Ms. Blake will serve the City's day-to-day service point of contact. She is highly familiar with municipalities similar to the City's program and well versed in responding to the service requests, issuing certificates of insurance, maintaining property, vehicle, and equipment schedules, claims handling as well as general requests for service. Melody has been in the insurance industry for 30 years and boasts an impressive record of accurate, quality service and routinely receives accolades from her clients. She currently handles some of Brown & Brown Public Sector's largest and most complex clients and is well trained and experienced in handling custom self-insured insurance programs.

**Scope of Responsibility for the City of Ormond Beach**

- Proposal/Binder/Policy delivery
- Invoicing, Certificates, and general inquiries
- Audits and premium adjustments
- Property, Auto and Inland Marine Schedule maintenance
- Provide up-to-date Schedules of Insurance coverage
- Creation and assembly of reports, claims data and loss history summaries
- Securing alternative needs such as performance bonds, additional coverages, etc.

## TRISH JENKINS, CPSR

**Senior Public Risk Specialist**

### EDUCATION, LICENSES, & CERTIFICATIONS

- Certified Public Risk Specialist (CPSR)
- State of Florida, 2-20 General Lines License

### CONTACT

Trish Jenkins
*Senior Public Risk Specialist*
Trish. Jenkins@bbrown.com
O (386) 239-4042
300 North Beach Street
Daytona Beach, FL 32114

**Experience**

Ms. Jenkins is highly familiar with Florida Public Entity insurance programs and boasts an impressive record of accurate, quality service and routinely receives accolades from her clients. Trish has been in the insurance industry for 29 years and is often used as a resource and trusted business partner of her clients. Trish is accustomed to handling large and complex clients and is well trained and experienced in handling custom self-insured insurance programs.

**Scope of Responsibility for the City of Ormond Beach**

Trish will serve as backup to Ms. Blake.

## JESSICA CONWAY

**Public Risk & Claims Specialist**

### EDUCATION, LICENSES, & CERTIFICATIONS

- Stetson University, Bachelor of Science, Public Health
- State of Florida, 2-20 General Lines License

### CONTACT

Jessica Conway
*Public Risk & Claim Specialist*
Jessica.Conway@bbrown.com
O (386) 333-6001
300 North Beach Street
Daytona Beach, FL 32114

### Experience

Jessica specializes in the review and processing of certificates of insurance, NFIP flood program policy administration, and claims administration and reporting. She will be providing support to the City's service team.

### Scope of Responsibility for the City of Ormond Beach

Jessica will handle requests for certificates of insurance and issuance, claims reporting, claims file management, NFIP Flood program policy administration, and other daily servicing duties. She will also provide backup for Certificate related questions and other administrative projects.

## GARY RAIA, ARM

**Senior Safety and Loss Control Manager**

### EDUCATION, LICENSES, & CERTIFICATIONS

- New York University, Bachelor of Industrial Engineering/Safety Management
- Associates of Risk Management
- OSHA 30 hour construction
- OSHA 10 hour general industry
- Chief Risk Management and Safety Officer 2021-2023

### CONTACT

Gary Raia, ARM
*Senior Safety and Loss Control Manager*
Gary.Raia@bbrown.com
C (407)496-0989
300 North Beach Street
Daytona Beach, FL 32114

### Experience

Gary is a Senior Safety and Loss Control Manager offering 30 years of experience in Enterprise Risk Management, Safety, Loss Control and Insurance Coverage for Fortune 500 companies, and Public and Governmental entities. This includes Insurance Carriers, Brokers, Service, Hospitality, Construction and Manufacturing industries. Gary will be the dedicated loss control representative for the City, travelling as frequently as needed.

### Scope of Responsibility for the City of Ormond Beach

As the senior safety and loss control manager for the Brown & Brown Public Sector team, Gary will provide senior oversight to the City's safety programs and initiatives. Gary will also assist the loss control and safety data, reports, and training materials as needed.

## STEVE FARMER

**Executive Vice President**

### EDUCATION, LICENSES, & CERTIFICATIONS

- Florida State University, Bachelor of Arts, Economics
- State of Florida, 2-20 General Lines License
- State of Florida, 2-15 General Lines License

### CONTACT

Steve Farmer
*Executive Vice President*
Steve. Farmer@bbrown.com
O (386) 239-7233
300 North Beach Street
Daytona Beach, FL 32114

**Experience**

Steve Farmer is an accomplished Executive Vice President of Brown & Brown Insurance, the 5th largest Insurance Brokerage in the Nation. With over 28 years of experience in the Insurance Industry, he currently leads the largest retail branch located at the company's headquarters in Daytona Beach, FL. Previously, Steve served as Sr. Vice President, Sales Leader for the Daytona Retail Operation, and Vice President/Producer with responsibilities for development and service of new and existing accounts. In January of 2021, Steve added oversight of the Team at O'Leary Insurances, a Brown & Brown acquisition based in Cork , Ireland to his growing responsibilities.

In addition to his work at Brown & Brown, Steve actively serves on the Board of Directors for the Volusia/Flagler YMCA, the Daytona Beach Chamber of Commerce, the FUTURES Foundation, he is a member of the Agents Advisory Council for AmTrust Financial and a member of the RMI Executive Council for Florida State University.

Steve graduated from Florida State University with a B.A. in Economics in 1986. He is married to Carol Murphy Farmer and resides in Ormond Beach, FL. They have 3 sons, Ryan, Adam, and Logan.

**Scope of Responsibility for the City of Ormond Beach**

Steve will provide executive oversight to the City.

## MATT MONTGOMERY

**Executive Vice President**

### EDUCATION, LICENSES, & CERTIFICATIONS

- Florida State University, Bachelor of Science, Philosophy
- State of Florida, 2-20 General Lines License
- State of Florida, 2-15 General Lines License

## Minimum Qualifications

**To be considered by the City, proposing firm must:**

**1. Have at least five years of experience under the same name providing similar property and casualty broker services to municipalities of similar size in the state of Florida.**

Brown & Brown was founded 86 years ago with the Brown & Brown Public Sector being built 33 years ago from the acquisition of Risk Management Associates, Inc (RMA). For over 30 years, we have continuously refined our Public Sector specialization and enhanced our services enroute to becoming the largest public entity brokerage in Florida.

Please reference section 2 above for examples of experience with municipalities of similar size.

## 2. Be licensed to transact insurance brokerage business in the state of Florida.

Risk Management Associates, Inc. (Brown & Brown Public Sector) is licensed, permitted, and certified to do business in the State of Florida.

FLORIDA DEPARTMENT of FINANCIAL SERVICES

RISK MANAGEMENT ASSOCIATES, INC. DBA PUBLIC
RISK INSURANCE ADVISORS

300 NORTH BEACH ST
DAYTONA BEACH FL 32114

Agency License Number L018706

Location Number: 133164

Issued On 09/14/2006

Pursuant To Section 626.0428, Florida Statutes, This Agency Location Shall Be In The Active Full-Time Charge Of A Licensed And Appointed Agent Holding The Required Agent Licenses To Transact The Lines Of Insurance Being Handled At This Location.

Pursuant To Subsection 626.172(4), Florida Statutes, Each Agency Location Must Display The License Prominently In A Manner That Makes It Clearly Visible To Any Customer Or Potential Customer Who Enters The Agency Location.

Jimmy Patronis
Chief Financial Officer
State of Florida

3. **Demonstrate they have successfully provided similar broker services to at least three other municipalities of similar size in the State of Florida.**

Please reference section 2 above for examples of experience with municipalities of similar size.

4. **Services must have been provided in the past five years prior to the issuance of this RFP.**

Brown & Brown Public Sector has been providing public entity insurance brokerage and consulting services since 1992.

5. **Demonstrated ability and success implementing various risk management strategies to reduce premium costs while providing adequate insurance levels.**

## Understanding the City's Risks, Exposures and Financial Goals Continual Analysis

Constant communication and understanding of the rapidly changing risk exposures are critical to our ability to provide the most effective risk management program. The first step of our renewal management process is to discern exposure facts and the City's needs for risk transfer and retention options.

Risk identification and exposure analysis are the foundation of our risk management program design recommendations. An overview of this critically important function includes the following major objectives:

- Discuss insurance options available via our superior carrier relationships, specialist wholesale/surplus lines, reinsurance, non-domestic partner brokers, captive management, and other special programs
- Self-insurance and Risk-transfer strategies developed with staff.
- Develop quality relationships with key underwriters. If desired by the City, we will coordinate face-to-face meetings with staff and key underwriters and other important industry experts. We currently coordinate such meetings for our clients, including at your, ours, or their location(s), off-site at in- or out-of- state conferences, including the facilitation of significant London or Bermuda relationships.
- Aggressive negotiation skills and market management employed to generate insurance options within entire marketplace – not just one or two favored markets.
- Use of claims analysis and predictive/statistical analytics presentations to market.
- Develop underwriting narratives highlighting City staff qualifications, use of risk control techniques and other favorable underwriting information not requested on applications to produce a superior market submission.

While premium is a large portion of the City's Total Cost of Risk (TCOR), one of the other major components is the cost of retentions or uninsured losses. We believe a critical review of the policy and structure of the placement will lead to a lower TCOR for the City.

A few techniques and resources utilized for this important facet of our services include:

- Evaluation of critical operations and conduct discussions concerning risk factors, including but not limited to Storm Resiliency, Flood Mapping Changes, FEMA Eligibility and Service Interruptions.
- Interviews and discussions with various City staff and departments, including assistance with data collection required for insurance applications.
- On-site inspections.
- Annual Catastrophic modeling (including **AIR & RMS**, plus enhanced analytics).
- Loss trend analysis and recommendation of loss control resources.
- Review valuations and encourage COPE updates for property exposures. Specifically tracking updates for existing buildings, including roof updates, is impactful to your modeling and underwriter perception.
- Manage Property Appraisal contract with reputable independent property appraisers. This includes coordination of inspections, trending, reconciliation of results, and communication with insurers.

Brown & Brown Public Sector routinely submits a budget estimate for all lines of insurance as well as recommendations for insurance or self-insurance solutions for new exposures.

Our State of the Property Market white paper that is submitted annually is an excellent example of a strategy report, see following page.

City of Ormond Beach

Brown & Brown

# Florida Property Insurance Market Update - 2024

**Florida Property Market Update**

Rate increases in 2023 within the Florida public sector ranged from 40% to 100% in Florida. Entities with coastal wind exposure and large losses experienced the higher end of rate increases. The City's rate increase in 2023 was 21%.

Total catastrophic losses in the U.S. have exceeded $100b for the last three years which has stalled any softening of market rates.

However, there is some relief occurring with a small amount of new capacity entering the market. The increase in rate is expected to slow with some carriers providing rate increases of flat to 10%.

- In 2024 we expect the reinsurance capacity for catastrophic loss to remain flat providing some stabilization of the global property market.
- Traditional carriers will continue to adjust their portfolios to reduce exposure and increase profits.
- Underwriters are still requiring adjustments to insured values to align with elevated costs to repair and rebuild.
- In 2024 we anticipate rate increases ranging from flat to 10% in Florida but higher rate hikes for risks with significant property losses. We also expect continued non-concurrent terms from carriers. For example, insureds may see claim valuation terms of Blanket Replacement Cost and Margin Clauses mixed within one layered-insurance program.

In 2024, we anticipate rate increases ranging from flat to 15% in Florida with higher rate increases for risks with significant losses. The City's currently estimated property increase is 3%.

**NOAA Summary Stats for Billion Dollar Weather Events**

Updated Dec 2023

| Time Period | Total Number of Events | Events per Year | Total Cost (in Billions $) | Major Events |
|---|---|---|---|---|
| 2003-2007 | **32** | 6.4 | $ **432.4** | Hurricanes Katrina, Wilma, Rita, Charley, & Ivan |
| 2008-2012 | **57** | 11.4 | $ **382.0** | Hurricanes Sandy & Ike; Severe Drought |
| 2013-2017 | **63** | 12.6 | $ **533.5** | Hurricanes Maria, Irma, & Harvey |
| 2018 -2023 | **88** | 17.6 | $ **704.6** | Hurricanes Ida, Michael & Ian; Wildfires |

## Exposure Analysis & Gap Identification

Evaluating risk exposures is an ongoing focus as different risk exposures emerge frequently. Our analysis method involves a detailed structured identification of current and future loss exposures. We conduct a formal submission process annually prior to negotiating new and renewal coverage.

We use risk identification and exposure analysis as the foundation of our risk management program design and to analytically base our recommendations. We provide objective and subjective analysis so that you can make informed decisions.

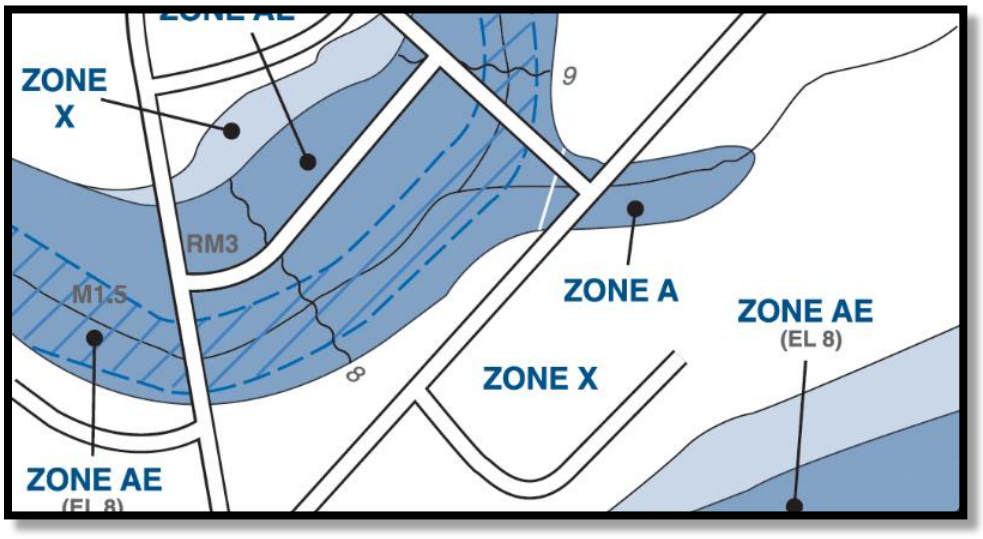
| Exposure Identification processes include: | |
|---|---|
| 1. Retention, coverage, and sublimit review | ✓ |
| 2. Site inspections/Engineering Reports | ✓ |
| 3. Review current/prior insurance applications | ✓ |
| 4. Complete insurance company applications | ✓ |
| 5. Policy and procedure manuals | ✓ |
| 6. Contractual obligations- lenders, lessors, bonds, etc. | ✓ |
| 7. Safety policies and loss prevention protocol | ✓ |
| 8. Research (your website and local sites) | ✓ |
| 9. Financial records review (CAFR, Budget documents, etc.) | ✓ |
| 10. Loss Runs Reports/Claims review | ✓ |
| 11. Current program analysis and review (coverage forms and policies) | ✓ |

| Property Specific Exposures | |
|---|---|
| Time Element/Financial Loss review | Property in the Open considerations |
| Property Appraisal Review | Catastrophic wind, flood, & storm surge models |
| FEMA Stafford Act- Flood Zone Determination/ Flood Audit | FEMA Commitments |

| Casualty Specific Exposures | |
|---|---|
| Experience Modification Factor Review | Retention Analysis |

**Property –** We run (PML) models annually for each large client to evaluate the large loss centers and the flood probabilities. We will provide the City with current AIR catastrophic modeling results at each property renewal to identify specific locations that may suffer large loss or operation centers that may experience interruption.

We collect detailed property data relative to wind resistance for all locations. Our process involves identifying the roof covering, roof geometry, roof age and roof strapping (if any) of these locations.



This additional data significantly increases the accuracy of PML models, which in turn better identifies and measures an insured's exposure to loss. This is further used to negotiate better terms and conditions with carriers. Without the additional roof information, the PML model will default to a higher value and thereby increase the PML value resulting in higher premiums.

We also evaluate the need for and the proper levels of often overlooked property coverages such as: extra expense, errors & omissions, increased cost of construction (building ordinance), equipment floaters, demolition costs, debris removal, utility interruption, pollution clean-up, property-in-the-open, builders' risk, etc.

We accomplish all the above through various techniques, processes, and tasks such as:

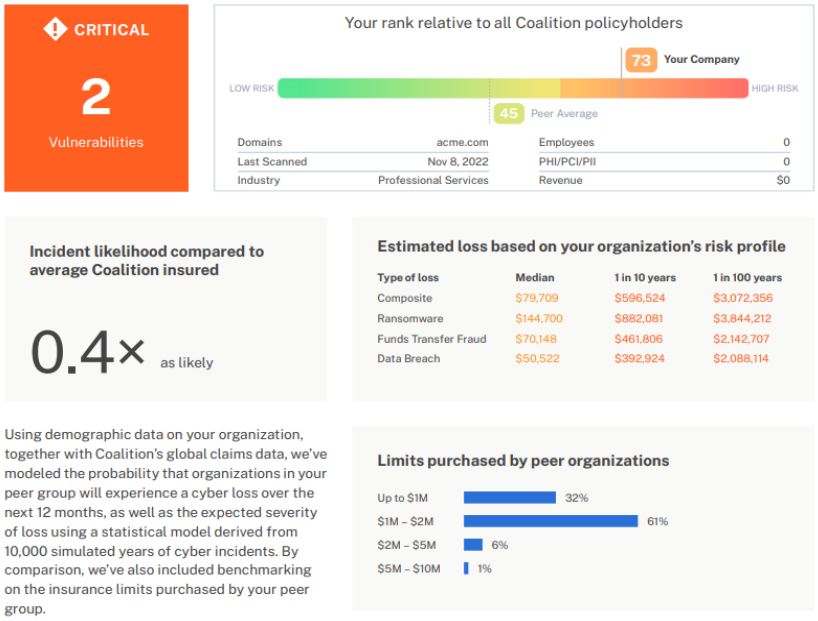
- Property Site Inspection and Building Appraisals
- Catastrophic wind, flood, and storm surge models
- Research (City website and local sites visits)
- Financial Record Research (CAFR, Budget)
- Loss Run Reports
- Current Program Analysis and Review (Coverage Forms and Policies)

**Flood Audit –** This is a unique process that we have developed to keep up with FEMA's rate, rule, and flood mapping changes. We regularly review anticipated flood zone changes (which can employ a variety of methods) to determine impact to structures located in Special Flood Hazard Areas (SFHA's). The importance of this exercise is to determine and communicate the implications of FEMA and the Stafford Act to our clients.

**Liability Loss Exposures –** Thoroughly identifying these exposures can be complex due to the broad litigious nature of citizens and businesses. However, we have seen many types of lawsuits and possess an intimate knowledge of the State and Federal Statutes that govern public entity operations and personnel. Consequently, our advice, counsel and recommendations are based on actual claims occurring here in Florida and many years of assisting other clients with similar issues.

The basic methods of identifying exposures include claims analysis, review of financial reports, understanding of all operational functions, evaluating current and future contractual obligations, identifying key personnel, reviewing lease and other contracts, reviewing the City's policies and procedures manuals, and general practices.

**Workers' Compensation –** Methods include analysis of loss run reports, financial reports, actuarial reports, incident reports and interviews with key personnel and management. We also review the return-to-work programs, disciplinary procedures and safety programs that are currently in place. Analytics play a large role in rate determination and retention levels. Internally we evaluate numerous factors, trends, and total cost of risk to determine the best risk retention and transfer levels that minimize the City's financial exposures both long and short-term.



Below is an example of one of our advanced analytical tools for workers' compensation risks. This report identifies departments or specific job functions that perform better or worse than their peers in Florida. Actual losses over a three-year period are compared with the expected or average losses as determined by the State of Florida. This information can be used to tailor loss control efforts for maximum return-on-investment.

| Class Code | Class Code Description | Estimated Payr | 2023 Expected Loss Ra | Expected Annual Loss | Actual Losses 22-23 as of -Sept 2 | Actual Losses 21-22 | Actual Losses 20-21 | Actual Losses 19-20 | Average Actual Losses | Ratio Avg to Expected Losses |
|---|---|---|---|---|---|---|---|---|---|---|
| 5509 | Street or Road Maintenance | $ 739,493 | 3.67 | $ 27,139 | $ 700 | $ - | $ 1,209 | $ 253 | $ 634 | 0.02 |
| 7520 | Waterworks | $ 286,591 | 1.24 | $ 3,554 | $ - | $ 521 | | $ - | $ 153 | 0.04 |

## Cyber Exposure Analysis

Brown & Brown is partnered with Coalition. Coalition's signals intelligence platform provides a snapshot of an entity's current risk level by using public, external methods (no penetration or intrusive tactics) to:

- Scan infrastructure for publicly accessible servers, services, and technology
- Discover exploitable vulnerabilities and misconfigurations in the scanned infrastructure
- Find exposed available user/employee information
- Uncover other existing threats hidden on the dark web
- Discover proactive measures already taken by the company

This data, combined with Coalition's proprietary claims and loss data provides:

- A relative measure of the company's defensive security posture compared to organizations scanned by Coalition
- A clear, fact-based assessment of potentially weak security areas and steps to fix them
- Recommendations on how the company can further secure their infrastructure informed by actual losses experienced by Coalition policyholders

## Additional Resources

Below are some of the available online tools we offer to enhance the City's program. Documents from the below mentioned tools can be provided electronically, including **our online, cloud-based client document portal – designed custom for City of Ormond Beach.**

### SharePoint

Brown & Brown utilizes SharePoint to enhance efficient document management. Each major client has the ability to access the asset schedule, white papers, certificates and many other risk management related documents and information from any device. The City will have instant access to a large library of information and documents.

## Family of Resources

Brown & Brown's decentralized structure is unique in that it allows each of our subsidiaries to create exceptionally unique service models designed to deliver customized results for each our clients. In addition to the City project team highlighted herein, we have access to Brown & Brown's international operations for client support, subject matter expertise and carrier relationships, including;

- London Brokerage
- Bermuda, Grand Cayman, and other international offices
- Litigation Specialists and legal support
- Alternative Risk Transfer and Captive management
- Enterprise Risk Management (ERM)
- Financial & Property Modeling
- Actuarial Services
- Analytics and Modeling
- Program administrators with distinctive expertise
- Wholesale specialists in public entity, property, and professional liability
- Loss Control and Safety Resources
- Surety/Bond Practice
- Personal Lines insurance practice
- National Retail Brokerage/Marketing and Support
- Strategic partnership with previously owned Third Party Claims Administrators, including Medicare Set-Aside, Cost Containment, Medical Bill Auditing and Review, Loss analysis, and Specialty claim experts
- National Cyber division
- National Aviation division

Brown & Brown Public Sector will coordinate the company's resources from all divisions within this contract. Industry and subject matter expertise from these divisions are included in our proposal, however, specific services may be subject to additional contracts/fees depending on the scope.

We also have relationships with organizations that are not Brown & Brown subsidiaries. We recommend the service provider that will **provide the most benefit** the client and fulfill their needs. Brown & Brown's decentralized culture allows for this flexibility.

## Market Access

A critical aspect of a broker's ability is access to all carriers. One of our core competencies is our knowledge of and relationship with all competitive insurers. Our marketing process and philosophy is somewhat unique and can be summarized as follows:

***Do business with as many insurance markets as possible. Do not simply offer renewal terms and accept pricing from the same company year after year and limit our clients' options – ensure we are getting the best deal for our clients every year.***

We believe that an agent's job is to utilize market forces and competition in the marketplace to be sure we bring the most competitive insurance placements to our clients every year. This concept also underlines one of our core business principles: Always *do what is best for the client.* We have learned how to keep the market's interest while conducting a competitive process in a professional manner. Our companies **trust** us. We maintain excellent market relationships always in hard, soft, or stable markets. While other brokers place the lion share of their client's business solely in the commercial market or primarily in an insurance Trust, we have critical mass in Trusts (40%) and commercial markets (60%). This allows us to bring more options at each renewal and leverage the competitive marketing process heavily in our client's favor. We are experts in designing and implementing custom insurance programs. One of our core strengths is the ability to negotiate and obtain the inclusion of innovative coverage terms from carriers resulting in custom policies aimed at a client's specific risk needs. Our clients have benefited from this approach in the past, specifically in the countless custom enhancements implemented in many of our property policies.

Brown & Brown Public Sector is uniquely positioned to deliver brokerage excellence for Florida's Public Entities precisely because of our ability to monitor the factors above and interpret their effect on the marketplace. We then utilize our resources both within our Global Brown & Brown Family of Companies to turn that understanding into strategy. We offer our client unique access to A few key factors that serve us in these complex strategies and navigating the ever-changing marketplace:

- 100% Public Entity Team
- 30+ Years of Relevant Experience
- 250 Public Entity Clients
- C-Suite Carrier Relationships
- Brown & Brown Resources
- 16,000 Global Teammates
- State, National & International Presence
- Strong Underwriter Relationships
- Corporate Public Entity Footprint
- Trade Group & Association Membership
- Real-Time Industry News & Communications
- Culture of Professionalism & Excellence

**Market Leverage –** Brown & Brown has established itself as one of the preeminent power brokerage houses in the world. Our 16,000 teammates are responsible for the design, placement, and service of more than **$25 Billion in annual insurance premiums.** This gives our family of companies unrestricted access to the marketplace paired with top tier negotiating power and leverage with insurance carriers.

The Brown & Brown Public Sector team and our clients benefit greatly from the downstream effect of our company's massive marketplace presence. This is accomplished through strategic internal tools which ensure that our team can consistently harness the power of that global volume as we navigate the marketplace on behalf of our clients.

**Florida Public Entity Market Footprint –** For the purposes of this RFP, the far more relevant measure of market leverage, is broker footprint within the Florida Public Entity insurance marketplace. The combination of large CAT losses, rising cyber liability exposures, workers compensation presumption laws, active-shooter exposures, and sovereign immunity caps has proven too complicated, unpredictable, and unprofitable for most traditional risk-bearers**.**

These factors have created a highly specified market in which carrier options are few, terms and conditions are constricted, and broker leverage is limited.
***This is where Brown & Brown shines.***

Our team manages over 85 property, casualty, and workers compensation insurance programs for Florida public entities with annual premiums of $250,000 or greater. Due to the size of our practice and number of sophisticated risk management clients, we are the largest broker in Florida for most relevant carriers. This affords Brown & Brown preferred status and powerful leverage with all carriers and, as a result, empowers our team to consistently obtain best in class terms and conditions and deliver the most cost-efficient risk transfer programs available.

## Navigating the Insurance Marketplace

Brown & Brown places over $25 Billion in annual premiums with hundreds of insurance markets.

Brown & Brown's market philosophy has always been to develop relationships and place business with the markets that bring the most value to our clients vs. other brokers who focus on placing business with select "favored" carriers. Our style is to maintain professional relationships with all markets. This strategy delivers our clients' options, open-market representation, and impressive results of the most effective leveraging of terms and conditions available in the marketplace.

Our team maintains excellent market relationships that survive and flourish in hard, soft, and stable markets. The challenge in designing and implementing custom insurance programs, however, is maintaining a thorough understanding of the market as it evolves. The evolution of the marketplace creates both challenges and opportunities for brokers to deliver for their clients. In Florida especially, the market changes quickly. Below are some of the factors which drive consistent change and necessitate top-tier broker performance:

1. Catastrophic Losses
2. Windstorm Modeling
3. Changes in Carrier Appetite
4. New Carrier Entrants & Departures
5. Shifts in the Legal Environment
6. Regulatory Changes
7. Emerging Exposures
8. Insurance Product Trends
9. Investment Capital
10. Global CapaCity Fluctuations

## Casualty and Workers Compensation Markets

The following list of markets are those that are typically the most competitive for our Florida government clients within Casualty and Workers Compensation and Excess placements. These carriers have consistently delivered competitive rates and expansive coverage terms specifically designed for public entities. We have established meaningful relationships and significant program placement volume with the insurance carriers listed below which have historically exhibited a strong appetite and sufficient capaCity for large City exposures. Please note this is not an exhaustive list of all carriers but a list of currently competitive markets. The markets in bold are typically the most competitive in Florida for public entities. We are always evaluating new and emerging markets that can provide our clients with efficient terms.

| Carrier | Carrier | Carrier |
|---|---|---|
| AIG | Employers Re | One Beacon |
| Allianz | Euclid/Scottsdale | ***Preferred* Governmental Insurance Trust** |
| Allied Public Risk | Fairfax | QBE |
| Allied World Assurance | **Fortegra** | **Safety National/Tokio Marine** |
| AmTrust | **Global Aerospace** | Selective |
| **Ambridge** | Genesis | Starr Aviation |
| Arch | Hanover | Trident/Paragon |
| Aspen | Hartford | Travelers |
| **Berkley** | Hiscox/State National | US Specialty |
| Berkshire Hathaway | Liberty Mutual | XL/Catlin |
| Brit/Lloyds | **Midwest Employers** | Western World |
| **Chubb/ACE** | Midlands Management (MGU) | Zurich |
| Cincinnati | Munich Re | Old Republic |
| CNA | Nautilus | Darwin |

## Key Property Market Volumes

| Key Market Volumes | |
|---|---|
| **Market** | **Brown & Brown Placed Premiums** |
| Lloyd's | $1,112,000,000 |
| Zurich | $572,000,000 |
| Berkshire Hathaway | $552,000,000 |
| Hartford | $550,000,000 |
| Chubb | $544,000,000 |
| Travelers | $450,000,000 |
| QBE | $450,000,000 |
| Liberty Mutual | $380,000,000 |
| Safety National/Tokio Marine | $350,000,000 |
| Munich Re | $273,000,000 |
| AIG | $254,000,000 |
| Markel | $253,000,000 |
| Arch | $240,000,000 |

Our team believes constant communication and a thorough understanding of the City's risk exposures at all times of year is critical to providing the most effective risk management program. It is crucial to recognize the exposure facts and meet with you before approaching the marketplace to provide the City with insight into the current market conditions and identify the City's goals and risk appetite.

Our service commitment includes establishing a client-specific calendar of events which proactively guides the insurance program in real-time and assures that our team is with you every step of the way. This includes fulfilling City expectations on communications, deliverables and reporting requirements. It is our procedurally mandated service commitment to immediately identify and document customer expectations in order to meet those needs on a daily and on-going basis. Below is an example Insurance Renewal Timeline for the City's program. Please note that this timeline is flexible and can be adjusted to the City's needs.

## Insurance Renewal Timeline

**150-120 days prior to EACH policy expiration**

- Initiate Marketing Process
- Current market conditions analysis
- Estimate changes in cost – self-insured and risk transfer
- Discuss Budget Constraints and Goals
- Written request for underwriting data
- Assist in collection of risk exposure information
- Establish competitive markets to be approached
- Identify desired coverage, terms, and conditions goals

**90 to 120 days prior to policy expiration**

- Approval of Submission to risk-transfer/insurance markets by client
- Submit underwriting data to chosen and/or all interested carriers
- Update Risk Management on progress and early pricing and coverage term indications

**60 to 90 days prior to policy expiration**

- Update of quotes received and markets approached
- Cost of Risk Analysis - Liability
- Catastrophic Modeling Results - Property
- Develop recommendation for most effective program

**30 to 60 days prior to policy expiration**

- Attend Meetings and Workshops
- Assist in preparation of Board Agenda items
- Complete required signed documents
- Submit Requests to Bind to chosen carriers

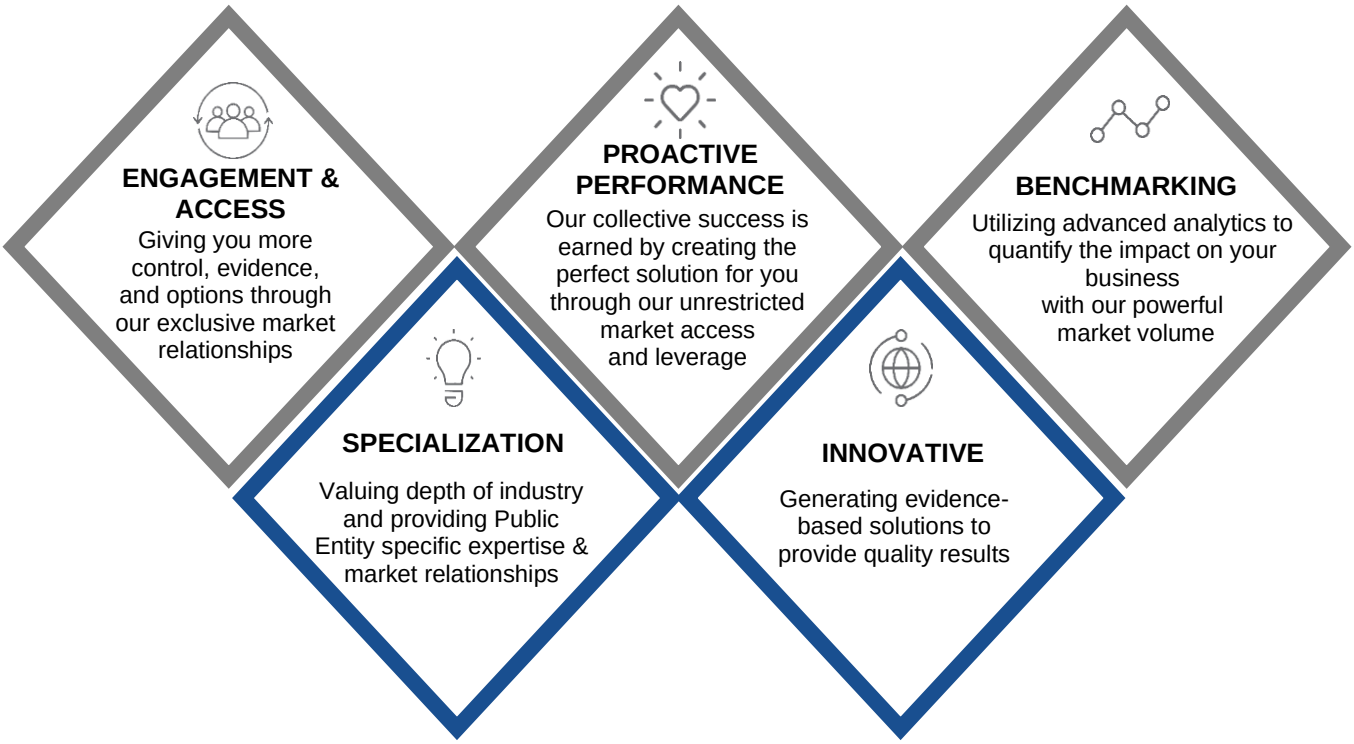
**Inside 30 days prior to policy expiration**

- Request, Review and Issue Binders
- Issue any recurring Certificates of Insurance
- Issue Invoices – with special instruction for timing of payments as needed
- Issue Binders

**30 to 60 days after policy inception**

- Re-issue any expired binders
- Review, correct and issue policies

**Ongoing**



- Daily Policy Maintenance and Client Service Requests
- Claims Reporting and Advocacy
- Aggregate and Large Claim Reviews
- Property appraisal management and implementation
- Maintain, Update and Scrub Property Statement of Values data
- Stewardship Reports
- Provide Analytics, including Cat Modeling
- Review Risk Management Polices
- Inspection/Loss Prevention Program Implementation
- Flood Zone Audits for Property
- Market Trend and Emerging Markets Identification
- Legislative Change Tracking
- Industry News Communications
- Other Special Projects as agreed, including
- Contractual Risk Transfer/Vendor Contracts
- Vendor Certificate of Insurance Review

## Insurance and Risk Transfer Design, Marketing, and Placement

One of the most critical functions a broker performs is to *design, market, propose and implement the broadest insurance program that adequately and economically protects the Client*.

Ultimately, the design, marketing and placement of the insurance products is the largest and most controllable, annual variable in the risk program. This is also the spot where the difference between a good broker and a great broker will yield the most tangible program cost savings.

We are experts at aligning clients with the most cost effective and stable insurance carriers. We provide detailed analysis of each carrier including data relevant to the long-term success of a risk management program. We serve each client with a custom program design and our process includes very detailed evaluation of a client's risk appetite, loss exposure, budget constraints and political climate before we begin to align them with the appropriate insurance programs.

Due in large part to our critical mass in the public entity marketplace we have direct access to every insurance market that allows for such access. We continually monitor existing and emerging markets for financial and rate stability. Face-to-face meetings with underwriters occur throughout the year to ensure that we are on the leading edge of any changes in carrier rate, coverage, or financial standing.

Whenever a significant change is occurring or will occur in the marketplace we move quickly and proactively to mitigate the fiscal impact. For example, when Hurricane Ian hit in 2022 we knew the property insurance market would be significantly impacted. We communicated with clients early and

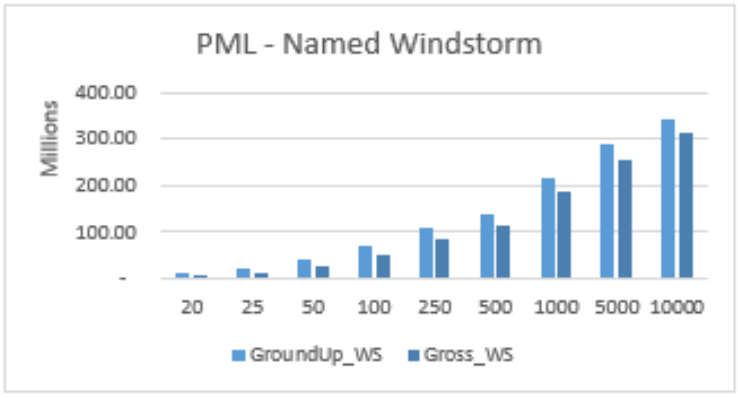
began creating options and tools to mitigate imminent rate increases. We have also conducted workshops with elected officials to set expectations and review the options available to mitigate the rate changes many months prior to policy renewals.

Monitoring and understanding the marketplace is a critical element in providing timely and competitive renewals.

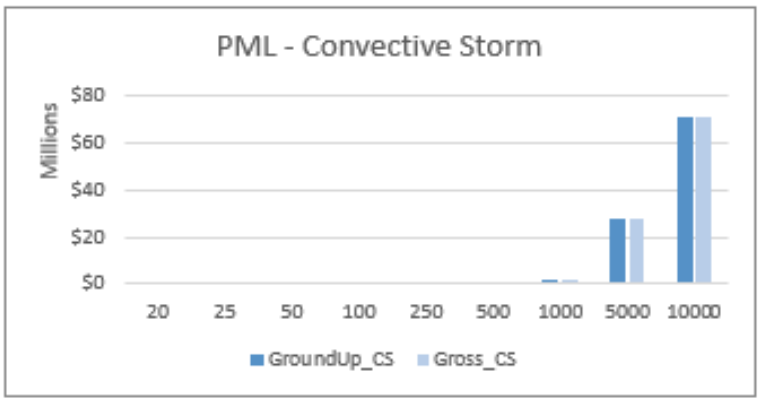
The Brown & Brown Public Sector team strategically leverages market forces, spurs competition, and as a result, can consistently bring the **most** viable insurance placements to our clients. We are perpetually focused on the balance between holding the markets' interest while driving competition. That balance requires high levels of skill, experience, and market relationships capable of countering the market's desire to build profitable and long-term insurance contracts. Our team consistently drives this balance through a combination of three critical market performance attributes.

## Develop Market Submission

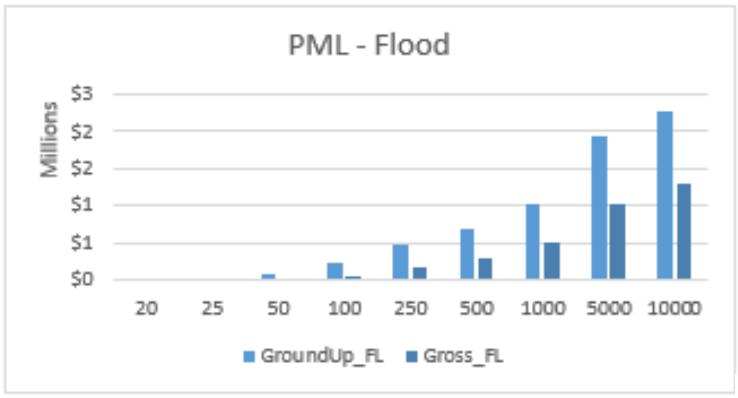
We will assist you with annual updates required by insurers. Our review of updates includes (but is not limited to): current exposures, changes in operations, loss control efforts, marketplace changes, and current claims analysis, we assist in the preparation of required insurance company applications. In addition to applications, the following items are and will be included within an underwriting submission:



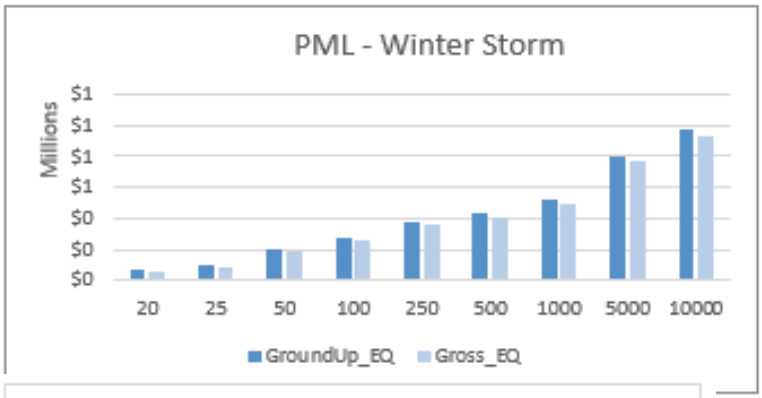
- Underwriting Executive Summary, including exposure overview and risk management strategies. See below illustration of our template for Underwriting Executive Summary providing an expansive view of your risk to the market.
- Claims reports and analysis, including details for large claims, claim trends and corrective actions.
- Supplemental information, including news articles, handbooks, procedural manuals, financials, and actuarial reports.
- Website links, photographs, assembly of special reports, and market narratives are developed to support reliable underwriting data and best represent the City in the marketplace.



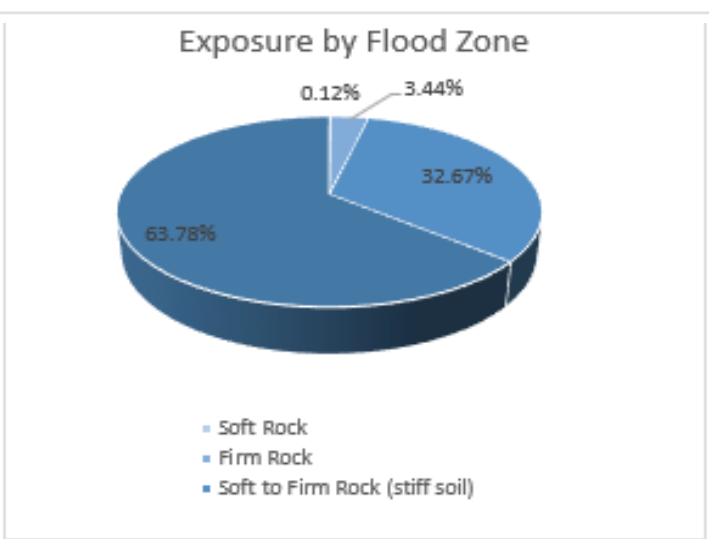
For the Property submission, it is important to secure accurate insured asset characteristics, so we scrub the Property Statement of Values (SOV) annually. We will assist the City in collecting any missing information, including site inspections if needed. We will make sure the SOV information is as complete as possible ensuring that modeling software outputs the best Probable Maximum Loss (PML) results. Below is a sampling of analytics utilized in the marketing negotiation process.



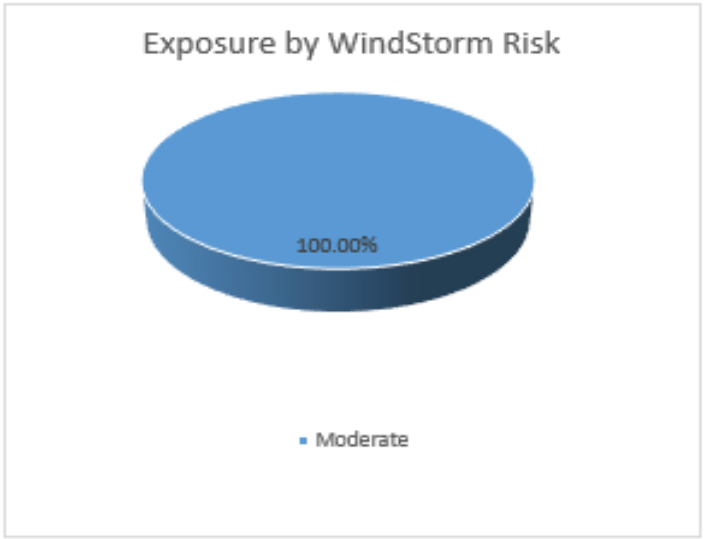
We have access to a centralized CAT Modeling team that can provide output report results for RMS and AIR. RMS can run perils for Named Storm (NS) including surge, earthquake and severe convective wind. Our recommended platform, AIR, can run NS including surge, earthquake, severe convective wind and flood. We can provide both the excel format as well as the PDF report format for client utilization.



The below sample modeling analytic results show the Probable Maximum Loss (PML) for various catastrophic events. This report is computed after our initial exposure data analysis. This information assists us in determining appropriate policy limits and identifying areas that modeled the highest average annual loss.



**Sample of AIR Touchstone v10/2024 analytics.**



## Program Design

We will continually modify the City's insurance program to best fit the needs of the City at that time. This rationale is based on the City's losses, risk appetite, property values, and market conditions. The City's program should never be static. We intend to meet with the City before every renewal to establish expectations, coverage enhancements, risk tolerance, and budget to ensure a transparent and cost-efficient program.

## Insurance Proposal Presentation

Our insurance professionals present a written proposal detailing all proposed services and insurance terms and conditions including but not limited to:

- Stewardship Report
- Current Insurance Market Summary/Update (industry data and analysis)
- Market Overview (carrier quotes and declinations)
- Comprehensive Coverage Comparisons
- Expiring vs. Renewal Comparison
- Claim Analysis
- Catastrophic property and other modeling analytics
- Retention and policy limit options analysis
- Summary of terms, conditions and exclusion highlights, specimen forms and compensation disclosures
- Copies of all insurer quotes are included in our hard copy proposal
- Written confirmation of all commissions paid to broker/intermediaries

## Attendance at Public and Internal Meetings

Our team is available to attend Board Meetings, Department Meetings, Insurance and Safety Committee Meetings, and any discussions or meetings with the Risk Management Team.

We agree to attend as many meetings as desired or necessary upon request by the City.

## Agency Management Systems

The key to effective administrative support from our agency is through internal organization and follow-through. Our team utilizes Vertafore, and a suite of agency management systems spearheaded by **AMS360 Online**. These systems enable our team to effectively manage all client tasks with integrated solutions focused on identifying, tracking, and completing workflows on time, every time.

Our system manages all aspects of account management including billing, document management, communications, (emails, applications, written correspondence, etc.), marketing, claims, certificates of insurance and many other daily transactional activities. All pending items are suspensed and completed in a specified time frame. This system is designed and maintained so that each service team member can service any account if a primary account representative is out of the office. To guarantee our ability to provide continuous uninterrupted service AMS 360 data is maintained in redundancy at an offsite location. **If any of our locations were to suffer a catastrophic loss, we could still operate at full capaCity on a remote basis and with the support of our multiple office structure.**

**AMS360 is an agency management system that provides the foundation for our team to boost productivity and track all workflows. It helps streamline workflows, improve renewal timelines, improve teammate productivity, and enables our team to deliver excellent customer service. AMS 360 allows our team to:**

- **Integrate agency-carrier workflows**
- **Better manage and access insurance documents and client content**
- **Configure workflows to route the right work to the right person at the right time**
- **Provides real-time insights**
- **Reduce time spent on finance and accounting through insurance process automation**
- **Automate alerts on renewals and analyze rate information for use by our brokerage team**
- **Integrate technological inputs from vendors, clients and carriers**

## Quality Control

Our Agency Management Systems (AMS 360) and other Quality Control guidelines ensure that tasks and activities are completed in a timely manner. Brown & Brown has a **Quality Control division which includes multiple teams of internal auditors**. These auditors perform not only financial audits, but also file and Information Technology audits of each office to assure funds, records and client service are performed in accordance with the company's policies and procedures. The results of these audits are made directly to Brown & Brown's Board of Directors. In addition, we have corporate standards, including procedures such as: Catastrophe Plan, Contract Review standards, Internal Procedures Manuals, Correspondence Management, Data Retention, etc.

All team members must and will follow corporate Quality Control Guidelines for timeliness and service delivery. Annual requirements include:

- Insurance Coverage Review Checklists completed annually
- Mandatory internal self-audit procedure and financial audits to ensure quality procedures and desired results.
- Mandatory annual compliance training for employees, including insurance licensing, cyber/IT, ethics, and various computer software.
- These trainings are timely and are directly related to our customer experience. For example, MS Teams training was required immediately following the pandemic lockdown orders.

## Security Committee

Although we cannot predict the future results of any company, we persistently offer only financially secure insurers to our clients. Per corporate mandate, Brown & Brown is not authorized to provide quotes to our clients from unauthorized insurers or insurers with a less than AM Best rating of A- or those not rated by AM Best without an authorized exception. However, since it may be in the best interest of our clients to review and bind quotes from certain alternative risk transfer providers, Brown & Brown has established a Market Security Committee which reviews and monitors insurers falling into these categories: Risk Retention Groups, Captives, Self-Insured Groups, Trusts, State Funds, and Joint Underwriting Associations.

In addition:

- Each team member monitors industry news from various sources daily.
- AM Best ratings are confirmed and provided formally any time a quote is presented.
- Any discussion or further research regarding ratings or financial position is performed, as necessary.

## Safety and Loss Control

Safety is a key objective of our program, and a tailored loss control plan is the key to lowering the long-term cost of risk for the City. We will coordinate a highly qualified loss control representative for on-site training, safety audits, policy review, workers' compensation claim reduction and other activities at the direction of the City. We will be an active partner in assisting the City's loss control, safety and claim reduction efforts, and are committed to providing meaningful risk control tools and analysis. As such, our efforts will be tailored to the specific needs of the City and measured for cost effectiveness.

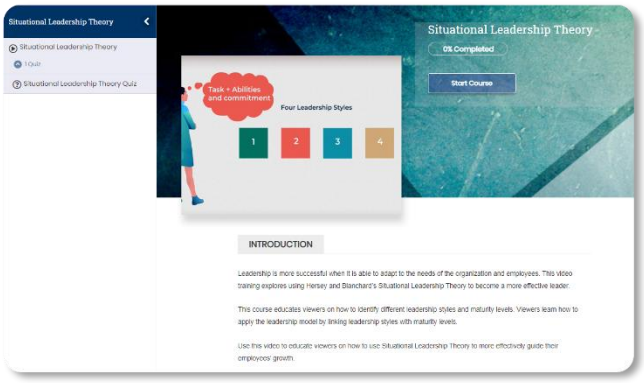
The City will be assigned a **Safety & Risk Management Consultant** to identify needs and deliver risk management resources. All our senior consultants have over 20 years of experience each and are directly involved with the loss consultant assigned to the City. Customized on-site training is dependent upon the needs of the City. Some of the standard training topics include (but are certainly not limited to):

- Emergency and Hurricane Preparedness
- Defensive Driving
- Workplace ergonomics
- Job Hazard Analysis
- Employment Practices
- Mental Health/PTSD in the Workplace

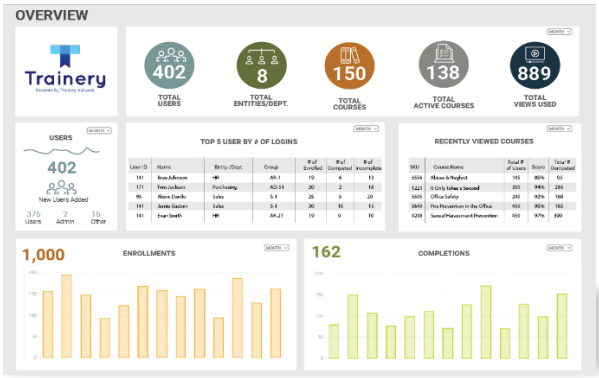
Our Team will obtain, analyze, and monitor workers' compensation loss reports monthly and establish meetings with staff to review loss trends. We participate in claims reviews, mitigate claim issues, work directly with adjusters and defense counsel when necessary, and always seek to serve as an extension of our client's risk staff.

Brown & Brown Public Sector will assist with the coordination of all resources available to the City. The City will be assigned our dedicated Public Entity Loss Control & Safety representative, **Gary Raia, ARM.** The services and expertise of Mr. Raia is provided to the City at no cost.

Our greatest expertise arises from our experience with governmental clients at every size and every risk tolerance. We represent clients as small as 10 employees and as large as more than 50,000 employees. Those clients have risk management programs which range from 1st dollar, to almost completely bare from an insurance perspective. That experience allows us to bring expertise, ideas, and perspective from every possible angle within the industry.



## Online Training Resources



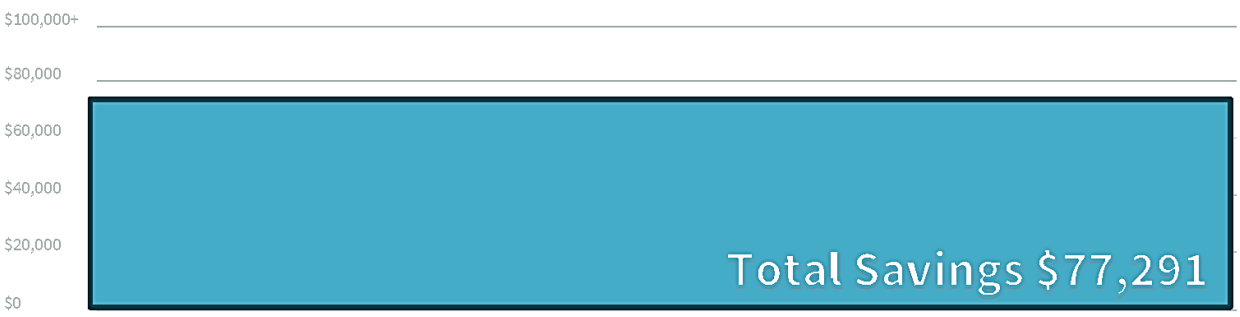
**Streamery is an online streaming solution** provided to Brown & Brown Public Sector customers to facilitate the training of employees in the policies and procedures that build a safe workplace.

Streamery serves as a leader in the distribution of Safety, Management, Technology, and Human Resource training programs. They offer a variety of tools and solutions to help organizations comply with HR regulations and requirements, including OSHA, DOT and the EEOC. The innovative training platform includes over 700 videos on demand that can be streamed anytime, anywhere. The included Training Support Materials make this valuable resource the perfect tool for instructor lead or individual training. Notable subjects include:

* **Defensive Driving**
* **Emergency Planning**
* **Active Shooter and Workplace Violence**
* **Evacuation Procedures**
* **Using Fire Extinguishers**
* **First Aid- Until Help Arrives**
* **Hazard Recognition**
* **HIPAA Rules and Compliance**

These work best when led by a supervisor or trainer from an individual department. The trainings are short (5-20 minutes on average), so are perfect for use in weekly safety meetings!

*A single login (which can be utilized by multiple supervisors) is included in our proposal



The below is an example of the PGIT Stewardship Report that identifies the positive usage of the loss control services detailed above, cost savings because of the utilization, and areas of improvement.

# Stewardship Report

Preferred® PGIT GOVERNMENTAL INSURANCE TRUST

## RATING ★★★★

## Citrus County

### Property Appraisal

- Based on your number of structures, the average amount saved by receiving a free comprehensive property appraisal is $11,395

## HIGHLIGHTS

This member has utilized Vector Solutions and the Risk Management Resource Center with great success. You also participated in our Cyber webinar last year.

## AVAILABLE

I am showing none of the available $5,000 used in TIPS money for this member. Please contact the Director of Loss Control Services Pam Hancock to find out how to take full advantage of these valuable resources. Other resources available include: Claims 101, Claims Reviews, and in-person consultations and training.

## Claims Advocacy & Resources

Brown & Brown Public Sector does not employ a single national claims service employee for all our clients. Instead, we follow a successful team approach of using resources that are readily available and the best specialists/negotiators/relationship-holders for any given situation.

An important facet of pre-loss advocacy is a proactive discussion of expectations with the City's dedicated Executive Field Adjusters, or "Assigned Adjuster." We will also conduct Table-Top exercises to establish best practices for disaster recovery protocols. Our objective is to create an efficient and concise recovery process that eliminates any unnecessary delays should a large loss occur.

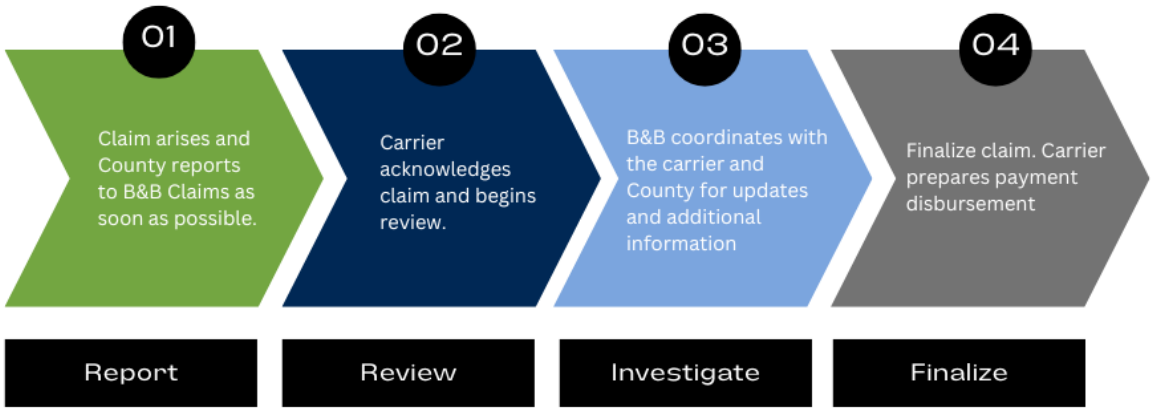
For Casualty claims advocacy, we will work closely with insurance carriers and Third-Party Administrators (TPAs). We are willing and able to coordinate and attend claims meetings to resolve claims quickly and equitably. Your assigned Team Leader, Kyle Stoekel, has extensive experience representing the clients' interest in claims resolution.

We prefer to develop a working relationship with our clients' TPA. It is important for your broker to communicate policy information and reporting requirements for excess insurers at least annually. We also ensure that reports required by our carriers are formatted and delivered to excess insurers' satisfaction to proactively avoid any coverage issues. It is also important that your TPA is vetted by any potential new insurer to which the TPA will be reporting. This process can be quite extensive, and we will handle approval and any transition for you.

We may also need to expeditiously coordinate Excess Casualty claims reimbursements with Staff, adjusters and TPA. We prefer to attend and coordinate claims review meetings with excess insurers, client departments, and the TPA, and assist in coverage clarifications with underwriters as needed.

The team proposed herein is well-versed in claims advocacy. If assistance is needed in any particular area, we reach out to the appropriate Brown & Brown or non-Brown & Brown business partners.

Our **Claims Specialist**, Jessica Conway, embraces her primary function to ensure that all claims submitted through our office (non-TPA reported) are received and acknowledged by an adjuster within 24 hours for non-TPA policies. She also provides follow-up with adjusters on open claims to ensure claims handling is in step with the Client's objectives. Tasks included within this role include:



- Claims reporting (for policies placed outside TPA contract)
- Claims tracking/acknowledgement and closure

- Coordinate claims review meetings
- Liaise with adjusters, client departments and TPA
- Assist in coverage clarifications with underwriters as needed
- Prepare spreadsheets in FEMA format for catastrophes
- Pre- and post-event communication

We are **committed to being an extension of the City's staff** and take an active approach to ensure that claims management is the number one priority. We provide all new clients with a 'Claims Kit,' which outlines procedures and protocols for effective claim reporting, monitoring, and closure.

As a claims advocate, Brown & Brown Public Sector will work closely with you and directly on your behalf with insurance carriers. We are willing and able to coordinate and attend claims meetings to resolve claims quickly and equitably. We have extensive experience assisting our clients with claims, both large and small. Our position is that we represent our clients, not the insurance carriers. The City will never question which side of the fence we are on. We follow up with adjusters on open claims to ensure claims handling is in step with the client's desires.

While every claim is slightly different and should be approached accordingly, the same basic process applies: Report, Review, Investigate, Finalize. We recommend reporting any claim or potential claim to us, as your claims advocate, as soon as possible. We will report to the corresponding carrier and ensure a claims acknowledgement is received and the City is kept involved of the claims status. We do not settle claims without your consent and we ensure claims are reserved properly and closed when finalized to give the City the most accurate loss experience to carriers.

**Extra Resources:**

Brown & Brown Public Sector will coordinate with property adjustors and TPAs to ensure smooth claim processing.

We will provide quarterly claims reviews as requested to ensure claims are moving forward in a timely manner.

## FEMA Public Assistance Coordination

Our vast experience in managing large property claims has led us to develop unique programs such as our FEMA Coordination program. This service was created in response to the difficulty that most public entities experienced in dealing with FEMA after the major storms in 2004.

Our first initiative was to gain an intimate understanding of the Stafford Act and its implications in providing public assistance funds in Florida. We then met directly with FEMA representatives in the Lake Mary Long Term Disaster Recovery office and quickly established a procedure and protocol with FEMA personnel that will improve their ability to quickly pay public assistance funds to our clients. For example, we have provided a current client property policy and schedule to FEMA in advance of any losses so that FEMA will not need to request this information directly from our clients. We have also coordinated the efforts of the insurance company's loss adjusters to better align with the data that FEMA requires on their Project Worksheets. These project worksheets are an integral part of FEMA's reimbursement process and can significantly slow the process if they are not completed accurately.

We are also committed to working directly with FEMA representatives and consultants to expedite every aspect of the public assistance process. In the event of a major loss, we will be assisting in every step of the insurance company claims process as well as the FEMA reimbursement process. We are confident that with the protocols in place we can effectively improve the expediting of claim payments and cash flows.

We are intimately familiar with the State's new disaster recovery initiative, F-ROC and can assist the City with submissions to the system. We can also assist in procuring and establishing qualified and pre-approved vendors for disaster recovery functions.

Upcoming F-ROC Key Milestones can be found below, and our team is available to assist the City in completing applications to reach the required opt-in periods.

**IMPORTANT F-ROC DATES**

| | |
|---|---|
| June 1, 2025 | Opt-In Period Opens |
| July 1, 2025 | DRA Submission Opens |
| August 31, 2025 | Opt-In Period Closes |
| October 31, 2025 | DRA Submission Deadline |

## Turnkey Disaster Recovery – Preferred Priority

Through our exclusive partnership with *Preferred*, the City has access to a fully managed disaster response program. Instead of having the burden of managing and coordinating with multiple third-party vendors after a disaster, we can seamlessly manage the recovery response with BluSky Restoration. BluSky can provide immediate access to water mitigation resources, roof assessment, repair and replacement and building reconstruction. BluSky coordinates directly with us, as your agent, *Preferred*, your insurance carrier, and Engle Martin, the claims adjustor, to ensure a fluent recovery process. This service is included in the *Preferred* program at no additional costs and provides the City with the security of having the recovery process streamlined all in one place. More information on BluSky Restoration can be found on the following page.

After the recent destruction brought on by Hurricane Milton on 10/09/2024, Citrus County experienced substantial damages. The roof of one of their training centers was torn off and flooded the inside of the building. BluSky mobilized the **same day** and fully tarped the roof and provided water extraction and drying. Their quick and efficient response prevented further damage to the building and the fantastic communications have made this claims process seamless. Without BluSky, the County would've had to contact multiple different vendors and attempt to get them to the damaged building in a timely manner, creating stress and disconnect in communications.

# When Disaster Strikes, Preferred Priority Is There

**Whether it is a named storm, flooding, fire or any other natural disaster, Preferred Priority is there with the response and services you need for a simplified quick recovery.**

### Property Appraisal Services

- Partnership with Centurisk to provide free extensive property appraisal services for all property coverage members.
- Detailed appraisal reports to include replacement cost, construction, occupancy, protection, exposure along with photographs of structures appraised.
- Accurate declared values to protect members from possible penalties related to stated value policies.
- Online access to Centurisk AMP for tracking of property schedules, review of appraisal values and COPE information, as well as appraisal trending.

### Disaster Recovery & Mitigation

- Immediate deployment of Engle Martin field adjuster team to assess damages and provide estimation for losses.
- Prompt adjustment of claims and issue of payments.
- 24/7 Emergency Mitigation Response services, such as catastrophic storm response, water damage, extraction/ drying, and content restoration, through our partnership with BluSky Restoration, to quickly get your operations back up and running.
- Panel of other approved recovery vendors with structured claim payments directly paid to vendor of members choice.

### Pre-Storm Preparations

- Experienced Loss Control team to assist with disaster preparedness and disaster recovery planning.
- Annual Disaster Preparedness Guide provided to all members prior to storm season.
- Storm alerts via social media.
- Close monitoring of projected storm path and land fall zone to coordinate swift, strategic deployment of resources and field adjusters to assist members.

### Claims Close Out

- Dedicated team of in-house claims adjusters for speedy and seamless claims processing.
- Easy and efficient claims process including assistance with required documentation to support FEMA claim.

# MEMBER-CENTRIC EMERGENCY RESPONSE

Preferred Priority and BluSky Restoration

## 24/7/365 Emergency Disaster Response:

# 800.266.5677

**BluSky Restoration's efficient responses ensure seamless service for members when they need it most. BluSky is proud to offer:**

**Expert Emergency Response**

- ✓ Water extraction, drying, and sanitation
- ✓ Board up & temporary roof cover
- ✓ Smoke & soot removal
- ✓ Temporary power distribution
- ✓ Total reconstruction

**In-House Commercial Roofing**

- ✓ Roof damage assessment
- ✓ Repair & replacement
- ✓ Total reconstruction

**Environmental Testing & Remediation**

- ✓ Asbestos, mold, & biohazard cleanup
- ✓ 24-hour air quality monitoring
- ✓ Negative air pressure containments
- ✓ Total reconstruction

**In times of crisis, turn to BluSky to get things back to normal as quickly and smoothly as possible.**

## Data Management & Exposure Identification Tools

Our experienced staff assists in managing and creating the database for submission to insurers, including Property, Automobile, and Inland Marine schedules. Our goal is to have no administrative impact on the City. We accurately maintain and update all the City's schedules and make them available in real time for the City to review.

Brown & Brown Public Sector's benchmarking and analytics tools allow us to provide customers with market insights helping to make more informed decisions about premiums, limits, and retentions.

Analytics tools include:

- Workers' compensation experience modification analysis
- Property catastrophe modeling
- Loss forecasting analysis
- Public entity benchmarking (example below)

**Property Insurance Benchmark Report**

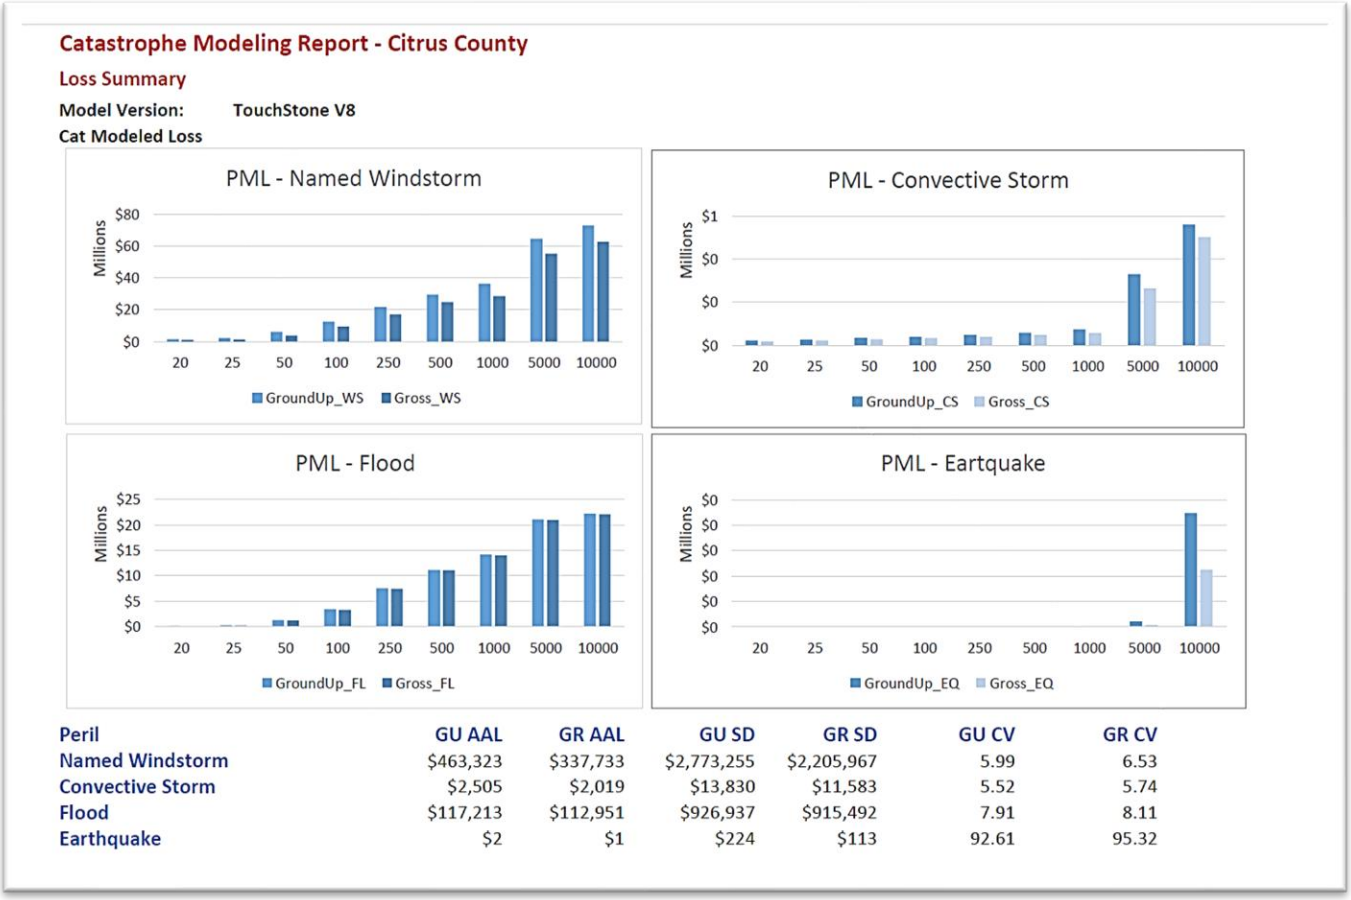
We provide all resources to keep up with valuation changes. Property Appraisals and property trending information is provided FREE OF CHARGE to the City by the current insuring arrangement, *Preferred*. In addition, the City has access to the innovative RiskStar database described below.

Our team assists in scrubbing/reconciling property appraisals and implementing new values. We also will provide annual advice on trending of values, in addition to the suite of services provided at no cost by *Preferred*, our brokerage team provides the resources below to our clients.

Our team utilizes RiskMeter and CoreLogic, a completely online resource providing on-demand hazard risk data. This in-house subscription is utilized to be sure the most accurate and complete underwriting data is provided to the property underwriters via the Property Schedule.

RiskMeter Online™ CoreLogic

A completely online resource providing on-demand hazard risk data, this in-house subscription is utilized to be sure the most accurate and complete underwriting data is provided to the property underwriters via the Property Schedule.



**Real Time Data Available for individual sites includes:**

- Distance to Coast
- Flood Zone Determination with distance from SFHA
- Storm Surge Score
- FEMA Flood Insurance Rate Map and panel number

We have national contracts with both of the top catastrophic modeling platforms, RMS and the preferred AIR Worldwide and their Touchstone Platform. The Touchstone Platform provides proprietary software-driven program analytics of individual client risk exposures on multi-layered interactive maps.

These highly sophisticated analyses provide actionable data via Interactive mapping and client-specific geographic risk profiles, including the following:

- Data analysis to reduce uncertainty, ensure accurate underwriting data, and preempt modeling formulas utilized by insurers to evaluate risk, set rate and coverage terms
- Custom catastrophe and non-catastrophic modelling analysis
- Visualize severe thunderstorm and windstorm risks
- Quality data analytics which measure true risk profiles
- Geo-visualization tool – Spatial Key

| Peril | GU AAL | GR AAL | GU SD | GR SD | GU CV | GR CV |
|---|---|---|---|---|---|---|
| Named Windstorm | $463,323 | $337,733 | $2,773,255 | $2,205,967 | 5.99 | 6.53 |
| Convective Storm | $2,505 | $2,019 | $13,830 | $11,583 | 5.52 | 5.74 |
| Flood | $117,213 | $112,951 | $926,937 | $915,492 | 7.91 | 8.11 |
| Earthquake | $2 | $1 | $224 | $113 | 92.61 | 95.32 |

We will make available to the City, at no cost, a valuable web-based Property Asset Management Tool. This property management web-based platform is offered by Centurisk, an industry leading appraisal and asset management company. The system is called RiskStar and provides the user with an easy and efficient tool to maintain tangible property data including buildings, contents, property in the open, vehicles, mobile equipment, and other fixed assets. RiskStar can greatly increase the integrity of data and has complete conversion capability for catastrophic modeling, proof of loss documentation and a plethora of property-based reports.

Centurisk

**Purpose-built software to navigate the complexities of risk management.**

From buildings to moveable equipment, RiskStar can help you manage data and workflows related to various asset types. Data conversion capabilities for catastrophe modeling, reports for proof-of-loss documentation, and a streamlined insurance renewal process are just some of what makes RiskStar the clear choice for managing property data and values.

RiskStar

## 5 Reasons Your Risk Pool Needs RiskStar

- RiskStar helps you meet the underwriting requirements of an ever-changing property insurance market
- With RiskStar, you can turn detailed data into actionable insight
- RiskStar can help you enhance member engagement through technology
- Providing an exceptional customer experience is a core value of the RiskStar team
- RiskStar was built for risk pools by risk pools, designed with your needs in mind

RiskStar Property Risk Software

### Comprehensive is an understatement.

Designed by property appraisal experts and risk management professionals, RiskStar offers the most robust functionality for managing property risk and exposures on the market.

## Enhanced Communication Resources

We are proficient in training our clients in many areas including but not limited to: Contractual Risk Transfer and Indemnification, FEMA Rules and Procedures, Employment Practices Liability, Florida Public Entity Law, and State of the Market. Our team is available to present any necessary training to City employees as needed.

We also provide timely topical updates unique to the City. These are available via email and on our website, but we also discuss directly with the City how these may impact your specific environment.

- White Papers
- Current risk environment updates, for example Cyber resources and updates
- Legislative and market updates
- Florida public-entity focused newsletter (The Weekly Rundown)

6. **The client executive assigned to the account must have a minimum of ten years of experience providing similar broker of record services to municipalities of similar size in the state of Florida and must be capable of speaking and making decisions on behalf of the firm. Additional support staff assigned to the City must have a minimum of five years of experience supporting municipalities in the administration of property and casualty insurance programs.**

Agree. Please see section 2 for additional details.

# Section 3
## Scope of Services

## Section 3 – Scope of Services

**The City is seeking proposals from established, qualified Property & Casualty insurance brokers who are properly licensed and have been in the business for not less than five (5) years. The broker selected will serve as the City's Agent of Record and will be responsible for conducting all services relative to the marketing, acquisition and maintenance of Property & Casualty insurance on behalf of the City of Ormond Beach. The Agent of Record may receive a reasonable commission from the Property & Casualty insurance carrier(s) and/or charge an administrative fee directly to the City. The Agent should be able to acquire liability coverage which provides for the City's choice of counsel. Examples of the work expected to be performed by the selected agent includes but are not limited to:**

Brown & Brown Public Sector confirms our ability and understanding of the requested Scope of Services outlined below. We consider these our core competencies and deliver a very similar scope to the majority of our current clients. Our public sector expertise allows us to consistently deliver on these items with the highest level of efficiency and customer service.

| Scope of Services | Agree | Disagree |
|---|---|---|
| 1. Contact Property & Casualty insurance providers on behalf of the City to resolve issues that may arise throughout the year as needed. The City of Ormond Beach currently purchases Excess Workers' Compensation, Property, Public Officials Liability, Employment Practices Liability, Commercial General Liability, Licensees & Permitees, Drone, Cyber, Volunteer Accident, Petroleum, Flood, Professional Liability for Specified Medical Professions (Emergency Medical Technicians – EMT), Commercial Crime, and Accidental Death and Disability for Public Safety coverage. The City may consider Auto Liability coverage, or other applicable coverage. | ✓ | |
| 2. Negotiate renewal rates on an annual basis for the most comprehensive coverage at the most cost-effective premium with input from City staff and provide such rates no later than July of each year – unless other arrangements are agreed-to between the broker or brokers and the City. | ✓ | |
| 3. Assist the Risk Manager and/or City staff in conducting annual physical inventories for real and personal property, establishing current replacement values. | ✓ | |
| 4. Prepare and maintain list of current properties owned by the City. Update list to reflect new construction, acquisition or deletion of property and provide same to the City, at a minimum on an annual basis. | ✓ | |

| Scope of Services | Agree | Disagree |
|---|---|---|
| 5. Assist the Risk Manager in preparing documents and exhibits for presentation to the City's Insurance Program Committee and/or City Commission for approval/annual renewal of Property & Casualty insurance. All documents/proposals to be considered by the City Commission for approval must be received in final form to meet deadlines established by the Risk Manager for inclusion in the City Commission agenda packet. | ✓ | |
| 6. Attend City Commission meetings and other meetings as requested by City staff at no cost to the City. | ✓ | |
| 7. Assist City staff with review and suggested improvement to the City's minimum insurance requirements. | ✓ | |
| 8. Be available to meet with City staff concerning issues regarding the City's minimum insurance requirements and certificates of insurance. | ✓ | |
| 9. Be willing to assist vendors or bidders on City contracts with insurance coverage that meets or exceeds the City's minimum insurance requirements. | ✓ | |
| 10. Assist in the preparation of Requests for Proposals (in compliance Section 2-300 of the Ormond Beach Code of Ordinances) and analysis of same as needed at no charge to the City. | ✓ | |
| 11. Respond to telephone calls from City staff on the same day or within twenty-four (24) hours and be available at night and on weekends as needed. | ✓ | |
| 12. Be available to meet on-site as required by the City within 48 hours of request, unless other arrangements are agreed-to between the broker and the City. | ✓ | |
| 13. Actively pursue improved coverage and/or rates on behalf of the City of Ormond Beach. Outline marketing techniques including timing, client meetings, meetings with underwriters and major carriers. | ✓ | |
| 14. Perform risk management advisory services. Advice must be provided on emerging risk management trends, the state of the market and any new, innovative products. | ✓ | |
| 15. Review and refine existing insurance model and prepare ongoing reports as requested. | ✓ | |
| 16. Provide other related services as determined by the City at no cost to the City. | ✓ | |

Summary

This is a request to approve an Underground Utility Construction Management Services Work Authorization with Danus Utilities, Inc. for services related to the rehabilitation of the 107 (6P) Lift Station.

The lift station with the designation of 107 (6P) is utility staff's current recommended rehabilitation priority. This lift station is located at 350 John Anderson Drive and it is responsible for conveying a large amount of wastewater from the northern peninsula region to the City's water reclamation facility. A commitment to investing in regular system improvements is necessary for the City to provide reliable and efficient operation and maintenance of its wastewater collection system.

On October 6, 2020, the City Commission approved Resolution 2020-142, which authorized the execution of continuing contracts with 4 underground utility contractors. Danus has extensive experience with the City's lift stations, which allows them to provide well-suited, economical construction management services for this project.

Financial Impact

Funding for this $85,085 work authorization is included in the FY 2024-25 budget, within Fund 401 Water and Wastewater Operating Fund.

Citizen Impact

Scheduling priority based repairs for the utility infrastructure provides for reliable sanitary sewer treatment systems for the City's utility customers.

**RESOLUTION NO. 2025-120**

A RESOLUTION ACCEPTING A PROPOSAL FROM DANUS UTILITIES, INC. TO PROVIDE UNDERGROUND UTILITY CONSTRUCTION MANAGEMENT SERVICES REGARDING THE LIFT STATION 6P REHABILITATION PROJECT; AUTHORIZING THE EXECUTION OF A WORK AUTHORIZATION THERETO; AND SETTING FORTH AN EFFECTIVE DATE.

**WHEREAS**, the City solicited a proposal from Danus Utilities, Inc., a firm under continuing contract with the City, to provide underground utility construction management services regarding the lift station 6P rehabilitation project ("the Project") in accordance with the provisions of Section 2-300(c) of the *Code of Ordinances*, and

**WHEREAS,** the appropriate City staff have reviewed the proposal received and determined that the proposal submitted by Danus Utilities, Inc. to provide underground utility construction management services for the aforedescribed project at a cost not to exceed $85,085.00 is in the best overall interest of the City, and recommends that the said proposal (a copy being attached to the Work Authorization which is attached hereto and incorporated herein by reference) be accepted, and

**WHEREAS,** the City Commission concurs in the said determination and recommendation, and

**WHEREAS,** the City Manager has certified that the money for the payment of the Project has been deposited to the credit of the Water and Wastewater Operating Fund (401) and has not been appropriated for any other purpose, now therefore,

**BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:**

**SECTION ONE.** The proposal submitted by Danus Utilities, Inc. to provide underground utility construction management services regarding the lift station 6P rehabilitation project at a cost not to exceed $85,085.00 is hereby accepted.

**SECTION TWO.** The Mayor and the City Manager are hereby authorized and directed to execute a Work Authorization between the City and Danus Utilities, Inc. to provide underground utility construction management services for the Project at the said price, and to pay the cost therefor from the Water and Wastewater Operating Fund.

**SECTION THREE.** This Resolution shall take effect immediately upon its adoption.

**APPROVED AND AUTHENTICATED this 22nd day of July, 2025.**

## I. COMPLIANCE WITH FLORIDA PUBLIC RECORDS LAW

Contractor expressly agrees that it shall comply with the public records law provided in Florida Statutes, Chapter 119, and specifically to:

(a) Keep and maintain public records required by the City to perform the contracted service.
(b) Upon request from the City Clerk, provide the City with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in Chapter 119, Florida Statutes, or as otherwise provided by law.
(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the contractor does not transfer the records to the City.
(d) Upon completion of the contract transfer, at no cost to the City, all public records in possession of the contractor or keep and maintain public records required by the City to perform the service. If the contractor transfers all public records to the City upon completion of the contract, the contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the contractor keeps and maintains public records upon the completion of the contract, the contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the City, upon request from the City Clerk, in a format that is compatible with the information technology systems of the City.
(e) Failure of the Contractor to comply with Public Records Law as provided by Florida Statutes, Chapter 119, shall subject the Contractor to penalties under Chapter 119.10 and subject this Agreement to termination for cause by the City.

**IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS CONTRACT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT:**

**CITY CLERK**
**22 SOUTH BEACH STREET**
**ORMOND BEACH, FLORIDA 32174 (386) 676-3331**
**CITYCLERK@ORMONDBEACH.ORG**

Ref: Fla. Stat. §119.0701(2016)

## II. VERIFICATION OF EMPLOYMENT STATUS USING E-VERIFY SYSTEM

1. Section 448.09, *Florida Statutes*, makes it unlawful for any person to knowingly employ, hire, recruit, or refer, either for herself or himself, or on behalf of another, for private or public employment within the state, an alien who is not duly authorized to work in the United States. Contractor warrants that it is registered with the U.S. Department of Homeland Security's E-Verify system, and is compliant with the requirements of Sections 448.09 and 448.095, *Florida Statutes*.
2. Contractor agrees that if the contractor enters into an agreement with a subcontractor, the subcontractor must provide the contractor with an affidavit stating that the subcontractor does not employ, contract with, or subcontract with an unauthorized alien, and contractor warrants it shall maintain any such affidavits for the duration of the contract. If the City has a good faith belief that a subcontractor knowingly violated Section 448.09 (1), the City shall promptly notify the contractor and order the contractor to immediately terminate the contract with the subcontractor.
3. In the event the City has a good faith belief that the contractor has knowingly violated Section 448.09 (1), *Florida Statutes*, the City shall terminate the contract, and as provided by statute, the contractor may not be awarded a public contract for at least one (1) year after the date of termination. The contractor may also be held liable for any additional costs incurred by the City as a result of the termination of the contract.

Summary

This is a request for the City Commission to formally adopt the 2025 Ormond Beach Strategic Plan. The City began formally adopting a strategic plan in 2015, and has continued to regularly update its goals and priorities through City Commission workshops and progress reports. This process supports good governance and is vital in providing for the efficient use of staff and financial resources.

This year, the City of Ormond Beach engaged Strategic Government Resources (SGR) to assist the City Commission in updating its Strategic Plan. SGR facilitated a two-day goal-setting workshop on March 12 and March 13, with a follow-up workshop on May 6, 2025, to review and finalize the City Commission's goals and priorities for the remainder of this election term. As part of this process, the City Commission revised the City's vision statement, mission statement, and organizational values and reaffirmed the following strategic pillars established in the City's 2019 Strategic Plan:

- Transportation & Community Development
- Economic Development
- Governence
- Public Safety
- Quality of Life
- Water Quality and Environment

The 2025 Strategic Plan identifies the goals and priorities agreed upon for each strategic pillar and will be utilized to help guide the City's efforts and resources for the betterment of our community. Progress reports will be published regularly to measure intended outcomes and results.

Attached is the proposed City of Ormond Beach 2025 Strategic Plan and a summary report created by SGR detailing the strategic planning process and results.

Financial Impact

The adoption of the 2025 Strategic Plan has no current budgetary impact. However, each of the goals and priorities will be reviewed in conjunction with the operational and capital budgets and planned accordingly.

Citizen Impact

Strategic planning with clearly established goals and priorities helps to focus efforts and financial resources on issues and outcomes most important to the community.

**RESOLUTION NO. 2025-121**

A RESOLUTION OF THE CITY COMMISSION APPROVING AND ADOPTING THE CITY'S 2025 STRATEGIC PLAN; AND PROVIDING AN EFFECTIVE DATE.

**WHEREAS**, on March 12-13, 2025 and May 6, 2025 the City Commission held Strategic Planning Workshops to review and update the goals and priority objectives of its Strategic Plan; those updates are set forth in the 2025 Strategic Plan, a copy of which is attached hereto and incorporated herein by reference, and

**BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:**

**SECTION ONE.** The City Commission hereby approves the 2025 Strategic Plan outlining priority objectives, and hereby adopts the same as the official Strategic Plan for the City of Ormond Beach.

**SECTION TWO.** This Resolution shall take effect immediately upon its adoption.

**APPROVED AND AUTHENTICATED this 22nd day of July, 2025.**

CITY OF ORMOND BEACH

# STRATEGIC PLAN 2025

## VISION STATEMENT

**RECOGNIZED AS ONE OF FLORIDA'S MOST ATTRACTIVE, SAFE, FISCALLY RESPONSIBLE, AND DESIRABLE COASTAL COMMUNITIES BY PROTECTING OUR RICH HISTORY, PRESERVING OUR DISTINCTIVE SMALL-TOWN CHARM, AND CULTIVATING NATURAL ENVIRONMENTS, RECREATIONAL SPACES, AND ECONOMIC OPPORTUNITIES.**

## MISSION STATEMENT

**DELIVERING EXCEPTIONALLY RESPONSIVE CITY SERVICES TO OUR RESIDENTS, BUSINESSES, AND VISITORS THAT FOSTERS A WELCOMING AND PROSPEROUS ENVIRONMENT AND CREATES THE HIGHEST QUALITY OF LIFE FOR CURRENT AND FUTURE GENERATIONS.**

## CITY COMMISSION

Mayor
Jason Leslie

Deputy Mayor & Zone 1 Commissioner
Lori Tolland

Zone 2 Commissioner
Travis Sargent

Zone 3 Commissioner
Kristin Deaton

Zone 4 Commissioner
Harold Briley

# ORGANIZATIONAL VALUES

**Integrity:** We hold ourselves accountable to the highest ethical standards in all aspects of work.

**Customer Service:** We deliver exceptional customer service through professional engagement and compassion for those we serve.

**Resilient:** We strive for preparedness in emergency planning, assessing future needs, and preserving natural resources by incorporating sustainability and resilience in the design and operation of our facilities, infrastructure, programs, services, and development standards.

**Transparency:** We are committed to building and maintaining trust in one another and with our community through continued public engagement through proactive and open communication.

**Responsive:** We prioritize delivering timely, thoughtful service that reflects the needs of those who live, work, and visit Ormond Beach.

**Innovative:** We continuously seek new ideas and better ways to serve our community by balancing fiscal responsibility with forward-thinking solutions that strengthen Ormond Beach for generations to come.

**Empowerment:** We foster a culture of trust and accountability where every employee is encouraged to lead, collaborate, and find smart, community-first solutions that deliver meaningful results.

# MAYOR'S MESSAGE

JASON LESLIE

*As a City Commission, our top priority is serving the residents of Ormond Beach with transparency, accountability, and respect. We are committed to making decisions that reflect the needs, values, and aspirations of our community. That starts with listening. Whether it's an email, a comment at a public meeting, a survey response, or a conversation at a neighborhood event, we take your input seriously.*

*Every voice matters and plays a role in shaping the future of our city. From public safety and infrastructure to parks, economic development, and responsible growth, your feedback helps guide the policies and projects we pursue. Our goal is to ensure Ormond Beach remains a place we are all proud to call home. A place where quality of life, natural beauty, and community spirit are protected and strengthened for generations to come.*

# 2025 STRATEGIC PILLARS

1. TRANSPORTATION & COMMUNITY DEVELOPMENT
2. ECONOMIC DEVELOPMENT
3. GOVERNANCE
4. PUBLIC SAFETY
5. QUALITY OF LIFE
6. WATER QUALITY & THE ENVIRONMENT

# TRANSPORTATION & COMMUNITY DEVELOPMENT

## GOAL STATEMENT

TO ENSURE THE CHARM AND RICH HISTORY OF OUR COMMUNITY IS WELL MAINTAINED THROUGH RESPONSIBLE DEVELOPMENT/REDEVELOPMENT THROUGH THE PROVISION OF INFRASTRUCTURE TO MEET CURRENT AND FUTURE NEEDS.

- **Engage with the Florida Department of Transportation (FDOT) to ensure Ormond Beach's input into the design and aesthetics of the new US-1 and I-95 Interchange as the entranceway to our community.**

- **Improve City gateway corridors entry features to convey a sense of arrival in Ormond Beach.**
  - **Underground utilities along US 1, North Beach Street, around US 1 & I-95 interchange.**

- **Pursue the development of multi-modal trail connectivity to historical, cultural, business, residential, recreational, and other points of interests both within Ormond Beach and with neighboring regional trails.**
  - **Trail connectivity to Penland Property conservation land.**
  - **Work with Volusia County to expand Beach Street Trail and connect A1A to Volusia County Trails through Ormond Beach.**
  - **Trail connectivity along the Halifax River to US 1 and to the I-95 interchange with connectivity to Ormond Scenic Loop and Trail.**

- **Explore cost effective measures with the Building and Community Development Departments that could result in improvements to Ormond Beach's current CRS 5 rating to attain benefits of reduced insurance costs for our residents and businesses.**

**Rendering Courtesy of Florida Department of Transportation.**

# ECONOMIC DEVELOPMENT

## GOAL STATEMENT

TO ENSURE THE ECONOMIC HEALTH AND VITALITY OF THE CITY OF ORMOND BEACH BY PROVIDING AN ENVIRONMENT ALLOWING BUSINESSES TO THRIVE THROUGH RETENTION, EXPANSION, AND ATTRACTION.

- **Actively consider Community Redevelopment Authority (CRA) projects in both the Granda and Ormond Crossings Districts to spur development, redevelopment, and associated investment.**

- **Promote and protect Ormond Beach's Historic Downtown to ensure its economic vitality.**

- **Actively promote the value of the Municipal Airport and pursue improvements that maximize its use and economic/business contributions to the City.**
  - **Pursue the upgrade or replacement of the existing Fixed Base Operator (FBO) Building to provide improved welcoming appearance and safety for patrons.**
  - **Consider the expansion of the Airport's runway to 4,500 – 5,000 feet to improve safety for existing and new patrons of the facility.**
  - **Investigate the need for additional hangars at the Airport.**

- **Encourage a diversified economic base, which provides for the City's longterm economic health and quality of life.**
  - **Continue to invest in attracting and retaining high-wage jobs.**
  - **Reuse or repurpose Riverbend property.**

# GOVERNANCE

## GOAL STATEMENT

TO BUILD AND MAINTAIN STRONG GOVERNANCE PRACTICES INTERNALLY AND EXTERNALLY THROUGH CONTINUED CIVIC ENGAGEMENT EFFORTS WITH RESIDENTS, EFFECTIVE MANAGEMENT AND OPERATIONAL POLICIES, AND STRATEGIC PARTNERSHIPS WITH OTHER GOVERNMENTS AND AGENCIES.

**Strive to achieve the public's trust through honest, transparent, respectful, and equitable behavior in conducting City business.**

- **Develop a Mayor & City Commission Norms & Procedures Policy.**

**Attract, develop, and support the best talent for Ormond Beach to be recognized as an Employer of Choice.**

**Provide convenient, modern, and technologically advanced municipal services to improve efficiencies and accessibility of services to both internal and external customers.**

**Provide citizen education and engagement opportunities to support the city's decision-making in policies, ordinances, and programs.**

- **Advocate for the goals and priorities of Ormond Beach and promote related regional action through active participation in intergovernmental relations and partner agencies.**
- **Continue Citizen's Academy.**
- **Complete the City website redesign and other technology upgrades.**
- **Continue Chamber partnership for Youth Leadership Program and Student Government Day to encourage future leaders.**

# PUBLIC SAFETY

**Provide efficient, effective staffing to ensure a high level of services and response times for Public Safety services.**

- **Evaluate compensation, benefits, and training programs that enhance recruitment, retention and succession planning in a competitive market.**
- **Maintain DARE program and other youth outreach programs.**
- **Mental wellness signage and resources on the website/first responder assistance.**
- **Encourage collaboration with drug/alcohol treatment providers and Narcan/Safety measures in response to affected populations.**

**Strive to maintain one of the lowest crime rates among comparable cities.**

**Consider options including dialogue with churches and social service providers, establishment of Task Force, ordinances, regulations, and other measures to mitigate the impact of homelessness in Ormond Beach.**

**Ensure the physical security of City assets and operations.**

- **Pursue the relocation of the Police Department, Emergency Operations Center (EOC), and the Public Works Facility from their current flood zone locations.**
- **Continue the conversion of city outdoor lighting fixtures to LED.**

**Consider enhancements to City's property maintenance Codes to achieve a higher adherence to community standards in support of beautifying Ormond Beach.**

**Explore measures with the Fire & Utilities Departments that could result in improvements to Ormond Beach's current ISO #3 rating to attain benefits of reduced insurance costs for our residents and businesses.**

## GOAL STATEMENT

TO PROVIDE A SAFE AND SECURE COMMUNITY WITH EFFECTIVE, EFFICIENT AND RESPONSIVE EMERGENCY SERVICES, STAFFING, AND INFRASTRUCTURE.

Ormond Beach police officers saluting during 2025 Police Week at Memorial Park.

Ormond Beach firefighters train for Mayday, emergencies where a firefighter is lost, trapped, or injured on scene.

# QUALITY OF LIFE

**Pursue the expansion of recreation fields in Ormond Beach and prioritize the projects in the City's current Park & Recreation Master Plan for funding and development.**

**Continue to be recognized as a leader in Parks & Recreation through the offering of diverse, high-quality parks and natural spaces.**

- **Desire to have U.S. National Anthem played at start of every game.**
- **Explore improved field lighting in sports fields and recreational facilities.**
  - **Priority locations: behind Nova Rec to Nova Road on north side & parking lot lighting of softball quad.**

**Consider the development of additional facilities for public programs and community gatherings/events.**

- **Determine the best redevelopment option for the former Church property located at 56 N. Beach St.**
- **Establish Founder's Day as a community flagship event.**
- **Plan for future needs of East and West Ormond Beach Community Centers/Venues.**

**Continue to improve the attraction and beautification of Ormond Beach by supporting the placement of public art, community gateway planting/landscaping, and lighting of bridge.**

- **Develop policies and collaborate with partner agencies to enhance the beautification of the US 1 Corridor.**
- **Continue to work with Volusia County and citizen groups to promote and enhance North Beach Street/Scenic Loop and Trail.**
- **Continue to pursue and promote new Public Art projects in Downtown/Main Street.**
- **Maintain downtown seasonal lights and add bridge uplighting.**
- **Verbally support the rehabilitation of Chief Tomokie statue.**

## GOAL STATEMENT

TO ENSURE ORMOND BEACH REMAINS THE CROWN JEWEL OF CENTRAL FLORIDA, BY PROVIDING FOR THE QUALITY, QUANTITY AND VARIETY OF PASSIVE AND ACTIVE RECREATION AREAS AND FACILITIES TO SERVE THE NEEDS OF OUR COMMUNITY.

# WATER QUALITY & THE ENVIRONMENT

## GOAL STATEMENT

TO ADVANCE THE CITY'S ENVIRONMENTAL STEWARDSHIP THROUGH PROJECTS AND OUTREACH PROMOTING WATER QUALITY, STORMWATER MANAGEMENT, AND RECYCLING.

- **Protect and enhance our environment and invest in infrastructure projects and assets that build resilience benefits to reduce flooding risk and increase sustainability.**
  - **Reduce the impacts of localized stormwater flooding through the prioritization of key projects in the Stormwater Master Plan and through pre-storm mitigations activities.**
- **Advocate for projects that can improve the overall quality of Ormond Beach's water bodies.**
  - **Expand reclaimed water system and reuse pond out West.**
  - **Continue effort of septic to sewer conversions in Magnolia, Oak, and Bonita targeted areas on the mainland.**
  - **Evaluate the possible benefits of a new Federal inlet north of Highbridge to improve the water quality of the Halifax River.**
- **Promote the value of the City's recycling program to reduce the impact of the waste stream sent to the landfill.**
- **Consider the establishment of a Protective Wildlife Corridor.**

## BACKGROUND:

The City of Ormond Beach engaged Strategic Government Resources (SGR) to facilitate the March 12 & 13, 2025 Governance & Goal Setting Workshop, and a subsequent May 6, 2025 Goal Prioritization Workshop to assist the newly seated Mayor & Commission in their governance practices and to update the City's current Strategic Plan.

The 2025 Strategic Planning process involved SGR meeting with the City's senior staff in advance to learn about the status of the City's previous strategic planning initiatives and to receive an update on the status of significant projects and initiatives currently underway in Ormond Beach. This work was followed-up by conducting virtual pre-workshop individual interviews with the Mayor and each Commissioner to secure feedback from them regarding how they were working as a governing body; their thoughts regarding the progress on significant initiatives/projects in the City's current Strategic Plan; undertake a SWOT assessment; solicit input on current and emerging organizational and community issues; solicit their thoughts on possible new initiatives and/or projects; and to gain insights on their individual desires regarding the current and future direction of the community and organization. The feedback received from these interviews served as the groundwork for the Initial Governance & Goal Setting Workshop.

The first afternoon/evening part of the workshop focused on the Mayor & Commissioners and the City Manager's Input-Output-Processing-Template Styles (IOPT), followed by a presentation of High-Performing Organizational Good Governance Principles. The full second day of the workshop focused on the Strategic Visioning and Planning process. The presentation highlighted the importance of organizational Mission, Vision, and Values, as well as the need for the City Commission and the City staff to work collaboratively in the response and development of strategies and programs to address emerging operational and community issues through an interdepartmental focus.

The Mayor & Commissioners were subsequently engaged in a highly interactive discussions to solicit their collective thoughts and perceptions on the City's current Vision, Mission, and Goals, what they mean to each of them, with the opportunity to revise/amend any statements. The final approved Vision, Mission, Organizational Values, Strategic Pillars & Priorities are intended to serve as the foundation for the City's new Strategic Plan.

The workshop also involved a series of high-level briefings by senior staff highlighting completed projects in the previous year, followed by proposed and emerging projects and initiatives for consideration. The Mayor & Commission reviewed the progress made to date on the City's current projects and initiatives, discussed the emerging issues and response strategies at a high level, and advanced various additional items they were interested in considering going forward.

Post-workshop, the Mayor & Commission expressed an interest in undertaking a ranking of the proposed Goals & Priorities for the new Strategic Plan to better provide consensus and direction on the most important initiatives that the Administration should be pursuing in the upcoming

years. The results of the Prioritization Process were reviewed and discussed at a second Workshop held on May 6, 2025.

This Report is intended to provide an overview of the material that was presented and discussed at both the March 12th & 13th and May 6th sessions.

# HIGH LEVEL FEEDBACK FROM ADVANCE CITY COMMISSION INTERVIEWS

## What are the Strategic Questions that need to be addressed at the upcoming Strategic Visioning Session?

- *Pleased with City Administration & City Attorney*
- *Development Growth – Residentially built out but pressures to the south, north, and west. We have water and sewer agreements with surrounding communities to help address growth. Strong impacts from Daytona Beach re: growth*
- *We are seeing growth in homelessness and panhandling*
- *Need to acquire land to build new EOC and Reclaimed Water Ponds*
- *Impact of proposed Fuel Farm along City's northern border in Unincorporated Volusia County. Formerly Heavy Industrial and now zoned Light Industrial, but not for same project*
- Airport:
    - *Former City-owned Golf Course (Riverbend) near Airport. Possible Airport expansion, flight schools, hangars, and passive parkland (X2)*
    - *Airport is great asset, but underutilized. The Airport has local value to the economy but is not universally understood and/or liked. Need for better education about its economic impact on City. Need for Airport expansion/support as part of discussions*
    - *New gates, new FBO & Building needed, extend runway. Supports current plan including refurbished City-owned Golf Course but may require some additional land purchases to complete.*
- Beautification:
    - *Undergrounding utilities along US 1 and North Beach Street and around US 1 & I-75 interchange (Also include multi-modal pathway to Ormond Crossing) – New Gateways to City, although required ROW's not all owned by the City*
    - *North Beach Street – Scenic loop highway/Gateway Park (Needs a different name) Needs kiosk and Historical Society wants to partner with City*
    - *Complete Cassen Park redevelopment with unlighted Bridge and connect four parks on each corner of bridge*
- Stormwater & Flooding:
    - *Starting to experience localized flooding following storms that has not historically occurred (X2)*
    - *Canal cleaning, purchasing property for retention basins*
    - *We dedicated some millage to support recreation field and maintenance projects*
    - *Former Golf Course (Tomoka Oaks) within a subdivision (closed 10 years) & lawsuit with developer (RRD zoned) – now expired*
- Outdoor Trails:
    - *Penland Property (off Airport Road) St. Johns WMD & Volusia Forever new conservation land currently used as public mountain bike area*

    - *Multi-modal trail up the river, over the RR to US 1 and out to I-95 interchange. Plantation Oaks connectivity out to Scenic Loop*
    - *Work with Volusia County to connect parts of Ormond Beach – A1A and 2 other smaller parcels connection to Volusia County Trails through Ormond Beach*
- *Pace School Project ($200k in budget for Pace) using old building in Central/South Ormond Beach to help underserved community. (Across the street PAL Building – Maybe repurpose current building on Pace property) and will likely require some additional private funding sources)*
- *Purchase of property for Community Center (56 North Beach/ Church Property) – torn down and now a parking lot in a holding pattern. Possible parking garage with adjacent building*
- *Economic development opportunities to bring more jobs to Ormond Beach*
- *Police/Fire Retirement – We have the lowest multiplier in the area which affects recruitment and retention efforts*
- *Established Citizen's Academy*
- *Updated technology*

## What do you want to accomplish and/or leave as your legacy following your tenure on the City Commission?

- *That we left Ormond Beach better than we found it – Great transparency and how we do things*
- *Improvements to recreational facilities and addressed deferred maintenance with dedicated revenue*
- *Maintenance of drainage ditches to assist during hurricanes and significant storms*
- *I helped make a difference and fought for what is right and good for Ormond Beach and its constituents*
- *Perfect person to be on Commission at the right time in our community's history – Moved things off the table*
- *Leave Ormond Beach better than we found it, with improvements in technology, stormwater, Airport, etc.*
- *Change development codes to support planning of native plants/Florida Friendly species*
- *Supported community beautification efforts, undergrounding of utilities, low impact development, and multi-modal trail development*

## What do you want to change about Ormond Beach?

- *Nothing comes to mind, but perhaps reducing traffic with improved East-West corridors and bridges to beaches*
- *Help insurance rates go down*
- *That people could choose to stay in Ormond Beach – multi-generational and a good place to live without pricing people out of the area*
- *Proactive vs. passive enforcement Code Enforcement*
- *Stem the growth in homelessness and its impacts on the community*
- *Nothing requires changing, but some concerns with non-local purchasing of properties that are pushing our housing/land prices up to build mega-homes/pricing*
- *Reduce impacts of traffic and congestion*

## What do you want to keep about the way it is in Ormond Beach?

- *Maintain the City's character – Quaintness & Small-Town Feel*
- *Preserve historic resources in community*
- *Affordable City Budget – Preserve and improve our Quality of Life*
- *Don't let surrounding communities & issues negatively impact Ormond Beach*

- *Our support for small businesses and Main Street events (Would like more of that)*
- *We live in paradise – Small town feel, beach*
- *Keep greenspaces/open spaces, trail connectivity, and outdoor lifestyle*

## What does the City of Ormond Beach do Exceptionally Well?

- *Staff and Administration are great – Good Management & Leadership*
- *Law enforcement and its outreach to youth, homelessness, Parks & Recreation, Streets and ROWs are attractive*
- *Parks & Recreation, Events, Police & Fire*
- *Great Parks & Recreation facilities and programming*
- *City supports its residents and great interdepartmental cooperation in serving our community*

## What does the City of Ormond Beach Struggle with?

- *Growing Pains – Keeping up with staffing levels associated with growth*
- *Sandbag Program – Prefilled sandbags-People are OK with filling themselves vs. drop offs (Handicapped assistance)*
- *Public education on how our government/services work*
- *Improved education regarding bicycle safety and riding rules*
- *Police Recruitment & Retention – Need to review compensation, benefits, retirement, etc.*
- *Managing traffic and growth outside of Ormond Beach that impacts our City*
- *It sometimes just takes too much time to get things done!*

## What Successes Come to Mind?

- *Technology upgrades to City Commission Chambers (X3)*
- *City Hall Telephone system upgraded*
- *Cassen Park improvements (X3)*
- *Future I-95 & US 1 Interchange improvements (2026/2027)*
- *Progress on EOC, Community Center, and resolution of Fuel Farm issue*
- *Part of Flemming Avenue by Central Park – New Stormwater drainage system to alleviate flooding*
- *Fuel Farm Issue resolution*
- *Stood up to developers on Golf Corse (Tomoka Oaks) redevelopment*
- *Removed fluoride from water system*
- *Dedicated millage for Leisure Services projects and operations*
- *Native Plant legislation, uplighting of bridge*

## Any Stalled Projects/Initiatives?

- *Fuel Farm issue took months to get resolved*
- *Ormond Crossings Development Project*
- *Decision on future use of former City-owned Golf Course*
- *None come to mind*
- *Relocated Police Department & EOC (Funding request to State got turned down)*
- *Septic to sewer conversions on Beach side of town – Need to prioritize targeted area and proceed (Magnolia, Oak, and Bonita)*

# SWOT Analysis:

## Comments Received From City Commission Advance Interviews

The following information regarding the City's leading Strengths, Weaknesses, Opportunities, and Threats secured from the Advance City Commission Interview Sessions. Respondents were asked to specifically identify anything that was fundamentally different from historical Strengths, Weaknesses, Opportunities and Threats over the last 12 months.

### Strengths:

- *Successfully addressed lots of controversial issues over the last several years with City Commission generally unified on responses*
- *Trust in Ormond Beach City Commission – 3 elected without opposition and 2 open seats due to transition of incumbents*
- *Work well with community groups and partners*
- *Good working relationships with surrounding jurisdictions*
- *LDC's were well written and followed that attract development and people to Ormond Beach*
- *Improving Arts & Culture – Murals, sculptures public art*
- *Growth & Development without need for tax increases*
- *Good at "Building Community" – We can come together for goals*
- *Support of our local businesses*
- *Avalon Park Development (10K homes outside of City – wholesale potable water and sanitary sewer to Daytona Beach) but Ormond Beach will see impacts of traffic, and Ormond Crossings (3,250 homes)*
- *Great and engaged residents and supportive of City Commission*

### Weaknesses:

- *Prior to development of Citizen's Academy, lack of understanding of City operations and procedures*
- *Lack of modern EOC, with current Police Department & EOC located in flood zone*
- *Traffic - East-West corridors are challenged and with impacts from surrounding communities/areas*
- *Public perception of household incomes – inflation, insurance, etc. and resulting impacts on spending power for local businesses*
- *Social media complaints and "Word Vomit"*
- *Flooding – But City does not experience much*
- *Requests for building moratoriums by watchdog groups*
- *Increased major storm activity with resulting flooding impacts*
- *New Mayor and City Commission*
- *New City Commission is generally aligned, but needs some education on roles and responsibilities of elected officials vs. Administration*

### Opportunities:

- *Redevelopment of former City-owned Golf Course to assist Airport and diversify economy with possible light industrial*
- *Water taxi service – both within Ormond Beach and to Daytona Beach during festivals, etc.*
- *Beach parking fees for non-residents*

- *Floating dock on river, possible overnight transient boat parking to support restaurants and local businesses*
- *Cassen Park Renovations*
- *We could be more transparent to alleviate concerns – Educate people on how our processes work*
- *Airport development*
- *Need to leverage our connections with elected officials in WDC and Tallahassee given key appointments/leadership positions*

### THREATS:

- *Fuel Farm Project*
- *Development & traffic*
- *Fuel Terminal Project in unincorporated County*
- *Perception by some that the glass is half empty vs. half full*

## ORMOND BEACH'S VISION STATEMENT

The City of Ormond Beach has not historically used a Vision Statement which typically provides the organization's purpose and objectives in the present, i.e., *the why*. The Vision Statement describes where the organization hopes it will be going in the future if they can fulfill their Mission. There was interest expressed both during the Advance Interviews and at the Strategic Visioning Retreat about establishing a more formalized Vision Statement versus just the use of the current City Tag Line *"The Ormond Beach Way."*

The following themes were suggested by the Commission as possible components in a new City Vision Statement:

- *Clean, safe city; first class services; recreational assets; and opportunities for all ages, opportunity for high-paying jobs for future generations to stay in Ormond Beach*
- *Pushing ahead/forward; prospering; smart and balanced growth; innovation*
- *Community legacy; multi-generational residents; footprints for future generations*
- *Quaint; friendly; small town; beautiful*
- *Economic Development*
- *Quality of Life*
- *Coastline/Sustainability*
- *Diversity*

As a result of the discussion and feedback, the following new Vision Statement was proposed:

*"Recognized as one of Florida's most attractive, safe, fiscally responsive, and desirable coastal communities by protecting our rich history, preserving our distinctive small-town charm, and cultivating natural environments, recreational spaces, and economic opportunities."*

## ORMOND BEACH'S MISSION STATEMENT

A Mission Statement should provide the organization's purpose and objectives in the present, i.e., *the what and how*. The Mission Statement describes what you do, who you do it for and the benefit that it provides and should be consistent over the life of the Strategic Plan.

The following represent the City's current Mission Statement:

*"To ensure Ormond Beach is one of the most attractive, stimulating and innovative communities in Florida, while protecting our rich history and maintaining our unique charm. Boasting an environment where our children can thrive, with a prosperously diverse and balanced economy, within a fiscally strong community. All the while, delivering exceptionally responsive service to our citizens and cultivating the highest quality of life."*

The following themes were discussed and/or suggested regarding possible changes to the City's Mission Statement:

- *OK – but could combine some parts into a Vision Statement*
- *A little long, but good stuff*
- *Ormond Beach is not very diverse.*
- *Fiscally responsible, attractive, unique charm, quality, and responsive services (customer service)*
- *OK as is*
- *Mission Statement sounds a bit redundant and too long/wordy – but gets the points correct.*
- *Fiscally responsive should be included in the Vision Statement*

As a result of the discussion and feedback, the following new Mission Statement was proposed:

*"Delivering exceptionally responsive city services to our residents, businesses, and visitors that fosters a welcoming and prosperous environment and creates the highest quality of life for current and future generations."*

## ORMOND BEACH'S ORGANIZATIONAL VALUES

Organizational Values are typically utilized by the City Commission, staff, and its advisors in its interactions with residents, customers, visitors, and other stakeholders in the carrying out of its services and programs. Organizational Values should be revisited from time to time but rarely change significantly once they are adopted to ensure the culture of the organization becomes ingrained in all its employees and their actions.

The City Commission felt that it should develop and adopt City Organizational Values, with the following themes reflected in both the Advance Interviews and during the Retreat:

- *Integrity, Empowerment, honesty, transparency*
- *Preserve our history, Outstanding Parks & Recreation (Athletics & Youth Sports), Friendly, Quality of Life services, Safety - look out for one another, Environmental Focus*
- *Customer Service, Transparent, fiscally responsible*
- *Technology, Transparency*
- *Respect, Responsiveness, Advocacy for Constituents, Resiliency*

Based on the feedback and discussion, SGR proposed that the following Organizational Values and accompanying Statements be considered by the Commission for adoption:

- **Integrity:** *We hold ourselves accountable to the highest ethical standards in all aspects of work.*

- **Customer Service:** *We deliver exceptional customer service through professional engagement and compassion for those we serve.*

- **Resilient:** *We strive for preparedness in emergency planning, assessing future needs, and preserving natural resources by incorporating sustainability and resilience in the design and operation of our facilities, infrastructure, programs, services, and development standards.*

- ***Transparency:*** *We are committed to building and maintaining trust in one another and with our community through continued public engagement and open communication.*

- ***Responsive:*** *We prioritize delivering timely, thoughtful service that reflects the needs of those who live, work, and visit Ormond Beach.*

- ***Innovative:*** *We continuously seek new ideas and better ways to serve our community by balancing fiscal responsibility with forward-thinking solutions that strengthen Ormond Beach for generations to come.*

- **Empowerment:** *We foster a culture of trust and accountability where every employee is encouraged to lead, collaborate, and find smart, community-first solutions that deliver meaningful results.*

# Strategic Plan Pillars & Statements, and Current/Proposed Goals & Priorities

The City used various Pillars in its current Strategic Plan with accompanying statements and Priorities which were reviewed as part of the new Strategic Visioning & Plan Project. The following section will review the current Pillars, Statements, and Priorities and outline the revised Pillars, Statements, Goals, and Priorities that were developed in the 2025 Strategic Visioning & Plan Project.

## Current Transportation & Community Development Pillar:

**Current Statement:** *"To ensure the charm and rich history of our community is well-maintained through orderly development and redevelopment utilizing existing infra-structure, including utility service areas outside the City's municipal boundaries."*

**Current Key Priorities:**

- Determine the best redevelopment option for church property and enhance temporary use and signage
- Update airport operations, including noise abatement
- Encourage ER/medical presence on the beachside
- Encourage ER/medical presence on the beachside
- US-1 and I-95 Interchange construction
- Look at Vision Zero FDOT pledge (ped/car safety)

## Proposed Transportation & Community Development Current Pillar:

The Commission affirmed the current Transportation & Community Development Pillar Statement.

**Proposed Key Goals & Priorities:**

- ***T&CD 1:*** *Pursue the development of multi-modal trail connectivity to historical, cultural, business, residential, recreational, and other points of interests both within Ormond Beach and with neighboring regional trails.*

    - **T&CD 1.1:** Trail connectivity to Penland Property conservation land.

    - **T&CD 1.2:** Trail connectivity along the Halifax River to US 1 and to the I-95 interchange with connectivity to Ormond Scenic Loop and Trail.

    - **T&CD 1.3:** Work with Volusia County to expand Beach Street Trail and connect A1A to Volusia County Trails through Ormond Beach.

    - **T&CD 1.4:** Multi-modal pathway to Ormond Crossing development.

- ***T&CD 2:*** *Improve City gateway corridors entry features to convey a sense of arrival in Ormond Beach.*

    - **T&CD 2.1:** Underground utilities along US 1, North Beach Street, around US 1 & I-95 interchange.

- ***T&CD 3:*** *Improve East-West connectivity of the City's transportation systems.*

    - **T&CD 3.1:** Explore construction of new bridge spanning the Halifax River.

- ***T&CD 4:*** *Engage with the Florida Department of Transportation (FDOT) to ensure Ormond Beach's input into the design and aesthetics of the new US-1 and I-95 Interchange as the entranceway to our community.*

- ***T&CD 5:*** *Explore cost effective measures with the Building and Community Development Departments that could result in improvements to Ormond Beach's current CRS 5 rating to attain benefits of reduced insurance costs for our residents and businesses.*

## CURRENT ECONOMIC DEVELOPMENT PILLAR:

**Current Statement:** *"To ensure the economic health and vitality of the City of Ormond Beach by providing an environment allowing businesses to thrive through retention, expansion, and attraction."*

**Current Priorities:**

- Reuse or repurpose Riverbend property
- Continue attracting and retaining high-wage jobs and the development of Ormond Crossings

## PROPOSED ECONOMIC DEVELOPMENT PILLAR:

The Commission affirmed the current Economic Development Pillar Statement.

**Proposed Goals *(italicized)* & Priorities (Sub-Bullets):**

- ***ED 1:*** *Encourage a diversified economic base, which provides for the City's long-term economic health and quality of life.*
    - **ED 1.1:** Reuse or repurpose Riverbend property.
    - **ED 1.2:** Continue to invest in attracting and retaining high-wage jobs.
    - **ED 1.3:** Continue the development of Ormond Crossings**.**
- ***ED 2:*** *Promote and protect Ormond Beach's Historic Downtown to ensure its economic vitality.*
- ***ED 3:*** *Actively promote the value of the Municipal Airport and pursue improvements that maximize its use and economic/business contributions to the City.*
    - **ED 3.1:** Pursue the upgrade or replacement of the existing Fixed Base Operator (FBO) Building to provide improved welcoming appearance and safety for patrons.
    - **ED 3.2:** Consider the expansion of the Airport's runway to 4,500 – 5,000 feet to accommodate more corporate use.
    - **ED 3.3:** Investigate the need for additional hangars at the Airport.
    - ***ED 4:*** *Actively consider Community Redevelopment Authority (CRA) projects in both the Granda and Ormond Crossings Districts to spur development/redevelopment and associated investment.*

## CURRENT GOVERNANCE PILLAR:

**Current Statement:** *"To build and maintain strong governance practices internally and externally through continued civic engagement efforts with residents, effective management and operational policies, and strategic partnerships with other governments and agencies to support the city's directions."*

**Current Priorities:**

- Upgrade City Commission chambers technology (online listening for meetings, microphones, monitors, podium, electronic voting/commission request to speak)
- Electronic information sign for upcoming events
- Website redesign
- Develop a Citizen's Academy

## PROPOSED GOVERNANCE PILLAR:

The Commission affirmed the current Governance Pillar Statement.

**Proposed Goals *(italicized)* & Priorities (Sub-Bullets):**

- ***GOV 1:*** *Strive to achieve the public's trust through honest, transparent, respectful, and equitable behavior in conducting City business.*

- **GOV 1.1:** Develop a Mayor & City Commission Norms & Procedures Policy

- ***GOV 2:*** *Provide citizen education and engagement processes to assist in the community's decision-making in policies, ordinances, and programs.*
  - **GOV 2.1:** Continue Chamber partnership for Youth Leadership Program and Student Government Day to encourage future leaders in Ormond Beach.
  - **GOV 2.2:** Continue Citizen's Academy.

- ***GOV 3:*** *Attract, develop, and support the best talent for Ormond Beach to be recognized as an Employer of Choice.*

- ***GOV 4:*** *Provide convenient, modern, and technologically advanced municipal services to improve efficiencies and accessibility of services to both internal and external customers.*
  - ***GOV 4.1:*** Purchase an electronic information sign to promote upcoming events.
  - ***GOV 4.2:*** Complete the City website redesign and other technology upgrades.

- ***GOV 5:*** *Advocate Ormond Beach's Goals and Priorities and promote related regional action through active participation in intergovernmental relations and partner agencies.*

## CURRENT PUBLIC SAFETY PILLAR:

**Current Statement:** *"To provide a safe and secure city that maintains a sense of security and responsiveness for all residents by protecting and serving our community through the provision of effective, efficient and responsive emergency services."*

**Current Priorities:**

- New Police Department and EOC West of town
- Convert city parking lots to LED
- Review and look at the DARE program and other programs
- Develop an aggressive dog ordinance

## PROPOSED PUBLIC SAFETY PILLAR:

**Proposed Statement:** *"To provide a safe and secure community with effective, efficient and responsive emergency services, staffing, and infrastructure."*

**Proposed Goals *(italicized)* & Priorities (Sub-Bullets):**

- ***PS 1:*** *Provide efficient, effective staffing to ensure a high level of services and response times for Public Safety services.*
  - **PS 1.1:** Evaluate compensation, benefits, and training programs that enhance recruitment, retention, and succession planning in a competitive market.
  - **PS 1.2:** Encourage collaboration with drug/alcohol treatment providers and Narcan/Safety measures in response to affected populations.

- **PS 1.3:** Mental wellness signage and resources on the website/first responder assistance.
- **PS 1.4:** Maintain DARE program and other youth outreach programs.

- ***PS 2:*** *Strive to maintain one of the lowest crime rates among comparable cities.*
- ***PS 3:*** *Ensure the physical security of City assets and operations.*
  - **PS 3.1:** Pursue the relocation of the Police Department, Emergency Operations Center (EOC), and the Public Works Facility from their current flood zone locations.
  - **PS 3.2:** Convert city parking lots to LED.
- ***PS 4:*** *Explore measures with the Fire & Utilities Departments that could result in improvements to Ormond Beach's current ISO #3 rating to attain benefits of reduced insurance costs for our residents and businesses.*
- ***PS 5:*** *Consider enhancements to City's property maintenance Codes to achieve a higher adherence to community standards in support of beautifying Ormond Beach.*
- ***PS 6:*** *Consider options including dialogue with churches and social service providers, establishment of Task Force, ordinances, regulations, and other measures to mitigate the impact of homelessness in Ormond Beach.*

## CURRENT QUALITY OF LIFE PILLAR:

**Current Statement:** *"To ensure Ormond Beach remains the crown jewel of central Florida, by providing for the quality, quantity and variety of passive and active recreation areas and facilities to serve the needs of our community."*

**Current Priorities:**

- Historical museum (centralized in one building) and provide a 50-year lease
- Complete Doug Thomas Way
- Maintain lights downtown and add bridge uplighting
- Rehab Chief Tomokie statue
- Mental wellness signage and resources on the website/first responder assistance

## PROPOSED QUALITY OF LIFE PILLAR:

The Commission affirmed the current Quality of Life Pillar Statement.

**Proposed Goals *(italicized)* & Priorities (Sub-Bullets):**

- ***QoL 1:*** *Recognized as a leader in Parks & Recreation through the offering of diverse, high-quality parks and natural spaces.*
  - **QoL 1.1:** Explore improved field lighting in sports fields and recreational facilities.

        - Specific need behind Nova Rec to Nova Road on north side & Parking lot lighting of Softball Quad.

    - **QoL 1.2:** Desire to have U.S. National Anthem played at start of every game.

- ***QoL 2:*** *Improve the attraction and beautification of Ormond Beach by supporting the placement of public art, community gateway planting/landscaping, and lighting of bridge.*

    - **QoL 2.1:** Develop policies and collaborate with partner agencies to enhance the beautification of the US 1 Corridor.

    - **QoL 2.2:** Continue to work with Volusia County and citizen groups to promote and enhance North Beach Street/Scenic Loop and Trail.

    - **QoL 2.3:** Continue to pursue and promote new Public Art projects in Downtown/Main Street.

    - **QoL 2.4:** Maintain downtown lights and add bridge uplighting.

    - **QoL 2.5:** Support the rehabilitation of Chief Tomokie statue.

- ***QoL 3:*** *Consider the development of additional facilities for public programs and community gatherings/events.*

    - **QoL 3.1:** Determine the best redevelopment option for the former Church property located at 56 N. Beach St.

    - **QoL 3.1:** Plan for future needs of East and West Ormond Beach Community Centers/Venues.

    - **QoL 3.2:** Consider options to return community programs in Downtown Ormond Beach.

    - **QoL 3.3:** Establish Founder's Day as a community flagship event.

- ***QoL 4:*** *Pursue the expansion of recreation fields in Ormond Beach and prioritize the projects in the City's current Park & Recreation Master Plan for funding and development.*

## CURRENT WATER QUALITY & THE ENVIRONMENT PILLAR:

**Current Statement:** *"To maintain the City's environmental stewardship by reducing negative impacts of pollutants to waterbodies, such as the Halifax and Tomoka Rivers and their tributaries that decrease the quality of life of Ormond Beach residents."*

**Current Priorities:**

- Expand reclaimed water system and reuse pond out West
- Continue septic to sewer conversion starting within the city limits to decrease effluent to the Halifax River

- Enhance commitment to reducing the use of plastic straws / bags / Styrofoam

### PROPOSED WATER QUALITY & THE ENVIRONMENT PILLAR:

**Proposed Statement:** *"To advance the City's environmental stewardship through projects and outreach promoting water quality, stormwater management, and recycling."*

**Proposed Goals *(italicized)* & Priorities (Sub-Bullets):**

- ***WQ&E 1:*** *Protect and enhance our environment and invest in infrastructure projects and assets that build resilience benefits to reduce flooding risk and increase sustainability.*
    - **WQ&E 1.1:** Reduce the impacts of localized stormwater flooding through the prioritization of key projects in the Stormwater Master Plan and through pre-storm mitigations activities.
- ***WQ&E 2:*** *Advocate for projects that can improve the overall quality of Ormond Beach's water bodies.*
    - **WQ&E 2.1:** Expand reclaimed water system and reuse pond out West.
    - **WQ&E 2.2:** Continue effort of septic to sewer conversions in Magnolia, Oak, and Bonita targeted areas on the mainland.
    - **WQ&E 2.3:** Evaluate the possible benefits of a new Federal inlet north of Highbridge to improve the water quality of the Halifax River.
- ***WQ&E 3:*** *Promote the value of the City's recycling program to reduce the impact of the waste stream sent to the landfill.*
    - **WQ&E 3.1:** Enhance commitment to reducing the use of plastic straws/bags/styrofoam.
- ***WQ&E 4:*** *Consider the establishment of a Protective Wildlife Corridor.*

## Review of Strategic Plan & Prioritization Process

Following the March 12th & 13th Retreat, SGR & Staff finalized the Draft Strategic Vision Report and developed a Prioritization Survey for the Mayor & City Commission to provide Staff with a better sense of the Governing Body's Priorities. The Prioritization Survey involved proposed Goals & Priorities/Projects that were discussed at the March 12th & 13th Retreat to provide Staff with further direction on how to best prioritize the tracking of the Mayor & City Commission's Priorities.

The Mayor & Commission met again at a Workshop on May 5, 2025, to review the proposed wording of revised Vision, Mission, and Organizational Values, followed by the review and discussion of the results of the Mayor & City Commission 's Prioritization Survey of proposed Goals & Priorities. The following represents the final outcomes from the Prioritization Survey results with Goals & Priorities ranked from highest to lowest under each Pillar, coupled with other final changes that were advanced by the Mayor & City Commission at the Workshop which collectively represent the City's new Strategic Plan.

## Vision Statement

***"RECOGNIZED AS ONE OF FLORIDA'S MOST ATTRACTIVE, SAFE, FISCALLY RESPONSIBLE, AND DESIRABLE COASTAL COMMUNITIES BY PROTECTING OUR RICH HISTORY, PRESERVING OUR DISTINCTIVE SMALL-TOWN CHARM, AND CULTIVATING NATURAL ENVIRONMENTS, RECREATIONAL SPACES, AND ECONOMIC OPPORTUNITIES."***

## Mission Statement

***"DELIVERING EXCEPTIONALLY RESPONSIVE CITY SERVICES TO OUR RESIDENTS, BUSINESSES, AND VISITORS THAT FOSTERS A WELCOMING AND PROSPEROUS ENVIRONMENT AND CREATES THE HIGHEST QUALITY OF LIFE FOR CURRENT AND FUTURE GENERATIONS."***

## Organizational Values

- **Integrity:** *We hold ourselves accountable to the highest ethical standards in all aspects of work.*
- **Customer Service:** *We deliver exceptional customer service through professional engagement and compassion for those we serve.*
- **Resilient:** *We strive for preparedness in emergency planning, assessing future needs, and preserving natural resources by incorporating sustainability and resilience in the design and operation of our facilities, infrastructure, programs, services, and development standards.*
- ***Transparency:*** *We are committed to building and maintaining trust in one another and with our community through continued public engagement and open communication.*
- ***Responsive:*** *We prioritize delivering timely, thoughtful service that reflects the needs of those who live, work, and visit Ormond Beach.*
- ***Innovative:*** *We continuously seek new ideas and better ways to serve our community by balancing fiscal responsibility with forward-thinking solutions that strengthen Ormond Beach for generations to come.*
- **Empowerment:** *We foster a culture of trust and accountability where every employee is encouraged to lead, collaborate, and find smart, community-first solutions that deliver meaningful results.*

## Transportation & Community Development Pillar

**"TO ENSURE THE CHARM AND RICH HISTORY OF OUR COMMUNITY IS WELL-MAINTAINED THROUGH RESPONSIBLE DEVELOPMENT/REDEVELOPMENT THROUGH THE PROVISION OF INFRASTRUCTURE TO MEET CURRENT AND FUTURE NEEDS."**

## Goals *(italicized)* & Priorities (Sub-Bullets):

- ***T&CD 1:*** *Engage with the Florida Department of Transportation (FDOT) to ensure Ormond Beach's input into the design and aesthetics of the new US-1 and I-95 Interchange as the entranceway to our community.*

- ***T&CD 2:*** *Improve City gateway corridors entry features to convey a sense of arrival in Ormond Beach.*

    - **T&CD 2.1:** Underground utilities along US 1, North Beach Street, around US 1 & I-95 interchange.

- ***T&CD 3:*** *Pursue the development of multi-modal trail connectivity to historical, cultural, business, residential, recreational, and other points of interests both within Ormond Beach and with neighboring regional trails.*

    - **T&CD 3.1:** Trail connectivity to Penland Property conservation land.

    - **T&CD 3.2:** Work with Volusia County to expand Beach Street Trail and connect A1A to Volusia County Trails through Ormond Beach.

    - **T&CD 3.3:** Trail connectivity along the Halifax River to US 1 and to the I-95 interchange with connectivity to Ormond Scenic Loop and Trail.

- ***T&CD 4:*** *Explore cost effective measures with the Building and Community Development Departments that could result in improvements to Ormond Beach's current CRS 5 rating to attain benefits of reduced insurance costs for our residents and businesses.*

# Economic Development Pillar

**"TO ENSURE THE ECONOMIC HEALTH AND VITALITY OF THE CITY OF ORMOND BEACH BY PROVIDING AN ENVIRONMENT ALLOWING BUSINESSES TO THRIVE THROUGH RETENTION, EXPANSION, AND ATTRACTION."**

## Goals (italicized) & Priorities (Sub-Bullets):

- ***ED 1:*** *Actively consider Community Redevelopment Authority (CRA) projects in both the Granda and Ormond Crossings Districts to spur development/redevelopment and associated investment.*

- ***ED 2:*** *Promote and protect Ormond Beach's Historic Downtown to ensure its economic vitality.*

- ***ED 3:*** *Actively promote the value of the Municipal Airport and pursue improvements that maximize its use and economic/business contributions to the City.*

    - **ED 3.1:** Pursue the upgrade or replacement of the existing Fixed Base Operator (FBO) Building to provide improved welcoming appearance and safety for patrons.

    - **ED 3.2:** Consider the expansion of the Airport's runway to 4,500 – 5,000 feet to improve safety for existing and new patrons of the facility.

- **ED 3.3:** Investigate the need for additional hangars at the Airport.

- ***ED 4:*** *Encourage a diversified economic base, which provides for the City's long-term economic health and quality of life.*

  - **ED 4.1:** Continue to invest in attracting and retaining high-wage jobs

  - **ED 4.2:** Reuse or repurpose Riverbend property.

## Governance Pillar

**"TO BUILD AND MAINTAIN STRONG GOVERNANCE PRACTICES INTERNALLY AND EXTERNALLY THROUGH CONTINUED CIVIC ENGAGEMENT EFFORTS WITH RESIDENTS, EFFECTIVE MANAGEMENT AND OPERATIONAL POLICIES, AND STRATEGIC PARTNERSHIPS WITH OTHER GOVERNMENTS AND AGENCIES TO SUPPORT THE CITY'S DIRECTIONS."**

### Goals (italicized) & Priorities (Sub-Bullets):

- ***GOV 1:*** *Strive to achieve the public's trust through honest, transparent, respectful, and equitable behavior in conducting City business.*

  - **GOV 1.1:** Develop a Mayor & City Commission Norms & Procedures Policy

- ***GOV 2:*** *Attract, develop, and support the best talent for Ormond Beach to be recognized as an Employer of Choice.*

- ***GOV 3:*** *Provide convenient, modern, and technologically advanced municipal services to improve efficiencies and accessibility of services to both internal and external customers.*

- ***GOV 4:*** *Advocate Ormond Beach's Goals and Priorities and promote related regional action through active participation in intergovernmental relations and partner agencies.*

- ***GOV 5:*** *Provide citizen education and engagement processes to assist in the community's decision-making in policies, ordinances, and programs.*

  - **GOV 5.1:** Continue Citizen's Academy.

  - ***GOV 5.2:*** Complete the City website redesign and other technology upgrades.

  - **GOV 5.3:** Continue Chamber partnership for Youth Leadership Program and Student Government Day to encourage future leaders in Ormond Beach.

## Public Safety Pillar

***"TO PROVIDE A SAFE AND SECURE COMMUNITY WITH EFFECTIVE, EFFICIENT AND RESPONSIVE EMERGENCY SERVICES, STAFFING, AND INFRASTRUCTURE."***

## Goals (italicized) & Priorities (Sub-Bullets):

- ***PS 1:*** *Provide efficient, effective staffing to ensure a high level of services and response times for Public Safety services.*
    - **PS 1.1:** Evaluate compensation, benefits, and training programs that enhance recruitment, retention, and succession planning in a competitive market.
    - **PS 1.2:** Maintain DARE program and other youth outreach programs.
    - **PS 1.3**: Mental wellness signage and resources on the website/first responder assistance.
    - **PS 1.4:** Encourage collaboration with drug/alcohol treatment providers and Narcan/Safety measures in response to affected populations.
- ***PS 2:*** *Strive to maintain one of the lowest crime rates among comparable cities.*
- ***PS 3:*** *Consider options including dialogue with churches and social service providers, establishment of Task Force, ordinances, regulations, and other measures to mitigate the impact of homelessness in Ormond Beach.*
- ***PS 4:*** *Ensure the physical security of City assets and operations.*
    - **PS 4.1:** Pursue the relocation of the Police Department, Emergency Operations Center (EOC), and the Public Works Facility from their current flood zone locations.
    - **PS 4.2:** Pursue the conversion of city outdoor lighting fixtures to LED.
- ***PS 5:*** *Consider enhancements to City's property maintenance Codes to achieve a higher adherence to community standards in support of beautifying Ormond Beach.*
- ***PS 6:*** *Explore measures with the Fire & Utilities Departments that could result in improvements to Ormond Beach's current ISO #3 rating to attain benefits of reduced insurance costs for our residents and businesses.*

# Quality of Life Pillar

***"TO ENSURE ORMOND BEACH REMAINS THE CROWN JEWEL OF CENTRAL FLORIDA, BY PROVIDING FOR THE QUALITY, QUANTITY AND VARIETY OF PASSIVE AND ACTIVE RECREATION AREAS AND FACILITIES TO SERVE THE NEEDS OF OUR COMMUNITY."***

## Goals (italicized) & Priorities (Sub-Bullets):

- ***QoL 1:*** *Pursue the expansion of recreation fields in Ormond Beach and prioritize the projects in the City's current Park & Recreation Master Plan for funding and development.*

- ***QoL 2:*** *Recognized as a leader in Parks & Recreation through the offering of diverse, high-quality parks and natural spaces.*
    - **QoL 2.1:** Desire to have U.S. National Anthem played at start of every game.
    - **QoL 2.2:** Explore improved field lighting in sports fields and recreational facilities.
        - Specific need behind Nova Rec to Nova Road on north side & Parking lot lighting of Softball Quad.
- ***QoL 3:*** *Consider the development of additional facilities for public programs and community gatherings/events.*
    - **QoL 3.1:** Determine the best redevelopment option for the former Church property located at 56 N. Beach St.
    - **QoL 3.2:** Establish Founder's Day as a community flagship event.
    - **QoL 3.3:** Plan for future needs of East and West Ormond Beach Community Centers/Venues.
- ***QoL 4:*** *Improve the attraction and beautification of Ormond Beach by supporting the placement of public art, community gateway planting/landscaping, and lighting of bridge.*
    - **QoL 4.1:** Develop policies and collaborate with partner agencies to enhance the beautification of the US 1 Corridor.
    - **QoL 4.2:** Continue to work with Volusia County and citizen groups to promote and enhance North Beach Street/Scenic Loop and Trail.
    - **QoL 4.3:** Continue to pursue and promote new Public Art projects in Downtown/Main Street.
    - **QoL 4.4:** Maintain downtown seasonal lights and add bridge uplighting.
    - **QoL 4.5:** Verbally support the rehabilitation of Chief Tomokie statue.

## Water Quality & The Environment Pillar

***"TO ADVANCE THE CITY'S ENVIRONMENTAL STEWARDSHIP THROUGH PROJECTS AND OUTREACH PROMOTING WATER QUALITY, STORMWATER MANAGEMENT, AND RECYCLING."***

### Proposed Goals (italicized) & Priorities (Sub-Bullets):

- ***WQ&E 1:*** *Protect and enhance our environment and invest in infrastructure projects and assets that build resilience benefits to reduce flooding risk and increase sustainability.*

- **WQ&E 1.1:** Reduce the impacts of localized stormwater flooding through the prioritization of key projects in the Stormwater Master Plan and through pre-storm mitigations activities.

- ***WQ&E 2:*** *Advocate for projects that can improve the overall quality of Ormond Beach's water bodies.*
  - **WQ&E 2.1:** Expand reclaimed water system and reuse pond out West.
  - **WQ&E 2.2:** Continue effort of septic to sewer conversions in Magnolia, Oak, and Bonita targeted areas on the mainland.
  - **WQ&E 2.3:** Evaluate the possible benefits of a new Federal inlet north of Highbridge to improve the water quality of the Halifax River.
- ***WQ&E 3:*** *Promote the value of the City's recycling program to reduce the impact of the waste stream sent to the landfill.*
- ***WQ&E 4:*** *Consider the establishment of a Protective Wildlife Corridor.*

## CLOSING COMMENTS

The City of Ormond Beach is to be congratulated for building upon its previous year's efforts to refine their strategic planning process to better articulate and track the community's strategic direction for the upcoming years. The City's Strategic Plan is like a GPS navigation system, where the destination is identified at the front end (Vision), the mode in which you desire to travel such as expressways, toll roads, etc. (Mission & Values) provide direction; and your waypoints, stops, and sights along the way (Pillars) ensure that you are attaining the important reasons behind the journey. That said, just as the GPS navigation system will offer options and detours based upon traffic, construction, and/or accidents to allow the successful navigation around unforeseen issues at the start of the journey, the City's Strategic Plan is developed at a moment in time based upon the best information that is available during its creation and adoption. The City of Ormond Beach will without doubt encounter economic challenges, state, and federal legislation, changing public service expectations, and other factors which will impact the final approved Strategic Plan, which will require adjustments from time to time as the community embarks on its journey to achieve its desired vision.

In future years, SGR recommends that Actionable Items and/or Key Success Indicators (KSI's) be developed for each Priority so that the organization and the community has a clear understanding on the progress of the desired results as expressed by the Mayor & Commission, along with assigning responsible Departments and action steps to track each Priority in the maturation of the City's Strategic Planning process.

Strategic Government Resources is pleased and honored to assist the City of Ormond Beach with the revised Strategic Visioning and Planning Project, and we look forward to following your progression as you embark on this exciting journey!

| **Recommended Action** | Staff recommends approval of the attached resolution adopting the 2025 updated LMS. | | |
| **Strategic Goal** | Quality of Life - Other | | |
| **Department Staff Contact** | Finance - Grants<br>Loretta Moisio, Grants Coordinator | | |

Summary

In 1998, the Volusia County Local Mitigation Strategy was implemented in order to make Volusia County a more disaster resistant community. Since that time, the City has been a participant of this initiative. The working group for the strategy is called the *Volusia Prepares LMS Working Group*. The State of Florida, Department of Emergency Management, and the Federal Emergency Management Agency (FEMA) requires that Local Mitigation Strategies be updated every five years. The Disaster Mitigation Act of 2000 also requires that such plans be updated as it ties the plans to available grant funding. The Disaster Mitigation Act of 2000 requires active participation from each local jurisdiction in the development and maintenance of a multi-jurisdictional Local Mitigation Strategy in order to be eligible for the Pre-Disaster Mitigation Program (PDM), and Hazard Mitigation Grant Program (HMGP).

The current LMS expires on July 30, 2025, and Volusia County's updated LMS for 2025 has been submitted to and approved by the Florida Department of Emergency Management (FDEM) for compliancy with federal standards. Part of the approval process of the LMS requires that all represented jurisdictions formally adopt the strategy by signed resolution which must be included in the final LMS submission. If not, the jurisdiction is not considered part of the multi-jurisdictional strategy; and, therefore, not eligible to apply for funding from the above mentioned programs.

Financial Impact

None

Citizen Impact

Participation in the multi-jurisdictional Local Mitigation Strategy provides the City with the ability to apply for grants in the Pre-Disaster Mitigation Program (PDM) and Hazard Mitigation Grant Program (HMGP) in order to provide projects within the City that mitigate the effects of disasters on its citizens.

**RESOLUTION NO. 2025-122**

A RESOLUTION SUPPORTING AND ADOPTING THE UPDATED VOLUSIA COUNTY LOCAL HAZARD MITIGATION PLAN; AND SETTING FORTH AN EFFECTIVE DATE.

**WHEREAS,** areas of the City of Ormond Beach are vulnerable to the human and economic costs of natural, technological and societal disasters, and

**WHEREAS,** the City Commission of the City of Ormond Beach, Florida, realizes the importance of reducing or eliminating those vulnerabilities for the overall good and welfare of the community, and

**WHEREAS,** the City of Ormond Beach actively participates in Volusia Prepares, the Local Mitigation Strategy (LMS) working group, which has established a comprehensive, coordinated planning process involving the county and its municipalities, as well as other public and private sector organizations, to eliminate or decrease these vulnerabilities, and

**WHEREAS**, the City's professional staff have identified, justified and prioritized a number of proposed projects and programs needed to mitigate the vulnerabilities of areas of Ormond Beach to the impacts of future disasters, and

**WHEREAS**, the City's professional staff have reviewed the information provided by or for other participating jurisdictions and organizations, including the projects and programs they have proposed for incorporation into the Volusia County Local Mitigation Plan, and

**WHEREAS**, these proposed projects and programs have been incorporated into the current edition of the Volusia County Local Mitigation Plan that has been prepared and issued

for consideration and implementation by the communities and jurisdictions of Volusia County a copy of said Plan being attached hereto and incorporated herein by reference, now therefore,

**BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:**

**SECTION ONE.** The City Commission hereby accepts and approves of its designated portion of the Volusia County Local Mitigation Plan,

**SECTION TWO.** The City Commission accepts and endorses the mitigation goals and objectives established by Volusia Prepares for the countywide plan, and the anticipated schedule for the next updating of the plan.

**SECTION THREE.** The City Commission finds that the proposed mitigation projects and programs included in the plan by other jurisdictions and organizations are acceptable, that they will not adversely affect the City or its neighborhoods, and that they do not conflict with or duplicate the mitigation proposals made by the City itself.

**SECTION FOUR.** The City Manager or her designee is requested and instructed to pursue available funding opportunities for implementation of the proposals designated therein.

**SECTION FIVE.** The City will, upon receipt of such funding or other necessary resources, seek to implement the proposals contained in the City's individual section of the Plan.

**SECTION SIX.** The City will continue to participate in the updating and expansion of the Volusia County Local Mitigation Plan in the years ahead.

**SECTION SEVEN.** The City will further seek to encourage the businesses, industries and community groups operating within Ormond Beach to also participate in the updating and expansion of the Volusia County Local Mitigation Plan in the years ahead.

**SECTION EIGHT.** This Resolution shall take effect immediately upon its adoption.

**APPROVED AND AUTHENTICATED this 22nd day of July, 2025.**

_____
**JASON LESLIE**
Mayor

**ATTEST:**

# SECTION 1 – INTRODUCTION

This section of the Plan provides a general introduction to the Volusia County Multi-Jurisdictional Local Mitigation Strategy (LMS). It consists of the following five subsections:

- **Background**
- **Purpose**
- **Scope**
- **Authority**
- **Summary of Plan Contents**

## 1.1 BACKGROUND

Natural hazards, such as hurricanes, floods and tornadoes, are a part of the world around us. Their occurrence is natural and inevitable, and there is little we can do to control their force and intensity. We must consider these hazards to be legitimate and significant threats to human life, safety and property.

Volusia County, Florida is vulnerable to a wide range of natural hazards, including hurricanes and tropical storms, flooding, tornadoes and wildfires. These hazards threaten the life and safety of county residents and have the potential to damage or destroy both public and private property and disrupt the local economy and overall quality of life of individuals who live, work and vacation in the community.

While the threat from hazardous events may never be fully eliminated, there is much we can do to lessen their potential impact upon our community and our citizens. By minimizing the impact of hazards upon our built environment, we can prevent such events from resulting in disasters. The concept and practice of reducing risks to people and property from known hazards is generally referred to as *hazard mitigation*.

**FEMA Definition of Hazard Mitigation:**
*"Any sustained action taken to reduce or eliminate the long-term risk to human life and property from hazards."*

Hazard mitigation techniques include both structural measures, such as strengthening or protecting buildings and infrastructure from the destructive forces of potential hazards and non-structural measures, such as the adoption of sound land use policies and the creation of public awareness programs. It is widely accepted that the most effective mitigation measures are implemented at the local government level, where decisions on the regulation and control of development are ultimately made. A comprehensive mitigation approach addresses hazard vulnerabilities that exist today and in the foreseeable future. Therefore, it is essential that projected patterns of future development are evaluated and considered in terms of how that growth will increase or decrease a community's overall hazard vulnerability.

As a community formulates a comprehensive strategy to hazard mitigation, a key component is to develop, adopt and update a Local Mitigation Strategy. An LMS/hazard mitigation plan establishes a broad

community vision and guiding principles for reducing hazard risk and further proposes specific mitigation actions to eliminate or reduce identified vulnerabilities. Each of the jurisdictions has adopted the LMS by resolution (**Appendix H**).

The Volusia County Multi-Jurisdictional Local Mitigation Strategy has evolved over the years, as more thoroughly described in Section 2: Planning Process. The Volusia Prepares LMS Working Group (LMS Working Group) has developed Bylaws and Operating Procedures (**Appendix A**) to formalize the LMS update process and working group. The Plan documents and represents the County's and participating local jurisdictions' sustained efforts to incorporate hazard mitigation principles and practices into the routine government activities and functions of Volusia County and its participating jurisdictions and partners. This includes documenting the goals and objectives that Volusia County deems necessary to protect people and property from hazards. At its most inner core, the Plan recommends specific actions to combat hazard vulnerability and protect its residents from losses to those hazards that pose the greatest risk. Actions go beyond recommending micro-level solutions such as elevation, retrofitting and acquisition projects, and address macro-level solutions. Examples of macro-level actions that contribute to reducing the future vulnerability of Volusia County include local policies on community growth and development, incentives for natural resource protection and public awareness and outreach activities. Finally, the Plan is a living document, with implementation, evaluation and update procedures included to help achieve meaningful objectives and successful outcomes over time.

### 1.1.1 Disaster Mitigation Act of 2000

To reduce the Nation's mounting natural disaster losses, the U.S. Congress passed the Disaster Mitigation Act of 2000 (DMA 2000) to amend the Robert T. Stafford Disaster Relief and Emergency Assistance Act. Section 322 of DMA 2000 emphasizes the need for state and local government entities to closely coordinate mitigation planning activities and makes the development of a hazard mitigation plan a specific eligibility requirement for any local government applying for federal mitigation grant funds. These funds include the Hazard Mitigation Grant Program (HMGP) and the Pre-Disaster Mitigation (PDM) program, both of which are administered by the Federal Emergency Management Agency (FEMA) under the Department of Homeland Security. Communities with an adopted and federally approved hazard mitigation plan thereby become pre-positioned and are more apt to receive available mitigation funds before and after the next disaster strikes.

