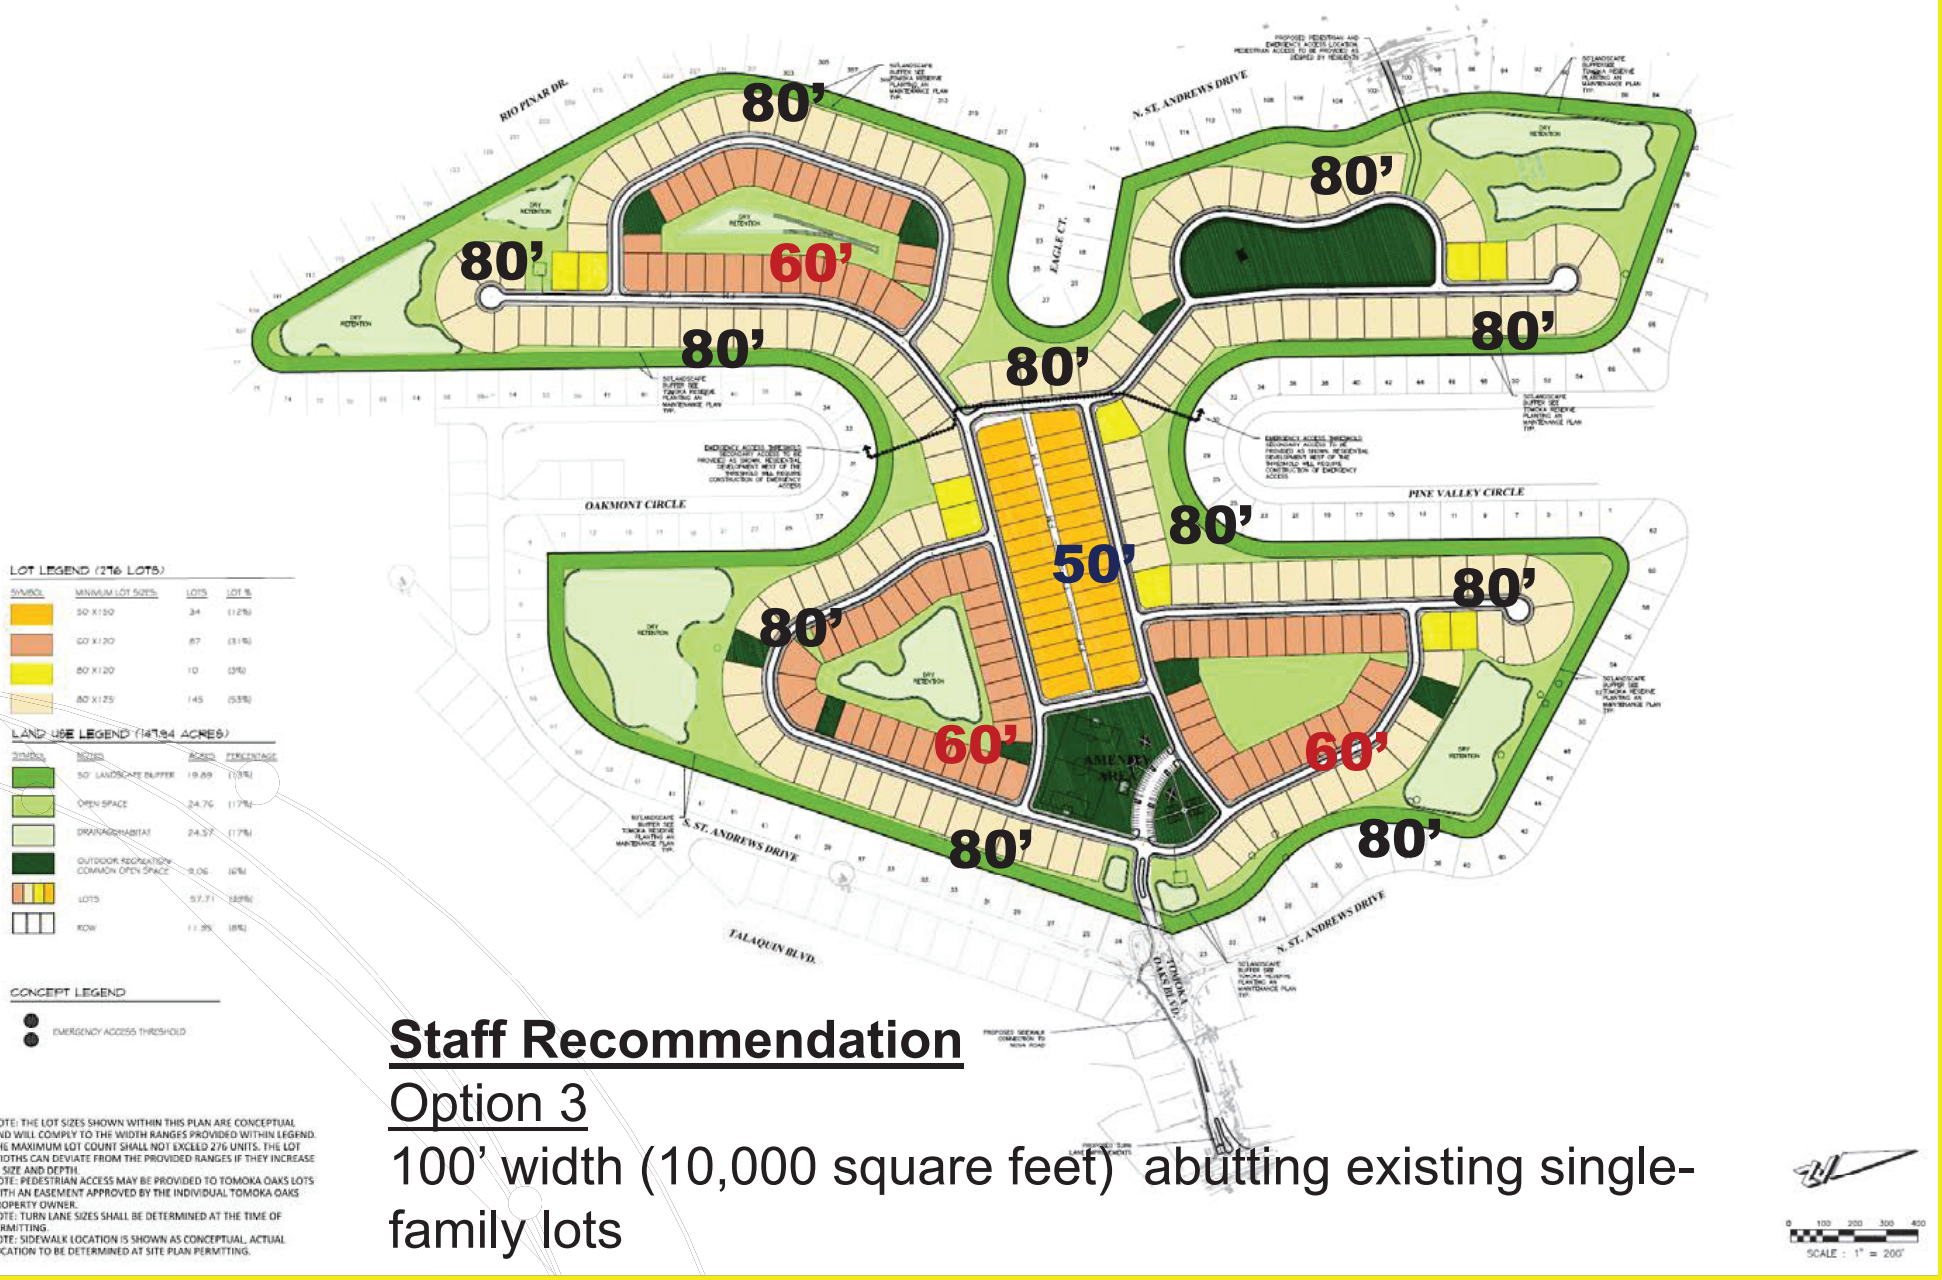
8. Environmental Assessment provided.
9. Natural preservation – 34 acres.
10. Recreational areas.
11. Lot sizes:

Lot Width	Lot Depth	Lot square footage	Number of Lots
50’	150’	7,500	34
60’	120’	7,200	87
80’	120’	9,600	10
80’	125’	10,000	145

Tomoka Reserve Site Plan



12. 50’ buffer.
13. Historic Trees preserved.
14. Stormwater areas.
15. School concurrency provided.
16. Traffic Impact Analysis provided.

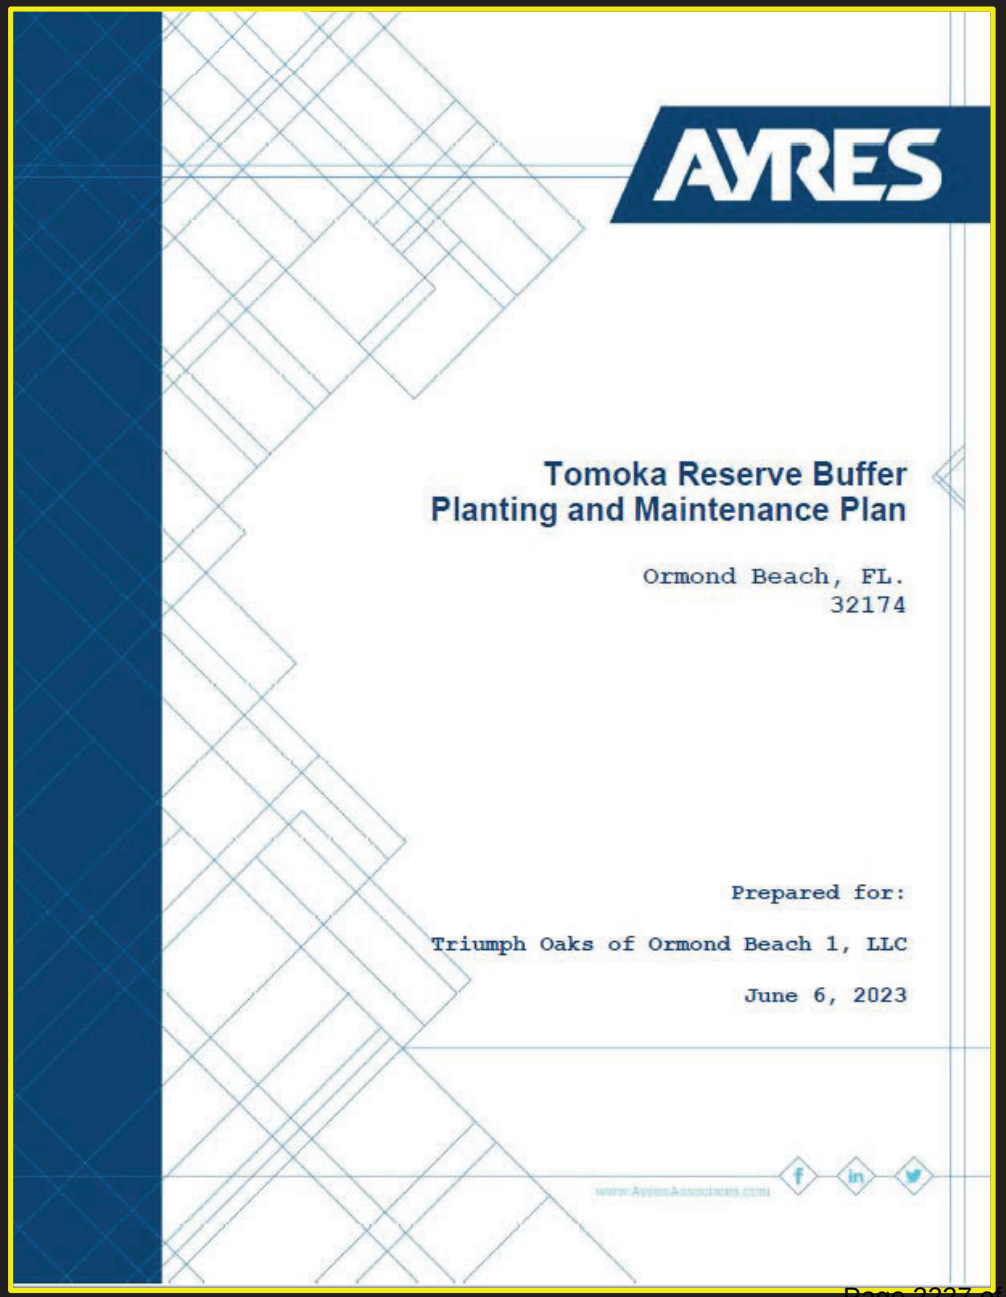


Key issue 1 – Development Ability of the former golf course

Planning Board packet includes:

1. Ms. Davis analysis. Mr. Spain's letter dated 07/12/2023.
2. City Attorney's analysis.
3. Cobb Cole analysis.

Key issue 2 – Lot size/density/compatibility



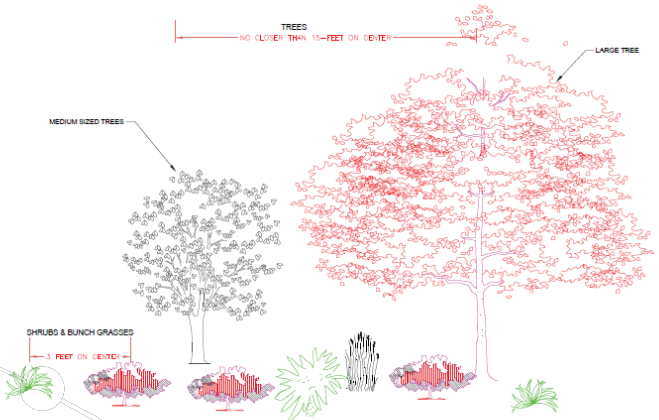
Staff Recommendation

Option 3

100’ width (10,000 square feet) abutting existing single-family lots

Key issue 3 – Planting of the 50’ natural buffer

- Use existing vegetation wherever possible.
- Where vegetation does not exist:
  1. 7 trees & 30 shrubs and grasses per 100 linear feet.
  2. Clustered in a 20 foot spacing
- Watering proposed with truck with a water tank – no permanent irrigation.



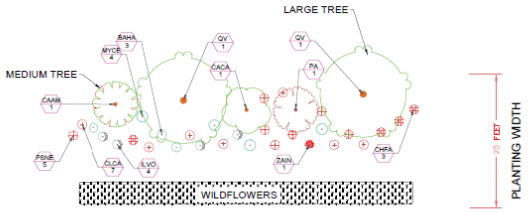
Key issue 3 – Planting of the 50’ natural buffer

HIGH DENSITY BUFFER PLANTING - NO TREES PRESENT IN THE BUFFER

7 TREES AND 30 SHRUBS & GRASSES PER 100 LINEAR FEET. **HIGH DENSITY PLANTINGS** WILL OCCUR WHERE THERE IS LESS THAN 10% VEGETATIVE COVER IN FRONT PRIVATE PROPERTY.

- WITHIN THE 100-FOOT AREA, TREES WILL BE PLACED APPROXIMATELY 15-FEET APART WHILE SHRUBS AND BUNCH GRASS WILL BE PLACED APPROXIMATELY 3-FEET APART.
- FOR EACH 100-FOOT PLANTING AREA, THE PLANTING PATTERN WILL BE AS FOLLOWS:

  MED TREE - LG TREE - MED TREE - LG TREE - MED TREE - LG TREE - MED TREE
- FOR EACH 100-FOOT PLANTING AREA, SHRUBS & GRASSES WILL BE EVENLY SPACED.



ELEVATION (FRONT) VIEW OF PLANTING - MEDIUM DENSITY PLANTING

TREE, SHRUB, AND GROUND COVER SPECIES WILL CONSIST OF A MIXTURE OF SPECIES TO INCREASE BIODIVERSITY. FOR TREES, EACH PLANTING AREA WILL CONSIST OF THREE DIFFERENT SPECIES. FOR SHRUB AND GROUND COVER AREAS, NO MORE THAN 20% OF THE TOTAL PLANTS FOR THAT BUFFER PLANTING WILL BE THE SAME SPECIES.

POTENTIAL MEDIUM DENSITY PLANTING ARRANGEMENT

TREE AND SHRUB PLANTINGS WILL BE CONCENTRATED ON THE AREAS WHERE EXISTING NATURAL VEGETATION DOES NOT EXIST.

PLAN VIEW - HIGH DENSITY PLANTING, NO TREES IN THE BUFFER

100—FEET

REVISIONS DATE

DESIGNED BY: Don Spence, Ph.D.
DRAWN BY: Don Spence, Ph.D.
DATE: 09-16-2022
PROJECT NUMBER:

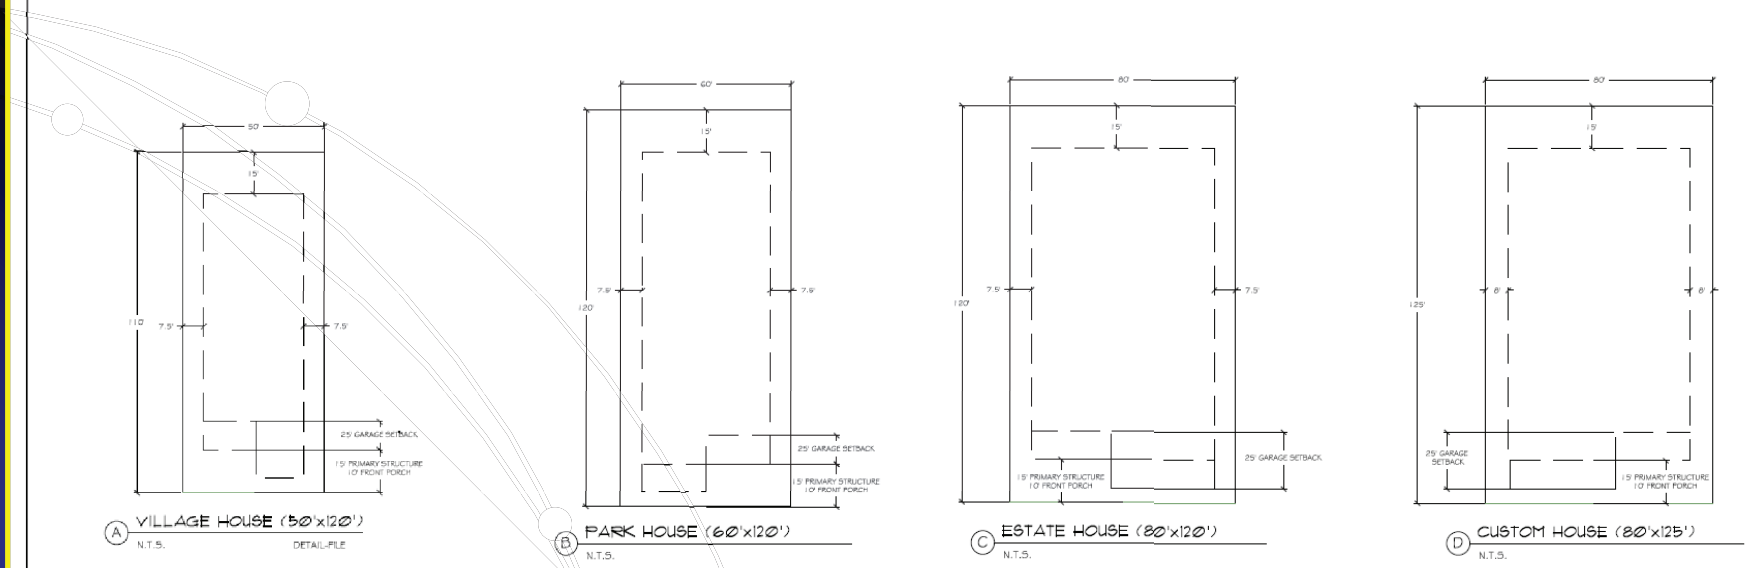
SHEET TITLE:
HIGH DENSITY BUFFER LAYOUT ELEVATION VIEW

SHEET NUMBER:
L-101

Key issue 3 – Planting of the 50’ natural buffer

Staff Recommendation:

Requirement of a type 6 buffer planting plan that requires seven (7) trees, 70 shrubs & 70 ground covers per 100' linear feet – Option 6



Key concerns:

- The landscape buffering requirements of the city have **worked well** to create buffers between uses.
- The amount of material needs to be as **voluminous as possible** to create buffers where no buffer exists today.
- **Staff strongly objects to the use of non-permanent irrigation** and believes that this would set into motion a source of constant issues along a 3.3-mile buffer. Staff believes hand watering would also create unnecessary obligations to a future HOA and potentially defer the cost of an irrigation system to future property owners. Section 3-05(e) of the Land Development Code requires an irrigation system.
- The planting plan as shown in Sheet L-101 shows the trees planted in a 15-foot separation in a tight 20’ planting depth (linear area). **The seven (7) trees need to be staggered within the 50’ buffer depth to allow the proper area to grow.**

Key issue 4 – Setback Plan

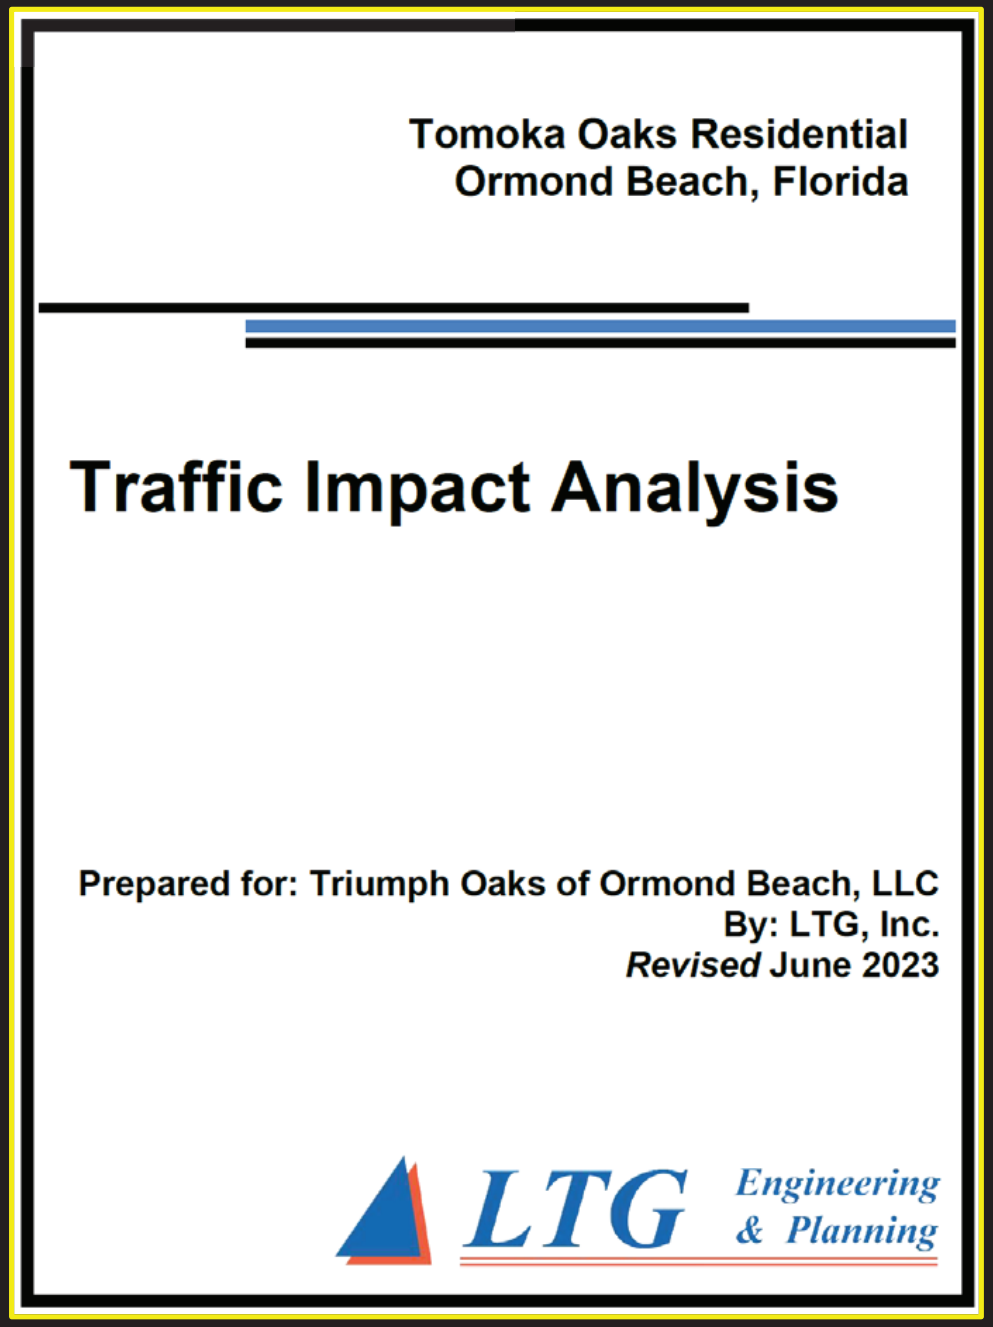
SHEET: PD6 OF 10

Key issue 5: Sheet PD6 note on lot separation

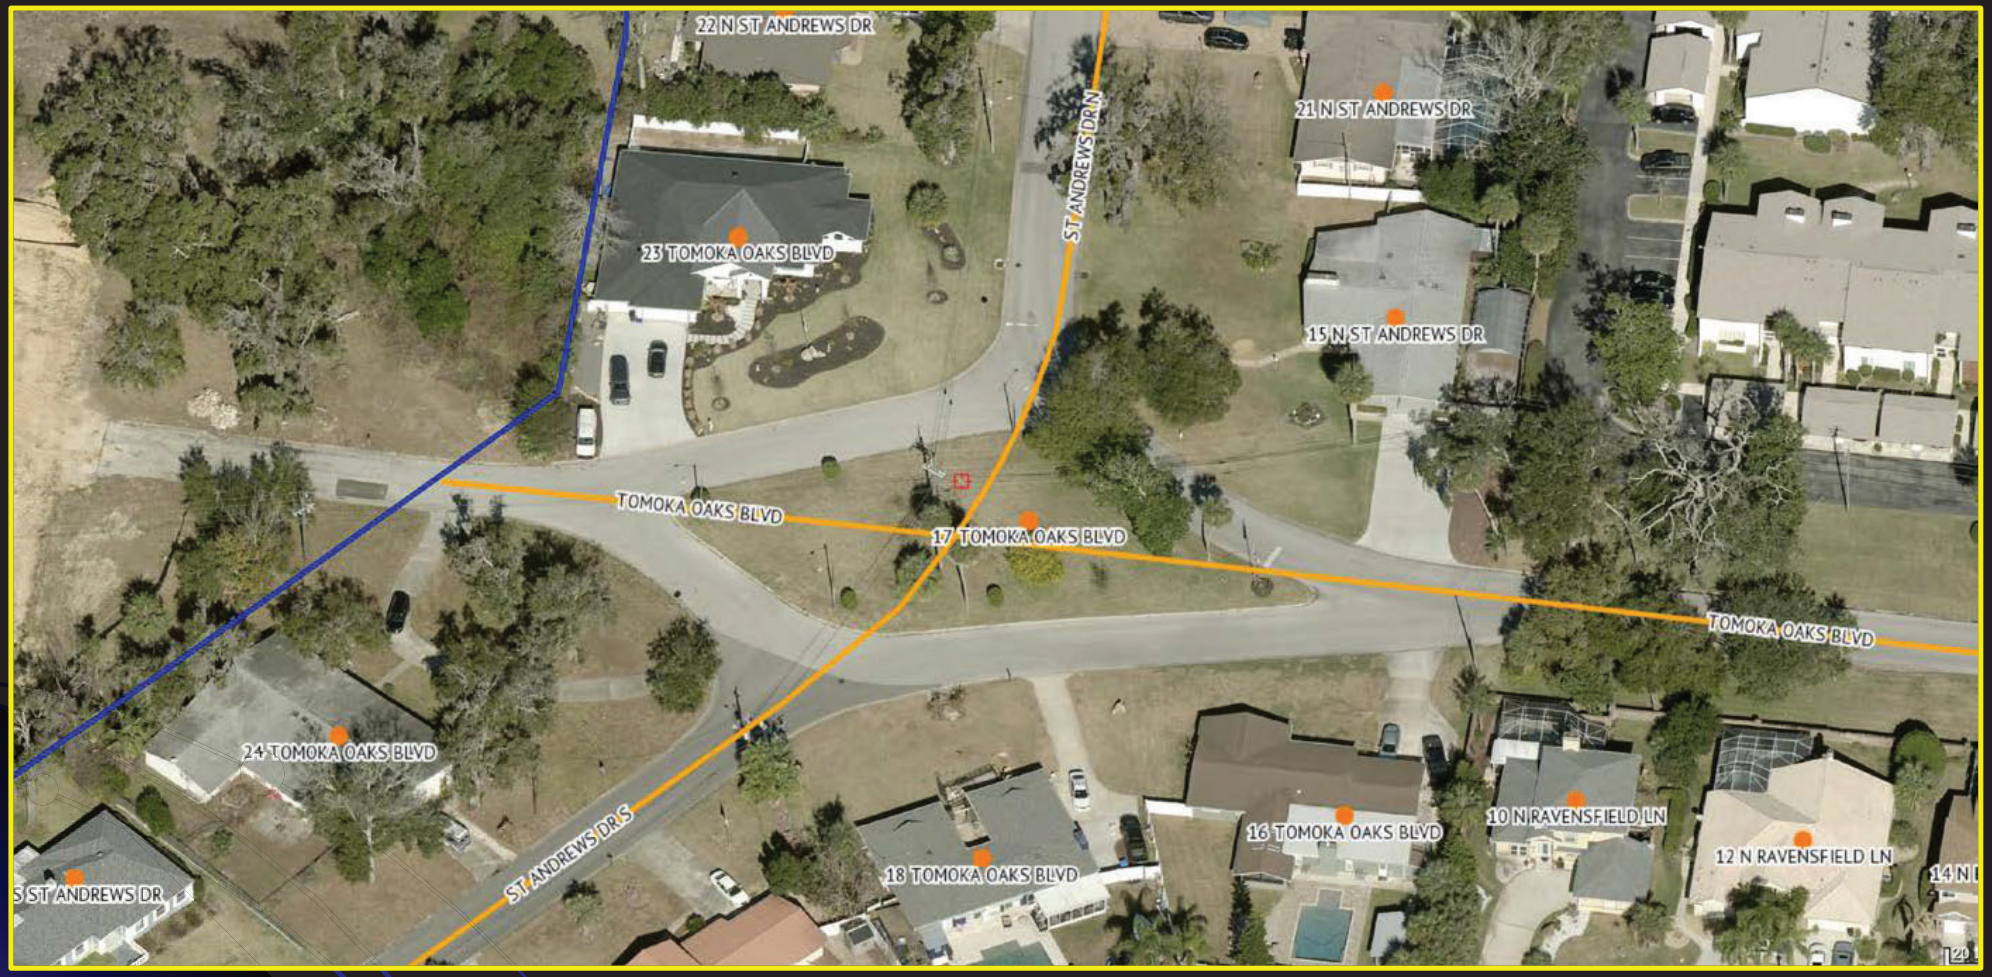
LOT SEPARATION TABLE			
COLOR	WIDTH	HOMES	%
	50′	10	6
	+50′-75′	74	43
	+75′-125′	27	16
	125′	61	35
	TOTAL	172	100



NOTE: THE LOT SEPARATION WIDTH SHOWN ON THIS SHEET MAY BE SUBJECT TO CHANGE AT THE TIME OF PERMITTING. THE REPRESENTED DISTANCES ARE FROM EXISTING RESIDENTIAL LOTS IN TOMOKA OAKS NEIGHBORHOOD AND PROPOSED LOTS WITHIN TOMOKA RESERVE.

Staff Recommendation:

Sheet PD6 note on lot separation - Amend note to state: The 50’ buffer abutting the Tomoka Oaks existing residential lots and areas called out as natural preservation shall not be modified and shall always be vegetative areas **(Option 24)**.



Key issue 6: Traffic

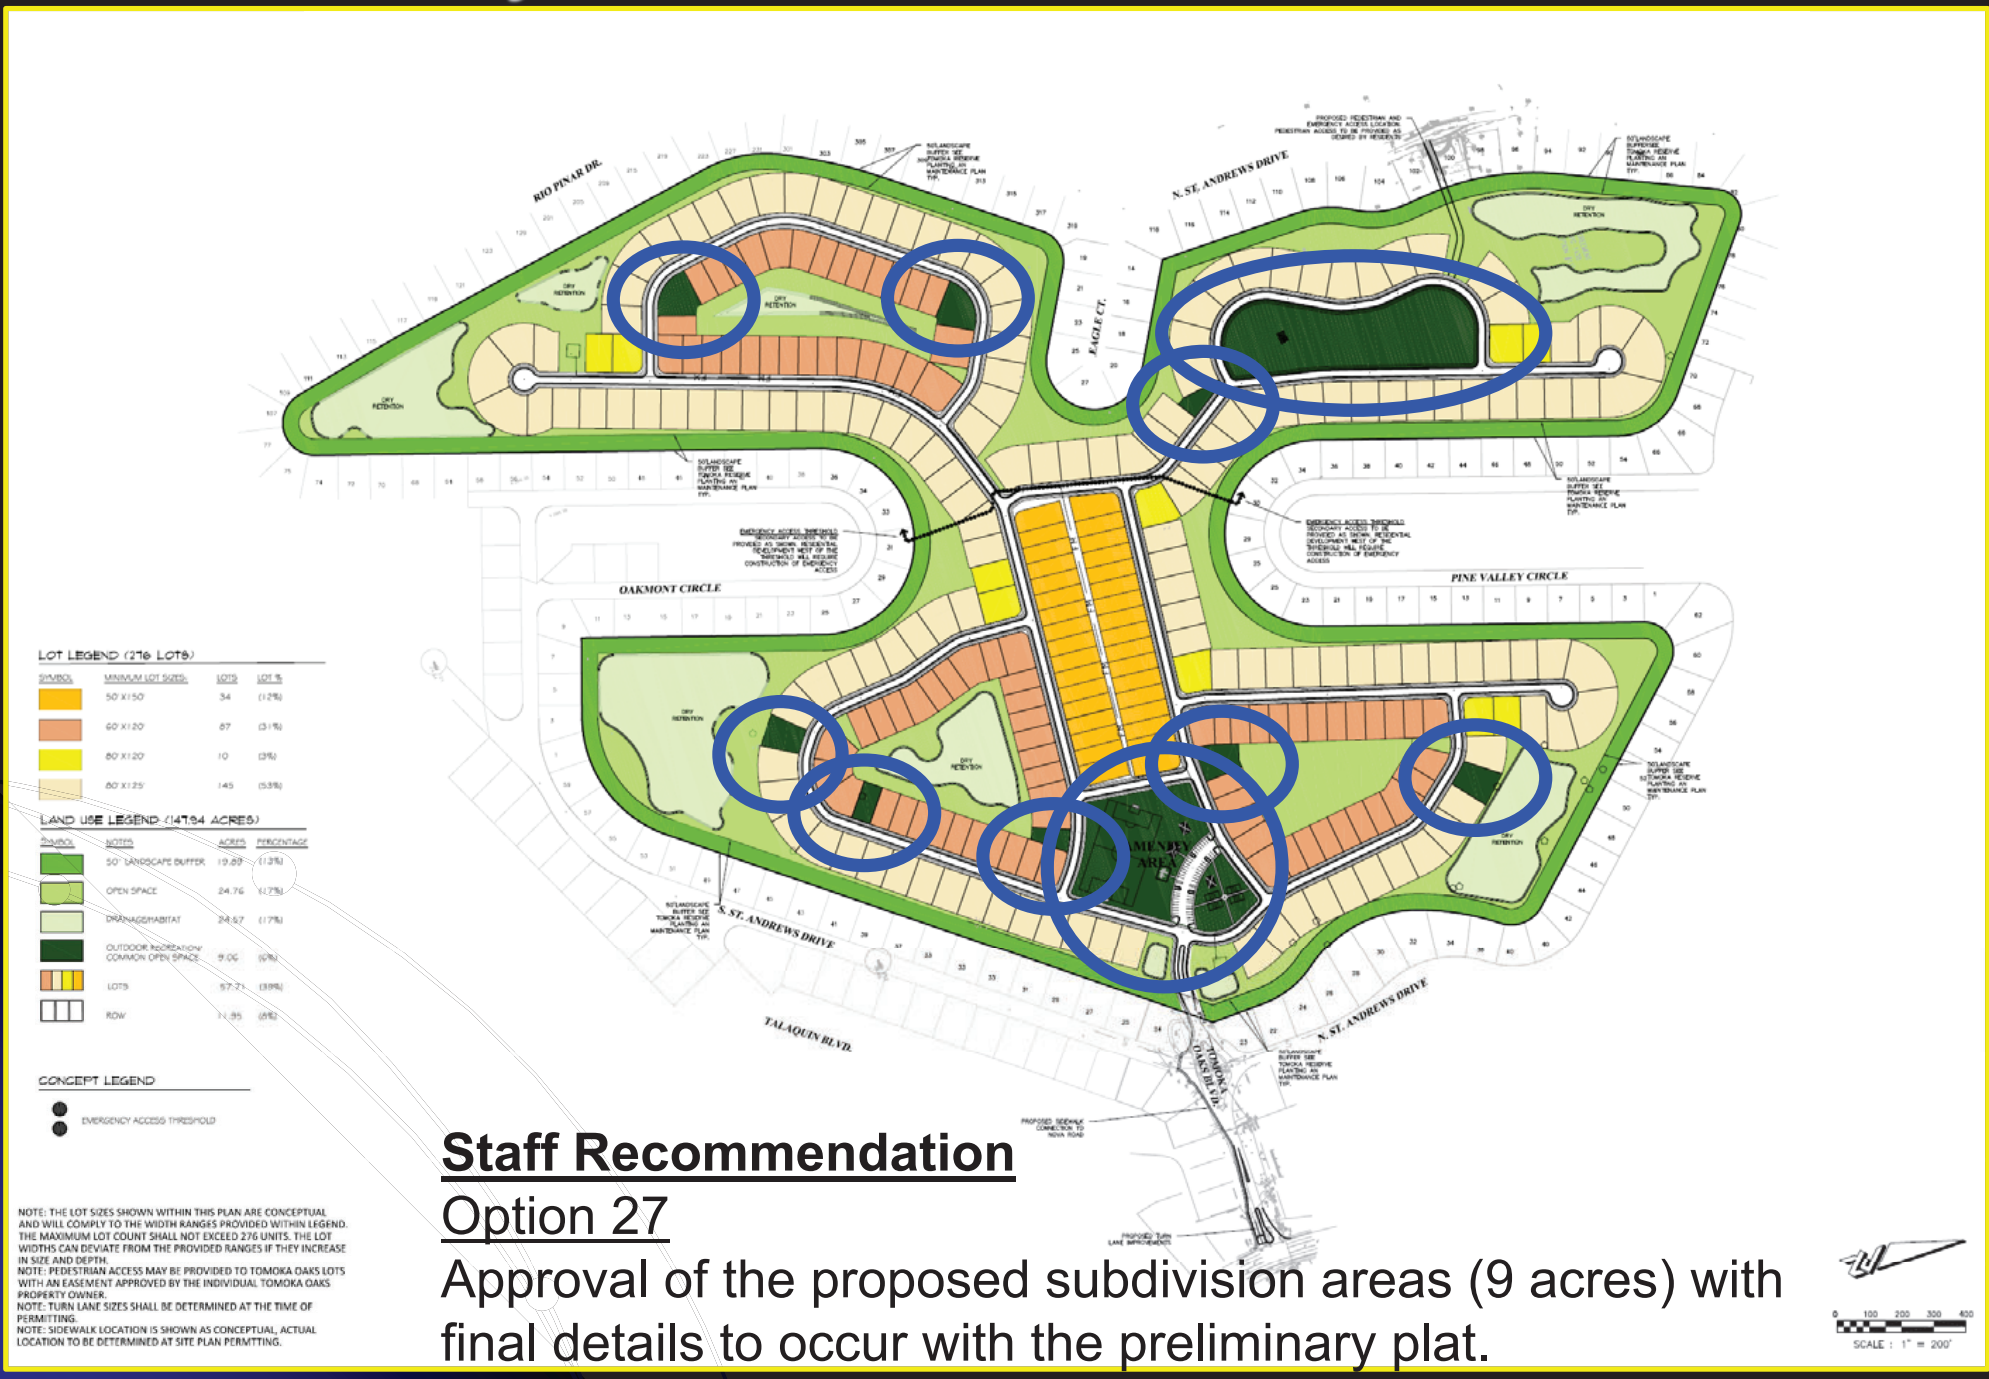
- Traffic counts update – March 2023
- The technical memorandum states, “Due to the proposed location of the project’s access, peak hour data and transportation model results, it is anticipated that **96% of the project trips will utilize Tomoka Oaks Boulevard** and **4% will use Iroquois Trail** for external access. 4% of traffic (111 total daily, 8 total AM and 11 total PM) are expected to use this route to access SR 40.”
- Traffic signal at Tomoka Oaks Boulevard and Nova Road warranted.
- **All local intersections operate at a Level of Service of “A” or “B”** where the adopted Level of Service is “D”.
- Draft proportionate share calculation provided.

Key issue 6: Traffic

St. Andrews Drive and Tomoka Oaks Boulevard diamond intersection

Staff Recommendation:

Staff recommends (Option 25) that the diamond intersection be required to be reconfigured at the construction (preliminary plat) phase of the development.



Key issue 6: Traffic

Sidewalks along Tomoka Oaks Boulevard

In comments received from residents, there has been a desire to see sidewalks on **both sides of Tomoka Oaks Boulevard** (***Option 26***). The applicant has proposed sidewalks on one side of Tomoka Oaks Boulevard.

Key issue 7: Recreation Area

Staff Recommendation

Option 27

Approval of the proposed subdivision areas (9 acres) with final details to occur with the preliminary plat.

Key issue 8: Environmental

A. Ayden Environmental submitted site assessment reports and a Soils Management Plan to the Florida Department of Environmental Protection.

B. All work will be managed by Ayden Environmental with Florida Department of Environmental Protection oversight. All work will be completed in accordance with Chapter 62-780 of the Florida Administrative Code.

C. The Florida Department of Environmental Protection approved the site assessment reports and Soils Management Plan in a letter dated November 16, 2022.

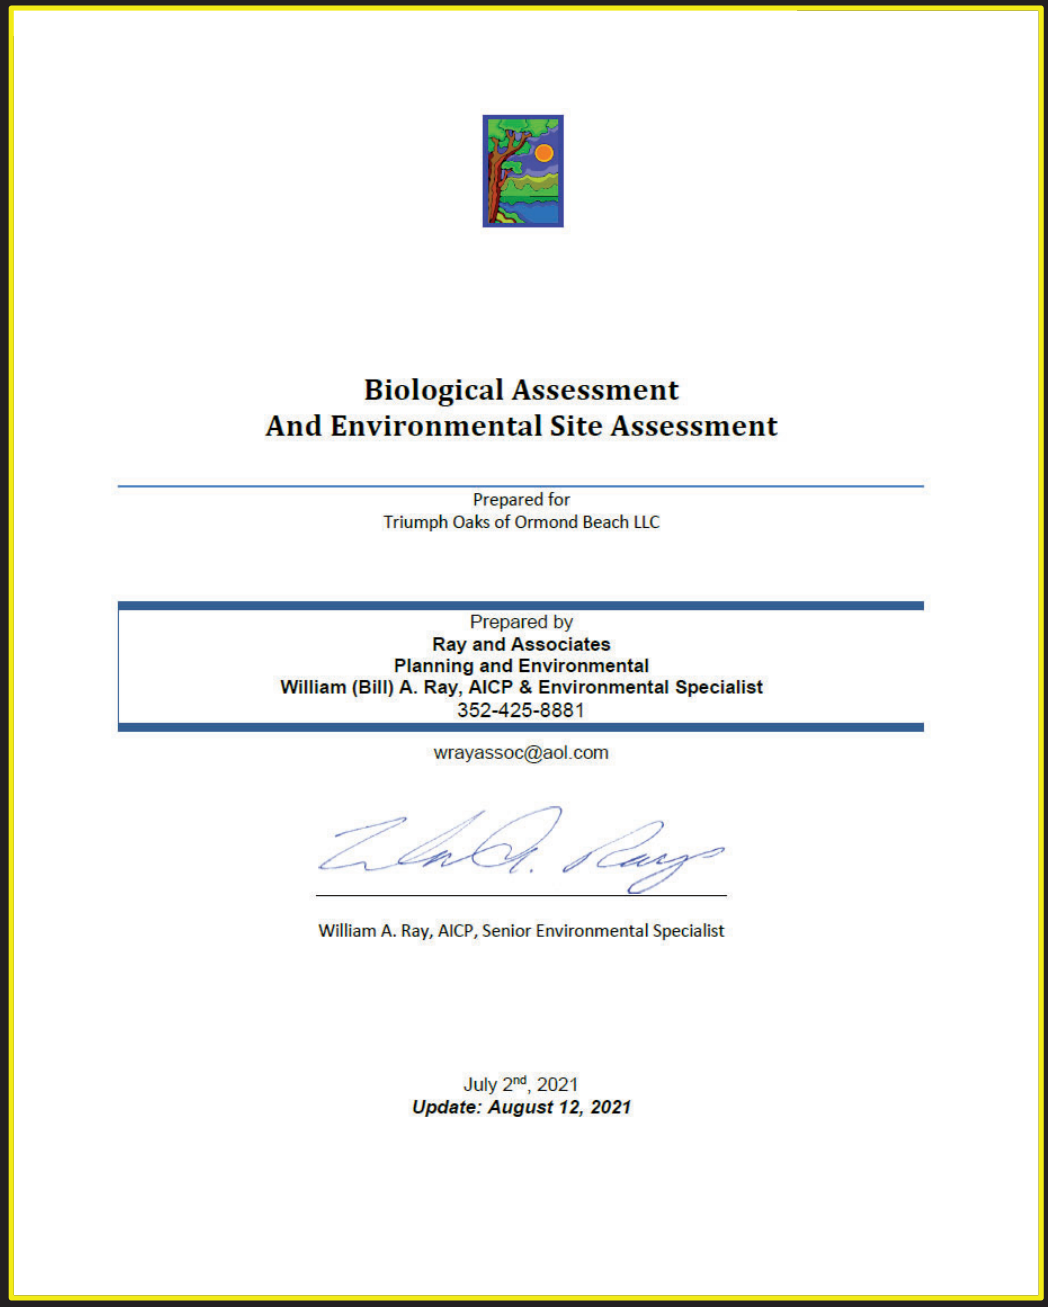
Re: Environmental Regulatory Process Summary
Tomoka Oaks Golf Course Redevelopment (the "Site")
Ormond Beach, Florida

Dear Steven:



The environmental regulatory review and approval process for the former Tomoka Oaks Golf Course is being conducted by the Florida Department of Environmental Protection (FDEP) relating to its former use as a golf course and proposed redevelopment for residential uses. During the prior operation of the golf course, it is understood by FDEP that certain agrichemicals were lawfully applied to the golf course playing areas of the Site for the purposes of turf management. The Site owner contracted with a Florida-certified environmental engineer, Jeff Flairty, P.E. of Ayden Environmental LLC, to complete the required environmental assessment of the Site and develop a remedial plan to address to support the land use change from golf course to residential land uses.

In 2022, Ayden Environmental submitted site assessment reports (i.e., an initial report and a response to FDEP comments) and a Soil Management Plan (SMP) to FDEP. The site assessment reports document the extensive soil and groundwater testing performed by Ayden Environmental and the areas of the Site requiring further site rehabilitation. The SMP details the process for additional site assessment, remediation of impacted soil, and confirmatory sampling to ensure the Site can be redeveloped for residential uses. Implementation of the SMP is intended to run parallel with the proposed redevelopment of the Site and will be managed by Ayden Environmental with FDEP oversite. All work will be completed in accordance with Chapter 62-780 of the Florida Administrative Code, which is Florida's regulatory framework for environmental cleanup. FDEP completed a review of Ayden's regulatory submittals and approved the site assessment reports and SMP in a letter dated, November 16, 2022.

July 2nd, 2021
Update: August 12, 2021

Other issues – R-2 zoning application

Standard	PRD zoning	R-2 zoning
Lot size	Can request varying sizes	100’ lot width – 10,000 square feet lot area
Setbacks	Can request specific standards	Front yard setback of 30’, rear yard setback of 25’, side yards setbacks of a minimum of 8’ to total 20’ between both setbacks, and a side corner setback of 20’
Building Coverage	Can request specific standards	35%
Natural preservation	Additional provided – minimum 20%, project at 23%	15% required
Buffer area	50’ buffer proposed	6’ buffer required
Perimeter setback required	40’	None required.
Recreation	9.06 acres of recreation	None required.
Additional sidewalk from site to Nova Road along Tomoka Oaks Boulevard	One side provided.	Not required.