The Volusia County Multi-Jurisdictional LMS has been prepared in coordination with FEMA Region IV and the Florida Division of Emergency Management to ensure that the Plan meets all applicable DMA 2000 and state requirements. A *Local Mitigation Plan Review Crosswalk*, found in **Appendix B**, provides a summary of federal and state minimum standards and notes the location where each requirement is met within the Plan.

## 1.2 PURPOSE

The purpose of the Volusia County Multi-Jurisdictional LMS is to:

- **Provide a comprehensive update to the *Volusia County Local Hazard Mitigation Plan*, as previously amended in 2020, that is compliant with federal and state requirements.**
  - This Plan is intended to assist participating jurisdictions to comply with requirements in order to expedite the response and recovery process. In addition, compliance is often required to obtain state and federal funding for pre-disaster mitigation projects and post-disaster situations. This Plan allows participating jurisdictions to quickly assemble the necessary grant application materials when seeking funding.

- **Provide a methodical, substantive approach to mitigation planning.**
  - The use of a methodical approach ensures that each step in the planning process builds upon the last, resulting in a high level of assurance that proposed mitigation actions have a valid basis.

- **Enhance public awareness and understanding of hazard mitigation planning.**
  - Engaging the public in the local mitigation planning process shapes the goals, objectives and policies in this Plan. Further, it provides a method for educating the public on how to protect themselves from the impacts of hazards.

- **Create a decision tool for management.**
  - This plan provides local managers, leaders and officials with the tools needed to reduce vulnerabilities to future hazard events.

- **Enhance local policies for hazard mitigation capability.**
  - The Capability Assessment found in Section 7 outlines the policies in Volusia County and the participating jurisdictions to reduce hazard vulnerability. Volusia County's participating jurisdictions aim to enhance and create policies to address mitigating the impacts of a hazard if such policies do not exist.

- **Assure inter-jurisdictional coordination of mitigation-related programming.**
  - By creating a Multi-Jurisdictional plan, this Plan ensures coordination of mitigation activities. This ensures that mitigation actions proposed or implemented by one jurisdiction will be compatible with the actions pursued by another.

- **Provide jurisdiction-specific hazard mitigation vulnerability assessments and actions.**
  - The vulnerability of each jurisdiction will be outlaid in the Vulnerability Assessment. Further, each jurisdiction, based on its vulnerability, will have actions to address hazard vulnerability.

## 1.3 SCOPE

The focus of the Volusia County Multi-Jurisdictional LMS is on those hazards deemed to be "high" or "moderate" risk as determined through a detailed hazard risk assessment conducted for Volusia County. Other hazards that pose a "low" or "negligible" risk will continue to be evaluated during future updates to the Plan, but they may not be fully addressed until they are determined to be of high or moderate risk. This enables Volusia County and its participating jurisdictions to prioritize mitigation actions based on those hazards which are understood to present the greatest risk to lives and property.

The geographic scope (i.e., the planning area) for the Plan includes all areas within the unincorporated jurisdiction of Volusia County and the participating incorporated municipalities: Daytona Beach, Daytona Beach Shores, DeBary, DeLand, Deltona, Edgewater, Holly Hill, Lake Helen, New Smyrna Beach, Oak Hill, Orange City, Ormond Beach, Pierson, Ponce Inlet, Port Orange and South Daytona. In addition, other entities, such as the Volusia County School District, Halifax Medical Center, various Advent Health locations, American Red Cross and the Daytona Beach International Airport participated in the planning process. See Section 2 for a full list of participating entities.

## 1.4 AUTHORITY

The Volusia County Multi-Jurisdictional LMS has been developed in accordance with current state and federal rules and regulations governing local hazard mitigation plans and has been adopted by Volusia County and its participating jurisdictions and partners in accordance with standard local procedures. The Plan shall be routinely monitored and revised to maintain compliance with the following provisions, rules and legislation:

- Section 322, Mitigation Planning, of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as enacted by Section 104 of the Disaster Mitigation Act of 2000 (P.L. 106-390); and
- FEMA's Interim Final Rule published in the Federal Register on February 26, 2002, at 44 CFR Part 201.

## 1.5 SUMMARY OF PLAN CONTENTS

The contents of this Plan are designed and organized to be as reader-friendly and functional as possible. While significant background information is included in the processes used and studies completed (i.e., risk assessment, capability assessment), this information is separated from the more meaningful planning outcomes or actions (i.e., mitigation strategy, mitigation action plans).

Section 2: ***Planning Process***, provides a complete narrative description of the process used to prepare the Plan. This includes the identification of who was involved, who participated on the planning team, and how the public and other stakeholders were involved. It also includes a detailed summary for each of the key meetings held along with any associated outcomes.

The ***Community Profile***, located in Section 3, describes the general makeup of Volusia County, including prevalent geographic, demographic and economic characteristics. In addition, building characteristics and land use patterns are discussed. This baseline information provides a snapshot of the planning area and thereby assists local officials recognize those social, environmental and economic factors that ultimately play a role in determining community vulnerability to hazards.

The Risk Assessment is presented in three sections: Section 4: ***Hazard Identification***; Section 5: ***Hazard Profiles***; and Section 6: ***Vulnerability Assessment***. Together, these sections serve to identify, analyze and assess the overall risk posed to Volusia County and the participating jurisdictions from hazards. The risk assessment also attempts to define any hazard risks that may uniquely or exclusively affect specific areas of Volusia County or its participating jurisdictions and partners.

The ***Capability Assessment***, found in Section 7, provides a detailed analysis of the capacity in Volusia County and the participating jurisdictions to implement meaningful mitigation strategies and identifies existing opportunities to increase and enhance that capacity. Specific capabilities addressed in this section include planning and regulatory capability, staff and organizational (administrative) capability, technical capability, fiscal capability and political capability.

The ***Community Profile, Risk Assessment*** and ***Capability Assessment*** collectively serve as a basis for determining the goals for the Volusia County Multi-Jurisdictional LMS, each contributing to the development, adoption and implementation of a meaningful and manageable *Mitigation Strategy* that is based on accurate background information.

The ***Mitigation Strategy***, found in Section 8, consists of broad countywide goal statements as well as an analysis of hazard mitigation techniques for Volusia County and its participating jurisdictions and partners to consider in reducing hazard vulnerabilities. The Strategy provides the foundation for a detailed ***Mitigation Action Plan***, found in Section 9, which links specific mitigation actions for each County department or agency to locally assigned implementation mechanisms and target completion dates. Together, these sections are designed to make the Plan both strategic (through the identification of long-term goals) but also functional through the identification of short-term and immediate actions that will guide day-to-day decision-making and project implementation.

In addition to the identification and prioritization of possible mitigation projects, emphasis is placed on the use of program and policy alternatives to help make Volusia County and the participating jurisdictions less vulnerable to the damaging forces of hazards while improving the economic, social and environmental health of the community. The concept of multi-objective planning was emphasized throughout the planning process, particularly in identifying ways to link, where possible, hazard mitigation policies and programs with complimentary community goals related to disaster recovery, housing, economic development, recreational opportunities, transportation improvements, environmental quality, land development and public health and safety.

Section 10: ***Plan Maintenance Procedures*** includes the measures that Volusia County and the participating jurisdictions will take to ensure the Plan's continuous long-term implementation. The procedures also include the manner in which the Plan will be regularly evaluated and updated to remain a current and meaningful planning document.

# SECTION 2 – PLANNING PROCESS

**44 CFR Requirement**

***44 CFR Part 201.6(c)(1):*** The plan shall include documentation of the planning process used to develop the plan, including how it was prepared, who was involved in the process and how the public was involved.

This section describes the planning process undertaken by Volusia County in the development of the 2025 Multi-jurisdictional Local Mitigation Strategy. It consists of the following six subsections:

- **Overview of Hazard Mitigation Planning**
- **History of Hazard Mitigation Planning in Volusia County**
- **Preparing the 2025 Plan**
- **The Volusia Prepares Local Mitigation Strategy Working Group**
- **Community Meetings and Workshops**
- **Involving the Public and Identified Stakeholders**

## 2.1 OVERVIEW OF HAZARD MITIGATION PLANNING

Local hazard mitigation planning is the process of organizing community resources, identifying and assessing hazard risks and determining how to best minimize or manage those risks. This process results in a hazard mitigation plan that identifies specific mitigation actions, each designed to achieve both short-term planning objectives and a long-term community vision.

To ensure the functionality of a hazard mitigation plan, responsibility is assigned for each proposed mitigation action to a specific individual, department or agency along with a schedule or target completion date for its implementation. Plan maintenance procedures are established for the routine monitoring of implementation progress, as well as the evaluation and enhancement of the mitigation plan itself. These plan maintenance procedures ensure that the plan remains a current, dynamic and effective planning document over time that becomes integrated into the routine local decision-making process.

Mitigation planning offers many benefits, including:

- **Saving lives and property**
- **Saving money**
- **Speeding recovery following disasters**
- **Reducing future vulnerability through wise development and post-disaster recovery and reconstruction**
- **Expediting the receipt of pre-disaster and post-disaster grant funding**
- **Demonstrating a firm commitment to improving community health and safety**

Typically, mitigation planning is described as having the potential to produce long-term and recurring benefits by breaking the repetitive cycle of disaster loss. A core assumption of hazard mitigation is that

the investments made before a hazard event will significantly reduce the demand for post-disaster assistance by lessening the need for emergency response, repair, recovery and reconstruction. Furthermore, mitigation practices will enable local residents, businesses and industries to re-establish themselves in the wake of a disaster, getting the community economy back on track sooner and with less interruption.

The benefits of mitigation planning go beyond solely reducing hazard vulnerability. Measures such as the acquisition or regulation of land in known hazard areas can help achieve multiple community goals, such as preserving open space, maintaining environmental health and enhancing recreational opportunities. Thus, it is vitally important that any local mitigation planning process be integrated with other concurrent local planning efforts, and any proposed mitigation strategies must consider other existing community goals or initiatives that will help complement or hinder their future implementation.

## 2.2 HISTORY OF HAZARD MITIGATION PLANNING IN VOLUSIA COUNTY

Volusia County's hazard mitigation planning efforts began in 1997 with the formation of the Volusia Prepares Committee. The committee developed the first LMS in 1999 (adopted 2000), as part of the Florida Department of Community Affairs LMS Initiative. The previous version of the LMS, prior to the 2025 version, was updated and adopted in 2020.

## 2.3 PREPARING THE 2025 LMS

The 2025 LMS update was prepared by the East Central Florida Regional Planning Council with assistance from Volusia County Emergency Management Staff. The LMS Update process was led by Volusia County Emergency Management Plans Coordinator Aubrie Austin. The LMS plan was updated from June 2024 to January 2025.

Per the contractual scope of work[1], the consultant team utilized the mitigation planning process recommended by FEMA (Publication Series 386) and recommendations provided by Florida Division of Emergency Management mitigation planning staff. A Local Mitigation Plan Crosswalk, found in Appendix C, provides a detailed summary of FEMA's current minimum standards of acceptability for compliance with the DMA 2000 and notes the location of where each requirement is met within the Plan. These standards are based upon FEMA's Interim Final Rule as published in the Federal Register on February 26, 2002, in Part 201 of the 44 Code of Federal Regulations.

The 2025 LMS was prepared using an updated plan outline and incorporated relevant content from the 2020 LMS. The LMS Working Group updated various parts of the 2020 LMS, as exemplified below:

- *Stakeholders*
  The LMS Working Group identified additional stakeholders that would like to participate in the LMS update process. These stakeholders were invited to subsequent meetings.

- *Plan Outline*
  The LMS Working Group did not revise the plan outline that was proposed by the consultant.

[1] A copy of the negotiated contractual scope of work between Volusia County and ECFRPC is available through Volusia County upon request.

- *Hazards*
  The LMS Working Group decided to include natural hazards starting with the 2009 LMS update, per DMA 2K requirements. Additional manmade and technical hazards occurrences have been included because the rise in occurrences over past years. Many of these hazards are addressed through other emergency preparedness and response plans (e.g., Comprehensive Emergency Management Plan, Emergency Response Plan, Emergency Action Plan, etc.), but cascading impacts have increased the need for mitigation.

- *Hazards Identification Scoring (for reference)*
  In 2024, prior to this plan update, each jurisdiction reviewed the hazards scores that were included in the 2020 LMS (Comparison of Jurisdictional Relative Risk) and modified the scores for each hazard to reflect changes in the impacted area; probability of occurrence; and affects to the built and natural environment and economy.

- *Goals and Objectives*
  The LMS Working Group reviewed the goals and objectives as part of the 2025 update cycle. Through a series of meetings at the beginning of the update process, all goals and objectives were assessed, combined, and/or updated to better reflect the changing needs of the county.

- *Vulnerability Assessment*
  The Vulnerability Assessment was updated using property appraiser data, Resilient Florida Statute Guidelines, and NOAA/USACE predications, as well as the most recent local parcel data (October 2024) for GIS analysis. Hazard maps, hazards exposure and loss estimates were included when appropriate. See Sections 4, 5 and 6 for further information.

- *Hazard Mitigation Initiatives*
  The LMS Working Group decided to continue to use the Excel-based mitigation initiative status and scoring system. See Section 9 for further information.

- *LMS Working Group Bylaws and Operating Procedures (for reference)*
  The LMS Working Group updated the Bylaws and Operating Procedures in 2014 with the facilitated assistance from the consultant with changes made since the 2009 LMS update.

- *Capability Assessment*
  In 2009, a Capability Assessment was prepared, which was not included in the 2005 LMS. This assessment was updated for the 2020 LMS. A survey was conducted among the participating jurisdictions to update the 2025 LMS.

The process used to update this LMS included:

- Conducted the Preliminary Meeting with Volusia County Emergency Management to establish planning process, roles, responsibilities, etc. in preparation for the Kickoff Meeting.
- Conducted the Kickoff Meeting with the Volusia Prepares LMS Working Group
- Offered engagement opportunities for the general public

- Implemented the Vulnerability Assessment produced by the East Central Florida Regional Planning Council (ECFRPC)
- Updated the Capability Assessment
- Conducted Mitigation Strategy Meetings with the Volusia Prepares LMS Working Group and invited the general public to attend. The meetings focused on the plan outline and data collection process, as well as a review of the first draft of the updated 2025 plan.
- Developed the Mitigation Strategy with the LMS Working Group
- Updated the scores for the Mitigation Initiatives
- Updated the Mitigation Initiatives status and scoring of potential projects
- Updated the LMS Plan Maintenance process

Each of these planning steps resulted in critical work products and outcomes that collectively make up the Plan. These elements have been included as separate sections of the Plan (further described in Section 1: Introduction).

The jurisdictions will consider using content from the LMS into other planning initiatives.

## 2.4 VOLUSIA PREPARES LOCAL MITIGATION STRATEGY WORKING GROUP

To guide the development of this Plan, Volusia County reconvened its Volusia Prepares LMS Working Group that was created under past planning efforts. Since the previous update, some changes have been made to the LMS working group in terms of personnel. The LMS Working Group includes representatives of various public, private and non-profit organizations throughout the county. The LMS Working Group represents a community-based planning team made up of local government officials and other key stakeholders identified to serve as critical partners in the planning process.

Opportunities were provided for all Volusia County jurisdictions, agencies, businesses, academia and other interested parties to participate in the LMS update process. All Volusia Prepares information is emailed to city managers, business owners, chambers of commerce, agencies, non-profits, emergency managers and other county partners.

Several non-profits (e.g., American Red Cross, Volusia Interfaiths/Agencies Networking in Disaster and United Cerebral Palsy) have participated in the LMS update process and have approved initiatives in the LMS. There is a Volusia Prepares Business group that has developed a Business Operations Center and emergency business database. They've also held several business planning workshops.

Beginning in June 2024, the LMS Working Group members engaged in regular discussions as well as local meetings and planning workshops to discuss and complete tasks associated with preparing the Plan. This working group coordinated together on all aspects of plan preparation and provided valuable input to the process. In addition to regular meetings, committee members routinely communicated and were kept informed through an e-mail distribution list and internet web site.

Specifically, the tasks assigned to the LMS Working Group members included:

- Participate in LMS update meetings and workshops.
- Provide best available data.

- Help complete the Capability Assessment Survey and provide copies of any mitigation or hazard-related documents for review and incorporation into the Plan.
- Support the development of the Mitigation Strategy, including the design and adoption of community goal statements.
- Help design and propose appropriate mitigation actions for their department/agency for incorporation into the Mitigation Action Plan. Provide a status update and assign a priority score to existing Mitigation Actions.
- Review and provide timely comments on all study findings and draft plan deliverables.
- Support the adoption of the 2025 Volusia County Multi-Jurisdictional Local Mitigation Strategy by all participating jurisdictions.

In addition to these tasks, the Volusia Prepares LMS Working Group consists of a subcommittee responsible for the integration of the County's Program for Public Information (PPI) report into the workflow of the Volusia Prepares Working Group. This includes the creation of an annual report that reviews the status and applicability of the plan.

**Section 2 Table 1** lists the members of the Volusia County Prepares LMS Working Group who were responsible for participating in the development of the Plan.

**Section 2 Table 1: Volusia County Prepares LMS Working Group**

## 2.5 COMMUNITY MEETINGS AND WORKSHOPS

The preparation of this Plan required a series of meetings and workshops for facilitating discussion, gaining consensus and initiating data collection efforts with local government staff, community officials and other identified stakeholders. More importantly, the meetings and workshops prompted continuous input and feedback from relevant participants throughout the drafting stages of the Plan. Below is a summary of the key meetings and community workshops held during the development of the plan update.

In many cases, routine discussions and additional meetings were held by local staff to accomplish planning tasks specific to their department or agency, such as the approval of specific mitigation actions for their jurisdiction, department or agency to undertake and include in the Mitigation Action Plan. Preplanning efforts began in January 2024. The LMS Working Group was notified in the first quarter meeting that the LMS update was this year, and their participation was vital to the plan's success.

The following is a summary of the meetings that occurred during the LMS update planning process. Meeting invitations, agendas, minutes and rosters are provided in Appendix D.

**Volusia Prepares Kickoff Meeting**

*June 21, 2024*

The Kickoff Meeting was held at the Volusia Emergency Operations Center, 3825 Tiger Bay Road and was attended by the LMS Working Group. The primary purpose of the meeting was to explain the proposed planning process in detail, describe individual roles and responsibilities and begin initial data collection efforts. The LMS Working Group was asked to identify additional stakeholders, new plans, data and studies to incorporate into the LMS update.

**Public Kickoff Meeting**

*September 20, 2024*

The Working Group's Quarter 3 Meeting was open to the public. This meeting was held at the Volusia County Emergency Operations Center. The goal was to begin the public engagement process. The objective was to inform the Working Group and the public on the progress made up to that point and to discuss any updates needed to the priority project list.

**Public Engagement Meetings**

*November 25 and 26, 2024*

Two public meetings were held to inform the public of the planning process and the overall scope of the 2025 Volusia County Local Mitigation Strategy. Maps and a draft plan were provided and general items within the plan were discussed. Special attention was given to community members' needs and recommendations for the plan.

**Volusia Prepares Meeting #2 and Conclusion Meeting for Public**

*December 13, 2024*

The next Local Mitigation Strategy Meeting was held at the Volusia County Emergency Operations Center, 3825 Tiger Bay Road. The purpose of this meeting was to inform the jurisdictions and the public on the plan update and obtain comments and feedback.

The final opportunity for public comment will take place at the County Council meeting when the plan is presented for formal adoption. Upcoming community outreach efforts will focus on including the concepts of mitigation in current public information activities, and to make the public aware of this planning process, its goals and objectives, and opportunities for public input at every possible occasion.

## 2.6 INVOLVING THE PUBLIC AND IDENTIFIED STAKEHOLDERS

A press release was issued from Volusia County Community Information, by the Volusia County Public Information Officer, to invite the public to participate in the LMS development and provide comments on the LMS. The press release included background information about the LMS process, the agenda topics, date, time and location information. Public feedback was accepted by emails, in meetings, in surveys, or by contacting the LMS Coordinator. In addition, the LMS was also placed on the Volusia County Emergency Management's Website.

The public and community stakeholders were invited to "Public Meetings" during the LMS planning process (see Appendix D). These meetings were hosted at two different public library locations to reach different parts of the community. Additionally, they were hosted at different times of the day, one evening and one morning, to accommodate various residents.

The public was also invited to the Volusia Prepares meetings conducted on September 20$^{th}$ and December 13$^{th}$ at the Volusia County EOC.

VCEM engaged community leaders from low-income and underserved communities to request input on the risks and hazards over the 5-year planning period. The survey was distributed to these partners as a way to report local experiences of hazard events (see Appendix D).

# SECTION 3 – COMMUNITY PROFILE

This section of the Plan provides an overview of Volusia County, Florida. It consists of the following five subsections:

- **Geography and the Environment**
- **Population and Demographics**
- **Housing, Infrastructure and Land Use**
- **Employment and Industry**
- **Development Trends**

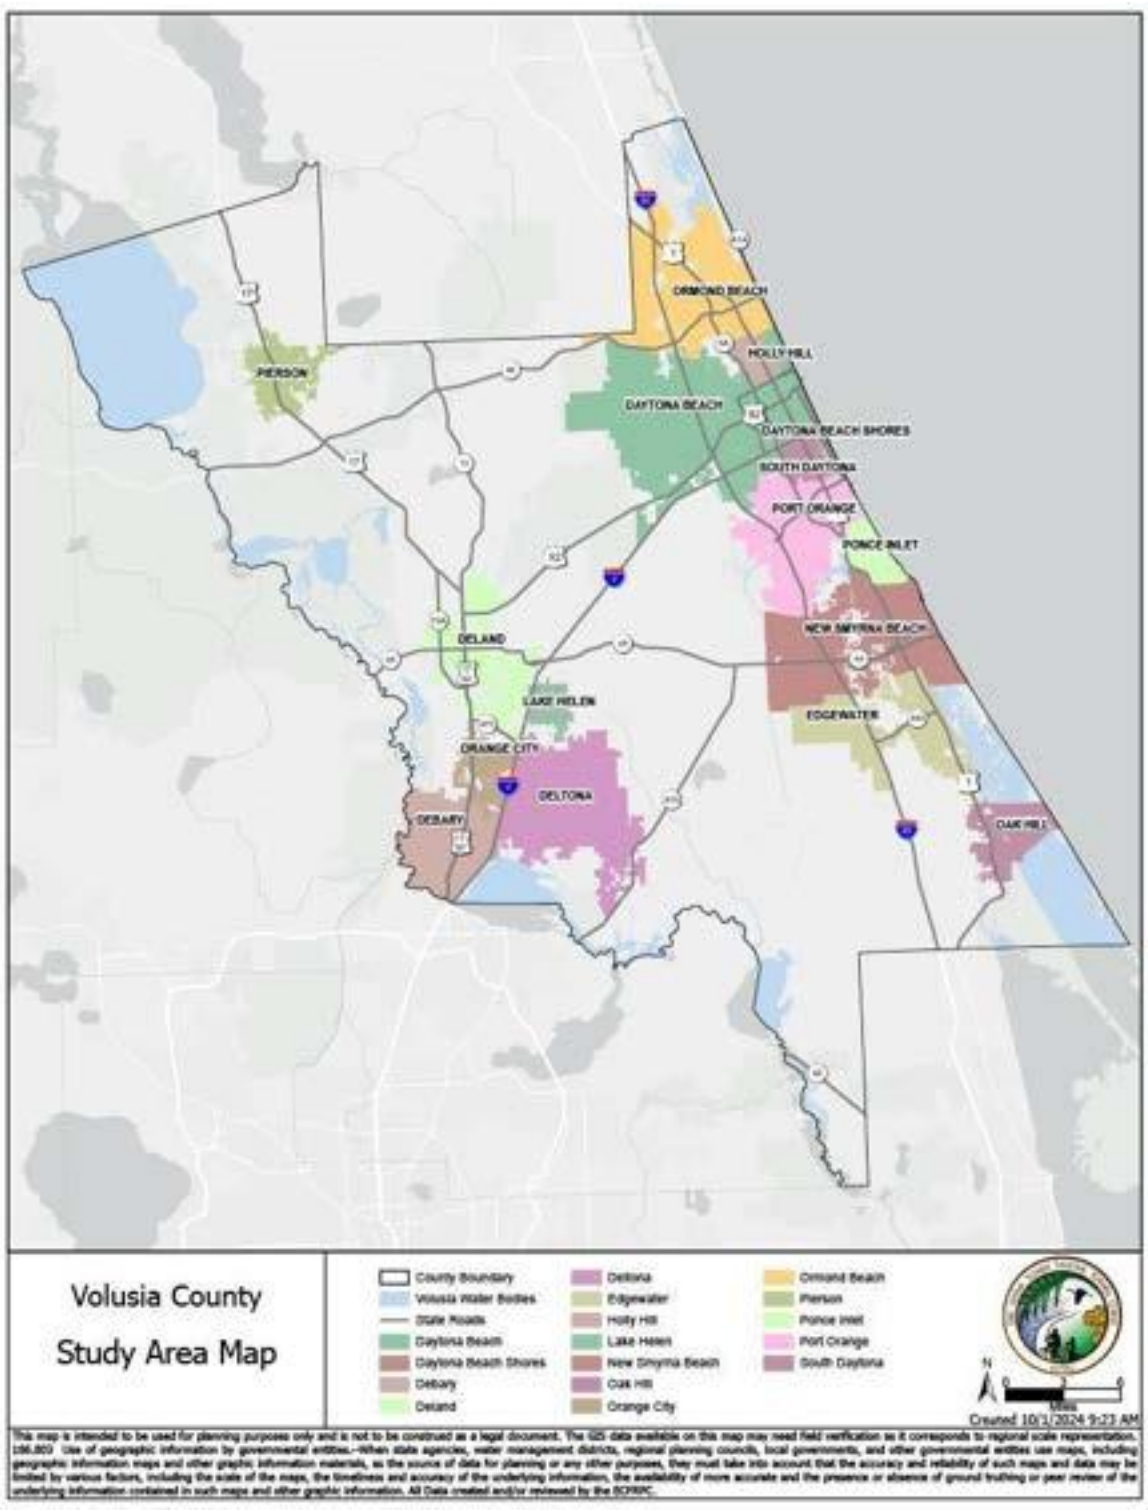
A variety of resources were used to obtain reliable data and information about the community's profile and demographics. To develop this plan, sources such as the U.S. Census, BEBR reports, and Volusia County Property Appraiser information, were utilized.

## 3.1 GEOGRAPHY AND THE ENVIRONMENT

Volusia County was established in 1854 as a prosperous steamboat landing area. It lies on the central coast of eastern Florida and is comprised of 1,103 square miles of land and 329 square miles of water (bounded to the north and south by the coastal counties of Flagler and Brevard). Several counties border Volusia County to the west including Putnam, Marion, Lake and Seminole. The County is located approximately 40 miles from Orlando, 95 miles from Jacksonville and 105 miles from Tampa, Florida.

There are 16 incorporated areas within Volusia County, of which Deltona is the largest in terms of population. An orientation map of the Volusia County study area is provided as **Section 3 Figure 1**. The participating jurisdictions in this plan include Daytona Beach, Daytona Beach Shores, DeBary, Deland Deltona, Edgewater, Holly Hill, Lake Helen, New Smyrna Beach, Oak Hill, Orange City, Ormond Beach, Pierson, Ponce Inlet, Port Orange, South Daytona, and the unincorporated area of Volusia County.

Forest land accounts for approximately 56 percent of the land area in Volusia County[1]. There is an abundance of public land in Volusia County. For example, the northern portion of the county, abutting Flagler County, is located in the North Peninsula State Recreation Area. In addition, the southern coastal portion of the county, adjacent to Brevard County, is part of the Canaveral National Seashore.



The climate in Volusia County is considered sub-tropical with generally warm, humid temperatures year-round. The average winter temperature is 61 degrees Fahrenheit. The average summer temperature is 81 degrees Fahrenheit, though it typically exceeds 90 degrees Fahrenheit in the months of June, July, and August. The average annual precipitation is 53.83 inches.

The dominant surface water resources in Volusia County are Halifax River, Indian River Lagoon, Mosquito Lagoon, Lake George (37,884 acres), Lake Monroe (5,423 acres), and Lake Harney (3,210 acres)[2].

[1] http://www.freshfromflorida.com
[2] Volusia County Comprehensive Plan, Figure 1-2 Legend for Water Bodies

There are many other water areas throughout the County, which are fed by numerous creeks, bayous and other minor tributaries.

**Section 3: Figure 1: Volusia County Study Area Map**

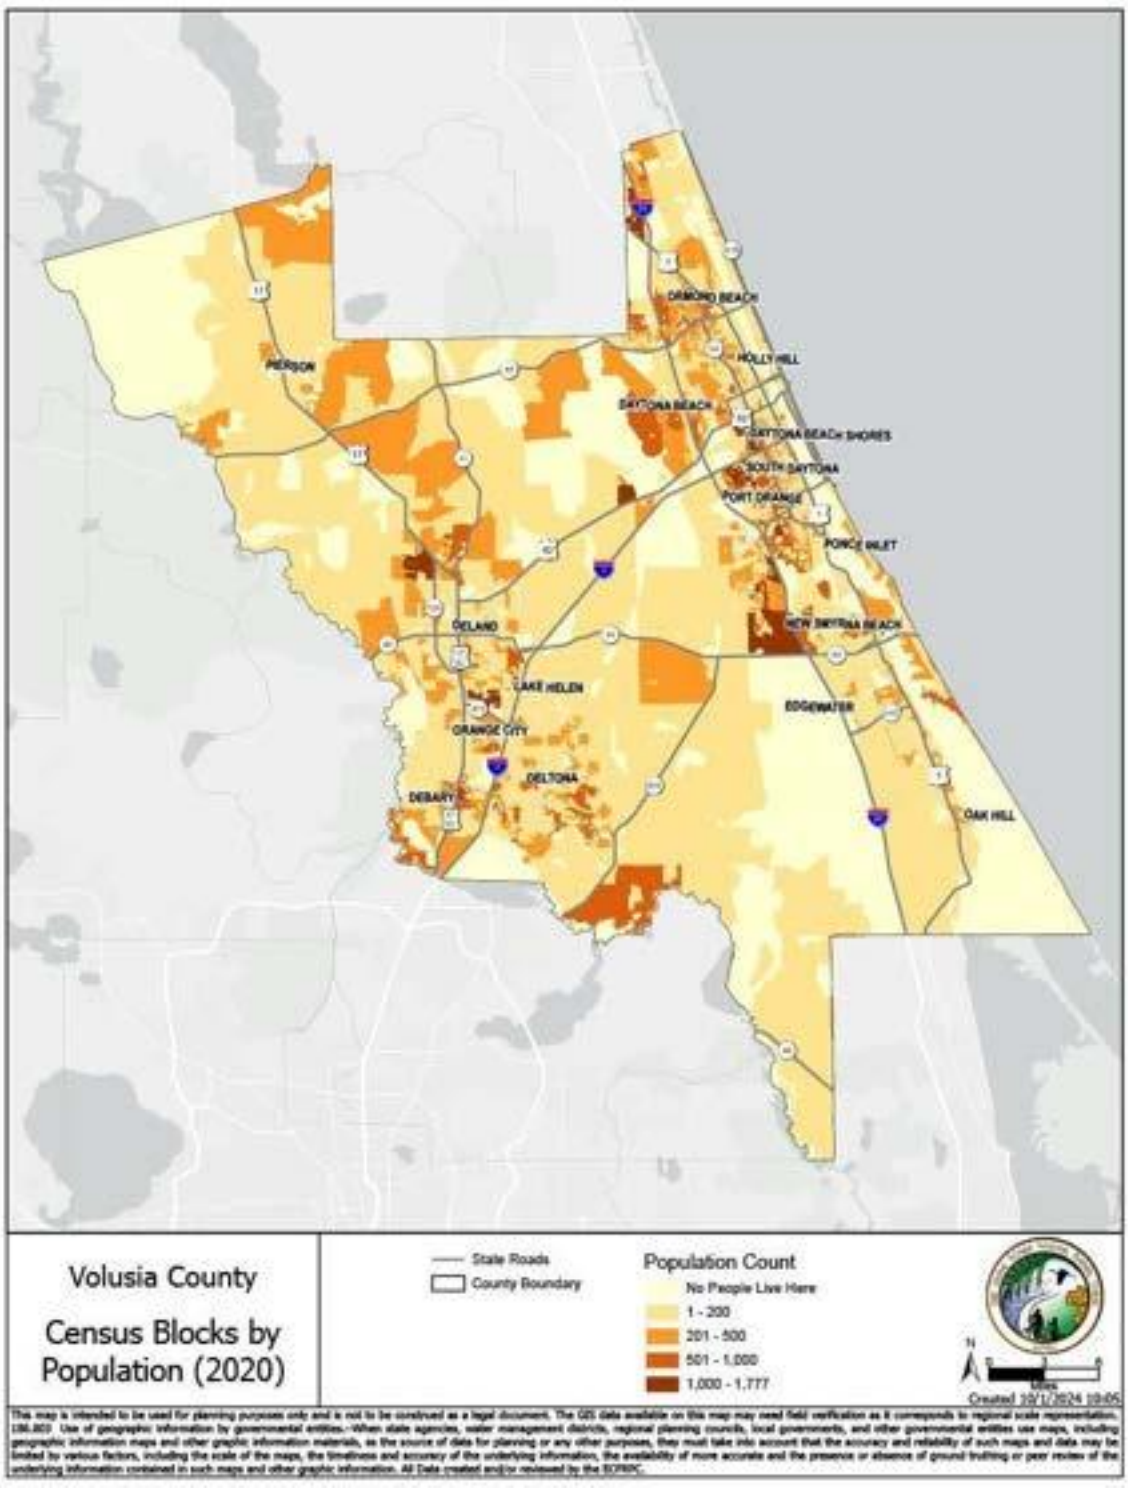
## 3.2 POPULATION AND DEMOGRAPHICS



According to the U.S. Census Bureau, the 2023 estimated population of Volusia County was 590,357. This represents a 6.7 percent increase from 2020, when the population was 553,537. **Section 3: Table 1** provides the 2020 populations of the cities and unincorporated areas within Volusia County, along with the 2023 population estimates as provided by the U.S. Census Bureau. In addition, **Section 3: Figure 2** shows the population distribution in Volusia County.

**Section 3: Table 1: Population of Cities and Unincorporated Areas in Volusia County[3]**

| JURISDICTION | 2020 POPULATION | 2023 POPULATION ESTIMATE |
|---|---|---|
| Daytona Beach | 71,586 | 82,485 |
| Daytona Beach Shores | 5,120 | 5,194 |
| DeBary | 22,255 | 23,209 |
| DeLand | 37,786 | 43,009 |
| Deltona | 93,701 | 98,739 |
| Edgewater | 23,111 | 23,636 |
| Holly Hill | 12,970 | 13,075 |
| Lake Helen | 2,843 | 2,964 |
| New Smyrna Beach | 30,210 | 32,655 |
| Oak Hill | 2,011 | 2,128 |
| Orange City | 12,631 | 14,928 |
| Ormond Beach | 43,070 | 44,277 |
| Pierson | 1,540 | 1,558 |
| Ponce Inlet | 3,365 | 3,450 |
| Port Orange | 62,619 | 65,966 |
| South Daytona | 12,852 | 13,781 |
| Unincorporated | 115,867 | 119,303 |

[3] U.S. Census Bureau, Population Division (May 2024) & University of Florida Bureau of Economic and Business Research (January 2024). https://bebr.ufl.edu/wp-content/uploads/2024/01/projections_2024.pdf

**Section 3: Figure 2: Population of Cities and Unincorporated Areas in Volusia County**

Source: U.S. Census Bureau (2020)

According to the 2022 U.S. Census American Community Survey, the median age for the County was 46.6 years. This is higher than the Florida median age of 42.7 years of age. It is estimated that 25.4 percent of the County's population is made up of persons that are 65 years old and over, which is higher than the State figure of 21.6 percent.

The racial mix in Volusia County is predominately white, but has other populations. White persons make up 70.4 percent of the County's population. Black or African American persons accounted for 10.1 percent of the Volusia County population, less than the state percentage of 15.0 percent. Asians comprised 2.0 percent of the population compared to the state's 2.9 percent. People of two or more races comprise 7.6 percent of the population in the County.

According to the Census American Community Survey, in 2022 there were 2.7 people per household. There were 2.32 people per household according to the 2010 U.S. Census.

**Section 3: Table 2: Average Number of Persons Per Household**

| JURISDICTION | AVERAGE NUMBER OF PERSONS PER HOUSEHOLD |
|---|---|
| Daytona Beach | 2.7 |
| Daytona Beach Shores | 2.2 |
| DeBary | 2.7 |
| DeLand | 2.9 |
| Deltona | 3.2 |
| Edgewater | 2.6 |
| Holly Hill | 2.5 |
| Lake Helen | 2.5 |
| New Smyrna Beach | 2.4 |
| Oak Hill | 1.7 |
| Orange City | 2.6 |
| Ormond Beach | 2.5 |
| Pierson | 2.9 |
| Ponce Inlet | 2.1 |
| Port Orange | 2.6 |
| South Daytona | 2.7 |
| Unincorporated | 2.8 |

## 3.3 HOUSING, INFRASTRUCTURE, AND LAND USE

### 3.3.1 Housing

According to the Census Bureau's 2022 American Community Survey, there are 273,835 housing units in Volusia County. Of these structures, 68.8 percent are single-unit and 22.7 percent are multi-unit. The remaining 8.5 percent are mobile homes or other types of housing. The median value of owner-occupied housing units was $251,400, compared to the $178,700 state average and the $193,500 national average.[4]

### 3.3.2 Infrastructure

Infrastructure is categorized in this Plan as Transportation and Utilities, as these elements are vital in a disaster event, both for evacuation and for response and recovery efforts. Volusia County is endowed with multi-modes of transportation and has several utility providers.

***Transportation***

Volusia County has several transportation options whether traveling by automobile, rail, or air. There are two federal interstates which run through the County: Interstate 95 runs north to south along the coast, and Interstate 4 runs northeast, connecting the County to Orlando, and merging with I-95 near Daytona Beach. There are also four federal highways (U.S. 1, U.S. 17, U.S. 40 and U.S. 92). There are also four major railway transportation providers (Amtrak, CSX, Florida East Coast Railway, and SunRail), and a number of regional airports. The major area airport is Daytona Beach International Airport. In addition, Port Canaveral, a deep-water port, and one of the busiest cruise ports in the world, is located about 70 miles south of Volusia County in Brevard County.

***Utilities***

Florida Power and Light, Duke Energy, City of New Smyrna Beach Utilities Commission, and Clay Electric Cooperative serve the electricity needs in Volusia County. The natural gas suppliers are Florida Public Utilities and TECO People's Gas. Water and sewer services are provided by a number of different sources including Volusia County Utilities, North Peninsula Utilities Corporation, and municipal governments.

### 3.3.3 Land Use

**Section 3: Table 2** shows the current vacant commercial, industrial, institutional, other, and residential land in Volusia County as of 2024 rounded up to the nearest whole numbers.

**Section 3: Table 3: Vacant Land in Acres Throughout Volusia County**

| JURISDICTION | VACANT COMMERCIAL | VACANT INDUSTRIAL | VACANT INSTITUTIONAL | VACANT OTHER | VACANT RESIDENTIAL |
|---|---|---|---|---|---|
| Daytona Beach | 1488 | 241 | 95 | 6830 | 817 |
| Daytona Beach Shores | 25 | 0.5 | 0.7 | 137 | 10 |
| DeBary | 298 | 46 | - | 739 | 491 |
| DeLand | 447 | 127 | 30 | 2084 | 676 |
| Deltona | 576 | 152 | 9 | 1691 | 1165 |
| Edgewater | 464 | 220 | 2 | 1360 | 518 |
| Holly Hill | 67 | 31 | 0.6 | 45 | 96 |
| Lake Helen | 100 | - | 7 | 185 | 631 |
| New Smyrna Beach | 654 | 150 | 15 | 2978 | 626 |
| Oak Hill | 143 | - | 3 | 796 | 479 |
| Orange City | 827 | 91 | 0.8 | 259 | 236 |
| Ormond Beach | 651 | 63 | 5 | 2947 | 628 |
| Pierson | 65 | - | 0.8 | 900 | 745 |
| Ponce Inlet | 17 | - | 4 | 221 | 67 |
| Port Orange | 514 | 42 | 130 | 2127 | 311 |
| South Daytona | 125 | 9 | 1 | 73 | 39 |
| Unincorporated Area | 1735 | 333 | 41 | 6305 | 40339 |

Source: Volusia County Property Appraiser, ECFRPC

## 3.4 EMPLOYMENT AND INDUSTRY

Volusia County began as a prosperous steamboat landing town in the early 1800s. Today, employment is based largely in the public sector. According to the 2022 American Community Survey, the civilian labor force in Volusia County is approximately 255,301. The top employers are Volusia County Schools, and the local hospital systems.

From an industry perspective, the main economic sources for the county are educational services, and health care and social assistance (21.7%); Retail trade (13.6%); Professional, scientific, and management, and administrative and waste management services (12.4%); and Arts, entertainment, and recreation, and accommodation and food services (11.5%).[5]

In 2022, the estimated median household income for Volusia County was $64,601, less than the State at $72,200 and U.S. medians of $80,610.[6]

[5] https://data.census.gov/table/ACSDP5Y2022.DP03?g=050XX00US12127&d=ACS%205-Year%20Estimates%20Data%20Profiles

[6] https://fred.stlouisfed.org/series/MHIFL12127A052NCEN

## 3.5 DEVELOPMENT TRENDS

Volusia County experienced substantial growth between 2000 and 2005 followed by a sharp decline in growth between 2009 and 2012, as indicated by U.S. Census residential building permit data. Growth has generally rebounded since 2013.

**Section 3: Table 4: Annual Residential Building Permit Data, Volusia County**

| YEAR | TOTAL RESIDENTIAL UNITS | YEAR OVER YEAR CHANGE |
|---|---|---|
| 2000 | 3,147 | --- |
| 2001 | 5,112 | + 1,965 |
| 2002 | 4,171 | -941 |
| 2003 | 5,112 | + 941 |
| 2004 | 4,920 | - 192 |
| 2005 | 5,186 | + 266 |
| 2006 | 2,961 | - 2,225 |
| 2007 | 1,577 | - 1,384 |
| 2008 | 1,053 | - 524 |
| 2009 | 600 | - 453 |
| 2010 | 653 | + 53 |
| 2011 | 539 | - 114 |
| 2012 | 760 | + 221 |
| 2013 | 1,307 | + 547 |
| 2014 | 1,205 | - 102 |
| 2015 | 987 | - 218 |
| 2016 | 1,077 | + 90 |
| 2017 | 1,496 | + 419 |
| 2018 | 1,598 | + 102 |
| 2019 | 1,928 | + 105 |
| 2020 | 2,035 | + 107 |
| 2021 | 2,759 | +724 |
| 2022 | 3,519 | + 760 |
| 2023 | 3,232 | -287 |
| 2024 | 2,574 | -658 |

For a list of new developments in Volusia County please visit the Land Development section of the Volusia County Growth and Resource Management Department website at the following link: http://www.volusia.org/services/growth-and-resource-management/planning-and-development/land-development/

[7] https://connectlivepermits.org/citizenportal/app/public-search on 12/18/2024

# SECTION 4 – HAZARD IDENTIFICATION

This section is the first of three sections that assess the risk of Volusia County and the participating jurisdictions to hazards. This section identifies a wide range of hazards that could potentially impact the County. Section 5: ***Hazard Profiles*** provides more detailed information about how the identified hazards specifically impact the County and participating jurisdictions. Section 6: ***Vulnerability Assessment*** provides detailed analyses results that indicate the number of damages that could occur in the County because of the identified hazards. Together, these sections serve to identify, analyze and assess the overall risk posed to Volusia County and the participating jurisdictions from hazards. The risk assessment also attempts to define any hazard risks that may uniquely or exclusively affect specific areas of Volusia County or its participating jurisdictions and partners.

Volusia County and the participating jurisdictions are vulnerable to a wide range of natural hazards[1] that threaten life and property. Upon a review of the full range of natural hazards suggested under FEMA planning guidance, Volusia County and the participating jurisdictions have identified several hazards that are to be addressed in this Multi-Jurisdictional LMS. These hazards were identified through an extensive process that utilized input from the Local Mitigation Strategy Working Group (LMS Working Group) members, research of past disaster declarations in the County, a review of previous hazard mitigation plans in the County, and a review of the current Florida Hazard Mitigation Plan. Readily available online information from reputable sources such as federal and state agencies was also evaluated to supplement information from these key sources.

**Section 4: Table 1** lists the full range of natural hazards initially identified for consideration in the Plan and provides a brief description for each. This table includes seventeen (17) individual hazards categorized by the following types: natural, technological, and manmade. Some of these hazards are interrelated or cascading (i.e., hurricanes can cause flooding, storm surge and tornadoes). It should also be noted that some hazards, such as extreme temperature may impact a large area yet cause little damage, while other hazards, such as tornadoes, may impact a small area yet cause extensive damage.

**Section 4: Table 1: Descriptions of the Full Range of Initially Identified Hazards**

| HAZARD | DESCRIPTION |
|---|---|
| **Natural** | |
| **Agriculture** | Agriculture includes Infestations, Invasive Species, and Diseases Infestation or disease in agriculture is when biological entities such as insects, rodents, bacteria or viruses significantly increase in a given area, affecting crops to the point where human and animal health is threatened, valuable crops may be damaged or significant environmental resources may be lost. |
| **Coastal Erosion** | Landward displacement of a shoreline caused by the forces of waves and currents define coastal erosion. Coastal erosion is measured as the rate of change in the |

[1] FEMA's current regulations and interim guidance under the Disaster Mitigation Act of 2000 (DMA 2000) require, at a minimum, an evaluation of a full range of natural hazards. An evaluation of human-caused hazards (e.g., technological hazards, terrorism, etc.) is encouraged, though not required, for plan approval. Volusia County has focused solely on natural hazards at this time. Incorporation of human-caused hazards may be evaluated in future versions of the plan, as it is a "living document" which will be monitored, evaluated and updated regularly.

| HAZARD | DESCRIPTION |
|---|---|
| | position or horizontal displacement of a shoreline over a period. It is generally associated with episodic events such as hurricanes and tropical storms, nor'easters, storm surges and coastal flooding but may also be caused by human activities that alter sediment transport. Construction of shoreline protection structures can mitigate the hazard but may also exacerbate it under some circumstances. |
| **Drought** | A drought is a prolonged period of less than normal precipitation such that the lack of water causes a serious hydrologic imbalance. Common effects of drought include crop failure, water supply shortages, and fish and wildlife mortality. High temperatures, intense winds, and low humidity can worsen drought conditions and make areas more susceptible to wildfire. Human demands and actions can hasten or mitigate drought-related impacts on local communities. |
| **Extreme Temperature** | Extreme temperature generally refers to temperatures that are unusually high or low compared to typical weather conditions for a specific location and time of year. However, defining what constitutes "extreme" can be challenging due to context, location, history, and duration. Volusia County defines extreme temperature in two ways.<br>• Extreme cold may include snow, sleet, freezing rain, or a mix of these wintry forms of precipitation. Ice storms occur when moisture falls and freezes immediately upon impact on trees, power lines, communication towers, structures, roads and other hard surfaces. Winter storms and ice storms can down trees, cause widespread power outages, damage property, and cause fatalities and injuries to human life.<br>• Extreme heat is defined as temperatures that hover 9 degrees or more above the average high temperature of 90°F for the region and last for 3 or more consecutive days. Humid or muggy conditions, which add to the discomfort of high temperatures, occur when a "dome" of high atmospheric pressure traps hazy, damp air near the ground. |
| **Flood** | The accumulation of water within a water body results in the overflow of excess water onto adjacent lands, usually floodplains, causing flood or rising waters in various ways. Floods have three categories: riverine, coastal, or shallow flooding (which includes sheet flow, ponding, and urban drainage). A floodplain is the land adjoining the channel of a river, stream ocean, lake or other watercourse or water body that is susceptible to flooding. |
| **Public Health Emergencies** | Public health emergencies consist of disease and pandemic outbreaks. They may be accidental, natural, or intentional. Under section 319 of the Public Health Service Act (42 U.S.C § 319), the Secretary of the Department of Health and Human Services (HSS) can declare a public health emergency. This can include medical surges (often from mass casualty events) that require hospitals to act beyond normal capacity. |
| **Rising Coastal Waters** | Rising coastal waters is a hazard that refers to unprecedented water levels along the coast, usually leading to inland affects. This hazard encompasses:<br>• Storm surge is a large dome of water often 50 to 100 miles wide and rising anywhere from four to five feet in a Category 1 hurricane up to more than 30 feet in a Category 5 storm. Storm surge heights and associated waves are also dependent upon the shape of the offshore continental shelf (narrow or wide) and the depth of the ocean bottom (bathymetry). A narrow shelf, or one that drops steeply from the shoreline and subsequently produces deep |

| HAZARD | DESCRIPTION |
|---|---|
| | water close to the shoreline, tends to produce a lower surge but higher and more powerful storm waves. Storm surge arrives ahead of a storm's actual landfall and the more intense the hurricane is, the sooner the surge arrives. Storm surge can be devastating to coastal regions, causing severe beach erosion and property damage along the immediate coast.<br>• Sea level rise is caused by warming of the earth's climate, the associated thermal expansion of water molecules, and generally impacts coastal, lagoon-adjacent and river-adjacent areas that are hydrologically connected to the ocean. Sea level rise has been observed over the past few decades in Central Florida, including Volusia County. Projections by NOAA and the U.S. Army Corps of Engineers depict varying levels of sea level rise by the year 2100. As part of this plan, sea level rise and sea level rise-plus storm surge are analyzed.<br>• Tsunamis are a wave or series of waves mostly caused by an earthquake or by a large undersea landslide, volcanic eruption or other undersea disturbance. From the area of disturbance, tsunami waves will travel outward in all directions and can originate hundreds or even thousands of miles away from affected coastal areas. |
| **Severe Weather** | Severe weather refers to any significant or intense weather conditions that can cause damage, disruption, or pose a threat to safety. It encompasses a range of phenomena that are more extreme than typical weather conditions. Volusia County experiences severe weather in a variety of ways.<br>• A hail event produces hailstones that fall to the ground. Hail forms when updrafts in thunderstorms carry raindrops into parts of the atmosphere where the temperatures are below freezing.<br>• Lightning is a discharge of electrical energy resulting from the buildup of positive and negative charges within a thunderstorm, creating a "bolt" when the buildup of charges becomes strong enough. This flash of light usually occurs within the clouds or between the clouds and the ground. A bolt of lightning can reach temperatures approaching 50,000 degrees Fahrenheit. Lightning rapidly heats the sky as it flashes, but the surrounding air cools following the bolt. This rapid heating and cooling of the surrounding air causes thunder. On average, 73 people are killed each year by lightning strikes in the United States.<br>• Thunderstorms are caused by air masses of varying temperatures meeting in the atmosphere. Rapidly rising warm and moist air fuels the formation of thunderstorms. They can move through an area very quickly or linger for several hours. |
| **Tornado** | A tornado is a violently rotating column of air that has contact with the ground and is often visible as a funnel cloud. Its vortex rotates cyclonically with wind speeds ranging from as low as 40 mph to as high as 300 mph. Tornadoes are most often generated by thunderstorm activity when cool, dry air intersects and overrides a layer of warm, moist air forcing the warm air to rise rapidly. The destruction caused by tornadoes ranges from light to catastrophic depending on the intensity, size, and duration of the storm. |
| **Tropical Cyclones** | Hurricanes and tropical storms are classified as tropical cyclones and defined as any closed circulation developing around a low-pressure center in which the winds rotate |

| HAZARD | DESCRIPTION |
|---|---|
| | counterclockwise in the Northern Hemisphere (or clockwise in the Southern Hemisphere) and with a diameter averaging 10 to 30 miles across. When maximum sustained winds reach or exceed 39 miles per hour, the system is designated a tropical storm, given a name, and is closely monitored by the National Hurricane Center. When sustained winds reach or exceed 74 miles per hour the storm is deemed a hurricane. The primary damaging forces associated with these storms are high-level sustained winds, heavy precipitation and tornadoes. Coastal areas are also vulnerable to the additional forces of storm surge, wind-driven waves and tidal flooding which can be more destructive than cyclone wind. Most hurricanes and tropical storms form in the Atlantic Ocean, Caribbean Sea and Gulf of Mexico during the official Atlantic hurricane season, which extends from June through November. |
| **Wildland Fire** | An uncontrolled fire burning in an area of vegetative fuels such as grasslands, brush, or woodlands. Heavier fuels with high continuity, steep slopes, high temperatures, low humidity, low rainfall, and high winds all work to increase risk for people and property located within wildfire hazard areas or along the urban/wildland interface. Wildfires are part of the natural management of forest ecosystems, but most are caused by human factors. Over 80 percent of forest fires started by negligent human behavior such as smoking in wooded areas or improperly extinguishing campfires. The second most common cause for wildfire is lightning. |
| **Manmade** | |
| **Civil Disturbance** | Events of civil disturbances can be classified as armed violence, riots, protests, and threats against the military or the government. The proper planning and prevention methods aid in the mitigation of such events. For threats of civil disturbance utilizing armed violence, it is likely that a joint jurisdictional management of operations will take effect, coordinated at the county level between the Sheriff's Office, Florida Department of Law Enforcement (FDLE), and the Office of Emergency Management. Civil disturbances can occur due to socio-economic, political or other reasons. These types of events typically occur in public places. |
| **Mass Migration** | Mass-migration occurs when persons of one geographic area move in large numbers to another geographic location. |
| **Terrorism** | Terrorism includes any attempt to attack, cripple or damage public goods, public infrastructure or citizens on a large scale. Defined in the Code of Federal Regulations as "the unlawful use of force and violence against persons or property to intimidate or coerce a government, the civilian population, or any segment thereof, in furtherance of political or social objectives" (28 C.F.R. Section 0.85). The various forms of terrorism Volusia County may experience come in four forms.<br>• Agro-Terrorism: The deliberate introduction of disease-causing organisms and chemicals into the food supply through agriculture. It could impact the public if crops or agricultural foods contaminated with disease-causing organisms were to enter the food chain.<br>• Cyber Terrorism: Unlawful attacks and threats of attack against computers, networks, and the information stored therein; and used to intimidate or coerce a government or its people in furtherance of political or social objectives. |

| HAZARD | DESCRIPTION |
|---|---|
| | • Domestic Terrorism: Violent, criminal acts committed by individuals and/or groups to further ideological goals stemming from domestic influences, such as those of a political, religious, social, racial, or environmental nature.<br>• International Terrorism: Violent, criminal acts committed by individuals and/or groups who are inspired by, or associated with, designated foreign terrorist organizations or nations (state-sponsored). |
| **Technological** | |
| **Coastal Oil Spill** | An oil spill is the release of liquid petroleum into the environment, typically the ocean, rivers, or lakes. These spills can result from various incidents, including accidents involving oil tankers, offshore drilling rigs, pipelines, storage facilities, or during the extraction process. Oil spills can have severe environmental, economic, and health impacts. While oil spills would primarily affect the Gulf coast of Florida, oil spills can negatively affect tourism and ecological conditions on the Atlantic coast of Florida. |
| **Critical Infrastructure Failure** | Public utilities provide critical services such as drinking water, stormwater and wastewater collection/treatment, electric power, transportation, supply chains systems that support food and fuel, and communications. These services contribute to the economic well-being and public health/safety of the communities they serve. A utility service disruption can be a cascading emergency from an event such as a cyber-terrorism or a hurricane.<br>Widespread power outages can occur without warning. Generally warning times will be short in the case of technological failure, such as a fire at a sub-station, traffic accident, human error, or terrorist attack. In cases where a power failure is caused by natural hazards, greater warning time is possible. For example, high wind events such as tornados and hurricanes often cause widespread power failure and are often forecasted before they affect a community so that residents can prepare. |
| **HazMat / Industrial Incident** | Hazardous material (HazMat) includes events when liquid, solid or gaseous chemicals that are harmful or fatal to humans or ecological infrastructure disperse into the atmosphere. |

SPECIAL NOTE: The plan omits hazards that may be recognized to affect the jurisdiction(s) in the planning area. Rationale is that while some hazards may pose a risk to Volusia County, mitigation investments would not be deemed appropriate or feasible due to the impending need to mitigate more frequent disasters. Hazards, such as sinkholes and earthquakes, were omitted due to low probability, limited recorded impacts, and low economic impact. It is acknowledged that mitigation efforts can duplicate hazard mitigation benefits.

# SECTION 5 – HAZARD PROFILES

**44 CFR Requirement**

***44 CFR Part 201.6(c)(2)(i):***
The risk assessment shall include a description of the type, location and extent of all natural hazards that can affect the jurisdiction. The plan shall include information on previous occurrences of hazard events and on the probability of future hazard events.

## 5.1 OVERVIEW

This section includes detailed hazard profiles for each of the hazards identified in the previous section as significant enough for further evaluation through the risk assessment in Volusia County. This includes the following hazards:

- **Natural**
  - Agriculture
  - Coastal Erosion
  - Drought
  - Extreme Temperature
  - Flood
  - Public Health Emergencies
  - Rising Coastal Water
  - Severe Weather
  - Tornado
  - Tropical Cyclones
  - Wildland Fire
- **Manmade**
  - Civil Disturbance
  - Mass Migration
  - Terrorism
- **Technological**
  - Coastal Oil Spill
  - Critical Infrastructure Failure
  - HazMat/ Industrial Incident

Each hazard profile described in this section includes a general description of the hazard, its location and extent, notable historical occurrences, the probability of future occurrences, potential impacts, and overall vulnerability. It also includes specific items noted by members of the Local Mitigation Strategy Working Group (LMS Working Group). The probability of future occurrence is expressed as “high” (expected to occur at least every five years), “moderate” (expected to occur at least every 25 years), “low”

(expected to occur at least every 100 years, and "very low" (is possible to occur, despite their being no recorded occurrences).

## Major Disaster Declarations

In 1988, the Robert T. Stafford Disaster Relief and Emergency Assistance Act was enacted to support state and local governments when disasters overwhelm local resources. This law, as amended, establishes a process for requesting and obtaining a Presidential Disaster Declaration, defines the type and scope of assistance available from the federal government, and sets the conditions for obtaining that assistance. The Federal Emergency Management Agency (FEMA), now part of the Emergency Preparedness and Response Directorate of the Department of Homeland Security, is tasked with coordinating the response. Since 1965, Volusia County has received numerous presidential disaster declarations for such hazards as hurricanes, tornados, floods and severe freezes (**Section 5: Table 1**).

**Section 5: Table 1: Presidential Disaster Declarations**

| EVENT | DECLARATION DATE | DECLARATION NUMBER |
|---|---|---|
| Severe Storms, Tornadoes, and Flooding | 05/15/79 | 586 |
| Tornadoes, Flooding, High Winds & Tides, Freezing | 03/13/93 | 982 |
| Tropical Storm Gordon, Tornadoes, Flooding | 11/28/94 | 1043 |
| Tropical Storm Josephine | 10/15/96 | 1141 |
| Severe Storms, High Winds, Tornadoes, Flooding | 02/25/98 | 1195 |
| Extreme Fire Hazard | 07/03/98 | 1223 |
| Hurricane Floyd | 09/22/99 | 1300 |
| Hurricane Irene | 10/28/99 | 1306 |
| Severe Freeze | 02/06/01 | 159 |
| Hurricane Charlie/Bonnie | 08/13/04 | 1539 |
| Hurricane Frances | 09/04/04 | 1545 |
| Hurricane Ivan | 09/15/04 | 1551 |
| Hurricane Jeanne | 09/26/04 | 1561 |
| Hurricane Katrina Evacuation | 09/05/05 | 3220 |
| Severe Storms, Tornadoes | 02/03/07 | 1679 |
| Severe Storms, Tornadoes, and Flooding | 02/08/07 | 1680 |
| Tropical Storm Fay | 08/21/08 | 3288 |
| Severe Storms, Flooding, Tornadoes, Straight-line Winds | 05/27/09 | 1840 |
| Hurricane Matthew | 10/03/16 | 3377 |
| Hurricane Irma | 09/04/17 | 3385 |
| Hurricane Michael | 10/07/18 | 3405 |
| Hurricane Dorian | 08/28/19 | 3420 |
| Florida Covid-19 Pandemic | 03/25/20 | 4486 |

| | | |
|---|---|---|
| Hurricane Sally | 09/23/20 | 4564 |
| Hurricane Ian | 09/29/22 | 4673 |
| Hurricane Nicole | 12/13/22 | 4680 |
| Hurricane Idalia | 08/31/23 | 4734 |
| Hurricane Debby | 08/10/24 | 4806 |
| Hurricane Milton | 10/11/2024 | 4834 |

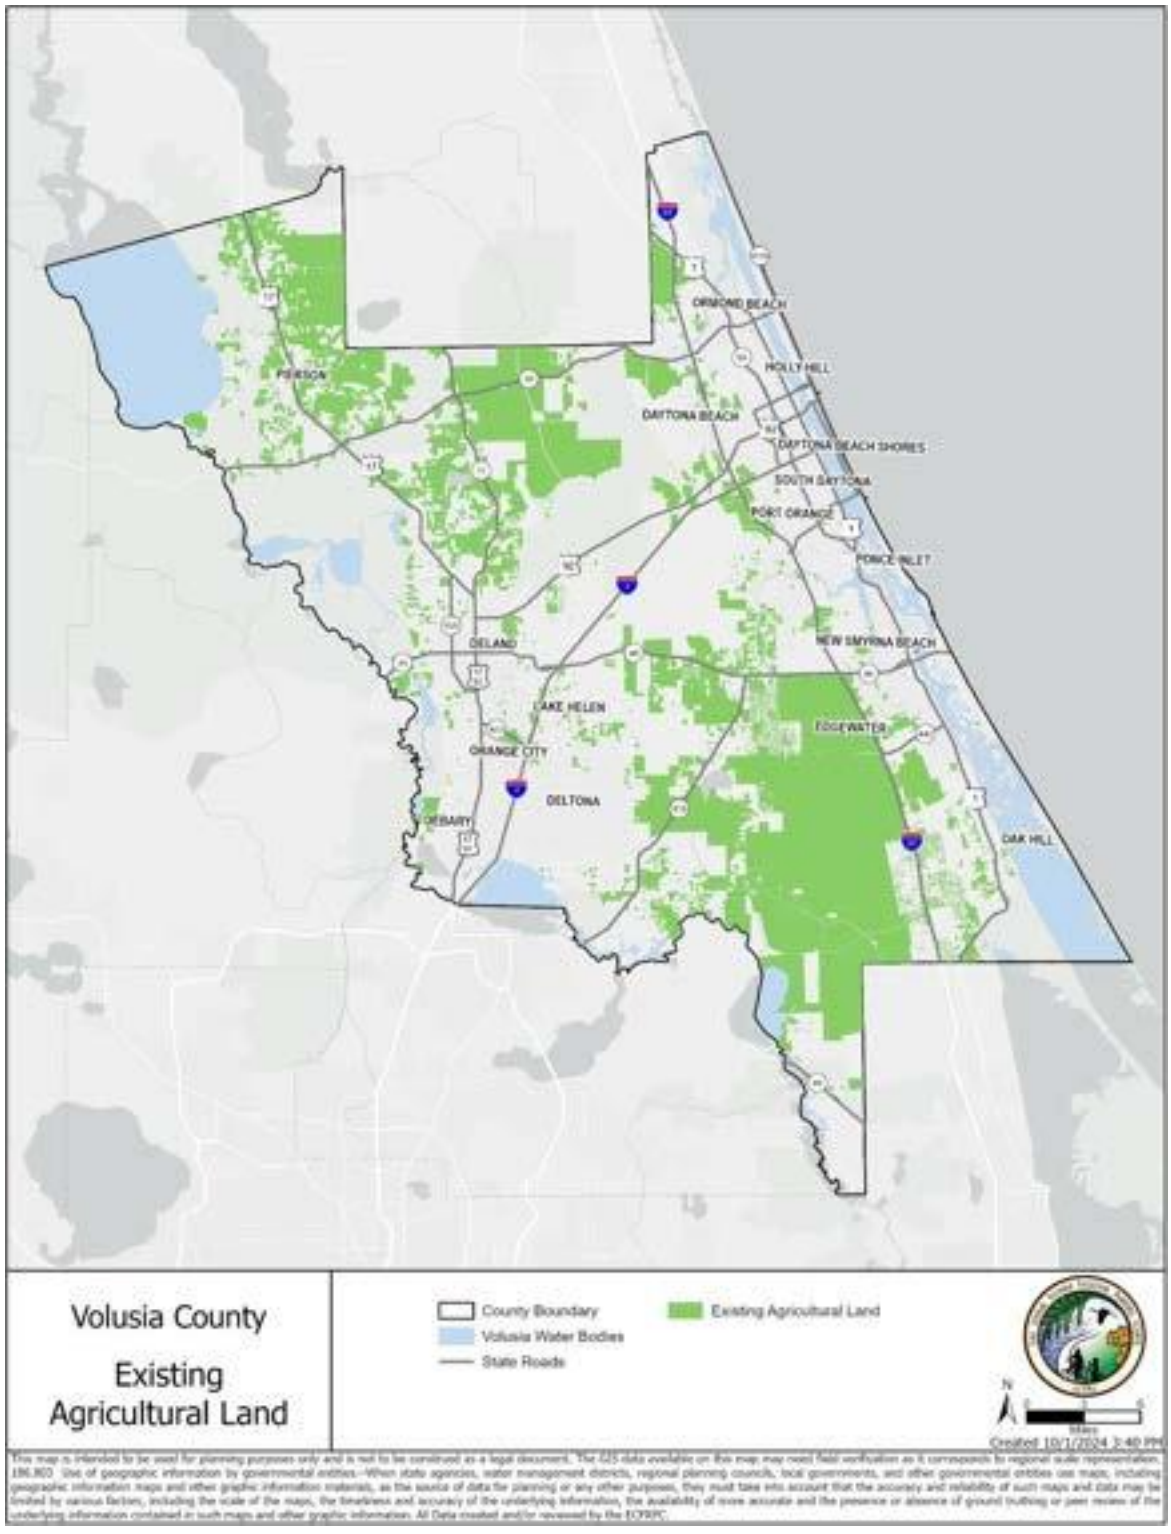
# NATURAL HAZARDS

## 5.2 AGRICULTURE

### Background

Agriculture includes Infestations, Invasive Species, and Diseases Infestation or disease in agriculture is when biological entities such as insects, rodents, bacteria or viruses significantly increase in a given area, affecting crops to the point where human and animal health is threatened, valuable crops may be damaged, or significant environmental resources may be lost. Examples of common Volusia infestations are caused by mosquitos, citrus greening, southern pine beetle, Florida Dampwood Termites, rats, or noxious plants like Brazilian Pepper Tree, etc.

Cattle diseases like Mad Cow, Hartwater, and hoof-and-mouth and citrus disease like Greening and Canker are of concern to Volusia farmers. Coordination with the University of Florida IFAS and Volusia County Extension is the first step in mitigation planning for agricultural infestations and disease. A notable source of information on the distribution of invasive plants, insects, animals and diseases in Volusia can be found at the Early Detection and Distribution Mapping system website, http://www.eddmaps.org, known as EDDMapS. The EDDMapS web-based mapping system documents invasive species and disease distribution. The site combines data from other databases and organizations as well as volunteer observations to create a national network of invasive species distribution data that is used by scientists, researchers, land managers, landowners, educators, conservationists, ecologists, farmers, foresters, state and national parks. Florida has ecosystems not found in the other 47 contiguous states, and it also has more non-native species than any state other than Hawaii.



If important natural resources such as mangroves, sea oats, oyster beds, etc. are overrun by invading species, then the county will be more vulnerable to the consequences of all other hazards. With the disappearance of natural barriers, lower impacting hazards will have increasingly stronger impacts on residents, businesses, critical infrastructure and the ability of the County to provide uninterrupted program operations. Faculty members at the University of Florida currently are conducting research and outreach programs to better understand and control these exotic invasive species. Until controls are in place the entire population of Volusia is at risk to the effects of a degrading ecosystem.

### Location and Spatial Extent

Agriculture incidents in Volusia County are quite rare and historically have not caused much damage to the community. In 2022, the county had 95,988 acres of farmland. Much of the agricultural land is located in the central western part of Volusia County, including Enterprise and Pierson. The extent encompasses small areas of crops within the county. Since 2022, there has been a 13% decrease in the number of farms that exist within the county. While the direct impacts may be rare, the indirect effects of an incident could be county-wide. From 2020 to 2024, at least 70 acres within the county are infested with non-native species.[1] **Section 5 Figure 1** displays the areas of the county most vulnerable to agricultural incidents based on areas zoned agricultural.

**Section 5: Table 3: Farm Overview 2022**[2]

| | 2022 | % Change Since 2017 |
|---|---|---|
| **Number of Farms** | 1,374 | -13 |
| **Land in Farms (Acres)** | 95,988 | -16 |
| **Average Size of Farm (Acres)** | 70 | -4 |

## Historical Occurrences

With its plant-friendly south temperate/subtropical climate, Florida particularly suffers from the introduction and unchecked growth of exotic plants. Almost half (1,180) of the 3,834 plant species found in Florida have arrived here since European occupation. Since plants are the base of the food chain, exotic "takeovers" can jeopardize plant-dependent wildlife and the whole ecosystem. The Florida Exotic Pest Plant Council (FLEPPC) has identified 152 non-native invasive species that are invading and disrupting native plant communities (2011 list). In 2022, that has now increased to 172[3]. EDDMapS notes over 299 separate invasive plants, animal, and insect species found in Volusia County to date. Many of the listed species are distributed throughout the county and are found in natural and disturbed landscapes.

In Florida, at least 60 species of exotic birds have bred in the wild. Despite this fact, the chance of persisting survival of non-indigenous birds is uncertain. Among those species which have survived and thrived as pests are Muscovy ducks, rock doves, European starlings, house sparrows, and monk parakeets. Though troublesome in other respects, some species (such as feral pigs) are important as prey for native predators (Florida panthers) and serve as an attraction for hunters. However, negative impacts from invasive species include habitat destruction, competition with native species, predation, hybridization, disease and parasites.

Florida mammal pests include the Norway rat, roof rat, house mouse and feral pig. Siting of invasive fish in Volusia include Lionfish, and Nile Tilapia. Annually, insect pests cause an estimated $1 billion in damages in Florida, and many of the worst pests are non-indigenous. According to entomologist Dr. John Capinera, 1,218 invading insect species become established in Florida annually. These non-natives arrive by flying, walking, swimming, rafting and by stowing away on cargo (often on infested plants commercially imported).

In 1997 and 1998, Florida's agricultural community was forced to focus time and resources on communicating to the general public about the Mediterranean fruit fly (Medfly) and the control methods used to eradicate the pest when the fly threatened the state's $6.8 million agriculture industry. The Florida Agricultural Extension is a partnership between the University of Florida Institute of Food and Agricultural Sciences (IFAS), the United States Department of Agriculture (USDA) and county governments in Florida to provide scientific knowledge and expertise to the public through educational programs. Volusia County has cattle farms, citrus orchards, ferneries, and other agricultural enterprises that are vulnerable to infestations and disease. Information on these infestations and diseases is available at http://www.volusia.org/services/community-services/extension/.

## Probability of Future Occurrences

Agricultural threats will continue to pose a threat to Volusia County for years to come, but the probability remains low for catastrophic farming impacts. Agriculture does remain a threat because although the number of farms has decreased since 2017, the market value of products sold increased by 47% and farm related income by 116%.

## 5.3 COASTAL EROSION

### Background

Coastal erosion is a hazard defined as the wearing away of land and loss of beach, shoreline, or dune material and is measured as the rate of change in the position or horizontal (landward) displacement of a shoreline over a period of time. Short-term erosion typically results from episodic natural events such as hurricanes and storm surge, windstorms and flooding hazards, but may be exacerbated by human activities such as boat wakes, removal of dune and vegetative buffers, shoreline hardening and dredging. Long-term erosion is a function of multi-year impacts such as wave action, sea level rise, sediment loss, subsidence and climate change. Climatic trends can change a beach from naturally accreting to eroding due to increased episodic erosion events caused by waves from an above-average number of storms and high tides, or the long-term effects of fluctuations in sea level.

Natural recovery from erosion can take years, often decades. If a beach or dune system does not recover quickly enough naturally, coastal and upland property may be exposed to further damage in subsequent coastal erosion and flooding events. Human actions to supplement natural coastal recovery, such as beach nourishment, dune stabilization and shoreline protection structures (e.g., sea walls, groins, jetties, etc.) can mitigate the hazard of coastal erosion, but may also exacerbate it under some circumstances.

Death and injury are not typically associated with coastal erosion; however, it can cause the destruction of buildings and infrastructure and represents a major threat to the local economies of coastal communities that rely on the financial benefits of recreational beaches.

### Location and Spatial Extent

All coastal areas in Volusia County are susceptible to coastal erosion. The jurisdictions most vulnerable are displayed in **Section 5 Figure 2**. Using Florida Department of Environment (FDEP) field data beginning in 1972, it is clear that Volusia County shorelines are moving due to erosion, accretion, and beach nourishment projects[4]. Further, in July 2023, FDEP released a *Critically Eroded Beaches in Florida* report that identifies four critically eroded beach areas (27.2miles), two non-critically eroded beach area (2 miles) and one critically eroded inlet shoreline area (0.6 mile) in Volusia County.

A 16.6-mile segment of beach (R51 – R143) along Ormond Beach, Daytona Beach, Daytona Beach Shores, Wilbur By The Sea and the Town of Ponce Inlet is critically eroded, threatening development and recreational interests, as well as sea turtle nesting areas where the dry sand beach has become very narrow. Most of this segment is armored with seawalls.

Due to the erosional impacts of Hurricane Ian and Nicole in 2022, there is a 0.9-mile segment of a noncritically eroded beach within the Town of Ponce Inlet between R143 to R148.2 and no structures are threatened. The north shoreline (0.6-mile) of Ponce de Leon Inlet is critically eroded and threatens recreational interests at the county park. The 8.4 miles of beaches (R160.8 – R207.8) south of Ponce de Leon Inlet within New Smyrna Beach and Bethune Beach are critically eroded. Private development and recreational interests, as well as sea turtle nesting habitats, are threatened. Much of New Smyrna Beach

[4] Foster, Emmet and Jenny Cheng. Shoreline Beach Change Estimates, Volusia County, 2000. Office of Beaches and Coastal Systems, Florida Department of Environmental Protection; Beaches and Shores Research Center, Florida State University.

is armored with seawalls, with Bethune Beach protected by a boulder rock revetment. The New Smyrna Beach area has received inlet sand transfer material from dredging within Ponce de Leon Inlet and additional material from dredging the Atlantic Intracoastal Waterway. A 1.1-mile segment of the Canaveral National Seashore (R207.8 – R214) south of Bethune Beach is also non-critically eroded without any threatened interests at this time.[5]

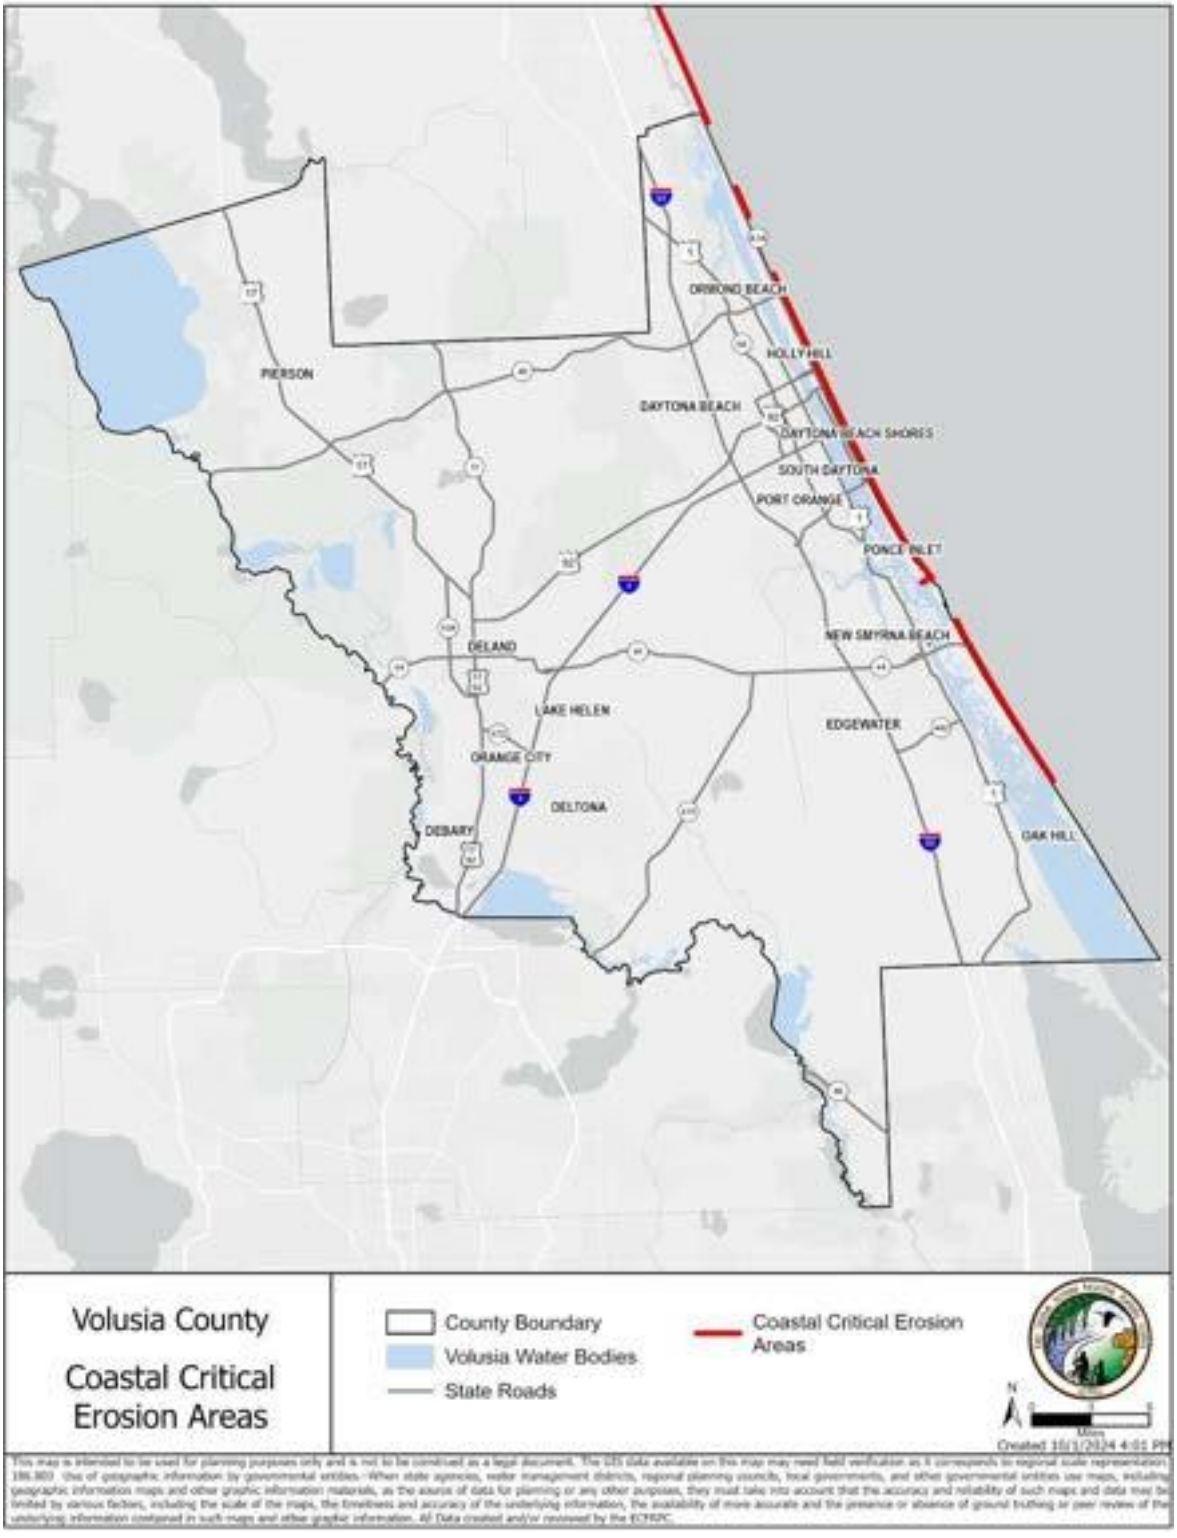
The beach ridge in Volusia County ranges from 300 – 3,000 feet in width. A majority of the county, ranging approximately from Ormond Beach to Bethune Beach, has fine-grained quartz sand. Sand in areas north and south of this area consist of a shell-quartz mixture and have steeper slopes than the central county. The southernmost mile of shoreline in Volusia County makes up part of the Canaveral National Seashore Park, while the northernmost area is part of the North Peninsula State Recreation Area.

## Historical Occurrences

Erosion events typically are part of other hazard events (e.g., storm surge and hurricanes) and the monetary damage for the erosion alone is unknown.

**Section 5: Table 4: Historical Coastal Erosion Impacts**

| LOCATION | DATE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|
| Volusia County | 9/14/1999 | 0/0 | $56,444,488 (2009 dollars) | Hurricane Floyd caused significant beach erosion in Volusia County. Of the property damage estimates, over $13 million was attributed to beach erosion. |
| St. Lucie and Volusia Counties | 10/14/1999 | 0/0 | $68,539,735 (2009 dollars) | Hurricane Irene caused beach loss of four to ten feet in the affected areas with damage in the millions. |
| Brevard and Volusia Counties | 9/04/2001 | 0/0 | $6,333,850 (2009 dollars) | Storm tide from a tropical storm reached two feet above normal, causing significant beach erosion. |
| St. Lucie and Volusia Counties | 9/25/2004 | 0/0 | $440,408,221 (2009 dollars) | Severe beach erosion was reported from Hurricane Jeanne, a category 3 storm. |
| Volusia County | 8/21/2008 | 0/0 | Unknown | New Smyrna Beach experienced a loss of 50 feet of new sand due to wind gust of over 45 MPH from Tropical Storm Fay. Even Orange and Seminole counties experienced riverine erosion along the St. Johns River. |
| St. Johns, Flagler, Volusia and Brevard Counties | 10/6/16 | 0/0 | $15.8 million | Under executive authority, Governor Rick Scott announced on January 27, 2017, that emergency funding of $15.8 million would be made available for emergency beach and dune repairs in response to the damage caused by Hurricane Matthew. The emergency funding was intended for |



[5] Critically Eroded Beaches in Florida Office of Resilience and Coastal Protection Florida Department of Environmental Protection July 2023

| LOCATION | DATE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|
| | | | | immediate use to address critically eroded beaches where there was an imminent threat to beachfront structures, such as roadways, homes and businesses. |
| Volusia County | September-November 2022 | 0/0 | Unknown | Several structures either partially or fully collapsed into the ocean throughout Volusia County. Elsewhere, significant damage was noted to dunes, beach access crossovers, seawalls, piers, and boardwalks, many of which were already in a weakened state due to Hurricane Ian. Numerous structures, including homes, condominiums, and hotels were deemed unsafe and required additional analysis by engineers as well as county and state officials. Elevated water levels along the intracoastal waters resulted in damage to numerous boat docks and marinas throughout the county. |

Source: National Climatic Data Center

The severity of coastal erosion is typically measured through a quantitative assessment of annual shoreline change for a given beach cross-section of profile (feet or meters per year) over a long period of time. Erosion rates vary as a function of shoreline type and are influenced primarily by episodic events but can be used in land use and hazard management to define areas of critical concern.

**Section 5: Figure 2: Critical Erosion Areas in Volusia County**

Source: Florida Department of Environmental Protection, Division of Beaches and Coastal Systems, 2024

## Probability of Future Occurrences

The probability of the continuing occurrence of coastal erosion in the coastal areas of Volusia County is high. Florida's Bureau of Beaches and Coastal Systems estimates an average of a one-foot loss annually for Volusia County in stable or accretionary areas. The area between Ormond Beach and Daytona Beach Shores are eroding at a rate between zero and 0.5 feet annually, according to a 2000 study. Northern areas of the county, including the North Peninsula State Recreation Area, lose between 0.5 and 1.5 feet annually. Areas south of Ormond Beach to Daytona Beach Shores stretch have lower expected erosion rates due to extensive armoring (e.g., beach walls and revetments). However, natural erosion is occurring southward from South of Ponce de Leon Inlet. Loss rates are as high as 1.5 feet per year and decrease heading in a southerly direction. The damaging impacts of coastal erosion are lessened through continuous (and costly) beach nourishment and structural shoreline protection measures. However, it is likely that the impacts of coastal erosion will increase in severity due to future episodic storm events.

The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts and that future mitigation and adaptation strategies related to this hazard should be considered.

## 5.4 DROUGHT

### Background

Drought is a normal part of virtually all climatic regions, including areas with high and low average rainfall. Drought is the consequence of a natural reduction in the amount of precipitation expected over an extended period of time, usually a season or more in length. High temperatures, high winds, and low humidity can exacerbate drought conditions. In addition, human actions and demands for water resources can hasten drought-related impacts. Droughts are typically classified into one of four types[6]:

- **Meteorological:** The degree of dryness or departure of actual precipitation from an expected average or normal amount based on monthly, seasonal, or annual time scales.
- **Hydrologic:** The effects of precipitation shortfalls on stream flows and reservoir, lake, and groundwater levels.
- **Agricultural:** Soil moisture deficiencies relative to water demands of plant life, usually crops.
- **Socioeconomic:** The effect of demands for water exceeding the supply as a result of a weather-related supply shortfall.

Droughts are slow-onset hazards, but over time can have very damaging effects to crops, municipal water supplies, recreational uses, and wildlife. If droughts extend over a number of years, the direct and indirect economic impact can be significant. The National Weather Service alerts are displayed in **Section 5 Figure 3**.

### Location and Spatial Extent

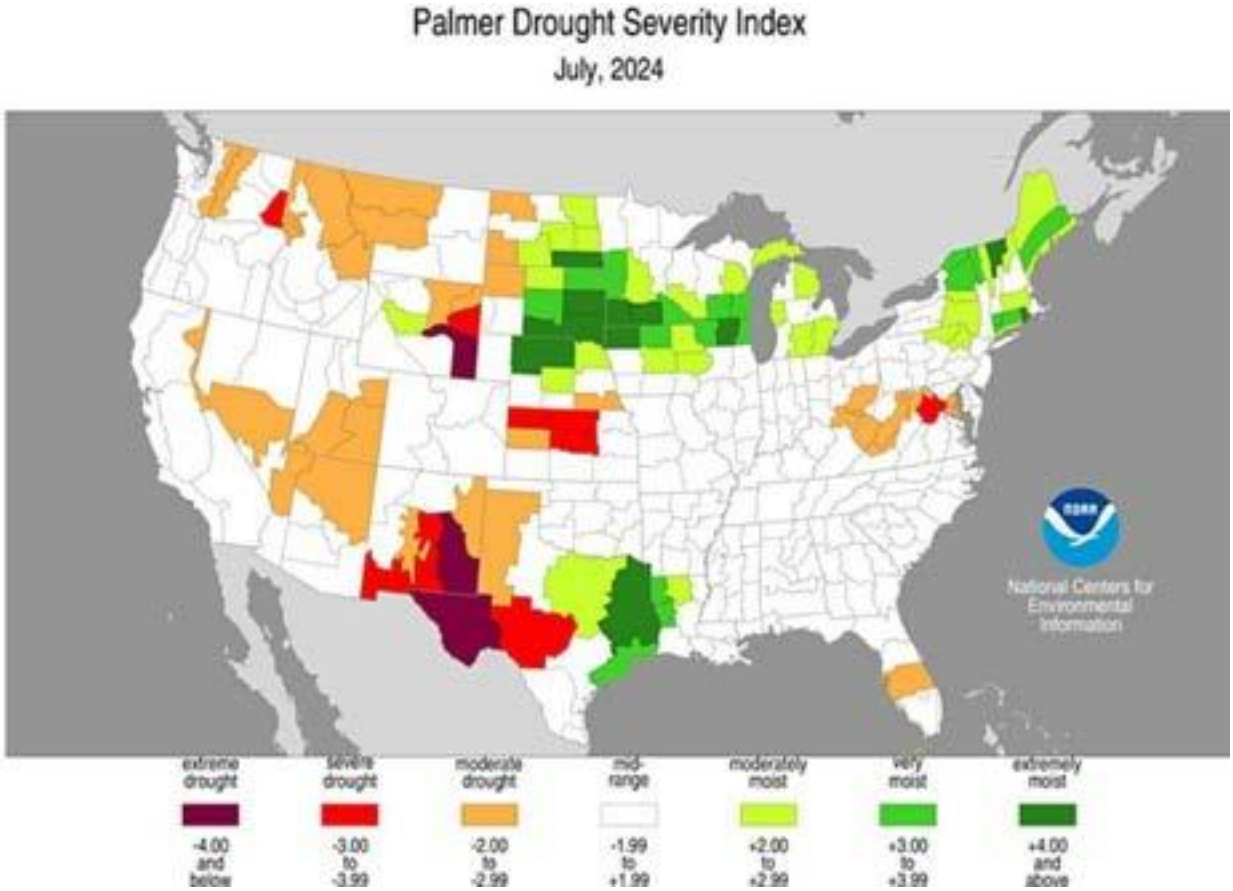
The Palmer Drought Severity Index (PDSI) is based on observed drought conditions and range from -0.5 (incipient dry spell) to -4.0 (extreme drought). Evident in **Section 5: Figure 3,** the Palmer Drought Severity Index Summary Map for the United States, droughts affect most areas of the United States but are less severe in the Eastern United States.

Drought typically covers a large area and cannot be confined to any geographic or political boundaries; thus, Volusia County and all its jurisdictions are equally susceptible. According to the Palmer Drought Severity Index, Florida has a relatively low risk for drought hazard. However, local areas may experience much more severe and/or frequent drought events than what is represented on the Palmer Drought Severity Index map. Further, it is assumed that Volusia County would be uniformly exposed to drought, making the spatial extent potentially widespread. During long periods of drought, disruption in the water cycle can have potentially damaging effects, including substantial crop loss in the northwestern portion of the county. Periods of drought can exacerbate the ignition of wildfires that can damage the natural and built environment, as has occurred before in Volusia County.

One of the most severe cases of drought in Florida occurred from October 2010 until June of 2012 in which a major portion of the state displayed D3 (Drought Extreme) conditions. During this extensive period, the two-month period of April and May of 2012, showed the highest level of drought concern with portions of the state under a D-4 Drought Exceptional condition (The National Drought Mitigation Center, 2014).

[6] Multi-Hazard Identification and Risk Assessment: A Cornerstone of the National Mitigation Strategy, FEMA

Thus, Volusia County can experience the full array of drought conditions, from D0 to D4. NOAA describes D4 events as having "extensive and widespread crop and pasture losses, fire risk, shortages of water in reservoirs, stream and wells that yield water emergencies. D4 can loosely be likened to a "once-in-a-generation" type of drought noted by the second percentile, or a 1 in 50-year drought.



**Section 5: Figure 3: Drought Monitor Intensities**

| National Weather Service Alerts | |
|---|---|
| Alert | Criteria |
| D0 Abnormally Dry | Going into drought: short-term dryness slowing planting, growth of crops or pastures. Coming out of drought: some lingering water deficits; pastures or crops not fully recovered. |
| D1 Moderate Drought | Some damage to crops, pastures, streams, reservoirs, or wells low, some water shortages developing or imminent, and voluntary water-use restrictions requested. |
| D2 Severe Drought | Crop or pasture losses are likely, water shortages common and water restrictions imposed. |
| D3 Extreme Drought | Major crop and pasture losses with widespread water shortages or restrictions. |
| D4 Exceptional Drought | Exceptional and widespread crop and pasture loss, shortages of water in reservoirs, streams, and wells creating water emergencies. |

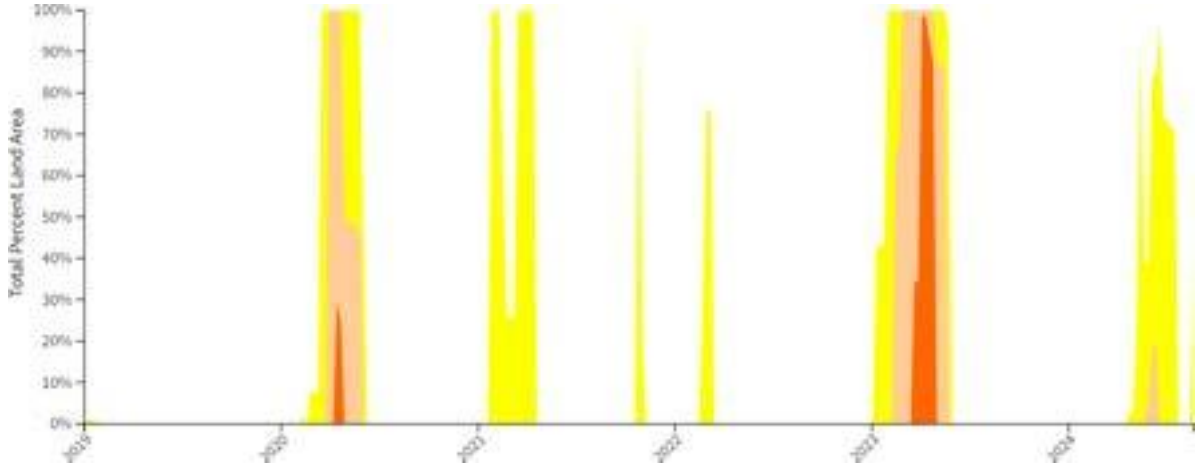
## Historical Occurrences



Secondary research was conducted to determine the historical drought occurrences in Volusia County. Volusia County is part of the St. Johns River Water Management District, which monitors well levels throughout its jurisdiction. The Keetch Bryam Drought Index is a numerical scale (0-800) that measures the amount of moisture in the soil. A zero indicates wet, full saturation conditions while an 800 represents extreme drought conditions. It is often used to assess the danger of wildfires but is also an indication of drought. Therefore, it is reported where information is available. The following highlights some of the events from the years.

**1981:** Drought conditions were reported throughout Southern Florida. Three firefighters narrowly escaped injury while fighting drought-related wildfire. Officials from St. Johns River Water Management District ordered a mandatory 15 percent reduction in water use for public water supply, industrial, commercial and self-supplied users[8].

[7] https://www.ncei.noaa.gov/access/monitoring/historical-palmers/maps/psi/202301-202407
[8] "Winds, Dry Weather Worsen Central Florida Fires. Ocala Star-Banner. Associated Press. July 1, 1981.

- **1985:** A short, six-month drought was reported in Volusia County. In addition to sparking wildfires, it led to a water warning calling for voluntary water usage restrictions[9]. On June 20, 1985, the water warning was expanded throughout St. Johns Water Management District. Volusia County had been placed under warning months earlier[10]. On August 14, the warning was lifted as counties were able to meet usage demands due to recent rainfall.
- **1998:** Volusia County reported a Drought Index reading of 700. Wildfires were abundant throughout the County. This year was reported as having the driest conditions in 50 years. The drought did not officially end until 2002[11].
- **January 1999:** Volusia County reported a Drought Index of 500.
- **May 2000:** The May Drought Index was reported at 432 – 570. By early 2001 the Drought Index average for Volusia County was 601.
- **February 2001:** During this drought, drought index D4 covered 39.08% of Florida.
- **April 2006 – August 2008:** This prolonged drought covered much of the state in D2 and D3 conditions.
- **October 2010 – June 2012:** This prolonged drought covered much of the state in D1 and D2 conditions. D3 conditions peaked in June 2012, covering more than 80% of the state.
- **Spring 2024:** Volusia County was in a drought nearly the entire first quarter of the year, reaching D2 conditions as shown in **Section 5 Figure 4**. [12]

**Section 5: Figure 5: Drought Conditions for Volusia County**

Source: NOAA

## Probability of Future Occurrences

It is assumed that all of Volusia County is uniformly exposed to a drought event. As with any location, some areas of the county may be affected more severely than others during a drought. Given the

[9] "Fires Still Rage in Volusia County." Evening Independent. Associated Press.
[10] "St. John's Water District Expands Warning Area." Gainesville Sun. Associated Press. June 20, 1985.
[11] NAVARRO, MIREYA. "Thousands Flee Florida Homes as Fires Surge." July 2, 1998. Section A, page 1, New York Times.
[12] https://www.drought.gov/states/florida/county/volusia

frequency of previous events, warm temperatures, and average rainfall, the probability of future drought events is high.

In partnership with County and municipal staff and the St. Johns River Water Management District, a contingency plan is in place to restrict water use across the county in an effort assist with water conservation efforts during periods of drought. Some direct impacts related to drought include reduced crop production, increased fire hazards, reduced water levels at major lakes and rivers, damage to fish habitat, and income loss for the agriculture industry.

The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts and that future mitigation and adaptation strategies related to this hazard should be considered.

## 5.5 EXTREME TEMPERATURES

### Background

Extreme temperature generally refers to temperatures that are unusually high or low compared to typical weather conditions for a specific location and time of year. However, defining what constitutes "extreme" can be challenging due to context, location, history, and duration. Volusia County defines extreme temperature in two ways.

- **Extreme cold** may include snow, sleet, freezing rain, or a mix of these wintry forms of precipitation. A winter storm can range from moderate snow over a period of a few hours to blizzard conditions with blinding wind-driven snow that lasts for several days. Ice storms occur when moisture falls and freezes immediately upon impact on trees, power lines, communication towers, structures, roads and other hard surfaces. Winter storms and ice storms can bring down trees, cause widespread power outages, damage property, and cause fatalities and injuries to human life. All winter storm events have the potential to present dangerous conditions to Volusia County.
- **Extreme heat** is defined as temperatures that hover 99 degrees or more above the average high temperature of 90°F for the region and last for 3 or more consecutive days. Humid or muggy conditions, which add to the discomfort of high temperatures, occur when a "dome" of high atmospheric pressure traps hazy, damp air near the ground.

### Location and Spatial Extent

The entirety of Volusia County and its jurisdictions are susceptible to extreme temperatures. Volusia County, being in the southern portion of the nation, rarely experiences extreme cold events, and thus has a much lower risk than more northern areas of the country. Typically, there have not been many winter storms that have caused damage in Volusia County. Volusia County does succumb more frequently to extreme heat events.

A severe winter storm occurs when the surface air temperature is expected to be 32°F or below over a widespread area for at least 3 or more consecutive days (this is the minimum extent of a severe winter storm). Use of the term is usually restricted to aversive situations or occasions when wind or other conditions prevent frost. "Killing" may be used during the growing season when the temperature is expected to be low enough for a sufficient duration to kill all but the hardiest herbaceous crops. Extreme cold can immobilize an entire region. Even areas, such as Volusia County, that normally experience mild winters can be hit with a major extreme cold winter event. Winter storms can result in ice, localized flooding, closed highways, blocked roads, downed power lines and hypothermia.

There is a low probability that Volusia County and its jurisdictions will experience 72 consecutive hours of temperatures below 32°F on an annual basis. However, outlier storms (such as the Great Blizzard of 1899) have been observed within Volusia County and are often the result of arctic activity that affects the entire North American continent. These events are of low probability on an annual basis but can occur.

Volusia County and its jurisdictions are more likely to experience freezing temperatures for much shorter durations of time. More specifically, temperatures tend to dip below the freezing threshold during nighttime from the months of November to February.

The extent of extreme heat is determined as 3 -10 consecutive days of 99°F or higher and at least 50% of the County would be impacted during an event. Trends show increasing temperatures for longer durations. This puts the entire county and its residents at much greater risk of extreme heat events.

## Historical Occurrences

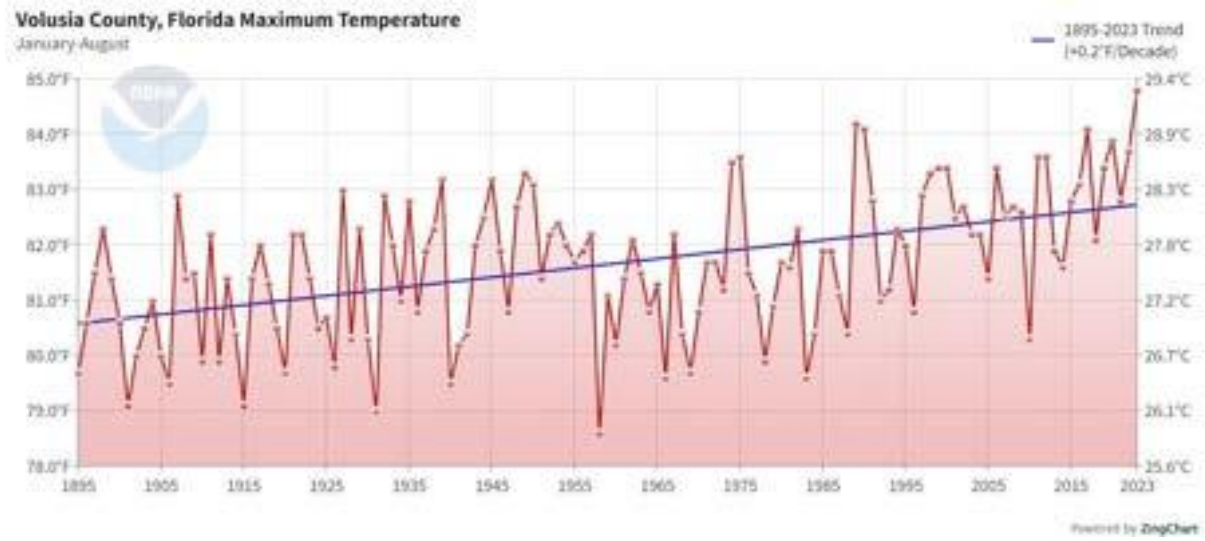
Temperatures within Volusia County, Florida were recorded as low as 6 degrees Fahrenheit in December 1962, according to the National Oceanographic and Atmospheric Administration. Temperatures dropped to 6 degrees for five consecutive days, although the temperature did not sustain at this level continuously. According to a previous Volusia County Emergency Operations Management manager, there were also two severe winter freezes in the mid to late 80's. These events killed many orange groves in Volusia County and around the state. There were no reports of death, injuries, or property damage as a result of the winter weather.

Despite the rare chance of winter storm occurrence, one snow event was reported in 2008 according to NOAA National Climatic Data Center (NCDC). On January 3, 2008, cold breezes off the Atlantic produced brief snow flurries along the coast of Volusia County. On January 9, 2010, sleet was reported in Volusia County.

However, freezing temperatures are not likely to persist for more than 24 hours at a time. In most circumstances, temperatures will only dip below freezing for a small number of hours during the nighttime. A number of these events were reported in Volusia County in the 2014- and 2015-time frame, one of the most recent and severe being the 'polar vortex' super storm on January 6th and 7th, 2014. The early months of 2025 brought freezing temperatures across the state. Volusia County opened cold weather shelters and issued numerous freeze and cold weather advisories for residents.

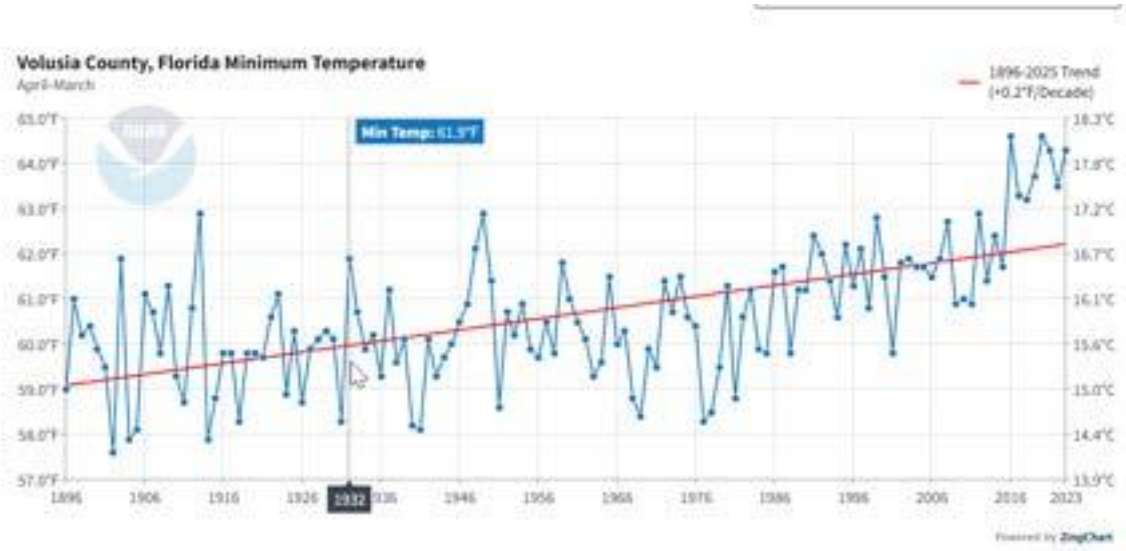
According to scientists at NASA's Goddard Institute for Space Studies (GISS) in New York, July 2023 was hotter than any other month in the global temperature record. Temperatures above 95 F occur most often in June, July, August, and occasionally in May and September. From January 2020 to January 2025 Volusia County experienced temperatures 99 degrees or above on 2 occasions, June 23, 2022 at 101 degrees and August 10, 2023, at 99 degrees.

## Probability of Future Occurrences



There is a low probability of future winter storm occurrences in Volusia County; however, outlier storms such as the 1899 Blizzard can occur with an extremely low probability. Winter storm events will remain an infrequent occurrence in Volusia County. Given the average winter temperature of 61.5 degrees Fahrenheit, it is highly unlikely that a winter event beyond light snow will occur. Based on the data produced by NOAA shown in **Section 5: Figure 7**, extreme cold trends are increasing.

It is assumed that Volusia County experiences extreme heat periodically and will continue to do so. The average temperature and number of consecutive days of extreme heat are likely to increase, bringing new challenges to human health and infrastructure. The historical county maximum temperature in January through August in 1895 was 79.7 degrees, whereas the current day maximum temperature is 84.8 degrees.[13] Based on the data produced by NOAA shown in **Section 5: Figure 6**, extreme heat trends are increasing.



[13]Source: NOAA National Centers for Environmental information, Climate at a Glance: County Time Series, published August 2024, retrieved on August 13, 2024, from https://www.ncei.noaa.gov/access/monitoring/climate-at-a-glance/county/time-series

Future impacts throughout Volusia County could include damage to crops, nurseries and tree farms (e.g., Pierson is the fern capital of the world), and other vegetation; sleet could increase the number of vehicular accidents); and the increased use of alternate heating sources in homes could cause potential structural fires. Also, agriculture may be disproportionately affected.

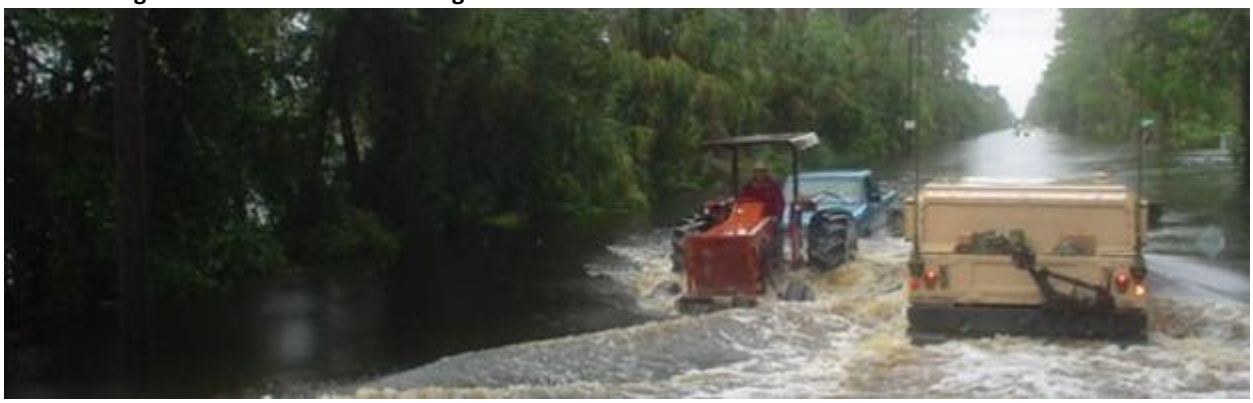
**Section 5: Figure 6: Florida Maximum Annual Temperature Since 1895**

**Section 5: Figure 7: Florida Maximum Annual Temperature Since 1895**

The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts and that future mitigation and adaptation strategies related to this hazard should be considered.

## 5.6 FLOOD

### Background



Flooding is the most frequent and costly natural hazard in the United States, a hazard that has caused more than 10,000 deaths since 1900. Nearly 90 percent of presidential disaster declarations result from natural events where flooding was a major component.

Floods generally result from excessive precipitation and can be classified under two categories: general floods, precipitation over a given river basin for a long period of time along with storm-induced wave or tidal action; and flash floods, the product of heavy localized precipitation in a short time period over a given location. The severity of flooding events is typically determined by a combination of several major factors, including stream and river basin topography and physiography; precipitation and weather patterns; recent soil moisture conditions; and the degree of vegetative clearing and impervious surface.

- A **general flood** is usually a long-term event that may last for several days. The primary types of general flooding include riverine, coastal, and urban flooding. Riverine flooding is a function of excessive precipitation levels and water runoff volumes within the watershed of a stream or river. Coastal flooding is typically a result of storm surge, wind-driven waves and heavy rainfall produced by hurricanes, tropical storms and other large coastal storms[14]. Urban flooding occurs where manmade development has obstructed the natural flow of water and decreased the ability of natural groundcover to absorb and retain surface water runoff.

- Most **flash flooding** is caused by slow-moving thunderstorms in a local area or by heavy rains associated with hurricanes and tropical storms. However, flash flooding events may also occur from a dam or levee failure within minutes or hours of heavy amounts of rainfall, or from a sudden release of water held by a retention basin or other stormwater control facility. Although flash flooding occurs most often along mountain streams, it is also common in urbanized areas where much of the ground is covered by impervious surfaces.

**Section 5: Figure 8: Flood Waters Covering Streets**

Maytown Road experienced extreme flooding during the 2009 Volusia County rainstorms

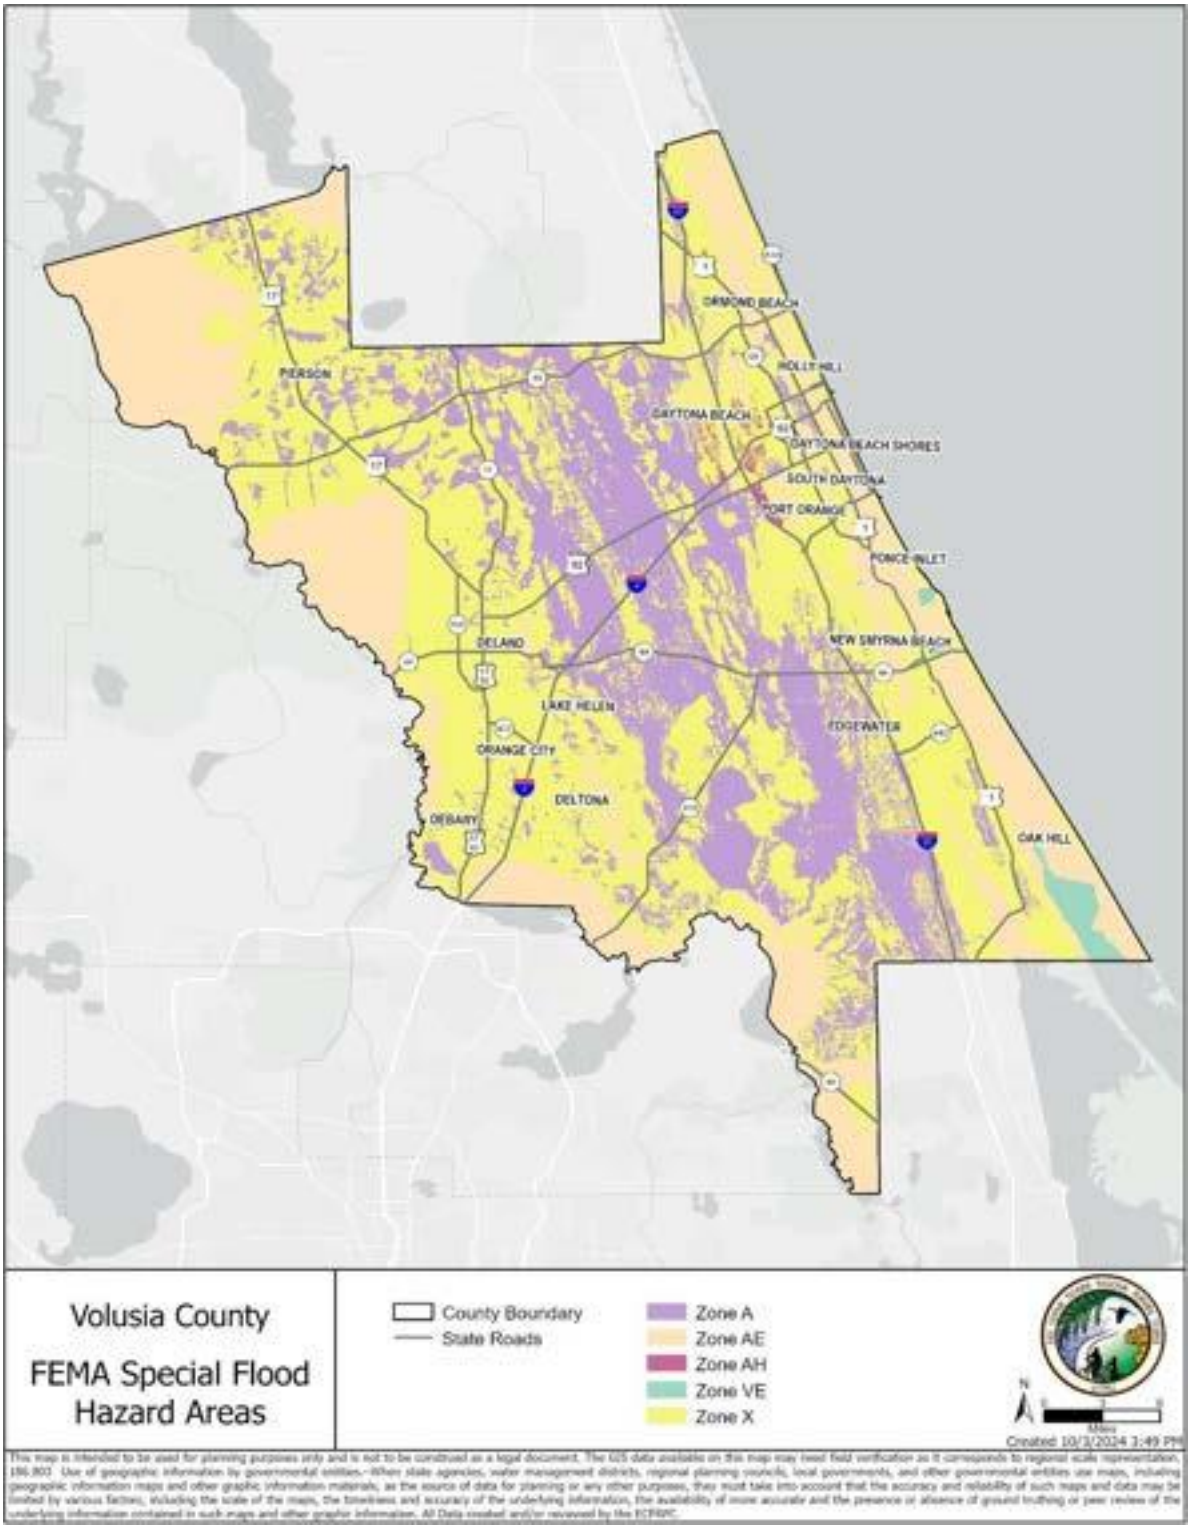
[14] While briefly mentioned here, coastal flooding is more thoroughly addressed under the "rising coastal water" hazard.

The periodic flooding of lands adjacent to rivers, streams and shorelines (land known as floodplain) is a natural and inevitable occurrence that can be expected to take place based upon established recurrence intervals. Floodplains are designated by the frequency of floods that is large enough to cover them. There are two ways to determine the frequency of flood events

1. By plotting a graph of the size of all known floods for an area and determining how often floods of a particular size occur, and
2. the chance of occurrence in a given year, which is the percentage of the probability of flooding each year.

For example, the 1 percent annual chance flood refers to an area in the 100-year floodplain and has a 1 percent chance of occurring in any given year. Similarly, the 0.2 percent flood covers the 500-year floodplain and has a 0.2 percent chance of occurring in any given year. The recurrence interval of a flood is defined as the average time interval, in years, expected between a flood event of a particular magnitude and an equal or larger flood. Flood magnitude increases with increasing recurrence intervals.

## Location and Spatial Extent



All areas of Volusia County are susceptible to riverine and urban (stormwater) flooding, and its coastal communities are also very susceptible to tidal and coastal flooding due to coastal storm events including storm surge.[15] **Section 5: Figure 9** illustrates the location and extent of currently mapped Special Flood Hazard Areas for Volusia County based on best available FEMA Digital Flood Insurance Rate Map (DFIRM) data.[16] As displayed in the image, the hazard differs across the county. The differences include Zones A/AE (100-year floodplain), Zone VE (100-year coastal flood zones, associated with wave action) and Zone X (500-year floodplain). It is important to note that while FEMA digital flood data is recognized as best available data for planning purposes, it does not always reflect the most accurate and up-to-date flood risk. Impacts have included flooding of hundreds of homes, schools, and roads, including the blockage of I-95 in Ormond Beach during a 2004 flash flood. Flooding and flood-related losses sometimes occur outside of delineated “100 year” special flood hazard areas during 500-year storm events or when rain events are exacerbated by strong winds. Changes in topography (and associated water runoff) generally do not impact Volusia County due to its flat terrain.

Water can rise to exceptional levels during hurricane, storm surge, flash flood and thunderstorm conditions. Water levels have historically risen to 6 feet within southwestern Volusia County following one of these events, with increased water heights for coastal communities due to Florida’s semidiurnal tides. Roadway flooding has been seen rising between 1 and 5 feet.

There are a number of areas that are disproportionately affected to flooding, including areas adjacent to the St. Johns River (Maytown to Enterprise).

[15] Storm surge is addressed separately within this section.

**Section 5: Figure 9: Special Flood Hazard Areas in Volusia County**

Source: Federal Emergency Management Agency

## Historical Occurrences

According to the National Climatic Data Center, there have been over 20 reported flood events in Volusia County since 1994. According to the data as shown in **Section 5: Table 5**, there was over $20 million in property damage (not including recorded agricultural losses) during this period.

**Section 5: Table 5: Historical Flood Impacts in Volusia County**

| LOCATION | DATE | TYPE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| Peninsular | 9/15/1994 | Flood | 0/0 | $757,242 | Two synoptic-scale systems, one tropical and one non-tropical brought heavy rain to most of peninsular Florida the last half of September. Other sections of Florida, particularly northeast and east central, experienced urban flooding which closed roads and flooded schools and homes in Duval County and flooded subdivisions in Flagler, Volusia, St. Johns and Brevard counties. |
| Countywide | 10/11/1994 | Flood | 0/0 | $757,242 | Heavy rains across much of northeast Florida caused widespread flooding of roadways and vehicles and minor flooding of schools, businesses and residences. Strong onshore winds caused significant beach erosion and minor coastal flooding along portions of the northeast coast. |
| Oak Hill | 9/19/1999 | Flash Flood | 0/0 | $13,439 | Heavy rain of 2 to 4 inches produced flooding in Oak Hill. Two homes had minor flooding. |
| Edgewater | 9/14/2001 | Flash Flood | 0/0 | $316,693 | Rainfall from Tropical Storm Gabrielle flooded about 25 homes and apartments in Edgewater and New Smyrna Beach. About 5 homes were flooded along the Tomoka River in Daytona Beach. Roadway and small stream flooding was reported over much of the county. |
| Ponce Park | 11/14/2001 | Flash Flood | 0/0 | $633,385 | Showers and thunderstorms dumped over 5 inches of rain in coastal sections of Volusia County. Thirty-five homes in the Ponce Inlet, Daytona Beach and Ormond by the Sea areas received some water damage. |
| Deltona | 8/19/2002 | Urban Flood | 0/0 | $0 | Thunderstorms produced street flooding in Deltona. |
| Ormond Beach | 8/8/2004 | Flash Flood | 0/0 | $0 | Heavy rain in the morning hours brought 24-hour rain totals to near 7 inches. Widespread street flooding with water in two homes in Ormond Beach was reported. A lane of Interstate 95 was blocked by flood waters. |
| Countywide | 9/5/2004 | Flash Flood | 0/0 | $0 | From 10 to 12 inches of rain from the northern rain bands of Hurricane Frances produced widespread flooding of homes, businesses and roads across coastal communities as well as in Deltona, and DeLand. |

| LOCATION | DATE | TYPE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| Countywide | 9/9/2004 | Flood | 0/0 | $5,564,516 | Hurricane Frances produced 6 to 10 inches of heavy rain over much of the middle and upper St. Johns River Basin. Beginning on September 9th, water levels began to reach flood stage on the middle basin mainly around Geneva, and Sanford. Levels continued to rise well above flood stage and began to fall slightly until Hurricane Jeanne followed the same track across the state. Significant flooding followed with a record crest of 10.1 feet being reached at Lake Harney Gage. Many homes were flooded near Stone Island. |
| Countywide | 8/21/2008 | Flash Flood | 0/0 | $13,400,000 | As Tropical Storm Fay drifted north in the Volusia County offshore waters, hours of torrential rain fell across southern Volusia County. Close to 200 homes were flooded. The damage was nearly $13 million. Torrential rain from Tropical Storm Fay produced widespread flooding across Brevard and central and southern Volusia counties. |
| Deltona | 5/19/2009 | Flood | 0/0 | $68,600,000 | Multiple rounds of heavy rainfall over five days led to several feet of standing water in many areas of eastern Volusia County. Rainfall reached 18 to 28 inches in several coastal areas. |
| Ormond Beach | 5/22/2009 | Flash Flood | 0/0 | N/A | High levels of pre-existing flood waters were exacerbated as two to four inches of additional rainfall occurred in less than three hours. Standing water rose to three feet or higher in several locations. Flood waters entered additional homes. Flash flood damage estimates were included collectively in the five-day flood event from May 19-24. |
| Isleboro | 9/23/2014 | Flash Flood | 0/0 | $562,000 | A very moist atmosphere coupled with a series of upper-level disturbances resulted in several persistent rain bands. Significant urban and small stream flooding affected portions of Melbourne/Palm Bay and Lake Mary/Winter Park. Flash flooding resulted in rapid water accumulation in New Smyrna Beach and from Holly Hill to Daytona Beach to Port Orange, where numerous roadways became impassable and over 100 homes sustained damage from the rising flood waters. Rainfall totals during the 24-hour period of greatest impact reached 6-12 inches. Flood damage estimates within Volusia County were 3.65 million dollars. No injuries reported. |
| Holly Hill | 9/24/2014 | Flash Flood | 0/0 | $3,090,000 | Same as above. |

| LOCATION | DATE | TYPE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| Ormond-by-the-Sea | 10/6/2016 | Flood | 0/0 | $0 | Associated with Hurricane Matthew (see Hurricanes) |
| Seville | 9/10/2017 | Flood | 0/0 | $0 | Associated with Hurricane Irma. (see Hurricanes) |
| Ormond-by-the-Sea | 11/23/2017 | Flood | 0/0 | $0 | A strong thunderstorm embedded within a rain area ahead of a cold front intensified as it traveled quickly northeast across Volusia County. Mobile homes were damaged well inland in DeLand, then over 30 minutes later, the storm damaged mobile homes in Daytona Beach. |
| Daytona Beach | 11/5/2021 | Flood | 0/0 | $500,000 | A very slow-moving front produced persistent heavy rains across a portion of Volusia County. The total of twenty-four-hour rain totals were 6-10 inches, however most of the rain fell in less than 12 hours, impacting Daytona Beach and Port Orange. As much as 5-6 inches accumulated between 1500 and 1800 LST. Numerous roadways were flooded, with as much as 1-2 feet of standing water in some localized areas, resulting in road closures. |
| Volusia County | 9/28/2022 | Flood | 4/0 | $3,400,000 | Rainfall totals averaging between 10 to 16 inches, with locally higher amounts of up to 20 inches were reported particularly in the coastal part of the county, resulting in widespread residential, street, urban, and poor drainage flooding. A county damage assessment indicated 3554 structures affected, 2602 with minor damage, 645 with major damage, and 48 destroyed, mainly due to widespread and historic flooding. The combined effects of Hurricane Ian led to a total estimated damage of approximately $340M. |

| LOCATION | DATE | TYPE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| Volusia County | 11/08/2022 | Flood | 0/0 | $0 | Rainfall totals of 3-6 inches, which fell between 0700EST on the 8th and 1500EST on the 10th led to generally nuisance type to minor street flooding across portions of Volusia County. The St. Johns River at Astor, which was already in moderate flood stage due to the remnant effects of Hurricane Ian, experienced water level rises as early as the 8th due to increasing north to northeast winds impeding the river's flow. Renewed flooding was reported along numerous streets and communities along the river in Astor. At DeLand, already in minor flood stage, river gauges recorded a rise into moderate flood stage on the 9th. |
| West Holly Hill | 9/30/2023 | Flood | 0/0 | $0 | Volusia County Fire Rescue reported flooding of several areas in Ormond Beach due to excessive rainfall. |
| Ormond Beach | 9/30/2023 | Flood | 0/0 | $0 | Heavy rainfall led to flooding in Ormond Beach in Volusia County. |
| Volusia County | 10/10/2024 | Flood | 0/0 | $240,000,000 | Volusia County Emergency Management reported significant urban, street, and low-lying flooding as a result of 6 to 12 inches of rain in association with Hurricane Milton. A period of very heavy rainfall rates associated with the core of the storm led to flash flooding during the overnight period (Oct 9 - 10). The heavy rain that fell as a result of the storm also led to a long-term river flood event along the St. Johns with the river near Geneva entering major flood on Oct 14, peaking at 10.15 feet on Oct 15. At DeLand, the river rapidly rose to major flood stage on Oct 11, peaking at 5.49 ft on Oct. 14. Downstream at Astor, the river was already in a minor flood stage at the beginning of the event and quickly rose to major the morning of Oct 10, peaking at 4.81 ft on Oct 12, a new record for the site. |

***NOTE: ALL HISTORICAL OCCURRENCES IN THIS REPORT ARE THE MOST RECENT AS DOCUMENTED BY THE NATIONAL CLIMATIC DATA CENTER***

According to the emergency management officials from the Volusia County jurisdictions, another significant flood occurred during the Memorial Day Weekend in May 2009 that was not included in the

[17]https://www.ncdc.noaa.gov/stormevents/listevents.jsp?eventType=%28Z%29+Flood&beginDate_mm=05&beginDate_dd=01&beginDate_yyyy=2017&endDate_mm=05&endDate_dd=31&endDate_yyyy=2024&county=VOLUSIA%3A127&hailfilter=0.00&tornfilter=0&windfilter=000&sort=DT&submitbutton=Search&statefips=12%2CFLORIDA

NCDC database. This event caused high rains and four feet of storm surge. There was approximately $68 million in damage along the coastline from Ormond Beach to New Smyrna Beach. Approximately 1,000, infrastructure and various critical facilities were damaged. Daytona Beach, alone, had approximately 650 damaged homes.

## Historical Summary of Insured Flood Losses

All jurisdictions in Volusia County participate in the National Flood Insurance Program (NFIP). **Section 5: Table 6** provides flood insurance policy and claim summary information for each of the participating jurisdictions. The reported losses include both inland (freshwater) and coastal flooding events. It should be emphasized that these numbers include only those losses to structures that were insured through the NFIP policies, and for losses in which claims were sought and received. It is likely that many additional instances of flood losses in Volusia County were either uninsured, denied claims payment, or not reported.

**Section 5: Table 6: NFIP Policy and Claim Information**

| JURISDICTION | TOTAL CLAIMS SINCE 1978 | TOTAL PAID SINCE 1978 |
|---|---|---|
| Daytona Beach | 1,701 | $81,477,671 |
| Daytona Beach Shores | 175 | $3,778,724 |
| DeBary | 108 | $4,846,401 |
| DeLand | 19 | $363,712 |
| Deltona | 125 | $3,178,258 |
| Edgewater | 252 | $7,528,013 |
| Holly Hill | 400 | $10,505,116 |
| Lake Helen | 3 | $14,481 |
| New Smyrna Beach | 1,229 | $50,878,748 |
| Oak Hill | 18 | $554,185 |
| Orange City | 19 | $946,274 |
| Ormond Beach | 768 | $11,608,018 |
| Pierson | 1 | $8,834 |
| Ponce Inlet | 255 | $7,965,454 |
| Port Orange | 1,451 | $62,222,337 |
| South Daytona | 1,088 | $54,614,519 |
| Volusia County | 2,391 | $68,055,722 |
| **TOTAL** | **10,003** | **$368,546,467** |

Source: Volusia County Growth Management, FEMA (as of 01/27/2025)

## Repetitive Loss Properties

FEMA defines a repetitive loss property as any insurable building for which two or more claims of more than $1,000 were paid by the NFIP within any rolling 10-year period, since 1978. A repetitive loss property may or may not be currently insured by the NFIP. Currently there are over 122,000 repetitive loss properties nationwide.

According to Volusia County repetitive loss property records (as of January 2025), there are over 1,000 repetitive loss properties located in Volusia County. Without mitigation, these properties will likely continue to experience flood losses. **Section 5: Figure 10** displays the general location of RL properties.

**Section 5: Table 7: Repetitive Loss Properties Information**

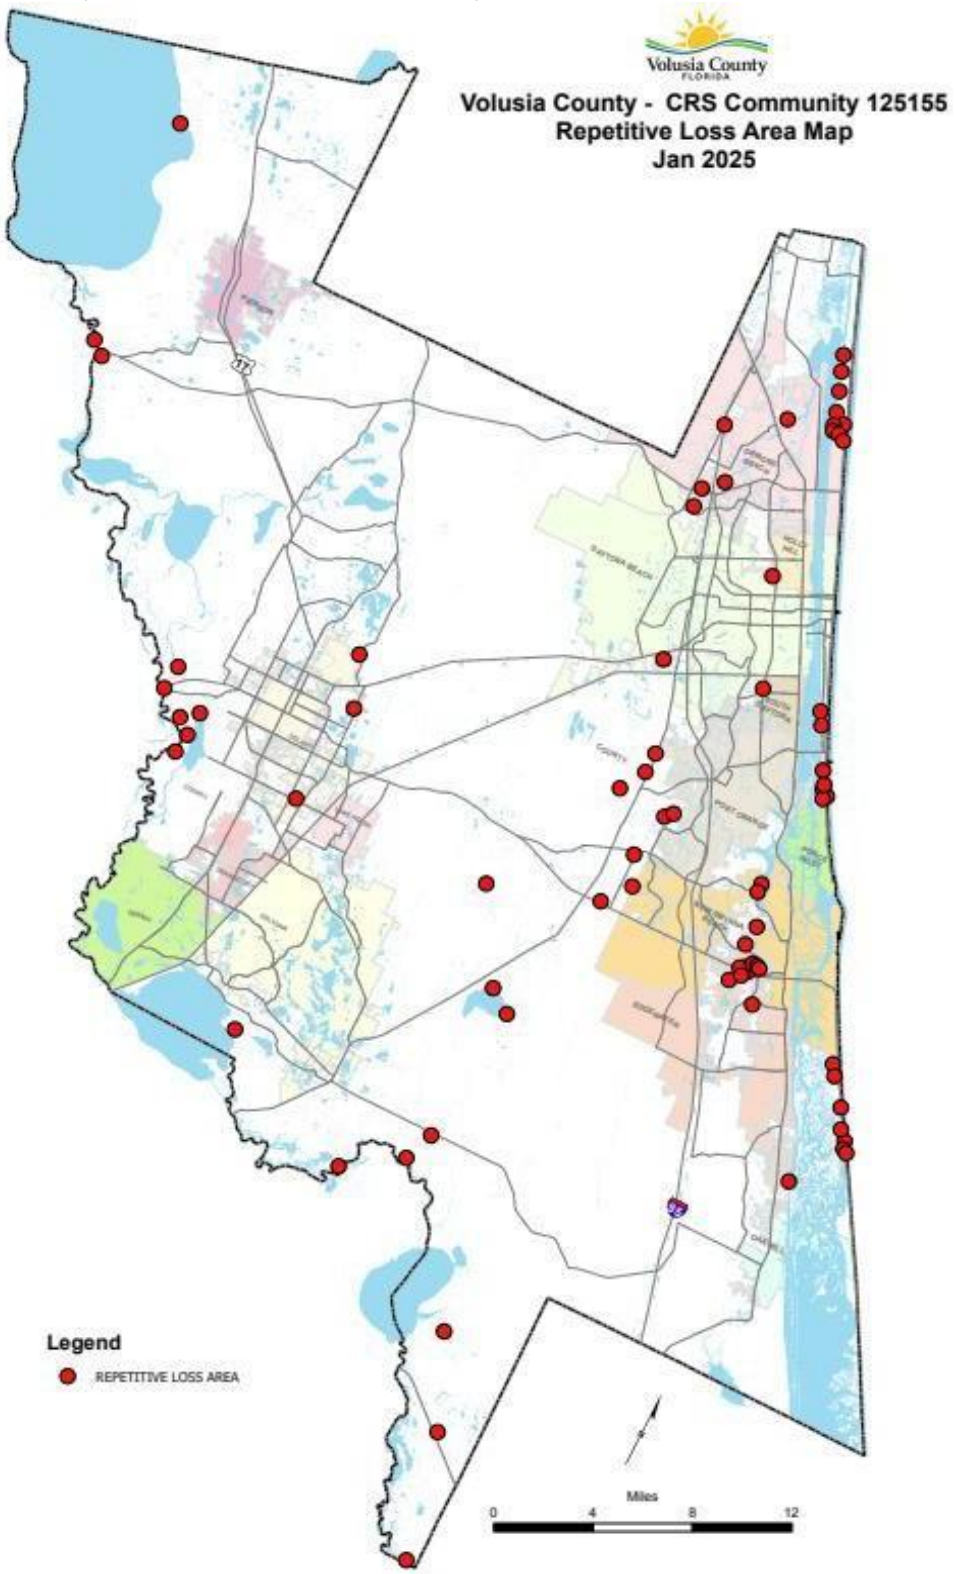
| JURISDICTION | NUMBER OF RL PROPERTIES | | |
|---|---|---|---|
| | TOTAL | NUMBER OF Structures BY LAND USE (Data provided by jurisdictions in 2025) | LOSSES BY LAND USE (Data provided by jurisdictions in 2020 LMS update) |
| Daytona Beach | 273 | 226 residential, 47 commercial | 2 residential |
| Daytona Beach Shores | 11 | 6 residential, 5 commercial | NONE |
| DeBary | 20 | 13 residential, 5 commercial, 2 government | NONE |
| DeLand | 2 | 2 residential | 10 residential |
| Deltona | 13 | 13 residential | NONE |
| Edgewater | 24 | 24 residential | 1 residential |
| Holly Hill | 72 | 72 residential | 1 residential |
| Lake Helen | 5 | 5 residential | NONE |
| New Smyrna Beach | 116 | 110 residential, 6 commercial | 18 residential |
| Oak Hill | 0 | 0 | NONE |
| Orange City | 45 | 39 residential, 6 commercial | NONE |
| Ormond Beach | 37 | 37 residential | 24 residential |
| Pierson | 0 | 0 | NONE |
| Ponce Inlet | 15 | 15 residential | NONE |
| Port Orange | 355 | 347 residential, 4 commercial, 4 government | 4 residential |
| South Daytona | 411 | 402 residential, 9 commercial | 2 residential |
| Volusia County | 208 | 204 residential, 4 commercial | 13 residential |

Source: Individual jurisdictions, FEMA

Not all jurisdictions have severe repetitive loss properties. Those that have them identified for the 2025 update are:

- Port Orange, 50 Residential

## Probability of Future Occurrences



Flood events will remain a frequent occurrence in Volusia County, and the probability of future occurrences is high. The probability of future flood events based on magnitude and according to best

available data is illustrated in Figure 5.10, which indicates those areas susceptible to the 1 percent annual chance flood (100-year floodplain); the 1 percent annual chance flood with wave action (100-year coastal floodplain); and the 0.2 percent annual chance flood (500-year floodplain). Further, as described in other hazard profiles, it is highly likely that Volusia County will continue to experience inland and coastal flooding associated with large tropical storms, hurricanes and storm surge events.

Anticipated sea level rise will increase the probability and intensity of future tidal flooding. Rising sea level over time will decrease the return period (increasing the frequency) of significant flood events. For example, sea level rise of 1 foot over a typical project analysis period (50 years) may cause a flood event currently of annual probability of 2 percent (50-year flood) to become an event of 10 percent annual probability (10-year flood). This rise in sea level will increase the probability of the loss of coastal wetlands and erosion of sandy beaches that act as protective buffers against flood events.

There are repetitive loss properties within 13 of the 16 jurisdictions within Volusia County. This includes 1,280 properties in total. Countywide distribution of repetitive loss properties is somewhat weighted to the east, as a majority of the repetitive loss properties in the county are in Port Orange, South Daytona, and Daytona Beach. The western side of the county also has several repetitive loss properties, most notably the cluster within the Stone Island residential area in the southwestern portion of the county. Data collected showed that many properties have not undergone mitigation efforts; however, there is insufficient data to measure an actual percentage for the entire county.

**Section 5: Figure 10: Repetitive Loss Areas in Volusia County**

## 5.8 PUBLIC HEALTH EMERGENCY

### Background

Public heath emergencies may be accidental, natural, or intentional. Under section 319 of the Public Health Service Act (42 U.S.C § 319), the Secretary of the Department of Health and Human Services (HSS) can declare a public health emergency.

Public health is the science and art of preventing disease, prolonging life, and promoting health through organized efforts and informed choices of society, organizations, the public, private communities, and individuals. According to the Centers for Disease Control and Prevention (CDC), disease outbreaks are identified by the occurrence of more cases of disease(s) than normally expected within a specific place, or among a group of people over a specified period of time. Potential health threats come from an increasing range of health hazards, including infectious diseases, HazMat incidents, food contamination, and threats associated with climate change including extreme weather events. Public health emergencies include medical surges (often from mass casualty events) that require hospitals to act beyond normal capacity. Pandemics are included in this category.

### Location and Spatial Extent

All Volusia County residents face risks associated with public health emergencies. Risk factors, including income, gender, age, migration, health/nutritional status, displacement, and unplanned urbanization, increase people's exposure and vulnerability to these threats and hazards.

All Volusia County residents are at risk of public health emergencies such as pandemic influenza, pneumonic plague, epidemic, food contamination, etc. Youth (under 18) and the elderly (over 65) are especially vulnerable as their immune systems are more susceptible. Risks may also be increased in people of any age who have other serious health problems — such as heart or lung conditions, weakened immune systems, obesity, or diabetes. This is similar to what is seen with respiratory illnesses, such as the flu (influenza) and COVID-19.

### Historical Occurrences

In 2016 and 2017 the Zika Virus cases were on the rise and led to several birth defects. In October of 2022, Dengue was reported in a Volusia County resident. In June 2023, four cases of Malaria were reported, treated, and recovered in Sarasota, Florida. Although rare, there have also been cases of West Nile Virus that led to encephalitis in the County.

Then in March 2020, the first cases of COVID-19 were reported in Florida. On March 11, 2020, the World Health Organization (WHO) officially declared COVID-19 a pandemic. By April, the governor had declared an executive order to restrict activities within the state unless deemed essential. The pandemic was declared over in May 2023, but continues to impact Florida's population through the time this plan was published.

### Probability of Future Occurrences

Public health emergencies are expected to increase. Volusia County and the surrounding areas bring many tourists, which can be a contributor to the spread of health concerns or diseases. Although international

travel is a contributing factor, climate change and a growing population will continue to influence public health.

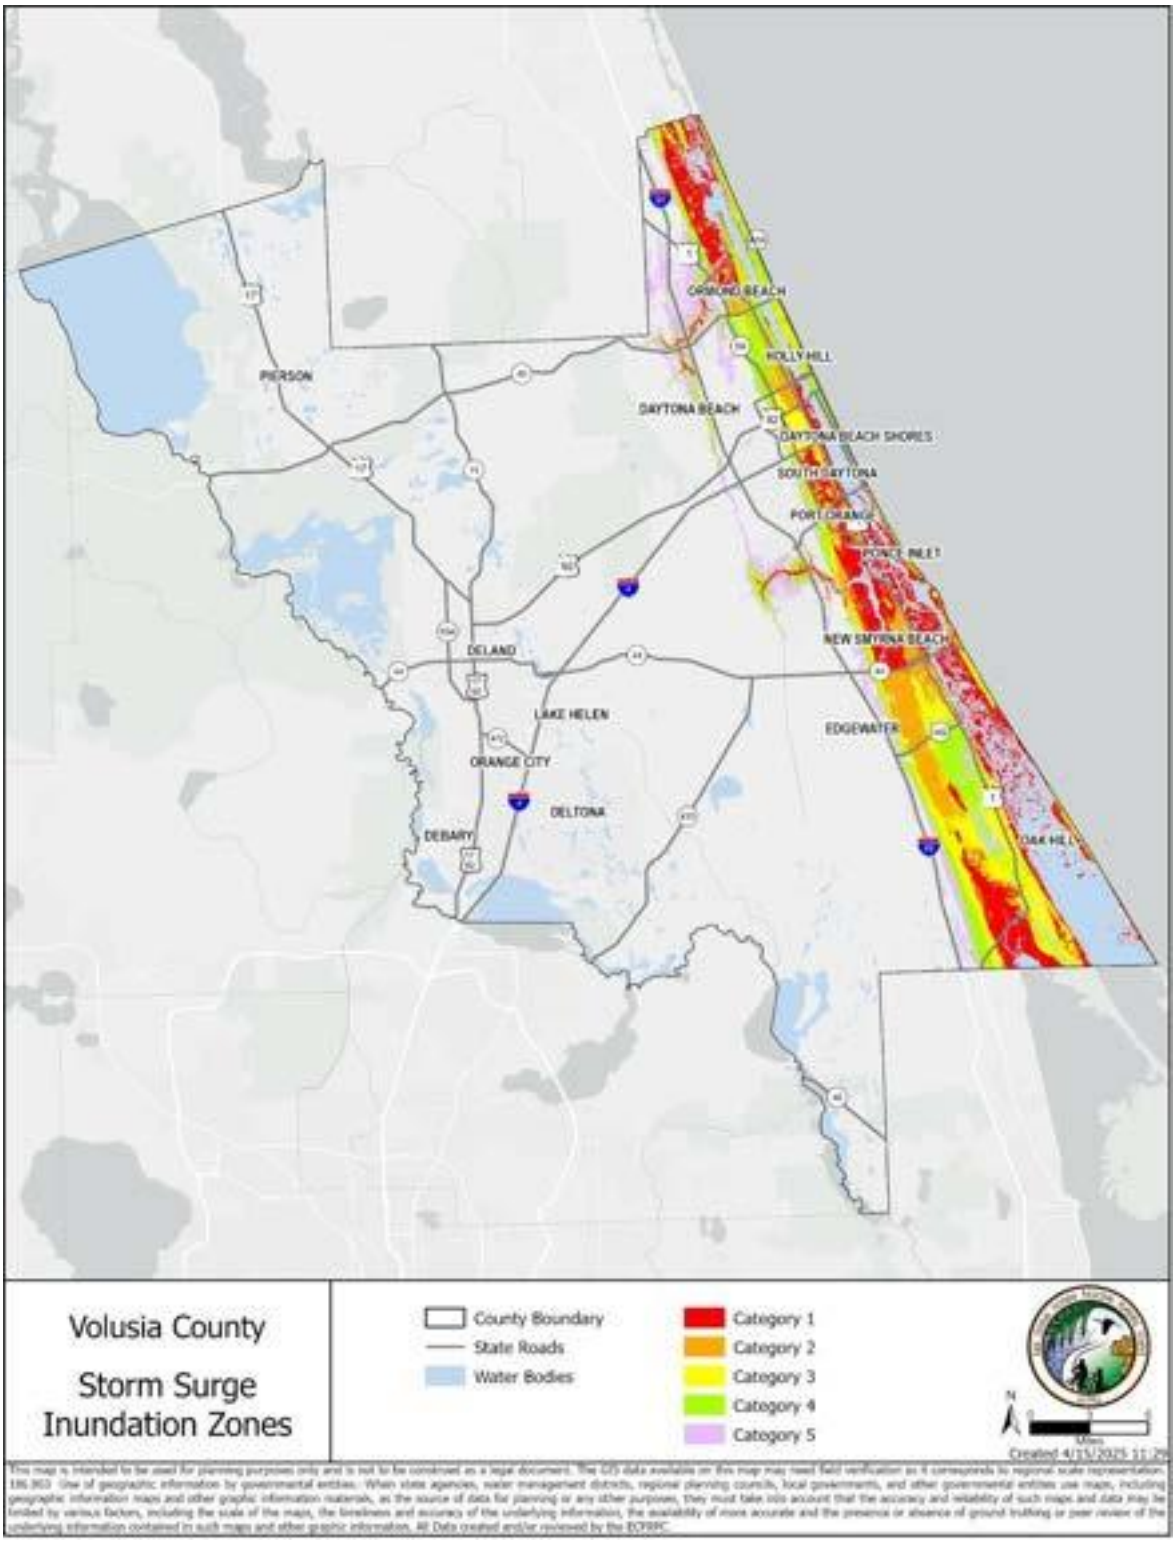
## 5.9 RISING COASTAL WATERS

### Background

Rising coastal waters is a hazard that refers to unprecedented water levels along the coast, usually leading to inland affects. This hazard encompasses:

- **Storm Surge**: Storm surge occurs when the water level of a tidally influenced body of water increases above the normal astronomical high tide and is most common in conjunction with coastal storms with massive low-pressure systems with cyclonic flows such as hurricanes, tropical storms and nor'easters. The low barometric pressure associated with these storms causes the water surface to rise, and storms making landfall during peak tides have surge heights and more extensive flood inundation limits. Storm surges will inundate coastal floodplains by dune over wash, tidal elevation rise in inland bays and harbors, and backwater flooding through coastal river mouths. The duration of a storm is the most influential factor affecting the severity and impact of storm surges.
- **Sea Level Rise (SLR)**: Sea level rise is caused by warming of the earth's climate, the associated thermal expansion of water molecules, and generally impacts coastal, lagoon-adjacent and river-adjacent areas that are hydrologically connected to the ocean.
- **Tsunami**: In the open ocean, tsunami waves travel at speeds of up to 600 miles per hour but are too small to be observed, and the time between wave crests may be five to 90 minutes. As the waves approach shallow coastal waters, they slow down and may rise to several feet or, in rare cases, tens of feet. Although the waves slow down as they reach shallow water, the energy remains constant and when tsunami waves crash into the shoreline they may be as high as 100 feet. The first wave is almost never the largest; successive waves may be spaced tens of minutes apart and continue arriving for many hours. The coastal areas at greatest risk are less than 50 feet above sea level and within one mile of the shoreline. Tsunamis can cause great loss of life and property damage where they come ashore, and most tsunami deaths are the result of drowning. Associated risks include water pollution, damaged gas lines, and flooding.

### Location and Spatial Extent



All of Volusia County and its jurisdictions are subject to rising coastal water inundation. Municipalities such as Ormond Beach, Holly Hill, Daytona Beach, Daytona Beach Shores, South Daytona, Port Orange, Ponce Inlet, New Smyrna Beach, Edgewater, and Oak Hill are most susceptible to rising coastal waters given their proximity to the coast.

- **Storm Surge**: As shown in **Section 5 Figure 11**, the entire east side of Volusia County is at high risk of storm surge inundation in addition to most riverine floodplains along major rivers in southern portions of the area. While areas not located immediately along the coast or major rivers may not be directly impacted by storm surge inundation except in extreme storm events, they might experience flooding caused by storm surge and extremely high tides that affect the drainage of areas further inland.
- **Sea Level Rise**: In Volusia County, areas susceptible to sea level rise include jurisdictions in close proximity to the Atlantic Ocean, the Indian River Lagoon, the Halifax River, the St. Johns River, and smaller riverine systems that provide hydro connectivity into the interior of the County. The extent of sea level rise would go beyond coastal communities, like Ormond Beach and New Smyrna Beach. Inland communities along waterways, such Astor and DeLand, will be impacted

during periods of high-water inundation since the water systems will be over capacity and exiting the system at slower rates.