Correspondence received

- Proposed development is not compatible with the existing Tomoka Oaks, including the smaller lot sizes.
- Property values will be diminished with the loss of the golf course land area. The development would alter the character of the Tomoka Oaks subdivisions.
- Loss of quality of life.
- The golf course was designed as part of Tomoka Oaks and should be used in perpetuity as a golf and country club, golf course, and related uses.
- Concerns with the existing configuration of the diamond intersection at St. Andrews Drive and Tomoka Oaks Boulevard and no proposed improvements.
- Potential backups along Tomoka Oaks Boulevard impacting the Escondido condominiums.
- Construction traffic will have a negative impact on existing residents.
- Project traffic using the Trails subdivisions (Iroquois Trail and Rio Pinar Trail).

Correspondence received

- Design concerns with 50-foot wide lots.
- Only one sidewalk proposed on Tomoka Oaks Boulevard – should be on both sides of the street.
- The timing of the traffic light should be in place before the development project on the golf course starts. TMH Consulting, Inc. states: "The applicant should be required to submit the application to FDOT for installation of the signal concurrent with the first application for subdivision design and prohibit the issuance of any residential building permits until the signal is approved and installation initiated."
- Concerns over stormwater.
- Concerns over Tomoka Reserve HOA and the ability to manage common areas, including the 50' buffer.
- On PD6 (ATTACHMENT 11), buffer widths should not be able to be modified.
- Impacts on wildlife that exist on the golf course property.

Planning Board Review Criteria

- Application submittal;
- Staff report and Site Plan Review Committee comments;
- Written correspondence provided;
- Criteria of the Land Development Code contained within the staff report; and
- Testimony provided at the Planning Board public hearing.

Recommendation

SPRC Recommendation: Denial of the proposed site plan for the issuance of a development order

Recommended changes

SPRC recommended changes:

A. Require all lots on the project perimeter with the Tomoka Oaks subdivision to be 100' in lot depth and at least 10,000 square feet in lot area **(Option 3)**.

B. Requirement of a type 6 buffer planting plan that requires seven (7) trees, 70 shrubs & 70 ground covers per 100' lineal feet **(Option 6)**.

C. Setback plan – lot width – 100' in width **(Option 8)**.

D. Setback plan – maximum building coverage – 50% across all housing types **(Option 10)**.

E. Setback plan - minimum primary structure setbacks – **(Option 13)**.

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50'	20'	20'	7.5'	15'
Park House	60'	25'	20'	7.5'	15'
Estate House	80'	25'	20'	8'/20'	20'
Custom House	80'	25'	20'	8'/20'	20'

F. Setback plan - minimum front porch setbacks – **(Option 16)**

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50'	12'	20'	7.5'	15'
Park House	60'	15'	20'	7.5'	15'
Estate House	80'	15'	20'	8'/20'	20'
Custom House	80'	15'	20'	8'/20'	20'

Recommended changes

SPRC recommended changes:

G. Setback plan - minimum garage setbacks – **(Option 19)**

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50’	20’	20’	7.5’	15’
Park House	60’	25’	20’	7.5’	15’
Estate House	80’	25’	20’	8’/20’	20’
Custom House	80’	25’	20’	8’/20’	20’

H. Setback plan – Notes – Delete the notes. Notes 1 and 2 are contained in the Land Development Code. Staff is not supportive of a 15’ front yard garage setback **(Option 22)**.

I. Sheet PD6 note on lot separation - Amend note to state: The 50’ buffer abutting the Tomoka Oaks existing residential lots and areas called out as natural preservation shall not be modified and shall always be vegetative areas **(Option 24)**.

J. St. Andrews Drive and Tomoka Oaks Boulevard diamond - that a diamond reconfiguration be required at the construction (preliminary plat) phase of the development **(Option 25)**.

K. Sidewalks on both sides of Tomoka Oaks Boulevard – require sidewalks on both sides of Tomoka Oaks Boulevard **(Option 26)**.

L. The preliminary plat should require the conducting of a neighborhood meeting.

SHEET: PD9 OF 10

Architectural Standards

- Sheet PD10 includes full standards on roof construction, wall plates, driveways, etc.
- **PREFERRED ARCHITECTURAL THEMES**
  - The overall architectural vision for Tomoka Reserve has been established to create a community embodying a “timeless” quality. Such a vision will be realized through a variety of classical and regional architectural styles, combined with authentic detailing and use of high-quality materials.
  - Permitted architectural styles include but are not limited to contemporary, Modern, Postmodern, coastal themed styles, Mediterranean, Mission, Cracker, Craftsman, Ranch and Tuscan styles.

- **PROHIBITED ARCHITECTURAL STYLES**
  - While diversity and creativity in the design of the homes at Tomoka Reserve is encouraged, certain architectural styles are not considered appropriate. These include, but are not limited to Art Deco, A-frame, Adobe, Cabin design style, Gothic, or Southwestern/Pueblo. Buildings and their accessory structures shall be consistent with a common architectural theme.
  - The architectural theme shall be established by harmoniously coordinating the general appearance of all buildings and related structures.

- **EXTERIOR MATERIALS/ELEVATIONS**
  - Architectural variation and variety of housing types and designs within the neighborhood is encouraged. To facilitate this diversity **no two homes adjacent to one another can have identical front elevations.**
  - The front facade should include four to six individual design elements and blank walls shall be discouraged unless adequately landscaped.
  - A mixture of one- and two-story homes will be encouraged to vary the streetscapes.
  - Window trim, shutters and or banding shall be used on the front façade of all residential units. Articulation of side street facades for corner lots shall also be required. On each level or part of the street facing facades, rows of windows shall be spaced evenly and contain consistent sizes and shapes to create visual harmony.

- **PERMITTED EXTERIOR MATERIALS INCLUDE:**
  - Brick
  - Stucco
  - Stone (Manufactured, Natural, or Cast)
  - Fiber-cement Lap Siding or Shingles
  - Other textures and materials will be evaluated on their own merit by the ARB.

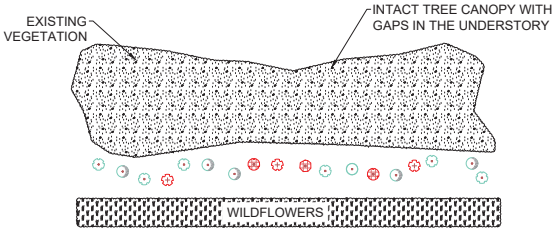
BUFFER PLANTING WHEN TREES ARE PRESENT IN THE BUFFER - UNDERSTORY GAPS

WHEN 7 OR MORE TREES EXIST IN A CONTINUOUS LIINE OVER A 100 FOOT SECTION, ONLY SHRUBS, AND BUNCH GRASSES WILL BE USED WHEN UNDERSTORY GAPS OCCUR.



ELEVATION (FRONT) VIEW OF PLANTING - SHRUBS & GRASSES PLANTING

TREE, SHRUB, AND GROUND COVER SPECIES WILL CONSIST OF A MIXTURE OF SPECIES TO INCREASE BIODIVERSITY. FOR TREES, EACH PLANTING AREA WILL CONSIST OF THREE DIFFERENT SPECIES. FOR SHRUB AND GROUND COVER AREAS, NO MORE THAN 20% OF THE TOTAL PLANTS FOR THAT BUFFER PLANTING WILL BE THE SAME SPECIES.

POTENTIAL MEDIUM DENSITY PLANTING ARRANGEMENT

TREE AND SHRUB PLANTINGS WILL BE CONCENTRATED ON THE AREAS WHERE EXISTING NATURAL VEGETATION DOES NOT EXIST.

PRD Rezoning Standards – LDC Section 2-35(j)(4)

REVIEW OF A PRD REZONING REQUEST SHALL BE BASED ON "THE EXTENT TO WHICH THE DEVELOPMENT OFFERS SITE AMENITIES ABOVE THAT NORMALLY FOUND FOR PERMITTED USES IN THE DISTRICT WITH REGARD TO THE FOLLOWING:

- Criteria #1 - Innovative Site Design
  - Preservation of Historic Trees – Sheet PD5/6(Pg. 775)
  - Buffer Layout and Planting – Sheet PD5/6 and Buffer Maintenance Plan (Pg. 775, Pg. 695)
  - Stormwater Improvements – Sheet PD9 (Pg. 779)
  - Reuse System - Sheet PD9 (Pg. 779)
  - Redevelopment of Golf Course Impacts – Environmental Summary of FDEP Review (Pg. 490)
  - Pedestrian Improvements – Sheet PD2 (Pg. 771)

THE PROPOSED PROJECT COMPLIES WITH THIS CRITERIA.

PRD Rezoning Standards – LDC Section 2-35(j)(4)

- Criteria # 2 – Coordinated Architectural Design
  - Architectural Design Standards and Criteria – Sheet PD8 (Pg. 777)

- Criteria # 3 - Open Space, Recreation, Common Areas
  - Buffer Plan – Sheet PD5/6 (Pg. 774)
  - Open Space – Sheet PD3 (Pg. 772)
  - Recreation/Amenities - Sheet PD10 (Pg. 780)

- Criteria # 4 – Coordinated Streetscape Elements
  - Overall Development Plan – Sheet PD2 (Pg. 771)

THE PROPOSED PROJECT COMPLIES WITH THIS CRITERIA.

Rezoning Standards – LDC Section 1-15(e)

CRITERIA 1. THE PROPOSED DEVELOPMENT CONFORMS TO THE STANDARDS AND REQUIREMENTS OF THIS LAND DEVELOPMENT CODE AND WILL NOT CREATE UNDUE CROWDING BEYOND THE CONDITIONS NORMALLY PERMITTED IN THE ZONING DISTRICT, OR ADVERSELY AFFECT THE PUBLIC HEALTH, SAFETY, WELFARE OR QUALITY OF LIFE:

- Density Review - *see* City of Ormond Beach Staff Report Pg. 5 (Pg. 7 of overall packet)
- Buffer - Sheet PD5/6 (Pg. 774)
- Recreational Amenities and Pedestrian Access - Sheet PD10 (Pg. 780)
- Common Open Space - Sheet PD3 (Pg. 772)

THE PROPOSED PROJECT COMPLIES WITH THIS CRITERIA.

Rezoning Standards – LDC Section 1-15(e)

CRITERIA 2. THE PROPOSED DEVELOPMENT IS CONSISTENT WITH THE COMPREHENSIVE PLAN:

- City of Ormond Beach Staff Report – Pg. 21 (Pg. 23 of overall packet)
- City of Ormond Beach Comprehensive Plan – Policies 1.1.2, 1.1.6, 1.1.7, 1.1.14, 2.2.1, 2.2.5, 2.4.7, 2.4.10
- Project Narrative – (Pg. 688)

THE PROPOSED PROJECT COMPLIES WITH THIS CRITERIA.

Rezoning Standards – LDC Section 1-15(e)

CRITERIA 3. THE PROPOSED DEVELOPMENT WILL NOT ADVERSELY IMPACT ENVIRONMENTALLY SENSITIVE LANDS OR NATURAL RESOURCES, INCLUDING, BUT NOT LIMITED TO, WATERBODIES, WETLANDS, XERIC COMMUNITIES, WILDLIFE HABITATS, ENDANGERED OR THREATENED PLANTS AND ANIMAL SPECIES OR SPECIES OF SPECIAL CONCERN, WELLFIELDS, AND INDIVIDUAL WELLS.

- Environmental Site Analysis (Pg. 720)
- Environmental Summary of FDEP Review (Pg. 490)
- Stormwater Calculations (Pg. 759) – *Also see* submitted Stormwater Calculations

THE PROPOSED PROJECT COMPLIES WITH THIS CRITERIA.

Rezoning Standards – LDC Section 1-15(e)

CRITERIA 4. THE PROPOSED USE WILL NOT SUBSTANTIALLY OR PERMANENTLY DEPRECIATE THE VALUE OF SURROUNDING PROPERTY; CREATE A NUISANCE; OR DEPRIVE ADJOINING PROPERTIES OF ADEQUATE LIGHT AND AIR; CREATE EXCESSIVE NOISE, ODOR, GLARE OR VISUAL IMPACTS ON THE NEIGHBORHOOD AND ADJOINING PROPERTIES.

- Economic Report by Fishkind & Associates

CRITERIA 5. THERE ARE ADEQUATE PUBLIC FACILITIES TO SERVE THE DEVELOPMENT, INCLUDING, BUT NOT LIMITED TO, ROADS, SIDEWALKS, BIKE PATHS, POTABLE WATER, WASTEWATER TREATMENT, DRAINAGE, FIRE AND POLICE SAFETY, PARKS AND RECREATION FACILITIES, SCHOOLS, AND PLAYGROUNDS.

- Traffic Impact Analysis – revised June 2023 (Pg. 217)
- Pedestrian/Bike Memorandum – dated 12/19/23 (Pg. 718)
- Connectivity Map – dated 6/10/22 (Pg. 719)
- City Staff Report – Page 23 (Pg. 25 of overall packet)
- Volusia School Board finding of Adequate Capacity – dated 3/27/23 (Pg. 506)

THE PROPOSED PROJECT COMPLIES WITH THESE CRITERIA.

Rezoning Standards – LDC Section 1-15(e)

CRITERIA 6. INGRESS AND EGRESS TO THE PROPERTY AND TRAFFIC PATTERNS ARE DESIGNED TO PROTECT AND PROMOTE MOTORIZED VEHICLE AND PEDESTRIAN/BICYCLE SAFETY AND CONVENIENCE, ALLOW FOR DESIRABLE TRAFFIC FLOW AND CONTROL, AND PROVIDE ADEQUATE ACCESS IN CASE OF FIRE OR CATASTROPHE. THIS FINDING SHALL BE BASED ON A TRAFFIC REPORT WHERE AVAILABLE, PREPARED BY A QUALIFIED TRAFFIC CONSULTANT, ENGINEER OR PLANNER WHICH DETAILS THE ANTICIPATED OR PROJECTED EFFECT OF THE PROJECT ON ADJACENT ROADS AND THE IMPACT ON PUBLIC SAFETY.

- Traffic Impact Analysis, revised June 2023 (Pg. 217)

THE PROPOSED PROJECT COMPLIES WITH THIS CRITERIA.

Rezoning Standards – LDC Section 1-15(e)

CRITERIA 7. THE PROPOSED DEVELOPMENT IS FUNCTIONAL IN THE USE OF SPACE AND AESTHETICALLY ACCEPTABLE.

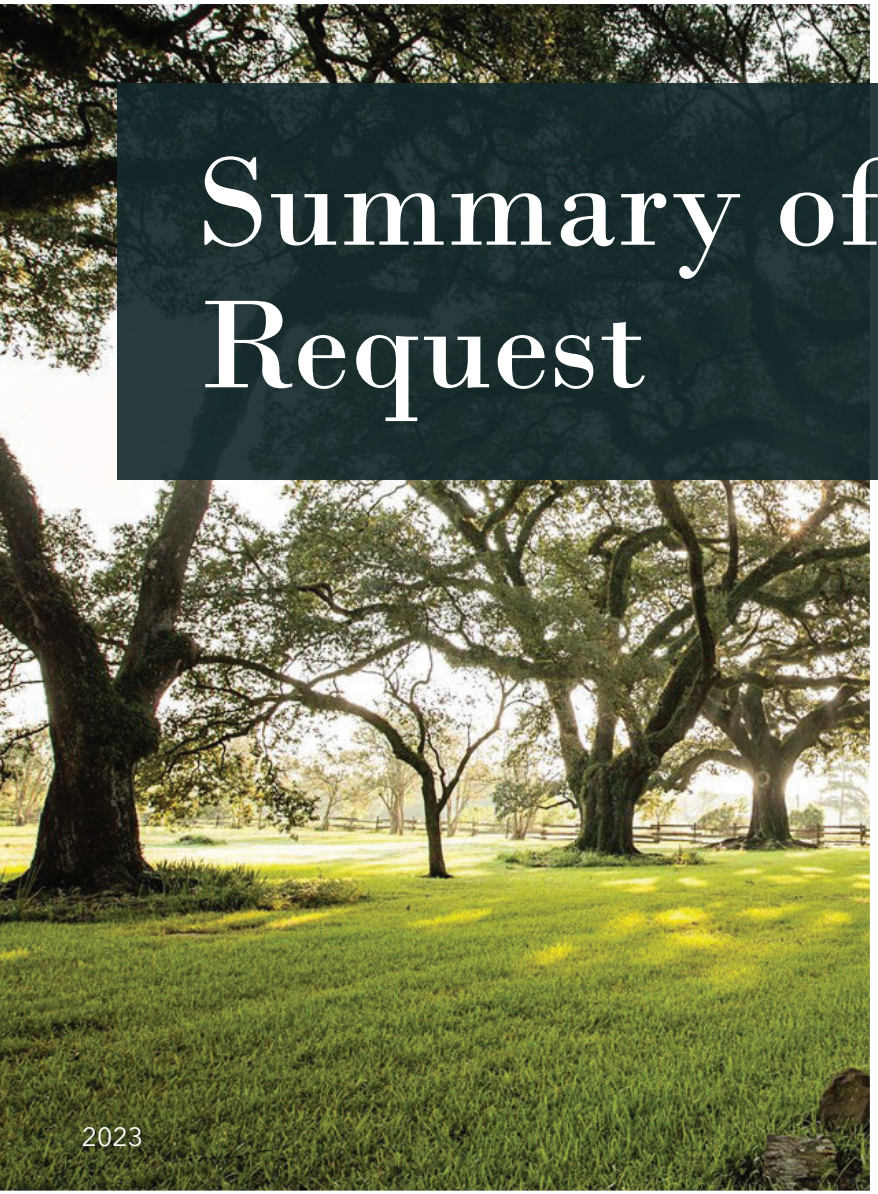
- Conceptual Site Plan – Sheets PD3, PD 5/6, PD 10 (Pgs. 772, 774, and 780, respectively)
- City or Ormond Beach Staff Report – Page 24 (Pg. 26 of overall packet)

CRITERIA 8. THE PROPOSED DEVELOPMENT PROVIDES FOR THE SAFETY OF OCCUPANTS AND VISITORS.

- Compliance with Land Development Code (LDC)
- Pedestrian Improvements – Sheet PD2 (Pg. 771)
- City or Ormond Beach Staff Report – Page 25 (Pg. 27 of overall packet)

THE PROPOSED PROJECT COMPLIES WITH THESE CRITERIA.

Rezoning Standards – LDC Section 1-15(e)



CRITERIA 9. THE PROPOSED USE OF MATERIALS AND ARCHITECTURAL FEATURES WILL NOT ADVERSELY IMPACT THE NEIGHBORHOOD AND AESTHETICS OF THE AREA.

- Economic Impact Analysis – Fishkind & Associates
- City or Ormond Beach Staff Report – Page 25 (Pg. 27 of overall packet)

CRITERIA 10. THE TESTIMONY PROVIDED AT PUBLIC HEARINGS.

- The testimony provided herein has been provided by individuals with direct knowledge of the project site, familiarity with the technical elements relating to the items addressed, and with expertise in their fields of knowledge, as demonstrated by the qualifications submitted in writing to the Board.

THE PROPOSED PROJECT COMPLIES WITH THESE CRITERIA.

Summary of Request

This project aims to redevelop the property, which was formerly a failed golf course, by providing a residential development that will complement the surrounding area and integrate with the surrounding residential neighborhood.

Staff and Applicant PowerPoints

Section C

Staff PowerPoint for August 21, 2023 Planning Board meeting

City of Ormond Beach
Planning Board

Updated based on information provided by the applicant on August 16, 2023

Key Issues Review

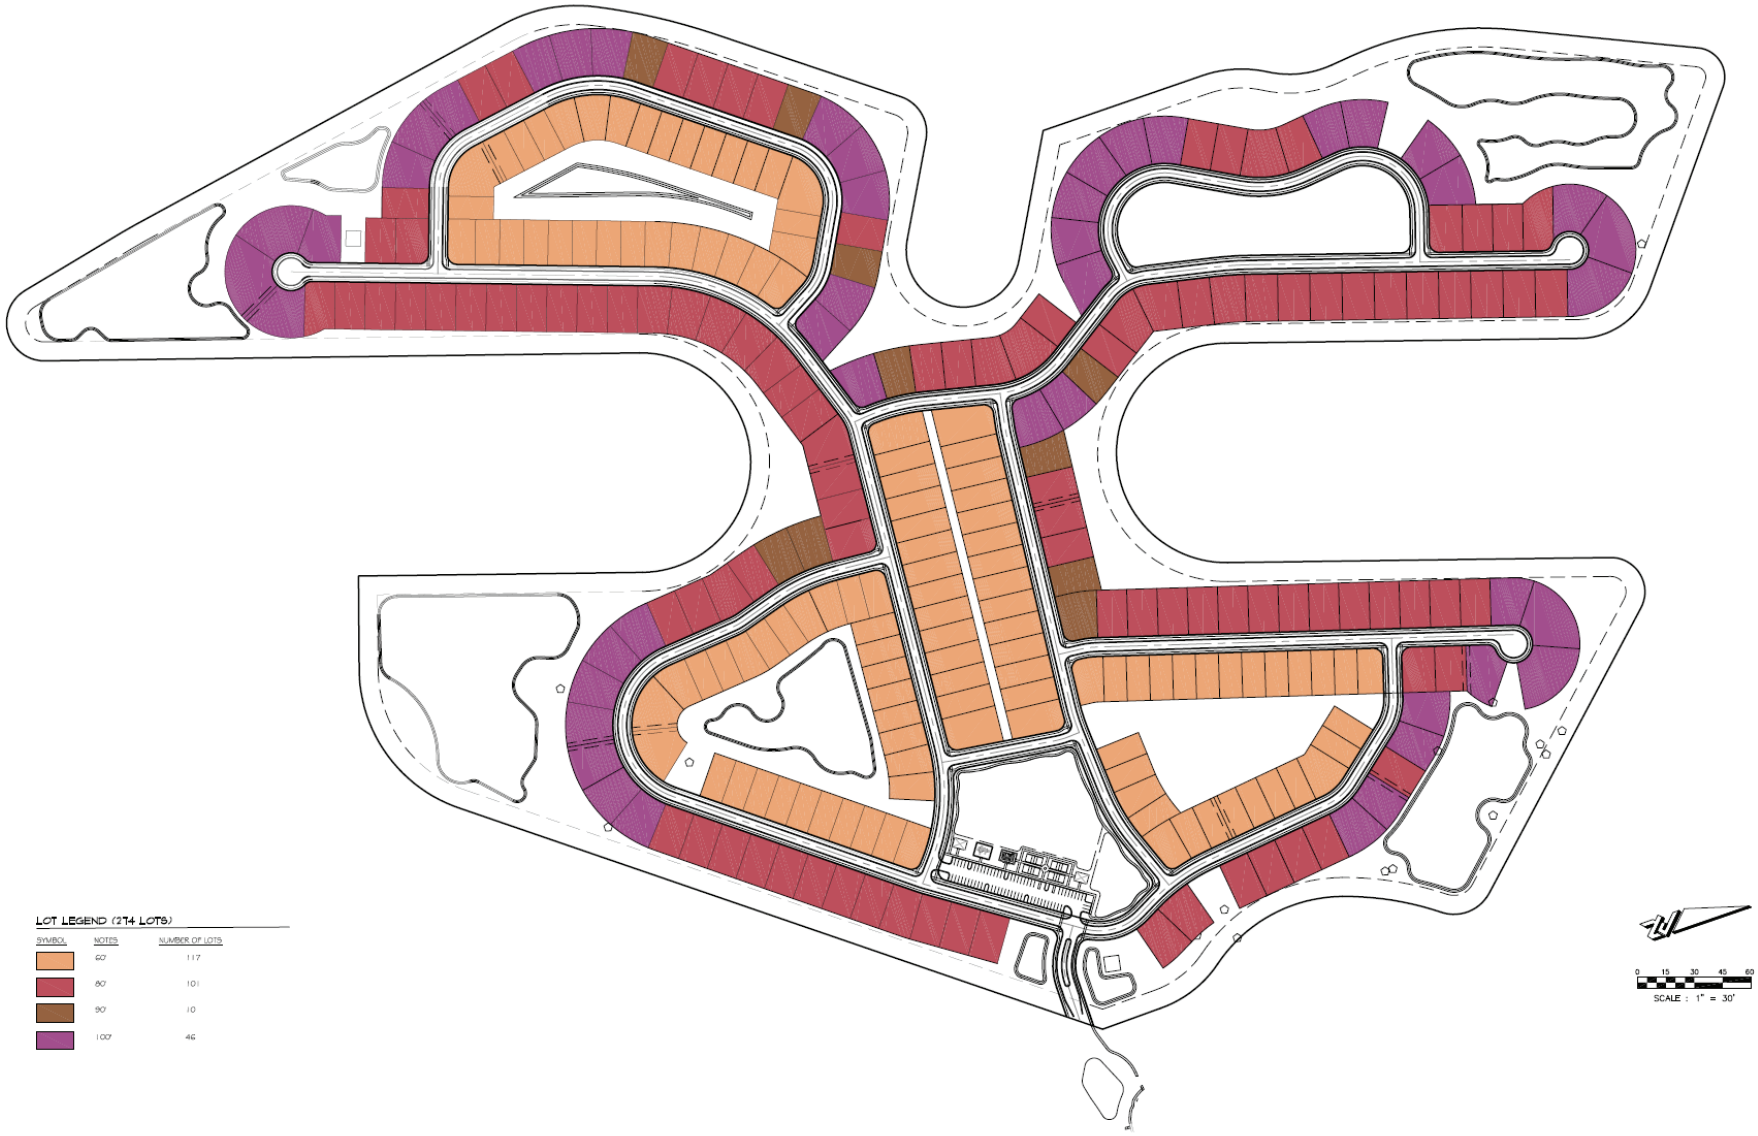
Key issue 1 – Development Ability of the former golf course

City staff are not aware of any private document that requires the subject property to be utilized as a golf course only.

Key Issues Review

Key issue 2 – Lot size/density/compatibility

Staff Recommendation:



Approve the submitted site plan with the condition that all lots on the project perimeter with the Tomoka Oaks subdivision be 100' in lot width and at least 10,000 square feet in lot area.

Applicant's response:

The Applicant does not believe it is possible to incorporate a minimum lot width of 100' throughout the site with the requested voluntary landscaping buffer and proposed open space, which we believe is a key feature for the existing and proposed residents. However, we have been able to modify the plan to create a mixture of lot types along the perimeter of the site that demonstrate a lot width along the rear setback line (as a closer measuring point to the existing residential homes).

Key Issues Review

August 16, 2023

Key Issues Review

Key issue 3 – Planting of the 50’ natural buffer

Staff Recommendation:

Requirement of a type 6 buffer planting plan that requires seven (7) trees, 70 shrubs & 70 ground covers per 100' lineal feet – Irrigation required.

Applicant’s response:

As noted in the hearing, the Applicant believes that the proposed planting system for the property, which includes a xeric landscaping scope that will complement and enhance areas of natural vegetation within the site, is more compatible with existing on site conditions and will act as a better screening measure for adjacent properties, while also relying on less irrigation and water consumption and supporting natural plant communities.
However, we understand that the City is interested in ensuring adequacy of the buffer between the communities, and has agreed to the following:

- ***Where the planting standard outlined in the PUD is utilized for a phase, a maintenance bond will be provided to ensure the survivability of planting materials for a period of one (1) year.***
- ***In the event that the planting materials do not survive, the buffer will be modified to a Type 6 buffer within the requirements of the City’s Land Development Code (LDC).***

Key Issues Review

Key issue 4 – Setback plan

- Maximum building coverage: 50% - **Applicant agrees to this condition.**
- Primary structure setback - **Applicant agrees to this condition.**

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50’	20’	20’	7.5’	15’
Park House	60’	25’	20’	7.5’	15’
Estate House	80’	25’	20’	8’/20’	20’
Custom House	80’	25’	20’	8’/20’	20’

- Front porch structure setback - **Applicant agrees to this condition.**

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50’	20’	20’	7.5’	15’
Park House	60’	25’	20’	7.5’	15’
Estate House	80’	25’	20’	8’/20’	20’
Custom House	80’	25’	20’	8’/20’	20’

Key Issues Review

Key issue 4 – Setback plan

- Garage structure setback - **Applicant agrees to this condition.**

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50’	12’	20’	7.5’	15’
Park House	60’	15’	20’	7.5’	15’
Estate House	80’	15’	20’	8’/20’	20’
Custom House	80’	15’	20’	8’/20’	20’

- Setback plan – Notes – Delete the notes. Notes 1 and 2 are contained in the Land Development Code. Staff is not supportive of a 15’ front yard garage setback - **Applicant agrees to this condition.**

Key Issues Review

Key issue 5 – Sheet PD6 note on lot separation

Staff Recommendation:

Amend note to state: The 50’ buffer abutting the Tomoka Oaks existing residential lots and areas called out as natural preservation shall not be modified and shall always be vegetative areas.

Applicant’s response:

Applicant agrees to this condition.

Key Issues Review

Key issue 6 – Traffic - St. Andrews Drive and Tomoka Oaks Boulevard diamond

Staff Recommendation:

A diamond reconfiguration be required at the construction (preliminary plat) phase of the development.

Applicant's response:

The Applicant has demonstrated that the diamond intersection operates within the required level of service for the site. The Applicant is willing to provide the following necessary improvements to this area of the property, as illustrated on the attached exhibit:

- ***Modification of existing drive aisle to resolve turning radii conflicts for emergency vehicles; and***
- ***Provision of additional landscaping adjacent to the right-of-way.***

Key Issues Review

Key issue 6 – Traffic - St. Andrews Drive and Tomoka Oaks Boulevard diamond

Key Issues Review

Key issue 6 – Sidewalks on both sides of Tomoka Oaks Boulevard

Staff Recommendation (residents):

Require sidewalks on both sides of Tomoka Oaks Boulevard.

Applicant's response:

Applicant agrees to this condition.

Key Issues Review

Key issue 7 – Recreation

Staff Recommendation:

Approval of the proposed subdivision areas (9 acres) with final details to occur with the preliminary plat.

Applicant's response:

No changes.

Key Issues Review

Key issue 8 – Environmental

Staff Recommendation:

No changes from the original submittal.

Applicant's response:

No changes.

Key Issues Review

Other issues – Preliminary Plat neighborhood meeting

Staff Recommendation:

The preliminary plat should require the conducting of a neighborhood meeting.

Applicant's response:

Applicant is in agreement with this condition.

Key Issues Review

Other issues –Resident Concern – Timing of Signal Permitting

Applicant's response:

The Applicant understand that the residents want to ensure that permitting and installation of the signal move forward at the same time as the development. As such, the Applicant agrees to the voluntary condition that the Applicant will make application for the permits for the signal within 30 days of subdivision approval, and such permit will be issued prior to the issuance of subdivision construction permits.

Key Issues Review

Other issues –Resident Concern – HOA Architectural Design Language

Applicant's response:

The Applicant has coordinated with residents following the Planning Board hearing and have agreed to modify the proposed architectural standards to include the following:

i. The Architectural Review Board may not modify the architectural standards set forth in the PUD until such time that the HOA has turned control over from the Declarant to the homeowners.

ii. The Applicant has committed to compliance with the following additional landscape standards included herein.

Key Issues Review

Other issues – Planning Board Concern – Cut Through of Amenity Space parking lot

Applicant's response:

A board member noted that within a previous plan iteration, residents could utilize the amenity parking lot as a cut through drive aisle, which raised concerns on resident and child safety. This parking area has been revised to limit cut-through traffic.

Conclusion

- The site plan changes submitted August 16, 2023 are material changes.
- The proposed site plan changes would require a re-submittal to the Site Plan Review Committee.
- The Planning Board can act (approve or deny) on the original site plan submitted – from the July 13, 2023 Planning Board meeting.
- Action on the proposed site plan requires a new public hearing (presentations, public comments, board review).
- The new public hearing requires advertisement.
- Suggested dates for a new public hearing:
    1. Tuesday, September 26, 2023
    2. Thursday, September 28, 2023

ATTACHMENT 13

Staff report for July 13, 2023 Planning Board meeting

STAFF REPORT

City of Ormond Beach
Department of Planning

MEETING DATE: July 13, 2023

SUBJECT: Tomoka Reserve– Issuance of a development order

APPLICANT: Robert A. Merrell III, Esquire, Cobb Cole on behalf of the property owner, Triumph Oaks of Ormond Beach I, LLC

NUMBER: PRD 2022-043

PROJECT PLANNER: Steven Spraker, AICP, Planning Director

SECTION 1, INTRODUCTION:

This is an application submitted by Robert A. Merrell III, Esquire, Cobb Cole on behalf of the property owner, Triumph Oaks of Ormond Beach I, LLC, for the issuance of a development order for the Tomoka Reserve subdivision. The application seeks to allow the issuance of a development order for 276 single-family lots on approximately 147.94 acres under certain conditions and associated subdivision improvements. The subject property is currently zoned as PRD, Planned Residential Development and is located at 20 Tomoka Oaks Boulevard. The subject property is shown in Exhibit 1.

EXHIBIT 1:
Location Map

SECTION 2, BACKGROUND:

The subject property has a land use designation of "Low Density Residential" (LDR) and the zoning classification of Planned Residential Development. Maps of the subject property are included in ATTACHMENT 2. The land area for the application was platted in 1961 as the Sam Snead Golf and Country Club. The Tomoka Oaks Golf & Country Club included an 18-hole golf course, clubhouse, cart barn, and maintenance barn. On September 19, 2006, the City Commission approved Ordinance 2006-17 that authorized the following:

A. Zoning map amendment from R-2, Single-Family Low Density to PRD, Planned Residential Development;
B. The Tomoka Oaks Golf Village development order;
C. Development of 119 multi-family units (townhomes and condominiums) and 3 single-family homes, along with a re-designed golf course;
D. The property owner was to provide for covenants and restrictions that restrict the golf course to open space and golf course use with the development of the residential use; and
E. A phasing plan for site development.

The project development order expired in 2014 based on no permit activity. Because there was no construction, none of the development order conditions, including the covenant and restrictions for a golf course, were implemented. The applicant purchased the property in 2021 and has sought to implement a new development order to provide zoning entitlements for the property.

The uses around the subject property are as follows:

EXHIBIT 2: Land uses and zoning

Direction	Current Land Uses	Future Land Use Designation	Zoning
North	Single-Family Residential	"Low Density Residential"	R-2, Single-Family Low Density
South	Single-Family Residential	"Low Density Residential"	R-2, Single-Family Low Density
East	Single-Family Residential	"Low Density Residential"	R-2, Single-Family Low Density
West	Single-Family Residential	"Low Density Residential"	R-2, Single-Family Low Density

In 2022, all on-site structures were demolished and there are no existing buildings on-site. On May 4, 2023, the applicant submitted an application for a zoning map amendment for the subject property seeking to go from PRD, Planned Residential Development, to the R-2, Single-Family Low Density zoning designation. The applicant indicated that if the issuance of a development order application was unable to gain approval, the intent was to seek the original zoning designation of R-2, Single-Family Low Density and develop under those zoning district standards.

SECTION 3, PROJECT PROCESS:

The zoning map amendment to designate the Tomoka Reserve land area to the Planned Residential Development zoning category occurred in 2006. The 2006 development order has expired and the subject property does not have a standard zoning designation or an active development order. The purpose of the application is to provide a zoning designation through the issuance of a development order that details what is allowed on the property. Since the previous golf course use has been vacant for longer than six (6) months, the property does not have any allowed zoning uses. If the development order is denied, the applicant has indicated that they would pursue a zoning map amendment back to the original zoning designation of R-2, Single-Family Low Density.

Below are the steps for development within a Planned Residential Development:

A. Planned Residential Development (PRD) Development Order: This process requires the applicant to provide a holding capacity analysis, flood zone information, proposed lot layout, recreation areas, generalized areas of stormwater, road layouts, and landscaping buffers. **The PRD development order does not require the applicant to provide detailed engineering information regarding the application. The detailed engineering work is not done until the preliminary plat approval process**. The application for a development order is reviewed under criteria within the analysis section and the application can be approved, approved with conditions, or denied based on the evaluation of the criteria.

   Under the City's Land Development Code, the PRD becomes the zoning district of the project site. The zoning designation for this property occurred in 2006, and no development order is associated with the Planned Residential Development. The PRD development order becomes a contract between the developer and the city and identifies the overall development concept, the number and size of lots, and the location of the lots.

   The process for the issuance of the development order is depicted in Exhibit 3 as follows:

EXHIBIT 3: Application process

Reviewing entity/action	Date	Required advertising
Pre-application community meeting	May 20, 2021	Not required
Pre-application community meeting	July 15, 2021	Not required
SPRC submittal	April 13, 2022	SPRC review: May 3, 2022
Neighborhood meeting	February 8, 2023	1. Mail notice, 600' radius. 2. Newspaper advertisement.
SPRC comments (2nd review)	January 19, 2023	SPRC review: February 21, 2023
SPRC comments (3rd review)	April 30, 2023	SPRC review: May 11, 2023
SPRC comments (4th review)	June 7, 2023	SPRC Review: June 28, 2023

Reviewing entity/action	Date	Required advertising
Planning Board	**July 13, 2023**	**1. Mail notice, 300' radius. 2. Newspaper advertisement. 3. Site posting.**
City Commission	To be determined	1. Mail notice, 300' radius. 2. Newspaper advertisement.
If approved, proceed to preliminary plat (see below)	To be determined	To be determined

B. Preliminary Plat: After a PRD development order has been approved, the applicant's engineer performs detailed work regarding stormwater design, utilities, lot grading, and road layout. The preliminary plat requires review and a recommendation from the Planning Board and review/action by the City Commission. There are two (2) options for development once a preliminary plat has been approved:

Option 1 - Proceed with the submittal of construction drawings for completion of the required improvements prior to recording the final plat per Section 4-18(8)(a) of the Land Development Code. When the required off-site and on-site improvements are constructed and inspected, the final plat would be submitted by the applicant to the Site Plan Review Committee (SPRC). The final plat would be acted upon by the Planning Board and City Commission and, if approved, recorded with the Volusia County Clerk of the Court.

Option 2 - Proceed with final plat review and approval process, with the completion of required improvements after recording the plat per Section 4-18(8)(b) of the Land Development Code. With this option, the applicant files surety documents guaranteeing that such improvements will be installed. All guarantees are incorporated in a bonded agreement for the construction of the required improvements in the form acceptable to the City Attorney. The final plat would be recorded and the applicant would then construct the improvements.

C. Final Plat: The final plat is a legal document that is reviewed by an independent City Surveyor and the City's Legal Department to ensure compliance with State Statutes. Under Option 1 above, the Planning Board and City Commission would review and act on the plat after all improvements have been constructed. Under Option 2, above the Planning Board and City Commission would review and act on the final plat with the preliminary plat.

The proposed Tomoka Reserve subdivision is seeking only the PRD development order approval at this time. If the issuance of a development order is approved, detailed engineering plans would need to be reviewed by the Site Plan Review Committee and forwarded to the Planning Board and City Commission for review and action when appropriate.

SECTION 4, PROJECT DESCRIPTION:

The application seeks to allow the issuance of a development order for 276 single-family lots on approximately 147.94 acres under certain conditions and associated subdivision improvements. The attachments detail the subdivision proposal and include a traffic impact analysis (ATTACHMENT 4), environmental information, (ATTACHMENT 5), applicant provided documents (ATTACHMENT 10), and the proposed site plans (ATTACHMENT 11). The project is summarized below:

1. The total project size is 147.94 acres.
2. The subdivision density is proposed at 1.87 units per acre or 276 single-family lots. The "Low Density Residential" land use allows 4.3 units per acre. The holding capacity analysis (ATTACHMENT 10) shows the property could support 887 total units.
3. The project shall be required to obtain a preliminary plat and provide detailed engineering plans with review by the Planning Board and final action by the City Commission prior to the issuance of a site construction permit. Staff would recommend a requirement of a neighborhood meeting for the preliminary plat.
4. The project narrative letter states that the proposed subdivision density of 1.87 units per acre is lower than the existing Tomoka Oaks subdivisions, which have an average density of 2.09 units per acre.
5. The subdivision phasing is proposed to be developed with the construction plans and may be modified with the review and approval of the Site Plan Review Committee.
6. The subdivision plan indicates the maximum number of lots to be 276. Within the subdivision process, the project can increase the lot widths from the site plan shown on PD2 (ATTACHMENT 11), but cannot reduce the lot size below the sizes shown.
7. The project is proposed to have a gated access point for vehicles and to allow pedestrian access into the subdivision. Private, gated subdivisions are required to provide easements to the city through the platting process for access and maintenance of the project utilities. The streets, sidewalks, and stormwater system would be privately owned and maintained by the Tomoka Reserve Homeowner's Association.
8. There have been inquiries as to whether the Live Local Act would be applicable to the subject property. The Tomoka Reserve project with a "Low Density Residential" land use would not qualify for the Live Local Act. The Live Local Act states: A municipality must authorize multifamily and mixed-use residential as allowable uses in any area zoned for commercial, industrial, or mixed use if at least 40 percent of the residential units in a proposed multifamily rental development are, for a period of at least 30 years, affordable as defined in Florida Statutes 420.0004.
9. The project proposes 16 model homes within the subdivision. Model homes are allowed to be started after a stabilized road is constructed and water and sewer clearances have been obtained which may be before final subdivision acceptance by the Site Plan Review Committee. No certificate of occupancies would be released until after all subdivision improvements are completed.

10. An emergency access connection point is shown on the site plan (ATTACHMENT 11) and is designed for emergency access only. The area would have a stabilized base and a grass surface. Construction details of the emergency access connection point would occur during the preliminary plat process.
11. Sheet PD2 (ATTACHMENT 11) shows the following lot sizes:

EXHIBIT 4: Proposed lot sizes

Lot Width	Lot Depth	Lot square footage	Number of Lots	Location within subdivision	Lot Percentage of 276 total
50’	150’	7,500	34	Interior of subdivision	12.3%
60’	120’	7,200	87	Interior of subdivision	31.5%
80’	120’	9,600	10	Perimeter, not abutting existing Tomoka Oaks lots.	3.6%
80’	125’	10,000	145	Perimeter, generally abutting existing Tomoka Oaks lots.	52.6%

Additional discussion on the lot size is included in section 6 of this report.

12. The applicant is seeking reduced setbacks across the different lot types. An analysis of the proposed and recommended setbacks is included in Section 6 of this report.
13. School concurrency for the zoning action is provided in ATTACHMENT 6. Additional school concurrency would be required for the plat (detailed construction plans).
14. There are no wetlands on the property.
15. The property lies within Flood Zone X (area of minimal flood hazard).
16. ATTACHMENT 5 contains a summary of an environmental assessment performed by Ayden Environmental, LLC and approved by the Florida Department of Environmental Protection. The summary letter from Ayden Environmental, LLC states: “All work will be completed in accordance with Chapter 62-780 of the Florida Administrative Code, which is Florida’s regulatory framework for environmental cleanup.”
17. The project proposes a fifty-foot vegetation buffer around the exterior of the property abutting the existing Tomoka Oaks subdivision. This area is approximately 3.3 miles in length. The applicant has provided a “Buffer Planting & Maintenance Plan” for the fifty-foot buffer (see ATTACHMENT 10). Additional discussion on the planting plan is provided in section 6 of this report.
18. The project narrative letter states that 16 historic trees within the property will be saved.
19. The site plan shows areas for stormwater. The project seeks to use a low-impact development technique of berming around existing areas (keeping existing

vegetation) to create stormwater retention areas. While the stormwater final design is part of the construction plans, the project team has indicated that the stormwater will exceed state and local stormwater regulations.

20. The site plans indicate a five (5') foot sidewalk on both sides of the internal subdivision streets. The project also proposes a sidewalk outside of the property along Tomoka Oaks Boulevard to connect with Nova Road, which is not a required sidewalk. There has been several correspondence seeking to require the installation of sidewalks on both sides of Tomoka Oaks Boulevard.
21. Throughout the site plan process, the applicant has indicated a willingness to connect the proposed Tomoka Reserve subdivision, via a sidewalk, to existing areas of the Tomoka Oaks subdivision. Any pedestrian connection would need the approval of the property owner(s) of the individual Tomoka Oaks subdivision lots.
22. The project has provided multiple areas for outdoor recreation. The amenities are proposed to be detailed in the construction drawings (preliminary plat). Some recreation areas provide access to the stormwater area for maintenance purposes.
23. The Planned Residential Development requirements include a provision for 20% of the property to be dedicated for natural preservation. The project is required to provide 29.6 acres and shows 34 acres dedicated to natural preservation.
24. Subdivision architectural requirements are provided in ATTACHMENT 11, sheet PD8.
25. A traffic impact analysis was performed and is included in ATTACHMENT 4. Additional discussion is included in section 6 of this report.
26. The traffic analysis determined a traffic signal was warranted at Nova Road and Tomoka Oaks Boulevard. The project traffic engineer has provided the Florida Department of Transportation a Traffic Warrant Analysis Study and correspondence has indicated verbal approval of a traffic signal.
27. The diamond intersection at St. Andrews Drive and Tomoka Oaks Boulevard has been the source of much discussion. Throughout the site plan process, there have been many concerns regarding the existing configuration and the Tomoka Reserve proposed project trips to the intersection. The traffic analysis determined that the intersection would operate at an acceptable level of service after the build out of the Tomoka Reserve subdivision and has not recommended any modifications. Additional discussion is included in section 6 of this report.
28. The project is proposing two re-use irrigation ponds for landscape irrigation. These ponds would be supplemented with a well as needed.
29. The project would be required to provide water and sewer connections. Water lines would be looped to improve water pressure for Tomoka Oaks and Tomoka Reserve subdivisions.
30. The development order expiration would be five (5) years from the date of City Commission approval. If the development order were to expire, a zoning map amendment would need to occur to ensure the property had a city zoning designation.

SECTION 5, RESIDENTIAL PERMITTING:

Exhibit 5 details the residential permitting within Ormond Beach. In order to construct a single-family home, the lot must be platted. Exhibit 5 shows a decrease in the number of platted lots each decade as the city has been built out. The city has annexed the Plantation Oaks Planned Residential Development, which will lead to the ability to plat and construct residential units. The city has also seen applications that are utilizing commercially zoned properties for multi-family uses (Tymber Creek Apartments, Regal multi-family, and Ormond Enclave).

Notes:
(1) Population estimates from University of Florida Business of Economic and Business Research. 1980, 1990, 2000, 2010 in **bold** are from the U.S. Census.
(2) SFH lots plat are taken from the Volusia County Clerk of Court website, http://app02.clerk.org/or_plats/
(3) Single-Family, multi-family, manufactured and mobile home permits from the Ormond Beach Building Department.
(4) 2023 permitting information from January 1, 2023 to July 1, 2023.

SECTION 6, ANALYSIS:

The application has several key issues which are discussed below. The applicant and the Site Plan Review Committee have been unable to reach a consensus on several issues. These issues are policy issues that need a recommendation from the Planning Board and final action from the City Commission. The report is formatted to provide options where available to assist in the formulation of the policy direction. Alternative options can also be created through the public hearing process.

Key issue 1: development ability of the former golf course: The subject property was platted in 1961 as the Sam Snead Golf and Country Club. A key question is whether there is an ability to develop the property as a use other than a golf course. The city designated land use is "Low Density Residential" and the zoning is Planned Residential Development. The existing land use allows several uses, including a golf course and single-family homes.

Questions regarding private covenants and restrictions have been raised throughout the process. In 2006, with the original Planned Residential Development, there were no private covenants and restrictions that prevented the 122 residential units from being approved. The 2006 development order required that covenants and restrictions be placed on the subject property for the golf course use in order to build the 122 residential units. The project was never built and the property owner at the time did not restrict the use of the subject property for a golf course use only.

Included in ATTACHMENT 9 are three documents: (1) June 2022 document prepared by resident Ms. Davis, (2) June 30, 2022 analysis from the City Attorney's office, and (3) February 23, 2023 analysis from Matthew Welch, Cobb Cole and a title insurance document. The documents examine if there is a private covenant and restriction or another legal document that restricts the use of the subject property to a golf course. The City Attorney's Office concluded:

> "In summary, the records confirm the existence of a document recorded in the public records that provided the property be used for purposes of a golf course in perpetuity. In this case, the document was not contained covenants and restrictions provided by a homeowners' association, but rather in a warranty deed, and as stated previously, subsequent records confirm the reverter clause containing the language was properly released by a recorded corporate resolution and release, and therefore no longer valid."

The city's land use classification does not prevent the development of the property for single-family uses or other uses within the "Low Density Residential" land use. The zoning needs either (1) an active development order or (2) a zoning map amendment back to the R-2, Single-Family Low Density zoning designation. City staff are not aware of any private document that requires the subject property to be utilized as a golf course only.

Key issue 2: lot size/density/compatibility: The applicant is proposing lots with varying lot widths of 80' (abutting existing Tomoka Oaks lots), 60', and 50'. The proposed density is 1.87 units per acre. The narrative letter (ATTACHMENT 10) analyzed the density of the existing Tomoka Oaks subdivision at 2.09 units per acre. In reviewing the Tomoka Oaks subdivision, the individual subdivisions were platted in the 1960s and 1970s and did not include common open space, recreational areas, or stormwater management systems which were not required at the time of platting. The Tomoka Reserve site plans show 78.28 acres or 53% of the site dedicated to landscape buffers, open space, stormwater, and recreational areas to support the subdivision. The project has clustered the lots in order to provide landscape buffers, open space, stormwater, and recreational areas.

Planned Residential Developments typically use the existing zoning district as a basis for allowed uses and dimensional standards. This property had a zoning map amendment in 2006 from the R-2, Single-Family Low Density zoning designation to PRD, Planned Residential Development. Based on the previous zoning designation and the surrounding properties also being zoned R-2, Single-Family Low Density, this zoning district is being used as the basis for the review of the Tomoka Reserve project. The Planned Residential Development allows the ability to request alternative lot sizes or more intensive uses in a development order. Section 2-35(b) of the Land Development Code states: "More intense uses (e.g., townhouses in a single-family district, or apartments in a townhouse district) may be allowed, provided that their visual and functional impact on neighboring districts is minimized by providing adequate buffering and screening, and all the requirements of this section are met." The allowance is discretionary with the term "may" used in the standard and requires adequate buffering and screening.

Planned Residential Developments (Marshside, Pineland, Creekside) in the West Ormond Beach area previously sought lower lot dimensions than the SR, Suburban Residential zoning district minimum of 80'. The applications for smaller lot sizes were either denied or amended to the 80' lot width minimums. Staff sees similarities between the Tomoka Reserve and the Planned Residential Developments of West Ormond Beach. Throughout the application process, concerns have been raised about the lot sizes and the compatibility of the Tomoka Reserve application. The Planning Board has the following options for a recommendation on the project lot sizes:

Option 1: Approve the submitted site plan with 80', 60', and 50' lots.

Option 2: Deny the submitted site plan in its entirety (require 100' lots throughout the project).

Option 3: Approve the submitted site plan with the condition that all lots on the project perimeter with the Tomoka Oaks subdivision be 100' in lot width and at least 10,000 square feet in lot area.

Option 4: Approve an alternative site plan layout specifying the required lot width and overall size.

Staff is recommending option 3 with the project perimeter abutting the Tomoka Oaks subdivision be 100’ in lot width and at least 10,000 square feet in lot area. Option 2 may lead the applicant to seek a zoning map amendment to the R-2, Single-Family Low-Density zoning designation. Staff concerns are that development within the R-2 zoning designation does not include the 50’ buffer (6’ landscape buffer is required) and the potential loss of additional natural areas and outdoor recreational areas. Review under the R-2 zoning district would require compliance with the Land Development Code requirements with no additional public benefits.

Key issue 3: Planting of the 50’ natural buffer: As part of the site design, a 50-foot buffer around the perimeter totaling approximately 3.3 miles is proposed. The buffer was designed to provide a natural area for both Tomoka Oaks and Tomoka Reserve lots. All existing natural vegetation will remain and areas with no vegetation would be planted. A key point of the project application has been the planting of the areas that do not have existing natural vegetation. Site Plan Review Committee staff have recommended a type 6 buffer planting plan that requires seven (7) trees, 70 shrubs & 70 ground covers per 100' linear feet.

The applicant has created a Tomoka Reserve Planting and Maintenance Plan, dated June 9, 2023 (ATTACHMENT 10). Sheet L-101 demonstrates the planting plan proposed by the applicant and includes seven (7) trees and 30 shrubs and grasses per 100 linear feet. The plantings are proposed in a 20’ area of the 50’ buffer. The Planting and Maintenance Plan (page 3) calls for watering of the buffer with a large water tank on a truck with no plans for a permanent irrigation system.

The Planning Board has the following options for a recommendation on the planting of the 50’ natural buffer:

Option 5: Approval of the Tomoka Reserve Planting and Maintenance Plan, dated June 9, 2023.

Option 6: Requirement of a type 6 buffer planting plan that requires seven (7) trees, 70 shrubs & 70 ground covers per 100' linear feet.

The Site Plan Review Committee recommends option 6 based on the following points:

A. The landscape buffering requirements of the city have worked well to create buffers between uses. There are many examples of how buffers have grown in and what they will look like over time.
B. The amount of material needs to be as voluminous as possible to create buffers where no buffer exists today. Reducing plant material will reduce the overall effectiveness of the buffer.
C. Staff strongly objects to the use of non-permanent irrigation and believes that this would set into motion a source of constant issues along a 3.3-mile buffer. Staff believes hand watering would also create unnecessary obligations to a future HOA and potentially defer the cost of an irrigation system to future property owners. Section 3-05(e) of the Land Development Code requires an irrigation system.
D. The planting plan as shown in Sheet L-101 shows the trees planted in a 15-foot separation in a tight 20’ linear area. The seven (7) trees need to be staggered to allow the proper area to grow, as recommended by the city’s Landscape Architect.

E. It is important to note tree mitigation (if applicable) would drive the density of the buffers and tree caliper sizes.

F. The number of deciduous (trees that drop their leaves in the winter) trees should be limited.

Key issue 4: Setback plan: ATTACHMENT 8 contains the applicant's requested setbacks, staff recommendations, and the dimensional standards of the R-2, Single-Family Low Density zoning district. Key decision points include the following:

A. *Lot width of the lot type custom house:*

Option 7: Applicant request: Approve lots that are 80' in width.

Option 8: Staff recommendation: Require lots that are 100' in width.

Staff recommends 100' lot widths on the perimeter of the Tomoka Reserve perimeter abutting the existing Tomoka Oaks lots.

B. *Maximum building coverage:*

Option 9: Applicant request: 65% (Village House – 50' wide lots), 50% (Park House – 60' wide lots), 54% (Estate House – 80' wide lots), 52% (Custom House – 80' wide lots).

Option 10: Staff recommendation: 50% across all housing types.

Option 11: R-2 zoning: The R-2 zoning district allows 35% building coverage. One option is to adopt the building coverage allowed in the zoning district.

It is understood that there is an emerging building trend to allow larger houses on smaller lots. The application did not amend the overall impervious coverage. Staff is supportive of a 50% building coverage for all lot types.

C. *Minimum Primary Structure setbacks:*

Option 12: Applicant request:

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50'	15'	15'	7.5'	10'
Park House	60'	15'	15'	7.5'	10'
Estate House	80'	15'	15'	7.5'	10'
Custom House	80'	15'	15'	8'	10'

Option 13: Staff recommendation:

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50'	20'	20'	7.5'	15'
Park House	60'	25'	20'	7.5'	15'
Estate House	80'	25'	20'	8'/20'	20'
Custom House	80'	25'	20'	8'/20'	20'
R-2 setback	100'	30'	25'	8'/20'	20'

Option 14: R-2 zoning: This option would require a front yard setback of 30', rear yard setback of 25', side yards setbacks of a minimum of 8' to total 20' between both setbacks, and a side corner setback of 20'.

Staff believes that option 13 provides a balance between the applicant's request and the R-2 zoning district standards.

D. *Minimum Front Porch setbacks:*

Option 15: Applicant request:

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50’	10’	15’	7.5’	Not provided
Park House	60’	10’	15’	7.5’	Not provided
Estate House	80’	10’	15’	7.5’	Not provided
Custom House	80’	10’	15’	7.5’	Not provided

Option 16: Staff recommendation:

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50’	12’	20’	7.5’	15’
Park House	60’	15’	20’	7.5’	15’
Estate House	80’	15’	20’	8’/20’	20’
Custom House	80’	15’	20’	8’/20’	20’
R-2 setback	100’	30’	25’	8’/20’	20’

Option 17: R-2 zoning: This option would require a front yard setback of 30’, rear yard setback of 25’, side yards setbacks of a minimum of 8’ to total 20’ between both setbacks, and a side corner setback of 20’.

Staff recommends option 16 that allows the unenclosed porch to be in front of the principal building. Unenclosed porches are hard roofed structures with no screens or walls (other than the connection to the house). Reduced porch setbacks were used in Chelsea Place and have been positively received.

E. *Minimum Garage setbacks:*

Option 18: Applicant request:

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50’	25’	15’	7.5’	Not provided
Park House	60’	25’	15’	7.5’	Not provided
Estate House	80’	25’	15’	7.5’	Not provided
Custom House	80’	25’	15’	7.5’	Not provided

Option 19: Staff recommendation:

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50’	20’	20’	7.5’	15’
Park House	60’	25’	20’	7.5’	15’
Estate House	80’	25’	20’	8’/20’	20’
Custom House	80’	25’	20’	8’/20’	20’
R-2 setback	100’	30’	25’	8’/20’	20’

Option 20: R-2 zoning: This option would require a front yard setback of 30’, rear yard setback of 25’, side yards setbacks of a minimum of 8’ to total 20’ between both setbacks, and a side corner setback of 20’.

Staff recommends option 19 that follows the principal building setbacks.

F. *Notes:*

Option 21: Applicant request: Sheet PD7 includes three (3) notes:

Note 1: The maximum building height shall be measured from the average of the existing grade at the four out most corners of the building.

Note 2: The minimum front yard setback to the primary structure defined as load bearing air conditioned space.

Note 3: Garages can be front loaded or side loaded. Side loaded garages may have a minimum front setback of 15'.

Option 22: Staff recommendation: Delete the notes. Notes 1 and 2 are contained in the Land Development Code. Staff is not supportive of a 15' front yard garage setback.

Key issue 5: Sheet PD6 note on lot separation: Sheet PD6, included in ATTACHMENT 11, includes a note with the lot separation table and staff recommends that this note be amended.

Option 23: Applicant request: Note on plan sheet PD6 states: "The lot separation width shown on this sheet may be subject to change at the time of permitting. The represented distances are from existing residential lots in Tomoka Oaks neighborhood and proposed lots within Tomoka Reserve."

Option 24: Staff recommendation: Amend note to state: The 50' buffer abutting the Tomoka Oaks existing residential lots and areas called out as natural preservation shall not be modified and shall always be vegetative areas.

It is important that the development order be clear that both the 50' buffer and areas show as natural preservation shall remain and cannot be modified.

Key issue 6: Traffic review, including St. Andrews Drive and Tomoka Oaks Boulevard diamond:

ATTACHMENT 4 includes (1) Traffic Impact Analysis, (2) Response to comments, dated June 7, 2023, and (3) a technical memorandum, dated June 7, 2023. The technical memorandum is designed to summarize the traffic analysis for the project. Traffic impact analysis focus on the impacts of traffic to intersections and roadways. Where intersections and roadway segments fail as a result of project trips, state law allows the project to pay its proportionate fair share to mitigate the project impacts. The project traffic analysis seeks to review and determine if a project diminishes the adopted level of services below the level of services adopted in the city's Comprehensive Plan. An independent traffic engineer, employed by the city, has reviewed and provided comments on the traffic impact analysis. The traffic analysis went above the city requirements and analyzed the local road traffic impact of the proposed development based upon citizens' concerns and questions.

Key aspects of the study include the following:

A. Traffic counts were performed in March of 2023 to update the original traffic analysis.

B. The technical memorandum states, “Due to the proposed location of the project’s access, peak hour data and transportation model results, it is anticipated that 96% of the project trips will utilize Tomoka Oaks Boulevard and 4% will use Iroquois Trail for external access. 4% of traffic (111 total daily, 8 total AM and 11 total PM) are expected to use this route to access SR 40.”

C. The traffic analysis has identified the need for a traffic signal at Nova Road and Tomoka Oaks Boulevard (see Table 10 of the TIA). The traffic analysis states a Traffic Warrant Analysis Study was conducted and submitted to the Florida Department of Transportation. The response to comments states that the Florida Department of Transportation has verbally accepted the traffic signal as a treatment option for the intersection level of service.

D. Table 10 of the Traffic Impact Analysis details the Level of Service for the unsignalized intersections, including the local intersections along Tomoka Oaks Boulevard, St. Andrews Drive, Rio Pinar Trail, and Iroquois Trail. All intersections operate at a Level of Service of “A” or “B” where the adopted Level of Service is “D”. Again, the analysis does not state that there will not be traffic. The analysis shows that the proposed traffic is within the Level of Service standards adopted by the city with the Comprehensive Plan.

E. St. Andrews Drive and Tomoka Oaks Boulevard diamond. The Traffic Impact Analysis (pages 17 & 18 of the TIA) provides a detailed analysis of the existing diamond intersection. The analysis concludes that the existing configuration is expected to operate within the adopted Level of Service and no improvements are proposed. There have been no crashes around the diamond within the last three (3) years. The diamond intersection is awkward, and in staff’s opinion, confusing and potentially dangerous as additional trips are added.

   Staff recommends (***Option 25***) that the diamond intersection be required to be reconfigured at the construction (preliminary plat) phase of the development. It is believed that the intersection would become substantially more used and lead to conflicts with the existing configuration with the development of the Tomoka Reserve project. Staff’s opinion is that the applicant should bear some responsibility for the correction of this intersection. A final design could occur with the construction drawings and may include some use of local road impact fee credits.

F. The response comments provided a draft proportionate share calculation.

G. In comments received from residents, there has been a desire to see sidewalks on both sides of Tomoka Oaks Boulevard (***Option 26***). The applicant has proposed sidewalks on one side of Tomoka Oaks Boulevard.

It is understood that traffic is a key part of the subdivision. From a technical perspective, the applicant has demonstrated compliance with the city’s Comprehensive Plan and state law regarding traffic concurrency. The analysis resulted in a traffic signal being required. Staff would also recommend conditioning any approval on (1) reconfiguration of the St. Andrews Drive and Tomoka Oaks Boulevard diamond and (2) requiring sidewalks on both sides of Tomoka Oaks Boulevard.

Key issue 7: Recreational areas: Section 2-35(h) of the Land Development Code details the recreational requirements for a Planned Residential Development. The Land Development Code allows a process to provide additional outdoor recreational area in lieu of indoor recreation which has been allowed for the Tattersall and RidgeHaven residential projects. The Land Development Code requirement is 24,840 square feet of recreational area and the project has provided 140,000 square feet of recreational area throughout the subject property. The final details of the recreational amenities would be required with the construction drawings. The site plans show a multi-purpose field, pickle-ball courts, playgrounds, pavilions, an outdoor exercise area, and picnic tables. Staff recommends (***Option 27***) approval of the proposed subdivision areas with final details to occur with the preliminary plat.

Key issue 8: Environmental: The Tomoka Oaks Golf & Country Club included an 18-hole golf course, clubhouse, cart barn, and maintenance barn. Ayden Environmental was hired by the applicant to provide an environmental assessment of the golf course and to develop a remedial plan to address the conversion of the golf course to residential uses. Ayden Environmental has provided a summary that is included in ATTACHMENT 5. Key summary points are as follows:

A. Ayden Environmental submitted site assessment reports and a Soils Management Plan to the Florida Department of Environmental Protection.

B. All work will be managed by Ayden Environmental with Florida Department of Environmental Protection oversight. All work will be completed in accordance with Chapter 62-780 of the Florida Administrative Code.

C. The Florida Department of Environmental Protection approved the site assessment reports and Soils Management Plan in a letter dated November 16, 2022.

D. In the ATTACHMENT 5 cover sheet, a link is provided to the Florida Department of Environmental Protection website page for the project's submittals and reviews.

SECTION 7, INPUT RECEIVED:

The project team performed two (2) neighborhood meetings prior to the submittal of the project on May 20, 2021 and July 15, 2021. The applicant summarized "mentions" in these meetings that included traffic, density, lot size, cookie cutter homes, tree removal, and a large buffer. A neighborhood meeting was held on February 8, 2023 with a summary included in ATTACHMENT 7. Written correspondence has been received for this project and is included in ATTACHMENT 3.

Key concepts, ideas, and thoughts include:

A. Proposed development is not compatible with the existing Tomoka Oaks, including the smaller lot sizes. TMH Consulting, Inc. provided an analysis of development compatibility.

B. Property values will be diminished with the loss of the golf course land area. The development would alter the character of the Tomoka Oaks subdivisions.

C. Loss of quality of life.

D. The golf course was designed as part of Tomoka Oaks and should be used in perpetuity as a golf and country club, golf course, and related uses.
E. Concerns with the existing configuration of the diamond intersection at St. Andrews Drive and Tomoka Oaks Boulevard and no proposed improvements.
F. Potential backups along Tomoka Oaks Boulevard impacting the Escondido condominiums.
G. Construction traffic will have a negative impact on existing residents.
H. Project traffic using the Trails subdivisions (Iroquois Trail and Rio Pinar Trail).
I. Design concerns with 50-foot wide lots.
J. Only one sidewalk proposed on Tomoka Oaks Boulevard – should be on both sides of the street.
K. The timing of the traffic light should be in place before the development project on the golf course starts. TMH Consulting, Inc. states: "The applicant should be required to submit the application to FDOT for installation of the signal concurrent with the first application for subdivision design and prohibit the issuance of any residential building permits until the signal is approved and installation initiated."
L. Concerns over stormwater.
M. Concerns over Tomoka Reserve HOA and the ability to manage common areas, including the 50' buffer.
N. On PD6 (ATTACHMENT 11), buffer widths should not be able to be modified.
O. Impacts on wildlife that exist on the golf course property.

Written correspondence received is included in ATTACHMENT 3. Correspondence related to each Site Plan Review Committee review is available at https://www.ormondbeach.org/1013/Tomoka-Reserve. Any additional correspondence received after publication of the staff report would be provided to the Planning Board by e-mail with a hard copy provided at the Planning Board meeting.

SECTION 8, CRITERIA FOR REVIEW:

The following are the review criteria for Planned Residential Developments from the Land Development Code:

Planned Residential Development Criteria

Section 2-35, Chapter 2, Article II of the Land Development Code details the requirements of a Planned Residential Development:

1. Section 2-35(d)(3) of the Land Development Code states: "All structures shall be set back a minimum of forty feet (40') from the project's perimeter boundaries unless natural or manmade features, such as lakes, creeks, wooded or conservation areas are present. Where a project abuts a collector or arterial street, the setback requirement may be increased if an effective buffering treatment cannot be provided between the street and residential use."

   The project has established a 50' vegetative buffer around the entire perimeter of the property and meets this requirement.

2. Section 2-35(h)(3) of the Land Development Code states, "Thirty (30) square feet of indoor recreation floor area, including exercise rooms, all-purpose space, dining areas and similar uses shall be provided for each dwelling unit, unless waived by the City Commission and replaced at a minimum as provided below:
   a. Subdivisions of 200 dwelling units or less may provide, at a minimum, an additional 30 square feet per unit of outdoor active recreation space in compliance with this Section in lieu of the indoor recreation floor area requirement.
   b. Subdivisions that do not provide indoor recreational facilities are not eligible for park and recreation impact fee credits.
   c. The open space and/or additional outdoor facilities must be compatible with adjacent properties and the recreational facilities must be consistent with the needs of the project.
   d. The Development Review Board and City Commission determine, after reviewing the proposed development plan, that the preservation of natural resources and/or provision of additional recreation facilities is appropriate and that indoor recreational facilities can be waived."

   The applicant is providing additional square footage as outdoor recreation as permitted under Subsection 3a (above) in lieu of the indoor recreation requirement. The conversion of required indoor recreation to outdoor recreation has been permitted in other Planned Residential Developments such as Creekside, Southern Pines, Pineland, Tattersall, and RidgeHaven.

3. Section 2-35(h)(4) of the Land Development Code states, "Sixty (60) square feet of outdoor active recreation space (exclusive of parking, landscaping, retention/detention ponds and other site features), including pools, pool decks, shuffleboard courts, tennis courts, and fishing piers and similar uses, shall be provided for each dwelling unit. Impact fee credits for any specific outdoor recreation site shall be limited to three hundred (300) dwelling units."

   The project is required to provide a total of 16,560 square feet of outdoor recreation area. The additional 30 square feet of outdoor recreation area in lieu of the indoor recreation (8,280 square feet), requiring a total of 24,840 square feet of outdoor recreation area. The project is proposing 9.06 acres (394,653 square feet) of recreational area throughout the project. The recreational amenities shown are a multi-purpose field, pickle-ball courts, playgrounds, pavilions, an outdoor exercise area, and picnic tables with the final design occurring at the preliminary plat.

4. Section 2-35(h)(7) of the Land Development Code states, "Thirty (30) square feet of common accessible, open space shall be provided for each dwelling unit.
   a. Common open space shall be available to all the residents of the development. At the option of the developer, subject to the approval of the City Commission, common open space may be dedicated to the use of the general public.
   b. Common open space must be adequately landscaped and irrigated.
   c. Natural features worthy of preservation shall be left in a natural state.

d. Waterbodies may be utilized to meet twenty-five percent (25%) of the available open space requirement, provided significant recreational use of the waterbody can be demonstrated. Water retention and wetlands areas may not be included in this calculation."

The project is required to provide 8,280 square feet of common space. The applicant has provided the common open space throughout the project.

5. Section 2-35(h)(8) of the Land Development Code states: "Twenty percent (20%) of the project shall be left in a natural state. This may include designated conservation areas within lots or common areas, but shall not include classified wetlands and required upland buffers."

   The project is proposing that 34 acres of the site remain in a natural state where the Land Development Code requirement is 29.6 acres. The project proposes a natural buffer around the boundary of the site.

6. Other Uses. Section 2-35(b)(2) of the Land Development Code allows other uses within planned residential developments.

   The only use proposed is single-family residential. No other uses are proposed.

Section 2-35(j)(4) of the Land Development Code states, "In considering an application for a PRD, the planning board may recommend approval, approval with conditions, or disapproval and the city commission may base its conditions of approval or denial of the issuance of a development order on the extent to which the development offers site amenities above that normally found for permitted uses in the district with regard to the following:"

a) Innovative Site Design

In ATTACHMENT 10, the applicant states: "In designing the proposed redevelopment plan, the Applicant took great measures to ensure the project would complement the surrounding area and integrate with the surrounding residential neighborhood." The proposed application provides additional site amenities above and beyond what a standard subdivision would provide, including open space, recreational facilities, architectural and landscape design for the lots. The project proposes an off-site sidewalk along Tomoka Oaks Boulevard to Nova Road.

In review by the Site Plan Review Committee, there have been comments regarding the perimeter lot size, buffer plantings, and setbacks. The use of the buffer to provide a natural area is an innovative site design. However, the planting material and long-term maintenance are critical to the buffer's long-term viability. The issue regarding the lot size has been discussed repeatedly, including at the pre-application meeting, neighborhood meeting, and Site Plan Review Committee meetings. Staff's recommendation is for 100' wide lot size along the Tomoka Reserve perimeter.

b) Coordinated Architectural Design

The Tomoka Reserve project shall have an Architectural Control Committee tasked with enforcing the architectural design guidelines detailed in the plan set (see ATTACHMENT 11).

c) Open Space, Recreation, Common Areas

The project has exceeded the space required for open space, recreation, and common areas. The project has preserved 23% of the project land area. As discussed under the Planned Residential Development section, the applicant is providing a recreation area and common open space. The total area for open space, recreation, and stormwater is 78.28 acres or 53% of the overall property.

d) Coordinated Streetscape Elements

The site plan shows the subdivision entry feature (PD4 – ATTACHMENT 11). The project would be required to provide streetscape elements such as street tree plantings.

The project has a unique site design with natural preservation and recreation areas. The key issues in the review of the project's design revolve around the lot sizes, buffer planting, and setbacks. Throughout public meetings, it has been stated that the proposed lot dimensions are not consistent with the existing developed subdivision. One key decision for the Planning Board is to determine if the interior lot widths proposed at 50' and 60' wide are appropriate.

Section 1-15(e) of the Land Development Code states: "In its review of any application requiring a development order, planned developments, special exceptions and LDC amendment applications, the board shall consider:"

1. **The proposed development conforms to the standards and requirements of this Code and will not create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare, or quality of life.**

   The applicant has provided the required information in terms of lot sizes and layout, street locations, buffer requirements, traffic impacts, stormwater planning, and Planned Residential Development requirements. Please note that site-specific information (stormwater, lighting details, and landscaping details) shall be provided with preliminary and final plat applications. The application exceeds the requirements of site buffering, recreational amenities, and common space.

   Section 2-35(b) of the Land Development Code states: "More intense uses (e.g., townhouses in a single-family district, or apartments in a townhouse district) may be allowed, provided that their visual and functional impact on neighboring districts is minimized by providing adequate buffering and screening, and all the requirements of this section are met." The conclusion of the Site Plan Review Committee was that modifications to the application are needed (lot size, buffer material, traffic mitigation, and revised setbacks) to recommend approval of the proposed site plan. Staff does not believe that the application submitted is compatible with the existing Tomoka Oaks subdivisions development pattern. Additionally, there are concerns with the buffer planting plan in terms of the quantity of material and long-term maintenance.

2. The proposed development is consistent with the Comprehensive Plan.

The property is designated "Low Density Residential" on the City's Future Land Use Map. The Future Land Use Element of the Comprehensive Plan states:

Low Density Residential (LDR)

Purpose: To protect and encourage the continued development of typical single-family residential areas and stabilize and protect the character of such neighborhoods. Institutional uses may be permitted in accordance with the maximum floor area ratio.

Density: up to 4.3 units per acre

Maximum FAR: 0.2

The following is a list of the Comprehensive Plan Objectives and Policies pertaining to the proposed PRD:

Future Land Use Element

GOAL 1. LAND USE DISTRIBUTION

FUTURE DEVELOPMENT AND REDEVELOPMENT ACTIVITIES SHOULD BE DIRECTED IN APPROPRIATE AREAS AS DEPICTED ON THE FUTURE LAND USE MAP TO MEET THE LAND USE NEEDS OF THE ANTICIPATED POPULATION, IN A MANNER CONSISTENT WITH SOUND PLANNING PRINCIPLES, THE GOALS, OBJECTIVES AND POLICIES CONTAINED HEREIN, AND THE DESIRED COMMUNITY CHARACTER.

THE FUTURE LAND USE ELEMENT SHOULD ALLOW LIMITED COMMERCIAL EXPANSION, PROMOTE INDUSTRIAL USE, AND MAINTAIN CURRENT RESIDENTIAL DENSITIES IN THE CORE AREA WHILE ESTABLISHING LOWER DENSITIES IN THE PERIMETER AREAS, FOCUSING REDEVELOPMENT IN THE DOWNTOWN COMMUNITY REDEVELOPMENT AREA, US1, AND SRA1A, AND PROVIDING OR A CONTINUED HIGH LEVEL OF OPEN SPACE. FUTURE GROWTH SHALL BE TIMED AND LOCATED TO MAXIMIZE EXISTING PUBLIC INFRASTRUCTURE.

OBJECTIVE 1.1. RESIDENTIAL LAND USE

Ensure the availability of adequate lands to meet the residential land use needs of the community.

POLICY 1.1.3.

Preserve the character of existing neighborhoods by not allowing intrusion of land uses that would threaten to alter the neighborhood character and by encouraging voluntary rehabilitation and sound maintenance programs in viable neighborhoods which are capable of self-renewal and establishing code enforcement or public redevelopment activities in areas not capable of self-renewal.

POLICY 1.1.5.

Encourage innovative design measures for new residential developments and ensure that adequate provision is made for neighborhood facilities suitable to the type of development proposed.

POLICY 1.1.6.

Provide the opportunity, through zoning and other land use controls, for the development of a variety of housing types (i.e., single-family, duplex, townhouse, multi-family) in both conventional, planned unit and cluster type developments, that will meet the varied needs of the citizens of Ormond Beach.

POLICY 1.1.14.

Enhance community livability in the central core and older sections of the City by encouraging infill as appropriate, transit-oriented development, and walkable residential areas.

POLICY 2.4.7.

Encourage cluster development which promotes the efficient use of open space and reduces development costs, in areas where services and facilities exist or are planned.

Housing Element

GOAL 1. HOUSING SUPPLY

ENSURE THE AVAILABILITY OF SAFE AND ADEQUATE HOUSING UNITS OF DIFFERENT TYPES, SIZES, AND PRICE RANGES TO MEET THE NEEDS OF ALL CURRENT AND FUTURE RESIDENTS.

OBJECTIVE 1.1. HOUSING SUPPLY

The City shall continue to facilitate the private production of a housing supply, including adequate sites for mobile homes or manufactured housing and low and moderate-income housing, which will meet future community needs and offset housing deficiencies as noted in this Element.

OBJECTIVE 1.2. PROVISION OF ADEQUATE SERVICES AND FACILITIES

Each existing housing development and residential neighborhood along with all new housing development shall meet the existing adopted level of service standards.

POLICY 1.2.1.

The general residential development pattern in the city should be in accord with the community's growth strategy for residential densities, as stipulated within the Future Land Use Element.

The Comprehensive Plan contains policies that can support the proposed project or be used to deny the project. It is important to note that the land use density allows 4.3 units per acre and the proposed density is 1.87 units per acre. The project concern is focused on the Land Development Code zoning regulations regarding lot sizes and setbacks. If there was a desire to deny the application, Policy 1.1.3 of the Future Land Use Element – (Preserve the character of existing neighborhoods by not allowing intrusion of land uses that would threaten to alter the neighborhood character) could

be used. If there is a desire to support the application, Policies 1.1.5 and 1.1.6 of the Future Land Use Element would be applicable.

3. **The proposed development will not adversely impact environmentally sensitive lands or natural resources, including but not limited to waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells.**

   The project has prepared an environmental summary included in ATTACHMENT 5. The property would be subject to environmental remediation from the former golf course that would be monitored by the Florida Department of Environmental Protection. The subject property does not have any on-site wetlands or floodplains. The project is seeking to use reuse water for irrigation. A Biological Assessment and Environmental Site Assessment is provided in ATTACHMENT 10.

4. **The proposed use will not substantially or permanently depreciate the value of surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties.**

   The land use and original zoning designation of R-2, Single-Family Residential provides a variety of allowed uses, including single-family houses (permitted) and a golf course (Special Exception). Supporters of the application would state that the development of the golf course with a new subdivision that provides open space, natural areas, buffers, stormwater management, and recreational area would increase the land's value and abutting property's value. Single-family houses abutting single-family houses should be considered similar uses and would not cause depreciation of surrounding property values. The applicant has stated that the lesser lot sizes are needed to provide the buffering, natural areas, and recreational amenities.

   Individuals seeking denial of the application state that the proposed development (1) takes away open space that was to be used for the existing development and (2) proposes lots that are smaller in width and overall lot size to Tomoka Oaks existing lots. Multiple correspondences received detail that the proposed project is not similar to the existing development patterns of the area.

   The Site Plan Review Committee concludes that the proposed design is not consistent with the lot patterns of the Tomoka Oaks development and could cause nuisances or have visual impacts on adjoining properties. There are site design modifications (lot size, traffic mitigation, buffer planting types, and setbacks) that could lead to support from the Site Plan Review Committee.

5. **There are adequate public facilities to serve the development, including but not limited to roads, sidewalks, bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds.**

   There are adequate public facilities to serve the development. Traffic and sidewalks were discussed earlier in the staff report. The Planning Board would need to review options regarding (1) the diamond at St. Andrews Drive and Tomoka Oaks Boulevard and (2) sidewalks on both sides of Tomoka Oaks Boulevard. Based on traffic study data and analysis, there was a conclusion that impacts on roadways and the

intersection operate at an acceptable level of service at build-out. Based upon state statutes any impacts of the project above the adopted level of services would be required to provide a proportionate fair share agreement. There is adequate water and wastewater capacity to serve the project. Finally, the project was reviewed by the Volusia County School Board and a concurrency certificate is shown in ATTACHMENT 6.

6. **Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe. This finding shall be based on a traffic report where available, prepared by a qualified traffic consultant, engineer, or planner which details the anticipated or projected effect of the project on adjacent roads and the impact on public safety.**

   ATTACHMENT 4 includes a (1) Traffic Impact Analysis, (2) Response to comments, dated 06.07.2023, and (3) a technical memorandum, dated 06.07.2023. The technical memorandum is designed to summarize the traffic analysis for the project. It is important to note that the subject property has a land use that allows residential uses at 4.3 units per acre. Traffic analysis is focused on the impacts of traffic on intersections and roadways. Where intersections and roadway segments fail as a result of project trips, state law allows the project to pay its proportionate fair share to mitigate the project impacts. The analysis seeks to review and determine if a project diminishes the adopted level of services below the level of services adopted in the city's Comprehensive Plan. An independent traffic engineer, employed by the city, has reviewed and provided comments on the traffic impact analysis. The traffic analysis went above the city requirements and analyzed the local road traffic impact of the proposed development.

   Key aspects of the study are summarized in section 6 of this report.

   It is understood that traffic and its impact are a large part of any development. A professional traffic engineer has prepared an analysis of the project impacts that has been reviewed by a professional traffic engineer hired by the city. The analysis shows certain required improvements and a responsibility to pay a proportionate share for project impacts as required by state law. The analysis does not state that there will not be an increase in traffic impacts as the result of the Tomoka Reserve proposed subdivision. The analysis does state that the increased impacts of the Tomoka Reserve subdivision are within the Level of Service standards allowed by the city and payment of proportionate share as allowed by state law.

7. **The proposed development is functional in the use of space and aesthetically acceptable.**

   Natural and landscaped areas are provided around the entire perimeter of the project to provide natural areas. The project is using a low impact development technique of berming around the stormwater area.

8. **The proposed development provides for the safety of occupants and visitors.**

   The overall design indicates safe movement on the site. The proposed road and access layouts would be reviewed during the construction drawings of the preliminary plat.

9. **The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area.**

   The project is required to utilize a Homeowners' Association (HOA), which will institute an Architectural Control Committee to review construction plans within the development. The site plan exhibits outline regulations governing the construction of buildings and landscaping on individual lots, in order to encourage aesthetics and harmony within the development.

10. **The testimony provided at public hearings**.

    The project has not been reviewed at a public hearing and no testimony has been provided. Any testimony at the Planning Board meeting would be provided in the meeting minutes for the City Commission review.

SECTION 9, RECOMMENDATION:

The Planning Board has the following options for a recommendation on the application for the issuance of a development order:

1. Approve the application as submitted;
2. Deny the application as submitted; or
3. Approve with conditions.

Key considerations for deliberation of a recommendation include lot sizes, density, compatibility, planting of the 50' natural buffer, project setbacks, lot separation note (sheet PD6), key traffic issues (diamond intersection at St. Andrews Drive & Tomoka Oaks Boulevard and sidewalks on both sides Tomoka Oaks Boulevard), acceptance of outdoor recreation areas. The traffic impacts of this project have been analyzed and determined to be within the Level of Services adopted by the City Comprehensive Plan, with the provision of a traffic signal at Nova Road and Tomoka Oaks Boulevard.

In reviewing the application, the Planning Board should consider:

1. Application submittal;
2. Staff report and Site Plan Review Committee comments;
3. Written correspondence provided;
4. Criteria of the Land Development Code contained within the staff report; and
5. Testimony provided at the Planning Board public hearing.

It is recommended that the Planning Board recommend **DENIAL** for the issuance of a development order for 276 single-family lots on approximately 147.94 acres under certain conditions and associated subdivision improvements based on criteria 1 and 4 analyzed above.

Specific recommended changes in the site plan from the Site Plan Review Committee would include:

A. Require all lots on the project perimeter with the Tomoka Oaks subdivision to be 100' in lot depth and at least 10,000 square feet in lot area **(Option 3)**.

B. Requirement of a type 6 buffer planting plan that requires seven (7) trees, 70 shrubs & 70 ground covers per 100' lineal feet **(Option 6)**.

C. Setback plan – lot width – 100' in width **(Option 8)**.

D. Setback plan – maximum building coverage – 50% across all housing types **(Option 10)**.

E. Setback plan - minimum primary structure setbacks – **(Option 13)**.

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50'	20'	20'	7.5'	15'
Park House	60'	25'	20'	7.5'	15'
Estate House	80'	25'	20'	8'/20'	20'
Custom House	80'	25'	20'	8'/20'	20'

F. Setback plan - minimum front porch setbacks – **(Option 16)**

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50'	12'	20'	7.5'	15'
Park House	60'	15'	20'	7.5'	15'
Estate House	80'	15'	20'	8'/20'	20'
Custom House	80'	15'	20'	8'/20'	20'

G. Setback plan - minimum front porch setbacks – **(Option 19)**

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50'	20'	20'	7.5'	15'
Park House	60'	25'	20'	7.5'	15'
Estate House	80'	25'	20'	8'/20'	20'
Custom House	80'	25'	20'	8'/20'	20'

H. Setback plan – Notes – Delete the notes. Notes 1 and 2 are contained in the Land Development Code. Staff is not supportive of a 15' front yard garage setback **(Option 22)**.

I. Sheet PD6 note on lot separation - Amend note to state: The 50' buffer abutting the Tomoka Oaks existing residential lots and areas called out as natural preservation shall not be modified and shall always be vegetative areas **(Option 24)**.

J. St. Andrews Drive and Tomoka Oaks Boulevard diamond - that a diamond reconfiguration be required at the construction (preliminary plat) phase of the development **(Option 25)**.

K. Sidewalks on both sides of Tomoka Oaks Boulevard – require sidewalks on both sides of Tomoka Oaks Boulevard **(Option 26)**.

L. The preliminary plat should require the conducting of a neighborhood meeting.

Denial of the application may lead to the movement of the R-2, Single-Family Low Density zoning map amendment to provide the property a zoning designation. If there is a belief that the project has complied with the development order criteria, then the project should be recommended for approval. No City Commission date has been set for the project at this time.

ATTACHMENT 13

Information that was updated based on September 6, 2023 site plan submittal

Section B

Former Attachment 1: outstanding SPRC comments

Project Name: PZ-22-043
Project Description: Tomoka Reserve
Review Comments List Date: 6/27/2023

Ref. # 105, Civil Engineer, David Allen, 2/21/23 11:47 AM, Cycle 2, Unresolved
Markup: Civil-Lot Size, Tomoka Reserve PD Plans 6- typical lot layout.pdf

In the Neighborhood meeting, the width of the lot adjacent to the buffer,(existing lots) was a significant question. The width was more important than the square footage of the lot. Please provide rationale for the proposed lot sizes.

Responded by: Debi LaCroix - 6/7/23 3:30 PM
The Applicant is proposing a minimum lot width of 80 for all lots bordering the perimeter of the Property. The proposed lot width provides for overall lot areas within the same average size of the existing neighborhood, but provides a lot size that is· more applicable to current market conditions, which are equivalent to the minimum lot areas required by the adjacent zoning classification. The deeper lot depth will provide additional open space between the proposed and existing residential area.

Ref. # 145, Civil Engineer, David Allen, 6/21/23 4:08 PM, Cycle 4, Unresolved
Markup: Civil-Phasing Plan, PD2-PD6_21067 ODP PD2 (1).pdf

Is there a phasing plan available for the project? If so, at what stage will the Emergency Access be constructed?

How will the construction of utility connections be staged in the overall project?

Ref. # 147, Civil Engineer, David Allen, 6/26/23 3:27 PM, Cycle 4, Unresolved
Markup: Civil-Lot Width, PD2-PD6_21067 ODP PD2 (1).pdf

Change the word size to width. The size can increase by depth only. The concern is the width of the lots.

Ref. # 148, Civil Engineer, David Allen, 6/26/23 3:27 PM, Cycle 4, Unresolved
Markup: Civil-Pedestrian access, PD2-PD6_21067 ODP PD2 (1).pdf

Add the term "and individual property owners affected. "

Ref. # 149, Civil Engineer, David Allen, 6/26/23 4:56 PM, Cycle 4, Unresolved
Markup: Civil-Revision Emailed 06-26-23, PD1_21067 COV C1 (1).pdf

Note No. 9, Indicates that this will be a gated subdivision. Provide note that the streets will be privately maintained. Provide a note that there will be an access/utility easement placed over the entire roadway parcel dedicated to the City of Ormond Beach.

Technical comments for Preliminary Plat

Ref. # 65, Civil Engineer, David Allen, 1/31/23 4:34 PM, Cycle 2, Unresolved
Markup: Civil-Operating tables, 21067 Tomoka Reserve Storm Package.pdf

How were the discharge rates established for these tables.

Responded by: Debi LaCroix - 6/7/23 3:29 PM
Rates were established based upon geotechnical report. Geotechnical report has been attached with resubmittal. Final design and calculations will be provided during site plan review.
Reviewer

Ref. # 103, Civil Engineer, David Allen, 2/21/23 9:50 AM, Cycle 2, Unresolved
Markup: Civil-=Emergency Access, Autoturn Analysis.pdf

Provide a detail that shows the island and the pavement widths for North St Andrews Drive. Provide the vehicle turn exhibit for this connection as well as the connection within the subdivision.

Responded by: Debi LaCroix - 6/7/23 3:30 PM
Auto turn exhibit has been updated and enlargement provided on sheet vt1
Reviewer Response: David Allen - 5/10/23 2:49 PM
Layout of streets does not match the plan sheets. Provide auto-turn with the plan sheet layout.
TECHNICAL COMMENT

Ref. # 118, Civil Engineer, David Allen, 5/10/23 2:15 PM, Cycle 3, Unresolved
Markup: Civil-Dry Retention, 21067 PD-04-28-23.pdf

Dry retention ponds were indicated as allowing infiltration to meet the time related requirements for stormwater management. The borings for the ponds indicated a layer of oraganics and top soil. How will the ponds function after several rain events have compacted the top layer into an impervious layer at the bottom of the pond.

If the pond bottom is being counted as natural preserrvation, these organics will seal the pond bottom. If the organics are removed then it should not count towards the natural [preservation.

Provide time table of acceptable water stage on the trees within the dry retention.

Responded by: Debi LaCroix - 6/7/23 3:31 PM
As discussed at the SPRC meeting, the Applicant will meet Mr. Allen on site to discuss potential allowable vegetation and maintenance within these areas.

Ref. # 119, Civil Engineer, David Allen, 5/10/23 2:39 PM, Cycle 3, Unresolved
Markup: Civil- Auto Turn, Autoturn Analysis.pdf
This configuration no longer matches the roadway layout for the [project. please provide an update to this figure.
Also provide a detail that demonstrates the emergency vehicle at the emergency access in conjunction with the existing island in N. St Andrews.
Responded by: Debi LaCroix - 6/7/23 3:31 PM
Enlargement has been provided on sheet vt1
Reviewer Response: David Allen - 5/10/23 2:50 PM
TECHNICAL COMMENT

Ref. # 62, Landscape Architect, Cara Culliver, 1/25/23 3:25 PM, Cycle 2, Unresolved
Markup: Buffer Type, Tomoka Reserve PD Plans 5 -Buffer plan.pdf

- Staff is supporting a Type 6 landscape buffer which is consistent with the 50' buffer width & requires 7 trees, 70 shrubs & 70 ground covers per 100' lineal feet.

Responded by: Debi LaCroix - 6/7/23 3:32 PM
Buffer planting and Maintenance Plan has been developed by Don Spence, PhD. It has been included with the submittal.

Ref. # 134, Landscape Architect, Cara Culliver, 6/12/23 5:00 PM, Cycle 4, Unresolved
Markup: High Density Buffer Planting, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf

- A Type 6 buffer which is 50' foot depth requires 7 trees, 70 shrubs & 70 ground covers per 100' lineal feet. The document states 30 shrubs and the planting depth is 20 foot which is inconsistent with Section 3-06(d)(1)(2) of the Land Development Code.

- The elevation & plan view drawings shall be to scale and should show a typical 100 foot length & 50' foot depth planting design. This applies to all of the Typical Buffer Sketches.

- There is no reference to the keyed out plant materials and not able to determine what's being proposed?

- The plan view sketch only shows 5 trees and the requirement is 7 trees per 100 lineal foot. Also, the shrub requirement is 70 and only 30 are shown.

- Spacing trees 15 feet apart doesn't give enough room for growth and you have a 50' foot wide buffer to work within.

- The wildflower areas should be shown in more natural shape.

Ref. # 135, Landscape Architect, Cara Culliver, 6/13/23 10:39 AM, Cycle 4, Unresolved
Markup: Master Buffer Plan, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf

- Need to reference on the master buffer plan where these 3 different typical buffer planting would occur.

- Ultimately, the 3 different planting sketches/specifications will have to be incorporated on 24x36 scaled drawing and included in the ZevCohen landscape plans.

Ref. # 136, Landscape Architect, Cara Culliver, 6/13/23 10:43 AM, Cycle 4, Unresolved
Markup: Tree Mitigation for Specimen & Protected Trees, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf

- Tree mitigation if applicable could drive the density of the buffers and tree caliper sizes. This will have to be worked out with final future detailed drawings.

Ref. # 137, Landscape Architect, Cara Culliver, 6/13/23 10:50 AM, Cycle 4, Unresolved
Markup: Medium Density Buffer & Intact Buffer Plantings Sketches, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf

- The medium and intact buffer sketches would need to be applied to the actual site to determine what needs to be planted back.

- There is a ground cover requirement and no mention of this in the written text for both of these sketches.

Ref. # 138, Landscape Architect, Cara Culliver, 6/13/23 11:01 AM, Cycle 4, Unresolved
Markup: Planting Details, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf
- Please use the City standard planting details.

Ref. # 139, Landscape Architect, Cara Culliver, 6/13/23 11:13 AM, Cycle 4, Unresolved
Markup: Watering Schedule, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf
- Staff is not supportive hand watering for establishment of plant materials/trees. A permanent irrigation system needs to be in place for the establishment of the trees and plant materials as per Section 3-05(e) of the Land Development Code.

- The watering requirement of trees wouldn't be the same as watering requirement for shrubs/ground covers. For example and based on the University of Florida research, 3 gallons of water per caliper inch and establishment rates are based on 3 month per inch of trunk caliper. To establish a 30 (8 gallons of water) or 45 gallon tree (9 gallons of water) at 2.5" caliper would take 8-12 months. You would need to water daily for 1-2 months and every other day for 4 months and weekly until establishment. This is not a efficient way to water a project of this size and there will be limited to no access to this 50 foot buffer when the project is developed. Also, we frequently experience drought which is going to be a factor in keeping this natural buffer alive.

Ref. # 140, Landscape Architect, Cara Culliver, 6/13/23 3:41 PM, Cycle 4, Unresolved
Markup: Intact Buffer, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf
- When 7 existing trees are not present with this buffer type, than Understory trees would be more appropriate than more shade canopy trees.

Ref. # 141, Landscape Architect, Cara Culliver, 6/13/23 3:52 PM, Cycle 4, Unresolved
Markup: Suggested Tree List, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf
- The intent is to provide screening please limit the amount of deciduous trees used in this plant palette.

- This project would have Canopy and Understory trees. Please add a category for native Understory Trees. Might want to call the Medium tree an Understory tree on the sketches.

- I don't think the American Olive, American Hornbeam, Redbud and Sugarberry are available to meet the cities minimum tree size of 10' foot height and 2.5" caliper, please check availability and revise list as necessary.

- The Florida Privet is semi-evergreen and can shed it's leaves in the winter.

Ref. # 142, Landscape Architect, Cara Culliver, 6/14/23 8:37 AM, Cycle 4, Unresolved
Markup: Tree Size & Spacing, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf

- The minimum tree size is 10' foot height and 2.5" caliper per Sec.3-05(d)(2).

- Spacing trees 15 feet apart especially for canopy trees doesn't not provide enough room for growth. You have a 50' buffer depth and greater spacing can be achieved with a staggered spacing.

Ref. # 143, Landscape Architect, Cara Culliver, 6/14/23 9:02 AM, Cycle 4, Unresolved
Markup: Wildflowers, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf

- For the success of the wildflower seeds they are installed a certain way, during the fall season, type of seed mix and what's the application rate. Please provide more detailed specifications.

Ref. # 144, Landscape Architect, Cara Culliver, 6/14/23 9:16 AM, Cycle 4, Unresolved
Markup: Existing Turfgrass, Draft 4 Buffer Planting Maintenance Plan (6-6-23).pdf

- The existing turfgrass will need to be removed for the plantings of the trees and shrubs. The existing grass is going to compete with the establishment of the shrubs and most likely grow over the shrubs and choke them out. This will become a long-term maintenance issue if the grass is left. Once the plant materials are installed a 3" inch mulch layer (suggest using Pine Bark) will retain the soils moisture.

Ref. # 121, Planning Director, Steven Spraker, 5/11/23 8:21 AM, Cycle 3, Unresolved
Markup: Comments After Zoning Approval (For Landscape Architect), PD2-PD6_21067 ODP-PD5B.pdf

- All subdivisions and other developments involving the creation of new streets shall adhere to Section 3-05(c)(15)(18)(19).

- A landscape plans shall be submitted for all the required landscape buffers detailing the tree, shrub/ground cover requirements and how they are being met, street tree plan, main entrance landscape and amenity plans. These plans shall also detail/provide calculations for the minimum tree, tree mitigation & specimen tree requirements. Irrigation plans will also be required and comply with the Volusia County Waterwise Ordinance.

- A tree survey was prepared. Please prepare a tree protection/removal plan superimposed over the proposed improvements, including tree/mitigation calculations.