- **Tsunami**: Tsunami activity is a greater risk along the Pacific Rim states (Washington, Oregon, California, Alaska, and Hawaii), but is still possible along the East Coast of the United States. In fact, as many as 40 tsunami or tsunami-like events have been reported along the East Coast since the early 1600s. Additionally, models and methodologies do not currently exist to accurately assess the tsunami hazard as it would relate to an inland community along the East Coast. The potential location and extent of the tsunami hazard for Volusia County is similar and slightly more extensive than the established flood hazard area. A tsunami event could cover all of Volusia County based on severity. However, the coastal jurisdictions are most at risk. The areas of Volusia County most at risk of a tsunami hazard are similar to those of storm surge and sea level rise. A tsunami's extent could go beyond the coastal areas, although they are at the greatest risk. High velocity waves that could cause severe catastrophic damage to structures and infrastructure. Its extent could result in massive amounts of vegetative and construction debris, boats would be washed ashore, impacted buildings could collapse, trees could be uprooted, above ground power poles and lines could collapse, and underground utilities could be unearthed and destroyed.

**Section 5: Figure 11: Current Day Storm Surge Predications Based on Hurricane Category**

Source: ECFRPC, NOAA

## Historical Occurrences

Volusia County has experienced numerous rising water events associated with hurricanes, nor'easters and tropical storms. Water can rise to exceptional levels during hurricanes, storm surge, flash flood and thunderstorm conditions.

- **Storm Surge**: Water levels from storm surge have historically risen to 6 feet within Volusia County following one of these events, with increased water heights for coastal communities due to Florida's semidiurnal tides. Roadway flooding has been seen rising between 1 and 5 feet. Hurricane Nicole in 2022 produced an impactful storm surge along a large portion of the east coast of Florida, battering beaches with elevated water levels and wave action. Florida was previously hit by Hurricane Ian in late September which caused beach erosion along the east coast and freshwater flooding from rainfall in rivers and canals. The impact of Ian likely left the area more vulnerable to storm surge from Nicole. Additionally, Nicole's large wind field and its initial subtropical characteristics increased the potential for widespread wave and storm surge impacts. Port Orange, South Daytona, Ormond Beach, and Daytona Beach were most impacted during Hurricane Nicole, however most of this was from the tides increasing and influencing the intracoastal waterways. Please refer to the Hurricane Historical Occurrences listing for more information.
- **Sea Level Rise**: Sea level rise is currently impacting south and central Florida, with nearshore, high-tide flooding becoming a more frequent sea level rise-associated hazard in some locations. Historical occurrences of sea level rise are not easy to measure due to a lack of data existing from the early 20th Century as well as the time period of two epochs (38 years) needed to calculate the mean impacts of sea level rise, by location. According to U.S.SealevelChange.gov, Florida has seen 7 inches in sea level rise since 1970., As data collection and monitoring improve, the ability for the County to track historical occurrences will improve. One indicator of sea level rise is the frequency or nearshore, high tide flood events, also known as nuisance flooding. In 2016, a NOAA study found that nuisance flooding frequency was increasing to the north and south of Volusia County (in Mayport, FL; Fernandina Beach, FL; and Key West, FL). It is expected that these events will continue to increase in frequency in the future.
- **Tsunami**: In August 2008, a qualitative tsunami hazard assessment prepared by NOAA and USGS indicated that the U.S. Atlantic coast has a very low tsunami risk[18]. This qualitative assessment was based on National Geophysical Data Center (NGDC) and United States Geological Survey (USGS) databases. Specifically, Atlantic coast tsunami vulnerability was deemed very low based on very low wave runup, low tsunami hazard frequency, and no reported fatalities. Although an East Coast tsunami would be rare, two offshore areas are currently under investigation according to a 2002 National Geophysical Data Center report. One area of interest consists of large cracks northeast of Cape Hatteras, North Carolina that could foretell the early stages of an underwater landslide resulting in a tsunami. The other area of interest consists of submarine canyons approximately 150 kilometers from Atlantic City, New Jersey. Significant factors for consideration regarding these areas are recent discoveries along the East Coast that demonstrate the existence of pressurized hydrates and pressurized water layers on the continental shelf. This has produced speculation among the scientific community on possible triggers that could cause sudden and perhaps violent releases of compressed material that could factor into landslide events and the resulting tsunami waves. Although different from a tsunami, a rogue wave is relatively large (i.e., larger in height than a tsunami) and spontaneous ocean waves can cause similar impacts.

[18] NOAA and USGS. 2008. *U.S. States and Territories National Tsunami Hazard Assessment: Historical Record and Sources for Waves.* August 2008.

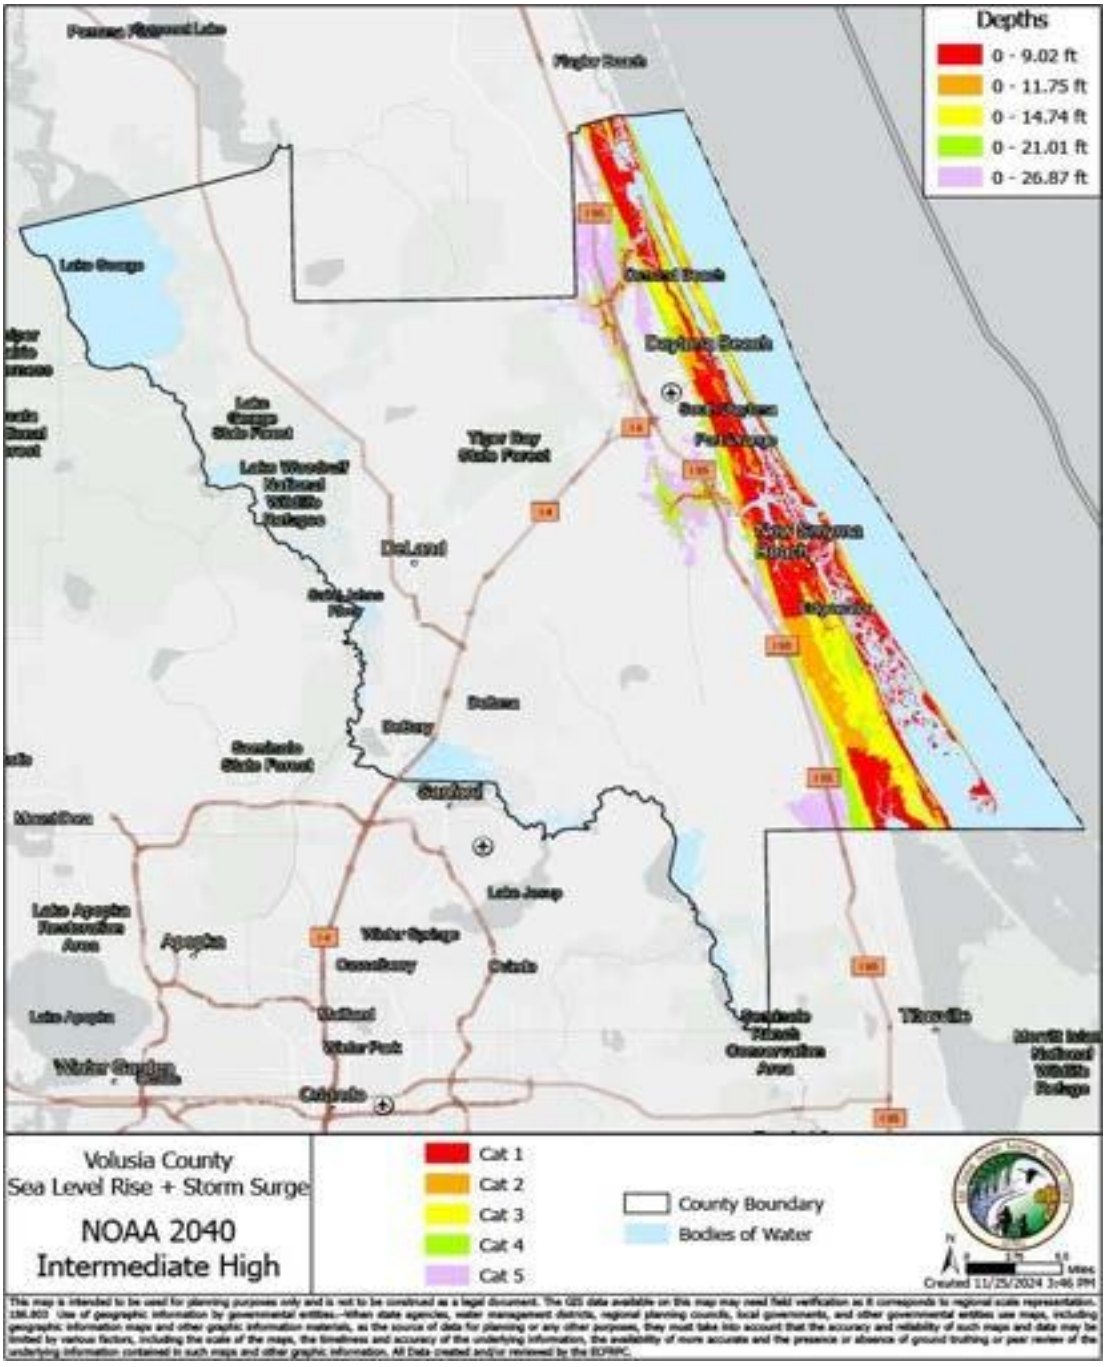
Although a defined tsunami has not impacted Volusia County, On July 3, 1992, a 27-mile-long, 18-foot rogue wave came onshore between Ormond Beach to New Smyrna Beach, centered at Daytona Beach. Sailboats crashed ashore, 200 cars were damaged and approximately 75 people were injured resulting in two hospitalizations. It is theorized that an underwater landslide caused the rogue wave, potentially categorizing this wave as a type of tsunami, or it was the result of a squall line.

## Probability of Future Occurrences

There is a high probability that Volusia County will continue to experience rising coastal water associated with large tropical storms, hurricanes and squalls combined with high tides, based on the frequency of tropical cyclones as shown in **Section 5 Figure 13 and 14.**

As noted in previous sections (under Flood), anticipated sea level rise will increase the probability and intensity of future storm surge events. This rise in sea level will increase the probability and intensity of rising coastal water events but will also contribute to the loss of coastal wetlands and erosion of sand beaches that act as protective buffers against storm surge events. The National Oceanic and Atmospheric Administration (NOAA) and the U.S. Army Corps of Engineers have published numerous “sea level rise curves” that project the future impacts of sea level rise, in feet. The following sea level rise curves are being used to assess the potential impacts of sea level rise by municipalities in Volusia County.

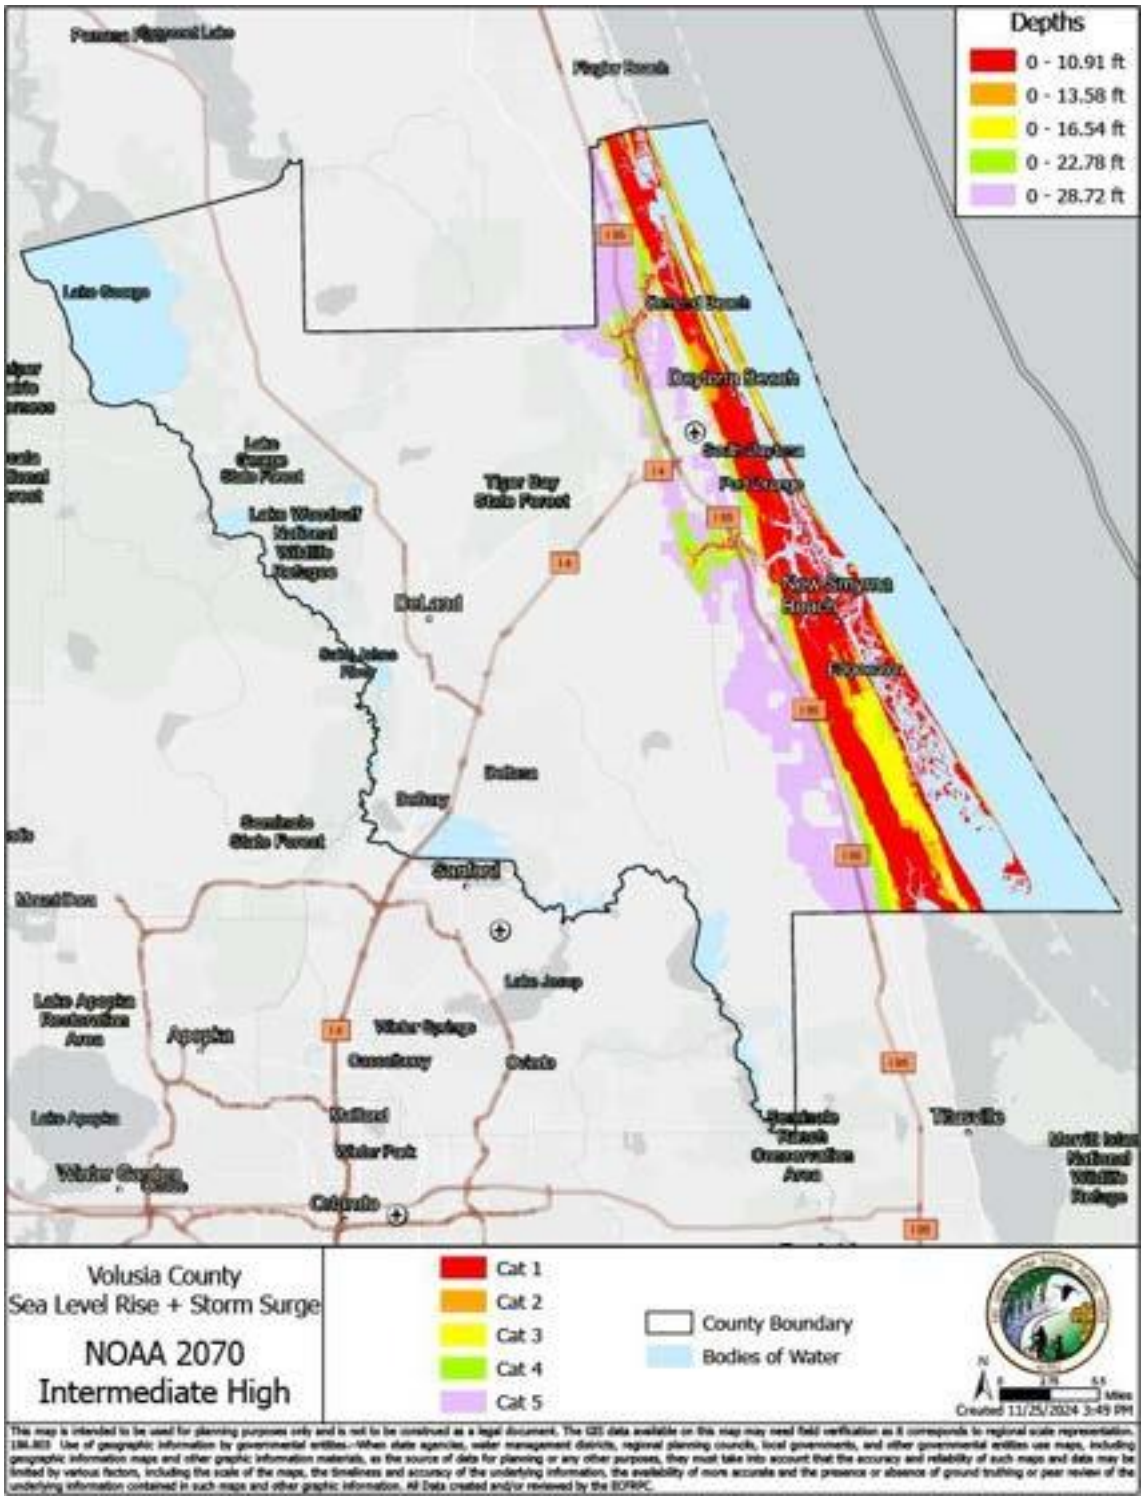
**Section 5: Figure 12: Sea Level Rise Projections**



The probability of future storm surge events is dependent on the probability of future hurricanes and tropical storm events for Volusia County. According to NOAA statistical data, Volusia County is in an area with an annual probability of a named storm between 36 and 42 percent.

The probability of a future tsunami event affecting Volusia County is very low, as indicated in the 2008 NOAA-USGS tsunami hazards assessment. However, the consequences of even a moderate tsunami striking Volusia County would devastate lives, development, and the ability of the county to function.

The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts and that future mitigation and adaptation strategies related to this hazard



should be considered. The figures below represent the NOAA intermediate high projection for rising coastal waters in 2040 and 2070 with storm surge.

**Section 5: Figure 13: 2040 Intermediate High Storm Surge**

Source: ECFRPC, Volusia County Vulnerability Assessment

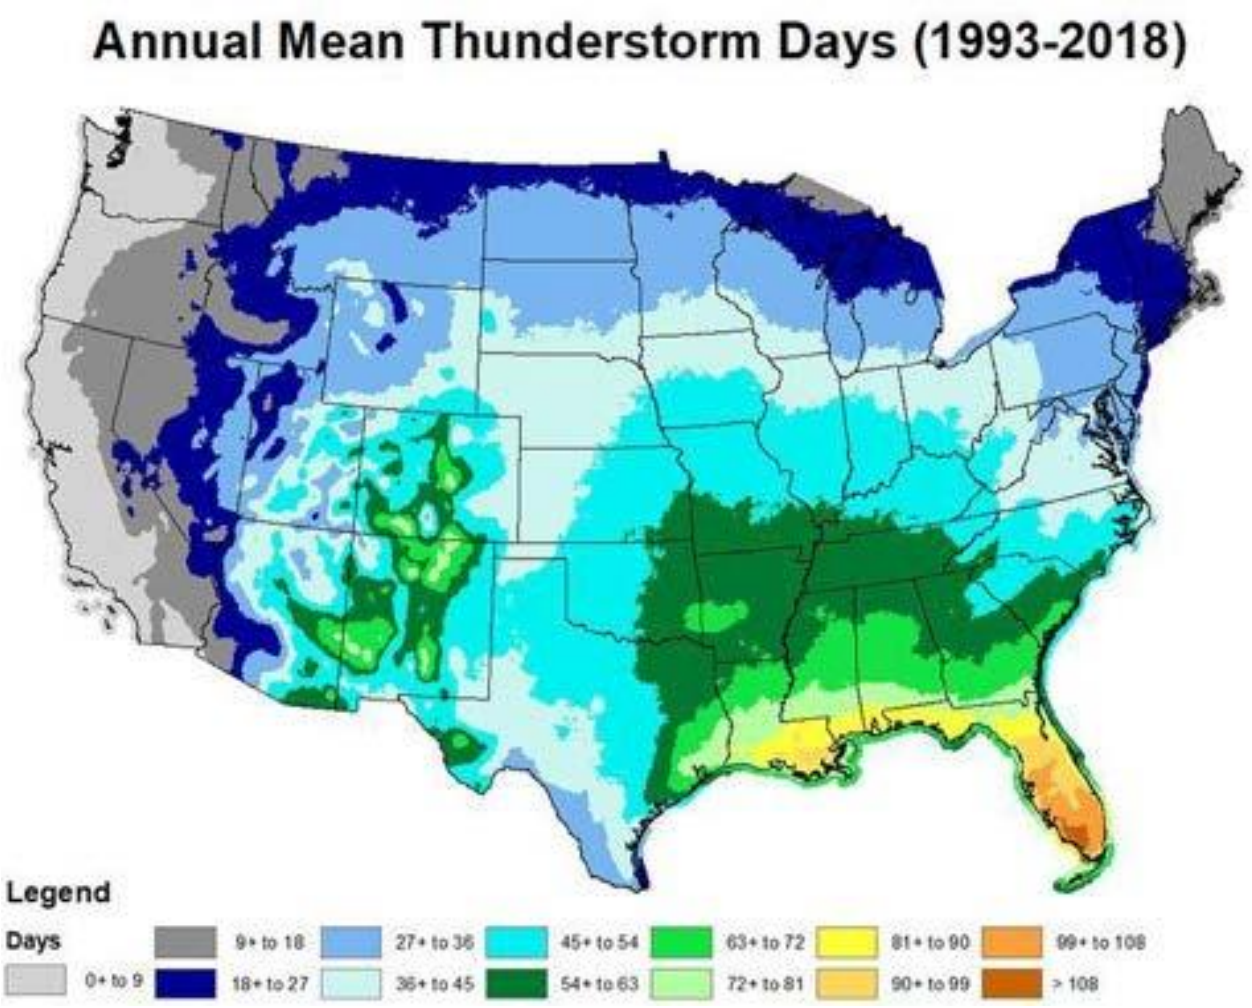
**Section 5: Figure 14: 2070 Intermediate High Storm Surge**

Source: ECFRPC, Volusia County Vulnerability Assessment

## 5.10 SEVERE WEATHER

### Background

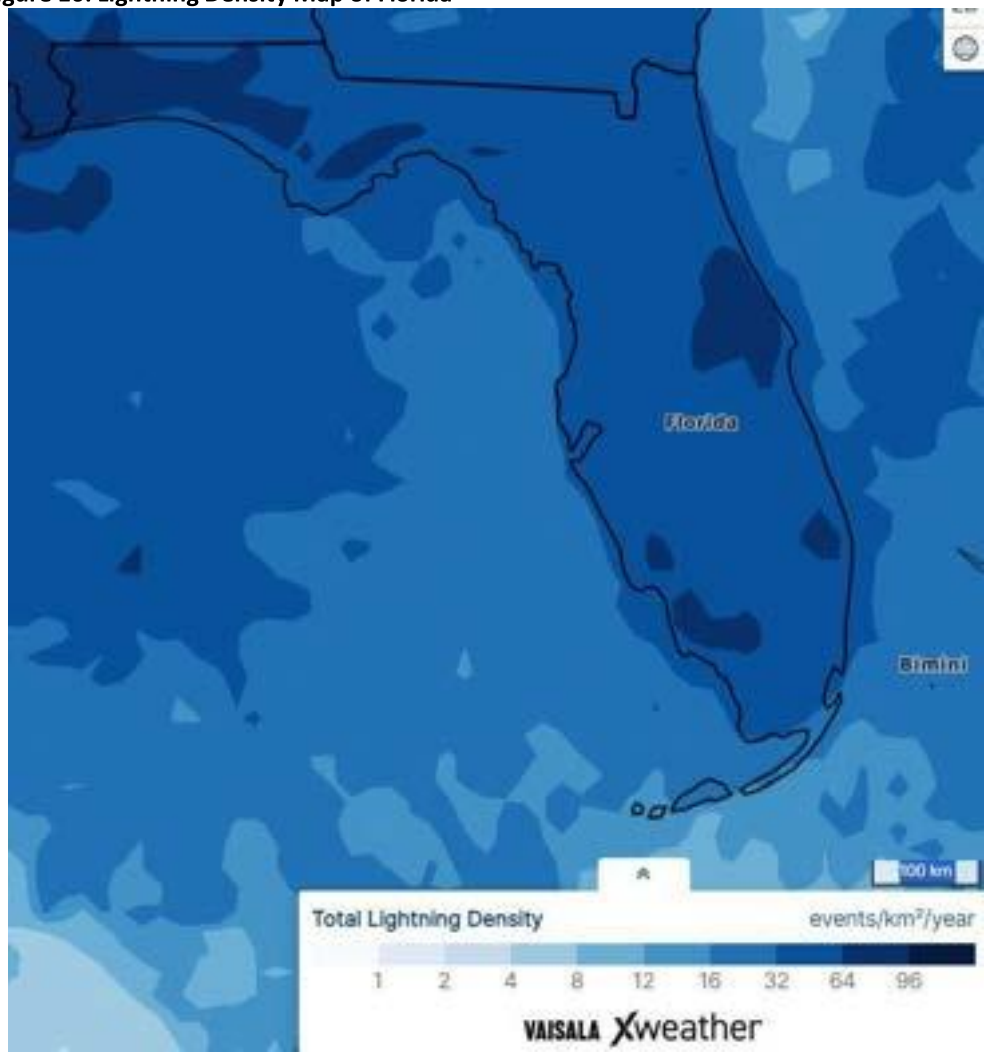
Severe weather refers to any significant or intense weather conditions that can cause damage, disruption, or pose a threat to safety. It encompasses a range of phenomena that are more extreme than typical weather conditions. Volusia County experiences severe weather in a variety of ways.



- **Hail** frequently accompanies thunderstorms and has potential to cause substantial damage. Early in the developmental stages of hail, ice crystals form within a low-pressure front due to the rapid rise of warm air into the upper atmosphere and the subsequent cooling of the air mass. Frozen droplets gradually accumulate on the ice crystals until they develop sufficient weight to fall as precipitation. Hail precipitation falls in spheres or irregularly shaped masses greater than 0.75 inches in diameter. The size of hailstones is a direct function of the size and severity of the storm. High velocity updraft winds are required to keep hail in suspension in thunderclouds. The strength of the updraft is a function of the intensity of heating at the Earth's surface. Higher temperature gradients relative to elevation above the surface result in increased suspension time and hailstone size.
- **Lightning** is a discharge of electrical energy resulting from the buildup of positive and negative charges within a thunderstorm, creating a "bolt" when the buildup of charges becomes strong enough. This flash of light usually occurs within the clouds or between the clouds and the ground. A bolt of lightning can reach temperatures approaching 50,000 degrees Fahrenheit. Lightning rapidly heats the sky as it flashes but the surrounding air cools following the bolt. This rapid heating and cooling of the surrounding air causes thunder which often accompanies lightning strikes. While most often affiliated with severe thunderstorms, lightning often strikes outside of heavy rain and might occur as far as 10 miles away from any rainfall.
    - According to FEMA, an average of 300 people are injured and 80 people are killed in the United States each year by lightning. Direct lightning strikes also can cause significant damage to buildings, critical facilities, and infrastructure. Lightning is also responsible for igniting wildfires that can result in widespread damage to property before firefighters have the ability to contain and suppress the resultant fire[19].
- **Thunderstorms** are common throughout Florida and occur throughout the year. Although thunderstorms generally affect a small area, they are very dangerous given their ability to produce accompanying hazards including high winds, hail, and lightning which all may cause serious injury or death, in addition to property damage[20].
    - According to the National Weather Service, more than 100,000 thunderstorms occur each year, though only about 10 percent of these storms are classified as "severe." A severe thunderstorm occurs when the storm produces one of three elements: 1) Hail of three-quarters of an inch; 2) Tornado; 3) Winds of at least 58 miles per hour.
    - Three conditions need to occur for a thunderstorm to form. First, it needs moisture to form clouds and rain. Second, it needs unstable air, such as warm air that can rise rapidly (this often referred to as the "engine" of the storm). Finally, thunderstorms need lift, which comes in the form of cold or warm fronts, sea breezes, mountains, or the sun's heat. When these conditions occur, air masses of varying temperatures meet, and a

[19]Wildfires are discussed in Section 5.14.
[20] Lightning and Hail are discussed in detail as separate hazards in this section.

thunderstorm is formed. These storm events can occur singularly, in lines, or in clusters. Further, they can move through an area very quickly or linger for several hours.



Severe weather can affect all jurisdictions within Volusia County and their duration can span from localized events (less than 10 minutes locally) to hours-long events (primarily in the case of hurricanes or large tropical systems).

**Section 5: Figure 15: Average Annual Number of Thunder Events**

Source: NOAA. 4/2023

**Section 5: Figure 16: Lightning Density Map of Florida**

Source: Vaisala U.S. National Lightning Detection Network 2024. https://interactive-lightning-map.vaisala.com/

## Location and Spatial Extent

Severe storms are common and impact the entirety of Volusia County. Volusia County and its jurisdictions are in a region of the country that is particularly susceptible to these types of events.

Hail is often produced during a thunderstorm event which has no geographic limitations on the area it affects. Therefore, it is assumed that all of Volusia County is uniformly at risk to hail events. Impacts typically include downed power lines and trees and damage to vehicles and mobile homes. In terms of extent for Volusia County, tennis ball-sized hail (2.5-inch diameter based on NOAA hail conversions) has been observed on many occasions within Volusia County and is a probable occurrence on an annual basis. Larger hail conditions are less likely, but possible. The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts from hail and that future mitigation and adaptation strategies related to this hazard should be considered.

Lightning occurs randomly and is, therefore, impossible to predict where it will strike. It is assumed that all of Volusia County is uniformly exposed to lightning which strikes in very small, specific geographic areas. Impacts from lightning have included deaths and injuries, damage to electrical systems, and fires that have destroyed residential and commercial property. The most threatening and common type of lightning is cloud-to-ground lightning, where the extent of the threat causes lightning to make contact with whatever object is below. **Section 5 Figure 16** displays the spatial extent of the hazard.

Severe thunderstorms and their related hazardous elements (including lightning, hail, and straight-line winds) are not confined to any geographical boundaries and typically are widespread events. Thunderstorms can occur in all regions of the United States, but they are most common in the central and southern states because atmospheric conditions in those regions are favorable for generating these powerful storms as shown in **Section 5 Figure 15**. Therefore, it is assumed that Volusia County would be uniformly exposed to these hazards and that the extent of that impact would potentially be large. The extent of thunderstorm severity varies on an event-by-event-basis and is generally subject to the atmospheric conditions present at the time. While light thunderstorms are more common in frequency, severe thunderstorms (with associated Severe Thunderstorm Warnings) which include the added impacts of lightning and (more rarely) hail occur several times per year in Volusia County. The extent of severe thunderstorms are watches and warnings. A Severe Thunderstorm Watch is issued when severe thunderstorms are possible in and near the watch area. It does not mean that they will occur. It only means they are possible. A Severe Thunderstorm Warning is issued when severe thunderstorms are occurring or are imminent in the warning area.

## Historical Occurrences

According to the National Climatic Data Center, there have been numerous recorded hail events in Volusia County as shown in **Section 5: Table 8**[21]. Hail sizes for these events range from 1.00 inches to 2.75 inches in diameter. The emergency management officials from the Volusia County jurisdiction determined that only hail that was greater than one inch in diameter was to be listed.

**Section 5: Table 8: Historical Hail Impacts**

| LOCATION | DATE | MAGNITUDE (inches) | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| Volusia County | 8/16/1963 | 1.00 | 0/0 | $0 | Not Available |

| Glencoe | 3/7/2008 | 1.00 | 0/0 | $0 | A cold front moving across central Florida produced a line of thunderstorms that moved southeast across the area. One inch hail was reported in Port Orange. Quarter size hail was reported at Interstate 95 and Highway SR44, near Glencoe, and in Daytona Beach. The public reported nickel size hail in Deltona. |
| Port Orange | 3/7/2008 | 1.00 | 0/0 | $0 | |
| Daytona Beach | 3/7/2008 | 1.00 | 0/0 | $0 | |

| LOCATION | DATE | MAGNITUDE (inches) | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| Seville | 7/5/2008 | 1.00 | 0/0 | $0 | Quarter-sized hail was reported. A sea breeze thunderstorm produced hail and wind gusts in interior parts of E.C.F. |
| Seville | 6/13/2009 | 1.00 | 0/0 | $0 | Numerous strong storms developed over east central Florida, with a few strengthening to severe levels and producing wind damage and large hail. |
| DeLeon Springs | 3/31/2009 | 1.00 | 0/0 | $0 | A northward-lifting warm front combined with active sea breeze boundaries within an unstable atmosphere produced several severe thunderstorms with nickel to quarter sized hail and localized severe winds. |
| Ponce Park | 2/22/2010 | 1.00 | 0/0 | $0 | Isolated thunderstorms developed in an unstable environment well ahead of a cold front. One of the storms became strong and produced small hail as it moved east out of the Ocala National Forest. The storm strengthened as it approached the coast, producing large hail on the barrier island east of central Daytona Beach. |
| Harbor Point | 5/13/2011 | 1.00 | 0/0 | $0 | The collision of the east and west coast sea breezes formed a broken line of thunderstorms across East Central Florida. A couple of these pulse storms became severe in Orange and Volusia Counties. |
| Ormond by the Sea | 3/31/2011 | 1.00 | 0/0 | $0 | A pre-frontal squall line moved rapidly across central Florida, bringing strong to severe thunderstorms with large hail and funnel clouds. |
| Glencoe | 5/17/2012 | 1.75 | 0/0 | $0 | The east coast sea breeze formed in the early afternoon and |

| LOCATION | DATE | MAGNITUDE (inches) | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| | | | | | propagated inland, eventually colliding with the west coast sea breeze over the central peninsula. Storms moved to the east and northeast and produced large hail over Brevard and Volusia Counties. |
| Deltona | 4/20/2012 | 1.75 | 0/0 | $0 | Several severe thunderstorms occurred as low to mid-level southwest winds brought a warm and very moist air mass into east central Florida. Much cooler and drier air above this moisture laden air allowed for vigorous storm development which acted to produce severe wind gusts and hail in many of the thunderstorms that developed. |
| Barberville | 4/20/2012 | 1.25 | 0/0 | $0 | Several severe thunderstorms occurred as low to mid-level southwest winds brought a warm and very moist air mass into east central Florida. Much cooler and drier air above this moisture laden air allowed for vigorous storm development which acted to produce severe wind gusts and hail in many of the thunderstorms that developed. |
| DeBary | 4/20/2012 | 1.00 | 0/0 | $0 | Several severe thunderstorms occurred as low to mid-level southwest winds brought a warm and very moist air mass into east central Florida. Much cooler and drier air above this moisture laden air allowed for vigorous storm development which acted to produce severe wind gusts and hail in many of the thunderstorms that developed. |
| DeLand Osteen | 5/17/2012 | 0.75 (DeLand) 0.88 (Osteen) | 0/0 | $0 | The east coast sea breeze formed in the early afternoon and |

|---|---|---|---|---|---|
| Glencoe | | 1.75 (Glencoe) | | | propagated inland, eventually colliding with the west coast sea breeze over the central peninsula. Storms moved to the ENE, producing large hail over Volusia County. |
| Daytona Beach International Airport | 6/24/2014 | 0.88 | 0/0 | $0 | A thunderstorm developed rapidly along the east coast sea breeze over coastal Volusia County. |
| DeLeon Springs | 6/26/2014 | 0.88 | 0/0 | $0 | A weather spotter observed hail up to nickel size in De Leon Springs as a strong thunderstorm affected the area. |
| Deltona | 5/20/2015 | 1.00 | 0/0 | $0 | Strong thunderstorms developed over the mainland and became severe as they interacted with the east coast sea breeze over central Volusia and eastern Seminole County. Large hail, up to quarter-sized, was reported across sections of Deltona and Oviedo. |
| DeLeon Springs | 7/6/2015 | 0.75 | 0/0 | $0 | Thunderstorms developed along the west coast sea breeze and became strong as they approached Volusia County, producing small hail and some minor tree damage in De Leon Springs. |
| DeLeon Springs | 7/6/2016 | 1.00 | 0/0 | $0 | An isolated thunderstorm quickly became severe and hail up to quarter size as it moved slowly southeast across Deleon Springs. |
| Enterprise | 2/15/2017 | 0.88 | 0/0 | $0 | Scattered thunderstorms developed ahead of a strong cold front, bringing small hail to Enterprise in Volusia County. |
| Harbor Point New Smyrna Beach Enterprise | 6/1/2017 | 1.00 – 1.25 | 0/0 | $0 | A sea breeze collision produced a severe thunderstorm over east central Volusia County during the late afternoon. Several reports of quarter to half dollar sized hail |

| LOCATION | DATE | MAGNITUDE (inches) | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| | | | | | were received from Port Orange to New Smyrna Beach. |
| Enterprise | 7/20/2017 | 1.00 | 0/0 | $0 | A collision of the east and west coast sea breeze over the interior of Central Florida produced two severe thunderstorms that resulted in quarter-sized hail in Orange and Volusia Counties. A funnel cloud was also reported in Osceola County. |
| Ormond Beach DeLeon Springs Daytona Beach Holly Hill | 3/20/2018 | 1.00 – 2.00 | 0/0 | $0 | A deepening mid-level trough and associated strong cold front moved across north/central Florida. Conditions ahead and along the cold front were favorable for severe thunderstorms as 80-90 knot jet maxima produced sufficient upper level divergence. These conditions produced an enhanced risk of severe weather, sparking several rounds of severe thunderstorms, which affected Volusia, Seminole, Orange, Brevard and Okeechobee Counties. |
| New Smyrna Beach | 4/9/2019 | 0.88 | 0/0 | $0 | An area of low pressure and a weak cold front moved across central Florida sparking numerous showers and thunderstorms across the area. Deep moisture was in place across the area, and instability had increased through the day due to daytime heating. The instability, combined with lift associated with the approaching cold front and cold temperatures in the middle part of the atmosphere, allowed a few thunderstorms to become severe. In Volusia County, a strong storm produced nickel sized hail. In Seminole County, damaging winds caused numerous trees to be uprooted. In Brevard County, a |

| LOCATION | DATE | MAGNITUDE (inches) | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| | | | | | severe thunderstorm produced a strong wind gust at the Cape. |
| Deltona | 5/4/2019 | 0.75 – 1.00 | 0/0 | $0 | An area of high pressure located over the central Atlantic was the dominant feature affecting weather over central Florida. This led to west to southwest winds at the surface that pushed deep moisture from the Gulf across the area. Hot daytime temperatures, and cold temperatures in the middle atmosphere provided the necessary ingredients for strong to severe thunderstorms to develop. These storms developed along the sea breezes and outflow boundaries that were produced. One thunderstorm became severe in southwestern Volusia County where it produced hail and damaging winds. |
| Glencoe Hucomer | 5/31/2019 | 0.88 – 1.00 | 0/0 | $0 | The Atlantic high-pressure ridge located south of Florida resulted in southwest winds across central Florida. This pushed deep moisture over the area, and when combined with daytime heating and cold temperatures in the middle atmosphere provided conditions for showers and thunderstorms to develop. One thunderstorm in eastern Volusia County interacted with the sea breeze front. This storm quickly became severe as it moved very slowly southward over New Smyrna Beach and Edgewater, and several reports of hail were received in these areas. |
| Cassadaga | 5/21/2020 | 1.00 | 0/0 | $0 | The public reported quarter sized hail near the intersection of |

| LOCATION | DATE | MAGNITUDE (inches) | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| | | | | | Courtland Boulevard and Lockwood Boulevard in Deltona. |
| Orange City Deltona | 8/9/2020 | 1.00-1.75 | 0/0 | $0 | Afternoon thunderstorms that developed along the sea breeze collision became severe, producing large hail in Volusia County, and damaging winds in Volusia and Orange Counties. |
| Blake | 8/18/2020 | 1.00 | 0/0 | $0 | Numerous thunderstorms developed along the outflow boundary and sea breeze collisions. These storms produced two tornadoes in western Volusia County, including a rare August EF-2. In addition, other thunderstorms produced strong winds and hail along the Volusia and Brevard County coasts. |
| West Holly Hill Daytona Beach Daytona Beach Shores South Daytona Ponce Inlet Blake | 3/6/2021 | 0.75-1.50 | 0/0 | $0 | Daytona International Speedway Emergency Management reported half dollar sized hail west of Interstate 95 near LPGA Boulevard. They also reported small hail had accumulated on the ground and was 4 to 5 inches deep in some spots. |
| Ormond by the Sea | 4/18/2021 | 1.00 | 0/0 | $0 | An isolated severe thunderstorm developed over Flagler County near a stationary front. The storm moved quickly southeast along the Flagler-Volusia County line and produced large hail just south of the county line, in Ormond Beach. |
| New Smyrna Beach Coronado Beach | 3/16/2022 | 1.75 | 0/0 | $0 | Numerous afternoon thunderstorms developed across east-central Florida, with several becoming severe. These severe storms produced large hail in Brevard, Seminole, and Volusia County, with wind damage to trees also occurring in Volusia County. |

| LOCATION | DATE | MAGNITUDE (inches) | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| Orange City DeLand | 5/21/2022 | 1.00-1.25 | 0/0 | $0 | Numerous afternoon thunderstorms developed across east-central Florida as the east coast sea breeze moved inland from the coast and eventually collided with the west coast sea breeze. Many storms became severe and produced quarter to half dollar sized hail over parts of Seminole, Volusia, and Lake Counties. |
| Cassadaga | 6/6/2022 | 1.00 | 0/0 | $0 | Numerous severe thunderstorms developed across east-central Florida along the east coast sea breeze, and along the main sea breeze collision. Many storms became severe over Seminole and Volusia Counties where hail and wind damage occurred. Then, as storms moved offshore, they produced severe wind gusts along the coast in Brevard, Indian River, and Martin Counties. One storm produced an EF-0 tornado in Saint Lucie County west of Fort Pierce. |
| Lake Helen | 5/18/2023 | 1.00 | 0/0 | $0 | Strong storms produced severe hail near Lake Helen in Volusia County. |

Source: National Climatic Data Center

***NOTE: ALL HISTORICAL OCCURRENCES IN THIS REPORT ARE THE MOST RECENT AS DOCUMENTED BY THE NATIONAL CLIMATIC DATA CENTER***

According to the National Climatic Data Center, there have been recorded lightning events in Volusia County as listed in **Section 5: Table 9**. However, these are only the lightning events that have been reported to NCDC. According to emergency managers from various Volusia County jurisdictions thousands of lightning strikes occur each day during the summer afternoon thunderstorms. For example, in 1997 the Port Orange Police Department was struck by lightning twice in a two-week period, each time knocking out the 911 consoles. In addition, during September 2007, there was a lightning event that occurred in Port Orange causing damages totaling $310,000 to a property which had an appraisal value of $350,000 and another which occurred in August 2009, in DeBary causing damages of $500,000 to a church which had burned to the ground. Volusia has the second greatest number of lightning strikes in Florida, behind the Tampa Bay area. The corridor between I-75 and I-95 in the North Central Florida area experiences a high number of lightning strikes.

**Section 5: Table 9: Historical Lightning Occurrences**

| LOCATION | DATE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|
| Holly Hill | 7/23/1994 | 0/1 | $0 | A 17-year-old male riding a bike was hospitalized with burns to his chest after lightning struck the boy. |
| New Smyrna Beach | 9/18/1994 | 1/1 | $0 | A fast-moving thunderstorm, which had produced rain for only a few minutes, produced the flash which struck the victims directly. One death and one injury resulted. |
| New Smyrna Beach | 6/24/1995 | 0/1 | $0 | A lifeguard on top of a high observation tower was struck and injured by lightning. |
| Ormond Beach | 6/28/1995 | 0/1 | $0 | A woman was injured by lightning while talking on a telephone in her home. |
| Daytona Beach | 9/23/1995 | 1/1 | $0 | Two men were struck by a lone lightning bolt. Both men were hospitalized in critical condition. One of the two died three days later. |
| DeBary | 6/15/1996 | 0/0 | $285,935 | Fires started by lightning destroying two condominiums. |
| New Smyrna Beach | 6/19/1996 | 0/0 | $100,077 | Fire started by lightning severely damaged a house. |
| Edgewater | 8/20/1997 | 0/1 | $0 | Lightning knocked a plumber unconscious while he was under a mobile home. |
| New Smyrna Beach | 8/3/1999 | 0/0 | $4,032 | A Volusia County Sheriff's Office horse was killed by lightning while standing under a tree. |
| Daytona Beach | 7/4/2002 | 0/0 | $24,597 | Lightning started a fire that damaged an apartment building in Daytona Beach. |
| Daytona Beach | 7/4/2002 | 0/8 | $0 | Eight spectators were struck and injured by lightning at Daytona Beach International Speedway. Two of the victims were hospitalized. Six were treated and released at the scene. |

| LOCATION | DATE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|
| Port Orange | 8/3/2002 | 1/0 | $0 | A 62-year-old man was killed by lightning outside his home. |
| Edgewater | 8/20/2002 | 0/0 | $18,448 | Lightning started a fire that damaged a carpet store in Edgewater. |
| Oak Hill | 7/21/2003 | 0/0 | $35,822 | Fire started by lightning destroyed a mobile home. |
| Deltona | 8/25/2003 | 0/0 | $298,513 | Fire from a lightning strike destroyed a church in Deltona. |
| Port Orange | 9/14/2003 | 0/0 | $298,513 | Lightning struck a warehouse in Port Orange. |
| Daytona Beach | 6/3/2004 | 0/2 | $0 | Two spectators suffered minor injuries from a lightning strike at Daytona Beach International Speedway. |
| Pierson | 7/7/2004 | 0/2 | $0 | Two convenience store workers were briefly hospitalized after being injured by a lightning strike while working in the store kitchen. |
| Edgewater | 5/24/2005 | 0/1 | $0 | A 27-year-old man was seriously injured by lightning while in a wooded area near Edgewater. |
| DeLand | 7/29/2005 | 0/0 | $0 | Lightning strikes down trees and power lines in DeLand. |
| DeBary | 5/26/2006 | 0/1 | $0 | A woman carrying a child outside was struck by lightning. The child was uninjured. The woman was transported to a hospital in critical condition. |
| Deltona | 6/25/2007 | 0/0 | $26,523 | Lightning heavily damaged a home in Deltona. |
| Ponce Park | 9/12/2007 | 0/2 | $0 | A small boat was struck by lightning in the Halifax River, resulting in minor injuries for two people. |
| DeBary | 7/16/2008 | 0/0 | $4,120 | Lightning ignited a barn fire near DeBary. |
| DeBary | 7/16/2008 | 0/0 | $500,000 | A lightning strike from an intense thunderstorm started a fire with burned a church to the ground. |
| Holly Hill | 7/24/2009 | 0/1 | $0 | Sea breeze boundaries collided over coastal Volusia County, resulting in the rapid development of a severe storm near Ormond Beach. This cell then back-built south-southwest along a boundary during the late afternoon, producing a complex of strong to severe cells farther inland. A waterspout developed within the initial severe cell offshore of Ormond Beach and moved onto the beach as a tornado, reaching the adjacent backyard of several homes just beyond the beach. This vortex meandered |

| LOCATION | DATE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|
| | | | | south along the beach and near-shore Atlantic waters for about ten minutes. Early in the evening, another tornado (EF-0) developed inland over Port Orange and damaged 150 mobile homes before lifting. |
| Daytona Beach and South Peninsula | 8/05/2009 | 0/1 | $0 | Strong thunderstorms produced frequent cloud to ground lightning strikes across Volusia County. Two individuals were injured by lightning strikes in separate incidents about 30 minutes apart within Daytona Beach and South Peninsula. |
| DeBary | 8/20/2009 | 0/0 | $4,000 | Sea breeze thunderstorms produced lightning across central Florida. Lightning ignited a barn fire near DeBary. |
| Blake | 6/9/2015 | 0/1 | $0 | Lightning associated with thunderstorms developing along the east coast sea breeze injured a boy fishing in the water at Daytona Beach Shores. |
| Harbor Point | 6/26/2015 | 1/0 | $0 | Thunderstorms developed over northern Volusia County along the east coast sea breeze. Lightning struck and killed a 25-year-old male in Port Orange as he worked outdoors. |
| Daytona Beach Shores | 6/24/2016 | 1/2 | $0 | Lightning from a thunderstorm located about 4 miles to the north struck a woman walking at waters edge on Daytona Beach Shores, resulting in a fatality. |
| Ponce Park | 8/14/2016 | 0/1 | $0 | A severe thunderstorm produced wind damage to trees and structures in Lake County during the middle of the afternoon. About an hour later, another storm produced lightning which injured a man on a Volusia County beach. |
| Ellison Acres | 1/7/2017 | 0/1 | $0 | A line of strong thunderstorms moved quickly east across Volusia County early in the morning, crossing Ponce Inlet prior to sunrise. A fisherman on the north jetty was injured when lightning struck his fishing pole. |
| Ormond by the Sea | 7/22/2017 | 0/1 | $0 | Lightning struck close to a woman standing in shallow water in Ormond by the Sea, resulting in injuries. |
| Maytown | 8/5/2017 | 0/0 | $200,000 | An afternoon thunderstorm produced a lightning strike that hit a house in Oak Hill. The house caught fire and suffered extensive damage. No injuries or fatalities were reported. |

| LOCATION | DATE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|
| Ellison Acres | 6/14/2018 | 0/3 | $0 | Numerous showers and thunderstorms developed along the collision of the east and west coast sea breeze in eastern Orange and eastern Seminole County. One storm became strong and produced penny-sized hail just east of Geneva. Then, as these storms pushed east towards the coast, one storm produced a lightning strike that injured three people that were near the edge of the boardwalk in New Smyrna Beach. |
| Harbor Point | 6/21/2018 | 0/0 | $275,000 | This storm produced a severe wind gust in Melbourne Beach. In Port Orange, a home was destroyed after being struck by lightning and catching fire. |
| DeLand | 8/28/2018 | 0/1 | $0 | A woman standing in a parking lot in DeLand was struck and seriously injured by a lightning strike. |
| Ormond Beach | 6/9/2019 | 1/0 | $0 | A motorcyclist was killed when he was struck by lightning while on Interstate 95 in Volusia County. |
| Mission City | 7/19/2022 | 1/1 | $0 | Lightning struck and injured two people at two different locations in New Smyrna Beach. A 27-year-old man was seriously injured and transported to a local hospital, where he later died from his injuries. A 66-year-old man suffered minor injuries after lightning struck nearby. |
| Deltona | 5/22/2023 | 1/0 | $0 | Lightning struck and killed a 24-year-old man while he was working on a roof in Volusia County, causing him to fall off of the roof. |

Source: National Climatic Data Center

***NOTE: ALL HISTORICAL OCCURRENCES IN THIS REPORT ARE THE MOST RECENT AS DOCUMENTED BY THE NATIONAL CLIMATIC DATA CENTER***

**Section 5: Table 10** shows historic thunderstorm events, including thunderstorm winds and high winds, which resulted in property damage in Volusia County. (Other windstorms, such as tornadoes and hurricanes, are addressed separately.)

**Section 5: Table 10: Historical Thunderstorm Occurrences Resulting in Property Damage**

| LOCATION | DATE | TYPE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| Pierson | 3/27/2000 | Thunderstorm Winds | 0/0 | $19,572 | Severe thunderstorm winds blew down trees on a house near Pierson. |
| Deltona | 7/26/2000 | Thunderstorm Winds | 0/1 | $15,657 | Thunderstorm winds blew down power lines and trees in the Deltona Area. One woman was injured when a tree fell on her car as she was driving in Deltona. |
| Orange City | 9/03/2000 | Thunderstorm Winds | 0/0 | $39,143 | Thunderstorm winds blew down numerous trees and power lines in Orange City. Falling trees damaged six residences. |
| Emporia | 9/04/2000 | Thunderstorm Winds | 0/0 | $13,048 | Thunderstorm winds blew down a large shed cover at a fern nursery. |
| Daytona Beach | 3/13/2001 | Thunderstorm Winds | 0/1 | $38,003 | Strong microburst winds hit the barrier island in Daytona Beach destroying a large tent and a beach tollbooth. One person was injured. |
| Daytona Beach | 6/16/2001 | Thunderstorm Winds | 0/0 | $19,002 | Thunderstorm winds blew a 50-foot section off the roof of a restaurant in Daytona Beach. |
| New Smyrna Beach | 8/21/2001 | Thunderstorm Winds | 0/0 | $20,268 | Thunderstorm winds swept across the New Smyrna Beach Airport overturning a small plane and damaging six others. |
| DeBary | 8/05/2002 | Thunderstorm Winds | 0/0 | $12,299 | Thunderstorm winds blew down trees on a mobile home in Debary. |
| Deltona | 3/07/2003 | Thunderstorm Winds | 0/0 | $1,194 | Thunderstorm winds blew down numerous trees and power lines in Deltona. |
| Deltona | 3/19/2003 | Thunderstorm Winds | 0/0 | $119,405 | Strong thunderstorm winds swept across the Deltona area blowing down dozens of trees that damaged houses and vehicles. |

| | | | | | Road. The daily east coast sea breeze pushed inland and produced thunderstorms over coastal sections of Central Florida. |
| Fatio | 6/21/2008 | Thunderstorm Winds | 0/0 | $5,150 | Law enforcement reported three trees down across County Road 42. The daily east coast sea breeze pushed inland and produced thunderstorms over coastal and interior sections of Central Florida. |
| Beresford | 6/21/2008 | Thunderstorm Winds | 0/0 | $1,030 | Law enforcement reported a large tree down across State Road 44. The daily east coast sea breeze pushed inland and produced thunderstorms over coastal and interior sections of Central Florida. |
| DeBary, Holly Hill, Osteen, and Daytona Beach | 10/9/2008 | Thunderstorm Winds | 0/0 | $0 | A north moving warm front produced widespread thunderstorms across central Florida. |
| Orange City | 4/14/2009 | Thunderstorm Winds | 0/0 | $0 | A squall line well ahead of a cold front produced numerous thunderstorms with damaging straight-line winds, large hail and a brief, weak tornado. Several Line Echo Wave Pattern (LEWP) features were apparent on radar with rotating comma head signatures. |
| Harbor Point | 6/18/2009 | Thunderstorm Winds | 0/0 | $0 | Numerous strong storms impacted central Florida ahead of a stalled frontal boundary far to the north. Local sea breeze interactions combined with a large-scale outflow boundary propagating to the region prompted the storm development. Many storms produced small hail and wind gusts 45-55 mph, with two storms strengthening to severe levels and resulting in damaging wind gusts. |
| DeLand | 6/13/2009 | Thunderstorm Winds | 0/0 | $0 | Numerous strong storms developed over east central Florida, with a few strengthening to severe levels and producing wind damage and large hail. |
| DeLand | 3/31/2009 | Thunderstorm Winds | 0/0 | $0 | A northward-lifting warm front combined with active sea breeze |

| LOCATION | DATE | TYPE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| | | | | | boundaries within an unstable atmosphere produced several severe thunderstorms with nickel to quarter sized hail and localized severe winds. |
| Lake Harney | 8/3/2009 | Thunderstorm Winds | 0/0 | $0 | Thunderstorms along the east coast sea breeze boundary progressed inland and intensified to produce minor wind damage and a funnel cloud. |
| DeLand | 1/21/2010 | Thunderstorm Winds | 0/0 | $0 | Numerous strong thunderstorms moved across the county, well ahead of a cold front during the late afternoon and evening. One of the storms became severe and produced localized wind damage. A funnel cloud was also observed by the Daytona Beach Airport (KDAB) weather observer. |
| Ormond Beach | 6/3/2010 | Thunderstorm Winds | 0/0 | $0 | Numerous strong thunderstorms lifted northeast across east-central Florida from mid-afternoon through early evening. Two of the storms became severe and produced damaging winds which downed several trees and large limbs within Orange and Volusia Counties. |
| DeLand | 8/22/2010 | Thunderstorm Winds | 0/0 | $0 | Saturated grounds from previous rains, along with recent heavy rain and 30 mph wind gusts from a thunderstorm passing 30 minutes earlier, caused a large pine tree to topple as a vehicle was traveling beneath, resulting in a fatality. |
| Ormond Beach | 4/5/2011 | Thunderstorm Winds | 0/0 | $0 | A pre-frontal squall line crossed central Florida during the morning and early afternoon. A few of the storms became strong to severe and produced high winds and a funnel cloud, primarily across Volusia and Brevard Counties. |
| Volusia County | 6/17/2011 | Thunderstorm Winds | 0/0 | $0 | Numerous strong to severe storms formed along the east coast sea breeze across the central Florida interior and Volusia County, producing dime to quarter sized hail and winds of 50 to 60 mph. |

| LOCATION | DATE | TYPE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| Volusia County | 3/30/2011 | Thunderstorm Winds | 0/0 | $0 | A rare Florida derecho affected the region during the late afternoon and early evening, well ahead of a strong cold front. The rapidly moving squall line, contained multiple bow echoes as it moved across the central portion of Florida at 60 mph. |
| DeBary | 3/30/2011 | Thunderstorm Winds | 0/0 | $0 | A rare Florida derecho affected the region during the late afternoon and early evening, well ahead of a strong cold front. The rapidly moving squall line, contained multiple bow echoes as it moved across the central portion of Florida at 60 mph. |
| DeBary | 3/30/2011 | Thunderstorm Winds | 0/0 | $0 | A rare Florida derecho affected the region during the late afternoon and early evening, well ahead of a strong cold front. The rapidly moving squall line, contained multiple bow echoes as it moved across the central portion of Florida at 60 mph. |
| Deltona | 3/30/2011 | Thunderstorm Winds | 0/0 | $0 | A rare Florida derecho affected the region during the late afternoon and early evening, well ahead of a strong cold front. The rapidly moving squall line, contained multiple bow echoes as it moved across the central portion of Florida at 60 mph. |
| DeLand | 8/13/2011 | Thunderstorm Winds | 0/0 | $5,000 | An isolated severe thunderstorm developed along a boundary collision in central Volusia County and produced wind damage. |
| Glencoe | 5/17/2012 | Thunderstorm Winds | 0/0 | $0 | The east coast sea breeze formed in the early afternoon and propagated inland, eventually colliding with the west coast sea breeze over the central peninsula. Storms moved to the east and northeast and produced large hail over Brevard and Volusia Counties. |
| Oak Hill | 8/8/2012 | Thunderstorm Winds | 0/0 | $0 | A line of storms developed along the west coast sea breeze and intensified as it interacted with the |

| LOCATION | DATE | TYPE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| | | | | | east coast sea breeze. One of the storms in this line became severe near Haulover Canal. |
| Volusia County | 6/30/2013 | Thunderstorm Winds | 0/0 | $0 | Deep southwesterly flow led to the development of several strong to severe thunderstorms, which moved from the Orlando area to the coast of Volusia and Brevard Counties. Peak winds gusts reached 66 mph in Orlando. Thunderstorm winds also peeled back part of a roof from a home in Port Orange. |
| Volusia County | 9/11/2013 | Thunderstorm Winds | 0/0 | $10,000 | An isolated heavy shower moved onshore from the Atlantic late at night and produced wind damage to the upper story of an apartment complex. |
| Deltona | 12/15/2013 | Thunderstorm Winds | 0/0 | $1,000 | A broken line of showers and thunderstorms moved rapidly southeast across Volusia County. Two cells along the line caused minor wind damage to trees, but no structural damage. Part of a tree fell onto powerlines and a vehicle in Deltona, and tree limbs temporarily blocked a road in Osteen. |
| Coronado Beach | 02/12/2014 | Thunderstorm Winds | 0/0 | $0 | A squall line developed out ahead of a cold front over the eastern Gulf of Mexico. Thunderstorms within the squall line produced damaging winds and large hail (although hail was not reported in Volusia County) |
| Daytona Beach | 04/01/2014 | Thunderstorm Winds | 0/0 | $0 | A broken line of showers moved northeast across Volusia and Brevard Counties. A severe thunderstorm developed near the northern edge of the line and caused localized wind damage near Daytona Beach International Airport and Embry-Riddle Aeronautical University Campus. |
| Cassadaga Lake Helen | 6/10/2014 | Thunderstorm Winds | 0/0 | $5,000 | Thunderstorms developed over the interior and produced locally damaging winds along with quarter sized hail. |

| LOCATION | DATE | TYPE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| Daytona Beach International Airport | 6/24/2014 | Thunderstorm Winds | 0/0 | $0 | A thunderstorm developed rapidly along the east coast sea breeze over coastal Volusia County and produced severe wind gusts and hail up to nickel size at Daytona Beach Airport. |
| DeLeon Springs | 7/14/2014 | Thunderstorm Winds | 0/0 | $0 | Strong thunderstorms moved into western Volusia County and interacted with the east coast sea breeze. |
| Coronado Beach | 7/25/2014 | Thunderstorm Winds | 0/0 | $245,000 | An EF-1 tornado touched down within a rural airpark and affected adjacent neighborhoods. Several buildings and small planes were damaged at the airpark, and many trees were damaged or uprooted within the adjacent neighborhood as the tornado tracked northeast. The thunderstorm which produced the tornado was also responsible for wind damage to a fence and the roof of an apartment building on the barrier island in New Smyrna Beach. |
| Orange City | 6/1/2015 | Thunderstorm Winds | 0/0 | $0 | Several strong to severe thunderstorms developed along the east coast sea breeze as it pushed inland to the Interstate 4 corridor during the afternoon and interacted with other outflow boundaries. Large hail, up to golf ball sized was reported across DeBary, Sanford, Lake Mary, Altamonte Springs and Oakland. Strong winds also felled numerous trees and large tree branches leading to damage to homes and cars in DeBary, Astatula, and Lake Mary. |
| Lake Helen | 3/24/2016 | Thunderstorm Winds | 0/0 | $2,000 | An upper-level weather disturbance, together with a very unstable airmass and mesoscale boundaries resulted in numerous strong thunderstorms across the central Florida peninsula. Two of the storms produced large hail, from quarter to golf ball size. |

| LOCATION | DATE | TYPE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| Edgewater | 9/13/2016 | Thunderstorm Winds | 0/0 | $5,000 | A tropical disturbance, with a well-defined surface circulation, moved onshore near Vero Beach during the early morning hours, then lifted northward along the coast to Volusia County (and beyond) through the evening. By late evening, the system was upgraded to Tropical Storm Julia, as it approached Jacksonville. A rain band associated with the system spawned an EF-0 tornado in southern Brevard County during the early afternoon, resulting in damage to a few residences. Other passing rain bands produced strong wind gusts along the coast of Brevard and Volusia Counties, one of which resulted in damage to a home in Edgewater. A funnel cloud was also sighted in Lake County. |
| Hucomer | 9/29/2016 | Thunderstorm Winds | 0/0 | $0 | A thunderstorm became severe over southeast Volusia County and produced damage to several trees and powerlines in the town of Edgewater. |
| New Smyrna Beach Fatio | 1/22/2017 | Thunderstorm Winds | 0/0 | $0 | An unusually strong jet stream aided development of an intense squall line which moved rapidly across east central Florida during the evening of January 22. Several thunderstorms developed ahead of the main squall line and became severe, as well as other storms within the squall line itself. Reports of quarter sized hail, wind gusts over 60 mph and funnel clouds were received. A localized area of tree damage also occurred. |
| DeLand Municipal Airport Holly Hill | 11/23/2017 | Thunderstorm Winds | 0/0 | $50,000 | A strong thunderstorm embedded within a rain area ahead of a cold front intensified as it traveled quickly northeast across Volusia County. Mobile homes were damaged well inland in DeLand, then over 30 minutes later, the storm damaged mobile homes in |

| LOCATION | DATE | TYPE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| | | | | | Daytona Beach. Rain totals reached five to seven inches in a short period of time from Ormond-by-the-Sea to Holly Hill. High levels of standing water and some impassible roadways occurred. |
| DeLand Municipal Airport Allandale | 4/15/2018 | Thunderstorm Winds | 0/0 | $0 | The Storm Prediction Center had designated a slight change of severe weather for all of east central Florida. A high amplitude shortwave over the Mississippi River Valley quickly moved south across the Florida peninsula during the afternoon and evening hours. A cold front associated with the intensifying trough was also observed crossing the Florida peninsula. Ahead of the cold front moderate thermodynamic instability with 700mb temperatures between -7 to -8 degrees Celsius, and 500mb between -9 to -10 degrees Celsius, resulting in lapse rates of 6-6.5 C/km. 90 knot winds atop a hot streak over the north central Gulf of Mexico created resulting flow from the southwest. Numerous showers and thunderstorms developed along the cold front, eventually forming a line that crossed across all of east central Florida. |
| Ormond Beach | 7/22/2018 | Thunderstorm Winds | 1/1 | $0 | One person was killed, and another injured in Ormond Beach when winds from a non-severe thunderstorm knocked over a large, mostly dead tree onto them. |
| Deltona | 5/4/2019 | Thunderstorm Winds | 0/0 | $0 | An area of high pressure located over the central Atlantic was the dominant feature affecting weather over central Florida. This led to west to southwest winds at the surface that pushed deep moisture from the Gulf across the area. Hot daytime temperatures, and cold temperatures in the middle atmosphere provided the necessary |

| LOCATION | DATE | TYPE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| | | | | | ingredients for strong to severe thunderstorms to develop. |
| DeLand | 6/9/2019 | Thunderstorm Winds | 0/0 | $0 | Rich moist air was moving across the Florida peninsula as the area was sandwiched between the Atlantic high pressure to the south and a low-pressure system over the eastern half of the U.S. This combination of weather systems provided substantial energy in the atmosphere, that when combined with daytime heating and southwest winds at the surface led to the development of numerous strong thunderstorms across east central Florida. As these storms pushed across the peninsula they produced and interacted with many outflow boundaries and the east coast sea breeze. Several storms became severe as they moved over Seminole and Volusia Counties, where wind damage was reported. Also, a motorcyclist was killed when he was struck by lightning while on Interstate 95 in Volusia County. |
| Daytona Beach | 09/18/2019 | Thunderstorm Wind | 0/0 | $0 | A strong storm came onshore in Volusia County and quickly became severe over Daytona Beach. Observations of 50 knot or greater winds occurred at three separate, but close by locations. |
| Fatio | 04/20/2020 | Thunderstorm Wind | 0/0 | $0 | As a broken line of severe thunderstorms moved through Seminole County, one storm produced a brief waterspout/tornado on and near Lake Jesup. A second thunderstorm produced damaging winds in Volusia County, while a third thunderstorm produced damaging winds and hail in Martin County. |
| Cassadaga | 05/28/2020 | Thunderstorm Wind | 0/0 | $0 | Scattered strong to severe storms moved across Lake and Volusia counties producing minor wind damage and small hail. |

| LOCATION | DATE | TYPE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| Daytona Beach | 06/06/2020 | Thunderstorm Wind | 0/0 | $5,000 | A National Weather Service damage survey confirmed straight-line winds estimated at 55-65 mph impacted the Daytona Flea and Farmers Market in Daytona Beach. Damage consisted of the removal of a large portion of a corrugated roof, with metal roofing peeled back on several adjacent buildings. Roof debris was blown downwind 100 yards onto adjacent portions of Interstate 95, causing the roadway to be closed for several hours. No other damage was noted in the area and there were no injuries or fatalities. |
| DeBary | 08/09/2020 | Thunderstorm Wind | 0/0 | $0 | Afternoon thunderstorms that developed along the sea breeze collision became severe, producing large hail in Volusia County, and damaging winds in Volusia and Orange Counties. |
| Coronado Beach | 08/18/2020 | Thunderstorm Wind | 0/0 | $0 | Numerous thunderstorms developed along the outflow boundary and sea breeze collisions. These storms produced two tornadoes in western Volusia County, including a rare August EF-2. In addition, other thunderstorms produced strong winds and hail along the Volusia and Brevard County coasts. |
| DeLand | 08/20/2020 | Thunderstorm Wind | 0/0 | $0 | A thunderstorm became severe as it moved north through DeLand where it caused damage to planes and hangers at the airport, as well as nearby homes. |
| Samsula | 10/28/2021 | Thunderstorm Wind | 0/0 | $1,000 | Numerous thunderstorms were moving across Volusia County, where one storm became strong and produced localized wind damage in New Smyrna Beach. |
| DeLand | 03/01/2022 | Thunderstorm Wind | 0/0 | $10,000 | A strong thunderstorm that moved through DeLand in Volusia County produced minor wind damage that resulted in old trees falling into several power lines. |

| LOCATION | DATE | TYPE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| Samsula | 03/16/2022 | Thunderstorm Wind | 0/0 | $0 | Numerous afternoon thunderstorms developed across east-central Florida, with several becoming severe. These severe storms produced large hail in Brevard, Seminole, and Volusia County, with wind damage to trees also occurring in Volusia County. |
| Edgewater | 07/19/2022 | Thunderstorm Wind | 0/0 | $3,000 | Strong thunderstorms that developed along the sea breeze collision moved east and offshore of Volusia County. One storm became severe where it produced wind damage in Edgewater. |
| Orange City | 08/17/2022 | Thunderstorm Wind | 0/0 | $4,000 | A thunderstorm became severe in western Volusia County where it produced tree and powerline damage in Orange City. |

Source: National Climatic Data Center

***NOTE: ALL HISTORICAL OCCURRENCES IN THIS REPORT ARE THE MOST RECENT AS DOCUMENTED BY THE NATIONAL CLIMATIC DATA CENTER***

## Probability of Future Occurrences

Severe weather events will continue to have high occurrences in the future. Based on the frequency of hail events in the past, the probability of future hail occurrences in Volusia County is high. Over the past 45 years, Volusia County has been impacted by two or more hail events per year. It can be expected that future hail events will continue to cause minor to severe damage to property and vehicles throughout Volusia County.

The probability of occurrence for future lightning events in Volusia County is high. According to NOAA, Volusia County is in an area of the country that experiences 8-16 lightning flashes per square kilometer per year (approximately 20,224 to 40,448 flashes countywide per year). Given this regular frequency of occurrence, it can be expected that future lightning events will continue to threaten life and property throughout Volusia County.

Thunderstorms are frequent in Volusia County. During the summer, Volusia County experiences thunderstorms nearly every afternoon. They will undoubtedly continue to occur, thereby threatening the lives, safety, and property in Volusia County. Therefore, the probability of future occurrences is high.

The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts from severe weather and that future mitigation and adaptation strategies related to this hazard should be considered.

## 5.11 TORNADO

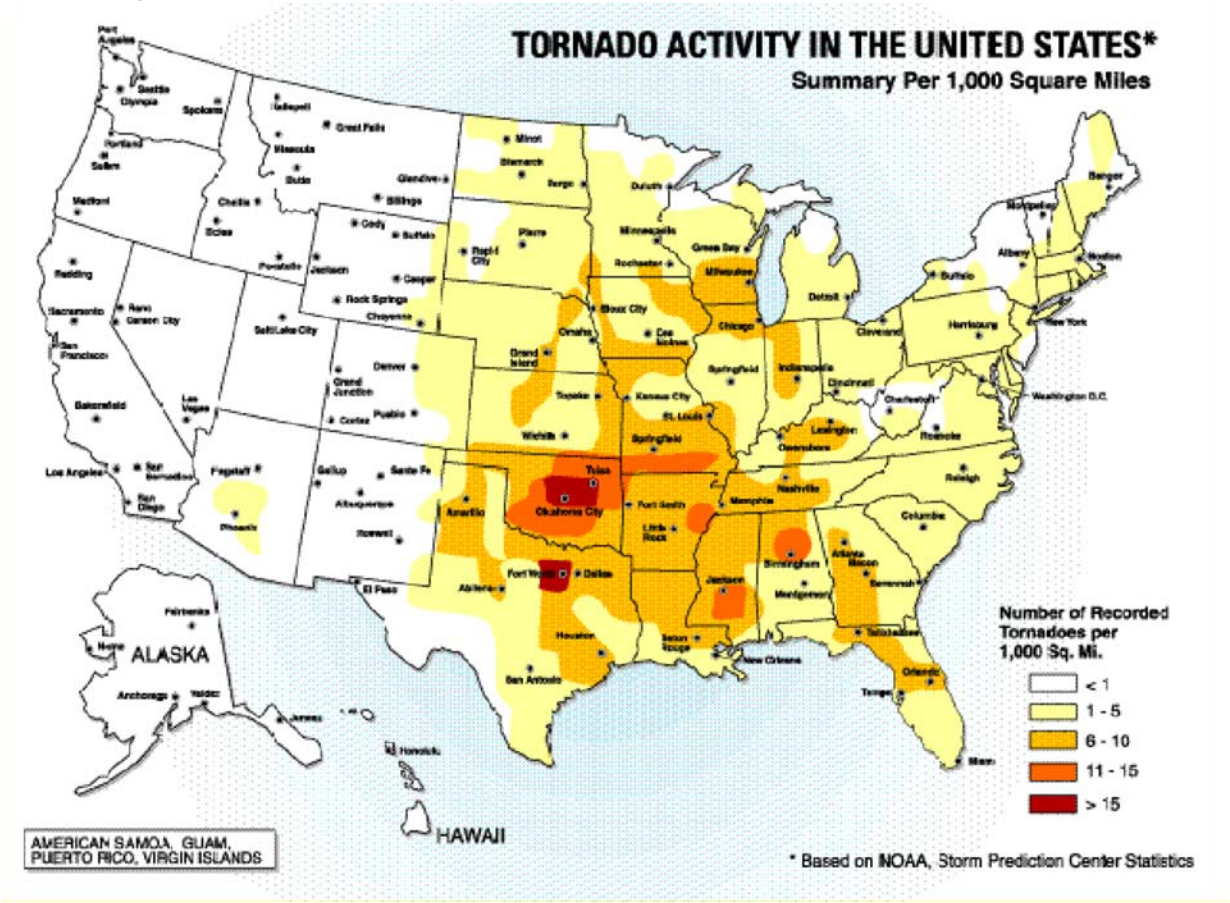
### Background

A tornado is a violent windstorm characterized by a twisting, funnel-shaped cloud extending to the ground. Tornadoes are most often generated by thunderstorm activity (but sometimes result from hurricanes and other tropical storms) when cool, dry air intersects and overrides a layer of warm, moist air forcing the warm air to rise rapidly. The damage caused by a tornado is a result of the high wind velocity and wind-blown debris, also accompanied by lightning or large hail. According to the National Weather Service, tornado wind speeds normally range from 40 to more than 300 miles per hour and are a few yards wide. The most violent tornadoes have rotating winds of 250 miles per hour or more and can cause extreme destruction, carving a path over a mile wide and several miles long and turning normally harmless objects into deadly missiles.

Over 800 tornadoes are reported nationwide annually, resulting in an average of 80 deaths and 1,500 injuries (NOAA, 2007). They are more likely to occur during the months of March through May and can occur at any time of day but are likely to form in the late afternoon and early evening. Further, the tornadoes associated with tropical cyclones are most frequent in September and October when the incidence of tropical storm systems is greatest. The destruction caused by tornadoes ranges from light to inconceivable depending on the intensity, size and duration of the storm. Typically, tornadoes cause the greatest damage to structures of light construction, including residential dwellings (particularly mobile homes). The magnitude of tornadic activity is reported using the Enhanced Fujita Scale. However, tornado magnitudes prior to 2005 were classified using the traditional version of the Fujita Scale.

**Section 5: Table 11: Enhanced Fujita Scale for Tornadoes (Effective 2005 and after)**

| F-SCALE NUMBER | INTENSITY | WIND SPEED (MPH) | TYPE OF DAMAGE DONE |
|---|---|---|---|
| **F0** | GALE | 65–85 | Some damage to chimneys; breaks branches off trees; pushes over shallow-rooted trees; damages to sign boards. |
| **F1** | MODERATE | 86–110 | Peels surface off roofs; mobile homes pushed off foundations or overturned; moving autos pushed off the roads; attached garages may be destroyed. |
| **F2** | SIGNIFICANT | 111–135 | Considerable damage. Roofs torn off frame houses; mobile homes demolished; boxcars pushed over; large trees snapped or uprooted; light object missiles generated. |
| **F3** | SEVERE | 136–165 | Roof and some walls torn off well-constructed houses; trains overturned; most trees in forest uprooted. |
| **F4** | DEVASTATING | 166–200 | Well-constructed houses leveled; structures with weak foundations blown off some distance; cars thrown and large missiles generated. |
| **F5** | INCREDIBLE | Over 200 | Strong frame houses lifted off foundations and carried considerable distances to disintegrate; automobile sized missiles fly through the air in excess of 100 meters; trees debarked; steel re-enforced concrete structures badly damaged. |



**Section 5: Table 12: The Fujita Scale (Effective Prior to 2005)**

| F-SCALE NUMBER | INTENSITY | WIND SPEED (MPH) | TYPE OF DAMAGE DONE |
|---|---|---|---|
| **F0** | GALE | 40–72 | Some damage to chimneys; breaks branches off trees; pushes over shallow-rooted trees; damages to sign boards. |
| **F1** | MODERATE | 73–112 | Peels surface off roofs; mobile homes pushed off foundations or overturned; moving autos pushed off the roads; attached garages may be destroyed. |
| **F2** | SIGNIFICANT | 113–157 | Considerable damage. Roofs torn off frame houses; mobile homes demolished; boxcars pushed over; large trees snapped or uprooted; light object missiles generated. |
| **F3** | SEVERE | 158–207 | Roof and some walls torn off well-constructed houses; trains overturned; most trees in forest uprooted. |
| **F4** | DEVASTATING | 208–260 | Well-constructed houses leveled; structures with weak foundations blown off some distance; cars thrown, and large missiles generated. |
| **F5** | INCREDIBLE | 261–318 | Strong frame houses lifted off foundations and carried considerable distances to disintegrate; automobile sized missiles fly through the air in excess of 100 meters; trees debarked; steel re-enforced concrete structures badly damaged. |
| **F6** | INCONCEIVABLE | 319–379 | These winds are very unlikely. The small area of damage they might produce would probably not be recognizable along with the mess produced by F4 and F5 wind that would surround the F6 winds. Missiles, such as cars and refrigerators would do serious secondary damage that could not be directly identified as F6 damage. If this level is ever achieved, evidence for it might only be found in some manner of ground swirl pattern, for it may never be identifiable through engineering studies. |

Source: National Weather Service

According to the NOAA Storm Prediction Center (SPC), the highest concentration of tornadoes in the United States has been in Oklahoma, Texas, Kansas and Florida. Although the Great Plains region of the Central United States does favor the development of the largest and most dangerous tornadoes (earning the designation of “tornado alley”), Florida experiences the greatest number of tornadoes per square mile of all U.S. states (SPC, 2002). **Section 5: Figure 17** shows tornado activity in the United States based on the number of recorded tornadoes per 1,000 square miles.

**Section 5: Figure 17: U.S. Tornado Activity**

Source: Federal Emergency Management Agency

## Location and Spatial Extent

Based on historic data, tornadoes occur throughout the state of Florida at a rate of 1-10 confirmed touchdowns per 1,000 square miles. Florida tornadoes typically impact a relatively small area; however, events are completely random, and it is not possible to predict specific areas that are more susceptible to a tornado strike over time. Therefore, it is assumed that all of Volusia County and its jurisdictions are uniformly exposed to this hazard. **Section 5 Figure 17** displays were where the hazard has been identified.

April, May, and June are considered the peak months for Florida tornadoes. A review of historical data shows that tornadoes within Volusia County are typically in the F0, F1 and, more rarely, the F2 range. F3 and F4 tornadoes are very rare, with three occurring since 1950. The county has never experienced a F5 tornado on record.

## Historical Occurrences

According to the National Climatic Data Center, these events occurred in the Volusia County study area as listed in **Section 5: Table 13**.

**Section 5: Table 13: Historical Tornado Impacts**

| Oak Hill | 7/5/1997 | F0 | 0/0 | $41,928 | The brief touchdown damaged 2 houses and 8 mobile homes. |
| New Smyrna Beach | 11/2/1997 | F3 | 0/32 | $19,566,485 | A rapidly intensifying tornado initially touched down in New Smyrna Beach about 1 mile west of U.S. Highway 1 between Enterprise and Wayne Avenues. The tornado moved east northeast at about 50 mph damaging several homes and downing trees and power lines. It lifted just west of Highway 1 after passing Chisholm Elementary School. The tornado then struck New |

| LOCATION | DATE | MAGNITUDE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| | | | | | Smyrna Beach High School producing Fujita Scale F1 damage. As the tornado intensified to a strong F3 category, it passed through the Venetian Villas subdivision and the Diamond Head Condominiums. A number of large well-built homes were destroyed. Many of the units in the 10 story Diamond Head Condominiums received major damage as high winds blew out exterior glass walls and blew furniture into the adjoining Indian River Lagoon. The tornado then crossed the Intracoastal Waterway and passed over the barrier island between Robinson Road and East Street where a number of large well-built homes were almost completely destroyed. The tornado then moved over the Atlantic Ocean. In all 32 people were injured, six requiring hospitalizations. Thirty-one homes were destroyed and 290 were damaged. Damage estimates were near 14 million dollars. |
| Emporia | 2/16/1998 | F0 | 0/0 | $111,808 | Sixteen mobile homes were damaged, and one was destroyed. |
| Daytona Beach | 2/22/1998 | F2 | 1/3 | $5,504,681 | This tornado cell caused extensive damage and two deaths throughout Volusia County. In Daytona Beach one person was killed and three others were injured while in a mobile home. In Osteen, a man staying in a recreational vehicle was killed. |
| Osteen | 2/23/1998 | F3 | 1/0 | $1,376,170 | |
| Oak Hill | 2/23/1998 | F2 | 0/0 | $688,085 | |
| Port Orange | 7/28/1998 | F0 | 0/0 | $137,617 | Thirty-three mobile homes were damaged with this F0 tornado. |
| New Smyrna Beach | 9/17/2000 | F0 | 0/0 | $13,048 | This tornado caused minor damage including power outages and downed signs and trees. |
| Daytona Beach | 3/13/2001 | F1 | 0/5 | $6,333,850 | This F1 damaged over 100 houses and dozens of vehicles, many due to fallen trees. Five people were injured. |

| LOCATION | DATE | MAGNITUDE | DEATHS/ INJURIES | PROPERTY DAMAGE | DESCRIPTION |
|---|---|---|---|---|---|
| New Smyrna Beach | 9/14/2001 | F0 | 0/0 | $70,939 | This tornado was a result of a rainstorm associated with Tropical Storm Gabriel. Twelve mobile homes were damaged and three were destroyed. |
| Daytona Beach | 8/8/2004 | F0 | 0/0 | $0 | A waterspout came ashore, blowing branches from trees. |
| South Daytona | 8/13/2004 | F1 | 0/0 | $0 | This tornado cell was associated with Hurricane Charley. It caused minor damage to homes, commercial buildings, and trees. |
| Daytona Beach Shores | 8/13/2004 | F0 | 0/1 | $0 | |
| DeLand | 12/25/2006 | F2 | 0/5 | $2,731,818 | An F2 tornado touched down just west of North Stone Street in DeLand and moved northeast crossing Highway 17. It moved across the Fernwood mobile home community and continued northeast over Meadowlea Estates mobile home community. It lifted just north of Carter Road. Fifty-two residences were destroyed and 162 were damaged. Five people were seriously injured. |
| Daytona Beach International Airport | 12/25/2006 | F2 | 0/6 | $54,636,350 | The same system that caused fived injuries and damaged 162 homes in DeLand touched down at Daytona Beach International, destroying 40 Embry Riddle University aircraft and the two-story administration building. East of Embry Riddle Aeronautical University, 48 apartments units were destroyed and 200 were damaged. |
| Beresford | 2/2/2007 | F3 | 0/42 | $55,166,800 | The tornado that killed 13 people in Lake County moved east across the St. Johns River, crossed into Volusia county at Lake Beresford and moved across DeLand as an F3 tornado. It was still moving east northeast at 50 MPH as it damaged 277 and destroyed 106 residences in the DeLand area. There were no fatalities in Volusia County but 42 people were injured. |
| New Smyrna Beach (Airport) | 2/2/2007 | F1 | 0/0 | $6,365,400 | |

| Lake George | 7/7/2007 | F0 | 0/0 | $31,827 | Tornado-force winds caused damage to a restaurant and apartment complex. |
| Port Orange and Ormond Beach | 7/24/2009 | F0 | 0/1 | $ 2,500,000 | This tornado was caused by a sea breeze merger, when winds from both coasts meet and cause the rotation. Although it was classified as the mildest of twisters, it caused damage to 163 homes in Port Orange. Of these, seven were totally destroyed, eight had major damage, and twenty-six had moderate damage. The same system produced a waterspout that came ashore in Ormond Beach, destroying a catamaran. |
| Edgewater | 8/7/2010 | F0 | 0/0 | $58,000 | A waterspout formed within a thunderstorm over the intracoastal river, then moved onshore the adjacent barrier island in New Smyrna Beach and produced minor damage as it crossed to the Atlantic coast. |
| Edgewater | 8/11/2010 | F0 | 0/0 | $5,000 | Scattered thunderstorms trained northward near the Florida east-central coast, within a strong southerly flow due in part to the presence of Tropical Depression Five remnants near the central Gulf coast. Around mid-day, a waterspout developed over the intracoastal river and moved onshore the mainland in Edgewater, producing minor damage. Several hours later, another storm developed rotation and produced a brief touchdown in a |

|---|---|---|---|---|---|
| | | | | | wooded area, farther inland over southern Volusia County. |
| Glencoe | 8/11/2010 | F0 | 0/0 | $0 | Scattered thunderstorms trained northward near the Florida east-central coast, within a strong southerly flow due in part to the presence of Tropical Depression Five remnants near the central Gulf coast. Around mid-day, a waterspout developed over the intracoastal river and moved onshore the mainland in Edgewater, producing minor damage. Several hours later, another storm developed rotation and produced a brief touchdown in a wooded area, farther inland over southern Volusia County. |
| Volusia County | 12/10/2012 | F0 | 0/0 | $1,000 | Very moist southwest winds developed across east-central Florida well in advance of a cold front and associated upper level disturbance. Strong daytime heating, combined with moderate low-level wind shear, resulted in numerous strong storms, two of which produced tornadoes. The first tornado began as a waterspout over Lake Apopka, then crossed the northeast shore of the lake and remained on the ground for a short distance. Although the waterspout/tornado affected a rural area, several citizens witnessed the event. The second tornado impacted a mobile home park and adjacent wooded area in Edgewater, then became a waterspout as it crossed the intracoastal river, before moving across the barrier island as a tornado. Significant damage occurred at the mobile home park, with only minor damage on the barrier island. Several funnel clouds were also observed. |
| Volusia County | 12/10/2012 | F1 | 0/2 | $1.7 Million | |
| Edgewater | 7/25/2014 | F0 | N/A | N/A | A tornado struck down in Edgewater at Park Avenue and Wildwood Drive near Massey Air Park at 4:30pm, causing damage to several hangars |

|---|---|---|---|---|---|
| | | | | | and planes. Winds reached 65 to 85 mph. |
| Ormond Beach | 9/10/2017 | F1 | 0/0 | $0 | Associated with Hurricane Irma. |
| Ariel | 6/9/2018 | F0 | 0/0 | $10,000 | After storms developed over Orlando, they pushed east towards the southeastern Volusia County coastline. One storm managed to produce a very weak, short-lived tornado (land spout) in Oak Hill. |
| Beresford | 01/04/2020 | EF1 | 0/0 | $25,000 | A severe thunderstorm moving across central Florida produced two tornadoes, one in Okahumpka in Lake County, then another in DeLand in Volusia County. |
| Enterprise | 06/06/2020 | EF0 | 0/0 | $0 | A waterspout that came onshore and developed into a tornado. Based on this report, along with only minor damage to trees near the lakefront, peak winds were estimated between 45 and 55 mph. |
| DeLand | 08/18/2020 | EF2 | 1/0 | $8,010,339 | The tornado generally tracked east-northeast across the city resulting in many downed medium to large tree branches, downed power lines, and numerous large trees being uprooted, which led to many local and major roadways being blocked. Many homes and vehicles suffered moderate to major damage as large tree branches or entire trees fell on them. There were 163 damaged structures, with 49 sustaining minor damage, 40 sustaining major damage, and 5 that were destroyed. |
| Orange City | 08/18/2020 | EF0 | 0/0 | $40,000 | The tornado tracked along a 0.1 mile long path, with maximum winds estimated between 65-75 mph. The tornado had a maximum width of approximately 70 yards. |
| Isleboro | 08/02/2021 | EF0 | 0/0 | $0 | Based on information provided by the Volusia County Sheriffs Office, a short-lived tornado touched down just west of U.S. Highway 1, near the |

***NOTE: ALL HISTORICAL OCCURRENCES IN THIS REPORT ARE THE MOST RECENT AS DOCUMENTED BY THE NATIONAL CLIMATIC DATA CENTER***

**Section 5: Figure 18: Locations of Historical Tornado Events in Volusia County**

Source: National Oceanic and Atmospheric Administration

## Probability of Future Occurrences

The probability of a future tornado affecting Volusia County is high. According to historical records, Volusia County experiences, on average, more than one (1.2) confirmed tornado event annually. While many of these events are small in terms of size, intensity and duration, a greater number of stronger storms (i.e., F2 and F3 tornadoes) have been reported in the past decade. Further, even minor tornadoes can cause substantial damage. In conclusion, tornadoes pose a significant threat to lives and property in Volusia County.

The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts from tornadoes and that future mitigation and adaptation strategies related to this hazard should be considered.

# 5. TROPICAL CYCLONES

## Background

Hurricanes and tropical storms are classified as tropical cyclones and defined as any closed circulation developing around a low-pressure center in which the winds rotate counterclockwise in the Northern Hemisphere (or clockwise in the Southern Hemisphere) and whose diameter averages 10 to 30 miles across. A tropical cyclone refers to any such circulation that develops over tropical waters. Tropical cyclones act as a "safety-valve," limiting the continued build-up of heat and energy in tropical regions by maintaining the atmospheric heat and moisture balance between the tropics and the pole-ward latitudes. The primary damaging forces associated with hurricanes and tropical storms are high-level sustained winds, heavy precipitation, and tornadoes. Coastal areas are also vulnerable to the additional forces of storm surge, wind-driven waves and tidal flooding which can be more destructive than cyclone wind.

The key energy source for a tropical cyclone is the release of latent heat from the condensation of warm water. Their formation requires a low-pressure disturbance, warm sea surface temperature, rotational force from the spinning of the earth and the absence of wind shear in the lowest 50,000 feet of the atmosphere. Many hurricanes and tropical storms form in the Atlantic Ocean, Caribbean Sea, and Gulf of Mexico during the official Atlantic hurricane season, which encompasses the months of June through November. The peak of the Atlantic hurricane season is early to mid-September, and the average number of storms that reach hurricane intensity per year in this basin is about six.

As an incipient hurricane develops, barometric pressure (measured in millibars or inches) at its center falls and winds increase. If the atmospheric and oceanic conditions are favorable, it can intensify into a tropical depression. When maximum sustained winds reach or exceed 39 miles per hour, the system is designated a tropical storm, given a name, and is closely monitored by the National Hurricane Center in Miami, Florida. When sustained winds reach or exceed 74 miles per hour the storm is deemed a hurricane. Hurricane intensity is further classified by the Saffir-Simpson Scale (**Section 5: Table 14**), which rates hurricane intensity on a scale of 1 to 5, with 5 being the most intense[22].

**Section 5: Table 14: Saffir-Simpson Scale**

| CATEGORY | MAXIMUM SUSTAINED WIND SPEED (MPH) | MINIMUM SURFACE PRESSURE (MILLIBARS) | STORM SURGE (FEET) |
|---|---|---|---|
| Tropical Storm | 39–73 | n/a | 0–2 |
| 1 | 74–95 | Greater than 980 | 3–5 |
| 2 | 96–110 | 979–965 | 6–8 |
| 3 | 111–129 | 964–945 | 9–12 |
| 4 | 130–156 | 944–920 | 13–18 |
| 5 | 157 + | Less than 920 | 19+ |

Source: National Hurricane Center

The Saffir-Simpson Scale categorizes hurricane intensity linearly based upon maximum sustained winds, barometric pressure and storm surge potential, which are combined to estimate potential damage.

[22] Although a tropical storm is not part of the Saffir-Simpson Scale, it is listed here for comparative purposes.

Categories 3, 4, and 5 are classified "major" hurricanes. Hurricanes within this range comprise only 20 percent of total tropical cyclone landfalls, but they account for over 70 percent of the damage in the United States. **Section 5: Table 15** describes the damage that could be expected for a tropical storm and each category of hurricane. Damage during hurricanes may also result from spawned tornadoes, storm surge and inland flooding associated with heavy rainfall that usually accompanies these storms.

**Section 5: Table 15: Hurricane Damage Classifications**

| STORM CATEGORY | DAMAGE LEVEL | WIND SPEED | DESCRIPTION OF DAMAGES | PHOTO EXAMPLE |
|---|---|---|---|---|
| Tropical Storm | MINOR | 39-73 mph | Breaks twigs and branches off trees, damages signboards, and windows may break. |  |
| 1 | MINIMAL | 74-95 mph | No real damage to building structures. Damage primarily to unanchored mobile homes, shrubbery, and trees. Also, some coastal flooding and minor pier damage. |  |
| 2 | MODERATE | 96-110 mph | Some roofing material, door, and window damage. Considerable damage to vegetation, mobile homes, etc. Flooding damages piers and small craft in unprotected moorings may break their moorings. |  |
| 3 | EXTENSIVE | 111-129 mph | Some structural damage to small residences and utility buildings, with a minor amount of curtainwall failures. Mobile homes are destroyed. Flooding near the coast destroys smaller structures, with larger structures damaged by floating debris. Terrain may be flooded well inland. |  |
| 4 | EXTREME | 130-156 mph | More extensive curtainwall failures with some complete roof structure failure on small residences. Major erosion of beach areas. Terrain may be flooded well inland. |  |
| 5 | CATASTROPHIC | 157+ mph | Complete roof failure on many residences and industrial buildings. Some complete building failures with small utility buildings blown over or away. Flooding causes major damage to lower floors of all structures near the shoreline. Massive evacuation of residential areas may be required. |  |

## Location and Spatial Extent

Tropical cyclones threaten the entire Atlantic and Gulf seaboard of the United States. Coastal jurisdictions are directly exposed to the brunt of a land-falling storm due to where the hazards occur, but its impact is often felt hundreds of miles inland. Volusia County is susceptible to all the hazards wrought by hurricanes and tropical storms as shown **Section 5 Figure 19**. All areas throughout the county are susceptible to the accompanying hazard effects including extreme wind, flooding, and tornadoes. In addition, the coastal areas of the county are extremely susceptible to the added effects of rising coastal water (storm surge and others), wave action, coastal erosion and tidal flooding[23]. This includes the cities and towns of Ormond Beach, Holly Hill, Daytona Beach, South Daytona, Daytona Beach Shores, Port Orange, Ponce Inlet, New Smyrna Beach, Edgewater and Oak Hill.

The extent of tropical cyclones in terms of strength in Volusia County is consistent when reviewing historical data. Storms hitting the county are primarily in the Tropical Storm to Category 1 range, with winds seldom exceeding 95 miles per hour. A hurricane of any size could impact the entire county.

## Historical Occurrences

**Section 5: Table 16** provides for each event the date of occurrence, name (if applicable), maximum wind speed (as recorded within 100 miles of Volusia County) and Category of the storm based on the Saffir-Simpson Scale.

[23] Distinct hazard area locations for flooding, rising coastal water, and coastal erosion are discussed elsewhere in this section.

**Section 5: Figure 19: Historical Storm Tracks within 75 Miles of Volusia County**

Source: National Oceanic and Atmospheric Administration

Some of the notable tropical cyclone events that occurred in Volusia County within the last two decades are described below:

**Tropical Storm Gordon, 1994:** Tropical Storm Gordon made landfall in South Florida on November 13, 1994. Gordon caused a total of 8 deaths, 43 injuries, and $400 million in damages ($605,793,853; 2009 dollars). It affected a number of Florida Counties, including Dade and Brevard, but Volusia was hit especially hard. Volusia County experienced $500,000 in both agricultural and property damage. Single-family, multi-family, and mobile home structures (a total of 1236 units) reported flood damage and losses were estimated at over $26 million.

**Hurricane Floyd, 1999:** On September 15, 1999, the center of Hurricane Floyd passed about 115 statute miles off the coast of Central Florida, causing substantial damage to the coastal counties of Brevard and Volusia. Winds gusts near 70 miles per hour were reported in both counties. In total, Floyd caused over $61 million in property damage, but there were no reports of deaths or injuries ($81,978,899; 2009 dollars). Over $42 million in damages were reported in Volusia County, $10 million of which was attributed directly to coastal erosion. In addition, over 300 homes were damaged by wind and trees.

**Hurricane Irene, 1999:** Hurricane Irene reached hurricane status over the Florida Straits and the calm of the center moved over Key West on October 15, 1999. Most of the hurricane force winds were confined to the east of Irene's center over the lower to middle Keys. As Hurricane Irene moved across Southeast Florida, it brought tropical storm conditions with sustained winds between 39 and 73 miles per hour. Hurricane Irene caused considerable damage in South Florida due to flooding. In some residential areas, flooding lasted for a week, displacing several hundred people and isolating thousands more. Volusia County estimated that damages to approximately 185 properties; totaling more than $16.8 million. The total losses (agricultural and property) were estimated near $800 million in of the state of Florida. An estimated 700,000 customers lost electricity. There were eight indirect deaths reported in Florida.

**Hurricane Charley, 2004:** Hurricane Charley produced wind gusts over 80 miles per hour as it traversed Volusia County on August 13, 2004. The storm caused over $106 million in property damage in Volusia County. In addition, two fatalities were attributed to Hurricane Charley. Widespread power outages, roadway flooding, and fallen trees also occurred. A strong F1 tornado also touched down in South Daytona Beach contributing to the total damage from the event.

**Hurricane Frances, 2004:** Hurricane Frances, a Category 2 storm, made landfall on September 4, 2004, in Martin County, Florida. As it moved north, Volusia County experienced a hurricane force wind for several hours. Daytona Beach International Airport recorded wind gusts of 94 miles per hour. In addition to wind impacts, over 13 inches of rain fell in Volusia County which caused substantial flooding. Wind and flooding impacts resulted in damages of over $390 million within Volusia County. Total damage estimates for all impacted counties include over $4.8 billion for property damage and $93.2 million for crop damage. Despite widespread and severe damage, no deaths or injuries were reported.

**Hurricane Jeanne, 2004:** Hurricane Jeanne made landfall on the east coast of Florida on September 26, 2004, with winds estimated at 120 mph. Widespread rainfall of up to eight inches accompanied Hurricane Jeanne as it moved across eastern, central and northern Florida. A narrower band of 11 to 13 inches was observed in the vicinity of the eye wall track over Osceola, Broward and Indian River counties of east central Florida. A storm surge of approximately four feet above normal astronomical tide levels was measured at Trident Pier at Port Canaveral, Florida about an hour after landfall. Storm surge flooding of

up to six feet above normal tides likely occurred along the Florida east coast from the vicinity of Melbourne southward to Ft. Pierce. Damages were estimated to be over $59 million in Volusia County. The American Insurances Service Group reported that Frances caused a total of $4.11 billion in Florida. There were three direct deaths reported in Florida, with total deaths exceeding 3,000.

**Tropical Storm Fay, 2008:** Moving over Key West, Tropical Storm Fay made its first Florida landfall on August 18, 2008. As the tropical storm drifted north in Volusia County offshore waters, hours of heavy rain fell across southern Volusia County. Tropical Storm Fay's primary impact was inland flooding. Rainfall amounts ranged from three to five inches over Miami-Dade and Broward counties and seven to 10 inches over northern Collier, Hendry and Glades counties near the center path of Fay. Storm surges were relatively minimal for this tropical storm. In Florida, wind damage was confined to mostly downed trees and power lines, plus minor roof damage to homes. Homes, personal property and motor vehicles were the primary damage losses in the United States. Volusia County reported damages in excess of $13.5 million. The total damage estimate, compiled by Property Claim Services, is $245 million, including $195 million in Florida. Flood damage losses reported by the National Flood insurance Program were about $36 million.

**Tropical Storm Sandy, 2012:** A New Smyrna Beach mesonet site (XNSB) recorded sustained north winds of 43 mph and other spotter reports confirmed tropical storm winds along the immediate coast of Volusia County. Gusts of 50-55 mph occurred, especially during passing squalls. Hurricane Sandy moved slowly northwest, parallel to the Florida Coast, approximately 200-250 miles offshore.

**Hurricane Matthew, 2016:** Matthew paralleled the Florida coast, remaining just offshore as a Category 3 hurricane. The eye reached its closest point of approach to land, only 25 miles east of Cape Canaveral near 0800LST on October 7, and was 35 miles east of Daytona Beach around 1100LST, as it continued moving northwest, just offshore the northeast Florida coast. Hurricane force winds (sustained or frequent gusts) affected coastal areas from Vero Beach northward, extending inland across the mainland portions of Brevard and Volusia Counties, with tropical storm force winds experienced across much of the remainder of east-central Florida.

**Hurricane Irma, 2017:** Hurricane Irma made a northerly turn toward Florida on Sunday, September 10. Hurricane Irma had maximum sustained winds of 185 MPH at its peak in the Atlantic Ocean, which maintained for over 35 hours, making it one of the strongest storms on record in the Atlantic basin. Making its second continental U.S. landfall, Irma slowly weakened as it continued north northwestward across north Florida and southwest Georgia through Monday September 11.

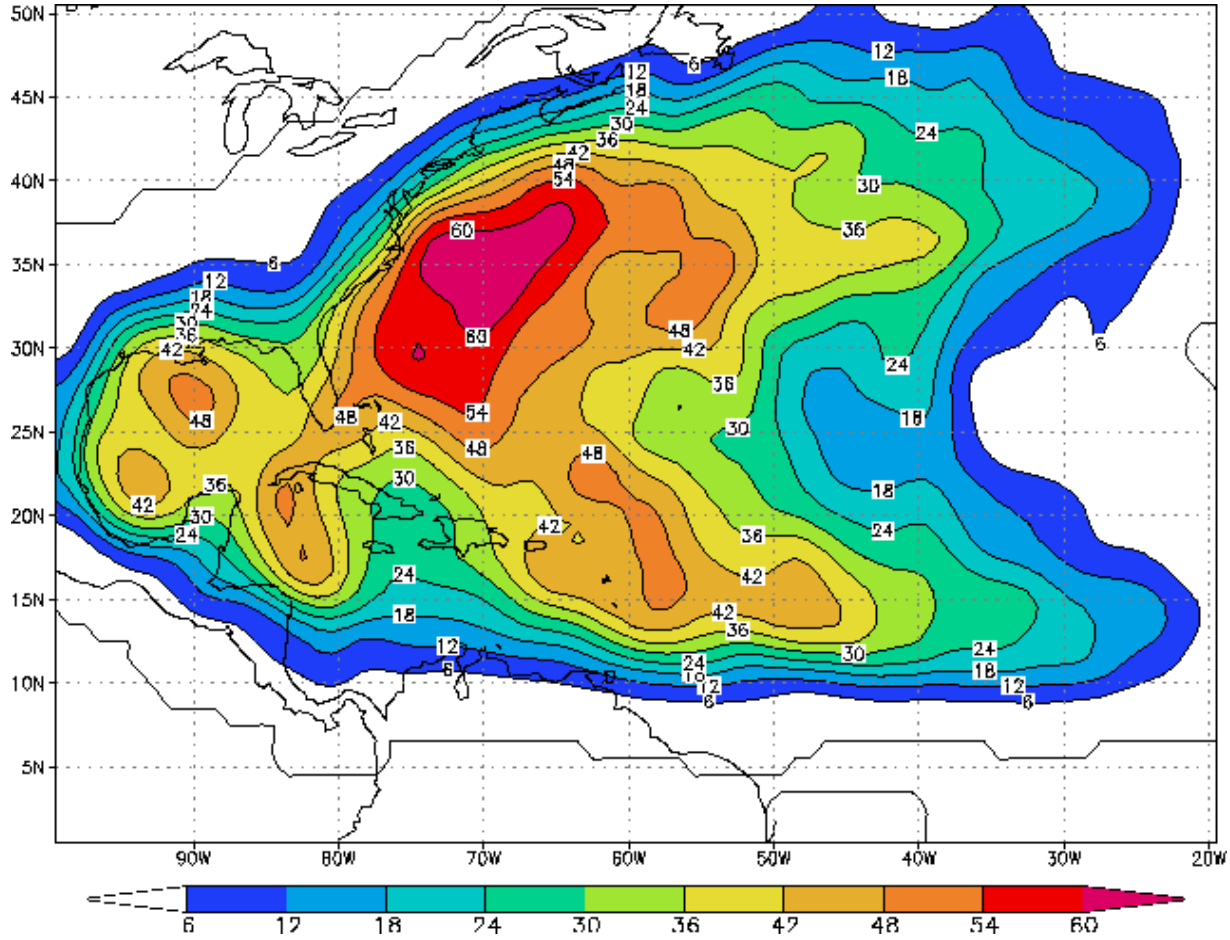
**Hurricane Dorian, 2019:** On September 1, Dorian reached Category 5 intensity, with maximum sustained winds of 185 mph, and a maximum central pressure of 910 mb (26.87 inHg) while making landfall in Elbow Cay, Bahamas. Dorian made another landfall on Grand Bahama several hours later. The ridge of high-pressure steering Dorian westward collapsed on September 2, causing Dorian to stall just north of Grand Bahama for about a day. It is the strongest known system to impact the Bahamas. A combination of cold-water upwelling and an eyewall replacement cycle weakened Dorian to a Category 2 hurricane the next day. On the morning of September 3, Dorian began to move slowly towards the north-northwest.

**Hurricane Ian, 2022:** After making landfall as a major hurricane in southwest Florida near Cayo Costa, Ian crossed the peninsula and into east central Florida (southern Osceola County) as a Category 1 Hurricane with estimated maximum sustained winds of 75 mph. The system was downgraded to a tropical storm shortly thereafter and emerged into the Atlantic Ocean near Cape Canaveral. Ian's slow movement and

large wind field led to a long period of tropical storm force winds across all east central Florida, as well as hurricane force gusts in squalls and historic rainfall and flooding across parts of the area. Widespread rainfall totals of 4 to 8 inches were reported throughout the area, with a corridor of 10 to 20 inches across Osceola, Orange, Seminole, Volusia, and northern Brevard counties. The maximum observed rainfall total was 21.09 inches in Spruce Creek, Volusia County. The St. Johns River experienced historic rises with record crests set at Astor, DeLand, Sanford, and Lake Harney in the days and weeks following Ian's heavy rainfall. A tornado briefly touched down and crossed US-192 in rural Brevard County with no damage to structures reported. Persistent onshore flow before and during the storm led to water level rises (storm surge) of 1-3 feet along east central Florida, bringing moderate to severe beach erosion, with the most significant effects noted in Volusia County. Collectively, the effects of Hurricane Ian led to 15 storm-related fatalities (6 direct and 9 indirect) and between $800-900M in property damage across east central Florida.

**Hurricane Nicole, 2022:** Hurricane Nicole made landfall near Vero Beach, Florida as a Category 1 Hurricane on Thursday, November 10, 2023, with estimated maximum sustained winds of 75 mph. The system was originally classified as a subtropical storm after forming several hundred miles east of the Bahamas before it gained tropical characteristics as it approached Grand Bahama and Abaco Island. The interplay between Nicole and an expansive area of high pressure over the eastern United States produced a large wind field of tropical storm force over the western Atlantic, with a long northeast fetch that stretched over 1000 miles. These onshore winds generated very large seas more than 30 feet offshore, which over multiple unusually high tide cycles led to moderate to severe beach erosion across east central Florida. Damage to coastal structures was extensive, particularly across Volusia County where an already weakened shoreline due to Hurricane Ian succumbed to the long-duration high surf event.

**Hurricane Helene, 2024:** Volusia County began experiencing impacts from Hurricane Helene overnight on September 25 as the storm advanced closer to the Big Bend area. Hurricane Helene’s closest approach to Volusia County occurred on the afternoon of September 26. Volusia County experienced 0.5 to 1.5 inches of rain and wind gusts between 45 to 55 mph. There were no injuries, fatalities, or evacuations and damage consisted of fallen trees and powerlines. Throughout Hurricane Helene, Volusia County had tornado watches, tornado warnings, and wind advisories.



**Hurricane Milton, 2024:** Volusia County began experiencing impacts from Hurricane Milton on Wednesday, October 09 as the storm advanced closer to the west coast and approached landfall. Hurricane Milton’s closest approach to Volusia County occurred overnight from October 09 to October 10. Volusia County experienced 7 to 17 inches of rain and wind gusts between 50 and 99 mph with one observation near Ponce Inlet recorded at 99 mph. The St. John’s River entered major flood stage at both Astor and DeLand. There were two direct fatalities and two indirect fatalities due to Milton. Damage consisted of downed trees, powerlines, and flooding with many public, residential, and commercial property damages. Throughout Hurricane Milton, Volusia County had tropical storm warnings, hurricane watches, hurricane warnings, tornado watches, tornado warnings, flood watches, flood warnings, and wind advisories

## Probability of Future Occurrences

The probability of future hurricanes and tropical storm events for Volusia County is high. According to NOAA statistical data, Volusia County is in an area with an annual probability of a named storm between 36 and 42 percent.

**Section 5 Figure 20** below shows for any location what the chance is that a tropical storm or hurricane will affect the area sometime during the Atlantic hurricane season. This illustration was created by NOAA's Hurricane Research Division using data from 1944 to 1999 and counting hits when a storm or hurricane was within approximately 100 miles (165 km) of each location.

**Section 5: Figure 20: Empirical Probability of a Named Hurricane or Tropical Storm**

Source: National Oceanic and Atmospheric Administration

The probability of storm occurrences will vary significantly based on the return interval for different categories of magnitude. The probability of less intense storms (lower return periods) is higher than more intense storms (higher return periods). The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts from tropical cyclones and that future mitigation and adaptation strategies related to this hazard should be considered.

## 5.12 WILDLAND FIRE

### Background

A wildfire is any fire occurring in a wildland area (i.e. grassland forest, brush land) except for fire under prescription.[24] Wildland fires are part of the natural management of forest ecosystems but may also be caused by human factors. Nationally, over 80 percent of forest fires are started by negligent human behavior such as smoking in wooded areas or improperly extinguishing campfires. The second most common cause for wildland fire is lightning.

There are three classes of wildland fires: surface, ground and crown fire. A surface fire is the most common of these three classes and burns along the floor of a forest, moving slowly and killing or damaging trees. A ground fire (muck fire) is usually started by lightning or human carelessness and burns on or below the forest floor. Crown fires spread rapidly by wind and move quickly by jumping along the tops of trees. Wildland fires are usually signaled by dense smoke that fills the area for miles around.

Wildfire probability depends on local weather conditions, outdoor activities such as camping, debris burning, and construction, and the degree of public cooperation with fire prevention measures. Drought conditions and other natural hazards (such as tornadoes, hurricanes, etc.) increase the probability of wildland fire by producing fuel in both urban and rural settings. Forest damage from hurricanes and tornadoes may also block interior access roads and fire breaks; pull down overhead power lines, or damage pavement and underground utilities.

Many individual homes and cabins, subdivisions, resorts, recreational areas, organizational camps, businesses and industries are located within high wildfire hazard areas. Further, the increasing demand for outdoor recreation places more people in wild lands during holidays, weekends and vacation periods. Unfortunately, wildland residents and visitors are rarely educated or prepared for wildfire events that can sweep through the brush and timber and destroy property within minutes.

Wildfires can result in severe economic losses as well. Businesses that depend on timber, such as paper mills and lumber companies, often experience losses that are passed on to consumers through higher prices. In some cases, this has resulted in the loss of jobs. The high cost of responding to and recovering from wildfires can deplete state resources and increase insurance rates. The economic impact of wildfires can also be felt in the tourism industry if roads and tourist attractions are closed due to health and safety concerns.

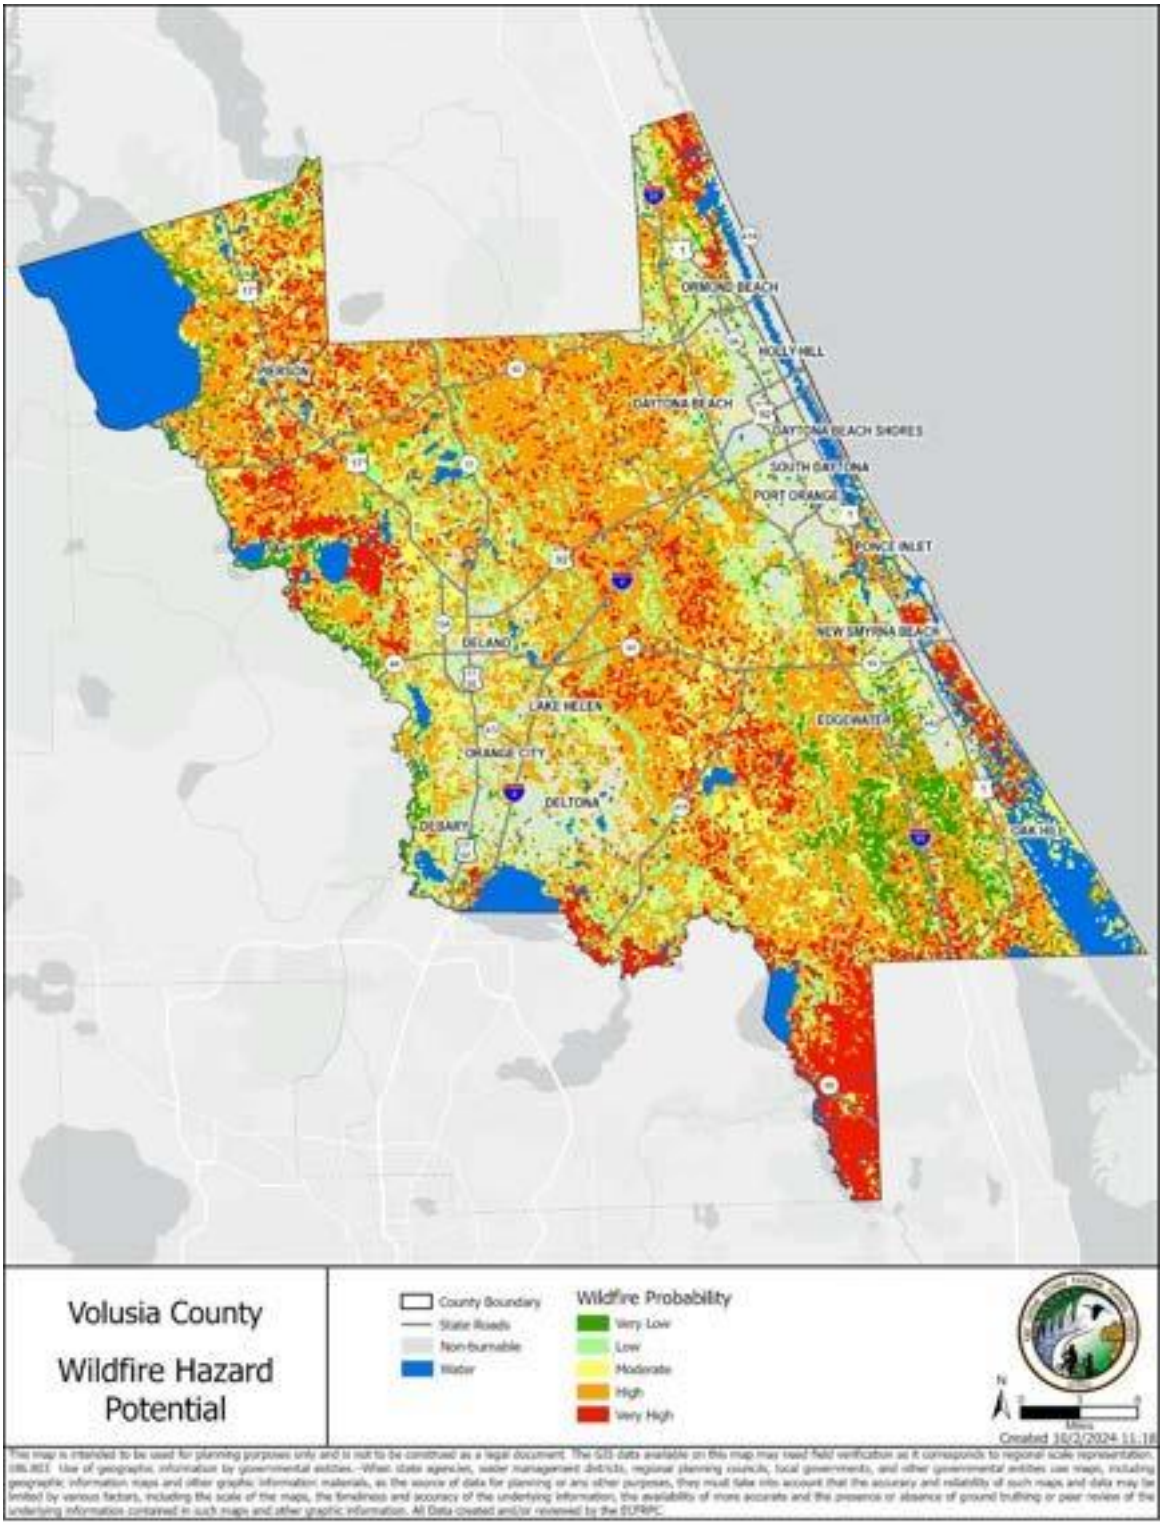
State and local governments can impose fire safety regulations on home sites and developments to help curb wildfire. Land treatment measures such as fire access roads, water storage, helipads, safety zones, buffers, firebreaks, fuel breaks and fuel management can be designed as part of an overall fire defense system to aid in fire control. Fuel management, prescribed burning, and cooperative land management planning can also be encouraged to reduce fire hazards.

[24] Prescription burning, or “controlled burn,” undertaken by land management agencies is the process of igniting fires under selected conditions, in accordance with strict parameters.

## Location and Spatial Extent

Volusia County and its jurisdictions are not uniformly exposed to wildland fire risk. Although the county typically receives a high amount of precipitation each year (around 50 inches), there is a risk of wildfire due to the hot, dry summer months. Further, drought and drought-like conditions may occur which could increase the probability of wildfire occurrence.

The wildfire potential for Volusia County is shown in **Section 5: Figure 19**. All areas of the county may be susceptible to wildfire, and the wildland-urban interface is an area of concern as more property may be at risk of fire damage in these areas. This hazard occurs in the southern, western, and central parts of the county most likely; although, there are pockets of wildland fire locations dispersed across the county.



The extent of fire weather can be determined in two ways. A Fire Weather Watch is issued to alert fire officials and firefighters of potentially dangerous fire weather conditions within the next 24 to 36 hours. They are issued when the following three criteria are met:

1. Surface relative humidity (RH) less than 30 % for VA and MD; RH less than or equal to 25% for WV AND
2. Sustained surface wind of 20 MPH or greater AND
3. 10-hour fuel moisture less than 8% for VA; less than or equal to 8% for MD and WV

A Red Flag Warning is issued to alert fire officials and firefighters of potentially dangerous fire weather conditions within the next 12 to 24 hours. They are issued when the following three criteria are met:

1. Surface relative humidity (RH) less than 30 % for VA and MD; RH less than or equal to 25% for WV AND
2. Sustained surface wind of 20 MPH or greater AND
3. 10-hour fuel moisture less than 8% for VA; less than or equal to 8% for MD and WV

**Section 5: Figure 21: Wildland Fire Risk in Volusia County**

Source: U.S. Forest Service

## Historical Occurrences

According to the Florida Division of Forestry, Florida experiences an average of 3,060 wildfires annually, burning nearly 154,000 acres[25]. The most common cause of Florida wildfire events is lightning which ignited over 700 fires annually between 2000 and 2009. Volusia County experienced 1,306 fires that burned over 22,600 acres between January 2000 and August 2009. Lightning caused nearly half of these fires. **Section 5: Table 17** lists the number of reported wildfire occurrences in Volusia County between the years 2001 and 2018.

**Section 5: Table 17: Historical Wildfire Occurrences in Volusia County (2001-2018)**

| YEAR | 2001 | 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009 | Annual Average |
|---|---|---|---|---|---|---|---|---|---|---|
| # of Fires | 116 | 31 | 71 | 145 | 64 | 213 | 195 | 121 | 127 | 120 |
| Acres Burned | 383 | 371 | 2,011 | 746 | 198 | 5,037 | 1,826 | 1,482 | 8,839 | 2,321 |
| YEAR | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | Annual Average |
| # of Fires | 128 | 237 | 208 | 104 | 74 | 104 | 174 | 132 | TBD | 145 |
| Acres Burned | 672 | 8,952 | 3,832 | 1,404 | 626 | 788 | 1,421 | 1,150 | TBD | 2,355 |

Source: Florida State Fire Marshal Report

It should also be noted that 1998 was a particularly significant year for wildland fires in Volusia County. That year, drought conditions were prevalent throughout the County. A total of 233 wildfires were reported, the largest single cause being lightning. In all, over 163,000 acres were burned. The fires threatened 29,000 homes and hindered travel as wildfires jumped highways. However, after weeks of burning, just six houses, one mobile home, and two businesses were destroyed, totaling $2.1 million ($2,889,598; 2009 dollars). Timber, conversely, took the brunt of the damage with losses of over $60 million ($85,570,222; 2009 dollars). No fatalities or civilian injuries were reported but ten firefighters did have minor injuries.

These events have had devastating impacts on Volusia County. Homes and businesses have been damaged or destroyed, causing economic and social hardship, while several agricultural resources (such as timber, as described above) have been lost in these events. Families and vulnerable populations can be displaced temporarily or permanently by these events, while businesses can be lost forever. Human life is also at great risk to fires, as fires can quickly consume buildings and prevent escape. Smoke inhalation is a common cause of death due to fire, rather than the fire itself. Updating and enforcing building codes can help prevent fire disasters.

One of the largest fires recorded in Volusia County over the last decade was the Iron Horse Fire, which occurred in 2011 in southeastern Volusia County. Approximately 17,000 acres burned during this event, and a full Fire Operations Center (FOC) activation was executed. One mobile home, three outbuildings and three camp structures were destroyed, while 140 total structures were threatened. Interstate 95 was completely shut down due to smoke limiting driver visibility (intermittently over a two-day period), and a firefighter was injured during the event. Also, in 2011, the Maytown Road Fire burned approximately

[25] Average information based on information between January 2000 and August 2009.

2,500 acres of land and affected local weather conditions by increasing cloud coverage. In 2012, several smaller fires affected the DeLand and DeBary areas of Volusia County.

In March 2013, the Durrance Road Fire destroyed 1,100 acres and forced evacuations of unincorporated areas of Volusia County near the Flagler County line west of Interstate 95. Approximately 300 homes were evacuated during this event. Interstate 95 from US1 to SR40 was shut down due to smoke.

## Probability of Future Occurrences

There is a high probability of future wildfire events in Volusia County, especially during drought cycles and abnormally dry conditions, based on prior occurrence. Volusia County experienced nearly 130 wildfires per year from 2000 – 2008. As development continues to grow, there is an increasing chance for wildfires to reach the urban interface. This will increase the probability of economic loss and fatalities.

The Local Mitigation Strategy recognizes that with a changing climate, there is a potential for an increasing risk of environmental impacts from wildfire and that future mitigation and adaptation strategies related to this hazard should be considered.

# MANMADE HAZARDS

## 5.13 CIVIL DISTURBANCE

### Background

Civil disturbances can occur due to socio-economic, political or other reasons. Events of civil disturbances can be classified as armed violence, riots, protests, and threats against the military or the government. The proper planning and prevention methods aid in the mitigation of such events. For threats of civil disturbance utilizing armed violence, it is likely that joint jurisdictional management of operations will take effect, coordinated at the county level between the Sheriff's Office, Florida Department of Law Enforcement (FDLE), and the Office of Emergency Management. These types of events typically occur in public places.

According to FEMA, civil disturbance is an activity such as a demonstration, riot, or strike that disrupts a community, and requires intervention to maintain public safety and order. Most protestors are law abiding citizens who intend their protest to be nonviolent. However, sometimes these situations become highly emotional and tense and can turn a peaceful crowd into a violent riot. Most crowds are orderly, nonviolent, and do not cause problems for authorities, but there are three types of crowds that can create a civil disturbance:

- **Public Disorder**: the basic breach of civic order, meaning the crowd tends to disrupt the normal flow of operations around them, such as traffic
- **Public Disturbance**: a demonstration that is designed to cause turmoil and disruption. These crowds chant, yell, and sing to voice collective opinions
- **Riot**: when a disturbance turns violent. The crowd suddenly becomes a mob that violently expresses itself by destroying property, assaulting others, and creating an extremely volatile environment

### Location and Spatial Extent

Civil disturbances tend to occur in urban areas but can occur anywhere. These types of events typically occur in public gathering places, including court houses or civic spaces. While the spatial extent of the hazard would be 25% or less, civil disturbances could have county-wide effects.

### Historical Occurrences

Civil Disturbances have been occurring since the beginning of time. There are several examples of civil disturbances in Florida in recent years. Some significant events that have impacted Central Florida and Volusia County through racially charged protests are outlined.

- **2012**: Trayvon Martin's death in Sanford, Florida. There were public protests, school walk outs, and thousands of planned rallies across the nation.
- **2020**: George Floyd's death in Minneapolis, Minnesota; Breonna Taylor's death in Louisville, Kentucky; Ahmaud Arbery's death in Brunswick, Georgia.
- **2021**: Othal Wallace's arrest for the death of a Daytona Beach police officer.

## Probability of Future Occurrences

It is likely that occurrences of civil disturbance will continue in the future. There have been several in Florida in previous years and protesting is a fundamental right protected by the US Constitution; therefore, civil disturbances will continue into the future.

## 5.14 MASS MIGRATION

### Background

Mass-migration occurs when people of one geographic area move in large numbers to another geographic location. According to United States Code Title 8, Chapter 12 (8 U.S.C. § 1101), the definition of mass migration is a migration of undocumented aliens that is of such magnitude and duration that it poses a threat to the national security of the United States.

This usually refers to an event, or series of events, that may take place over the course of several years or even decades. The event could be economic, social, or political in nature but it is something that causes a mass exodus.

### Location and Spatial Extent

There are no particular geographic areas in Volusia County with a more ideal jurisdiction for this hazard to take effect. Volusia County contains the intersection of the state's two busiest highway systems, I-95 and Interstate 4 (I-4). Because Volusia County is the intersection of these two major state transportation networks, people traveling from any direction of the state might travel to or through the area as refugees. The county also contains State Road A1A (SR A1A) which runs north and south through the entire county. Florida's proximity to the Caribbean basin makes it a vulnerable point of entry for a massive influx of refugees entering the United States. The spatial extent of this hazard would affect less than 25% of the geographical area.

### Historical Occurrences

The United States has often been seen as a golden refuge for many immigrants, especially those in poor economic circumstances. Major policy changes can be a driving cause for mass migration. Since 1995, the "wet-foot, dry-foot" policy has allowed Cubans who reach American soil a fast-tracked path to citizenship. The policy was reversed by Former President Barak Obama in 2016, making the Cuban immigration process the same as any other immigrant. President Donald Trump's first administration took a strict stance on immigration, leading many Cubans to flock to America before he took office. The U.S. recorded increased Cuban Refugees from 2015 and 2016. According to the US Coast Guard, 7,358 Cubans tried to enter the U.S. illegally in the 2015-2016 fiscal year and were intercepted. Meanwhile 50,082 Cubans managed to enter (38,310 illegally and 11,772 with visas) in that same period.

**Section 5: Table 18: Mass Migration Occurrences**

| Year | Description |
|---|---|
| 2010 | January – Operation Haiti Relief after an earthquake brought displaced and some injured people through Orlando Sanford International Airport. |
| 2017 | Hurricane Maria – mass migration of evacuees from the island of Puerto Rico to the Central Florida area after the hurricane. Over 250 families resettled in Seminole County and over 6,500 in Central Florida. |
| 2024 | March of 2024, overwhelming gang violence and the overthrow of the Haitian government caused mass evacuations of American citizens from Haiti back to the United States. |

While Florida typically has a fast-growing population, many local municipalities are facing pressures from the booming population moving legally from other parts of the country in recent years. In the post-World War II era after 1946, Florida's percentage increase in population each year fluctuated but has always been positive. Between 2010 and 2020, national growth dipped from 0.9% to 0.5% each year while Florida's increases ranged from 1.0% to 2.0%. In 2022, Florida's growth was nearing 1.9%, not high compared to past gains but still the fastest among the states.

## Probability of Future Occurrences

It is possible that any Florida county could be impacted by refugees and migrants. Florida is in proximity to islands such as Cuba, Puerto Rico, Dominican Republic and Haiti, and the Gulf Coast is within proximity of Mexico. Mass migration can also occur domestically due to an impending hazard causing large groups of citizens to head north or inland to other counties to evacuate. The probability of a migration influx in Florida is perceived to be high, and planning must be done to ensure safety and security. As political unrest and large-scale natural disasters continue to increase within the Caribbean and South American regions, people will continue to migrate throughout Florida.

The overall vulnerability of mass migration and repatriation in Volusia County and its jurisdictions is low. While lack of housing and community resources could be a concern with mass migration, due to the low probability and lack of physical impacts, Volusia County is not extremely vulnerable to this hazard. Each jurisdiction is equally vulnerable to this possibility.

## 5.15 TERRORISM

### Background

Terrorism includes any attempt to attack, cripple or damage public goods, public infrastructure or citizens on a large scale. Volusia County should be prepared for a terrorist-related event that could occur with or without notice. Since terrorism can take many different forms, including weapons of mass destruction, and be directed at many kinds of targets, it poses some very complex, technical problems in planning and response. **Section 5: Table 19** displays the types of terrorism Volusia County is susceptible to.

**Section 5: Table 19: Types of Possible Terrorism**

| Types of Terrorism | Description |
|---|---|
| Agro-Terrorism | The deliberate introduction of disease-causing organisms and chemicals into the food supply through agriculture. It could impact the public if crops or agricultural foods contaminated with disease-causing organisms were to enter the food chain. The secondary effects of which can be disease, famine and massive economic loss. |
| Cyber Terrorism | Unlawful attacks and threats of attack against computers, networks, and the information stored therein; and used to intimidate or coerce a government or its people in furtherance of political or social objectives. |
| Domestic Terrorism | Violent, criminal acts committed by individuals and/or groups to further ideological goals stemming from domestic influences, such as those of a political, religious, social, racial, or environmental nature. |
| International Terrorism | Violent, criminal acts committed by individuals and/or groups who are inspired by, or associated with, designated foreign terrorist organizations or nations (state-sponsored). |

### Location and Spatial Extent

Violent events can happen at any time at any place. Terrorism can be targeted at large gatherings, such as concerts or shopping malls, as has been seen in previous occurrences across the country. Event centers like the Daytona Beach Speedway and the Daytona Beach Ocean Center are indicated locations. But because terrorism thrives on fear, places such as community spaces, civic buildings, or historical monuments need additional precautions. A terrorist attack would most likely be very localized and isolated and impact less than 25% of the geographic area of the County, however effects could be county-wide.

### Historical Occurrences

The nation as a whole has been affected by various acts of terrorism. Cyber terrorism is becoming an increasing threat, and residents are particularly vulnerable to subtle attacks such as credit card fraud. **Section 5: Table 20** outlines two major acts of terrorism.

**Section 5: Table 20: Historical Occurrences of Terrorism**

| Year | Description |
|---|---|
| 2016 | At 2:00 AM on June 12, 2016, an active shooter walked into Pulse Nightclub in Downtown Orlando, FL, and opened fire into the crowd of approximately 300 people. One hundred two (102) people were directly impacted as 49 people were killed and 53 were injured. Another five people had non–gunshot related injuries. The attack began as an active shooter incident, transitioned into a hostage situation, and ended around 5:15 AM. It was one of the deadliest terrorist attacks in the United States since September 11, 2001. With assistance from various agencies and organizations around the area, victims were evacuated and transported. |
| 2023 | ABB (a leading technology electrification and automation company that works with public and private organizations) determined that an unauthorized third-party accessed the company's systems. Black Basta ransomware was deployed that shut down business operations. The company was forced to terminate VPN connections with various customers to prevent the spread of the ransomware to other networks. |

## Probability of Future Occurrences

Any community can be impacted by terrorism. Each year domestic terrorism increases across the country and becomes more deadly. There are no discernable patterns or methods to indicate the probability of future occurrence. Because terrorist attacks can take many forms and include many types of weapons, it is difficult to reduce the county's overall vulnerability to these incidents. First response agencies attempt to reduce vulnerability through prevention tactics and intelligence sharing. No jurisdiction in Volusia County is more vulnerable to attack than another.

# TECHNOLOGICAL HAZARDS

## 5.16 COASTAL OIL SPILL

### Background

Coastal oil spills pose a threat to human health and safety and frequently result in significant impacts to natural and cultural resources. Thousands of oil spills occur in U.S. waters each year. Most of these spills are small (e.g., oil spills while refueling ships), but these spills can still cause harm, especially if they happen in sensitive environments, like beaches, mangroves, and wetlands. Large oil spills are major and dangerous disasters. This tends to happen when pipelines break, big oil tanker ships sink, or drilling operations fail. Consequences to ecosystems and economies can be felt for decades following a large oil spill.

An oil spill is the release of liquid petroleum hydrocarbon into the environment, especially marine areas, due to human activity. The term is usually applied to marine oil spills, where oil is released into the ocean or coastal waters, but spills may also occur on land.

### Location and Spatial Extent

Oil spills can happen anywhere oil is drilled, transported, or used. While oil spills would primarily affect the Gulf coast of Florida, oil spills can negatively affect tourism and ecological conditions on the Atlantic coast of Florida. The location of these incidents would be located within these large bodies of water.

### Historical Occurrences

In 2010, an explosion occurred on the Deepwater Horizon drilling platform in the Gulf of Mexico. The explosion, which killed 11 men, caused the rig to sink and started a catastrophic oil leak from the well. The spill took three months to cap and approximately 134 million gallons of oil spilled into the Gulf, becoming the largest offshore oil spill in U.S. history. The economic impacts to commercial and recreational fishing for the period between 2010–2020 are a loss of roughly 24,000 job-years, $2.1 billion in industry output, $1.1 billion in total value-added or Gross Regional Product, $650 million in labor income, $140 million in state and local tax revenues, and $160 million in federal tax revenues. In addition, The Deepwater Horizon spill resulted in the largest natural resource damage assessment ever undertaken. The parties responsible owed a record-setting settlement with BP Exploration & Production for an unprecedented $5.5 billion Clean Water Act penalty and up to $8.8 billion in natural resource damages.

Although this incident did not happen in Volusia County, it severely impacted the state of Florida because the spill took place off the shore of Louisiana and impacted the Gulf of Mexico which runs along Florida's west coast. The economic condition of the county could be seriously impacted by a coastal oil spill event. During the Deepwater Horizon oil spill, tourism in Volusia County suffered since people thought all of Florida was impacted. In the event of another spill, the charter fishing industry would likely be devastated. If a coastal oil spill were to occur in Volusia County, tourism would greatly decrease, and tax revenue would be severely impacted.

## Probability of Future Occurrences

Although there are no documented major oil refineries in the central Florida region, there are thousands in the Gulf of Mexico. The likelihood of a coastal oil spill directly impacting Volusia County is low, but any ships transporting oil in the Atlantic Ocean pose a threat.

## 5.17 CRITICAL INFRASTRUCTURE FAILURE

### Background

Critical infrastructure failures refer to the disruption of public utility services such as drinking water, stormwater and wastewater collection/treatment, electric power, transportation, supply chains systems that support food and fuel, and communications. These services contribute to the economic well-being and public health and safety of the communities they serve. A critical infrastructure failure can occur from a cascading emergency such as terrorism or a hurricane.

Widespread power outages can occur without warning. Generally warning times will be short in the case of technological failure, such as a fire at a sub-station, traffic accident, human error, or terrorist attack. In cases where a power failure is caused by natural hazards, greater warning time is possible. For example, high wind events such as tornados and hurricanes often cause widespread power failure and are often forecasted before they affect a community so that residents can prepare.

The Federal Highway Administration's (FHWA) 2000 Traffic Incident Management Handbook defines a major traffic disturbance as "any non-recurring event that causes a reduction of roadway capacity or an abnormal increase in demand". Under this definition, events such as traffic crashes, disabled vehicles, spilled cargo, highway maintenance, reconstruction projects, and special non-emergency events (e.g., ball games, concerts, or any other event that significantly affects roadway operations) are classified as an incident.

### Location and Spatial Extent

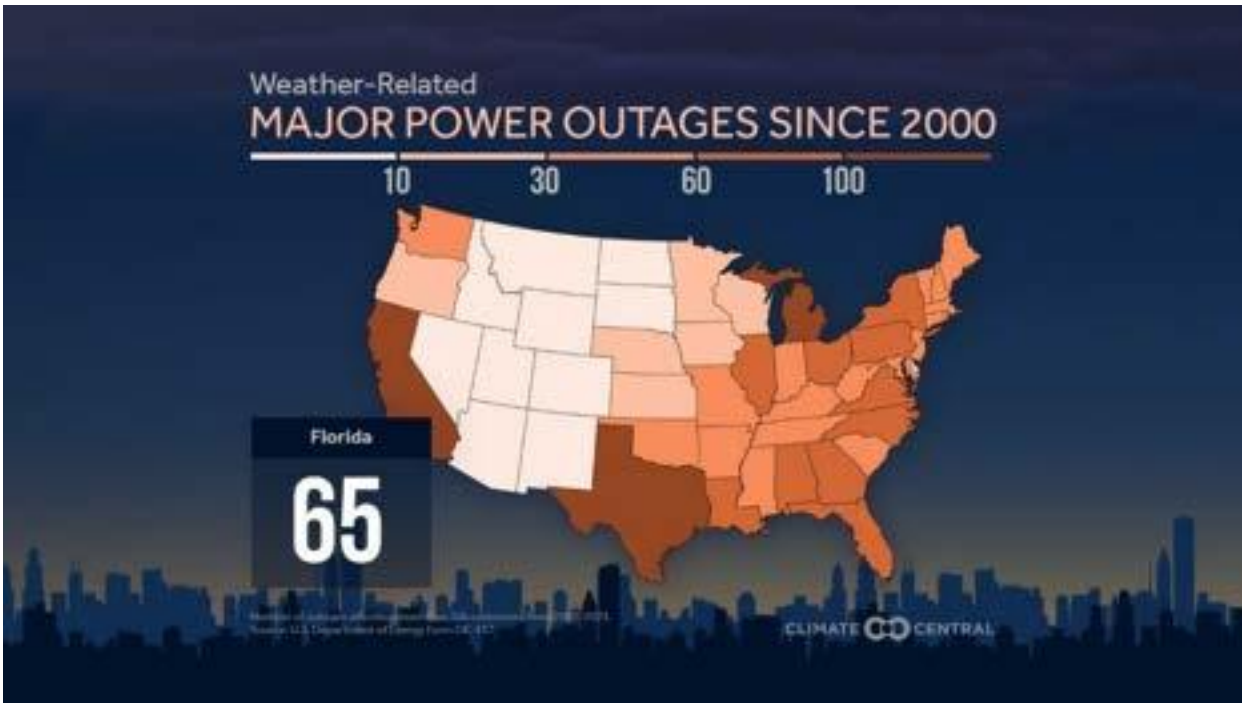
All of Volusia County is at risk of critical infrastructure failure as there are numerous facilities throughout the county, making a direct location difficult to identify. Locations could range from traffic light intersections to wastewater facilities. Impacts from disruption could impact more than 50% of the county, but most likely would have county-wide effects. Critical infrastructure failures are usually localized and are usually the result of a natural hazard event involving flooding or high winds, like hurricanes. A major transportation incident would mostly involve a highway or roadway, but the county's airports and proximity to major water systems poses a threat to an incident taking place.

### Historical Occurrences

Many critical infrastructure failures resulted as a cascading impact from a natural hazard, such as a hurricane. As recently as October 2024, Hurricane Milton swept through Florida and resulted in more than 3.2 million power losses. 77% of all homes and businesses in the combined Volusia County/Flagler County area, according to newly revised numbers from the Florida Public Service Commission. At least 305,152 customers lost power out of the 395,582 total served in the two-county area.

In May 2024, the strongest geomagnetic storm in twenty years hit Earth causing disruptions to power grids, broadband technology, and GPS satellites in space.

### Probability of Future Occurrences



While the probability of future utility service disruption in Volusia County is difficult to predict, past outages indicate that significant failures have and will occur because of natural hazards, technological

failures, and outdated utility infrastructure. As infrastructure ages beyond its intended lifespan, it is likely to become less reliable and lead to higher likelihoods of failure.

In addition, climate change may also impact the probability of utility failure occurrences because of an increase in the frequency and intensity of severe weather events. Storms with high winds will increase the chance that the power-related infrastructure will be impacted. Extreme temperatures are predicted to have an impact as well. During the hot summer months, the potential for power overload will grow as demand for power increases due to air conditioning units having to work harder. Extreme heat can also lead to transformer failures because the electric distribution equipment does not have the opportunity to cool sufficiently between periods of heavy use, leading to blackouts. **Section 5 Figure 22** displays the number of weather-related major power outages since 2000.

The power grid is essential, yet vulnerable. Florida is the third-largest electricity consumer in the nation. Disruptions can be minimized by providing a diverse set of utility service sources. If a particular system fails or is attacked, alternative sources can minimize impacts and provide the support to get operations back to normal.

**Section 5: Figure 22: Weather-Related Major Power Outages Since 2000**

Source: Climate Central[26]

[26] https://www.climatecentral.org/graphic/surging-weather-related-power-outages?graphicSet=Weather-related+Outages+by+State&location=Florida&lang=en on December 26, 2024

As population continues to rise in the area and the need for transportation increases, accidents will continue to rise. While most are expected to be minor, the possibility of a major event increases. Automobiles pose the most risk, but other examples include:

- **Aviation**: Volusia County has numerous airports throughout the county which present the possibility of traffic disruptions in the event of an aviation-related crash. General aviation aircraft pass over the county en-route to and from Daytona, Orlando, Sanford, Jacksonville, and other small airports located around Volusia County.
- **Marine**: The county is located on the Atlantic Ocean, Halifax River, Indian River Lagoon, and Mosquito Lagoon which provides traffic on water transportation routes. The Tomoka River and other local waterways consists of mostly recreational/sports activities.

## 5.18 HAZMAT / INDUSTRIAL INCIDENT

### Background

Hazardous material (HazMat)/industrial incidents include events when liquid, solid or gaseous chemicals that are harmful or fatal to humans or ecological infrastructure are dispersed. HazMat events occur when liquid, solid, gaseous chemicals, or a combination of all three (which may include dust, fumes, gas, vapor, mist, and smoke)—diffuse into the environment and become harmful or fatal to humans, infrastructure, or ecosystems.

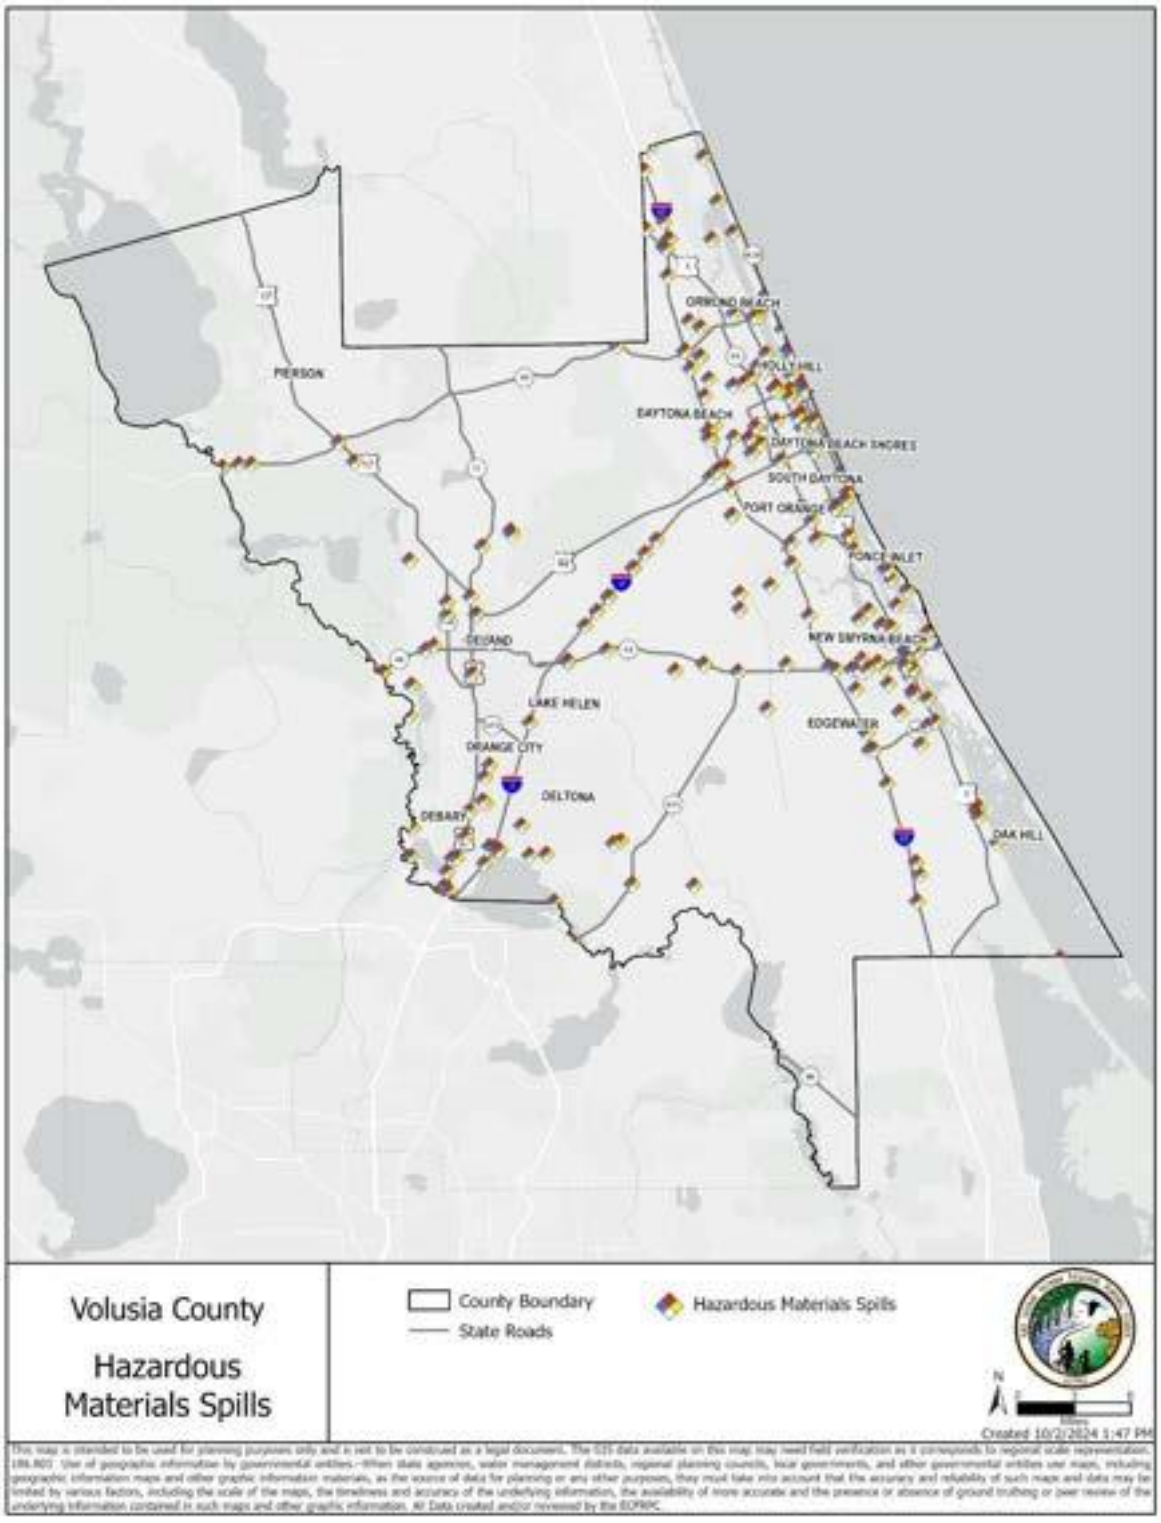
Hazardous waste is dangerous, and can be ignited, corrosive, reactive, or toxic. Paint products, pool chemicals, household cleaners, and pesticides are common examples, but can also include toxic chemicals, fuels, nuclear waste products, biological, chemical, and radiological agents.

### Location and Spatial Extent

There are numerous facilities and plants throughout the county that hold hazardous material. This includes residential and commercial swimming pools that keep dangerous chemicals (liquid, powdered, and gas chlorine, acids, etc.). These chemicals are stored in bulk in several retail stores throughout the county. Chemicals are also used in water and wastewater treatment facilities in Volusia County. Additional threats are created by the transportation of hazardous materials on I-95 and other roadways. The Florida East Coast Railway also runs through the eastern part of the county, which transports hazardous materials along Florida's east coast. **Section 5 Figure 23** displays the variety of locations this hazard can occur at, ranging from waterway systems to major traffic corridors.

Any hazardous material accident would have very localized impacts and would account for less than 25% of the county's geographic area.

### Historical Occurrences



**Section 5 Figure 23** displays recent HazMat incidents in the county. In Ormond Beach on September 7th, 2018, a toxic industrial chemical, Sodium Hypochlorite, was accidentally released from an aboveground tank into a nearby storm drain. A city employee reported that 1,484 gallons of 7% chlorine was released and that the drain discharged into the Halifax River. A dechlorinator was added to the storm drain as part of the cleanup effort.