Reviewer Response: Steven Spraker - 6/27/23 4:59 PM
These documents shall be required with the construction drawings.

Responded by: Debi LaCroix - 6/7/23 3:43 PM
NOTE HAS BEEN ADDED TO ILLUSTRIATIVE SECTION Planting and Maintenance plan has been generated. It is included with the submittal for staff review. Calculations are to be provided at site plan as discussed with staff. Unclear if this is a hold over comment or new comment due to formatting.

Ref. # 122, Planning Director, Steven Spraker, 5/11/23 8:21 AM, Cycle 3, Unresolved
Markup: 20% Natural Preservation (For Landscape Architect), PD2-PD6_21067 ODP-PD5B.pdf

- To meet the natural preservation requirement all the trees and natural understory would need to remain. The plan is including open space areas as natural preservation and these areas would need to have existing trees and understory vegetation to meet these requirements. Need more information to see if the requirement is being met.

- The plan shows the bottom of the retention ponds are to remain at natural grade and provide natural preservation, however very concerned with long-term feasibility of these areas remaining natural and long-term permeability?

- Informational comment, no grading will be allowed within the natural preservation areas.

Reviewer Response: Steven Spraker - 6/27/23 4:58 PM
Thank you for the information on the 20% natural preservation. Note, once these areas are approved with the zoning documents, SPRC does not have the ability to reduce natural preservation acreage.

Responded by: Debi LaCroix - 6/7/23 3:44 PM
Callouts have been modified and are no longer counted within the Total Natural Preservation Area as discussed at SPRC. The design intent and goal with the grading plan is still to preserve the existing canopy that is contained within the dry retention areas. Callouts have been modified and are no longer counted within the Total Natural Preservation Area as discussed at SPRC. The design intent and goal with the grading plan is still to preserve the existing canopy that is contained within the dry retention areas. Noted, Thank you.

Ref. # 106, Planner 1, Robin Gawel(B), 5/9/23 1:22 PM, Cycle 3, Unresolved
Markup: Planning, Project Narrative 4.28.23.pdf

Please see comments on page PD6 and page mark-up in Reviewer Attachments folder.

1. The R-2 requirements for impervious coverage is 75%. Staff recommends maintaining consistent requirements for all of the lot types.

2. Staff recommends revising page PD6 Maximum building coverage to 50% for all types to be consistent with statement number 2 of this document.

3. Staff recommended setbacks are included on comments to PD6 and illustrated on mark-up uploaded in the reviewer attachments folder.

Responded by: Debi LaCroix - 6/7/23 3:33 PM
Plans have been updated and a revised table and illustrations have been added.

Ref. # 114, Planner 1, Robin Gawel(B), 5/9/23 3:50 PM, Cycle 3, Unresolved
Markup: Planning, PD2-PD6_21067 ODP PD6 (1).pdf

Staff recommends the following changes to be consistent with statements made in the project narrative and response letter.

1. General impervious requirement is 75%. Staff recommends maintaining consistent standards.

2. Project narrative requests 50% coverage. Staff recommends this be consistent for all lots.

3. Staff recommends removing all notes in the table. Alleys are no longer included in the development. Coach and Townhomes are not one of the listed Lot Types. 0' setbacks are not included in the Lot types. Granny flats, mother-in-law suites or detached accessory dwelling units are permitted as part of a single-family dwelling.

4. Staff recommends the setbacks as follows;

Lot Type	Front	Rear	Side Interior	Street Corner	Porch
Village House	20ft	20ft	7.5ft	15ft	12ft
Park House	25ft	20ft	7.5ft	15ft	15ft
Estate House	25ft	20ft	8ft total 20ft	20ft	15ft
Custom House	25ft	20ft	8ft total 20ft	20ft	15ft

Staff recommended setbacks and PD6 with comments has been uploaded to reviewer attachments folder for reference.

Responded by: Debi LaCroix - 6/7/23 3:33 PM
Plans have been updated and a revised table and illustrations have been added.

Ref. # 116, Planner 1, Robin Gawel(B), 5/9/23 4:00 PM, Cycle 3, Unresolved
Markup: Planning, Response Letter 4.28.23.pdf

The response comments note that the proposed lots are equal to the overall zoning district square footage minimum of 10,000 square feet. In staffs review, many existing lots exceed the zoning district minimum, with a minimum lot area of 12,000 sq. ft.

Responded by: Debi LaCroix - 6/7/23 3:35 PM
Noted:

Ref. # 117, Planner 1, Robin Gawel(B), 5/9/23 4:00 PM, Cycle 3, Unresolved
Markup: Planning, Response Letter 4.28.23.pdf

Staff does not concur with the proposed setbacks and has provided recommendation. If there is a desire to maintain the proposed setbacks and conditions, staff recommends outlining each aspect of New Urbanism being applied with a summary of how it is being achieved through this development. In support of the proposed setback differences, what other communities have been constructed utilizing the New Urbanism principals.

Reviewer Response: Robin Gawel(B) - 6/26/23 9:44 AM
See comments uploaded by Planning Director.

Responded by: Debi LaCroix - 6/7/23 3:35 PM
Setbacks have been updated as discussed in SPRC. Additional exhibits have been generated to discuss side yard setbacks.

Ref. # 146, Planner 1, Robin Gawel(B), 6/22/23 3:56 PM, Cycle 4, Unresolved
Markup: Planner 1, 21067 SETBACKS C4 (1) copy.pdf

It is not clear what is to be derived from this detail. It is recommended that some commentary is added to help clarify how this information should be implemented.

Ref. # 123, Planning Director, Steven Spraker, 5/11/23 8:21 AM, Cycle 3, Unresolved
Markup: 50' Landscape Buffer, PD2-PD6_21067 ODP-PD5B.pdf

- Staff will be supporting a Type 6 buffer plantings within the 50' landscape buffer. Response comments indicate plantings to be a type 4 buffer which will include existing natural vegetation with temporary irrigation is being proposed. Staff is not supportive of a type 4 buffer type and the information provided to date has not made staff supportive of the plant materials or temporary irrigation. A permanent irrigation system needs to be in place for establishment of the trees which can take years depending on the caliper size and drought situations. Staff also have concerns with the long-term maintenance of the buffer area and survivability of the plants with temporary irrigation.

Responded by: Debi LaCroix - 6/7/23 3:45 PM
Please see submitted Buffer Planting and Maintenance Plan.

Ref. # 150, Planning Director, Steven Spraker, 6/27/23 10:00 AM, Cycle 4, Unresolved
Comment:
Key policy issues:

1. **Lot Sizes:**

Applicant: mixture of 80', 60' and 50' lots. 80' wide lots abut existing Tomoka Oaks lots.

Staff recommendation: Staff recommends 100' wide lots to total at least 10,000 square feet abutting the perimeter of the existing Tomoka Oaks single-family houses.

2. **Buffer abutting existing Tomoka Oaks single-family houses:**

Applicant: See Tomoka Reserve Buffer Planting and Maintenance Plan, dated June 6, 2023.

Staff recommendation: Staff recommends typical planting (type 6) and irrigation plan. See city Landscape Architect's comments.

3. **Setback plan:**

Applicant: See Sheet PD7.

Staff recommendation: Staff not supportive of building coverages or proposed setbacks. Staff recommended setbacks included in the review.

4. **PD6 note on lot separation.**

Applicant: Note states: The lot separation width shown on this sheet may be subject to change at the time of permitting. The represented distances are from existing lot in Tomoka Oaks neighborhood and proposed lots within Tomoka Reserve.

Staff recommendation: The 50' buffer abutting the Tomoka Oaks existing residential lots and areas called out as natural preservation shall not be modified and shall always be vegetative areas.

5. **St. Andrews Drive and Tomoka Oaks Boulevard "diamond".**

Applicant: Traffic Impact Analysis, response to comments, Item 3 states the existing diamond is expected to operate within the adopted level of service during the peak hours. No improvements are proposed.

Staff recommendation: The diamond is awkward and in staff's opinion's confusing and potentially dangerous as additional trips are added. Staff recommends that a diamond reconfiguration be required at the construction (preliminary plat) phase of the development.

6. **Recreation – additional outdoor recreation.**

Applicant: See sheets PD10 and PD3 where 9.06 acres of outdoor recreation is provided throughout the subdivision.

Staff recommendation: Staff supportive of the request. Similar request have been approved – RidgeHaven subdivision was the last similar request.

Ref. # 151, Planning Director, Steven Spraker, 6/27/23 10:41 AM, Cycle 4, Unresolved
Comment:

The Planning Board meeting will be at 6pm at Calvary Christian Center at 1687 West Granada Boulevard, Ormond Beach, FL 32174.

If you intend to use a PowerPoint, we will need the PowerPoint on/before July 13th at noon.

Ref. # 152, Planning Director, Steven Spraker, 6/27/23 10:43 AM, Cycle 4, Unresolved

Comment: The review from TEDS/Stanley Group is outstanding and will be provided once received.

Ref. # 153, Planning Director, Steven Spraker, 6/27/23 10:44 AM, Cycle 4, Unresolved

Comment: The diamond at St. Andrews and Tomoka Oaks Boulevard is awkward and in staff's opinion's confusing and potentially dangerous as additional trips are added. Staff recommends that a diamond reconfiguration be required at the construction (preliminary plat) phase of the development.

Ref. # 154, Planning Director, Steven Spraker, 6/27/23 5:06 PM, Cycle 4, Unresolved

Comment: Written comments on the plan sheets were provided by Planning staff on 6/23/23 and the applicant has provided updated plans dated 06/26/2023. Staff comments from 6/23/23 are attached.

Ref. # 64, Utility 1, Mike Stephenson, 1/26/23 1:52 PM, Cycle 2, Unresolved
Markup: Site Plan - Revise and Resubmit, Tomoka Reserve PD Plans 7 - Utility plan.pdf

Utilities has no comments regarding the proposed planned residential development. Full site plan approval, however, will require review of more detailed construction plans and design documents. Elements that will be reviewed at that time include, but is not limited to: utility separation requirements, utility connection details, valves and hydrants spacing, applicable permit status, and the inclusion of applicable City standard details.

Responded by: Debi LaCroix - 6/7/23 3:49 PM
Noted.

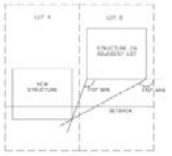
Sec. 2-13. - R-2, Single-Family Low Density Zoning District.

A. PURPOSE:	The purpose of the Single-Family Low Density (R-2) Zoning District is to protect and encourage the continued development of low density, single-family residential development.											
B. DIMENSIONAL STANDARDS												
1	2	3	4	5.	6.	7.	8.	9.				
Density	**Maximum Building Height**	**Maximum Building Coverage**	**Maximum Impervious Lot Coverage**	**Minimum Lot Size**	**Minimum Lot Width**	**Minimum Lot Depth**	**Minimum Perimeter**	**Setbacks**				
								a. Front	**b. Rear**	**c. Side**	**d. Street Side/Corner**	**e. Waterbody**
4.3 units per acre	30'	35%	75%	10,000 SF	100'	None	None	30' (see Additional Front Yard Setbacks listed below)	25'	8' total 20'	20'	30' (see Additional Waterbody Setbacks listed below)

9.a. Additional Front Yard Setbacks: In order to preserve the character of the historic area along the west side of North and South Beach Street between Sanchez Avenue and Lorillard Place, the following standards shall apply to all lots of record as of October 3, 1989, which lots are residentially zoned, abut the west side of North or South Beach Street and lie south of the centerline of Sanchez Avenue and north of the centerline of Lorillard Place:



(1) The required front yard setbacks for any lot of record as of October 3, 1989, and to which these regulations apply, shall not be less than the average building setback of all existing single-family dwelling units within three hundred feet (300') of each side lot line of the lot on which the single-family dwelling unit is proposed to be located provided that, in no event shall the front yard setback be less than thirty feet (30'). It shall include single-family dwelling units separated from the lot in question by any side streets. In the event no single-family dwelling units are located within three hundred feet (300') of both sides, the required front yard shall be thirty feet (30'). For the purpose of this requirement, the three hundred feet (300') shall be measured along a line parallel with the street right-of-way line, beginning at the corner of the lot nearest the direction being measured (e.g., for three hundred feet (300') north, begin at northeast corner), and including any street rights-of-way within the three hundred-foot (300') distance.

(2) In the event there is more than one principle structure, as defined in Chapter 1, Article III, Section 1-22, located on any adjacent lot within the 300', only the setback of the principal structure nearest the front property line will be used to calculate the applicable setback. Principle structure means any structure that is occupied by a principle use as defined in this Land Development Code.

(3) Notwithstanding subsections 9.a.(1) and 9.a.(2) of this section, a single-family dwelling unit that is proposed to replace an existing single-family dwelling unit may be built to the same setback in the same building footprint and height as the dwelling unit that it is replacing.

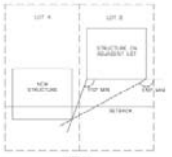
(4) Notwithstanding subsections 9.a.(1) and 9.a.(2) of this section, a structure may encroach into a required front yard setback provided that the new structure is so located as to allow a minimum viewing angle to the right-of-way of not less than 110 degrees from the closest front corner and 130 degrees from the furthest front corner of the closest structure on the adjacent lot, as depicted in Exhibit 9.a., and the 30' setback is met.

Exhibit 9.a. Minimum Viewing Angle

9.e. Additional Waterbody Setbacks:

(1) Ocean Yard Setbacks: Yards adjacent to the ocean shall be considered "rear" yards, and no structure, except for sun decks and walkways provided in this section and Chapter 3, Article II, Section 3-15, Coastal Management, shall extend beyond a line projected between the average setback of all buildings within 800' of each side lot line of the lot upon which the proposed building is to be constructed or within a building setback otherwise established under Florida Statutes or Chapter 3, Article II of this Land Development Code, whichever is greater. Such line shall run parallel with the street right-of-way line; or

(2) Tomoka/Halifax River Frontage Lots (Excluding Oceanfront):



a. The minimum rear yard setback from the mean or ordinary high-water line for properties abutting a waterbody shall be the average building setback of all existing single-family dwelling units within 300' of each side lot line of the lot on which the single-family dwelling unit is proposed to be located, minus 5', or as otherwise established under Florida Statutes or Chapter 3, Article II, Section 3-16 of this Land Development Code, Surface Waters and Marine Life Habitat, whichever is greater, provided that in no event shall the setback be less than 30'. The rear yard setback line may meander to follow the mean high-water line.

b. In the event there is more than one principle structure, as defined in Chapter 1, Article III, Section 1-22, located on any adjacent lot within the 300', only the setback of the principal structure nearest the mean or ordinary high-water line will be used to calculate the applicable setback. Principle structure means any structure that is occupied by a principle use as defined in this Land Development Code.

c. Notwithstanding subsections a. and b. of this section, a single-family dwelling unit that is proposed to replace an existing single-family dwelling unit may be built to the same setback in the same building footprint and height as the dwelling unit that it is replacing.

d. Notwithstanding subsections a. through c. of this section, a structure may encroach into a required waterfront yard setback provided that the new structure is so located as to allow a minimum viewing angle to the waterway of not less than 110 degrees from the closest front corner and 130 degrees from the furthest front corner of the closest structure on the adjacent lot, as depicted in Exhibit 9.e., and the 30' setback is met.

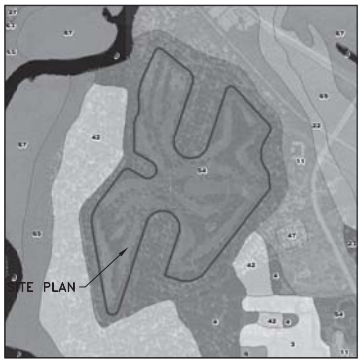
PROJECT DESCRIPTION:

ISSUANCE OF A DEVELOPMENT ORDER TO ALLOW 276 SINGLE-FAMILY LOTS AND ASSOCIATED SITE IMPROVEMENTS.

SITE INFORMATION:	
SITE ADDRESS:	20 TOMOKA OAKS BLVD., ORMOND BEACH, FL 32174
PROJECT AREA:	147.94 ACRES
TAX PARCEL I.D. #:	32420700010
ADJACENT ZONING	R2
EXISTING ZONING:	PRD-EXPIRED
PROPOSED ZONING:	PRD
EXISTING LAND USE:	VACANT
PROPOSED LAND USE:	RESIDENTIAL FAMILY
EXISTING FUTURE LAND USE:	LDR
MAXIMUM UNIT/LOT COUNT:	276
MAXIMUM MODEL HOME COUNT:	16
UNIT/LOT DENSITY:	1.87 PER ACRE
LOT TYPE	VARIES
REQUIRED LANDSCAPE BUFFER(S):	50 FT. MINIMUM TYPE 4 PLANTINGS
MINIMUM LOT DEPTH:	110 FT.
MINIMUM LOT WIDTH:	50 FT.
MAXIMUM BUILDING HEIGHT	35 FT.
UTILITIES:	PROVIDED BY CITY OF ORMOND BEACH



NOTES:
1. PROJECT MAY BE PHASED. PHASING PLAN WILL BE PROVIDED AT SITE PLAN APPROVAL.
2. ALL CONSTRUCTION TRAFFIC SHALL UTILIZE TOMOKA BLVD. AND NOVA ROAD ONLY
3. CONSTRUCTION ACTIVITIES SHALL ONLY BE ALLOWED ON MONDAY THROUGH SATURDAY BETWEEN THE HOURS OF 7:00 A.M. TO 7:00 P.M.
4. PEDESTRIAN ACCESS THROUGH THE SECONDARY ACCESS MAY BE PROVIDED BUT SHALL NOT BE REQUIRED. FINAL DESIGN AND LAYOUT TO BE COORDINATED DURING SUBDIVISION REVIEW
5. THE PERIMETER BUILDING SETBACK SHALL BE NO LESS THAN 50' FROM THE PROJECT BOUNDARY PER L.D.C.
6. MODEL HOMES INCLUDED IN 276 TOTAL PROPOSED UNITS
7. TYPE 6 BUFFER AS MODIFIED PER TOMOKA RESERVE BUFFER PLANTING AND MAINTENANCE PLAN JUNE 6, 2023.
8. EXISTING VEGETATION NATURAL VEGETATION WITHIN THE BUFFER WILL BE UTILIZED TO MEET THE MINIMUM STANDARDS. AT TIME OF CONSTRUCTION IF EXISTING NATURALLY OCCURRING LANDSCAPE IS INSUFFICIENT (BY CITY OF ORMOND BEACH LANDSCAPE ARCHITECT) SUPPLEMENTAL PLANTINGS WILL BE PROVIDED.
9. PROPOSED ENTRANCE WILL BE GATED TO VEHICULAR ACCESS. PEDESTRIAN ACCESS IS STILL PROVIDED THROUGH MAIN ENTRANCE AND EMERGENCY ACCESS.

SHEET: PD7 OF 10

ARCHITECTURAL STANDARDS

I. PREFERRED ARCHITECTURAL THEMES

A. The overall architectural vision for Tomoka Reserve has been established to create a community embodying a "timeless" quality. Such a vision will be realized through a variety of classical and regional architectural styles, combined with authentic detailing and use of high-quality materials.

B. Permitted architectural styles include but are not limited to contemporary, Modern, Postmodern, coastal themed styles, Mediterranean, Mission, Cracker, Craftsman, Ranch and Tuscan styles.

II. PROHIBITED ARCHITECTURAL STYLES

A. While diversity and creativity in the design of the homes at Tomoka Reserve is encouraged, certain architectural styles are not considered appropriate. These include, but are not limited to Art Deco, A-frame, Adobe, Cabin design style, Gothic, or Southwestern/Pueblo. Buildings and their accessory structures shall be consistent with a common architectural theme.

B. The architectural theme shall be established by harmoniously coordinating the general appearance of all buildings and related structures.

III. EXTERIOR MATERIALS/ELEVATIONS

A. Architectural variation and variety of housing types and designs within the neighborhood is encouraged. To facilitate this diversity no two homes adjacent to one another can have identical front elevations.

B. The front façade should include four to six individual design elements and blank walls shall be discouraged unless adequately landscaped.

C. A mixture of one- and two-story homes will be encouraged to vary the streetscapes.

D. Window trim, shutters and or banding shall be used on the front façade of all residential units. Articulation of side street facades for corner lots shall also be required. On each level or part of the street facing facades, rows of windows shall be spaced evenly and contain consistent sizes and shapes to create visual harmony.

E. PERMITTED EXTERIOR MATERIALS INCLUDE:

1. Stucco
2. Stone (Manufactured, Natural, or Cast)
3. Brick
4. Fiber-cement Lap Siding or Shingles
5. Other textures and materials will be evaluated on their own merit by the ARB.

IV. ROOF

A. Acceptable roof materials for consideration include, heavy weight (30 year) composition shingles with significant dimensional texture, flat tile, "S" tile, slate tile, cedar wood shake and a high-quality standing seam metal roof. Copper and other metal roof products acceptable to the ARB are permitted for limited applications such as bay windows, porches, cupolas, and dormers, or in accordance with specific architectural styles. Thermoplastic Polyolefin, PVC membrane or other similar roofing materials/roofing systems will be considered by the ARB on a case-by-case basis for properties developed with ultramodern or contemporary homes that incorporate a flat roof.

B. Roof lines will be variable using varied roof styles, pitches, projections, gables, and hips. Roof pitches shall be between 0 to 6:12. Dormers may have a roof pitch outside the above range. Flat roofs or flat roof with a parapet may be approved if it is a part of an integral design element such as with ultra-modern or contemporary designs. The roof pitch for primary structures should reflect the selected architectural style for the home.

C. Roof structures may be conventionally framed or constructed of prefabricated trusses.

V. WALL PLATES

A. The minimum wall plate heights shall be 9'-0" in main living areas on the first floor. The second-floor wall plate height must be no less than 9'-0" above the first-floor wall plate. Garages must have a minimum plate height of 8'-0".

VI. DRIVEWAYS

A. Driveways shall be stone, paver style materials, or decorative concrete. Asphalt is prohibited.

VII. GARAGES

A. Three types of garages are permitted: front-entry, side entry, and accessory garage buildings.

VIII. FENCES

A. The following fence materials are permitted: black wrought iron, high-quality aluminum, and white PVC. Perimeter fencing should be a maximum of 4'-6'.

IX. LANDSCAPE

A. All disturbed areas on the lot must be irrigated and landscaped with either trees, plants or sod including to the back of curb along the street and to the edge of clearing for natural areas and the water's edge for lots along pond banks. All landscaped beds shall be mulched with pine straw, pine bark or mulch.

X. MODIFICATIONS

A. All modifications to the above shall be submitted to the ARB for consideration of approval. The above are general guidelines. Tomoka Reserve development will have an enhanced focus on the environment, climate change and sustainability, along with protecting and enhancing future values.

Re: Tomoka Reserve Redevelopment - Rezoning/Planned Residential Development – Project Revisions Following Planning Board and Resident Feedback

Dear Steven:

As you know, it is the Firm's pleasure to represent Triumph Oaks of Ormond Beach I, LLC (the "Applicant") with respect to the redevelopment and rezoning to Planned Residential Development of the property comprising the former Tomoka Oaks Golf Course. Following the Planning Board meeting held on July 13, 2023, the Applicant has revised their proposal to respond to the comments and concerns raised by the board and residents. A summary of these changes is included below, outlined in line with the staff recommendations beginning on Page 26 of the staff report:

A. Require all lots on the project perimeter with the Tomoka Oaks subdivision to be 100' in lot depth and at least 10,000 square feet in lot area – ***The Applicant has agreed to this recommendation to commit to a minimum depth of 100' and minimum lot area of 10,000 sq. ft. in lot area.***

B. Requirement of a type 6 buffer planting plan that requires seven (7) trees, 70 shrubs & 70 ground covers per 100' lineal feet – ***As noted in the hearing, the Applicant believes that the proposed planting system for the property, which includes a xeric landscaping scope that will complement and enhance areas of natural vegetation within the site, is more compatible with existing on site conditions and will act as a better screening measure for adjacent properties, while also relying on less irrigation and water consumption and supporting natural plant communities. This landscaping type has been recommended by the University of Florida's Institute of Food and Agricultural Sciences (IFAS) and***

utilized in cutting edge communities such as Sunbridge and the Edge at Cherrylake. Information relating to these communities in included herein.

However, we understand that the City is interested in ensuring adequacy of the buffer between the communities, and has agreed to the following:

i. ***Where the planting standard outlined in the PUD is utilized for a phase, a maintenance bond will be provided to ensure the survivability of planting materials for a period of one (1) year.***
ii. ***In the event that the planting materials do not survive, the buffer will be modified to a Type 6 buffer within the requirements of the City's Land Development Code (LDC).***

C. Setback plan – lot width – 100' in width – ***As noted during the hearing, the Applicant does not believe it is possible to incorporate a minimum lot width of 100' throughout the site with the requested voluntary landscaping buffer and proposed open space, which we believe is a key feature for the existing and proposed residents. However, we have been able to modify the plan to create a mixture of lot types along the perimeter of the site that demonstrate a lot width along the rear setback line (as a closer measuring point to the existing residential homes) as follows:***

i. ***Of the lots along the perimeter of the site, a revised layout demonstrates that 46 of these lots are 100' in width, and 10 of these lots are at 90' in width.***
ii. ***The variable width provided with the revisions still creates a variety of housing types and transitional areas from the larger perimeter lots and the smaller footprint homes in the core of the project, while creating a larger similarity in lot size between the existing and proposed homes.***
iii. ***With the proposed revisions, 35% of the perimeter lots are 90' or greater in width, with approximately 29.3% being a minimum width of 100'.***
iv. ***The minimum lot width within the core of the community has been revised from 50' lot widths to a proposed minimum lot width of 60' for the interior lot types.***

D. Setback plan – maximum building coverage – 50% across all housing types – ***The Applicant is in agreement with this condition and has made this revision.***

E. Setback plan - minimum primary structure setbacks – ***The Applicant is in agreement with this condition and has made this revision.***

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50'	20'	20'	7.5'	15'
Park House	60'	25'	20'	7.5'	15'
Estate House	80'	25'	20'	8'/20'	20'
Custom House	80'	25'	20'	8'/20'	20'

F. Setback plan - minimum front porch setbacks – ***The Applicant is in agreement with this condition and has made this revision.***

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50’	20’	20’	7.5’	15’
Park House	60’	25’	20’	7.5’	15’
Estate House	80’	25’	20’	8’/20’	20’
Custom House	80’	25’	20’	8’/20’	20’

G. Setback plan - minimum front porch setbacks – ***The Applicant is in agreement with this condition and has made this revision.***

Lot type	Lot width	Front	Rear	Side	Side Street
Village House	50’	12’	20’	7.5’	15’
Park House	60’	15’	20’	7.5’	15’
Estate House	80’	15’	20’	8’/20’	20’
Custom House	80’	15’	20’	8’/20’	20’

H. Setback plan – Notes – Delete the notes. Notes 1 and 2 are contained in the Land Development Code. Staff is not supportive of a 15’ front yard garage setback. - ***The Applicant is in agreement with this condition and has made this revision.***

I. Sheet PD6 note on lot separation - Amend note to state: The 50’ buffer abutting the Tomoka Oaks existing residential lots and areas called out as natural preservation shall not be modified and shall always be vegetative areas. - ***The Applicant is in agreement with this condition and has made this revision.***

J. St. Andrews Drive and Tomoka Oaks Boulevard diamond - that a diamond reconfiguration be required at the construction (preliminary plat) phase of the development. – ***The Applicant has demonstrated that the diamond intersection operates within the required level of service for the site. An autoturn analysis has been undertaken to determine if there are any conflicts with emergency services to the area using the diamond intersection – the Applicant is willing to provide the following necessary improvements to this area of the property, as illustrated on the attached exhibit:***

   i. ***Modification of existing drive aisle to resolve turning radii conflicts for emergency vehicles; and***
   ii. ***Provision of additional landscaping adjacent to the right-of-way.***

K. Sidewalks on both sides of Tomoka Oaks Boulevard – require sidewalks on both sides of Tomoka Oaks Boulevard. - ***The Applicant is in agreement with this condition and has made this revision.***

L. The preliminary plat should require the conducting of a neighborhood meeting. - ***The Applicant is in agreement with this condition.***

M. **Resident Concern – Timing of Signal Permitting –** ***The Applicant understand that the residents want to ensure that permitting and installation of the signal move forward at the same time as the development. As such, the Applicant agrees to the voluntary condition that the Applicant will make application for the permits for the signal within 30 days of subdivision approval, and such permit will be issued prior to the issuance of subdivision construction permits.***

N. **Resident Concern – HOA Architectural Design Language –** ***The Applicant has coordinated with residents following the Planning Board hearing and have agreed to modify the proposed architectural standards to include the following:***

   i. The Architectural Review Board may not modify the architectural standards set forth in the PUD until such time that the HOA has turned control over from the Declarant to the homeowners.
   ii. The Applicant has committed to compliance with the following additional landscape standards included herein.

O. Planning Board Concern – Cut Through of Amenity Space parking lot – ***A board member noted that within a previous plan iteration, residents could utilize the amenity parking lot as a cut through drive aisle, which raised concerns on resident and child safety. This parking area has been revised to limit cut-through traffic.***

We look forward to review of this item by the Planning Board at their August 21, 2023 hearing date. If there is any additional information we can provide to assist in review, please do not hesitate to reach out.

Sincerely,

Robert A. Merrell III

ARCHITECTURAL PLAN REQUIREMENTS

Purpose and Intent

1) Architectural requirements are an integral part of the LDC in order to ensure quality development, create a sense of place and community, and to enhance the physical environment.
2) These standards are intended to:
   a) Encourage a diversity in housing styles, shapes, and materials in order to create variety in the streetscape,
   b) Encourage richness in design through materials and details,
   c) Maximize the positive impact of development,
   d) Ensure that non-residential building facades are designed to a human scale, for esthetic appeal, pedestrian comfort, and compatibility with adjacent development,
   e) Ensure that larger non-residential buildings are designed to reduce their apparent bulk and volume through design and landscaping,
   f) Encourage sustainable architecture.

Residential Development Standards

In order to promote architectural character, new housing development shall be required to offer a variety of architectural styles and elevations. These regulations promote both diversity in the exterior elevations of neighboring homes, as well as individual character in the design of each residence.

1) For new single-family residential developments or infill single family development with six (6) or more adjacent lots:
   a) Identical elevations on adjacent lots or directly across the street will not be permitted. No homes with the same color scheme on adjacent lots or directly across the street will be permitted.
   b) Similar floor plans may be used provided they incorporate different exterior elements that eliminate the perception of repetition.
   c) When less than ten (10%) percent of the lots in a subdivision remain to be developed, the Planning Board may approve a home design to be used more than three times within a single block face. This option is intended to provide some flexibility in finishing the subdivision development while maintaining diversity in building design.
   d) Front porches may encroach into the front setback up to five (5) feet. Front porches may be screened, provided that the screen is located behind the railings.
   e) Residential building walls shall be wood clapboard, wood shingle, wood drop siding, Hardie board siding, brick, stone, stucco, approved vinyl siding, or similar material.
   f) Residential roofs shall be wood, 30-year architectural asphalt shingles, or fiberglass shingles, solar shingles, tile or metal. Eaves are an important component of the roof design; they not only provide architectural character, but they help to protect building walls and reduce cooling costs.

g) Fencing or decorative walls in residential front yards shall be a maximum of three (3) feet tall. Fencing in side and rear yards shall be a maximum of six (6) feet tall. Fences shall be wood, vinyl, wrought iron, or aluminum that is designed to resemble wrought iron.
h) The architectural style and color of walls or fences shall match the primary dwelling unit. Fences shall be erected so that the finished side is towards adjacent lots or the public right-of-way. Chain link fencing is permitted along the sides and rear lot lines of residential lots that back up to either a stormwater facility or lake.
i) Perimeter fences or walls are permitted around a residential development up to a maximum of six (6) feet, provided that the fence and/or wall has architectural features compatible with the neighborhood. Fences and walls shall also include details such as banding, capping, columns (which may be up to 8 feet tall), and other elements to add interest. To enhance design, perimeter fences and walls are required to incorporate landscaping with breaks in the fence or wall (or change in direction). Perimeter fences shall be wrought iron, or aluminum that is designed to resemble wrought iron. Perimeter walls shall be faced with stucco, brick, or stone or a combination of those materials.

Single Family Residential Development Architectural Plans

At the time of Final Plat submittal (or at building permit for infill development), the applicant shall submit a complete set of the residential design plans. This shall include the front, side, and rear elevations for each model that will be constructed within the development. The building elevations shall include the following:

1) Roof plan: Residential homes shall have variations in roof lines and use dormers, and other architectural elements to add interest and sustainability.
2) Wall materials and color options: See above for material options. Walls cannot be all one material and/or all one color. Primary facades shall have one base color and a minimum of one complementary accent color. A complementary wall material may be used to meet the second color requirement.
3) Exterior architectural details: Each home shall incorporate architectural details to add interest to all sides of the building. Primary facades shall incorporate a minimum of four (4) architectural details These include, but are not limited to:
   a) Windows
   b) Shutters
   c) Porches
   d) Decorative elements
   e) Doors
   f) Columns
   g) Window boxes
   h) Porticos
   i) Cupolas
   j) Chimneys
   k) Enhanced landscape treatment which provides for one additional planting area with a minimum size of 400 square feet
   l) Other elements approved by the City review staff

ORDINANCE NO. 2006-17

AN ORDINANCE AMENDING SUBSECTION A, ZONING MAP, OF SECTION 2-03, OFFICIAL ZONING MAP AND ZONING DISTRICT, OF CHAPTER 2, ARTICLE I, ESTABLISHMENT OF ZONING DISTRICTS AND OFFICIAL ZONING MAP, OF THE LAND DEVELOPMENT CODE, BY AMENDING THE OFFICIAL ZONING MAP TO REZONE A 147-ACRE PARCEL OF REAL PROPERTY FROM R-2 (SINGLE FAMILY LOW DENSITY) TO PRD (PLANNED RESIDENTIAL DEVELOPMENT), SAID REAL PROPERTY BEING LOCATED WITHIN THE LIMITS OF THE EXISTING TOMOKA OAKS GOLF COURSE; ESTABLISHING BOUNDARIES; AUTHORIZING REVISION OF OFFICIAL ZONING MAP; APPROVING A DEVELOPMENT ORDER FOR "THE TOMOKA OAKS GOLF VILLAGE", PLANNED RESIDENTIAL DEVELOPMENT (PRD); REPEALING ALL INCONSISTENT ORDINANCES OR PARTS THEREOF; AND SETTING FORTH AN EFFECTIVE DATE.

WHEREAS, the property to be rezoned consists of approximately 147-acres located within the limits of the existing Tomoka Oaks Golf Course, and is zoned R-2 (Single Family Low Density), and

WHEREAS, RTH, Inc., a Florida corporation, has initiated this Ordinance which rezones that parcel of privately-owned real property hereinafter described, and

WHEREAS, the said parcel of real property involves more than ten (10) contiguous acres, and

WHEREAS, the Planning Board held a public hearing regarding this matter as required by Chapter 1, Article II, Section 1-15D of the *Land Development Code*, and

WHEREAS, the City Commission held a public hearing regarding this matter as required by Section 166.041(3)(c)(2), *Florida Statutes*, and

WHEREAS, all applicable legal notice requirements have been complied with, and

WHEREAS, the City Commission finds the proposed rezoning to be consistent with the Future Land Use Element, and the Future Land Use Map, of the City's adopted *Comprehensive Plan*, now therefore,

BE IT ENACTED BY THE PEOPLE OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:

SECTION ONE. Subsection A, Zoning Map, of Section 2-03, Official Zoning Map and Zoning District, of Chapter 2, District and General Regulations, Article I, Establishment of Zoning Districts and Official Zoning Map, of the *Land Development Code* of the City of Ormond Beach, Florida, is hereby amended by amending the Official Zoning Map, which is part of the said *Land Development Code*, to change the real property described on Exhibit "A" attached hereto and incorporated herein by reference from R-2 (Single Family Low Density) to PRD (Planned Residential Development).

SECTION TWO. The property hereby rezoned consists of approximately 147-acres located at within the limits of the existing Tomoka Oaks Golf Course, and is zoned R-2 (Single Family Low Density).

SECTION THREE. The City Commission does hereby approve, authorize, and direct the revision of the City's Official Zoning Map to show the classification for the area as hereby rezoned.

SECTION FOUR. The City Commission does hereby approve a Development Order to allow the construction of the "The Tomoka Oaks Golf Village" Planned Residential Development, consisting of 119-multifamily units (townhomes and condominiums) and 3-single family dwellings on a 147-acre parcel, attached hereto.

SECTION FIVE. All Ordinances or parts of Ordinances in conflict herewith are hereby repealed to the extent of such conflict.

SECTION SIX. This Ordinance shall take effect immediately upon its adoption.

PASSED UPON at the first reading of the City Commission this 3rd day of October, 2006.

PASSED UPON at the second and final reading of the City Commission this 17th day of October, 2006.

BEFORE THE
CITY COMMISSION
OF THE
CITY OF ORMOND BEACH

IN RE: Application of RTH, Inc.
PRD-06-32
"Tomoka Oaks Golf Village" Planned Residential Development
within the limits of the existing Tomoka Oaks Golf Course

DEVELOPMENT ORDER

This matter having come on for public hearing before the City Commission of the City of Ormond Beach, Florida, on October 3, 2006 and October 17, 2006, and the City Commission having considered those items as required by Chapter 1, Article II, Section 1-18(D)(3) of the *Land Development Code*, and having heard testimony and evidence from all affected persons, the City Commission hereby finds that:

(1) The land use conforms to the standards and requirements of this *Land Development Code* and will not create undue crowding beyond the conditions normally permitted in the PRD, Planned Residential zoning district, or adversely affect the public health, safety, welfare or quality of life;

(2) The land use is consistent with the *Comprehensive Plan*;

(3) The land use will not adversely impact environmentally sensitive lands or natural resources, including but not limited to waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells;

(4) The land use will not substantially or permanently depreciate the value of surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties;

(5) Public facilities, such as roads, sidewalks, bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds will not be unduly burdened and are adequate to serve the land use;

(6) Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe;

(7) The land use is functional in the use of space and aesthetically acceptable;

(8) The land use provides for the safety of occupants and visitors;

(9) The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area; and

(10) The testimony provided at public hearings.

Thereupon and in consideration thereof, the City Commission hereby orders that:

A. The application of RTH, Inc., a Florida corporation, for the "Tomoka Oaks Golf Village" a planned residential development to allow the construction of consisting of 119-multifamily units (townhomes and condominiums) and 3-single family dwellings on a 147-acre parcel within the limits of the existing Tomoka Oaks Golf Course, in the R-2 Single Family Low Density zoning district, on that real property described and depicted on Exhibit "A" attached hereto and incorporated herein by reference, is hereby granted, subject to the following conditions:

1. All applicable provisions of Chapter 2, District and General Regulations, Article II, District Regulations, Section 2-35, Planned Residential Development, of the City of Ormond Beach *Land Development Code*, except as otherwise specifically modified hereby, shall at all times be strictly complied with;

2. That the following recommendations of the Planning Board shall be resolved and strictly complied with at all times:

a. The owner shall provide for covenants and restrictions that restrict the golf course to open space and golf course use. The City of Ormond Beach shall be involved in a manner that requires the approval of the City if the owners ever wish to remove the restriction on use.

b. The owner shall provide a note on the plat for the property indicating to future property owners the proximity of the airport and the flight pattern of the traffic from the airport.

c. The applicant shall include a landscape buffer around the 3 single-family lots that is a minimum of 10-feet in width with trees and shrubs in accordance with the minimum buffering requirements specified by the Land Development Code, Chapter 3, Article I, Section 3-06, as currently adopted.

3. That the following comments of the Site Plan Review Committee shall be resolved and strictly complied with at all times:

CITY LANDSCAPE ARCHITECT COMMENTS:

a. Wheel stops must be provided. Vehicle bumpers will not overhang the planting beds.

b. Applicant must provide a littoral planting detail and specifically show where they are to be planted on the pond banks in all applicable ponds; applicant must provide calculation for each pond; clarify if ponds are wet or dry; if dry then littoral planting is not required.

c. Applicant must provide a note on the plans that any tree needed to be removed during construction will require a one for one replacement penalty; protected trees will require one 2.5" caliper variety and specimen trees will require one 4.5" caliper variety to suit its planting location; replacement trees need to be Florida #1 at a minimum height of ten feet (10'). CPH will make the determination as to what is best suited for each replacement.

d. Remove the asterisk note on page TR-8.

CIVIL ENGINEER COMMENTS:

e. Applicant must provide legend to clarify phasing.

f. Sheet C6 – Include Temporary Construction Entrance in Phase 1A.

g. Sheet C2 – Provide As Built Requirements for Water and Sewer; relocate the As Built Requirements for Roadway Construction from sheet C36.

h. Sheet C22 –Removing the fire hydrant from the pond.

i. Sheets C45-C47 – Estimated Wet Season Water Table Elevation and Design Pond High Water Elevation to each section.

j. Applicant must locate easements for utilities and lift station on the plat.

CHIEF BUILDING OFFICIAL COMMENTS:

k. Applicant must provide additional fire hydrants to townhouse and condo locations.

l. Applicant must provide location of fire department connections.

m. The location of handicap spaces for the clubhouse is unacceptable; accessible parking spaces shall not cross the roadway and shall be as close to the building as possible.

FIRE DEPARTMENT COMMENTS:

n. Fire hydrants shall be installed at intervals not to exceed 500 feet; provide location of additional hydrants on plans.

PUBLIC UTILITIES COMMENTS:

o. Manhole #44 on page C18 of the plans needs to be lined.

p. Applicant must update fire hydrant assembly detail.

q. Show how reuse will be connected to existing reuse line or the proposed reuse line to be constructed to the reuse storage pond by Tomoka Oaks.

r. Reuse meter to be provided by owner of make and model approved by the City. A reuse agreement will need to be executed by the owner and the City.

s. Applicant must confirm if water master meter shall be needed or if units will be individually metered.

t. Applicant must provide match lines on composite utility sheets.

u. All water and sewer lines to be owned and maintained by City must be in public rights of way or 40 foot access and utility easement; an easement or deed is also needed for the lift station.

POLICE DEPARTMENT COMMENTS:

v. Parking lot lighting, pole heights must not exceed 20 feet and maximum wattage shall be 250 watts (see Land Development Code Chapter 3, Article 5 Architectural Design Standards, Chapter 3 Page 10). This will impact lighting calculations currently submitted.

4. The subdivision is approved to have a total of consisting of 119-multifamily units (townhomes and condominiums) and 3-single family dwellings with the following dimensions as shown on the attached plans. The townhomes and condominiums shall be developed in accordance with the conceptual plans approved for the proposed PRD and the requirements established in Chapter 2, Article IV, Section 2-57 M. Multi-Family Dwellings:

Land Use	Min. Lot Area	Min. Lot Width	Front Setback	Side Corner	Side Setback	Rear Setback
Single-family	10,000-square feet	100- feet	30-feet	20-feet	8-feet total 20-feet	25-feet

5. As a stand alone zoning district the following permitted uses and dimensional criteria for this Planned Residential Development are hereby established as follows:

1. **Permitted Principal Uses and Structures.**

   a. Single-family Detached units

   b. Townhouse Units, as located on the conceptual development plan prepared by Conklin Porter and Homes, CPH project number T7501, dated June 2005.

   c. **Multifamily Condominium units** as located on the

conceptual development plan prepared by Conklin Porter and Homes, project number T7501, dated June 2005.

2. Permitted Accessory Uses and Structures

a. Single Family detached dwellings and all accessory uses customarily associated with, dependent on and incidental to their permitted principal uses, provided that such uses conform to the regulations set forth in Chapter 2, Article III.

b. Home Occupations, Type "A", subject to the regulations set forth in Chapter 2, Article III.

6. The project shall be phased over a 5-year period and shall consist of 6 phases; a new phase shall not be initiated until the improvements and enhancements identified in the previous phase have been initiated and are substantially completed. This condition shall not prevent the owner from completing multiple phases concurrently. The following summarizes the phasing of the project:

Phase	Description
1A	Construction of the tennis facility, maintenance area, parking, spine road and associated stormwater improvements. The "Golf Townhomes" at the northern most portion of the development (9th and 10th fairway) will be constructed
1B	Demolition and reconstruction of the clubhouse and parking lot.
1C	Completion of all of the townhomes in the golf and tennis areas.
2A	Development of condominiums at tennis facility.
2B	Development of condominiums at the driving range and clubhouse areas.
3	Development of 3-single family homes on the estate lots.

B. The final plans for the development project shall be consistent with the provisions of this Development Order and the plans depicted in Exhibit "B" hereto; provided, however, that the said plans shall be amended as necessary in order to achieve such consistency.

C. No material change shall be made to the final plan for the development project without further review by the Planning Board and approval by the City Commission in accordance with the procedures for the approval of this Development Order.

D. All site construction activity shall be performed in strict compliance with the terms and conditions of this Development Order approved for this development project, and of the *Land Development Code.*

E. If the final plan approval lapses under the provisions of Section 1-14(C)(2) of the *Land Development Code*, before the planned development permit can be re-established, a new PRD Development Order shall be considered by the City Commission.

F. In the event the use of the land approved by this PRD Development Order is abandoned for a period of two (2) years or there has been no construction activity during that period, the permit shall be void and a Notice of Final Plan Revocation filed under the provisions of Section 1-14(C)(2) of the *Land Development Code*, before the planned development permit can be reestablished, a new PRD Development Order shall be considered by the City Commission.

G. Semi-annually, the Neighborhood Improvement Officer shall prepare a report indicating which planned developments are not in compliance with Section 1-14, or the conditions stipulated in the Development Order, in the event a Neighborhood Improvement Officer subsequently determines there to be any violation, such Officer shall promptly present such determination to the Special Master for hearing.

H. Pursuant to Chapter 1, Article II, Section 1-14(C) (2), of the *Land Development Code*, the first phase of this Special Exception shall automatically expire and become void, without further action by the City Commission, 24 months (October 17, 2008) from the date of City commission approval, unless a site plan or building permit has been issued prior to that date; and a use building permit is so issued, this Special Exception shall remain in full force and effect unless and until subsequently amended by the City Commission.

I. The expiration date of the sixth and final phase of the project to be constructed shall be five (5) years in the future, or to October 17, 20011, and shall automatically expire and become void, without further action by the City Commission, unless a building permit

is issued for the sixth and final phase of the project prior to that date; and if a building permit is so issued, the Development Order shall remain in full force and effect unless and until subsequently amended by the City Commission

J. This Development Order shall be recorded in the public records of Volusia County, Florida, at the expense of RTH, Inc., a Florida corporation, and shall be binding upon RTH, Inc., a Florida corporation, and its successors and assigns, and shall run with the real property described in Exhibit "A" attached hereto and incorporated herein by reference. (Parcel ID No. 3242-07-00-0010)

ORDERED this 17th day of October, 2006.

GENERAL NOTES:

ALL CONSTRUCTION SHALL BE IN ACCORDANCE WITH THE CITY OF ORMOND BEACH'S LAND DEVELOPMENT CODE REQUIREMENTS, AND THE STANDARD CONSTRUCTION DETAILS AND CONSTRUCTION SPECIFICATIONS (SCDCS). AN ENGINEERING PERMIT AND TREE REMOVAL PERMIT IS REQUIRED PRIOR TO STARTING CONSTRUCTION.

NO LAND SHALL BE CLEARED, EXCAVATED OR FILLED AND NO STRUCTURE SHALL BE ERECTED, REPAIRED OR DEMOLISHED WITHOUT PROPER PERMIT(S) AS REQUIRED BY THE CITY OF ORMOND BEACH.

NOTIFY THE CITY OF ORMOND BEACH'S ENGINEERING DIVISION AT 676-3269 48 HOURS PRIOR TO THE START OF CONSTRUCTION.

ANY CONSTRUCTION CHANGES TO APPROVED PLANS SHALL BE SUBMITTED TO THE CITY OF ORMOND BEACH FOR APPROVAL PRIOR TO PERFORMING THE WORK.

ROAD CONSTRUCTION AND PIPE INSTALLATION COMPACTION AND DENSITY TESTING SHALL CONFORM TO THE CITY OF ORMOND BEACH'S MINIMUM REQUIREMENTS. CERTIFIED COPIES OF TEST REPORTS SHALL BE SUBMITTED TO THE CITY INSPECTOR AND THE CITY'S ENGINEERING DIVISION.

A PRE-PAVING UTILITY INSPECTION MUST BE REQUESTED AND COMPLETED PRIOR TO THE PAVING OF ALL ROADS, STREETS, AND PARKING AREAS.

A FINAL INSPECTION, TO BE CONDUCTED BY THE CITY OF ORMOND BEACH, SHALL BE PERFORMED ON ALL CONSTRUCTION. THE DESIGN ENGINEER SHALL NOTIFY THE CITY OF ORMOND BEACH'S ENGINEERING DIVISION 676-3269 WHEN REQUESTING A FINAL INSPECTION.

THREE COMPLETE SETS OF AS-BUILT DRAWINGS (5 FOR SUBDIVISIONS) ARE REQUIRED TO BE SUBMITTED TO THE CITY OF ORMOND BEACH PRIOR TO REQUESTING A FINAL INSPECTION.

THE CITY HAS A CONTRACTOR FOR ROLL OFF SERVICE. NO OTHER CONTRACTOR SHALL BE PERMITTED TO PROVIDE THIS SERVICE. VERIFY COMPANY UNDER CONTRACT WITH THE CITY.

CONSTRUCTION STANDARDS FOR ALL DRAINAGE SYSTEM COMPONENTS SHALL CONFORM TO THE LATEST EDITION OF THE FDOT ROADWAY AND TRAFFIC DESIGN STANDARDS MANUAL.

ALL STORM SEWER PIPE SHALL BE REINFORCED CONCRETE (RCP), HIGH DENSITY POLYETHYLENE (HDPE), POLYVINYL CHLORIDE (PVC) OR ALUMINUM CORRUGATED METAL PIPE (ACMP), AS SHOWN ON THE PLANS.

STORM DRAINAGE PIPES SHALL BE A MINIMUM OF FIFTEEN (15) INCH DIAMETER OR EQUIVALENT.

STORM INLETS, MANHOLES AND CATCH BASINS SHALL BE EITHER POURED IN PLACE OR PRE CAST REINFORCED CONCRETE. STRUCTURES SHALL BE REQUIRED AT EACH CHANGE OF PIPE SIZE OR CHANGE IN PIPE DIRECTION.

STORM INLETS SHALL BE SPACED IN SUCH A MANNER AS TO ACCEPT ONE HUNDRED (100) PERCENT OF THE DESIGN STORM RUNOFF.

WET DETENTION PONDS SHALL BE EIGHT (8) FEET MINIMUM TO TWELVE (12) FEET MAXIMUM DEPTH BELOW THE DESIGN LOW OR NORMAL WATER STAGE.

MAXIMUM DISTANCES BETWEEN INLETS AND/OR JUNCTION BOXES:

PIPE SIZE (INCHES)	LENGTH OF RUN (FEET)
15	150
18	300
24 OR GREATER	400

ALL SWALES, DITCHES AND DRY RETENTION POND SIDE SLOPES SHALL BE NO STEEPER THAN 4:1 (H:V) AND SHALL BE SODDED.

NORMAL ROADSIDE SWALES SHALL BE CONSTRUCTED TO A MAXIMUM DEPTH OF 18" BELOW THE OUTSIDE EDGE OF PAVEMENT OR CONCRETE CURB.

CONCRETE EROSION CONTROL MUST BE PROVIDED WHERE SWALES OF CULVERTS INTERCEPT DRAINAGE DITCHES.

A MINIMUM ONE FOOT (1') FREEBOARD ABOVE THE DESIGN HIGH WATER ELEVATION IS REQUIRED AT ALL POINTS AROUND WET DETENTION PONDS.

LAKE INFLOW AND OUTLET STRUCTURES SHALL GENERALLY BE CONSTRUCTED WITH REINFORCED CONCRETE AND SHALL BE SUBJECT TO THE APPROVAL OF THE CITY.

SOIL EROSION CONTROL MEASURES, SATISFACTORY TO THE CITY, SHALL BE EMPLOYED DURING CONSTRUCTION AND UPON COMPLETION OF THE POND.

THE CITY MAY REQUEST THAT THE DEVELOPER SUBMIT A REPORT BY A QUALIFIED HYDROLOGIST ON THE IMPACT THE POND WILL HAVE ON NEIGHBORING WATER TABLE ELEVATIONS BOTH DURING CONSTRUCTION AND AFTER POND COMPLETION. THE CITY MAY REQUIRE GROUNDWATER MONITORING DURING THE POND EXCAVATION.

ADEQUATE MAINTENANCE EASEMENTS OR RIGHTS-OF-WAY AS APPROVED BY THE CITY SHALL BE PROVIDED AROUND THE ENTIRE PERIMETER OF ALL PONDS AND ASSOCIATED OUTFALLS DISCHARGING INTO AND OUT OF PONDS. APPLICABLE CROSS SECTIONS SHALL BE INCLUDED ON ALL FINAL DEVELOPMENT PLANS.

DEVELOPMENT PLANS SHALL CONTAIN DRAINAGE CONTROL STRUCTURE (OVERFLOW) INFORMATION, BOTTOM ELEVATION, TOP ELEVATION, NORMAL WATER LEVEL AND THE 25 YR. - 24 HR. DESIGN HIGH WATER LEVELS.

IN GENERAL, ALL RETENTION/DETENTION PONDS MUST BE CONSTRUCTED PRIOR TO ANY ROAD, PARKING LOT OR BUILDING CONSTRUCTION COMMENCING OR AS CURRENT PERMIT CONDITIONS DICTATE.

THE ENGINEER OF RECORD SHALL BE RESPONSIBLE TO OBTAIN ANY AND ALL DEWATERING PERMITS THAT MAY BE REQUIRED.

CULVERTS CROSSING RIGHTS-OF-WAY SHALL EXTEND FROM RIGHT-OF-WAY LINE TO RIGHT-OF-WAY LINE UNDER THE ROADWAY.

ALL STORM WATER MANAGEMENT SYSTEMS ARE TO BE OWNED AND MAINTAINED BY EITHER THE SURROUNDING PROPERTY OWNERS OR AN ASSOCIATION OF THE SURROUNDING PROPERTY OWNERS OR SOME OTHER GROUP AS APPROVED BY THE CITY.

SANITARY SEWER CONSTRUCTION GENERAL NOTES

THE CITY'S PUBLIC UTILITY DEPARTMENT SHALL BE NOTIFIED PRIOR TO BEGINNING ANY SEWER CONSTRUCTION.

ALL SANITARY SEWER MAIN LINES SHALL BE A MINIMUM OF 8" IN DIAMETER. SERVICE LATERALS WITH MULTIPLE CONNECTIONS SHALL BE 6" DIAMETER OR LARGER.

ALL SANITARY SEWER LINES SHALL BE PVC SDR 35. IN PLACES WHERE A MINIMUM COVER OF 4.0' CANNOT BE MAINTAINED, C-900 GREEN PVC DR-25, CLASS 100 OR CONCRETE ENCASEMENT SHALL BE USED.

MINIMUM ALLOWABLE SANITARY SEWER SLOPES ALLOWED ARE:

8" PIPE 0.40%
10" PIPE 0.30%
12" PIPE 0.22%

SEWER LINE CONSTRUCTION SHALL BE ACCOMPLISHED BY THE USE OF A LASER INSTRUMENT UNLESS ANOTHER METHOD IS PREVIOUSLY APPROVED BY THE CITY.

THE CONTRACTOR SHALL AT ALL TIMES, DURING PIPE LAYING, DEWATER THE GROUND SUFFICIENTLY TO KEEP THE GROUNDWATER ELEVATION A MINIMUM OF 6" BELOW THE PIPE BEING LAID WITHIN THE AREA OF THE TRENCH.

ALL PIPES SHALL BE LAID ON A FIRM FOUNDATION. SOFT OR SPONGY BEDDING FOR PIPES WILL NOT BE ACCEPTED. ANY UNSUITABLE MATERIAL SHALL BE REMOVED AND REPLACED WITH A DRY, COMPACTED, GRANULAR MATERIAL SATISFACTORY TO THE CITY.

EXCAVATION AND BACKFILL: THE CONTRACTOR SHALL PROVIDE ADEQUATE SHEETING AND BRACING OF EXCAVATION WORK OR USE OF TRENCH BOX IN ORDER TO PROVIDE FOR THE SAFETY OF WORKMEN, AS WELL AS REPRESENTATIVES OF THE CITY, THE DESIGN ENGINEER, AND THE DEVELOPER.

THE CONTRACTOR SHALL INSTALL A METALLIZED FOIL LOCATER TAPE, OR SIMILAR DEVICE AS MAY BE APPROVED BY THE CITY FOR THE FULL LENGTH OF ALL PVC WATER, RECLAIMED WATER AND SEWAGE FORCE MAINS. THIS PIPE LOCATER AID SHALL BE INSTALLED (15) INCHES BELOW FINISHED GRADE OR AS DIRECTED BY THE MANUFACTURER AND IS IN ADDITION TO THE LOCATER WIRE REQUIRED IN THE UTILITY PIPE LOCATION MATERIALS DETAIL (MISCELLANEOUS DETAILS SECTION - M10).

MANHOLES SHALL BE LOCATED AT INTERVALS NOT EXCEEDING 400 FEET.

MANHOLE RIMS SHALL MATCH FLUSH WITH THE FINISH GRADE ELEVATION IN PAVED AREAS AND A MINIMUM OF 0.2 FEET ABOVE GRADE IN UNPAVED AREAS.

THE CONTRACTOR SHALL CONSTRUCT SANITARY SEWER MANHOLES IN SUCH A WAY THAT SEWER LINES DO NOT INTERSECT SEALED JOINTS BETWEEN SECTIONS OF THE MANHOLE.

RUBBER BOOTS AND STAINLESS STEEL BANDS SHALL BE UTILIZED IN THE CONNECTION OF THE SEWER MAIN TO THE MANHOLES (SEE RUBBER BOOT AND PRECAST JOINT CONNECTION DETAIL).

INDIVIDUAL SANITARY SERVICE CONNECTORS ON NEW CONSTRUCTION SHALL NOT BE CONNECTED DIRECTLY INTO MANHOLES, BUT TO SEWER MAIN LINES BY USE OF WYE CONNECTIONS.

FOR SINGLE FAMILY HOMES, SINGLE FOUR INCH SEWER SERVICES SHALL BE CONSTRUCTED AT EACH LOT OR UNIT AND LOCATED ON THE DOWNSTREAM SIDE OF THE LOT CENTER LINE. THESE SERVICES SHALL BE EXTENDED 4 FEET ABOVE GROUND AT THE PROPERTY LINE WITH A PVC RISER AND PLUG BEING EASILY VISIBLE FROM THE ROAD. RUBBER SEAL FITTINGS TO BE USED ON ALL LINES, NO GLUED JOINTS.

FOR MULTI-FAMILY AND COMMERCIAL SITES, SIX INCH MINIMUM SEWER SERVICES AND CLEANOUTS SHALL BE PROVIDED AS APPROVED BY THE CITY.

SANITARY SEWER LATERALS LONGER THAN 70 FEET, MEASURED FROM THE SEWER MAIN TO THE RIGHT-OF-WAY LINE MAY BE APPROVED ON A CASE BY CASE BASIS. SUCH LATERALS SHALL BE D.I.P. EPOXY LINED OR C-900 PVC.

SANITARY SEWER MANHOLES WHICH HAVE SEWER FORCE MAINS DISCHARGING DIRECTLY INTO THEM, OR ANY MANHOLE WITHIN 200 FEET OF A LIFT STATION, SHALL BE FIBERGLASS OR PVC LINED. RETRO-FITTING OF MANHOLES WITH LINERS SHALL BE REQUIRED WHEN NEW CONNECTIONS SUCH AS THIS ARE MADE. FIBERGLASS SHALL BE A MINIMUM 1/2" THICKNESS UNLESS APPROVED OTHERWISE BY THE CITY. LINING SHALL BE AGRU SURE-GRIP OR PRE-APPROVED EQUAL.

SEE CHART S-9C FOR PIPE SIZE AND MATERIALS.

THE CITY OF ORMOND BEACH REQUIRES THE DEVELOPER TO TELEVISE ANY AND ALL SANITARY SEWER MAIN LINES AND LATERALS PRIOR TO ANY FINAL ACCEPTANCE, AND RESERVES THE RIGHT TO REQUEST WATER AND AIR TESTING.

ALL SEWER MAINS PRIOR TO ACCEPTANCE BY THE CITY SHALL BE TELEVISED BY A REPUTABLE COMPANY THAT ENGAGES IN THIS TYPE OF WORK. THE VIDEO SHALL BE NON-STOP WITH AUDIO DESCRIBING WHAT IS BEING REVIEWED. WRITTEN LOGS DESCRIBING THE CONDITION OF THE LINES SHALL ACCOMPANY THE TAPE SUBMISSION TO THE CITY.

CONTRACTORS SHALL BE REQUIRED TO TELEVISE ALL SEWER LINES IN THE PRESENCE OF CITY PERSONNEL AND PROVIDE COPIES OF THE VIDEO TAPE TO THE PUBLIC UTILITY DEPT. ANY DEFECTS NOTED SHALL BE CORRECTED PRIOR TO ACCEPTANCE BY THE CITY.

ALL MANHOLES CONSTRUCTED IN SIDE YARDS, BACKYARDS, AND EASEMENTS OFF THE RIGHT-OF-WAY SHALL BE OUTFITTED WITH FIBERGLASS LINERS OR OTHER TYPES OF LINERS OR COATINGS APPROVED BY THE CITY. IN ADDITION THE CITY MAY REQUIRE LINERS OR COATINGS TO BE INSTALLED IN OTHER AREAS WHERE THE PUBLIC UTILITY DEPARTMENTS BELIEVE THE NEED IS JUSTIFIED.

ALL SEWER LINES WHICH ARE CONSTRUCTED OFF PUBLIC RIGHTS-OF-WAY WITHIN SIDEYARDS, BACKYARDS, AND OTHER POORLY ACCESSABLE AREAS SHALL BE CONSTRUCTED OF C-900 PVC, OR EPOXY LINED DUCTILE IRON PIPE. ABSOLUTELY NO USE OF PLASTIC STYRENE FITTINGS SHALL BE ALLOWED.

SEWER LATERAL LOCATIONS SHALL BE MARKED ALONG THE OUTSIDE OF THE CURB WITH A SAWCUT V , OR BY A METAL TAB SET INTO THE PAVEMENT.

EZ-WRAP PLASTIC, AS MANUFACTURED BY PRESS-SEAL GASKET CORPORATION OR APPROVED EQUAL, SHALL BE USED ON THE OUTSIDE OF ALL MANHOLE AND WETWELL JOINTS. APPLY ONE LAYER OF 8" WRAP CENTERED ON EACH JOINT. A CITY INSPECTOR SHALL PERSONALLY INSPECT ALL JOINT SEALS PRIOR TO BACKFILLING OPERATIONS .

MATERIALS		
DIAMETER	MATERIAL	STANDARD
> 3" - 4"	PVC 1120 / SDR 21	ASTM D 2241
> 4" - 12"	PVC 1120 / CLASS 150	AWWA C 900
14" - 36" (16" - 24" DR - 18) (30" - 36" DR - 25)	PVC 1120	AWWA C 905

NOTE: -PVC PIPE COLOR SHALL BE BLUE FOR POTABLE WATER MAIN, GREEN OR WHITE FOR SEWER FORCE MAIN, AND PURPLE FOR REUSE MAIN.

WATER SYSTEM CONSTRUCTION GENERAL NOTES

THE CITY'S PUBLIC UTILITIES DEPARTMENT SHALL BE NOTIFIED PRIOR TO BEGINNING ANY WATER SYSTEM CONSTRUCTION.

DEWATERING SHALL BE PROVIDED TO KEEP GROUNDWATER ELEVATION A MINIMUM OF 6 INCHES BELOW WATER MAIN BEING LAID.

ALL WATER MAINS SHALL BE LAID ON A FIRM FOUNDATION WITH ALL UNSUITABLE MATERIAL (MUCK, ROCK, COQUINA, ETC.) REMOVED AND REPLACED WITH CLEAN GRANULAR MATERIAL.

TRENCHES SHALL BE BACKFILLED WITH CLEAN GRANULAR MATERIAL IN MAX. 1' LIFTS WITH A MINIMUM COMPACTION OF 98 PERCENT (AASHTO-T180) IN PAVED AREAS AND 90 PERCENT IN UNPAVED AREAS.

IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO ENSURE THAT TRENCH COMPACTION TESTS BE PROVIDED AT POINTS 1 FOOT ABOVE THE PIPE AND AT 1 FOOT VERTICAL INTERVALS TO FINISH GRADE, AT A MINIMUM SPACING OF EVERY 300 FEET, AND TO FURNISH COPIES OF TEST REPORTS PROMPTLY TO THE CITY ENGINEERING DEPARTMENT.

METALLIZED PIPE LOCATION TAPE SHALL BE LOCATED 15 INCHES BELOW FINISHED GRADE OR AS SPECIFIED BY MANUFACTURER FOR ALL PVC LINES. MARKER TAPE SHALL BE USED ON ALL DUCTILE IRON PIPE.

ALL WATER SERVICES (SINGLE 1" AND DOUBLE 1 1/2") SHALL BE POLYETHYLENE TUBING (BLUE IN COLOR) ; POLYBUTYLENE SHALL NOT BE ALLOWED.

ALL WATER SERVICE ENDINGS SHALL BE MARKED WITH 4" X 4" LUMBER (PRESSURE TREATED) EXTENDING 4 FEET ABOVE GRADE, WITH WATER SERVICES SECURED 24" ABOVE THE GROUND. WARE TIES SHALL BE USED TO SECURE THE CURB STOPS TO SUPPORT POSTS.

WATER VALVES SHALL BE PLACED AT ALL STREET INTERSECTIONS AND AT MAXIMUM SPACINGS OF 500 FEET.

AT ALL WATER MAIN TEES AND CROSSES, VALVES SHALL BE INSTALLED ON ALL LEGS EXCEPT ONE.

APPROVED WATER VALVE TYPES ARE THE FOLLOWING:

A. STANDARD GATE VALVES LESS THAN 24" DIAMETER RESILIENT SEAT GATE VALVES (AWWA C-509).
B. TAPPING VALVES AND MECHANICAL TAPPING SLEEVE SHALL BE STAINLESS STEEL. (AWWA C - 509)

ALL WATER VALVE BOXES SHALL BE ADJUSTED TO FINISH GRADE AND THE LIDS PAINTED BLUE TO MAKE THEM PLAINLY VISIBLE.

WATER VALVES SHALL BE COMPLETELY OPENED BY THE CONTRACTOR UPON FINAL ACCEPTANCE OF NEW WATER SYSTEMS IN THE PRESENCE OF UTILITY DEPARTMENT PERSONNEL.

ALL FIRE HYDRANTS SHALL BE CONSTRUCTED TO MAKE THEM EASILY ACCESSIBLE TO FIRE PERSONNEL IN CASE OF FIRE. THE MAIN NOZZLE CONNECTION SHOULD ALWAYS FACE THE STREET AND BE 18-18" ABOVE GRADE.

AS STANDARD PRACTICE, WATER MAINS SHALL BE INSTALLED 4 FEET OFF THE BACK OF CURB OR AS APPROVED BY THE CITY.

ALL WATER MAINS SHALL BE NSF-APPROVED FOR POTABLE WATER USE, AND SHALL HAVE A MINIMUM COVER OF 36 INCHES. IN SPECIAL CASES WHERE IT IS IMPOSSIBLE OR INAPPROPRIATE TO PROVIDE ADEQUATE COVER, DUCTILE IRON CLASS 350 OR CONCRETE ENCASEMENT MAY BE USED AS APPROVED BY THE CITY.

ALL PROPOSED WATER MAINS SHALL BE FLUSHED, DISINFECTED AND BACTERIOLOGICALLY CLEARED FOR SERVICE IN ACCORDANCE WITH LATEST AWWA STANDARDS AND THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION REQUIREMENTS.

WATER MAINS SHALL BE AWWA C-900 CL 150 OR D.I.P. CLASS 350 STANDARD CEMENT LINED.

UPON CONSTRUCTION COMPLETION AND ACCEPTANCE OF THE SYSTEM, IT SHALL BE THE DESIGN ENGINEER'S RESPONSIBILITY TO ENSURE THAT THE SYSTEM IS PROPERLY CERTIFIED AND ACCEPTED BY THE HEALTH DEPARTMENT, AND THAT CERTIFIED AS-BUILT DRAWINGS ARE PROVIDED TO THE CITY PRIOR TO PAVING AND ANY USE OF THE SYSTEM. PROVIDE THREE (3) BLUELINE COPIES AND ONE (1) MYLAR OF AS-BUILT DRAWINGS.

MEGALUG OR EQUIVALENT, RESTRAINED JOINT SYSTEM MAY BE USED ON ALL RESTRAINED FITTINGS, VALVES, ETC. MINIMUM DEPTH OF BURY ON PIPES NOT MEETING REQUIRED COVER REQUIREMENTS SHALL FOLLOW THE MOST RECENT DIPRA THRUST RESTRAINT DESIGN GUIDELINES.

WATER SYSTEMS SHALL BE PRESSURE TESTED AT 150 PSI STATIC PRESSURE FOR A PERIOD OF 2 HOURS PER AWWA STANDARDS. TESTS SHALL BE CONDUCTED BEFORE FINAL PAVING AND IN THE PRESENCE OF THE CITY'S INSPECTOR.

ALL WATER SERVICES SHALL BE MARKED WITH A "A" SAWCUT INTO THE CURB OR BY METAL TABS SET INTO THE PAVEMENT.

ALL WATER VALVES AND BLOW-OFFS SHALL BE MARKED WITH AN "X" SAWCUT INTO THE CURB OR BY METAL TABS SET INTO THE PAVEMENT. LOCATION OF METAL TABS IN INCHES FROM EDGE OF PAVEMENT SHALL EQUAL DISTANCE IN FEET FROM EDGE OF PAVEMENT TO VALVE.

WATER SERVICES SHALL NORMALLY BE DOUBLE 1 1/2" SERVICES LOCATED AT SIDE LOT LINES. IN INSTANCES WHERE SERVICES NEED TO BE OFFSET, 1" SINGLE SERVICES SHALL BE SPECIFIED. THESE SERVICES MAY BE OFFSET A MAXIMUM OF 5.0'.

UNIFLANGE 1300 SERIES PIPE RESTRAINTS AS MANUFACTURED BY FORD OR APPROVED EQUAL MAY BE USED AS APPROPRIATE FOR RESTRAINING IN-LINE PRESSURE PIPE EACH SIDE OF PIPE JOINT. AS REQUIRED BY RESTRAINT TABLE.

TRACING WIRE SHALL BE INSTALLED IN ACCORDANCE WITH UTILITY PIPE LOCATION MATERIALS DETAIL.

NO GALVANIZED PIPE, FITTINGS, ETC. ARE ACCEPTED.

ALL WATER METERS SHALL BE INSTALLED AT THE RIGHT OF WAY LINE ONLY REGARDLESS OF SIZE.

ROADWAY CONSTRUCTION NOTES

ALL RIGHT OF WAY OTHER THAN ROADWAY AREAS SHALL BE SEEDED AND MULCHED OR SODDED. THE CITY RESERVES THE RIGHT TO REQUIRE SODDING IN SPECIAL AREAS WHERE EROSION IS A CONCERN.

THE FOLLOWING WILL BE THE STANDARD PROTECTION FOR DITCHES UNLESS DRAINAGE CALCULATIONS INDICATE OTHERWISE:

SWALE PROFILE GRADES	PROTECTION REQUIRED
0.2% - 1.0%	SEEDING AND MULCHING
1.0% - 4.0%	SODDING
4.0% AND GREATER	DITCH PAVING

ALL FRANCHISE UTILITY CROSSINGS, INCLUDING BUT NOT LIMITED TO FPL, BELLSOUTH AND CABLE SHALL BE INSTALLED PRIOR TO INSTALLATION AND COMPACTION OF THE ROAD SUB BASE. ANY CROSSINGS AFTER INSTALLATION OF THE SUB BASE SHALL BE BY DIRECTIONAL BORE.

THE LIMITS OF STABILIZED SUB BASE SHALL EXTEND TO A DEPTH OF SIX INCHES (6") BELOW THE BOTTOM OF THE BASE AND OUTWARD TO TWELVE INCHES (12") BEYOND THE CURB.

THE STABILIZING MATERIAL, IF REQUIRED, SHOULD BE A HIGH BEARING VALUE SOIL, SAND-CLAY, LIMEROCK, RECYCLED CONCRETE, SHELL OR OTHER MATERIAL AS APPROVED BY THE CITY AND A LICENSED SOILS ENGINEER.

THE SUB BASE SHALL BE STABILIZED NOT LESS THAN FORTY (40) POUNDS LIMEROCK BEARING RATIO (LBR). A COMPACTION OF NO LESS THAN NINETY-EIGHT (98%) PERCENT DENSITY BASED ON AASHTO T-180 SHALL BE REQUIRED.

TESTS FOR SUB BASE BEARING CAPACITY AND COMPACTION SHALL BE DONE AT A MINIMUM OF EVERY 300 FEET AND SHALL BE STAGGERED TO THE LEFT, RIGHT AND AT CENTER LINE OF THE ROADWAY.

BASES FOR ALL STREETS SHALL HAVE A MINIMUM SIX INCH (6") DEPTH. PRIMING AND SANDING SHALL BE REQUIRED AS SOON AS BEARING CAPACITY AND COMPACTION HAS BEEN ACHIEVED.

RECYCLED CONCRETE OR LIMEROCK BASES SHALL BE COMPACTED TO (98 %) MAXIMUM DENSITY BASED ON AASHTO T-180 MODIFIED PROCTOR TEST.

RECYCLED CONCRETE MIX DESIGNS SHALL BE SUBMITTED TO THE CITY FOR APPROVAL PRIOR TO START OF SUB BASE PREPARATION.

CEMENT DELIVERY TICKETS SHALL BE PROVIDED TO THE CITY AT THE TIME OF PLACEMENT.

TESTING OF THE IN-PLACE BASE SHALL BE DONE AT INTERVALS EQUIVALENT TO SUB BASE TESTING AND SHALL CONSIST OF, AS A MINIMUM, MOISTURE CONTENT AND COMPACTION TEST.

DESIGN MIXES SHALL BE SUBMITTED TO THE CITY FOR THEIR APPROVAL NO LESS THAN THREE (3) WORKING DAYS PRIOR TO ANY ROADWAY CONSTRUCTION.

ASPHALT SPECIFICATIONS SHALL BE SUBMITTED BY THE DESIGN ENGINEER WITH FINAL PLANS TO THE CITY. FLORIDA STATE CERTIFIED BATCH PLANTS MUST THEN CERTIFY THAT THESE APPROVED SPECIFICATIONS HAVE BEEN MET.

EXTRACTION AND GRADATION TESTS ON ASPHALT MIXES SHALL BE PROVIDED TO THE CITY TO INSURE THAT DESIGN MIXES MEET THE CITY STANDARD SPECIFICATIONS.

THE ROADWAY CROWN SHALL HAVE A STANDARD ONE QUARTER INCH (1/4") PER FOOT SLOPE.

ALL ROADWAYS WITH CURB AND GUTTER SECTIONS SHALL HAVE AS A STANDARD A MINIMUM LONGITUDINAL SLOPE OF 0.30

THE FINISHED PAVEMENT EDGE SHALL BE WITHIN ONE QUARTER INCH (1/4") OF THE ADJACENT CONCRETE CURB.

CONCRETE CURBS SHALL BE PROVIDED ON BOTH SIDES OF ALL STREETS AND CONSTRUCTED WITH 2500 PSI CONCRETE AT 28 DAYS.

CONCRETE CURBS SHALL BE SAW CUT TO A DEPTH EQUAL TO 1/4 OF CURB THICKNESS AT INTERVALS OF TEN FEET (10') WITH EXPANSION JOINTS AT STREET INTERSECTIONS, STRUCTURES AND ALONG CURVES AT SIXTY FEET (60') INTERVALS. ALL EXPANSION JOINT MATERIAL IS REQUIRED TO BE INSTALLED THROUGH THE ENTIRE DEPTH OF THE CONCRETE CURB.

AN "X" SHALL BE CUT IN THE CURB TO MARK THE LOCATION OF WATER DISTRIBUTION SYSTEM VALVE.

AN "T" SHALL BE CUT INTO THE CURB TO MARK THE LOCATION OF ALL VALVES OTHER THAN WATER DISTRIBUTION VALVES.

A "V" SHALL BE CUT IN THE CURB TO MARK THE LOCATION OF ALL SEWER SERVICES.

A "J" SHALL BE CUT IN THE CURB TO MARK THE LOCATION OF ALL RECLAIMED WATER SERVICES.

A "A" SHALL BE CUT IN THE CURB TO MARK THE LOCATION OF ALL WATER SERVICES.

THREE (3) CONCRETE CYLINDERS SHALL BE TAKEN AND TESTED FOR EVERY THREE HUNDRED (300) FEET OF ROADWAY CONSTRUCTED. TEST RESULTS SHALL THEN BE PROVIDED TO THE CITY AS THEY BECOME AVAILABLE.

THE DEVELOPER SHALL PROVIDE ALL REQUIRED PAVEMENT MARKINGS ON ALL ROADWAYS PER CITY, COUNTY AND STATE REQUIREMENTS. CENTERLINE STRIPES SHALL BE PROVIDED ON EXTENSIONS OF CITY COLLECTOR OR ARTERIAL ROADS, COUNTY ROADS AND STATE HIGHWAYS ONLY.

STOP BARS SHALL BE PLACED AT ALL SUBDIVISION ENTRANCES AND INTERSECTIONS CONTAINING CITY COLLECTOR AND ARTERIAL ROADS, COUNTY ROADS AND STATE HIGHWAYS.

ALL TRAFFIC CONTROL DEVICES PLACED AT INTERSECTIONS, PRIVATE STREETS, PUBLIC STREETS, COUNTY ROADS AND STATE HIGHWAYS WITHIN THE CITY LIMITS SHALL BE INSTALLED ACCORDING TO THE MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES, LATEST EDITION.

THE DEVELOPER IS RESPONSIBLE FOR PAYING FEES FOR ALL STREET LIGHTS PRIOR TO ACCEPTANCE OF THE PROJECT BY THE CITY.

STANDARD TURNING RADII FOR INTERSECTIONS:

2-LANE ACCESS OR FEEDER	35'
LOCAL TO COLLECTOR	35'
LOCAL OR COLLECTOR TO ARTERIAL	40'
ARTERIAL TO ARTERIAL	50'

CITY INSPECTOR SHALL BE PRESENT DURING PAVING OF ALL PUBLIC AND PRIVATE ROADS. PAVING SHALL BE PERFORMED DURING NORMAL BUSINESS HOURS, MONDAY THROUGH FRIDAY. PAVING DURING WEEKENDS IS NOT PERMITTED.

CONSTRUCTION METHODS AND DESIGN FOR CONCRETE PAVEMENT SHALL CONFORM TO FDOT STANDARD SPECIFICATION FOR ROAD AND BRIDGE CONSTRUCTION, LATEST EDITION.

ALL CONTRACTORS THAT ARE PERFORMING THE CONSTRUCTION OF PUBLIC IMPROVEMENTS (WATER MAIN, SANITARY SEWER MAIN, RECLAIMED WATER MAIN, STORM WATER PIPES AND INLETS AND ALSO CONSTRUCTION OF ROADWAYS) SHALL BE CERTIFIED WITH THE FLORIDA STATE DEPARTMENT OF PROFESSIONAL REGULATIONS (DPR) FOR THE TYPE OF WORK THAT THEY PERFORM. A COPY OF THE VALID LICENSE IS REQUIRED AT PRE CONSTRUCTION MEETING.

UTILITY DEPTH:

- HIGH VOLTAGE UTILITIES SUCH AS POWER (FEEDER, SERVICE AND DROPS) SHALL BE BURIED A MINIMUM OF 30 INCHES IN DEPTH.
- LOW VOLTAGE UTILITIES SUCH AS PHONE AND CABLE TV SHALL BE BURIED A MINIMUM OF 12 INCHES IN DEPTH FOR FEEDER AND SERVICES. SERVICE DROPS SHALL BE BURIED A MINIMUM OF 8 INCHES IN DEPTH.
- HIGH VOLTAGE UTILITIES INSTALLED PARALLEL TO PRESSURE MAINS SHALL MAINTAIN A MINIMUM FIVE FOOT SEPARATION.

GEOTECHNICAL TESTING REPORTS SIGNED AND SEALED BY A PROFESSIONAL ENGINEER SHALL BE SUBMITTED TO THE CITY OF ORMOND BEACH PRIOR TO FINAL SIGN OFF. REPORTS SHALL CLEARLY LABEL PROJECT NAME AND PHASE.

LANDSCAPE NOTES:

1. The Landscape Contractor shall be responsible for all materials and all work as called for on the Landscape Plans and in the Landscape Specifications. In the event of variation between quantities shown on plant list and the plans, the plans shall control. The Landscape Contractor shall verify all quantities and report any discrepancies at the time of bidding.
2. The Landscape Contractor shall review architectural/engineering plans and become thoroughly familiar with surface and subsurface utilities.
3. Every possible safeguard shall be taken to protect building surfaces, equipment and furnishings. The Landscape Contractor shall be responsible for any damage or injury to person or property which may occur as a result of negligence in the execution of the work.
4. The work shall be coordinated with other trades to prevent conflicts. Coordinate the planting with the irrigation work to assure availability and proper location of irrigation flows and plants.
5. All planting shall be performed by personnel familiar with planting procedure and under the supervision of a qualified planting foreman.
6. All plant material shall be graded Florida No. 1 or better as outlined under Grades and Standards for Nursery Plants, Part I and II, published by the Florida Department of Agriculture and Consumer Services or to the standards as given by the latest "American Standard for Nursery Stock," American National Standards Institute.
7. The Landscape Architect or Owner shall have the right, at any stage of the operations, to reject any and all work and materials which, in his opinion, do not meet with the requirements of these specifications.
8. Except as otherwise specified, the Landscape Contractor's work shall conform to accepted horticultural practices as used in the trade.
9. The minimum acceptable size of all plants, measured after pruning, with branches in normal positions, shall conform to the measurements specified on the plant list or as indicated on the landscape drawings. Height and spread dimensions refer to main body of the plant, and not extreme branch tip to tip. The caliper of tree trunks is to be taken one foot above the ground level.
10. Plants shall be protected upon arrival at the site, by being thoroughly watered and properly maintained until planted.
11. All tree pits shall be excavated to size and depth in accordance with the USDA Standard for Nursery Stock 260.1, unless shown otherwise on the drawings, and backfilled with the specified planting soil. The Landscape Contractor shall test the all tree pits with water before planting to assure proper drainage percolation is available.
12. The Landscape Contractor shall be responsible for proper watering of all plants. All plants shall be thoroughly watered at time of planting and kept adequately watered until time of acceptance. It shall be the Landscape Contractor's responsibility to assure that plants are not over watered.
13. It shall be the Landscape Contractor's responsibility to prevent plants from falling or being blown over, to restraighten and replant all plants which lean or fall and to maintain all plants which are damaged due to lack of proper guying or staking. The Landscape Contractor shall be legally liable for any damages caused by forfeitability of any plant materials.
14. All trees and all palms shall be guyed or staked or braced. The Landscape Contractor shall determine which small or multi-trunk trees need to be guyed and staked to maintain plumb. Staking of trees and shrubs, if required, shall be done after planting and guying detail prepared by the Landscape Architect. It shall be the responsibility of the Landscape Contractor to remove guys and stakes from the trees and job site after a period of 90 days.
15. Plants blown over by high winds, within the guaranteed period, shall not be cause for additional expense to the Owner, but shall be the responsibility of the Landscape Contractor. Damaged plants shall be replaced by the Landscape Contractor at no additional cost to the Owner.
16. Sod shall be certified to be free of the imported fire ant. Sod shall have a dense growth of acceptable grass, reasonably free of weeds with not less than 1 1/2" of soil firmly adhering to roots. It shall be the responsibility of the Landscape Contractor to maintain and determine the exact ground required. This amount shall be verified with the Owner or Landscape Architect before installation.
17. The Landscape Contractor shall insure adequate vertical drainage in all plant beds, planters, and sod areas. Vertical drilling through any compacted fill to native soil shall be accomplished to insure drainage. If soil around pit is compacted to assure positive drainage, this hole shall be brought up by the Landscape Contractor at time of bidding.
18. The Landscape Contractor shall insure that his work does not interrupt established or projected drainage patterns.
19. The Landscape Contractor shall prune, shape and remove dead foliage/limbs from existing plant material to remain. Confirm with the Landscape Architect or Owner the extent of work required at time of bidding.
20. Mulch - All plant beds shall be top dressed with 3" shredded hardwood mulch (or approved equal).
21. Transplanted Material - The Landscape Contractor shall be responsible for determining and evaluating which plant materials are suitable for transplanting and shall verify this with the Landscape Architect or Owner. The Landscape Contractor shall take all reasonable, horticulturally acceptable measures to assure the successful transplanting of determined plant materials. The Landscape Contractor shall be responsible for replacing any relocated plant materials which die or whose resources are not taken, as determined by the Landscape Architect or Owner. Replacement plants shall be of identical species and size if required.
22. MAINTENANCE PRIOR TO FINAL INSPECTION AND ACCEPTANCE:

    Maintenance shall commence after each plant is planted and the maintenance period shall continue until the job or specific phase of the job is accepted by the Landscape Architect or Owner. Before work shall be taken to instruct the Owner or his representatives in general maintenance procedures.

    Plant maintenance shall include watering, pruning, weeding, cultivating, mulching, replanting, and repairing of guys, replacement of ties or stakes, resetting plants to proper grades or upright positions and restoration of the planting manner and all other work needed for proper growth of the plants.

    During the maintenance period and up to the date of final acceptance, the Landscape Contractor shall do all necessary spraying and/or dusting of trees and shrubs. Upon completion of all planting, an inspection for acceptance of work will be held. The Landscape Contractor shall notify the Landscape Architect or Owner for scheduling of the inspection 10 days prior to the anticipated date.

    At the time of the inspection, if all of the materials are acceptable, a written notice will be given by the Landscape Architect or Owner to the Landscape Contractor stating the date when the Maintenance Period ends.

    GUARANTEE AND REPLACEMENT:

    All plant materials shall be guaranteed for one (1) year from the time of final inspection and interim acceptance shall be alive and in satisfactory growth for each specific kind of plant at the end of the guaranteed period.

    At the end of the guarantee period, any plant required under this contract that is dead or not in satisfactory growth, as determined by the Owner or the Landscape Architect, shall be removed and replaced. Replacement plants shall have an extended guarantee, as noted above, from time of replacement.

    All replacements shall be planted of the same kind and size as specified on the plant list. They shall be the responsibility of the Landscape Contractor.

NOTE: LOCATE PLANTS IN A TRIANGULAR PATTERN AS SHOWN, SPACED EQUIDISTANT FROM EACH OTHER (AT SPACING SPECIFIED IN THE PLANT LIST).

RE: Tomoka Oaks Golf Villas
Development Order
Ordinance No. 2006-17

Dear Mr. Merrell:

At its October 16, 2006, meeting, the City Commission of Ormond Beach approved Ordinance No. 2006-17 authorizing a Development Order for the Tomoka Oaks Golf Villas and rezoning from R-2 (Single Family Low Density) to PRD (Planned Residential Development). A copy of the ordinance and development order is enclosed for your information. Please be aware this development order contains expiration dates.

The ordinance and development order have been sent to the Clerk of the Court for recording, and a recorded copy will be forwarded to you when it has been received from the Clerk. In the meantime, should you have any questions regarding the development order, please contact Mr. Clay Ervin, Planning Director, at 676-3238.

Sincerely,

Veronica Patterson

Veronica Patterson, CMC
City Clerk

RE: Ordinance No. 2006-17
Tomoka Oaks Golf Villas
Development Order

Dear Ms. Matousek:

Enclosed herewith is a certified copy of Ordinance No. 2006-17 together with the original Development Order for a 147-acre parcel located at the Tomoka Oaks Subdivision in Ormond Beach, Florida.

Kindly return the recorded documents in the enclosed, self-addressed envelope and bill the City for the costs incurred.

Sincerely,

Veronica Patterson, CMC
City Clerk

Dear Mr. Gilreath:

Pursuant to Rule 12D-1.011(1), *Florida Administrative Code*, enclosed is a certified copy of Ordinance No. 2006-17 which was adopted by the City of Ormond Beach City Commission on October 16, 2006, relative to 147-acre parcel of real property which has been rezoned from R-2 (Single Family Low Density) to PRD (Planned Residential Development). The property is located at Tomoka Oaks Subdivision in the City of Ormond Beach.

Please contact me at 676-3340 should you have any questions.

Sincerely,

Veronica Patterson, CMC
City Clerk

BEFORE THE
CITY COMMISSION
OF THE
CITY OF ORMOND BEACH

IN RE: Application of RTH, Inc.
PRD-06-32
"Tomoka Oaks Golf Village" Planned Residential Development
within the limits of the existing Tomoka Oaks Golf Course

DEVELOPMENT ORDER

This matter having come on for public hearing before the City Commission of the City of Ormond Beach, Florida, on October 3, 2006 and October 17, 2006, and the City Commission having considered those items as required by Chapter 1, Article II, Section 1-18(D)(3) of the *Land Development Code*, and having heard testimony and evidence from all affected persons, the City Commission hereby finds that:

(1) The land use conforms to the standards and requirements of this *Land Development Code* and will not create undue crowding beyond the conditions normally permitted in the PRD, Planned Residential zoning district, or adversely affect the public health, safety, welfare or quality of life;

(2) The land use is consistent with the *Comprehensive Plan*;

(3) The land use will not adversely impact environmentally sensitive lands or natural resources, including but not limited to waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells;

(4) The land use will not substantially or permanently depreciate the value of surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties;

(5) Public facilities, such as roads, sidewalks, bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds will not be unduly burdened and are adequate to serve the land use;

(6) Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe;

(7) The land use is functional in the use of space and aesthetically acceptable;

(8) The land use provides for the safety of occupants and visitors;

(9) The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area; and

(10) The testimony provided at public hearings.

Thereupon and in consideration thereof, the City Commission hereby orders that:

A. The application of RTH, Inc., a Florida corporation, for the "Tomoka Oaks Golf Village" a planned residential development to allow the construction of consisting of 119-multifamily units (townhomes and condominiums) and 3-single family dwellings on a 147-acre parcel within the limits of the existing Tomoka Oaks Golf Course, in the R-2 Single Family Low Density zoning district, on that real property described and depicted on Exhibit "A" attached hereto and incorporated herein by reference, is hereby granted, subject to the following conditions:

1. All applicable provisions of Chapter 2, District and General Regulations, Article II, District Regulations, Section 2-35, Planned Residential Development, of the City of Ormond Beach *Land Development Code*, except as otherwise specifically modified hereby, shall at all times be strictly complied with;

2. That the following recommendations of the Planning Board shall be resolved and strictly complied with at all times:

a. The owner shall provide for covenants and restrictions that restrict the golf course to open space and golf course use. The City of Ormond Beach shall be involved in a manner that requires the approval of the City if the owners ever wish to remove the restriction on use.

b. The owner shall provide a note on the plat for the property indicating to future property owners the proximity of the airport and the flight pattern of the traffic from the airport.

c. The applicant shall include a landscape buffer around the 3 single-family lots that is a minimum of 10-feet in width with trees and shrubs in accordance with the minimum buffering requirements specified by the Land Development Code, Chapter 3, Article I, Section 3-06, as currently adopted.

3. That the following comments of the Site Plan Review Committee shall be resolved and strictly complied with at all times:

CITY LANDSCAPE ARCHITECT COMMENTS:

a. Wheel stops must be provided. Vehicle bumpers will not overhang the planting beds.

b. Applicant must provide a littoral planting detail and specifically show where they are to be planted on the pond banks in all applicable ponds; applicant must provide calculation for each pond; clarify if ponds are wet or dry; if dry then littoral planting is not required.

c. Applicant must provide a note on the plans that any tree needed to be removed during construction will require a one for one replacement penalty; protected trees will require one 2.5" caliper variety and specimen trees will require one 4.5" caliper variety to suit its planting location; replacement trees need to be Florida #1 at a minimum height of ten feet (10'). CPH will make the determination as to what is best suited for each replacement.

d. Remove the asterisk note on page TR-8.

CIVIL ENGINEER COMMENTS:

e. Applicant must provide legend to clarify phasing.

f. Sheet C6 – Include Temporary Construction Entrance in Phase 1A.

g. Sheet C2 – Provide As Built Requirements for Water and Sewer; relocate the As Built Requirements for Roadway Construction from sheet C36.

h. Sheet C22 –Removing the fire hydrant from the pond.

i. Sheets C45-C47 – Estimated Wet Season Water Table Elevation and Design Pond High Water Elevation to each section.

j. Applicant must locate easements for utilities and lift station on the plat.

CHIEF BUILDING OFFICIAL COMMENTS:

k. Applicant must provide additional fire hydrants to townhouse and condo locations.

l. Applicant must provide location of fire department connections.

m. The location of handicap spaces for the clubhouse is unacceptable; accessible parking spaces shall not cross the roadway and shall be as close to the building as possible.

FIRE DEPARTMENT COMMENTS:

n. Fire hydrants shall be installed at intervals not to exceed 500 feet; provide location of additional hydrants on plans.

PUBLIC UTILITIES COMMENTS:

o. Manhole #44 on page C18 of the plans needs to be lined.

p. Applicant must update fire hydrant assembly detail.

q. Show how reuse will be connected to existing reuse line or the proposed reuse line to be constructed to the reuse storage pond by Tomoka Oaks.

r. Reuse meter to be provided by owner of make and model approved by the City. A reuse agreement will need to be executed by the owner and the City.

s. Applicant must confirm if water master meter shall be needed or if units will be individually metered.

t. Applicant must provide match lines on composite utility sheets.

u. All water and sewer lines to be owned and maintained by City must be in public rights of way or 40 foot access and utility easement; an easement or deed is also needed for the lift station.

POLICE DEPARTMENT COMMENTS:

v. Parking lot lighting, pole heights must not exceed 20 feet and maximum wattage shall be 250 watts (see Land Development Code Chapter 3, Article 5 Architectural Design Standards, Chapter 3 Page 10). This will impact lighting calculations currently submitted.

4. The subdivision is approved to have a total of consisting of 119-multifamily units (townhomes and condominiums) and 3-single family dwellings with the following dimensions as shown on the attached plans. The townhomes and condominiums shall be developed in accordance with the conceptual plans approved for the proposed PRD and the requirements established in Chapter 2, Article IV, Section 2-57 M. Multi-Family Dwellings:

Land Use	Min. Lot Area	Min. Lot Width	Front Setback	Side Corner	Side Setback	Rear Setback
Single-family	10,000-square feet	100- feet	30-feet	20-feet	8-feet total 20-feet	25-feet

5. As a stand alone zoning district the following permitted uses and dimensional criteria for this Planned Residential Development are hereby established as follows:

1. **Permitted Principal Uses and Structures.**

   a. Single-family Detached units

   b. Townhouse Units, as located on the conceptual development plan prepared by Conklin Porter and Homes, CPH project number T7501, dated June 2005.

   c. **Multifamily Condominium units** as located on the

conceptual development plan prepared by Conklin Porter and Homes, project number T7501, dated June 2005.

2. Permitted Accessory Uses and Structures

a. Single Family detached dwellings and all accessory uses customarily associated with, dependent on and incidental to their permitted principal uses, provided that such uses conform to the regulations set forth in Chapter 2, Article III.

b. Home Occupations, Type "A", subject to the regulations set forth in Chapter 2, Article III.

6. The project shall be phased over a 5-year period and shall consist of 6 phases; a new phase shall not be initiated until the improvements and enhancements identified in the previous phase have been initiated and are substantially completed. This condition shall not prevent the owner from completing multiple phases concurrently. The following summarizes the phasing of the project:

Phase	Description
1A	Construction of the tennis facility, maintenance area, parking, spine road and associated stormwater improvements. The "Golf Townhomes" at the northern most portion of the development (9th and 10th fairway) will be constructed
1B	Demolition and reconstruction of the clubhouse and parking lot.
1C	Completion of all of the townhomes in the golf and tennis areas.
2A	Development of condominiums at tennis facility.
2B	Development of condominiums at the driving range and clubhouse areas.
3	Development of 3-single family homes on the estate lots.

B. The final plans for the development project shall be consistent with the provisions of this Development Order and the plans depicted in Exhibit "B" hereto; provided, however, that the said plans shall be amended as necessary in order to achieve such consistency.

C. No material change shall be made to the final plan for the development project without further review by the Planning Board and approval by the City Commission in accordance with the procedures for the approval of this Development Order.

D. All site construction activity shall be performed in strict compliance with the terms and conditions of this Development Order approved for this development project, and of the *Land Development Code*.

E. If the final plan approval lapses under the provisions of Section 1-14(C)(2) of the *Land Development Code*, before the planned development permit can be re-established, a new PRD Development Order shall be considered by the City Commission.

F. In the event the use of the land approved by this PRD Development Order is abandoned for a period of two (2) years or there has been no construction activity during that period, the permit shall be void and a Notice of Final Plan Revocation filed under the provisions of Section 1-14(C)(2) of the *Land Development Code*, before the planned development permit can be reestablished, a new PRD Development Order shall be considered by the City Commission.