As recently as May 10, 2022, a citizen reported a possible HazMat issue just south of the Granada Bridge. The citizen reported that approximately two-dozen old, abandoned boats were leaking oil and fuel into the Indian River Lagoon and Halifax River. The boats have been abandoned in this location for 3 to 4 years. This was classified as a petroleum spill and oil release, and although major waterways were affected, no cleanup actions were reported.

### Probability of Future Occurrences

It is likely that HazMat incidents will continue, whether they are reported or not.

**Section 5: Figure 23: Hazardous Spill in County 2019-2024**

Source: FDEP

## 5.18 CONCLUSIONS ON HAZARD RISK

The hazard profiles presented in this section were developed using best available data and result in what may be considered principally a qualitative assessment as recommended by FEMA in its "How-to" guidance document titled *Understanding Your Risks: Identifying Hazards and Estimating Losses* (FEMA Publication 386-2). It relies heavily on historical and anecdotal data, stakeholder input, and professional and experienced judgment regarding observed and/or anticipated hazard impacts. It also carefully considers the findings in other relevant plans, studies and technical reports.

### Hazard Risk Scoring

Volusia County threats and hazards are scored using the Calculation and Rating Score Development (CPRI). Frequency (probability), impact (magnitude/severity), warning time, and duration are the main factors used to assign a score to every hazard. To provide a comprehensive assessment of each hazard, the hazards were scored based on several vulnerability factors including area(s) of impact, health and safety of the population, property, environment, and economic vulnerability. Each of these factors, considered magnitude/severity, has been assigned a number between one and four, based on risk, with four being the greatest. The values then were summed and multiplied by the probability of occurrence factor, which is also a one to four scale. Warning time and duration of each hazard are also considered and factored into the scoring. The resulting value is a risk rating for each hazard. **Section 5: Table 21** provides the CPRI scoring categories and rating system. Further, the Vulnerability Assessment (Section 6) also provides information on hazard vulnerability at the jurisdictional level.

CPRI Calculation and Rating Score Development

**CPRI** = [(Probability X .45) + (Magnitude X .30) + (Warning Time X .15) + (Duration X .10)]

**Section 5: Table 21: CPRI Scoring Categories**

| CPRI CATEGORY | DEGREE OF RISK | | | ASSIGNED WEIGHTING FACTOR |
|---|---|---|---|---|
| | LEVEL ID | DECRIPTION | INDEX VALUE | |
| **Frequency (Probability)** | Highly Likely | • Common events with a well-documented history of occurrence.<br>• Annual probability is greater than 1. | 4 | 45% |
| | Likely | • Frequent occurrences with at least two or more documented historical events.<br>• Annual probability is between 1 and 0.1. | 3 | |
| | Possible | • Infrequent occurrences with at least one documented or anecdotal historic event.<br>• Annual probability is between 0.1 and 0.01. | 2 | |
| | Unlikely | • Rare with no documented history of occurrences or events.<br>• Annual probability of less than 0.01. | 1 | |
| **Magnitude / Severity** | Catastrophic | • Severe property damages (greater than 50% of critical and non-critical facilities and infrastructure).<br>• Injuries or illnesses result in permanent disability and multiple deaths.<br>• Shut down of critical facilities for more than 1 month. | 4 | 30% |
| | Critical | • Moderate property damages (greater than 25% and less than 50% of critical and non-critical facilities and infrastructure).<br>• Injuries or illnesses result in permanent disability and at least 1 death.<br>• Shut down of critical facilities for more than 1 week and less than 1 month. | 3 | |
| | Limited | • Slight property damages (greater than 5% and less than 25% of critical and non-critical facilities and infrastructure).<br>• Injuries or illnesses do not result in permanent disability and there are no deaths.<br>• Moderate quality of life lost.<br>• Shut down of critical facilities for more than 1 day and less than 1 week. | 2 | |
| | Negligible | • Negligible property damage (less than 5% of critical and non-critical facilities and infrastructure). | 1 | |

| | | | | |
|---|---|---|---|---|
| | | • Injuries or illnesses are treatable with first aid and there are no deaths.<br>• Negligible quality of life lost.<br>• Shut down of critical facilities for less than 24 hours. | | |
| **Warning Time** | Less than 6 hours | Self-explanatory. | 4 | 15% |
| | 6 to 12 hours | Self-explanatory. | 3 | |
| | 12 to 24 hours | Self-explanatory. | 2 | |
| | More than 24 hours | Self-explanatory. | 1 | |
| **Duration** | More than 1 week | Self-explanatory. | 4 | 10% |
| | Less than 1 week | Self-explanatory. | 3 | |
| | Less than 1 day | Self-explanatory. | 2 | |
| | Less than 6 hours | Self-explanatory. | 1 | |

## Final Determinations

The conclusions drawn from the hazard profiling process for Volusia County resulted in the classification of risk for each identified hazard according to three categories: High, Moderate and Low Risk. For the purposes of these classifications, risk is expressed in relative terms according to the estimated impact that a hazard will have on human life and property throughout all of Volusia County. A more quantitative analysis to estimate potential dollar losses for each hazard has been performed separately and is described in the *Vulnerability Assessment* section.

It should be noted that although some hazards are classified below as posing low risk, their occurrence of varying or unprecedented magnitudes is still possible in some cases and their assigned classification will continue to be evaluated during future updates.

| Hazard | Probability | | | | Magnitude/Severity | | | | Warning Time | | | | Duration | | | | CPRI Score |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Unlikely | Possibly | Likely | Highly Likely | Negligible | Limited | Critical | Catastrophic | < 6 hours | 6 - 12 hours | 12 - 24 hours | > 24 hours | < 6 hours | < 24 hours | < 1 week | > 1 week | |
| **NATURAL HAZARDS** | | | | | | | | | | | | | | | | | |
| AGRICULTURE | X | | | | X | | | | | X | | | | | | X | 1.6 |
| COASTAL EROSION | | | | X | | | X | | | | | X | | | | X | 3.25 |
| DROUGHT | | | X | | | | X | | | | | X | | | X | | 2.7 |
| EXTREME TEMPERATURES | | | X | | | | X | | | | | X | | | X | | 2.7 |
| FLOOD | | | | X | | | | X | | | | X | | | X | | 3.45 |
| PUBLIC HEALTH EMERGENCIES | | X | | | | X | | | | X | | | | | | X | 2.35 |
| RISING COASTAL WATER | | | | X | | | | X | | | | X | | | X | | 3.75 |
| SEVERE WEATHER | | | | X | | X | | | X | | | | X | | | | 3.1 |
| TORNADO | | | X | | | | X | | X | | | | X | | | | 2.95 |
| TROPICAL CYCLONES | | | | X | | | | X | | | | X | | | X | | 3.45 |

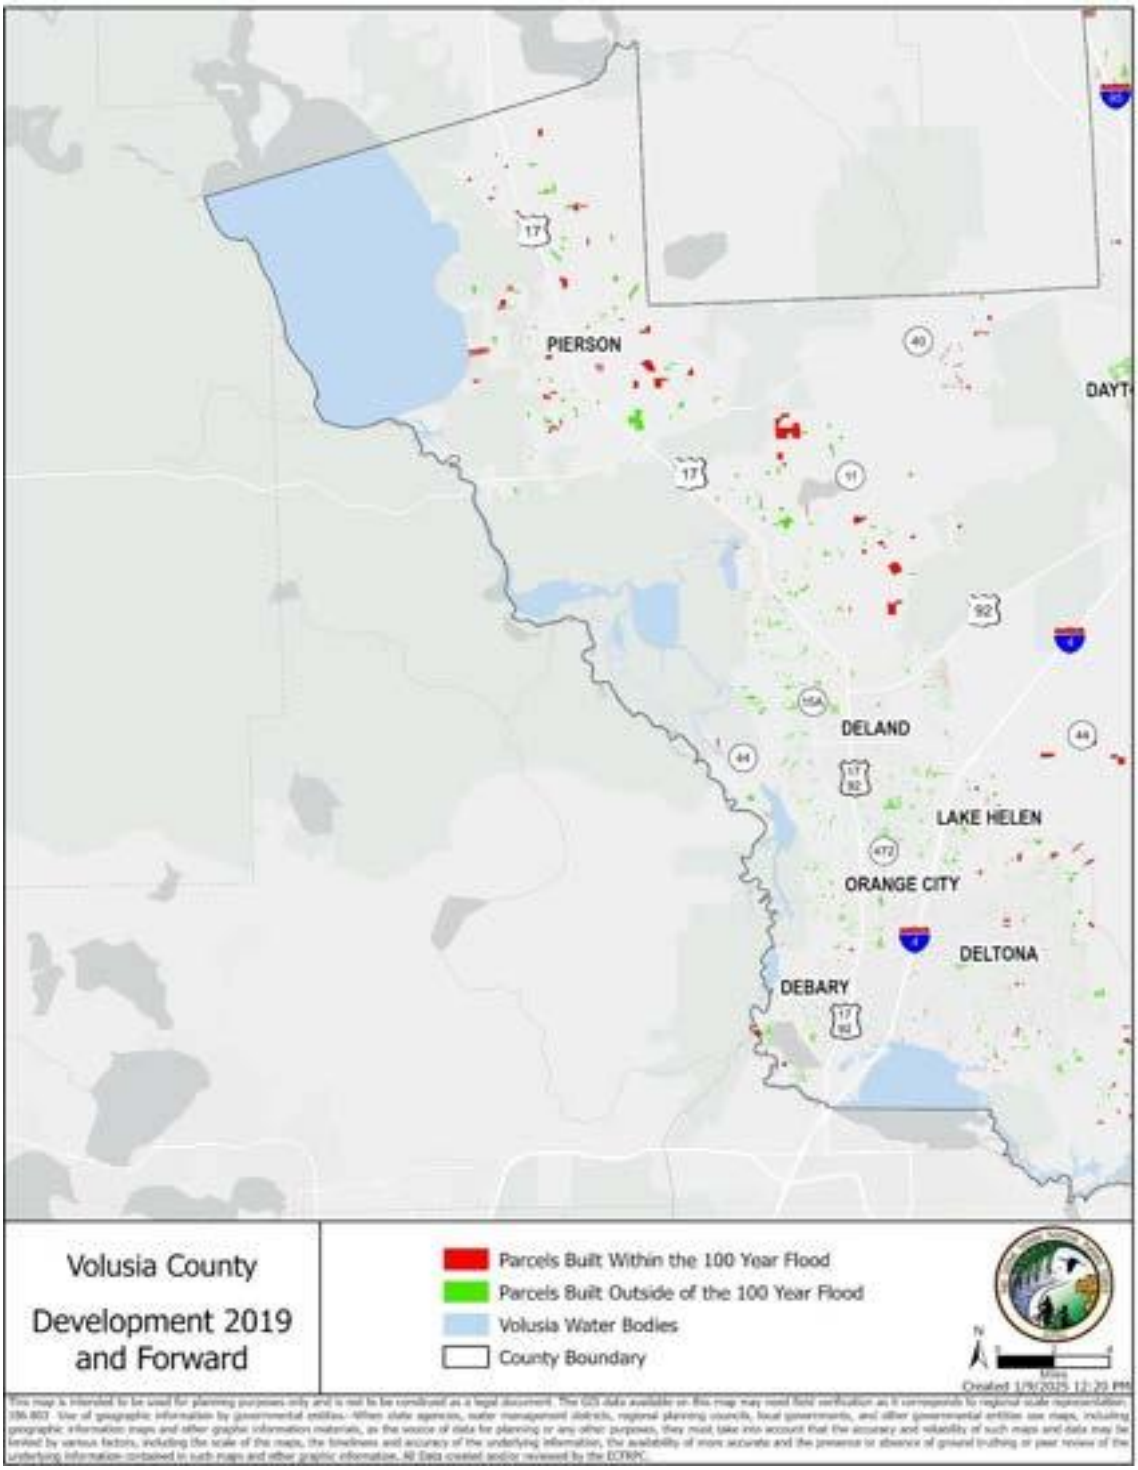
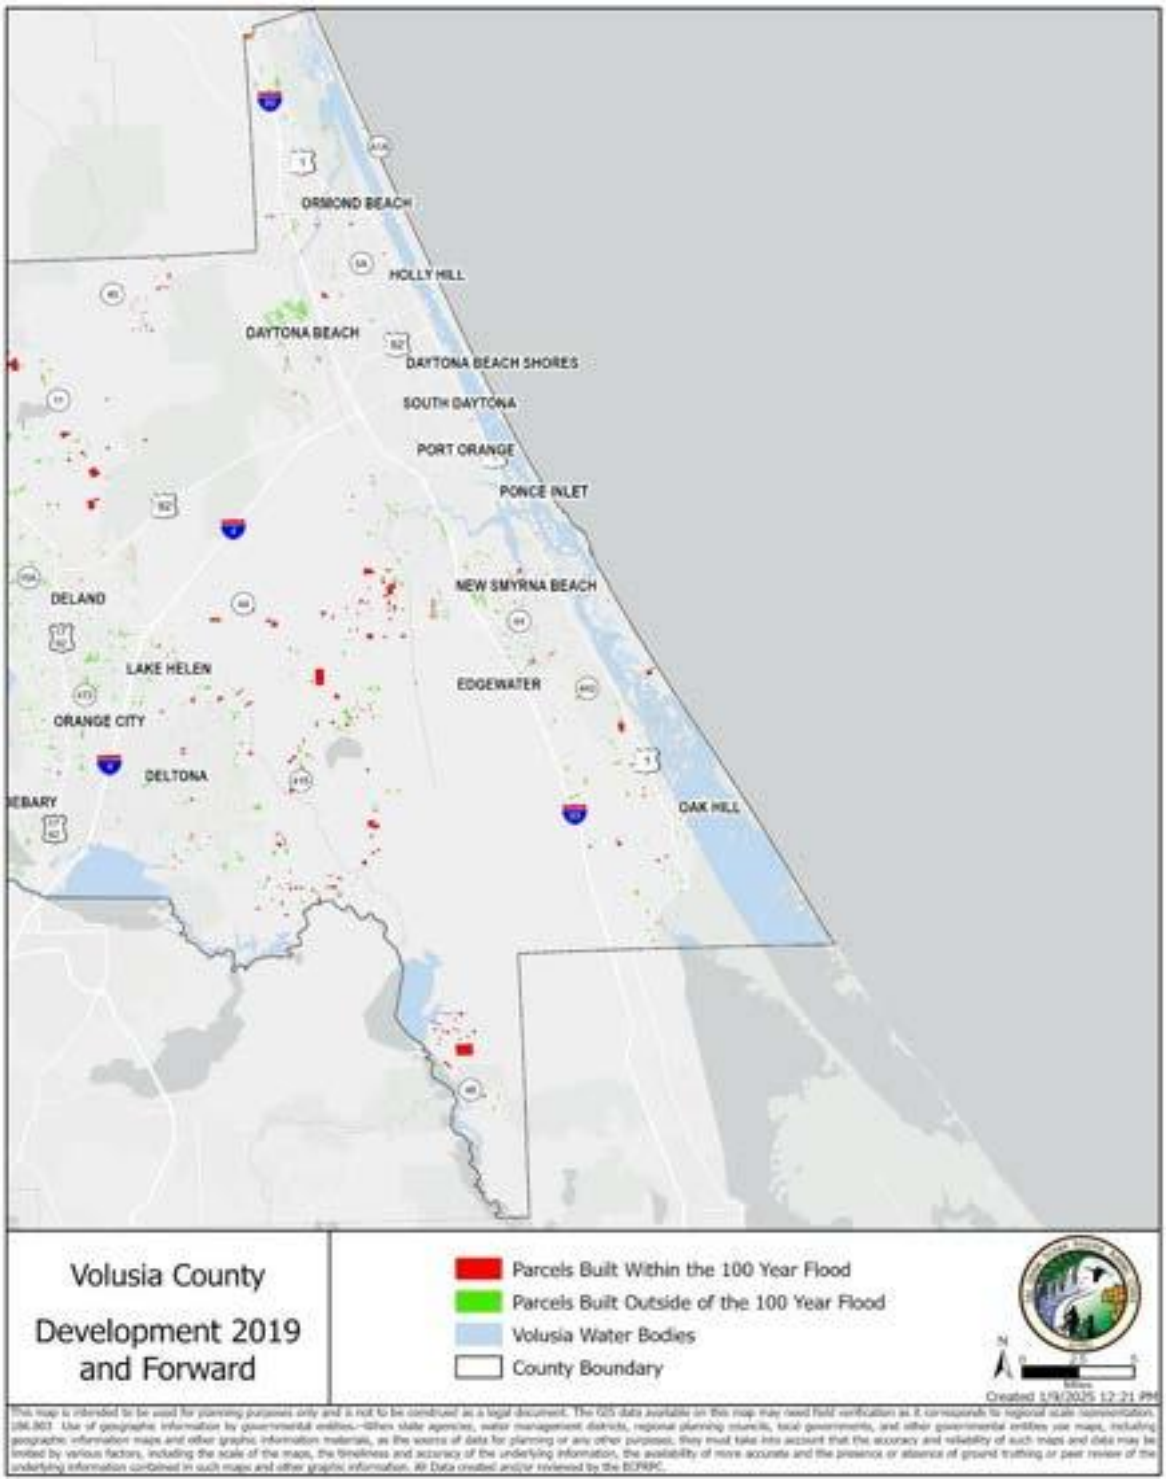
| HAZARDOUS MATERIALS / INDUSTRIAL INCIDENT | | | X | | | | X | | | X | | | | | | X | 3.1 |

**Section 5: Table 22: Conclusions on Hazard Risk for Volusia County**



## 5.19 DEVELOPMENT SINCE 2020 (LAST LMS SUBMITTAL)

The maps on the next page in Section 5 **Figure 24 and Figure 25** shows development in Volusia County from 2019 to 2024 with exposure to the 100-year floodplain. While the eastern portion of the county is susceptible to more hazards than the western portion, the eastern side has seen the largest growth in the number of properties built since 2019. Areas such as Ormond Beach, Daytona Beach, Holly Hill, South Daytona, Ponce Inlet, and New Smyrna Beach have experienced growth since 2020, much of it along the barrier islands to the east of the Halifax River, Indian River Lagoon, and Mosquito Lagoon. These areas are susceptible to tropical cyclones, flooding, and rising coastal waters. The western portion of the county has also experienced growth. Deltona, DeBary, DeLand and Orange City are typically more susceptible to wildland fires and flooding.



Since 2019, 6,005 properties have been built in the 100-year floodplain countywide. The total county taxable value of these new properties is $1,970,544,855 according to the ECFRPC analysis. The jurisdiction experiencing the most development is New Smyrna Beach. Daytona Beach is a close second.

For more information on recent developments in the hazard zones covered in this report, view the Vulnerability Assessment in Section 6.

**Section 5: Figure 24: Development in 100-Year Floodplain since 2019. West Side of Volusia County**

# SECTION 6 – VULNERABILITY ASSESSMENT

**44 CFR Requirement**

***44 CFR Part 201.6(c)(2)(ii):*** The risk assessment shall include a description of the jurisdiction's vulnerability to the hazards described in paragraph (c)(2)(i) of this section. The description shall include an overall summary of each hazard and its impact on the community. The plan should describe vulnerability in terms of: (A) The types and numbers of existing and future buildings, infrastructure, and critical facilities located in the identified hazard areas; (B) An estimate of the potential losses to vulnerable structures identified in paragraph (c)(2)(ii)(A) of this section and a description of the methodology used to prepare the estimate; (C) Providing a general description of land uses and development trends within the community so that mitigation options can be considered in future land use decisions.

## 6.1 OVERVIEW

This section builds upon the information provided in Section 5: *Hazard Profiles* by identifying and characterizing an inventory of assets in Volusia County and then assessing the potential impact and number of damages that can be expected to be caused by each identified hazard event. The primary objective of the vulnerability assessment is to quantify exposure, and the potential loss estimates for each hazard. In so doing, Volusia County and its participating jurisdictions and partners may better understand their unique risks to identify hazards and be better prepared to evaluate and prioritize specific hazard mitigation actions.

This section begins with an explanation of the methodology applied to complete the hazard vulnerability assessment, followed by a summary description of the asset inventory as compiled for Volusia County. The remainder of this section focuses on the results of the assessment and is organized by hazard as listed below.

- **Natural**
  - Agriculture
  - Coastal Erosion
  - Drought
  - Extreme Temperature
  - Flood
  - Public Health Emergencies
  - Rising Coastal Waters
  - Severe Weather
  - Tornado
  - Tropical Cyclones
  - Wildland Fire
- **Manmade**
  - Civil Disturbance
  - Mass Migration
  - Terrorism

- **Technological**
  - Coastal Oil Spill
  - Critical Infrastructure Failure
  - HazMat/ Industrial Incident

## 6.2 ASSESSMENT METHODOLOGY

This vulnerability assessment was conducted utilizing three distinct methodologies based on an appropriate analysis of that hazard:

1. Geographic Information System (GIS)-based analysis
2. A qualitative analysis based on the risk to people, property, the environment, government operations, the public, first responders, continuity of operations, facilities and infrastructure, economic conditions, and public confidence in governance.

Each approach provides estimates for the potential impact of hazards by using a common, systematic framework for evaluation, including historical occurrence information. The results of the vulnerability assessment are provided for each identified hazard. The versions of HAZUS used for this assessment were 6.1 and 7.0. All versions of HAZUS are designed to conduct the same analyses for the same purposes.

### GIS-Based Analysis

For the GIS-based assessment, digital data was collected from local, state and national sources. ESRI® ArcPro 3.4.0 was used to assess risk utilizing digital data including local tax records for individual properties and georeferenced point locations. Using these data layers, risk was assessed by estimating the assessed building value associated with properties determined to be in identified hazard areas. The critical asset inventory was compiled from FEMA's built-in asset inventory within HAZUS, the ECFRPC's critical asset inventory compiled for FDEP's statewide Resilient Florida Vulnerability Assessment, and additional assets provided by Volusia's jurisdictions. Parcel and land use data was retrieved from Volusia County's GIS Department and Property Appraiser.

To estimate population in hazard areas, Census 2020 population data by census block was obtained from HAZUS 7.0 and census blocks intersecting with hazard areas were used to determine improved property value, land value, building value, assessed value, taxable county value were obtained from Volusia County's Property Appraiser and properties intersecting with hazard areas were used to determine financial exposure and potential financial loss.

Census 2020 data was used for analyses as it is available by census block. There are other population estimates that are provided by reputable sources; however, they are only available at the jurisdiction level (e.g., county or city). When the next decennial census population data is available the county will consider reassessing the populations that are vulnerable to various hazards.

The objective of the GIS-based analysis was to determine the estimated vulnerability of people, buildings and critical facilities to the identified hazards for Volusia County using the best available geospatial data. In so doing, local databases made available through Volusia County such as local tax assessor records, parcel boundaries and critical facilities data were used in combination with digital hazard data. The results

of the analysis provided an estimated number of people, as well as the numbers and values of buildings and critical facilities determined to be potentially at risk to those hazards with delineable geographic hazard boundaries.

Financial exposure of parcels to hazards was assessed by intersecting parcel data to the extent of the hazards. Per the guidance of Volusia County Emergency Management, financial exposure to hazards for parcels with stacked properties was handled in two manners. Hazard analysis regarding wind, wildland fire, and sea level rise was conducted for all properties within a parcel, capturing the financial exposure of each floor within condominiums and other buildings. Hazard analysis regarding storm surge and FEMA flood zones was conducted only for first floor properties.

For storm surge, the data was retrieved from the National Oceanic and Atmospheric Administration's National Hurricane Center. The storm surge data is derived from the Maximum of the Maximum Envelope of High Water (MEOW), or MOM, which provides a worst case snapshot for a particular storm category. Each MOM considers combinations of forward speed, trajectory, and initial tide level. No single hurricane will produce the regional flooding depicted in the MOMs. Instead, the product is intended to capture the worst-case high-water value at a particular location for hurricane evacuation planning. The MOMs are also used to develop the nation's evacuation zones.

For wildland fire risk, the U.S. Forest Service's Wildfire Hazard Probability dataset was used to evaluate the wildfire risk for Volusia's critical assets. The Wildfire Hazard Probability dataset recognizes impervious surfaces as "non-burnable." As the majority of Volusia's critical assets are built on top of paved surfaces, they were marked as non-burnable by the dataset. However, due to the nature of wildfire and its ability to jump onto structures although they may be built upon impervious surfaces, geostatistical methods were employed to interpolate the fire risk for areas originally marked as non-burnable. The raster dataset provided by the U.S. Forest Service was altered to remove cells marked as non-burnable. This altered raster was run through Empirical Bayesian Kriging (EBK) to generate new wildfire risk scores for areas previously categorized as non-burnable. EBK is a geostatistical method utilized for making spatial predictions based upon existing patterns. Using EBK to fill in the gaps of the Wildfire Hazard Probability dataset allowed for a more comprehensive analysis of wildfire risk for the County's critical assets.

For tropical cyclone wind hazards, HAZUS 6.1 was used to run a probabilistic hurricane wind analysis. Probabilistic hurricane analysis is a method of predicting the likelihood of hurricane-related events by using a range of possible outcomes. This method can help to estimate the risk of hurricane damage and inform decision making. Return periods of 10, 20, 50, 100, and 500 were used to analyze peak wind gusts across Volusia County.

## 6.3 ASSET INVENTORY

An inventory of Volusia County's georeferenced assets was created in order to identify and characterize those properties potentially at risk to the identified hazards. By understanding the type and number of assets that exist and where they are located in relation to known hazard areas, the relative risk and vulnerability for such assets can be assessed. Three categories of assets were created and assessed through GIS analysis, including:

1. Improved Property: Includes properties with improved property (i.e., structures)

2. Critical Assets: Includes Volusia County's emergency operations centers, fire stations, police stations, schools and hospitals. This was derived from the FEMA HAZUS asset inventory and critical assets identified through the Volusia 2024 VA.

3. Transportation Infrastructure: Includes primary roads and active railroads.

## Improved Property

**Section 6 Table 1** displays total assessed value of improvements for unincorporated Volusia County and the incorporated areas with improved property.

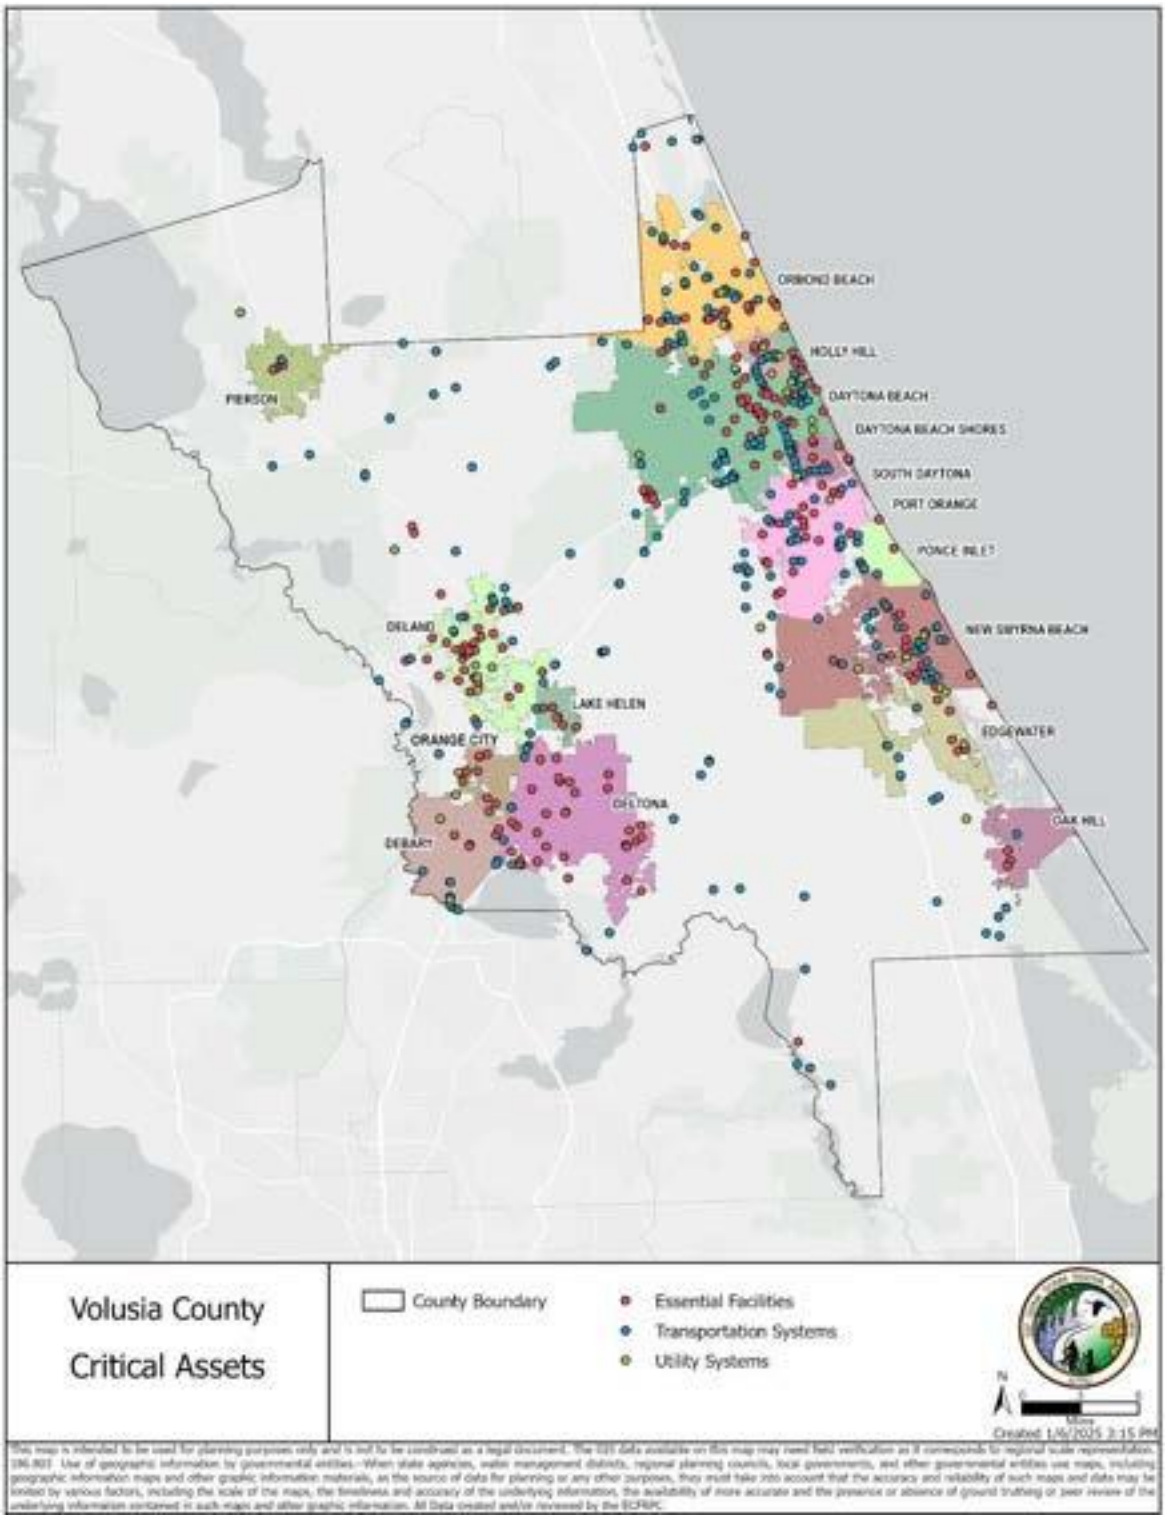
**Section 6: Table 1: Total Value of Improved Properties**

| JURISDICTION | TOTAL IMPROVED VALUE OF IMPROVED PROPERTIES |
|---|---|
| Daytona Beach | $11,412,838,706.00 |
| Daytona Beach Shores | $2,643,078,172.00 |
| DeBary | $2,829,659,586.00 |
| DeLand | $4,555,243,217.00 |
| Deltona | $8,243,140,783.00 |
| Edgewater | $2,478,786,764.00 |
| Holly Hill | $1,108,379,506.00 |
| Lake Helen | $273,588,377.00 |
| New Smyrna Beach | $7,693,963,655.00 |
| Oak Hill | $232,951,847.00 |
| Orange City | $1,439,235,489.00 |
| Ormond Beach | $6,202,742,902.00 |
| Pierson | $145,434,493.00 |
| Ponce Inlet | $1,426,666,290.00 |
| Port Orange | $6,642,257,338.00 |
| South Daytona | $1,215,618,172.00 |
| Unincorporated | $14,307,435,560.00 |
| **TOTAL** | **$72,851,020,857.00** |

Source: Volusia County Property Appraiser Data (2024)

## Critical Assets

**Section 6 Table 2** lists Volusia County's critical facilities, as identified by each jurisdiction in Volusia County. A full listing of the critical facilities and their exposure to each hazard included in this vulnerability assessment is in **Appendix E**. This information is not available for public distribution as it contains sensitive information. The critical facilities data is on file with Volusia County Emergency Management.



**Section 6: Table 2: Number of Critical Facilities**

| JURISDICTION | Number of Critical Assets |
|---|---|
| Daytona Beach | 74 |
| Daytona Beach Shores | 2 |
| DeBary | 7 |
| DeLand | 47 |
| Deltona | 27 |
| Edgewater | 14 |
| Holly Hill | 10 |
| Lake Helen | 6 |
| New Smyrna Beach | 28 |
| Oak Hill | 4 |
| Orange City | 9 |
| Ormond Beach | 31 |
| Pierson | 4 |
| Ponce Inlet | 2 |
| Port Orange | 22 |
| South Daytona | 6 |
| Unincorporated | 578 |
| Multi-Jurisdictional | 276 |
| **TOTAL** | **1,147** |

Source: All Jurisdictions (Cities, County), HAZUS

**Section 6 Figure 1** illustrates the general locations of the critical facilities and infrastructure according to the current georeferenced point and line locations. Facilities were identified through a combination of jurisdiction-provided data, 2024 Vulnerability Assessment (VA), and HAZUS 7.0 asset inventory.

## 6.4 AGRICULTURE

### Vulnerability

Agriculture in Volusia County is a sector that encompasses crops, livestock, and environmental resources. This sector is vulnerable to a variety of threats, including infestations, invasive species, and diseases. Infestation or disease in agriculture refers to the significant increase of biological entities such as insects, rodents, bacteria, or viruses in a given area, which can adversely affect crops, threaten human and animal health, damage valuable crops, or lead to the loss of significant environmental resources.

In Volusia County, common agricultural threats include infestations by mosquitoes, citrus greening, southern pine beetle, Florida dampwood termites, rats, and noxious plants like the Brazilian pepper tree. These threats can impact key agricultural crops such as citrus, vegetables, and ornamental plants. For instance, citrus greening, a bacterial disease, severely affects citrus crops, leading to significant economic losses. Similarly, the southern pine beetle can devastate pine forests, impacting timber production, while invasive species like the Brazilian pepper tree can outcompete native plants and disrupt local ecosystems. Livestock in Volusia County, including cattle, poultry, and horses, are also at risk from various diseases. Diseases such as foot-and-mouth disease and avian influenza can spread rapidly, causing substantial harm to livestock and posing a risk to human health. Contaminated water supplies used for irrigation or livestock drinking water can exacerbate these issues, leading to widespread problems for all residents in and near Volusia County.

The overall vulnerability of Volusia County and its jurisdictions to agricultural diseases and pests is low. Although there is not a large percentage of farmland in the county, disease can spread quickly if response is not immediate. The cities of Oak Hill and Pierson and unincorporated parts of Volusia County are most vulnerable to agricultural incidents because this is the largest area of farmland countywide. Climate change may exacerbate agricultural threats via the movement of invasive species. **Section 6: Figure 2** displays the areas of the county with the most vulnerability. The Western and Southern portions of the county are at highest risk.

### Impacts

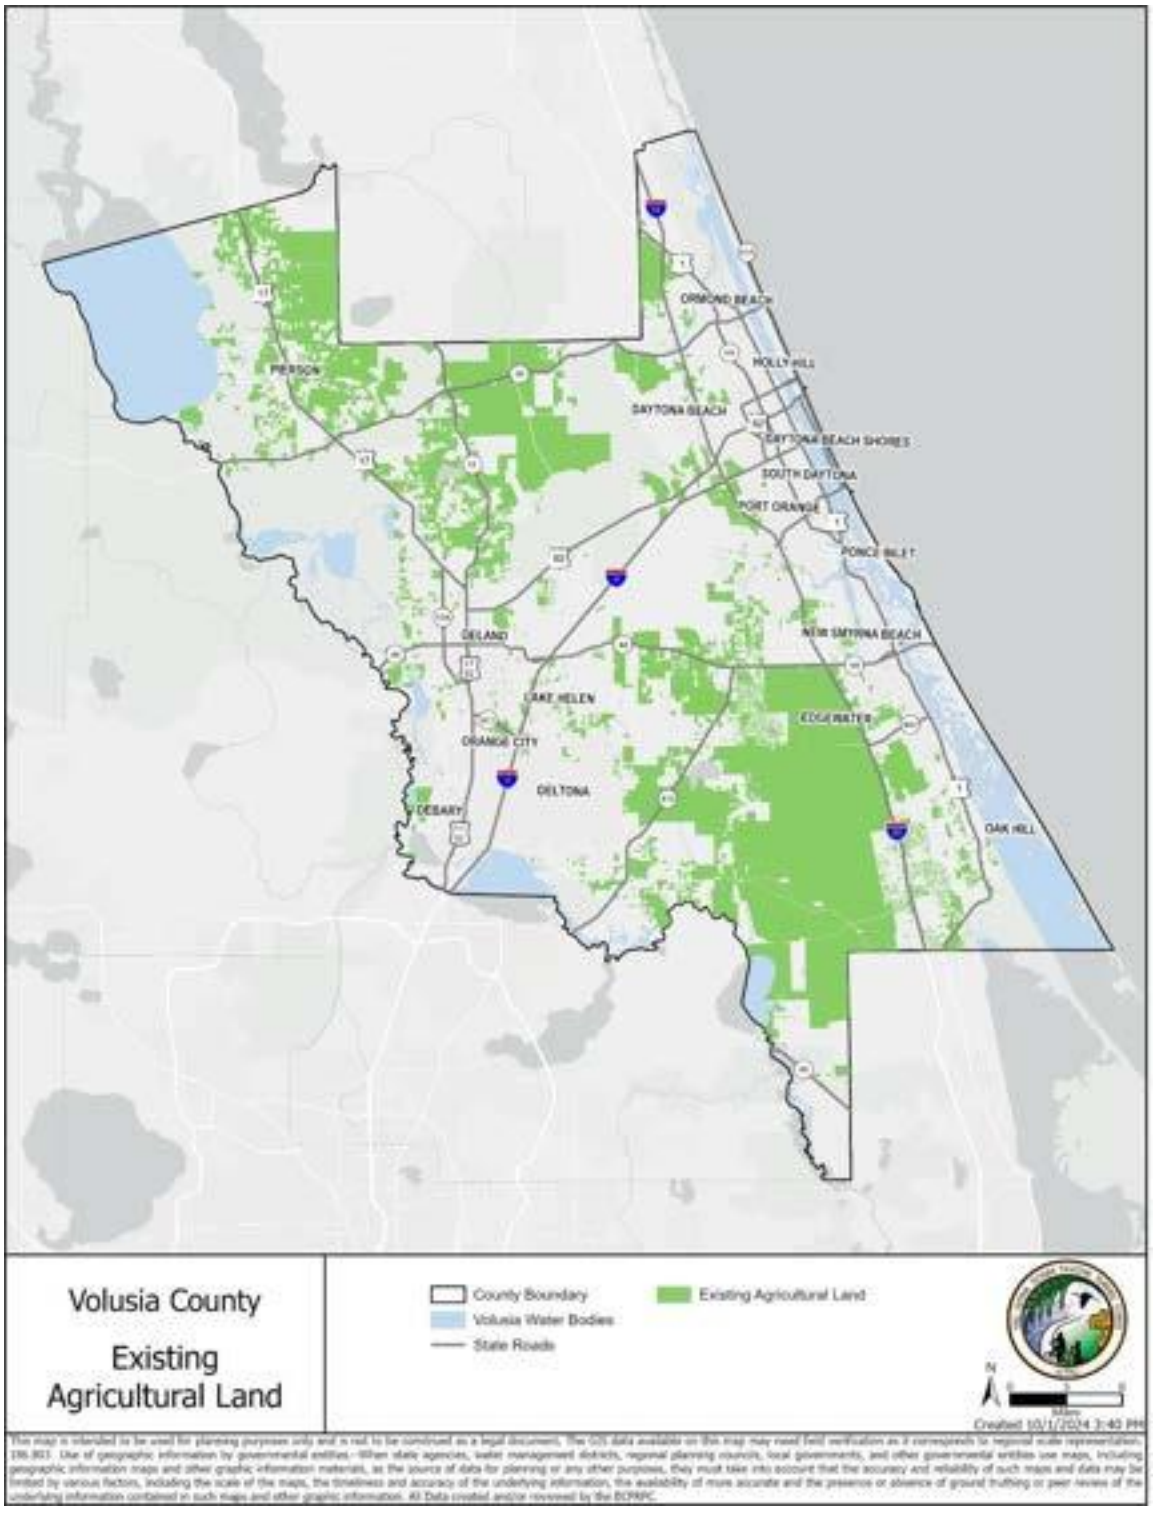
Environmental impacts include ecosystem disruption through the destruction of crops, contamination of soil and water, and displacement of native species by invasive plants. These disruptions can lead to the loss of biodiversity, affecting the region's ecological balance. There are many natural springs located on the west side of the county, such as Blue Spring, DeLeon Springs, Green Springs, and Gemini Springs, that attract tourism and protect native species.

On top of having profound ecological impacts, invasive species cost Floridians over $500 million each year; these costs include monitoring, testing, management, eradication, and restoration efforts. Future conditions may exacerbate the concern. Temperature changes, extended growing seasons, and altered rainfall patterns can support the spread of organisms into new territories. Additionally, as climate zones shift, the natural predators of pests might not migrate at the same rate, potentially leading to an imbalance where pest populations can grow unchecked. The probability of invasive species continuing to impact Volusia County is considered likely, occurring once a year or more. The economic impact of agricultural infestations and diseases in Volusia County can be profound, especially for the South and Western parts of

the county where there is a significant agriculture presence. Financial losses can result from crop destruction, decreased yields, and the costs associated with pest control and disease management. This is particularly relevant for Enterprise and Pierson.

Public health, especially of residents living in proximity to agriculture, is another critical area affected by agricultural threats. Additionally, vector-borne diseases spread by pests like mosquitoes, such as West Nile virus, dengue fever, and Zika virus, pose direct health risks to the public.

Responders dealing with agricultural infestations or disease outbreaks face health risks if exposed to harmful organisms or chemicals. Ensuring the safety of responders requires robust safety protocols, including the use of personal protective equipment (PPE) and decontamination procedures. Despite these risks, the continuity of operations in most sectors is unlikely to be significantly impacted by agricultural infestations or diseases. Essential services and functions can generally continue with minimal interruption. However, ensuring the continuity of operations for emergency response agencies is critical to effectively managing these threats.



Agricultural infestations and diseases are also unlikely to directly impact property, facilities, or infrastructure in urbanized areas of the county. The primary effects are concentrated on the agricultural lands. To mitigate these risks, it is essential to implement robust surveillance systems to detect and respond to biological threats quickly. Regular monitoring of crops, livestock, and the environment for signs of infestation or diseases is crucial. Education and training programs for farmers, agricultural workers, and first responders are necessary to ensure they can recognize and respond to agricultural threats effectively.

Clear communication channels between local, state, and federal agencies are vital for a coordinated response. This includes mutual aid agreements and support from the Florida Division of Emergency Management (FDEM). Emergency preparedness plans should be developed and regularly updated to include specific protocols for addressing agricultural infestations and diseases, covering containment, decontamination, and recovery processes.

Investing in research to develop resilient crop varieties and livestock breeds that are less susceptible to diseases is also important. Promoting the development of rapid detection technologies for pests and pathogens can enhance the county's ability to respond to agricultural threats. Every jurisdiction must integrate pest management (IPM) practices that can control pest populations using environmentally sustainable methods, such as biological control, habitat manipulation, and resistant crop varieties.

In conclusion, while Volusia County's agricultural sector faces low risks from infestations, invasive species, and diseases, proactive measures can significantly reduce these risks and mitigate their impacts. By enhancing surveillance, improving coordination, and investing in education and research, the county can better protect its agricultural assets and ensure food security. Comprehensive planning and preparedness efforts can minimize the overall public health, environmental, and economic impacts of agricultural threats. Existing land use was derived from parcel data provided by Volusia County GIS as seen in **Section 6 Figure 2**.

**Section 6: Figure 2: Existing Agricultural Land in Volusia County**

## 6.5 COASTAL EROSION

### Vulnerability

Coastal erosion is a significant concern for Volusia County, with all coastal areas prone to this natural process. Nearly half of the county's 47 miles of shoreline are considered critically eroded. While the population is not explicitly threatened by coastal erosion, the economic impact on beachfront properties can be substantial. Coastal erosion is typically measured as the annual shoreline change for a given beach cross-section over a long period.

Coastal erosion poses a considerable threat to beachfront properties within five jurisdictions of the county, as well as unincorporated areas. More than 5,000 properties are at direct risk, representing over $800 million in property value. Properties at the highest risk are those with low elevations, as wave action and dune degradation can compromise the integrity of the lot foundation. Properties with lower foundations, or those not elevated above the base flood elevation, are at higher risk for water damage, loss of personal property, electrical damage, structural collapse, and, in rare instances, loss of life.

Daytona Beach Shores and New Smyrna Beach are particularly vulnerable to coastal erosion due to their extensive shoreline properties. Additionally, storm surge presents a unique financial challenge, as beachfront properties are typically high value. Volusia County has engaged in beach renourishment activities and hardening shorelines with gray infrastructure, such as seawalls, and green infrastructure, such as living shorelines. Continued development along the shorelines and storm surges increasing in intensity and frequency contribute to the vulnerability of the coastal cities in Volusia County.

### Impacts

The county's Lifeguard Headquarters and Administration Building, located on the beach in Daytona Beach, provides public safety and lifeguard services to the entire beach area. The Ponce Inlet Lighthouse, another significant site, has undergone extensive work by the U.S. Army Corps of Engineers to re-nourish the sand and install rock jetties to protect the area.

There are two piers with restaurants vulnerable to storm surge, including Joe’s Crab Shack on the Main Street Pier, which is a major tourist attraction in Daytona Beach’s Boardwalk Entertainment Area. The entire shoreline, along with condominiums, residential homes, businesses, and restaurants, can be susceptible to coastal erosion depending on the strength and direction of storms. The North Peninsula State Recreation Area in Ormond-By-The-Sea and the A1A roadway in that area are at higher risk than other county areas, although it remains mostly undeveloped.

Coastal erosion can be a consequence of tropical storms, hurricanes, and nor'easters. Homes and structures built along the coastline may be damaged or even destroyed during these events, with protective dunes potentially obliterated. All property along the coast of Volusia County is at risk, with private property in some areas losing inches or feet of beach each year. Coastal erosion has caused over $400 million in damage.

The environment is highly vulnerable to coastal erosion. Erosion can occur via wind or water, leading to sedimentation in waterways, loss of habitat for coastal ecosystems, and changes in coastal geomorphology. Protective dunes on the shore may be reduced or washed away in hurricanes and high surf, further exacerbating erosion issues.

Responders are not directly impacted by coastal erosion, and the Volusia County Emergency Management Division will not face issues in continuing operations and delivering services due to this hazard. Although coastal erosion does not directly threaten program operations, as the Volusia County Emergency Operations Center is located 20 miles inland, the public faces numerous consequences. Homes can collapse into the ocean, and critical utilities and roadways may be compromised if beaches erode, and water inundates their systems. Coastal erosion also affects many public beaches in Volusia County, leading to the loss of recreational areas and potential destruction of private property and homes. In some rare cases, homes and businesses may fall into the ocean.

The consequences for the environment from coastal erosion are severe. Erosion by wind or water can deplete coastal ecosystems, reduce protective dunes, and cause sand and soil to enter water and sewer systems, leading to public and environmental issues. Coastal erosion is costly, with beach nourishment expenses averaging around $2.00 per cubic yard, placing a financial burden on local economies.
Despite these challenges, public confidence in government should not be significantly impacted by coastal erosion, as rapidly eroding beaches remain a high priority for nourishment efforts.

Coastal erosion also impacts tax revenue as some residents may choose to move away or cannot afford to fix a property after a storm. This can lead to condemned buildings that are unsightly and unsafe.

**Section 6 Table 4** provides the number of people and number and value of improved properties that are susceptible to coastal erosion. Coastal erosion is very likely to continue impacting the coastal areas of Volusia County. Jurisdictions with critically eroded beaches in Volusia County actively participate in the federal beach nourishment program.

**Section 6: Table 4: Total Exposure from Coastal Erosion for Ocean Shorelines & Lagoons**

| JURISDICTION | AT-RISK AREAS (within 250 feet of shoreline) | | |
|---|---|---|---|
| | Total Number of Properties at Risk | Total Improved Value of Buildings at Risk | Total County Taxable Value |
| Daytona Beach | 3914 | $1,573,304,260.00 | $1,137,404,025.00 |
| Daytona Beach Shores | 522 | $317,920,506.00 | $263,536,865.00 |
| Edgewater | 318 | $351,929,936.00 | $224,619,720.00 |
| Holly Hill | 647 | $255,000,654.00 | $200,624,664.00 |
| New Smyrna Beach | 3947 | $2,905,660,684.00 | $2,029,296,261.00 |
| Oak Hill | 391 | $164,494,791.00 | $92,141,021.00 |
| Ormond Beach | 1362 | $1,303,941,624.00 | $953,112,793.00 |
| Ponce Inlet | 615 | $368,335,931.00 | $255,695,564.00 |
| Port Orange | 777 | $377,236,994.00 | $230,213,454.00 |
| South Daytona | 439 | $196,332,861.00 | $140,465,685.00 |
| Unincorporated | 5080 | $2,701,737,784.00 | $1,903,028,923.00 |

## 6.6 DROUGHT

### Vulnerability

Volusia County and its jurisdictions are uniformly vulnerable to drought and overall vulnerability to drought is high. During the dry months of the year, drought can cause serious consequences and have compounding effects. Tactics such as water usage restrictions are implemented to save water. Extreme temperature events are increasing in frequency and intensity deepening vulnerabilities. Volusia County and its jurisdictions have continued to increase in population and the continuous growth is expected to worsen residents' vulnerabilities the water shortages.

### Impacts

Typically associated with crop damage rather than damage to the built environment, droughts can have significant secondary effects. Historical data indicate that drought conditions have led to wildfires in the years 1985, 1988, 1998, and 2009. These conditions can impact the Florida Aquifer, affecting the water supply for Volusia County residents, many of whom rely on personal wells or the county's public water supply, which is also drawn from wells.

Drought can lead to substantial crop loss, livestock reductions, and disruption of fish habitats. Furthermore, it is often associated with an increased wildfire threat, placing both human and wildlife populations at heightened risk. The environment is at risk from drought. Vegetation and sensitive ecosystems can suffer without adequate water, and stream flows may be reduced, impacting riparian and riverine ecosystems. Reduced lake and canal depths can impact boating traffic and access to certain waterways, diminishing property values in these locations. Notably, the Lake Beresford area in DeLand, which attracts tourists for fishing and houseboat rentals, could suffer from severe drought conditions. The St. John's River, which runs from south to north, can also be affected by droughts occurring as far south as Lake Okeechobee.

Although droughts do not directly affect the building stock within the county, they can cause numerous indirect losses to personal property and critical facilities. For instance, agricultural areas, especially in the northwest part of the county including the Town of Pierson, are particularly vulnerable. Losses within the agricultural industry can have a cascading effect on local businesses, such as those selling tools or heavy machinery, resulting in indirect financial losses. Consequently, residents may lose jobs, leading to a net economic loss for the county. Therefore, the most significant losses from drought are financial rather than physical, unlike other hazards.

The secondary physical impact of drought is the potential for sinkholes. Both excess rainfall (flooding) and drought conditions can negatively affect Florida's limestone bedrock. Thus, sinkholes represent a primary physical risk to the county's building stock due to drought conditions. The western portion of the county is particularly vulnerable to this because sinkholes happen more commonly than the eastern side of the county. Droughts can also result in increased wildfire activity. For instance, the 1998 drought directly contributed to wildfires that burned over 163,000 acres. Drought can significantly impact the county's economy, with the agricultural and natural resources industries contributing $781 million annually. An extended period of drought could seriously harm this sector.

Public confidence in government is unlikely to be significantly affected by a drought occurrence, as these are common occurrences in Florida. Insurance and assistance programs are widely available to farmers.

The public may not always experience direct consequences of drought, but government-imposed water restrictions may affect residential lawns and gardens. Chapter 50, Article III Minimum Environmental Standards, Division 8 Water Conservation references watering restrictions required for all jurisdictions within Volusia County.

Overall, program operations are not impacted by drought conditions. Responders are generally not impacted by drought, although caution and adequate hydration are necessary during extreme heat. Historically, the Volusia County Emergency Management Division has not faced issues continuing operations and delivering services during droughts events.

While homes, businesses, critical facilities, and infrastructure are generally not significantly impacted by drought and extreme heat, certain hydrologic processes, such as irrigation capacities and tourism-related activities (e.g., lakes and golf courses), can be affected. The St. Johns River Water Management District may restrict lawn irrigation, impacting residences and golf courses. Additionally, wells may reach dangerously low levels.

People are at risk from drought due to its negative effects on agriculture and livestock, which may impact long term food supplies. Farmers are the most directly affected by drought. Property may be at high risk from drought under extreme circumstances. Extended drought periods can significantly impact agricultural products and farmlands, particularly the fern industry in Volusia County, which experienced droughts in 1981, 1985, 1998, 1999, and 2000.

## 6.7 EXTREME TEMPERATURE

### Vulnerability

Overall vulnerability to extreme temperature is medium in Volusia County and its jurisdictions. While property is unlikely to be affected by extreme temperature conditions, unhoused populations are highly vulnerable to extreme heat with approximately 700 unhoused citizens between Flagler and Volusia counties on any given day as of 2024[1]. Extreme temperatures can also pose greater vulnerabilities on outside workers, the elderly, and infant populations. Extreme temperatures would make all of Volusia County and its jurisdictions equally vulnerable.

Agricultural areas are the most vulnerable areas to extreme temperatures. However, damage to critical facilities, businesses and homes can occur as a result of these events. Annualized losses for these events are very hard to measure.

### Impacts

Extreme temperatures have significant impacts when they occur. Winter storms can range from moderate snow over a few hours to blizzard conditions lasting several days. Ice storms, which occur when moisture falls and freezes upon impact, can cause widespread power outages, bring down trees, damage property, and result in fatalities and injuries. Extreme heat events are more common and pose significant challenges to Volusia County. Extreme heat is defined as temperatures that hover 9 degrees or more above the average high temperature of 90°F for the region and last for three or more consecutive days. These events can lead to widespread impacts:

All existing and future buildings, facilities, and populations in Volusia County are considered to be exposed to extreme temperature. The potential impacts include:

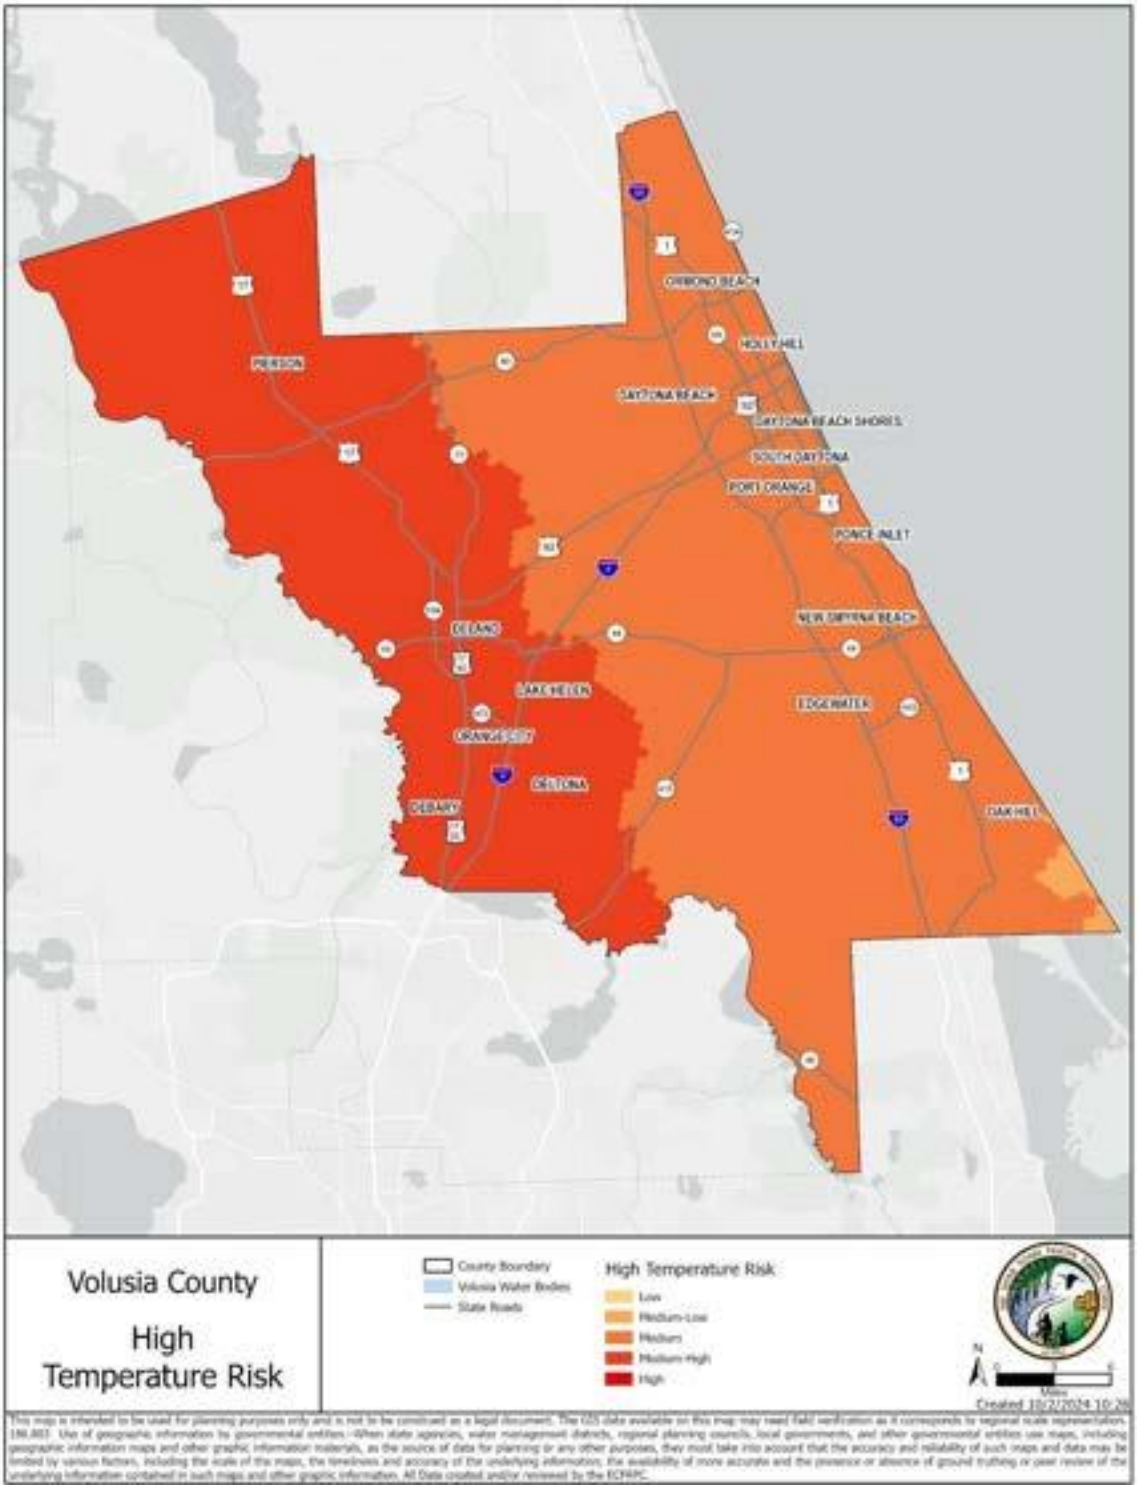
- **Public Risks:** All populations of Volusia County are vulnerable to extreme temperatures. Hypothermia and frostbite or heat illness are significant concerns, especially for vulnerable populations such as the elderly, young children, and the unhoused. Power outages can lead to HVAC failures, increasing the risk of illnesses. Heat exhaustion and heatstroke are serious health concerns, particularly for the elderly, children, outdoor workers, and those with pre-existing health conditions. Increased electricity demand for air conditioning can strain the power grid and lead to outages, leaving residents without cooling during the hottest periods. There is a growing concern for the unhoused population and extreme heat as climate change continues to impact frequency of events.
- **Responders' Risks:** Icy conditions can hinder emergency response, delaying response times. First responders must be prepared for the cold and heat to ensure they have the necessary equipment to operate safely. First responders must take precautions during extreme heat events to avoid heat-related illnesses. Ensuring adequate hydration and monitoring for signs of heat exhaustion and heatstroke are critical.
- **Property and Infrastructure:** Ice can accumulate on power lines, leading to outages that affect homes, businesses, and critical facilities. Burst pipes due to freezing temperatures can lead to

[1] https://www.vfcch.org/#:~:text=There%20are%20over%20600%2C000%20people,in%20Volusia%20and%20Flagler%20Counties.

significant water damage. Winter storms tend to affect transportation infrastructure (such as bridges and boat traffic) in addition to power sources. Consecutive high heat days may overload the electrical grid, also leading to power outages. Prolonged high temperatures can cause roads and bridges to expand and crack, leading to maintenance challenges. Power lines and transformers are also more likely to fail under high demand and heat stress.

- **Environmental Impact:** Wildlife may struggle to find food and shelter, and plants not adapted to extreme temperatures may be damaged or killed. Water bodies can warm, leading to reduced oxygen levels that harm aquatic life. Vegetation can suffer from heat stress, leading to reduced crop yields and increased wildfire risk.
- **Economic Impact:** Agricultural areas, particularly the Town of Pierson known as the "Fern Capital of the World," are vulnerable to severe financial losses. Transportation infrastructure, such as bridges and boat traffic, can also be affected, impacting the economy further. Moreover, areas heavy with agriculture could be at greater risk from an economic perspective, as these land uses can incur heavy losses during extreme temperatures. Extreme heat is associated with drought, thus can severely impact the agricultural sector. The annual economic impact of Volusia County's agriculture and natural resources industries is $781 million. An extended period of heat could seriously impact this.

Consequences for the public from extreme temperatures are the potential loss of power, with the unhoused population being the most affected. Shelters may need to be opened during these events. Public confidence in government is likely to remain stable during such events as they are rare in the county.



Responders are not expected to be adversely impacted due to the limited duration of extreme temperatures in Volusia County. Government operations are expected to continue during these events, with Volusia County Emergency Management maintaining operations through redundant power, IT, and communication systems.

Consequences of extreme heat on the public are not always direct but include impacts on agriculture and the food supply. Water restrictions may be implemented, affecting residential lawns and gardens.
Responders must exercise caution in extreme heat, ensuring adequate hydration. Historically, Volusia County Emergency Management has not faced significant issues in continuing operations during extreme heat events. Program operations are expected to continue without significant disruptions.

The data used for the extreme high temperature risk map in **Section 6 Figure 3** was derived from the ECFRPC's Resilience Collaborative Risk Assessment. Dr. Christopher Emrich from the University of Central Florida developed this data through the VMAP platform.

Overall, extreme heat poses a more consistent threat to Volusia County compared to extreme cold. While extreme cold events are rare, they can cause significant disruption and damage when they occur. Extreme heat is more common and presents ongoing challenges to public health, infrastructure, and the environment. Both types of extreme temperatures require effective preparedness and response plans to mitigate the impacts on the county's residents, infrastructure, and natural resources.

**Section 6: Figure 3: Extreme Heat Risk in Volusia County[2]**

[2] https://www.hazardrisk.org/

## 6.8 FLOOD

### Vulnerability

Flooding is one of the most destructive and costly natural hazards, not only in Volusia County but across the United States. FEMA identifies flooding as the most expensive natural hazard in terms of damage, with long-term psychological and economic impacts for affected communities. While all 50 states are at risk for flooding, Volusia County faces unique vulnerabilities due to its geography, environmental systems, and population distribution.

The overall vulnerability to floods in Volusia County and its jurisdictions are high. With several large bodies of water in the county and municipalities including Lake Monroe, Indian River Lagoon, Tomoka River, Halifax River, and the St. John's River; the community is very vulnerable to flooding. Enforcing floodway restrictions and building codes reduces vulnerability; however, with heavy rains caused by severe weather and tropical cyclones, flooding is possible in any jurisdiction of the county.

Flooding in Volusia County typically results from prolonged rainfall, storm surges, or overflow from rivers and streams. Although flash flooding, characterized by rapidly rising water, does not occur in the county, localized flooding can cause significant damage and disruption. An inch of water in a home can cause extensive property damage and standard homeowner's or renter's insurance policies do not cover flood-related losses, making homeowners vulnerable. A separate National Flood Insurance Program (NFIP) policy must be purchased to provide coverage. Unfortunately, many residents without flood insurance may receive little to no assistance in repairing their homes and property following a flood event. The frequency of flooding events has continued to increase and each year the recovery costs rise.

Properties most vulnerable to flooding damage are those with the lowest elevations. While a flood zone can envelop properties at a specified range of elevations, the variability in the elevations within those zones make certain buildings more prone to flooding damage than others. Additionally, structures that are located below the roadway system adjacent to the building (without a bio-swale buffer) are at extreme risk for flooding, as transportation networks are among the first areas to become inundated in a flood situation.

Many critical facilities are located within the 100-year floodplain. Adverse to the results when analyzing properties within each zone on a county level, the majority of critical facilities that are located within a flood zone in Volusia County are located within Flood Zone 'A'. A majority of the critical facility structures located within the 100-year floodplain are located in Volusia County's beach side communities. These include fire stations in New Smyrna Beach, Ponce Inlet, Daytona Beach Shores, Daytona Beach and Ormond Beach. There are hospitals at risk in low lying areas in Orange City and DeLand. Maytown Road in Oak Hill to Osteen/Enterprise is not an evacuation route because of repeated flooding. It is recommended that the County and all jurisdictions within the county enact policies to limit or disallow future development within the 100-year floodplain.

To assess flood risk, a GIS-based analysis was used to estimate exposure to flood events using FEMA's preliminary Digital Flood Insurance Rate Map (DFIRM) data in combination with local tax assessor records. The determination of assessed value at-risk (exposure) was calculated using GIS analysis by summing the total assessed building values for improved properties that were confirmed to be located

within an identified Zone A/AE (100-year floodplain), Zone VE (100-year coastal flood zone, associated with wave action), and Zone X (500-year floodplain). This analysis is parent parcel data. It is recommended that the flood analyses be revised once new flood maps are available. Flooding can impact all populations, primarily those who live, work or recreate anywhere within the county. Flooding can also cause property loss to structures located within the 100-year floodplain.

**Section 6 Table 5** lists the number of properties that are in both 100-year (A/AE) flood zone and 500 (X) flood zone, and the total value of the properties in the zones. This includes the entire property, although only a portion of the property may be located within the flood zone. The table corresponds with **Section 6 Figure 5**, which depicts all flood hazard zones. For a listing and generalized map of all Repetitive Loss Properties within the County and its 16 jurisdictions, please reference the 2025 Floodplain Management Plan. The table below summarizes types of flooding advisories.

**Section 6: Figure 4: National Weather Service Alerts**

| Alert | Criteria |
|---|---|
| Flood Watch | Atmospheric conditions over a large area, varying in size from multiple counties to multiple states, support the development of heavy rain and/or thunderstorms that are capable of producing flooding. A flood watch implies a longer period of relatively lighter rains, adding up to a large amount of rain. Longer-term flooding implies a slower or steadier rise in the water levels of creeks, streams and larger rivers. Roads can also become flooded, but it is usually more gradual, allowing motorists to monitor conditions more closely. |
| Flood Warning | A Flood Warning is issued by the National Weather Service when heavy rain has been occurring, and flooding is either occurring or will occur within a specified time, usually within 60 minutes. |
| Flash Flood Watch | Implies a shorter period of heavier rain. Generally, if flooding is expected within six hours of the onset of rain, a Flash Flood Watch is most appropriate. Flash flooding by definition suggests rapidly rising water, such as a surge of water heading rapidly downstream in a creek or small river. It could also be rapidly rising water on roadways, which can cause motorists to become stranded in vehicles, or even worse, washed into creeks and small rivers due to rapid runoff. |
| Flash Flood Warning | Atmospheric conditions over a large area, varying in size from multiple counties to multiple states, support the development of heavy rain and/or thunderstorms that are capable of producing flash flooding: A Flash Flood Warning is issued by the National Weather Service when heavy rain has been occurring, and flash flooding is either occurring or will occur within a specified time, usually within 60 minutes. |
| Urban and Small Stream Advisory | Flooding of small streams, streets and low-lying areas, such as railroad underpasses and urban storm drains is occurring. |

Source: National Weather Service

## Impacts

Flooding can devastate homes and businesses, washing away entire structures or causing irreparable damage. Roads and bridges may be washed out, limiting access to essential services and isolating

communities. In some cases, flooding is a secondary hazard following a hurricane or tropical storm. Critical infrastructure, including utilities, emergency response facilities, and government buildings, is also at risk.

Structural damage because of flooding can result in a loss of electricity, which can cause communication problems throughout the county. Moreover, physical damage due to water can result in the loss of personal property (for business owners and homeowners), while heavy, often expensive equipment located within critical facilities can be damaged.

The Volusia County Emergency Operations Center is not located within an SFHA, but access roads and surrounding areas may be impacted by severe flooding. During extreme flood events, access to the EOC could become difficult. Contingency plans, such as the use of Volusia County Sheriff's Office helicopter assets or all-terrain vehicles, are in place to maintain operations.

Flooding poses a significant risk to Volusia County's sensitive ecosystems. Riverbed erosion caused by floodwaters introduces sediments into waterways, potentially clogging stormwater systems and affecting water quality downstream. Floods can also carry hazardous materials and pollutants into rivers and streams, damaging aquatic habitats and riparian ecosystems. Additionally, nutrient-rich runoff, such as water released from Lake Okeechobee into the Intracoastal Waterway, can lead to algal blooms and oxygen depletion in rivers, causing fish die-offs. Although historical data on environmental impacts specific to Volusia County is limited, these events highlight the need for proactive monitoring and mitigation efforts.

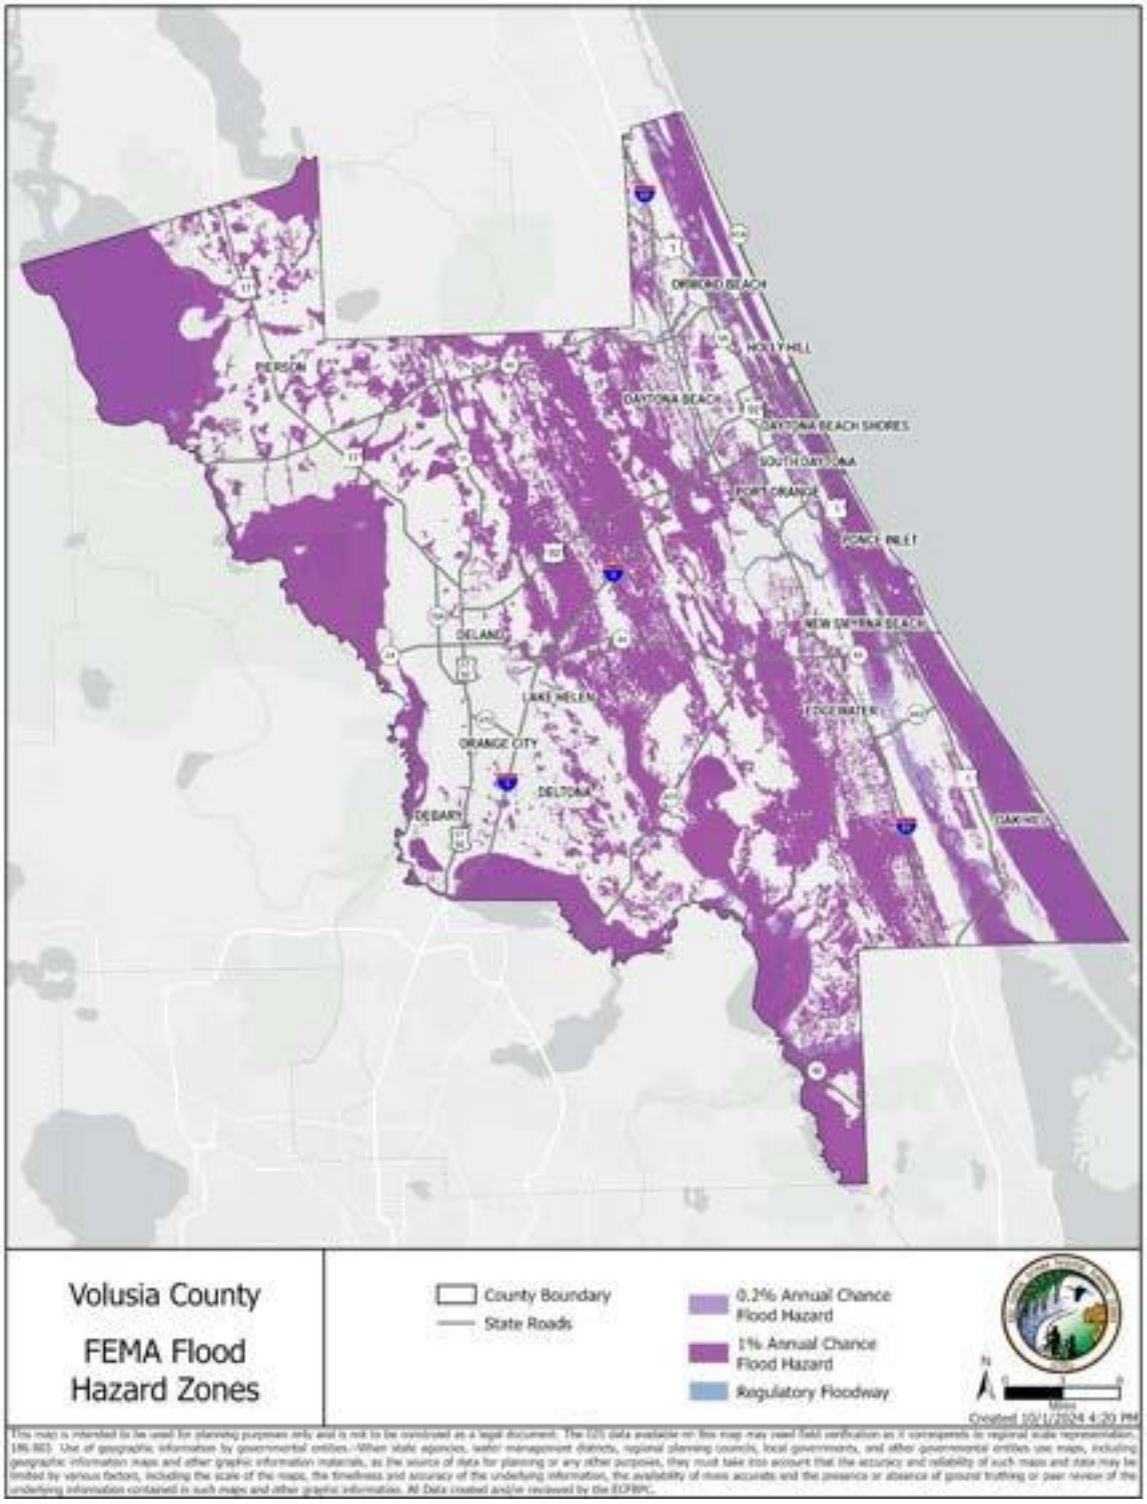
The consequences of flooding on the public can be severe. Floodwater can trap individuals in vehicles or homes, leading to injuries or fatalities. Recovery from a flood is often costly and time-consuming, taking weeks, months, or even years for individuals and communities to fully recover. For uninsured residents, the financial burden can be insurmountable.

Economically, flooding disrupts transportation, agriculture, business continuity, and government services. Agricultural areas, a key component of Volusia County's economy, are particularly vulnerable to flood damage. Historical data shows that between 1994 and 2009, 11 major flood events caused over $100 million in agricultural related damage in the county. The frequency of flooding events has continued to increase and each year the recovery costs rise.

Responders face significant challenges during flood events, including swift water rescues and navigating damaged or obstructed infrastructure. For instance, during Tropical Storm Fay, responders conducted numerous water rescues, highlighting the risks to both citizens and emergency personnel. Despite these challenges, the VCEOC has historically remained operational during flood events. Mutual aid agreements, including the Emergency Management Assistance Compact (EMAC), allow Volusia County to request additional resources and support during significant incidents.

To reduce the impact of flooding and maintain public confidence, Volusia County has implemented several education and mitigation initiatives. In collaboration with FEMA, NOAA, USACE, FDEM, ECFRPC, and the Florida Department of Insurance, the county provides residents with information on flood risks and the importance of flood insurance.

Since 1996, Volusia County Emergency Management has distributed over 5,000 NOAA weather radios to mobile home residents and created social media campaigns to disseminate critical information during flood events. The county has also developed an app for mobile devices.



Mitigation activities, combined with education and public awareness campaigns, play a crucial role in reducing the financial and social burden of flooding while fostering community resilience. These efforts ensure that residents and businesses are better prepared to recover quickly and effectively after a flood event.

**Section 6: Table 5: Property Exposure to Flood Hazard Zones**

| Jurisdiction | Number of Properties | Total Improved Value | County Taxable Value |
|---|---|---|---|
| Daytona Beach | 13,847 | $6,658,435,543 | $4,082,706,747 |
| Daytona Beach Shores | 507 | $437,389,147 | $373,912,678 |
| DeBary | 1,387 | $590,820,327 | $340,103,975 |
| DeLand | 369 | $234,887,960 | $120,198,104 |
| Deltona | 5,522 | $1,545,648,555 | $668,644,860 |
| Edgewater | 1,564 | $690,712,173 | $417,012,709 |
| Holly Hill | 3,160 | $18,630,680 | $14,443,385 |
| Lake Helen | 288 | $755,792,246 | $502,823,799 |
| New Smyrna Beach | 10,556 | $78,324,628 | $36,649,988 |
| Oak Hill | 891 | $5,286,195,924 | $3,238,539,783 |
| Orange City | 74 | $268,013,123 | $143,174,110 |
| Ormond Beach | 5,093 | $254,676,169 | $131,349,031 |
| Pierson | 163 | $2,993,289,460 | $2,032,959,092 |
| Ponce Inlet | 1,083 | $37,715,903 | $17,576,761 |
| Port Orange | 8,567 | $683,896,424 | $450,947,795 |
| South Daytona | 4,311 | $3,029,147,801 | $1,859,130,800 |
| Unincorporated | 31,415 | $1,285,011,052 | $765,792,886 |

## 6.10 PUBLIC HEALTH EMERGENCIES

### Vulnerability

Public health emergencies encompass a range of incidents, including disease outbreaks, pandemics, and mass casualty events that place extraordinary strain on healthcare systems. These emergencies may arise from natural causes, accidental exposure, or intentional acts, such as bioterrorism. Under Section 319 of the Public Health Service Act (42 U.S.C. § 319), the Secretary of the Department of Health and Human Services (HHS) has the authority to declare a public health emergency, which often prompts hospitals and other healthcare providers to exceed their normal operating capacities.

Volusia County's overall vulnerability to public health emergencies is medium. The people of Volusia County are highly vulnerable to the spread of disease due to the population size and proximity to tourist hotspots with travelers from all over the country and the world. All jurisdictions in the county are similarly vulnerable.

All residents of Volusia County are potentially vulnerable to public health emergencies, though the severity of impact often varies across demographic groups. Particularly at risk are the very young and the elderly, whose immune systems are more susceptible to illness. Volusia County has previously experienced isolated cases of imported malaria and West Nile virus (WNV) encephalitis, though WNV is asymptomatic in 80% of cases. Recent outbreaks of dengue fever (DEN-1) in nearby Martin County underscore the potential for emerging infectious diseases to pose a future threat. Communities with high density are more likely to spread illnesses faster, such as Daytona Beach and Deltona.

### Impacts

Although public health emergencies primarily impact human health, agriculture could serve as the source of an outbreak in rare cases, such as with foodborne illnesses or zoonotic diseases transmitted from livestock to humans. The residents with the highest risk for this type of transmission are those in agricultural parts of the county. See Agriculture for further details on vulnerable locations. However, property and infrastructure are not directly at risk in these scenarios.

The environment is unlikely to be directly affected by most public health emergencies, except in cases of bioterrorism or hazardous materials (HAZMAT) incidents, where contamination could impact air, soil, or water quality. For further details on these scenarios, see the HAZMAT/Terrorism sections of this report.

Public health emergencies can disrupt program operations, especially if key personnel become ill or are otherwise unavailable. Historically, Volusia County's Emergency Operations Center has not experienced significant operational disruptions due to public health emergencies. However, in the event of a widespread outbreak or pandemic, reduced staffing levels may necessitate virtual communications or remote work for some personnel. In extreme cases, the county may rely on support from neighboring jurisdictions through the Emergency Management Assistance Compact.

If the primary Volusia County Emergency Operation Center becomes contaminated, operations may shift to an alternate location to maintain continuity. Detailed contingency plans are outlined in the Volusia County Emergency Management (VCEM) Continuity of Operations Plan (COOP).

The consequences of public health emergencies for residents can range from temporary illness to long-term health issues or death, depending on the nature and scale of the event. Overwhelmed healthcare facilities may lead to crowded hospitals, long wait times for treatment, and limited availability of medications or vaccines.

Emergency responders are also at risk during public health emergencies, as they may be exposed to contagious diseases or hazardous substances. To protect themselves, responders may need vaccinations, protective equipment, and training to safely navigate these incidents.

A widespread public health emergency could have significant economic repercussions for Volusia County. High infection rates may reduce workforce availability, leading to interruptions in business operations and consumer spending. Early detection, vaccination programs, and public health interventions are critical for minimizing these economic disruptions. Tourism activities could also be slowed or halted, disrupting the entire county.

Maintaining public confidence in governance is a key component of managing a public health emergency. The Volusia County Health Department plays a vital role in monitoring air and water quality, tracking emerging infectious diseases, and providing educational resources to residents. The department also coordinates hospital preparedness programs and healthcare coalitions to ensure a robust response to public health threats. Through its transparency and preparedness efforts, including online resources and public outreach campaigns, VCHD demonstrates its capacity to protect public health. This proactive approach minimizes the potential for a loss of public confidence during a crisis.

## 6.11 RISING COASTAL WATERS

### Vulnerability

Rising coastal water is a significant hazard for Volusia County, encompassing storm surge, sea level rise, and tsunamis. This combination of immediate, catastrophic threats and long-term challenges has the potential to impact on the county's population, property, environment, economy, and government operations. The risks are particularly acute in coastal and low-lying areas near the Atlantic Ocean, Indian River Lagoon, Halifax River, St. Johns River, and other water-adjacent regions.

The municipalities most at risk are displayed in **Section 6 Table 6** and **Figure 6.** Rising coastal water poses the greatest risk to: Daytona Beach, Daytona Beach Shores, Edgewater, Holly Hill, New Smyrna Beach, Oak Hill, Ormond Beach, Ponce Inlet, Port Orange, south Daytona, and Unincorporated Volusia County due to its geographic proximity to the coast. Continued development along the shoreline also increases vulnerability to rising coastal waters for existing and future residents in these jurisdictions.

Residents in coastal areas of Volusia County face varying levels of risk from rising coastal water events.

- **Storm Surge:** The eastern portion of the county is highly susceptible to storm surge during hurricanes, with the worst-case scenario (Category 5 hurricane) potentially causing inundation almost as far inland as Interstate 95. Vulnerable populations in areas like Ponce Inlet, Daytona Beach Shores, and Ormond Beach face the highest immediate risks.
- **Tsunamis:** Although the U.S. Atlantic coast has a very low tsunami risk, the potential for significant impact exists. Coastal populations could experience rapid inundation, particularly in densely populated areas along the Halifax River and Atlantic coast. Tsunami events would likely allow for a minimum six-hour warning, enabling evacuation of at-risk populations. The most likely scenario for a tsunami in Volusia County would be triggered by a seismic event in Puerto Rico or off the western coast of Africa. Such events can affect populations thousands of miles away.
- **Sea Level Rise:** Sea level rise is currently being studied as a vulnerability to properties located near oceans, and many areas of eastern Volusia County would be inundated with water if sea level rise occurs as modeled by the U.S. Army Corps of Engineers. This long-term hazard poses no immediate threat to life but increases vulnerability to storm surge and coastal flooding over time. Impacts to residents in areas near the Indian River Lagoon, Halifax River, and St. Johns River are expected to escalate between 2040 and 2070.

### Impacts

Rising coastal water poses substantial risks to property across Volusia County.

- **Storm Surge:** Coastal and low-lying areas east of Interstate 95, including properties along Spruce Creek and the Tomoka River, are vulnerable to storm surge inundation. Key at-risk locations include:
    - Barrier islands in Daytona Beach Shores and Ponce Inlet, which contain critical facilities like fire stations and city halls.
    - Infrastructure along the Halifax River, Indian River Lagoon, and Mosquito Lagoon, such as bridges (Main Street, Highbridge, Silver Beach, and North Bridge in New Smyrna Beach).
    - Iconic landmarks like the Ponce Inlet Lighthouse and Daytona Beach's Main Street Pier.
- **Tsunamis:** Property impacts would mirror those of a major storm surge, with debris transported inland, structural foundations compromised, and critical infrastructure disrupted.

- **Sea Level Rise:** Long-term property damage is expected in coastal areas adjacent to the Atlantic Ocean, Indian River Lagoon, Halifax River, and St. Johns River. Facilities near water bodies may require relocation, especially those handling hazardous materials. Saltwater intrusion could deteriorate stormwater infrastructure, including outfalls, lift stations, and pump stations, while older structures face heightened risks of damage.

The environmental impacts of rising coastal water in Volusia County are significant and varied.

- **Storm Surge and Tsunamis:** These events can devastate ecosystems, introducing saltwater into sensitive estuaries like the Indian River Lagoon and Halifax River. Saltwater intrusion into aquifers, the county's primary drinking water source, would be particularly harmful. Inundation could also damage dune systems and spread sewage and pollutants into the environment.
- **Sea Level Rise:** Coastal and riverbank ecosystems, including beaches and dune systems, are at risk of long-term degradation. Sensitive habitats, such as those for marine turtles, could face irreversible damage. Saltwater intrusion into stormwater infrastructure may exacerbate environmental harm.

The economic consequences of rising coastal water are profound. **Section 6 Table 7** and **Table 8** display financial exposures.

- **Storm Surge:** Damage to homes, businesses, and tourism infrastructure would result in substantial economic losses. A Category 5 hurricane could result in damages exceeding $1 billion, while impacts on tourism—a cornerstone of the county's economy—would be severe.
- **Sea Level Rise:** Gradual loss of property values, businesses, and community assets such as beaches will weaken the economic foundation of coastal areas. Investments in mitigation can reduce long-term risks but require substantial funding in the near term.
- **Tsunamis:** Like storm surge, tsunamis would devastate tourism, disrupt businesses, and impact the property tax base.

Public confidence in government could be significantly influenced by how rising coastal water events are managed.

- **Storm Surge and Tsunamis:** Delays in recovery or perceived inefficiencies could diminish public trust.
- **Sea Level Rise:** Public dissatisfaction could stem from either perceived inaction or over-investment in mitigation efforts. Balancing proactive measures with economic constraints is critical.

Rising coastal water could strain government operations and continuity.

- **Storm Surge and Tsunamis:** Response and recovery operations could be overwhelmed by the scale of damage, requiring mutual aid from adjacent counties, the state, and FEMA. Program operations may take months to return to normal.
- **Sea Level Rise:** While its effects are gradual, proactive relocation of facilities and infrastructure will be necessary to maintain operational continuity.

Volusia County has taken substantial steps to address these hazards, including participation in:

- The East Central Florida Regional Resiliency Action Plan and Resilience Collaborative.
- Sea level rise studies conducted by the Florida Department of Environmental Protection (FDEP).
- Development of a tsunami response plan and analysis of storm surge vulnerabilities.

These efforts, combined with the county's focus on adaptive strategies, demonstrate a commitment to protecting its residents, economy, and natural resources from the multifaceted threats posed by rising coastal water.

The interconnected challenges of storm surge, sea level rise, and tsunamis necessitate a comprehensive and adaptive approach. By leveraging regional collaboration, scientific research, and proactive planning, Volusia County can mitigate risks and build resilience to safeguard its future against the impacts of rising coastal water.

Storm surge data was obtained from the NOAA National Hurricane Center, which uses the hydrodynamic Sea, Lake, and Overland Surges from Hurricanes (SLOSH) model to simulate storm surges from tropical cyclones. Storm surge composites – Maximum Envelopes of Water (MEOWs) and Maximum of MEOWs (MOMs) – are created to assess and visualize storm surge risk under varying conditions. This analysis used MOMs, which show maximum storm surge heights for each hurricane category.[3]

[3] https://www.nhc.noaa.gov/nationalsurge/?text

**Section 6 Table 6** shows the number of properties at risk, per jurisdiction, to Category 1, Category 3 and Category 5 storm surge effects. The table corresponds with **Section 6 Figure 6**, which depicts the storm surge hazard zones.

**Section 6: Table 6: Properties at Risk to Category 1/3/5 Storm Surge by Jurisdiction**

| JURISDICTION | Properties at Risk (Cat. 1) | Properties at Risk (Cat. 3) | Properties at Risk (Cat. 5) |
|---|---|---|---|
| Daytona Beach | 2,548 | 11,700 | 17,070 |
| Daytona Beach Shores | 641 | 1,113 | 1,316 |

## 6.12 SEVERE WEATHER

### Vulnerability

Severe weather, including hail, lightning, and thunderstorms, is a recurring concern in Volusia County. Each hazard poses unique threats to populations, property, and infrastructure, but come with little to no warning. It encompasses a range of phenomena that are more extreme than typical weather conditions. Severe weather events can impact all areas of Volusia County, depending on the location of the storm, its direction, and its lateral speed across the Earth's lower atmosphere. These events can cause damage to structures, disruption of utilities and surface/air transportation.

Vulnerability to severe weather is medium due to its frequency in nature combined with our ability to monitor and predict when severe weather will impact Volusia County and its jurisdictions. While severe weather can have damaging effects on people and property, widespread awareness and lead time before storms reduces our overall vulnerability to its effects. Vulnerability to severe weather is consistent throughout all jurisdictions.

Hailstorms can occur unpredictably across Volusia County, impacting all buildings, facilities, and populations equally. Hailstones in Florida are typically penny to quarter-sized but can occasionally grow as large as golf balls or baseballs, causing significant damage to property and infrastructure. Vulnerable areas of structures include roofs, windows, and pool screens, as well as exposed personal property like vehicles and outdoor decor. Communication facilities may be at a higher risk of a lightning strike, while school assets such as football stadiums with lighting could also be at an increased level of vulnerability. Structures that are isolated in areas of low tree coverage are at a higher risk for lightning strikes. Jurisdictions within the county where this could be more common include DeLand, Lake Helen, Orange City, and Pierson. These areas are generally more rural in nature and have a higher rate of isolated critical facilities and structures.

In situations where tornadoes are present, hail may have a higher likelihood of being present. Moreover, structures that have partial or full tree coverage could have lessened property damage due to hail as a result of the slowing speed of the hail before impact with property. Severe hail can also damage emergency vehicles and communication systems, disrupting response efforts.

Beachside structures located near or along the Atlantic Ocean are also at a higher vulnerability to lightning damage due to historical occurrences. There are not many critical facilities located along the Atlantic Ocean in Volusia County, as the majority of those facilities are located inland along the barrier islands or are located west of the Intracoastal Waterway. Vulnerable areas for lightning include recreational spaces, golf courses, and the county's 47 miles of Atlantic Ocean beaches, where tourists and residents engaging in outdoor activities face heightened risks. Lightning is a dangerous threat to people in the United States, particularly those who are outside during the summer. The number one area for fatalities due to lightning strikes is open fields, making Volusia County's 47 miles of Atlantic Ocean beach among the most dangerous in the County. This heightens the risk for the tourist population who may be unaware of the imminent danger of quickly approaching tropical systems that emit lightning.

Communication systems and power sources are among the most vulnerable land uses to this hazard due to their electrical nature. Volusia County has approximately 30 golf courses, along with private and public recreational facilities, the Daytona Beach International Speedway and 2 additional smaller outdoor

racetracks, 2 intracoastal waterways traversing the county, school facilities, and parks located throughout the County. Individuals participating in the following recreational activities could be vulnerable to lightning including: golf, football, baseball, soccer, surfing, horseback riding, walking, jogging, tennis, boating, fishing, kite flying, kayaking, paddle boarding, beach activities, picnicking, camping, hiking, gardening, hunting, swimming, basketball, softball, cycling, wind surfing, lacrosse, archery, track and field events, stock car races, outdoor festivals and numerous other outdoor activities. It is estimated that at least 75% of the population participates in at least one of these recreational activities and is thus vulnerable to lightning.

Thunderstorms are frequent throughout the year in Volusia County, often bringing high winds, hail, and lightning. From 2019 to 2024, the county experienced 14 severe thunderstorm events, causing $23,000 in property damage. Downed trees, power outages, and damage to homes and infrastructure are common consequences. Unhoused populations, outdoor event spectators, and those engaging in recreational activities are particularly vulnerable.

## Impacts

Lightning can spark structure fires, damage electrical systems, and contribute to wildfire during dry seasons. Critical facilities with tall antennas, isolated structures, or those in rural areas like DeLand, Lake Helen, Orange City, and Pierson are at increased risk of lightning strikes. Beachside properties, including hotels and utilities, are also vulnerable. As it cannot be predicted where lightning may strike, all existing and future buildings, facilities and populations in Volusia County are exposed to this hazard and could potentially be impacted. As the lightning capital of the U.S., Florida experiences a high frequency of lightning strikes, with Volusia County recording approximately 4,000 lightning strikes weekly during summer.

Beachside structures located near or along the Atlantic Ocean are also at a higher vulnerability to lightning damage. Many utilities are in these locations. Most of the buildings located along the beach are hotels, businesses and high-rise condos. There are not many critical facilities located along the Atlantic Ocean in Volusia County, as the majority of those facilities are located inland along the barrier islands or are located west of the Intracoastal Waterway.

Thunderstorms frequently occur in Volusia County. Since it cannot be predicted where thunderstorms may occur, all existing and future buildings, facilities and populations are exposed to this hazard and could potentially be impacted. Thunderstorm winds can disrupt transportation and utilities, while heavy rain may lead to localized flooding. Critical roadways may be blocked by downed trees or power lines, complicating emergency response. Thunderstorms can also exacerbate other hazards, such as hail and lightning, increasing their overall impact on the county.

While severe weather generally has minimal long-term environmental impacts, it can cause immediate issues such as downed vegetation, localized flooding, and occasional wildfires. Economically, damages are often covered by insurance, limiting their broader impact on the local economy.

Volusia County Emergency Management has systems in place to maintain operations during severe weather events. Redundant communication systems, backup power, and a Continuity of Operations Plan (COOP) ensure the county can respond effectively, even in catastrophic scenarios. However, responders

may face challenges such as blocked roads, downed power lines, and unsafe conditions caused by lightning or hail.

Public confidence in government is unlikely to be significantly affected by severe weather events, as Volusia County provides timely information through NOAA weather radios, social media, and the county's website. Recovery efforts for most severe weather events are typically completed within days.

## 6.13 TORNADO

### Vulnerability

Historical evidence confirms that Volusia County is vulnerable to tornadoes, which can result from severe thunderstorms, tropical storms, or hurricanes. These hazards are unpredictable, with no specific area immune from their potential impacts. All buildings, facilities, and populations in Volusia County are considered exposed to tornadoes, regardless of location. Vulnerable populations, such as the unhoused, elderly, and lower-income residents, are particularly at risk, as are those living in mobile home parks and manufactured housing communities. Volusia County has mobile home/manufactured home parks throughout the county, both east and west sides which are equally vulnerable to impacts of tornadoes. Many of the parks are 55 and older only while others have very old mobile homes that are not built to today's standards, leaving the elderly and low-income populations more at risk. Many of these structures, particularly older ones, are not built to current building standards, making them highly susceptible to damage from high winds and flying debris. **Section 6 Table 9** displayed each jurisdiction's number of homes and when the homes were built. Daytona Beach and Unincorporated Volusia have the highest number of homes built pre-1969, making residents of those jurisdictions more vulnerable.

### Impacts

While tornadoes are relatively rare in Volusia County compared to other hazards, they can have devastating effects when they occur. The strongest tornado to impact Volusia County was an EF3, capable of leveling well-constructed buildings, uprooting trees, and creating automobile-sized projectiles that can travel for miles. Although large tornadoes are uncommon, their potential for destruction makes them a significant threat to both life and property.

Two primary types of tornadoes typically impact Volusia County. Larger tornadoes, in the EF2 to EF4 range, often form in central Florida near the Orlando metropolitan area and tend to move from the west-southwest to the east-northeast. These tornadoes cover large areas and are more likely to affect the western portions of Volusia County, particularly near its borders with Seminole and Lake Counties. Historical patterns suggest that tornado activity often reaches the eastern coastline after being detected in Central Florida, offering some warning for communities in the storm's path.

Smaller tornadoes, typically in the EF0 to EF1 range, occur more frequently in Volusia County and are less predictable. These tornadoes do not follow consistent geographic patterns, and their touchdowns can appear randomly. Despite this, a disproportionate number of these smaller tornadoes have been observed near the Intracoastal Waterway. Rarely have tornadoes been recorded crossing Interstate 95 in Volusia County, further illustrating the widespread vulnerability of the area to these storms.

The consequences of tornadoes on property, infrastructure, and the environment can be severe. Tornadoes can demolish homes, businesses, and critical facilities, while also disrupting utilities such as power and communication systems. Roads may become impassable due to debris, downed trees or power lines, and complicated emergency response efforts. Older structures are particularly vulnerable, as building codes have become more stringent over time to better withstand high winds. Infrastructure in the western portions of the county faces higher risks from larger tornadoes, which develop over longer periods and allow less time for mitigation or protective measures. Thus, critical facilities at the highest risk for strong tornado damage (and loss of human life) would generally be those located in the western portion of the

county due to the shorter duration of time allowed for mitigation of these properties in the event of an incoming storm.

The environmental impacts of tornadoes vary depending on their intensity. Even weaker EF0 tornadoes can uproot trees and vegetation, while stronger tornadoes can scatter debris over great distances, sometimes miles from the point of origin. This debris can contaminate waterways or cause secondary hazards if it includes hazardous materials from damaged vehicles or storage facilities. Agencies such as Volusia County Environmental Management and the County Health Department would monitor these environmental impacts to mitigate risks.

Emergency response efforts in the aftermath of a tornado are critical but can be challenging. Search and rescue operations may be required in heavily impacted areas, and responders may encounter destroyed communication systems, missing landmarks, and blocked roadways. Power lines and debris present additional hazards, necessitating extreme caution for first responders. Despite these challenges, the Volusia County Emergency Operations Center is fortified to withstand an EF4 tornado, ensuring its continued operation even during severe events. In the unlikely event of direct damage to the VCEOC, alternative plans outlined in the COOP would allow emergency services to continue without significant interruption.

Tornadoes also pose economic risks to the county. While smaller tornado events may only have a localized impact, larger tornado outbreaks can devastate entire communities, crippling local economies and requiring substantial recovery resources. Assistance from the Volusia County Community Organizations Active in Disaster (COAD), including the American Red Cross, would be mobilized to support affected residents and businesses.

Public awareness and preparedness play crucial roles in mitigating the impacts of tornadoes. The county utilizes NOAA weather radios, social media platforms, and premade media materials to disseminate information during and after tornado events. Some communities in Volusia County are equipped with tornado sirens and safe rooms, further enhancing public safety during these hazardous events.

In conclusion, while tornadoes are not as frequent as other hazards in Volusia County, their potential for catastrophic damage makes them a significant concern. All areas and populations within the county are at risk, and continued efforts in preparedness, infrastructure hardening, and public education remain essential to minimizing their impact and ensuring the safety and resilience of the community.

**Section 6: Table 9: Year Range of Built Homes for each Municipality**

| JURISDICTION | Pre- 1969 | 1970-1979 | 1980-1989 | 1990-1999 | 2000-2024 |
|---|---|---|---|---|---|
| Daytona Beach | 10,816 | 3,919 | 4,114 | 1,090 | 8,353 |
| Daytona Beach Shores | 578 | 1,257 | 1,842 | 1,276 | 1,637 |
| DeBary | 1,562 | 735 | 1,577 | 2,120 | 3,567 |

## 6.14 TROPICAL CYCLONE

### Vulnerability

Tropical cyclones, encompassing hurricanes and tropical storms, pose significant risks to Volusia County. The overall vulnerability of tropical cyclones is high within all jurisdictions of Volusia County. The possibility of harm to humans, high property damage, and potential infrastructure losses all combine to make tropical cyclones one of the highest threat hazards. Volusia County is vulnerable to tropical cyclones to a similar level in all jurisdictions because of the spatial extent of a hurricane or tropical storm. The LMS works to protect critical infrastructure and residents in order to reduce the vulnerability of the community.

These events often affect large areas and cross jurisdictional boundaries, exposing all existing and future buildings, facilities, and populations to potential impacts. Volusia County has a lower risk compared to other areas of the state such as the western panhandle and southeastern Florida.

The county's coastal region, home to over 45% of the population, is particularly vulnerable. Vulnerable populations, including the unhoused, disabled, elderly, and lower-income residents, face heightened risks during these events. Additionally, residents living on the barrier islands or adjacent to the Intracoastal Waterway system are particularly susceptible due to their proximity to storm surge zones and areas prone to flooding.

### Impacts

Critical infrastructure, including communication systems and power sources, is vulnerable to tropical cyclones. These storms bring a combination of high winds, flooding, coastal erosion, and heavy precipitation, making it challenging to estimate total potential losses. Historical data suggest that Volusia County is at a relatively lower risk for direct impacts compared to areas like the western Florida Panhandle or southeastern Florida. However, regions closer to the Atlantic Ocean or in the southeastern part of the county face the highest risk of wind damage.

This area also drives much of the county's tourism, which faces significant disruption during tropical cyclone events. One of Volusia County's most significant hurricane seasons on record occurred in 2004, with Hurricanes Charley, Frances, and Jeanne causing back-to-back impacts. While Charley was the only storm to bring hurricane-force winds to the county, the cumulative effects of these storms caused extensive damage to homes, infrastructure, and the environment. Over 40% of homes sustained damage, and the total economic losses exceeded $560 million. Annualized losses to residential buildings in the county are estimated at over $280 million, with an additional $70 million in annualized losses for non-residential structures.

Beyond high winds, tropical cyclones bring cascading hazards, including inland flooding, tornadoes, storm surge, and severe beach erosion. These hazards significantly impact on the environment, causing downed trees, eroded coastal dunes, and loss of animal habitat, like sea turtle nesting areas. Additionally, debris and hazardous materials may wash into waterways, further harming sensitive ecosystems. The monetary cost of erosion alone is challenging to calculate as it often occurs alongside other impacts. Agencies such as Volusia County Environmental Management and the County Health Department play vital roles in monitoring and mitigating environmental consequences.

Program operations and emergency response efforts can be strained during a major tropical cyclone, particularly a Category 3 or higher hurricane. While routine operations generally continue during tropical depressions or weaker storms, a direct hit from a significant hurricane could severely disrupt county functions. In such cases, Volusia County may require assistance from neighboring counties, the state, or FEMA through mutual aid agreements like the Emergency Management Assistance Compact (EMAC). Recovery may take months or even years to return operations to pre-storm levels, depending on the storm's severity.

The public faces numerous challenges during and after tropical cyclones, including injuries, fatalities, destruction of homes and businesses, and prolonged disruptions to essential services like water, power, and sewage. Recovery is often costly, time-consuming, and emotionally taxing for affected residents, even with insurance or disaster assistance. These events can have lasting psychological impacts, especially on those who experience repeated storm impacts. All residents are vulnerable.

Responders face extreme challenges in tropical cyclone events. Downed trees, power lines, damaged infrastructure, and impassable roads complicate rescue and recovery efforts. Critical facilities such as the EOC, fire stations, hospitals, and government buildings may also sustain damage, limiting their functionality. Responders must operate with heightened awareness of their risks, especially in hazardous conditions caused by the storm.

The economic consequences of tropical cyclones are substantial. The 2004 hurricane season remains the costliest disaster in Volusia County's history, with damages to tourism alone amounting to millions of dollars per day. Recovery from a single major hurricane can take years, with long-term financial impacts on the county and affected communities.

To mitigate these risks and maintain public confidence, the Volusia County Emergency Management has implemented various preparedness and public awareness initiatives. These include a video disaster preparedness guide, behavioral surveys following hurricane evacuations, public presentations, and an annual media campaign in collaboration with local outlets like the Daytona Beach News Journal. During hurricane events, the Public Information Office (PIO) uses pre-prepared materials and social media campaigns to provide timely updates. Year-round preparedness information can be disseminated through the county's weekly Podcast called Volusia Today.

Through these efforts, Volusia County Emergency Management aims to ensure residents are informed and confident in the county's ability to respond to and recover from tropical cyclones. These storms remain a significant threat to Volusia County, necessitating ongoing vigilance and community resilience to minimize the impacts.

**Section 6: Tables 10-14** display individual municipalities vulnerability and potential financial impacts. **Section 6: Figures 7-11** display the jurisdictions most vulnerable to tropical cyclone wind.

**Section 6: Table 10:Total Exposure and Potential Losses from Tropical Storm 10 Year Wind Event**

| JURISDICTION | Category Storm | Total Properties Impacted | Total Improved Value | Total County Taxable Value |
|---|---|---|---|---|
| Daytona Beach | Tropical Storm (10 Year Wind) | 30,119 | $12,633,494,317 | $7,749,648,103 |

## 6.15 WILDLAND FIRE

### Vulnerability

Overall vulnerability to wildland fires is medium. Wildland fires can happen quickly and cause widespread damage. Volusia County faces a uniform risk of wildland fires, particularly during hot, dry summer months and periods of drought. Wildland fires most frequently affect wooded areas with low population densities, posing a heightened threat to rural areas. Although large population centers generally have lower risk, wildland fires can still cause significant damage to structures and critical infrastructure and pose serious health hazards, including injuries and fatalities from smoke inhalation.

The build year of a property is a critical metric in assessing wildland fire vulnerability due to the evolution of building codes over time. Modern codes restrict the use of flammable materials and promote mitigation strategies, reducing the risk for newer structures. While Volusia County has an older building stock overall, properties within fire hazard zones tend to be newer compared to those vulnerable to other hazards. Areas such as Ormond Beach's rural regions along SR 40 west of I-95 are particularly susceptible, with heavily wooded single-family subdivisions like Timber Creek, Hunters Ridge, Breakaway Trails, and Plantation Pines being at heightened risk.

In terms of land use, low-density residential properties dominate the fire hazard zones. Agricultural areas and extensive woodlands throughout the county also contribute significantly to the overall vulnerability. Wildland fires can spread through two primary mechanisms: burning ashes from tree lines that can “jump” across roadways or other barriers, and the less visible but equally dangerous underground energy transfer, where fires spread beneath the surface. This heightens the danger for residents in isolated rural areas surrounded by dense vegetation.

### Impacts

The public faces direct consequences when wildland fires impact homes or businesses. Fires can destroy property, disrupt utility services, and limit access to roadways. Smoke and ash also contribute to air pollution, exacerbating health risks, particularly for vulnerable populations.

Responders face significant challenges during wildland fire events. The unpredictable and dynamic nature of fires, driven by changing wind and environmental conditions, requires substantial resources and strategic planning. Smoke inhalation poses health risks to emergency personnel, emphasizing the importance of protective measures during response efforts.

While wildland fires are a natural part of the ecosystem, they can severely impact the environment. Beyond damaging native vegetation and wildlife habitats, wildfires contribute to air and water pollution. Smoke and ash can contaminate waterways, while the loss of tree cover can exacerbate soil erosion. Volusia County Fire Services and the Health Department actively monitor and address air and water quality concerns during wildfire events.

Despite these challenges, Volusia County Emergency Management anticipates no significant disruptions to operations or service delivery during a wildland fire. The county's COOP ensures uninterrupted emergency management functions even in the event of a direct impact on the Emergency Operations Center.

Economically, wildland fires in Volusia County tend to have localized impacts. However, larger fires that are difficult to control may disrupt events or industries critical to the county's economy. For example, smoke from past wildland fires led to the postponement of the Coke Zero race. Small, rural communities are particularly vulnerable, as fire could devastate local economies. Recovery efforts would rely on organizations such as the County Community Organizations Active in Disaster and the American Red Cross.

Public confidence in government typically remains stable during wildfire events, supported by Volusia County's preparedness and outreach efforts. The county maintains premade media materials and actively uses social media and NOAA weather radios to provide timely updates. The success of past wildfire responses, such as the 1998 fires where 29,000 homes were at risk but only six homes, one mobile home, and two businesses were lost, continues to bolster public confidence.

While wildland fires pose a persistent hazard in Volusia County, ongoing mitigation efforts, strategic response plans, and public outreach programs aim to reduce risks and strengthen resilience for residents and communities.

**Section 6 Table 15** lists the number of properties and the property values that are in the high, moderate, and low-risk wildfire zones for each jurisdiction. The table depicts exposure to different fire hazard zones utilizing 2024 property data.

**Section 6: Table 15: Financial Exposure to Hazard Zones – Cumulative Financial Values within Zones**

| Fire Class | Jurisdiction | Properties in Zone | Improved Value | County Taxable Value |
|---|---|---|---|---|
| **High** | Daytona Beach | 3,960 | $1,621,910,972 | $1,100,871,625 |
| **High** | DeBary | 595 | $123,696,392 | $71,260,689 |

## 6.16 CIVIL DISTURBANCE

### Vulnerability

The overall vulnerability of civil disturbances in Volusia County is low as there is no major political critical infrastructure like those of Tallahassee. While moderate human impact is possible, civil disorder can spread quickly and disrupt the public's confidence in the jurisdictions' governance. There are no major civil disturbances recorded, but all jurisdictions of Volusia County are vulnerable to civil disorder. The infrastructure most vulnerable is those around municipal buildings. The City of DeLand is most vulnerable due to the municipal complex hosting many of the county-wide departments.

### Impacts

Civil disturbances, while relatively rare, pose a potential risk to public safety, property, and the overall perception of stability in Volusia County. These events typically arise from social, political, or economic grievances and can escalate quickly, resulting in harm to individuals, damage to property, and disruptions to community operations.

The public is the most directly affected by civil disturbances, particularly individuals in the immediate vicinity of the event. Bystanders may be injured or, in severe cases, killed during such incidents. The risk is heightened during large gatherings, such as major NASCAR events, Biketoberfest, or Bike Week, when Volusia County hosts hundreds of thousands of visitors. These annual events spread throughout the county, but are concentrated in cities such as Daytona Beach, Daytona Beach Shores, and Ormond Beach. Civil disturbances during these events could lead to mass casualties, panic, and chaos, straining local emergency response systems.

Private and public properties are at significant risk during civil disturbances. Rioters may engage in vandalism, looting, or arson, causing extensive damage. The financial toll of such actions can reach hundreds of thousands of dollars, disrupting businesses, displacing residents, and burdening local governments with costly repairs. Florida's history includes seven major riots, such as the 1980 and 1982 Miami riots and the 1996 St. Petersburg riots, which highlight the potential for widespread property destruction.

The environment may experience moderate consequences from civil disturbances. Fires resulting from arson can release toxic gases, fumes, and fluids into the air, soil, and water, posing risks to human health and local ecosystems. Additionally, burned vehicles and structures can leave behind hazardous debris that require specialized cleanup and disposal efforts.

Volusia County's program operations are not expected to be significantly disrupted by a civil disturbance. The Volusia County Emergency Operations Center (VCEOC) is a secure facility, designed to maintain continuity of operations even during extreme events. In the event of a large-scale disturbance, mutual aid agreements with neighboring counties can provide additional resources to manage the situation.

Responders face unique challenges during civil disturbances. They must navigate highly volatile situations where they may be targeted by individuals instigating violence. The risk of injury or death is real, requiring responders to exercise extreme caution and rely on specialized training to de-escalate tensions while ensuring public safety.

The impact of civil disturbances on property and infrastructure can be substantial. Homes, businesses, and critical facilities, such as government buildings and transportation hubs, may be damaged or destroyed. Streets may become blocked or impassable, complicating response efforts and further exacerbating the situation.

The economic fallout from a civil disturbance can be severe. Damaged homes and businesses require costly repairs, and disruptions to local commerce may reduce tax revenue. If civil disturbances occur during major tourist events, the county's reputation as a safe destination may suffer, deterring future visitors and negatively impacting the local economy. Businesses reliant on tourism could face prolonged downturns, compounding financial losses.

Public confidence in government can be adversely affected by civil disturbance, particularly if the response is perceived as slow or inadequate. Effective and timely action by law enforcement and emergency management is critical to maintaining trust. Volusia County must demonstrate its capacity to manage such events to reassure residents and visitors that their safety is a priority.

Civil disturbances pose a range of risks, from direct harm to individuals and property to broader economic and social consequences. By leveraging secure facilities like the Volusia County Emergency Operations Center, mutual aid agreements, and specialized training for responders, Volusia County is prepared to address these challenges. Proactive communication and decisive action during a disturbance are essential to mitigating impacts and maintaining public trust.

## 6.17 MASS MIGRATION

### Vulnerability

The overall vulnerability of mass migration in Volusia County and its jurisdictions is low. While lack of affordable housing and community resources could be a concern with mass migration, due to the low probability and lack of physical impacts, Volusia County is not very vulnerable to this hazard. While it is possible people migrating to the county may choose a more urban area to move to such as Daytona Beach, each jurisdiction is equally vulnerable to this possibility.

### Impacts

The citizens of Volusia County face minimal direct risk from a mass migration event. However, an influx of migrants, whether due to political upheaval, natural disasters, or humanitarian crises in neighboring regions or countries, could present logistical and social challenges. The likelihood of such an event remains low, but the county must remain prepared to manage a sudden increase in population to ensure the safety and well-being of all residents, including the migrants themselves.

Property within Volusia County would not be directly at risk from a mass migration event. Migrants arriving in the county are unlikely to cause physical damage to homes, businesses, or infrastructure. However, depending on the scale of the event, temporary facilities such as shelters, processing centers, or housing accommodations may need to be established, potentially requiring the repurposing of public spaces or other properties. Additionally, there may be a strain on available affordable housing, spiking up rent prices for existing residents.

The environment would experience minimal impact from a mass migration event. Temporary facilities and increased resource use may place localized stress on certain systems, such as water and waste management, but these effects would likely be short-term and manageable with proper planning and resources. Environmental risks could be mitigated through coordinated efforts to ensure that shelter locations and services are established in environmentally sustainable ways.

Programming operations within the county would also experience minimal disruption. Volusia County Emergency Management Department and other relevant agencies have contingency plans in place to address scenarios involving a sudden population influx. Should the situation exceed local resources, mutual aid agreements with adjacent counties and support from state and federal agencies would ensure that operations continue with minimal interruption.

The public is unlikely to experience significant, direct consequences from a mass migration event, though there may be concerns or perceptions about how the government is managing the situation. With effective communication and transparent planning, the direct impacts on the daily lives of Volusia County residents would remain minimal.

Responding to the event would play a critical role in managing a mass migration event. Law enforcement, public health, and emergency management personnel would be responsible for organizing, processing, screening, and housing the migrant population. Although the physical and mental demands on responders may increase during such an event, their training and preparedness would help ensure the situation is managed effectively and humanely.

The county's economy is unlikely to be significantly impacted by a mass migration event. Migrants are typically transient and may not remain in the county for an extended period. Temporary costs associated with shelter, food, and medical services would likely be covered by state or federal aid. Long-term economic impacts would depend on whether migrants integrate into the local population and contribute to the economy or if the county becomes a hub for repeated migration events.

Public confidence in government could be affected by a mass migration event, particularly if the public perceives that the government is unprepared or inefficient in managing the situation. Delays in organizing processing, screening, or housing for migrants could lead to frustration among residents. To mitigate these risks, Volusia County would need to maintain open and consistent communication with the public, emphasizing its plans and progress in addressing the situation and ensuring that public safety and order are upheld.

Continuity of operations for the county government would not be significantly impacted by a mass migration event. In a larger-scale scenario, mutual aid from surrounding counties, as well as state and federal resources, would provide additional support. The Volusia County Emergency Operations Center would coordinate these efforts to ensure that essential services continue without interruption.

Overall, the consequences of a mass migration event for property, facilities, and infrastructure in Volusia County would be minimal. Temporary strains on resources and systems may occur, but with proper planning and coordination, these challenges would be manageable. The county's proactive approach to emergency management ensures that any potential impacts from a mass migration event are addressed efficiently and effectively, preserving the safety and well-being of all individuals in the community.

## 6.18 TERRORISM

### Vulnerability

Terrorism remains a persistent and evolving threat, with a wide array of potential impacts ranging from physical destruction and loss of life to disruptions of critical services and public confidence. In Volusia County, these risks are particularly relevant due to its high-profile events, significant agricultural sector, and increasing reliance on digital infrastructure. This assessment examines the vulnerabilities and consequences of various forms of terrorism, including agroterrorism, cyber terrorism, and conventional attacks.

Overall vulnerability to a terrorist attack is moderate within Volusia County and its jurisdictions. Human and property impacts could be severe and widespread depending on the nature of the attack. Because terrorist attacks can take many forms and include many types of weapons, it is difficult to reduce the county's overall vulnerability to these incidents. First response agencies attempt to reduce vulnerability through prevention tactics and intelligence sharing. No jurisdiction in Volusia County is more vulnerable to attack than another.

### Impacts

The public faces significant risks in the event of a terrorist attack. Volusia County is home to numerous mass gatherings, such as NASCAR events at Daytona International Speedway, which attract over 100,000 spectators, as well as Bike Week and Biketoberfest, which draw an estimated 500,000 participants annually. These events represent potential targets for terrorism due to their large crowds and national visibility.

The consequences of an attack at such an event could include:

- Serious injuries and fatalities.
- Long-term psychological impacts, including post-traumatic stress disorder (PTSD) and heightened public anxiety about future events.
- Economic impacts due to decreased attendance at events and diminished tourism.

Agroterrorism presents another unique threat to public health. Contamination of agricultural products could introduce pathogens into the food supply, leading to widespread illness and potential fatalities. Such an event would not only harm individuals directly but could also undermine trust in food safety systems.

Property, facilities, and infrastructure are all at risk in a terrorist event. A physical attack involving explosives, arson, or a dirty bomb could result in:

- Extensive damage to buildings and critical infrastructure, including transportation networks, energy facilities, and communication systems.
- Severe financial losses for private businesses and public institutions.
- Long-term closures of impacted facilities, potentially disrupting essential services.

In agroterrorism scenarios, farms and processing facilities could suffer catastrophic losses if disease-causing agents spread among crops or livestock. The costs of containment, eradication, and recovery could be significant, particularly for Volusia County's $781 million agricultural industry.

The environment could suffer both immediate and long-term damage depending on the type of terrorist event:

- **Dirty Bombs and Explosions**: Contamination of air, soil, and water with hazardous materials could render areas uninhabitable for years, requiring costly cleanup efforts.
- **Arson and Large-Scale Fires**: Toxic smoke and fumes could impact air quality, while firefighting runoff could contaminate waterways.
- **Agroterrorism**: Introduction of pathogens or chemicals into agricultural systems could damage ecosystems and potentially spread beyond the initial target area.

Terrorism can severely impact the economy in several ways:

- **Tourism Declines**: Volusia County relies heavily on tourism revenue, particularly from its internationally recognized events. A major attack would likely deter visitors, leading to substantial financial losses for local businesses.
- **Agricultural Losses**: Agroterrorism could devastate the local economy by damaging crops and livestock, disrupting supply chains, and necessitating extensive containment measures.
- **Cyber Terrorism**: If key industries, such as banking, utilities, or retail, were targeted, there could be cascading economic effects due to loss of revenue and reduced consumer confidence.

Cyber terrorism involves the use of digital means to disrupt critical infrastructure, steal sensitive information, or sow chaos. Potential impacts on Volusia County include:

- **Public Impacts**: Extended power outages could lead to food spoilage, loss of refrigeration-dependent medication, and disruptions to life-saving medical devices like oxygen concentrators.
- **Economic Impacts**: Businesses relying on e-commerce or digital payment systems could face significant losses. Additionally, interruptions to public services, such as water or electricity, could result in substantial recovery costs.
- **Public Confidence**: Cyber terrorism targeting essential systems (e.g., water treatment, healthcare, or emergency communication networks) could erode trust in government, particularly if recovery efforts are perceived as slow or ineffective.

While cyber terrorism typically does not cause direct harm to the environment, indirect consequences—such as industrial accidents triggered by compromised control systems—remain a concern.

Public confidence in government could be significantly impacted by any form of terrorism. Perceptions of inadequate preparation, delayed response, or insufficient recovery efforts can erode trust in public institutions. This risk is particularly pronounced in:

- Large-scale attacks, such as those involving mass casualties or significant property damage.
- Agroterrorism incidents that highlight vulnerabilities in the food supply chain.
- Cyber terrorism events that disrupt daily life and expose weaknesses in critical infrastructure.

A proactive and transparent public affairs strategy is essential to maintaining confidence during and after a terrorist event. Efforts should focus on clear communication, visible leadership, and timely updates on response and recovery efforts.

Responders face heightened risks in terrorist events. Physical attacks may involve secondary explosive devices or hazardous conditions, while agroterrorism and cyber terrorism may expose responders to novel threats, such as contaminated materials or compromised communication systems. Ensuring responder safety requires:

- Access to specialized training and equipment.
- Clear protocols for identifying and mitigating risks in dynamic and dangerous environments.
- Coordination with mutual aid partners and state-level resources.

Continuity of operations for Volusia County is generally robust due to the secure design of the Volusia County Emergency Operations Center. However, certain scenarios could present challenges:

- **Direct Attack on VCEOC**: Although unlikely, a direct attack could necessitate a temporary relocation to the alternate EOC.
- **Cyber Terrorism**: Disruptions to digital systems could temporarily affect access to information or communication channels. However, redundancies and mutual aid agreements are in place to minimize these effects.

Terrorism represents a complex and multifaceted threat to Volusia County, with the potential to impact public safety, property, the environment, and the economy. While the likelihood of an event is difficult to predict, ongoing investments in preparedness, training, and public awareness are essential for mitigating risks and ensuring resilience. Whether facing agroterrorism, cyber terrorism, or a conventional attack, Volusia County is committed to protecting its residents, preserving its resources, and maintaining public trust.

## 6.19 COASTAL OIL SPILL

### Vulnerability

A coastal oil spill could significantly impact public health, particularly for individuals with pre-existing respiratory conditions. Exposure to fumes and airborne contaminants near the coastline may exacerbate these issues, prompting the Volusia County Health Department and Environmental Management to closely monitor air, water, sediment, and waste generated during cleanup operations. Although these efforts would mitigate health risks to the public, some localized impacts are inevitable for those in proximity to the affected areas. The most vulnerable areas are along major waterways that support transport ships, such as Ormond Beach, Holly Hill, Daytona Beach Shoes, Ponce Inlet, and New Smyrna Beach.

### Impacts

While property is not typically at direct risk from an oil spill, contamination of docks, boats, and other coastal facilities is possible if the spill enters waterways such as the Ponce de Leon Inlet. This could require extensive cleaning and decontamination efforts to restore usability and prevent further environmental harm.

The environment, however, faces the greatest risk in the event of a coastal oil spill. Sensitive ecosystems, including turtle nesting sites, estuaries, and nearshore marine habitats, could suffer long-lasting damage. Sand and sediment along the beaches would be heavily contaminated, requiring labor-intensive cleanup and rehabilitation to restore the natural environment. The ecological consequences of an oil spill could linger for years, disrupting the delicate balance of marine and coastal ecosystems.

Although program applications within the county are not likely to be adversely affected by a coastal oil spill, responders tasked with addressing the spill face considerable challenges. The use of personal protective equipment (PPE) is essential to prevent exposure to hazardous materials, and the physically demanding nature of cleanup operations adds an additional layer of complexity. Coordination between local, state, and federal agencies will be critical to ensure the safety and effectiveness of the response effort.

Continuity of operations within Volusia County would remain largely intact, as the spill's direct effects are unlikely to extend beyond the immediate coastal zone. However, economic and social disruptions could strain government resources and necessitate long-term recovery planning. The economic ramifications of a coastal oil spill would be severe. Tourism—a cornerstone of Volusia County's economy—would likely grind to a halt as visitors avoid beaches perceived to be contaminated. The charter fishing industry, another vital economic sector, would be devastated as fish stocks and marine habitats are impacted. Many businesses along the coastline may face permanent closure due to prolonged loss of revenue, and the county's tax base could shrink significantly, compounding the financial strain on recovery efforts.

Public confidence in government would also be tested during a coastal oil spill event. The protracted nature of cleanup and environmental restoration, which could take months or even years, would likely frustrate residents and stakeholders. Effective communication from the Volusia County Public Information Office (PIO) would be essential to maintaining public trust. By providing consistent updates and demonstrating transparent collaboration between government agencies and private industry, officials could reassure the public that every effort is being made to address the spill and restore the county's natural and economic resources.

In conclusion, while a coastal oil spill may have minimal immediate effects on most residents and infrastructure, the long-term environmental, economic, and public confidence impacts could be profound. Preparing for such an event through detailed planning, interagency coordination, and robust public communication strategies will be vital to mitigating its consequences.

## 6.20 CRITICAL INFRASTRUCTURE FAILURE

### Vulnerability

Critical infrastructure failure refers to the disruption of essential services such as drinking water, stormwater and wastewater systems, electric power, transportation, supply chains for food and fuel, and communication networks. These systems are vital to maintaining public health, safety, and economic stability. Failures in these systems are often caused by cascading emergencies like natural disasters, such as hurricanes or floods, or man-made events, including terrorism and cyberattacks. In urbanized areas of Volusia County, where the population is highly dependent on these systems, disruptions have the potential to affect more than half of the population, with the most severe cases resulting in widespread county-wide impacts. Those most vulnerable are Deltona, Port Orange, Daytona Beach, and Ormond Beach. The risks are further exacerbated by climate change, which is increasing the frequency and intensity of extreme weather events.

The overall vulnerability of Volusia County and its jurisdictions to critical infrastructure disruption is medium. Because critical infrastructure failure can be caused by many different forces, it is one of the hazards with the highest vulnerability. Severe weather, tropical cyclones, tornadoes, and geomagnetic storms are just some examples of harmful incidents that may cause a disruption.

The power grid is among the most critical and vulnerable pieces of infrastructure in Volusia County. Utility substations and transmission lines near coastal and urban areas, such as Daytona Beach, Deltona, and Ormond Beach, are particularly at risk. High winds and storm surges associated with hurricanes can lead to widespread power outages, while aging infrastructure is susceptible to overheating during peak demand periods in the hot summer months. Water and wastewater systems are similarly vulnerable, particularly those located in flood-prone areas like the St. Johns River Basin. Flooding from severe storms can disrupt water treatment operations, resulting in water contamination or sewage overflows. Rising sea levels pose a long-term threat to coastal water facilities.

### Impacts

Transportation systems in Volusia County are also at significant risk. Major highways like I-95 and I-4, along with bridges, railroads, and the Daytona Beach International Airport, could be disrupted by extreme weather events such as high winds and flooding. Proximity to water systems, including the Halifax River, Indian River Lagoon, Mosquito Lagoon, and the Intracoastal Waterway, increases the vulnerability of transportation infrastructure to storm surges. Similarly, communication networks, including cellular towers, fiber optic lines, and data centers in urban hubs, are susceptible to physical damage from hurricanes and flooding, as well as cyberattacks.

Environmental impacts from critical infrastructure failures can be severe. Disruptions to wastewater facilities may result in untreated sewage spills, contaminating rivers, lakes, and coastal waterways, which can harm aquatic ecosystems and degrade water quality. Stormwater management systems may also fail during prolonged power outages, leading to localized flooding and habitat destruction. Additionally, increased reliance on backup generators during power outages can contribute to air pollution.

The economic consequences of critical infrastructure failures are significant. Prolonged outages can result in the closure of businesses, disrupt tourism, and interrupt supply chains, with Daytona Beach's event-driven economy particularly susceptible. Repairing damaged infrastructure can cost millions, placing a

strain on local budgets. Furthermore, frequent failures may lead to increased insurance premiums for businesses and residents alike.

Social impacts are equally concerning. Interruptions in water treatment can lead to the spread of waterborne diseases, while power outages during extreme heat can exacerbate heat-related illnesses. Transportation failures may isolate communities, preventing access to essential services such as medical care. Vulnerable populations, including the elderly, disabled, and low-income residents, are disproportionately affected by such disruptions, further exacerbating existing social inequities.

Emergency managers and first responders face significant challenges during critical infrastructure failures. Damage to roadways and communication systems can delay response times and hinder coordination efforts. Prolonged failures often require an extended deployment of resources, potentially overloading emergency services. Responders are also at risk of exposure to hazardous environments, such as contaminated water and extreme heat, while working to restore infrastructure and assist affected residents. Community outreach efforts are essential to educate residents about emergency preparedness and available resources, thereby enhancing overall resilience to infrastructure failures.

## 6.21 HAZMAT / INDUSTRIAL INCIDENT

### Vulnerability

The citizens of Volusia County face daily risks from hazardous materials (HAZMAT) due to the presence of both fixed and mobile sources. These include industrial facilities, railroads, highways, and even potential intentional uses such as terrorism. With two major interstate highways, two significant rivers, and two railroads running through the county, HAZMAT incidents are a constant possibility. While most of these involve minor petroleum spills or sewage discharges, the potential exists for far more severe events. Overall vulnerability of hazardous materials incidents is low in Volusia County and its jurisdictions. Citizens may encounter risks from hazardous materials at schools, in their homes, on roadways, through their food supply, or at public venues such as stadiums and other large gathering spaces. While the spatial extent of these incidents would likely be low, the impact on humans could be substantial. The consequences of a hazardous material incident could range from illness and injury to death, with the most severe incidents—such as radiological releases or large-scale explosions—possibly leading to the displacement of residents for extended periods until cleanup is complete. Having major bodies of water such as Tomoka River, Halifax River, Indian River Lagoon, Mosquito Lagoon, and the St. Johns River also leaves room for vulnerability because some hazardous materials may be spread through the waterways.

Property in Volusia County is highly vulnerable to hazardous materials incidents. Chemical spills, explosions, or acts of bioterrorism could devastate individual homes, businesses, and critical infrastructure. Structural damage from explosions or corrosive chemical exposure can leave properties uninhabitable or in need of significant repair. Hazardous materials may also erode or corrode infrastructure such as roads, bridges, and pipelines, further compounding recovery challenges. Even in less catastrophic cases, incidents such as traffic accidents involving hazardous materials can result in destruction of vehicles, roadways, and signage.

### Impacts

The environment is particularly susceptible to the harmful effects of hazardous materials, whether the release is accidental, intentional, or natural. These materials can rapidly spread through air, water, and the food supply, contaminating ecosystems and threatening both human and wildlife populations. Sensitive habitats, such as wetlands and coastal areas, could be irreparably damaged. Cleanup efforts can take days, weeks, months, or even years, and in some cases, environmental recovery may never fully restore the original ecosystem balance.

While the Volusia County Emergency Operations Center itself is not located near major hazardous materials facilities, its operations could be impacted in extreme cases. For instance, in the event of significant structural damage or service disruptions, staff may need to relocate to its alternate site as outlined in the Volusia County Emergency Management Department COOP. Despite these risks, the county's environmental management teams, in coordination with Fire Services HAZMAT units, are prepared to respond to large-scale incidents.

Volusia County has a HazMat team available to respond. Responders are at the forefront of mitigating the impacts of HAZMAT incidents. Specialized teams, including HAZMAT, Radiological Material (RMAT), and Explosive Ordnance Disposal (EOD) units, are trained and equipped to manage these complex situations. Protective gear and specialized equipment are vital to ensure their safety as they identify hazardous materials, mitigate risks, and oversee cleanup efforts. Despite their training, responders remain at risk due

to the unpredictable nature of these incidents and the potential for secondary hazards such as fires or explosions.

The economic consequences of a HAZMAT incident in Volusia County could vary widely depending on the scale of the event. While smaller incidents may disrupt transportation or local industries temporarily, larger events—such as a chemical facility disaster or a radiological release—could result in long-term economic strain. The BP oil spill in 2011, which cost approximately $40 billion to address, serves as an extreme example of the potential financial toll of such events. Even less catastrophic incidents can lead to costly disruptions if key transportation routes or industries are forced to shut down.

Public confidence in the local government may also be tested by a HAZMAT incident. Smaller, localized events are unlikely to affect the public's trust, as these are relatively common and manageable occurrences. However, a large-scale chemical or radiological release, or an incident involving terrorism, could erode public confidence in the government's ability to protect its citizens. In such cases, the Volusia County leadership must prepare to launch a robust public information campaign through its website and social media channels, ensuring transparent communication and providing timely updates on the response and recovery efforts.

In conclusion, while Volusia County is prepared to handle the frequent minor HAZMAT incidents that occur, the potential for a large-scale event remains a significant concern. Proactive planning, coordinated response efforts, and clear communication are essential to mitigating the risks and consequences of hazardous materials incidents on the public, property, environment, and economy.

## 6.18 CONCLUSIONS ON HAZARD VULNERABILITY

Volusia County is vulnerable to a wide array of hazards spanning natural, manmade, and technological categories, each presenting unique risks and requiring tailored mitigation and preparedness strategies. Assessing vulnerabilities across these diverse hazards is essential to building a safer, more resilient community.

- **Improved Understanding for All Hazards:**
  Analyzing vulnerabilities provides a clearer picture of who and what is at risk for each hazard type. For example:
  - **Natural Hazards:** Understanding flood-prone areas and vulnerable coastal regions allows for targeted mitigation like enhanced stormwater management, improved floodplain regulations, and strengthened coastal infrastructure. Similarly, identifying populations at risk from extreme temperatures or public health emergencies helps tailor outreach and response efforts.
  - **Manmade Hazards:** Civil disturbances, mass migration, and terrorism require assessments of social dynamics, key facilities, and potential response bottlenecks. For example, mapping critical facilities and public spaces allows emergency managers to better plan for security, evacuation, and resource allocation.
  - **Technological Hazards:** Evaluating risks from coastal oil spills, hazardous materials incidents, and industrial accidents ensures that high-risk areas, particularly those near industrial zones or transportation corridors, are prioritized for safety inspections and emergency planning.

By improving understanding across these hazard categories, Volusia County can enhance risk awareness among stakeholders and better align resources to the most pressing needs.

- **Baseline for Policy Development and Strategic Planning:**
  A comprehensive vulnerability assessment serves as the foundation for creating effective policies and mitigation plans. For instance:
  - For **rising coastal waters and coastal erosion**, the assessment may inform zoning policies that restrict development in highly vulnerable areas or incentivize green infrastructure solutions to stabilize shorelines.
  - For **drought and agriculture**, policies that promote sustainable water use and crop diversification can be informed by understanding long-term climate trends and agricultural vulnerabilities.
  - For **technological hazards**, findings can influence regulations to enhance safety standards for industrial facilities or mandate periodic safety drills for oil transport and hazardous materials handling.

These informed policies can reduce risks, improve land-use decisions, and foster greater resilience in the face of evolving threats.

- **Risk Comparison for Balanced Mitigation Efforts:**
  Assessing vulnerabilities across all hazard types enables the county to compare risks and prioritize mitigation measures. For example:

- Coastal and flood-prone areas might see investments in seawalls or elevating infrastructure, while inland areas might benefit from improved wildfire prevention strategies and drought-resistant infrastructure.
- **Public health emergencies**, such as pandemics, might require investments in healthcare infrastructure, while terrorism or civil disturbance risks may necessitate enhanced security measures and community engagement initiatives.

This comparative approach ensures that resources are allocated equitably and effectively, allowing the county to address both high-impact, high-frequency hazards like severe weather and tropical cyclones, as well as lower-probability but potentially devastating events like terrorism or industrial incidents.

- **Enhancing Emergency Management Capabilities:**
  Vulnerability assessments also identify gaps in current capabilities, enabling targeted improvements. For example:
  - Understanding response times and challenges in rural areas supports enhancements in wildland fire management and tornado response strategies.
  - Identifying critical infrastructure at risk of failure ensures redundancy and continuity planning for essential services.
  - Highlighting social vulnerabilities, such as lower-income or elderly populations, support targeted outreach, evacuation planning, and sheltering options.

By strengthening emergency management capabilities, Volusia County can reduce disaster impacts, speed recovery, and build public confidence in its resilience strategies.

In summary, assessing vulnerabilities across Volusia County's full hazard profile is a cornerstone of effective disaster mitigation. It provides clarity on risks, informs strategic policy development, and supports equitable resource allocation. These efforts are critical to ensure the county's ability to withstand, adapt to, and recover from a wide range of threats, safeguarding the well-being of its residents and the environment.

# SECTION 7 – CAPABILITY ASSESSMENT

This section of the Plan discusses the capability of Volusia County and the participating municipal jurisdictions to implement hazard mitigation activities. It consists of the following four subsections:

- **What is a Capability Assessment?**
- **Conducting the Capability Assessment**
- **Capability Assessment Findings**
- **Public Capability Assessment**
- **Existing County-Wide Efforts**
- **Conclusions of the Capability Assessment**

## 7.1 WHAT IS A CAPABILITY ASSESSMENT?

The purpose of conducting a capability assessment is to determine the ability of a local jurisdiction to implement a comprehensive mitigation strategy, and to identify potential opportunities for establishing or enhancing specific mitigation policies, programs or projects.[1] As in any planning process, it is important to try to establish which goals, objectives and/or actions are feasible, based on an understanding of the organizational capacity of those agencies or departments tasked with their implementation. A capability assessment helps to determine which mitigation actions are practical and likely to be implemented over time, given the local government's planning and regulatory framework. This capability assessment also highlights the positive mitigation measures already in place, or being implemented at the local government level, which should continue to be supported and enhanced through future mitigation efforts.

The capability assessment completed for Volusia County and its jurisdictions serves as a critical planning step and an integral part of the foundation for designing an effective multi-jurisdictional hazard mitigation strategy. The *Capability Assessment* helps identify and target meaningful mitigation actions for incorporation in the *Mitigation Strategy* portion of the Hazard Mitigation Plan. It helps establish the goals and objectives for the Volusia County Region to pursue under this Plan and ensures that those goals and objectives are realistically achievable under given local conditions.

## 7.2 CONDUCTING THE CAPABILITY ASSESSMENT

In order to facilitate the inventory and analysis of local government capabilities throughout Volusia County, a detailed *Capability Assessment Survey*[2] was distributed to Volusia County staff and to staff from participating local municipal jurisdictions. The survey questionnaire, which was completed by applicable local government officials, requested information on a variety of "capability indicators" such as existing

[1] While the Interim Final Rule for implementing the Disaster Mitigation Act of 2000 does not require a local capability assessment to be completed for local hazard mitigation plans, it is a critical step to develop a mitigation strategy that meets the needs of each jurisdiction while taking into account their own unique abilities. The Rule does state that a community's mitigation strategy should be "based on existing authorities, policies, programs and resources, and its ability to expand on and improve these existing tools" (44 CFR, Part 201.6(c)(3)).

[2] The *Capability Assessment Survey* instrument used to assess county and municipal capabilities is available through Volusia County upon request.

local plans, policies, programs or ordinances that contribute to and/or hinder the community's ability to implement hazard mitigation actions.

At a minimum these survey results provide an inventory of existing local plans, ordinances, programs and resources in place or under development in addition to their overall effect on hazard loss reduction. The survey instrument thereby not only helps accurately assess each jurisdiction's degree of local capability, but also serves as a good source of introspection for those jurisdictions wishing to improve their capability. The identification of opportunities and specific actions to be proposed as part of the community's mitigation strategy often develops as an outcome of completing a capability assessment.

## 7.3 CAPABILITY ASSESSMENT FINDINGS

The findings of the capability assessment are summarized in this Plan to provide insight into the capacity of Volusia County and the participating jurisdictions to implement hazard mitigation activities. All information is based upon the responses provided by local government officials to the *Capability Assessment Survey*.

### 7.3.1 Planning and Regulatory Capability

Planning and regulatory capability is based on the implementation of plans, ordinances and programs that demonstrate a local jurisdiction's commitment to guiding and managing growth, development and redevelopment in a responsible manner while maintaining the general welfare of the community. It includes emergency response and mitigation planning, comprehensive land use planning and transportation planning in addition to the enforcement of zoning or subdivision ordinances and building codes that regulate how land is developed, and structures are built, as well as protecting environmental, historic and cultural resources in the community. Although some conflicts can arise, these planning initiatives generally present significant opportunities to integrate hazard mitigation principles and practices into the local decision-making process.

This assessment is designed to provide a general overview of the key planning and regulatory tools or programs in place or under development for Volusia County and the participating jurisdictions, along with their potential effect on loss reduction. This information will help identify opportunities to address existing gaps, weaknesses or conflicts with other initiatives in addition to integrating the implementation of this Plan with existing planning mechanisms, where appropriate.

**Section 7: Table 1** provides a summary of the relevant local plans, ordinances and programs already in place or under development for Volusia County and the participating jurisdictions. An (x) mark indicates that the given item is currently in place and being implemented by the local jurisdiction, or that it is currently being developed for future implementation. A more detailed discussion on each jurisdiction's planning and regulatory capability follows, along with the incorporation of additional information based on the narrative comments provided by local officials in response to the survey questionnaire.

Following the inventory of local plans, programs and policies is a description of each element upon which the local jurisdiction's capability score was based.

## SECTION 7: CAPABILITY ASSESSMENT

| South Daytona | X | X | X | X | X | X | X | X | X | X | X | | | X | X | X | | | X | X | X | X | X |
| Volusia County | X | X | X | | | X | X | X | X | X | X | X | X | X | X | X | | | | X | X | X | X |

# SECTION 7: CAPABILITY ASSESSMENT

The project team at the East Central Florida Regional Planning Council developed the Local Mitigation Strategy with numerous resources, including existing plans, technical information and mapping software.

ESRI ArcGIS software and HAZUS was used to develop vulnerability profiles for the hazards covered throughout this report. Data collection by the project team included municipal critical facilities, stormwater facilities and lift/pump stations, as well as parcel data collected from the Volusia County Property Appraiser. Numerous GIS files were also downloaded from Volusia County I.T. for consideration, research, and use.

Technical plans were also reviewed for consistency with the Local Mitigation Strategy. This primarily included the county's Integrated Floodplain Management Plan, which was reviewed and updated alongside the 2025 LMS. The data collection, data analysis and risk profile methodologies used for the Local Mitigation Strategy and the Floodplain Management Plan are identical. The additional plans listed on the previous page **Section 7: Table 1: Relevant Plans, Ordinances and Programs**, including the Volusia County Continuation of Operations Plan and others, were also reviewed as made available.

Technical information was collected primarily from the Volusia County Emergency Management Department and the National Climatic Data Center, which compiles countywide reports on past hazard events, estimated losses, and other critical information for tracking the County's vulnerabilities.

## 7.3.2 Emergency Management

Hazard mitigation is widely recognized as one of the four primary phases of emergency management. Other phases include preparedness, response and recovery. Each phase is interconnected with hazard mitigation as **Section 7: Figure 1** suggests. Planning for each phase is a critical part of a comprehensive emergency management program and a key to the successful implementation of hazard mitigation actions. As a result, the *Capability Assessment Survey* asked several questions regarding emergency management plans in order to assess the jurisdiction's willingness to plan and their level of technical planning proficiency.

**Section 7: Figure 1: The Phases of Emergency Management**

***Local Mitigation Strategy (LMS)***: Also called a hazard mitigation plan, the local mitigation strategy represents a community's blueprint for how it intends to reduce the impact of natural and human-caused hazards on people and the built environment. The essential elements of a local mitigation strategy include a risk assessment, capability assessment, mitigation strategy and the mitigation projects list.

- Volusia County and its jurisdictions developed the first version of their local mitigation strategy in 1999 (adopted 2000) and updated the plan in 2009, 2014, and 2019. The plan is currently undergoing a revision that will be completed in January 2025.

***Disaster Recovery Plan***: A disaster recovery plan serves to guide the physical, social, environmental and economic recovery and reconstruction process following a disaster. In many instances, hazard mitigation principles and practices are incorporated into local disaster recovery plans with the intent of capitalizing on opportunities to break the cycle of repetitive disaster losses.

- A potential mitigation action that should be considered is for all participating jurisdictions to develop their own disaster recovery plan that would incorporate mitigation opportunities into the disaster recovery process.

***Emergency Operations Plan***: An emergency operations plan outlines responsibility and the means by which resources are deployed to respond to an emergency or disaster. Many communities choose to update their emergency operations plan before events occur to better prepare for future disasters. This is an example of hazard mitigation.

- Volusia County Emergency Management maintains the emergency operations plan that also covers their respective jurisdictions. In general, emergency operations planning has been determined to have a moderate effect on loss reduction, as its emphasis focuses on preparedness and response operations rather than hazard mitigation activities.

***Continuity of Operation Plan***: A continuity of operations plan establishes a chain of command line of succession, and plans for backup or alternate emergency response resources in case of an extreme emergency. Developing a continuity of operation plan is an example of hazard mitigation.

- Each of the other jurisdictions is encouraged to consider preparing their own continuity of operations plans as a possible mitigation action for inclusion this Plan.

### 7.3.3 General Planning

The implementation of hazard mitigation activities should involve agencies and individuals beyond the emergency management profession. Other stakeholders may include local planners, public works officials, economic development specialists and others. Because in many instances, concurrent local planning efforts help achieve or complement hazard mitigation goals, even though they are not specifically designed as such, the *Capability Assessment Survey* asked questions regarding each jurisdiction's general planning capabilities and the degree to which hazard mitigation is integrated into other ongoing planning efforts.

***Comprehensive Land Use Plan***: A comprehensive land use plan establishes the overall vision for a community and serves as a guide for future governmental decision making. Typically, a comprehensive plan is comprised of a summary of current and expected demographic conditions, land use, transportation elements and community facilities. Given the broad nature of the plan and its regulatory standing in many communities, the integration of hazard mitigation measures into the comprehensive plan can greatly enhance the likelihood of achieving risk reduction goals, objectives and actions.

- All jurisdictions within the region have a comprehensive land use plan as required by state law.

***Capital Improvements Plan***: A capital improvements plan guides the scheduling of spending for public improvement projects. A capital improvements plan can serve as an important mechanism to guide future development away from identified hazard areas. Limiting public spending in hazardous areas is one of the most effective long-term mitigation actions available to local governments.

- Volusia County has a Capital Improvements Element (CIE) that is part of the Comprehensive Plan. The Capital Improvement Plan should be considered a local funding source for mitigation projects recommended as part of the Local Mitigation Strategy and the implementation of those actions will help to reduce disaster damages.

***Historic Preservation Plan***: A historic preservation plan is intended to preserve historic structures or districts within a community. An often overlooked aspect of the historic preservation plan is the assessment of buildings and sites located in areas subject to natural hazards to include the identification of the most effective way to reduce future damages.[3] This may involve retrofitting or relocation techniques that account for the need to protect buildings that do not meet current building standards or are within a historic district that cannot easily be relocated out of harms way.

***Zoning Ordinances***: Zoning dictates the means by which land use is controlled by a local government. As part of a community's police power, zoning is used to protect the public health, safety and welfare of those within a given jurisdiction. A zoning ordinance is the mechanism through which zoning is implemented. Since zoning regulations enable municipal governments to limit the type and density of development, it can serve as a powerful tool, especially when applied in identified hazard areas.

***Subdivision Ordinances***: A subdivision ordinance is generally intended to regulate the development of housing, commercial and industrial uses, including associated public infrastructure, as land is subdivided into buildable lots for sale or future development. Subdivision design that accounts for natural hazards can dramatically reduce the exposure of future development.[4]

***Building Codes, Permitting and Inspections***: Building Codes regulate construction standards. In many communities' permits must be issued and inspections of work must take place for new construction. Decisions regarding the adoption of building codes (that account for hazard risk), the type of permitting process required both before and after a disaster, and the enforcement of inspection protocols all affect the level of hazard risk faced by a community. All Volusia County jurisdictions have adopted and enforce the Florida Building Code.