G. Semi-annually, the Neighborhood Improvement Officer shall prepare a report indicating which planned developments are not in compliance with Section 1-14, or the conditions stipulated in the Development Order, in the event a Neighborhood Improvement Officer subsequently determines there to be any violation, such Officer shall promptly present such determination to the Special Master for hearing.

H. Pursuant to Chapter 1, Article II, Section 1-14(C) (2), of the *Land Development Code*, the first phase of this Special Exception shall automatically expire and become void, without further action by the City Commission, 24 months (October 17, 2008) from the date of City commission approval, unless a site plan or building permit has been issued prior to that date; and a use building permit is so issued, this Special Exception shall remain in full force and effect unless and until subsequently amended by the City Commission.

I. The expiration date of the sixth and final phase of the project to be constructed shall be five (5) years in the future, or to October 17, 20011, and shall automatically expire and become void, without further action by the City Commission, unless a building permit

is issued for the second and final phase of the project prior to that date; and if a building permit is so issued, the Development Order shall remain in full force and effect unless and until subsequently amended by the City Commission

J. This Development Order shall be recorded in the public records of Volusia County, Florida, at the expense of RTH, Inc., a Florida corporation, and shall be binding upon RTH, Inc., a Florida corporation, and its successors and assigns, and shall run with the real property described in Exhibit "A" attached hereto and incorporated herein by reference. (Parcel ID No. 3242-07-00-0010)

ORDERED this 17th day of October, 2006.

CITY MANAGER
MEMORANDUM

TO: Honorable Mayor Costello and City Commissioners

FROM: Isaac D. Turner, City Manager

DATE: September 28, 2006

SUBJECT: Tomoka Oaks Golf Villas-Rezoning to Planned Residential Development

Introduction: This is a request by Robert A. Merrell, Esquire, representing RTH, Incorporated, to rezone a 147-acre parcel from R-2 (Single Family Low Density) to PRD (Planned Residential Development). The subject property is known as the Tomoka Oaks Golf Course.

Background: The subject property is currently being used for a golf course and country club. The owners of the property are seeking to maintain the current uses and add 122 residential units on the site. The property has a land use designation of "Low Density Residential" on the adopted Future Land Use Map and is classified as R-2 (Single-Family Low Density) on the Official Zoning Map. Accordingly, the property could be redeveloped for single-family dwelling units at a maximum density of 4.3 units per acre with lots that meet the minimum dimensional standard for the R-2 zoning district (minimum lot area of 10,000 square feet; minimum lot width 100-feet; minimum lot depth 100 feet).

In 2005, the applicant contacted the City of Ormond Beach to review options for renovating the golf and country club that included residential elements such as townhomes, condominiums and single-family homes. Staff researched the land use and zoning of the property and discovered that there were development rights for single-family homes. Staff was concerned with these critical issues:

1. **Are there any existing restrictions on the use of the property for any other use than a golf course?** The staff's main concern is that there are private restrictions that supersede the land use and zoning that would prohibit any kind of uses except for the golf and country club. A title opinion from the property owner indicates that there are no such restrictions and that the use of the property is only subject to the City of Ormond Beach Comprehensive Plan and Land Development Code (LDC).

2. **Integration of residential land uses cannot have a negative impact on the adjoining residential property owners; specifically, any new residential development could not be located directly adjoining to existing residential lots within the Tomoka Oaks subdivision.** The applicant agreed that views from the abutting residential properties had to be protected and that the location and orientation of the residential development could not negatively impact the existing homes.

3. **The remaining portion of the golf course will be restricted that it cannot be used for residential development so that adjoining neighbors are confident that the use of the property for a golf course and recreational open space is protected.** The applicant has agreed to provide that surety through an easement over the remaining portion of the golf course that will ensure that the property will remain as open space/recreational use.

Through a series of meetings to discuss how the property could be redeveloped and the staff's concerns with the impacts on the adjoining single-family homes, it was decided that the owners could seek approval of a planned development that included the clustering of the residential development allowed on the property. The planned development process allows for the concentration of the residential units in a manner with minimal impacts to the existing land owners and would still maintain the golf course as it is currently laid out. The staff emphasized that the application would need to reflect attention to the impacts on the adjoining property owners and emphasized the location, spacing and appearance of the proposed buildings. Staff further required that the applicant look at the traffic impacts and how to orient access to the new residential development so that there are no disruptions or impacts to the existing residences. The staff indicated that the remainder of the golf course had to be restricted so that the future of redeveloping it for additional residential uses was not possible. Lastly, staff indicated that the phasing of the development could not load all of the amenities (clubhouse, tennis facility, driving range) until the last phase and that these improvements had to be developed concurrently with the residential aspects of the project.

The project consists of a multiple phased development whereby the existing clubhouse, tennis, swimming pool and driving range facilities will be demolished and replaced. The "golf course" development consisting of 30 townhomes and 54 condominium units will be developed on the northeast area of the course by the 9th and 10th fairways. The "tennis complex" will have 5 townhome units and 30 condominium units. The townhomes are two-story structures with an average height of 22 feet. The condominiums are three-story buildings with an average height of 39 feet. There are three single-family detached lots proposed for the northwest portion of the site. These lots will comply with the dimensional standards established for the R-2 zoning district. The project will be phased over a 5-year period and will consist of six (6) phases.

Discussion: The proposed rezoning to PRD was heard at the August 10, 2006, meeting of the Planning Board. There was considerable comment from the residents of the Tomoka Oaks subdivision regarding the development. The primary concerns pertained to the traffic impacts, impacts to the utilities (water pressure), visual impacts onto the existing residential homes, lack of maintenance of the existing golf course, notification of future owners of the flight pattern and proximity to the airport, and certainty that the remainder of the golf course would remain. The Planning Board recommended approval of the proposed rezoning to PRD subject to the following ten conditions.

1. The owner shall provide for covenants and restrictions that restrict the golf course to open space and golf course use. The City of Ormond Beach shall be involved in a manner that requires the approval of the City if the owners ever wish to remove the restriction on use.
2. The owner shall provide a note on the plat for the property indicating to future property owners of the proximity of the airport and the flight pattern of the traffic from the airport.
3. The applicant shall include a landscape buffer around the 3 single-family lots that is a minimum of 10-feet in width with tress and shrubs in accordance with the minimum buffering requirements specified by the Land Development Code, Chapter 3, Article I, Section 3-06, as currently adopted.
4. The applicant is to research and develop a plan to improve the traffic flow and safety at the entrance to Tomoka Oaks.
5. The City and the owner shall research the amount of landscaping to be placed on the site and see where there are opportunities to provide larger trees within the buffers (increase size from 2 ½ inch caliper to 4 inch caliper).
6. The City staff will investigate the opportunity to provide reuse water to the Tomoka Oaks residences as well as the golf course.
7. The owner and City shall research and develop minimum maintenance standards to be included as part of the PRD Development Order.
8. The City shall research and remedy, in cooperation with the applicant, any problems to water pressure within the system serving the Tomoka Oaks development.
9. Staff is to verify that an environmental study for the project had been completed and was technically correct.
10. There is a provision in the Development Order for the PRD that a new phase could not be initiated until the improvements and enhancements identified in the previous phase had been initiated and where substantially completed. This condition would not prevent the owner from completing multiple phases concurrently.

Staff met with the property owners since the Planning Board and reviewed the 10 conditions. All of the conditions have been addressed. The applicant and the City staff could not find specific maintenance standards, but have agreed that there will be a minimum standard established prior to commencement of construction. The traffic engineer has provided background information regarding the single warrant study and improvements in traffic safety at Tomoka Oaks Boulevard.

Recommendation: It is recommended that the City Commission **APPROVE** the proposed Tomoka Golf Village Planned Residential Development (PRD), thereby allowing the redevelopment of the site for 119 multifamily units (townhomes and condominiums) and 3 single family dwellings, subject to the recommendations of the Planning Board and the outstanding comments of the Site Pan Review Committee.

Prepared by: Clay Ervin, AICP, Planning Director

STAFF REPORT

City of Ormond Beach
Department of Planning

DATE: September 26, 2006

SUBJECT: Tomoka Golf Village Planned Residential Development

APPLICANT: Robert A. Merrell, representing RTH Inc.

NUMBER: PRD-06-32

PROJECT PLANNER: Teri Holleran, Senior Planner/ Clay Ervin, AICP, Planning Director

INTRODUCTION: This is a request by Robert A. Merrell, Esquire, representing RTH, Incorporated, to rezone a 147 acre parcel from R-2 (Single family low density) to PRD (Planned Residential Development). The subject property is known as the Tomoka Oaks Golf Course.

BACKGROUND: The subject property is currently being used for a golf course and country club. The owners of the property are seeking to maintain the current uses and add 122-residential units on the site. The property has a land use designation of "Low Density Residential" on the adopted Future Land Use Map and is classified as R-2 (Single-family low density) on the Official Zoning Map. Accordingly, the property could be redeveloped for single-family dwelling units at a maximum density of 4.3-units per acre, with lots that meet the minimum dimensional standard for the R-2 zoning district (minimum lot area of 10,000 square feet; minimum lot width 100-feet; minimum lot depth 100 feet).

In 2005, the applicant contacted the City of Ormond Beach to review options for renovating the golf and country club that included residential elements such as townhomes, condominiums and single-family homes. Staff researched the land use and zoning of the property and discovered that there were development rights for single-family homes. Staff was concerned with these critical issues:

1. **Are there any existing restrictions on the use of the property for any other use than a golf course?** The staff's main concern is that there are private restrictions that supersede the land use and zoning that would prohibit any kind of uses except for the golf and country club. A title opinion from the property owner indicates that there are no such restrictions and that the use of the property is only subject to the City of Ormond Beach Comprehensive Plan and Land Development Code (LDC).

2. **Integration of residential land uses cannot have a negative impact on the adjoining residential property owners; specifically, any new residential development could not be located directly adjoining to existing residential lots within the Tomoka Oaks subdivision.** The applicant agreed that views from the abutting residential properties had to be protected and that the location and orientation of the residential development could not negatively impact the existing homes.

3. **The remaining portion of the golf course will be restricted that it cannot be used for residential development so that adjoining neighbors are confident that the use of the property for a golf course and recreational open space is protected.** The applicant has agreed to provide that surety through an easement over the remaining portion of the golf course that will ensure that the property will remain as open space/recreational use.

Through a series of meetings to discuss how the property could be redeveloped and the staff's concerns with the impacts on the adjoining single-family homes, it was decided that the owners could seek approval of a planned development that included the clustering of the residential development allowed on the property. The planned development process allows for the concentration of the residential units in a manner with minimal impacts to the existing land owners and still would maintain the golf course as it is currently laid-out. The staff emphasized that the application would need to reflect attention to the impacts on the adjoining property owners and emphasized the location, spacing and appearance of the proposed buildings. Staff further required that the applicant look at the traffic impacts and how to orient access to the new residential development so that there are no disruptions or impacts to the existing residences. The staff indicated that the remainder of the golf course had to be restricted so that the future of redeveloping it for additional residential uses was not possible. Lastly, staff indicated that the phasing of the development could not load all of the amenities (clubhouse, tennis facility, driving range) until the last phase and that these improvements had to be developed concurrently with the residential aspects of the project.

Project Description: The project consists of a multiple phased development whereby the existing clubhouse, tennis, swimming pool and driving range facilities will be demolished and replaced. The "golf course" development consisting of 30 townhomes and 54 condominium units will be developed on the northeast area of the course by the 9th and 10th fairways. The "tennis complex" will have 5 townhome units and 30 condominium units. The townhomes are two-story structures with an average height of 22-feet. The condominiums are three-story buildings with an average height of 39-feet. There are three single-family detached lots proposed for the northwest portion of the site. These lots will comply with the dimensional standards established for the R-2 zoning district.

The project will be phased over a 5-year period and will consist of 6 phases. The following summarizes the phasing of the project. Please refer to the plans for details and specifics of the phasing plan.

Phase	Description
1A	Construction of the tennis facility, maintenance area, parking, spine road and associated stormwater improvements. The "Golf Townhomes" at the northern most portion of the development (9th and 10th fairway) will be constructed
1B	Demolition and reconstruction of the clubhouse and parking lot.
1C	Completion of all of the townhomes in the golf and tennis areas.
2A	Development of condominiums at tennis facility.
2B	Development of condominiums at the driving range and clubhouse areas.
3	Development of 3-single family homes on the estate lots.

The primary focus is to preserve the existing golf course, locate the new buildings so that they do not impact the existing homes and enhance the landscaping to minimize the impacts of the new development.

The applicant has requested a rezoning to Planned Residential Development (PRD). The purpose of a Planned Development is to:

1. Achieve innovative and creative design and a high level of amenities within residential and non-residential developments;
2. Promote efficient use of land by facilitating more cost effective and environmentally sensitive site planning, including the arrangement of buildings, circulation systems, land use and facilities;
3. Stimulate opportunities for varied housing types and diversified economic opportunities;
4. Conserve and protect the natural environment including wetlands, natural habitat, drainage corridors, flood prone lands, and other environmentally sensitive lands;
5. Provide for more useable and suitably located open space and recreation facilities and other common facilities than would otherwise be provided under conventional land development procedures; and
6. Achieve harmonious building and site designs.

Although Planned Developments provide opportunities for unique concepts, Planned Developments shall comply with the community character as promoted by the City Commission and shall be designed to limit impacts of the development internally within the confines of the Planned Development through compliance with the regulations established in the Comprehensive Plan and as stipulated in the Land Development Code.

ANALYSIS:

Planned Residential Development: Section 2-35, Chapter 2, Article II of the Land Development Code details the following requirements for a Planned Residential Development:

A. General: The proposed development is consistent with the purpose and intent of the Planned Residential Development.

B. Permitted and other uses: The proposed development complies with this section of the code. The permitted uses consist of single-family, townhome and multi-family residential developments. Other uses consist of golf course, tennis facilities and associated club house facilities.

C. Density: The proposed development is consistent with this criterion. The area encompassed by the PRD is 147-acres. The adopted Future Land Use Map designates the property as "Low Density Residential" which allows up to 4.3 units per acre. This means that the theoretical maximum development on the site would be 632 units.

D. Dimensional requirements: The proposed development is in compliance with this requirement.

E. Interior road system: The proposed development is in compliance with this requirement.

F. Off-street parking: The proposed development meets or exceeds the standards established in the LDC.

G. Landscaping and utility lines: The proposed development meets or exceeds the standards established in the LDC.

H. Recreational facilities: The project meets and exceeds all of the minimum recreational requirements established for PRDs.

I. Supplemental Requirements: The proposed development complies with the requirements for supplemental requirements.

Comprehensive Plan and Zoning: The site is designated "Low Density Residential" (LDR) on the City's Future Land Use Map and is zoned R-2 (single-

family low density). The following table shows the surrounding land uses and zoning:

	Current Land Uses	Future Land Use Designation	Zoning
North	Tomoka Oaks subdivision	Low Density Residential	R-2 (Single family low density)
South	Tomoka Oaks subdivision	Low Density Residential	R-2 (Single family low density)
East	Tomoka Oaks subdivision	Low Density Residential	R-2 (Single family low density)
West	Tomoka Oaks subdivision	Low Density Residential	R-2 (Single family low density)

Site Characteristics and Services:

Soils: According to the Soil Survey of Volusia County, the underlying soil type is Soils Group No. 54-Quartzipsamments, gently sloping. A map and description of these soil types are included in Appendix A. The development potential of this soil type is "very high" according to the Soil Survey of Volusia County.

Wetlands/Flood Zone: The proposed development does not impact any wetlands nor is the development located within a designated flood zone.

Vegetation: The site has been impacted by the development of the golf course. The vegetation consists predominately of recreational grasses and ground cover, with areas of oaks, magnolia and pine interspersed.

Water and Sewer: The proposed development will require the extension of existing water and sewer lines serving the Tomoka Oaks subdivision. The proposed development of 122 residential units will generate an additional demand of 13,664 gallons per day for potable water and 12,298 gallons of wastewater per day. There is sufficient capacity with the water and wastewater treatment facilities for this development. This development will not result in a negative impact to water pressure and fire flows to the area.

Transportation: A traffic impact assessment report was prepared in support of the proposed rezoning to PRD. The analysis reflected the impacts of the new uses consisting of 119 multifamily dwelling units and 3 single-family dwelling units. The amount of trips generated by the new uses are projected to be 772 average daily trips and 72 PM peak-hour trips, based on the ITE Trip Generation Manual, 7th edition. It is assumed that the project will be completed by 2008.

The distribution and assignment of traffic is based on the adopted Central Florida Regional Planning Model II (CFRPM II). The result is that a majority of the traffic

is projected to Tomoka Oaks Boulevard as the primary route to enter and exit the project (88% of the traffic) with the remaining 12% of the traffic using other routes, such as Rio Pinar. The majority of the traffic exiting/entering Tomoka Oaks is projected to impact the segment of Nova Road between SR 40 and Granada Boulevard. The attached spreadsheet summarizes the road segments and the traffic impacts resulting from the project at the built-out condition in 2008.

In summary, the proposed development will not negatively impact the level of service on the impacted roadways and does not require any additional traffic mitigation efforts.

Parking: Parking for the residential and non-residential uses will comply with the requirements of Chapter 3, Article III of the LDC.

Stormwater Management: The applicant is required to obtain approval of the master stormwater plan from the City and the St. John's Water Management District. The preliminary design indicates that the project will comply with the requirements established in the LDC. The proposed development plan reflects that the stormwater plan consisting of several basins where the stormwater is collected from sheet flow across the site and is directed either directly into swales or pipes where it is transferred to on-site retention ponds for treatment prior to being discharged. Please be aware that the drainage on this site will not be an issue given the high permeability rate of the underlying soils.

Solid Waste: The site will be served by City sanitation services. There is sufficient capacity in the City system to meet projected demand.

Other Services: The site is located within an approximate 5-7 minute response time from police and fire stations. The nearest fire station is Station #92 on Nova Road, south of Granada Boulevard. There is sufficient response time from both Police and Fire services to the site.

Roadway	Segment		Adopted LOS	Daily Capacity at Adopted LOS	Existing Daily Traffic	Projected 2008 Background Traffic	Vested Trips	Project Trips from Tomoka Golf Villas	2008 Projected Total Daily Traffic	Future LOS

CRITERIA FOR APPROVAL: In considering an application for a PRD, the City Commission may recommend approval, approval with conditions, or denial on the extent to which the development offers site amenities above that normally found for permitted uses in the district with regard to the following:

a) Innovative site design.

b) Coordinated architectural design.

c) Open space, recreation, common areas.

d) Coordinated streetscape elements.

The proposed development utilizes superior architectural design, well-laced landscaping and the existing golf course to introduce new residential units in a manner that minimize impacts on the adjoining residential development. The integration of new golf and tennis facilities improve the overall aesthetics of the area and provide for a needed upgrade to the existing facilities. The development utilizes landscaping, lighting and access points to minimize impact on the adjoining properties, but still maintain an efficient and attractive internal road system. In summary, it is staff's opinion that the proposed development complies with the previous criteria.

The following are standard criteria to be used by the Planning Board and City Commission in its review of the proposed rezoning to PRD. In its review of each application for amendment, the Planning Board and City Commission shall consider:

1. **The proposed development conforms to the standards and requirements of this Code and will not create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare or quality of life.**
   The subject property has a land use classification that allows up to 632-homes to be developed on the site. There could be approximately 300 homes developed on the golf course site, based on the R-2 zoning. This type of development would eliminate the entire golf course. The applicant has requested a rezoning to PRD to cluster the development to minimize impacts to the golf course. The resulting development plan of 122 units results in a density of .82 units per acre. Given the development potential and the proposed development, the application complies with this review criterion.

2. **The proposed development is consistent with the Comprehensive Plan.**

   The proposed development plan is consistent with the adopted Future Land Use Element and Future Land Use Map; specifically:

Goal 1. Land use distribution

Future development and redevelopment activities should be directed in appropriate areas as depicted on the future land use map to meet the land use needs of the anticipated population, in a manner consistent with sound planning principles, the goals, objectives and policies contained in the plan, and the desired community character.

Overall, the land use plan should limit commercial expansion, promote industrial use, maintain current residential densities in the core area while establishing lower densities in the perimeter areas, and provide for a continued high level of open space. Specific goals and policies are listed below for each type of land use.

Objective 1.1. Residential land use
Ensure that adequate lands are available to meet the residential land use needs of the community.

Policy 1.1.1.
Continue to promote sound planning for the location and design of new residential developments including on-site common open space and recreation facilities.

Policy 1.1.4.
Encourage innovative design measures for new residential developments and ensure that adequate provision is made for neighborhood facilities suitable to the type of development proposed.

Policy 1.1.5.
Provide the opportunity, through zoning and other land use controls, for the development of a variety of housing types (i.e., single-family, duplex, townhouse, multi-family) in both conventional, planned unit and cluster type developments that will meet the varied needs of the citizens of Ormond Beach.

Policy 1.1.17.
Encourage the development of infill residential areas in the central core and older sections of the City.

Future Land Use Map: The subject property is designated as "Low Density Residential", which allows for a maximum density of 4.3 units per acre. The proposed project has a gross density of .83 units per acre.

3. **The proposed development will not adversely impact environmentally sensitive lands or natural resources, including but not limited to waterbodies, wetlands, xeric communities, wildlife**

habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells.

The proposed development does not impact any identified wetlands or protected species of plant or animal. The project is not located near any wellfield or other area of special concern.

4. **The proposed use will not substantially or permanently depreciate the value of surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties.**

The proposed project involves significant upgrades to the existing golf course and tennis facilities. Additionally, the value of similar development has maintained or increased over the past 5-years. The proposed development will not have a substantial or permanent negative impact on the adjoining properties.

5. **There are adequate public facilities to serve the development, including but not limited to roads, sidewalks, bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds.**

The City of Ormond Beach has adequate capacity in its facilities to serve the proposed 122-dwelling units.

6. **Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe. This finding shall be based on a traffic report where available, prepared by a qualified traffic consultant, engineer or planner which details the anticipated or projected effect of the project on adjacent roads and the impact on public safety.**

The proposed development plans include a traffic study prepared by an engineer licensed to practice transportation engineering in the State of Florida. The analysis uses accepted methodologies and indicates that the proposed development complies with the concurrency management requirements of the Comprehensive Plan and LDC.

7. **The proposed development is functional in the use of space and aesthetically acceptable.**

The proposed development utilizes the existing golf course in a manner that maintains the open areas adjacent to the existing residential homes and concentrates the development in the center of the property. The combination of landscaping, architectural treatment of the buildings and locations of the structures provides both aesthetical and functional use of the site.

8. **The proposed development provides for the safety of occupants and visitors.**

The proposed development incorporates site and building improvements to ensure that occupants and visitors to the site are safe to use the grounds and buildings.

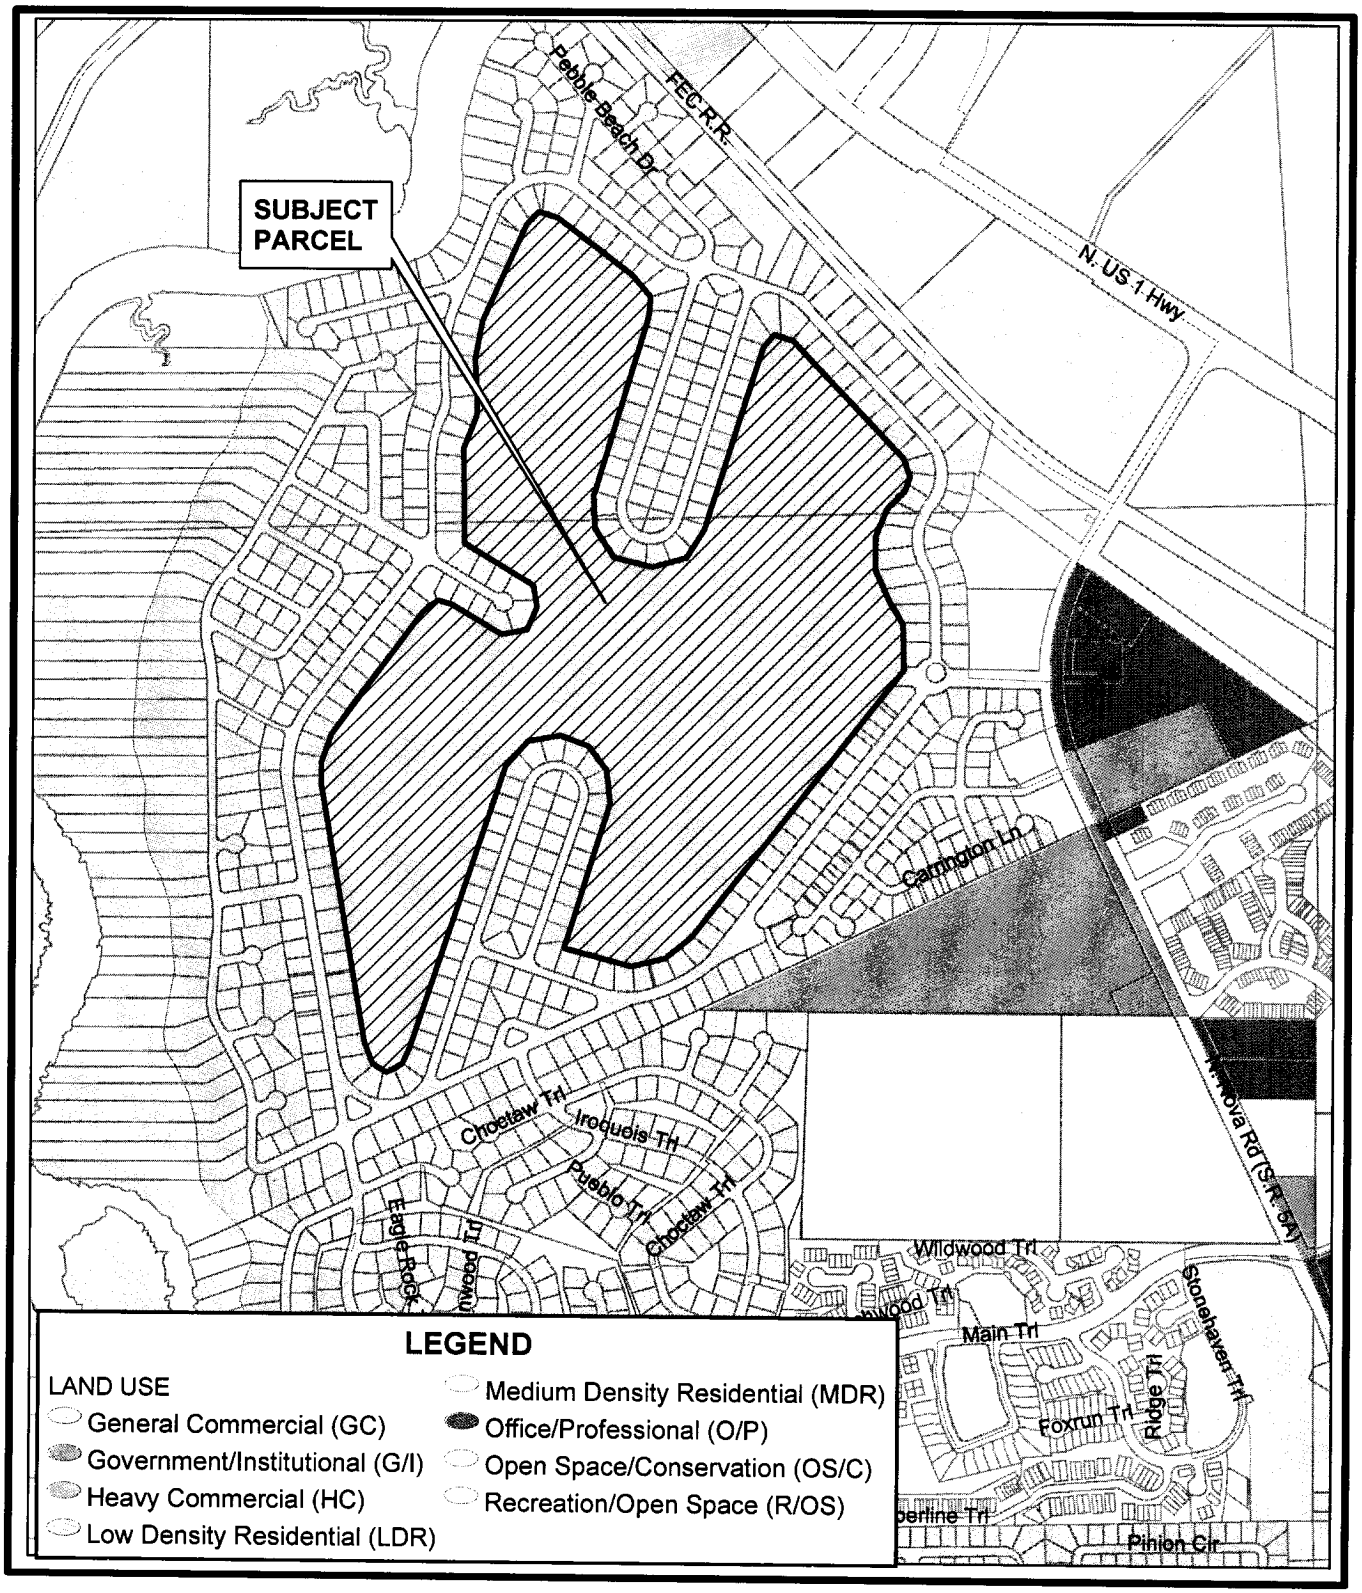
9. **The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area.**

This is a critical issue and the applicant agreed to provide upgraded architectural treatment for all of the structures being developed on the site. This will ensure compatibility and enhancement to the surrounding neighborhood.

10. **The testimony provided at public hearings.**

The proposed rezoning to PRD was heard at the August 10, 2006, meeting of the Planning Board. There was considerable comment from the resident of the Tomoka Oaks subdivision regarding the development. The primary concerns pertained to the traffic impacts; impacts to the utilities (water pressure); visual impacts onto the existing residential homes; lack of maintenance of the existing golf course; notification of future owners of the flight pattern and proximity to the airport; and certainty that the remainder of the golf course would remain. The Planning Board recommended approval of the proposed rezoning to PRD subject to the following ten conditions.

- The owner shall provide for covenants and restrictions that restrict the golf course to open space and golf course use. The City of Ormond Beach shall be involved in a manner that requires the approval of the City if the owners ever wish to remove the restriction on use.
- The owner shall provide a note on the plat for the property indicating to future property owners of the proximity of the airport and the flight pattern of the traffic from the airport.
- The applicant shall include a landscape buffer around the 3 single-family lots that is a minimum of 10-feet in width with tress and shrubs in accordance with the minimum buffering requirements specified by the Land Development Code, Chapter 3, Article I, Section 3-06, as currently adopted.
- The applicant to research and develop a plan to improve the traffic flow and safety at the entrance to Tomoka Oaks.
- The City and the owner shall research the amount of landscaping to be placed on the site and see where there are opportunities to provide larger trees within the buffers (increase size from 2 ½ inch caliper to 4 inch caliper).
- The provision in the Development Order for the PRD that a new phase could not be initiated until the improvements and enhancements identified



in the previous phase had been initiated and where substantially completed. This condition would not prevent the owner from completing multiple phases concurrently.

- The City staff will investigate the opportunity to provide reuse water to the Tomoka Oaks residences as well as the golf course.
- The owner and City shall research and develop minimum maintenance standards to be included as part of the PRD Development Order.
- The City shall research and remedy, in cooperation with the applicant, any problems to water pressure within the system serving the Tomoka Oaks development.
- Staff to verify that an environmental study for the project had been completed and was technically correct.

Recommendation: It is recommended that the City Commission **APPROVE** the proposed Tomoka Golf Village Planned Residential Development (PRD), thereby allowing the redevelopment of the site for 119-multifamily units (townhomes and condominiums) and 3-single family dwellings, subject to the recommendations of the Planning Board and the outstanding comments of the Site Pan Review Committee, which consist of:

1. It is recommended to include wheel stops. Vehicle bumpers will overhang the planting beds without wheel stops.
2. The newly proposed buffer planting to the rear of the lot number one (1) is inside the pond. Planting is only allowed on the back slopes of ponds.
3. Please provide a littoral planting detail and specifically show where they are to be planted on the pond banks in all applicable ponds. Provide calculation for each pond. Please clarify if ponds are wet or dry. If dry then littoral planting is not required.
4. Provide a note that any tree needed to be removed during construction will require a one for one replacement penalty. Protected trees will require one 2.5" caliper variety and specimen trees will require one 4.5" caliper variety to suit its planting location. Replacement trees need to be Florida #1 at a minimum height of ten feet (10'). CPH will make the determination as to what is best suited for each replacement.
5. There is a floating note on page C6.
6. What is the intent of the utility/access easement near the estate lots? Residents are questioning the intent of this easement.
7. Please remove the asterisk note on page TR-8.
8. General comment: Provide legend to clarify phasing.
9. Sheet C6 – Please include Temporary Construction Entrance in Phase 1A.
10. Sheet C2 – Please provide As Built Requirements for Water and Sewer. It may be prudent to also relocate the As Built Requirements for Roadway Construction from sheet C36. It will probably get missed.
11. Sheet C22 – Consider removing the fire hydrant from the pond.
12. Sheets C45-C47 – Provide Estimated Wet Season Water Table Elevation and Design Pond High Water Elevation to each section.

13. Please confirm through the plat that there will be easements for utilities and lift station.
14. Provide additional fire hydrants to townhouse and condo locations.
15. Provide location of fire department connections.
16. The location of handicap spaces for the clubhouse is unacceptable. Accessible parking spaces shall not cross the roadway and shall be as close to the building as possible.
17. Additional comments pending.
18. Fire hydrants shall be installed at intervals not to exceed 500 feet. Provide location of additional hydrants.
19. Manhole #44 on page C18 need to be lined.
20. Need to update fire hydrant assembly detail.
21. Show how reuse will be connected to existing reuse line or the proposed reuse line to be constructed to the reuse storage pond by Tomoka Oaks.
22. Reuse meter to be provided by owner of make and model approved by the City. A reuse agreement will need to be executed by the owner and the City.
23. Will water master meter be needed or will units be individually metered?
24. It would be helpful to provide match lines on composite utility sheets.
25. All water and sewer lines to be owned and maintained by City to be in public rights of way or 40 foot access and utility easement. An easement or deed is also needed for the lift station.
26. Parking lot lighting, pole heights not exceed 20 feet and maximum wattage should be 250 watts (see Land Development Code Chapter 3, Article 5 Architectural Design Standards, Chapter 3 Page 10). This will impact lighting calculations currently submitted.

Traffic Impact Study

Prepared for Tomoka Oaks Golf Village, LLC
By Lassiter Transportation Group, Inc.
June 2005

Lassiter Transportation Group, Inc.
Engineering and Planning

1

INTRODUCTION

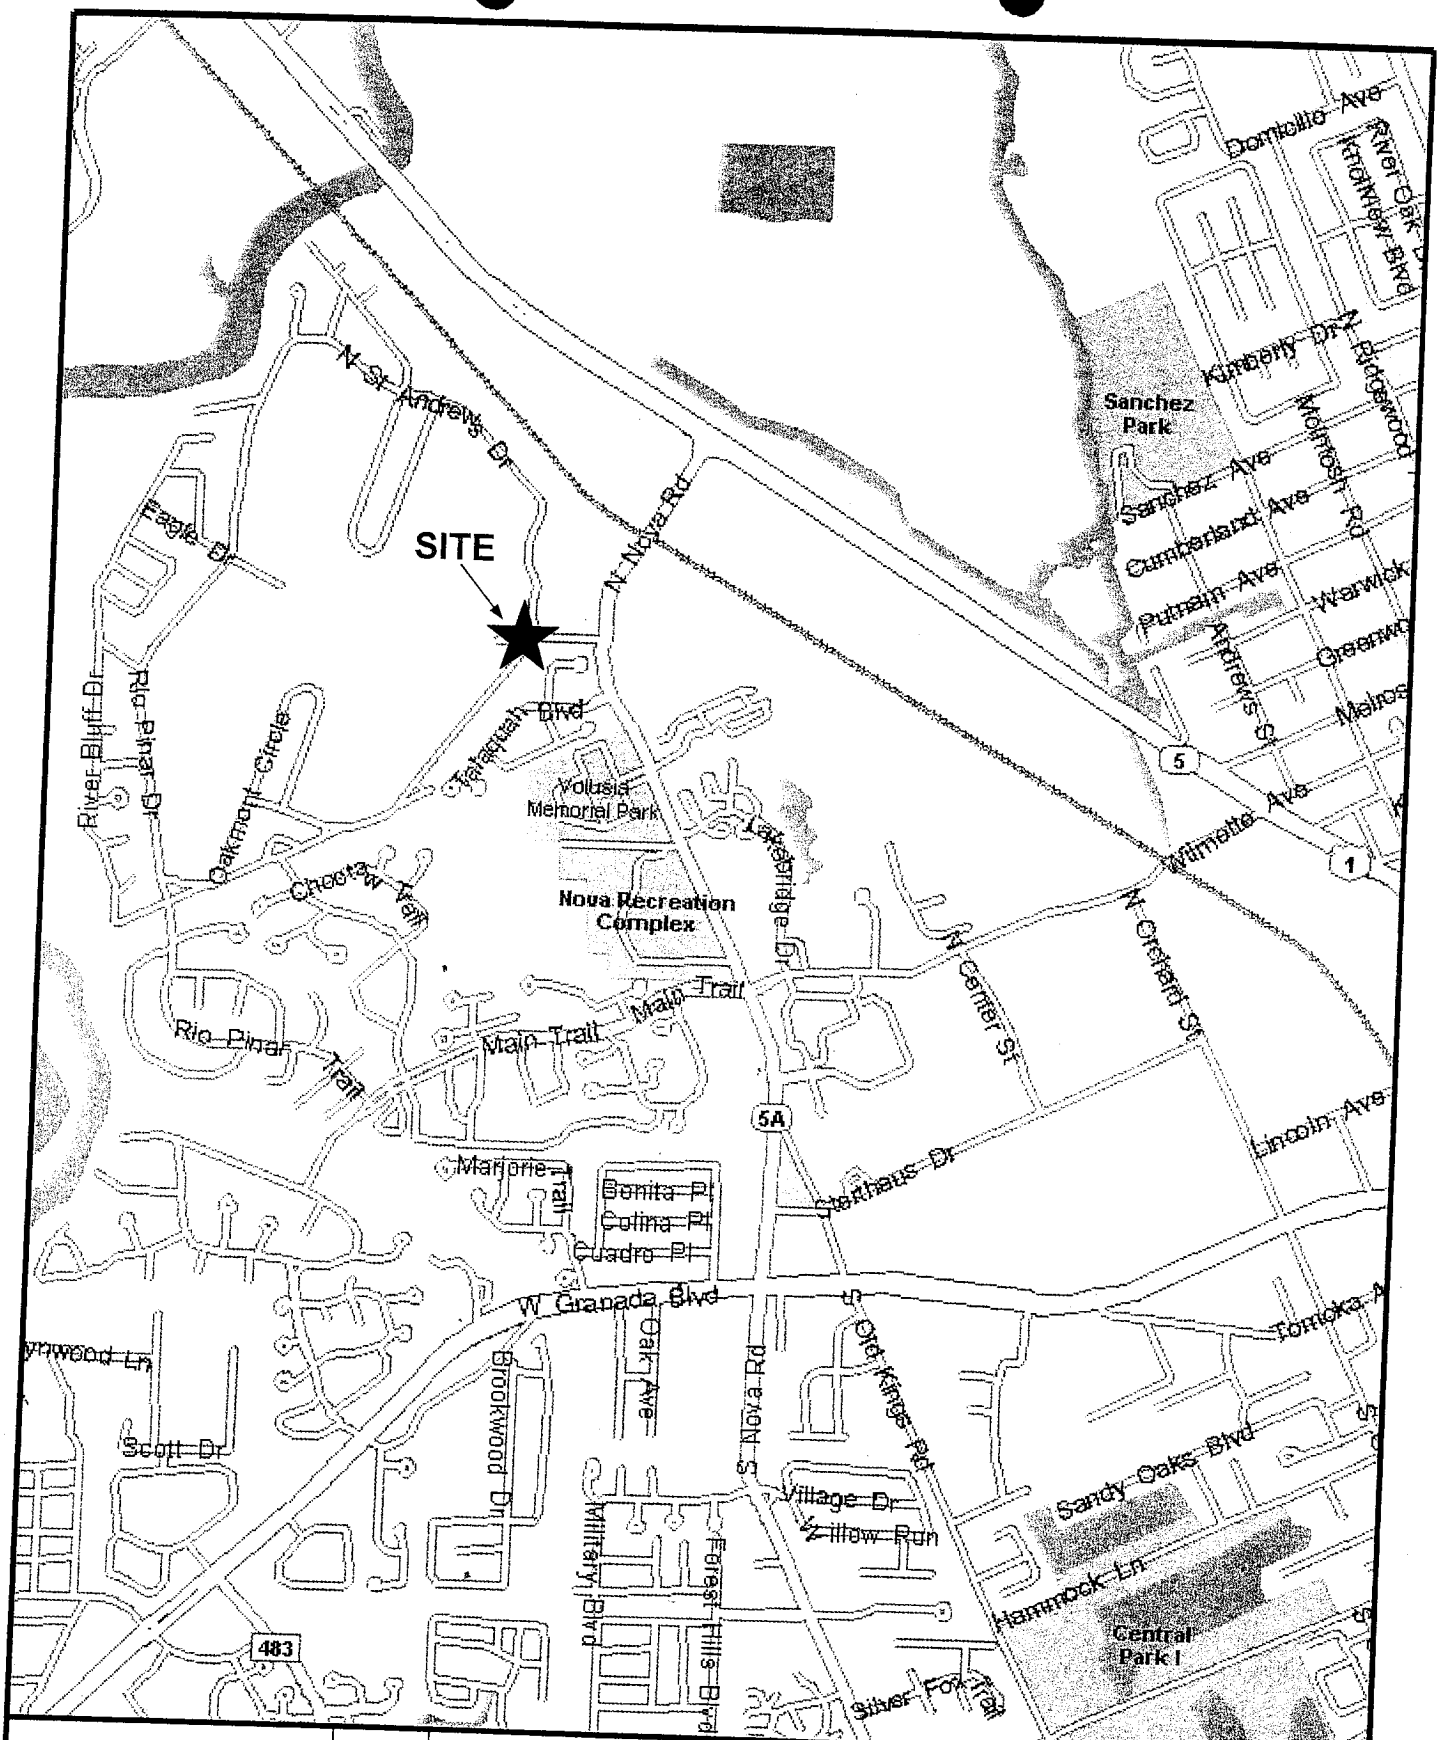
Lassiter Transportation Group, Inc. (LTG) was retained by Tomoka Oaks Golf Village, LLC to prepare a traffic impact study for a proposed 122-unit planned residential development (PRD) to be located within the existing Tomoka Oaks Golf and Country Club. The development will be located on the west side of Nova Road (SR 5A), south of US 1. The project, which consists of 35 townhouses, 84 condominiums, and three single-family dwellings, is expected to be completed and fully occupied by the year 2008. Figure 1 graphically depicts the location of the proposed development.

The existing Tomoka Oaks Golf and Country Club is accessible via Nova Road and Main Trail, with primary access by way of Nova Road. The proposed development will use the existing site drives currently serving Tomoka Oaks Golf and Country Club.

Study Area

The City of Ormond Beach planning department was contacted to determine the project study area. Subsequently, a traffic impact analysis proposed methodology letter was submitted to the City of Ormond Beach on June 6, 2005. The methodology letter is included as Appendix A .The agreed upon intersections and roadways are listed below:

Intersections:
- US 1 at Nova Road
- Nova Road at Tomoka Oaks Boulevard
- Nova Road at Wilmette Avenue/Main Trail
- W. Granada Boulevard at Nova Road



Roadways:
- US 1 from Airport Road to W. Granada Boulevard
- Nova Road from US 1 to Hand Avenue
- W. Granada Boulevard from Clyde Morris Boulevard to US 1
- Wilmette Avenue from Nova Road to US 1

Study Procedures

Standard engineering and planning procedures were used to determine the impacts of the proposed project. Reference data was obtained from the City of Ormond Beach, the Volusia County Engineering Department, the Volusia County Metropolitan Planning Organization (MPO), the Institute of Transportation Engineers (ITE), and the Florida Department of Transportation (FDOT).

Planned Roadway Improvements

The Volusia County Public Works Department and FDOT were contacted to determine if there are any planned roadway improvements in the area. Neither agency has any capacity enhancing improvements scheduled to occur within the next five years in the project study area.

		Project No.: 3308.01	Figure 1	536 N. Halifax Ave., Suite 101 – Daytona Beach, Florida 32118 Telephone: 386.257.2571 Fax: 386.257.6996 EB# 0009227

3

FUTURE TRAFFIC CONDITIONS

The next step in the analysis was to determine the future traffic conditions on the study area roadways at the time of project completion. The following documents the procedures used to determine the future traffic.

Background Traffic

Traffic on the roadway network will continue to grow due to local development approvals. Traffic growth projections from historic Average Annual Daily Traffic (AADT) counts, as provided by the Volusia County Traffic Engineering Department and FDOT, were used to determine the growth rates for the study area roadways. Using FDOT's *Traffic Trends* software, the average annual growth rates for the study area roadways were determined. The results of the Traffic Trends analyses are listed in Table 5. The *Traffic Trends* analysis worksheets are contained in Appendix E. As a general rule, if a roadway segment experienced an average of less than one percent of growth per year, one percent was the applied growth rate.