The adoption and enforcement of building codes by local jurisdictions is routinely assessed through the Building Code Effectiveness Grading Schedule (BCEGS) program developed by the Insurance Services Office, Inc. (ISO).[5] Under the BCEGS program, ISO assesses the building codes and enforcement of these codes in a particular community, with special emphasis on mitigation of losses from natural hazards. The results of BCEGS assessments are routinely provided to ISO's member private insurance companies, which in turn may offer ratings credits for new buildings constructed in communities with strong BCEGS classifications. The concept behind this is that communities with well-enforced, up-to-date codes should have fewer losses, and insurance rates can reflect that in these communities.

In conducting the assessment ISO collects information related to personnel qualifications and continuing education, as well as the number of inspections performed per day. This type of information, combined with local building codes, is used to determine a grade for that jurisdiction. The grades range from 1 to 10, with the lower grade being more ideal. A BCEGS grade of 1 represents exemplary commitment to building code enforcement, and a grade of 10 indicates less than minimum recognized protection. **Section**

[3] See Protecting the Past from Natural Disasters. 1989. Nelson, Carl. National Trust for Historic Preservation: Washington D.C.
[4] For additional information regarding the use of subdivision regulations in reducing flood hazard risk, see Subdivision Design in Flood Hazard Areas. 1997. Morris, Marya. Planning Advisory Service Report Number 473. American Planning Association: Washington D.C.
[5] Participation in BCEGS is voluntary and may be declined by local governments if they do not wish to have their local building codes evaluated.

**7: Table 3** lists the BCEGS ratings for the jurisdictions within Volusia County that identified their rating to the planning team.

**Section 7: Table 2: BCEGS Ratings in the Region**

| JURISDICTION | BCEGS RESIDENTIAL RATING | BCEGS COMMERCIAL RATING | YEAR LAST RATED |
|---|---|---|---|
| Daytona Beach | NA | 3 | NA |
| Daytona Beach Shores | 3 | 3 | NA |
| Lake Helen | 4 | 4 | 2000 |
| New Smyrna Beach | 4 | 3 | 2023 |
| Ormond Beach | 3 | 3 | 2004 |
| Ponce Inlet | 4 | 3 | NA |
| Port Orange | 4 | 3 | 2020 |
| South Daytona | 3 | 2 | 2021 |

## 7.3.4 Floodplain Management and National Flood Insurance Program (NFIP)

Flooding represents the greatest natural hazard facing the nation. At the same time the tools available to reduce the impacts associated with flooding are among the most developed when compared to other hazard-specific mitigation techniques. In addition to approaches that cut across hazards such as education, outreach, and the training of local officials, the *National Flood Insurance Program* (NFIP) contains specific regulatory measures that enable government officials to determine where and how growth occurs relative to flood hazards. Participation in the NFIP is voluntary for local governments; however, program participation is strongly encouraged by FEMA as a first step for implementing and sustaining an effective hazard mitigation program. It is therefore used as part of this assessment as a key indicator for measuring local capability.

In order for a county or municipality to participate in the NFIP they must adopt a local flood damage prevention ordinance which requires jurisdictions to follow established minimum building standards in the floodplain. These standards require that all new buildings and substantial improvements to existing buildings will be protected from damage by a 100-year flood event, and that new development in the floodplain will not exacerbate existing flood problems or increase damage to other properties.

A key service provided by the NFIP is the mapping of identified flood hazard areas. Once completed, the Flood Insurance Rate Maps (FIRMs) are used to assess flood risk, regulate construction practices and set flood insurance rates.[6] FIRMs are an important source of information to educate residents, government officials and the private sector about the likelihood of flooding in their community. The most recent adopted map is shown in **Section 7: Figure 2**.

[6] https://www.volusia.org/services/public-protection/emergency-management/types-of-disasters/floods/flood-maps.stml

The adoption of the NFIP and local flood damage prevention ordinance for each jurisdiction can be found in each land development municipal Code of Ordinances and/or Land Development Code. The following list identifies each participating jurisdiction adoption of NFIP standards:

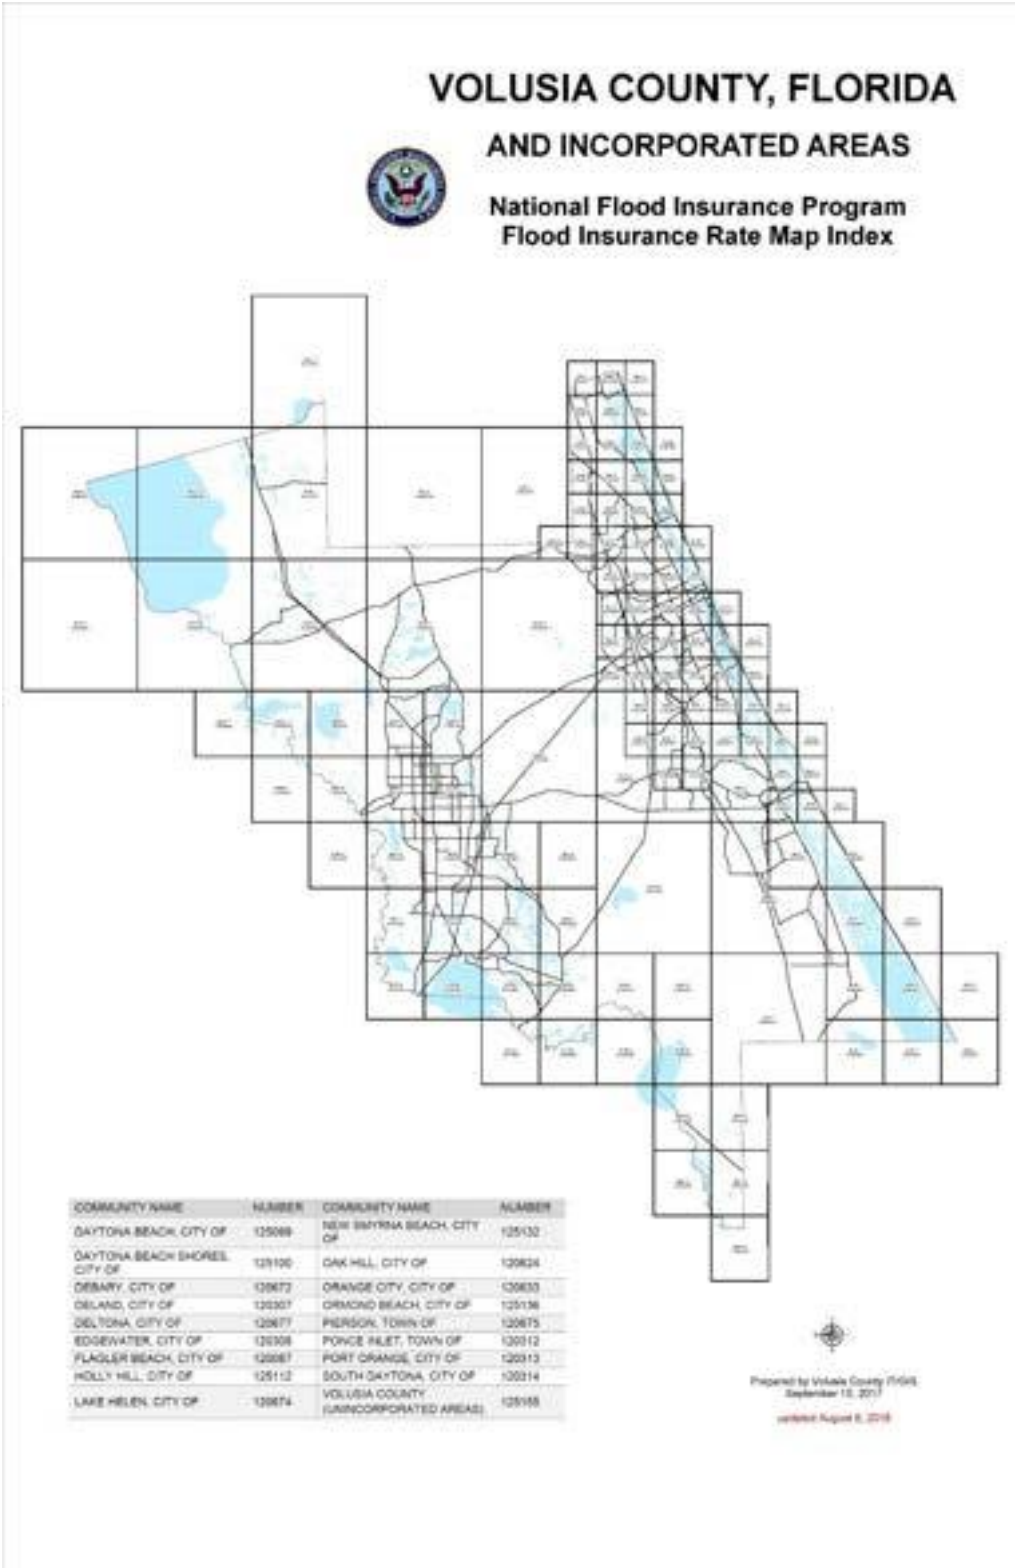
- Daytona Beach
  - Daytona Beach, FL, Code of Ordinances § 7-4 (2014).
- Daytona Beach Shores
  - Daytona Beach Shores, FL, Code of Ordinances Appendix G, Chapter 10, Article I, Section 10-1 (2013).
- DeBary
  - DeBary, FL, Code of Ordinances Chapter 14, Article II, Division 1, Section 14-33 (2014).
- DeLand
  - DeLand, FL, Code of Ordinances Chapter 11, Article VI, Section 33-61 (2013).
- Deltona
  - Deltona, FL, Code of Ordinances Chapter 90, Article I (2014).
- Edgewater
  - Edgewater, FL, Code of Ordinances Chapter 7, Article I, Section 7 (2014).
- Holly Hill
  - Holly Hill, FL, Code of Ordinances Chapter 94, Article II (2013).
- Lake Helen
  - Lake Helen, FL Code of Ordinances Part I, Article 10 (2021).
- New Smyrna Beach
  - New Smyrna Beach, FL, Part II Code of Ordinances Chapter 26, Article VIII (2014).
- Oak Hill
  - Oak Hill, FL, Code of Ordinances Chapter 24, Article VII (2013).
- Orange City
  - Orange City, FL, Code of Ordinances Chapter 5, Article I, Section 5.2 (2009).
- Ormond Beach
  - Ormond Beach, FL, Land Development Code Chapter 3, Article II, Section 3-20 (2013).
- Pierson
  - Pierson, FL, Code of Ordinances Chapter 9, Article IV, Division 2, Section 9-162 (2014).
- Ponce Inlet
  - Ponce Inlet, FL, Code of Ordinances Part IV, Chapter VI (2017).
- Port Orange
  - Port Orange, FL. Land Development Code Chapter 8, Article I, Section 1 (2014).
- South Daytona
  - South Daytona, FL, Land Development Code Section VII, Section 7.2 (2017).
- Volusia County
  - Volusia County, FL Code of Ordinances Chapter 72, Article III, Division 7 (2013).

Volusia County Government has several mutual aid agreements with public works departments throughout the county, as well as a Memorandum of Understanding (MOU) between Volusia County and all jurisdictions within the county (adopted in 2014). Local municipalities and the county can also apply for assistance on the federal level. The county refers to the Emergency

Management Assistance Compact. The county and many municipalities participate in the CRS (Community Rating System) to lower mitigation costs for residents.

Volusia Prepares is a multi-jurisdictional, public-private partnership that maintains a comprehensive, county-wide local mitigation strategy and acts as the Hazard Mitigation Representative. Other county and municipal agencies perform routine mitigation-related functions, including but not limited to the following:

- Considering hazard mitigation issues in the county's comprehensive plan and land development code.
- Enforcement of the county's flood plain ordinance.
- Issuance of building permits and enforcing building codes.
- Conducting fire inspections.
- Conducting public information and education programs related to hazard mitigation.



In the post-disaster time frame, the Planning Committee may be requested by the Chair of the Steering Committee to form one or more teams to identify the mitigation opportunities and needs highlighted by the experience with the event. The Chair will request the assistance of the County Emergency Management Division in identifying such individuals and notifying them of the upcoming assessment process. This post-event assessment process will also be utilized, when applicable, to evaluate the effectiveness in mitigation initiatives in place. At a minimum, representatives from the impacted local jurisdictions will be represented on such teams, as will personnel from the County Emergency Management Division serving as Volusia Prepares support staff.

The Emergency Management Division coordinates with the CRS Coordinator, the Growth and Resource Management Department and the Property Appraisers Office to identify substantially damaged structures in SFHAs throughout the entire county and its jurisdictions. Once an incident occurs the Property Appraisers Office will send out teams to conduct the initial assessment of damaged areas and structures. The Property Appraisers Office will work with the municipalities and generate a list of the damaged structures, destroyed, major, minor, and affected, and provide to the Emergency Management Division to disseminate to the state and Emergency Management Partners. The Growth and Resource Management Department will then send out teams to take pictures, leave door hangers, identify if structures are substantially damaged, and mail out letters to the owners of the substantially damaged structures in the SFHAs, to come in for permits. A database will be created after each incident of the substantially damaged structures. The substantially damaged structures in a SFHA database will be shared with the Emergency Management Division. Within 45 days of the incident, the CRS Coordinator will facilitate a meeting with all participating community CRS coordinators and/or floodplain managers from the municipalities to discuss the substantially damaged structures in SFHAs within their jurisdictions. To maintain awareness for mitigation projects, the Emergency Management Division compares mitigation projects to the substantially damaged in a SFHA database.

**Support Agencies responsible for implementation and enforcement of local floodplain management regulations to regulate and permit development in SFHAs:**

- Sheriff's Office
- Property Appraiser
- Growth & Resource Management
- Public Works
- Accounting Services
- Budget and Administration Services
- Purchasing Department
- Community Services
- Emergency Services Department
- Municipalities

**Section 7: Figure 2: FEMA DFIRM Panel Map. Last updated August 8, 2018**[7]

[7] https://volusiacountyfl.maps.arcgis.com/apps/instant/basic/index.html?appid=a12bb2c92372450ca1712a0651815b5f

An additional indicator of floodplain management capability is the active participation of local jurisdictions in the *Community Rating System* (CRS). The CRS is an incentive-based program that encourages counties and municipalities to undertake defined flood mitigation activities that go beyond the minimum requirements of the NFIP, adding extra local measures to provide protection from flooding. All of the 18 creditable CRS mitigation activities are assigned a range of point values. As points are accumulated and reach identified thresholds, communities can apply for an improved CRS class. Class ratings, which run from 10 to 1, are tied to flood insurance premium reductions. As class ratings improve (the lower the number the better), the percent reduction in flood insurance premiums for NFIP policyholders in that community increases.

Community participation in the CRS is voluntary. Any community that is in full compliance with the rules and regulations of the NFIP may apply to FEMA for a CRS classification better than class 10. The CRS application process has been greatly simplified over the past several years, based on community comments intended to make the CRS more user friendly, and extensive technical assistance available for communities who request it.

Volusia County and its 16 jurisdictions are all participants in the National Flood Insurance Program (NFIP) and many jurisdictions participate in the Community Rating System (CRS). Compliance with the NFIP is maintained through:

- Jurisdiction participation in the Volusia Prepares Working Group (quarterly)
- Quarterly submittal of Mitigation Initiatives by jurisdiction
- Complying with NFIP through County/Municipal Floodplain Ordinances (exceed CFR-44)
- Compliance with Florida Building Code

**Section 7: Table 3: CRS Premium Discounts, By Class**

| CRS CLASS | PREMIUM REDUCTION |
|---|---|
| 1 | 45% |
| 2 | 40% |
| 3 | 35% |
| 4 | 30% |
| 5 | 25% |
| 6 | 20% |
| 7 | 15% |
| 8 | 10% |
| 9 | 5% |
| 10 | None |

**Section 7: Table 4: CRS Participation in Volusia County (as of 11/15/2024)**

| JURISDICTION | CRS CLASSIFICATION | DISCOUNT FOR SFHA |
|---|---|---|
| Daytona Beach | 5 | 25% |
| Daytona Beach Shores | 5 | 25% |
| DeBary | NA | NA |
| DeLand | NA | NA |
| Deltona | 9 | 5% |
| Edgewater | 7 | 15% |
| Holly Hill | 8 | 10% |
| Lake Helen | NA | NA |
| New Smyrna Beach | 5 | 15% |
| Oak Hill | NA | NA |
| Orange City | NA | NA |
| Ormond Beach | 5 | 25% |
| Pierson | NA | NA |
| Ponce Inlet | 5 | 25% |
| Port Orange | 5 | 25% |
| South Daytona | 7 | 15% |
| Volusia County | 5 | 25% |

***Floodplain Management Plan***: A floodplain management plan (or a flood mitigation plan) provides a framework for action regarding the corrective and preventative measures put in place to reduce flood-related impacts. Floodplain management plans are similar to hazard mitigation plans except for the fact that they focus solely on flood hazards and identify specific actions to address flooding problems within a jurisdiction.

- All jurisdictions have a floodplain management plan, located within the County Floodplain Management Plan.

***Stormwater Management Plan***: A stormwater management plan is designed to address flooding associated with stormwater runoff. The stormwater management plan is typically focused on design and construction measures intended to reduce the impact of minor urban flooding. Stormwater management plans are an excellent way for local governments to regulate stormwater flow within the jurisdiction and to prevent future stormwater problems.

## 7.3.5 Gaps and Capability Improvements

Small jurisdictions within Volusia County do not have the necessary resources to expand operations beyond what is needed for day-to-day operations. These municipalities rely on support from the County to develop plans and execute necessary safety measures, particularly in times of disaster. Municipalities such as DeBary, Oak Hill, and Pierson fall into this category. These communities often resort to the County's policies to guide their own.

Municipalities such as Daytona Beach, Deltona, New Smyrna Beach, and Ormond Beach have numerous policies in place to support hazard mitigation efforts as described throughout this report. Cities such as DeLand, Edgewater, and Port Orange have more than half of policies listed that support mitigation, but still face serious, ongoing damage from hazards, particularly flooding. Policy gaps and continued development increase the vulnerability to hazards within these jurisdictions.

It is recommended within the next five years that each jurisdiction reviews the existing policies for relevance, adopts additional policies mentioned in this document, and reassess developed or developing areas that are considered high risk as identified in Vulnerability Assessments. If a jurisdiction has not completed a Vulnerability Assessment, this can be accomplished through the Resilient Florida Grant Program.[8] Additionally, within the next five years, all municipalities are encouraged to participate in all LMS quarterly meetings and engage in county-wide resilience working groups to improve their capabilities to respond, mitigate, and recover from disasters.

[8] https://floridadep.gov/rcp/resilient-florida-program/content/resilient-florida-grants

## 7.4 PUBLIC CAPABILITY ASSESSMENT

As described in Section 2 of the plan, the public engagement sessions and surveys provided insight into residents' capabilities to respond and recover from disasters. The feedback received provides an opportunity for stakeholders to be involved in the planning process.

Residents from the community were invited to the LMS Working Group quarterly meetings, and two public engagement sessions. All residents were encouraged to speak on hazard concerns witnessed in the past five years to provide insight into Volusia County Emergency Management on individual and community level capabilities. The main concern of the public was about hurricane and flooding damage. Key takeaways from the public engagement sessions were:

- Flood mitigation efforts are ad hoc and there is no sole department or person overseeing mitigation efforts.
- There is no true definition of success or metrics on how to measure mitigation efforts to ensure they are working as intended.
- Maintenance and pre-storm preparations do not meet the public's needs for safety and security.
- Local building codes, zoning, and construction practices should be reevaluated to safeguard public confidence.

Additionally, the homeowner surveys collected information on the public's capabilities to respond and recover from disasters. There were 136 responses to this survey. Key takeaways were:

- 82% responded yes to noticing an increase in flood events.
- 49% responded yes to having flood insurance on their property.
- 56% responded no to implementing individual mitigation measures on their property.
- Of the 29% of those who have implemented individual mitigation measures on their property, 29% were landscaping/drainage improvements and 10% installed flood barriers.
- 51% have not implemented individual mitigation measures on their property due to financial setbacks and 20% claimed perceived difficulty.

## 7.5 EXISTING COUNTY-WIDE EFFORTS

Volusia County has invested resources into various plans and studies prior to this plan's update that contribute towards hazard mitigation and resilience. These plans and studies were reviewed during the update of this plan and discussed during LMS Working Group quarterly meetings by the various stakeholders and departments that completed them. Examples include:

- 2012 Volusia County Sustainability Action Plan
- 2017 Resilient Volusia County Phase 1
- 2018 East Central Florida Regional Resilience Collaborative
- 2019 East Central Florida Regional Resiliency Action Plan (RRAP)
- 2020 Planning for the Financial, Socio-Economic and Infrastructure-Related Effects of Sea Level Rise on Future Hurricane Storm Surge Intensity Report
- 2021 Resilient Volusia County Phase 2- Adaptation Action Areas Report
- 2023 Enhanced State Hazard Mitigation Plan
- 2024 East Central Florida Regional Risk Assessment
- Florida Statewide Regional Evacuation Study Program Regional Hazard Analysis
- Numerous vulnerability assessments throughout cities and county
- Numerous basin studies throughout cities and county

## 7.6 CONCLUSIONS OF THE CAPABILITY ASSESSMENT

The capability of Volusia County and the participating jurisdictions varies greatly from jurisdiction to jurisdiction. **Table 7.6** lists the total number of jurisdictions that have plans, ordinances and programs in place or under development.

**Section 7: Table 5: Relevant Plans, Ordinances and Programs**

| Plan, Ordinance or Program | Total Number of Jurisdictions |
|---|---|
| Local Mitigation Strategy | 17 |
| Comprehensive Land Use Plan | 17 |
| Floodplain Management Plan | 17 |
| Open Space Management Plan | 8 |
| Stormwater Management Plan | 15 |
| Natural Resource Protection Plan | 10 |
| Flood Response Plan | 11 |
| Emergency Operations Plan | 17 |
| Continuity of Operations Plan | 11 |
| Evacuation Plan | 14 |
| Disaster Recovery Plan | 11 |
| Capital Improvements Plan | 17 |
| Economic Development Plan | 11 |
| Historic Preservation Plan | 8 |
| Floodplain Ordinance (or Flood Damage Prevention Ordinance) | 17 |
| Zoning Ordinance | 17 |
| Subdivision Ordinance | 13 |
| Unified Development Ordinance | 9 |
| Post-disaster Redevelopment / Reconstruction Ordinance | 4 |
| Building Code | 17 |
| Fire Code | 17 |
| National Flood Insurance Program | 17 |
| NFIP Community Rating System | 11 |

Capability *Assessment* and *Risk Assessment* serve as the foundation for a meaningful hazard mitigation strategy. During the process of identifying the goals and mitigation actions each jurisdiction must consider not only their level of hazard risk but also their existing capability to minimize or eliminate that risk.

In jurisdictions where the overall risk of hazard is high, specific mitigation actions that account for these conditions should be considered. This may include less costly actions such as minor ordinance revisions or public awareness activities. If necessary, specific capabilities may need to be improved to better address recurring threats. Similarly, in cases where the hazard vulnerability is low, more emphasis can be placed on actions that may impact future vulnerability, such as guiding development away from known hazard areas using various regulatory measures.

**Use of Social Media and Other Media for Warning and Loss Prevention**

Volusia County Emergency Management uses its X, formally known as Twitter, and Facebook account to provide warning to residents about incoming storms and other natural hazards. In unison with social media, the County Public Information Officer and Emergency Manager stay in communication with local television stations as well as national television stations such as The Weather Channel before, during and after storm and natural hazard events). Coordination with media sources often includes tips for residents for property mitigation (such as sandbagging) and tips for residents to stay safe after a storm (including staying away from downed power lines and standing water).

As of 2024, Volusia County Emergency Management launched an app focused on public outreach on emergency preparedness. This app sends out push notifications and public safety messages in real-time. The app provides information on topics such as state of emergencies, current events, weather conditions, sheltering, and disaster assistance.

# SECTION 8 – MITIGATION STRATEGY

This section of the Plan provides the blueprint for Volusia County and the participating jurisdictions to become less vulnerable to its identified hazards. It is based on general consensus of the Volusia Prepares LMS Working Group (LMS Working Group) and the findings and conclusions of the *Capability Assessment* and *Risk Assessment*. It consists of the following five subsections:

- **Introduction**
- **Mitigation Goals**
- **Identification and Analysis of Mitigation Techniques**
- **Selection of Mitigation Techniques for Volusia County**
- **Mitigation Success Stories**
- **Plan Update Requirement**

## 8.1 INTRODUCTION

The intent of the Local Mitigation Strategy is to provide Volusia County and the participating jurisdictions with the goals that will serve as guiding principles for future mitigation policy and project administration, along with an analysis of mitigation techniques deemed available to meet those goals and reduce the impact of identified hazards. It is designed to be comprehensive, strategic and functional in nature:

- In being comprehensive, the development of the strategy includes a thorough review of all hazards and identifies extensive mitigation measures intended to not only reduce the future impacts of high-risk hazards, but also to assist the County and participating jurisdictions achieve compatible economic, environmental and social goals.

- In being strategic, the development of the strategy ensures that all policies and projects proposed for implementation are consistent with pre-identified, long-term planning goals.

- In being functional, each proposed mitigation action is linked to established priorities and assigned to specific departments or individuals responsible for their implementation with target completion deadlines. When necessary, funding sources are identified that can be used to assist in project implementation.

The first step in designing the LMS includes the identification of countywide mitigation goals. Mitigation goals represent broad statements that are achieved through the implementation of more specific, action-oriented objectives. These actions include both hazard mitigation policies (such as the regulation of land in known hazard areas through a local ordinance), and hazard mitigation projects that seek to address specifically targeted hazard risks (such as the acquisition and relocation of a repetitive loss structure).

The second step involves the identification, consideration and analysis of available mitigation measures to help achieve the identified mitigation goals. This is a long-term, continuous process, sustained through the development and maintenance of this Plan. Alternative mitigation measures will continue to be

considered as future mitigation opportunities become identified, as data and technology improve, as mitigation funding becomes available, and as this Plan is maintained over time.

The third and last step in designing the LMS is the selection and prioritization of specific mitigation actions, referred to as Hazard Mitigation Initiatives, for Volusia County and participating jurisdictions. The Mitigation Action Plan (MAP) represents an unambiguous and functional plan for action and is considered to be the most essential outcome of the mitigation planning process.

The MAP includes a prioritized listing of proposed hazard mitigation actions (policies and projects) for Volusia County and its participating jurisdictions and partners to carry out with accompanying information such as those departments or individuals assigned responsibility for their implementation, potential funding sources and an estimated target date for completion, serving as an important tool for monitoring success or progress over time. The cohesive collection of actions listed in the MAP can also serve as an easily understood menu of mitigation policies and projects for those local decision makers who want to quickly review the recommendations and proposed actions.

In preparing the Mitigation Action Plan for Volusia County, the LMS Working Group considered the overall hazard risk and capability to mitigate the effects of hazards as determined through the risk and capability assessment process, in addition to meeting the adopted countywide mitigation goals and unique needs of the community. Prioritizing the proposed mitigation actions was based on the following 11 factors:

- Population Benefited
- Health and Safety Considerations
- Environmental Impact
- Consistency with Other Plans and Programs
- Reduces Risk of Future Property Damage
- Supports Essential or Critical Services
- Probability of Receiving Funding for Implementation
- Feasibility of Implementation
- Community Rating System
- Repetitive Loss Mitigation
- Benefit Cost Ratio (to be conducted prior to submitting a project for grant consideration)

The mitigation initiative scoring system is provided in **Section 8: Table 1**.

**Section 8: Table 1: Mitigation Initiative Scoring System**

| Prioritization Criteria | Scoring | | | | |
|---|---|---|---|---|---|
| **Population Benefited** | **4** - Project will benefit a multi-jurisdictional area. | **3** - Project will benefit a jurisdictional area. | **2** - Project will benefit less than 100% of a jurisdiction (i.e., neighborhood). | | |
| **Health and Safety Considerations** *Add 1 point for projects that benefit a multi-jurisdictional area. | **4** - Project would benefit 75% or more of the population. | **3** - Project would benefit 50-74% of the population. | **2** - Project would benefit 25-49%of the population. | **1** - Project would benefit less than 25% of the population. | |
| **Environmental Impact** | **1** - Project improves the environment. | **0** - Risk to the environment is undetermined. | **(-1)** - Project poses risk to the environment. | | |
| **Consistence with other Plans and Programs** | **4** - Project is incorporated into the LMS, CEMP and Comprehensive Plan, and supports the National Flood Insurance Program (i.e., for flood related projects). | **3** - Project is incorporated into at least two of these plans. | **2 -** Project is incorporated into at least one of these plans. | **1** - Project is consistent with other local standards, aside from LMS, CEMP and Comprehensive Plan. | |
| **Reduces Risk of Future Property Damage** | **4 -** Mitigates a hazard of high frequency or risk. | **3 -** Mitigates a hazard of moderate frequency or risk. | **2 -**Mitigates a hazard of low frequency or risk. | **1 -** Mitigates a hazard of very low frequency or risk. | |
| **Supports Essential or Critical Services** | **5** - Project will ensure continuity of operations for essential infrastructure or services. | **3** - Project will support infrastructure or services with loss/damage history. | **1** - Project will support infrastructure or services without loss/damage history. | **0** - Project's operation will have no impact on community infrastructure or services if disrupted. | |
| **Probability of Receiving Funding for Implementation** | **4** - Limited funding potential exists. | **3** -Potential funding sources are other state or federal grants or similar funding sources. | **2** - Potential funding is readily available through emergency preparedness or mitigation funding sources. | **0** - Potential funding is readily available through local funding sources (e.g., budgeting, capital improvements). | |
| **Feasibility of Implementation** | **4** - Project would be relatively easy to implement in one year. | **3** - Project would be easy to implement in three years. | **2** - Project would be easy to implement in five years. | **0** - Project would be difficult to implement. | |
| **Community Rating System** | **4** - Project supports all four elements of CRS flood-related activities (public information, mapping and regulations, damage reduction and flood preparedness). | **3** - Project supports three CRS elements. | **2** - Project supports two CRS elements. | **1** - Project supports one CRS element. | **0** - Project does not support any CRS element. |
| **Repetitive Loss Mitigation** | **4** - Project protects 50% or more of Repetitive Loss (RL) structures. | **2** - Project protects less than 50% of RL structures. | **0** - Project does not protect a RL structure. | | |
| **Benefit Cost Ratio** | **5** - Project has a Benefit Cost Ratio (BCR) of "1" or higher, using FEMA approved software. | **3** - Project has a BCR of less than "1" using FEMA approved software. | **0** - The BCR cannot be determined. | | |

## 8.2 MITIGATION GOALS

**44 CFR Requirement**

***44 CFR Part 201.6(c)(3)(i):***
The mitigation strategy shall include a description of mitigation goals to reduce or avoid long-term vulnerabilities to the identified hazards.

For the 2025 plan update, the LMS Working Group used the goal listing updated and developed as part of the 2020 plan update. Each of the following goal statements represent a broad target for Volusia County and its participating jurisdictions and partners to achieve through the implementation of its more detailed Mitigation Action Plan provided in Section 9: *Mitigation Action Plan*. They are intended to reflect the unique needs and wishes of the communities of Volusia County to have a more "disaster resilient" future.

**Section 8: Table 2: LMS Working Group Mitigation Goals**

| |
|---|
| **GOAL 1: Strengthen effective hazard mitigation programming through policies, regulations, and technology through local government collaborations.** |
| ***Objective 1*:** Develop a mechanism to track mitigation projects for active reporting among jurisdictions. |
| ***Objective 2*:** Support the efforts of each jurisdictions' Community Rating Systems program. |
| ***Objective 3*:** Review, develop and enforce policies, plans and regulations to discourage or prohibit inappropriate location of structures or infrastructure components in high-risk areas. |
| ***Objective 4*:** Leverage available information and data from sources, such as individual vulnerability assessments, the Regional Resilience Action Plan, and Adaption Action Areas to further mitigation efforts. |
| ***Objective 5*:** Seek funding to implement and further existing forecasting technology. |
| ***Objective 6*:** Strengthen surveying strategies before and after a disaster for more comprehensive damage assessments. |
| **GOAL 2: Local government will endeavor to have resilient critical infrastructure that supports operations before, during, and after disasters.** |
| ***Objective 1:*** Educate local partners on the need for financial planning to reduce risk and recover critical infrastructure quickly after a disaster. |
| ***Objective 2:*** Implement adaptation strategies and encourage routine maintenance of critical infrastructure through physical and geological enhancements using available technology. |
| ***Objective 3*:** Evaluate utility, telecommunications, and information technology systems with external agency partners to determine potential mitigation opportunities. |
| ***Objective 4*:** Assess transportation routes, systems, and infrastructure to identify potential relocation, retrofit, or modification opportunities to ensure safe passage before, during and after disaster events. |
| ***Objective 5*:** Prioritize the functions of emergency service operations and their facilities. |
| ***Objective 6:*** Annually seek opportunities and apply for funding to expand future shelter capacity and for existing shelter retrofits. |

| |
|---|
| **GOAL 3: Encourage economic sustainability within the community.** |
| ***Objective 1:*** Local government will encourage businesses and industries to make employment facilities and operations more disaster resilient. |
| ***Objective 2:*** Develop partnerships to enhance communication between private sector businesses and local governments. |
| ***Objective 3:*** Offer training to local businesses and professional organizations on all hazard preparedness. |
| ***Objective 4:*** Review the needs of key supply chain demands in the community by establishing programs, facilities or resources to support business continuity. |
| **GOAL 4: Enhance the whole community's understanding of the hazards and the techniques used to minimize vulnerability.** |
| ***Objective 1:*** Provide information through outreach activities to further the public's understanding of local hazards and residential vulnerabilities. |
| ***Objective 2:*** Inform tourists on the hazard risks and preparedness. |
| ***Objective 3:*** Collaborate with private sector associations and businesses to further disaster preparedness and business continuity. |
| ***Objective 4:*** Encourage each jurisdiction to participate in trainings and exercises and share resources with one another. |

## 8.3 IDENTIFICATION AND ANALYSIS OF MITIGATION TECHNIQUES

**44 CFR Requirement**

***44 CFR Part 201.6(c)(3)(ii):***
The mitigation strategy shall include a section that identifies and analyzes a comprehensive range of specific mitigation actions and projects being considered to reduce the effect of each hazard, with particular emphasis on new and existing buildings and infrastructure.

In formulating the LMS for Volusia County, a wide range of activities were considered to help achieve the established mitigation goals in addition to addressing any specific and targeted hazard concerns. These activities were discussed by the LMS Working Group at meetings held over the course of plan development. In general, all activities considered by the LMS Working Group can be classified under one of the following six (6) broad categories of mitigation techniques.

**1. Prevention**
Preventative measures are intended to keep hazard problems from getting worse and are typically administered through government programs or regulatory actions that influence the way land is developed and buildings are built. They are particularly effective in reducing a community's future vulnerability, especially in areas where development has not occurred or capital improvements have not been substantial. Examples of preventative activities include:

- Planning and zoning
- Building codes
- Open space preservation
- Floodplain regulations
- Stormwater management regulations
- Drainage system maintenance
- Capital improvements programming
- Riverine / fault zone setbacks

**2. Property Protection**
Property protection measures involve the modification of existing buildings and structures to help them better withstand the forces of a hazard, or removal of the structures from hazardous locations. Examples include:

- Acquisition
- Relocation
- Building elevation
- Critical facilities protection
- Retrofitting (e.g., wind proofing, floodproofing, seismic design techniques, etc.)
- Safe rooms, shutters, shatter-resistant glass
- Insurance

**3. Natural Resource Protection**

Natural resource protection activities reduce the impact of natural hazards by preserving or restoring natural areas and their protective functions. Such areas include floodplains, wetlands, steep slopes and sand dunes. Parks, recreation or conservation agencies and organizations often implement these protective measures. Examples include:

- Floodplain protection
- Watershed management
- Riparian buffers
- Forest and vegetation management (e.g., fire resistant landscaping, fuel breaks, etc.)
- Erosion and sediment control
- Wetland preservation and restoration
- Habitat preservation
- Slope stabilization

**4. Structural Projects**

Structural mitigation projects are intended to lessen the impact of a hazard by modifying the environmental natural progression of the hazard event through construction. They are usually designed by engineers and managed or maintained by public works staff. Examples include:

- Reservoirs
- Dams / levees / dikes / floodwalls
- Diversions / detention / retention
- Channel modification
- Storm sewers

**5. Emergency Services**

Although not typically considered a “mitigation” technique, emergency service measures do minimize the impact of a hazard event on people and property. These commonly are actions taken immediately prior to, during, or in response to a hazard event. Examples include:

- Warning systems
- Evacuation planning and management
- Emergency response training and exercises
- Sandbagging for flood protection
- Installing temporary shutters for wind protection

**6. Public Education and Awareness**

Public education and awareness activities are used to advise residents, elected officials, business owners, potential property buyers, and visitors about hazards, hazardous areas, and mitigation techniques they can use to protect themselves and their property. Examples of measures to educate and inform the public include:

- Outreach projects
- Speaker series / demonstration events

- Hazard map information
- Real estate disclosure
- Library materials
- School children educational programs
- Hazard expositions

## 8.4 SELECTION OF MITIGATION TECHNIQUES FOR VOLUSIA COUNTY

In order to determine the most appropriate mitigation techniques for Volusia County, the LMS Working Group thoroughly reviewed and considered collective findings of various community assessments. Other considerations included each individual mitigation action's effect on overall risk to life and property, health and safety, the environment, plan consistency, its ease of implementation and general cost-effectiveness, and funding availability (if necessary).

FEMA guidance for meeting the planning requirements of the Disaster Mitigation Act of 2000 specifies that local governments should prioritize their mitigation actions based on the level of risk a hazard poses to life and property. In response to this requirement, the LMS Working Group used and completed a Mitigation Techniques Matrix (**Section 8: Table 3**) to make certain they addressed, at a minimum, those hazards posing the greatest threat.

**Section 8: Table 3: Mitigation Techniques Matrix for Volusia County**

| MITIGATION TECHNIQUE | HIGH RISK HAZARDS | | | |
|---|---|---|---|---|
| | FLOOD | TROPICAL CYCLONES | RISING COASTAL WATERS | TORNADO |
| Prevention | ✓ | ✓ | ✓ | ✓ |
| Property Protection | ✓ | ✓ | ✓ | ✓ |
| Natural Resource Protection | ✓ | ✓ | ✓ | |
| Structural Projects | ✓ | ✓ | ✓ | ✓ |
| Emergency Services | ✓ | ✓ | ✓ | ✓ |
| Public Education & Awareness | ✓ | ✓ | ✓ | ✓ |

The Mitigation Techniques Matrix provides the LMS Working Group with the opportunity to cross-reference each of the priority high risk hazards, the aforementioned comprehensive range available mitigation techniques, including prevention; property protection; natural resource protection; structural projects; emergency services; and public education and awareness. However, it is important to note that Volusia County's Mitigation Action Plan includes an array of actions targeting multiple hazards and is not necessarily limited to only those classified as high risk.

Additional mitigation strategies range from:

- Seawalls
- Breakwaters
- Habitat restoration
- Beach renourishment
- Living Shorelines
- Elevating major roadways
- Raising vulnerable structures
- Water pump systems
- Underground utilities
- Permeable pavement
- Low impact development
- Floodproofing structures
- Rain gardens
- Increase density standards
- Land acquisition
- Public Outreach and Education

## 8.5 PLAN REVISIONS

Because of FEMA requirements for plan updates, the Mitigation Action Plan was reviewed by each agency responsible identified for implementing the action. For each action, an update on the implementation status (completed, deleted, or deferred) was provided and milestones achieved or impediments to implementation of the actions were identified to adjust the project list as necessary.

The current goals and objectives were updated and refined through a series of virtual and in-person meetings in 2024. All members of the Volusia Prepares Working Group were invited to participate in the meetings outside the quarterly meetings. All feedback was evaluated and incorporated into the outlined goals and objectives.

Flooding, rising coastal waters, and tropical cyclones were the top concerns for the LMS Volusia Prepares Working Group and residents throughout Volusia County. These hazards are complex issues with multiple contributing factors, often specific to a given site. Effective mitigation requires accurate data collection and analysis to identify areas that have experienced repeated damage. Prioritization should be given to these locations, followed by those that have been damaged most recently, ensuring that resources are allocated efficiently to address the most impacted areas first. Given the constraints of available resources, it is essential to focus on areas where mitigation efforts will have the greatest impact.

Public concerns regarding such hazards have frequently attributed the issue to new development. While development can be a contributing factor in certain locations—such as Venetian Bay in New Smyrna Beach, Old Dixie Highway in Ormond Beach, the west side of Daytona Beach, and new miscellaneous subdivisions throughout the county—these hazards are typically the result of a combination of factors. Addressing existing challenges requires a site-specific approach that considers a broad range of contributing causes and solutions.

# SECTION 9 – MITIGATION ACTION PLAN

**44 CFR Requirement**

***44 CFR Part 201.6(c)(3)(iii):*** The mitigation strategy shall include an action plan describing how the actions identified in paragraph (c)(2)(ii) of this section will be prioritized, implemented, and administered by the local jurisdiction.

This section includes the listing of the mitigation actions proposed by Volusia County and its participating jurisdictions and partners. It has been designed to achieve the mitigation goals and objectives established in Section 8: Mitigation Strategy and will be maintained on a regular basis according to the plan maintenance procedures established in Section 10: Plan Maintenance Procedures.

As described in the previous section, the Mitigation Action Plan, or MAP, represents an unambiguous and functional plan for action. Each proposed mitigation action has been identified as an effective measure (policy or project) to reduce hazard vulnerability for Volusia County.

Most importantly, implementation mechanisms are provided for each action, including the designation of a lead agency or department responsible for implementing the action. Specific information regarding project cost and timeframe for its completion is on file with Volusia County Emergency Management. These implementation mechanisms ensure that Volusia County Local Mitigation Strategy remains a functional document that can be monitored for progress over time.

**Section 9: Table 1: Key Elements of the Mitigation Action Plan**

| | |
|---|---|
| **Priority** | Indicates whether the action is a "low" priority, "moderate" priority or "high" priority based on the established prioritization criteria: Low = <10; Moderate = 11-24; High = 25+ |
| **Jurisdiction** | Identifies the geographic location where the initiative is located. |
| **Responsible Organization** | Identifies the local agency, department or organization that is best suited to implement the proposed action, project or initiative. |
| **Hazard(s)** | Lists the hazard(s) the proposed action is designed to mitigate against. |
| **Mitigation Technique Category** | It indicates the mitigation technique that the proposed action is designed to help achieve. Categories include E = Emergency Services; P = Prevention; PE = Public Education; PP = Property Protection; S = Structural |
| **Initiative** | Identifies a specific action that, if accomplished, will reduce vulnerability and risk in the impact area. Actions may be in the form of local policies (i.e., regulatory or incentive-based measures), programs or structural mitigation projects and should be consistent with any pre-identified mitigation goals and objectives. An identification number is provided. The county has additional information on files for each initiative (e.g., location, damage history, specific mitigation measure, estimated cost, etc.) |
| **Funding** | If applicable, it indicates how the cost to complete the action will be funded. For example, funds may be provided from existing operating budgets or general funds, a previously established contingency fund, a cost-sharing federal or state grant program, etc. The default funding source for initiatives within this listing is the Hazard Mitigation Grant Program (HMGP). Outside of the HMGP, funding sources for these projects are typically determined on the local level for "proactive" projects that do not need a disaster declaration to be funded. However, most of the projects on this listing do not have a set funding source, which defaults the project to HMGP. If identified, specific funding sources will be attributed to initiatives. |
| **Approved by LMS Working Group** | Identifies the date when the initiative was approved by the LMS Working Group |
| **Completion Date** | Indicates when the action was completed. Remember that some actions will require only a minimal amount of time, while others may require a long-term or continuous effort. Projects are "deferred" or "terminated" from list listing at the discretion of the jurisdiction that is implementing those changes. When initiatives are deferred or deleted on the jurisdictional level, countywide representatives are notified via the LMS Working Group (or Volusia Prepares), and the countywide initiative listing is updated at that time. |
| **Status** | The status indicators for each initiative is as follows:<br>• C = Current<br>• D = Deferred ****See notes under "Completion Date" above****<br>• N = New<br>• T = Terminated ****See notes under "Completion Date" above****<br>• U = Updated<br>• CF = Completed with other funding<br>• W = Withdrew<br>• L = Looking for other funding |

Each mitigation initiative has been scored by the responsible jurisdiction. The scoring system is included in Section 8: Mitigation Strategy.

Prioritizing the proposed mitigation actions was based on the following 11 factors:

- Population Benefited
- Health and Safety Considerations
- Environmental Impact
- Consistency with Other Plans and Programs
- Reduces Risk of Future Property Damage
- Supports Essential or Critical Services
- Probability of Receiving Funding for Implementation
- Feasibility of Implementation
- Community Rating System
- Repetitive Loss Mitigation
- Benefit Cost Ratio (to be conducted prior to submitting a project for grant consideration)

Each mitigation initiative was scored on 10 of these 11 factors. The jurisdictions have not run an official benefit cost analysis (BCA) for the initiatives at this time. The jurisdictions did include a general BCA in the mitigation initiative application that was submitted to Volusia County Emergency Management. However, the BCA will be run for the initiatives following a disaster to factor in all known damage costs.

The mitigation initiatives are not listed in exact priority order, though each has been assigned a priority level of “low”, “moderate”, or “high”.

All mitigation initiatives included in the Action Plan that propose to reduce flood hazard vulnerability advance the intent of the National Flood Insurance Program (NFIP), as they will meet the current local floodplain regulations adopted by the jurisdictions as required by the NFIP. Two of the scoring factors used to determine the priority of the actions specifically address the intent of the NFIP and the Community Rating System (CRS). These two factors consider whether the initiative supports elements of the CRS and reduces repetitive flood losses.

Volusia County is highly committed to reducing flood losses in support of the NFIP and has predominantly used local funding to implement these projects. Examples of these initiatives include acquiring and relocating repetitive loss structures, relocating critical facilities from the 100-year floodplain, floodproofing equipment at water treatment plants, performing drainage improvement projects and creating new topographic maps based on newly collected Light Detection and Ranging (LiDAR) data. Approximately half of open disaster mitigation initiatives support flood hazard vulnerability reduction.

The open mitigation initiatives are listed in the Action Plan in **Section 9: Table 2** If a mitigation initiative does not have a status indicator, it is considered “open.

In 2019, the East Central Florida Regional Planning Council and Volusia County Emergency Management mapped the locations of all mitigation projects, by type, as part of a project with the Florida Department of Environmental Protection. These maps are available upon request.

**Section 9: Table 2: Mitigation Action Plan: Open Mitigation Initiatives by Jurisdiction (as of 1/28/2025)**

| Project # | Priority | Jurisdiction | Responsible Organization | Hazard(s) | Mitigation Technique Category | Initiative | Funding | Est. Cost | Approved by LMS Working Group | Anticipated Completion Date | Status |

# SECTION 10 – PLAN MAINTENANCE PROCEDURES

**44 CFR Requirement**

***44 CFR Part201.6(c)(4)(i):***
The plan shall include a plan maintenance process that includes a section describing the method and schedule of monitoring, evaluating and updating the mitigation plan within a five-year cycle.

***44 CFR Part 201.6(c)(4)(ii):***
The plan maintenance process shall include a process by which local governments incorporate the requirements of the mitigation plan into other planning mechanisms such as comprehensive or capital improvement plans, when appropriate.

This section of the Plan discusses how the Mitigation Strategy and Mitigation Action Plan will be implemented and how the LMS will be evaluated and enhanced over time. This section also discusses how the public will continue to be involved in a sustained hazard mitigation planning process. It consists of the following three subsections:

- **Implementation**
- **Monitoring, Evaluation and Enhancement**
- **Continued Public Involvement**

## 10.1 IMPLEMENTATION

Each agency, department or other partners participating under the Volusia County Multi-Jurisdictional LMS is responsible for implementing specific mitigation actions as prescribed in the Mitigation Action Plan. Every proposed action listed in the Mitigation Action Plan is assigned to a specific “lead” agency or department in order to assign responsibility and accountability and increase the likelihood of subsequent implementation.

In addition to the assignment of a local lead department or agency, an implementation time period or a specific implementation date has been assigned in order to assess whether actions are being implemented in a timely fashion. Volusia County and its participating jurisdictions and partners will seek outside funding sources to implement mitigation projects in both the pre-disaster and post-disaster environments. When applicable, potential funding sources have been identified for proposed actions listed in the Mitigation Action Plan.

Volusia County will integrate this Mitigation Plan into relevant County government decision making processes or mechanisms. This includes integrating the Mitigation Plan requirements into other local planning documents, processes or mechanisms, such as comprehensive or capital improvement plans, when appropriate. Members of the LMS Working Group will ensure that the goals and strategies of new and updated local planning documents for their agencies or departments are consistent and do not conflict with the goals and actions of the LMS and will not contribute to increased hazard vulnerability in the County.

Opportunities to integrate the requirements of this Plan into other local planning mechanisms shall continue to be identified through future meetings of the LMS Working Group and through the five-year review process described herein. Although it is recognized that there are many possible benefits to integrating components of this Plan into other local planning mechanisms, the development and maintenance of this stand-alone Mitigation Plan is deemed by the Volusia County LMS Working Group to be the most effective and appropriate method to implement local hazard mitigation actions at this time.

## 10.2 MONITORING, EVALUATION AND ENHANCEMENT

Periodic revisions and updates of the LMS are required to ensure that the goals of the Plan are kept current and account for potential changes in hazard vulnerability and mitigation priorities. In addition, revisions may be necessary to ensure that the Plan is in full compliance with applicable federal and state regulations. Periodic evaluation of the Plan will also ensure that specific mitigation actions are being reviewed and carried out according to the Mitigation Action Plan.

The Volusia County LMS Working Group and public participants will continue to meet at least annually and following any disaster events warranting a reexamination of the mitigation actions being implemented or proposed for future implementation. This will ensure that the Plan is continuously updated to reflect changing conditions and needs within Volusia County. If determined appropriate or as requested, an annual report on the Plan will be developed and presented to the Volusia County Council in order to report progress on the actions identified in the Plan and to provide information on the latest legislative requirements and/or changes to those requirements.

The LMS Coordinator, Volusia County Emergency Management Planner II, will be responsible for tracking and monitoring any changes or evaluations the LMS Working Group review and vote on as a committee.

### 10.2.1 Five (5) Year Plan Review

The Plan will be thoroughly reviewed by the LMS Working Group every five years to determine whether there have been any significant changes in Volusia County that may, in turn, necessitate changes in the types of mitigation actions proposed. New development in identified hazard areas, increased exposure to hazards, the increase or decrease in capability to address hazards, and changes to federal or state legislation are examples of factors that may affect the necessary content of the Plan.

The plan review provides Volusia County officials with an opportunity to evaluate those actions that have been successful and to explore the possibility of documenting potential losses avoided due to the implementation of specific mitigation measures. The plan review also provides the opportunity to address mitigation actions that may not have been successfully implemented as assigned. Volusia County Emergency Management Services department will be responsible for reconvening the LMS Working Group and conducting the five-year review.

During the five-year plan review process, the following questions will be considered as criteria for assessing the effectiveness and appropriateness of the Plan:

- Do the goals address current and expected conditions?
- Has the nature or magnitude of risks changed?
- Are the current resources appropriate for implementing the Plan?

- Are there implementation problems, such as technical, political, legal or coordination issues with other agencies?

- Have the outcomes occurred as expected?
- Did the County and participating agencies and other partners participate in the plan implementation process as assigned?

Following the five-year review, any revisions deemed necessary will be summarized and implemented according to the reporting procedures and plan amendment process outlined herein. Upon completion of the review and update/amendment process, the Volusia County LMS will be submitted to the State Hazard Mitigation Officer at the Florida Division of Emergency Management (FDEM) for final review and approval in coordination with the Federal Emergency Management Agency (FEMA).

**5-Year Update Summary**
**Review Group Lead as of 2024:** Aubrie Austin, Volusia County Emergency Management
**Review Group Name:** Volusia Prepares Working Group (see members in Section 2).
**Interim LMS Review:** LMS can be reviewed or commented on at any quarterly Volusia Prepares Meeting
**2030 Review Date:** The Volusia Prepares group will begin review no less than 365 days before the 2030-35 plan submittal date. This will ensure ample time to hire a contractor to complete the plan with all necessary community and municipal outreach completed.
**Review Forum:** Volusia Prepares Working Group Meetings (Quarterly)

### 10.2.2 Disaster Declaration

Following a disaster declaration, the Volusia County LMS will be revised as necessary to reflect lessons learned, or to address specific issues and circumstances arising from the event. It will be the responsibility of the Volusia County Emergency Management Services Division to reconvene the LMS Working Group and ensure the appropriate stakeholders are invited to participate in the plan revision and update process following declared disaster events.

### 10.2.3 Reporting Procedures

The results of the five-year review will be summarized by the LMS Working Group in a report that will include an evaluation of the effectiveness of the Plan and any required or recommended changes or amendments. The report will also include an evaluation of implementation progress for each of the proposed mitigation actions, identifying reasons for delays or obstacles to their completion along with recommended strategies to overcome them.

### 10.2.4 Plan Amendment Process

Upon the initiation of the amendment process, Volusia County and its participating jurisdictions and partners will forward information on the proposed change(s) to all interested parties including, but not limited to, all directly affected County departments, residents, and businesses. Information will also be forwarded to the Florida Division of Emergency Management. This information will be disseminated in order to seek input on the proposed amendment(s) for not less than a 45-day review and comment period.

At the end of the 45-day review and comment period, the proposed amendment(s) and all comments will be forwarded to the LMS Working Group for final consideration. The committee will review the proposed

amendments along with the comments received from other parties, and, if acceptable, the committee will submit a recommendation for the approval and adoption of changes to the Plan to the Volusia County Council within 60 days.

In determining whether to recommend approval or denial of a Plan amendment request, the following factors will be considered by the LMS Working Group:

- There are errors, inaccuracies or omissions made in the identification of issues or needs in the Plan;
- New issues or needs have been identified which are not adequately addressed in the Plan;
- There has been a change in information, data, or assumptions from those on which the Plan is based.

Upon receiving the recommendation from the LMS Working Group and prior to adoption of the Plan, the County will hold a public hearing if deemed necessary. The Volusia County Council will review the recommendation from the LMS Working Group (including the factors listed above) and any oral or written comments received at the public hearing. Following that review, the County Council will take one of the following actions:

- Adopt the proposed amendments as presented
- Adopt the proposed amendments with modifications
- Refer to the amendments request back to the LMS Working Group for further revision, or
- Defer the amendment request back to the LMS Working Group for further consideration and/or additional hearings

### 10.2.5 Plan Integration

It is recommended that the findings from the LMS be integrated into individual jurisdictional plans to demonstrate the commitment to reducing hazard risk. Individual jurisdictions have been utilizing these findings in a variety of ways, such as identifying high risk areas through vulnerability assessments and incorporating the LMS project list into jurisdictional capital improvement plans.

There are opportunities for Volusia County and its jurisdictions to integrate the LMS into more specific plans. There are various reasons why hazards have profound impacts on the community. Potential causes of hazards that have been identified by members of the community include, but are not limited to:

- Inadequate maintenance of storm drains, lift stations, and canals
- Insufficient maintenance of stormwater retention and detention systems
- Encroachment upon or reduction of conservation areas
- Loss of vegetation and tree cover
- Increased impervious surface coverage, such as new residential dwellings and parking lots
- Severe rain events occurring on already saturated ground (e.g., Hurricanes Milton and Ian)
- Severe coastal erosion due to stronger and more frequent storm events
- Inadequate or antiquated stormwater retention and detention infrastructure in development
- Outdated or poorly designed stormwater conveyance systems
- Impacts from climate change, such as sea level rise

These concerns are multifaceted and require that findings of the LMS be integrated into existing plans in each participating jurisdiction. To provide the most effective hazard mitigation for Volusia County and its jurisdictions, local plans should address these concerns and dedicate resources to solving them.

Several measures are currently under consideration to reduce hazard risk in Volusia County and its jurisdictions. In June 2023, Volusia County's Environment and Natural Resources Advisory Committee (ENRAC) recommended a hybrid approach to Low Impact Development. County Council directed staff and ENRAC to create a voluntary LID program with incentives that October. The subsequent LID program was created, and final decision is anticipated in Spring/Summer 2025. Updates to individual jurisdictions' stormwater ordinances are also forthcoming for review and potential approval. Additional mitigation strategies include infrastructure retrofits to improve stormwater management and strategic land-use planning to assess the suitability of future development.

Addressing hazard mitigation requires collaboration among policymakers, engineers, planners, and resilience experts. Local governments, alongside regional partners such as the East Central Florida Regional Planning Council, have access to technical expertise and data-driven recommendations to guide decision-making. It is critical to assess and implement these expert recommendations to enhance community resilience and reduce future hazard impacts. See Section 8 for further details on mitigation strategies.

Moving forward, it will be the responsibility of the LMSWG representatives from each participating jurisdiction to continue to determine and pursue opportunities for integrating the findings, requirements, and strategies of this plan with other local planning documents. The LMSWG is also responsible for ensuring that the goals and strategies of new and updated local planning documents for their jurisdictions or agencies are consistent with the goals and actions of the Local Mitigation Strategy and will not contribute to increased hazard vulnerability in the planning area. Methods for integration may include: Monitoring other planning/program agendas; Attending other planning/program meetings; Participating in other planning processes; and Monitoring community budget meetings for other community program opportunities.

Many identified mitigation initiatives are capital projects, the implementation of which is usually dependent upon the availability of funding. When such initiatives are prioritized, and funding is sought, each jurisdiction will comply with its existing rules regarding inclusion of projects in its Capital Improvement Plan or other budget and planning processes and documents.

Opportunities to integrate the requirements of this plan into other local planning mechanisms shall continue to be identified through future meetings of the LMSWG and through the five-year review process described herein. Although it is recognized that there are many possible benefits to integrating components of this plan into other local planning mechanisms, the development and maintenance of this stand-alone Local Mitigation Strategy is deemed by the LMSWG to be the most effective and appropriate method to implement local hazard mitigation actions at this time.

## 10.3 CONTINUED PUBLIC INVOLVEMENT

**44 CFR Requirement**

***44 CFR Part 201.6(c)(4)(iii):***
The plan maintenance process shall include a discussion on how the community will continue public participation in the plan maintenance process

Public participation is an integral component to the mitigation planning process and will continue to be essential as this Plan evolves over time. As described above, significant changes or amendments to the Plan shall require a public hearing prior to any adoption procedures.

Other efforts to involve the public in the maintenance, evaluation and revision process will be made as necessary. These efforts may include:

- Advertising meetings of the LMS Working Group in local newspapers, social media public bulletin boards and/or County office buildings
- Designating willing and voluntary citizens and private sector representatives as official members of the LMS Working Group
- Utilizing local media to update the public of any maintenance and/or periodic review activities taking place
- Utilize social media for education on mitigation efforts and funding opportunities
- Utilizing the Volusia County website to advertise any maintenance and/or periodic review activities taking place, and
- Keeping copies of the Plan in public libraries
- Provide mitigation education and information on the LMS committee at public presentations and events
- Continue to engage with Transform 386, the Volusia County Recovery and Resiliency Division on helping the low socio-economic community members
- Continuing to engage the Community Rating System Program for Public Information activities

# APPENDIX A: BYLAWS OF "VOLUSIA PREPARES"

**Bylaws of "Volusia Prepares"**
**The Volusia County Local Mitigation Strategy Steering Committee**

## ARTICLE I: PURPOSES OF THE TASK FORCE

The purpose of the Volusia County Local Mitigation Strategy Task Force, otherwise known as "Volusia Prepares", is to decrease the vulnerability of the citizens, governments, businesses and institutions of Volusia County to the future human, economic and environmental costs of natural, technological, and societal disasters. The Task Force will develop, monitor, implement, and maintain a comprehensive plan for hazard mitigation which will be intended to accomplish this purpose.

## ARTICLE II: MEMBERSHIP

Participation in Volusia Prepares is voluntary by all entities. Membership in Volusia Prepares is open to all jurisdictions, organizations and individuals supporting its purposes

## ARTICLE III: ORGANIZATIONAL STRUCTURE

The organizational structure of Volusia Prepares shall consist of a Steering Committee and subcommittees as deemed necessary by the Steering Committee.

### *A. The Steering Committee*

Volusia Prepares shall be guided by a Steering Committee consisting of designated representatives of the following:

- One representative from the government of Volusia County and each participating incorporated municipality,
- One representative from organizations and associations representing key business, industry, and community interest groups of Volusia County, and
- Other such individuals appointed by a majority vote of the Steering Committee.

Members of the Steering Committee will be designated by formal appointment or other action to serve as the official representative and spokesperson for the jurisdiction or organization regarding the activities and decisions of Volusia Prepares. To maintain good standing, members of the Steering Committee must not have more than two unexcused absences from meetings during the course of a year. Three or more unexcused absences during the course of one calendar year may result in HMGP grant funding ineligibility for those jurisdiction(s) during the next Presidentially declared disaster.

### *B. Subcommittees*

Volusia Prepares may have permanent and/or temporary subcommittees as deemed necessary by the Steering Committee. Membership in the subcommittees is not restricted. There are no requirements for individuals to maintain good standing as members of a permanent or temporary subcommittee.

### *C. Program Staff*

The Volusia County Emergency Management Division, or other agency as so designated by the Steering Committee, will serve as the program staff for Volusia Prepares, and assist in the coordination and support of Volusia Prepares activities.

## ARTICLE IV: OFFICERS

Any member in good standing of the Steering Committee is eligible for election as an officer. The Steering Committee will have a chair elected by a majority vote of a quorum of the members. The Steering Committee will also elect by majority vote a vice chair. Representatives of both local government and any participating private sector organizations will be eligible for election as an officer. Each will serve a term of one year, and be eligible for re-election for an unlimited number of terms. The chair and vice chair of the Steering Committee are also considered to be chair and vice chair of Volusia Prepares.

The chair of the Steering Committee will preside at each meeting of the Steering Committee, as well as establish temporary subcommittees and assign personnel to them. The vice chair will fulfill the duties and responsibilities of the chair in his or her absence.

The chair of each permanent or temporary subcommittee will be designated from the members in good standing of the Steering Committee by its chair, and will serve at the pleasure of the chair of the Steering Committee.

## ARTICLE V: RESPONSIBILITIES

### *A. Steering Committee*

The Steering Committee will be responsible for oversight and coordination of all actions and decisions by the Task Force, and is solely responsible for formal actions in the name of Volusia Prepares, including the release of reports, development of resolutions, issuance of position papers, and similar activities. The Steering Committee makes assignments to the subcommittees, coordinates their work, and takes action on their recommendations. Their goal is to make Volusia County disaster resistant by preventing or reducing the personal and economic loss from natural or man-made hazards through a partnership between government, businesses, organizations, associations, and citizens.

Objectives:

1. Keep the Volusia County Local Mitigation Strategy (LMS) document current (incorporating new projects, objectives, and goals).
2. Develop and maintain overall policies and procedures and integrate priorities of mitigation efforts.
3. Facilitate comprehensive effectiveness by coordinating with subcommittees.
4. Vote on proposed action plans and initiatives.
5. Develop a strategy to constantly identify and recruit new partners.
6. Develop a systematic method to share knowledge and market the need for being disaster resistant.
7. Promote accomplishments to elected officials and community.

### *B. Subcommittees*

If established by the Steering Committee, subcommittees will have responsibilities as assigned by the Steering Committee members.

***C. Program Staff***

Technical, clerical and other types of support activities to the Steering Committee and subcommittees will be provided through the Volusia County Emergency Management Division or other agency or organizational staff as designated by the Steering Committee. The Steering Committee will also designate an agency of Volusia County to serve as the legal representative and agent of Volusia Prepares, and to be empowered under County statutes to accept and disburse funds, enter into contracts, hire staff, and take such other actions as necessary in support of, or for the benefit of, the Task Force. Other jurisdictions and organizations may also provide such services on a voluntary basis upon request of the chair of the Steering Committee.

## ARTICLE VI: ACTIONS BY THE TASK FORCE

***A. Authority for Actions***

Only the Steering Committee has the authority to take final actions in the name of Volusia Prepares. Actions by subcommittees or program staff are not considered as final until affirmed by action of the Steering Committee.

***B. Meetings, Voting and Quorum***

Meetings of the Steering Committee and its subcommittees will be conducted in accord with Robert's Rules of Order, if and when deemed necessary by chair of the meeting. Regular meetings of the Steering Committee will be scheduled at least quarterly with a minimum of 10 working days' notice. Subcommittees will meet at least quarterly prior to Steering Committee meetings, or more frequently as deemed necessary, at the discretion of their chairperson.

All final actions and decisions made in the name of Volusia Prepares will be by affirmative vote of a quorum of the Steering Committee. A quorum shall be 50 percent of the members of the Steering Committee in good standing at the time of the vote. Each member of the Steering Committee will have one vote. Voting by proxy, written or otherwise, is permitted.

***C. Special Votes***

Special votes may be taken under emergency situations or when there are other extenuating circumstances as determined by the chair and/or vice chair of the Steering Committee. Special votes may be made by telephone, email, webinar, or any electronic means, or first class mail, and shall be in accord with all applicable quorum rules for such actions.

***D. Public Hearings***

When required by statute or the policies of Volusia County, or when deemed necessary by the Steering Committee, a public hearing regarding actions under consideration for implementation by Volusia Prepares will be held.

***E. Documentation of Actions***

All meetings and other forms of action by the Steering Committee and permanent subcommittees (if established) will be documented and made available for inspection by the public.

### ARTICLE VII: ADOPTION OF AMENDMENTS AND CHANGES TO THE BYLAWS AND *"VOLUSIA PREPARES"* LOCAL MITIGATION STRATEGY DOCUMENT

The Bylaws of Volusia Prepares and the *"Volusia Prepares"* Local Mitigation Strategy document may be adopted and/or amended by a two-thirds majority vote of the members in good standing of the Steering Committee at any time. All proposed changes to the bylaws and *"Volusia Prepares"* Local Mitigation Strategy document will be provided to each member of the Steering Committee prior to voting on the proposed changes. Routine changes, additions, deletions, and deferment of mitigation initiatives and any other changes to the document may be made at any time by majority vote. Voting may be by telephone, email, webinar, or any electronic means, or first class mail. A 45-day public review and comment period shall apply to the five-year FEMA required update of the *"Volusia Prepares"* LMS Document.

### ARTICLE VIII: DISSOLUTION OF THE TASK FORCE

The Task Force may be dissolved by affirmative vote of 100% of the members in good standing of the Steering Committee at the time of the vote, by order of a court of competent jurisdiction, and/or by instruction of the Volusia County governing body. At the time of dissolution, all remaining documents, records, equipment and supplies belonging to the Task Force will be transferred to Volusia County for disposition.

# APPENDIX B: LOCAL MITIGATION STRATEGY CROSSWALK

## 2023 Florida Local Mitigation Strategy (LMS) Crosswalk

| DESCRIPTION: |
|---|
| The Florida Local Mitigation Strategy (LMS) Crosswalk is informed by the FEMA Local Mitigation Planning Policy Guide (effective April 19, 2023). Each requirement listed below is a required Element of the FEMA Policy Guide. There is a difference in formatting when comparing the FL Crosswalk with FEMA's Policy Guide Elements. This is to prevent the possibility of skipping various components of each FEMA requirement. You will notice the specific FEMA requirement is listed in parenthesis next to each FL Crosswalk Element (e.g., P1 in the FL Crosswalk is equivalent to FEMA Element A1-a). As such, multiple FL Crosswalk Elements may correspond to the same FEMA Element. |

| INSTRUCTIONS: |
|---|
| Enter the requested information in each field below:<br>1) In the FL Crosswalk Tab, please identify the "Location in Plan" using the corresponding page numbers for each requirement.<br>2) In the Jurisdiction Checklist Tab, please add each of the "participating" jurisdictions.<br><br>*Please do not edit the following sections: *Met, Not Met, Reviewer Comments* . If revisions are required, the State reviewer will put revisions in the Required Revisions section. As revisions are made, please feel free to add comments about the revisions in the same section. **Do not remove any State comments.**<br>*Additionally, a Project List Template can be found in a separate tab below. |

| | | | |
|---|---|---|---|
| **Jurisdiction:** | Volusia County | **Title of Plan:** | Volusia County Multi-Jurisdictional Local Mitigation Strategy |
| **Local Point of Contact:** | Yolanda Buckles | **Address:** | 3825 Tiger Bay Rd., Suite 102, Daytona Beach, FL 32124 |
| **Title:** | Volusia Prepares Coordinator | **Email:** | ybuckles@volusia.org |
| **Agency:** | Volusia County Emergency Management | **Phone Number:** | 386-254-1500 |

| | |
|---|---|
| **State Reviewers:** | |
| **Date Received by FDEM:** | |
| **Date Plan Not Approved:** | |
| **Date Plan APA:** | |
| **Date Plan Approved:** | |

| Planning Process (FEMA Element A) | | Location in Plan | Met | Not Met | Reviewer Comments | Required Revisions |
|---|---|---|---|---|---|---|
| **P1 (A1-a)** | The plan must document the current planning process. | Section 2.3-2.6 | | | | |
| **P2 (A1-b)** | The plan must list the jurisdiction(s) in the current plan that will seek approval. | Section 1.3, Section 2.4 (Table 2.1) | | | | |
| **P3 (A1-b)** | The plan must list the representative from **each jurisdiction** that will seek approval and how they participated in the planning process. (At a minimum, it must identify the jurisdiction represented and the person's agency and title within the jurisdiction.) | Section 2.4 (Table 2.1) | | | | |

| | | | | | | |
|---|---|---|---|---|---|---|
| **P4 (A2)** | The plan must provide documentation of an opportunity for stakeholders to be involved in the current planning process. Documentation of this opportunity must identify how **each of the stakeholders** (see below) were presented with this opportunity, as applicable. | Sections 2.4; 2.5; Appendix D | | | | |
| **P5 (A3)** | The plan must document how the public had an opportunity to be involved in the current planning process and what that participation entailed, including how underserved communities and vulnerable populations within the planning area were provided an opportunity to be involved. | Section 2.6; Section 7.4 | | | | |
| **P6 (A4)** | The plan must document what existing plans, studies, reports and technical information were reviewed and how they were incorporated, if appropriate, into the development/update of the plan. | Section 3; Section 6; Section 7.3.; Table 7.1; Section 7.5 | | | | |
| **P7 (A4)** | For jurisdictions with structures for which National Flood Insurance Program (NFIP) coverage is available, regulatory flood mapping products are required to be incorporated, if applicable. Participants may use other jurisdiction-specific materials, including non-regulatory flood mapping products, that improve upon NFIP regulatory flood mapping products. | Section 5.6; Section 6.8 | | | | |

***FEMA Guidance Notes:***

Document means to provide factual evidence for how the participants developed/updated the plan. Documentation may include narrative descriptions, copies of meeting minutes, sign-in sheets, or newspaper articles. Examples of documentation of public involvement/feedback may include, but are not limited to, narratives, materials from open meetings, screenshots of social media postings and/or interactive websites with drafts for public review and comment, questionnaires or surveys through utility bills, etc.

Involvement means being engaged and actively participating in the development of the plan; providing input and directly providing, affecting or editing plan content as the representative of the participating jurisdiction(s) or organization.

Stakeholders include local and regional agencies involved in hazard mitigation activities; agencies that have the authority to regulate development; neighboring communities; representatives of business, academia, and other private organizations; representatives of nonprofit organizations.

An opportunity to be involved in the planning process means that these stakeholders are invited to be engaged or are asked to provide information or input to inform the plan's content.

Public Participation: The opportunity must occur during the plan's development, meaning prior to the plan's submission for formal review. In addition, the plan must document how public feedback was included throughout the planning process.

Examples for P6: state hazard mitigation plan; local plans (such as comprehensive/master/general land use, economic development, capital improvement, affordable housing, resource management, resilience, climate, etc.); and hazard-specific reports and plans (such as Community Wildfire Protection Plans).

## APPENDIX B: LOCAL MITIGATION STRATEGY CROSSWALK

| Risk Assessment (FEMA Element B) | | Location in Plan | Met | Not Met | Reviewer Comments | Required Revisions |
|---|---|---|---|---|---|---|
| R1 (B1-a) | The plan must include a **description** of all natural hazards that can affect the jurisdiction(s) in the planning area and their assets, such as dams, located outside of the planning area. | Section 4 | | | | |
| R2 (B1-a) | The plan must provide rationale for the omission of any natural hazards that are commonly recognized to affect the jurisdiction(s) in the planning area. | Section 4 Page 4:5 | | | | |
| R3 (B1-b) | The plan must include information on **location** for each identified hazard. | Section 5 | | | | |
| R4 (B1-c) | The plan must provide the **extent** of the hazards that can affect the planning area. | Section 5 | | | | |
| R5 (B1-d) | The plan must include information on **previous occurrences** for each hazard that affects the planning area. At a minimum, this includes any state and federal major disaster declarations for the planning area since the last update. | Section 5 | | | | |
| R6 (B1-e) | The plan must include the **probability** of future events for the identified hazards that can affect the planning area. | Section 5 | | | | |
| R7 (B1-f) | For multi-jurisdictional plans, when hazard risks differ across the planning area and between participating jurisdictions, the plan must specify the unique and varied risk information for each applicable jurisdiction and their assets outside the planning area. | Section 6; Appendix E; Appendix F | | | | |
| R8 (B2-b) | The plan must describe the potential **impacts** on each participating jurisdiction and its identified assets. | Section 6 | | | | |
| R9 (B2-a) | The plan must describe the **overall vulnerability** of each participant to the identified hazards. | Section 6; Appendix E; Appendix F | | | | |
| R10 (B2-a) | For plan updates, the risk assessment must meet Element E1-a (Changes in Development). | Section 3.5; Section 5.19; Section 7 | | | | |
| R11 (B2-c) | The plan must address repetitively flooded NFIP-insured structures by including the estimated numbers and types (residential, commercial, institutional, etc.) of repetitive/severe repetitive loss properties for **each jurisdiction**. | Section 5.6 | | | | |

***FEMA Guidance Notes:***

Description means to provide a narrative description or definition.

Location is defined as the unique geographic boundaries within the planning area, or assets that may be affected by the identified hazard. If maps are used, provide sufficient detail and scale to clearly identify the hazard locations within and/or affecting assets owned by the participating jurisdiction(s). If narrative descriptions are used, the must contain enough detail to clearly identify the area(s) that will be affected by the hazard.

Extent is defined as the range of anticipated intensities of the identified hazards. Extent is most commonly expressed using various scientific scales. When using scales, the plan must document how the scale applies to each jurisdiction.

## APPENDIX B: LOCAL MITIGATION STRATEGY CROSSWALK

| Mitigation Strategy (FEMA Element C) | | Location in Plan | Met | Not Met | Reviewer Comments | Required Revisions |
|---|---|---|---|---|---|---|
| S1 (C1-a) | The plan must describe how the existing authorities, policies, programs, funding, and resources of **each participant** are available to support the mitigation strategy. This must include a discussion of the existing building codes and land use and development ordinances or regulations. Capabilities may be described in a table or narrative. | Section 7; Table 7.1 | | | | |
| S2 (C1-b) | The plan must describe the ability of **each participant** to expand on and improve the capabilities described in the plan (see S1). | Section 7; Table 7.1 | | | | |
| S3 (C2-a) | The plan must describe participation in the NFIP for **each participant**, as applicable, in accordance with NFIP regulatory requirements (see reviewer notes). | Section 5.6; Section 7 | | | | |
| S4 (C3-a) | The plan must include **goals** to reduce the risk of the identified hazards. | Section 8 | | | | |
| S5 (C4-a) | The mitigation strategy must include an analysis of a comprehensive range of actions or projects that the participants considered to specifically address vulnerabilities identified in the risk assessment. | Section 8.3; Section 8.4 | | | | |
| S6 (C4-b) | **Each plan participant** must identify one or more mitigation actions the participant(s) intends to implement for each hazard addressed in the risk assessment. | Section 9 | | | | |
| S7 (C5-a) | The plan must describe the criteria used for prioritizing the implementation of the actions. The criteria must include an emphasis on the extent to which benefits are maximized, in relation to the associated costs of the action. | Table 8.1; Section 9 | | | | |
| S8 (C5-b) | The action plan must identify who is responsible for administering each action, along with the action's potential funding sources and expected time frames for completion. | Section 9; Table 9.2 | | | | |

***FEMA Guidance Notes:***

Discussion means a narrative or other materials that provide context on a section of the plan. Describing current capabilities provides a rationale for which mitigation projects can be undertaken to address the vulnerabilities identified in the Risk Assessment.

For C1-b: If participants do not have the ability or authority to expand and/or improve their capabilities, the plan must describe the lack of ability or authority.

For C2-a: The following information must be provided for each participant: adoption of NFIP minimum floodplain management criteria via local regulation; adoption of the latest effective Flood Insurance Rate Map (if applicable); Implementation and enforcement of local floodplain management regulations to regulate and permit development in SFHAs; appointment of a designee or agency to implement the addressed commitments and requirements of the NFIP; and description of how participants implement the substantial improvement/substantial damage provisions of their floodplain management regulations after an event. Simply stating "The community will continue to comply with the NFIP" is not sufficient to meet the requirement.

Goals are broad, long-term policy and vision statements that explain what is to be achieved by implementing the mitigation strategy. The goals must be consistent with the hazards identified in the plan. Goals may be presented as general statements applying to more than one hazard, or they may be itemized to each of the identified hazards.

A mitigation action is a measure, project, plan, or activity proposed to reduce current and future vulnerabilities described in the risk assessment. These actions must be achievable and demonstrate how the mitigation activities reduce the risks identified in the risk assessment.

# APPENDIX B: LOCAL MITIGATION STRATEGY CROSSWALK

| Plan Maintenance (FEMA Element D) | | Location in Plan | Met | Not Met | Reviewer Comments | Required Revisions |
|---|---|---|---|---|---|---|
| **M1 (D1-a)** | The plan must describe how the participant(s) will continue to seek public participation after the plan has been approved and during the plan's implementation, monitoring, and evaluation. | Section 10.1 | | | | |
| **M2 (D2-a)** | The plan must identify how, when and by whom the plan will be tracked for implementation over its five-year cycle (**monitoring**). | Section 10.2 | | | | |
| **M3 (D2-b)** | The plan must identify how, when and by whom the plan will be assessed for effectiveness at achieving its stated purpose and goals (**evaluating**). | Section 10.2 | | | | |
| **M4 (D2-c)** | The plan must identify how, when and by whom the plan will be reviewed and revised at least once every five years (**updating**). | Section 10.2 | | | | |
| **M5 (D3-a)** | The plan must describe the community's process to **integrate** the plan's data, information, and hazard mitigation goals and actions into other **planning mechanisms**. | Section 10.2 | | | | |
| **M6 (D3-c)** | A multi-jurisdictional plan must describe **each participant's** individual process for integrating information from the mitigation strategy into their identified planning mechanisms. | Section 10.2 | | | | |
| **M7 (D3-b)** | The plan must identify the local planning mechanisms where hazard mitigation information/actions may be integrated. The identified list of planning mechanisms must be applicable to the plan participant(s) and not contradict the identified capabilities. | | | | | |

***FEMA Guidance Notes:***

For D1-a: The plan may contain a narrative description or an itemized list of steps, demonstrating the prescribed method that will be followed to obtain future public participation.

Monitoring means tracking the implementation of the plan over time. For example, monitoring may include a system for tracking the status of the identified hazard mitigation actions.

Evaluating means assessing the effectiveness of the plan at achieving its stated purpose and goals.

Updating means reviewing and revising the plan at least once every five years.

Integrate means to include hazard mitigation principles, vulnerability information and mitigation actions into other existing community planning to leverage activities that have co-benefits, reduce risk and increase resilience.

Planning mechanisms refer to the governance structures used to manage local land use development and community decision-making.

For a multi-jurisdictional integration plan, this element may be met with a general narrative description if the process is applicable to each of the plan participants; however, any participant who cannot apply the same process as other plan participants must include their unique process for integration.

# APPENDIX B: LOCAL MITIGATION STRATEGY CROSSWALK

| Plan Update (FEMA Element E) | | Location in Plan | Met | Not Met | Reviewer Comments | Required Revisions |
|---|---|---|---|---|---|---|
| U1 (E1-a) | The plan must describe changes in development that have occurred in hazard-prone areas and how they have increased or decreased the vulnerability of **each jurisdiction** since the previous plan was approved. | Section 5.19 | | | | |
| U2 (E2-a) | The plan must describe how it was revised due to a change in priorities for **each jurisdiction**. | Section 8.5 | | | | |
| U3 (E2-b) | The plan must describe the status of all hazard mitigation actions in the previous plan by identifying whether they have been completed or not, for each jurisdiction. | Initiative List | | | | |
| U4 (E2-c) | The updated plan must explain how the jurisdiction(s) integrated information from the mitigation plan into other planning mechanisms, as a demonstration of progress in local hazard mitigation efforts. If information from the previous plan was not integrated into other planning mechanisms, this must be stated. | VA? CIP? | | | | |

***FEMA Guidance Notes:***

Changes in development means recent development, potential development, or conditions that may affect the risks and vulnerabilities of the jurisdictions or shifts in the needs of underserved communities or gaps in social equity. This can also include changes in local policies, standards, codes, regulations, land use regulations and other conditions. If no development changes affected the jurisdiction's overall vulnerability, this must be stated with the plan.

Description of Priorities: A description of priorities is defined by the participant(s). If the participant(s) has no change in priorities since the last approval of the mitigation plan, this must be stated. This can be a narrative or with detailed statements in appropriate sections of the plan.

Actions: For actions that are not complete, the plan must state whether the action is no longer relevant or will be included in the updated action plan.

| Plan Adoption (FEMA Element F) | | Location in Plan | Met | Not Met | Reviewer Comments | |
|---|---|---|---|---|---|---|
| A1 (F1-a) | The jurisdiction must provide documentation of plan adoption, usually a resolution by the governing body or other authority, to receive approval. | Appendix A | | | | |
| A2 (F2-a) | To receive approval, the participants must adopt the plan and provide documentation that the adoption has occurred. | Appendix A | | | | |

***FEMA Guidance Notes:***

Jurisdiction Adoption: **At least one** adoption resolution should be transmitted through the State to FEMA for the LMS Plan to be officially approved. The remaining resolutions may be transmitted as they are completed.

Documentation may be provided in the form of meeting minutes, resolutions, signed letter or any other method to demonstrate that official adoption by the participant has occurred.

Participants that submit their adoption documentation separately from the other multi-jurisdictional plan participants will not receive a new expiration date.

Participating jurisdictions that adopt the plan **more than one year** after Approvable Pending Adoption (APA) status has been issued must either: Validate that their information in the plan remains current with respect to both the risk assessment and their mitigation strategy OR Make the necessary updates before submitting the adoption resolution to FEMA.

## MULTI-JURISDICTION SUMMARY SHEET

**INSTRUCTIONS:** For multi-jurisdictional plans, this Summary Spreadsheet lists each participating jurisdiction, and outlines whether they met each required Element. As jurisdictions adopt the approved plan, Column H will be filled out. This Summary Sheet does not imply that a jurisdiction-specific mitigation plan be developed for each jurisdiction, instead **simply fill in the names and type of each jurisdiction (columns B and C)** participating in the Plan.

| MULTI-JURISDICTIONAL SUMMARY SHEET | | | | | | | |
|---|---|---|---|---|---|---|---|
| # | Jurisdiction Name | Type of Jurisdiction (school board, non-profit, special district, city, town, etc.) | Requirements Met (Y/N) | | | | |
| | | | A. Planning Process | B. Hazard Identification & Risk Assessment | C. Mitigation Strategy | D. Plan Review, Evaluation & Implementation | E. Plan Adoption |
| 1 | County | | X | Y | Y | Y | |
| 2 | Daytona Beach | | Y | Y | Y | Y | |
| 3 | Daytona Beach Shores | | Y | Y | Y | Y | |
| 4 | DeBary | | Y | Y | Y | Y | |
| 5 | DeLand | | Y | Y | Y | Y | |
| 6 | Deltona | | Y | Y | Y | Y | |
| 7 | Edgewater | | Y | Y | Y | Y | |

| 19 | Advent Health | | Y | Y | | | |
| 20 | Daytona Beach Airport | | Y | Y | | | |

## APPENDIX B: LOCAL MITIGATION STRATEGY CROSSWALK

***This Hazard Review Checklist will be filled out by the FDEM State Reviewers during their review.***

### HAZARD REVIEW CHECKLIST

| Hazard Name | Description of Hazard | Location | Extent | Previous Occurrences (Updated) | Probability | Impacts | Effects of Climate Change | Overall Vulnerability | Jurisdictional Risk Assessment *(Y/N)* |
|---|---|---|---|---|---|---|---|---|---|
| Coastal Erosion | 39 | 39 - names specific areas of the beach | 43 - defined by the erosion rate | 40-41 - description of historical | 43 - Probability defined when you are talking about Loss rates | 164 - 166 | 164 - 166 | 164 - 166 | Y |
| Drought | 44 | 44 | 45 - Drought monitor intensities | 46-47 | 47 - high | 167 - 168 | 167 - 168 | 167 - 168 | Y |
| Cold | 49 | 49 - What areas in Volusia would be impacted by the hazard? | 49 - surface air for 3 or more days | 50 | 49-50 - low | 169 - 171 | 169 - 171 | 169 - 171 | Y |
| Heat | 49 | 49<br>171 High temp risk map | 50 - 3-10 days<br>99+ | None - What was the previous occurrence within the last 5 years? | 50 - low | 169 - 171 | 169 - 171 | 169 - 171 | Y |
| Flood | 52 | p 54 - FIRM map<br>176 - FEMA Hazard Zones | 53 - defines floodplains<br>173 - Advisories | 55-58 | 60 - high | 172 - 176 | 172 - 176 | 172 - 176 | Y |

| | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| Storm Surge | 65 | 67 - storm surge map | 65 | 68 | 69 - high Double sentence about sea level rise increase | 179 - 184 | 179 - 184 | 179 - 184 | Y |
| Sea Level Rise | 65 | 65 | 66 - no extent | 68 - nothing since 2016, state so | 69 - low | 179 - 184 | 179 - 184 | 179 - 184 | Y |
| Tsnuamis | 65 | 66 | 66 - no extent | 68 - nothing since 2008 - state so | 69 - low | 179 - 184 | 179 - 184 | 179 - 184 | Y |
| Hail | 72 | 74 - entirety of county - Could this be Volusia County and its Jurisdictions? | what are the advisories? | 76 - 83 | 100 - high | 185 - 187 | 74<br>185 - 187 | 185 - 187 | Y |
| Lightning | 72 | 75 | what are the advisories? | 84 - 87 | 100 - high | 186 - 187 | 74<br>185 - 188 | 186 - 187 | Y |
| Thunderstorms | 72 | 75 | what are the advisories? | 88 - 99 | 100 - high | 187 - 187 | 74<br>185 - 189 | 187 - 187 | Y |
| Tornado | 101 | 103 - uniformly exposed | 101 | 103 - 114 | 116 - high | 188 - 190 | 116<br>188 - 190 | 188 - 190 | Y |
| Tropical Cyclones | 117 | 119 - emphasis on coastal areas | 117 | 120 - 121 | 126 - high | 191 - 199 | 191 - 199 | 191 - 199 | Y |
| Wildland Fire | 127 | 128 - uniformly exposed, WUI map | what constitutes as a wildfire? | 130 - nothing after 2018, state so | 131 - high | 127 in the background has good impacts<br>200 - 203 | 200 - 203 | 201 - 203 | Y |

# Meeting Information

This section of the Volusia Local Mitigation Strategy includes documentation (agendas, sign-in sheets, other items) for the meetings held as part of the planning process. The planning team held four meetings, which are summarized below:

- **Public Kickoff Meeting**
  - September 20, 2024
  - The Working Group's Quarter 3 Meeting was open to the public. This meeting was held at the Volusia County Emergency Operations Center, 3825 Tiger Bay Road. The goal was to begin the public engagement process. The objective was to inform the Working Group and the public on the progress made up to that point and to discuss any updates needed to the priority project list.

- **Public Engagement Meetings**
  - November 25 and 26, 2024
  - Two public meetings were held to inform the public of the planning process and the overall scope of the 2025 Volusia County Local Mitigation Strategy. Maps and a draft plan were provided and general items within the plan were discussed. Special attention was given to community members' needs and recommendations for the plan.

- **Volusia Prepares Meeting and Conclusion Meeting for Public**
  - December 13, 2024
  - The next Local Mitigation Strategy Meeting was held at the Volusia County Emergency Operations Center, 3825 Tiger Bay Road. The purpose of this meeting was to show the jurisdictions and the public the draft plan and obtain comments and feedback.

Documentation for these meetings is found on the following pages of this appendix, including:

- Sign-In Sheets
- Agendas
- Press Releases
- Presentation Slides

Good Afternoon Everyone,

This is a friendly reminder about the upcoming Volusia Prepares (LMS) quarterly meeting, scheduled for this Friday, September 20th, at 9:00 AM at the Emergency Operations Center.

Please find the meeting agenda and minutes from our last quarterly meeting attached.

If you have any questions or need further information, feel free to reach out

Best Wishes,
Yolanda

**Subject:** LMS Quarterly Meeting

Good Afternoon All:

This is a friendly reminder that our quarterly LMS meeting is scheduled for this Friday, December 13th, at 9:00 AM at the EOC.

Attached, you will find the agenda for the meeting, as well as the minutes from the September 20th meeting for your review.

If you have any questions, please don't hesitate to reach out.

Best Wishes,
Yolanda

Yolanda Buckles, FPEM
Planner II
Volusia County Emergency Management
3825 Tiger Bay Rd., Suite 102
Daytona Beach, FL 32124
386.254.1500 ext 11027

AGENDA
Local Mitigation Working Group Meeting
September 20, 2024, 9:00 AM
Program Coordinator: Yolanda Buckles
EOC – Ops Room
3825 Tiger Bay Rd. Ste. 102, Daytona Beach, FL 32124

- Welcome/Introductions
- Approval of meeting minutes from June 21, 2024
- Update of Hurricane Ian, Hurricane Nicole and Hurricane Idalia HMGP initiatives
- Update on any 2023 FMA initiatives
- Present any new initiatives to be added to the LMS Initiative List
- 2025-2030 Local Mitigation Strategy (LMS) Public Kickoff
- Training Plan
- Open Discussion

Next Quarterly Meeting will be December 13

AGENDA
Local Mitigation Working Group Meeting
December 13, 2024, 9:00 AM
Program Coordinator: Yolanda Buckles
EOC – Ops Room
3825 Tiger Bay Rd. Ste. 102, Daytona Beach, FL 32124

- Welcome/Introductions
- Approval of meeting minutes of September 20, 2024
- Update of Hurricane Ian, Hurricane Nicole and Hurricane Idalia HMGP initiatives
- Update on any 2023 FMA initiatives
- Present any new initiatives to be added to the LMS Initiative List
- 2025-2030 Local Mitigation Strategy (LMS) Update
- Open Discussion

Next Quarterly Meeting to be determined

# 2025-2030 LOCAL MITIGATION STRATEGY PUBLIC KICKOFF

Volusia County Emergency Management and the East Central Florida Regional Planning Council

September 20, 2024

Images: Volusia County Emergency Management Logo and East Central Florida Regional Planning Council Logo

# Overview of LMS & FMP

- Local Mitigation Strategy (LMS) is a 5-year plan that anticipates damage and disruption that could result from a disaster and then determines how best to eliminate or at least reduce this damage.
  - Focuses on most relevant hazards
- The Floodplain Management Plan (FMP) is a plan that supports the National Flood Insurance Program to: identify known flood problem areas, establish goals, objectives, and implementation programs, and support the reduction in flood insurance costs.

# LMS & FMP- Goals & Objectives

- LMS Working Group
  - Updated LMS goals and objectives have been updated through Working Group meetings
  - FMP goals and objectives have been updated based on conversations in these meetings
  - Awaiting feedback from Working Group: requested no later than **Sept. 30**

# LMS Updated Goals

| | |
|---|---|
| Strengthen | GOAL 1: Strengthen effective hazard mitigation programming through policies, regulations, and technology through local government collaborations. |
| Endeavor | GOAL 2: Local government will endeavor to have resilient critical infrastructure that supports operations before, during, and after disasters. |
| Encourage | GOAL 3: Encourage economic sustainability within the community. |
| Enhance | GOAL 4: Enhance the whole community's understanding of the hazards and the techniques used to minimize vulnerability. |

# Individual Jurisdictional Goals & Objectives within the FMP

Each municipality has a section within the FMP stating goals and objectives to be worked towards in the next five years

Working Group: feedback and updates to those goals **Sept 30**

# Additional Plan Updates

- Broad overview of the section updates:
  - Community profile has been updated to include most recent census data
  - Hazards have been refined to include additional risks and broaden the scope of disasters
  - Hazard profiles have been updated to include recent occurrences within the past 5 years
  - Vulnerability assessment is being conducted in partnership with Volusia County's Environmental Management
  - Capability assessment will be using information collected from surveys

- Mitigation plan and strategies will mainly consist of the Quarter 3 priority list
- Al data and maps are being updated currently
- Public meetings are October 7 & 8
  - Daytona Beach Library and Deland Library

# THANK YOU!

Please join us for a deeper dive into the draft in October!

# LOCAL MITIGATION STRATEGY QUARTER 4 MEETING

Prepared by the East Central Florida Regional Planning Council with Volusia County Emergency Management

Friday, December 13, 2024

Images: Volusia County Emergency Management Logo and East Central Florida Regional Planning Council Logo

# Overview of LMS & FMP

- Local Mitigation Strategy (LMS) is a 5-year plan that anticipates damage from a disaster to determine how to eliminate or reduce damage.
  - All hazards
  - Whole community
- The Floodplain Management Plan (FMP) is a plan that supports the National Flood Insurance Program to: identify known flood problem areas, establish goals, implement programs, and reduce flood insurance costs.

# Identified Natural Hazards in LMS

- Agriculture
- Coastal Erosion
- Drought
- Extreme Temperature (heat & cold)
- Flood
- Tropical Cyclones
- Public Health Emergencies
- Rising Coastal Waters (storm surge, sea level rise, & tsunamis)
- Severe Weather (hail, lightning, & thunderstorms)
- Tornado
- Wildland Fire

# Identified Manmade/Technological Hazards in LMS

- Civil Disturbance
- Mass Migration
- Terrorism
- Coastal Oil Spill
- Critical Infrastructure Failure
- HazMat/Industrial Incident

# LMS Example Projects

- Generators
- Home elevations
- Basin Improvements
- Hardening lift stations
- Sewer improvements

# Survey Results Overview

- Public Survey for residents: 136
- HOA: 4
- Local businesses: 6

# Public Survey

- 50% have lived in home for 10+ years
- 61% are very concerned about flooding in their home (83 people)
- 39% had flooding in 2022; 25% had flooding in 2024
- 82% of residents have noticed an increase in duration and frequency

# HOA Survey

- 75% believe property owners are very concerned about flooding
- All have noticed an increase in flooding
- Communities represented: DeBary, Deland, Port Orange, Unincorporated Volusia

# Business Survey

- 50% are NOT concerned about flooding
- 33% of participants have flooded
- Financial impacts of concern: loss of business, days, employees unable to work, profit loss, property damage

# Additional Public Feedback

- Public comments brought up in two outreach sessions will be consolidated and incorporated into the LMS
  - November 25 and 26, 2024
- Additional comments taken today

THANK YOU!

# 25-2030 LOCAL MITIGATION STRATEGY AND FLOODPLAIN MANAGEMENT PLAN PUBLIC MEETINGS

Prepared by the East Central Florida Regional Planning Council with Volusia County Emergency Management

November 25 & 26, 2024

Images: Volusia County Emergency Management Logo and East Central Florida Regional Planning Council Logo

# History

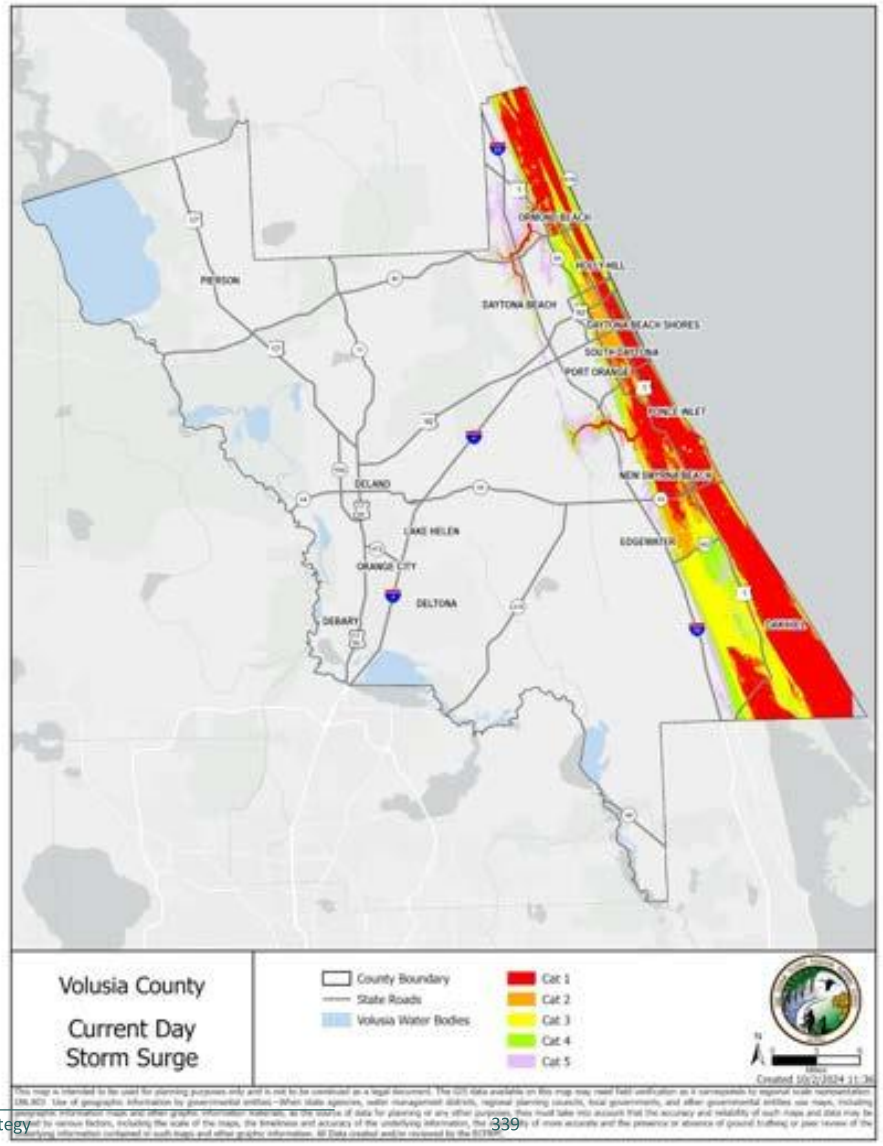
- Volusia County's hazard mitigation planning efforts began in 1997 with the formation of the Volusia Prepares Committee
- First LMS in 1999 (adopted 2000), as part of the Florida Department of Community Affairs LMS Initiative
- The previous version of the LMS, prior to this 2025 version, was updated and adopted in 2020

# Overview of LMS & FMP

- Local Mitigation Strategy (LMS) is a 5-year plan that anticipates damage from a disaster to determine how to eliminate or reduce damage.
  - All hazards
  - Whole community
- The Floodplain Management Plan (FMP) is a plan that supports the National Flood Insurance Program to: identify known flood problem areas, establish goals, implement programs, and reduce flood insurance costs.

# LMS Updated Goals

| | |
|---|---|
| Strengthen | GOAL 1: Strengthen effective hazard mitigation programming through policies, regulations, and technology through local government collaborations. |
| Endeavor | GOAL 2: Local government will endeavor to have resilient critical infrastructure that supports operations before, during, and after disasters. |
| Encourage | GOAL 3: Encourage economic sustainability within the community. |
| Enhance | GOAL 4: Enhance the whole community's understanding of the hazards and the techniques used to minimize vulnerability. |



# LMS & FMP- Project Lists

- Create a Master Initiatives List
- Makes county eligible for the Hazard Mitigation Grant Program (HMGP) funding through Florida's Division of Emergency Management (FDEM) and FEMA
- Grant funds are intended to bring mitigation projects to fruition that would end up on a wish list otherwise.

# Community Profile

- Age (2022):
  - Median age for the County was **46.6 years**
  - State median age of **42.7 years** of age
  - Roughly 25% of residents in Volusia are over 65
- Housing (2022):
  - Median value of owner-occupied housing units was **$251,400**
  - **$178,700** average in Florida
  - **$193,500** national average

Image of current day storm surge impacting Volusia County. This map is organized by hurricane category using the SLOSH model (Sea, Lake, and Overland Surges from Hurricanes model is a computer program that estimates storm surge heights caused by tropical cyclones). This map has been approved by FDEM.

# Overview of Required Updates

- Community profile has been updated to include most recent census data
- Hazards have been refined to include additional risks and broaden the scope of disasters
- Hazard profiles have been updated to include recent occurrences within the past 5 years
- Vulnerability assessment is being conducted in partnership with Volusia County's Environmental Management and information from the County's Property Appraiser

# Overview of Required Updates (Continued)

- Capability assessment will use information collected from surveys
- Mitigation plan and strategies will consist of the Quarter 3 & 4 priority list
- All data and maps are being updated currently

# We Need You!

- Public participation is vital to the success of the LMS/FMP
- Understanding individual homeowners' capabilities to withstand and respond to disasters is crucial for county to understand the **NEEDS** of the whole community

# APPENDIX D: CRITICAL FACILITY VULNERABILITY ASSESSMENT

This section of the Local Mitigation Strategy cross-references the locations of all critical facilities within Volusia County and its jurisdictions with environmental layers pertaining to the following hazard layers:

- Storm Surge Threat
- Fire Risk Zone
- Wind Risk
- FEMA Flood Zone

There are over 500 critical facilities identified within Volusia County and its jurisdictions. The critical facilities covered in this report cover the following types of facilities.

- Transportation
- Public Buildings
- Waste Water Systems
- Medical Facilities
- Schools
- Educational Facilities

Also covered in this section are **Water and Sewage Treatment Facilities**.

The tables on the following pages depict the critical facilities, by jurisdiction and facility type, that are located within Volusia County, Florida. Each critical facility is cross-referenced with the hazard zones to depict risk for the hazards listed above. This analysis involves numerous sources, such as:

- HAZUS
- National Hurricane Center
- U.S. Forest Service
- FEMA
- American Society of Civil Engineers
- ECFRPC
- Volusia County and Jurisdictions
- FDEP

**Table 1: Jurisdictional Summary of Critical Assets**

| Jurisdiction | Jurisdiction Type | # of Assets | Total Financial Exposure (Assets) | Mean Year Built (Assets) |
|---|---|---|---|---|
| **Volusia County** | County | 578 | $10,940,822,969 | 1984 |
| **Daytona Beach** | City | 74 | $3,407,757,509 | 1975 |
| **Daytona Beach Shores** | City | 2 | $8,741,800 | 1984 |
| **Debary** | City | 7 | $1,481,752,946 | 1993 |
| **DeLand** | City | 47 | $1,077,176,288 | 1976 |
| **DeLeon Springs** | Census Designated Place | 3 | $137,054,550 | 1984 |
| **Deltona** | City | 27 | $431,515,600 | 1986 |
| **Edgewater** | City | 14 | $421,779,479 | 1979 |
| **Holly Hill** | City | 10 | $170,752,230 | 1978 |
| **Lake Helen** | City | 6 | $35,579,280 | 1987 |
| **New Smyrna Beach** | City | 28 | $571,274,878 | 1975 |
| **Oak Hill** | City | 4 | $ 21,068,949 | 1983 |
| **Orange City** | City | 9 | $277,059,730 | 1985 |
| **Ormond Beach** | City | 31 | $314,347,059 | 1982 |
| **Pierson** | City | 4 | $52,222,180 | 1982 |
| **Ponce Inlet** | City | 2 | $ 8,741,800 | 1993 |
| **Port Orange** | City | 22 | $789,670,500 | 1985 |
| **South Daytona** | City | 6 | $33,242,490 | 1977 |
| **Enterprise** | Unincorporated Community | 2 | $10,662,390 | 1983 |

# APPENDIX F: HAZARD IDENTIFICATION RISK ANALYSIS (HIRA) CAPABILITY TARGETS

This section of the report details the core capability targets and resource requirements for some natural, man-made, and technological hazards covered in the Local Mitigation Strategy. The tables provided for each hazard are based on the template created as part of the Threat and Hazard Identification and Risk Assessment Guide (Second Edition) created by the U.S. Department of Homeland Security.

The following hazards are covered within this portion of the THIRA analysis:

- Drought
- Extreme Temperatures
- Flood
- HazMat Incident
- Public Health Emergency
- Sea Level Rise
- Severe Weather
- Storm Surge
- Terrorism
- Tornado
- Tropical Cyclone
- Wildland Fire

## Drought

| Drought | |
|---|---|
| **Context Description** | It is the beginning of summer. East central Florida is in a severe drought, as it has not rained in two months in Volusia County. The drought has caused brushfires to start in the western portions of the County. Dehydration-related deaths in the County have reached 10 since January. |
| | |
| **Core Capability** | |
| **Capability Target** | Community Resilience; Prescribed Burns, Long Term Vulnerability Reduction, Mass Care Services, Mass Search/Rescue, Aerial Reconnaissance and GIS Mapping of Fire, Aerial Firefighting Services (Regional, State, Federal), Inter-County Cooperation and Resource Sharing, Operational Communication/ Coordination, Planning, Public/Private Services, Health/Medical Service, Public Info/Warning, Risk Resilience Management, Threat/Hazard Identification, Health/Medical Services, Rapid Medical Air Transport |
| | |
| **Resource Requirement** | |
| **Resources** | **Number Required** |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |

## Extreme Temperatures

| Extreme Temperatures | |
|---|---|
| **Context Description** | It is mid-August and temperatures reach 110 degrees Fahrenheit for five straight days. Students returning to school are beginning to be hospitalized for heat stroke and other heat-related illnesses, and multiple elderly residents have passed away as a result of heat stroke. |
| | |
| **Core Capability** | |
| **Capability Target** | Health/Medical Services; Rapid Medical Air Transport; Mass Care Services; Public Info/Warning Systems; Social Media and Media Outreach; School District Coordination with Schools; Medical Training for School Staff Member(s); Intensive Care Unit; Response for Environmental/Health/Safety; Fatality Management; Coordination with the Federal/State Government; Coordination with the Red Cross |
| | |
| **Resource Requirement** | |
| **Resources** | **Number Required** |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |

## Flood

| Flooding | |
|---|---|
| **Context Description** | A large tropical low has formed off of the coast of Florida and has been held stationary by the presence of a low pressure system moving southward from northern Florida for over three days. An estimated 50% of the parcels within Flood Zone 'A' are affected, 50% of the parcels within Flood Zones 'AH', 'AO' and 'AE' are affected, 75% of the parcels within Flood Zone 'VE' are affected, and 1% of the parcels within Flood Zone X (500-Year Floodplain) are affected. The storm affects the building and assessed values of the parcels hit by an estimated 10%. |
| | |
| **Core Capability** | |
| **Capability Target** | Community Resilience, Critical Transportation, Economic Recovery, Environmental Response, Health and Social Services, Housing, Infrastructure Systems, Long Term Vulnerability Reduction, Mass Care Services, Mass Search/Rescue, Natural and Cultural Resources, On-Scene Security/Protection, Operational Communication/Coordination, Planning, Public/Private Services, Health/Medical Service, Public Info/Warning, Risk Resilience Management, Risk Management Programs, Situational Assessment, Threat/Hazard Identification |
| | |
| **Resource Requirement** | |
| **Resources** | **Number Required** |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |

## HazMat Incident

| HazMat Incident | |
|---|---|
| **Context Description** | A train traveling along the Florida East Coast Railway crashes into Dubious Chemz, a chemical facility located along the Florida East Coast Railway line in unincorporated Volusia County. The train is not carrying hazardous materials, but the impact with the chemical facility triggers a simultaneous release of 26,000 pounds of chlorine stored in the facility into the air. Wind is registered at 5 miles per hour from the east southeast, humidity is 50% and the air temperature is 85 degrees Fahrenheit. The constant chemical leak lasts for exactly one hour, at which point all 26,000 pounds of chlorine have been released. |
| | |
| **Core Capability** | |
| **Capability Target** | Community Resilience, Critical Transportation, Economic Recovery, Response for Environmental/Health/Safety, Fatality Management, Forensics/Attribution, Health/Social Services, Infrastructure Systems, Intelligence/Information Sharing, Interdiction/Disruption, Long Term Vulnerability Reduction, Mass Care Services, Mass Search/Rescue, Natural and Cultural Resources, On-Scene Security and Protection, Operational Communication, Operational Coordination, Planning, Public/Private Services and Response, Health/Medical Services, Public Info/ Warning, Risk Resilience Management, Risk Management Programs, Screen/ Search/ Detect, Situational Assessment, Threat/Hazard Identification |
| | |
| **Resource Requirement** | |
| **Resources** | **Number Required** |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |

## Public Health Emergency

| Public Health Emergency | |
|---|---|
| **Context Description** | An airplane landing at Daytona Municipal Airport carrying 234 passengers becomes overwhelmed by a NLV-like pandemic that sickens 80% of the passenger. After the passengers de-board the plane without a health check, the virus is airborne, has a 20% spread rate (20% of people who come in contact with the infected become infected) and is caught when a person with the sickness comes within 1 foot of a person with the pandemic. Moreover, of the 234 passengers affected with the sickness, those 234 passengers come in contact (or spread the disease) with an average of 7.5 persons per hour. The disease does not inflict casualties until at least 12 to 18 hours after the initial infection period, adding to the number of individuals who can be exposed to the disease from those infected individuals that are still alive. |
| | |
| **Core Capability** | |
| **Capability Target** | Access Control/ID Verification, Community Resilience, Economic Recovery, Response for Environmental/Health/Safety, Fatality Management, Health/Social Services, Intelligence/Information Sharing, Interdiction/ Disruption, Long Term Vulnerability Reduction, Mass Care Services, Mass Search/ Rescue, On-Scene Security and Protection, Operational Communication, Operational Coordination, Physical Protective Measures, Planning, Public/ Private Services and Response, Health/Medical Services, Public Info/ Warning, Risk Resilience Management, Risk Management Programs, Screen/ Search/ Detect, Situational Assessment, Supply Chain Integrity, Threat/Hazard Identification |
| | |
| **Resource Requirement** | |
| **Resources** | **Number Required** |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |

## Sea Level Rise

| Sea Level Rise | |
|---|---|
| **Context Description** | It is the year 2070. A neighborhood located on the barrier islands is beginning to flood frequently due to sea level rise, subsidence and other factors. Property owners are having a hard time selling their properties and the value of the properties is decreasing. |
| | |
| **Core Capability** | |
| **Capability Target** | Pre-Planning as part of the HMGP Program (Demolition, etc.); Sea Level Rise Vulnerability Assessments and Identified Countermeasures; Gray/Green Infrastructure (Sea Walls); Other Protective Measures; Community Resilience; Economic Recovery, Environmental Response, Health and Social Services, Housing, Infrastructure Systems, Long Term Vulnerability Reduction |
| | |
| **Resource Requirement** | |
| **Resources** | **Number Required** |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |

## Severe Weather

| Severe Weather | |
|---|---|
| **Context Description** | A youth sports team is caught in a severe thunderstorm and multiple members of the team are struck by lightning. The sports complex is located in a rural area of west Volusia, not close to any hospital facilities. Some patients need immediate hospital care while others have very minor injuries. |
| | |
| **Core Capability** | |
| **Capability Target** | Health/Medical Services; Rapid Medical Air Transport; Mass Care Services; Mass Search/Rescue; Public Info/Warning Systems; Social Media; National Weather Service Coordination; Regional EMS Support; Inter-Local Agreements for Medical Response; Intensive Care Unit; Medical Specialists |
| | |
| **Resource Requirement** | |
| **Resources** | **Number Required** |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |

## Storm Surge

| Storm Surge | |
|---|---|
| **Context Description** | A Category 3 Hurricane hits Volusia County, affecting a large portion of the county with storm surge damage. An estimated 60% of the parcels within the Category 1 Storm Surge zone are affected, 45% of the parcels within the Category 2 zone are affected, 30% of the parcels within the Category 3 zone are affected, 2% of the parcels within the Category 4 zone are affected and 1% of the parcels within the Category 5 zone are affected. |
| | |
| **Core Capability** | |
| **Capability Target** | Community Resilience, Critical Transportation, Economic Recovery, Environmental Response, Health and Social Services, Housing, Infrastructure Systems, Long Term Vulnerability Reduction, Mass Search/Rescue, Natural and Cultural Resources, On-Scene Security/Protection, Operational Communication/ Coordination, Planning, Public/Private Services, Health/Medical Service, Public Info/Warning, Risk Resilience Management, Risk Management Programs, Situational Assessment, Threat/Hazard Identification |
| | |
| **Resource Requirement** | |
| **Resources** | **Number Required** |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |

## Terrorism

| Terrorism | |
|---|---|
| **Context Description** | A terrorist of unknown domestic or international origin detonates an explosive at the Daytona 500 car race while attendees are exiting the stadium. There are immediate casualties, both fatal and non-fatal, including fatal injuries to the perpetrator. It is unknown whether or not the perpetrator acted alone. |
| | |
| **Core Capability** | |
| **Capability Target** | Federal Coordination of Assets and Intelligence (FBI, CIA); State Coordination of Assets and Intelligence (FDLE); Regional Coordination of Assets and Equipment (CFIX); COOP Planning; Economic Recovery Planning; Mass Care Services; Mass Search/Rescue; On-Scene Law Enforcement Response; Health/Medical Services; Physical Protective Measures; Public Information; Coordination through the Media, Social Media and Law Enforcement; Operational Communication, Operational Coordination |
| | |
| **Resource Requirement** | |
| **Resources** | **Number Required** |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |

## Tornado

| Tornado | |
|---|---|
| **Context Description** | A Category 3 Hurricane spawns several F1 tornadoes near the Ponce Inlet area. 100% of the parcels that are directly hit by the tornado are affected with 100% damage (as a percentage of building value), 50% of the parcels within 1/8 of a mile are affected with 75% damage, 20% of the parcels closer than 1/4 mile but farther than 1/8 mile away are affected with 20% damage, 5% of the parcels closer than 1/2 mile but farther than 1/4 mile away are affected with 2% in damage, and 1% of the parcels father than 1/2 mile away but less than one mile away are affected with minor, variable damage. |
| | |
| **Core Capability** | |
| **Capability Target** | Community Resilience, Economic Recovery, Environmental Response, Health and Social Services, Housing, Infrastructure Systems, Long Term Vulnerability Reduction, Mass Care Services, Mass Search/Rescue, Natural and Cultural Resources, On-Scene Security/Protection, Operational Communication/ Coordination, Planning, Public/Private Services, Health/Medical Service, Public Info/Warning, Risk Resilience Management, Risk Management Programs, Situational Assessment, Threat/Hazard Identification |
| | |
| **Resource Requirement** | |
| **Resources** | **Number Required** |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |

## Tropical Cyclone

| Tropical Cyclone | |
|---|---|
| **Context Description** | A Category 3 Hurricane hits Volusia County from the Atlantic Ocean, affecting a large portion of the county with wind damage. An estimated 60% of the parcels within the 111-115 Wind Zone are affected, while 25% of the parcels within the 106-110 Wind Zone and 10% of the parcels within the 105-110 Wind Zone are affected. |
| | |
| **Core Capability** | |
| **Capability Target** | Community Resilience, Economic Recovery, Environmental Response, Health and Social Services, Housing, Infrastructure Systems, Long Term Vulnerability Reduction, Mass Care Services, Mass Search/Rescue, Natural and Cultural Resources, On-Scene Security/Protection, Operational Communication/ Coordination, Planning, Public/Private Services, Health/Medical Service, Public Info/Warning, Risk Resilience Management, Risk Management Programs, Situational Assessment, Threat/Hazard Identification |
| | |
| **Resource Requirement** | |
| **Resources** | **Number Required** |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |

## Wildland Fire

| Wildland Fire | |
|---|---|
| **Context Description** | A wildfire spawns and spreads within a 'Very High Risk' area within Volusia County. The fire spreads, and as a result, 1% of the parcels within the 'Very High Risk' zone are affected, 0.5% of the parcels within the 'High Risk' zone are affected, 0.25% of the parcels within the 'Low Risk' zone are affected, and 0.1% of the parcels within the 'No Risk' or 'None' zone are affected. The fire affects parcels uniformly across hazard zones. |
| | |
| **Core Capability** | |
| **Capability Target** | Community Resilience, Economic Recovery, Environmental Response, Health and Social Services, Housing, Infrastructure Systems, Long Term Vulnerability Reduction, Mass Care Services, Mass Search/Rescue, Natural and Cultural Resources, On-Scene Security/ Protection, Operational Communication/ Coordination, Planning, Public/Private Services, Health/Medical Service, Public Info/Warning, Risk Resilience Management, Risk Management Programs, Situational Assessment, Threat/Hazard Identification; Prescribed Burns |
| | |

# Volusia County Integrated Floodplain Management Plan

## I. ACKNOWLEDGEMENTS

The East Central Florida Regional Planning Council would like to thank the Volusia Prepares Working Group for their participation in the preparation of this plan. The following jurisdictions were instrumental in the completion of this plan: Volusia County, Daytona Beach, Daytona Beach Shores, Debary, DeLand, Deltona, Edgewater, Holly Hill, Lake Helen, New Smyrna Beach, Oak Hill, Orange City, Ormond Beach, Pierson, Ponce Inlet, Port Orange, and South Daytona. Thank you to the Volusia County Division of Emergency Management for assisting in the plan development and coordination necessary for its success.

## II. INTRODUCTION

The National Flood Insurance Program (NFIP) provides federally supported flood insurance in communities that regulate development in floodplains. The Community Rating System (CRS) grades the various Community Floodplain Management Programs and reduces flood insurance premiums in those communities that meet certain requirements. In order to reduce the potential for personal/property losses in flood prone areas and ensure the lowest possible flood insurance premiums for our residents, Volusia County and the jurisdictions of Daytona Beach, Daytona Beach Shores, Debary, Deland, Deltona, Edgewater, Holly Hill, New Smyrna Beach, Oak Hill, Orange City, Ormond Beach, Pierson, Ponce Inlet, Port Orange and South Daytona have developed this Floodplain Management Plan (FMP) which includes specific jurisdictional plans. The Plan was developed and is updated with input from the Volusia County Volusia Prepares Working Group. In 2013, the Volusia Prepares Steering Committee voted unanimously to incorporate the Plan into the Local Mitigation Strategy.

Activity section 510 of the CRS Coordinator's Manual requires an annual update of the Plan's implementation to be made available to the local governing body (distributed electronically), the community, and the media. Copies of this plan are available for review at the Volusia County Emergency Management Division, 386-258-4088 or downloading a copy from the County's website, https://www.volusia.org/services/emergency-services/emergency-management/.

## III. BACKGROUND

This Floodplain Management Plan was developed by the East Central Florida Regional Planning Council for Volusia County and the jurisdictions within. The plan is designed to encompass a snapshot of floodplain hazards throughout the county and also provide separate jurisdictional plans developed as the appendices of the main plan. This design promotes a unified approach to mitigation and planning efforts and consistency across the county. As part of the planning process, this plan was integrated with the Volusia County Local Mitigation Strategy document (LMS). The LMS provides in-depth analysis of hazards and mitigation strategies. Various sections of the LMS have been identified throughout this Floodplain Management Plan in order to provide additional information for projects and analysis. The Volusia County Floodplain Management Plan follows the format and outline of the Community Rating System guidance.

## IV. PLANNING PROCESS

### A. Prepare the Plan

The 2025 Volusia County Floodplain Management Plan update was prepared by the East Central Florida Regional Planning Council (ECFRPC), a community planning office, in conjunction with the Volusia County Emergency Management Division, the Volusia County Growth and Resource Management Department and the jurisdictions within Volusia County. The planning team was staff from the ECFRPC and VCEM. The planning committee consisted of the Volusia Prepares LMS Working Group, Volusia County Growth and Resource Management, County CRS Coordinator, Floodplain Managers, and additional jurisdictional staff responsible for the implementation of floodplain management strategies, State Mitigation Officers and the Florida Division of Emergency Management. The planning process and committee were supported by the jurisdictional commissions, and the names of the planning team members (Volusia Prepares) are included below. These individuals acted as liaisons between the planning team (VCEM and ECFRPC) and city commissioners for support and adoption of the plan. Members were included in the beginning of the planning process via the Volusia Prepares meetings and were provided copies of the draft plan for comment before final plan adoption.

The following list are the members of the Volusia Prepares Working Group and supported the development of this plan.

- Justin Barton, Daytona Beach
- Angie Sehenuk, Daytona Beach
- Lori Irwin, Daytona Beach Shores
- Amy Long, DeBary
- David Hamstra, DeBary
- Mike Grebosz, DeLand
- Kieu Moses, DeLand
- Jonathan Jacob, DeLand
- Sue Houle, Deltona
- Bill Snyder, Deltona
- Tyna Lynn Hilton, Edgewater Sandy Camp, Edgewater
- Jeff Miller, Holly Hill
- Steve Juengst, Holly Hill
- Jim Gleason, Lake Helen
- David Hamstra, New Smyrna Beach
- Kyle Fegley, New Smyrna Beach
- Mark Bell, Oak Hill
- John Peters, Orange City
- Joseph Ruiz, Orange City
- Ronnie Long, Orange City
- Loretta Moisio, Ormond Beach
- Robin Gawel, Ormond Beach
- Yvonne Braddock, Pierson
- Hank Baker, Ponce Inlet
- Ami Pierce, Ponce Inlet
- Valerie Duhl, Port Orange
- Marget Tomlinson, Port Orange
- Becky Witte, South Daytona
- James Gillis Jr, South Daytona

- Josh McEnany, South Daytona
- Jessica Fentress, Volusia County Coastal Division
- Niles Cyzycki, Volusia County Coastal Division
- Corry Brown, Volusia County Community Assistance
- Aubrie Austin, Volusia County Emergency Management
- Yolanda Buckles, Volusia County Emergency Management
- Suzie Darby, Volusia County Emergency Services
- Samantha West, Volusia County Environmental Management
- Jeff Alberts, Volusia County Fire Services
- Nancy Church, Volusia County GIS
- Tim MacHardy, Volusia County Mosquito Control
- Jill Hemmerlein, Volusia County Planning & Development Services
- Arden Fontaine, Volusia County Public Works David Linkinhoker, Volusia County Recovery and Resiliency
- Chris William, Volusia County Recovery and Resiliency
- Ron Young, Volusia County School Board
- Michael Ulrich, Volusia County Water Resources and Utilities
- Michael Poinatowski, Advent Health
- Pat White, Aptim
- Karen Feaster, Daytona Beach International Airport
- McKenna Korzeniewski, East Central Florida Regional Planning Council
- Michelle Cechowski, East Central Florida Regional Planning Council
- Austin Beeghly, FDEM
- Elizabeth Caison, FDEM
- Stephen Civitelli, Florida Health Department – Volusia
- Cammie Dewey, St. Johns River WMD
- Jim Cannon, St. Johns River WMD
- Jim Peterson, St. Johns River WMD
- Mike McMunigle, St. Johns River WMD

Several planning committee meetings were held throughout the process. Due to the limited time frame to prepare the planning document, meetings focused on multiple steps of the process. The table below lists the planning team meeting dates, locations and focus areas of each meeting.

| Meeting Name & Attendees | Date | Location | Focus Areas |
|---|---|---|---|
| Kick Off Meeting (ECFRPC, County Departments and Divisions) | March 2024 | Volusia County EOC | Project Budget, Plan and Overview, Planning Process, Planning Team |
| Planning Meeting (ECFRPC, County Departments and Divisions) | June 2024 | Volusia County EOC | Volusia Prepares Meeting, Data Collection, Hazard Analysis |
| Public Kickoff Engagement Meeting | September 2024 | Volusia County EOC | Goals and Objectives, Project Priorities |

*Table 1: Planning meetings*

## B. Involve the Public

As part of the planning process, numerous efforts to engage the public were implemented. The ECFRPC developed a survey that was reviewed by the planning committee and allowed the committee to provide comments prior to public release. The public survey was created using Survey123 and a link and QR code were provided to all jurisdictions for release in newsletters, utility/water bills, and through websites, and social media. Additionally, the survey was made accessible at the public meetings. There were 136 responses in the floodplain management public survey for homeowners. Not all questions were mandatory in the survey; thus, not all percentages total to 100% as some participants skipped questions. This section lists the key findings. See Appendix B for full results.

**Key findings from the public survey are as follows:**

- 50.74% of respondents have lived in their current residence for over 10 years, 27.21% for 5 to 10 years, and 22.06% at less than 5 years.
- Approximately 25% of respondents indicated their home was built prior to 1987. 42.65% of respondents' homes were built between 1987 and 2001. 6,62% answered between 2002 and 2012, while 9.56% of participants home were built after 2012. 11.76% are unsure.
- 15.44% responded that they are not concerned about the possibility of their home flooding, 22.06% are somewhat concerned, and 61.03% are very concerned about the possibility of their home being flooded.
- 33.82% of respondents noted that their homes are located within a floodplain, 40.44% are located outside a floodplain, and 25% are unsure if their home is located within a designated floodplain.
- Of the 34% of respondents knowing within the floodplain, 20 are in Zone AE, 1 is in Zone A1-A30, 0 are in Zone AH. However, 61 respondents are unsure of their zone classification.
- Nearly 56.6% of respondents indicated that their home, to their knowledge, has never flooded due to natural causes.
- Of the of respondents indicating their home had flooded due to natural causes, 9.56% noted that the last flooding occurred between 2000 and 2009 (this would include the 2004

Hurricanes and TS Fay). 4.4% flooded in 2017. 38.97% flooded in 2022 (this would include Hurricanes Ian and Nicole). 25% flooded in 2024 (this would include Hurricanes Helene and Milton).

- 27.21% of those respondents who have experienced flooding in their homes noted that the flooding was less than 1 foot in depth, 9.56% experienced between 1 and 2 feet of water 3.68% experienced between 2 and 3 feet.
- The cost of structural damages associated with this flooding was varied; 5.88% noted less than $1,000; 18.38% noted between $1,000 and $50,000; 16.18% noted greater than $50,000; and 15.44% were unsure.
- The approximate dollar value of personal items lost was varied as well; 7.35% noted less than $1,000 in loss; 15.44% indicated between $1,000 and $9,999; 14.71% noted between $ 10,000 and $50,000. 5.88% noted greater than $50,000.
- 81.62% of total respondents have flood insurance; 7.35% do not.
- Of those without flood insurance, the majority (25 participants) stated that the main reason for not having flood insurance was that the property is outside the floodplain; 18 indicated that high cost is the main reason; 12 indicated that there was no perceived threat to their property; 8 indicated that they rent their home.
- Nearly 28.68% of respondents noted that flood mitigation efforts had been implemented on their property. 11% were unsure, while 55.88% did not have any mitigation efforts undertaken on their property.
- For those who have implemented mitigation efforts, the efforts included:
    - Built higher than 100-year floodplain (11 participants)
    - Elevated home/ first floor was parking or access only (5 participants)
    - Landscaping/drainage improvements (40 participants)
    - Installed flood barriers (13 participants)
    - Other effort not listed (24 participants)
- 31.62% of respondents indicated that they have not considered implementing flood management strategies on their property. The main reason for the lack of implementation was the financial setback (50.74%). Other reasons include multi-family dwellings, not feeling like it would make an impact, time, perceived difficulty, permitting, and HOA restrictions.
- 15.44% or 21 of respondents indicated that their property is currently classified as a repetitive flood loss property. 56.35% indicated no. 24.26% are unsure.
- 48.53% of respondents have visited the Volusia County Floodplain website.
- 2% of respondents are very satisfied with jurisdictional efforts of public involvement and outreach as it concerns flood hazards; 7.5% are somewhat satisfied; 8.82% are somewhat dissatisfied; 60% are very dissatisfied, and 21.32% are unaware of public

involvement/outreach efforts.

The business community was engaged in the process through a survey created specifically for business owners. The link to this survey was made available to jurisdictions to release to the various Chambers of Commerce and other business-oriented agencies and groups within their community. The link was distributed through various websites at the beginning of the planning process, and through a final press release near the end of the planning process. This survey was also made available at the public meetings for any business owners in attendance. This survey received 6 responses during its collection period.

**Key findings from the business survey are as follows:**

- 33.33% of respondents have been in business at their current locations for over 20 years.
- 33.33% of buildings were constructed before 1987; 50% were constructed between 2002-2012.
- 50% of the respondents are “not concerned” about their business flooding and 33.33% are “very concerned” about the flooding possibility of streets accessing their business.
- While 16.67% of respondents indicated they are located within a designated flood hazard zone, 33.33% are unsure.
- Being located in a flood zone was not a concern in business location for 83.33% of respondents.
- 33.33% of respondents indicated that their place of business has flooded due to natural/environmental causes, but 66.67% of respondents noted an increase in frequency and duration of local flood events.
- 50% of respondents have flood insurance for their property.
- Those who have flooded the indicated impacts are: loss of business days, employees unable to work, profit loss, and property damage.
- Flood mitigation efforts consist of flood insurance, improved landscaping/drainage, and flood proofing.
- 33.33% of business respondents are very satisfied with public involvement and outreach efforts by local jurisdictions as related to floodplain management, while 33.33% of respondents are very dissatisfied with how their jurisdiction handles outreach concerning flood in their area.

In Volusia County, several Homeowner Associations are associated with developments within the 100-year floodplain. Another specialized survey was conducted and distributed to local HOA’s via email and through public meetings. During this time, 4 surveys were completed.

**Key findings from the HOA surveys are as follows:**

- 75% agreed that property owners are very concerned about flooding in their communities.
- 2 neighborhoods are in the floodplain, while 2 communities have no portion located within a floodplain.
- All respondents noted flooding occurred between 2017-2024.
- 3 communities indicated they flood during extreme rainfall events, and all four respondents noticed an increase in frequency and duration of roadway flooding.

Due to the size of Volusia County, it was determined the best way to reach the residents was to hold one meeting on the east side of the county (Daytona Beach) and one on the west side (DeLand). Additionally, the meetings were held at different times of the day to accommodate working residents. The meetings were held on November 25th and 26th, 2024. The meetings consisted of a presentation on the plan background and purpose, question and answer session, and an open house session. Pamphlets and QR codes were provided at the meeting for attendees to access the public survey and to visit the Volusia County website to determine whether a specific property is located within the floodplain. Public comments were recorded and brought back to the planning team for discussion and review.

Attempts to encourage public input to the planner or Floodplain Management Plan Committee included information distributed through the County's website and informational notices posted on webpages. Local television channels, including Spectrum 13, were provided with press releases of the FMP Public Survey to televise. Local news outlets advertised the November 2024 public meetings. Additionally, Volusia County Emergency Management's website houses links that provide flood and other natural hazard related information.

### C. Coordinate

Existing studies, reports, plans and other information were reviewed in the development of this plan. These documents include the Volusia County Local Mitigation Strategy, local Comprehensive Plans, Land Development Codes, Ordinances, and stormwater management plans. During the LMS update of 2024, individual plan updates were reviewed as well to ensure consistency and overlapping projects and priorities. **Table 2** illustrates the plans, reports, codes, and other documents within each jurisdiction. The results from Table 2 were collected through the jurisdictional representative that sits on the Volusia Prepares Working Group.

## APPENDIX H: VOLUSIA COUNTY INTEGRATED FLOODPLAIN MANGEMENT PLAN

The Volusia County LMS provides more information concerning each plan and its role in emergency management and floodplain management. This information can be found in Section 7: Capability Assessment of the LMS.

Additionally, this plan coordinated with Volusia County and its jurisdictions within to coordinate the plan's assessment and goals. While members of the public were invited to engage, various departments participated in this plan through the representation of the Volusia Prepares Working Group. Input was provided through a variety of government agencies including:

- Planning & Development Services
- Environmental Management
- Public Works
- Community Assistance
- Emergency Management
- Recovery & Resiliency

VCEM engaged community leaders from low-income and underserved communities to request input on the risks and hazards over the 5-year planning period. The survey was distributed to these partners as an approach to report local experiences of hazard events.

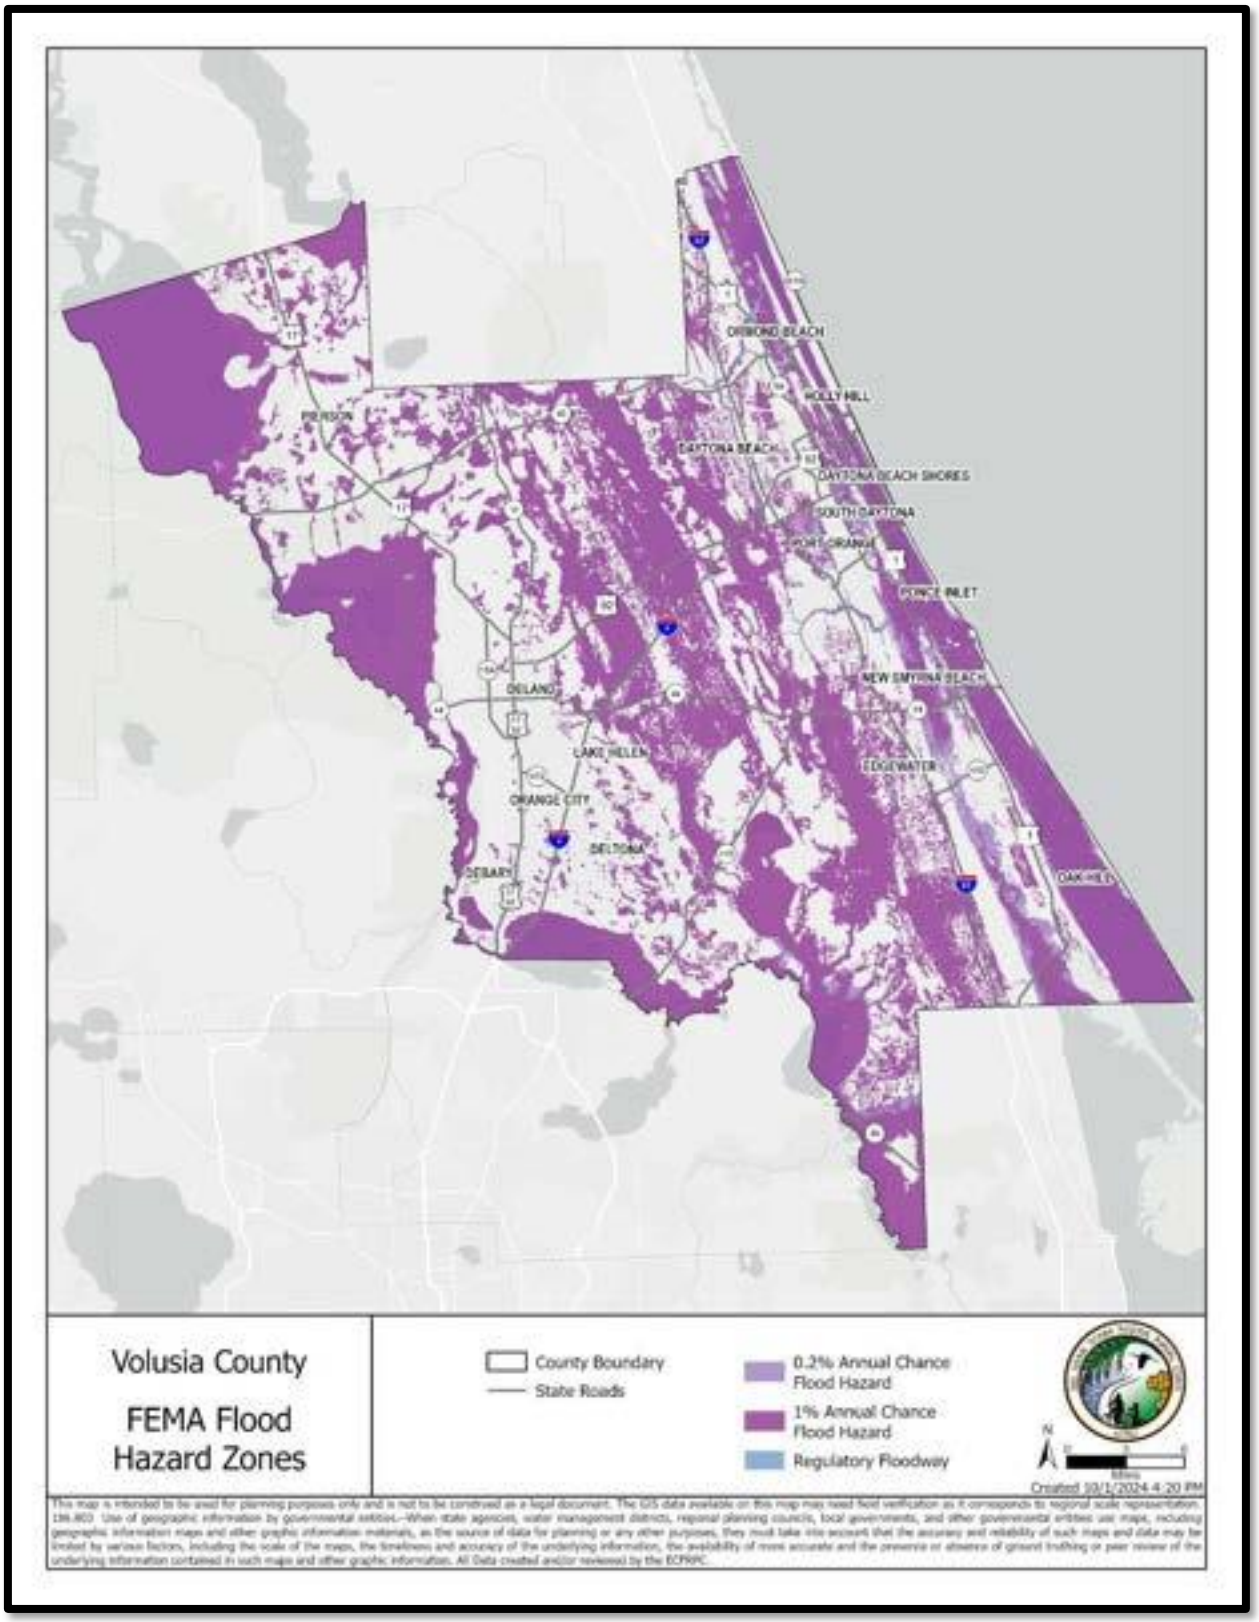
## APPENDIX H: VOLUSIA COUNTY INTEGRATED FLOODPLAIN MANGEMENT PLAN

The Planning Team reviewed plans from the County and all jurisdictions for information geared to assist in the data collection, analysis and overall development of this plan. While the Local Mitigation Strategy provided a great deal of information, individual Comprehensive Plans gave the planning team good insight into the policy-driven needs of these jurisdiction from a community resiliency and land use perspective. The datasets compiled from the Future Land Use element of each Comprehensive Plan within the County (city and county) were utilized to create a land-use based GIS analysis in the risk assessment portion of this report. Volusia County Emergency Operations Plan and Continuity of Operations Plans (COOP) were also reviewed by the Planning team to ensure the initiative and analyses included in this plan reflect the actual response mechanisms already in place in Volusia County. Of the plans listed above, another crucial piece of information from the jurisdictional level came from building codes and standards located within Land Development Codes.



## D. Methodology

To analyze the change in the 100-year FEMA flood zone since the previously accepted FMP, the ECFRPC compared the total acreage of the 2017 flood zone (used in the 2020 analysis) to the acreage of the current 2024 flood zone. To understand where and how the extent of the 100- year flood zone had changed, the ECFRPC analyzed where the floodplain increased and decreased for each jurisdiction. Generalized repetitive loss areas were provided by Volusia County GIS and Emergency Management. Exposure of parcels and critical assets to the 100-year flood zone was assessed through an overlay analysis to identify locations in which the parcels and assets intersect with the floodplain. The acreage of overlapping areas was then calculated.

The principal tool utilized in assessing the hazard of storm surge is the Sea, Lake and Overland Surges from Hurricane (SLOSH) model. The computerized SLOSH model predicts the tidal surge heights that result from hypothetical hurricanes with selected various combinations of pressure, size, forward speed, track and winds. The SLOSH model, which is utilized locally for hazard and vulnerability analysis, has been digitized into the County's Geographical Information System (GIS) mapping system. For this analysis, the Maximum of the Maximum Envelope of Water (MOM) was utilized from the SLOSH Model provided from the National Hurricane Center.

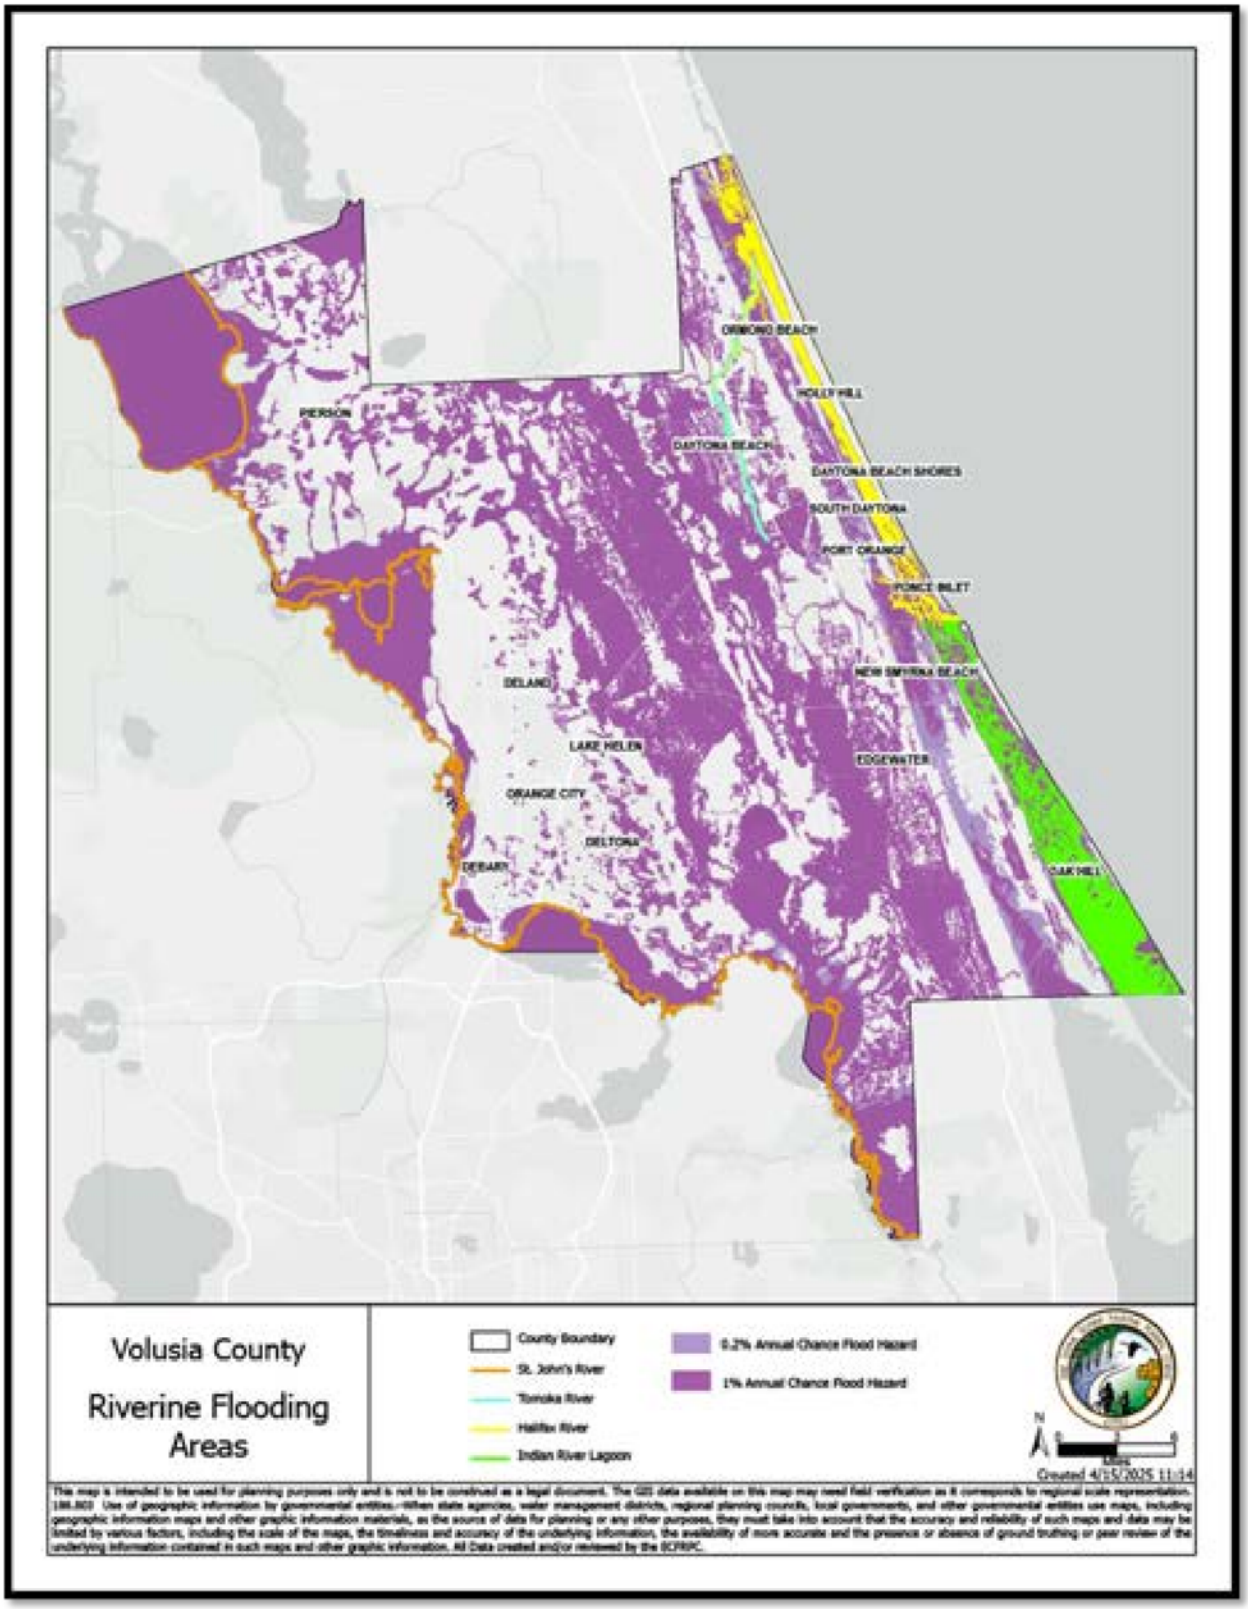
The MOM provides a worst-case snapshot for a particular storm category under "perfect" storm conditions. Each MOM considers combinations of forward speed, trajectory, and initial tide level. These products are compiled when a SLOSH basin is developed or updated. No single hurricane will produce the regional flooding depicted in the MOMs. Instead, the product is intended to capture the worst-case high-water value at a particular location for hurricane evacuation planning. The MOMs are also used to develop the nation's evacuation zones.