Table 5
Average Annual Growth Rates
Tomoka Oaks Golf Village

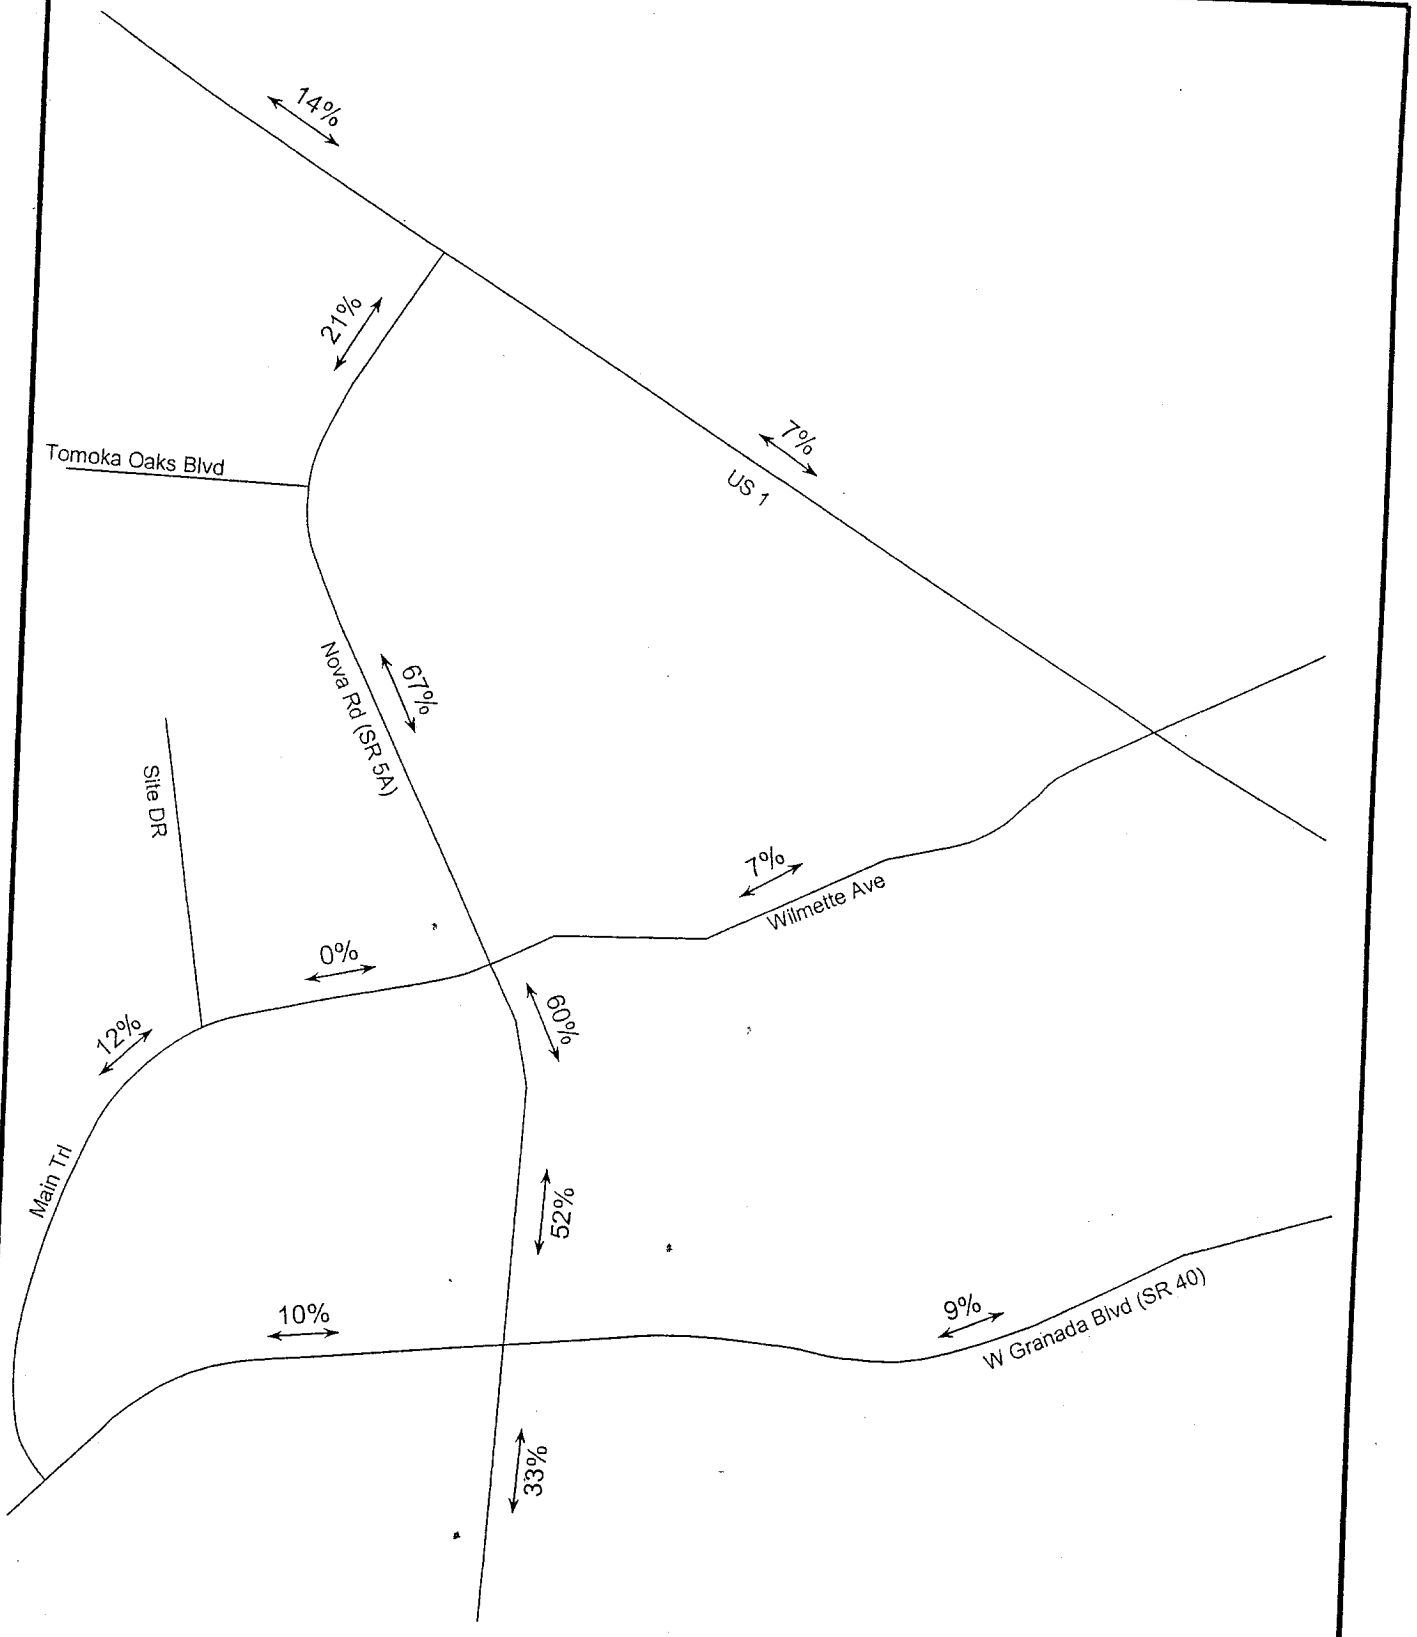
Roadway	Segment		Average Annual Growth Rate
	From	To	
US 1	Airport Rd.	Nova Rd.	-0.96%
	Nova Rd.	W. Granada Blvd.	-0.90%
Nova Rd.	US 1	Wilmette Ave.	-1.47%
	Wilmette Ave.	W. Granada Blvd.	-1.11%
	W. Granada Blvd.	Hand Ave.	-6.11%
W. Granada Blvd.	Clyde Morris Blvd.	Nova Rd.	-0.14%
	Nova Rd.	US 1	-0.81%
Wilmette Ave.	Nova Rd.	Center St.	1.37%
		Average:	**-1.38%**

Trip Generation

The trip generation for this residential development was determined using the trip generation rates and procedures published by the Institute of Transportation Engineers (ITE) in the document Trip Generation, 7th Edition. The total daily and p.m. peak-hour trip generation for the proposed development is shown in Table 6.

Table 6
Total Trip Generation
Tomoka Oaks Golf Village

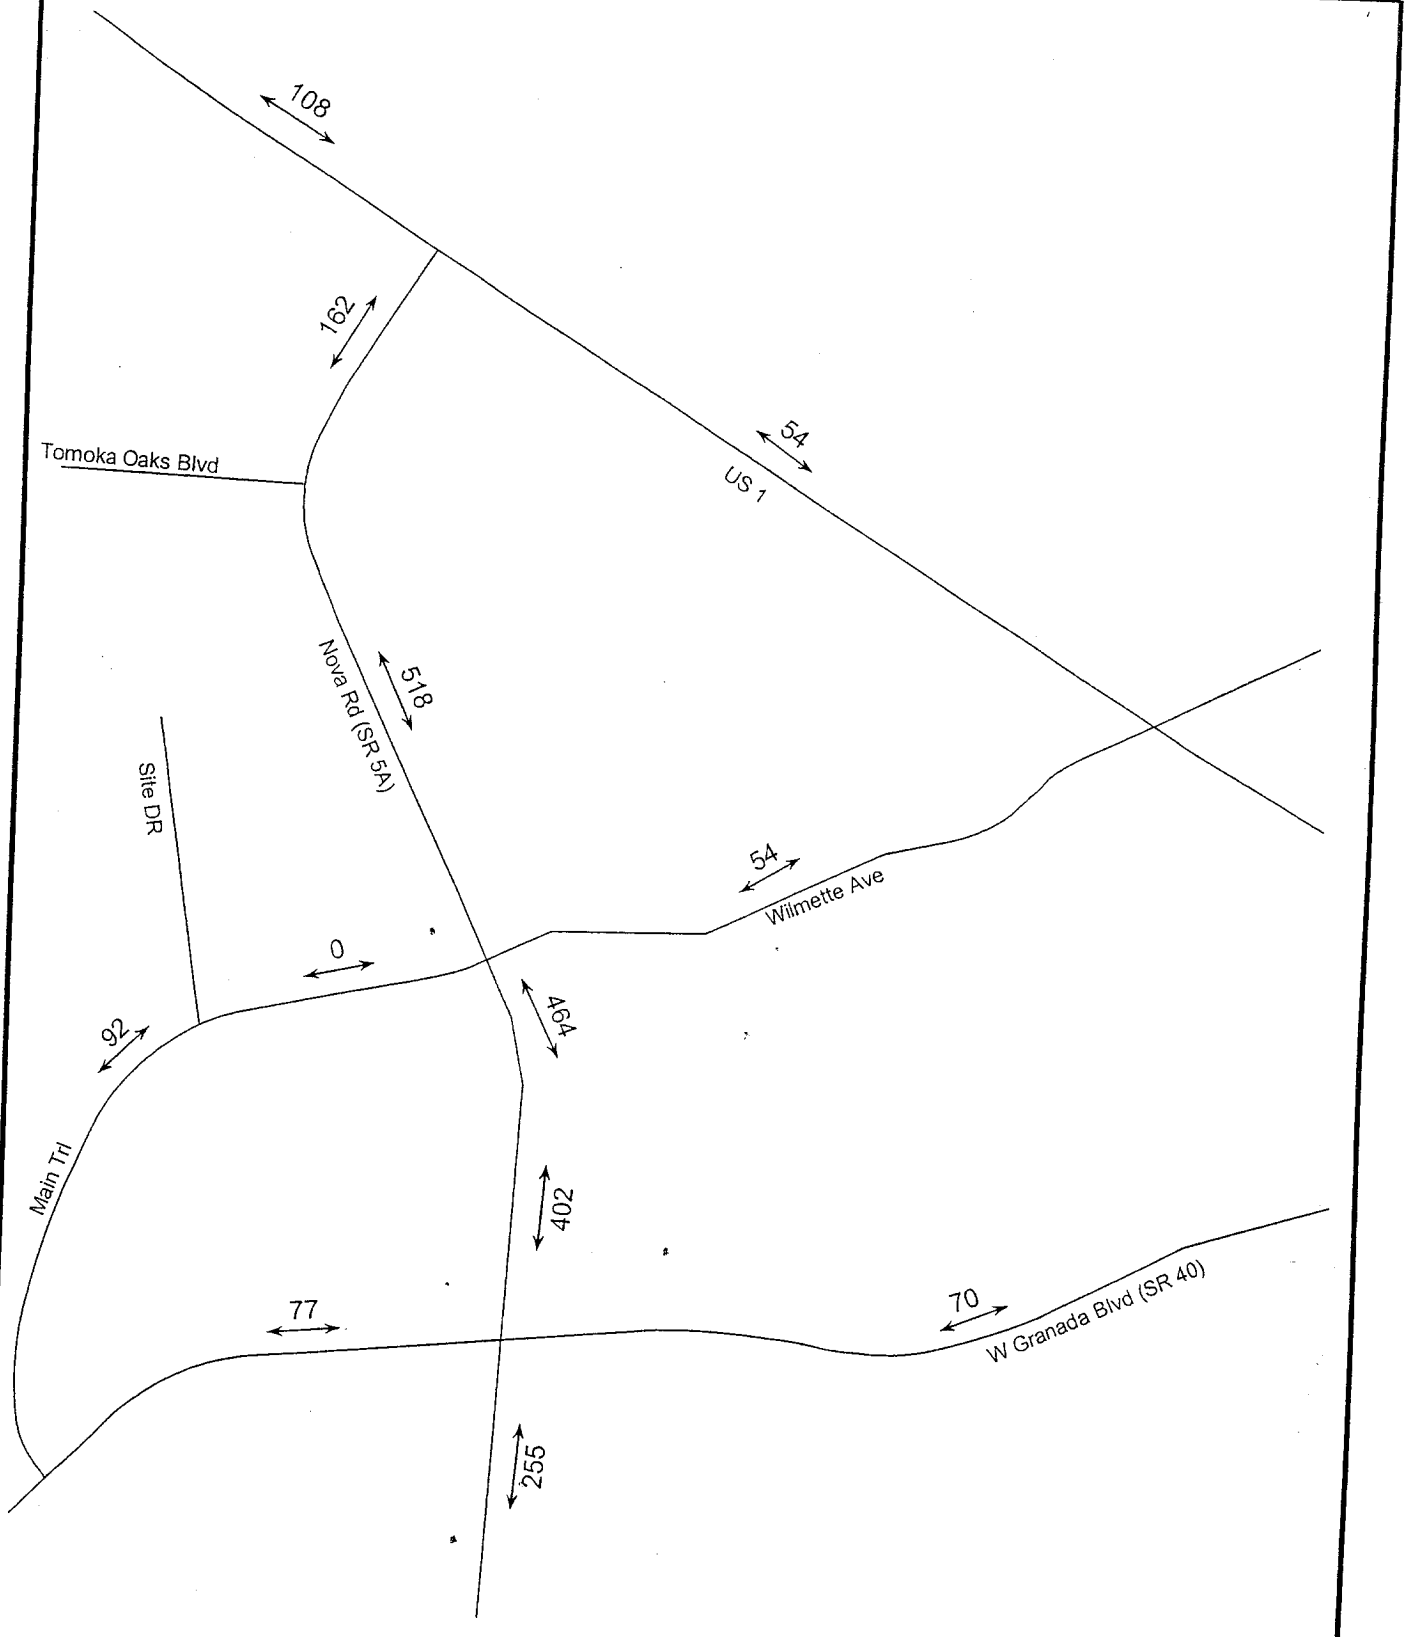
Time Period	ITE Code	Trip Rate Equation	Units	Total Trips	Percent Enter	Percent Exit	Trips Enter	Trips Exit
Daily	230	Ln(T) = 0.85 Ln(X) + 2.55	119 MFDU	744	50%	50%	372	372
	210	T = 9.57 (X)	3 SFDU	29	50%	50%	14	14
			Totals:	**773**			**386**	**386**
P.M. Peak-Hour	230	Ln(T) = 0.82 Ln(X) + 0.32	119 MFDU	69	67%	33%	46	23
	210	T = 1.01 (X)	3 SFDU	3	63%	37%	2	1
			Totals:	**72**			**48**	**24**



Source: ITE, Trip Generation, 7th Edition, LUC 230, Townhouse/Condominium, LUC 210, Single-Family Dwelling

Trip Distribution

The process of determining the directional flow of traffic associated with a new development is called trip distribution. The Central Florida Regional Planning Model II (CFRPM II), as modified and adopted by the City of Ormond Beach, was used to determine the trip distribution for this project. The process required editing the network to add a traffic analysis zone (TAZ) to represent the location of the project and its general orientation to the adjacent road network. The next step involved converting the land use data for the project to socio-economic (S/E) data which the model uses in trip generation and distribution. The model structure was then run which resulted in producing trip productions and attractions (trip generation) which were then matched with complementary attractions and productions according to statistically determined trip lengths by trip purpose. The model distribution is attached in Appendix F. Figure 3 shows the project trip distribution which was modified to reflect travel characteristics on local roads not included in the model.



Trip Assignment

The final step in the analysis is to assign the external project traffic to the road network. Figure 4 graphically depicts the external daily project trip assignment. Figure 5 graphically depicts the external p.m. peak-hour project trip assignment.

4

FUTURE ROADWAY ANALYSIS

The critical intersections and road segments were analyzed based on the future roadway conditions to determine potential impacts and to investigate mitigation requirements.

The average annual growth rate was applied to the existing traffic to project the 2008 base traffic. The City of Ormond Beach's daily vested traffic was obtained from the City's current Traffic Concurrency Analysis spreadsheet. The daily vested traffic was converted to p.m. peak-hour turning movements based on a 0.095 K-Factor and the existing turning movement percentages to establish the 2008 background traffic. The 2008 build-out traffic volumes were established by combining the 2008 background traffic and project traffic. Refer to Figure 5 for the 2008 build-out traffic volumes at the study area intersections.

Unsignalized Intersection Analysis

The unsignalized intersection was analyzed to determine the operational LOS at the time of build-out. Table 7 shows the projected LOS for the unsignalized intersection. The HCS summary sheet is contained in Appendix G. As indicated in the table, the Nova Road/Tomoka Oaks Boulevard intersection is expected to operate within the adopted level of service under 2008 build-out conditions.

Table 7
2008 Build-Out P.M. Peak-Hour Level of Service – Unsignalized Intersection
Tomoka Oaks Golf Village

Intersection	P.M. Peak-Hour			
	Adopted LOS	Critical Approach	Delay (sec.)	LOS
Nova Rd. at Tomoka Oaks Blvd.	E	EB	14.8	B

Signalized Intersection Analysis

The signalized intersections were analyzed to determine the operational LOS at the time of build-out. Table 8 shows the projected LOS for the signalized intersections. As indicated in the table, the signalized intersections are expected to operate within the adopted LOS under 2008 build-out conditions. The HCS summary sheets are contained in Appendix H.

Table 8
2008 Build-Out P.M. Peak-Hour Level of Service – Signalized Intersections
Tomoka Oaks Golf Village

Intersection	P.M. Peak-Hour		
	Adopted LOS	Delay (sec.)	LOS
US 1 at Nova Rd.	D	49.3	D
Nova Rd. at Wilmette Ave.	D	45.8	D
W. Granada Blvd. at Nova Rd.	D	53.6	D

Roadway Segment Analysis

The traffic analysis for the road segment involves the comparison of the future daily volumes to available capacity. Table 9 presents the results of the daily road segment analysis for the study area roadways under 2008 build-out conditions. As indicated in Table 9, all study area roadway segments are expected to operate within the adopted LOS under 2008 build-out conditions.

Table 10 presents the results of the p.m. peak-hour directional road segment analysis for the study area roadways under 2008 build-out conditions. As indicated in Table 10, all study area roadway segments are expected to operate within the adopted LOS.

5

CONCLUSIONS

This study was conducted to evaluate the impact the proposed Tomoka Oaks Golf Village PRD will have in the City of Ormond Beach. The results of the study are summarized below:

- The proposed development consisting of 35 townhouses, 84 condominiums, and three single-family dwellings, will generate a total of 773 daily trips with 72 trips occurring in the p.m. peak-hour.
- The Nova Road/Tomoka Oaks Boulevard unsignalized intersection currently operates within the adopted level of service and will continue to do so under 2008 build-out conditions.
- All of the signalized intersections currently operate within the adopted LOS and will continue to do so under 2008 build-out conditions.
- All of the study area roadway segments currently operate within the adopted LOS under daily conditions and will continue to do so under 2008 build-out conditions.
- All of the study area roadway segments currently operate within the adopted LOS under p.m. peak-hour conditions and will continue to do so under 2008 build-out conditions.

Current Noise Contours / Complaints

A. **PRD 06-32: Tomoka Golf Village Planned Residential Development Rezoning**

Mr. Ervin said that the application was to rezone 147 acres (the existing Tomoka Oaks Golf Course), which was surrounded by the existing Tomoka Oaks subdivision. He advised that the Land Use designation was Low-density Residential, which allowed a density of up to 4.3 units per acre (4.3 u/ac) and had a current zoning of R-2 (Single-family Low Density), which required lots with a minimum of 10,000 square feet and minimum dimensions of 100' x 100'. He said that the zoning was consistent with the existing homes in Tomoka Oaks and in neighboring developments such as The Trails.

Mr. Ervin recalled that in 2005, the property owners (RTH, Inc., represented by Dr. and Scott Ryals) met with staff and identified their desire to redevelop the golf course so that they could 1) maintain the golf course and 2) generate additional revenue. He said that staff had been surprised to note that the land use and zoning were something other than Open Space/Recreation, typical for such properties, and that the owners had the right to develop the property.

Mr. Ervin acknowledged some confusion expressed by residents of the area and explained that based on the land area, the owners could theoretically develop up to 632 single-family homes; however, because of the size and shape of the property, and the incorporation of roads, stormwater and open area, the number of homes that could be accommodated would realistically be reduced to about 300.

Mr. Ervin said that the applicants had been advised of the concerns of adjoining property owners, noting that the subdivision was one of Ormond's nicer communities and one of the few areas in which homes backed onto a golf course. He said they had relied upon the golf course and bought their properties believing that the golf course would always be there. He said that because the owners had development rights established by the existing land use and zoning, Staff had identified the concepts of clustering the homes and orienting the units to have the least amount of visual impact.

Mr. Ervin said that staff was also concerned with the possibility of leaving room for future development of the remaining portion of the golf course by clustering the homes; therefore, while the staff recommended approval of the proposal, staff also recommended that the development order blanket the remaining golf course property with a conservation easement so the land area could not be used for anything other than the golf course or open space purposes.

Mr. Ervin informed the board that the project had been in review with the City for about a year and that the staff focused on ensuring that the development not create negative impacts for the existing neighborhood. He said that they determined that by shifting the existing driving range towards the northwest and concentrating the condominiums around a relocated and revamped clubhouse, the new construction would not be close to the existing homes along the 18th, 9th and 10th holes. He said the project also proposed to locate 35 townhomes towards the northeast portion of the site with access by an entrance road off of Tomoka Oaks Boulevard and to locate two condominium buildings near the updated tennis center.

Mr. Ervin reported that staff had spoken with many residents of the area and noted that for the record, the Board had been provided with a copy of an e-mail from Ms. Linda Lewis, who had expressed concern with the buffering of the three estate lots proposed for the northwest area of the golf course. He said that Ms. Lewis had enjoyed an open space behind her home and was afraid that the location of the easement for a sanitary sewer line would result in the removal of the existing trees. He reported that the City's engineers and applicant had confirmed that they would consider utilizing a directional dig; therefore, there would be no open-earth excavation of the land and the existing trees could be preserved and protected. He said that the applicant would be required to follow through with that requirement.

Mr. Ervin said that the existing residents were concerned with the number of trees that could be impacted by the project; he stated that the applicant met or exceeded the City's tree mitigation standards because of the additional plantings around the buildings that would be utilized as visual buffers. He said that the plans included the tree mitigation calculations that showed number of trees to be removed and the number of trees to be replanted.

Mr. Ervin pointed out that the City required all multi-family buildings to maintain a minimum of 200' from any single-family home and said that the cart paths had been designed for emergency access; they provided an alternative access route to the properties if the spine roads were damaged or otherwise inaccessible. He said that the design also called for decorative pavement leading into the main drive, the townhomes, tennis center, and updated/relocated clubhouse.

Mr. Ervin displayed the plan layout and typical elevations and noted that staff had also required the architecture to be consistent with the existing development in Tomoka Oaks. He showed renderings of the 3-story golf villas and pointed out that there would be underground parking facilities to minimize the amount of impervious surface. He noted that sub-surface parking was possible because the site was very well-drained, with a low water table.

Mr. Ervin acknowledged that Board Member Jorczak and Mr. Larry Stout of the Airport Advisory Board had questioned whether the additional density and intensity proposed might violate the City's Airport Overlay Zone. He explained that Airport Overlay District comprised areas for which there were concerns regarding noise impacts that would result from the airport. He recalled the overlay issues presented to the Planning Board in the past and said that they had not been able to use the 60 DNL (day and night noise level contour), shown as a star-shaped zone, because it did not meet certain statutory and federal requirements. He said the City instead utilized the "iron cross" contour (a legally defensible method of establishing the noise levels) and stated that the project was located outside both the 60 DNL line and the City's adopted "iron cross" contours.

Mr. Ervin said that per Mr. Jorczak's request, staff looked at source of the noise complaints. He said that such complaints had been documented when the City was embattled with the decision as to whether or not to expand Runway 17-35; he pointed out on the map that the complaints had been identified as closer to the airport than the project location. He said that Mr. Jorczak and Mr. Stout had also questioned if there was a way to ensure that future purchasers of property in the area were aware that they were buying near the municipal airport, i.e. a kind of due diligence warning.

Mr. Ervin said that the staff report included technical analysis to show how the project complied with the city's concurrency requirements (water, sewer, stormwater and roads), identified zoning and land use issues, and summarized why the City staff recommended approval of the project. He reiterated that a number of Tomoka Oaks residents were unhappy with the project because they felt the golf course had not been properly maintained and worried that the project would just increase the problems they faced.

Mr. Ervin explained that Staff had to look at the proposal from a technical perspective in regard to land use and zoning and said that the proposed plan was considerably less intense than what could be developed there. He reiterated that Staff had made the applicant aware of the concerns, made sure that the development was compatible with the neighborhood, had no negative impacts on the existing residents and preserved the golf course. He agreed that it would be wonderful to retain the property as open space, but reminded everyone present that they had to respect the property rights of the property owner, who already had development rights on the property, given the land use and zoning. He

emphasized that the proposal de-intensified the project, concentrated the development and ensured that the impacts would be minimal.

Mr. Jorczak asked if there was a mechanism that the City could employ to notify potential purchasers of the proximity to the airport.

Mr. Ervin replied that there was nothing in the City codes to mandate such notification. He said that the Board could identify that as a concern and as a condition for their approval. He said that the applicant could decide to accept the condition; if they chose not to accept it, the City would then have to decide whether to impose the condition as a part of the rezoning request.

Mr. Thomas questioned why there were fewer noise complaints in 2006, than in 2005.

Mr. Robert Hernandez, Ormond Airport Manager, said that voluntary airport procedures and traffic patterns established prior to his tenure tried to limit the air traffic to the north and west sides of the airport as much as possible. He said most of the current complaints were being generated from the area east of the airport, where much of the training was conducted, and that there were a number of homes on that departure corridor. He explained that air traffic expanded and contracted in all directions and that although he would not say that there would be no aircraft over the proposed community, he felt the Tomoka Oaks residents were getting the benefit of the established voluntary procedures for noise control.

Chairwoman Press clarified with Mr. Ervin that the applicants had the right under the current zoning to remove the golf course and develop the entire area with houses, but that the proposed PRD (Planned Residential Development) would limit the residential development to 122 units and would require a conservation easement over the remaining portion of the golf course to prevent future development of that land. She asked if the development order, as proposed, would preclude the applicants from building any more than the 122 approved residential units on that property.

Mr. Ervin concurred.

Chairwoman Press stated for the record that she had requested an on-site review of the proposal and had toured the property with the owners. She said that she had learned that many of the roads would not be paved and asked who would be responsible for maintaining those roads.

Mr. Ervin responded that the maintenance of the roads would be the responsibility of the developer at first, but that the homeowners' association that would be created would ultimately be responsible for the maintenance of all grounds on the project.

Chairwoman Press asked if the roads met City standards.

Mr. Ervin said that the City required roads to be constructed with a 6" sub-base, 6" base and 1.25" of asphalt; he said that roads were generally designed for a 15 to 25-year life. He assured the Chairwoman that those standards applied to the subject roads. He pointed out that the emergency access/cart path type of roads might not be topped with asphalt, but would be stabilized and had to meet minimum standards established by the Code for emergency access areas. He said it was a common practice and had been utilized in other projects, such as Broadwater, Breakaway Trails, Aberdeen, etc. He noted that breakaway fences were utilized in emergency access areas.

Chairwoman Press asked if the order of the project phases could change.

Mr. Ervin responded that the development order would identify the project phases and that the applicants would have to adhere to the phases, as stated. He acknowledged that the residents of Tomoka Oaks were concerned that the applicants would build the residential units without completing the other improvements and said that was the reason for the phasing. He reported that Phase 1 would involve the relocation and construction of a new tennis facility, Phase 1B would include demolition of the existing parking lot and clubhouse, Phase 1C would be the completion of the townhomes, golf and tennis areas, and the clubhouse would be completed in Phase 2B. He noted that the amenities would correlate with the new homes being developed. He also acknowledged that the applicants were being required to upgrade the appearance of the golf course.

Mr. Thomas disclosed that he also toured the facilities and met with the applicant.

Mr. Robert A. Merrell, 150 Magnolia Avenue, Daytona Beach, representing the applicant, stated that he was also a resident of Ormond Beach. He thanked City staff for their very thorough report, particularly with regard to comprehensive plan consistency and code compliance. He stated that the project had evolved into a better product during the year-long process of working with City staff.

Mr. Merrell said that the project was the "poster child" for Smart Growth principles. He explained that the concept of smart growth was predicated upon the belief that the population would continue to grow and that people would continue to move into the area. He said that smart growth addressed the issues of where people would live and work, the redevelopment of urban areas, clustering development in areas where services were already available (fire stations, police stations, utilities) and clustering to preserve open space and recreation areas.

Mr. Merrell presented slides of the property, some with the proposal super-imposed over the existing development. He pointed out that the development would include demolition and rebuild of the clubhouse and pool area and the tennis center. He explained that the new three-level clubhouse facility would house partial underground golf cart storage; dining areas, kitchen and banquet facilities, a lounge area, pro shop, locker rooms, and surrounding covered porch on the middle level; offices, executive offices, and a sky lounge on the upper level. He added that there would be a tiki bar overlooking the new pool area.

Mr. Merrell pointed out the proposed condominiums and maintenance facility to be located near the tennis center and said that the redevelopment of the golf course would include bridges and new lakes that would store reuse water from the City's effluent plant. He mentioned that there would be fountains and that comfort stations would be constructed for the golfers and would include under-cover golf cart parking and vending machines.

Mr. Merrell explained that 30 two-story townhomes would be constructed at the northeast corner of the property, access to be by way of the road from the main entrance by the clubhouse. He showed the floor plans of both the townhomes, as well as the three-story condominiums with substantial balconies. He added that the three single-family estate lots would be located near Holes 11 and 16.

Mr. Merrell repeated Mr. Ervin's statement that the proposed project was consistent with the comprehensive plan and met all the criteria in the Land Development Code (LDC) for the PRD rezoning. He stated that the existing R-3 residential zoning (Staff note: actual zoning is R-2) and the future land use classification allowed development at up to 4.3 units per acre over the entire 147 acres. He agreed that it was unusual for a golf course to have a residential zoning, saying that they were typically zoned for

Recreation/Open Space, with the surrounding homes zoned for residential. He speculated that the original developer wanted to have an exit strategy in case the project did not succeed.

Mr. Merrell thought that the proposal would make the community proud, given the cluster of the residential units and the dramatic improvement of the amenities. He said that the golf course had suffered in the last couple of years because of the 2004 hurricanes, September 11th and the construction of Nova Road. He said that the purpose of the proposal was to reverse that trend. He said many times there were issues that were not raised until the first public hearing; he hoped the residents would be receptive to the plans.

Mr. Thomas stated that he wanted to discuss the traffic study, since the residents of Tomoka Oaks were very concerned about the traffic.

Mr. Merrell agreed that traffic issues were a concern with any new development and restated that they would be adding 122 residential units, even though the property was entitled to far more homes. He said that a traffic analysis completed for the project had considered the anticipated increase in trips, all of the intersections that could be affected and all of the road segments that could be affected. He said that the model used was one that was accepted by the City and the County; that study had indicated that there were no level of service problems. He recognized that there were traffic issues with some projects in the city at present, but that the widening of, and intersection improvements along, Nova Road had helped the traffic situation in the area of the subject. He reiterated that the project would not cause a level of service problem on any of the intersections or affected roads.

Mr. Thomas asked if the residences would be primarily occupied by full-time residents or whether the applicant anticipated residents for whom the units would be second homes.

Mr. Merrell stated that they felt there would be some part-time residents, but that the traffic analysis was predicated upon full-time residents. He added that even increasing trips at the peak hours did not produce traffic problems.

Mr. Thomas noted that he was trying to ask questions on behalf of the audience, since they had not had an opportunity to look at the traffic study, as had the board members. He asked what the traffic counts could be estimated to be if the property was instead developed with 300 single-family homes.

Mr. Sans Lassiter, President of Lassiter Transportation Group, 123 Live Oak Avenue, Daytona Beach, and resident of Ormond Beach, said that the study was based on a trip generation rate of 119 multi-family dwelling units and three single-family dwelling units. He explained that multi-family, as proposed, was a lower trip generator (about 6-7 trips per unit per day); therefore, the estimated number of daily trips generated by the proposed development was approximately 773. He further explained that 350 single-family residences (about 10 trips per day) could be expected to generate 3,500 daily trips. He concluded that the proposal represented a significant reduction over what could be done otherwise.

Mr. Lassiter agreed with Mr. McCoy that the trips in the study shown as vested were those trips for the development in Tomoka Oaks that had already been approved and for which the consultant had to account.

Mr. Merrell stated for the record that the applicant had agreed to install the utilities in such a way as to not damage the existing trees. He also mentioned that by approving the rezoning to Planned Residential Development, the resulting agreement (development order) would restrict the open space and golf course

area in perpetuity; he said that the applicant had agreed to a deed covenant (conservation easement and reciprocal covenant among all of the owners on the property) that would assure that the property would forever remain recreation/open space.

Chairwoman Press questioned the distance from 23 Pine Valley Circle (the home from which one of the photos was taken) to the golf village townhomes.

Mr. Ervin said that the closest point between any single-family residence and a multi-story building would be 225'. He said that the distance was 300' at the location in question, since the dimension was tied to the fairway (225', plus the fairway). He reiterated that the primary focus was to keep the buildings inside the fairways and away from the existing homes.

Mr. Jorczak asked if there would be any mechanism in place that would preclude the subsequent homeowners' association from turning the development into a private operation to exclude the public.

Mr. Merrell said that the Covenants and Restrictions and the condominium association Declaration would prevent that.

Mr. Thomas asked if there was any conceivable way that it could happen.

City Attorney Hayes said that although nothing was 100% guaranteed, he felt there were enough layers of protection that future development should not be a serious concern in the future.

Mr. Merrell said the applicants would agree to include whatever language that the city attorney deemed appropriate and necessary to assure that outcome.

Mr. Thomas understood and said that his concern was because the board and the residents had all heard the word "never" in the past.

Mr. Merrell elaborated on the city attorney's comments, saying that the discourse was in the public record and that coupled with the binding documents, would provide the City with an enforcement mechanism. He said the restriction was as fool-proof as they could make it.

City Attorney Hayes said that the City would make sure that the development order was drafted to make it as difficult as possible to undo.

Dr. Grissom inquired as to who would be responsible for the maintenance of the golf facilities.

Mr. Merrell said that maintenance would continue to be the responsibility of the owners of the golf course. He noted that only the residential units would be sold.

Dr. Grissom asked if the owners, as the condominium association or homeowners association, could have the prerogative to change the Covenants and Restrictions or Declarations of Condominium or any of the parameters include therein.

City Attorney Hayes replied that he did not think they could because it would be a condition of the development order, and would in fact be a violation of the development order, which had perpetual existence. He thought it would also be in violation of the recorded covenants and restrictions. He said that in reality, he did not think it could occur.

Mr. Merrell voiced his opinion that it would arguably require the City to agree to lift the deed covenant.

City Attorney Hayes reiterated his belief that there were enough layers to provide a sufficient safety net.

Mr. Jorczak thanked Mr. Ervin for his efforts to answer the questions regarding the airport issue on short notice. He thought that the applicants might find it beneficial when marketing the properties to promote the airport as an easy way to access their second homes. He remarked that municipal airports everywhere were under assault and felt it was very important that potential purchasers be notified that there was an airport nearby. He mentioned that the airport was a vital tool in shifting the City's tax base away from solely residential properties toward some industrial uses, what the City was hoping to achieve with the proposed Ormond Crossings development and which he felt was important. He said that there would always be noise associated with the airports and said that he anticipated an increase in use of the airport by the new very light jets, since they were more economical for businesses to purchase for both private use and for air taxi services .

Mr. Lewis Slaughter, 53 North St. Andrews Drive, thought that there would need to be a traffic light at the intersection of Tomoka Oaks Boulevard with Nova Road.

Mr. Mark Tolle, 54 Oakmont Circle, asked if there had been an environmental impact study conducted for the property. He reported that the property was currently home to a large breeding population of raptors, including great bard owls, screech owls, scissor-tail kites, swallow-tail kites (a species of special concern for the state of Florida) four species of pileated woodpeckers, and was a migratory stop for painted grosbeaks, American gold finches, etc.

Mr. Ervin said that because the site had already been impacted by development and was surrounded by existing homes, the property did not meet the City's criteria for requiring an environmental assessment report. He said that staff was aware that the area was home to migratory birds and that they had checked with Florida Fish & Wildlife to see whether or not nesting bald eagles or other endangered species had been identified there. He said that unless they had such documentation, a study could not be required; he said staff would seek verification as to whether or not the property was home to the variety of different species identified and whether or not there was a need for additional protections prior to scheduling the item for presentation to the City Commission.

Mr. Tolle referred to Dr. Grissom's comment regarding the ongoing maintenance of the property and said he did not believe that the golf course property was currently being maintained by a professional golf course management company. He opined that the course was in deplorable condition, far beyond simply lack of irrigation; he questioned the ability of RTH to maintain the golf course in an acceptable manner and cited the maintenance equipment and level of maintenance, saying that the course was not very playable and the reason why it was an inexpensive to play there.

Mr. Todd Hendricks, CPH Engineers, 520 Palm Coast Parkway, Palm Coast, said that the firm was the civil engineer for the project. He advised that Mr. Joe Young of Biological Consulting Services had performed an environmental assessment on the project and found no concerns that would prohibit the project from moving forward.

Longtime resident Ms. Susan Reynolds, 17 Oakmont Circle, agreed that the condition of the course was deplorable and likened it to living on a horse pasture in Ocala. She pointed out that any CADD technician could make the renderings of the proposed project look beautiful and noted that the project would require the developers to remove the bulk of the trees. She stated that the existing trees were not maintained and

thought that from a safety standpoint they should be required to remove those that had died. She thought that provisions for maintenance of the trees should also be written into the development order. She disagreed that the condition of the course was due to hurricanes, September 11th, or the Nova Road construction.

Ms. Reynolds thought that the proposal was better than allowing 300 homes to be built, but thought that the existing vegetation would also be allowed to die, because the buildings would be constructed over the root systems, which were already stressed.

Mr. Paul Momberger, 100 North St. Andrews Drive, stated that he lived on the 3rd Hole and that he felt the plan included buffers that would negate any impact on the adjacent residents. He noted that part of the reason that the grass did not grow was because there were so many trees. He stated that the infusion of new money for development would bring new life to the golf course and hopefully, help with the maintenance issues. He agreed that it needed to be improved and felt that the proposal was part of the solution. He added that the redevelopment of the clubhouse would also provide social benefits for the community. Mr. Momberger said that he supported the project.

Mr. Adelaide Mathew, 54 South St. Andrews, another longtime resident agreed and said that the 2004 hurricanes had left dead trees that had yet to be taken down. He questioned the proposed underground parking.

Mr. Ervin explained that not all of the parking spaces would be underground. He said that portions of the required condominium parking would be underground and townhome parking would be in garages and on the driveways (above grade).

Mr. Frank Bullard, 115 Rio Pinar Drive, questioned the effect of the new development on the water pressure in the area, which he said often fluctuated by about 30 pounds, depending upon the time of day. He asked if the current residents would be able to utilize the upgraded utilities that would be a part of the new development.

Mr. Ervin said that the development would utilize the existing water mains serving Tomoka Oaks and would have a loop system to maintain the water pressure. He said he had not been aware of a water pressure problem in the area, but assured Mr. Bullard that his comments would be forwarded to the Utilities staff and addressed prior to any City Commission meeting. He mentioned that the City's Fire Department periodically reviewed the water pressure to ensure that there was adequate fire flow pressure throughout the city.

Chairwoman Press again mentioned that the hearing at the advisory board level was a way for the public to ask questions and raise concerns; she encouraged the residents to attend the City Commission meeting, at which time the final decision would be made.

Ms. Sharon Kist, 68 Oakmont Circle, confirmed that there was a water problem in Tomoka Oaks and asked if the new amenities would be available for use by the current residents or whether they would be restricted to use by the owners of the condominiums.

Chairwoman Press said it was her understanding that there would be six tennis courts and assumed that they could be used by the residents.

Ms. Kist asked City staff to check on the water pressure in that area. She remembered that she had once been told that it was a problem at her house, rather the pressure.

Chairwoman Press said she thought that there was a problem with the water pressure throughout the city.

Ms. Christine Goudreau, 115 North St. Andrews Drive, asked about the hours of operation of the courts; she also questioned the light and sound that would emanate from the facility area.

Mr. Ervin said that the hours of operation had been identified by staff, as had the height of the lighting. He said that there were some conflicting requirements, because the police wanted the lighting to be higher and brighter, while staff wanted to keep the lighting lower and less bright. He said that the goal was to prevent spillover lighting onto the properties of the existing residents by utilizing lower lighting, trees and limited hours of operation to prevent the lighting impact.

In response to Mr. McCoy's request, Mr. Ervin advised that whether or not the amenities would be open for use by the residents was a decision to be made by the applicants.

Mr. Jorczak asked if there was a national standard for golf course maintenance and if so, whether it could be applied to the Tomoka Oaks course.

Mr. Ervin said he did not know, but would check into it.

Mr. David Ponitz, 90 North St. Andrews Drive, stated that both Mr. Ervin and Mr. Merrell had done a good job representing the development. He said he was pleased that none of the townhomes or condominium units were directly behind any abutting properties and asked if the development order could include a statement that specified the acreage to remain open space. He thought that perhaps that acreage could be zoned to ensure that it would remain open space.

Mr. Merrell explained that the planned development zoning did differentiate between the residential and recreational components, i.e., it was essentially a custom zoning for the property for which the development order dictated what could or could not be done as a result of the rezoning process. Every individual use (golf course, tennis courts, etc.) would be identified on the plans, which would become a part of that development order.

Mr. Ponitz said that in exchange for special development orders such as that being sought by the applicant, the City had an opportunity to ask for things above beyond what was generally required by the Land Development Code regulations. He asked if the City could ask the applicants to increase the size of the replacement trees.

Chairwoman Press asked the planning director to address the tree mitigation.

Mr. Ervin explained that Mr. Ponitz referred to the City's specific prohibitions regarding tree removal. He said that trees that were removed had to be mitigated; i.e., they had to be replaced. He said that the number of replacement trees was based on the size (diameter) of the tree being removed, not necessarily on a 1:1 basis. He said that protected trees were those 6"-12" in diameter as measured at four feet (4') above grade; replacement trees had to be a minimum 2.5". Specimen trees were those between 12" and 36" in diameter; replacement trees had to be larger, with a fuller canopy. He added that removal of trees over 36" in diameter required City Commission approval. He said because of the size of the project and

the existing trees on site and given the proposed landscaping plans, Staff felt it was appropriate to require them to adhere to the City's regular standards as they would for any development.

Mr. Ervin concurred with Mr. Ponitz that the PRD was a discretionary zoning for which the Planning Board and City Commission had the right to ask for mitigation above and beyond what was required by Code. He mentioned that the City's minimum requirements were also specific in regard to native and xeric landscaping, i.e., plantings that could survive in periods of drought. He said that the applicants utilized many different species, such as oaks, pines and magnolias, as well as decorative elements such as crape myrtles, etc., to accentuate the perimeter of the property. He said that some plants would be used in close proximity to the buildings to enhance the architecture being used. He further detailed the proposed landscaping and advised the board that it was within their purview to require an increase in the size of replacement trees if they felt it was justified.

Mr. Lewis Slaughter, 53 North St. Andrews, stated that he was in favor of the project and thought it would be a major asset to the city. He was pleased with the two new lakes that had been dug and said that the reuse water would help the look of the course tremendously. He asked if there could be a light installed at the intersection of Tymber Creek Road and Nova Road.

Mr. Sans Lassiter, Lassiter Transportation Group, said that whether or not a traffic signal would be warranted was the first thing that they had considered, but that they had not been able to show that intersection as warranting a traffic signal. He explained that Nova Road was a State Road and that the DOT (Department of Transportation) had very strict standards for when they would or would not allow a traffic signal; he said that the intersection did not come close to the threshold, mainly because the primary trips to and from the project area were from the south on Nova Road.

Mr. Slaughter stressed his support for the project and said that by their ability to attract more members, they would be in a better position financially to maintain the golf course. He asked if there would be an opportunity, in conjunction with the redevelopment of the golf course, for the adjacent homeowners to connect to the City's reuse system to reduce the need for private groundwater wells in the area.

Mr. Ervin commented to Mr. Ponitz that Mr. Hendrix wanted to discuss the request for upsizing the landscape mitigation.

Mr. Ervin also responded to Mr. Slaughter that the provision of reuse water to the residents adjacent to the golf course would be an expensive City of Ormond Beach public improvement project that would require the expenditure of capital improvement dollars. He said the City Commission had identified the South Peninsula area as the No. 1 priority and said there were other improvements that had been identified for completion in the next 5 -10 years. He said that the extension of the reuse water had not been identified as a capital improvement that could be funded in the next 5-10 years. He said that the City could consider it for future funding and that there might be an opportunity to utilize grants from the Water Management District, but reiterated that it was not currently identified as a priority.

Ms. Zella Wilen, 48 Oakmont Circle, said she was also a long-time resident. She objected to the rezoning request, as well as the request to construct streets across privately-owned business property. She did not want Tomoka Oaks Boulevard to be approved for extension or connection to any planned street. She also objected to the increased traffic that would be created by the new development.

Ms. Wilen referred the Board to the City archives (September and November, 1970); she said that there had been a rezoning issue raised and the homeowners had retained an attorney to argue against the zoning

change to R-5. She said that the homeowners had prevailed. She thought that if the proposal proceeded [to the City Commission], the Tomoka Oaks HOA Board of Directors should alert and notify every one of the homeowners in Tomoka Oaks of the rezoning request, not just those within the 300' radius of the project. She said she equated the request for the PRD to the prior request to rezone the property to R-5.

Chairwoman Press pointed out that the meeting would be advertised in the newspaper.

Mr. McCoy noted that the advertisement was countywide.

Dr. Gerald Gibb, 69 North St. Andrews Drive, stated that the traffic report was based on data, [not experience]. He said that the reason that most of the traffic turned southbound on Nova Road because it was too dangerous to turn northbound. He also stated that the construction would occur over a period of time and that construction workers would come and go at the same time as the residents, exacerbating the traffic in the area. He questioned if there was to be a traffic management plan during the construction of the project.

Mr. Lassiter agreed that for the "Existing Condition", the consultants could only count the traffic that did turn, not the traffic that might want to turn but did not. He felt it important that they understand that their Future Conditions analysis used the Urban Area Model, which distributed traffic without regard to congestion. He explained that the model looked at the major distribution points north and south on Nova Road up to US1 and in other parts of the city to determine the more likely direction traffic would go if there were no congestion. He felt that their analysis was absolutely correct.

Mr. Lassiter also liked the idea of a construction traffic management plan and said that they would recommend identifying routes for the resulting traffic. He reminded the Board that that the 770-trip per day increase was for the buildout of the development, not the construction traffic.

Ms. Leslie Nixon, 36 North St. Andrews Drive, expressed concern with additional traffic trying to negotiate the Tomoka Oaks Boulevard circle near the entrance to the subdivision.

Mr. Lassiter explained that the 770 trips was the number of estimated trips on a daily basis; he said there were 74 in the peak hour. He further explained that typically, the impact study deducted the existing traffic from the traffic proposed for the new development, but instead, the subject analysis assumed the existing traffic would remain. He said that meant that their analysis was overly conservative (predicted too much traffic), but that they wanted to be as conservative as possible. He stated that their analysis also assumed 100% occupancy year-round, which they also knew to be unlikely, but which would also produce conservative numbers.

Ms. Nixon asked for the percent of increase in trips. She wanted to make sure that Staff recognized that the ongoing development along the North US1 corridor would mean additional traffic for Nova Road, making left turns out of the subdivision even more difficult.

Ms. Nixon also asked if the Board could recommend fewer homes, rather than 120 proposed. She thought that the applicants could improve the clubhouse, the golf course and the tennis courts, but scale down the residential portion of the project.

Mr. Ray Sanchez, 12 Pine Valley Circle, stated that the traffic circle was dangerous and confusing, particularly since it was two-way traffic. He questioned the sales prices of the residential units.

Mr. Lassiter responded that because a traffic signal at the intersection with Nova Road was not warranted, the stop sign control was deemed to be adequate. He said that the same was true for traffic internal to the site, which would be less than at Nova Road. He answered that the consultants had not provided a percent of increase resulting from the project, but pointed out that they did not take a deduction either; they simply added the anticipated traffic to it (an over-estimate).

Mr. Jorczak asked if they had given any thought to how the circle could be improved.

Mr. Lassiter said that the circle was analyzed in the current condition. He said they could certainly do so by studying if it would be warranted by the level of delay, would reduce the level of delay, or would make the circle safer.

Mr. Jorczak said that the safety element seemed to warrant that study, regardless of the additional traffic that would be generated from the proposed 122 units. He remarked that the junction might require a different kind of layout.

Mr. Lassiter said that as a traffic engineer, his primary focus was safety. He stated that round-abouts and traffic circles, although becoming more popular, were particularly pedestrian-hostile. He pointed out that cars did not have to stop, gaps in traffic did not occur, and visibility was lessened because of the lack of time to look left and right. He said that because traffic came from the left, people did not always look to the right for pedestrians. He reiterated that pedestrian safety was one of his major concerns.

Mr. Thomas, a resident of Tomoka Oaks, thought that striping or arrows on the pavement might help drivers negotiate the circle. He thought that there were some simple things that could be done to improve the situation.

Mr. Lassiter said that it was something at which they could look.

Chairwoman Press thought that Mr. Lassiter could work on those things before the item reached the City Commission, since it was a concern to many of the residents.

Dr. Grissom questioned the nature and location of common areas for the new owners.

Mr. Merrell said that would be detailed in the plat, another process they were going through. He said that he did not have exhibits available for the item before the board, but that the common areas would be fully identified in the plat documents.

Dr. Grissom asked if the applicant wanted to respond to the residents' comments regarding the "deplorable condition" of the golf course.

Mr. Merrell said that they intended to address that conditions at the golf course were less than perfect. He said that they also wanted to point out that the golf course was being redeveloped to retrofit reuse water lines throughout the entire irrigation system at a cost of hundreds of thousands of dollars. He said that reshaping the course would also be a huge improvement. He said that together with the residences, the golf club and the tennis facility, it would be a much better place. He thought that the residents would be happy with it.