## Figure 1: FEMA Flood Zones

# V. RISK ASSESSMENT

## A. Assessing the Hazards

### FLOODING



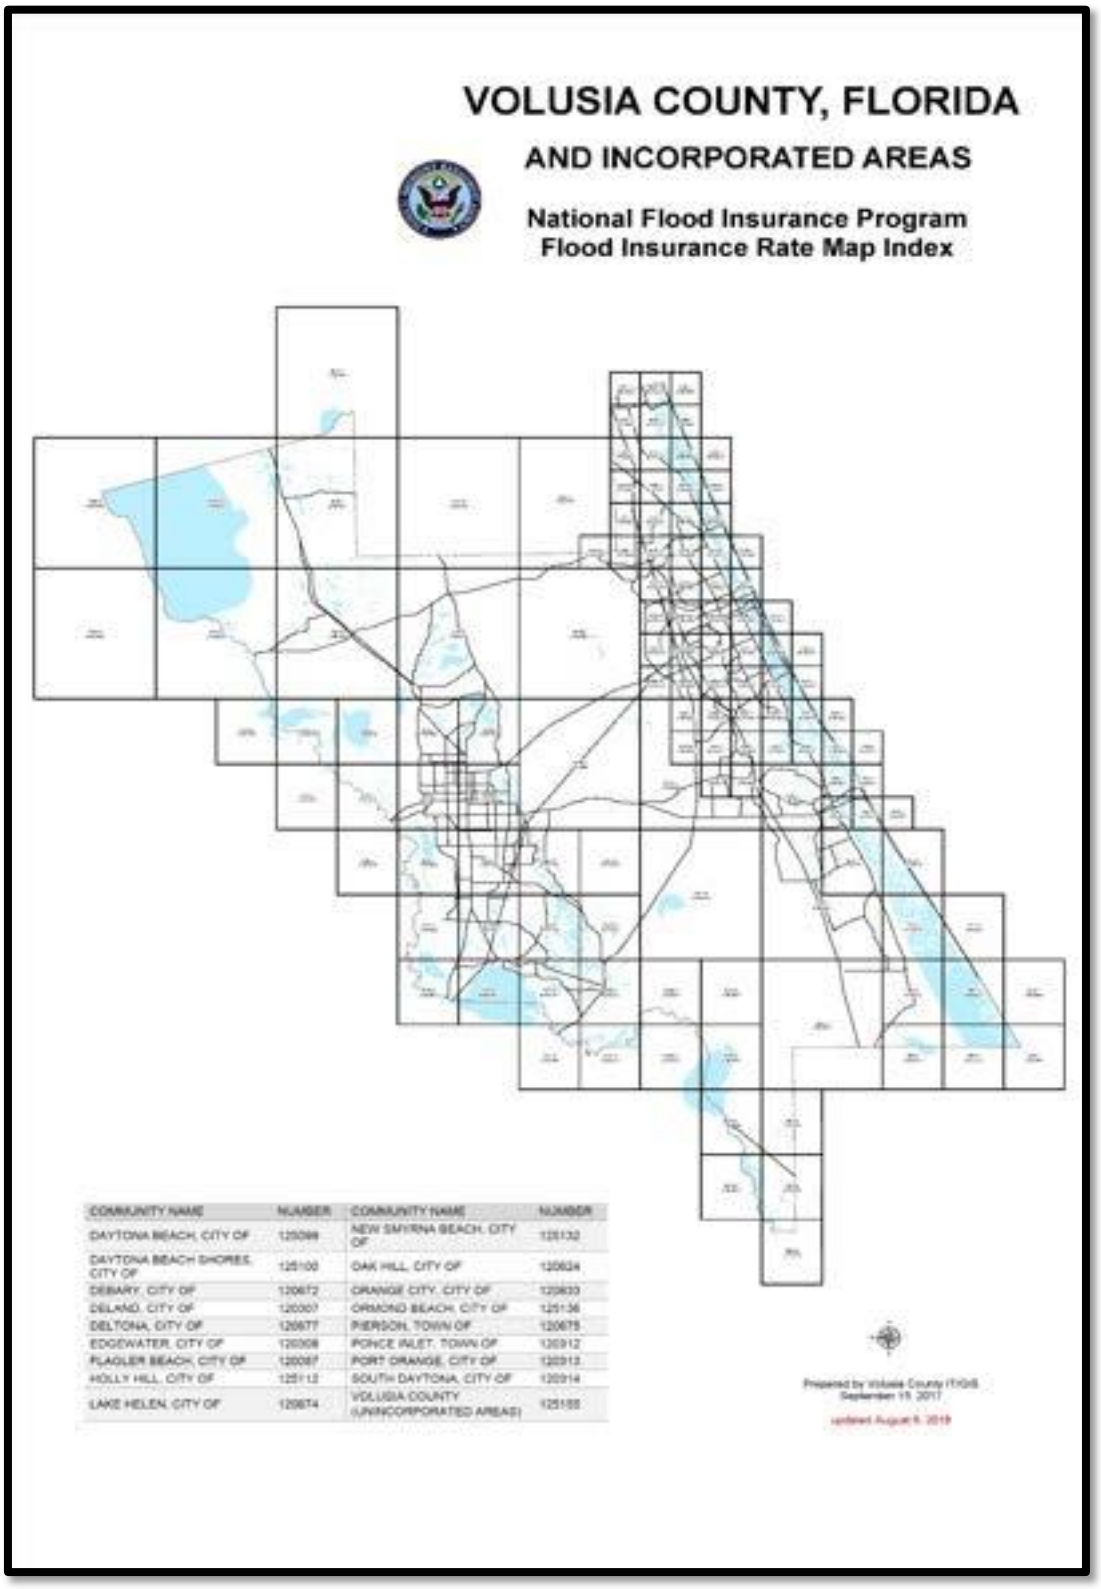
Volusia County encompasses approximately 1,210 square miles, including 50 miles of Atlantic coastline. Of this, 982 square miles fall within unincorporated areas, while 238 square miles are incorporated. The eastern portion of the county is characterized by the Halifax River and the Indian River North/Mosquito Lagoon, which together form the Intracoastal Waterway. These long, narrow estuaries separate the mainland from the barrier island. The Ponce de Leon Inlet, located near the center of the county's coastline, is the only natural tidal inlet, allowing for ocean water exchange and serving as a pathway for storm surge and tidal fluctuations into the Intracoastal Waterway.

Volusia County is highly susceptible to riverine, urban, and storm surge flooding as shown in **Figures 1 and 2**. Major waterways vulnerable to flooding include the St. Johns River, Halifax River, and Tomoka River, along with tributaries and creeks such as Thompson Creek and Laurel Creek in the Ormond Beach area. Additionally, low-lying inland areas in the northwest, north, southeast, and southwest are prone to flooding, which can impact evacuation routes if not properly elevated or designed for flood resilience.

The St. Johns River, the county's largest river, flows along the western boundary and presents a significant flooding threat. The Tomoka River, covering a 159-square-mile tributary area, serves the northeastern and central portions of the county. It flows south to north, ultimately discharging into the Tomoka Basin and Halifax River, both of which are susceptible to storm surge-related flooding.

Additionally, certain low-lying inland areas in the northwest, north, southeast and southwest are considered flood-prone areas. Many evacuation routes traverse the floodplain and if not mitigated properly (elevated, designed, etc.), could be prone to flooding.

## Figure 2: Riverine Flooding Areas



FEMA's Flood Insurance Rate Maps (FIRMs) are official maps used to identify flood hazards and assess flood risk. These maps are a key component of the National Flood Insurance Program (NFIP) and help communities, insurers, and property owners understand their flood risk and insurance requirements. **Figure 3** depicts the Volusia County most up-to-date FIRM flood zones throughout the County, last updated in 2018.

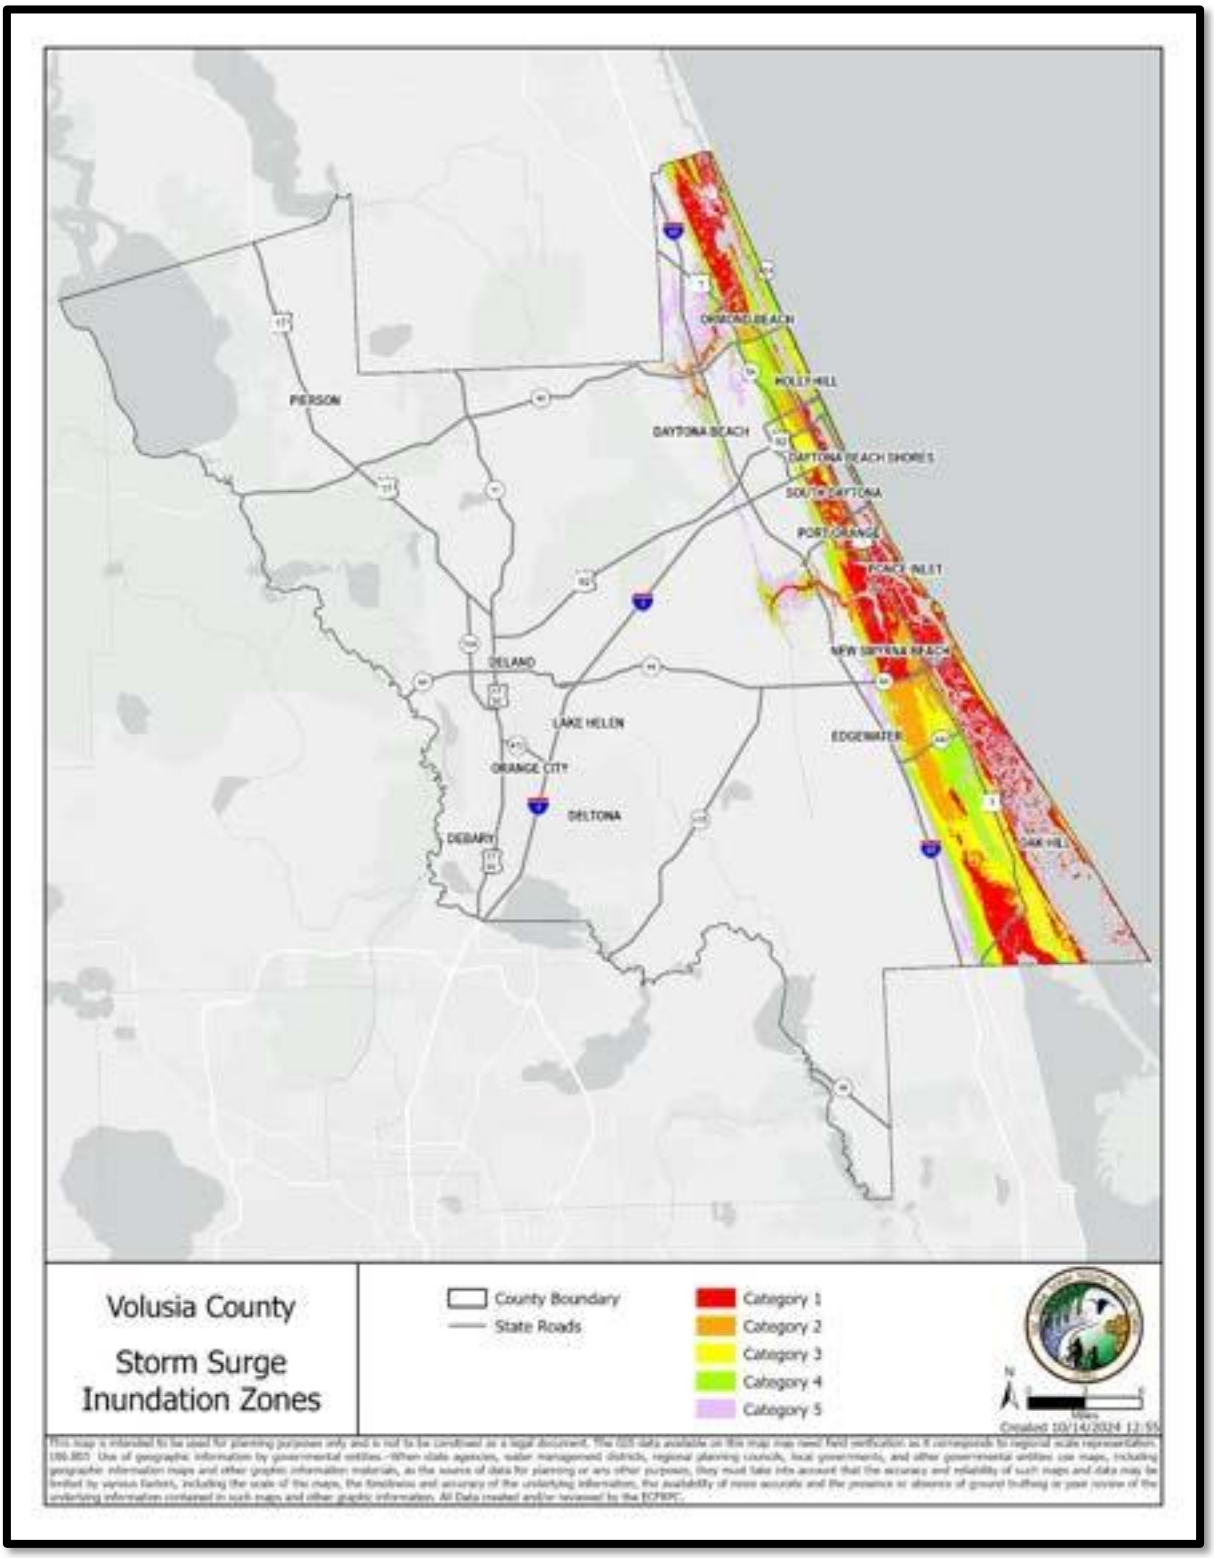
Areas vulnerable to flooding are higher when located within the floodplain, but all areas of Volusia County are susceptible to flooding. Flood-prone areas are primarily located within FEMA-designated floodplains, as detailed in the updated FIRMs for Volusia County, published in November 2023. While flood prone areas have shifted in the past five years, the FIRMs remain a standard to flood mitigation. These maps provide revised Base Flood Elevations (BFEs) from the Flood Insurance Study, which serve as key resources for flood risk assessment, infrastructure planning, and regulatory compliance. Tropical cyclone events remain the primary driver of severe flooding in Volusia County, producing both heavy rainfall and coastal storm surges.

Areas with the highest risk of flooding, known as Special Flood Hazard Areas (SFHAs), include Zone A, AE, AH, AO, and VE. According to FEMA, Special Flood Hazard Areas are **high**-risk areas. These zones have at least a 1% annual chance of flooding (commonly referred to as the 100-year floodplain), and properties with federally backed mortgages in these areas are required to carry flood insurance.

Non-Special Flood Hazard Areas are moderate-to-low risk areas. The risk of flooding is reduced, but not completely removed. FEMA identifies **Moderate**- to **low**-risk areas as zones beginning with the letters 'B', 'C' or 'X' (or a shaded X). Moderate-risk areas, such as Zone X (shaded), have a 0.2% annual chance of flooding (the 500-year floodplain), while Zone X (unshaded) represents areas with minimal flood risk. These areas submit more than 20 percent of National Flood Insurance Program claims and receive one-third of federal disaster assistance for flooding. FIRMs also highlight floodways, which are critical for water flow during flood events, where development is highly restricted.

**Figure 3: Latest FIRM Map for Volusia**

A key feature of FIRMs is the Base Flood Elevation (BFE), which indicates the estimated height of floodwater during a 100-year flood event. Properties built above the BFE are generally at lower risk and may qualify for lower insurance premiums. Because flood risks change over time due to factors such as development, climate change, and evolving hydrology, FEMA periodically updates FIRMs through Flood Risk Studies to ensure accurate assessments. The impact of FIRMs extends beyond flood insurance. Local governments use these maps to implement floodplain management regulations, ensuring that new development is built to withstand potential flood events. Homeowners and businesses rely on FIRMs to determine their flood risk and take necessary mitigation measures, such as elevating structures or purchasing flood insurance.



### STORM SURGE

Coastal flooding caused by tropical cyclones and unusually high tides combined with strong easterly or northeasterly winds also poses a continuing threat to the County. Storm surges produce much of the flood damage and loss of life associated with storms that make landfall or that closely approach a coastline. This hazard is historically the leading cause of hurricane related deaths in the United States. Storm surge and large battering waves can result in large loss of life and cause massive destruction along the coast. Storm surges can travel several miles inland, especially along bays, rivers, and estuaries.[1] **Figure 4** indicates communities susceptible to storm surge in Volusia County.

The principal tool utilized in assessing the hazard of storm surge is the Sea, Lake and Overland Surges from Hurricane (SLOSH) model. The computerized SLOSH model predicts the tidal surge heights that result from hypothetical hurricanes with selected various combinations of pressure, size, forward speed, track and winds. The SLOSH model, which is utilized locally for hazard and vulnerability analysis, has been digitized into the County's Geographical Information System (GIS) mapping system. Estimated storm surge heights range from two to four feet in a Category 1 storm to in excess of twenty feet in a Category 5 storm. For further information on the methodology, please see the methodology section of this report.

**Figure 4: Storm Surge Inundation Zones in Volusia County**

### TROPICAL CYCLONES

Since 1965, Volusia County has experienced numerous federally declared disasters due to tropical cyclones, coastal flooding, and erosion. Riverine and storm surge-induced flooding frequently extends beyond FEMA-designated 100-year floodplains, affecting inland areas, levee-protected zones, and coastal erosion-prone locations. Long-term hazards such as sea level rise and tsunamis further contribute to flood risks outside traditional flood-prone areas. The most recent tsunami-type event occurred in Daytona Beach on July 3, 1992, injuring over 70 individuals. Mitigation strategies, including infrastructure improvements, shoreline protection, and resilient land-use planning, are essential to reducing future risk. Strategies such as smart growth initiatives and clustering development in non-vulnerable areas can significantly mitigate long-term exposure to flooding, storm surge, and erosion. Volusia County has endured severe flooding and storm surge impacts from multiple significant storm events:

- 2004 Hurricanes Charley, Frances, and Jeanne brought extreme precipitation and storm surge flooding. Tidal waters rose 3 to 5 feet above the mean high tide, and Hurricane Frances alone delivered 13 inches of rainfall, leading to countywide inundation. Combined wind and flood damage exceeded $390 million.
- May 2009 "No-Name" Rain Event resulted in severe freshwater flooding, submerging properties under two feet of water on the county's east side.
- Tropical Storm Fay (2008) caused severe flooding in western Volusia County, with rainfall accumulations ranging from 3 to over 10 inches, leading to $13.5 million in damage.
- Hurricane Matthew (2016) tracked just offshore, generating storm surge, extensive wind damage, and widespread coastal and inland flooding.
- Hurricane Irma (2017) delivered excessive rainfall that compromised electrical infrastructure, inundated properties, and caused significant storm surge damage, including the destruction of a boardwalk near Ponce Inlet.

Since the last Flood Mitigation Plan (FMP) update in 2020, four hurricanes have significantly impacted Volusia County:

- Hurricane Ian (2022), downgraded to a tropical storm upon reaching the county, produced up to 22 inches of rainfall, setting historic precipitation records. Persistent onshore winds caused storm surges of 1 to 3 feet, resulting in moderate to severe beach erosion and infrastructure damage, particularly along the coastline.
- Hurricane Nicole (2022), making landfall just south of Volusia County as a Category 1 storm, generated 30-foot offshore seas and long-duration high surf, worsening beach erosion caused by Hurricane Ian. Extensive coastal structure failures were reported.
- Hurricane Helene (2024) impacted Volusia County on September 25–26, producing 0.5 to

1.5 inches of rain and wind gusts up to 55 mph.

- Hurricane Milton (2024) brought significantly more severe impacts, delivering 7 to 17 inches of rain and wind gusts reaching 99 mph near Ponce Inlet. Major flooding was reported along the St. Johns River at Astor and DeLand, with two direct and two indirect fatalities. Widespread damage included downed trees, power outages, and structural flooding affecting public, residential, and commercial properties. Throughout Hurricane Milton, Volusia County remained under multiple weather alerts, including tropical storm warnings, hurricane watches, tornado warnings, flood watches, and wind advisories. The cumulative effects of these storms underscore the county's ongoing vulnerability to tropical cyclone-driven flooding and the critical need for continued mitigation efforts to protect residents and infrastructure.

**Table 3** displays Emergency Operations Center (EOC) activations in Volusia County from the past three decades. These disasters resulted in widespread flooding and required a wide variety of resources to respond and recover.

**Figure 5** is from the 2021 Statewide Regional Evacuation Study Program: Regional Hazard Analysis developed for the east central Florida region by the ECFRPC and the Florida State Emergency Response Team. Through SLOSH Analysis, it was determined that a Category 1 storm surge will produce storm tide heights up to 6 feet. A category 5 storm will produce storm tide heights up to 26 feet. It should be noted again that these surge heights represent the maximum surge height recorded in the county from the storm tide analysis including inland and back-bay areas where the surge can be magnified depending upon storm parameters.

**Figure 5: Potential Storm Tide Heights by County (In feet above NAVD88)[2]**

(In feet above NAVD88)

| *Storm Strength | Brevard | Volusia |
|---|---|---|
| Category 1 | 5.7 | 5.7 |
| Category 2 | 9.6 | 9.5 |
| Category 3 | 15.8 | 14.3 |
| Category 4 | 20.8 | 22.8 |
| Category 5 | 25.9 | 25 |

*Based upon the category of storm on the Saffir-Simpson Hurricane Scale
** Surge heights represent the maximum values from selected SLOSH MOMs

### Table 3: Emergency Operations Center Activations Relating to Flooding in Volusia County

| Date of Event | Type of Event | Area of Event | Damage Estimate | Damage Estimates |
|---|---|---|---|---|
| | | | # of Parcels | Dollars |
| 11/17/1994 | T.S. Gordon | County-wide | 658 | $10,602,924.00 |
| 8/3/1995 | Hurricane Erin | Edgewater | 31 | $65,052.00 |
| 7/10/1996 | Hurricane Bertha | County-wide | N/A | N/A |
| 9/5/1996 | Hurricane Fran | County-wide | N/A | N/A |
| 10/8/1996 | T.S. Josephine | County-wide | 193 | $1,232,343.00 |
| 9/14/1999 | Hurricane Floyd | East Side | 433 | $18,655,353.00 |
| 10/16/1999 | Hurricane Irene | East Side | 185 | $16,809,266.00 |
| 9/16/2000 | Hurricane Gordon | County-wide | N/A | N/A |
| 9/14/2001 | T.S. Gabrielle | County-wide | 44 | $474,135.00 |
| 11/15/2001 | Rain Event | East Volusia | 39 | $561,300.00 |
| 9/4/2002 | T.S. Edouard | County-wide | N/A | N/A |
| 8/13/2004 | Hurricane Charley | County-wide | 5,719 | $106,900,000.00 |
| 9/4/2004 | Hurricane Frances | County-wide | 26,964 | $393,900,000.00 |
| 9/25/2004 | Hurricane Jeanne | County-wide | N/A | $59,500,000.00 |
| 9/8/2005 | T.S. Ophelia | County-wide | Beach | N/A |
| 10/23/2005 | Hurricane Wilma | County-wide | 3 | $752,000.00 |
| 8/29/2006 | T.S. Ernesto | County-wide | N/A | N/A |
| 8/18/2008 | T.S. Fay | County-wide | 240 | $13,580,016.00 |
| 5/17/2009 | May Rainstorm | County-wide | 1,654 | $69,516,703.00 |
| 10/7/2016 | Hurricane Matthew | County-wide | N/A | $442,509,779 |
| 9/11/2017 | Hurricane Irma | County-wide | 4,808 | $321,038,971 |
| 9/2/2019 | Hurricane Dorian | County-wide | N/A | $2,600,600 |
| 9/28/22 | Hurricane Ian | Countywide | 7,051 | $357,449,754 |
| 11/7/22 | Hurricane Nicole | Countywide | 615 | $495,385,828 |
| 10/10/24 | Hurricane Milton | Countywide | 5,102 | $267,508,457 |

### 500 YEAR FLOODS

A 500-year flood zone represents an area with a 0.2% annual chance of flooding, meaning that in any given year, there is a 1 in 500 probability of a significant flood event occurring. This does not imply that such a flood will occur precisely once every 500 years, but rather that over a long period, the probability remains consistent. The Federal Emergency Management Agency (FEMA) designates these zones as part of the Flood Insurance Rate Maps (FIRMs) to guide floodplain management, emergency planning, and insurance decisions.

In Volusia County, the 500-year flood zone is extensive, particularly concentrated along the eastern portion of the county and near major water systems such as the Halifax River and Tomoka River. These areas are highly susceptible to storm surge, tidal flooding, and extreme rainfall events that can overwhelm natural and engineered drainage systems. **Figure 6** depicts the FEMA 500-year flood hazard zone in Volusia County.

The 500-Year Flood Zone has a variety of implications:

- Increased Vulnerability to Extreme Events: While less frequent than 100-year flood events (which have a 1% annual chance), 500-year floods can still cause catastrophic damage, particularly when combined with hurricanes or tropical storms.
- Coastal and Inland Flooding Risks: Due to its proximity to the Atlantic Ocean, Intracoastal Waterway, and major rivers, Volusia County's low-lying areas in the 500-year floodplain are at risk from storm surge, rising sea levels, and heavy inland rainfall.
- Historical Flooding in the 500-Year Zone: Some of Volusia County’s most severe flood events, including those from Hurricanes Ian (2022), Nicole (2022), and Milton (2024), affected areas classified within the 500-year flood zone. These events highlight the need for enhanced flood mitigation efforts, as extreme flooding is becoming more frequent due to climate change and increased storm intensity.
- Infrastructure and Development Considerations: Roads, bridges, and evacuation routes passing through 500-year flood zones may become impassable during major flood events. Floodplain development regulations must consider elevated construction, resilient drainage systems, and strategic land-use planning to minimize future flood impacts.

As sea levels rise and extreme weather events become more intense, flood risk within the 500-year flood zone may increase beyond historical expectations. Volusia County's flood mitigation strategies—such as enhancing stormwater infrastructure, enforcing stricter building codes, and prioritizing resilient land-use planning—will be crucial in reducing long-term flood exposure in these vulnerable areas.

## Figure 6: FEMA 500 Year Flood

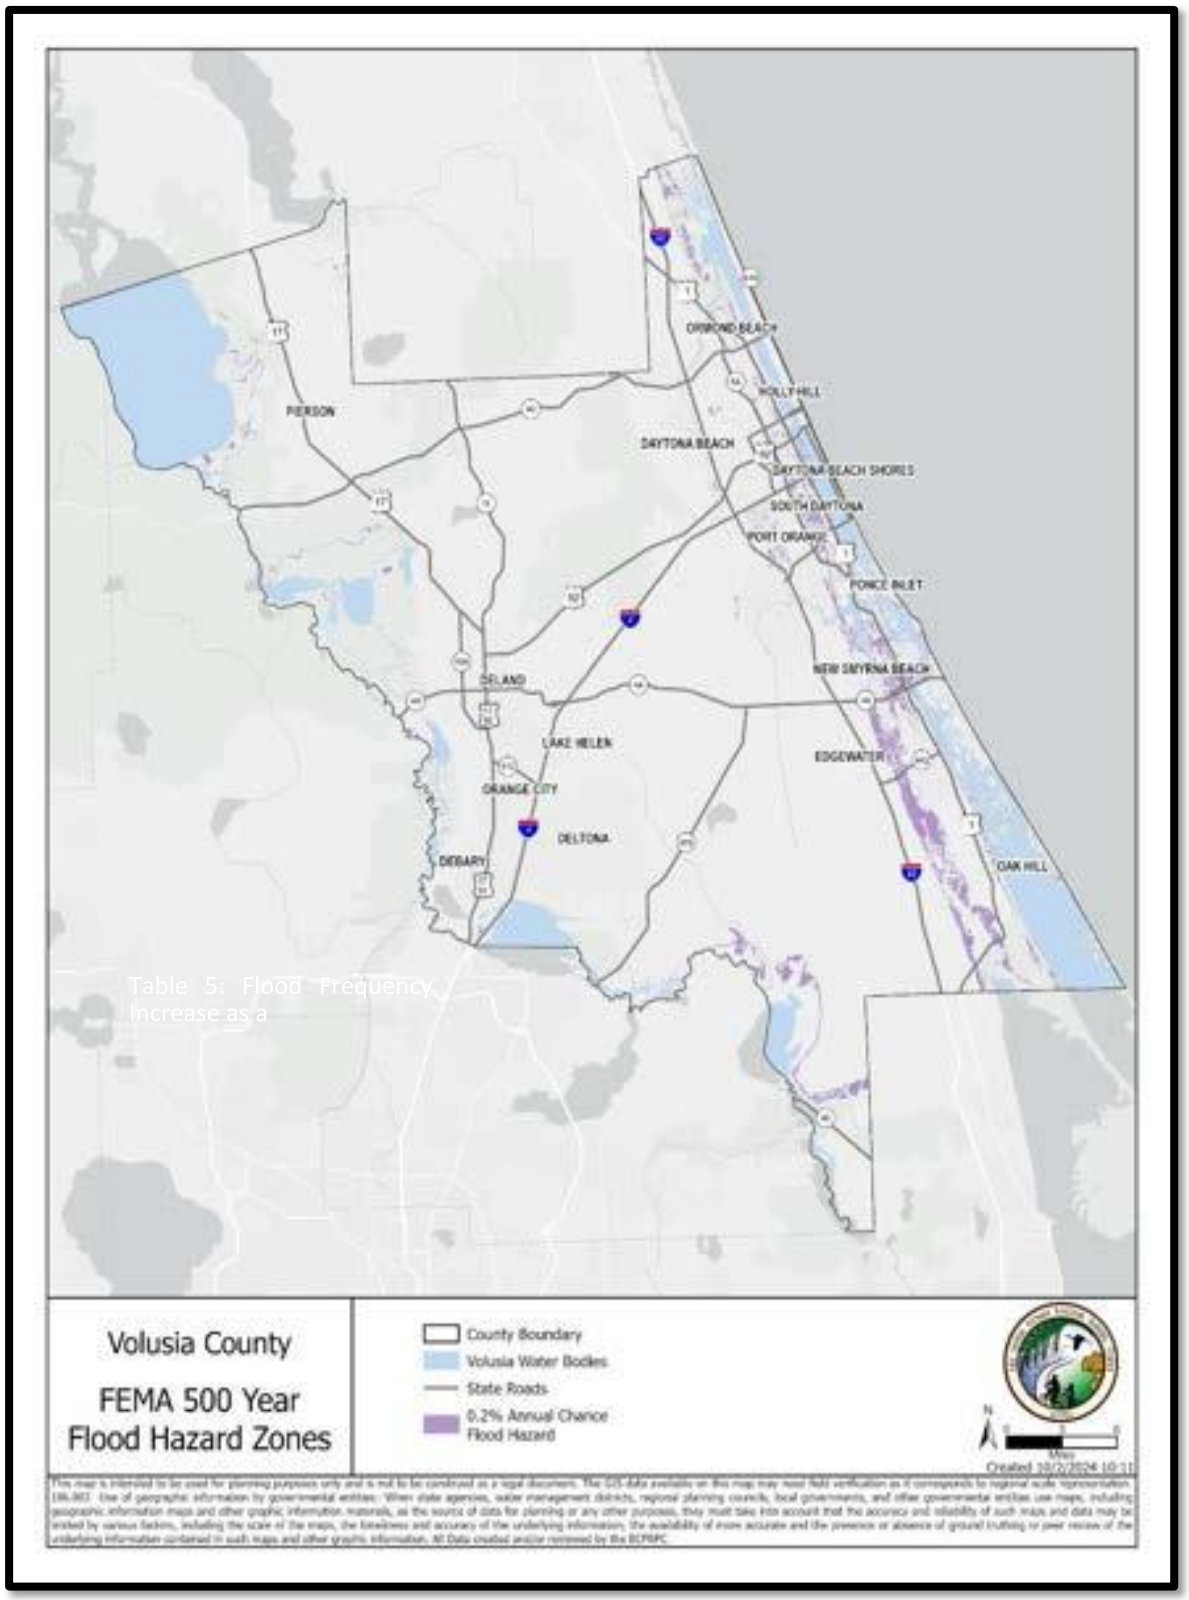

Table 5: Flood Frequency Increase as a

### SEA LEVEL RISE

Flooding and storms have become more frequent across Florida's coastal communities due to the changing climate and sea level rise. Mean elevation for the State of Florida is approximately 100 feet above sea level with the highest point registering at only 345 feet above sea level. In Volusia County, the highest natural point of elevation is 120 feet above sea level. Local governments and residents are starting to see the beginning impacts sea level rise combined with storms will have on their community. As sea level rise continues, it is becoming of critical importance to understand the potential vulnerability of inundation and flooding on communities and infrastructure, specifically those facilities located in low-lying coastal areas. The NOAA 2017 High/ECFRPC High Projection Rate Curve anticipates sea level rise along Daytona Beach Shores to be 8.48feet by 2100. This, along with a 100-year storm, could mean devastation to coastal communities if appropriate planning and action is not taken early enough.

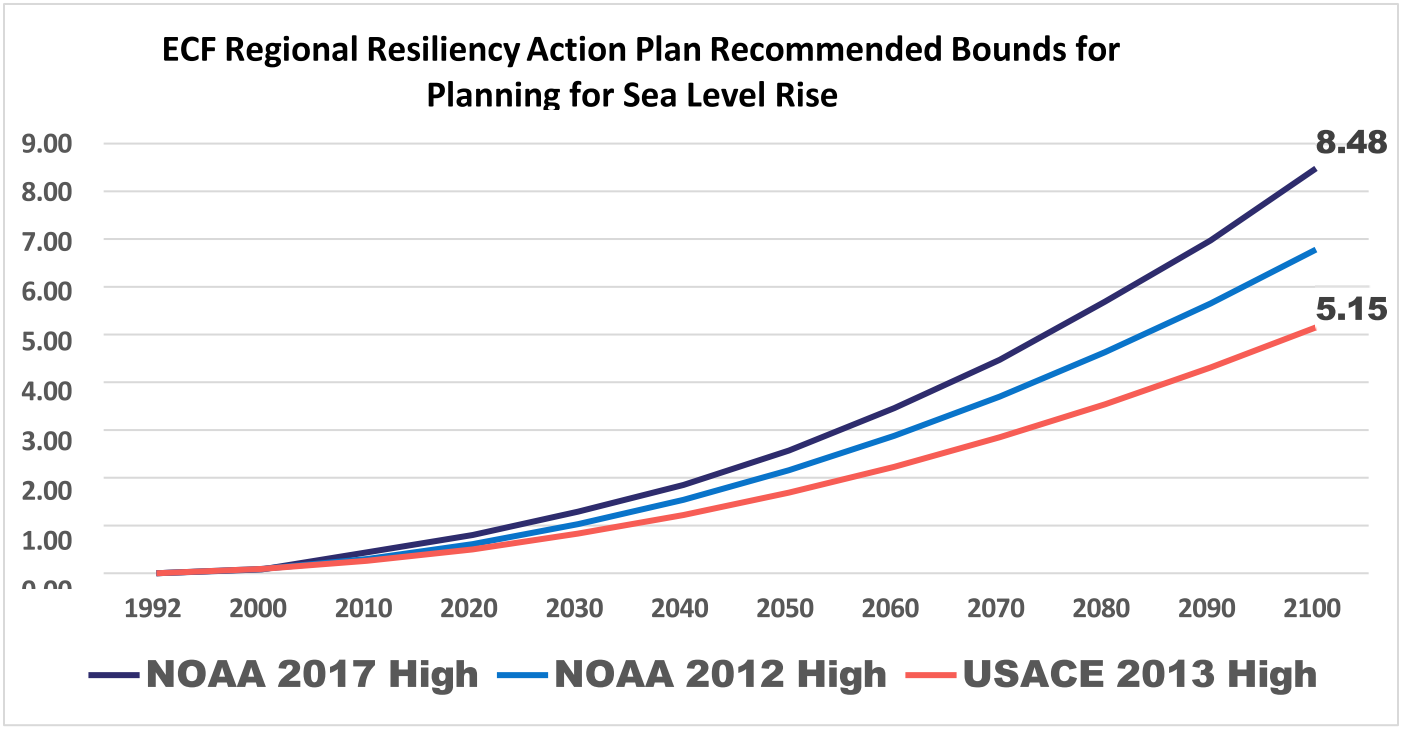

**Figure 7: Recommended range for sea level rise planning and includes the projected rise in sea level by decade based on the ECFRRAP.**

In 2017, the County worked with the East Central Florida Regional Planning Council, Florida Department of Transportation, the River to Sea Transportation Planning Organization, and University of Florida Geoplan to create Resilient Volusia County – Phase 1. This plan modeled impacts to critical assets from sea level rise combined with a 100-year coastal storm, using the FDOT Sea Level Scenario Sketch Planning Tool and FEMA's HAZUS-MH software. By taking a risk-based approach and identifying vulnerable facilities, agencies and jurisdictions can implement adaptation practices overtime that will protect these facilities and minimize impacts on the community.

The information, data and recommendations developed through these efforts has been made available to communities and agencies throughout Volusia County to aid them in the planning for future conditions related to flooding and sea level rise inundation.

Figure 8: The frequency of coastal flooding (pictured) is projected to increase with rises in sea levels.

In 2018, through extensive stakeholder input with Brevard and Volusia Counties, the ECFRPC and Volusia County Council adopted two scenarios for planning for sea level rise (NOAA 2017 High/ECFRPC High and USACE 2013 High/ECFRPC Low) through the East Central Florida Regional Resiliency Action Plan (ECFRRAP). The plan identifies that "no one projection rate curve should be used for planning purposes across all projects and programs. Instead, a range of rise should be considered based upon the vulnerability, allowable risk, and project service life and the forecast project "in-service" date of a facility or development."

The studies were built on through the County's 2024 Countywide Vulnerability Assessment, which identified impacts to local and regional critical assets within unincorporated Volusia County and all 16 municipalities. Critical assets, defined in section 380.093 F.S., includes four main categories - transportation assets and evacuation routes; critical infrastructure; critical community and emergency facilities; and natural, cultural, and historical resources. The exposure analysis was performed to identify the depth of water-based hazards – sea level rise and high tide flooding, and current and future storm surge. Sea-level rise projects used within the

exposure analysis includes the 2017 NOAA Intermediate-Low and Intermediate-High (required by 380.093 F.S.) and the ECFRRAP High and Low scenarios for 2040, 2070, and 2100. The sensitivity analysis determined the severity of impact to the critical asset through utilizing a hex grid and applying the Social Vulnerability Index, Regional Drivers of Vulnerability, population, present day flooding, and natural attributes. This methodology included future high tide flooding analysis with sea level rise, and was ran for each projection scenario. This updated Vulnerability Assessment provides a communitywide dataset of risk to identify needed capital improvement projects and enhance access to community lifelines for vulnerable populations.

## B. ASSESSING THE PROBLEM

### VULNERABILITY SUMMARY

Within the LMS there is a Hazard Risk Score for each jurisdiction as it concerns flooding and storm surge as per the Local Mitigation Strategy. Each hazard was scored by on the frequency, magnitude, warning time, and duration. Each hazard was given a score between one and five with five being the greatest. Additional hazard information can be found in the Volusia County Multi-Jurisdictional Local Mitigation Strategy (LMS), Section 5 Hazard Profiles.

The Flood Hazard analysis includes location and spatial extent of the hazard, historical occurrences and impacts, historical summary of insured flood losses, analysis of loss properties and probability of future occurrences.

### LIFE, SAFETY, AND HEALTH

Flooding along rivers and streams poses a significant threat to life, safety, and property, with the potential to cause injury and fatalities. Over the past 20 years, flood waters have become the leading cause of hurricane-related deaths. This shift is partly due to improved storm surge evacuation planning, which has reduced coastal drowning incidents in the U.S. since the early 2000s. However, inland flooding risks remain underrecognized, particularly among residents who underestimate flood dangers when driving.

To address this risk, the "Turn Around, Don’t Drown" program was implemented nationally in 2002 to educate the public about hazardous road conditions and the dangers of attempting to drive through floodwaters. While hurricane-related rainfall does not always necessitate immediate evacuation, delayed inland flooding can require post-storm evacuations as rivers and streams exceed capacity. Slow-moving storms exacerbate flooding, leading to widespread roadway inundation, making critical evacuation routes impassable.

#### *Evacuation and Infrastructure Preparedness*

Florida’s climate and seasonal weather patterns introduce additional flooding risks, as heavy rain preceding a hurricane can saturate the ground and flood roadways before the storm even arrives. To mitigate these risks, contingency planning efforts include:

- Route rerouting to bypass flooded roadways.
- Sandbagging and pumping operations coordinated with local and state agencies.
- Stormwater management improvements to limit standing water accumulation.
- Evacuation timing adjustments to ensure residents leave before road conditions deteriorate.

- With growing use of Electic Vehicles (EV), new considerations must be made to accommodate evacuations and public messaging.

### *Health Hazards from Floodwaters and Mold*

Floodwater poses serious public health risks, including exposure to contaminated water, bacteria, and mold. Standing water following major rain events creates an ideal environment for mold growth, which can lead to respiratory issues and long-term health complications. Volusia County Emergency Management will use social media, the County's Emergency Management app, local news stations, and emergency alert systems to warn residents of mold exposure risks in the aftermath of prolonged flooding. Additionally, effective stormwater management systems play a critical role in minimizing the presence of standing water on both public and private properties after storm events.

### *Impact of Hazards on Warning and Evacuation Procedures*

Timely and effective communication is essential during flood hazard events. The Volusia County Emergency Management X account (formerly known as Twitter) provides real-time updates before, during, and after flood emergencies. However, mass communication and power outages may disrupt normal information channels. In such cases, emergency communication will be facilitated through:

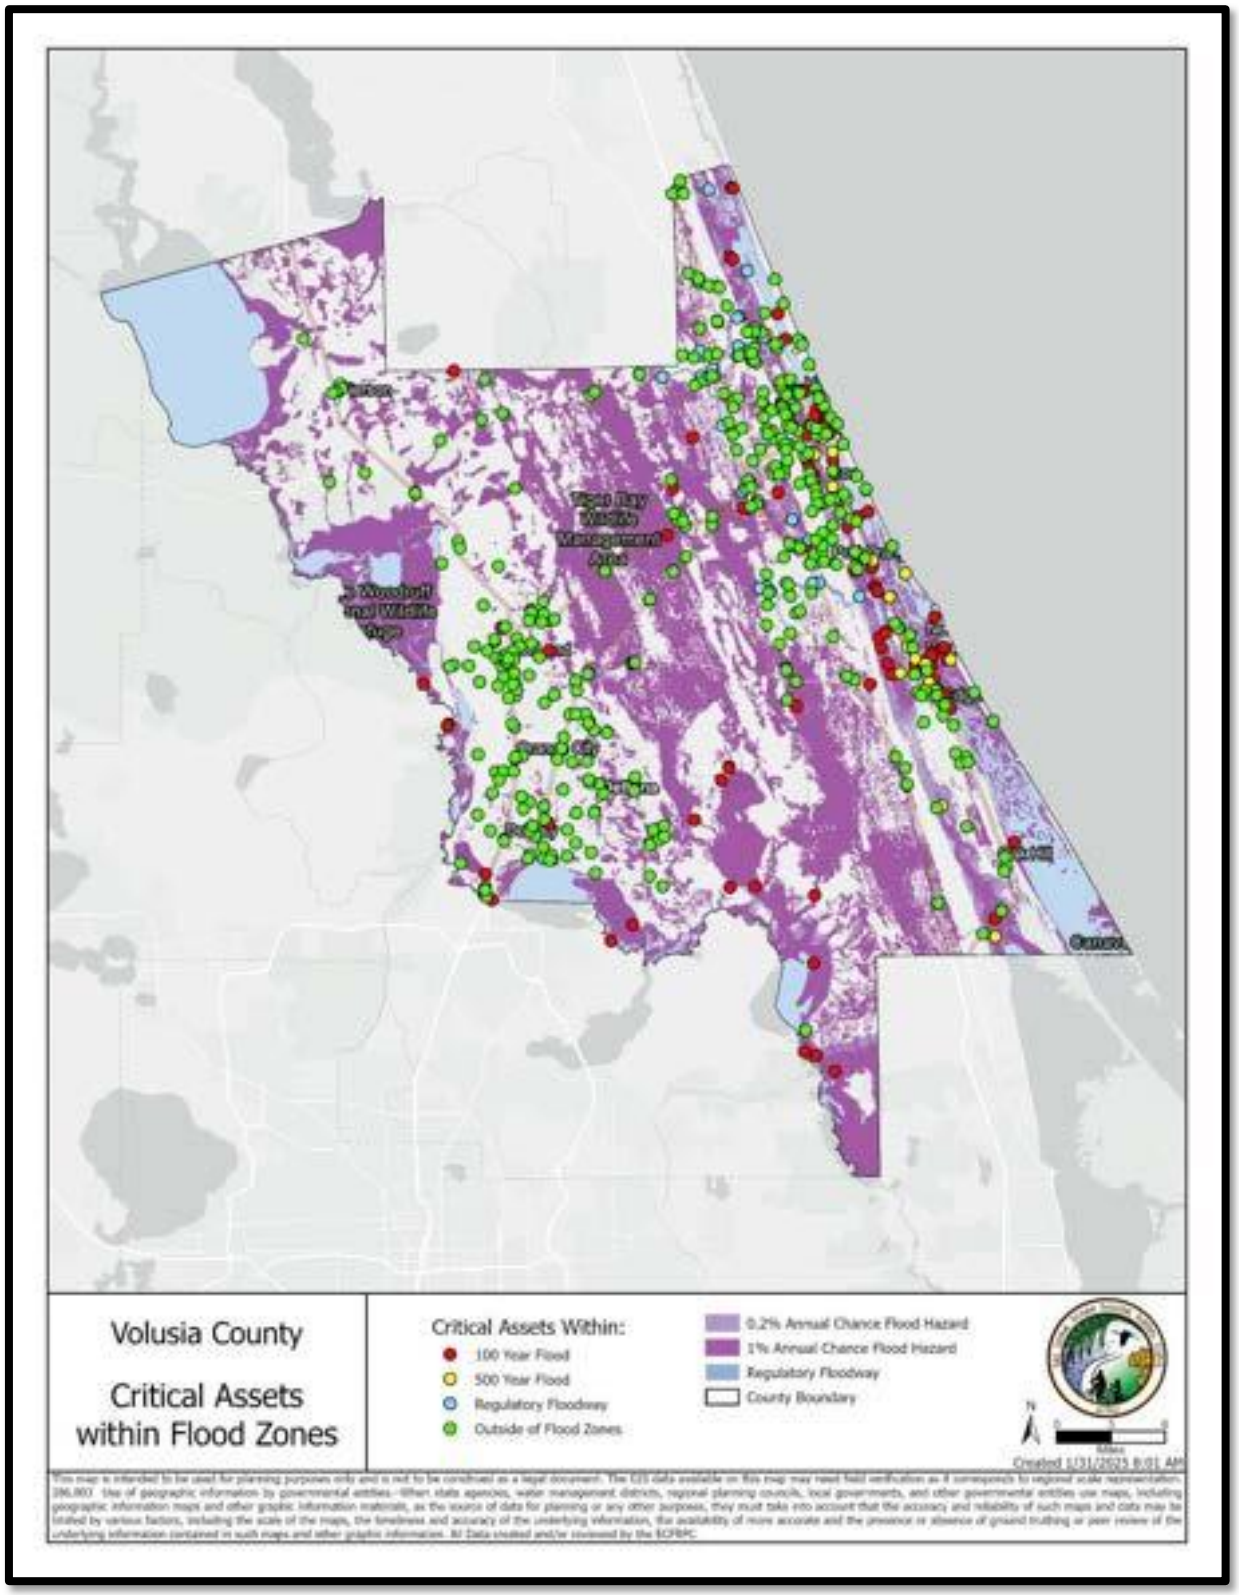
- Shelter staff and law enforcement personnel stationed in affected areas.
- Emergency Operations Center (EOC) protocols for alternative communication methods.
- Door-to-door alerts when necessary.

Additionally, strong winds and extreme weather conditions can delay emergency response efforts, emphasizing the need for advanced preparedness measures to ensure public safety during and after severe flooding events.

Volusia County, situated within the rapidly growing Central Florida region, has experienced significant population growth since the 1970s and continues to do so. Future development strategies should prioritize locations outside of flood-prone areas to reduce human exposure to flood risks. Key approaches include:

- Urban infill development to direct population growth away from high-risk floodplains.
- Increased density near transit to promote resilient land use.
- Low impact development, nature-based solutions, and green infrastructure.

## CRITICAL FACILITIES



Flooding can have impacts on critical facilities and the ability to respond to emergencies. According to the Florida Division of Emergency Management, "critical facilities" are defined as those structures from which essential services and functions for victim survival, continuation of public safety actions, and disaster recovery are performed or provided. Shelters, emergency operation centers, public health, public drinking water, sewer and wastewater facilities are examples of critical facilities. Though not explicitly included in the definition, supporting life-line infrastructure essential to the mission of critical facilities must also be included in the inventory when appropriate. Although several western jurisdictions are low in elevation, a disproportionately high number of critical facilities that are exposed to the floodplain are within a short distance to the Atlantic Ocean or inter-coastal waterway on the east side of the county. Many of the exposed critical facilities countywide are located east of Interstate-95.

The inundation of critical facilities can have a profound effect on the ability for coordination among county and city planning officials and mitigation activities must provide guidance to avoid cascading losses from a critical infrastructure perspective.

**Figure 9** depicts the flood hazard zones and the locations of vulnerable critical facilities at the countywide scale. The critical infrastructure database was derived from FEMA's HAZUS database.[3]

[3] The assets used for analysis in the FMP come from the Department of Homeland Security's Homeland Infrastructure Foundation-Level Data: https://hifld-geoplatform.hub.arcgis.com/pages/hifld-open

**Figure 9: Critical Assets**

## ECONOMIC ANALYSIS

An analysis of all properties exposed to the 100-Year Floodplain in Volusia County revealed that approximately 75,943 properties are located partially or completely within the 100-Year Floodplain. The county's taxable value at risk is $16,338,193,216 based on the ECFRPC analysis.

The following data summarizes the exposure within the 100-Year flood zone.
**Land Value**: $ 10,267,673,027
**Building Value**: $17,620,771,558
**Total Value**: $ 27,888,444,586

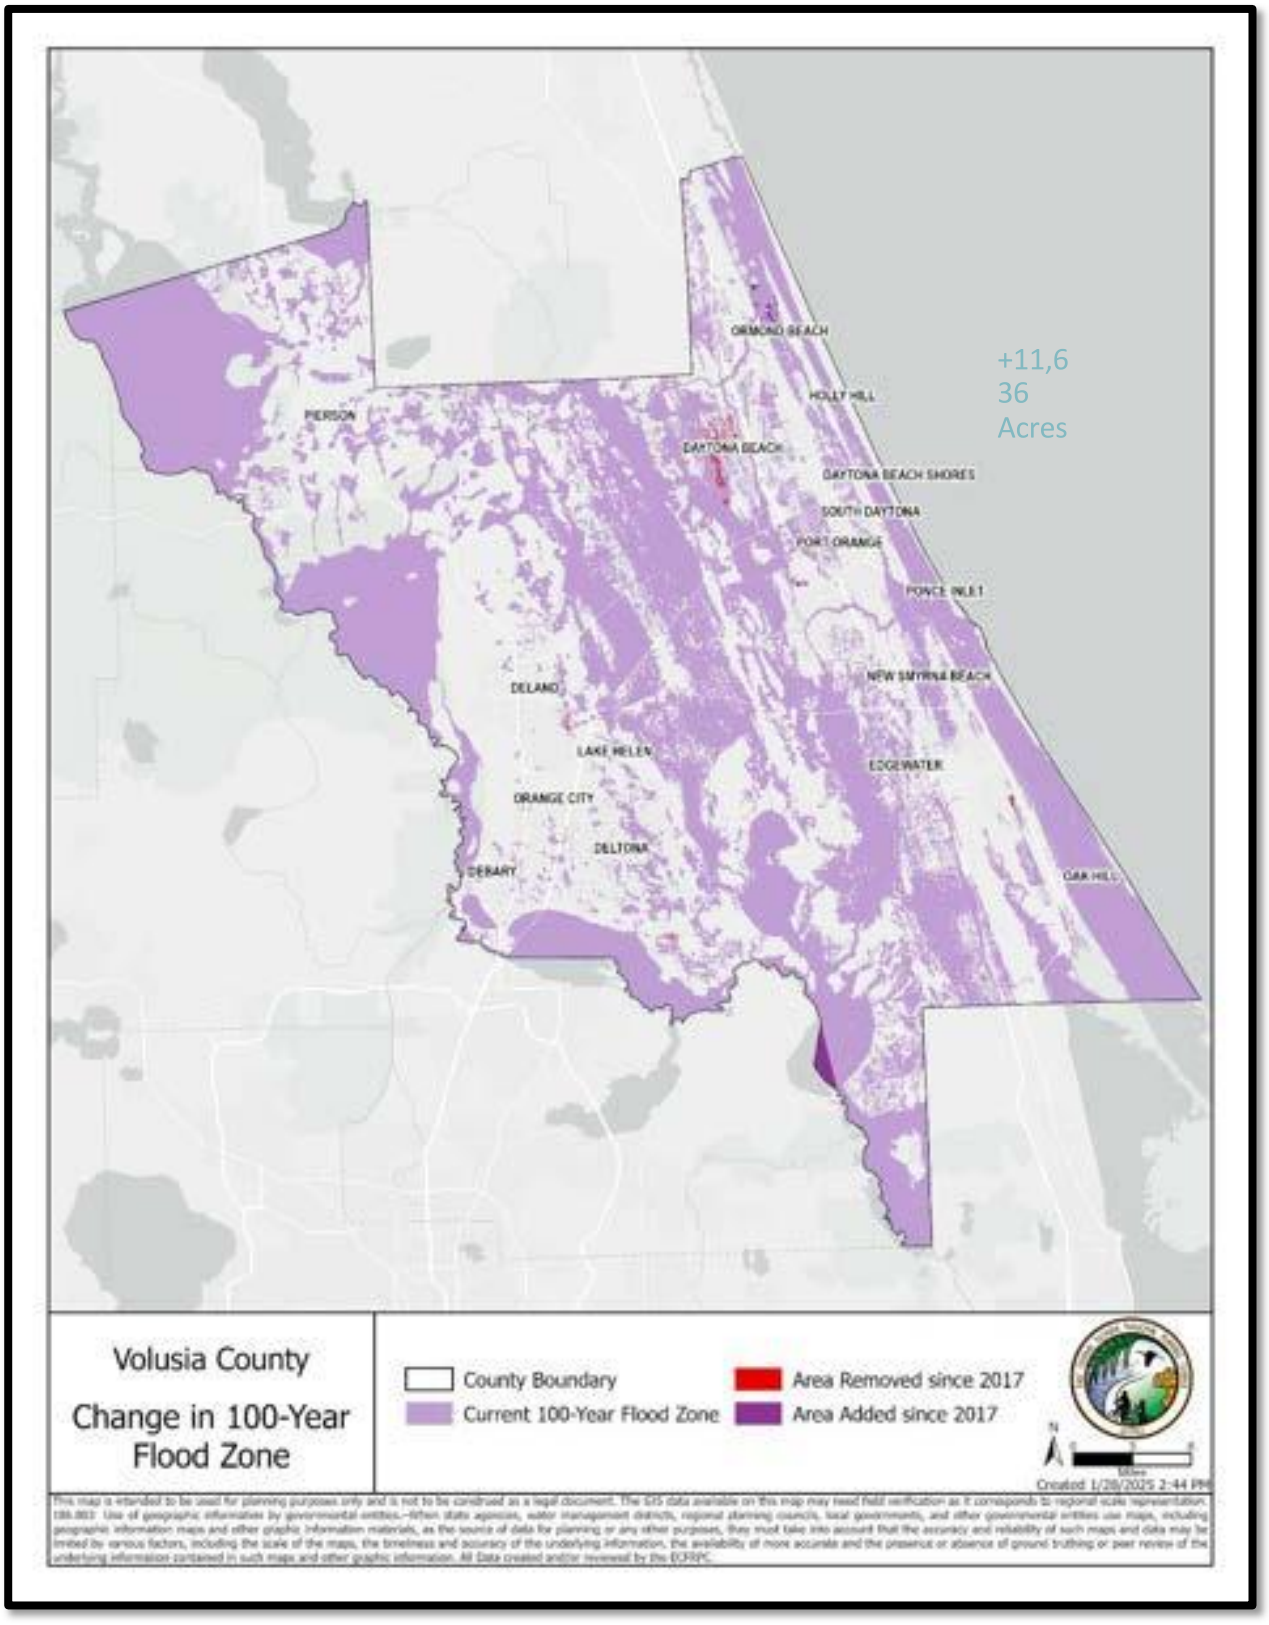
**Table 4** displays the financial exposure within the 100-Year floodplain by jurisdiction.

### Table 4: Total Financial Exposure to 100-Year Floodplain

| Municipality | Properties in Floodplain | Land Value in Floodplain | Assessed Building Value in Floodplain | Total Value | County Taxable Value in Floodplain |
|---|---|---|---|---|---|
| Daytona Beach | 12,759 | $1,662,132,754 | $4,774,499,134 | $6,436,631,889 | $3,945,909,214 |
| Daytona Beach Shores | 502 | $156,928,856 | $278,560,434 | $435,489,290 | $372,475,948 |
| DeBary | 1,380 | $210,284,592 | $378,959,546 | $589,244,138 | $339,144,099 |
| DeLand | 369 | $74,530,425 | $160,357,535 | $234,887,960 | $120,198,104 |
| Deltona | 5,522 | $398,367,606 | $1,147,280,949 | $1,545,648,555 | $668,644,860 |
| Edgewater | 1,166 | $304,009,640 | $294,055,323 | $598,064,963 | $353,613,966 |
| Holly Hill | 2,594 | $164,159,638 | $462,844,277 | $627,003,915 | $417,408,075 |
| Lake Helen | 288 | $32,412,697 | $45,911,931 | $78,324,628 | $36,649,988 |
| New Smyrna Beach | 6,251 | $1,453,090,176 | $2,186,466,969 | $3,639,557,145 | $2,303,289,141 |
| Oak Hill | 633 | $126,767,625 | $92,622,181 | $219,389,806 | $116,199,911 |
| Orange City | 74 | $46,406,822 | $208,269,347 | $254,676,169 | $131,349,031 |
| Ormond Beach | 4,325 | $928,807,534 | $1,781,229,586 | $2,710,037,120 | $1,882,276,510 |
| Pierson | 163 | $18,748,996 | $18,966,907 | $37,715,903 | $17,576,761 |
| Ponce Inlet | 813 | $268,308,232 | $254,911,926 | $523,220,158 | $360,984,348 |
| Port Orange | 5,254 | $647,646,952 | $1,424,083,158 | $2,071,730,110 | $1,296,532,918 |

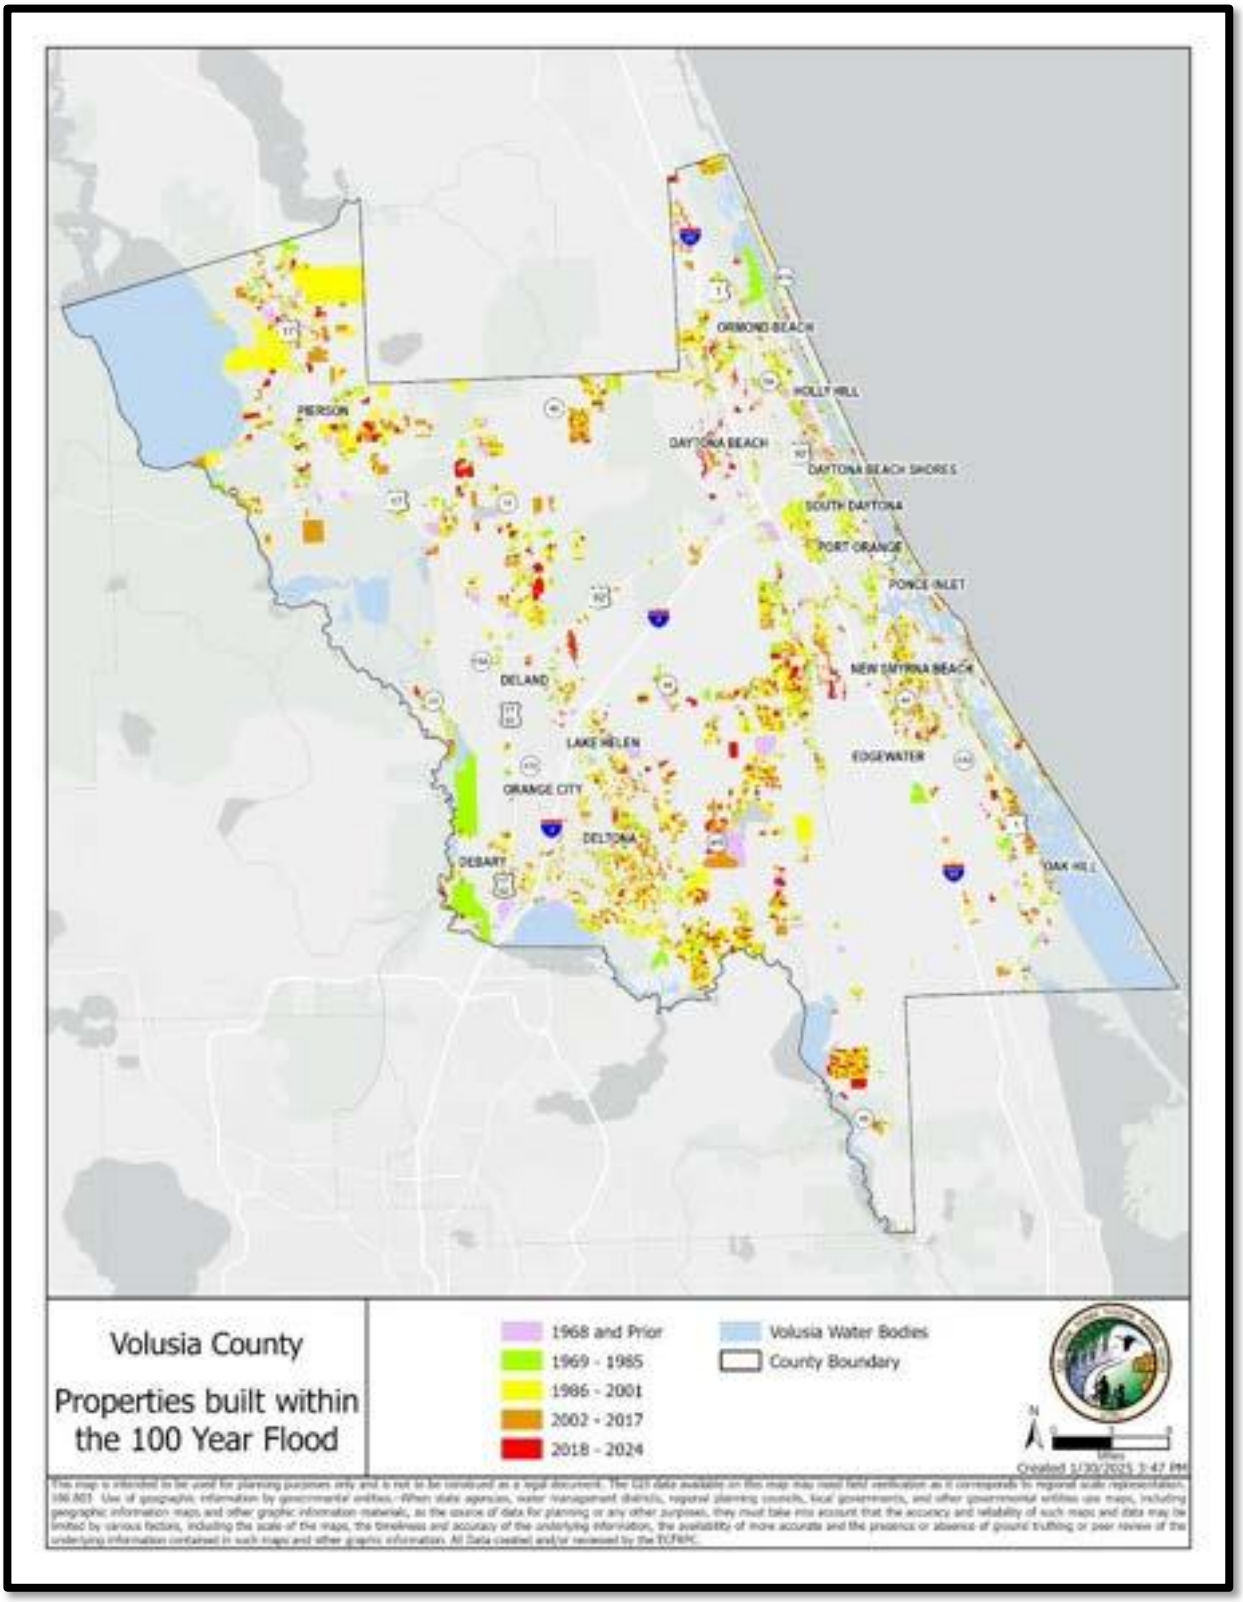
| | | | | | |
|---|---|---|---|---|---|
| South Daytona | 2,435 | $231,955,358 | $579,611,197 | $811,566,555 | $493,465,148 |
| Unincorporated | 31,415 | $3,543,115,124 | $3,532,141,158 | $7,075,256,282 | $3,482,475,194 |
| **Countywide** | **75,943** | **$10,267,673,027** | **$17,620,771,558** | **$27,888,444,586** | **$16,338,193,216** |

## FLOODPLAIN EXPANSION



An analysis of the previous 100-year flood zones showed considerable change from 2017 to 2024. Newly exposed and removed areas can be viewed in **Figure 10**. The acreage added since 2017 is 2,219 acres; however, 8,336 acres have been removed from the floodplain.

The most expansion has occurred in the Daytona Beach, DeBary, Ormond Beach, and unincorporated Volusia areas by 191, 1308, 380, and 197 acres respectively. This floodplain growth increases financial liability within the county, as a number of the parcels in these areas are developed. The jurisdictions with the most acreage removed are Daytona Beach, Daytona Beach Shores, and unincorporated Volusia by 6429, 891, and 960 acres respectively.



Volusia County is also susceptible to increases in the size of the 100-year Floodplain as a result of rising sea levels. This would primarily affect parcels near the coast, lagoon and inland rivers.

Floodplain Size Comparison
2007 DFIRM: Volusia County: 406,303 Acres
2017 DFIRM: Volusia County: 417,939 Acres (+2.9%)
2024: Volusia County: 411,383 (-1.6%)

**Figure 10: Change In The 100-Year FEMA Flood Zone Since 2017**

## Figure 11: Floodplain Growth

## PROPERTY ANALYSIS

An analysis of properties located totally, or in part, within the floodplain reveals countywide the percentage of properties in the floodplain. Jurisdictions such as New Smyrna Beach (54.72%), Oak Hill (48.5%), Ponce Inlet (52.47%), and South Daytona (79.74%) rank the highest percentage of properties within the floodplain; therefore, these jurisdictions are most susceptible to flooding. The year a property was built does alter flood risk because building code has included more requirements over time. **Table 5** breaks down the year built of all buildings within the 100 and 500-Year floodplain by jurisdiction. **Figure 11** displays the year that properties were built within the 100-year floodplain.

Key Dates Include:

The following dates are important from a building code perspective, as parcels built before or after these dates had different requirements at the time of construction.

1968

Federally backed flood insurance became available to all Americans.

1986

The County Stormwater Management ordinance was amended, enacting minimum design standards.

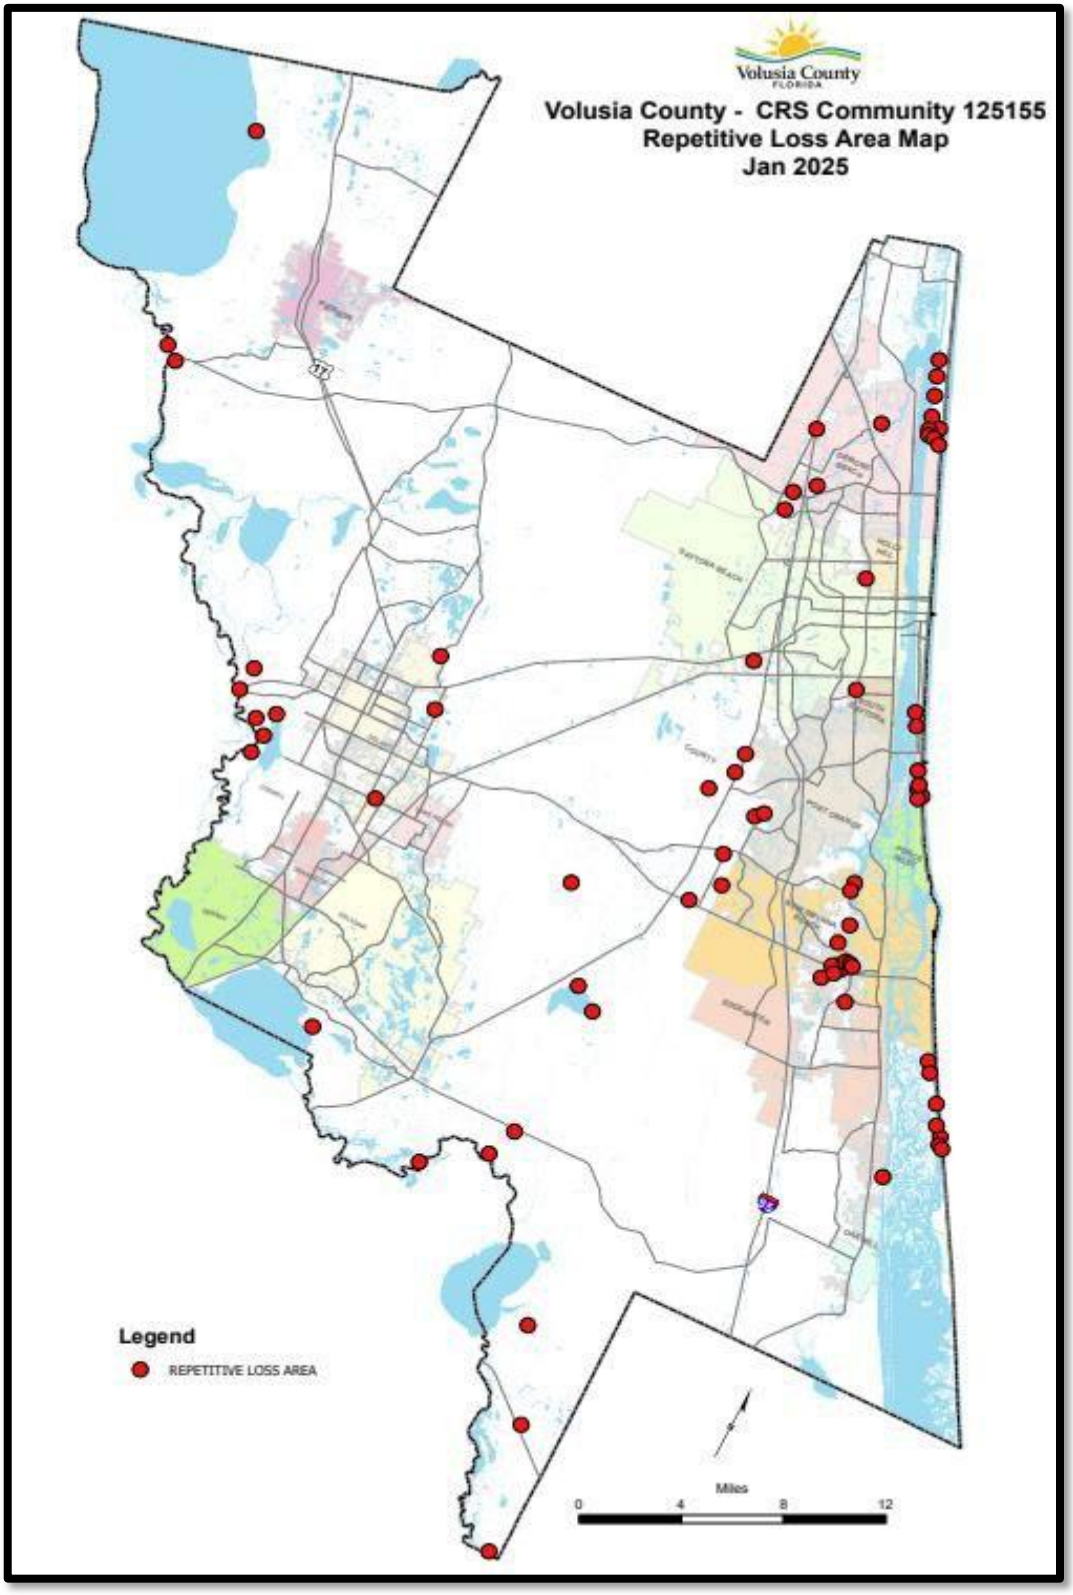
2002

The Florida building code went into effect.

### Table 5: Year Built of Structures in the 100 and 500-Year Floodplain

| Municipality | Number of Properties in Floodplain | Percentage of Properties in Floodplain | Built Prior to 1968 | Built 1969-1985 | Built 1986-2001 | Built 2002-2017 | Built 2018-2024 |
|---|---|---|---|---|---|---|---|
| Daytona Beach | 13,847 | 43.87% | 2,781 | 2,808 | 1,511 | 923 | 904 |
| Daytona Beach Shores | 507 | 38.53% | 89 | 155 | 45 | 50 | 5 |
| DeBary | 1,387 | 11.7% | 195 | 153 | 332 | 247 | 64 |
| DeLand | 369 | 2.11% | 2 | - | 18 | 71 | 67 |
| Deltona | 5,522 | 13.77% | 221 | 1,072 | 2,071 | 755 | 233 |
| Edgewater | 1,564 | 12.52% | 110 | 201 | 196 | 115 | 176 |
| Holly Hill | 3,160 | 57.93% | 866 | 647 | 212 | 184 | 61 |
| Lake Helen | 288 | 16.65% | 63 | 29 | 25 | 16 | 4 |
| New Smyrna Beach | 10,556 | 54.72% | 635 | 1,380 | 1,188 | 690 | 913 |
| Oak Hill | 891 | 48.5% | 37 | 134 | 86 | 113 | 48 |
| Orange City | 74 | 1.59% | 2 | - | 1 | 5 | 166 |
| Ormond Beach | 5,093 | 25.29% | 401 | 1,166 | 1,004 | 473 | 2 |
| Pierson | 163 | 12.72% | 28 | 21 | 13 | 6 | 25 |
| Ponce Inlet | 1,083 | 52.47% | 30 | 189 | 147 | 53 | 279 |
| Port Orange | 8,567 | 34.22% | 493 | 1,566 | 1,335 | 766 | 28 |

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| South Daytona | 4,311 | 79.74% | 652 | 994 | 382 | 83 | 900 |
| Unincorporated | 31, 415 | 38.45% | 1,596 | 3,474 | 3,083 | 2,010 | 3,875 |
| **Countywide** | | | **8,201** | **13,989** | **11,649** | **6,560** | **904** |



## REPETITIVE LOSS ANALYSIS

FEMA defines a repetitive loss (RL) property as any insurable building for which two or more claims of more than $1,000 were paid by the NFIP within any rolling 10-year period, since 1978. A repetitive loss property may or may not be currently insured by the NFIP.

There are repetitive loss properties within 13 of the 16 jurisdictions within Volusia County. This includes 1,280 properties in total. Countywide distribution of repetitive loss properties is somewhat weighted to the east, as a majority of the repetitive loss properties in the county are in Port Orange, South Daytona, and Daytona Beach. Each of these three jurisdictions has over 200 RL properties each. Unincorporated Volusia also has roughly 232 RL properties throughout. The western side of the county also has several repetitive loss properties, most notably the cluster within the Stone Island residential area in the southwestern portion of the county. Data collected showed that many properties have not undergone mitigation efforts; however, there is insufficient data to measure an actual percentage for the entire county. According to FEMA, the total building payments for these properties are approximately $182,712,911.

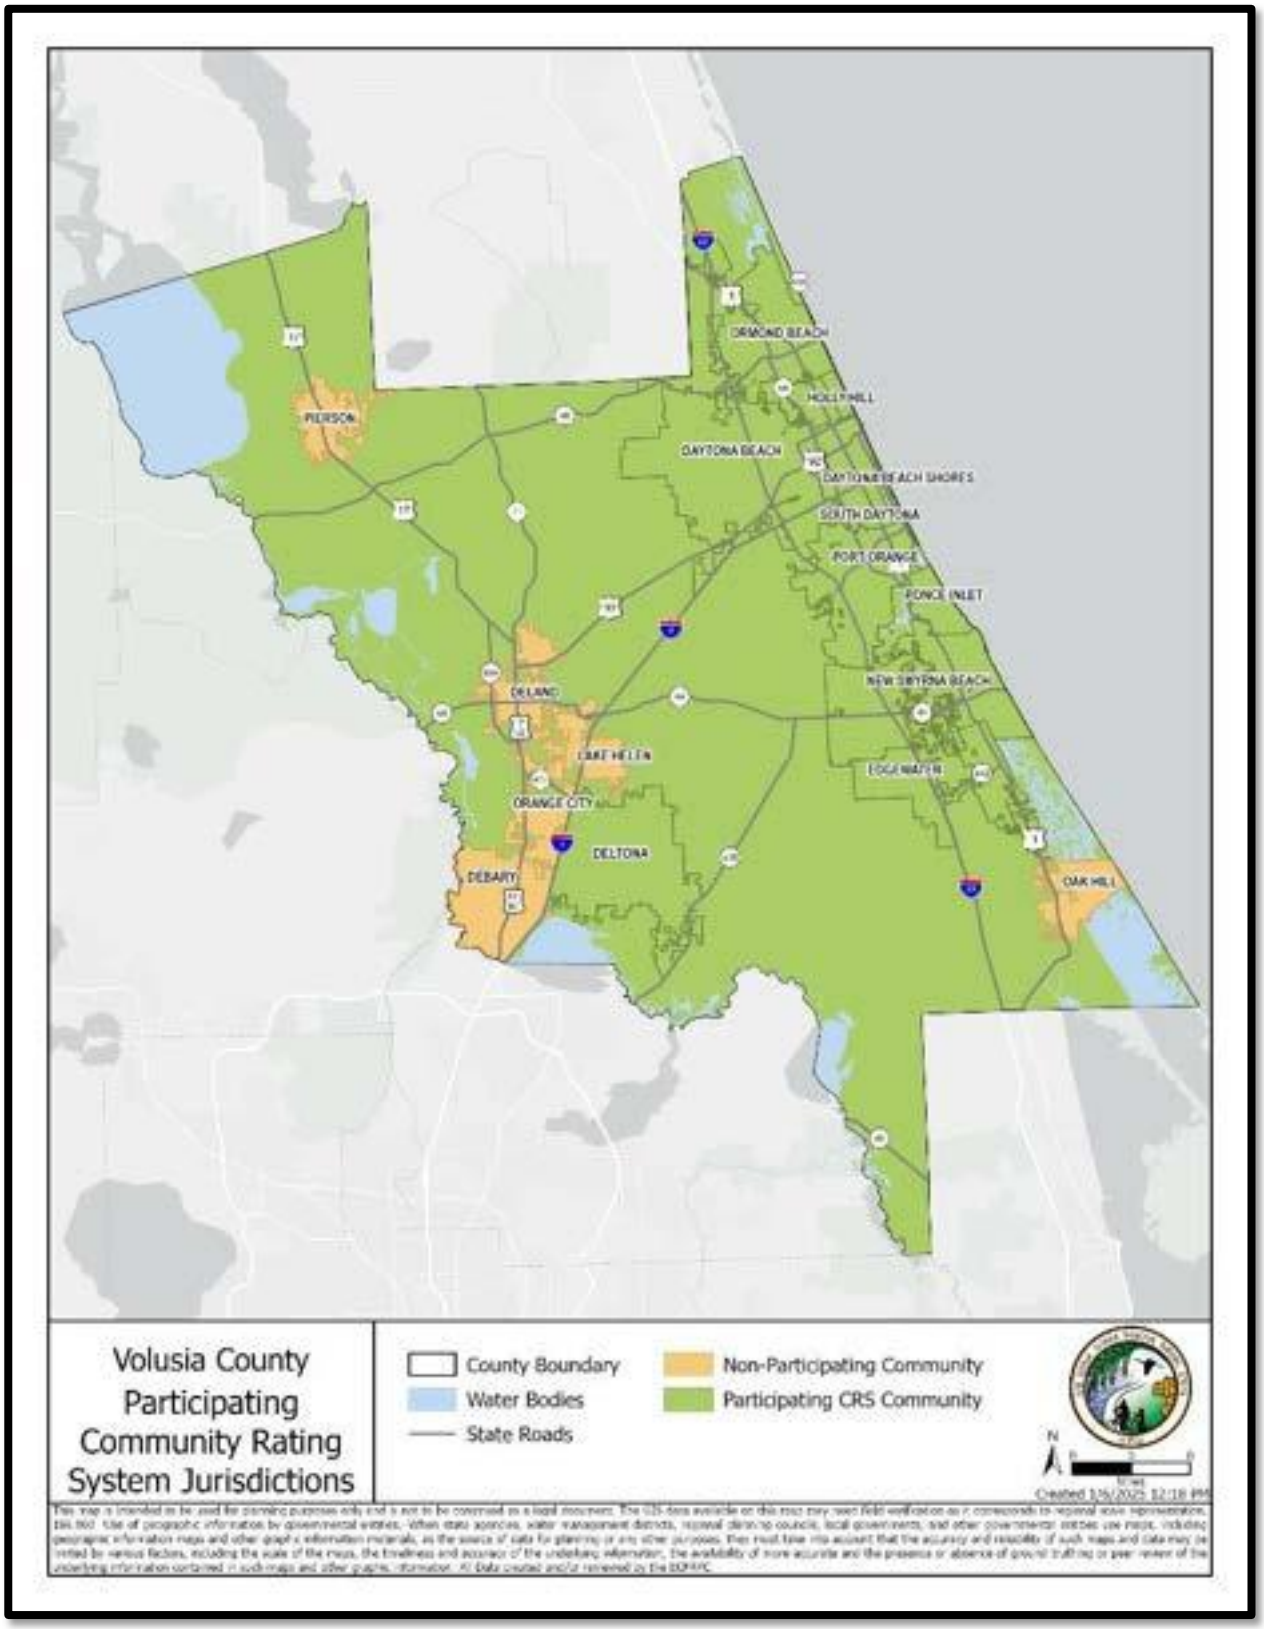
Because of the sensitivity with repetitive loss information, Volusia County and its jurisdictions have advised to omit the exact numbers of losses by land use, but many of these properties are residential. **Figure 12** displays the general location of RL properties as provided by Volusia County GIS.

**Figure 12: Repetitive Loss**

### *Mitigation Strategy for Repetitive Loss Properties*

The Volusia Prepares working group, mentioned previously in this plan, prioritizes mitigation projects among the county and all municipalities through the within Section 9 of the 2025-2030 LMS.

Of the many project types included in the Mitigation Action Plan is the mitigation of repetitive loss properties by raising the properties or through other measures. These properties are often mitigated with funds from the Federal Emergency Management Agency's (FEMA) Hazard Mitigation Grant Program (HMGP). FDEM announced Florida's first statewide residential mitigation program, Elevate Florida. The goal of this program is to enhance community resilience by mitigating private residences against natural hazards. The main focus is to elevate, reconstruct, and/or acquire.



## FLOOD CLAIM ANALYSIS

All jurisdictions in Volusia County participate in the National Flood Insurance Program (NFIP) and eleven (11) participate in the Community Rating System (CRS) program as shown in **Figure 13**. The average savings per policy by the participating jurisdictions is $75 per policy and $2,164,580 for total community savings.

As of January 2025, the total number of policies in force with the NFIP throughout Volusia County is 47,874 according to FEMA. The mean discounted premium for the county is $655. The median total annual payment is $889. The total discounted premium is $23,172,513. The total annual payment is $31,143,950. The City of Daytona Beach has the most active policies at 8,537.

In Volusia County, significant NFIP claim payouts were made in 2022 and 2024. For those within flood zones A, B, V, X and unknown, the grand total of payouts in 2022 was $268,842,848. Whereas zones A, B, and X in 2024 had a total of $121,019, 328. In those two years alone, the grand total of NFIP claims was approximately $389,862,176.

**Figure 13: Participating Community Rating System Jurisdictions**

As the effects of climate change become more pronounced and frequent, insurance providers have become less willing to insure homes in hazardous areas. In Florida, Progressive alone has dropped coverage for nearly 100,000 homes[4]—most of which were in high-risk areas—and nearly one-third of Florida residents who lost their provider had intentions to move or already had.[5] In July 2024, the Louisiana state legislature repealed a law preventing insurance ACT NOW companies from canceling policies that had been in effect for at least three years. Insurers are seeing reduced profits or even losses in most states; the resulting rising costs have led some people to forgo home insurance altogether. Homeowners that never considered having flood insurance are being hit hard, as was the case for North Carolinians in September 2024 with Hurricane Helene in 2024. Both owners and developers of affordable multifamily properties that receive tax credits are also experiencing surging insurance premiums, which is disincentivizing new development. To mitigate industry impacts to homeowners, some regulators employ strategies such as mandating insurance industry transparency and forbidding "bluelining"—the increase in premiums or withdrawal of services in high-risk areas—by providers. The National Association of Insurance Commissioners PREPARE recently adopted a National Climate Resilience Strategy for Insurance to guide regulators and providers alike, and Florida has passed several laws aiming to reduce insurance premiums and provide mitigation grants to homeowners and multifamily properties.[6] Growth in "non-admitted" residential insurance policies is skyrocketing, though this lightly regulated sector lacks guaranty funds and major disasters could leave those policyholders without protection.

### NATURAL PROTECTION

The Volusia County Comprehensive Plan and jurisdictional comprehensive plans all include a conservation element which aims to prevent the degradation of water bodies, wetlands, rivers, estuaries and essential upland areas. Goals and policies in the conservation elements include the protection of surface water resources and the floodplains associated with the water sources, including limiting dwelling unit densities within the floodplains and flood-prone areas. The County works alongside the St. Johns Water Management District to approve development, evaluate freshwater resource capacity, and manage stormwater.

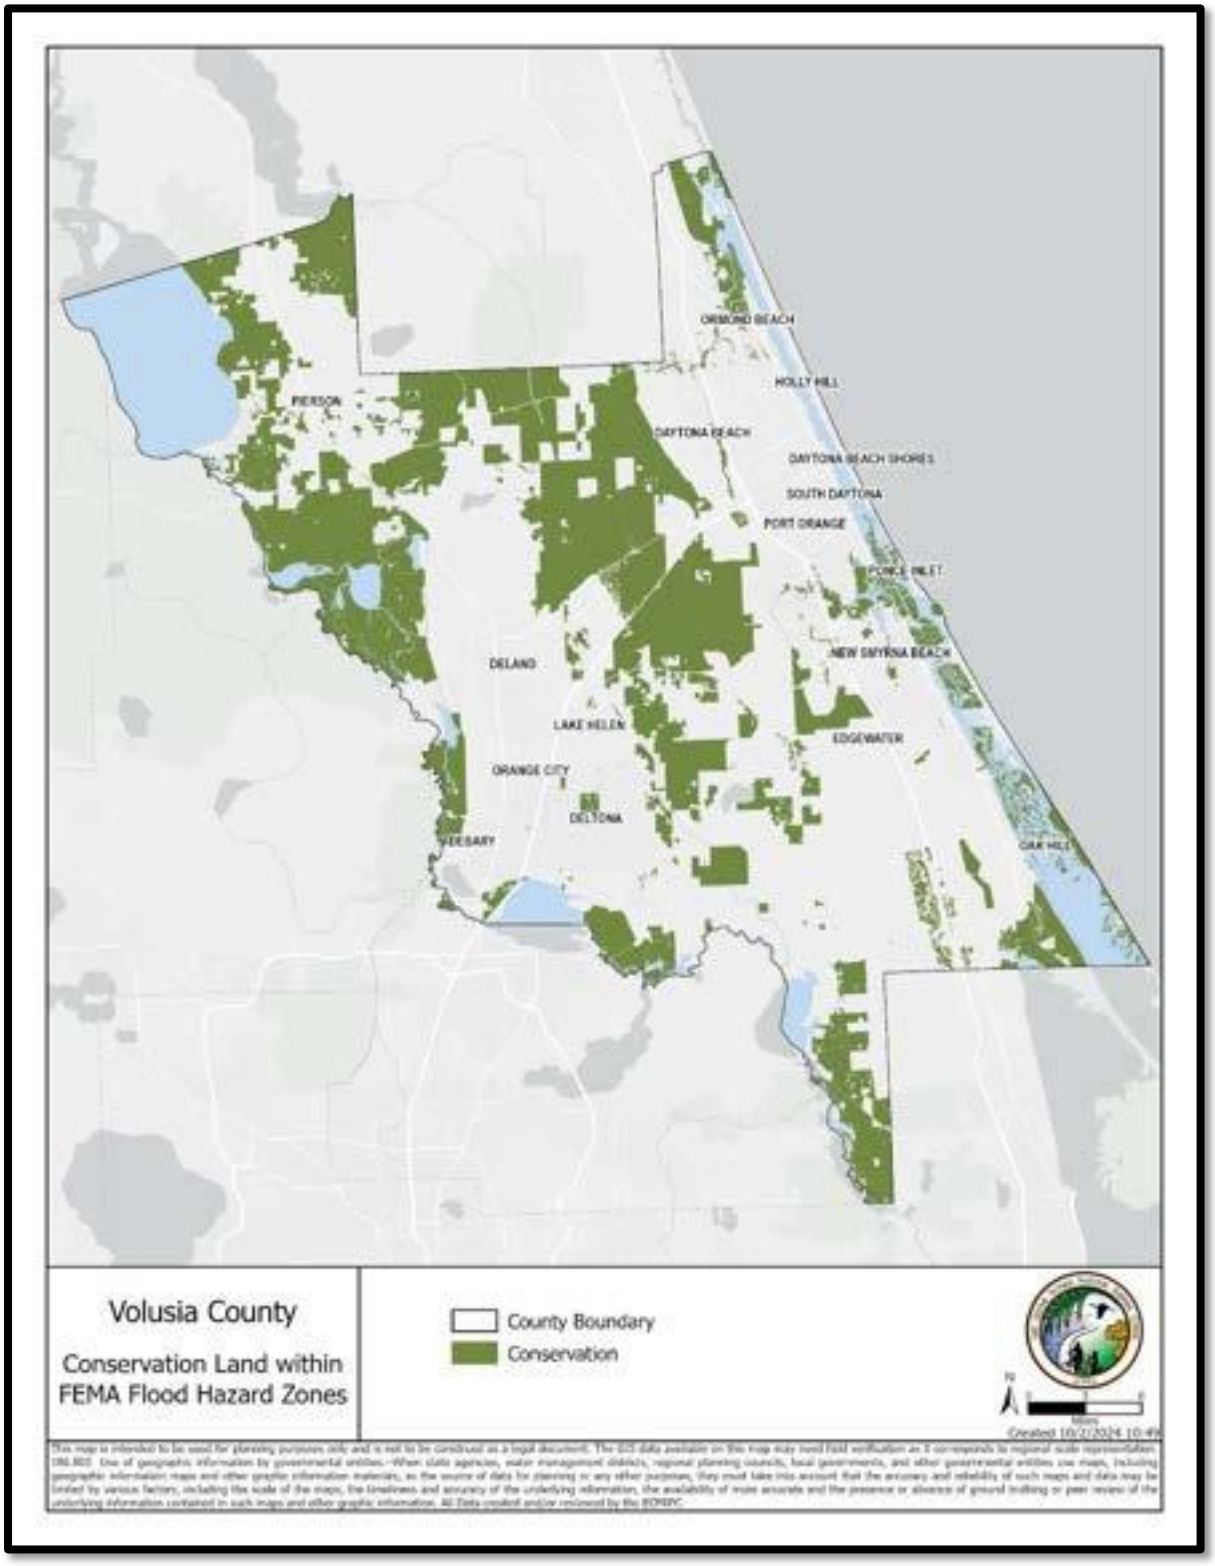
---

[4] https://www.clickorlando.com/news/florida/2024/04/26/progressive-dropping-100000-home-insurance-policies-in-florida-here-are-the-details/

[5] https://www.news4jax.com/news/local/2024/04/18/1-in-3-floridians-who-get-dropped-by-their-homeowners-insurance-company-are-choosing-to-move-study/

[6] https://www.floridapeninsula.com/blog/florida-legislation-helping-to-reduce-runaway-home-

insurance-premium-costs



To this effect, the protection of undisturbed segments of floodplains associated with surface water bodies shall continue through land use controls, conservation easements, public acquisition and other methods. These and other policies in the Comprehensive Plans aim to protect and utilize physical and ecological functions of natural drainage ways and patterns to protect developed areas from flood impacts. Wetland and easements maintained along water bodies not only serve as flooding buffers to development but also provide habitat for various species which may otherwise be displaced through fill and development.

According to the analysis performed using GIS by the ECFRPC, there are 411,383.43 acres within the 100-Year floodplain countywide (**Figure 14**). Throughout the county there are 236.620.55 acres zoned as conservation. The acreage of the 100-Year flood zone which falls within conservation lands is 147,171.36.

35.77% of the 100-Year flood zone intersects with areas zoned as conservation; whereas 62.21% of conservation land falls within the 100-Year flood zone.

This would be inclusive of all types of conservation properties such as wetlands and other floodplain areas. It should be the goal of all jurisdictions within the County to maximize the amounts of undeveloped lands in the floodplain with a conservation future land use. This would ensure that development does not infringe into the floodplain.

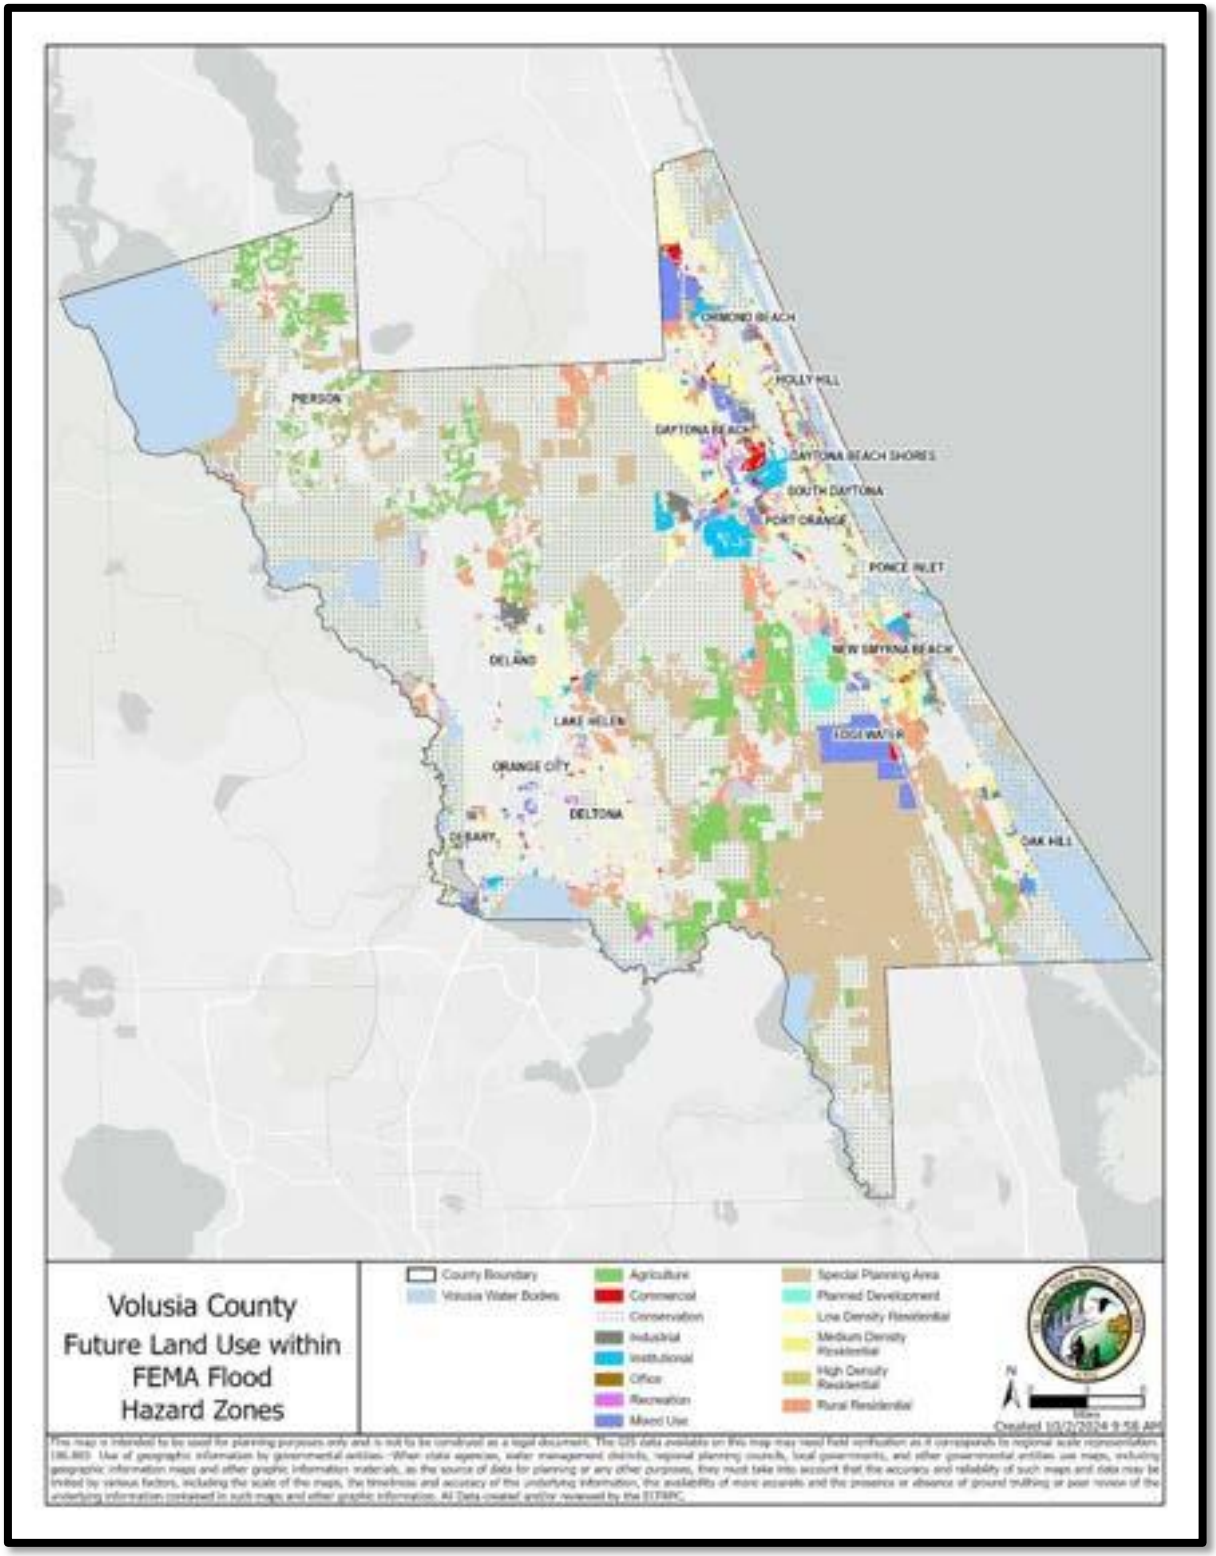
## Figure 14: Conservation Lands in the Floodplain

## LAND USE AND TREND ANALYSIS

**Table 6** below summarizes the total allocation of Future Land Use Designations by acreage of all parcels exposed to the 100-Year and 500-Year Floodplain in Volusia County. Most of the exposed developed parcels are categorized as "Residential" with roughly 50,000 acres exposed. That is by far the highest-ranking future land use exposed to flood zones. The future land use designation with the second highest exposure is mixed use, with slightly over 9,000 acres exposed. As population and development continue to risk, mitigation techniques should be implemented to ensure residents' safety and wellbeing. **Figure 15** displays the future land uses in the floodplain.

### *Population and Development Trends*

According to the U.S. Census Bureau, Volusia County's population has seen an increase over the past few decades. This trend is expected to be maintained, with population growth expected.



Volusia County Population, 2000: 445,060
Volusia County Population, 2010: 494,610 (+11.1%)
Volusia County Population, 2017: 538,692 (+8.9%)
Volusia County Population, 2023: 574,286 (+6.6%)

### *Future Land Use*

**Table 6: Analysis of Acreage of Future Land Uses Located within the 100 and 500-Year Flood Plain**

| Municipalities | Residential FLU | Commercial FLU | Mixed Use FLU | Industrial FLU | PD FLU | Institutional FLU |
|---|---|---|---|---|---|---|
| Daytona Beach | 9,383.93 | 1,008.15 | 1,611.28 | 977.84 | 45.03 | 864.09 |
| Daytona Beach Shores | 11.98 | 15.18 | - | - | 1.58 | 1.15 |
| DeBary | 482.88 | 69.27 | 110.81 | 1276.54 | - | 97.03 |
| DeLand | 889.78 | 8.7 | 1.69 | 407.6 | 162.82 | 2.25 |
| Deltona | 21,742.91 | 942.59 | 803.46 | - | - | - |
| Edgewater | 806.99 | 66.80 | 3,976.84 | 166.87 | - | 55.28 |
| Holly Hill | 603.81 | 69.36 | 8.30 | 222.08 | - | 27.98 |

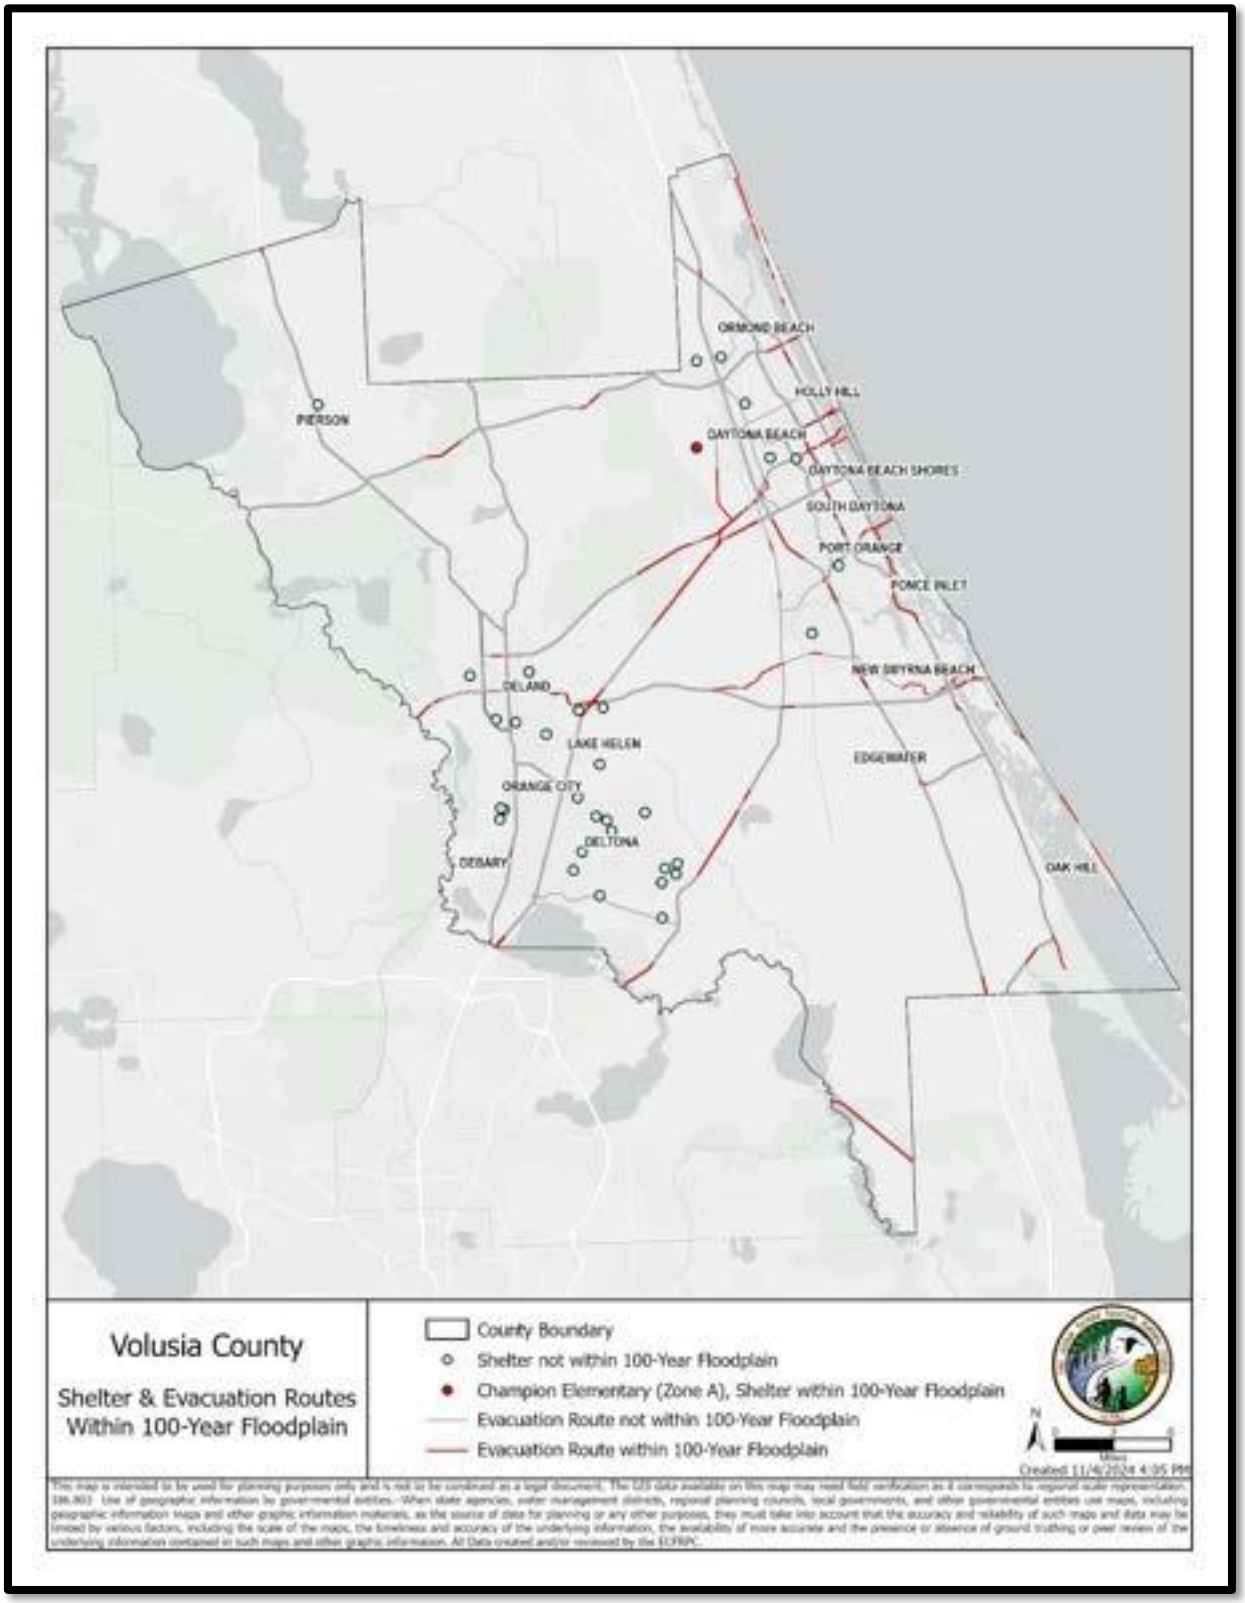
## Figure 15: Future Land Uses in the Floodplain

### *Shelters and Evacuations*

**Figure 16** shows the evacuation routes and storm shelter locations as identified by the Statewide Regional Evacuation Study (SRES). It is important to note that shelters located within a floodplain may be inaccessible to the public during flooding events, either due to property flooding or the flooding of access roads. The analysis showed that only one shelter is located within the 100-year floodplain.



The following evacuation routes are primary movers of traffic out of Volusia County:

- Interstate 4 (to Orlando)
- Interstate 95 (to Miami, Jacksonville)
- State Road 40 (to Lake County)
- State Road 415 (to Sanford)
- U.S. 1 (coastal)

**Table 7** lists all the designated storm shelters in Volusia County.

In the event of a mass-evacuation situation in Volusia County, the roadways utilized to reach these storm shelters could become damaged or inundated by water, thus creating the need for mitigation activities that would identify shelters that have additional capacity or those that can serve excess capacity from an inundated shelter. Public messaging about evacuations is extremely time sensitive.

## Figure 16: Shelters and Evacuation Routes in the Floodplain

### Table 7: List of Shelters

| Jurisdiction | Name |

### C. Impacts of Flooding

Flooding poses a significant threat to Volusia County, affecting nearly every aspect of life, from the economy and infrastructure to community resilience and environmental sustainability. As storms grow more intense and rainfall totals increase, the consequences of flooding become more severe, leaving lasting damage that extends well beyond the initial event.

Economically, the cost of flooding is staggering. Property damage from floodwaters can leave homes and businesses uninhabitable, forcing residents and business owners to invest in costly repairs or relocation. Insurance premiums for flood-prone areas rise, placing additional financial strain on homeowners and deterring economic growth in affected communities. Prolonged flooding also disrupts commerce, shutting down businesses, damaging inventory, and creating long-term economic instability. Major employment sectors in the county, including tourism, agriculture, and coastal industries, suffer significant losses when roads are impassable, infrastructure is compromised, or natural attractions like beaches and parks are eroded or destroyed.

The county's infrastructure is particularly vulnerable to repeated flood events. Roads and bridges may be washed out, undermining connectivity and delaying emergency response times. Utilities, including water treatment plants and electrical grids, can become inundated, leading to prolonged power outages and boil-water advisories. As storm surges and riverine flooding breach critical infrastructure, the cost of repairs increases, and the risk of cascading failures—such as sewage system overflows and contaminated drinking water—rises. Public transit systems and evacuation routes often traverse floodplains, leaving them impassable during storms and further complicating response efforts.

For residents, flooding creates lasting hardship, particularly for the county's most vulnerable populations. Low-income communities, many of which are located in flood-prone areas due to historically lower property values, face disproportionate risks. Without financial resources to repair or elevate homes, many residents are left living in unsafe conditions long after floodwaters recede. Elderly and disabled individuals, who may have difficulty evacuating or accessing aid, are at higher risk of becoming stranded or experiencing health complications. Displaced families struggle with housing instability, often relying on temporary shelters or FEMA assistance while facing an uncertain future.

The environmental consequences of flooding further exacerbate the challenges faced by Volusia County. As floodwaters move through developed areas, they pick up pollutants, chemicals, and debris, contaminating rivers, estuaries, and groundwater supplies. The Halifax and Tomoka Rivers, along with the St. Johns River, serve as critical water sources for both human consumption and local ecosystems. Flooding accelerates saltwater intrusion into freshwater supplies, diminishing the availability of clean drinking water and threatening agriculture. Additionally, coastal erosion intensifies with each flood event, weakening natural barriers and making future storms even more destructive. Wetlands, which serve as natural buffers for floodwaters, become overwhelmed or permanently degraded, reducing their ability to absorb excess water and increasing the risk of more severe flooding in the future.

In the aftermath of major flood events, the road to recovery is long and arduous. The county must balance the immediate need for rebuilding with the long-term necessity of flood mitigation and climate adaptation. While investment in resilient infrastructure, improved drainage systems, and sustainable land-use planning can help reduce future risk, the reality remains that Volusia County will continue to grapple with the growing threats of flooding. The challenge of moving forward is not simply about responding to flood events but adapting to a future where rising waters become an ever-present concern.

# VI. MITIGATION STRATEGY

## A. Setting Goals

The Floodplain Management Plan Committee reviewed the goals of the current Volusia County FMP and the Local Mitigation Strategy. The following goals and objectives were adopted for the 2025 Volusia County Floodplain Management Plan.

**GOAL 1 - Prevent new development in the floodplain from increasing runoff and resulting in increases in flood volumes in the floodplain.**

- Objective 1.1 Enforce the building requirements, from the National Flood Insurance Program and not allow variances that are feasibly avoidable.
- Objective 1.2 Ensure any new development in the floodplain is in accordance with county or municipal ordinances.
- Objective 1.3 Minimize flood hazards and protect water quality county-wide by employing watershed-based approaches that balance environmental, economic, and engineering considerations.
- Objective 1.4 Protect environmentally sensitive lands and aquifers to maximize their survivability from known flood hazards where appropriate and financially feasible.
- Objective 1.5 Reduce flood exposure and maximize flood protection efforts.

**Goal 2 – Develop and maintain a proactive public awareness and outreach that informs and notifies property owners that they are located in a flood zone and provides assistance and information regarding flood zones, protection of property, local drainage and sewer back-up problems.**

- Objective 2.1 Create easily accessible information to educate residents about the hazards, loss reduction measures, and the natural and beneficial functions of floodplains.
- Objective 2.2 Encourage land and water uses compatible with the protection of environmentally sensitive lands and coastal resources.
- Objective 2.3 Review the adequacy and completeness of emergency procedures that address catastrophic flood events and every year conduct a test of the flood warning system.
- Objective 2.4 Minimize impacts from flooding in FEMA designated special flood hazard areas (i.e. flood zones starting with the letters “V” or “A”) where financially feasible.
- Objective 2.5 Build a constituency that desires to see the plan's recommendations implemented.
- Objective 2.6 Provide leadership in protecting low-income properties and public housing

from the impacts of floods.

**Goal 3 - Continue with the Hazard Mitigation Grant Program to identify and obtain funding for both pre-and-post disaster residential mitigation projects regarding flooding.**

- Objective 3.1 Continue to identify cost-beneficial residential units for various flood mitigation grants.
- Objective 3.2 Continue to utilize "Volusia Prepares" Local Mitigation Strategy to guide and assist the County and municipalities in establishing priorities for hazard mitigation projects.

**Goal 4 – Reduce the number of repetitive loss properties within Volusia County.**

- Objective 4.1: Mitigate identified repetitive loss properties through the HMGP funding program when possible.

**Goal 5 - Review the locations and effects on areas that experience flooding and determine what steps, if any, the County and municipalities can take to alleviate future impacts.**

- Objective 5.1 Maintain a database of flood problems and hazards, mitigation, and repetitive loss claim history.
- Objective 5.2 Build public and political support for projects that prevent new problems, reduce losses, and protect the natural and beneficial functions of floodplains.
- Objective 5.3 Continue to prioritize capital projects that will mitigate flood impacts in those areas of the County and municipalities that have experienced significant flooding problems.
- Objective 5.4 Continue and enhance existing programs that acquire wetland areas for passive recreation uses while providing significant watershed volume storage and buffer areas from the floodplain.

## VII. MITIGATION ACTIVITIES

Flood Mitigation specifically involves managing and controlling flood movement to prevent and minimize flooding. Flood mitigation is any action taken to reduce risk to people or property from flooding and its effects. The Volusia County Multi-Jurisdictional Local Mitigation Strategy (LMS) has evolved over the years and not only focuses on flooding, but other natural hazards. The Volusia Prepares LMS Working Group has developed Bylaws and Operating Procedures to formalize the LMS update process and working group. The Plan documents and represents the County's and participating local jurisdictions' sustained efforts to incorporate hazard mitigation principles and practices into the routine government activities and functions of Volusia County and its participating jurisdictions and partners. This includes documenting the goals and objectives that Volusia County deems necessary to protect people and property from hazards. At its most inner core, the Plan recommends specific actions to combat hazard vulnerability and protect its residents from losses to those hazards that pose the greatest risk.

### Table 8: Funding Sources for Property Mitigation Activities

| Eligible Activities | Hazard Mitigation Grant | Pre-Disaster Mitigation | Flood Mitigation Assistance | Repetitive Flood Claim | Community Development Block Grant | Public Assistance Program | Severe Repetitive Loss |
|---|---|---|---|---|---|---|---|
| Acquisition/ Demolition *(for purposes of open space)* | ✓ | ✓ | ✓ | ✓ | ✓ | | ✓ |
| Relocation | ✓ | ✓ | ✓ | ✓ | ✓ | | ✓ |
| Elevation | ✓ | ✓ | ✓ | ✓ | ✓ | | ✓ |
| Dry Flood-proofing *(historic residential structures)* | ✓ | ✓ | ✓ | ✓ | ✓ | | ✓ |
| Public Facility Mitigation | | | | | ✓ | ✓ | ✓ |
| Mitigation Re-construction | | | | | ✓ | | ✓ |

*A detailed description of the funding sources can be found in Section 9 of the Volusia County Local Mitigation Strategy.*

## A. Flooding Preventative Activities

Planning and regulatory capability is based on the implementation of plans, ordinances and programs that demonstrate a local jurisdiction's commitment to guiding and managing growth, development and redevelopment in a responsible manner while maintaining the general welfare of the community. It includes emergency management, mitigation planning, and comprehensive land use planning. Examples include:

- **Enforcement of Zoning and Subdivision Ordinances and Building Codes** - regulate how land is developed and how structures are built.
- **Urban Service Area Boundaries** – created to regulate sprawl and apply land use policies within defined, manageable boundaries. When a city has an urban service boundary, services and infrastructure are not provided outside the boundary to prevent development in sensitive areas and future losses. This supports development in lower-risk areas.
- **Transfer of Development Rights** – transfer of development rights is a market-based tool that allows communities to channel development toward designated growth areas and away from natural areas. Purchasing land may be beneficial to conserve natural land or relocate facilities from at risk areas.
- **Down Zoning** – involves rezoning an area to a usage of lower intensity, limiting financial exposure of development in high-risk areas. This can be applied in parts of the city that might be vulnerable to the impacts of sea level rise, storm surge, and flooding.
- **Cluster Zoning** – the type of zoning is used to "cluster" density within well-defined urban centers, leaving room for open spaces and conservation land. This strategy is best implemented in areas located away from high hazard zones and are centrally located.

## B. Property Preventative Activities

Property preventive activities are generally undertaken by property owners on a building-by-building or parcel basis. Some activities may include:

- **Buy-Out & Acquisition** - the act of acquiring or gaining possession to flood damaged properties and permanently preserving the land.
- **Relocation** – physically moving an asset or facility that is at risk or that has experienced multiple flood losses in the past. A cost-benefit analysis should be performed due to the potential alternative to building an entirely new facility.
- **Elevation** – to reduce the probability of inundation and wave action, private and public property owners may choose to raise structures above base flood elevation.
- **Flood Insurance** – a specific insurance coverage against property loss from flooding.

- **Flood-Proofing** – this strategy includes making foundations, doors, and windows watertight or changing the use of the ground flood facilities to tolerate temporary inundation. Dry proofing makes assets waterproof. While wet proofing ensures that key materials are water resistant or elevated above the designated flood elevation.

### C. Natural Resource Protection Activities

These activities are customarily conducted to preserve or restore natural areas or the natural functions of floodplain and watershed areas. Natural resource protection activities reduce the impact of natural hazards by preserving or restoring natural areas and their protective functions. Such areas include floodplains, wetlands, steep slopes and sand dunes. Parks, recreation or conservation agencies and organizations often implement these protective measures. Examples of Natural Resource Protective Measures:

- **Floodplain protection and watershed management** – regulate how land is developed.
- **Low impact development and nature-based solutions** – this includes the use of multiple strategies such as bioretention, permeable surfaces, solar, green buildings, and other features in masse in a new or existing development.
- **Living shorelines** – a vegetated shoreline that utilizes native plants with the purpose of dissipating erosive wave energy, filtering out toxins from water draining into the lagoon, and supporting coastal marine ecosystems. Many types of living shorelines exist such as salt marshes, oyster reefs, and dunes.
- **Shoreline nourishment and replenishment** – lengthens beaches or reduces water depths, may restore natural sand flow where it has been interrupted, and provides erosion protection for a large area over time. This is most useful along waterways prone to erosion.
- **Habitat restoration** – restoration of dunes, wetlands, and marshlands can improve water quality and health of ecosystems, provides recreational and philanthropic opportunities, and buffer property from water velocity.

### D. Emergency Services Activities

Emergency services measures are taken prior to, during, and after an emergency to minimize vulnerability and impact. Volusia County Division of Emergency Management actively participates in training and exercise, as well as evacuation planning and emergency response. Currently Volusia County and 15 jurisdictions have an evacuation plan in place. In addition, Volusia County participated in the Statewide Regional Evacuation Study. Activities include:

- **Distributing sandbags for flood protection** - coordinating with the community prior to an expected flood event.

- **Emergency response training and exercises** – practices response and recovery efforts and identifying gaps.
- **Comprehensive Emergency Management Plan (CEMP)** – VCEM maintains a CEMP.

### E. Structural Projects

Structural projects keep floodwaters away from an area with a levee, reservoir, or other flood control measure. Structural projects are usually designed by engineers and managed or maintained by public works staff. Examples of structural projects include:

- **Seawalls** – designed to prevent erosion and flooding on property in coastal areas.
- **Levees** – manmade or naturally occurring to regulate water levels and prevent outflow.
- **Tidal Dams** – damn like structure that limits high tides and storm surge from traveling upstream, reducing potential overflow of creeks and banks.
- **Water Pump Systems** – essential for cities to have adequate water pumping systems to allow the distribution of clean water and disposal of wastewater.
- **Green Streets** – combines bioretention swales, planters, and other green features with the elements of complete streets to enhance aesthetics and on-site water retention.

### F. Public Education and Awareness Activities

Public Education and Awareness activities are used to advise residents, elected officials, business owners, potential property buyers, and visitors about hazards, hazardous areas, and mitigation techniques they can use to protect themselves and their property. Examples of measures to educate and inform the public include outreach projects.

Through an agreement with Volusia County, WNDB 1150AM/WHOG 95.7FM radio and WDSC TV-15 are Volusia County's official emergency management information stations. WNDB has a broadcast outlet at the CEOC. WDSC enhances the County's ability to provide critical public safety information with a direct, live television connection. Volusia County’s website hosts a flood map viewer which is an online mapping program that has searchable flood maps. The flood map viewer allows an individual to type in an address or property identification number to see the parcel on an interactive map in relation to the high-risk flood areas. Volusia County and its jurisdictions also provide real estate agents with floodplain disclosures. Information regarding floods can also be found at the County Libraries. Volusia County actively provides updates on events and public outreach through Facebook and X (formally known as Twitter).

It was identified through the public survey process that many residents are unsatisfied with educational and outreach efforts provided by the jurisdictions. It is recommended that

throughout the year and during the yearly plan update, at least one public meeting be held to provide information to the residents concerning mitigation and associated funding options. In addition, social media, mailings, workshops, and information booths at events are also suggested as well as public service announcements and information in the local newspaper. Providing strategies, funding resources and other education material both electronically on all the jurisdictional websites and in print in libraries and City Halls would be beneficial.

As of 2024, Volusia County Emergency Management has a downloadable app for cellphones that alerts and notifies residents with important information. This app supports push notifications that can be sent directly to the user's phone.

## G. Action Plan

The Volusia County Multi-Jurisdictional Local Mitigation Strategy features a mitigation action plan that is maintained through the LMS Working Group. The Mitigation Strategy is the selection and prioritization of specific mitigation actions, referred to as Hazard Mitigation Initiatives, for Volusia County and participating jurisdictions. The Mitigation Action Plan (MAP) represents an unambiguous and functional plan for action and is considered to be the most essential outcome of the mitigation planning process. This detailed Action Plan can be found in Section 8 of the Volusia County Multi-Jurisdictional Local Mitigation Strategy.

The MAP includes a prioritized listing of proposed hazard mitigation actions (policies and projects) for Volusia County and its participating jurisdictions and partners to carry out with accompanying information such as those departments or individuals assigned responsibility for their implementation, potential funding sources and an estimated target date for completion, serving as an important tool for monitoring success or progress over time. The cohesive collection of actions listed in the MAP can also serve as an easily understood menu of mitigation policies and projects for those local decision makers who want to quickly review the recommendations and proposed actions of the Hazard Mitigation Plan.

The LMS working group has reviewed and prioritized the initiatives and projects found in the Action Plan. The prioritization was based on the following factors: population benefited, health and safety considerations, environmental impact, consistency with other plans and programs, reduces risk of future property damage, supports essential or critical services, probability of receiving funding and ease of implementation, community rating system, repetitive loss mitigation, and benefit cost ratio. Refer to Table 9 on the next page which justifies the scoring system. It is important to note that since this plan is to be incorporated into the Volusia County Local Mitigation Strategy (LMS), it will fall under all the implementation, evaluation, and revision

criteria and schedule as outlined specifically in the LMS.

### H. Post-Disaster Redevelopment Strategies and Procedures

The County has completed and incorporated a Post Disaster Redevelopment Plan and Debris Management Plan into its ongoing planning process. In addition, a Continuity of Operations Plan has been developed to ensure that all County Emergency Support Functions (ESF's) work in unison following a hazard event.

### I. Natural Hazard Mitigation Strategies and Procedures

The County deals with natural hazard mitigation and procedures through this plan and the Local Mitigation Strategy. The Local Mitigation Strategy Priority Projects list includes projects geared to reduce the impacts of flooding, storm surge, tropical cyclones, and other hazards. The 2025 Floodplain Management Plan has been affirmed with Resolutions of Adoption (Appendix H) for incorporation into the Volusia County Floodplain Management Plan.

## Table 9: Prioritization and Scoring Worksheet

| *Prioritization Criteria* | *Scoring* | | | |
|---|---|---|---|---|
| ***Population Benefited*** | **4 Points:** Project will benefit a multi-jurisdictional area | **3 Points:** Project will befit a jurisdictional area | **2 Points:** Project will benefit less than 100% of a jurisdiction. | |
| ***Health and Safety Considerations*** | **4 Points:** Project would benefit 75% or more of the population. | **3 Points:** Project would benefit 50 -74 % of the population. | **2 Points:** Project would benefit 25-49% of the population. | **1 Point:** Project would benefit less than 25% of the population. |
| ***Environmental Impact*** | **1 Point:** Project improves the environment. | **0 Point:** Risk to the environment is undetermined. | **(-1) Point:** Project poses a risk to the environment. | |
| ***Consistency with other plans and programs*** | **4 Points:** Project is incorporated into the LMS, CEMP, and Comp Plan and supports the NFIP. | **3 Points:** Project is incorporated into at least two of these plans. | **2 Points:** Project is incorporated into at least one of these plans. | **1 Point:** Project is consistent with other local standards, aside from LMS, CEMP, and Comp Plan. |
| ***Reduces Risk of Future Property Damage*** | **4 Points:** Mitigates a hazard of high frequency or risk. | **3 Points:** Mitigates a hazard of moderate frequency or risk. | **2 Points:** Mitigates a hazard of low frequency or risk. | **1 Point:** Mitigates a hazard of very low frequency or risk. |
| ***Supports Essential or Critical Services*** | **5 Points:** Project will ensure continuity of operations for essential infrastructure or services. | **3 Points:** Project will support infrastructure or services with loss/damage history. | **1 Point:** Project will support infrastructure or services without loss/damage history. | **0 Points:** Projects operation will have no impact on community infrastructure or services if disrupted. |
| ***Probability of Receiving Funding for Implementation*** | **4 Points:** Limited funding potential exists. | **3 Points**: Potential funding sources are other state or federal grants or similar funding sources. | **2 Points:** Potential funding is readily available through emergency preparedness or mitigation funding sources. | **0 Points**: Potential funding is readily available through local funding sources. |

| | | | | |
|---|---|---|---|---|
| ***Feasibility of Implementation*** | **4 Points:** Project would be relatively easy to implement in one year. | **3 Points**: Project would be easy to implement in three years. | **2 points:** Project would be easy to implement in five years. | **0 Points:** Project would be difficult to implement. |
| ***Community Rating System (CRS)***<br>-public information, mapping<br>- damage reduction<br>-flood preparedness | **4 Points:** Project supports four CRS elements | **3 Points:** Project supports three CRS elements. | **2 Points:** Project supports two CRS elements. | **1 Point:** Project supports one CRS element. |
| ***Repetitive Loss (RL) Mitigation*** | **4 Points:** Project protects 50% or more of the RL structures. | **2 Points**: Project protects less than 50% of the RL structures. | **0 Points:** Project does not protect a RL structures. | |
| ***Benefit Cost Ratio (BCR)*** | **5 Points:** Project has a BCR of "1" or higher, using FEMA approved software. | **3 Points:** Project has a BCR of less than "1" using FEMA approved software. | **0 Points:** BCR cannot be determined. | |

# VIII. PLAN MAINTENANCE

## A. Adopt the Plan

Each jurisdiction participating in the CRS program is required to adopt the Floodplain Management Plan formally through individual jurisdictional boards. The Appendix provides copies of all adopted resolutions. Please note, this section is a working section, as the adoption process may vary amongst the jurisdictions. As each jurisdiction provides a copy of the adopted resolution, it will be added to the appendix of the plan. The Volusia County Emergency Management Division is responsible for the master copy of the Floodplain Management Plan.

## B. Implement, Evaluate, and Revise

As the party responsible for the FMP, the Volusia County Emergency Management Division will oversee the implementation, evaluation, and revision of the plan on a County-wide basis. Jurisdictional implementation and revision of Appendix A is the responsibility of each individual jurisdiction.

Procedures for monitoring the implementation, progression and revisions of the plan are completed through the Local Mitigation Strategy Steering Committee, also referred to as “Volusia Prepares”. This committee meets on a quarterly basis to review aspects of the LMS, including the FMP, and other topics such as CRS upkeep and requirements. The working group is made up of Volusia County Emergency Management staff and one representative from each participating Town or City. The working group implements the plan through Resolutions of Support and Resolutions of Adoption, evaluates the plan on a case- by-case basis, and revises the plan through the development of the “Action Plan” of priority projects, which are updated during Steering Committee Meetings as needed.

The LMS Steering Committee and the FMP Planning Committee are generally comprised of the same jurisdictional staff members. For the purpose of updating and maintaining the FMP, the FMP Planning Committee composition will continue to encompass the jurisdictional staff responsible for the implementation of the FMP and related policies and projects as it had been during the initial planning process. Pursuant to CRS Activity #510, an annual progress report is submitted.

This Floodplain Management Plan is considered an appendix to the Volusia County LMS. To that end, the maintenance of this document will occur in conjunction with the quarterly LMS updates. During the third quarter of the calendar year (July/August/September), the County and the jurisdictions will provide updates, including data and projects, to the County for review by the LMS

Steering Committee/FMP Planning Committee. The steering committee will review any updates, and the County will be responsible for implementing the updates in the master plan. In addition, the evaluation report will be prepared by the FMP Planning Committee and address updates per jurisdiction. Each community will submit its copy of the annual evaluation report with its recertification annually. The Volusia County Emergency Management Division will be responsible for the five-year update process. During this update period, the public will have the opportunity to participate in the updating process. It is recommended that at least one public meeting is held during this period to provide input. In addition, it is recommended that notification be submitted via databases, utility mailings, websites, and social media, concerning the update process, public meetings, and other avenues of input. The current plan as well as the proposed changes should be made available on each jurisdictional website as well as a hard copy being provided at the City Halls and libraries. Press releases, website or social media posts, radio, and TV announcements may also be utilized to inform the public.

Once per year, elected officials will be provided with a copy of the most current Floodplain Management Plan in conjunction with the LMS. At that time, hard copies of the plan will be replaced at the designated location in participating jurisdictions or be found online via the County's website.

# JURISDICTIONAL PROFILES

## Profiles

### Daytona Beach

***Floodplain Management Goals and Objectives***

Goal 1: Promote public health, safety and general welfare, and to minimize public and private losses due to flood conditions in specific areas

- Objective 1.1: Maintain the City's Community Rating System Classification.
- Objective 1.2: Provide flood protection information to residents.
- Objective 1.3: Coordinate and implement small and/or large-scale projects to help alleviate drainage and flood concerns.
- Objective 1.4: To protect human life, health and to eliminate or minimize property damage.
- Objective 1.5: Require the use of appropriate construction practices to prevent or minimize future flood damage.
- Objective 1.6: Manage filling, grading, dredging, mining, paving, excavation, drilling operations, storage of equipment or materials and other development activities which may increase flood damage or erosion potential.
- Objective 1.7: Manage the alteration of flood hazard areas, watercourses and shorelines to minimize the impact of development on the natural and beneficial functions of floodplains.
- Objective 1.8: To minimize the need for rescue and relief efforts associated with flooding that are generally undertaken at the expense of the general public.
- Objective 1.9: To minimize prolonged business interruptions.
- Objective 1.10: To minimize damage to public facilities and utilities, such as water mains, gas mains, electric lines, telephone lines and sanitary sewer lines, streets, bridges and stormwater culverts located in floodplains.
- Objective 1.11: To maintain a stable tax base by providing for the sound use and development of flood prone areas in such a manner as to minimize flood blight areas.
- Objective 1.12: To ensure that potential homebuyers are notified when the property is in a flood hazard area.

- Objective 1.13: To help maintain a stable tax base by providing for the sound use and development of flood prone areas in order to minimize flood blight areas.

Goal 2: To create programs to manage the surface water runoff

- Objective 2.1: Develop/maintain storm water management plan.
- Objective 2.2: Develop alternative water supply on western city limits.

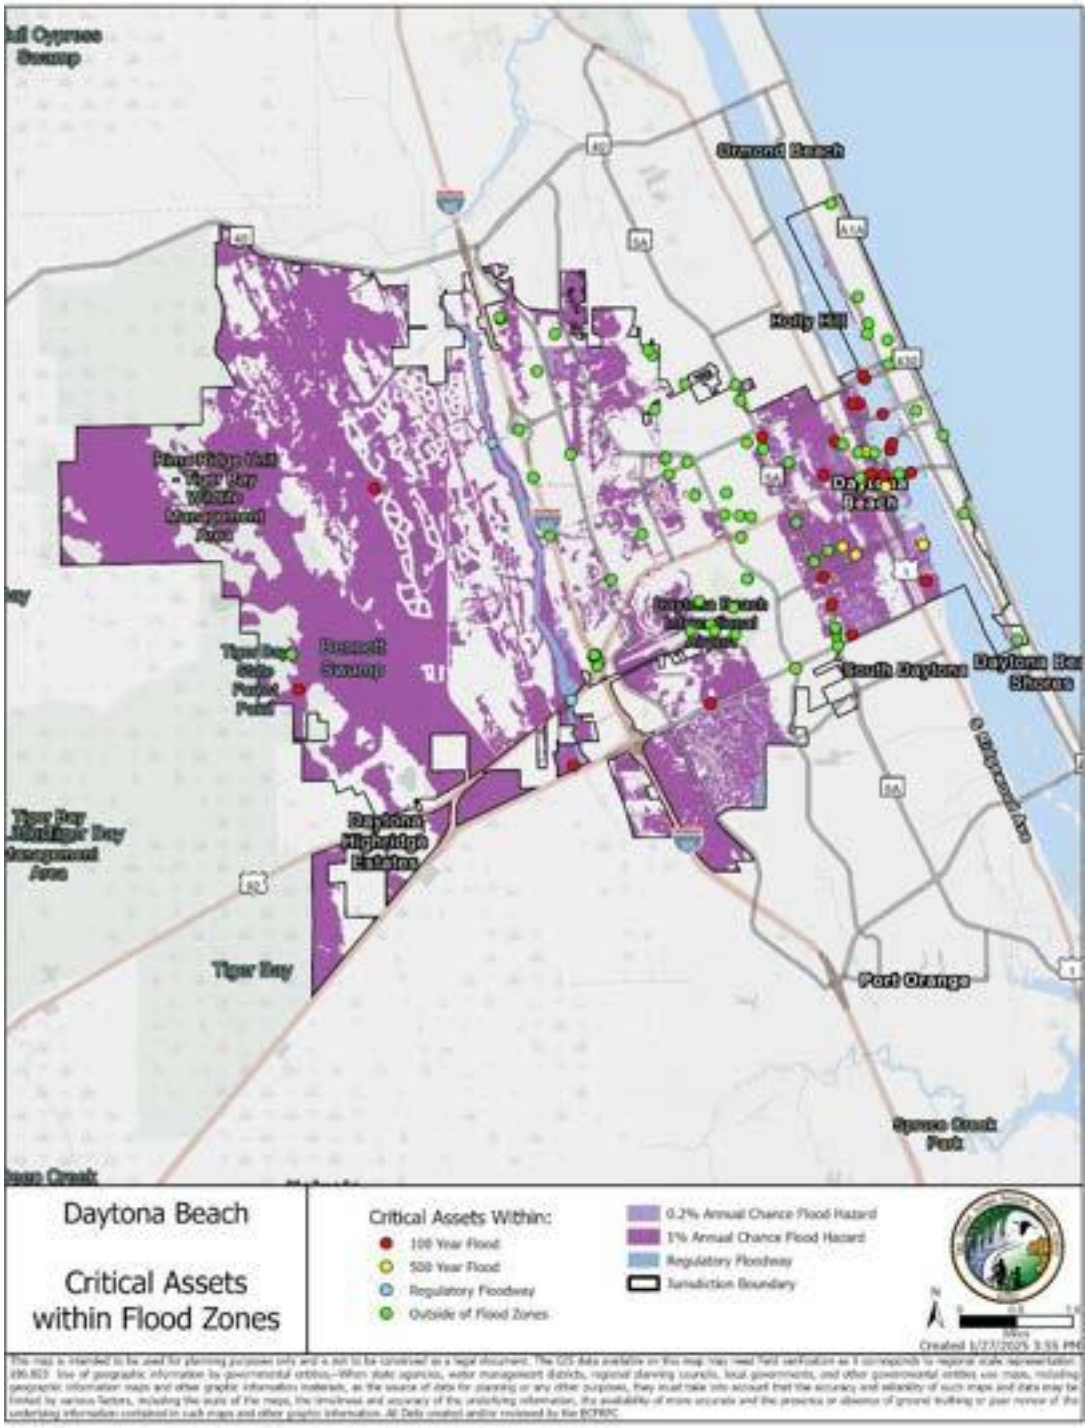

*Table 1: Daytona Beach- Exposed Critical Facilities*

| Facility Name | Facility Type | Flood Zone |
|---|---|---|
| **Iww Halifax River Highway Bridge** | Transportation Systems | 100-Year |
| **Daytona Canal Highway Bridge** | Transportation Systems | 100-Year |
| **Nova Canal Highway Bridge** | Transportation Systems | 100-Year |
| **Tomoka River Highway Bridge** | Transportation Systems | 100-Year |
| **Municipal Yacht Basin** | Transportation Systems | 100-Year |
| **Vehicle Maintenance Facility** | Utility Systems | 100-Year |
| **Daytona Beach/Bethune Point Drinking Water Facility** | Utility Systems | 500-Year |
| **WROD 1340** | Utility Systems | 100-Year |
| **WMFJ 1450** | Utility Systems | 100-Year |
| **Father Lopez Catholic High School** | Essential Facilities | 100-Year |
| **Pure In Heart Christian Academy** | Essential Facilities | 100-Year |
| **Bethune-Cookman University** | Essential Facilities | 100-Year |
| **Turie T. Small Elementary School** | Essential Facilities | 500-Year |
| **Mount Calvary Academy** | Essential Facilities | 500-Year |
| **The Chase Academy, Inc.** | Essential Facilities | 100-Year |
| **Champion Elementary School** | Essential Facilities | 100-Year |
| **Volusia County Sheriffs Department** | Essential Facilities | 500-Year |
| **Daytona Beach Fire Department Station 1** | Essential Facilities | 500-Year |
| **Daytona Beach Fire Department Station 6** | Essential Facilities | 100-Year |

*Table 2: Daytona Beach- Floodplain Exposure Analysis*

| Exposure | Percentage |
|---|---|
| **Percent of Properties in the Floodplain** | 43.87% |
| **Properties in the Floodplain** | 13,847 |
| **Exposed Acreage: Residential Future Land Use** | 9,383.93 |
| **Exposed Acreage: Commercial Future Land Use** | 1,008.15 |
| **Exposed Acreage: Mixed Use Future Land Use** | 1,611.28 |
| **Exposed Acreage: PD Future Land Use** | 45.03 |
| **Exposed Acreage: Institutional Future Land Use** | 864.09 |
| **Total Exposure: Land Value** | $1,703,773,217 |
| **Total Exposure: Building Value** | $4,954,662,325 |
| **Total Exposure: Assessed Value** | $6,658,435,543 |
| **Total Exposure: Taxable Value** | $4,082,706,747 |
| **Exposed Acreage: Industrial Future Land Use** | 977.84 |

*Figure 1: Critical Assets with Flood Zone - Daytona Beach*

## Daytona Beach Shores

### *Floodplain Management Goals and Objectives*

Goal 1: Prevent new development in the floodplain from increasing runoff and resulting in increases in flood volumes in the floodplain.

- Objective 1.1 Enforce building requirements from the National Flood Insurance Program and not allow variances that are feasibly avoidable.
- Objective 1.2 Permit new development in the Special Flood Hazard Area consistent with federal, state and local laws.
- Objective 1.3 Minimize flood hazards and protect water quality by employing approaches that balance environmental, economic, and engineering considerations.
- Objective 1.4 Protect environmentally sensitive lands to maximize their inherent mitigation attributes and reduce known flood hazards where appropriate and financially feasible.
- Objective 1.5 Reduce flood exposure and maximize flood protection efforts.

Goal 2: Develop and maintain a proactive public awareness and outreach that informs and notifies property owners that they are located in a flood zone and provides assistance and information regarding flood zones, protection of property, local drainage and sewer back-up problems.

- Objective 2.1 Create easily accessible information to educate residents about the hazards, loss reduction measures, and the natural and beneficial functions of floodplains.
- Objective 2.2 Encourage land and water uses compatible with the protection of environmentally sensitive lands and coastal resources.
- Objective 2.3 Review the adequacy and completeness of emergency procedures that address catastrophic flood events.
- Objective 2.4 Minimize impacts from flooding in FEMA designated special flood hazard areas (i.e. flood zones starting with the letters “V” or “A”) where financially feasible.
- Objective 2.5 Build a constituency that desires to see the plan's recommendations

implemented.

Goal 3: Continue with the Hazard Mitigation Grant Program to identify and obtain funding for both pre-and-post disaster residential mitigation projects regarding flooding.

- Objective 3.1 Identify various flood mitigation grants that may assist residences located in the floodplain.
- Objective 3.2: Utilize "Volusia Prepares" Local Mitigation Strategy to guide and assist in establishing priorities for hazard mitigation projects.

Goal 4: Reduce the number of repetitive loss properties within Volusia County.

Goal 5: Review the locations and effects on areas that experience flooding and determine what steps, if any, the City can take to alleviate future impacts.

- Objective 5.1 Maintain a database of flood problems and hazards, mitigation and repetitive loss claim history.
- Objective 5.2 Build public and political support for projects that prevent new problems, reduce losses, and protect the natural and beneficial functions of floodplains.
- Objective 5.3 Prioritize capital projects that will mitigate flood impacts in areas of the City that have experienced significant flooding problems.
- Objective 5.4 Utilize the findings of the Daytona Beach Shores Resiliency Study (25-26) to guide and assist in establishing flood related priorities and future actions.
- Objective 5.5 Coordinate with adjacent jurisdictions to address multi-jurisdictional flood issues where feasible.

There are no critical assets within the 100-year or 500-year flood zones.

*Table 3: Daytona Beach Shores - Floodplain Exposure Analysis*

| Exposure | Values |
|---|---|
| **Percent of Properties in the Floodplain** | 38.53% |
| **Properties in the Floodplain** | 507 |
| **Exposed Acreage: Residential Future Land Use** | 11.98 |
| **Exposed Acreage: Commercial Future Land Use** | 15.18 |
| **Exposed Acreage: Mixed Use Future Land Use** | 0 |

| **Exposed Acreage: Institutional Future Land Use** | 1.15 |
| **Total Exposure: Land Value** | $157,904,972 |
| **Total Exposure: Building Value** | $279,484,175 |
| **Total Exposure: Assessed Value** | $437,389,147 |
| **Total Exposure: Taxable Value** | $373,912,678 |
| **Exposed Acreage: Industrial Future Land Use** | 0 |

*Figure 2: Critical Assets with Flood Zone - Daytona Beach Shores*

## DeBary

### *Floodplain Management Goals and Objectives*

Goal 1: Manage storm water runoff and the preservation of water resources.

- Objective 1.1: Alleviate downstream flood hazards
- Objective 1.2: Prevent significant loss of life and property due to runoff from any foreseeable rainfall event
- Objective 1.3: Reduce the capital expenditure associated with flood-proofing and the installation and maintenance of storm drainage systems.

Goal 2: Promote public health, safety and general welfare and minimize public and private losses due to flood conditions in specific areas.

- Objective 2.1: Protect human life, health and eliminate or minimize property damage
- Objective 2.2: Minimize expenditure of public money for costly flood control projects
- Objective 2.3: Minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public
- Objective 2.4: Maintain a stable tax base by providing for the sound use and development of flood-prone areas in such a manner as to minimize flood blight areas.
- Objective 2.5: Ensure that potential homebuyers are notified that property is in a flood hazard area.