Mr. Merrell agreed that a CADD drawing could make anything look good, but pointed out that the pictures would be the zoning map for the property. He said that if they wanted to change anything, they

would have to reappear before the Board for another advertised public hearing. He said that the reason Staff liked the Planned Residential Development was that they had the ability to negotiate the zoning and had done so to the benefit of the City and pointed out that those things were binding.

Dr. Grissom asked Mr. Merrell if he and the applicant had previously discussed the possibility of increasing the size of the replacement trees used for mitigation.

Mr. Merrell said that their landscape architect, Galen Pugh, had been in dozens of meetings with the City staff and that many changes had been made to the plan to avoid impacting important trees. He said it was a given that the trees would be thinned and that the dead trees would be removed; he said the plan also exceeded the City's Code requirements for landscaping, typical of planned development rezoning negotiations. He reiterated that there had been a great deal of focus by City staff with regard to the trees.

Dr. Grissom stated that she was sensitive to the tree mitigation concerns and recalled her shock when she discovered that the beautiful, healthy trees in Breakaway Trails had been removed and replaced with what amounted to twigs. She thought that they should exceed the current excession, if possible.

Mr. Merrell thought that the issue was avoiding the removal of the trees, rather than with what to replace the existing trees. He noted that a tree survey had enabled them to identify all the important trees and that saving certain trees had required them to redraw the plans several times.

Dr. Grissom said she recognized that the applicants had presented a project that was beautiful. She questioned whether the Board could mandate that the development be sustained in the best possible condition at all times, i.e., in perpetuity.

Mr. Thomas recalled that Hurricanes Charley and Frances had caused the removal of a lot of old, dying and diseased trees, but not before tremendous damage had been done to the homes of the residents. He advised that his daughter, a resident of Ormond Lakes, had been required to save some magnificent oaks on her property, but less than a year later one of those same oaks was costing her $2,000 to remove because it had been diseased and had fallen on her fence. He stated that although he felt mitigation was a good thing in the long run and that he was not in favor of taking out a lot of trees, there were a lot of rotten, dead, sick and diseased trees throughout the city that should be removed.

City Attorney Hayes advised the Chair that he included a provision in all of the development orders that conferred to code enforcement the power to enforce the terms of the development order, as with any other ordinance. He said that the City therefore had the power to keep all projects from falling into disrepair.

Chairperson Press pointed out that it was 9:00 pm and asked that subsequent speakers limit their comments to things that had not already been expressed to the board.

Ms. Linda Larsen Lewis, 231 Rio Pinar, expressed her concern that her property line would be 100 feet from one of the three estate lots behind her property. She said that the trees were the only thing that would visibly buffer her home from her new neighbor and asked for assurance that the trees would remain.

Mr. Ervin reported that he had met with Ms. Lewis the day before and stated that her concerns were the City's concerns. He pointed out the location of the three estate lots and said that those lots would have the minimum lot size, width and setbacks that applied to the existing subdivision. He also pointed out

Mrs. Lewis' lot and said that although the distance from the lot line to the proposed lot line was 100', the distance between homes would be 160'. He said that the trees in that area would be preserved by the developer, but cautioned that once sold, the homeowner could take out some of the trees if they met the mitigation requirements. He said that the City had not required a minimum buffer because of distance between the lot and the buildings and the existing landscaping along the perimeter of the Lewis lot line but advised that it was within the purview of the Board to do so if they felt the trees should be protected.

Mr. Jorczak questioned the size of the existing trees.

Mr. Ervin replied that the trees ranged from small saplings to a 40" oak; he noted that there were several historic trees, the majority of which were specimen trees. He said that the tree survey showed only the trees over 6" in diameter (protected trees).

Mr. Jorczak asked if taking those trees would require a separate action from the City.

Mr. Ervin explained that once the three residential lots were sold, the homeowners could request the removal of any tree on their property, the same as any homeowner in the city of Ormond Beach. He said the number of trees that would have to be replaced would depend on the size of the tree to be removed. He said there was currently nothing in the City's Code or in the project documents that would require minimum tree line buffering on the residential lots.

Mr. Jorczak remarked that he understood, but thought it unlikely that someone buying an estate lot and erecting a big house would then want to take down the trees.

Mr. Ervin replied that it had happened in the past. He recalled Ms. Lewis' question as to whether or not a buffer was to be conserved that could not be touched and stated that the reality was that when the property was transferred, the owners could conceivably remove the trees.

Mr. Jorczak advised Ms. Lewis that taking down a specimen tree in Ormond Beach was a big deal.

Mr. Thomas agreed.

Mr. Ervin pointed out that historic trees were different than specimen trees. He stated that the developer was being required to do a directional dig for the extension to the sanitary sewer so that it a 40" historic oak would not be impacted. He said that there were also 25 – 28" oaks that had been identified for preservation, but wanted it on the public record that they were located within the property to be subdivided; therefore, if the subsequent owners met the mitigation requirements, removal of the trees would be justified.

Dr. Grissom asked how the deed restriction would work.

Mr. Ervin said that if the Board wanted to require a minimum buffer, they could identify, e.g., a 10' perimeter buffer with a tree every so many feet as part of the development order.

Ms. Lewis stated that people did take trees down so that they could have view of the golf course. She acknowledged that tracking 1,100 trees was an overwhelming job, but stated that she had noted a healthy pine and two smaller pines on the property that were not shown on the survey.

Ms. Reynolds asked what protections were in place to prevent the project from going bankrupt either because of mismanagement or because of market conditions. She said that she had seen it happen in far better situations and did not want a situation in which new owners would be allowed to do whatever they wanted just because they were finishing a stalled project. She expressed concern because of the scope of the project and because the owners had not demonstrated the ability to maintain the golf course.

City Attorney Hayes advised the Chair that development orders ran with the land; therefore, the owner of the land (or a subsequent owner) was subject to the requirements of the development order. He said there was no way to know whether or not any particular project would be built out or flounder. He said that the best the City could do was to create a safety net in the development order and ensure that the development occurred in accordance with the requirements of the approval.

City Attorney Hayes confirmed for Ms. Reynolds that the proposal was for a phased project and that the developer would have to complete one phase before starting another.

Long-time resident Ms. Susan Juckett, 311 Rio Pinar Trail, said that her view, which had gone from "lovely" to a lot of dead trees, and would now be of a comfort station (golf course bathroom).

City Attorney Hayes assured Ms. Juckett that any new owners in the future would also be required to preserve the golf course.

Ms. Juckett questioned the time line for all phases to the anticipated completion of the project. She stated that she was concerned with construction noise, dust, etc.

Mr. Ervin said that the construction timeframe identified in the PRD development order would be valid for five (5) years. He said that if Phase I had not been completed in that timeframe, the order would lapse. He said that the conditions would remain in place, but any redevelopment would require that it be brought back for another hearing and, with the existing conditions as minimum standards, any kind of upgrades would have to be to current Code.

Ms. Juckett asked if it would be to Phase I completion or completion of the project.

Mr. Ervin responded that it would be to completion of the project.

Ms. Juckett asked if the tree mitigation would be on-site. She also questioned the impact of new residents on Tomoka Elementary School, shopping facilities, the hospital, as well as the effect they could be expected to have on the water pressure in the area, already low.

Chairperson Press pointed out that the City staff was not aware of the problem and would address it.

Ms. Juckett stated that the problem would get worse before it got better. She found it hard to believe that the developer did not know the price for which they expected to market the units.

Mr. John Randall, 70 Oakmont Circle, recalled that he and his father had cleared their lot by hand and that subsequent generations would be occupying the residence. He questioned what mechanism would ensure that the integrity of the project would be maintained and that the homeowners' association would be able to collect their dues in order to pay the cost of maintaining the things for which they would be responsible. He asked who would be responsible for the property covered by the conservation easements

and questioned what would happen if the golf course went belly-up. He also expressed concern with the wildlife habitat that would be lost.

Mr. Randall commended the developer on a great idea, but sought assurance that the dream continued to be a reality in 20 years.

Dr. Grissom said she liked the idea of a deed restriction to protect the property.

Mr. Ervin responded to Mr. Randall's question that the City would have the ability, as with any easement, to access the property for maintenance and then charge the homeowners' association; he likened it to a sort of lien on the property. He said the City had the guarantee that someone would maintain the property and that the HOA would ultimately be financially responsible per code enforcement provisions in the easement documents.

Mr. Ervin said that the conservation/open space easements over the golf course meant that the owner continued to own the golf course property, but restricted the use of the property to a golf course and open space purpose. He said it would be an easement to the City; therefore, the easement could not be released without the approval of the City. He said that the easement would be described around the golf course itself, and that based on the testimony, RTH Corporation would maintain ownership of the golf course; he said that the areas around the townhomes and condominiums would be identified as common areas for those particular projects. He said that the common areas being used by the condominiums would be owned, maintained and operated by that association, whereas the golf course would be owned, maintained and operated by the RTH, Inc. He said that the City would require that the conservation easement on the golf course be recorded prior to any development. He pointed out that the easement was being created in association with the subdivision plat.

Mr. Jorczak asked if the City had ever required surety bonds to ensure completion of a project.

Mr. Ervin explained that they allowed surety bonds only for subdivision improvements, not for commercial developments. He agreed with the resident who had stated that developers sometimes failed to complete projects and said that in a market-driven economy the market sometimes had to rebound before someone else finished a development. He said that was the reason that the city attorney required recording of a very specific development plan that provided very specific guidelines as to what could be developed on a certain property; a subsequent developer would know exactly what could and could not be done. He explained that traditional zoning allowed for a great deal of options, whereas the PRD was a very specific recorded document of covenant and restrictions that traveled with the land, not the owner. He said it gave the residents of Tomoka Oaks much better protection for future conditions.

City Attorney Hayes said that from a legal standpoint, surety bonds sounded good, but were not practical. He pointed out that the City would not want to have to finish a project in default; it would create a nightmare scenario for the City.

City Attorney Hayes recommended that the Board members voice their comments on the proposal in an effort to solicit a motion. He offered to assist them with any conditions that they might wish to impose with their recommendation.

Mr. Ervin stated that he had summarized for clarification the ten (10) issues that had been brought up by the board members:

1) The City's engineering staff reported no environmental impacts.
   - Determine whether or not an environmental impact or assessment report has been done.
   - Forward a copy to the resident who requested it and include a copy in the City Commission's agenda packet.

2) Traffic conditions:
   - Analyze improvements at the circle that would make it safer (striping, signage, etc.).
   - Ask the applicant to look at other improvements that might be made.
   - Provide signal warrant study background information, i.e., why a signal is not warranted at the intersection of Tomoka Oaks Boulevard and Nova Road

3) Request to upsize the minimum size of the trees for mitigation. *(Mr. Ponitz)*

4) Question the possibility of providing reuse water for lots adjoining the golf course (noted that it was not identified in the City's Capital Improvements Program) - *Mr. Ponitz*

5) Address water pressure issues in Tomoka Oaks and include in the information forwarded to the City Commission.

6) Identify if minimum golf course maintenance standards are available from either a local or national organization. *(Mr. Jorczak)*

7) Clarify the role of the City in establishing the Covenants and Restrictions and the Development Order to ensure that the golf course is protected in perpetuity.

8) Possibility of notice to future purchasers of property in the subdivision of potential for airport impacts. *(Mr. Jorczak)*

9) Address concern regarding the buffering of the estate lots. *(Ms. Lewis)*

10) Documentation to ensure that each phase of the project is completed prior to beginning the next phase; ensure that the complete project will be built out in five years.

Chairwoman Press opened the floor to board comments.

Mr. McCoy pointed out that Mr. Momberger, one of the speakers, was a registered landscape architect and that he had not seemed particularly concerned with the issue of tree mitigation. He also pointed out that Mr. Ponitz, one of the other speakers, was the Utilities Engineer for the City of Daytona Beach. He said that the gentlemen were good at their jobs; therefore, he felt reasonably assured that the landscaping mitigation was well within or surpassed the City codes. He suggested that the many of trees about which the residents were concerned were probably in poor condition and had most likely reached the end of their useful life.

Mr. Thomas said he was also a long-time resident who favored the project. He said that he had sat on the Planning Board for many years and could recognize when the alternative was worse than the plan. He said he did not want 300-400 homes added, when the proposal was for only 122 homes of what he

believed would be part-time residents. He felt it was a beautiful plan and that the project would be a great asset to Ormond Beach.

Mr. Thomas referred to the concern expressed by a resident that the survey had missed a large sand pine, and explained that the State did not recognize sand pines as significant trees; therefore, it had not been marked. With regard to the concerns about the project not being completed, he stated that the three best real estate values were: a view, water and a golf course; he thought there would be buyers simply because the property was on a golf course. He restated that the City was tough on the issue of tree removal and reiterated his support for the project with the conditions discussed.

Mr. Jorczak echoed Mr. Thomas' comments and said that he thought it was an upscale project with a lower density than what would otherwise be allowed. He thought it would upgrade the neighborhood and would generate dollars that would help improve the golf course and surrounding amenities. He said that he hoped that the City would consider the concerns raised at meeting and said that he would recommend approval.

Dr. Grissom said she also supported the project and any motion to approve would include any amendments necessary to address the concerns raised. She thought that deed restrictions should be required for the three estate lots to require that they maintain the tree buffer in order to protect the privacy of abutting property owners.

Chairwoman Press opined that no one would buy the properties unless the golf course was upgraded and felt that the proposal would force those improvements to occur. She said for that reason she believed the project would be good for the area and was an example of Smart Growth.

Mr. Thomas recommended approval of PRD 06-32, with the recommendations by staff. He added that his motion was amendment friendly and clarified that he was including the ten items as listed by the planning director.

Mr. McCoy seconded the motion.

City Attorney Hayes responded to questions by Mr. Jorczak and Mr. McCoy that the [tree] buffer mandated by deed restriction would apply only to the three estate lots. He said that the board could make that a condition of their recommendation.

Mr. Ervin replied to Mr. Thomas that the list of ten items included addressing the traffic circle. He also pointed out that the applicants had already agreed to provide for a minimum 10-foot wide buffer at the rear of the lots, in which there would be a minimum planting of one tree every 30 linear feet with continuous hedge material between the trees. He explained that the buffer for those homes would be required as a part of the development order, either as a private restriction on the individual lots or by mandating that the buffer be placed on the golf course outside those lots. He said that the applicants could make that decision.

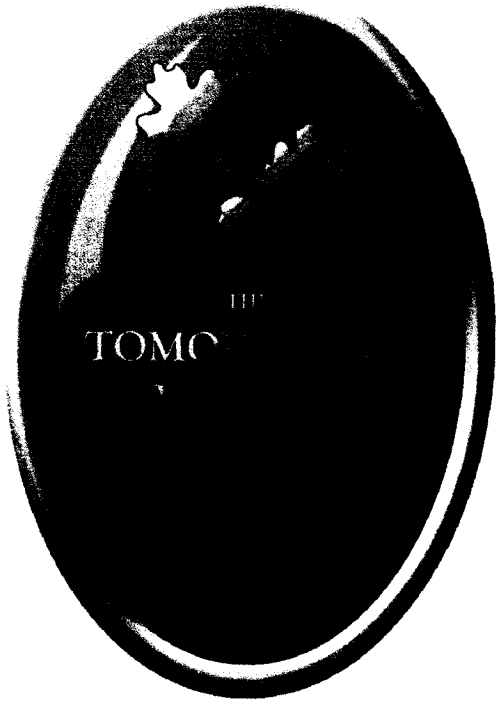
Mr. Merrell said that he understood the resident's concern, but said that having buffers between two houses was not typical and that houses backed up to each other in subdivisions all over the city. He said that the applicants were willing to do what Mr. Ervin was proposing, but that it was routinely done as a matter of zoning. He thought that having a provision in the development order was the better way to handle the issue, i.e., the developer would establish the buffer and it would then transfer with the land;

subsequent property owners would be responsible for maintaining it. He said that the provision could be enforced through the code enforcement mechanism.

City Attorney Hayes agreed that it would be better to put the onus on the developer as opposed to the property owner.

Mr. Merrell said that the suggested method would require only a code enforcement action rather than a court hearing, should there be a problem with the buffer in the future.

Mr. Thomas agreed to add acceptance of the applicants' voluntary inclusion of the buffer to his motion.



Mr. McCoy reiterated his second.

Ms. Bates called the question, which was approved by unanimous vote.

Mr. Thomas thanked everyone for attending the meeting, participating in the democratic process and helping the board to make their decision.

Mr. Ervin announced that the proposal was tentatively scheduled for the October 3rd City Commission meeting. He advised the residents that they would again be noticed and that an advertisement would again run in the newspaper.

The board voted to close the public hearing.

Mayor Costello stated whatever name was attached, be it a ditch or tributary, what was important was that this project can not stop water flowing onto the land. He asked if the height of the fence would be at a low point compared to the road.

Mr. Ervin stated the maximum height of the fence would be six feet along the property line. He explained the industrial parcel closest to US1 would have an extensive amount of fill and would be four feet higher at a finished floor elevation than the homes in Ormond Lakes, and the project would have a six foot wall at that location along with landscaping with the finished grade approximately two to three feet below the top of the wall. Mr. Ervin recommended a condition be added to correlate the fencing to the elevation of the roadway.

Mayor Costello advised it was very dark in front of the McDonalds west of I-95 where the lights were shielded, but was very bright after passing the screening which proved the screening does work well.

Commissioner Kelley moved, seconded by Commissioner Gillooly, to approve Resolution No. 2006-222, approving the Special Exception to include the indoor pool as presented and the wall height to extend six feet above the elevation of a road entering or surrounding the property.

Call Vote:

Commissioner Kelley	yes
Commissioner Partington	yes
Commissioner Gillooly	yes
Commissioner Kent	yes
Mayor Costello	yes

Carried.

Mayor Costello called for a short break at 9:30 p.m. and he reconvened the meeting at 9:37 p.m.

Hearing no objection, Mayor Costello closed the public hearing on Item #9(E).

Item #9(F) - "Ormond Beach Commercial Complex"

RESOLUTION NO. 2006-223

A RESOLUTION AUTHORIZING THE EXECUTION AND ISSUANCE OF A DEVELOPMENT ORDER FOR "ORMOND BEACH COMMERCIAL COMPLEX" SPECIAL EXCEPTION ON A SITE LOCATED AT 500 WEST GRANADA BOULEVARD WITHIN THE B-9 (BOULEVARD) ZONING DISTRICT; BY AUTHORIZING A WAIVER OF THE MASONRY BUFFER WALL REQUIREMENTS ALONG THE REAR PROPERTY LINE, BY ALLOWING THE USE OF AN EXISTING SIX FOOT HIGH WOOD FENCE IN LIEU THEREOF; ESTABLISHING CONDITIONS AND EXPIRATIONS OF APPROVAL; AND SETTING FORTH AN EFFECTIVE DATE.

Commissioner Kelley moved, seconded by Commissioner Partington, to approve Resolution No. 2006-223, as read by title only.

Call Vote:

Commissioner Partington	yes
Commissioner Gillooly	yes
Commissioner Kent	yes
Commissioner Kelley	yes
Mayor Costello	yes

Carried.

Hearing no objection, Mayor Costello closed the public hearing on Item #9(F).

Item #9(G) – "The Tomoka Oaks Golf Village"

ORDINANCE NO. 2006-17

AN ORDINANCE AMENDING SUBSECTION A, ZONING MAP, OF SECTION 2-03, OFFICIAL ZONING MAP AND ZONING DISTRICT, OF CHAPTER 1, ARTICLE II, ESTABLISHMENT OF ZONING DISTRICTS AND OFFICIAL ZONING MAP, OF THE LAND DEVELOPMENT CODE, BY AMENDING THE OFFICIAL ZONING MAP TO REZONE A 147-ACRE PARCEL OF REAL PROPERTY FROM R-2 (SINGLE-FAMILY LOW DENSITY) TO PRD (PLANNED RESIDENTIAL DEVELOPMENT), SAID REAL

PROPERTY BEING LOCATED WITHIN THE LIMITS OF THE EXISTING TOMOKA OAKS GOLF COURSE; ESTABLISHING BOUNDARIES; AUTHORIZING REVISION OF THE OFFICIAL ZONING MAP; APPROVING A DEVELOPMENT ORDER FOR "THE TOMOKA OAKS GOLF VILLAGE" PLANNED RESIDENTIAL DEVELOPMENT (PRD); REPEALING ALL ORDINANCES AND PARTS THEREOF; AND SETTING FORTH AN EFFECTIVE DATE.

Mr. Ervin stated this was a rezoning for a 147 acre parcel from R-2 to Planned Residential Development (PRD). He noted there was a revised development order on the dais that identified the three items from the Planning Board recommendation that could be incorporated into the final development order. Mr. Ervin pointed out many comments from the Planning Board were recommendations for staff to check certain items such as water pressure and landscaping; therefore, they could not be identified in the development order; but the City Attorney culled through those comments to come up with specific requirements that could be incorporated into the development order, and they were addressed by staff. He stated the reuse availability, which was a major capital undertaking, was not feasible at this time. Mr. Ervin reported the landscaping plan was reviewed, and many of the trees being planted were already above and beyond the minimum requirement. He stated traffic improvements would be incorporated into site plan, and the applicant had agreed to those improvements. Mr. Ervin noted these improvements would include striping, signage, and cautionary signage. He advised staff contacted the Utilities Department regarding water presser concerns at least three times to verify whether or not water pressure problems were being experienced in the Tomoka Oaks area; but the pressures were meeting minimum requirements, and no specific problems were identified. Mr. Ervin stated there would not be any dead-end systems and would actually loop back into the existing system; therefore, water pressure should be maintained.

Mr. Ervin advised the development order would include notification to purchasers by a note on the plat that they were within proximity of the airport and within the flight plan of the airport. He stated the golf course shall remain a golf course and would not be able to be converted to any other use without approval by the City Commission. Mr. Ervin reiterated this property was Low Density Residential with an R-2 zoning; therefore, a developer could, in theory, develop the entire golf course for 600 homes, but considering the contours 300 single-family homes would be more realistic. He explained the proposal was for multi-family homes consisting of three and four story condominiums, town homes, and three single-family homes.

Mr. Rob Merrell, 1638 John Anderson Drive, representing the applicant, provided a visual presentation of the project. He reported he would rely on Mr. Ervin's conclusions in his staff report concerning Comprehensive Plan consistency, compliance with all of the City's Land Development Code requirements, and other issues. Mr. Merrell pointed out the Planning Board recommended unanimous approval with conditions that they have accepted. He stated there were issues everyone agreed on regarding some Smart Growth principles, and this project represented some of those principles such as the concept of urban renewal, proximity to services, clustering development, and the preservation of open space. Mr. Merrell explained this project was for 122 residential units, a new club house, pro shop, tennis center, tennis courts, and many amenities. He stated the property owner made a concession to cluster a lower number of units that would allow a great deal of open space. Mr. Merrell reported there would be a total of 84 condominium units, 35 townhouse units, and three residential units. He presented a computer rendering of the development proposed superimposed on the aerial photograph and pointed out the various elements of the proposed plan along with renderings of the buildings and landscaping. Mr. Merrell reported there would be considerable improvements to the lake system and the green for the golf course as a result of retrofitting the golf course for reuse water. He advised this request was for a planned redevelopment rezoning.

Mr. Harry Wendelstedt, 88 South St. Andrews, stated he has been a resident of Tomoka Oaks for 35 years, which was one of the finest residential developments in Volusia County. He stated he believed this would adversely affect the residents who live along the golf course. Mr. Wendelstedt reported people were told when purchasing their property that this golf course would remain for 99 years. He expressed a concern regarding property values; however, he has been informed that should not be a concern. Mr. Wendelstedt stated Tomoka Boulevard was two lanes, and he expressed concern regarding what would happen should another natural disaster occur such as the fires of 1998. He recommended placing a traffic light at the end of Tomoka Boulevard and Nova Road. Mr. Wendelstedt noted residents may have had a different view if the renderings and information were made available to the people earlier than this evening. He stated he opposed the development because the homeowners would loose the site of the rolling green fairways.

Ms. Joan Deemer, 86 South St. Andrews Drive, stated she lived in Tomoka Oaks for 28 years and opposed the recommended changes. She expressed concern that this would adversely affect the area with too many people and too many cars taking away the charm of Tomoka Oaks.

Ms. Zella Wilen, 48 Oakmont Circle, stated in the Fall of 1970 a request to rezone this property to R-5 was rejected at the Planning Board and in October 6, 1970, the Land Use Map was adopted by the Commission and that map showed Tomoka Oaks, including the golf course and undeveloped wooded areas, to be Single-family Residential Low Density zoned R-2, making Tomoka Oaks some of the largest lots in Ormond Beach. She reported that at the recent Planning Board meeting she objected to the entire rezoning change, stating Tomoka Oaks Boulevard should not be approved for an extension or a connection to any planned or named street within this area. Ms. Wilen voiced an objection to any overnight lodging should that be considered. She stated she opposed the increased traffic through Tomoka Oaks to the South St. Andrews area and noted this would add additional traffic to the Trails as well. Ms. Wilen reported the City Attorney in 1970 talked about spot zoning, cautioning the Planning Board that the golf course was a conditional use and would be able to request certain updating and remodeling, and that statement was relevant today. She noted restrooms were a problem due to vandalism, but were needed. Ms. Wilen pointed out the club house and garage areas could have been upgraded at any time in the past 36 years. She reported this change would impact the entire Tomoka Oaks area, not only those living on the golf course or within the 300 foot notification area. Ms. Wilen equated the 1970 R-5 request to this PRD request and opposed the change. She advised part of the selling point for homes in this area was that this would remain a golf course for 99 years, and she urged the zoning remain the same and the project be stopped.

Mr. Rob Merrell stated the property owner made a commitment to maintain the open space of the golf course in perpetuity. He pointed out the entire property was currently zoned for home sites; however, the development order under this proposal would indicate that the golf course would remain open space, and the City would then be able to enforce that as an element of the development order. Mr. Merrell reported speakers mentioned a 99-year provision, but there was no such covenant; however, this proposal would include a commitment to cluster 122 units in areas designed to be the least intrusive along with a recorded covenant to keep the golf course.

Mr. Hayes concurred that there was no covenant of record regarding the golf course; therefore, the applicant had a right to request this redevelopment of the Commission. He noted the City could now go back to try to do what some of the homeowners believed they already had for some 30 years.

Mr. Merrell advised the Commission received a complete traffic report in their information packet, and no failures in the transportation network were found, but several improvements were being proposed. He reported he met with as many people as possible prior to this meeting. Mr. Merrell advised that many people saw the pictures in advance of the Planning Board meeting, and there was a full-house at the Planning Board meeting. He noted many of those people did not come to make an objection tonight because they went away from the meeting satisfied that their questions and concerns were answered. He reported a DOT warrant would be needed for a traffic light, but the requirements for a light would not nearly be met. Mr. Merrell stated this was very different from what occurred in the 1970s because what was being shown now was what would occur if approved by the Commission, and it could not be changed.

Commissioner Kelley moved, seconded by Commissioner Partington, to approve Ordinance No. 2006-17, on first reading, as read by title only.

Commissioner Kent reported he met with the developers a year ago, and the plans had not changed a great deal. He expressed concern regarding buffering for the current residents; however, the presentation showed this was addressed, and he could support this proposal.

Commissioner Gillooly stated the concept had merit, but she questioned what protection the people who purchased a home on a golf course would have. She noted people needed to be aware when purchasing a home what could occur to the property surrounding their home. Commissioner Gillooly pointed out nothing was uncovered that would protect the people to have this remain a golf course. She stated Tomoka Oaks was and remains a premier community in the City, but the golf course had not keep up to that premier status. Commissioner Gillooly suggested this development would bring in new residents, but at a greatly reduced rate than was permitted. She noted the design was thoughtful in that it kept the buffer, and the improvements may help bring the premier status back to the homes, increasing the value of the

existing homes. Commissioner Gillooly informed Mr. Merrell that she would like to assure the residents this would be the last residential plan for the Tomoka Oaks community. She advised she also told Mr. Merrell that she noted the developer planned the project with surrounding green space and improvements to the golf course, but she needed additional assurances that this would remain intact. Commissioner Gillooly reported the reply she received was an iron clad commitment. She stated the developer had a right to develop this property in a residential manner, and all of the above-noted improvements would to be made, which would make the overall project better.

Commissioner Partington advised he met with the developer last year and would vote for this for some of the same reasons as Commissioner Kent and Commissioner Gillooly previously mentioned. He noted this project would improve the entire subdivision, and this development set the standard for developments in other areas. Commissioner Partington reported he was comfortable this developer would make this project as high a quality, if not a higher quality, than he had done previously.

Commissioner Kelley reported he also met with the developer and saw a presentation last year. He stated this answered many questions; and while it would not answer the questions of those who want the land to stay exactly as it was, it did answer the question of whether there would be residential buildings constructed directly behind someone who now had a golf course view. Commissioner Kelley advised the placement of the development would not adversely impact the visual effect. He pointed out this would provide assurance that this would never come back to an R-2, R-3, or R-4 and would be dedicated. Commissioner Kelley reported the owner had prospective buyers come to him years ago to develop the property, but chose not to sell because he wanted to keep the golf course. He advised the proposal would only improve the value of all of the property in the area. Commissioner Kelley stated he shared a concern relative to the traffic, but was convinced the people would not come through the Trails because it would be faster to go to Nova Road and turn west to Clyde Morris Boulevard. He noted the only difficulty he could envision was the time it would take to exit on to Nova Road, particularly eastbound. Commissioner Kelley reported this project would be an improvement to the entire neighborhood, and it would assure the golf course would remain.

Mayor Costello reported he met with the developer a year ago, and the reality of the situation was that this was a residential piece of land that could hold 600 units and could realistically only hold 300 units without a golf course, but this proposal was for 122 homes with a golf course. He stated the choice was that in order to keep the golf course, the owner would have to make some money. Mayor Costello explained the alternative was, because the land was poorly permitted years ago, a developer had the right to construct 300 single-family homes and remove the golf course. He pointed out that in this development order the only thing permissible was the golf course open space. Mayor Costello recommended the developer set aside the finances for a traffic light even if it was not warranted at this point in that he believed traffic to be a valid concern. He asked if DOT would permit a light if the money was available.

Mr. Sans Lassiter, Traffic Engineer, replied if a traffic light was installed that does not meet the DOT warrants and an accident was caused by the fact the signal was installed, it would make the one installing the light liable. He explained traffic lights are a major liability issue because they increase rear end accidents and are meant to avoid right angle accidents which are more severe. Mr. Lassiter advised that due to this particular entrance on this particular road, most of the turns from Nova Road would be northbound left turns entering the parcel and most exiting from this project would be eastbound or outbound right turns, and those movements do not conflict with each other; therefore, this would not meet DOT's requirement for a traffic signal, and they would not allow it to be installed without a significant change in development such as a build-out of area. He reported the count at the peak hours did not meet the warrant, and the requirement was to meet eight hours to warrant a signal.

Mayor Costello stated the City had hired Mr. Lassiter on numerous occasions, and he was known to be honorable and would not state anything that could later be refuted. He assured Ms. Wilen the plan did not include any hotel/motel type proposal.

Call Vote:

Commissioner Gillooly	yes
Commissioner Kent	yes
Commissioner Kelley	yes
Commissioner Partington	yes
Mayor Costello	yes

Carried.

Hearing no objection, Mayor Costello closed the public hearing on Item #9(G).

businesses along A1A were permitted to have pole signs. He pointed out this was an older building with an architectural design that was somewhat limiting to allow for horizontal signs at or below 20 feet, and staff was trying to follow what was done previously at the other two sites referenced.

Commissioner Gillooly stated Commissioner Partington received an e-mail today questioning the fairness on how the Commission judged special exceptions. She requested Mr. Ervin explain what constituted a special exception.

Mr. Ervin stated the Land Development Code was specifically amended for this particular situation. He explained in the mid 1990s there was a prohibition of all signs over 20 feet, and Peninsula Hospital indicated they could not get a 20-foot sign, but it was imperative to have a sign. Mr. Ervin reported that rather than going through a variance procedure, the Planning Board recommendation was to make a special exception for applicants to go through a public hearing process at the Development Review Board and at the City Commission level. He pointed out that the concept behind a special exception was what was being requested may not work everywhere in the district but may be appropriate in certain locations. Mr. Ervin reported this was regulatory relief granted toward existing structures built along the beachfront and in the hospital zoning districts because it would deal with more institutional buildings that would typically be taller and did not have the architecture to support typical signage.

Mayor Costello asked why the parrot had to be removed from the hotel but this could stay.

Mr. Ervin stated this would meet the sign area requirements while the parrot exceeded the size limitation, and the parrot was considered a graphic representation used for commercial free speech; therefore, interpreted as a sign. He noted there was also a prohibition against murals.

Mayor Costello reported he worked hard to keep the parrot, and he did not understand why this was recommended for approval while the parrot had to be removed.

Commissioner Partington stated he also appreciated the pole sign on A1A. He summarized that Mr. Ervin was indicating that in order to be consistent with what was previously approved staff was recommending this be approved. Commissioner Partington noted he considered that to be an important factor.

Commissioner Kelley stated there was a very clear difference that the Development Review Board considered and assessed incorrectly which was that a special exception was granted to B-7 for a Planned Business Development (PBD). He pointed out the hospital had no place for a sign, but this applicant did have a place for a sign. Commissioner Kelley reported the sign would not be obtrusive, but the exception granted was meant to apply in those situations where there was no place for a sign, which was not the case in this instance; therefore, he would vote against this request.

Call Vote:

Commissioner Partington	yes
Commissioner Gillooly	no
Commissioner Kent	no
Commissioner Kelley	no
Mayor Costello	no

Failed.

Hearing no objection, Mayor Costello closed the public hearing on Item #9(A).

Item #9(B) - "The Tomoka Oaks Golf Village"

ORDINANCE NO. 2006-17

AN ORDINANCE AMENDING SUBSECTION A, ZONING MAP, OF SECTION 2-03, OFFICIAL ZONING MAP AND ZONING DISTRICT, OF CHAPTER 2, ARTICLE I, ESTABLISHMENT OF ZONING DISTRICTS AND OFFICIAL ZONING MAP, OF THE LAND DEVELOPMENT CODE, BY AMENDING THE OFFICIAL ZONING MAP TO REZONE A 147-ACRE PARCEL OF REAL PROPERTY FROM R-2 (SINGLE-FAMILY LOW DENSITY) TO PRD (PLANNED RESIDENTIAL DEVELOPMENT), SAID REAL PROPERTY BEING LOCATED WITHIN THE LIMITS OF THE EXISTING TOMOKA OAKS GOLF COURSE; ESTABLISHING BOUNDARIES; AUTHORIZING REVISION OF THE OFFICIAL ZONING MAP; APPROVING A DEVELOPMENT ORDER FOR "THE TOMOKA OAKS GOLF VILLAGE" PLANNED RESIDENTIAL DEVELOPMENT (PRD); REPEALING ALL

INCONSISTENT ORDINANCES AND PARTS THEREOF; AND SETTING FORTH AN EFFECTIVE DATE.

Commissioner Kelley moved, seconded by Commissioner Partington, to approve Ordinance No. 2006-17, on second reading, as read by title only.

Item #11(A) - Signage for Professional Office Uses in the Greenbelt Overlay District

ORDINANCE NO. 2006-19

AN ORDINANCE AMENDING CHAPTER 3, PERFORMANCE CRITERIA, ARTICLE IV, SIGN REGULATIONS, SECTION 3-48, SPECIALIZED SIGN STANDARDS, OF THE *LAND DEVELOPMENT CODE* BY ALLOWING FOR ADDITIONAL SIGNAGE FOR PROFESSIONAL OFFICE USES IN THE GREENBELT OVERLAY DISTRICT, SUBJECT TO MINIMUM CRITERIA; REPEALING ALL INCONSISTENT ORDINANCES OR PARTS THEREOF; PROVIDING FOR SEVERABILITY; AND SETTING FORTH AN EFFECTIVE DATE.

Mr. Ervin stated this was an administratively initiated amendment to the Land Development Code to address a concern identified to the Commission from a local land developer. He reported there was a concern that the current land development regulations do not provide enough sign flexibility for larger office complexes located along the major thoroughfares of Granada Boulevard, Clyde Morris Boulevard, Williamson Boulevard and Hand Avenue. Mr. Ervin noted staff had been in discussion with this developer to determine what options were available in that there were no sign variances for new construction, so developers have two options: rezone their property to PBD where they would have some flexibility or to go forward with straight zoning and comply with the minimum established standards. He explained the current minimum standards call for monument signage, and the size of the sign would be based on the frontage of the property with a maximum number of six tenant panels in addition to the name of the facility. Mr. Ervin reported the applicant was concerned this was not meeting the needs of today's real estate market and identified that the purchasers need additional signage. He noted staff had some concerns relative to applying the regulations City-wide. Mr. Ervin pointed out staff was not indicating the proposal was unattractive, and the applicant did point out

Ordinance Adoption
Business Impact Estimate

Proposed ordinance's number and legal title:

2023-XX

AN ORDINANCE AUTHORIZING THE EXECUTION AND ISSUANCE OF A PLANNED RESIDENTIAL DEVELOPMENT DEVELOPMENT ORDER FOR THE "TOMOKA RESERVE" SUBDIVISION, AUTHORIZING THE DEVELOPMENT OF 272 LOTS ON 147.94+ ACRES TO BE LOCATED AT 20 TOMOKA OAKS BOULEVARD; ESTABLISHING CONDITIONS AND EXPIRATION OF APPROVAL; AND SET FORTH AN EFFECTIVE DATE.

This Business Impact Estimate is provided in accordance with section 166.041(4), Florida Statutes. If one or more boxes are checked below, this means the City is of the view that a business impact estimate is not required by state law for the proposed ordinance, but the City is, nevertheless, providing this Business Impact Estimate as a courtesy and to avoid any procedural issues that could impact the enactment of the proposed ordinance. This Business Impact Estimate may be revised following its initial posting.

☐ The proposed ordinance is required for compliance with Federal or State law or regulation;
☐ The proposed ordinance relates to the issuance or refinancing of debt;
☐ The proposed ordinance relates to the adoption of budgets or budget amendments, including revenue sources necessary to fund the budget;
☐ The proposed ordinance is required to implement a contract or an agreement, including, but not limited to, any Federal, State, local, or private grant or other financial assistance accepted by the municipal government;
☐ The proposed ordinance is an emergency ordinance;
☐ The ordinance relates to procurement; or
☒ The proposed ordinance is enacted to implement the following:
  a. Part II of Chapter 163, Florida Statutes, relating to growth policy, county and municipal planning, and land development regulation, including zoning, development orders, development agreements and development permits;
  b. Sections 190.005 and 190.046, Florida Statutes, regarding community development districts;
  c. Section 553.73, Florida Statutes, relating to the Florida Building Code; or
  d. Section 633.202, Florida Statutes, relating to the Florida Fire Prevention Code.

In accordance with the provisions of controlling law, even notwithstanding the fact that an exemption noted above may apply, the City hereby publishes the following information:

1. A summary of the proposed ordinance, including a statement of the public purpose to be served by the proposed ordinance, such as serving the public health, safety, morals, and welfare of the City.

This is an application submitted by Robert A. Merrell III, Esquire, Cobb Cole on behalf of the property owner, Triumph Oaks of Ormond Beach I, LLC, for the issuance of a development order for the Tomoka Reserve subdivision. The application seeks to allow the issuance of a development order for 272 single-family lots on approximately 147.94 acres under certain conditions and associated subdivision improvements. The subject property is currently zoned as PRD, Planned Residential Development, and is located at 20 Tomoka Oaks Boulevard.

2. An estimate of the direct economic impact of the proposed ordinance on private, for-profit businesses in the City, including the following, if any:

   a. An estimate of direct compliance costs that businesses may reasonably incur if the ordinance is enacted;

      None. This is a request for the issuance of a development order for a residential subdivision. No compliance costs are anticipated.

   b. Identification of any new charge or fee on businesses subject to the proposed ordinance, or for which businesses will be financially responsible; and

      None. This is a request for the issuance of a development order for a residential subdivision. There are no charges or fees proposed.

   c. An estimate of the City's regulatory costs, including an estimate of revenues from any new charges or fees that will be imposed on businesses to cover such costs.

      None. This is a request for the issuance of a development order for a residential subdivision.

3. A good faith estimate of the number of businesses likely to be impacted by the ordinance.

   None. This is a request for the issuance of a development order for a residential subdivision.

4. Any additional information the City determines may be useful.

   (This section may include: methodology or data used to prepare the Business Impact Estimate, e.g., City staff solicited comments from businesses as to the potential impact of the proposed ordinance by contacting the chamber of commerce, social media posting, direct mail/email, posting on the City's website, public workshop, etc.; efforts made to reduce the potential fiscal impact on businesses; and state the proposed ordinance is a generally applicable ordinance that applies to all persons similarly situated (individuals or businesses) and, therefore, the proposed ordinance does not affect only businesses.)

   No business impacts proposed. The item was advertised by U.S. mail to abutting property owners and newspaper advertisements. Information on the application is also on the city's website.

City of Ormond Beach
AGENDA ITEM

October 17, 2023 - City Commission

Number: 9.A

Section:	FIRST READING OF ORDINANCES		
Item Category:	First Reading of Ordinances	**Res./Ord. No:**	2023-54
Strategic Goal:	Governance - Other		
Department:	Finance		
Subject:	FY 2022-23 Budget Amendments		
Summary:	Request to amend the Fiscal Year (FY) 2022-2023 budget by $15,388,583 with a final budget amount of $127,882,372. The net budget amount is $87,635,962 and represents the budget amount without duplicate entries (transfers and departmental charges required by Generally Accepted Accounting Principles GAAP) required to comply with state budget requirements (such as transfers amongst funds). The attachment provides details regarding the proposed amendment of the FY 2022-23 budget. These amendments are largely related to construction projects included in the FY 2021-22 budget where construction carried over to FY 2022-23.		
Financial Impact:	The amendments will increase the budget by $15,388,583.		
Citizen Impact:	The budget amendments are required to comply with local and state budgetary requirements.		
Recommended Action (Staff, Advisory Board and/or Other):	Staff recommends approval of the amendments to the FY 2022-2023 annual budget.		
Staff Contact:	Kelly McGuire, Finance Director, (386) 676-3226		
Attachments:	1. 23-54 Budget Amendment FY2022-2023 (P23-0194G) 2. Budget Amendment 3. Attachment A Amendments 4. Ordinance Business Impact Estimate 10-01-23 OB Form exemptions listed		

Approval:		
	Kelly McGuire, Finance Director	10/6/2023
	Claire Whitley, Assistant City Manager	10/9/2023
	Joyce Shanahan, City Manager	10/10/2023

ORDINANCE NO. 2023-54

AN ORDINANCE AMENDING THE ANNUAL BUDGET FOR FISCAL YEAR 2022-2023 BY AMENDING THE GENERAL FUND (001); DOWNTOWN REDEVELOPMENT TRUST FUND (104); STORMWATER UTILITY FUND (107); AIRPORT FUND (108); LOCAL LAW ENFORCEMENT TRUST FUND (109); PENSION CONTRIBUTION PASS THROUGH FUND (113); RECREATION FACILITY FEE FUND (115); GRANTS FUND (116); 2010 BEACHFRONT PARK BOND FUND (220); CAPITAL IMPROVEMENTS FUND (301); EQUIPMENT RENEWAL & REPLACEMENT FUND (302); PUBLIC SAFETY VEHICLE & EQUIPMENT FUND (305); TRANSPORTATION IMPROVEMENTS FUND (308); FACILITIES RENEWAL & REPLACEMENT FUND (317); WATER AND WASTEWATER FUND (401); RENEWAL & REPLACEMENT FUND (409); SOLID WASTE FUND (460); AND THE GENERAL LIABILITY FUND (504); AND SETTING FORTH AN EFFECTIVE DATE.

WHEREAS, the City Commission desires to amend the annual budget for Fiscal Year 2022-2023 by amending the General Fund (001); Downtown Redevelopment Trust Fund (104); Stormwater Utility Fund (107); Airport Fund (108); Local Law Enforcement Trust Fund (109); Pension Contribution Pass Through Fund (113); Recreation Facility Fee Fund (115); Grants Fund (116); 2010 Beachfront Park Bond Fund (220); Capital Improvements Fund (301); Equipment Renewal & Replacement Fund (302); Public Safety Vehicle & Equipment Fund (305); Transportation Improvements Fund (308); Facilities Renewal & Replacement Fund (317); Water and Wastewater Fund (401); Renewal & Replacement Fund (409); Solid Waste Fund (460); and the General Liability Fund (504); as more particularly set forth on the Attachment "A" attached hereto and incorporated herein by reference, now therefore,

BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:

SECTION ONE. The City Commission hereby amends the 2022-2023 Fiscal Year annual budget as set forth on Attachment "A" attached hereto.

SECTION TWO. This Ordinance shall take effect immediately upon second reading.

PASSED UPON at the first reading of the City Commission, this 17th day of October, 2023.

PASSED UPON at the second and final reading of the City Commission, this 7th day of November, 2023.

Ordinance Adoption
Business Impact Estimate

Proposed ordinance's number and legal title:

2023-54

AN ORDINANCE AMENDING THE ANNUAL BUDGET FOR FISCAL YEAR 2022-2023 BY AMENDING THE GENERAL FUND (001); DOWNTOWN REDEVELOPMENT TRUST FUND (104); STORMWATER UTILITY FUND (107); AIRPORT FUND (108); LOCAL LAW ENFORCEMENT TRUST FUND (109); PENSION CONTRIBUTION PASS THROUGH FUND (113); RECREATION FACILITY FEE FUND (115); GRANTS FUND (116); 2010 BEACHFRONT PARK BOND FUND (220); CAPITAL IMPROVEMENTS FUND (301); EQUIPMENT RENEWAL & REPLACEMENT FUND (302); PUBLIC SAFETY VEHICLE & EQUIPMENT FUND (305); TRANSPORTATION IMPROVEMENTS FUND (308); FACILITIES RENEWAL & REPLACEMENT FUND (317); WATER AND WASTEWATER FUND (401); RENEWAL & REPLACEMENT FUND (409); SOLID WASTE FUND (460); AND THE GENERAL LIABILITY FUND (504); AND SETTING FORTH AN EFFECTIVE DATE.

This Business Impact Estimate is provided in accordance with section 166.041(4), Florida Statutes. If one or more boxes are checked below, this means the City is of the view that a business impact estimate is not required by state law for the proposed ordinance, but the City is, nevertheless, providing this Business Impact Estimate as a courtesy and to avoid any procedural issues that could impact the enactment of the proposed ordinance. This Business Impact Estimate may be revised following its initial posting.

- ☐ The proposed ordinance is required for compliance with Federal or State law or regulation;
- ☐ The proposed ordinance relates to the issuance or refinancing of debt;
- ☒ The proposed ordinance relates to the adoption of budgets or budget amendments, including revenue sources necessary to fund the budget;
- ☐ The proposed ordinance is required to implement a contract or an agreement, including, but not limited to, any Federal, State, local, or private grant or other financial assistance accepted by the municipal government;
- ☐ The proposed ordinance is an emergency ordinance;
- ☐ The ordinance relates to procurement; or
- ☐ The proposed ordinance is enacted to implement the following:
  a. Part II of Chapter 163, Florida Statutes, relating to growth policy, county and municipal planning, and land development regulation, including zoning, development orders, development agreements and development permits;
  b. Sections 190.005 and 190.046, Florida Statutes, regarding community development districts;
  c. Section 553.73, Florida Statutes, relating to the Florida Building Code; or
  d. Section 633.202, Florida Statutes, relating to the Florida Fire Prevention Code.

In accordance with the provisions of controlling law, even notwithstanding the fact that an

exemption noted above may apply, the City hereby publishes the following information:

1. A summary of the proposed ordinance, including a statement of the public purpose to be served by the proposed ordinance, such as serving the public health, safety, morals, and welfare of the City.

Ordinance amends the FY 2022-23 budget as required by state law and local ordinance.

2. An estimate of the direct economic impact of the proposed ordinance on private, for-profit businesses in the City, including the following, if any:

    a. An estimate of direct compliance costs that businesses may reasonably incur if the ordinance is enacted;

    N/A

    b. Identification of any new charge or fee on businesses subject to the proposed ordinance, or for which businesses will be financially responsible; and

    N/A

    c. An estimate of the City's regulatory costs, including an estimate of revenues from any new charges or fees that will be imposed on businesses to cover such costs.
    N/A

3. A good faith estimate of the number of businesses likely to be impacted by the ordinance.
    None

4. Any additional information the City determines may be useful.

    (This section may include: methodology or data used to prepare the Business Impact Estimate, e.g., City staff solicited comments from businesses as to the potential impact of the proposed ordinance by contacting the chamber of commerce, social media posting, direct mail/email, posting on the City's website, public workshop, etc.; efforts made to reduce the potential fiscal impact on businesses; and state the proposed ordinance is a generally applicable ordinance that applies to all persons similarly situated (individuals or businesses) and, therefore, the proposed ordinance does not affect only businesses.)

    N/A