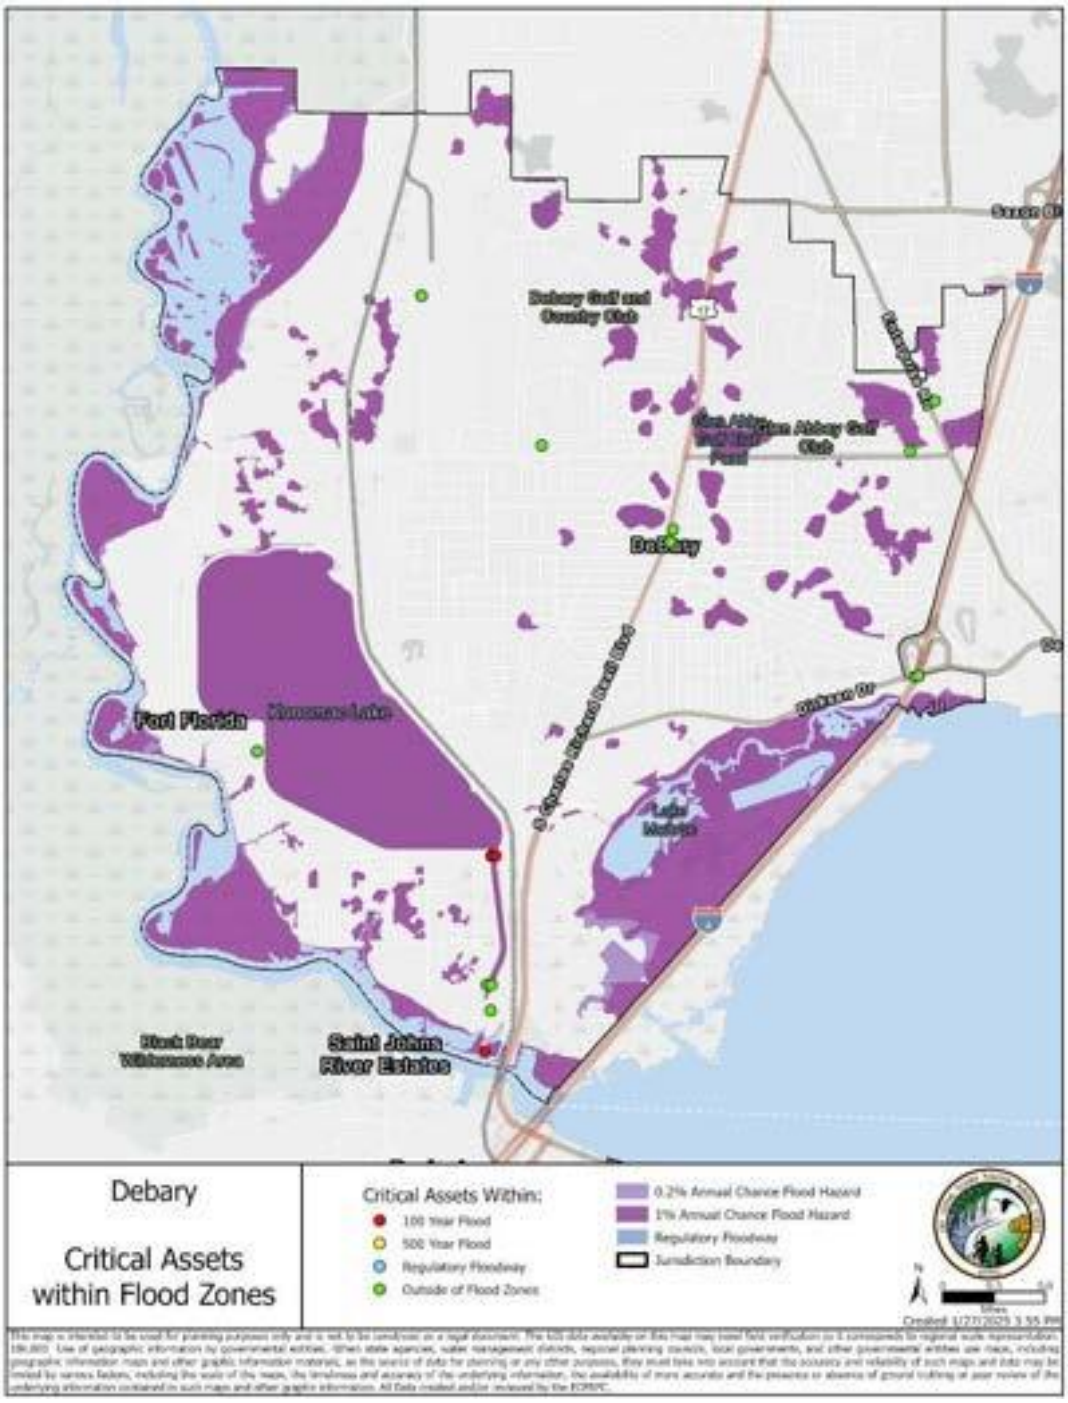

*Table 4: DeBary - Exposed Critical Facilities*

| Facility Name | Facility Type | Flood Zone |
|---|---|---|
| **FPL Cooling Discharge Canal Highway Bridge** | Transportation Systems | 100-Year |
| **FPL Cooling Intake Canal Highway Bridge** | Transportation Systems | 100-Year |
| **FPL Lake Monroe Highway Bridge** | Transportation Systems | 100-Year |

*Table 5: DeBary - Floodplain Exposure Analysis*

| Exposure | Values |
|---|---|
| **Percent of Properties in the Floodplain** | 11.7 |
| **Properties in the Floodplain** | 1,387 |
| **Exposed Acreage: Residential Future Land Use** | 482.88 |
| **Exposed Acreage: Commercial Future Land Use** | 69.27 |

| **Total Exposure: Building Value** | $380,092,845 |
| **Total Exposure: Assessed Value** | $590,820,327 |
| **Total Exposure: Taxable Value** | $340,103,975 |
| **Exposed Acreage: Industrial Future Land Use** | 0 |

*Figure 3: Critical Assets with Flood Zone - DeBary*

## DeLand

***Floodplain Management Goals and Objectives***

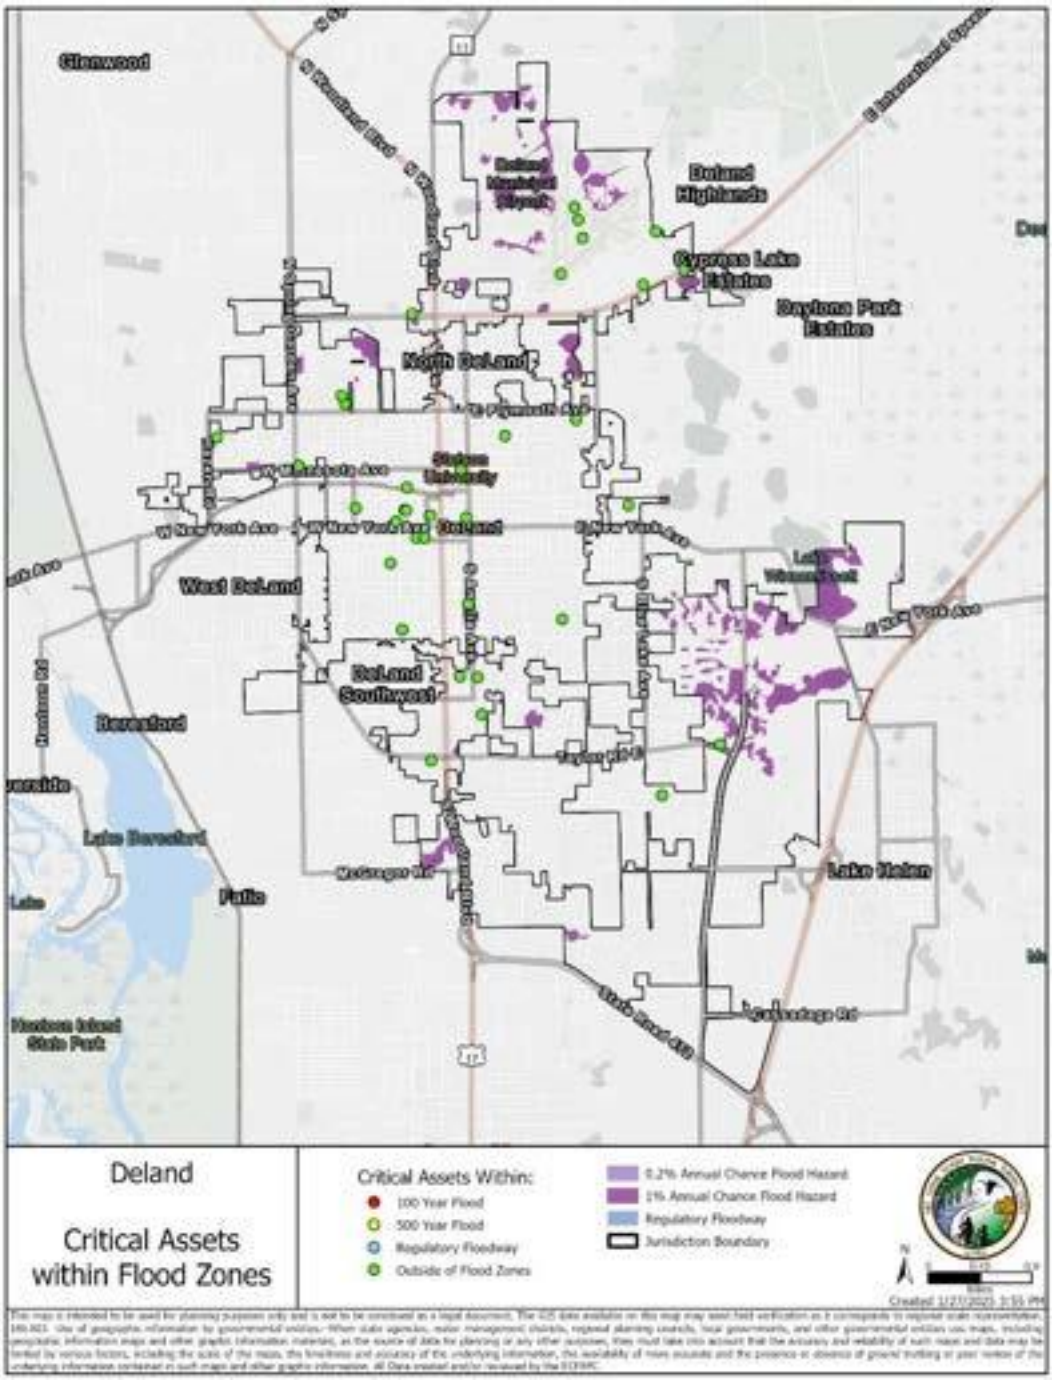
Goal 1: Minimize public and private losses due to flood conditions in specific areas.

- Objective 1.1: Prioritize and implement capital projects to alleviate known drainage and flooding problems.
- Objective 1.2: Maintain existing storm water facilities to function near optimal capacity.
- Objective 1.3: Sweep streets to maintain positive visual appearance and to prevent build-up of debris in storm systems within City right of way.
- Objective 1.4: Maintain storm water pump stations and standby generators in good condition at all times.

Goal 2: Provide adequate funding for construction of storm water system improvements and operation and maintenance of existing systems.

- Objective 2.1: Obtain revenue from all storm water system users by collection of utility fees accessed in proportion to benefit derived.
- Objective 2.2: Analyze and adjust storm water utility rates as necessary to fund priority capital projects and operating expenses.

Goal 3: Regulate new development and redevelopment to reduce or eliminate increases in flood volumes and additional flooding conditions.



- Objective 3.1: Enforce building requirements from the National Flood Insurance Program.
- Objective 3.2: Prevent new development in the flood plain unless mitigated.
- Objective 3.3: Consider downstream effects of new development and require mitigation as appropriate.
- Objective 3.4: Reduce quantity and improve quality of runoff from developed properties when redeveloped.

There are no critical assets within the 100-year or 500-year flood zones.

*Table 6: Deland - Floodplain Exposure Analysis*

| Exposure | Values |
|---|---|
| **Percent of Properties in the Floodplain** | 2.11% |
| **Properties in the Floodplain** | 369 |
| **Exposed Acreage: Residential Future Land Use** | 889.78 |
| **Exposed Acreage: Commercial Future Land Use** | 8.7 |
| **Exposed Acreage: Mixed Use Future Land Use** | 1.69 |
| **Exposed Acreage: PD Future Land Use** | 162.82 |
| **Exposed Acreage: Institutional Future Land Use** | 2.25 |
| **Total Exposure: Land Value** | $745,304,25 |
| **Total Exposure: Building Value** | $160,357,535 |

| **Total Exposure: Taxable Value** | $120,198,104 |
| **Exposed Acreage: Industrial Future Land Use** | 407.6 |

*Figure 4: Critical Assets with Flood Zone - Deland*

## Deltona

***Floodplain Management Goals and Objectives***

Goal 1: Protect and appropriately utilize the physical and ecological functions of natural drainage ways and related drainage patterns.

- Objective 1.1: The City shall discourage development within any known flood plains as identified by the best available data, such as FEMA flood maps.
- Objective 1.2: Development and structures shall be discouraged within the 100-year flood plain; however, if located therein they shall be constructed in a manner that results in no loss in of existing 100-year floodplain storage and function.
- Objective 1.3: If structures are allowed in the 100-year flood plain, development within areas prone to 100-year flooding shall compensate for the full amount of flood storage displacement within the 100-year floodplain and shall not increase expected flood levels for adjacent properties or reduce receiving surface water quality below established levels.
- Objective 1.4: The functions of flood plains and other flood prone areas shall be protected by directing development away from such areas. If activities do occur within floodplain or flood prone areas such impacts shall be minimized. In addition, if development does occur within floodplain/prone areas then techniques such as compensating storage and the elevation/design of improvements shall be required to ensure that floodplain functions are protected.

Goal 2: The City of Deltona shall continue to implement the comprehensive surface and groundwater watershed management plan.

- Objective 2.1: On-site sewage disposal systems and associated drain fields shall be discouraged within the flood plain of surface water bodies as provided for inland development regulations, to the extent that such systems are designed and located to not contribute to the degradation of ambient water quality as consistent with applicable State regulations.
- Objective 2.2: Undisturbed segments of flood plains shall be protected through public acquisition, land use controls, conservation easements, or other methods as appropriate.
- Objective 2.3: Proposed structures located within the flood plain of surface water

bodies and within flood prone areas, shall be required to utilize building methods as provided in land development regulations, to the extent that fill material required for construction or other impervious surfaces will not reduce the ability of the floodplains to store and convey floodwaters, or degrade the natural physical and biological functions of protected habitat without approved mitigation. Impacts of filling in the floodplains and flood prone areas shall be considered both sites specifically and cumulatively. 9J- 5.013(2)(c)(9)

- Objective 2.4: Dwelling unit densities shall not be increased within the flood plains of surface water bodies and in other flood prone areas as provided for in land development regulations, and per Florida Statute in that allowable densities do not create potential flood hazards or degrade the natural functions of the flood plain. Dwelling unit density determinations in the floodplain shall consider both site specific and cumulative impacts.

Goal 3: Protect and appropriately utilize the physical and ecological functions of natural drainage ways and related drainage patterns.

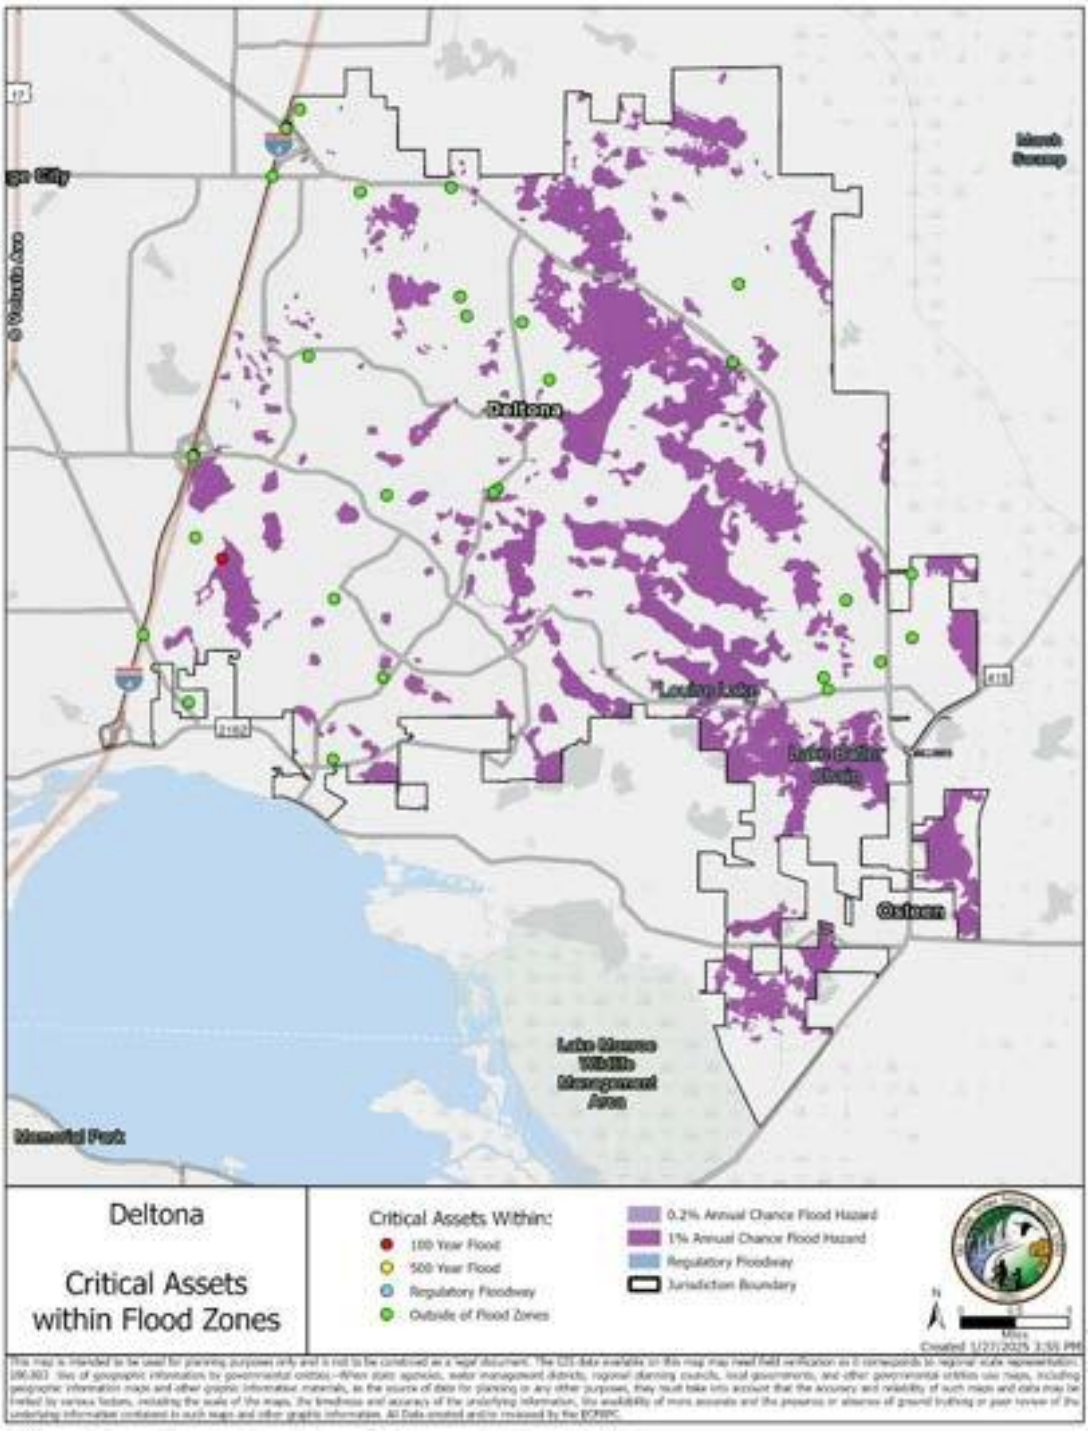

*Table 7: Deltona - Exposed Critical Facilities*

| Facility Name | Facility Type | Flood Zone |
|---|---|---|
| **Academy Of Career Training** | Essential Facilities | 100-Year |

| **Total Exposure: Taxable Value** | $668,644,860 |

*Figure 5: Critical Assets with Flood Zone - Deltona*

## Edgewater

### *Floodplain Management Goals and Objectives*

Goal 1: Continue to maintain a floodplain management ordinance, which includes the development standards required for participation in the National Flood Insurance Program.

- Objective 1.1: New construction, or substantial improvement, of any residential structure shall have the lowest floor, including basement, elevated no less than one foot (1') above the base flood elevation or crown of the paved road whichever is greater, or 16 inches (16") above an unpaved road.
- Objective 1.2: Plans and designs for subdivisions shall minimize potential flood damage by locating recreation and conservation uses, if included in the plans, to areas within the Flood Zone, reserving as much land as possible outside the flood zone for other land uses. Flood zones shall be identified on all final development plans submitted to the City.

Goal 2: Strongly discourage development within flood prone areas is strongly discouraged and mitigate any adverse impacts to the surrounding area that may be related to drainage, public health or public safety.

- Objective 2.1: Encroachments within the published flood way will not be approved under any circumstances.
- Objective 2.2: Compensatory storage for 100-year flood plain encroachments shall be provided in accordance with the City requirements.
- Objective 2.3: Projects located near the coast should evaluate any flooding effects associated with both storm surge (FEMA Zones V and VE) and the freshwater flood (FEMA Zones A, AE, AH and AO).

Goal 3: Protect the natural function and values of the 100-year floodplain.

- Objective 3.1: 100-year floodplain shall be given high priority in the selection of conservation areas within the City and for public acquisition of lands for conservation and recreational purposes.
- Objective 3.2: Development within the 100 Year Floodplain shall provide necessary

mitigation to maintain the natural storm water flow regime.

- Objective 3.3: All new construction and substantial improvements of existing construction shall be constructed with materials and utility equipment resistant to flood damage and using methods and practices that will minimize flood damage and prevent the pollution of surface waters during a 100-year flood event.

Goal 4: Limit development in the Coastal High Hazard Area and direct population concentrations away from this area.

- Objective 4.1: No new public facilities shall be located in the Coastal High Hazard Areas other than those necessary to support the levels of service identified in the Capital Improvement Element and for overriding health and safety reasons.
- Objective 4.2: By December 2014, the City shall identify areas in the Coastal High Hazard Area needing redevelopment, including eliminating unsafe conditions and inappropriate uses as opportunities arise.
- Objective 4.3: No future land use amendments shall be approved within the Coastal High Hazard Area which will increase the previously permitted density.

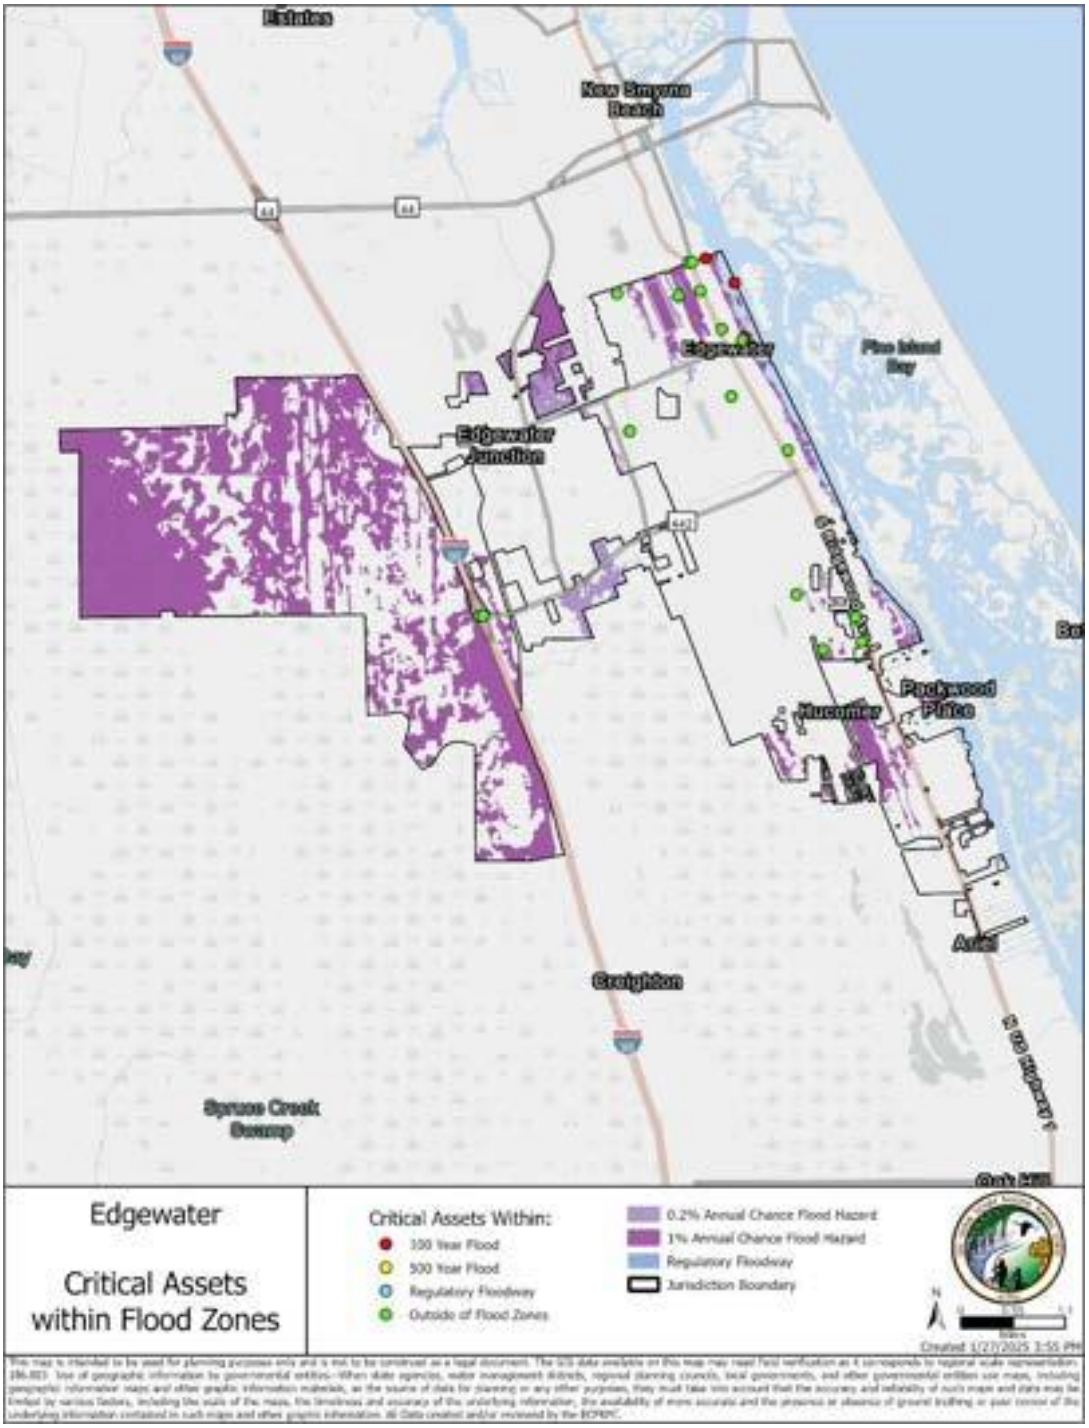

*Table 9: Edgewater - Exposed Critical Facilities*

| Facility Name | Facility Type | Flood Zone |
|---|---|---|
| **Gabordys Canal Highway Bridge** | Transportation Systems | 100-Year |
| **Edgewater Port Facility** | Transportation Systems | 100-Year |
| **Kennedy Park Waste Water System** | Utility Systems | 100-Year |

## Holly Hill

### *Floodplain Management Goals and Objectives*

Goal 1: Safeguard the public health, safety and general welfare and to minimize public and private losses due to flooding through regulation of development in flood hazard areas.

- Objective 1.1: Minimize unnecessary disruption of commerce, access and public service during times of flooding.
- Objective 1.2: require the use of appropriate construction practices in order to prevent or minimize future flood damage.
- Objective 1.3: Manage filling, grading, dredging, mining, paving, excavation, drilling operations, storage of equipment or materials and other development which may increase flood damage or erosion potential.
- Objective 1.4: Manage the alteration of flood hazard areas, watercourses and shorelines to minimize the impact of development on the natural and beneficial functions of the floodplain.
- Objective 1.5: Minimize damage to public and private facilities and utilities.
- Objective 1.6: Help maintain a stable tax base by providing for the sound use and development of flood hazard areas.
- Objective 1.7: Minimize the need for future expenditure of public funds for flood control projects and response to and recovery from flood events.
- Objective 1.8: Meet the requirements of the National Flood Insurance Program for community participation as set forth in the Title 44 Code of Federal Regulations, Section 59.22.

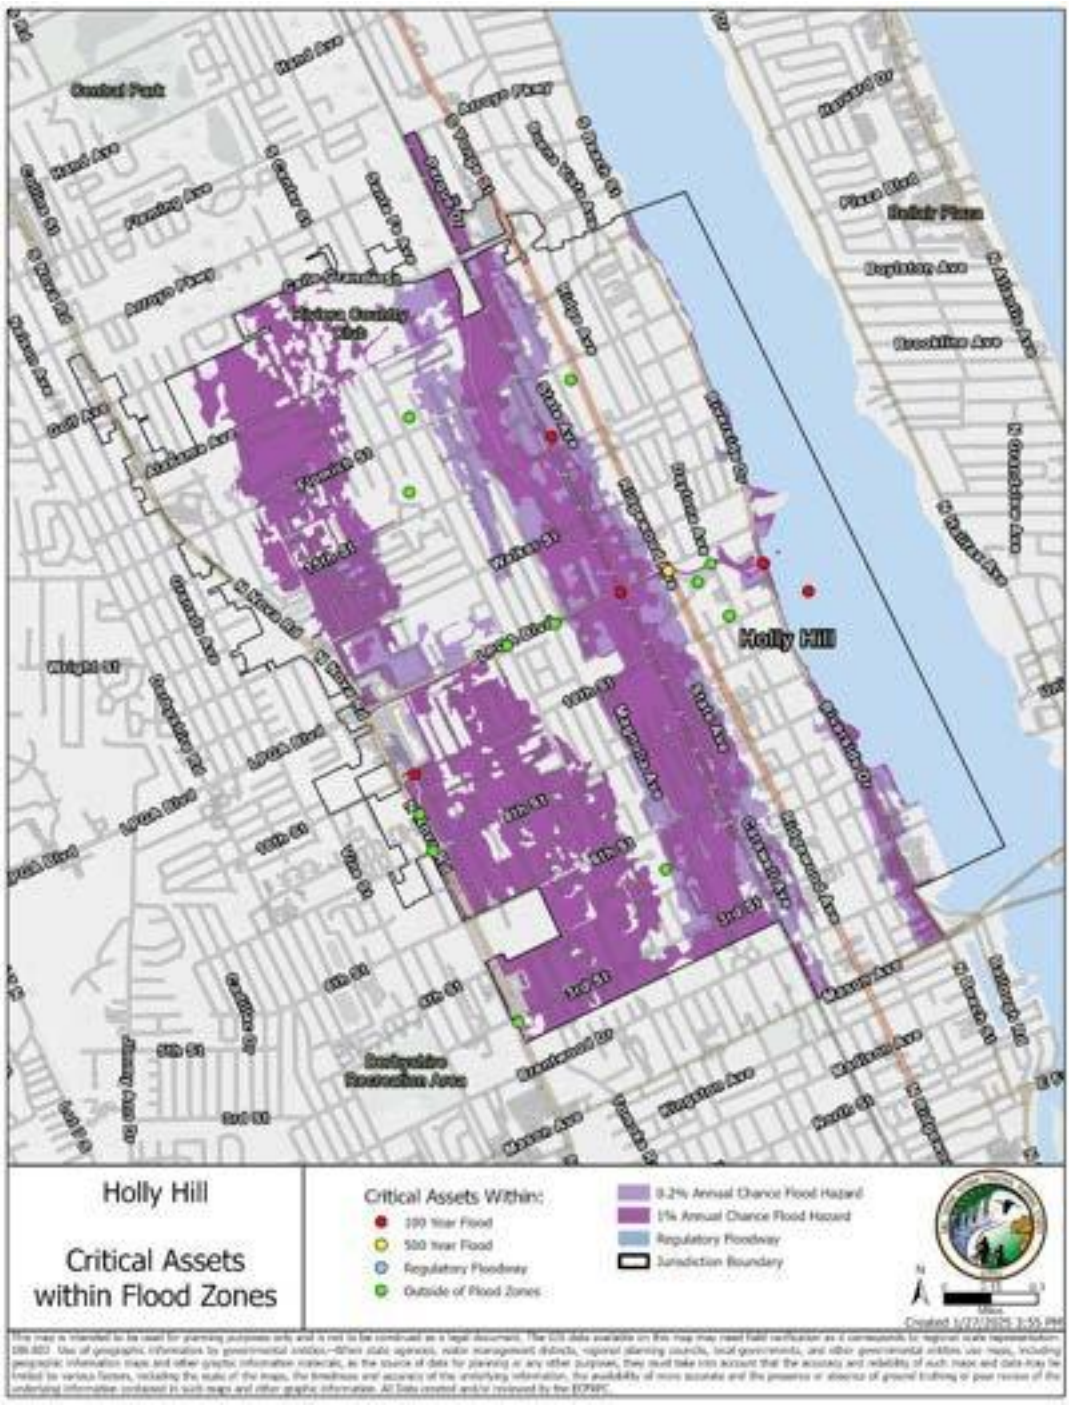

*Table 11: Holly Hill- Exposed Critical Facilities*

| Facility Name | Facility Type | Flood Zone |

| **Total Exposure: Assessed Value** | $78,324,628 |
| **Total Exposure: Taxable Value** | $36,649,988 |

*Figure 8: Critical Assets with Flood Zone - Lake Helen*

## New Smyrna Beach

### *Floodplain Management Goals and Objectives*

Goal 1: Promote public health, safety and general welfare, and minimize public and private losses due to flood conditions in specific areas.

- Objective 1.1: Maintain the City's Community Rating System Classification.
- Objective 1.2: Provide flood protection information to residents.
- Objective 1.3: Coordinate and implement small and/or large-scale projects to help alleviate drainage and flood concerns.
- Objective 1.4: To protect human life, health and to eliminate or minimize property damage.
- Objective 1.5: require the use of appropriate construction practices in order to prevent or minimize future flood damage.
- Objective 1.6: Manage filling, grading, dredging, mining, paving, excavation, drilling operations, storage of equipment or materials and other development which may increase flood damage or erosion potential.
- Objective 1.7: Manage the alteration of flood hazard areas, watercourses and shorelines to minimize the impact of development on the natural and beneficial functions of the floodplain.
- Objective 1.8: To minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public.
- Objective 1.9: To minimize prolonged business interruptions.
- Objective 1.10: To minimize damage to public facilities and utilities, such as water and gas mains, electric, telephone and sewer lines, streets, bridges and culverts located in floodplains.
- Objective 1.11: To maintain a stable tax base by providing for the sound use and development of flood prone areas in such a manner as to minimize flood blight areas.
- Objective 1.12: To endeavor to ensure that potential homebuyers are notified that property is in a flood hazard area.
- Objective 1.13: To help maintain a stable tax base by providing for the sound use and development of flood prone areas in such a manner as to minimize flood blight

areas.

Goal 2: Create programs to manage the surface water runoff

- Objective 2.1: Develop/maintain storm water management plan.
- Objective 2.2: Develop alternative water supply on western city limits.

## Ormond Beach

### *Floodplain Management Goals and Objectives*

Goal 1: Promote the public health, safety and general welfare, and to minimize public and private losses due to flooding through the regulation of development in flood hazard areas.

- Objective 1.1: Protect human life and health.
- Objective 1.2: Minimize or eliminate property damage.
- Objective 1.3: Minimize the need for future expenditure of public money for costly flood control projects and response to and recovery from flood events.
- Objective 1.4: Minimize unnecessary disruption of commerce, access and public service during times of flooding; Objective: Minimize damage to public and private facilities and utilities located in areas of special flood hazard.
- Objective 1.5: Help maintain a stable tax base by providing for the sound use and development of flood hazard area.
- Objective 1.6: Ensure that potential buyers are notified that property is in an area of special flood hazard.
- Objective 1.7: Require the use of appropriate construction practices in order to prevent or minimize future flood damage.
- Objective 1.8: Manage the alteration of flood hazard areas, watercourses, and shorelines to minimize the impact of development on the natural and beneficial functions of the floodplain.

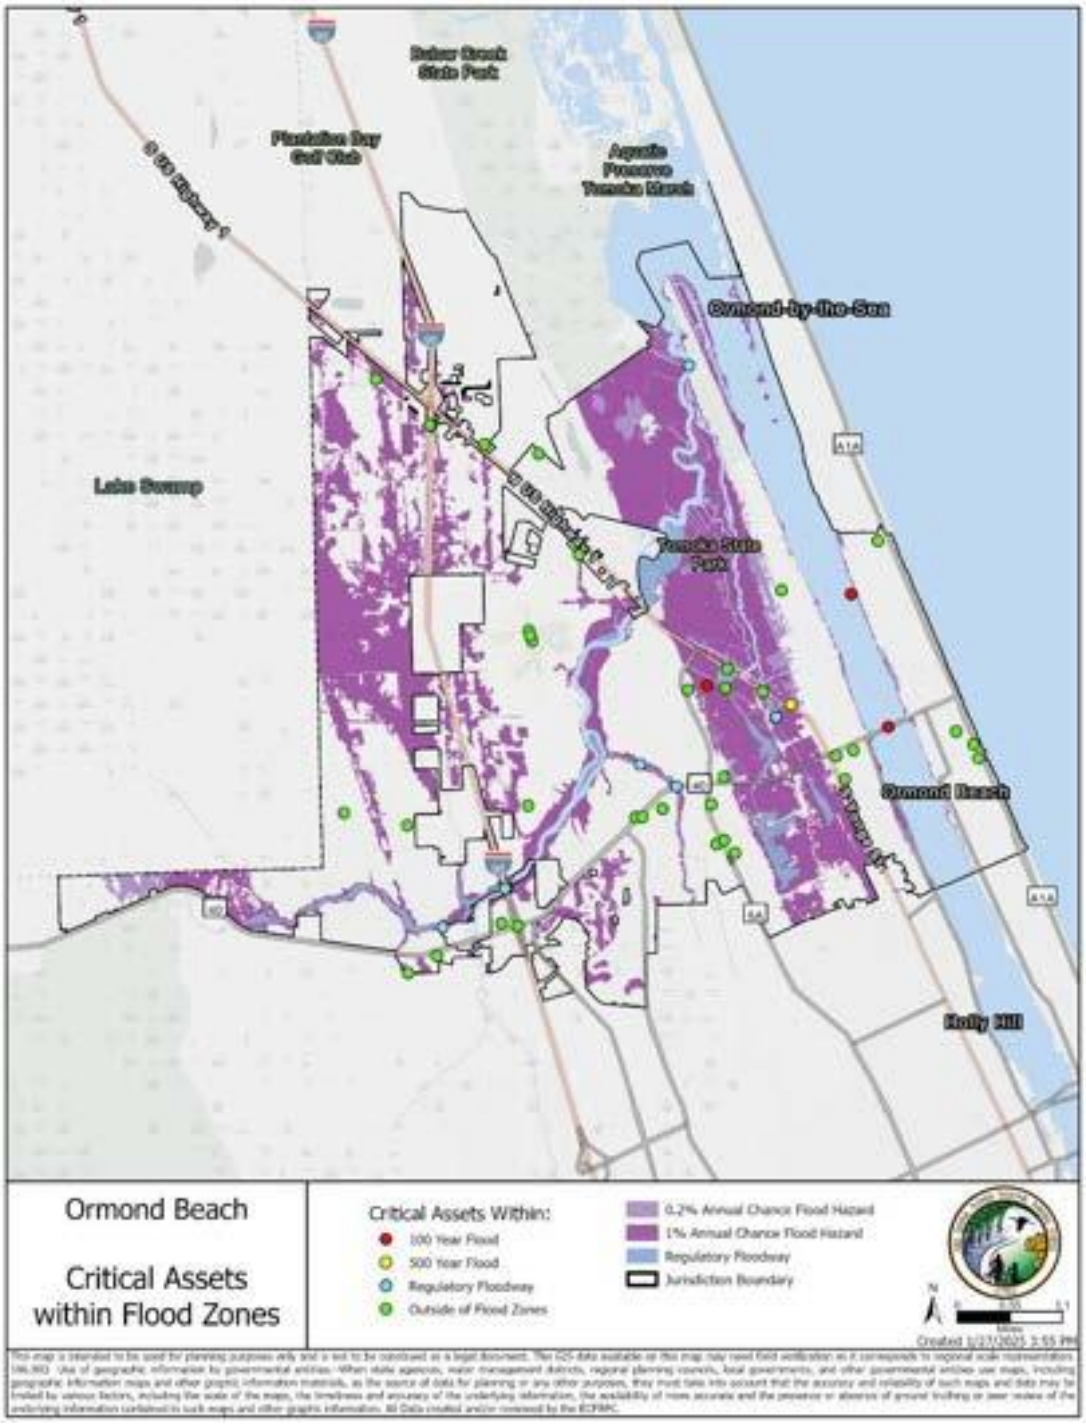

*Table 19: Ormond Beach - Exposed Critical Facilities*

| Facility Name | Facility Type | Flood Zone |
|---|---|---|
| **Halifax River IWW Highway Bridge** | Transportation Systems | 100-Year |
| **Ormond Beach Waste Water System** | Utility Systems | 100-Year |
| **Ormond Beach Fire Department Station 93** | Essential Facilities | 500-Year |

*Table 20: Ormond Beach - Floodplain Exposure Analysis*

| Exposure | Values |

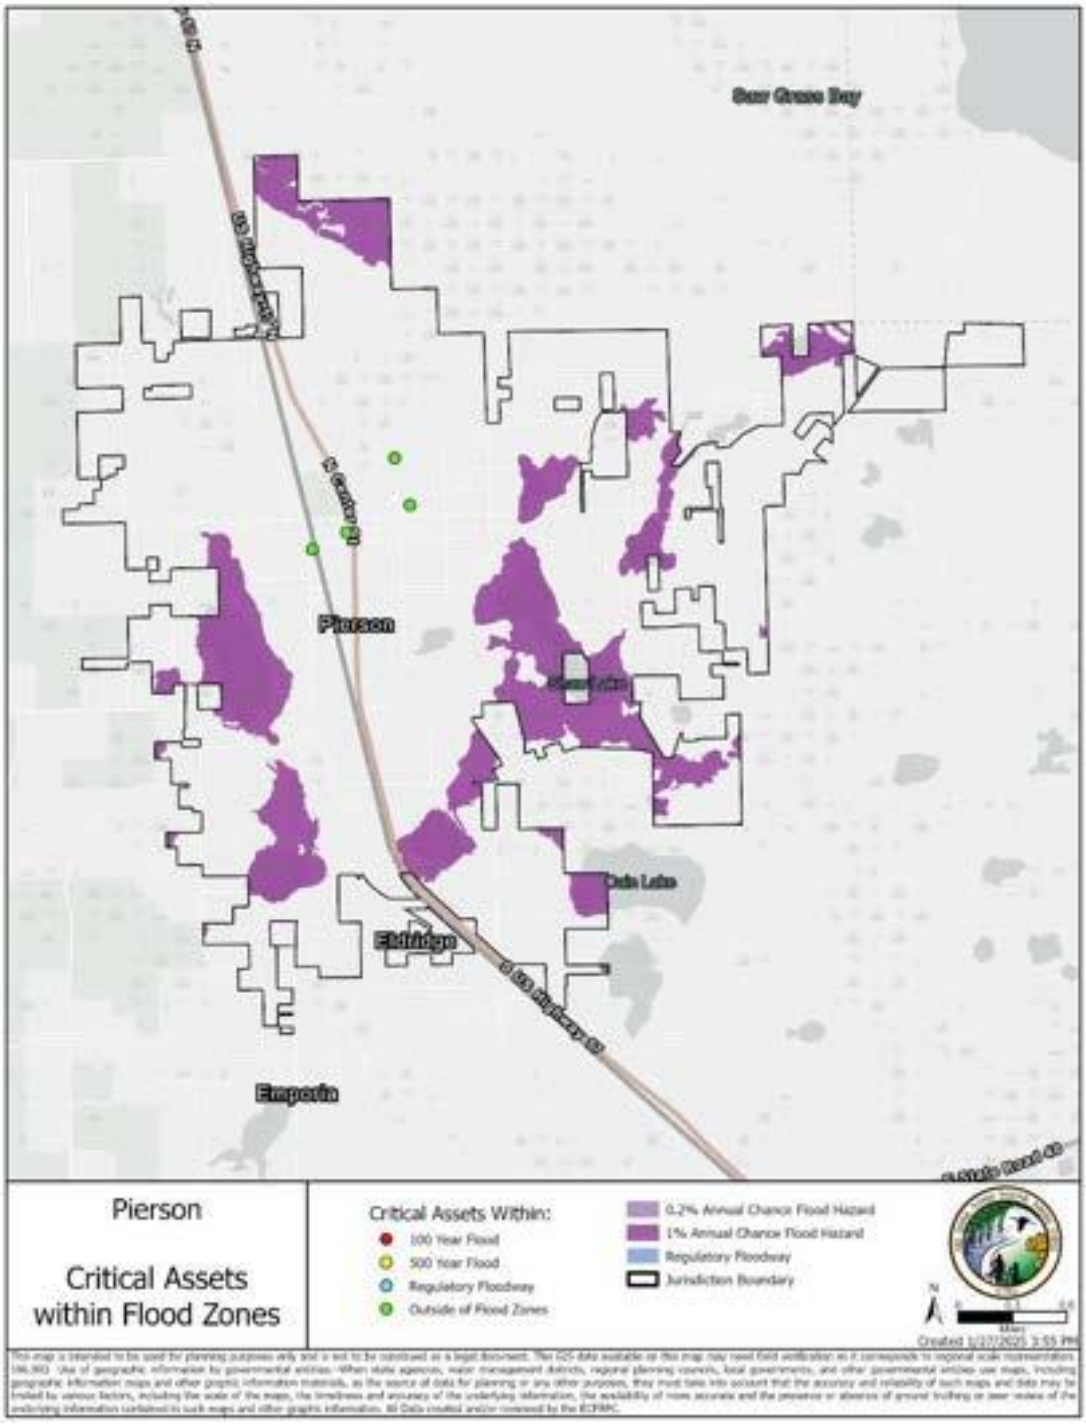
*Figure 12: Critical Assets with Flood Zone - Ormond Beach*

## Pierson

### *Floodplain Management Goals and Objectives*



There are no additional goals to the countywide goals stated in the report.

There are no critical assets within the 100-year or 500-year flood zones.

*Table 21: Pierson - Floodplain Exposure Analysis*

| Exposure | Values |
|---|---|
| **Percent of Properties in the Floodplain** | 12.72% |
| **Properties in the Floodplain** | 163 |
| **Exposed Acreage: Residential Future Land Use** | 31.69 |
| **Exposed Acreage: Commercial Future Land Use** | 0 |

| **Total Exposure: Assessed Value** | $37,715,903 |
| **Total Exposure: Taxable Value** | $17,576,761 |

*Figure 13: Critical Assets with Flood Zone - Pierson*

## Ponce Inlet

### *Floodplain Management Goals and Objectives*

Goal 1: Conserve, protect, and restore coastal natural resources to maintain and enhance native habitats, floral and faunal species diversity, water quality, and natural surface water characteristics: and preserve and expand opportunities for the general public to access, use and enjoy the ocean beaches, the Halifax River, and other natural resource areas with passive and active recreational potential.

- Objective 1.1: Ensure the long-term protection, restoration and enhancement of the natural upland and wetland habitats of the coastal area, particularly areas identified as critical habitat for threatened and endangered species and species of special concern, through cooperation and coordination with federal, state and regional agencies, as well as Volusia County and adjoining coastal municipalities.
- Objective 1.2: Protect, conserve and enhance coastal resource wetlands, wildlife habitat and living marine resources by continued implementation of the LUDC's development regulations.
- Objective 1.3: The town shall permit the use of limited shoreline land areas based on type of water-dependent use, adjacent land use, water quality, impact on critical habitat and coastal resources and in accordance with the priorities for shoreline uses set forth in Policy 1.3.1.
- Objective 1.4: The town shall develop strategies to lessen the impact of a destructive storm on human life, property, public facilities and natural resources.
- Objective 1.5: Population concentrations shall be directed away from the Coastal High Hazard Area* (CHHA).
- Objective 1.6: Public facilities shall be prohibited that will encourage new development inside the CHHA, unless the facilities are consistent with policies specifically identified in this Comprehensive Plan.
- Objective 1.7: Prior to the development of public facilities in the CHHA, it shall be determined that there are no other feasible sites outside said area.
- Objective 1.8: If constructed, all public facilities in the CHHA shall be flood-proofed to ensure minimum damage from storms and hurricanes.
- Objective 1.9: The town shall regulate development that could impact natural dune systems by requiring developments to provide a plan that addresses that avoids

disturbance to dunes if possible, and provides dune protection and stabilization measures, flood-proofing of utilities and requirements for structural wind resistance and floodplain management; Policy 1.4.6 - All development in the Hurricane Vulnerability Zone (HVZ) shall be consistent with the federal flood hazard requirements; Policy 1.4.7 - The town shall continue to participate in the National Flood Insurance Program (NFIP); Policy 1.4.8 - Any reconstruction or repair of the infrastructure necessitating state funds shall be designed to minimize potential damage (i.e., wind and/or flooding) from hurricanes or other storms; Policy 1.4.9 - The town, in accordance with Federal Emergency Management Agency requirements, shall adopt and implement a mitigation plan to reduce damage in areas of repetitive loss due to flooding; Policy 1.4.10 - The town shall continue to participation in the county's Emergency Management Service's "Local Mitigation Strategy" (LMS), as necessary and appropriate, through capital improvements programming and land development regulations in order to establish a continuing program of hurricane mitigation.

- Objective 1.10: In conjunction with Port Orange, Volusia County and Daytona Beach Shores, the town shall ensure that it maintains hurricane evacuation times at no more than 16 hours from the time of the first official order to evacuate during a Category 5 storm event as measured on the Saffir-Simpson scale prior to the consideration of any proposals to amend a Future Land Use designation that has the effect of increasing residential density in the community.

Goal 2: Protect, enhance, and restore the natural function of the beach and dune system.

- Objective 2.1: The town will continue to administer and enforce its comprehensive dune management program for the purpose of preserving and enhancing the existing dunes and stabilizing vegetation.
- Objective 2.2: The town shall coordinate with the East Central Florida Regional Planning Council, Volusia County and other coastal cities, as appropriate, in continually evaluating the long-term problems related to post-disaster redevelopment.

| **Total Exposure: Taxable Value** | $450,947,795 |

*Figure 14: Critical Assets with Flood Zone - Ponce Inlet*

## Port Orange

### *Floodplain Management Goals and Objectives*

Goal 1: Provide an efficient and effective drainage and storm water management system which, to the maximum extent practical, protects persons and property from flooding, prevents negative impacts to the groundwater aquifer, and safeguards surface waters against erosion and degradation of quality.

- Objective 1.1*:* To provide a storm water management level-of-service that will eliminate existing local flooding during the 25-year, 24-hour storm, and require all new development to provide storm water management facilities based on a 25-year, 24-hour storm event.
    - *Policy:* Continue to utilize the Port Orange Master Drainage Plan, which establishes high water elevations, addresses existing deficiencies, and coordinates the construction of new facilities.
    - *Policy:* Utilize the full carrying capacity of the existing culverts and ditches. The City will perform annual inspections of system elements to ascertain whether ditches have been maintained and culverts cleaned.
    - *Policy:* Review on a yearly basis the priorities for replacement, correction of facility deficiencies, and provision of future drainage facility needs. These priorities will be based on those facilities that: 1) have failed or have a high probability of failure; and 2) will meet future capacity needs. The City shall establish a construction schedule for identified improvements in order to meet the future needs of flood control and storm water management.

Goal 2: Lessen the impact of a destructive storm on human life, property, public facilities and natural resources.

- Objective 2.1: To utilize land development regulations that minimizes danger to life and property.
    - *Policy:* If constructed, all public facilities in the Coastal High Hazard Area, where necessary and appropriate, shall be flood-proof to ensure minimum damages from storms and hurricanes.
    - *Policy:* City utility infrastructure shall be designed to withstand floods and wind damage associated with major storms and hurricanes. Furthermore, the City shall require, where necessary and appropriate, that electric,

telephone, television cable, and other private utility infrastructure be designed to withstand flood and storm damage.

- *Policy:* Incorporate the recommendations of the Comprehensive Emergency Management Plan and the Local Mitigation Strategy (LMS), and other relevant interagency reports and agreements into the Comprehensive Plan and Land Development Code, as appropriate.
- *Policy:* Continue to participate in the county-wide Local Mitigation Strategy (LMS) program and implement the LMS, as necessary and appropriate, through capital improvements programming; *Policy:* Continue to participate in the National Flood Insurance Program (NFIP).
- *Policy:* Continue to pursue the improvement of Port Orange's insurance rating under the NFIP Community Rating System.

Goal 3: Conserve, protect, manage, restore, and enhance the City's air, water, and soil resources to maintain a living environment that supports a healthy population and does not cause illness.

- Objective 3.1*:* To protect, enhance and improve the ambient water quality of surface waters within the city.
  - *Policy:* On-site waste treatment system facilities and drain fields shall not be located within 75 feet of the 100-year floodplain; within 75 feet of an upland/wetland interface; or within 120 feet of the mean high-water mark of any surface water body, whichever is greater. On-site waste treatment systems should be located as far inland from a water body or wetland as possible.

Goal 4: Conserve, protect, manage, restore, and enhance the functional, aesthetic, and qualitative value of the natural environment for the benefit of present and future generations.

- Objective 4.1*:* To protect the natural function of the 100-year floodplains of Spruce Creek, the Halifax River, and their tributaries. In accordance with the provisions of the Comprehensive Plan, the City shall enforce development regulations to maintain the capability of floodplains to carry, store and filter flood waters.
  - *Policy:* Continue the use of the Conservation land use designation, as well as the Floodplain-Conservation (F-C) Zoning District, to protect the natural functions of floodplains and shorelines.

- *Policy:* Floodplains whose functional values have been degraded or destroyed through human intervention should be restored, if possible, through the public acquisition of historic floodplain lands. Various state, regional, and local acquisition programs shall be used for this purpose.
- *Policy:* No fill will be allowed in the Floodplain-Conservation (F-C) Zoning District that will decrease the flood carrying capacity of the riverine floodplain.
- *Policy:* No fill will be allowed in isolated floodplain pockets that will decrease the flood storage capacity of depressional wetlands.
- *Policy:* If any filling of land occurs during site design such that the volume of floodplain storage would be reduced, an equal volume of soil shall be excavated within the same floodplain to provide compensatory storage.
- *Policy:* Ensure that fill material or other structures do not adversely obstruct the natural movement of floodwater overland sheet flow or pose a threat to the public health, safety, and welfare.
- *Policy:* Encourage the development of a strict floodplain management program by state, regional, and local governments designed to preserve hydrologically significant wetlands and other natural floodplain features.

## South Daytona

### *Floodplain Management Goals and Objectives*

Goal 1: To protect human life and health through preparedness of emergency response teams from the Fire, Police and Public Works Departments.

Goal 2: Provide leadership in protecting residential properties and businesses from the impacts of floods by coordinating historical data with updated storm water management studies to identify possible flooding concerns.

Goal 3: To minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public with proper planning and cost-effective storm water improvements.

Goal 4: To minimize damage to public facilities and utilities such as water and gas mains, electric, telephone and sewer lines, streets and bridges located in floodplains through hardening facilities and Public Works Department preparedness.

Goal 5: To help maintain a stable tax base by providing for the sound use and development of flood prone areas in such a manner as to minimize flood blighted areas.

Goal 6: Provide advice and assistance to property owners by the Floodplain Manager and Chief Building Official concerning the protection of their properties from flooding.

Goal 7: Maintain a Public awareness program that informs all property owners in the flood zones that they are in a flood zone through mail- outs and website postings.

Goal 8: Maintain an aggressive grant program to identify and obtain funding for both pre and post disaster mitigation projects through the Community Development and the Ridgewood Corridor Re-Development Departments.

Goal 9: Create programs to manage the surface water runoff through maintaining an updated storm water management plan through the Public Works Department in conjunction with the Floodplain Manager and Chief Building Official.

*Figure 16: Critical Assets with Flood Zone - South Daytona*

## Unincorporated Volusia

### *Floodplain Management Goals and Objectives*

Goal 1: Reduce future floodplain impacts due to development.

- Objective 1.1: Review and update existing regulations to enhance practices related to stormwater management, flood hazard management, resiliency, and sea level rise.
- Objective 1.2: Continue to enforce enhanced building and development requirements identified in the Flood Hazard and Stormwater Management Ordinances and not allow variances that are feasibly avoidable.

Goal 2: Protect natural areas identified as green infrastructure for flood mitigation.

- Objective 2.1: Continue to utilize Volusia Forever, the small lot acquisition program, and other funding sources to conserve areas identified as Natural Critical Assets vulnerable to sea level rise and flooding.
- Objective 2.2: Continue to enforce protection standards of environmentally sensitive lands, as identified in the Comprehensive Plan and Chapter 72 Land Planning Code, to maximize their inherent mitigation attributes and reduce known flood hazards.

Goal 3: Prioritize capital projects to mitigate current and future flood impacts.

- Objective 3.1: Update and complete basin studies for all watersheds.
- Objective 3.2: Identify priority projects for funding to alleviate current and future impacts.
- Objective 3.3: Utilize the “Volusia Prepares” Local Mitigation Strategy as a tool for funding and prioritization needs.
- Objective 3.4: Maintain a Vulnerability Assessment report to identify critical assets that are within areas identified as at risk from flooding and sea level rise.

Goal 4: Educate the public on current and future flood hazards, resiliency and resources.

- Objective 4.1: Update the Volusia Multi-Jurisdictional Program for Public Information to include additional focus on resiliency.
- Objective 4.2: Update existing educational resources and websites to provide engaging, vital, and simplified information.

- Objective 4.3: Continue resiliency outreach through the Volusia Forward initiative.
- Objective 4.4: Provide outreach materials and presentations to inform stakeholders about Substantial Damage and FEMA's 50% rule.

Goal 5: Provide the community with funding assistance and grant opportunities.

- Objective 5.1: Continue the flood hazard mitigation program for pre-and-post disaster residential mitigation projects.
- Objective 5.2: Assist citizens with submitting residential projects to available state and federal grant programs.
- Objective 5.3: Continue to provide aid through Transform 386 Homeowner Recovery, Mitigation, and Infrastructure programs.
- Objective 5.4: Continue to provide post-event services for low- and moderate-income residents (e.g. Hurricane Housing Recovery, Relocation, Repair and Insurance Deductible Program, and Homeowner's/Flood Insurance Assistance) through the Community Assistance Division, as funding allows.

# APPENDIX H: PLAN ADOPTIONS

Resolutions of Adoption

**STAFF REPORT**
**CITY OF HOLLY HILL, FLORIDA**

**City Commission**
**Resolution**

**MEETING DATE:** **March 25, 2025**
**FROM:** **Josef Grusauskas**
**SUBJECT:** **A Resolution of the City Commission of the City of Holly Hill, Florida, Authorizing the City Manager to Accept and Approve the City of Holly Hill's Designated Portion of the Volusia County Mitigation Strategy Plans; Providing for Severability; and Providing for an Effective Date.**
**NUMBER:** **2025-R-26**
**APPLICANT:**
**PLANNER:**

## DISCUSSION:

Florida is currently operating under Program Administration by States (PAS) with regard to the review and approval of Local Mitigation Strategy (LMS) plans.

The Volusia County Local Mitigation Strategy is a working group, which has established a comprehensive, coordinated planning process involving the county and its municipalities. The LMS, represented by staff throughout municipalities of the county, have identified, justified and prioritized a number of proposed projects needed to mitigate the vulnerabilities as identified by municipalities.

Volusia County is asking that all jurisdictions accept and approve its designated portion of the Volusia County LMS and accept and endorse the mitigation goals and objectives established by Volusia Prepares for the countywide plan.

A copy of the 2025 Multi-Jurisdictional Local Mitigation Strategy for Volusia County is included as **"Exhibit A"**. City staff have asked that Jeff Miller be removed as a member of the Volusia Prepares working group representing Holly Hill and that the address for the fire station be changed to 1030 Daytona Avenue. These revisions have been accepted and are anticipated to be reflected along with other minor revisions from other jurisdictions in the final 2025 Local Mitigation Strategy.

## FISCAL ANALYSIS:

Adoption of the 2025 Multi-Jurisdictional Local Mitigation Strategy for Volusia County has no financial impact.

## STAFF RECOMMENDATION:

Authorize the City Manager to adopt the Local Mitigation Strategy.

**COMMISSION GOAL:**

**Goal #1:** Develop and maintain a sound and sustainable financial plan for the city that establishes sufficient reserves for all funds, ensures (whenever possible) that user fees pay for services rendered, provides a realistic capital improvement program, and encourages public/private sector partnerships and intergovernmental partnerships.

**Goal #4:** Provide proficient public health and safety services in terms of police and fire protection, water, storm water, waste water and solid waste management and disaster preparedness with a focus on intergovernmental collaboration, private sector partnerships, and utilization of technologies and proven innovations.

**MOTION:**

**APPROVE AUTHORIZING THE CITY MANAGER TO ACCEPT AND APPROVE THE CITY OF HOLLY HILL'S DESIGNATED PORTION OF THE VOLUSIA COUNTY LOCAL MITIGATION STRATEGY.**

**ATTACHMENTS:**

- Exhibit A - Local Mitigation Strategy (PDF)

# Resolution No. 2025-26

## A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF HOLLY HILL, FLORIDA, AUTHORIZING THE CITY MANAGER TO ACCEPT AND APPROVE THE CITY OF HOLLY HILL'S DESIGNATED PORTION OF THE VOLUSIA COUNTY MITIGATION STRATEGY PLANS; PROVIDING FOR SEVERABILITY; AND PROVIDING FOR AN EFFECTIVE DATE.

**A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF HOLLY HILL, FLORIDA, AUTHORIZING THE CITY MANAGER TO ACCEPT AND APPROVE THE CITY OF HOLLY HILL'S DESIGNATED PORTION OF THE VOLUSIA COUNTY MITIGATION STRATEGY PLANS; PROVIDING FOR SEVERABILITY; AND PROVIDING FOR AN EFFECTIVE DATE.**

**WHEREAS,** areas of Holly Hill are vulnerable to the human and economic costs of natural, technological and societal disasters; and

**WHEREAS,** the Holly Hill City Commission realizes the importance of reducing or eliminating those vulnerabilities for the overall good and welfare of the community; and

**WHEREAS,** Holly Hill has been an active participant in Volusia Prepares, the Local Mitigation Strategy working group, which has established a comprehensive, coordinated planning process involving the county and its municipalities, as well as other public and private sector organizations, to eliminate or decrease these vulnerabilities; and

**WHEREAS,** Holly Hill representatives and staff have identified, justified and prioritized a number of proposed projects and programs needed to mitigate the vulnerabilities of unincorporated areas of Volusia County to the impacts of future disasters; and

**WHEREAS,** Holly Hill staff have reviewed the information provided by or for other participating jurisdictions and organizations, including the projects and programs they have proposed for incorporation into the Volusia County Local Mitigation Plan; and

**WHEREAS,** these proposed projects and programs have been incorporated into the current edition of the Volusia County Local Mitigation Plan that has been prepared and issued for consideration and implementation by the communities and jurisdictions of Volusia County.

**NOW, THEREFORE, BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF HOLLY HILL, FLORIDA:**

**SECTION 1.** The City of Holly Hill accepts and approves of its designated portion of the Volusia County Local Mitigation Plan.

**SECTION 2.** The City of Holly Hill accepts and endorses the mitigation goals and objectives established by Volusia Prepares for countywide plan, and the anticipated schedule of the next updating of the plan

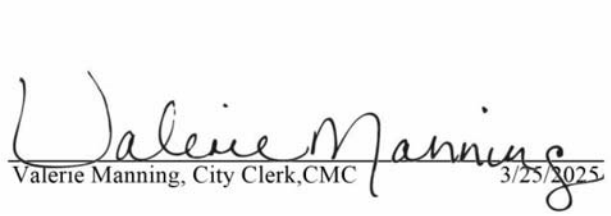
**SECTION 3.** The City of Holly Hill finds that the proposed mitigation projects and programs included in the plan by other jurisdictions and organizations are acceptable, that they will not adversely affect the county of its neighborhoods, and that they do not conflict with or duplicate the mitigation proposals made by the county itself.

**SECTION 4.** The personnel of Holly Hill are requested and instructed to pursue available funding opportunities for implementation of the proposals designated therein.

**SECTION 5.** The agencies and organizations within Holly Hill will, upon receipt of such funding or other necessary resources, seek to implement the proposals contained in the county's individual section of the strategy.

**SECTION 6.** The City of Holly Hill will continue to participate in the updating and expansion of the Volusia County Local Mitigation Plan in the years ahead.

**SECTION 7.** The City of Holly Hill will further seek to encourage the businesses, industries and community groups operating within Holly Hill to also participate in the updating and expansion of the Volusia County Local Mitigation Plan in the years ahead.



**SECTION 8. SEVERABILITY.** If any section or portion of a section of this Resolution prove to be invalid, unlawful, or unconstitutional, it shall not be held to invalidate or impair the validity, force, or effect of any other section or part of this Resolution.

**SECTION 9. EFFECTIVE DATE.** This Resolution shall take effect immediately upon its adoption.

**APPROVED AND AUTHENTICATED on this 25th day of MARCH, 2025.**

John Penny, Mayor 3/25/2025

# City of Daytona Beach Shores

*"Life is Better Here"*
*"A Premier, Friendly Place to Be"*

Office of The City Clerk

State of Florida
County of Volusia

I, the undersigned duly appointed City Clerk of the City of Daytona Beach Shores, Florida, HEREBY CERTIFY that the attached is a true copy of Resolution 2025-05 adopted on May 6, 2025, as shown in the records of the City on file in the office of the City Clerk.

WITNESS my hand and the corporate seal of the City of Daytona Beach Shores, Florida, this 7th day of May, 2025.

Cheri Schwab, CMC
City Clerk

2990 S. Atlantic Avenue, Daytona Beach Shores, FL 32118 - Phone 386/763-5364; Fax 386/763-5360

**RESOLUTION NO. 2025-05**

**A RESOLUTION OF THE CITY OF DAYTONA BEACH SHORES, VOLUSIA COUNTY, FLORIDA IN SUPPORT OF THE 2025 VOLUSIA COUNTY LOCAL MITIGATION STRATEGY PLAN; ADOPTING THE PLAN INCLUDING THE FLOOD WARNING PLAN - APPENDIX A; PROVIDING FOR AN EFFECTIVE DATE.**

**WHEREAS,** Article VIII, Section 2, *Constitution of the State of Florida,* authorizes the City of Daytona Beach Shores to exercise any power for municipal purposes except as otherwise provided by law; and

**WHEREAS,** coastal and riverine flooding are significant threats to the safety of residents of Volusia County and its municipalities; and

**WHEREAS,** the City Commission of the City of Daytona Beach Shores recognizes the importance of reducing vulnerabilities to flood events for the overall good and welfare of the community; and

**WHEREAS,** the City of Daytona Beach Shores has been an active participant in the Volusia Local Mitigation Strategy Working Group, which has established a comprehensive, coordinated planning process involving the county and its municipalities, as well as other public and private sector organizations, to eliminate or decrease these vulnerabilities; and

**WHEREAS,** Daytona Beach Shores representatives and staff have identified, justified and prioritized a number of proposed projects and programs needed to mitigate the vulnerabilities of unincorporated areas of Volusia County to the impacts of future flood events; and

**WHEREAS,** the National Flood Insurance Program (NFIP) provides federally subsidized flood insurance in communities that regulate development in floodplains; and

**WHEREAS,** the National Flood Insurance Program Community Rating System (CRS) rates the various community floodplain management programs and reduces flood insurance premiums in those communities that meet Community Rating System Program requirements; and

**WHEREAS,** the proposed projects and programs are undertaken to reduce the potential for personal and property losses in flood-prone areas and ensure the lowest possible flood insurance premiums for residents; and

**WHEREAS,** the adoption of the 2025 Volusia County Integrated Floodplain Management Plan and its integration into the Local Mitigation Strategy is intended to support this effort; and

**WHEREAS,** the formal adoption of the Plan by the local governing body is a requirement of the Community Rating System Program;

**NOW, THEREFORE, BE IT RESOLVED THAT THE CITY COMMISSION OF THE CITY OF DAYTONA BEACH SHORES, FLORIDA, AS FOLLOWS:**

**SECTION ONE. FINDINGS.**

1. The City Commission of the City of Daytona Beach Shores hereby accepts and approves of its designated portion of the Volusia County Integrated Floodplain Management Plan 2025.
2. The City Commission of the City of Daytona Beach Shores accepts and endorses the mitigation goals and objectives established by the Volusia County Local Mitigation Strategy work group for the countywide Plan, and the anticipated schedule for the next updating of the strategy.
3. The City Commission of the City of Daytona Beach Shores finds that the proposed flood mitigation projects and programs included in the Plan by other jurisdictions and organizations are acceptable, that they will not adversely affect the City or its neighborhoods, and that they do not conflict with or duplicate the flood mitigation proposals made by the City itself.
4. Relevant City Staff are requested and instructed to pursue available funding opportunities for the implementation of the proposals designated therein.
5. The agencies and organizations within the City of Daytona Beach Shores will, upon receipt of such funding or other necessary resources, seek to implement the proposals contained in the City's individual section of the Plan.
6. The City Commission of the City of Daytona Beach Shores will continue to participate in the updating and expansion of the Volusia County Integrated Floodplain Management Plan in the years ahead.
7. The City Commission of the City of Daytona Beach Shores will further seek to encourage the businesses, industries and community groups operating within Daytona Beach Shores to also participate in the updating and expansion of the Volusia County Integrated Floodplain Management Plan in the years ahead.

**SECTION TWO. SAVINGS.** The prior actions of the City of Daytona Beach Shores relating to the local mitigation strategy and floodplain management are hereby ratified and affirmed.

**SECTION THREE: CONFLICTS.** All resolutions or parts thereof in conflict with this Resolution are hereby repealed to the extent of such conflict.

**SECTION FOUR. SEVERABILITY.** If any section, subsection, sentence, clause, phrase, or portion of this Resolution, or application hereof, is for any reason held invalid or unconstitutional by any court of competent jurisdiction, such portion or application shall be deemed a separate, distinct, and independent provision and such holding shall not affect the validity of the remaining portions thereof.

**SECTION FIVE. EFFECTIVE DATE.** This Resolution shall take effect immediately upon its adoption.

# RESOLUTION NO. 25-22

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA, AUTHORIZING SUPPORT FOR THE VOLUSIA COUNTY LOCAL MITIGATION STRATEGY; PROVIDING AN EFFECTIVE DATE.

WHEREAS, areas of the City of Port Orange are vulnerable to the human and economic costs of natural, technological and societal disasters; and

WHEREAS, the City of Port Orange realizes the importance of reducing or eliminating those vulnerabilities for the overall good and welfare of the community; and

WHEREAS, the City of Port Orange has been an active participant in Volusia Prepares, the Local Mitigation Strategy working group, which has established a comprehensive, coordinated planning process involving the county and its municipalities, as well as other public and private sector organizations, to eliminate or decrease these vulnerabilities; and

WHEREAS, City of Port Orange representatives and staff have identified, justified and prioritized a number of proposed projects and programs needed to mitigate the vulnerabilities of areas of Port Orange to the impacts of future disasters; and

WHEREAS, Port Orange representatives and staff have reviewed the information provided by or for other participating jurisdictions and organizations, including the projects and programs they have proposed for incorporation into the Volusia County Local Mitigation Plan; and

WHEREAS, these proposed projects and programs have been incorporated into the current edition of the Volusia County Local Mitigation Strategy that has been prepared and issued for consideration and implementation by the communities and jurisdictions of Volusia County.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA:

Section 1. The City of Port Orange hereby accepts and approves of its designated portion of the Volusia County Local Mitigation Strategy.

Section 2. The City of Port Orange accepts and endorses the mitigation goals and objectives established by Volusia Prepares for the countywide strategy, and the anticipated schedule for the next updating of the strategy.

Section 3. The City of Port Orange finds that the proposed mitigation projects and programs included in the plan by other jurisdictions and organizations are acceptable, that they will not adversely affect the county or its neighborhoods, and that they do not conflict with or duplicates the mitigation proposals made by the City itself.

Section 4. The agency personnel of the City of Port Orange are requested and instructed to pursue available funding opportunities for implementation of the proposals designated therein.

Section 5. The agencies and organizations within the City of Port Orange will, upon receipt of such funding or other necessary resources, seek to implement the proposals contained in the county's individual section of the

strategy.

Section 6. The City of Port Orange will continue to participate in the updating and expansion of the Volusia County Local Mitigation Strategy in the years ahead.

Section 7. The City of Port Orange will further seek to encourage the businesses, industries and community groups operating within Port Orange to also participate in the updating and expansion of the Volusia County Local Mitigation Strategy in the years ahead.

Section 8. This Resolution shall become effective immediately upon adoption by the City Council.

Summary

This is the construction and demolition roll-off services franchise agreement application for Prince Containers. This application is for April 18, 2025 to April 18, 2026.

Prince Containers offers 10, 15, 20 and 30-yard roll-off containers. The principal owners have an extensive background in the recycling and solid waste industry, and staff expect a high level of customer satisfaction from the company. City staff previously conducted reference checks and a financial ability analysis of Prince Containers to perform construction and demolition roll-off services within the City. These checks provided no information to disallow the granting of a non-exclusive franchise agreement.

Financial Impact

Revenues from this nonexclusive franchise agreement will be $5,000 from the receipt of the annual franchise fee, $1,500 from the renewal fee, and approximately $2,500 from pull charges, which will be applied to Fund 460 - Solid Waste Fund.

Citizen Impact

The franchising of waste haulers ensures businesses operate within City requirements. Having multiple authorized haulers provides a varied selection from which residents can choose.

**To the applicant:** The following information checklist is provided to assist you in preparing your application for a non-exclusive franchise to provide containers for construction and demolition debris collection and disposal services to properties located in the City of Ormond Beach. Please provide the required information identified in this checklist as an attachment to the franchise application.

**Franchise Application Requirements**
**And Requirement Checklist**

☑ 1. Name(s) and business address(es) of principal officers and stockholders and other persons having financial or controlling interest in any partnership or corporation;

~~☐ 2.~~ Names(s) and business address(es) of local managing officers of any publicly owned corporation having more than 25 shareholders; - Do not need

☑ 3. Proof that corporation is in good standing in the State, and if not a Florida corporation, proof that applicant is qualified to do business in the State of Florida;

☑ 4. If applicant is other than a corporation, and is operating under a fictitious name, applicant shall be required to submit information that such fictitious name is registered and held by applicant;

☑ 5. List of type, number, and complete description of all equipment to be used by applicant for providing safe and efficient services;

☑ 6. Description or listing of the applicant's and its related entity's experience in the collection of construction and demolition debris;

☑ 7. List of all franchises awarded to the applicant and the status of those franchises;

**City of Ormond Beach**
**Public Works Department**
**Construction & Demolition Roll-Off Services Franchise Application**

☑ 8. List of all franchises applied for which were not granted during the previous five-year period;

☑ 9. Written response to selection criteria as follows:

1. The public need for the proposed franchise or franchise transfer
2. The financial ability of the applicant to perform
3. Such other matters or information regarding the applicant or proposed franchise that the City Commission may determine relevant in its legislative discretion;

☑ 10. Applicant shall maintain in full force and effect the insurance coverages required by Exhibit "A" of City of Ormond Beach Resolution No. 2021-144 and any subsequent amendments thereto. Commercial General Liability coverage shall be $1 million each occurrence, $1 million aggregate products and completed operations and $50,000 fire damage (any one fire).

☑ 11. An applicant for an initial franchise, or a material modification of an existing franchise, or a transfer of a franchise shall file the original and ten (10) copied of the application with the City Clerk, or his or her designee. Any transfer of more then twenty-five (25) percent of the ownership of the franchisee shall be deemed to be a "transfer of a franchise."

☑ 12. Contemporaneously with the filing of an application for an initial franchise, the applicant shall remit to the City a nonrefundable application fee in the amount of two thousand five hundred dollars ($2,500.00): and contemporaneously with the filing of an application for a material modification of an existing franchise, or a transfer of a franchise, the applicant shall remit to the City, unless otherwise prohibited by law or waived by the City, a nonrefundable application fee in the amount of one thousand five hundred dollars ($1,500.00). "Material modification" shall mean a change in any term or condition that substantially or materially affects any right or obligation of the franchisee or City under a franchise.

☑ 13. Within ten (10) business days after the filing of an application, the applicant shall furnish a complete copy of the application to all other collectors of construction and demolition debris that have franchises in the City. The copy shall be furnished by personal delivery or sent by certified mail, return receipt requested, to the principal business office of such other collectors of construction and demolition debris.

**Definitions:**

1. Applicant: a person or corporation applying to the City of Ormond Beach for a non-exclusive franchise to provide construction and demolition roll-off containers and/or collect construction and demolition debris within the City for hire, remuneration or other consideration.

2. Franchisee: person or corporation to whom the City has issued a non-exclusive franchise to provide roll-off containers for construction and demolition services and/or to provide construction and demolition debris collection and disposal services to properties in the City.

**Experience in Collection of Construction and Demolition Debris**

**Company Name:**
SJP Enterprises LLC, dba Prince Containers

**Years in Operation:**
Approximately 2.5 years

**Summary of Experience:**
SJP Enterprises LLC, doing business as Prince Containers, has been in operation for approximately two and a half years, specializing in the collection and management of construction and demolition (C&D) debris. We primarily serve large-scale builders such as DR Horton, Lennar, Casa Fresca, and others. Our focus is on commercial and production homebuilding projects, providing efficient removal, sorting, and proper disposal or recycling of materials such as wood, drywall, metal, and other common C&D waste — excluding concrete.

**Related Entity:**
**Prince and Sons** – Provides commercial landscape maintenance, landscape irrigation, and light construction services.

Together, our companies bring a well-rounded understanding of construction site operations and remain fully compliant with all local and state regulations regarding debris handling and disposal. Safety, reliability, and environmental responsibility are central to our operations.

## "Written Responses to Selected Criteria for Franchise Proposal"

There is a clear and growing public need for reliable and efficient construction and demolition debris collection services, especially within the rapidly expanding commercial and residential development sectors. SJP Enterprises LLC, dba Prince Containers, is well-positioned to meet this demand by providing dependable, regulation-compliant waste management solutions for leading builders such as DR Horton, Lennar, and Casa Fresca. We are currently serving communities across the state of Florida, supporting cleaner, safer job sites and contributing to responsible environmental practices in the community.

In addition, our strong financial standing allows us to maintain the necessary infrastructure, equipment, and staffing to scale our operations and meet the growing needs of the market. With two and a half years of successful operations and a solid financial track record, we are fully equipped to expand our services and sustain long-term success as a franchise.

Summary

This item provides public notice of the City's intent to issue a request for proposals (RFP) for the Water Well Assessment and Rehabilitation Services, RFP number 2025-38.

In order to provide the City's water treatment plant with an adequate supply of raw water, the City's raw water wells need to be maintained on a regular basis. The City currently has 42 raw water wells as permitted through the Saint Johns River Water Management District. Maintenance activities for any raw water well may include, but is not limited to, rehabilitating mechanical components and electrical systems, replacement of items damaged by lightning, video logging of the well's casing, and replacement of any damaged casing components.

The City currently has active contracts for these services with Thompson Well & Pump and Layne Christenson. These existing contracts were established on December 1, 2020, in Resolution 2020-182, with a maximum contract length of 5 years. The City will advertise this RFP with the intent of establishing a new contract with those contractor(s) selected though the RFP process.

Financial Impact

Water well assessment and rehabilitation services are included in the annual budget of Fund 401 - Water/Wasterwater Operating.

Citizen Impact

Regular maintenance and upkeep of the City's raw water wells is essential in providing reliable drinking water service to the City's utility customers. No adverse impacts are anticipated.

## GENERAL CONDITIONS

**PUBLIC ENTITY CRIMES**: A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a proposal on a contract to provide any goods or services to a public entity, may not submit a proposal on a contract with a public entity for the construction or repair of a public building or public work, may not submit Proposals on leases or real property to a public entity, may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with any public entity in excess of the threshold amount provided in Section 287.017, for CATEGORY TWO for a period of 36 months from the date of being placed on the convicted vendor list.

**DISCRIMINATION:** Pursuant to Section 287.134(2)(a), Florida Statutes, an entity or affiliate who has been placed on the discriminatory vendor list may not submit a bid or proposal on a contract to provide any goods or services to a public entity, may not submit a bid or proposal on a contract with a public entity for the construction or repair of a public building or public work, may not submit bid or proposal on leases of real property to a public entity, may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with any public entity.

**PUBLIC RECORDS/NON-CONFIDENTIALITY OF BIDS AND/OR PROPOSALS**. The City of Ormond Beach cannot and does not warrant the confidentiality of any information submitted in response to this solicitation. Florida law provides that municipal records shall at all times be open for personal inspection by any person, Section 119.01, F.S., The Public Records Law. Information and materials received by the City of Ormond Beach in connection with all Proposers' response shall be deemed to be public records subject to public inspection upon award, recommendation for award, or 30 days after bid opening, whichever occurs first. Section 119.071, F.S.

**DISTRIBUTION OF BIDS AND RFP'S**: The City uses the services of DemandStar (www.demandstar.com) to distribute its bids and RFP's on-line on the Internet. If you have received a copy of this RFP from any source other than DemandStar, please be aware that you may not have received the latest version of the RFP or any related addendums.

**SUBMISSION OF RESPONSES**: All Submittals shall be delivered in a sealed envelope. The Request for Proposals (RFP) number, title, and opening date shall be clearly displayed on the outside of the sealed envelope (and on the outside of any express shipping package). The delivery of said submittal to the Purchasing Office on or before the specified opening date and time is solely and strictly the responsibility of the Submitter. Any submittal received by the Purchasing Office after the specified date and time will not be accepted. Submittals must be presented on forms provided by the City. No other forms will be accepted. Responses submitted by telephone, fax or email will not be

considered. No Submittal may be modified after opening. No Submittal may be withdrawn after opening for a period of ninety (90) days unless otherwise specified.

**EXECUTION OF SUBMITTAL:** Submittals must contain a manual signature of authorized representative in the space(s) provided. Submittals must be typed or printed in ink. Use of erasable ink is not permitted. All corrections made by Submitter to any Submittal entry must be initialed. The company name and Federal Employer Identification Number (F.E.I.N.) number shall appear in the space(s) provided.

**RFP OPENING**: Submittals shall be opened and the name of the submitters shall be read publicly. No discussion of the Submittals will occur at this time.

**SUBMITTAL TABULATION:** The RFP Tabulation will be posted on Demandstar (www.demandstar.com). Any submitter wishing to receive a paper copy of the tabulation is required to enclose a stamped, self-addressed envelope with their Submittal response.

**CLARIFICATION/CORRECTION OF RFP ENTRY:** The City of Ormond Beach reserves the right to allow for the clarification of questionable entries and for the correction of obvious mistakes.

**INTERPRETATION:** Any questions concerning conditions and specifications shall be directed to the Purchasing Coordinator. Those interpretations which may affect the eventual outcome of this Submittal will be furnished in writing to all prospective Submitters. No interpretation shall be considered binding unless provided in writing by the City of Ormond Beach.

**PROCUREMENT COMMUNICATION PROTOCOL:** To protect the integrity of the procurement process, respondents, suppliers, contractors, sub-contractors or person acting on behalf of any of the above are prohibited from all communications regarding the solicitation with City staff, City consultants, City legal counsel, City agents, or elected officials unless such communication is specifically authorized in the City's solicitation or addenda. Violation of this provision may be grounds for rejecting a response.

**MINORITY POLICIES:** The City of Ormond Beach, Florida, encourages the full participation of Disadvantaged and Women Business Enterprises (D&WBE) in the provision of goods and services.

**RESPONSIBILITY DETERMINATION:** Pursuant to the provisions of Florida Statutes Chapter 287.05701, the City does not request or consider a vendor's social, political, or ideological interests in making a responsibility determination.

**LICENSES AND PERMITS:** The Vendor/Contractor is responsible for obtaining all necessary permits and licenses to comply with all Federal, State, local laws, rules and regulations required to perform work in accordance with the specifications.

**ADDITIONAL TERMS AND CONDITIONS:** The City of Ormond Beach reserves the right to reject Submittals containing any additional terms or conditions not specifically requested in the original conditions and specifications.

**TAXES:** The City of Ormond Beach is exempt from Federal Excise Taxes and all sales taxes.

**SILENCE OF SPECIFICATIONS**: The apparent silence of any specification and any supplemental specifications as to any details or the omission from same of any detailed description concerning any point shall be regarded as meaning that only the best commercial practices are to prevail and that only materials of first quality and correct type, size, and design are to be used. All workmanship is to be first quality. All interpretations of the specifications shall be made upon the basis of this statement.

**ASSIGNMENT:** Any purchase order or contract issued pursuant to a Submittal and the monies which may become due hereunder are not assignable except with the prior written approval of the City Manager or City Commissioner, whichever authorized the purchase or Agreement.

**LIABILITY**: The Contractor shall hold and save the City of Ormond Beach, its officers, agents, and employees harmless against claims by third parties resulting from the Contractor's or supplier's breach of contract or negligence, including all attorney's fees and costs, and shall pay any and all damages, fees, and costs assessed on behalf of the City. The City expressly reserves all rights, privileges and benefits of sovereign immunity.

**PATENTS AND ROYALTIES**: The Contractor, without exception, shall indemnify and save harmless the City of Ormond Beach and its employees from liability of any kind, including cost and expenses for or on account of any copyrighted, patented, or unpatented invention, process, or article manufactured or used in the performance of the contract, including its use by the City of Ormond Beach. If the Contractor uses any design, device, or materials covered by letters, patent or copyright, it is mutually agreed and understood without exception that the Submittal prices shall include all royalties or cost arising from the use of such design, device, or materials in any way involved in the work.

**NON-APPROPRIATION OF FUNDS:** In the event sufficient budget funds are not available for a new fiscal period, the CITY shall notify the VENDOR/CONTRACTOR of such occurrence and the contract shall terminate on the last day of the current fiscal period, without any penalty or expense to the CITY of any kind whatsoever.

**AWARDS:** The CITY reserves the right, in its sole discretion, as the best interest of the CITY may require, to make award(s) by individual item, group of items, all or none, or a combination thereof; on a geographical basis and/or with one or more vendors, contractors, consultants or specialists; or to reject any and all Submittals or waive any minor irregularity or technicality in the Submittals received.

**OTHER AGENCIES:** All Bidder(s) awarded contracts from this bid or proposal may, permit any municipality or other government agency to participate in the contract under the same prices, terms, and conditions, if agreed to by both parties.

It is understood that at no time will any city, municipality, or other agency be obligated for placing an order for any other city, municipality, or agency: nor will any city, municipality, or agency be obligated for any bills incurred by any other city, municipality, or agency. Further, it is understood that each agency will issue its own purchase orders to the awarded bidder(s).

**COMPLIANCE WITH FLORIDA PUBLIC RECORDS LAW:**

Contractor expressly agrees that it shall comply with the public records law provided in Florida Statutes, Chapter 119, and specifically to:

(a) Keep and maintain public records required by the City to perform the contracted service.
(b) Upon request from the City Clerk, provide the City with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in Chapter 119, Florida Statutes, or as otherwise provided by law.
(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the contractor does not transfer the records to the City.
(d) Upon completion of the contract, transfer at no cost, to the City all public records in possession of the contractor or keep and maintain public records required by the City to perform the service. If the contractor transfers all public records to the City upon completion of the contract, the contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the contractor keeps and maintains public records upon the completion of the contract, the contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the City, upon request from the City Clerk, in a format that is compatible with the information technology systems of the City.
(e) Failure of the Contractor to comply with Public Records Law as provided by Florida Statutes, Chapter 119, shall subject the Contractor to penalties under Chapter 119.10 and subject this Agreement to termination for cause by the City.

**IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS CONTRACT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT:**

CITY CLERK
22 SOUTH BEACH STREET
ORMOND BEACH, FLORIDA 32174
(386)677-0311
CITYCLERK@ORMONDBEACH.ORG
or online at
https://www.ormondbeach.org/prr

Ref: Fla. Stat. §119.0701(2016)

**THE CITY OF ORMOND BEACH RESERVES THE RIGHT TO REJECT ANY OR ALL PROPOSALS, AND TO WAIVE INFORMALITIES AS MAY BE DEEMED TO BE IN THE BEST INTEREST OF THE CITY.**

**TERMS AND CONDITIONS**

A. The City of Ormond Beach reserves the right without prejudice to reject any or all proposals, to request clarification of information submitted, and to request additional information of one or more proposers.

B. The City reserves the right to award the contract to the next most qualified firm if the successful firm fails to execute a contract within two weeks after the award of the contract by the City Commission.

C. In accordance with federal, State, and local regulations, the firm shall not discriminate under the contract against any person.

D. The firm shall not assign or transfer any interest in the contract without prior approval of the City Commission.

E. The City reserves the right to terminate the contract at any time due to the vendor's default under terms of agreement.

F. Submission of a proposal indicates acceptance by the firm of the conditions contained in this Request for Proposals unless clearly and specifically noted in the proposal submitted and confirmed in the contract between the City of Ormond Beach and the firm selected.

G. Submittals should include a copy of firm's insurance certificate, Conflict, Non-Conflict of Interest Statement/Litigation Statement, Drug Free Workplace Certificate and E-Verify Statement.

## I. OBJECTIVE OF THE REQUEST FOR PROPOSALS

The City of Ormond Beach is a coastal community located in northeast Volusia County, Florida, occupying an area of approximately 38 square miles. The City Utility Service Area extends outside of the City limits into part of unincorporated Volusia County as well as providing service to portions of neighboring Flagler County. Customer data for 2024 included 23,788 active water accounts, of which 16,972 were located within the City limits. Records indicate there were 18,027 active sewer accounts, of which 17,451 were located within City limits. The City's fiscal year begins on October 1 and ends on September 30.

It is the intent of the City of Ormond Beach, Florida to award a contract(s) to the successful proposer(s) of this request for proposals to provide **WATER WELL ASSESSMENT AND REHABILITATION SERVICES** on an "as needed" basis.

In order to meet the required raw water demands, the City presently utilizes thirty-nine (39) water production wells and is currently in the process of constructing three (3) new wells in the Hudson wellfield region. Details of individual wells are provided later within this same section. Bidders should be aware that the City's current inventory of well pumps includes multiple suppliers including Gould Water Technology Submersible Pumps (A Xylem Brand), Peabody Floway Vertical Turbine Submersible Pumps, and Grundfos Pumps.

To provide vendors with a better understanding of the City's water well network, an excerpt from the recently completed *Western Service Area Master Plan Update* (February 2020) completed by Mead & Hunt, is provided. The excerpt entitled "Existing Raw Water Infrastructure," is broken into three parts. In Part 1, Existing Wellfield Summary, a paragraph describes the City's four wellfields. Thereafter, in table format, all wells are listed with relevant details including: the ID number, the casing diameter the casing depth, the well total depth, pump capacity, drilling date, and status. In Part 2, Existing Wellfield Water Quality, a paragraph description provides an overview of the water quality followed by a table providing chloride levels measured at specific well sites from 2015 through 2019. Lastly, Figure 2-1 Primary Water Components, graphically depicts the locations of the wells relative to major roadways.

Excerpts from *Western Service Area Master Plan Update* (February 2020) completed by Mead & Hunt

# Existing Raw Water Infrastructure

### 1) Existing Wellfield Summary

The City provides potable water service to residential, retail, and commercial customers throughout their service area. The City currently has approximately 56,000 potable water customers. The City currently obtains its water supply to serve these customers from four (4) separate wellfields. The wellfield names are as follows: Division, SR40, Hudson, and Rima Ridge. Within these four wellfields, there are currently 33 active primary and secondary groundwater production wells drilled into the upper producing zones of the Floridan aquifer. Additionally, the City owns and operates three wells in the Breakaway (BAT) Trails wellfield region, but these BAT wells are currently only being utilized for reclaimed augmentation purposes. ***Table 2-1*** below summarizes current information regarding all of the City's wellfields with their corresponding capacities. Three new wells were "proposed" for construction within the Hudson wellfield in the 2015 Master Plan and are included within ***Table 2-1.***

*Table 2-1: Existing Wellfield Summary*

| Wellfield | Ormond Well ID | SJRWMD Well ID | Casing Diam. (IN) | Cased Depth (FT) | Total Depth (FT) | Pump Capacity (GPM) | Drill Date | Status |

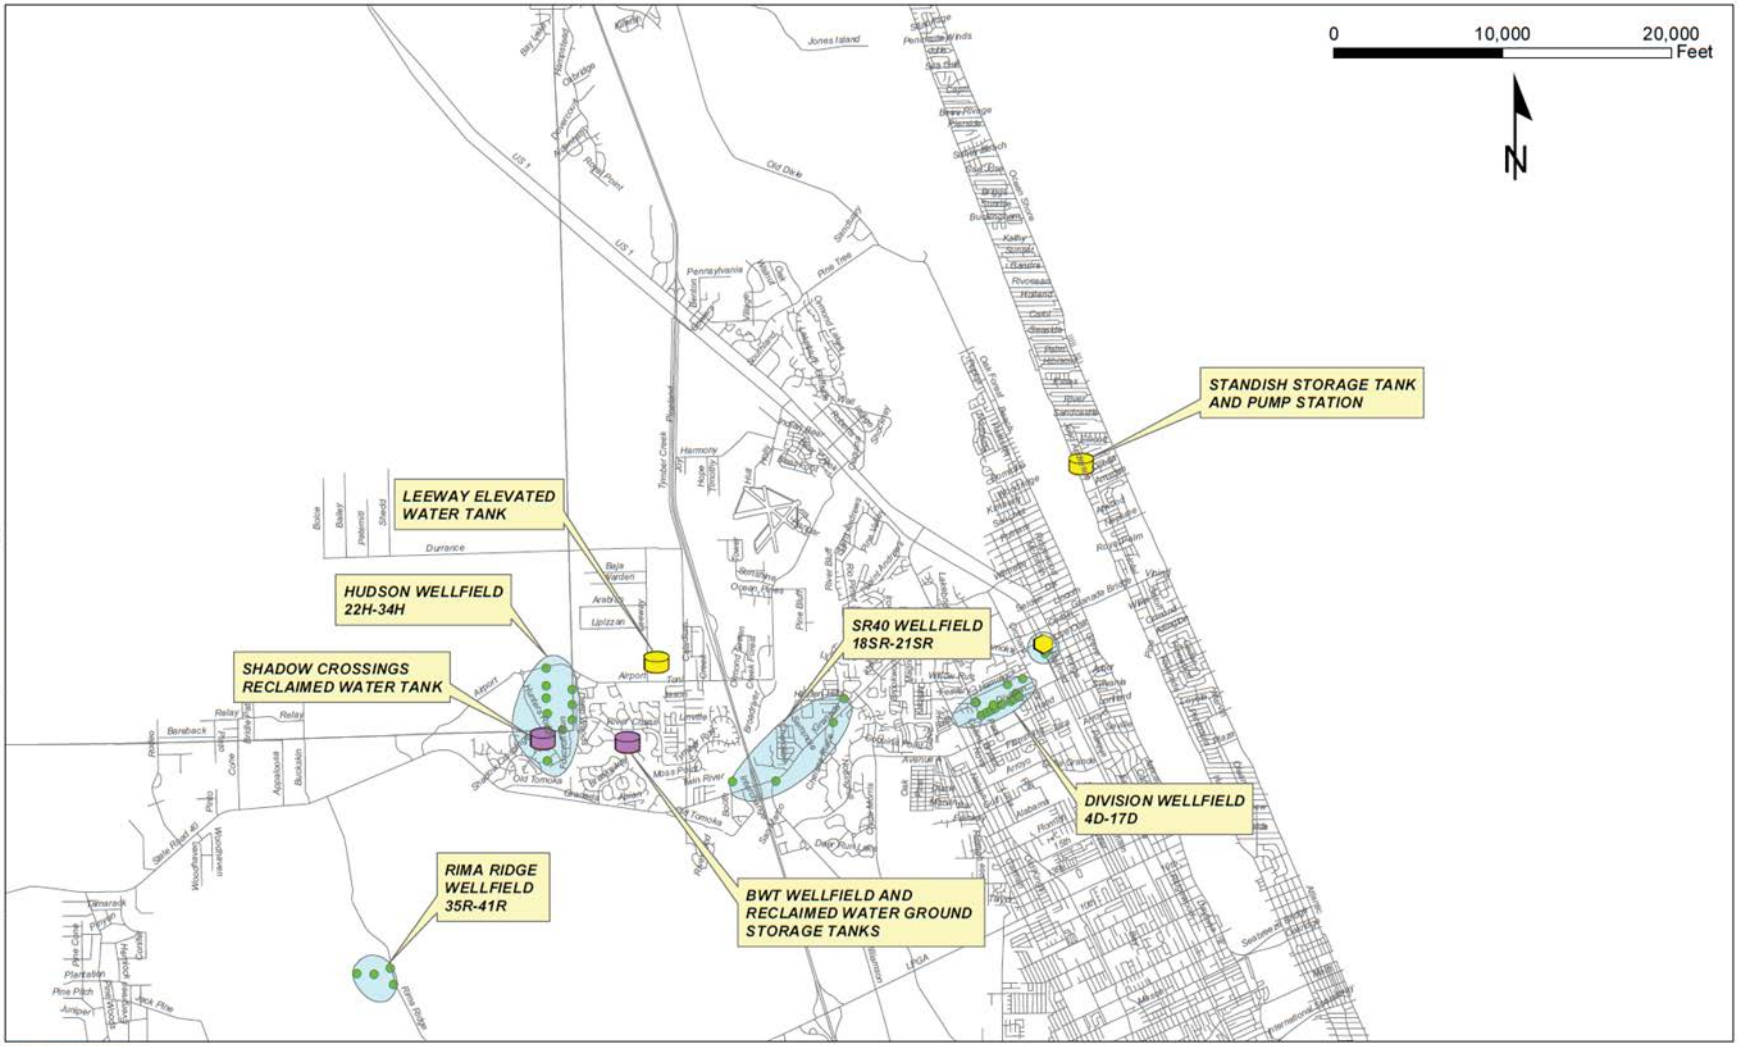
| **Rima Ridge** | 36R/51 | 17245 | 10 | 124 | 300 | 500 | 1987 | Active |
| **Rima Ridge** | 37R/52 | 17246 | 10 | 120 | 300 | 500 | 1994 | Active |
| **Rima Ridge** | 38R/53 | 17247 | 10 | 120 | 300 | 500 | 1994 | Active |
| **Rima Ridge** | 39R/54 | 34010 | 12 | 120 | 300 | 500 | 2010 | Active |
| **Rima Ridge** | 40R/55 | 34011 | 12 | 112 | 300 | 500 | 2010 | Active |
| **Rima Ridge** | 41R/56 | 34012 | 12 | 120 | 300 | 1000 | 2010 | Active |
| **Rima Ridge WF Total GPM** | | | | | | **4,000** | | |
| **Breakaway Trail (Irrigation)** | 2 Breakaway | 17799 | 8 | 100 | 260 | 215 | 1985 | Active |
| **Breakaway Trail (Irrigation)** | 3 Breakaway | 17800 | 8 | 100 | 260 | 260 | 1985 | Active |
| **Breakaway Trail (Irrigation)** | 4 Breakaway | 17801 | 8 | 100 | 260 | 225 | 1985 | Active |
| **Breakaway Trail Total GPM** | | | | | | **700** | | |
| **Maximum Production GPM (All Wellfields)** | | | | | | **9,692** | | |

Utilizing the maximum production GPM value calculated within ***Table 2-1***, the City can theoretically withdrawal 9,692 GPM from the upper Floridan aquifer in its current condition. This flow rate translates to 13.9 million gallons per day (MGD). Removing the BAT reclaimed augmentations wells from the equation, however, results in a theoretical maximum production value of 8,992 GPM or roughly 12.9 MGD. This 12.9 MGD value is the City's current maximum production capability as of 2019. ***Figure 2-1*** shows the geographic location of all wells throughout the City's service area.



### 2) Existing Wellfield Water Quality

The primary water quality concern for the City's existing wellfields are chloride levels. ***Table 2-2*** summarizes the overall chloride levels for the Division and SR40 wellfields from 2015 to the middle of 2019. The Hudson, Rima Ridge, and BAT wellfields are not required to have their chlorides documented and recorded at this time. Typical chloride levels are a concern and considered elevated when they exceed 250 mg/L. As such, wells numbered 4D, 5D, 6D, 8D, and 16D all have experienced 'high' levels of chlorides within the past few years. Having chloride levels that exceed 250 mg/L is not a critical concern due to the City having a reverse osmosis membrane water treatment plant, but high chloride levels typically increase overall treatment, operating, and maintenance costs. As such, the City should moderate usage of the aforementioned wells that have experienced high chlorides levels to the maximum extent allowable within their CUP limits.

Wells numbered 18SR and 20SR are noted as being offline and in need of repairs or relocation. The City should plan to reestablish these wells in the near future. Having these wells back online would aid the City with raw water supply capacity, wellfield rotation, and would likely help in lowering the measured chloride levels.

*Table 2-2: Existing Wellfield Chloride Levels*

| Well ID | 2019 Chloride Average (mg/L) | 2018 Chloride Average (mg/L) | 2017 Chloride Average (mg/L) | 2016 Chloride Average (mg/L) | 2015 Chloride Average (mg/L) |
|---|---|---|---|---|---|

CITY OF ORMOND BEACH
WESTERN SERVICE AREA
MASTER PLAN UPDATE
Figure 2-1 PRIMARY WATER COMPONENTS

Mead & Hunt

These documents shall not be used for any purpose or project for which it is not intended. Mead & Hunt shall be indemnified by the client and held harmless from all claims, damages, liabilities, losses, and expenses, including attorneys' fees and costs, arising out of such reuses or reuses of the documents. Any other use or reuse by owner or by others will be at owner's sole risk and without liability or legal exposure to Mead & Hunt. In addition, unauthorized reproduction of these documents, in part or as a whole, is prohibited.

## II. SCOPE OF SERVICES

The work shall be performed on an "as needed basis" for the Utilities Division of the Public Works Department. Awarded firms will be responsible for services as described below, consisting of Initial Well Assessments, Rehabilitation and Repair Services, Emergency Services, and General Services. Completion of a separate FEE SCHEDULE with Tasks 1 through 3 (included with these documents) is a required submittal of the bid proposal.

1. Initial Well Assessment (Task 1 of the FEE SCHEDULE)

The Contractor shall be responsible to conduct an initial assessment of each well as assigned by an authorized City representative. Each assessment shall consist of a physical inspection of each well to include as follows:

a. Remove & store motor, pump, column and all related appurtenances.
b. Perform a diagnostic evaluation of the condition and functionality of mechanical components.
c. Perform video logging during the assessment phase of services on a case by case basis as directed by authorized City representative. Fee for logging services will be negotiated on a case by case basis, and added to the Lump Sum Assessment fee.
d. Prepare and submit a written Well Inspection Report to the authorized City representative (see Sample Well Inspection Report). The report shall contain the following information:
    i. List of well defects
    ii. Proposed corrective action plan for repair/rehabilitation of the well to optimum operational performance.
    iii. Not-to-Exceed Time & Material cost estimate (in accordance with approved Fee Schedule) and schedule (# of days) to complete the repair/rehabilitation.
    iv. Copies of all supporting documentation i.e. photographs, test results, etc. shall be submitted as supporting documentation of the initial assessment.

Well Inspection Report Review and Approval - Each Well Inspection Report shall be reviewed by an authorized City representative. Implementation of a corrective action plan approved by the City shall be authorized in the form of a written Contract Task Order ***prior*** to any repair/rehabilitation work being performed. Upon receipt of a fully executed Task Order, the Contractor shall proceed with implementation of the scope of work of corrective action plan.

Well Inspections Reports not approved by an authorized Ormond Beach representative shall be returned to the Contractor with comments/suggestions and the corrective action plan shall be revised and re-submitted along with any revised cost estimate and schedule by the Contractor to the City until a plan is agreed to by all parties and a Task Order is issued to authorize the work. Upon receipt of a fully executed Task Order, the Contractor shall proceed with implementation of the scope of work of corrective action plan.

Payment Method - The Contractor shall be paid a Lump Sum fee for the Initial Assessment Report upon completion of the assessment and submission of a comprehensive Well Inspection Report in accordance with the approval Fee Schedule for each Initial Well Assessment conducted.

2. Rehabilitation/Repair Services (Task 2 of the FEE SCHEDULE)

The Contractor shall be responsible to provide all labor, materials, equipment and any other items necessary to:

a. Rehabilitate/repair each well in accordance with a City approved corrective action plan authorized in writing by a fully executed Contract Task Order.
b. Provide 48 hour notification to the City prior to completion of the work for the purpose of scheduling inspection and verification of the rehabilitation work.
c. Upon inspection of the work the Contractor shall be required to provide performance testing as directed by the City.
d. Well Development services may be required by the City on a case by case basis.

Payment Method – The Contractor shall be paid on a Time & Material Not-To-Exceed basis in accordance with the Fee Schedule rates approved at the time of contract signature and cost estimate submitted and approved with the corrective action plan.

3. Emergency Services (Task 3 of the FEE SCHEDULE)

From time to time the City may experience emergency situations with potable water wells. This contract shall include emergency response and repairs as situations occur.

a. Mobilization - The Contractor shall be required to have the capability to mobilize and assess emergency situations within 24 hours of initial contact from an authorized City representative.
b. Assessment and Approval - The Contractor shall provide a written assessment of the emergency condition along with a corrective action plan including a cost proposal and schedule for the necessary repairs to the City for review and approval. Upon approval by the City an emergency Task Order will be issued authorizing implementation of the repairs.
c. Implementation of Repairs - The contractor shall provide all labor, materials, equipment and any other items needed to make all necessary repairs approved by the City to return the well and/or well pumping appurtenances to a fully functional and operating condition.

Payment Method – The Contractor shall be paid a Lump Sum Fee for Emergency Mobilization and Emergency Assessment. The Contractor shall be paid on a Time & Material Not-To-Exceed basis for repairs performed under Emergency Services in accordance with the Fee Schedule rates effective at the time of the needed services and cost estimate submitted and approved with the corrective action plan.

4. General Services (To be included as part of the FEE SCHEDULE in Task 1)

The following general services shall be provided by the Contractor prior to placing the well into service, following the final evaluation or rehab/repair task:

a. Well Disinfection: Contractor shall properly disinfect the well per AWWA standards, and receive proper bacteriological clearance prior to placing any well back in service. Bacteriological sampling and analysis will be provided by the City at no cost to the Contractor. In the event where bacteriological samples fail, the Contractor shall re-perform disinfection procedures at no additional cost until bacteriological samples pass.

b. Site Restoration: Contractor shall restore job site to original or better condition following completion of evaluation and/or rehab/repair work. It is strongly recommended that the Contractor document the pre-existing condition of the work area with photographs or video prior to mobilizing equipment or materials. Site Restoration shall include, but is not limited to, repair of damaged site features or structures (i.e. grading, seed/sod, structural, piping, electrical), and removal of construction debris generated during the course of work.

Payment Method – The above noted general services shall be included in the lump sum price for Initial Assessment services (in Task 1 above)

5. Additional Requirements

Successful firms shall comply with all safety standards and regulations as required by the City of Ormond Beach, OSHA and any other local, state or federal regulations that may be applicable to a particular project. The Contractor shall be required to complete and submit a Certificate of Compliance with the Florida Trench Safety Act.

All workmanship shall be warranted for a period of one (1) year upon acceptance of the work by the City. All materials and/or equipment installed during the performance of the services shall be warranted for the manufacturers stated warranty and the Contractor shall be responsible for any associated labor required to repair and/or replace warranted materials and/or equipment that is not covered under the manufacturer's warranty.

Upon completion of the work the Contractor shall be required to submit a comprehensive written summary of all work performed.

6. Additional Services

In the event that additions or changes to the scope, cost or schedule of an approved Task Order change during the performance of the work, a change order to the Task Order authorizing the work shall be issued. Within seven (7) working days of identifying variances the Contractor shall prepare and submit a written proposal to the authorized City representative for review and approval. The proposal shall include a clear and comprehensive explanation and adequate documentation of any changes. All changes must be approved by the authorized City representative prior to any work being performed. Any work performed by the Contractor without written authorization in the form of a fully executed change order is done so at the Contractor's own risk.

7. Contract Exclusions

This contract does not include new well construction.

## III. TERM OF AGREEMENT

The initial term of this agreement shall be for a period of three (3) years and will be automatically renewed for two (2) additional one (1) year periods thereafter unless either party provides at least ninety (90) days prior written notice to the other party of their intent not to renew the agreement. The contract duration shall not exceed five (5) years. All terms and conditions shall remain firm for the initial three (3) year period and any optional renewal period of this contract based on contractor's acceptance, level of performance and approved funding.

## IV. PROPOSAL COMPONENTS

Submittals will not be evaluated on the aesthetics of the package. Non-recyclable materials are discouraged. Points may be deducted for Responses that exceed seventy-five (75) pages.

The proposal shall include the following:

a. Title Page: Title page marked, "**WATER WELL ASSESSMENT AND REHABILITATION SERVICES**", the firm's name; the name, address and telephone number of a contact person; and the date of the proposal.

b. Table of Contents: Include a clear identification of the material included in the proposal by page number.

c. Standard General Requirements: Include Proposer's name and principal address; contact person's name and title; telephone and fax number; FEIN; number of years organization has been in business; number of years your firm has been in business under your present business name; number of years your firm has been in business in work specific to this RFP; names and titles of all officers, partners or individuals doing business under trade name; statement of whether your firm has ever failed to complete work awarded to you; list all claims, arbitrations, administrative hearings and lawsuits brought by or against the Proposer or its predecessor organization(s) during the last five (5) years; list and describe all criminal proceedings or hearings concerning business related offenses in which the Proposer, its principals or officers or predecessor organization(s) were defendants; state whether the Proposer, its principals, officers or predecessor organization(s) have been CONVICTED of a Public Entity Crime, debarred or suspended from bidding by any government entity.

d. Transmittal Letter: A signed letter of transmittal briefly stating the proposer's understanding of the work to be done, the commitment to perform the work within the time period, a statement why the firm believes itself to be best

qualified to perform the engagement and a statement that the proposal is a firm and irrevocable offer for the engagement period. The transmittal letter shall have an original signature of an authorized official of the firm who has been designated to submit the proposal on behalf of the firm.

e. Technical Qualifications of Firm: Provide a description and overview of firm, including the size, range of activities, licenses, certifications etc. Detail expertise in, and experience with water well assessment, rehabilitation and repair of water well pumping systems of similar size and pumping capabilities. Identify any subcontractors(s) that will be involved if work not performed in house, including address and a description of qualifications.

f. Technical Qualifications of the Project Team: Identify the primary individuals (Project Team) who will be responsible for supervising, managing and executing the work for this Contract. Include their years of experience as well as the number of years with the company. List all certifications appropriate to the work (Limit response to two pages maximum per person).

g. References: Using the "List of References" sheet supplied herewith, provide list of six (6) utility clients for whom work has been performed within the past 5 years. Be sure to include:
   i. Entity/Client
   ii. Location
   iii. Year Completed
   iv. Client contact name, Phone and Email
   v. Types of equipment serviced

h. Responsiveness: Describe your approach to timely completion of work and provide general turnaround times.

i. Location: Provide shop location(s) where the bulk of work will occur and indicate which member of the Project Team primarily works from each. Provide information on alternate or backup facilities, if available. Points shall be awarded as follows: Within 25 miles of Ormond Beach City Hall (20 points), Within 50 miles of Ormond Beach City Hall (15 points), Within 100 miles of Ormond Beach City Hall (10 points), Beyond 100 miles of Ormond Beach City Hall (5 points)

j. Pricing: Provide not to exceed pricing using the FEE SCHEDULE (provided within this contract document).

k. Completeness: Submission of all information, as required, and evaluation to verify that the information supplied in the proposal is accurate and thorough. Bidder may choose to supply additional relevant information not specifically requested.

## V. PROPOSAL SUBMITTAL

Please check the contents of your RFP package carefully to ensure that you have in your possession all the necessary documents, as referenced within this RFP, including any addenda. If you are missing any items, please contact the City's Purchasing Coordinator at 386-676-3223, or by e-mail at: rob.hart@ormondbeach.org.

Submission of a proposal pursuant to this RFP shall constitute acknowledgement and acceptance of the terms and conditions set forth herein. Portions of this RFP and the contents of the proposal submitted by the successful proposer may become contractual obligations if an Agreement is awarded. Failure of the successful proposer to accept these obligations may result in cancellation of the award of contract.

The City reserves the right to withdraw this RFP at any time without prior notice. All proposals submitted in response to this RFP become the property of the City of Ormond Beach.

Deadline for Submission: To be considered, proposals must be received no later than 2:00 p.m., August 27, 2025.

Inquiries: Technical questions may arise as firms are preparing their proposals. The City will accept written inquiries regarding this RFP until August 18th at 4:00 PM. Questions received after that time will not be responded to. Answers to questions that warrant attention of all the potential proposers will be distributed in the form of an addendum. Please direct written inquiries to:

Rob Hart
City of Ormond Beach
22 South Beach Street, Room 102
Ormond Beach, Florida 32174
Telephone: (386) 676-3223
FAX: (386) 676-3374
rob.hart@ormondbeach.org

Signature Requirements: Proposals must be signed by a duly authorized official(s) of the proposing firm. Consortiums, joint ventures, or teams submitting proposals, although permitted and encouraged, will not be considered responsive unless it is established that all contractual responsibility rests solely with one firm or legal entity which shall not be a subsidiary or affiliate with limited resources. Each proposal shall indicate the entity responsible for execution on behalf of the proposal team.

Proposal Delivery: You must submit one (1) unbound original plus one (1) electronic copy on compact disk (CD) or flash drive of the proposal no later than the date and time specified above. Submit proposals to: Rob Hart, Purchasing Coordinator, at City Hall down stairs in Room 102, 22 South Beach Street, Ormond Beach, FL 32174. The RFP

title and number shall be plainly marked on the outside of the delivery envelope or package. It is solely the responsibility of the submitter to ensure that the Proposal is delivered on or before the specified date and time. Late proposals will not be accepted.

Addenda and Supplements to the Request for Proposals (RFP): In the event that it becomes necessary to revise any part of this RFP, or if additional information is necessary to enable the proposing firm to make an adequate interpretation of the provisions of this RFP, a supplement to the RFP will be provided to each firm that has requested a copy of this document.

Rejection Rights: The City of Ormond Beach reserves the right, at any time, to modify, waive or otherwise vary the terms and conditions of this RFP including, but not limited to, the deadlines for submission and submission requirements. The City further reserves the right to reject any or all submittals, to cancel or withdraw this RFP at any time and to negotiate with any party prior to or after submittal of proposals. Selection is also dependent upon the negotiation of a mutually acceptable contract with the successful proposers.

Cost of Proposal Preparation: No reimbursement will be made by the City of Ormond Beach for any costs incurred in the preparation of the proposal or presentation.

Proposals to be in Effect: Each proposal shall state that it is valid for a period of not less than 90 days from date of receipt.

## VI. EVALUATION PROCESS AND CRITERIA

The City of Ormond Beach will conduct an evaluation of all proposals, submitted by the deadline, to determine compliance with proposal requirements and mandatory document submissions. The committee will consist of three individuals from the Utility Department. The committee will evaluate proposals and select the Proposer that meets the best interests of the City, and will make a recommendation of Award of Contract to the City Commission.

**The City reserves the following rights:**

- Modify, extend, or cancel this RFP at any time to obtain additional proposals or for any other reason the City determines to be in its best interest;

- Issue a new RFP with terms and conditions that are the same, similar or substantially different as those set forth in this or a previous RFP in order to obtain additional proposals or for any other reason the City determines to be in its best interest;

- Conduct pre-award discussion and/or pre-award negotiations with any or all responsive and responsible proposer(s) who submit proposals determined to be

reasonably acceptable of being selected for award; and, conduct personal interviews or require presentations of any or all proposer(s) prior to selection.

- Request that proposer(s) furnish additional information as the City may reasonably require.

- Accept or reject qualifications or proposals in part or whole, and/or waive any defect or deficiency in any proposal, if in the City's sole judgment, the defect or deficiency is not material in response to this RFP;

- Limit and/or determine the actual contract services to be included in a contract.

- Engage outside experts to assist staff in evaluating the merits and viability of each proposer.

- Obtain information for use in evaluating submittals from any source.

- Verify the information received in the proposal. If a proposer knowingly and willfully submits false information or data, the City of Ormond Beach reserves the right to reject that proposal. If it is determined that an Agreement was awarded as a result of false statements or other data submitted in response to this RFP, the City of Ormond Beach reserves the right to terminate the Agreement.

The City shall be the sole judge of the proposer's qualifications.

**Evaluation Criteria:**

For the purposes of further evaluation, the responsive proposals will be evaluated on, but shall not be limited to, consideration of the following criteria:

| EVALUATION CRITERIA | MAXIMUM POSSIBLE POINTS |
|---|---|
| Technical Qualifications | 20 |
| Experience | 20 |
| Capability & Past Performance | 20 |
| Location | 20 |
| Pricing | 20 |
| **TOTAL** | 100 |

Responsive proposals will be ranked in each of the criteria

# REGISTRATION AND INSURANCE REQUIREMENTS FOR VENDOR/CONTRACTOR WORKING ON CITY PROJECTS

## Registration Requirements

VENDORS doing business within the City Limits must be registered with the City.

Requirements for registering a business are as follows:
Copy of City Business Tax Receipt (where your business is located).
Certificate of Insurance showing General Liability and Workers' Comp (or State Workers' Comp Exemption form).

Application Fee: $25.00 For more information, contact the City's Business Tax Receipt official at 386-676-3233 or btonline@ormondbeach.org You can apply online here: https://ormondbeachfl-energovweb.tylerhost.net/apps/selfservice#/home

## State Certified/Registered Contractors

All registered State contractors must be registered with Volusia County. Volusia County Contractor Licensing, 123 W. Indiana Ave., Rm 203, Deland, Fl. 32720 (386) 736-5957 contractorlicensing@volusia.org
https://connectlivepermits.org/citizenportal/app/landing

State certified contractors have the option of registering with Volusia County, or providing information directly to the business tax receipt official, to include copy of State license, certificate of insurance and copy of local business tax receipt. This information is provided with the permit application.

If you have any questions regarding the above requirements, please contact the business tax receipt official at (386) 676-3233 or btonline@ormondbeach.org

## EXHIBIT A
## Risk Management and Insurance Requirements

### A. Payment and Performance Bonds

**1.** Except as otherwise provided herein, the Contractor shall, prior to beginning performance, deliver to the City, and the City shall record in the public records of Volusia County, Florida, the Contractor's Payment and Performance Bond in an amount equal to the full amount of the Contract.

**2.** **(a)** Payment and Performance Bonds shall not be required for any contract except those which are for the construction of a public building, for the prosecution and completion of a public work (as described in Section 180.06, **Florida Statutes,** as amended from time to time) or for repairs upon a public building or public work (as described in Section 180.06, **Florida Statutes**, as amended from time to time).

**(b)** With respect to those Contracts for which Payment and Performance Bonds are otherwise required:

**i.** Unless the City Manager, or his designee, determines such Bond to be necessary to protect the interests of the City, no Contractor shall be required to provide a Payment and Performance Bond for any Contract which is for $25,000.00 or less.

**ii.** Upon the request of the contractor, good cause shown by the Contractor, and a determination that the public health, safety and welfare will be sufficiently protected, the City Commission may exempt the contractor from the requirement of providing a Payment and Performance Bond for any Contract which is for more than $25,000.00 but is less than $200,000.00.

**3.** The Payment and Performance Bond shall list the Contractor as Principal and be issued by a surety insurer authorized to do business in Florida as a surety and listed as an acceptable surety in the Federal Register.

**4.** The Payment and Performance Bond shall be executed pursuant to Section 255.05, **Florida Statutes**, and be in a form substantially similar to the form set forth in Section 255.05(3), **Florida Statutes**.

**5.** The Payment and Performance Bond shall specifically provide coverage for delay damages due to a default by the Contractor.

**6.** The Payment and Performance Bond shall not make the Contract part of the Bond agreement.

**7.** In lieu of the Payment and Performance Bond, the Contractor may file with the Finance Director of the City, in an amount equal to the full amount of the Contract, cash, a money order, a certified check, a cashier's check, an irrevocable letter of credit, or a security of a type listed in Part II, Chapter 625, **Florida Statutes**.

**8.** In the event the surety on any Payment and Performance Bond furnished by the Contractor is declared bankrupt or becomes insolvent, or its right to do business in the State of Florida is terminated, the Contractor shall, within five (5) working days thereafter, substitute another Payment and Performance Bond and surety acceptable to the City.

**9.** The Contractor is totally and solely responsible for keeping its surety informed as to the Base Contract Price as bid, significant changes in the Project Scope, and the overall progress and completion of the Project for the entire life of the Contract.

**10.** The payment and performance bond requirements stated herein above shall not be applicable to service-related contracts unless otherwise determined by the City Manager in order to protect the health, safety and welfare of the general public.

## B. Contractual Provisions Relative to Risk Management

All contracts for any public works to be performed, and service-related contracts, for or on behalf of the City shall include at a minimum, the following, or substantially similar, provisions:

### 1. Hold Harmless and Indemnity

The Contractor agrees to assume liability for and indemnify, hold harmless, and defend the City, its commissioners, mayor, officers, employees, agents, and attorneys of, from, and against all liability and expense, including reasonable attorney’s fees, in connection with any and all claims, demands, damages, actions, causes of action, and suits in equity of whatever kind or nature, including claims for personal injury, property damage, equitable relief, or loss of use, to the extent caused by the negligence, recklessness, or intentionally wrongful conduct of the Contractor, its agents, officers, contractors, subcontractors, employees, or anyone else employed or utilized by the Contractor in the performance of this Contract. The Contractor’s liability hereunder shall include all attorney’s fees and costs incurred by the City in the enforcement of this provision.

**2. Payment on Behalf of City**

The Contractor shall pay all costs of the City's legal defense, as may be selected by the City, for all claims described in the Hold Harmless paragraph. Such payment on behalf of the City shall be in addition to any and all other legal remedies available to the City and shall not be considered to be the City's exclusive remedy.

**3. Loss Control/Safety**

Precaution shall be exercised at all times by the Contractor for the protection of all persons, including employees and property. The Contractor shall comply with all applicable laws, regulations and ordinances related to safety and health, shall make special efforts to detect hazardous conditions, and shall take prompt action when loss control/safety measures are reasonably necessary. The City may order work to be stopped if conditions exist that present an immediate danger to persons or property. The Contractor acknowledges that such work stoppage will not shift responsibility for any damages from the Contractor to the City.

**4. Service Bond**

For Service-related contracts only, the City may require the Contractor to secure a service bond with a minimum $25,000 coverage limit for the period of the service agreement. The service bond covers dishonest acts of the contractor’s employees against the City. A copy of the bond shall be provided to the City when the agreement commences. Service-related contracts include and are not limited to businesses providing janitorial, pest control, general repair, security, carpet cleaning, locksmith, temporary employment, painting, moving services or other contracts as determined in the discretion of the Risk Manager as necessary to minimize loss.

## C. Contractor's Insurance

**1. General**

The Contractor, including service-related contractors, shall purchase and maintain for the entire life of the Project, including any and all approved time extensions, until its final acceptance by the City, such insurance as will protect the Contractor from claims under Workers' Compensation, disability benefit laws or other similar employee benefit laws; from claims for damages because of bodily injury, occupational sickness or disease, or death of Contractor’s employees; from claims insured by usual or unusual injury liability coverage; from claims or injury to or destruction of tangible property and from claims insured by usual Commercial General Liability coverage. This includes loss of use resulting therefrom, any or all of which may arise out of the Contractor's operations under the Contract Documents, whether such operations be by the Contractor, by any Subcontractor,

or by anyone directly or indirectly employed by any of them or for whose acts any of them may be legally liable. The Contractor's deductibles/self-insured retentions shall be disclosed to the City and may be disapproved by the City, and may be reduced or eliminated at the sole discretion of the City. The Contractor is responsible for the amount of any deductible or self-insured retention.

**2. Types of Insurance and Limits of Liability**

The insurance required herein shall be written for not less than any limits of liability specified and incorporated as part of the Contract Documents or as required by law, whichever is greater, and shall include and not limited to the following:

**(a)** Workers' Compensation Insurance in statutory limits for the State of Florida with Coverage B - Employer's Liability limits of not less than:

$100,000 Each Accident Bodily Injury by Accident
$100,000 Each Employee Bodily Injury by Disease
$500,000 Policy Limit Bodily Injury by Disease

Certificate of Exemptions. If the contractor has a State-issued Certificate of Exemption, the contractor may provide a copy in place of the requirement for coverage. However, if the contractor subcontracts or retains any other person or entity to perform under the contract, that person or entity must provide proof of workers' compensation insurance as required by law or provide a Certificate of Exemption.

It is the intent of the City that any individual who either contracts directly with the city or performs any work on behalf of any such contractor be covered by workers' compensation insurance or have a valid exemption from said coverage.

(If applicable to the Project, the policy must include benefits under the United States Longshoremen's and Harbor Workers' Act and the Jones Act coverage--all maritime coverage.)

**(b)** Commercial General Liability Insurance shall be written on a coverage form as broad as Insurance Services Office (ISO) Form CG 00 01 11 85, or its successor form, including but not limited to the following coverage (any deviation shall be noted on the Certificates of Insurance):

a. Premises, Operations, Products and Completed Operations
b. Owners' & Contractors' Protective
c. Products & Completed Operation
d. Explosion, Collapse & Underground Conditions

e. Blanket Contractual Liability
f. Personal Injury Liability
g. Broad Form Property Damage Endorsement, including Completed Operations
h. Independent Contractors
i. Watercraft--Owned and Non-Owned (if applicable, endorsement must be included in General Liability policy or a separate Protection & Indemnity Policy must be written)
j. Pollution Liability (if applicable)
k. Asbestos Abatement (if applicable)
l. Fire Damage Liability

Certain coverage outlined above may not be required if they do not relate to the Project, as may be determined at the sole discretion of the City.

Commercial General Liability Coverage shall be written on an occurrence basis and the limits shall be no less and not limited to the following amounts:

Limits (not less than)

$1 Million Each Occurrence
$2 Million General Aggregate
$1 Million Aggregate Products & Completed Operations

NOTE: Commercial General Liability Coverage must be purchased on either a project basis (separate policy per contract) or an endorsement allocating an aggregate limit per location or specified project.

**(c)** Automobile Liability Insurance is required if an Automobile(s) is used in the performance of the contract. ISO Symbol 1 (Any Auto), or alternatively a combination of Symbol 2 (Owned Autos), Symbol 8 (Hired Autos), and Symbol 9 (Non-Owned Autos), and limits shall be no less than:

| | |
|---|---|
| $1 Million | Combined Single Limit for Bodily Injury and Property Damage |

**(d)** Excess Liability

For contracts $250,000 or greater an Excess Liability Policy of at least but not limited to $1,000,000 in addition to the scheduled underlying policies for Commercial General Liability, Automobile Liability and Employers' Liability, the Contractor shall also provide an Excess Liability Policy with a maximum self-insured retention not to exceed $25,0000 per occurrence.

**(e)** Builder's Risk

Contractor shall purchase Builder's Risk Insurance for any contracts that are deemed to be vertical construction on an All-Risk policy, and shall also include coverage for wind, hail, and named storm. Limits of coverage shall be at least and not limited to the value of the project.

**(f)** Professional Liability, Malpractice and/or Errors and Omissions

The Contractor shall purchase and maintain professional liability, malpractice, or errors or omissions insurance with minimum limits of $1,000,000 per occurrence. If a claims made form of coverage is provided, the retroactive date of coverage shall be no later than the inception date of claims made coverage, unless the prior policy was extended indefinitely to cover prior acts. Coverage shall be extended beyond the policy year either by a supplemental extended reporting period (ERP) of as great a duration as is available, and with no less coverage and with reinstated aggregate limits, or by requiring that any new policy provides a retroactive date no later than the inception date of claims made coverage.

## D. Requirements for Certificates of Insurance

**1.** With the execution of the Contract Documents, the Contractor, including service related contractors, shall provide certificates of such insurance acceptable to the City. These certificates and insurance policies shall contain an endorsement that the coverage under the policies will not be canceled, non-renewed or materially changed until at least thirty (30) days' prior written notice of such cancellation, non-renewal or change (except for nonpayment of premium, which shall be ten (10) days) and a copy of the cancellation endorsement signed by an authorized representative of the insurer, be given to the City. The contractor shall be required to replace any expired or canceled policies in like amount and coverage to the satisfaction of the City. The Certificate of Insurance shall be the ACORD FORM 25-S (7/90), or its successor form, and shall be made a part of the Contract Documents.

**2.** New certificates of insurance shall be provided to the City at least fifteen (15) days prior to coverage renewals.

**3.** If requested by the City, the contractor shall immediately furnish complete copies of the Contractor's insurance policies, forms and endorsements.

**4.** For Commercial General Liability coverage the Contractor shall, at the option of the City, provide an indication of the amount of claims payments or reserves chargeable to the aggregate amount of liability coverage. If the

Commercial General Liability form of coverage includes an annual aggregate limitation on the amount of insurance provided, a separate project aggregate limit may be required by the City for the given contract.

**5.** If the Contractor fails to obtain and maintain for the life of the Project the insurance required hereby or to replace any such expired or canceled policy, the City may obtain and maintain such insurance with such company as it deems satisfactory. Any amounts expended by the City in payment of premiums for such insurance shall be deducted by the City form the amount due the Contractor for the work covered by the Contract.

## E. Policies of Insurance

**1.** Except as otherwise provided in this Exhibit, all insurance policies shall be issued by insurers licensed to do business in the State of Florida on an admitted basis or which is an eligible surplus lines insurer in the State of Florida, and any such insuring company is required to have a minimum financial rating of (A-), in the latest edition of “Best’s Key Rating Guide”, published by A. M. Best Co., Inc., or some similarly nationally recognized rating authority, including Standard and Poors and Demotech.

**2.** For Workers’ Compensation coverage only, self-insurance programs are acceptable with a minimum A- rated reinsurance carrier; written confirmation is required.

**3.** All policies of insurance or certificates thereof referred to in this Exhibit shall be deposited with the City Clerk.

**4.** The City shall be named an Additional Insured on General Liability including products and completed operations and Automobile Liability policies of insurance and certificates thereof.

## VERIFICATION OF EMPLOYMENT STATUS USING E-VERIFY SYSTEM

**1.** Undersigned firm warrants it **IS** currently registered with the U.S. Department of Homeland Security's E-Verify system, **and** is compliant with the requirements of Sections 448.09 and 448.095, *Florida Statutes*.

**2.** Undersigned firm warrants it **has not** had any contracts terminated as a result of violations of Sections 448.09 or 448.095, *Florida Statutes*, that prohibit it from contracting with a public agency.

**3.** Undersigned firm warrants that if it enters into an agreement with a subcontractor, an express provision shall be included in all of its subcontracts requiring subcontractors, who perform work or provide services pursuant to the contract, to use the E-Verify system to verify employment eligibility of all new employees hired by the subcontractor during the contract term.

**4.** Undersigned firm understands that any subcontractor must provide the contractor with an affidavit stating that the subcontractor does not employ, contract with, or subcontract with an unauthorized alien, and the contractor understands it shall maintain any such affidavits for the duration of the contract, and the contract with the subcontractor must be immediately terminated if the City has a good faith belief that the subcontractor knowingly violated Section 448.09 (1), *Florida Statutes*.

**5.** Undersigned firm understands that in the event the City has a good faith belief that the contractor has knowingly violated Section 448.09 (1), *Florida Statutes*, the City shall terminate the contract, and the contractor may not be awarded a public contract for a period of at least one (1) year after the date of termination. The contractor may be held liable for any additional costs incurred by the City as a result of termination of the contract.

## DRUG-FREE WORKPLACE CERTIFICATION

**IDENTICAL OR "TIE" SUBMITTALS**: Preference shall be given to businesses with drug-free workplace programs. Whenever two or more proposals which are equal in respect to price, quality, and service are received by the State or by any political subdivision for the procurement of commodities or contractual services, a bid received from a business that certifies that it has implemented a drug-free workplace program shall be given preference in the award process. Established procedures for processing tie bids will be followed if none of the tied vendors have a drug-free workplace program. In order to have a drug-free workplace program, a business shall:

1) Publish a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace and specifying the actions that will be taken against employees for violations of such prohibition.
2) Inform employees about the dangers of drug abuse in the workplace, the business's policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation, and employee assistance programs, and the penalties that may be imposed upon employees for drug abuse violation.
3) Give each employee that engages in providing the commodities or contractual services that are under bid a copy of the statement specified in subsection (1).
4) In the statement specified in subsection (1), notify the employees that, as a condition of working on the commodities or contractual services that are under bid, the employee will abide by the terms of the statement and will notify the employer of any conviction of, or plea of guilty or nolo contendere to, any violation of Chapter 893 or of any controlled substance law of the United States or any state, for a violation occurring in the workplace no later than five (5 ) calendar days after such conviction.
5) Impose sanctions on, or require the satisfactory participation in a drug abuse assistance or rehabilitation program if such is available in the employee's community, by any employee who is so convicted.
6) Make a good faith effort to continue to maintain a drug-free workplace through implementation of this section.

Summary

In 2021, the City issued an RFP to retain the services of a qualified firm to represent the City's interest in the state legislature. The firm Metz, Husband & Daughton, PA was selected. The services performed under the current contract expire in November 2025, and it is necessary to seek proposals as part of the City's competitive bidding process in anticipation of next year's legislative session in Tallahassee. The City seeks qualified proposals to provide the following services:

1. Review on a continuing basis all existing and proposed State of Florida policies, programs and legislation affecting the City. Identify those issues that may affect the City or its citizens, and regularly inform the City as to such matters, both orally and in writing. Provide legislative expertise and consulting services.
2. Review the legislative policy statements of other governments and lobbying groups for the purpose of identifying issues which may either positively or negatively affect the City.
3. Monitor, analyze and track authorizations and appropriation bills and recommend appropriate strategies.
4. Assist the City Commission, City Manager, and staff in the coordination and development of the City's legislative program. These issues may include: public safety, law enforcement, economic development, infrastructure improvements, telecommunications, transportation, environmental, water and sewer, coastal resiliency, revenue enhancement, mandates and other issues.
5. Monitor State of Florida legislative committee meetings, agency hearings and meetings prior to and during the regular and special legislative session(s) at which specific issues within the City's adopted legislative program are considered, as well as others that may arise that affect the City.

6. Facilitate meetings between and with state legislators and state agencies regarding the needs of the City of Ormond Beach.

During the next year, we anticipate many policy issues will dominate the legislative process. We also expect the selected firm will play a major role in facilitating economic development initiatives with the state legislature.

Financial Impact

The fee for services will be competitive and dependent on the proposal received. Funding for the program has been included in the FY 2025-26 Proposed Budget of the City Commission.

Citizen Impact

Legislative services are an important function as staff seek opportunities to influence the annual legislative process to supplement City revenue for water, sewer, recreational and economic development funding.

## GENERAL CONDITIONS

**PUBLIC ENTITY CRIMES**: A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a proposal on a contract to provide any goods or services to a public entity, may not submit a proposal on a contract with a public entity for the construction or repair of a public building or public work, may not submit Proposals on leases or real property to a public entity, may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with any public entity in excess of the threshold amount provided in Section 287.017, for CATEGORY TWO for a period of 36 months from the date of being placed on the convicted vendor list.

**DISCRIMINATION:** Pursuant to Section 287.134(2)(a), Florida Statutes, an entity or affiliate who has been placed on the discriminatory vendor list may not submit a bid or proposal on a contract to provide any goods or services to a public entity, may not submit a bid or proposal on a contract with a public entity for the construction or repair of a public building or public work, may not submit bid or proposal on leases of real property to a public entity, may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with any public entity.

**PUBLIC RECORDS/NON-CONFIDENTIALITY OF BIDS AND/OR PROPOSALS**. The City of Ormond Beach cannot and does not warrant the confidentiality of any information submitted in response to this solicitation. Florida law provides that municipal records shall at all times be open for personal inspection by any person, Section 119.01, F.S., The Public Records Law. Information and materials received by the City of Ormond Beach in connection with all Proposers' response shall be deemed to be public records subject to public inspection upon award, recommendation for award, or 30 days after bid opening, whichever occurs first. Section 119.071, F.S.

**DISTRIBUTION OF BIDS AND RFP'S**: The City uses the services of DemandStar (www.demandstar.com) to distribute its bids and RFP's on-line on the Internet. If you have received a copy of this RFP from any source other than DemandStar, please be aware that you may not have received the latest version of the RFP or any related addendums.

**SUBMISSION OF RESPONSES**: All Submittals shall be delivered in a sealed envelope. The Request for Proposals (RFP) number, title, and opening date shall be clearly displayed on the outside of the sealed envelope (and on the outside of any express shipping package). The delivery of said submittal to the Purchasing Office on or before the specified opening date and time is solely and strictly the responsibility of the Submitter. Any submittal received by the Purchasing Office after the specified date and time will not be accepted. Submittals must be presented on forms provided by the City. No other forms will be accepted. Responses submitted by telephone, fax or email will not be considered. No Submittal may be modified after opening. No Submittal may be withdrawn after opening for a period of ninety (90) days unless otherwise specified.

**EXECUTION OF SUBMITTAL:** Submittals must contain a manual signature of authorized representative in the space(s) provided. Submittals must be typed or printed in ink. Use of erasable ink is not permitted. All corrections made by Submitter to any Submittal entry must be initialed. The company name and Federal Employer Identification Number (F.E.I.N.) number shall appear in the space(s) provided.

**RFP OPENING**: Submittals shall be opened and the name of the submitters shall be read publicly. No discussion of the Submittals will occur at this time.

**SUBMITTAL TABULATION:** The RFP Tabulation will be posted on Demandstar (www.demandstar.com). Any submitter wishing to receive a paper copy of the tabulation is required to enclose a stamped, self-addressed envelope with their Submittal response.

**CLARIFICATION/CORRECTION OF RFP ENTRY:** The City of Ormond Beach reserves the right to allow for the clarification of questionable entries and for the correction of obvious mistakes.

**INTERPRETATION:** Any questions concerning conditions and specifications shall be directed to the Purchasing Coordinator. Those interpretations which may affect the eventual outcome of this Submittal will be furnished in writing to all prospective Submitters. No interpretation shall be considered binding unless provided in writing by the City of Ormond Beach.

**PROCUREMENT COMMUNICATION PROTOCOL:** To protect the integrity of the procurement process, respondents, suppliers, contractors, sub-contractors or person acting on behalf of any of the above are prohibited from all communications regarding the solicitation with City staff, City consultants, City legal counsel, City agents, or elected officials unless such communication is specifically authorized in the City's solicitation or addenda. Violation of this provision may be grounds for rejecting a response.

**MINORITY POLICIES:** The City of Ormond Beach, Florida, encourages the full participation of Disadvantaged and Women Business Enterprises (D&WBE) in the provision of goods and services.

**RESPONSIBILITY DETERMINATION:** Pursuant to the provisions of Florida Statutes Chapter 287.05701, the City does not request or consider a vendor's social, political, or ideological interests in making a responsibility determination.

**LICENSES AND PERMITS:** The Vendor/Contractor is responsible for obtaining all necessary permits and licenses to comply with all Federal, State, local laws, rules and regulations required to perform work in accordance with the specifications.

**ADDITIONAL TERMS AND CONDITIONS:** The City of Ormond Beach reserves the right to reject Submittals containing any additional terms or conditions not specifically requested in the original conditions and specifications.

**TAXES:** The City of Ormond Beach is exempt from Federal Excise Taxes and all sales taxes.

**SILENCE OF SPECIFICATIONS**: The apparent silence of any specification and any supplemental specifications as to any details or the omission from same of any detailed description concerning any point shall be regarded as meaning that only the best commercial practices are to prevail and that only materials of first quality and correct type, size, and design are to be used. All workmanship is to be first quality. All interpretations of the specifications shall be made upon the basis of this statement.

**ASSIGNMENT:** Any purchase order or contract issued pursuant to a Submittal and the monies which may become due hereunder are not assignable except with the prior written approval of the City Manager or City Commissioner, whichever authorized the purchase or Agreement.

**LIABILITY**: The Contractor shall hold and save the City of Ormond Beach, its officers, agents, and employees harmless against claims by third parties resulting from the Contractor's or supplier's breach of contract or negligence, including all attorney's fees and costs, and shall pay any and all damages, fees, and costs assessed on behalf of the City. The City expressly reserves all rights, privileges and benefits of sovereign immunity.

**PATENTS AND ROYALTIES**: The Contractor, without exception, shall indemnify and save harmless the City of Ormond Beach and its employees from liability of any kind, including cost and expenses for or on account of any copyrighted, patented, or unpatented invention, process, or article manufactured or used in the performance of the contract, including its use by the City of Ormond Beach. If the Contractor uses any design, device, or materials covered by letters, patent or copyright, it is mutually agreed and understood without exception that the Submittal prices shall include all royalties or cost arising from the use of such design, device, or materials in any way involved in the work.

**NON-APPROPRIATION OF FUNDS:** In the event sufficient budget funds are not available for a new fiscal period, the CITY shall notify the VENDOR/CONTRACTOR of such occurrence and the contract shall terminate on the last day of the current fiscal period, without any penalty or expense to the CITY of any kind whatsoever.

**AWARDS:** The CITY reserves the right, in its sole discretion, as the best interest of the CITY may require, to make award(s) by individual item, group of items, all or none, or a combination thereof; on a geographical basis and/or with one or more vendors, contractors, consultants or specialists; or to reject any and all Submittals or waive any minor irregularity or technicality in the Submittals received.

**OTHER AGENCIES:** All Bidder(s) awarded contracts from this bid or proposal may, permit any municipality or other government agency to participate in the contract under the same prices, terms, and conditions, if agreed to by both parties.

It is understood that at no time will any city, municipality, or other agency be obligated for placing an order for any other city, municipality, or agency: nor will any city, municipality, or agency be obligated for any bills incurred by any other city, municipality, or agency. Further, it is understood that each agency will issue its own purchase orders to the awarded bidder(s).

**COMPLIANCE WITH FLORIDA PUBLIC RECORDS LAW:**

Contractor expressly agrees that it shall comply with the public records law provided in Florida Statutes, Chapter 119, and specifically to:

(a) Keep and maintain public records required by the City to perform the contracted service.
(b) Upon request from the City Clerk, provide the City with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in Chapter 119, Florida Statutes, or as otherwise provided by law.
(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the contractor does not transfer the records to the City.
(d) Upon completion of the contract, transfer at no cost, to the City all public records in possession of the contractor or keep and maintain public records required by the City to perform the service. If the contractor transfers all public records to the City upon completion of the contract, the contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the contractor keeps and maintains public records upon the completion of the contract, the contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the City, upon request from the City Clerk, in a format that is compatible with the information technology systems of the City.
(e) Failure of the Contractor to comply with Public Records Law as provided by Florida Statutes, Chapter 119, shall subject the Contractor to penalties under Chapter 119.10 and subject this Agreement to termination for cause by the City.

**IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS CONTRACT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT:**

CITY CLERK
22 SOUTH BEACH STREET
ORMOND BEACH, FLORIDA 32174
(386)677-0311
CITYCLERK@ORMONDBEACH.ORG
or online at
https://www.ormondbeach.org/prr

Ref: Fla. Stat. §119.0701(2016)

**THE CITY OF ORMOND BEACH RESERVES THE RIGHT TO REJECT ANY OR ALL PROPOSALS, AND TO WAIVE INFORMALITIES AS MAY BE DEEMED TO BE IN THE BEST INTEREST OF THE CITY.**

## TERMS AND CONDITIONS

A. The City of Ormond Beach reserves the right without prejudice to reject any or all proposals, to request clarification of information submitted, and to request additional information of one or more proposers.

B. The City reserves the right to award the contract to the next most qualified firm if the successful firm fails to execute a contract within two weeks after the award of the contract by the City Commission.

C. In accordance with federal, State, and local regulations, the firm shall not discriminate under the contract against any person.

D. The firm shall not assign or transfer any interest in the contract without prior approval of the City Commission.

E. The City reserves the right to terminate the contract at any time due to the vendor's default under terms of agreement.

F. Submission of a proposal indicates acceptance by the firm of the conditions contained in this Request for Proposals unless clearly and specifically noted in the proposal submitted and confirmed in the contract between the City of Ormond Beach and the firm selected.

G. Submittals should include a copy of firm's insurance certificate, Conflict, Non-Conflict of Interest Statement/Litigation Statement, Drug Free Workplace Certificate and E-Verify Statement.

# Request for Proposals
# for State of Florida Legislative Lobbying Services
City of Ormond Beach RFP No. 2025-36

The purpose of this RFP is to solicit proposals to select an experienced and qualified law firm, governmental affairs consulting firm, business, individual and/or a combination thereof to provide the City of Ormond Beach with governmental representation before the executive and legislative branches of the State of Florida government.

The intent of the City is to select one (1) firm to provide the desired professional services

## A. QUALIFICATION AND EXPERIENCE

To be eligible to respond to the RFP, the Proposer must demonstrate that they or the principals assigned to this project has successfully performed services described in the Scope of Services of this RFP. Respondents not meeting minimum requirements will not be considered for evaluation by the committee.

1. Proposers must be able to provide a minimum of three (3) public sector clients for whom you have performed the indicated services, and have significant accomplishments in the areas of legislation and appropriations within the past three (3) years.

2. The selected Proposer should, at a minimum, possess:
   a) strong working knowledge of legislative, administrative, and regulatory processes at the state level;
   b) clear understanding of coastal communities, including specific knowledge of the City of Ormond Beach and the state of Florida programs administered by the City and a knowledge of the funding needs and policy issues important to the City;
   c) history of successful lobbying experience at the state level;
   d) clear strategy for representing the City at meetings with key legislators and members of the executive branch;
   e) ability to liaison with members of the House/Senate, state agencies, and the Governor's office;
   f) expertise to provide legal and legislative research upon request;
   g) resources to attend legislative and administrative hearings, monitor legislative and administrative developments, and report back to City staff;
   h) experience in identifying and securing various sources of state funding;
   i) experience in coordinating communications and meetings with House/Senate and the Administration;
   j) experience in working with Senate and House committees;
   k) resources to help facilitate meetings with and communications between committee leadership and senior staff;
   l) ability to provide timely notice of hearings.
   m) ability to provide written and verbal reports.

3. The selected Proposer should possess a substantial knowledge of past and existing economic development, commerce, and tourism issues including but not limited to:
   a) knowledge of governmental activities and legislative actions related to local, regional and statewide economic development issues (i.e. incentives, workforce development, business licenses, small business development, etc);
   b) experience in establishing relationships with key members of the legislature in leadership positions, senior staff, and key administration officials including the

Department of Business and Professional Regulation, Department of Economic Opportunity and Enterprise Florida.

c) experience identifying grant programs and successful experience securing funding from such grant programs that support local and regional economic development.

4. The selected Proposer should possess substantial knowledge of past and existing issues regarding Home Rule including, but not limited to:
    a) have comprehensive knowledge and experience regarding previous and current issues facing local units of government in Florida that affect the City's ability to govern itself;
    b) experience in establishing relationships with members of the legislature and coordinating visits and/or conference calls to review proposed legislation or ideas in order to make the City's position known.

## B. SCOPE OF SERVICES AND SPECIAL REQUIREMENTS

The City seeks qualified Proposer's to provide the following Services:

1. Review on a continuing basis all existing and proposed State of Florida policies, programs and legislation affecting the City. Identify those issues that may affect the City or its citizens, and regularly inform the City as to such matters, both orally and in writing. Provide legislative expertise and consulting services.

2. Review the legislative policy statements of other governments and lobbying groups for the purpose of identifying issues, which may either positively or negatively affect the City.

3. Monitor, analyze and track authorizations and appropriation bills and recommend appropriate strategies.

4. Assist the City Commission, City Manager, and staff in the coordination and development of the City's legislative program as well as facilitate for City officials and staff to participate in forming key legislation.

5. Coordinate visits between the City and elected representatives and key delegates in leadership positions in order to develop ongoing relationships and to discuss issues important to the City of Ormond Beach including but not limited to economic development and Home Rule.

6. Monitor State of Florida legislative committee meetings, agencies hearings and meetings prior to and during the regular and special legislative session(s) at which specific issues within the City's adopted legislative program are considered, as well as others that may arise that affect the City.

## C. RESPONSIBILITIES OF THE PROPOSER

The successful Proposer shall perform the scope of services as contained in the RFP specifications. This list of services shall not be deemed all-inclusive and may be changed from time to time as authorized by the City Manager.

## D. DELIVERABLES

Required reports may include but not necessarily be limited to, personal briefings and information bulletins pertinent to any legislations, rules, or regulations and other federal policies or programs that affect the City and its citizen either directly or indirectly.

1. During those months that legislature is in session a customized written summary report shall be submitted at the end of each week detailing legislative action during the week, status of legislative issues, anticipated legislation and committee meetings for the upcoming week, and suggested action plan that the City administrators or elected official may implement.

2. At the close of session a customized written report that summarizes the status of the City's legislative priorities shall be provided within one (1) week of the closing of the session and a more detailed final report written report on any specific legislation and new requirements affecting the City shall be provided within a reasonable time period, not to exceed thirty (30) days from the close of session.

3. During those months that legislature is not in session provide periodic written reports (at least monthly) on issues of interest or concern to the City. Such information may include, but not limited to action taken at interim committee meetings, rulemaking hearings, status of studies underway, and notice of legislation being proposed.

4. Over the course of each calendar year the selected proposer will coordinate a series of meetings between the City and key elected representatives and relevant State Agencies to discuss the City's projects, priorities, and to build relationships with the executive and legislative branch in Tallahassee.

## E. MANDATORY SUBMITTAL REQUIREMENTS

### 1. Proposers Experience, Qualifications and Past Performances

a) Provide a brief introduction narrative letter highlighting the qualifications of the firm including component firm(s), legal nature of organization and number of years in existence and primary markets served.
b) Describe the Proposer's past performance and experience in governmental representation and consulting. Discuss in detail the extent of the Proposer's lobbying experience, including the use of any sub consultants and their role in any engagement(s) of the Proposer.
c) Specifically address the areas listed in the Qualifications and Experience.
d) Provide a listing of three (3) comparable contracts (similar in the scope of services to those requested herein) which the Proposer has either ongoing or completed within the past three (3) years. Describe those projects performed by government client or similar size private entities. The listing should identify the following:
    - Client
    - Description of work
    - Total dollar value of the contract
    - Dates covering the term of the contract
    - Client contact person, phone number and email
    - Results of the project

### 2. Key Personnel and Subcontractors Performing Services

a) Provide an organization chart showing all key personnel, including their titles, to be assigned to this project. The chart must clearly identify the Proposer's employees and

those of the subcontractors or sub consultants and shall include the functions to be performed by the key personnel.

b) Describe the experience, qualifications and other critical information, including relevant experience on pervious similar projects, of all key personnel, including those of the subcontractor who will be assigned to the project.
c) Provide resumes and job descriptions and other detailed qualifications on all key personnel who will be assigned to this project.

**3. Proposed Approach to Providing the Services and Work Plan**

a) Confirm Proposer's ability to fulfill all elements of the Scope of Work
b) Describe the Proposer's methodology including specific policies, procedures or techniques to be used in performing the services described in the Scope of Work
c) Describe the Proposer's approach to the scheduling of work and prioritizing the City's request
d) Address Proposers ability and approach to complying with the reporting requirements in the Scope of Work. Describe the proposed report outline (i.e. sections, contents, etc.) and attach a sample report (if available)
e) Provide any information regarding the Proposer's general work plan which the Proposer deems relevant
f) Identify if the Proposer has taken any exception to the terms of this Solicitation. If so, indicate what alternative is being offered and the cost implications of the exception(s).

**4. Proposer's ability to assist in formulating and facilitating the City legislative agenda**

a) Provide information on Proposer's ability to understand, formulate, and facilitate the City of Ormond Beach's legislative priorities.
b) Describe how Proposer will assist the City officials in understanding the annual state legislative priorities and developing initiatives that will achieve the greatest success in Florida legislature and relevant state agencies.

**5, Fee Compensation / Expenses**

The proposed fees(s) shall detail all costs: i.e. travel and related incidental out of pocket expenses, lobbying registration, if applicable. Proposer shall not be reimbursed or otherwise paid for internal word processing, data processing or other services (i.e. local telephone serviced, copied, mail or postage services) that would reasonably be deemed the Proposers overhead expense. Proposers will be reimbursed on a quarterly basis as a flat fee, inclusive of all expenses. Price proposal shall be indicated as follows:

**COST TO THE CITY – Overall Contract:**

Annual FIRM, FIXED TOTAL COST NOT TO EXCEED $_____
(To be paid on a quarterly basis)

**EVALUATION / SELECTION PROCESS**

**Selection Process:**

A Selection Committee (The Committee) consisting of City staff.

The Committee's initial evaluation of Proposers shall be based on the specific project needs and the professional services offered by the Proposer as stated in the Qualifying Information submitted, in accordance with those criteria listed below.

Criteria will be scored on a scale of “0” to “25” with the maximum number of points available for each criterion as noted in this section. The total maximum number of points to be scored under this process is 100.

| | | |
|---|---|---|
| 1. | Proposer’s experience, qualifications and past performance in providing the type of services described in this Solicitation | 20 |
| 2. | Experience and qualifications of key individuals that will be assigned to this project | 20 |
| 3. | Proposer’s approach and scope of work to provide the services described in this RFP | 15 |
| 4. | Proposer’s understanding of major City issues, including specific knowledge of the City of Ormond Beach and ability to establish, maintain, and enhance working relationships between City elected officials and staff, and the executive and legislative branches of the State of Florida government and relevant state agencies. | 20 |
| 5. | Price Evaluation – Firm Fixed Annual Fee | 25 |
| | TOTAL POINTS | 100 |

The selection process will be as follows:

- The Committee will evaluate proposals to ensure compliance with the RFP requirements.
- The Committee will meet in accordance with the Florida Sunshine Law, and rank the proposals in accordance with the RFP evaluation criteria.
- As part of the selection process the highest ranked proposal(s) may be required to conduct a presentation before the Selection Committee.
- The Committee will transmit a ranking of the proposals to the City Commission.
- Applicants shall be notified in writing regarding their ranking.
- The City Commission shall review the recommendations of the Committee and upon approval authorize the Staff to negotiate the terms of the contract.
- The Contract Agreement requires approval by the City Commission at a public meeting.

Note: Discussions and/or interviews with qualified proposer(s) will be conducted after the due date. The City reserves the right to accept or reject any and all proposals, either in whole or in part, with or without cause, waive minor irregularities with any proposal, or make an award that is in its best interest subject to City Commission approval.

**PROPOSAL SUBMITTAL**

Please check the contents of your RFP package carefully to ensure that you have in your possession all the necessary documents, as referenced within this RFP, including any addenda. If you are missing any items, please contact the City's Purchasing Coordinator at 386-676-3223, or by e-mail at: rob.hart@ormondbeach.org.

Submission of a proposal pursuant to this RFP shall constitute acknowledgement and acceptance of the terms and conditions set forth herein. Portions of this RFP and the contents of the proposal submitted by the successful proposer may become contractual obligations if an Agreement is awarded. Failure of the successful proposer to accept these obligations may result in cancellation of the award of contract.

The City reserves the right to withdraw this RFP at any time without prior notice. All proposals submitted in response to this RFP become the property of the City of Ormond Beach.

Deadline for Submission: To be considered, proposals must be received no later than August 27, 2025 at 3:00 PM

Inquiries: Technical questions may arise as firms are preparing their proposals. The City will accept written inquiries regarding this RFP until the close of business on August 18, 2025 Questions received after that time will not be responded to. Answers to questions that warrant attention of all the potential proposers will be distributed in the form of an addendum. Please direct written inquiries to:

Rob Hart
City of Ormond Beach
22 South Beach Street
Ormond Beach, Florida 32174
Telephone: (386) 676-3223
rob.hart@ormondbeach.org

Signature Requirements: Proposals must be signed by a duly authorized official(s) of the proposing firm. Consortiums, joint ventures, or teams submitting proposals, although permitted and encouraged, will not be considered responsive unless it is established that all contractual responsibility rests solely with one firm or legal entity which shall not be a subsidiary or affiliate with limited resources. Each proposal shall indicate the entity responsible for execution on behalf of the proposal team.

Proposal Delivery: You must submit one (1) unbound original plus one (1) electronic copy on compact disk (CD) or flash drive of the proposal no later than the date and time specified above. Submit proposals to: Rob Hart, Purchasing Coordinator, at City Hall down stairs in Room 102, 22 South Beach Street, Ormond Beach, FL 32174. The RFP title and number shall be plainly marked on the outside of the delivery envelope or package. It is solely the responsibility of the submitter to ensure that the Proposal is delivered on or before the specified date and time. Late proposals will not be accepted.

Addenda and Supplements to the Request for Proposals (RFP): In the event that it becomes necessary to revise any part of this RFP, or if additional information is necessary to enable the proposing firm to make an adequate interpretation of the provisions of this RFP, a supplement to the RFP will be provided to each firm that has requested a copy of this document.

Rejection Rights: The City of Ormond Beach reserves the right, at any time, to modify, waive or otherwise vary the terms and conditions of this RFP including, but not limited to, the deadlines for submission and submission requirements. The City further reserves the right to reject any or all submittals, to cancel or withdraw this RFP at any time and to negotiate with any party prior to or after submittal of proposals. Selection is also dependent upon the negotiation of a mutually acceptable contract with the successful proposers.

Cost of Proposal Preparation: No reimbursement will be made by the City of Ormond Beach for any costs incurred in the preparation of the proposal or presentation.

Proposals to be in Effect: Each proposal shall state that it is valid for a period of not less than 90 days from date of receipt.

**ASSIGNMENT OF WORK**

It is the City's intention to solicit responses from interested parties, to evaluate the responses, and to award a contract to one (1) selected Proposer.

**CONTRACT TERM**

The City anticipates awarding the contract for a one (1) year period with an option of three (3) additional years on a year by year basis.

## EXHIBIT A

## REGISTRATION AND INSURANCE REQUIREMENTS FOR VENDOR/CONTRACTOR WORKING ON CITY PROJECTS

Registration Requirements

VENDORS doing business within the City Limits must be registered with the City.

Requirements for registering a business are as follows:
Copy of City Business Tax Receipt (where your business is located).
Certificate of Insurance showing General Liability and Workers' Comp (or State Workers' Comp Exemption form).

Application Fee: $25.00 For more information, contact the City's Business Tax Receipt official at 386-676-3233 or btonline@ormondbeach.org You can apply online here: https://ormondbeachfl-energovweb.tylerhost.net/apps/selfservice#/home

State Certified/Registered Contractors

All registered State contractors must be registered with Volusia County. Volusia County Contractor Licensing, 123 W. Indiana Ave., Rm 203, Deland, Fl. 32720 (386) 736-5957 contractorlicensing@volusia.org

https://connectlivepermits.org/citizenportal/app/landing

State certified contractors have the option of registering with Volusia County, or providing information directly to the business tax receipt official, to include copy of State license, certificate of insurance and copy of local business tax receipt. This information is provided with the permit application.

If you have any questions regarding the above requirements, please contact the business tax receipt official at (386) 676-3233 or btonline@ormondbeach.org

### Risk Management and Insurance Requirements

### A. Payment and Performance Bonds

**1.** Except as otherwise provided herein, the Contractor shall, prior to beginning performance, deliver to the City, and the City shall record in the public records of Volusia County, Florida, the Contractor's Payment and Performance Bond in an amount equal to the full amount of the Contract.

**2.** **(a)** Payment and Performance Bonds shall not be required for any contract except those which are for the construction of a public building, for the prosecution and completion of a public work (as described in Section 180.06, **Florida Statutes,** as amended from time to time) or for repairs upon a public building or public work (as described in Section 180.06, **Florida Statutes**, as amended from time to time).

**(b)** With respect to those Contracts for which Payment and Performance Bonds are otherwise required:

**i.** Unless the City Manager, or his designee, determines such Bond to be necessary to protect the interests of the City, no Contractor shall be required to provide a Payment and Performance Bond for any Contract which is for $25,000.00 or less.

**ii.** Upon the request of the contractor, good cause shown by the Contractor, and a determination that the public health, safety and welfare will be sufficiently protected, the City Commission may exempt the contractor from the requirement of providing a Payment and Performance Bond for any Contract which is for more than $25,000.00 but is less than $200,000.00.

**3.** The Payment and Performance Bond shall list the Contractor as Principal and be issued by a surety insurer authorized to do business in Florida as a surety and listed as an acceptable surety in the Federal Register.

**4.** The Payment and Performance Bond shall be executed pursuant to Section 255.05, **Florida Statutes**, and be in a form substantially similar to the form set forth in Section 255.05(3), **Florida Statutes**.

**5.** The Payment and Performance Bond shall specifically provide coverage for delay damages due to a default by the Contractor.

**6.** The Payment and Performance Bond shall not make the Contract part of the Bond agreement.

**7.** In lieu of the Payment and Performance Bond, the Contractor may file with the Finance Director of the City, in an amount equal to the full amount of the Contract, cash, a money order, a certified check, a cashier's check, an irrevocable letter of credit, or a security of a type listed in Part II, Chapter 625, **Florida Statutes**.

**8.** In the event the surety on any Payment and Performance Bond furnished by the Contractor is declared bankrupt or becomes insolvent, or its right to do business in the State of Florida is terminated, the Contractor shall, within

five (5) working days thereafter, substitute another Payment and Performance Bond and surety acceptable to the City.

**9.** The Contractor is totally and solely responsible for keeping its surety informed as to the Base Contract Price as bid, significant changes in the Project Scope, and the overall progress and completion of the Project for the entire life of the Contract.

**10.** The payment and performance bond requirements stated herein above shall not be applicable to service-related contracts unless otherwise determined by the City Manager in order to protect the health, safety and welfare of the general public.

## B. Contractual Provisions Relative to Risk Management

All contracts for any public works to be performed, and service-related contracts, for or on behalf of the City shall include at a minimum, the following, or substantially similar, provisions:

### 1. Hold Harmless and Indemnity

The Contractor agrees to assume liability for and indemnify, hold harmless, and defend the City, its commissioners, mayor, officers, employees, agents, and attorneys of, from, and against all liability and expense, including reasonable attorney's fees, in connection with any and all claims, demands, damages, actions, causes of action, and suits in equity of whatever kind or nature, including claims for personal injury, property damage, equitable relief, or loss of use, to the extent caused by the negligence, recklessness, or intentionally wrongful conduct of the Contractor, its agents, officers, contractors, subcontractors, employees, or anyone else employed or utilized by the Contractor in the performance of this Contract. The Contractor's liability hereunder shall include all attorney's fees and costs incurred by the City in the enforcement of this provision.

### 2. Payment on Behalf of City

The Contractor shall pay all costs of the City's legal defense, as may be selected by the City, for all claims described in the Hold Harmless paragraph. Such payment on behalf of the City shall be in addition to any and all other legal remedies available to the City and shall not be considered to be the City's exclusive remedy.

### 3. Loss Control/Safety

Precaution shall be exercised at all times by the Contractor for the protection of all persons, including employees and property. The Contractor shall comply with all applicable laws, regulations and ordinances related to safety and health, shall make special efforts to detect hazardous conditions, and shall take prompt action when loss control/safety measures are

reasonably necessary. The City may order work to be stopped if conditions exist that present an immediate danger to persons or property. The Contractor acknowledges that such work stoppage will not shift responsibility for any damages from the Contractor to the City.

**4. Service Bond**

For Service-related contracts only, the City may require the Contractor to secure a service bond with a minimum $25,000 coverage limit for the period of the service agreement. The service bond covers dishonest acts of the contractor's employees against the City. A copy of the bond shall be provided to the City when the agreement commences. Service-related contracts include and are not limited to businesses providing janitorial, pest control, general repair, security, carpet cleaning, locksmith, temporary employment, painting, moving services or other contracts as determined in the discretion of the Risk Manager as necessary to minimize loss.

## C. Contractor's Insurance

**1. General**

The Contractor, including service-related contractors, shall purchase and maintain for the entire life of the Project, including any and all approved time extensions, until its final acceptance by the City, such insurance as will protect the Contractor from claims under Workers' Compensation, disability benefit laws or other similar employee benefit laws; from claims for damages because of bodily injury, occupational sickness or disease, or death of Contractor's employees; from claims insured by usual or unusual injury liability coverage; from claims or injury to or destruction of tangible property and from claims insured by usual Commercial General Liability coverage. This includes loss of use resulting therefrom, any or all of which may arise out of the Contractor's operations under the Contract Documents, whether such operations be by the Contractor, by any Subcontractor, or by anyone directly or indirectly employed by any of them or for whose acts any of them may be legally liable. The Contractor's deductibles/self-insured retentions shall be disclosed to the City and may be disapproved by the City, and may be reduced or eliminated at the sole discretion of the City. The Contractor is responsible for the amount of any deductible or self-insured retention.

**2. Types of Insurance and Limits of Liability**

The insurance required herein shall be written for not less than any limits of liability specified and incorporated as part of the Contract Documents or as required by law, whichever is greater, and shall include and not limited to the following:

**(a)** Workers' Compensation Insurance in statutory limits for the State of Florida with Coverage B - Employer's Liability limits of not less than:

$100,000 Each Accident Bodily Injury by Accident
$100,000 Each Employee Bodily Injury by Disease
$500,000 Policy Limit Bodily Injury by Disease

Certificate of Exemptions. If the contractor has a State-issued Certificate of Exemption, the contractor may provide a copy in place of the requirement for coverage. However, if the contractor subcontracts or retains any other person or entity to perform under the contract, that person or entity must provide proof of workers' compensation insurance as required by law or provide a Certificate of Exemption.

It is the intent of the City that any individual who either contracts directly with the city or performs any work on behalf of any such contractor be covered by workers' compensation insurance or have a valid exemption from said coverage.

(If applicable to the Project, the policy must include benefits under the United States Longshoremen's and Harbor Workers' Act and the Jones Act coverage--all maritime coverage.)

**(b)** Commercial General Liability Insurance shall be written on a coverage form as broad as Insurance Services Office (ISO) Form CG 00 01 11 85, or its successor form, including but not limited to the following coverage (any deviation shall be noted on the Certificates of Insurance):

a. Premises, Operations, Products and Completed Operations
b. Owners' & Contractors' Protective
c. Products & Completed Operation
d. Explosion, Collapse & Underground Conditions
e. Blanket Contractual Liability
f. Personal Injury Liability
g. Broad Form Property Damage Endorsement, including Completed Operations
h. Independent Contractors
i. Watercraft--Owned and Non-Owned (if applicable, endorsement must be included in General Liability policy or a separate Protection & Indemnity Policy must be written)
j. Pollution Liability (if applicable)
k. Asbestos Abatement (if applicable)
l. Fire Damage Liability

Certain coverage outlined above may not be required if they do not relate to the Project, as may be determined at the sole discretion of the City.

Commercial General Liability Coverage shall be written on an occurrence basis and the limits shall be no less and not limited to the following amounts:

Limits (not less than)

$1 Million Each Occurrence
$2 Million General Aggregate
$1 Million Aggregate Products & Completed Operations

NOTE: Commercial General Liability Coverage must be purchased on either a project basis (separate policy per contract) or an endorsement allocating an aggregate limit per location or specified project.

**(c)** Automobile Liability Insurance is required if an Automobile(s) is used in the performance of the contract. ISO Symbol 1 (Any Auto), or alternatively a combination of Symbol 2 (Owned Autos), Symbol 8 (Hired Autos), and Symbol 9 (Non-Owned Autos), and limits shall be no less than:

| | |
|---|---|
| $1 Million | Combined Single Limit for Bodily Injury and Property Damage |

**(d)** Excess Liability

For contracts $250,000 or greater an Excess Liability Policy of at least but not limited to $1,000,000 in addition to the scheduled underlying policies for Commercial General Liability, Automobile Liability and Employers' Liability, the Contractor shall also provide an Excess Liability Policy with a maximum self-insured retention not to exceed $25,0000 per occurrence.

**(e)** Builder’s Risk

Contractor shall purchase Builder’s Risk Insurance for any contracts that are deemed to be vertical construction on an All-Risk policy, and shall also include coverage for wind, hail, and named storm. Limits of coverage shall be at least and not limited to the value of the project.

**(f)** Professional Liability, Malpractice and/or Errors and Omissions

The Contractor shall purchase and maintain professional liability, malpractice, or errors or omissions insurance with minimum limits of $1,000,000 per occurrence. If a claims made form of coverage is provided, the retroactive date of coverage shall be no later than the inception date of claims made coverage, unless the prior policy was extended indefinitely to cover prior acts. Coverage shall be extended beyond the policy year either by a supplemental extended reporting period (ERP) of as great a duration as is available, and with no less coverage and with reinstated aggregate limits, or by requiring that

any new policy provides a retroactive date no later than the inception date of claims made coverage.

**D. Requirements for Certificates of Insurance**

**1.** With the execution of the Contract Documents, the Contractor, including service related contractors, shall provide certificates of such insurance acceptable to the City. These certificates and insurance policies shall contain an endorsement that the coverage under the policies will not be canceled, non-renewed or materially changed until at least thirty (30) days' prior written notice of such cancellation, non-renewal or change (except for nonpayment of premium, which shall be ten (10) days) and a copy of the cancellation endorsement signed by an authorized representative of the insurer, be given to the City. The contractor shall be required to replace any expired or canceled policies in like amount and coverage to the satisfaction of the City. The Certificate of Insurance shall be the ACORD FORM 25-S (7/90), or its successor form, and shall be made a part of the Contract Documents.

**2.** New certificates of insurance shall be provided to the City at least fifteen (15) days prior to coverage renewals.

**3.** If requested by the City, the contractor shall immediately furnish complete copies of the Contractor's insurance policies, forms and endorsements.

**4.** For Commercial General Liability coverage the Contractor shall, at the option of the City, provide an indication of the amount of claims payments or reserves chargeable to the aggregate amount of liability coverage. If the Commercial General Liability form of coverage includes an annual aggregate limitation on the amount of insurance provided, a separate project aggregate limit may be required by the City for the given contract.

**5.** If the Contractor fails to obtain and maintain for the life of the Project the insurance required hereby or to replace any such expired or canceled policy, the City may obtain and maintain such insurance with such company as it deems satisfactory. Any amounts expended by the City in payment of premiums for such insurance shall be deducted by the City form the amount due the Contractor for the work covered by the Contract.

**E. Policies of Insurance**

**1.** Except as otherwise provided in this Exhibit, all insurance policies shall be issued by insurers licensed to do business in the State of Florida on an admitted basis or which is an eligible surplus lines insurer in the State of Florida, and any such insuring company is required to have a minimum financial rating of (A-), in the latest edition of "Best's Key Rating Guide", published by A. M. Best Co., Inc., or some similarly nationally recognized rating authority, including Standard and Poors and Demotech.

**2.** For Workers' Compensation coverage only, self-insurance programs are

acceptable with a minimum A- rated reinsurance carrier; written confirmation is required.

**3.** All policies of insurance or certificates thereof referred to in this Exhibit shall be deposited with the City Clerk.

**4.** The City shall be named an Additional Insured on General Liability including products and completed operations and Automobile Liability policies of insurance and certificates thereof.

# Authority for Release of Information

I hereby authorize any representative of the City of Ormond Beach bearing this release, or copy thereof, to obtain any information in my files pertaining to credit records, criminal history records, administrative or judicial dispositions concerning the undersigned individual and/or corporations in which the undersigned may be a partner or officer.

I hereby release you, as the custodian of such records both individually and collectively, from any and all liability for damages of whatever kind, which may at any time result to me, my heirs, family or associates because of compliance with this authorization and request to release information.

## VERIFICATION OF EMPLOYMENT STATUS USING E-VERIFY SYSTEM

**1.** Undersigned firm warrants it **IS** currently registered with the U.S. Department of Homeland Security's E-Verify system, **and** is compliant with the requirements of Sections 448.09 and 448.095, *Florida Statutes*.

**2.** Undersigned firm warrants it **has not** had any contracts terminated as a result of violations of Sections 448.09 or 448.095, *Florida Statutes*, that prohibit it from contracting with a public agency.

**3.** Undersigned firm warrants that if it enters into an agreement with a subcontractor, an express provision shall be included in all of its subcontracts requiring subcontractors, who perform work or provide services pursuant to the contract, to use the E-Verify system to verify employment eligibility of all new employees hired by the subcontractor during the contract term.

**4.** Undersigned firm understands that any subcontractor must provide the contractor with an affidavit stating that the subcontractor does not employ, contract with, or subcontract with an unauthorized alien, and the contractor understands it shall maintain any such affidavits for the duration of the contract, and the contract with the subcontractor must be immediately terminated if the City has a good faith belief that the subcontractor knowingly violated Section 448.09 (1), *Florida Statutes*.

**5.** Undersigned firm understands that in the event the City has a good faith belief that the contractor has knowingly violated Section 448.09 (1), *Florida Statutes*, the City shall terminate the contract, and the contractor may not be awarded a public contract for a period of at least one (1) year after the date of termination. The contractor may be held liable for any additional costs incurred by the City as a result of termination of the contract.

# RFP RESPONSE FORM

THIS RESPONSE IS SUBMITTED TO:

Purchasing Coordinator
City of Ormond Beach
22 S. Beach Street
Ormond Beach, Florida 32174

The undersigned SUBMITTER proposes and agrees, if this Submittal is accepted, to enter into a Contract with the CITY that reflects the items of this Request for Proposal (RFP) and to provide all services, as specified or indicated in the RFP Documents, in full accordance with the terms and conditions set forth in therein.

SUBMITTER accepts all of the terms and conditions of the General Conditions. SUBMITTER will sign the Contract) and submit the Contract security (when applicable) and other documents required by the Contract Documents within ten (10) days after the date of CITY's Notice of Award.

In submitting this information, SUBMITTER represents, as more fully set forth in the Agreement, that:

SUBMITTER has examined copies of all the RFP Documents and of the following Addenda:

| Addendum Date | Addendum Number |
|---|---|
| _____ | _____ |
| _____ | _____ |
| _____ | _____ |

Receipt of all of which is hereby acknowledged.

This Submittal is genuine and not made in the interest of or on behalf of any undisclosed person, firm or corporation and is not submitted in conformity with any agreement or rules of any group, association, organization or corporation; SUBMITTER has not directly or indirectly induced or solicited any other Submitter to submit a false or sham Submittal; SUBMITTER has not solicited or induced any person, firm or a corporation to refrain from bidding; and SUBMITTER has not sought by collusion to obtain for himself any advantage over any other Bidder or over the CITY.

THIS RESPONSE IS SUBMITTED BY:

City of Ormond Beach RFP No. 2025-36
## DRUG-FREE WORKPLACE CERTIFICATION

**IDENTICAL OR "TIE" SUBMITTALS**: Preference shall be given to businesses with drug-free workplace programs. Whenever two or more proposals which are equal in respect to price, quality, and service are received by the State or by any political subdivision for the procurement of commodities or contractual services, a bid received from a business that certifies that it has implemented a drug-free workplace program shall be given preference in the award process. Established procedures for processing tie bids will be followed if none of the tied vendors have a drug-free workplace program. In order to have a drug-free workplace program, a business shall:

1) Publish a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace and specifying the actions that will be taken against employees for violations of such prohibition.
2) Inform employees about the dangers of drug abuse in the workplace, the business's policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation, and employee assistance programs, and the penalties that may be imposed upon employees for drug abuse violation.
3) Give each employee that engages in providing the commodities or contractual services that are under bid a copy of the statement specified in subsection (1).
4) In the statement specified in subsection (1), notify the employees that, as a condition of working on the commodities or contractual services that are under bid, the employee will abide by the terms of the statement and will notify the employer of any conviction of, or plea of guilty or nolo contendere to, any violation of Chapter 893 or of any controlled substance law of the United States or any state, for a violation occurring in the workplace no later than five (5 ) calendar days after such conviction.
5) Impose sanctions on, or require the satisfactory participation in a drug abuse assistance or rehabilitation program if such is available in the employee's community, by any employee who is so convicted.
6) Make a good faith effort to continue to maintain a drug-free workplace through implementation of this section.

| **Recommended Action** | Staff intends to proceed with advertising RFP No. 2025-50, Ticketing Software Solution for the Ormond Beach Performing Arts Center. | | |
| **Strategic Goal** | Quality of Life - Other | | |
| **Department Staff Contact** | Leisure Services<br>Robert Carolin, Leisure Services Director | | |

Summary

The purpose of this item is to provide notice of staff's intent to proceed with advertising the Request for Proposals (RFP) No. 2025-50 for Ticketing Software Solution for the Ormond Beach Performing Arts Center.

The newer ticketing platforms utilize a per-ticket fee model, with charges typically ranging from $1.50 to $2.25 per ticket sold. These fees are applied directly to the consumer at the point of sale and are not an out-of-pocket expense for the venue. Additionally, under our current fee structure, we recover these costs during contract settlement, as we receive a fee per ticket sold from producers. If you were to base new software costs strictly on our current sales volume, the technical cost to us within the contract would equate to approximately $18,000 annually at $1.50 per ticket (12,000 tickets x $1.50), or $27,000 annually at $2.25 per ticket (12,000 tickets x $2.25), depending on the fee rate established. This contractual cost would be paid from our ticketing account as part of the operating expenses tied to the platform.

This RFP will solicit competitive sealed proposals to provide a comprehensive, cloud-based ticketing software solution. The intent is to select a vendor that offers a modern, user-friendly platform to manage ticket sales, customer engagement, reporting, and integrations with marketing and donor systems.

This RFP will be advertised beginning July 27, 2025, with the RFP opening on August 28, 2025. An agreement with the recommended vendor will be brought back to the City Commission for approval.

Financial Impact

The budget impact will be determined by the proposals and all expenses related to ticketing are currently housed in account Ormond Beach Performing Arts Center ticket sales account 001.347062.

Citizen Impact

Solicitation of proposals ensures a transparent process for selecting a qualified vendor.

## GENERAL CONDITIONS

**PUBLIC ENTITY CRIMES**: A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a proposal on a contract to provide any goods or services to a public entity, may not submit a proposal on a contract with a public entity for the construction or repair of a public building or public work, may not submit Proposals on leases or real property to a public entity, may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with any public entity in excess of the threshold amount provided in Section 287.017, for CATEGORY TWO for a period of 36 months from the date of being placed on the convicted vendor list.

**DISCRIMINATION:** Pursuant to Section 287.134(2)(a), Florida Statutes, an entity or affiliate who has been placed on the discriminatory vendor list may not submit a bid or proposal on a contract to provide any goods or services to a public entity, may not submit a bid or proposal on a contract with a public entity for the construction or repair of a public building or public work, may not submit bid or proposal on leases of real property to a public entity, may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with any public entity.

**PUBLIC RECORDS/NON-CONFIDENTIALITY OF BIDS AND/OR PROPOSALS**. The City of Ormond Beach cannot and does not warrant the confidentiality of any information submitted in response to this solicitation. Florida law provides that municipal records shall at all times be open for personal inspection by any person, Section 119.01, F.S., The Public Records Law. Information and materials received by the City of Ormond Beach in connection with all Proposers' response shall be deemed to be public records subject to public inspection upon award, recommendation for award, or 30 days after bid opening, whichever occurs first. Section 119.071, F.S.

**DISTRIBUTION OF BIDS AND RFP'S**: The City uses the services of DemandStar (www.demandstar.com) to distribute its bids and RFP's on-line on the Internet. If you have received a copy of this RFP from any source other than DemandStar, please be aware that you may not have received the latest version of the RFP or any related addendums.

**SUBMISSION OF RESPONSES**: All Submittals shall be delivered in a sealed envelope. The Request for Proposals (RFP) number, title, and opening date shall be clearly displayed on the outside of the sealed envelope (and on the outside of any express shipping package). The delivery of said submittal to the Purchasing Office on or before the specified opening date and time is solely and strictly the responsibility of the Submitter. Any submittal received by the Purchasing Office after the specified date and time will not be accepted. Submittals must be presented on forms provided by the City. No other forms will be accepted. Responses submitted by telephone, fax or email will not be

considered. No Submittal may be modified after opening. No Submittal may be withdrawn after opening for a period of ninety (90) days unless otherwise specified.

**EXECUTION OF SUBMITTAL:** Submittals must contain a manual signature of authorized representative in the space(s) provided. Submittals must be typed or printed in ink. Use of erasable ink is not permitted. All corrections made by Submitter to any Submittal entry must be initialed. The company name and Federal Employer Identification Number (F.E.I.N.) number shall appear in the space(s) provided.

**RFP OPENING**: Submittals shall be opened and the name of the submitters shall be read publicly. No discussion of the Submittals will occur at this time.

**SUBMITTAL TABULATION:** The RFP Tabulation will be posted on Demandstar (www.demandstar.com). Any submitter wishing to receive a paper copy of the tabulation is required to enclose a stamped, self-addressed envelope with their Submittal response.

**CLARIFICATION/CORRECTION OF RFP ENTRY:** The City of Ormond Beach reserves the right to allow for the clarification of questionable entries and for the correction of obvious mistakes.

**INTERPRETATION:** Any questions concerning conditions and specifications shall be directed to the Purchasing Coordinator rob.hart@ormondbeach.org. Those interpretations which may affect the eventual outcome of this Submittal will be furnished in writing to all prospective Submitters. No interpretation shall be considered binding unless provided in writing by the City of Ormond Beach.

**PROCUREMENT COMMUNICATION PROTOCOL:** To protect the integrity of the procurement process, respondents, suppliers, contractors, sub-contractors or person acting on behalf of any of the above are prohibited from all communications regarding the solicitation with City staff, City consultants, City legal counsel, City agents, or elected officials unless such communication is specifically authorized in the City's solicitation or addenda. Violation of this provision may be grounds for rejecting a response.

**MINORITY POLICIES:** The City of Ormond Beach, Florida, encourages the full participation of Disadvantaged and Women Business Enterprises (D&WBE) in the provision of goods and services.

**RESPONSIBILITY DETERMINATION:** Pursuant to the provisions of Florida Statutes Chapter 287.05701, the City does not request or consider a vendor's social, political, or ideological interests in making a responsibility determination.

**LICENSES AND PERMITS:** The Vendor/Contractor is responsible for obtaining all necessary permits and licenses to comply with all Federal, State, local laws, rules and regulations required to perform work in accordance with the specifications.

**ADDITIONAL TERMS AND CONDITIONS:** The City of Ormond Beach reserves the right to reject Submittals containing any additional terms or conditions not specifically requested in the original conditions and specifications.

**TAXES:** The City of Ormond Beach is exempt from Federal Excise Taxes and all sales taxes.

**SILENCE OF SPECIFICATIONS**: The apparent silence of any specification and any supplemental specifications as to any details or the omission from same of any detailed description concerning any point shall be regarded as meaning that only the best commercial practices are to prevail and that only materials of first quality and correct type, size, and design are to be used. All workmanship is to be first quality. All interpretations of the specifications shall be made upon the basis of this statement.

**ASSIGNMENT:** Any purchase order or contract issued pursuant to a Submittal and the monies which may become due hereunder are not assignable except with the prior written approval of the City Manager or City Commissioner, whichever authorized the purchase or Agreement.

**LIABILITY**: The Contractor shall hold and save the City of Ormond Beach, its officers, agents, and employees harmless against claims by third parties resulting from the Contractor's or supplier's breach of contract or negligence, including all attorney's fees and costs, and shall pay any and all damages, fees, and costs assessed on behalf of the City. The City expressly reserves all rights, privileges and benefits of sovereign immunity.

**PATENTS AND ROYALTIES**: The Contractor, without exception, shall indemnify and save harmless the City of Ormond Beach and its employees from liability of any kind, including cost and expenses for or on account of any copyrighted, patented, or unpatented invention, process, or article manufactured or used in the performance of the contract, including its use by the City of Ormond Beach. If the Contractor uses any design, device, or materials covered by letters, patent or copyright, it is mutually agreed and understood without exception that the Submittal prices shall include all royalties or cost arising from the use of such design, device, or materials in any way involved in the work.

**NON-APPROPRIATION OF FUNDS:** In the event sufficient budget funds are not available for a new fiscal period, the CITY shall notify the VENDOR/CONTRACTOR of such occurrence and the contract shall terminate on the last day of the current fiscal period, without any penalty or expense to the CITY of any kind whatsoever.

**AWARDS:** The CITY reserves the right, in its sole discretion, as the best interest of the CITY may require, to make award(s) by individual item, group of items, all or none, or a combination thereof; on a geographical basis and/or with one or more vendors, contractors, consultants or specialists; or to reject any and all Submittals or waive any minor irregularity or technicality in the Submittals received.

**OTHER AGENCIES:** All Bidder(s) awarded contracts from this bid or proposal may, permit any municipality or other government agency to participate in the contract under the same prices, terms, and conditions, if agreed to by both parties.

It is understood that at no time will any city, municipality, or other agency be obligated for placing an order for any other city, municipality, or agency: nor will any city, municipality, or agency be obligated for any bills incurred by any other city, municipality, or agency. Further, it is understood that each agency will issue its own purchase orders to the awarded bidder(s).

**COMPLIANCE WITH FLORIDA PUBLIC RECORDS LAW:**

Contractor expressly agrees that it shall comply with the public records law provided in Florida Statutes, Chapter 119, and specifically to:

(a) Keep and maintain public records required by the City to perform the contracted service.
(b) Upon request from the City Clerk, provide the City with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in Chapter 119, Florida Statutes, or as otherwise provided by law.
(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the contractor does not transfer the records to the City.
(d) Upon completion of the contract, transfer at no cost, to the City all public records in possession of the contractor or keep and maintain public records required by the City to perform the service. If the contractor transfers all public records to the City upon completion of the contract, the contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the contractor keeps and maintains public records upon the completion of the contract, the contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the City, upon request from the City Clerk, in a format that is compatible with the information technology systems of the City.
(e) Failure of the Contractor to comply with Public Records Law as provided by Florida Statutes, Chapter 119, shall subject the Contractor to penalties under Chapter 119.10 and subject this Agreement to termination for cause by the City.

**IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONTRACTOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS CONTRACT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT:**

CITY CLERK
22 SOUTH BEACH STREET
ORMOND BEACH, FLORIDA 32174
(386)677-0311
CITYCLERK@ORMONDBEACH.ORG
or online at
https://www.ormondbeach.org/prr

Ref: Fla. Stat. §119.0701(2016)

**THE CITY OF ORMOND BEACH RESERVES THE RIGHT TO REJECT ANY OR ALL PROPOSALS, AND TO WAIVE INFORMALITIES AS MAY BE DEEMED TO BE IN THE BEST INTEREST OF THE CITY.**

## TERMS AND CONDITIONS

A. The City of Ormond Beach reserves the right without prejudice to reject any or all proposals, to request clarification of information submitted, and to request additional information of one or more proposers.

B. The City reserves the right to award the contract to the next most qualified firm if the successful firm fails to execute a contract within two weeks after the award of the contract by the City Commission.

C. In accordance with federal, State, and local regulations, the firm shall not discriminate under the contract against any person.

D. The firm shall not assign or transfer any interest in the contract without prior approval of the City Commission.

E. The City reserves the right to terminate the contract at any time due to the vendor's default under terms of agreement.

F. Submission of a proposal indicates acceptance by the firm of the conditions contained in this Request for Proposals unless clearly and specifically noted in the proposal submitted and confirmed in the contract between the City of Ormond Beach and the firm selected.

G. Submittals should include a copy of firm's insurance certificate, Conflict, Non-Conflict of Interest Statement/Litigation Statement, Drug Free Workplace Certificate and E-Verify Statement.

## I. OBJECTIVE OF THE REQUEST FOR PROPOSALS

The City of Ormond Beach is soliciting proposals from qualified firms to provide a comprehensive, cloud-based ticketing software solution for the Ormond Beach Performing Arts Center. The intent is to select a vendor that offers a modern, user-friendly platform to manage ticket sales, customer engagement, reporting, and integrations with marketing and donor systems.

## II. SCOPE OF SERVICES

The selected vendor will be responsible for:

Providing and maintaining a ticketing software solution suitable for a 500+ seat venue

Enabling online ticket sales and box office transactions

Offering features including but not limited to: seat mapping, user account creation, promotional codes, multi-tiered pricing, and reporting dashboards

Integrating with email marketing platforms (e.g., Mailchimp, Constant Contact)

Providing technical support, onboarding/training, and implementation assistance

Ensuring ADA compliance and data security standards

## III. TERM OF AGREEMENT

The initial term of this agreement shall be for a period of one (5) year and will be automatically renewed for one year thereafter unless either party provides at least ninety (90) days prior written notice to the other party of their intent not to renew the agreement.

## IV. MINIMUM QUALIFICATIONS

To be considered by the City, proposing firm must:
Have a minimum of three (3) years of experience in providing ticketing solutions for public venues or performing arts centers

Provide at least three (3) references from organizations with similar size and scope

Be able to demonstrate compliance with Florida public record laws and E-Verify requirements

Provide proof of liability insurance and active business registration, business registration only required by the chosen firm(s)

Ability to integrate with Tyler Technologies Cashier preferred.

## V. PROPOSAL PROCESS

The firm or individual(s) interested in this contract should include a response to each of the following items in their written proposal:

A. Background of firm:

Provide a company overview including years in business, organizational structure, number of employees, and service regions.

B. Experience:

Detail previous engagements with performing arts centers or similar venues. Include implementation timelines and ongoing support structure.

C. Investment Approach:

Outline how your company approaches onboarding, customer support, maintenance, and upgrades.

D. Fees:

Clearly outline all startup costs, licensing/subscription fees, payment processing fees, and any other ongoing costs.

.

## VI. PROPOSAL SUBMITTAL

Please check the contents of your RFP package carefully to ensure that you have in your possession all the necessary documents, as referenced within this RFP, including any addenda. If you are missing any items, please contact the City's Purchasing Coordinator at 386-676-3223, or by e-mail at: rob.hart@ormondbeach.org.

Submission of a proposal pursuant to this RFP shall constitute acknowledgement and acceptance of the terms and conditions set forth herein. Portions of this RFP and the contents of the proposal submitted by the successful proposer may become contractual obligations if an Agreement is awarded. Failure of the successful proposer to accept these obligations may result in cancellation of the award of contract.

The City reserves the right to withdraw this RFP at any time without prior notice. All proposals submitted in response to this RFP become the property of the City of Ormond Beach.

Deadline for Submission: To be considered, proposals must be received no later than 2:00 p.m., August 28, 2025

Inquiries: Technical questions may arise as firms are preparing their proposals. The City will accept written inquiries regarding this RFP until seven August 19, 2025 at 4:00 PM. Questions received after that time will not be responded to. Answers to questions that warrant attention of all the potential proposers will be distributed in the form of an addendum. Please direct written inquiries to:

Rob Hart

City of Ormond Beach
22 South Beach Street, Room 102
Ormond Beach, Florida 32174
Telephone: (386) 676-3223
FAX: (386) 676-3374
rob.hart@ormondbeach.org

Signature Requirements: Proposals must be signed by a duly authorized official(s) of the proposing firm. Consortiums, joint ventures, or teams submitting proposals, although permitted and encouraged, will not be considered responsive unless it is established that all contractual responsibility rests solely with one firm or legal entity which shall not be a subsidiary or affiliate with limited resources. Each proposal shall indicate the entity responsible for execution on behalf of the proposal team.

Proposal Delivery: You must submit one (1) unbound original plus one (1) electronic copy on compact disk (CD) or flash drive of the proposal no later than the date and time specified above. Submit proposals to: Rob Hart, Purchasing Coordinator, at City Hall down stairs in Room 102, 22 South Beach Street, Ormond Beach, FL 32174. The RFP title and number shall be plainly marked on the outside of the delivery envelope or package. It is solely the responsibility of the submitter to ensure that the Proposal is delivered on or before the specified date and time. Late proposals will not be accepted.

Addenda and Supplements to the Request for Proposals (RFP): In the event that it becomes necessary to revise any part of this RFP, or if additional information is necessary to enable the proposing firm to make an adequate interpretation of the provisions of this RFP, a supplement to the RFP will be provided to each firm that has requested a copy of this document.

Rejection Rights: The City of Ormond Beach reserves the right, at any time, to modify, waive or otherwise vary the terms and conditions of this RFP including, but not limited to, the deadlines for submission and submission requirements. The City further reserves the right to reject any or all submittals, to cancel or withdraw this RFP at any time and to negotiate with any party prior to or after submittal of proposals. Selection is also dependent upon the negotiation of a mutually acceptable contract with the successful proposers.

Cost of Proposal Preparation: No reimbursement will be made by the City of Ormond Beach for any costs incurred in the preparation of the proposal or presentation.

Proposals to be in Effect: Each proposal shall state that it is valid for a period of not less than 90 days from date of receipt.

## VII. EVALUATION PROCESS AND CRITERIA

The City of Ormond Beach will conduct an evaluation of all proposals, submitted by the deadline, to determine compliance with proposal requirements and mandatory document submissions. The committee will consist of the city staff. The committee will evaluate

proposals and select the Proposer that meets the best interests of the City, and will make a recommendation of Award of Contract to the City Commission.

**The City reserves the following rights:**

- Modify, extend, or cancel this RFP at any time to obtain additional proposals or for any other reason the City determines to be in its best interest;

- Issue a new RFP with terms and conditions that are the same, similar or substantially different as those set forth in this or a previous RFP in order to obtain additional proposals or for any other reason the City determines to be in its best interest;

- Conduct pre-award discussion and/or pre-award negotiations with any or all responsive and responsible proposer(s) who submit proposals determined to be reasonably acceptable of being selected for award; and, conduct personal interviews or require presentations of any or all proposer(s) prior to selection.

- Request that proposer(s) furnish additional information as the City may reasonably require.

- Accept or reject qualifications or proposals in part or whole, and/or waive any defect or deficiency in any proposal, if in the City's sole judgment, the defect or deficiency is not material in response to this RFP;

- Limit and/or determine the actual contract services to be included in a contract.

- Engage outside experts to assist staff in evaluating the merits and viability of each proposer.

- Obtain information for use in evaluating submittals from any source.

- Verify the information received in the proposal. If a proposer knowingly and willfully submits false information or data, the City of Ormond Beach reserves the right to reject that proposal. If it is determined that an Agreement was awarded as a result of false statements or other data submitted in response to this RFP, the City of Ormond Beach reserves the right to terminate the Agreement.

The City shall be the sole judge of the proposer's qualifications.

**Evaluation Criteria:**

For the purposes of further evaluation, the responsive proposals will be evaluated on, but shall not be limited to, consideration of the following criteria:

Qualifications and Experience (30 points)
References (30 points)
Investment Strategy (30 points)

Price (10 points)

Responsive proposals will be ranked in each of the criteria

## REGISTRATION AND INSURANCE REQUIREMENTS FOR VENDOR/CONTRACTOR WORKING ON CITY PROJECTS

Registration Requirements

VENDORS doing business within the City Limits must be registered with the City.

Requirements for registering a business are as follows:
Copy of City Business Tax Receipt (where your business is located).
Certificate of Insurance showing General Liability and Workers' Comp (or State Workers' Comp Exemption form).

Application Fee: $25.00 For more information, contact the City's Business Tax Receipt official at 386-676-3233 or btonline@ormondbeach.org You can apply online here: https://ormondbeachfl-energovweb.tylerhost.net/apps/selfservice#/home

State Certified/Registered Contractors

All registered State contractors must be registered with Volusia County. Volusia County Contractor Licensing, 123 W. Indiana Ave., Rm 203, Deland, Fl. 32720 (386) 736-5957 contractorlicensing@volusia.org

https://connectlivepermits.org/citizenportal/app/landing

State certified contractors have the option of registering with Volusia County, or providing information directly to the business tax receipt official, to include copy of State license, certificate of insurance and copy of local business tax receipt. This information is provided with the permit application.

If you have any questions regarding the above requirements, please contact the business tax receipt official at (386) 676-3233 or btonline@ormondbeach.org

### Risk Management and Insurance Requirements

### A. Payment and Performance Bonds

**1.** Except as otherwise provided herein, the Contractor shall, prior to beginning performance, deliver to the City, and the City shall record in the public records of Volusia County, Florida, the Contractor's Payment and Performance Bond in an amount equal to the full amount of the Contract.

**2.** **(a)** Payment and Performance Bonds shall not be required for any contract except those which are for the construction of a public building, for the prosecution and completion of a public work (as described in Section 180.06, **Florida Statutes,** as amended from time to time) or for repairs upon a public building or public work (as described in Section 180.06, **Florida Statutes**, as amended from time to time).

**(b)** With respect to those Contracts for which Payment and Performance Bonds are otherwise required:

**i.** Unless the City Manager, or his designee, determines such Bond to be necessary to protect the interests of the City, no Contractor shall be required to provide a Payment and Performance Bond for any Contract which is for $25,000.00 or less.

**ii.** Upon the request of the contractor, good cause shown by the Contractor, and a determination that the public health, safety and welfare will be sufficiently protected, the City Commission may exempt the contractor from the requirement of providing a Payment and Performance Bond for any Contract which is for more than $25,000.00 but is less than $200,000.00.

**3.** The Payment and Performance Bond shall list the Contractor as Principal and be issued by a surety insurer authorized to do business in Florida as a surety and listed as an acceptable surety in the Federal Register.

**4.** The Payment and Performance Bond shall be executed pursuant to Section 255.05, **Florida Statutes**, and be in a form substantially similar to the form set forth in Section 255.05(3), **Florida Statutes**.

**5.** The Payment and Performance Bond shall specifically provide coverage for delay damages due to a default by the Contractor.

**6.** The Payment and Performance Bond shall not make the Contract part of the Bond agreement.

**7.** In lieu of the Payment and Performance Bond, the Contractor may file with the Finance Director of the City, in an amount equal to the full amount of the Contract, cash, a money order, a certified check, a cashier's check, an irrevocable letter of credit, or a security of a type listed in Part II, Chapter 625, **Florida Statutes**.

**8.** In the event the surety on any Payment and Performance Bond furnished by the Contractor is declared bankrupt or becomes insolvent, or its right to do business in the State of Florida is terminated, the Contractor shall, within

five (5) working days thereafter, substitute another Payment and Performance Bond and surety acceptable to the City.

**9.** The Contractor is totally and solely responsible for keeping its surety informed as to the Base Contract Price as bid, significant changes in the Project Scope, and the overall progress and completion of the Project for the entire life of the Contract.

**10.** The payment and performance bond requirements stated herein above shall not be applicable to service-related contracts unless otherwise determined by the City Manager in order to protect the health, safety and welfare of the general public.

## B. Contractual Provisions Relative to Risk Management

All contracts for any public works to be performed, and service-related contracts, for or on behalf of the City shall include at a minimum, the following, or substantially similar, provisions:

### 1. Hold Harmless and Indemnity

The Contractor agrees to assume liability for and indemnify, hold harmless, and defend the City, its commissioners, mayor, officers, employees, agents, and attorneys of, from, and against all liability and expense, including reasonable attorney's fees, in connection with any and all claims, demands, damages, actions, causes of action, and suits in equity of whatever kind or nature, including claims for personal injury, property damage, equitable relief, or loss of use, to the extent caused by the negligence, recklessness, or intentionally wrongful conduct of the Contractor, its agents, officers, contractors, subcontractors, employees, or anyone else employed or utilized by the Contractor in the performance of this Contract. The Contractor's liability hereunder shall include all attorney's fees and costs incurred by the City in the enforcement of this provision.

### 2. Payment on Behalf of City

The Contractor shall pay all costs of the City's legal defense, as may be selected by the City, for all claims described in the Hold Harmless paragraph. Such payment on behalf of the City shall be in addition to any and all other legal remedies available to the City and shall not be considered to be the City's exclusive remedy.

### 3. Loss Control/Safety

Precaution shall be exercised at all times by the Contractor for the protection of all persons, including employees and property. The Contractor shall comply with all applicable laws, regulations and ordinances related to safety and health, shall make special efforts to detect hazardous conditions, and shall take prompt action when loss control/safety measures are

reasonably necessary. The City may order work to be stopped if conditions exist that present an immediate danger to persons or property. The Contractor acknowledges that such work stoppage will not shift responsibility for any damages from the Contractor to the City.

**4. Service Bond**

For Service-related contracts only, the City may require the Contractor to secure a service bond with a minimum $25,000 coverage limit for the period of the service agreement. The service bond covers dishonest acts of the contractor's employees against the City. A copy of the bond shall be provided to the City when the agreement commences. Service-related contracts include and are not limited to businesses providing janitorial, pest control, general repair, security, carpet cleaning, locksmith, temporary employment, painting, moving services or other contracts as determined in the discretion of the Risk Manager as necessary to minimize loss.

## C. Contractor's Insurance

**1. General**

The Contractor, including service-related contractors, shall purchase and maintain for the entire life of the Project, including any and all approved time extensions, until its final acceptance by the City, such insurance as will protect the Contractor from claims under Workers' Compensation, disability benefit laws or other similar employee benefit laws; from claims for damages because of bodily injury, occupational sickness or disease, or death of Contractor's employees; from claims insured by usual or unusual injury liability coverage; from claims or injury to or destruction of tangible property and from claims insured by usual Commercial General Liability coverage. This includes loss of use resulting therefrom, any or all of which may arise out of the Contractor's operations under the Contract Documents, whether such operations be by the Contractor, by any Subcontractor, or by anyone directly or indirectly employed by any of them or for whose acts any of them may be legally liable. The Contractor's deductibles/self-insured retentions shall be disclosed to the City and may be disapproved by the City, and may be reduced or eliminated at the sole discretion of the City. The Contractor is responsible for the amount of any deductible or self-insured retention.

**2. Types of Insurance and Limits of Liability**

The insurance required herein shall be written for not less than any limits of liability specified and incorporated as part of the Contract Documents or as required by law, whichever is greater, and shall include and not limited to the following:

**(a)** Workers' Compensation Insurance in statutory limits for the State of Florida with Coverage B - Employer's Liability limits of not less than:

$100,000 Each Accident Bodily Injury by Accident
$100,000 Each Employee Bodily Injury by Disease
$500,000 Policy Limit Bodily Injury by Disease

Certificate of Exemptions. If the contractor has a State-issued Certificate of Exemption, the contractor may provide a copy in place of the requirement for coverage. However, if the contractor subcontracts or retains any other person or entity to perform under the contract, that person or entity must provide proof of workers' compensation insurance as required by law or provide a Certificate of Exemption.

It is the intent of the City that any individual who either contracts directly with the city or performs any work on behalf of any such contractor be covered by workers' compensation insurance or have a valid exemption from said coverage.

(If applicable to the Project, the policy must include benefits under the United States Longshoremen's and Harbor Workers' Act and the Jones Act coverage--all maritime coverage.)

**(b)** Commercial General Liability Insurance shall be written on a coverage form as broad as Insurance Services Office (ISO) Form CG 00 01 11 85, or its successor form, including but not limited to the following coverage (any deviation shall be noted on the Certificates of Insurance):

a. Premises, Operations, Products and Completed Operations
b. Owners' & Contractors' Protective
c. Products & Completed Operation
d. Explosion, Collapse & Underground Conditions
e. Blanket Contractual Liability
f. Personal Injury Liability
g. Broad Form Property Damage Endorsement, including Completed Operations
h. Independent Contractors
i. Watercraft--Owned and Non-Owned (if applicable, endorsement must be included in General Liability policy or a separate Protection & Indemnity Policy must be written)
j. Pollution Liability (if applicable)
k. Asbestos Abatement (if applicable)
l. Fire Damage Liability

Certain coverage outlined above may not be required if they do not relate to the Project, as may be determined at the sole discretion of the City.

Commercial General Liability Coverage shall be written on an occurrence basis and the limits shall be no less and not limited to the following amounts:

Limits (not less than)

$1 Million Each Occurrence
$2 Million General Aggregate
$1 Million Aggregate Products & Completed Operations

NOTE: Commercial General Liability Coverage must be purchased on either a project basis (separate policy per contract) or an endorsement allocating an aggregate limit per location or specified project.

**(c)** Automobile Liability Insurance is required if an Automobile(s) is used in the performance of the contract. ISO Symbol 1 (Any Auto), or alternatively a combination of Symbol 2 (Owned Autos), Symbol 8 (Hired Autos), and Symbol 9 (Non-Owned Autos), and limits shall be no less than:

| | |
|---|---|
| $1 Million | Combined Single Limit for Bodily Injury and Property Damage |

**(d)** Excess Liability

For contracts $250,000 or greater an Excess Liability Policy of at least but not limited to $1,000,000 in addition to the scheduled underlying policies for Commercial General Liability, Automobile Liability and Employers' Liability, the Contractor shall also provide an Excess Liability Policy with a maximum self-insured retention not to exceed $25,0000 per occurrence.

**(e)** Builder’s Risk

Contractor shall purchase Builder’s Risk Insurance for any contracts that are deemed to be vertical construction on an All-Risk policy, and shall also include coverage for wind, hail, and named storm. Limits of coverage shall be at least and not limited to the value of the project.

**(f)** Professional Liability, Malpractice and/or Errors and Omissions

The Contractor shall purchase and maintain professional liability, malpractice, or errors or omissions insurance with minimum limits of $1,000,000 per occurrence. If a claims made form of coverage is provided, the retroactive date of coverage shall be no later than the inception date of claims made coverage, unless the prior policy was extended indefinitely to cover prior acts. Coverage shall be extended

beyond the policy year either by a supplemental extended reporting period (ERP) of as great a duration as is available, and with no less coverage and with reinstated aggregate limits, or by requiring that any new policy provides a retroactive date no later than the inception date of claims made coverage.

## D. Requirements for Certificates of Insurance

**1.** With the execution of the Contract Documents, the Contractor, including service related contractors, shall provide certificates of such insurance acceptable to the City. These certificates and insurance policies shall contain an endorsement that the coverage under the policies will not be canceled, non-renewed or materially changed until at least thirty (30) days' prior written notice of such cancellation, non-renewal or change (except for nonpayment of premium, which shall be ten (10) days) and a copy of the cancellation endorsement signed by an authorized representative of the insurer, be given to the City. The contractor shall be required to replace any expired or canceled policies in like amount and coverage to the satisfaction of the City. The Certificate of Insurance shall be the ACORD FORM 25-S (7/90), or its successor form, and shall be made a part of the Contract Documents.

**2.** New certificates of insurance shall be provided to the City at least fifteen (15) days prior to coverage renewals.

**3.** If requested by the City, the contractor shall immediately furnish complete copies of the Contractor's insurance policies, forms and endorsements.

**4.** For Commercial General Liability coverage the Contractor shall, at the option of the City, provide an indication of the amount of claims payments or reserves chargeable to the aggregate amount of liability coverage. If the Commercial General Liability form of coverage includes an annual aggregate limitation on the amount of insurance provided, a separate project aggregate limit may be required by the City for the given contract.

**5.** If the Contractor fails to obtain and maintain for the life of the Project the insurance required hereby or to replace any such expired or canceled policy, the City may obtain and maintain such insurance with such company as it deems satisfactory. Any amounts expended by the City in payment of premiums for such insurance shall be deducted by the City form the amount due the Contractor for the work covered by the Contract.

## E. Policies of Insurance

**1.** Except as otherwise provided in this Exhibit, all insurance policies shall be issued by insurers licensed to do business in the State of Florida on an admitted basis or which is an eligible surplus lines insurer in the State of Florida, and any such insuring company is required to have a minimum financial rating of (A-), in the latest edition of "Best's Key Rating Guide",

published by A. M. Best Co., Inc., or some similarly nationally recognized rating authority, including Standard and Poors and Demotech.

**2.** For Workers' Compensation coverage only, self-insurance programs are acceptable with a minimum A- rated reinsurance carrier; written confirmation is required.

**3.** All policies of insurance or certificates thereof referred to in this Exhibit shall be deposited with the City Clerk.

**4.** The City shall be named an Additional Insured on General Liability including products and completed operations and Automobile Liability policies of insurance and certificates thereof.

## VERIFICATION OF EMPLOYMENT STATUS USING E-VERIFY SYSTEM

**1.** Undersigned firm warrants it **IS** currently registered with the U.S. Department of Homeland Security's E-Verify system, **and** is compliant with the requirements of Sections 448.09 and 448.095, *Florida Statutes*.

**2.** Undersigned firm warrants it **has not** had any contracts terminated as a result of violations of Sections 448.09 or 448.095, *Florida Statutes*, that prohibit it from contracting with a public agency.

**3.** Undersigned firm warrants that if it enters into an agreement with a subcontractor, an express provision shall be included in all of its subcontracts requiring subcontractors, who perform work or provide services pursuant to the contract, to use the E-Verify system to verify employment eligibility of all new employees hired by the subcontractor during the contract term.

**4.** Undersigned firm understands that any subcontractor must provide the contractor with an affidavit stating that the subcontractor does not employ, contract with, or subcontract with an unauthorized alien, and the contractor understands it shall maintain any such affidavits for the duration of the contract, and the contract with the subcontractor must be immediately terminated if the City has a good faith belief that the subcontractor knowingly violated Section 448.09 (1), *Florida Statutes*.

**5.** Undersigned firm understands that in the event the City has a good faith belief that the contractor has knowingly violated Section 448.09 (1), *Florida Statutes*, the City shall terminate the contract, and the contractor may not be awarded a public contract for a period of at least one (1) year after the date of termination. The contractor may be held liable for any additional costs incurred by the City as a result of termination of the contract.

## RFP RESPONSE FORM

THIS RESPONSE IS SUBMITTED TO:

Purchasing Coordinator
City of Ormond Beach
22 S. Beach Street
Ormond Beach, Florida 32174

The undersigned SUBMITTER proposes and agrees, if this Submittal is accepted, to enter into a Contract with the CITY that reflects the items of this Request for Proposal (RFP) and to provide all services, as specified or indicated in the RFP Documents, in full accordance with the terms and conditions set forth in therein.

SUBMITTER accepts all of the terms and conditions of the General Conditions. SUBMITTER will sign the Contract) and submit the Contract security (when applicable) and other documents required by the Contract Documents within ten (10) days after the date of CITY's Notice of Award.

In submitting this information, SUBMITTER represents, as more fully set forth in the Agreement, that:

SUBMITTER has examined copies of all the RFP Documents and of the following Addenda:

| Addendum Date | Addendum Number |
|---|---|
| _____ | _____ |
| _____ | _____ |
| _____ | _____ |

Receipt of all of which is hereby acknowledged.

This Submittal is genuine and not made in the interest of or on behalf of any undisclosed person, firm or corporation and is not submitted in conformity with any agreement or rules of any group, association, organization or corporation; SUBMITTER has not directly or indirectly induced or solicited any other Submitter to submit a false or sham Submittal; SUBMITTER has not solicited or induced any person, firm or a corporation to refrain from bidding; and SUBMITTER has not sought

by collusion to obtain for himself any advantage over any other Bidder or over the CITY.

## DRUG-FREE WORKPLACE CERTIFICATION

**IDENTICAL OR "TIE" SUBMITTALS**: Preference shall be given to businesses with drug-free workplace programs. Whenever two or more proposals which are equal in respect to price, quality, and service are received by the State or by any political subdivision for the procurement of commodities or contractual services, a bid received from a business that certifies that it has implemented a drug-free workplace program shall be given preference in the award process. Established procedures for processing tie bids will be followed if none of the tied vendors have a drug-free workplace program. In order to have a drug-free workplace program, a business shall:

1) Publish a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace and specifying the actions that will be taken against employees for violations of such prohibition.
2) Inform employees about the dangers of drug abuse in the workplace, the business's policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation, and employee assistance programs, and the penalties that may be imposed upon employees for drug abuse violation.
3) Give each employee that engages in providing the commodities or contractual services that are under bid a copy of the statement specified in subsection (1).
4) In the statement specified in subsection (1), notify the employees that, as a condition of working on the commodities or contractual services that are under bid, the employee will abide by the terms of the statement and will notify the employer of any conviction of, or plea of guilty or nolo contendere to, any violation of Chapter 893 or of any controlled substance law of the United States or any state, for a violation occurring in the workplace no later than five (5 ) calendar days after such conviction.
5) Impose sanctions on, or require the satisfactory participation in a drug abuse assistance or rehabilitation program if such is available in the employee's community, by any employee who is so convicted.
6) Make a good faith effort to continue to maintain a drug-free workplace through implementation of this section.

**City of Ormond Beach**

**City Commission Agenda**

**Staff Report**

| | | | |
|---|---|---|---|
| **Agenda Date** | July 22, 2025 | **Item No** | 7.Y. |
| **Section** | CONSENT AGENDA | **Category** | Consent - Disposition Item |
| **Subject** | Auto Renewal - Yellowstone Landscape Grounds Maintenance | | |
| **Recommended Action** | Staff intends to renew the Yellowstone Landscape contract for grounds maintenance for an additional year, unless otherwise directed. | | |
| **Strategic Goal** | Quality of Life - Other | | |
| **Department Staff Contact** | Leisure Services<br>Robert Carolin, Leisure Services Director | | |

Summary

On June 3, 2025 the City Commission tabled this item until corresponding documents and forms were included for additional review. As such, staff has added the following: updated certificate of insurance, maps of service areas, and summaries of service amendments approved each fiscal year. Below is the previous agenda request with additional renewal information provided for consideration.

The City is presenting this item for City Commission approval of a one-year renewal of the Yellowstone Ground Maintenance agreement. This action aligns with the directives received during the Ground Maintenance workshop conducted on August 20, 2024, wherein staff reviewed the current Yellowstone agreement - including sites, level of service, and costs - and received Commission direction to renew the agreement. The renewal ensures the ongoing maintenance and operational integrity of City grounds, consistent with the standards and expectations established by the Commission. Attached for reference is a copy of the August 20, 2024 Grounds Maintenance Contract workshop presentation and minutes.

The current Yellowstone, formerly Austin Outdoor LLC, agreement provides mowing and grounds maintenance services to over 375 sites within the City, including mowing, edging, string trimming, blowing-off of hard surfaces, debris pickup and removal, weed control (manual and chemical), fertilization (turf grasses, plant material and trees), irrigation services (testing, parts and repair), landscape detail services (shaping, pruning and trimming), palm tree pruning, annual flower installation, mulch re-surfacing, and pest control and prevention. The agreement has been renewed annually since the expiration of its initial term in 2015. Additionally, the City Commission has approved multiple amendments to ensure appropriate service levels are included for new sites.

As discussed at the August 20, 2024 workshop, City staff conduct periodic reviews to ensure service costs remain competitive, at or below market rates. In contrast to comparable municipalities, the City's agreement generally falls 10% to 44% lower in the areas of irrigation, mulch, palm pruning, and bulk mowing. Several environmental factors significantly influence grounds maintenance costs - such as vegetation, slopes, terrain, soil quality, tree types and locations, and canopy cover - impacting the frequency, difficulty, and costs of tasks. Commercial rates further indicate the City's contract rates are significantly lower, 50% below market for irrigation, and more than 50% below market rate for palm trimming. In additional to basic services, the City's agreement also provides for higher level of services such as seasonal flower plantings, higher quality grass selection, and additional irrigation sites.

Under this agreement, Yellowstone is permitted to request a CPI increase each year in the amount of the actual CPI or 4%, whichever is less. This request will be submitted separately in September to the City Commission. Adjusting the cost of services by the CPI, with a cap of 4%, preserves the competitiveness of the agreement while preventing significant cost increases based on economic fluctuations. Overall, Yellowstone's pricing and responsive service supports the City's goal of providing high-quality, cost-effective services to its residents.

Financial Impact

Funds for the contracted amount are included in the FY 2025-26 budget. Funding for this contract is provided from the General Fund (001), Community Redevelopment Fund (104), Water/Wastewater Operating Fund (401), Airport Fund (108), and Solid Waste Fund (460). The current budgeted contract price is $1,994,554.69. This does not include the 2025 CPI Adjustment. Contractually, the CPI Adjustment item will be brought back in a future Commission meeting.

Citizen Impact

The auto-renewal of the grounds maintenance contract ensures the City grounds are maintained in the appropriate manner and residents are able to continue to enjoy the grounds which promotes greater quality of life.

**Agreement with Austin Outdoor, LLC**
**for Grounds Maintenance Services**

**THIS AGREEMENT** is made and entered into by and between the **City of Ormond Beach** ("City"), a Florida municipal corporation, 22 South Beach Street, Ormond Beach, Volusia County, Florida and **Austin Outdoor, LLC**, P.O. Box 849, Bunnell, FL 32110, ("Contractor"), and in consideration of the mutual promises and covenants herein contained, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree to the following.

1. **Scope of Work.** The document entitled "Invitation to Bid [Grounds Maintenance Services-Facilities, Parks & Right of Ways, Bid No. 2012-10]", attached hereto as Exhibit "A" is incorporated herein by reference and is a material part of this Agreement. The Contractor shall fully comply with the terms and conditions described in the attached exhibit.

2. **Term.** The initial term of this Agreement shall be for a period of three (3) years, commencing on October 1, 2012 through September 30, 2015; and will be automatically renewed for additional one (1) year periods on October 1st of each year thereafter unless either party provides at least ninety (90) days prior written notice to the other party of their intent not to renew the Agreement.

3. **Consideration.** The Contractor shall provide the equipment and perform the services at the prices described in Exhibit "A". Contractor shall prepare and submit invoices to the City at the address set forth in Paragraph 9 of this Agreement. All such invoices shall be paid by the City pursuant to the Florida Prompt Payment Act, Chapter 218 (Part VII), Sections 218.70-218.80, *Florida Statutes*, as the same presently exists or may hereafter be amended.

4. **Termination of Agreement.** This section is supplemental to Exhibit "A".

   (a) The City Commission shall have the right to terminate the Agreement in the event the Contractor files any petition or proceeding for bankruptcy relief, or is adjudicated to be bankrupt or insolvent, or fails to pay just debts as they ordinarily become due.

   (b) This Agreement may not be terminated by the Contractor.

5. **Assignment.** The Contractor shall not assign, convey or transfer all or any part of this Agreement, or all or any part of Contractor's interest herein, or all or any part of any interest in the Contractor, without the prior written consent of the City Commission, which consent shall not be unreasonably withheld.

6. **Complete Agreement.** This Agreement, including the provisions set forth in the exhibit attached hereto and incorporated by reference herein, constitutes the entire and complete agreement of the parties, and the promises and covenants herein contained shall survive the life of this Agreement.

7. **Amendment to Agreement.** Any amendment, change or modification of this Agreement must be in writing and fully executed by both parties.

8. **Notices.** All notices which are required by this Agreement shall be provided to the parties at the following addresses, or such other addresses as may be requested in writing by either party:

| | |
|---|---|
| **City of Ormond Beach** | **Contractor** |
| Isaac D. Turner, City Manager | William M. Dellecker, President |
| (copy to City Attorney) | Austin Outdoor, LLC |
| 22 South Beach Street | P.O. Box 849 |
| Ormond Beach, FL 32174 | Bunnell, Fl 32110 |

9. **Sovereign Immunity.** The City expressly retains and reserves all rights, privileges, immunities, and benefits of sovereign immunity. This provision shall be construed broadly in favor of the City.

10. **Venue.** The terms and conditions of this Agreement shall be construed and enforced under the laws of the State of Florida. Any action or proceeding, either at law or in equity, regarding this Agreement shall be brought in the circuit court, Seventh Judicial Circuit in and for Volusia County, Florida. Venue in any other jurisdiction or forum, whether it be any other circuit, state or federal venue, is hereby expressly waived.

11. **Waiver of Conditions.** No waiver by the City of any condition or breach of performance by the Contractor shall constitute an irrevocable, continuing, or subsequent waiver by the City of the same condition or breach of performance, or of any other condition or other breach of performance.

12. **Severability.** If any part of this Agreement is declared to be unenforceable or void by a court of competent jurisdiction, the remaining parts of the Agreement shall remain in full force and effect as long as the services to be provided by the Contractor are not materially affected, altered or impaired as a result of said judicial declaration.

13. **Conflicting Provisions.** In the event of any conflict between the provisions of this Agreement and any exhibits, the provision most favorable to the City shall control and shall be given full force and effect.

14. **Indemnification**. The City, its agents, employees, and officials, both elected and appointed, shall be indemnified and held harmless by Contractor from any and all liabilities, claims, and causes of action which may arise out of the willful, negligent, or unlawful acts or omissions of the Contractor or its subcontractors in the performance of this Agreement, unless such claims are a result of the City's sole negligence, as determined by the final decision maker of such claim.

15. **Duty to Defend.** The Contractor shall defend all suits and administrative actions, including all appellate proceedings, brought against the City, its agents, employees, and officials, both elected and appointed and shall pay all attorneys' fees and costs associated with the City's legal defense, as may be selected by the City, arising from all claims and causes of action described in Section 15 above. Such payment on behalf of the City shall be in addition to any and all other legal or equitable remedies available to the City and shall not be considered to be the City's exclusive remedy.

16. **Contractor's Insurance.** The Contractor shall purchase and maintain for the entire life of this Agreement, including any and all approved time extensions, until its final acceptance by the City, such insurance as will protect the Contractor from claims under Workers' Compensation, disability benefit laws or other similar employee benefit laws; from claims for damages because of bodily injury, occupational sickness or disease, or death of Contractor's employees; from claims insured by usual or unusual injury liability coverage; from claims or injury to or destruction of tangible property and from claims insured by usual Commercial General Liability coverage. This includes loss of use resulting therefrom, any or all of which may arise out of the Contractor's operations under this Agreement, whether such operations be by the Contractor, or by any Subcontractor, or by anyone directly or indirectly employed by any of them or for whose acts any of them may be legally liable. The Contractor's deductibles/self-insured retentions shall be disclosed to the City and may be disapproved by the City, and may be reduced or eliminated at the sole discretion of the City. The Contractor is responsible for the amount of any deductible or self-insured retention.

17. **Types of Insurance and Limits of Liability.** The insurance required herein shall be written for not less than the limits of liability specified herein or as required by law, whichever is greater, and shall include the following:

(a) Workers' Compensation Insurance in statutory limits for the State of Florida with Coverage B - Employer's Liability limits of not less than:

$100,000. Each Accident Bodily Injury by Accident
$100,000. Each Employee Bodily Injury by Disease
$500,000. Policy Limit Bodily Injury by Disease

Certificate of Exemptions. If the contractor has a State-issued Certificate of Exemption, the contractor may provide a copy in place of the requirement for coverage. However, if the contractor subcontracts or retains any other person or entity to perform under the contract, that person or entity must provide proof of workers' compensation insurance as required by law or provide a Certificate of Exemption.

It is the intent of the City that any individual who either contracts directly with the city or performs any work on behalf of any such contractor be covered by workers compensation insurance or have a valid exemption from said coverage.

(If applicable to the Project, the policy must include benefits under the United States Longshoremen's and Harbor Workers' Act and the Jones Act coverage--all maritime coverages.)

(b) **Commercial General Liability Insurance** shall be written on a coverage form as broad as Insurance Services Office (ISO) Form CG 00 01 11 88, or its successor form, including but not limited to the following coverages (any deviation shall be

noted on the Certificates of Insurance), and the CITY OF ORMOND BEACH shall be named as an additional insured:

1. Premises and Operations
2. Owners' & Contractors' Protective
3. Products & Completed Operations
4. Explosion, Collapse & Underground Conditions
5. Blanket Contractual Liability
6. Personal Injury Liability
7. Broad Form Property Damage Endorsement, including Completed Operations
8. Independent Contractors
9. Watercraft--Owned and Non-Owned (if applicable, endorsement must be included in General Liability policy or a separate Protection & Indemnity Policy must be written)
10. Pollution Liability (if applicable)
11. Asbestos Abatement (if applicable)
12. Fire Damage Liability

Certain coverages outlined above may not be required if they do not relate to the Agreement, as may be determined at the sole discretion of the City.

**Commercial General Liability Coverage** shall be written on an occurrence basis and the limits shall be no less than the following for all tiers of Contractors and Subcontractors:

| Contract Value | Limits (not less than) |
|---|---|
| 0 - 25,000 | $300,000 Each Occurrence |
| | $300,000 General Aggregate* |
| | $300,000 Aggregate Products & Completed Operations |
| | $ 25,000 Fire Damage (any one fire) |
| $25,001 - $250,000 | $500,000 Each Occurrence |
| | $1 Million General Aggregate* |
| | $1 Million Aggregate Products & Completed Operations |
| | $ 50,000 Fire Damage (any one fire) |
| $250,001 - $3,000,000 | $1 Million Each Occurrence |
| | $1 Million General Aggregate* |
| | $1 Million Aggregate Products & Completed Operations |
| | $ 50,000 Fire Damage (any one fire) |

| | |
|---|---|
| $3,000,001 & over | 20% of the Value of the Contract [Minimum $1 Million Each Occurrence/$2 Million General Aggregate] |

*NOTE: Commercial General Liability Coverage must be purchased on either a project basis (separate policy per contract) or an endorsement allocating an aggregate limit per location or specified project.

(c) **Automobile Liability Insurance** for the operation, use, maintenance, loading or unloading of automobiles - ISO Symbol 1 (Any Auto) or alternatively a combination of Symbol 2 (Owned Autos), Symbol 8 (Hired Autos), and Symbol 9 (Non-Owned Autos). The coverage limits shall be no less than the following for all tiers of Contractors and Subcontractors:

| **Contract Value** | **Limits (not less than)** |
|---|---|
| 0 - 25,000 | $300,000 Combined Single Limit |
| $25,001 - $250,000 | $500,000 Combined Single Limit |
| $250,001 and over | $1 Million Combined Single Limit |

(d) Excess Liability

For Contracts of $250,000 or more, and in addition to the scheduled underlying policies for Commercial General Liability, Automobile Liability and Employers' Liability, the Contractor shall also provide an Excess Liability Policy with a maximum self-insured retention for occurrences insured in this Excess Policy not to exceed $25,000 and a minimum limit of $1 Million.

(e) Professional Liability, Malpractice and/or Errors and Omissions

The Contractor shall purchase and maintain professional liability, malpractice, or errors or omissions insurance with minimum limits of $1,000,000 per occurrence. If a claims made form of coverage is provided, the retroactive date of coverage shall be no later than the inception date of claims made coverage, unless the prior policy was extended indefinitely to cover prior acts. Coverage shall be extended beyond the policy year either by a supplemental extended reporting period (ERP) of as great a duration as is available, and with no less coverage and with reinstated aggregate limits, or by requiring that any new policy provide a retroactive date no later than the inception date of claims made coverage.

18. **Requirements for Certificates of Insurance.**

(a) With the execution of this Agreement, the Contractor shall provide certificates of such insurance acceptable to the City. These certificates and insurance policies shall contain a provision that the coverage under the policies will not be canceled, non-renewed or materially changed until at least **thirty (30)** days' prior written notice of such cancellation, non-renewal or change [except for nonpayment of premium, which shall be **ten (10)** days] has been given to the City. The Contractor shall be

required to replace any expired or canceled policies in like amount and coverage to the satisfaction of the City. The Certificate of Insurance shall be the ACORD FORM 25-S (7/90), or its successor form, and shall be made a part of this Agreement.

(b) New certificates of insurance shall be provided to the City at least fifteen (15) days prior to coverage renewals.

(c) If requested by the City, the Contractor shall furnish complete copies of the Contractor's insurance policies, forms and endorsements.

(d) For Commercial General Liability coverage the Contractor shall, at the option of the City, provide an indication of the amount of claims payments or reserves chargeable to the aggregate amount of liability coverage. If the Commercial General Liability form of coverage includes an annual aggregate limitation on the amount of insurance provided, a separate project aggregate limit may be required by the City for the given contract.

(e) If the Contractor fails to obtain and maintain for the life of the Agreement the insurance required hereby or to replace any such expired or canceled policy, the City may obtain and maintain such insurance with such company as it deems satisfactory. Any amounts expended by the City in payment of premiums for such insurance shall be deducted by the City from the amount due the Contractor for the work covered by the Agreement.

(f) **Policies of Insurance**

1. Except as otherwise provided herein, all insurance policies shall be issued by insurers licensed to do business in the State of Florida on an admitted basis or which is an eligible surplus lines insurer in the State of Florida, and any such insuring company is required to have a minimum financial rating of (A-) in the latest edition of "Best's Key Rating Guide", published by A. M. Best Co., Inc., or some similarly nationally recognized rating authority, including Standard and Poors and Demotech.

2. For Workers' Compensation coverage only, self-insurance programs are acceptable with a minimum A- rated reinsurance carriers; written confirmation is required.

3. All policies of insurance or certificates thereof referred to herein shall be deposited with the City Clerk.

4. The City shall be named an Additional Insured on all policies of insurance and certificates thereof.

19. **Enforcement of Costs.** If any legal action or other proceeding is brought for the enforcement of this Agreement, or because of an alleged dispute, breach, default, or misrepresentation in connection with any provision of this Agreement, the successful or prevailing party or parties shall be entitled to recover reasonable attorneys' fees, court costs, and all expenses even if not taxable court costs (including, without limitation, all such fees, costs and expenses incident to arbitration, appellate, bankruptcy, and post-judgment

proceedings), incurred in that action or proceeding or any appeal, in addition to any other relief to which the party or parties may be entitled. Attorneys' fees include legal assistant fees, expert witness fees, investigative fees, administrative costs, and all other charges billed by the attorney for the prevailing party.

20. **Effective Date.** This Agreement shall become effective upon the date last signed by the parties hereto.

IN WITNESS WHEREOF, the undersigned parties have caused this Agreement to be signed on the dates indicated hereinbelow.

DATED this 19th day of June, 2012.

## INVITATION TO BID

### GROUNDS MAINTENANCE SERVICES – FACILITIES, PARKS & RIGHTS OF WAY
### Bid No. 2012-10

## GENERAL CONDITIONS

**PUBLIC ENTITY CRIMES:** A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a Bid on a contract to provide any goods or services to a public entity, may not submit a Bid on a contract with a public entity for the construction or repair of a public building or public work, may not submit Bids on leases or real property to a public entity, may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with any public entity in excess of the threshold amount provided in Section 287.017, for CATEGORY TWO for a period of 36 months from the date of being placed on the convicted vendor list.

**DISCRIMINATION:** Pursuant to Section 287.134(2)(a), Florida Statutes, an entity or affiliate who has been placed on the discriminatory vendor list may not submit a bid or proposal on a contract to provide any goods or services to a public entity, may not submit a bid or proposal on a contract with a public entity for the construction or repair of a public building or public work, may not submit bid or proposal on leases of real property to a public entity, may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with any public entity.

**PUBLIC RECORDS/NON-CONFIDENTIALITY OF BIDS AND/OR PROPOSALS:** The City of Ormond Beach cannot and does not warrant the confidentiality of any information submitted in response to this solicitation. Florida law provides that municipal records shall at all times be open for personal inspection by any person, Section 119.01, F.S., The Public Records Law. Information and materials received by the City of Ormond Beach in connection with all Proposers' response shall be deemed to be public records subject to public inspection upon award, recommendation for award, or 10 days after bid opening, whichever occurs first. Section 119.071, F.S.

**NOTIFICATION OF BIDS AND RFP'S:** The City uses the services of Onvia DemandStar (www.demandstar.com) for notification of its Bids and RFP's on-line on the Internet. If you have received a copy of this Bid/RFP from any source other than Onvia DemandStar, please be aware that you may not have received the latest version of the Bid/RFP or any related addendums.

**SUBMISSION OF BIDS:** All Bids shall be submitted in a sealed envelope. The Invitation to Bid (ITB) number, title, and opening date shall be clearly displayed on the outside of the sealed envelope. The delivery of said Bid to the Purchasing Office on or before the specified opening date and time is solely and strictly the responsibility of the Bidder. Any Bid received by the Purchasing Office after the specified date and time will not be accepted. Bids must be submitted on forms provided by the City. No other forms will be accepted. Telephone, telefax and telegraph Bids will not be considered. No Bid may be modified after opening. **No Bid may be withdrawn after opening for a period of One Hundred and Twenty (120) days unless otherwise specified.**

**EXECUTION OF BID:** Bid must contain a manual signature of authorized representative in the space(s) provided. Bids must be typed or printed in ink. Use of erasable ink is not permitted. All corrections made by Bidder to any Bid entry must be initialed. The company name and Federal Employer Identification Number (F.E.I.D.) shall appear in the space(s) provided.

# CITY OF ORMOND BEACH
## INVITATION TO BID

### GROUNDS MAINTENANCE SERVICES – FACILITIES, PARKS & RIGHTS OF WAY
### Bid No. 2012-10

**PRE-BID MEETING:** Any bidder wishing to respond to this solicitation will be required to attend a pre-bid meeting at a date and time prescribed herein.

**BID OPENING:** Bids shall be opened and the name of the Bidders and the bid amounts shall be read publicly. Bid amounts announced at the bid opening are subject to change due to math errors made by Bidders

**BID TABULATION:** Any Bidder wishing to receive a copy of the Bid tabulation is required to enclose a stamped, self-addressed envelope with their Bid response. Bid opening tabulations will be posted on DemandStar.com.

**CLARIFICATION/CORRECTION OF BID ENTRY:** The City of Ormond Beach reserves the right to allow for the clarification of questionable entries and for the correction of obvious mistakes.

**INTERPRETATION:** Any questions concerning conditions and specifications shall be directed to the Purchasing Coordinator. Those interpretations which may affect the eventual outcome of this Bid will be furnished in writing to all prospective Bidders. No interpretation shall be considered binding unless provided in writing by the City of Ormond Beach.

**MINORITY POLICIES:** The City of Ormond Beach, Florida, encourages the full participation of Disadvantaged and Women Business Enterprises (D&WBE) in the provision of goods and services.

**LICENSES AND PERMITS:** The vendor is responsible for obtaining all necessary permits and licenses to comply with all Federal, State, and Local laws, rules and regulations required to perform work in accordance with the specifications.

**LOCAL VENDOR PREFERENCE:** The City *may* give a local preference in the amount of three percent (3%) of the bid price or $25,000, whichever is less. The bid price shall include not only the base bid price but all alternatives which are part of the bid and actually purchased or awarded. A Local Vendor Affidavit of Eligibility shall accompany the bid submittal to be considered valid.

**PRICING:** Firm prices shall be proposed and include FOB DESTINATION, all packing, handling, shipping charges and delivery to any point within the City of Ormond Beach to a secure area or inside delivery. Prices shall be valid for One Hundred and Twenty (120) days from date of Bid opening. In the event there is a discrepancy between the unit price and the extended amount, the unit price will prevail.

**ADDITIONAL TERMS AND CONDITIONS:** The City of Ormond Beach reserves the right to reject Bids containing any additional terms or conditions not specifically requested in the original conditions and specifications.

**TAXES:** The City of Ormond Beach is exempt from Federal Excise Taxes and all sales taxes.

**DISCOUNTS:** All discounts EXCEPT THOSE FOR PROMPT PAYMENT shall be considered in determining the lowest net cost for Bid evaluation purposes. If a Bidder offers a discount, it is understood that the discount time will be computed from the date of satisfactory delivery, at the place of acceptance, and receipt of correct invoice, at the office specified, whichever occurs last.

**SILENCE OF SPECIFICATIONS:** The apparent silence of any specification and any supplemental specifications as to any details or the omission from same of any detailed description concerning any point shall be regarded as meaning that only the best commercial practices are to prevail and that only materials of first quality and correct type, size, and design are to be used. All workmanship is to be first quality. All interpretations of the specifications shall be made upon the basis of this statement.

**ASSIGNMENT:** Any purchase order or contract issued pursuant to a Bid and the monies which may become due there under are not assignable except with the prior written approval of the City Manager or City Commissioner, whoever authorized the purchase.

**LIABILITY:** The vendor shall hold and save the City of Ormond Beach, its officers, agents, and employees harmless against claims by third parties resulting from the vendor's or supplier's breach of contract or negligence, including all attorney's fees and costs, and shall pay any and all damages, fees, and costs assessed on behalf of the City. The City expressly reserves all rights, privileges and benefits of sovereign immunity.

**PATENTS AND ROYALTIES:** The Bidder, without exception, shall indemnify and save harmless the City of Ormond Beach and its employees from liability of any kind, including cost and expenses for or on account of any copyrighted, patented, or unpatented invention, process, or article manufactured or used in the performance of the contract, including its use by the City of Ormond Beach. If the Bidder uses any design, device, or materials covered by letters, patent or copyright, it is mutually agreed and understood without exception that the Bid prices shall include all royalties or cost arising from the use of such design, device, or materials in any way involved in the work.

**SAFETY WARRANTY:** The selling dealer, distributor, supplier, and manufacturer shall be responsible for compliance with all Federal, State and local laws, rules and regulations concerning the equipment and/or service specified and the use thereof, applicable and effective on the date of manufacture including safety and environmental standards as apply to both private industry and governmental agencies.

**WARRANTY:** The Bidder agrees that, unless otherwise specified, the services furnished under the Bid shall be covered by the most favorable commercial warranty for comparable services, and that the rights and remedies provided herein are in addition to and do not limit any rights afforded to the City of Ormond Beach by other provision of the Bid.

**AWARDS:** The City reserves the right, in its sole discretion, as the best interest of the City may require, to make award(s) by individual item, group of items, all or none, or a combination thereof; on a geographical basis and/or with one or more vendors or contractors; or to reject any and all Bids or waive any minor irregularity or technicality in the Bids received.

**NON-APPROPRIATION OF FUNDS:** In the event sufficient budget funds are not available for a new fiscal period, the CITY shall notify the VENDOR/CONTRACTOR of such occurrence and the contract shall terminate on the last day of the current fiscal period, without any penalty or expense to the CITY of any kind whatsoever.

# CITY OF ORMOND BEACH
## INVITATION TO BID
### GROUNDS MAINTENANCE SERVICES – FACILITIES, PARKS & RIGHTS OF WAY
### Bid No. 2012-10

**THE CITY OF ORMOND BEACH RESERVES THE RIGHT TO REJECT ANY OR ALL BIDS, AND TO WAIVE INFORMALITIES, AS MAY BE DEEMED TO BE IN THE BEST INTEREST OF THE CITY.**

If the Bidder proposes to furnish an "Equivalent" product, the brand name, if any, of the product to be furnished shall be inserted in the space provided or such product shall be otherwise clearly identified. The evaluation of Bids and the determination as to equality of the product offered shall be the responsibility of the City and will be based on information furnished by the Bidder. The Purchasing Coordinator is not responsible for locating or securing any information which is not identified in the Bid and reasonably available to the Purchasing Coordinator. To insure that sufficient information is available the Bidder shall furnish as a part of the Bid all descriptive material necessary for the Purchasing Division to determine whether the product offered meets the salient characteristics required by the specifications and establish exactly what the Bidder proposes to furnish and what the City would be binding itself to purchase by making an award.

OTHER AGENCIES: Any bidder(s) awarded a contract resulting from this bid is/are given the privilege and is/are required to permit all public and governmental entities in the State of Florida to participate in the contract under the same terms and conditions.

It is understood that at no time will any agency be obligated for placing an order for any other agency. Each agency will only have the authority to obligate itself and will not be held responsible for bills incurred by any other agency. Further, it is understood that each agency will issue its own purchase order(s) or contract to successful bidder(s).

## GENERAL INSTRUCTIONS

**STATEMENT OF PURPOSE:** The City of Ormond Beach, Florida, is requesting Bids and intends to select a qualified firm or individuals to provide the City with professional grounds maintenance services throughout the entire City of Ormond Beach (Zones 1 through 4) for all facilities, parks and rights of way.

**SCHEDULE OF BID:**

| | |
|---|---|
| March 11, 2012 | Legal Advertisement |
| March 21, 2012 | **Mandatory** Pre-Bid Meeting at 2:00 P.M., Human Resources Training Room, Ormond Beach City Hall, 22 S. Beach Street Ormond Beach, Florida 32174. |
| April 25, 2012 | Bids due, no later than 10:00 A.M., in the office of the Purchasing Coordinator, Ormond Beach City Hall, 22 S. Beach Street Ormond Beach, Florida 32174. |

**TERM OF AGREEMENT:** The initial term of this Agreement shall be for a period of **three (3) years** starting on the commencement date and will be automatically renewed for additional **one (1) year periods** unless either party provides at least ninety (90) days prior written notice of non-renewal prior to the end of the initial term or one of the renewal terms.

# CITY OF ORMOND BEACH
## INVITATION TO BID

### GROUNDS MAINTENANCE SERVICES – FACILITIES, PARKS & RIGHTS OF WAY
### Bid No. 2012-10

**BID DELIVERY:** Submit **one (1) signed and unbound original** Bid packet, with all required attachments, by the closing date and time. Deliver Bids to: Purchasing Coordinator, Ormond Beach City Hall, 22 South Beach Street, Ormond Beach, Florida 32174. **Make sure the bid number is clearly visible on the outside of the delivery package. Bids delivered after the time and date specified will not be accepted.** For any question regarding bid delivery contact the purchasing office at 386-676-3223.

**TECHNICAL QUESTIONS:** Submit all technical questions regarding this Bid to the City's Landscape Architect, Paul MacDonald, by telephone (386) 676-3296 or by e-mail, macdonald@ormondbeach.org.

**REJECTION RIGHTS:** The City of Ormond Beach reserves the right, at any time, to modify, waive or otherwise vary the terms and conditions of this Bid including, but not limited to, the deadlines for submission and submission requirements. The City further reserves the right to reject any or all submittals, to cancel or withdraw this Bid at any time and to negotiate with any party prior to or after submittal of proposals.

**COST OF BID PREPARATION:** No reimbursement will be made by the City of Ormond Beach for any costs incurred in the preparation of the Bid, proposal or presentation.

**BIDS TO BE IN EFFECT:** Each Bid shall state that it is valid for a period of not less than one hundred and twenty (120) days from date of receipt.

**BID FORM:** Bids shall be submitted on standard forms which are furnished in this Invitation to Bid. Bid Forms must be completed in ink or by typewriter. Where indicated on the Bid Form, the Bid price of each item on the form must be stated in words and numerals; in case of a conflict, words will take precedence. The Bid shall contain an acknowledgement of receipt of all Addenda (the numbers and dates of which shall be filled in on the Bid Form.)

**REGISTRATION AND RISK MANAGEMENT REQUIREMENTS:** Any Contractor doing work for the City of Ormond Beach, on City property shall be **registered** to do business in the City of Ormond Beach and shall provide **proof of**, abide by and maintain, for the entire life of the Contractual Agreement, including any and all approved time extensions, such **insurance** as is required by City ordinance, which shall be incorporated in and made part of the contract documents. This proof of insurance will be required prior to commencement of any **on-site** work.

**DEFINITION OF TERMS:** For the purpose of this Agreement the following terms, phrases, words and their derivations shall have the meaning given herein. When not inconsistent with the context, words used in the present tense include the future, words in the plural number include the singular number, and words in the singular number include the plural number. The word "shall" is always mandatory and not merely directory.

**Annual** - A plant that lives for only a year.

**Authorized Representative** - the employee or employees designated by the City Manager to represent the City in the administration and supervision of this contract.

**City** - the City of Ormond Beach, a Florida municipal corporation, acting through the City Commission or City Manager, or official designated by the City Manager as the case may be.

**Contractor** - the individual, firm or corporation who or which agrees to perform the work or services as set forth in this Agreement.

**Debris** - all material normally removed after maintenance or installation, such as sand, glass, paper, cans, trimmings, etc.; it does not include larger items such as large stones, wood, cable, etc.

**Director** - the Leisure Service Director, or his/her designee.

**Erosion** - the group of natural processes, including weathering, dissolution, abrasion, corrosion, and transportation, by which material is worn away from the earth's surface.

**Fertilizer** - anything added to the soil to maintain or increase its fertility. Fertilizers may be organic, that is derived from once-living matter, as are manure, compost, and bone meal; or inorganic (artificial), such as soleplate or ammonia or superphosphate, which are prepared in chemical factories.

**Ground Cover** - a dense, extensive growth of low-growing plants, other than turf grass, normally reaching a maximum height of not more than eighteen (18") inches at maturity.

**Herbicide** - a substance that kills plants or inhibits their growth. Nonselective herbicides, generally toxic, are used to clear all plants from a broad area; selective herbicides attack weeds without permanently harming ornamental plants.

**Irrigation System** - the supply of water to landscape areas by an automatic sprinkler system.

**Logbook** - an official record book with daily entries of project status, pertaining to plant condition, fertilization, herbicide, pesticides, and irrigation repairs.

**Mulch** - used in landscape design to retard erosion, weed infestation, and retain moisture in planting areas.

**Palm** - a monocot tree which normally attains an overall height of at least twenty (20) feet.

**Pesticide** - A chemical substance used to destroy or inhibit the lifecycle of non-beneficial insects or diseases causing pathogens.

**pH** - the scale on which the acidity or alkalinity of soil is measured. It ranges from 1, an acid of fearsome strength, to 14, an alkali of equal ferocity, with 7 being the neutral point. Most garden soils fall between a pH of 5.5 and 8.6.

**Plant Material** - any of the following or a combination thereof such as, but not limited to: grass, ground cover, shrubs, vines, hedges, trees and palms.

**Prune** - the removal of dead, dying, diseased, weak or objectionable branches in a manner consistent with the National Arborist Association standards as incorporated herein, and as may be amended.

**Shrub** - a self-supporting woody perennial plant normally growing to a height of twenty-four (24") inches or greater and characterized by multiple stems and branches continuous from the base.

**Sucker Growth** - a shoot or stem that arises from the roots or trunk bases of a tree or shrub.

**Supervision** - the act, process, or function of supervising.

**Top Soil** - a medium composed of naturally occurring mineral particles and organic matter which provides physical, chemical and biological properties necessary for plant growth.

**Tree** - any living self-supporting woody plant which locally grows to an overall height of fifteen (15) feet or greater with a minimum crown spread of fifteen (15) feet or greater and which has a trunk which can be maintained with over five feet of clear trunk.

**Turf Grass** - any member of the very large grass family (Poaceae or Gramineae). Any area planted with lawn grasses.

**Surety** - the party which is bound with and for the Contractor to insure the payment of all lawful debts pertaining to and for the acceptable performance of the Agreement.

**Weed** - any plant that is unwanted and a nuisance in the context of a particular environment, whether it be a garden, a cultivated field, a pasture or in natural woodland or forest.

## SCOPE OF WORK AND SPECIFICATIONS

**STATEMENT OF RESPONSIBILITIES:** The Contractor will be responsible for providing machinery, equipment, tools, all materials, labor, supervision, transportation, supplies, insurance, proper safety measures and all incidentals necessary to provide and perform grounds maintenance services as described and required in these specifications.

**MAINTENANCE CLASSES:** Staff has designated all locations within this bid as one of the following service classes or what we refer to as "level of finish". The more site visits performed, the higher level of finish is expected for a site with that designation.

Each class typically represents the frequency of turf grass mowings / cuts unless otherwise noted in the chart and other landscape related maintenance tasks such as pruning of trees, shrubs and groundcovers as needed or as specified in this bid document. Debris cleanup, edging, blowing, string trimming, weeding, removing or adjusting tree stake kits etc. must be performed with every scheduled site visit.

Example #1: Granada Medians – Class "A" requires 39 turf grass mowings and 39 landscape maintenance visits to accomplish the above written tasks.

Example #2: - Vining Court – Class "A" requires 0 turf grass mowings and 39 landscape maintenance visits to accomplish the above written tasks.

## Class "A" Maintenance

**Number of Site Visits:** A total of thirty-nine (39) **maintenance visits** shall be provided between January 1st and December 31st.

**Maintenance Frequency:** The first thirty (30) **visits** of the season are to occur every seven (7) days starting March 14th. The final nine (9) **visits** are to occur every fourteen (14) days (November 1st to March 13th).

## Class "B" Maintenance

**Number of Site Visits:** A total of twenty-nine (29) **maintenance visits** shall be provided between January 1st and December 31st.

**Maintenance Frequency:** The first two (2) **visits** of the season are to occur every fourteen days starting on April 1st. The next seventeen (17) **visits** of the season are to occur every seven (7) days (May 1st to August 31st). The next six (6) **visits** are to occur every fourteen (14) days (September 1st to November 30th). The final four (4) **visits** are to occur every thirty (30) days (December 1st to March 31st).

## Class "C" Maintenance

**Number of Site Visits:** A total of sixteen (16) **maintenance visits** shall be provided between January 1st and December 31st.

**Maintenance Frequency:** The first ten (10) **visits** of the season are to occur every fourteen days starting April 1st. The final six (6) **visits** are to occur every thirty (30) days (September 1st to March 1st).

## Class "D" Maintenance

**Number of Site Visits:** A total of eleven (11) **maintenance visits** shall be provided between January 1st and December 31st.

**Maintenance Frequency:** The eleven (11) **visits** are to occur approximately every thirty (33) days.

## The following maintenance activities will occur during each scheduled site visit:

**TRASH / DEBRIS CLEANUP:** The Contractor shall be responsible for removing all trash and debris, regardless of its source from all turf grass area, parking area, sidewalks mulched landscape areas and shorelines. This includes, but is not limited to paper, bottles, cans, palm fronds, tree limbs, etc. from all sites covered in this bid document. The Contractor is responsible for disposal of trash and debris in accordance with all federal, state and local laws, rules and regulations.

**MOWING OF TURF GRASS AREAS:** All turf grass areas within specified facilities, parks, rights-of-way (medians and shoulders) including adjacent curb gutters shall be cleaned of all trash and/or debris prior to mowing. Mowing of trash and debris to shred into smaller pieces is not allowed.

All turf grass areas shall be mowed as specified in this document. No more than one-third (1/3) of the leaf blade should be removed per mowing. The grass shall not be cut so low as to damage or stress the grass and shouldn't be allowed to reach a height of six (6") inches or more unless otherwise requested by the City. The minimum turf grass mowing heights are as follows:

**St. Augustine – 3" minimum mowing height**

**Empire Zoysia – 2" minimum mowing height**

**Argentine Bahia – 3" minimum mowing height**

Areas where large mowers are impractical shall be serviced using **small push mowers such as the narrow median tips along Granada Boulevard, US1, Nova Road and A1A.** Mowing of wet turf grass shall be avoided unless permission is authorized by City staff. Contractor shall leave surrounding area(s) in a clean condition free of accumulated debris, including but not limited to grass clippings, after each mowing. Large clumps of clippings will be distributed by mechanical blowing or collected and removed. Materials removed from grounds shall be disposed of off-site by the Contractor in a lawful manner.

**EDGING OF TURF GRASS:** Contractor shall edge all appropriate surfaces with suitable mechanical equipment including, but not limited to driveways, curbs, parking areas, walkways, fences, plant beds and tree wells, so that no grass, ground covers or weeds are left extending beyond or over the surface being edged. This includes edging between adjoining beds of dissimilar ground cover types.

**STRING TRIMMING OF TURF GRASS:** Final string trimming around permanent objects such as metal posts and concrete curbing shall be accomplished with suitable mechanical equipment and at the same cutting heights as the rest of the turf areas. Where string trimming may damage wooden posts, decorative light poles or other City property, other non mechanical means must be performed.

**BLOWING OF DEBRIS AND TURF GRASS CUTTINGS:** Contractor shall blow all appropriate surfaces with suitable mechanical equipment including, but not limited to driveways, curbs, parking areas, walkways, turf grass areas, plant beds and tree wells as required to leave the area clean and free of debris. **Grass clippings and other organic debris shall not be blown into the roadway or disposed of in storm sewer drains per City Ordinance, Section(s) 10-8 and 10-9.**

**PRUNING OF SHADE AND ORNAMENTAL TREES:** Trees are to be pruned to maintain their natural shape and form by cutting any limb or "flag" that creates an odd shape or appearance. Dead, dying, diseased, sucker growth, and weak branches shall be removed to maintain a minimum 7'6" clear trunk height to provide unimpeded pedestrian or vehicular use of the sidewalks, roadways, parking areas, turf grass areas, planting beds, playgrounds and to provide visibility to all traffic devices and business identification signage.

All pruning shall be performed in accordance with the latest approved ANSI - A300 pruning standards.

**Crape myrtle trees are not pruned within the City limits and are not part of this bid. However, the contractor is responsible to remove all sucker growth that occurs between the rootball and bottom of the tree canopy.**

**ADJUSTING AND REMOVING TREE STAKE KITS:** Contractor is required to maintain all newly planted trees in a straight vertical position by adjusting tree stake kits as needed. The contractor will also be responsible to completely remove all stake kits approximately six (6) months to one (1) year after initial planting.

**PRUNING OF ORNAMENTAL SHRUBS AND GROUNDCOVERS:** Contractor shall prune and shape all ornamental shrubs and ground cover to maintain the natural form of the plant material and maintain its growth within the limitations of the plant bed, to eliminate damaged or diseased wood, and to provide sight distance requirements, if needed (see ornamental pruning specifications). The Maximum shrub height if found within sight distance triangles is 2'-6".

**WEEDING OF LANDSCAPE PLANTING BEDS:** Weeds, grasses and unwanted plant growth shall be removed from all mulched planting areas by hand pulling to removing the entire root system, or by herbicide spraying to effectively kill the entire root system of unwanted plant material. Herbicide shall not be applied in close proximity to existing ornamental shrubs, groundcovers or near the root system of any palm tree, with no exceptions. Herbicides shall not be applied on windy days as the drift will likely kill untargeted plant materials or turf grasses. String trimming around tree trunks with mechanical devices is prohibited. Weeding of all planting beds (including pavement and sidewalk areas) shall take place during each and every scheduled service to ensure the overall aesthetics of the landscape is not adversely affected by weed growth.

**REMOVING DEAD PLANT MATERIAL:** Contractor is responsible to remove and dispose of all dead ornamental trees, shrubs and ground cover during each scheduled visit. The contractor is responsible to notify staff to determine if a replacement is necessary.

**FERTILIZATION, DISEASE AND INSECT CONTROLS:** All landscaped areas shall be treated as outlined below to maintain all trees, palms, shrubs, groundcovers, and turf grass in good, healthy appearance and color. An application schedule along with the specified products must be submitted and approved by the City prior to applications.

**The following maintenance specification and schedules must be adhered to during this maintenance contract:**

**TURF GRASS FERTILIZATION (St. Augustine and Empire Zoysia):** All turf grass shall receive four (4) pounds of nitrogen per 1,000 square feet during the growing season. Turf grass shall be fertilized four (4) times per year and no more than one (1) pounds of nitrogen per 1,000 square feet shall be applied during each scheduled visit. In addition, a complete fertilizer shall be granular in composition and contain thirty to fifty percent (30% - 50%) or more of the nitrogen in a slow release form. The ratio of nitrogen to potash will be 1:1 or 2:1. A complete fertilizer shall be applied twice per year in March and September.

**SHADE AND ORNAMENTAL TREE FERTILIZATION:** All trees shall be fertilized one (1) time per year in early Spring with a balanced, slow release fertilizer, including minors at a rate of one (1) lbs per inch of caliper measured at DBH (4.5' above rootball).

**PALM TREE FERTILIZATION:** All mature palms in the landscape shall receive a complete granular fertilizer formulated for palms ("palm special") two (2) times per year at a rate of eight (8) pounds per application. Fertilizer shall be applied in March and September. Broadcast the fertilizer under the canopy of the palm but not up against the trunk where newly emerging roots may be injured.

**SHRUB AND GROUNDCOVER FERTILIZATION:** All shrubs and ground covers plantings shall be fertilized one (1) times per year in March with a heavy application of a balanced, slow release fertilizer, including minors. Each planting bed shall receive one (1) pound of nitrogen per 1,000 square feet of bed area. The mulch is to be pulled back and the fertilizer shall be applied directly near the rootball of each plant. Broadcasting on-top of mulch will not be allowed unless approved by City staff.

**DISEASE & INSECT CONTROL:** Contractor is responsible for the immediate control and identification of any insect or disease causing organisms that may arise in any landscape area. Root drench and bud drench all Medjool Palms with City approved fungicide/insecticide at the rate recommended by the manufacturer up to two (2) times per year. Upon confirmation of a specific problem requiring treatment, pesticides will be applied as needed on a spot treatment basis, whenever possible using the least toxic, effective pesticide. All applications of pesticides and fertilizations will be performed when temperatures are below 90 degrees and wind drift is negligible. All applicators shall have a State licensed, certified operator on staff or use a City approved sub-contractor that is licensed and certified for pest control.

Records will be kept on pests identified and treatment(s) rendered for control, shall be submitted to the City Contract Manager. All service costs related to pest control are to be included in the "total cost", as listed in the Bid Schedule. The Contractor or subcontractor shall be in strict accordance with all state and local regulations concerning licensing and safety requirements and be registered with the City of Ormond Beach Building and General Inspections Division.

**HERBICIDES:** Herbicide(s) may be used only with the prior written approval of the City and only in those areas authorized by the City staff. Pre-emergence herbicide shall be applied for control of winter annual weeds and herbicide shall be applied when night-time temperatures drop to fifty-five to sixty degrees Fahrenheit for several consecutive days from late October 20th to early November 7th. Contractor shall be responsible for the identification of weeds and be competent to recommend appropriate selective herbicides. Selective herbicides shall be used to manage weed outbreaks throughout the growing season. All herbicide applicators must be State Licensed to apply herbicides, and a copy of that license shall be provided to the City.

**LANDSCAPE PLANTING BED MULCHING:** All mulched areas will be replenished once a year during the winter months of November to March. The Contractor will properly prepare all planting beds by cutting new bed edges, adjusting tree rings sizes (per City Landscape Architect direction), raking out or removing excess mulch, digging new edges along concrete curbs and sidewalks, removing all weeds and dead plant materials prior to top-coating existing mulch areas with grade "A" shredded cypress hardwood mulch with pre-emergent. The Contractor shall replace areas where wash out occurs due to storms on an as-needed basis and the repair work will be billed as an extra work item. Depth of mulch shall be a minimum of 3 inches and a maximum of 4 inches.

## PLANT MATERIAL PRUNING SPECIFICATIONS AND SCHEDULE:

**SHADE AND ORNAMENTAL TREES:** Contractor will be responsible to prune all trees within the locations listed in this bid document. All pruning shall be performed in accordance with the latest approved ANSI - A300 pruning standards. Contractor will not be responsible to prune trees above a 15' height limit. Some of the most common trees are listed below:

**Crape Myrtles:** Remove crisscross, dead, broken branches, sucker growth and maintain a minimum clear trunk height of 7'6". **We do not cut back or tip our Crapes on a yearly basis.**

**EP / Dahoon Hollies:** Prune to keep a loose natural form by removing any branches that take away from the natural oval shape. Remove all sucker growth and maintain a minimum clear trunk height of 7'6". DO SHEER INTO A TIGHT TOPIARY SHAPE.

**Elm Species:** Remove crisscross, dead, broken branches, sucker growth and maintain a minimum clear trunk height of 7'6".

**Maple Species:** Remove crisscross, dead, broken branches, sucker growth and maintain a minimum clear trunk height of 7'6".

**Oaks Species:** Remove crisscross, dead, broken branches, sucker growth and maintain a minimum clear trunk height of 7'6".

**Oleander Standard Species:** Prune to keep a loose natural form by removing any branches that take away from the natural round shape. Remove all sucker growth and maintain a minimum clear trunk height of 7'6". **Do not sheer into a tight topiary shape.**

**PALM TREES (ADDITIVE ALTERNATE):** Contractor will be responsible to prune all palm trees per the quantities listing below if they are added to the base bid of this contract. The palms will be trimmed at the frequency specified to keep them free of seedpods and dead palm fronds. **No green palm fronds shall be removed during any trimming.**

**SHRUBS:** Contractor will be responsible to prune all shrubs within the locations listed in this bid document. Some of the most common materials are listed below with general maintenance specifications of each:

**Azaleas:** Prune after bloom has ended.

**Boxwoods:** Sheer tightly and box at a height of 24"- 36" as directed by staff.

**Crinums:** Remove damaged leaves and flower pods in Winter / Spring. Do not cut to ground unless directed by staff.

**Japanese Holly:** Sheer loosely and rounded at a height of 24"- 48" as directed by staff.

**Japanese Privet:** Sheer top rounded to a height of 24"– 48" as directed by staff.

**Ilex Species:** Sheer tightly and rounded at a height of 18"- 36" as directed by staff.

**Indian Hawthorn:** Sheer tightly and rounded at a height of 18"- 36" as directed by staff.

**Juniper Species:** Do not sheer as this will damage the plant material by browning the growing tips. Only remove brown branches with hand pruners.

**Nandinas:** Sheer tightly and rounded at a height of 18"- 30" as directed by staff.

**Oleanders:** Prune loosely and rounded at a height of 24"- 48" as directed by staff.

**Philodendrons:** Prune to remove damaged / brown leaves as needed.

**Pineapple Guava:** Sheer loosely and rounded at a height of 36"- 48" as directed by staff.

**Pittosporums:** Sheer loosely and rounded at a height of 36"- 48" as directed by staff.

**Podocarpus:** Sheer tightly and box at a height of 36"- 72" as directed by staff.

**Shrub Roses:** Dead head roses after bloom and keep form small and compact.

**Schefflera:** Sheer loosely and rounded at a height of 36"- 48" as directed by staff.

**Silverthorn:** Sheer loosely and rounded at a height of 48"-72" as directed by staff.

**Viburnum Species:** Sheer loosely and rounded at a height of 48"-72" as directed by staff.

**Wax Myrtles:** Sheer loosely and rounded at a height of 48"-72" as directed by staff.

---

**GROUNDCOVERS:** Contractor will be responsible to prune all groundcovers within the locations listed in this bid document. Some of the most common materials are listed below with general maintenance specifications for each:

**Agapanthus:** Remove spent flower stalks after bloom is completed within 30 days.

**Asiatic Jasmine:** Sheer once per year to adjust height for matching consistency.

**Bulbines:** Remove spent flower stalks after bloom is completed within 30 days.

**Daylilys:** Remove spent flower stalks after bloom is completed within 30 days.

**Flax Lilies:** Remove spent flower stalks after bloom is completed within 30 days.

**Iris:** Hand prune to thin out material as needed to remove old dead or dying growth. Remove spent seed pods after bloom is completed within 30 days.

**Junipers:** Do not sheer as this will damage the plant material by browning the growing tips. Only remove brown branches with hand pruners.

**Liriopes:** Hand prune to thin out material as needed to remove old dead or dying growth.

**Perennial Peanut:** Mow once per year as directed by staff.

**Society Garlic:** Remove spent flower stalks after bloom is completed within 30 days.

---

**ORNAMENTAL GRASSES:** Contractor will be responsible to cutback all grasses within the locations listed in this bid document. Some of the most common grasses are listed below:

**Crown Grass:** Do not cut back unless authorized by staff. (Example: I-95 Slopes).

**Dwarf Fakahatchee Grass:** Do not cut back unless authorized by staff. (N. US1 Gateway).

**Fountain Grass:** Cut back to 4"-6" inches tall at beginning of Winter.

**Muhly Grass:** Cut back to 4"-6" inches tall at beginning of Winter.

**Pampas Grass:** Cut back to 2' – 4' foot tall at beginning of Winter.

**Sandcord Grass:** Cutback to 4"-6" inches tall at beginning of Winter.

---

**The following specifications are for the Granada Boulevard Medians specifically but should be used as a guideline for all FDOT permitted median plantings.**

**Yaupon Hollies:** Must be maintained at a maximum height of 24" inches. The hollies along the curb must be low enough as to not block the irrigation spray and must be maintained at this height as per the approved FDOT plans.

**Flax Lilies:** Cut back 2"-3" above the ground if damaged by frost.

**Indian Hawthorn:** Must be maintained at a maximum height of 24" inches. The hawthorn along the curb must be low enough as to not block the irrigation spray and must be maintained at this height as per the approved FDOT plans.

**Parson Junipers:** Prune the brown out of the junipers and remove dead plants as if required.

**Nandina Firepower:** Must be maintained at a maximum height of 24" inches. The nandina along the curb must be low enough as to not block the irrigation spray and must be maintained at this height as per the approved FDOT plans.

**Plant Free Zone:** Maintain a four (4') foot, plant free mulch zone behind back of curbs so the materials do not obstruct the irrigation spray. Also, all ground cover within a 3' radius of an existing irrigation heads should be removed for the same reason above.

**ANNUAL FLOWERS:** The contractor shall purchase, deliver, and furnish all material, labor, and necessary soil amendments for the installation and replacement of annual flowers per quarter. Four-inch pots, planted in the following schedule and spacing, to correspond with the installation period unless directed differently by the City.

| | | |
|---|---|---|
| January - March | = | 7,500 Annuals |
| April - June | = | 7,500 Annuals |
| July - September | = | 7,500 Annuals |
| October - December | = | 7,500 Annuals |

Proper annual spacing is as follows: 8"-10" spaces on-center.

**IRRIGATION SYSTEMS: (ADDITIVE ALTERNATE)** Contractor is responsible for the entire irrigation system from the water meter to the sprinkler excluding the meter.

Irrigation systems, including but not limited to all heads, pipes, valves, rain shut-off devices controllers etc., shall be thoroughly inspected at the first sign of turf or shrub distress and tested monthly for each area. Heads shall be visually inspected at each mowing and all necessary repairs shall be made immediately.

Inspections shall include the firing of all zones for the purpose of flushing and adjusting heads to provide for maximum coverage and efficiency. Contractor's personnel shall do visual inspections on a continual basis during the day-to-day maintenance operation. This shall include observing for dry areas, wash outs, missing or broken heads, etc. and reporting any problems to the Contractor's appropriate supervisor, to be scheduled for repairs. Contractor is responsible for monitoring for overuse of water – repair and reset as needed. Contractor is required to monitor and minimize overspray of irrigation heads onto paved surfaces (concrete/asphalt). **A monthly irrigation system inspection report shall be submitted and the area of repair shall be kept in a logbook. Any repairs charged to the City should be noted in this report to coincide with the monthly billing for extra work.**

Controllers shall be set by a qualified member of Contractor's staff according to design specifications and the current weather conditions, in compliance with all applicable local, state, or federal regulations. Irrigation schedules shall be submitted to the City staff for approval. The City shall provide staff assistance to the Contractor with respect to controller questions and state/local watering restrictions.

Repairs or replacement of any of the systems for normal wear and tear shall be reported to City staff. The contractor will repair the system and charge the City based on the hourly rate and material markup as per the bid documents. Emergency repairs must be completed within 24 Hours of notice by City staff.

Contractor will be required to repair/replace any irrigation parts that fail or are damaged due to contractor negligence. The City will be responsible for the costs to replace any irrigation parts that are stolen, damaged by acts of vandalism, vehicular damage or other unforeseen or unpreventable causes. All non-functional irrigation heads shall be turned in to the City staff.

**EROSION:** If there is noticeable erosion of any site caused by any means, the Contractor shall immediately notify the City's Contract Manager of its location. The Contractor shall be responsible for any erosion damage caused by Contractor's equipment or performance of its duties under this Contract.

## The following are additional requirements of this maintenance contract:

**EQUIPMENT:** The Contractor shall have on hand at all times and in good working order such equipment as shall permit the Contractor to adequately and efficiently perform its contractual duties. All equipment shall be kept in good repair, appearance, and in a sanitary and clean condition at all times.

Equipment shall have the name of the Contractor, business telephone number and the number of the vehicle in letters not less than three (3) inches high on each side of the vehicle. The contractor may also place its corporate logo on the vehicles; however, no other form of advertising shall be permitted on vehicles. The Contractor shall supply the City with a listing of the vehicle numbers normally assigned to performance of duties under this Contract and shall keep the list current.

All equipment shall be kept in good safe operating condition with sharp blades and in such condition that oil and gasoline are not leaked.

**EQUIPMENT STORAGE:** The Contractor is responsible for storing all equipment and supplies off site. The City will not provide any storage space for the contractor.

**EQUIPMENT FUELING AND LUBRICATING:** Mowers and power equipment shall be fueled and lubricated using proper tools and equipment. Any fuel or oil spills are the sole responsibility of the Contractor to clean up and / or remove at the Contractor's expense. Any damage to median plant material by such fuel or oil spills shall be replaced within three (3) days by Contractor at the Contractor's expense.

**CONTRACTOR SCHEDULE:** Contractor shall submit a calendar schedule of all work, including a fertilizer timetable, specifying fertilizer manufacturer and formulary, to be performed for one (1) year. A copy of the yearly calendar shall be submitted to City's Contract Manager. Contractor shall update schedule on a monthly basis as needed. The use of noise making equipment is restricted to the hours of 7:30 A.M. to 6:30 P.M. Monday through Friday, (unless otherwise approved in writing by the City's Contract Manager).

**FREEZE DAMAGE:** Any freeze damaged plant material shall have dead growth removed as soon as it is deemed safe by the contractor and staff, by the appropriate means. Typically, after March 15th.

**REPLACEMENT OF PLANT MATERIALS:** City will be responsible to replace all plant materials that are frozen, stolen, vandalized, or otherwise destroyed by unforeseen or unpreventable circumstances. However, if the City staff determines that the poor condition of plant materials is due to improper

maintenance or irrigation, the Contractor will be responsible for replacing such plant material at the Contractor's sole expense. City shall be notified of plants or areas in distress. These areas need to be evaluated for plan of action and monitored by contractor for actions success. **No dead plant material** will remain in landscape. All replacements shall be done within one (1) week of notification. City staff shall approve all plant replacements, sizes and specifications.

**SAFETY CONSIDERATIONS AND MAINTENANCE OF TRAFFIC (MOT):** During mowing/maintenance operations, "MOWING" or "CAUTION MOWING OPERATIONS" signs must be placed on or near affected walkways and other traffic areas. All highway equipment used on right-of-ways must be properly signed and equipped with working safety lights. The Contractor is responsible for being in compliance with all FDOT and OSHA rules and regulations at all times. Within DOT right-of-way, Maintenance of Traffic Plan (MOT) shall be prepared and implemented by the Contractor when required. All work shall be performed according to FDOT safety and signage recommendations as outlined in their Utility Accommodation Guide, Document Number 710-020-001-b

**EMERGENCY:** The Contractor must respond within one (1) hour to emergency calls placed by the City staff. Contractor shall employ all available means to expedite the service applicable to the nature of the emergency.

**STORM DAMAGE CLEANUP:** The Contractor must fully cooperate with the City in the cleanup of the medians after a storm. Storm damage cleanup must be completed within twenty-four (24) hours after the storm event. A storm is defined as winds of 35 M.P.H. or greater, rain in excess of three (3) inches over a twenty-four (24) hour period or other acts of nature. Provided the Contractor has obtained prior written authorization from the City's Contract Manager, the Contractor shall be reimbursed for the actual documented cost to the Contractor of all required additional labor, overhead and equipment provided by the Contractor in response to the storm event.

**ADDITIONAL MAINTENANCE: (Non-emergency):** The Contractor is required to complete additional maintenance and/or additional regularly schedule maintenance activities to new site not currently listed within this contract, at the request of City staff. Additional costs will be in accordance with the executed contacts unit costs, or as otherwise negotiated by City staff for additional site maintenance not presently included within this contract.

**EXTRAORDINARY OCCURRENCES:** It is agreed that in no event shall the City or Contractor be liable or responsible to each other or any other person to perform work herein provided, where such stoppages or delays result from inclement weather, drought or excessive rain, acts of God, fire, or any other cause not within the control of the City and/or the Contractor.

**QUALITY OF SERVICE:** The direction and supervision of grounds maintenance services shall be by competent and qualified personnel and the Contractor shall devote sufficient personnel, time and attention to the direction and detail of the operation to assure performance satisfactory to the City.

In the event the quality of work performed is not acceptable to the City or the work is not performed when specified, the City will reduce the next payment using the full price as submitted in this bid for the affected site.

**SUPERVISION:** The Contractor is responsible for all personnel and supervision required performing work in accordance with these specifications. Supervision will be required for all working hours of the contract.

The Contractor and their employees must comply with all City regulations.

The Contractor understands that all planning, coordinating, and implementation of the described services shall be done through personal contact between the Contractor and City staff. Contractor will notify the City staff (via fax, e-mail or in person) when the specified scheduled services are fully completed. This is to allow City staff to inspect for full contract compliance and authorization for scheduled payments. City approved representatives of the Contractor shall be available to meet with the City staff as required to accomplish the City's objectives. All meetings with the City will be at no charge.

**CONTACT PERSON:** The Contractor shall provide the name and telephone number(s) of an English speaking contact person in case of an emergency.

The Contractor shall provide the name and telephone of an English-speaking representative to meet periodically with City staff.

**CONTRACTORS EMPLOYEES:** Contractors employees must be bonded. Proof of bonding must be submitted with bid. The City may request the Contractor to provide a list of employees working certain days, hours, or assignments. Such list must be submitted within two (2) hours (unless otherwise indicated) of the City' request and may include Social Security numbers, driver's license numbers, and addresses.

The City reserves the right to accept or reject any employee of the Contractor.

All personnel must be visible as Contractor's employee(s) by uniform and/or badge while on City property. The Contractor's work force shall be neat and clean in appearance and shall wear identification. Identification shall include the employee's name and company name.

**SUBCONTRACTOR:** The contractor is not permitted to use any subcontractors in performing any services related to these specifications unless the contractor obtains prior written approval from City staff or is approved during the bid process.

Approval by the City does not make the City a party of such subcontract, or subject the City to liability of any kind to any subcontractor. No subcontract will, under any circumstances, relieve the Contractor of their liability and obligation under this Contract; and despite any such subletting; the City shall deal through the Contractor. Subcontractors will be dealt with as employees and representatives of the Contractor, and as such shall be subject to the same requirements as are other employees of the Contractor.

**VACATION:** Contractor shall not be allowed vacation time as part of this contract.

**AWARD:** The City reserves the right to award any contract(s) to the bidder(s) which it deems to offer the best overall service; therefore, the City is not bound to award any contract(s) based solely on lowest quoted price. The City also reserves the right to negotiate separately with competing bidders as deemed to be in the City's best interest.

**COST ADJUSTMENT:** No later than June 1, of each contract year, the Contractor may petition the City through the Contract Manager for a rate adjustment to reflect the change in the cost of doing business, as measured by fluctuations in the Consumer Price Index (CPI), All Urban Customers, published by the U.S. Department of Labor, Bureau of Labor Statistics, for the preceding July 1-June 30 period. The maximum increase for any annual period shall be four (4%) percent which will only apply to the future year, increases will not be retroactive. The adjusted rate, if approved by the City Commission shall take effect on October 1, of the year in which approved.

**TAXES:** The Contractor is responsible for paying any and all taxes associated with this agreement.

**OTHER AGENCIES:** Any bidder(s) awarded a contract resulting from this bid is/are given the privilege and is/are required to permit all public and governmental entities in the State of Florida to participate in the contract under the same terms and conditions.

It is understood that at no time will any agency be obligated for placing an order for any other agency. Each agency will only have the authority to obligate itself and will not be held responsible for bills incurred by any other agency. Further, it is understood that each agency will issue its own purchase order(s) or contract to successful bidder(s).

**NON-APPRROPIATION OF FUNDS:** In the event sufficient budget funds are not available for a new fiscal period, the City shall notify the Contractor of such occurrence and the contract shall terminate on the last day of the current fiscal period, without any penalty or expense to the City of any kind whatsoever.

**PAYMENT PROCEDURES:** Payment will be made after satisfactory completion of the work. Each invoice shall be paid by the CITY within thirty (30) days, in accordance with the Florida Prompt Payment Act (Part VII, Chapter 218, *Florida Statutes*). Submit invoices to the CITY's Facilities Maintenance Manager, Public Works Department, 501 N. Orchard Street, Ormond Beach, FL 32174.

Due to such occurrences if the work scheduled is unable to be performed or cancelled, no payments will be let for service(s) not rendered.

**TERMINATION OF AGREEMENT:** If the Contractor fails to perform the conditions of the agreement as specified and as interpreted by the Contract Manager, the Contract Manager shall provide written notice of such violations. Full payment may be withheld unless the discrepancy is resolved within five (5) calendar days of written notice. If the violations are not corrected to the satisfaction of City staff or reoccur, the City may in its sole discretion immediately terminate the agreement. Termination or cancellation of the agreement will not relieve the Contractor from any contractual obligations to the City.

**The City reserves the right to terminate the agreement with or without cause upon one hundred eighty (180) calendar day written notice.**

The City Commission shall have the right to terminate the Agreement in the event the Contractor files any petition or proceeding for bankruptcy relief, or is adjudicated to be bankrupt or insolvent, or fails to pay just debts as they ordinarily become due.

This Agreement may not be terminated by the Contractor.

## INVITATION TO BID
### GROUNDS MAINTENANCE SERVICES – FACILITIES, PARKS & RIGHTS OF WAY
### Bid No. 2012-10

## SELECTION OF CONTRACTOR, SUBMITTALS AND BID SCHEDULE

**PROFESSIONAL QUALIFICATION:** Any firm or individual licensed and bonded to perform the landscape maintenance work, having demonstrable professional experience in the project category for a minimum of 10 years and having interest in providing these services to the City of Ormond Beach, is invited to submit a Letter of Interest and Bid. References will be verified and past performance must be found acceptable by City staff.

**INFORMATION TO BE SUBMITTED:** The Bid package shall consist of the following:

1. One (1) complete original BID including Bid (ITB) form, Addendum Acknowledgement and completed fee schedule..
2. One (1) original letter of interest.
3. Philosophy and general project approach of the firm or individual.
4. Proposed organizational chart, with resumes of the project team. Include subcontractors for consideration, if appropriate.
5. Provide financial information (Balance Sheet and Income Statement) for 2009, 2010, and 2011.
6. Past Experience - Similar contracts. List projects which are similar in scope and size that the proposed firm or individual has been awarded within the past five (5) years including:
   a) Contract name
   b) Address
   c) A brief description of the work
   d) Contract amount
   e) Duration
   f) Name of contact with telephone number
7. List of equipment the bidder possesses.
8. Copy of firm's current Operational Business License renewal.
9. Copy of firm's insurance certificates.
10. Conflict, Non-Conflict of Interest Statement and Litigation Statement
    A list of all lawsuits that the bidder has been a party to in the past five (5) years
11. Drug Free Workplace Certificate

# CITY OF ORMOND BEACH
## INVITATION TO BID

### GROUNDS MAINTENANCE SERVICES – FACILITIES, PARKS & RIGHTS OF WAY
### Bid No. 2012-10

The undersigned BIDDER proposes and agrees, if this Bid is accepted, to enter into an Agreement with OWNER to complete all Work as specified or indicated in the Contract Documents for the Contract Price and within the Contract Time as indicated in this Bid Proposal and in full accordance with all requirements as set forth in the Contract Documents.

(a) The Contract Documents, which set forth the terms and conditions of the Agreement, are comprised of the signed Quotation, with all related attachments and addendum (if any), any documentation accompanying the Quote, any post-quotation documentation submitted prior to the Notice of Award, the Certificate of Liability Insurance, the Bonds (when required), the Project Specifications and/or Drawings, the signed Purchase Order, as issued by the OWNER, and any other exhibits identified in the Agreement, together with any modifications issued after the execution of the Agreement.

(b) The Contract Price constitutes the total compensation (subject to authorized adjustments) payable by the OWNER to the CONTRACTOR for performing the Work.

(c) The Contract Time constitutes the number of calendar (consecutive) days allowed for the completion of the Work. The time shall commence on the date set in the Notice to Proceed. The completion date shall not fall on a Saturday or Sunday or on any legal holiday and shall be advanced to the next "business" day.

The Contractor is responsible for furnishing and maintaining all equipment in safe operating condition to perform duties in accordance with these specifications.

The City may order work to be stopped if conditions exist that present an immediate danger to persons or property. The Contractor acknowledges that such work stoppage will not shift responsibility for any damages from the Contractor to the City.

**HOLD HARMLESS:** The City, its agents, employees, and officials, both elected and appointed, shall be held harmless from and against all claims for bodily injury, sickness, disease, death or personal injury or damage to property or loss of use resulting there from, arising out of the agreement, contract or lease unless such claims are a result of the City's sole negligence, as determined by the final arbiter of such claim.

The City, its agents, employees, and officials, both elected and appointed shall be held harmless from and against all claims for bodily injury, sickness, disease, death or personal injury or damage to property or loss of use resulting there from arising out of performance of the agreement or contract, unless such claims are a result of the City's sole negligence, as determined by the final arbiter of such claim.

The City, its agents, employees, and officials, both elected and appointed shall also be held harmless from and against all claims for financial loss with respect to the provision of or failure to provide professional or other services resulting in professional, malpractice, or errors and omissions liability arising out of performance of the agreement or contract, unless such claims are a result of the City's sole negligence, as determined by the final arbiter of such claim.

In submitting this Bid, BIDDER represents, as more fully set forth in the Agreement, that:

# CITY OF ORMOND BEACH
## INVITATION TO BID
## GROUNDS MAINTENANCE SERVICES – FACILITIES, PARKS & RIGHTS OF WAY
## Bid No. 2012-10

(a) BIDDER has examined copies of all the Contract Documents and of the following addenda (receipt of all of which is hereby acknowledged):

| Addendum Date | Addendum Number |
|---|---|
| 4/17/2012 | #1 |
| | |
| | |

(b) BIDDER has examined the site and locality where the Work is to be performed, the legal requirements (federal, state and local laws, ordinances, rules and regulations) and the conditions affecting cost, progress or performance of the Work and has made such independent investigations as BIDDER deems necessary.

(c) BIDDER accepts all of the terms and conditions of the Contract Documents. This Bid will remain open for 120 days after the day of Bid opening. BIDDER will submit the Contract security bonds (when required) and other documents required by the Contract Documents within ten (10) days after the date of OWNER'S Notice of Award.

(d) This Bid is genuine and not made in the interest of or on behalf of any undisclosed person, firm or corporation and is not submitted in conformity with any agreement or rules of any group, association, organization or corporation; BIDDER has not directly or indirectly induced or solicited any other Bidder to submit a false or sham Bid; BIDDER has not solicited or induced any person, firm or a corporation to refrain from bidding; and BIDDER has not sought by collusion to obtain for himself any advantage over any other Bidder or over OWNER; and

(e) BIDDER will complete the Work for the following price(s):

## DRUG-FREE WORKPLACE CERTIFICATION

**IDENTICAL OR "TIE" SUBMITTALS**: Preference shall be given to businesses with drug-free workplace programs. Whenever two or more proposals which are equal in respect to price, quality, and service are received by the State or by any political subdivision for the procurement of commodities or contractual services, a bid received from a business that certifies that it has implemented a drug-free workplace program shall be given preference in the award process. Established procedures for processing tie bids will be followed if none of the tied vendors have a drug-free workplace program. In order to have a drug-free workplace program, a business shall:

1) Publish a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace and specifying the actions that will be taken against employees for violations of such prohibition.

2) Inform employees about the dangers of drug abuse in the workplace, the business's policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation, and employee assistance programs, and the penalties that may be imposed upon employees for drug abuse violation.

3) Give each employee that engages in providing the commodities or contractual services that are under bid a copy of the statement specified in subsection (1).

4) In the statement specified in subsection (1), notify the employees that, as a condition of working on the commodities or contractual services that are under bid, the employee will abide by the terms of the statement and will notify the employer of any conviction of, or plea of guilty or nolo contendere to, any violation of Chapter 893 or of any controlled substance law of the United States or any state, for a violation occurring in the workplace no later than five (5 ) calendar days after such conviction.

5) Impose sanctions on, or require the satisfactory participation in a drug abuse assistance or rehabilitation program if such is available in the employee's community, by any employee who is so convicted.

6) Make a good faith effort to continue to maintain a drug-free workplace through implementation of this section.

## LOCAL VENDOR PREFERENCE

The following is taken from the Code of Ordinances, City of Ormond Beach, Chapter 2, Financial Matters, Division 3, Purchasing, Article IX, Section 2-304:

Except where otherwise provided by federal or state law or other funding source restrictions, purchases of goods and services under the Purchasing Code shall give preference to local businesses as follows:

(a) Under a competitive bid solicitation, the City *may* give a local preference in the amount of three percent (3%) of the bid price or $25,000, whichever is less. The bid price shall include not only the base bid price but all alternatives which are part of the bid and actually purchased or awarded.

(b) A *local business* shall mean a vendor that has a valid occupational license issued by the City of Ormond Beach at least one year prior to bid opening, with a physical business address located within the municipal boundaries of the City of Ormond Beach from which the vendor operates or performs business on a day-to-day basis that is a substantial component of the goods or services being offered and has provided a Local Vendor Affidavit of Eligibility at the time the bid is submitted.

(c) A *Local Vendor Affidavit of Eligibility* shall accompany the bid submittal to be considered valid and shall include, but not be limited to, the following information:

(1) A physical business and location address;
(2) A copy of current City of Ormond Beach Local Business Tax Receipt (occupational license) to verify the business location;
(3) Proof of payment of business tax and real property tax due to the City of Ormond Beach;
(4) A copy of the firm's most recent annual corporation report to the Florida Division of Corporations;
(5) Any additional information necessary to verify local status.

(d) *Exemptions:* Goods or services provided under a cooperative purchasing agreement, contracts for professional services subject to Consultants' Competitive Negotiation Act, purchases or contracts funded in whole or part by a governmental entity that does not allow local preferences, purchases made under another agency's agreements or contracts (piggybacking), purchases under emergency or sole source situations and procurements subject to formal proposals including but not limited to request for proposals (RFP) or continuing contract, and request for quotes (RFQ) versus straight competitive bids.

(e) This section shall not be deemed to require the granting of a local preference, and nothing herein prohibits the award of a contract to a non-local vendor where such award is in the public interest.

## Local Vendor Affidavit of Eligibility

I certify that my company meets all of the following qualifications to be eligible for the local vendor preference:

a. My company has a physical business address located within the municipal boundaries of the City of Ormond Beach which is used to perform business on a day-to-day basis.
b. My company holds any business (occupational) or contractor license required by the City of Ormond Beach at least one year prior to bid opening.
c. Payment of business tax and real property tax due to the City of Ormond Beach is current
d. My company is in compliance with annual reporting to the Florida Division of Corporations

Insurance Requirements

[From Ormond Beach Code of Ordinances establishing minimum requirements for risk management, commercial general liability insurance, and comprehensive general liability insurance, as amended by Resolution No. 2011-116 (8/16/11)]:

**B. Contractual Provisions Relative to Risk Management**

All contracts for any public works to be performed, and service-related contracts, for or on behalf of the City shall include the following, or substantially similar, provisions:

**1. Hold Harmless**

**(a) General**

The City, its agents, employees, and officials, both elected and appointed, shall be held harmless from and against all claims for bodily injury, sickness, disease, death or personal injury or damage to property or loss of use resulting therefrom, arising out of the agreement, contract or lease unless such claims are a result of the City's sole negligence, as determined by the final arbiter of such claim.

**(b) Professional Services Contracts**

The City, its agents, employees, and officials, both elected and appointed shall be held harmless from and against all claims for bodily injury, sickness, disease, death or personal injury or damage to property or loss of use resulting therefrom arising out of performance of the agreement or contract, unless such claims are a result of the City's sole negligence, as determined by the final arbiter of such claim.

The City, its agents, employees, and officials, both elected and appointed shall also be held harmless from and against all claims for financial loss with respect to the provision of or failure to provide professional or other services resulting in professional, malpractice, or errors and omissions liability arising out of performance of the agreement or contract, unless such claims are a result of the City's sole negligence, as determined by the final arbiter of such claim.

**2. Payment on Behalf of City**

The Contractor shall pay all costs of the City's legal defense, as may be selected by the City, for all claims described in the Hold Harmless paragraph.

Such payment on behalf of the City shall be in addition to any and all other legal remedies available to the City and shall not be considered to be the City's exclusive remedy.

**3. Loss Control/Safety**

Precaution shall be exercised at all times by the Contractor for the protection of all persons, including employees and property. The Contractor shall comply with all applicable laws, regulations and ordinances related to safety and health, shall make special efforts to detect hazardous conditions, and shall take prompt action when loss control/safety measures are reasonably necessary.

The City may order work to be stopped if conditions exist that present an immediate danger to persons or property. The Contractor acknowledges that such work stoppage will not shift responsibility for any damages from the Contractor to the City.

4. **Service Bond**
For Service-related contracts only, the City may require the Contractor to secure a service bond with a minimum $25,000 coverage limit for the period of the service agreement. The service bond covers dishonest acts of the contractor's employees against the City. A copy of the bond shall be provided to the City when the agreement commences.

Service-related contracts include and are not limited to businesses providing janitorial, pest control, general repair, security, carpet cleaning, locksmith, temporary employment, painting, moving services or other contracts as determined in the discretion of the Risk Manager as necessary to minimize loss.

C. **Contractor's Insurance**

1. **General**
The Contractor, including service-related contractors, shall purchase and maintain for the entire life of the Project, including any and all approved time extensions, until its final acceptance by the City, such insurance as will protect the Contractor from claims under Workers' Compensation, disability benefit laws or other similar employee benefit laws; from claims for damages because of bodily injury, occupational sickness or disease, or death of Contractor's employees; from claims insured by usual or unusual injury liability coverage; from claims or injury to or destruction of tangible property and from claims insured by usual Commercial General Liability coverage. This includes loss of use resulting therefrom, any or all of which may arise out of the Contractor's operations under the Contract Documents, whether such operations be by the Contractor, by any Subcontractor, or by anyone directly or indirectly employed by any of them or for whose acts any of them may be legally liable. The Contractor's deductibles/self-insured retentions shall be disclosed to the City and may be disapproved by the City, and may be reduced or eliminated at the sole discretion of the City. The Contractor is responsible for the amount of any deductible or self-insured retention.

2. **Types of Insurance and Limits of Liability**
The insurance required herein shall be written for not less than any limits of liability specified and incorporated as part of the Contract Documents or as required by law, whichever is greater, and shall include the following:

(a) Workers' Compensation Insurance in statutory limits for the State of Florida with Coverage B - Employer's Liability limits of not less than:

$100,000. Each Accident Bodily Injury by Accident
$100,000. Each Employee Bodily Injury by Disease
$500,000. Policy Limit Bodily Injury by Disease

Certificate of Exemptions. If the contractor has a State-issued Certificate of Exemption, the contractor may provide a copy in place of the requirement for coverage. However, if the contractor subcontracts or retains any other person or entity to perform under the contract, that person or entity must provide proof of workers' compensation insurance as required by law or provide a Certificate of Exemption.

It is the intent of the City that any individual who either contracts directly with the city or performs any work on behalf of any such contractor be covered by workers compensation insurance or have a valid exemption from said coverage.

(If applicable to the Project, the policy must include benefits under the United States Longshoremen's and Harbor Workers' Act and the Jones Act coverage--all maritime coverage.)

(b) Commercial General Liability Insurance shall be written on a coverage form as broad as Insurance Services Office (ISO) Form CG 00 01 11 88, or its successor form, including but not limited to the following coverage (any deviation shall be noted on the Certificates of Insurance):

a. Premises and Operations
b. Owners' & Contractors' Protective
c. Products & Completed Operation
d. Explosion, Collapse & Underground Conditions
e. Blanket Contractual Liability
f. Personal Injury Liability
g. Broad Form Property Damage Endorsement, including Completed Operations
h. Independent Contractors
i. Watercraft--Owned and Non-Owned (if applicable, endorsement must be included in General Liability policy or a separate Protection & Indemnity Policy must be written)
j. Pollution Liability (if applicable)
k. Asbestos Abatement (if applicable)
l. Fire Damage Liability

Certain coverage outlined above may not be required if they do not relate to the Project, as may be determined at the sole discretion of the City.

Commercial General Liability Coverage shall be written on an occurrence basis and the limits shall be no less than the following amounts for all tiers of Contractors and Subcontractors:

| Contract Value | Limits (not less than) |
|---|---|
| 0 - $25,000 | $300,000 Each Occurrence<br>$300,000 General Aggregate* |

| | |
|---|---|
| | $300,000 Aggregate Products & Completed Operations<br>$ 25,000 Fire Damage (any one fire) |
| $25,001 - $250,000 | $500,000 Each Occurrence<br>$1 Million General Aggregate*<br>$1 Million Aggregate Products & Completed Operations<br>$ 50,000 Fire Damage (any one fire) |
| $250,001 - $3,000,000 | $1 Million Each Occurrence<br>$1 Million General Aggregate*<br>$1 Million Aggregate Products & Completed Operations<br>$ 50,000 Fire Damage (any one fire) |
| $3,000,001 & over | 20% of the Value of the Contract [Minimum $1 Million Each Occurrence/$2 Million General Aggregate] |

* NOTE: Commercial General Liability Coverage must be purchased on either a project basis (separate policy per contract) or an endorsement allocating an aggregate limit per location or specified project.

(c) Automobile Liability Insurance for the operation, use, maintenance, loading or unloading of automobiles - ISO Symbol 1 (Any Auto) or alternatively a combination of Symbol 2 (Owned Autos), Symbol 8 (Hired Autos), and Symbol 9 (Non-Owned Autos).

| Contract Value | Limits (not less than) |
|---|---|
| 0 - $25,000 | $300,000 Combined Single Limit |
| $25,001 - $250,000 | $500,000 Combined Single Limit |
| $250,001 and over | $1 Million Combined Single Limit |

(d) Excess Liability

For Contracts of $250,000 or more, and in addition to the scheduled underlying policies for Commercial General Liability, Automobile Liability and Employers' Liability, the Contractor shall also provide an Excess Liability Policy with a maximum self-insured retention for occurrences insured in this Excess Policy not to exceed $25,000 and a minimum limit of $1 Million.

(e) Professional Liability, Malpractice and/or Errors and Omissions

The Contractor shall purchase and maintain professional liability, malpractice, or errors or omissions insurance with minimum limits of $1,000,000 per occurrence. If a claims made form of coverage is provided, the retroactive date of coverage shall be no later than the inception date of claims made coverage, unless the prior policy was extended indefinitely to cover prior acts. Coverage shall be extended beyond the policy year either by a supplemental extended reporting period (ERP) of as great a duration as is available, and with no less coverage and with reinstated aggregate limits, or by requiring that any new policy provides a retroactive date no later than the inception date of claims made coverage.

**D. Requirements for Certificates of Insurance**

1. With the execution of the Contract Documents, the Contractor, including service-related contractors, shall provide certificates of such insurance acceptable to the City. These certificates and insurance policies shall contain an endorsement that the coverage under the policies will not be canceled, non-renewed or materially changed until at least thirty (30) days' prior written notice of such cancellation, non-renewal or change (except for nonpayment of premium, which shall be ten (10) days) and a copy of the cancellation endorsement signed by an authorized representative of the insurer, be given to the City. The contractor shall be required to replace any expired or canceled policies in like amount and coverage to the satisfaction of the City. The Certificate of Insurance shall be the ACORD FORM 25-S (7/90), or its successor form, and shall be made a part of the Contract Documents.

2. New certificates of insurance shall be provided to the City at least fifteen (15) days prior to coverage renewals.

3. If requested by the City, the contractor shall immediately furnish complete copies of the Contractor's insurance policies, forms and endorsements.

4. For Commercial General Liability coverage the Contractor shall, at the option of the City, provide an indication of the amount of claims payments or reserves chargeable to the aggregate amount of liability coverage. If the Commercial General Liability form of coverage includes an annual aggregate limitation on the amount of insurance provided, a separate project aggregate limit may be required by the City for the given contract.

5. If the Contractor fails to obtain and maintain for the life of the Project the insurance required hereby or to replace any such expired or canceled policy, the City may obtain and maintain such insurance with such company as it deems satisfactory. Any amounts expended by the City in payment of premiums for such insurance shall be deducted by the City form the amount due the Contractor for the work covered by the Contract.

E. **Policies of Insurance**

1. Except as otherwise provided in this Exhibit, all insurance policies shall be issued by insurers licensed to do business in the State of Florida on an admitted basis or which is an eligible surplus lines insurer in the State of Florida, and any such insuring company is required to have a minimum financial rating of (A-), in the latest edition of "Best's Key Rating Guide", published by A. M. Best Co., Inc., or some similarly nationally recognized rating authority, including Standard and Poors and Demotech.

2. For Workers' Compensation coverage only, self-insurance programs are acceptable with a minimum A- rated reinsurance carriers; written confirmation is required.

3. All policies of insurance or certificates thereof referred to in this Exhibit shall be deposited with the City Clerk.

4. The City shall be named an Additional Insured on General Liability and Automobile Liability policies of insurance and certificates thereof.

## VIII. TERMS AND CONDITIONS

A. The City of Ormond Beach reserves the right without prejudice to reject any or all proposals, to request clarification of information submitted, and to request additional information of one or more proposers.

B. The City reserves the right to award the contract to the next most qualified firm if the successful firm fails to execute a contract within two weeks after the award of the contract by the City Commission.

C. In accordance with federal, State, and local regulations, the firm shall not discriminate under the contract against any person.

D. The firm shall not assign or transfer any interest in the contract without prior approval of the City Commission.

E. The City reserves the right to terminate the contract at any time.

F. Submission of a proposal indicates acceptance by the firm of the conditions contained in this Request for Proposals unless clearly and specifically noted in the proposal submitted and confirmed in the contract between the City of Ormond Beach and the firm selected.

G. Submittals should include a copy of firm's insurance certificate, Conflict, Non-Conflict of Interest Statement/Litigation Statement, and Drug Free Workplace Certificate.

# City of Ormond Beach

## REGISTRATION REQUIREMENTS FOR VENDOR/CONTRACTOR WORKING ON CITY PROJECTS

### Registration Requirements

VENDOR'S doing business within the City Limits must be registered with the City. Requirements for registering a business are as follows:

Copy of City Business Tax Receipt (where your business is located).
Certificate of Insurance showing General Liability and Workers' Comp (or State Workers' Comp Exemption form).
Application Fee: $25.00 For more information, contact the City's Business Tax Receipt official.

### State Certified/Registered Contractors

All registered contractors must be registered with Volusia County. Volusia County Contractor Licensing, 123 W. Indiana Ave., Rm 203, Deland, Fl. 32720 (386) 736-5957 Opt. 2 –(386) 740-5215 Fax. Certified Contractors have the option of registering with Volusia County, or providing information directly to the business tax receipt official.

If you have any questions regarding the above requirements, please contact the business tax receipt official at (386) 676-3234.

## AMENDMENT TO AGREEMENT

THIS AMENDMENT TO AGREEMENT FOR GROUNDS MAINTENANCE SERVICES is made and entered into by and between the **City of Ormond Beach, Florida** (hereinafter referred to as "City"), and **Austin Outdoor, LLC d/b/a Yellowstone Landscape**, (hereinafter referred to as "Contractor") for the purposes stated herein, as follows:

WHEREAS, the City and Austin Outdoor, LLC are parties to an Agreement for grounds maintenance services having an effective date of October 1, 2012, and

WHEREAS, the City and Austin Outdoor, LLC desire to amend the subject Agreement for the limited purpose of acknowledging the new corporate name under which the Contractor will provide grounds maintenance services for the City; now therefore,

1. The introductory paragraph of that certain Agreement between the City and Austin Outdoor, LLC is hereby amended to read as follows:

**THIS AGREEMENT** is made and entered into by and between the **City of Ormond Beach** ("City"), a Florida municipal corporation, 22 South Beach Street, Ormond Beach, Volusia County, Florida and **Austin Outdoor, LLC d/b/a Yellowstone Landscape**, 3235 North State Street, Bunnell, FL 32110 ("Contractor"), and in consideration of the mutual promises and covenants herein contained, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree to the following:

2. All other terms and conditions of the subject Agreement shall remain in full force and effect.

IN WITNESS WHEREOF, the parties hereto have caused this amendment to be executed by the undersigned officials as of the date listed below.

# City of Ormond Beach
# Request for Proposals (RFP)
# CITY OF ORMOND BEACH, FLORIDA
## DRUG-FREE WORKPLACE CERTIFICATION

**IDENTICAL OR "TIE" SUBMITTALS**: Preference shall be given to businesses with drug-free workplace programs. Whenever two or more proposals which are equal in respect to price, quality, and service are received by the State or by any political subdivision for the procurement of commodities or contractual services, a bid received from a business that certifies that it has implemented a drug-free workplace program shall be given preference in the award process. Established procedures for processing tie bids will be followed if none of the tied vendors have a drug-free workplace program. In order to have a drug-free workplace program, a business shall:

1) Publish a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace and specifying the actions that will be taken against employees for violations of such prohibition.
2) Inform employees about the dangers of drug abuse in the workplace, the business's policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation, and employee assistance programs, and the penalties that may be imposed upon employees for drug abuse violation.
3) Give each employee that engages in providing the commodities or contractual services that are under bid a copy of the statement specified in subsection (1).
4) In the statement specified in subsection (1), notify the employees that, as a condition of working on the commodities or contractual services that are under bid, the employee will abide by the terms of the statement and will notify the employer of any conviction of, or plea of guilty or nolo contendere to, any violation of Chapter 893 or of any controlled substance law of the United States or any state, for a violation occurring in the workplace no later than five (5 ) calendar days after such conviction.
5) Impose sanctions on, or require the satisfactory participation in a drug abuse assistance or rehabilitation program if such is available in the employee's community, by any employee who is so convicted.
6) Make a good faith effort to continue to maintain a drug-free workplace through implementation of this section.

# City Commission Workshop
# *Grounds Maintenance Contract*

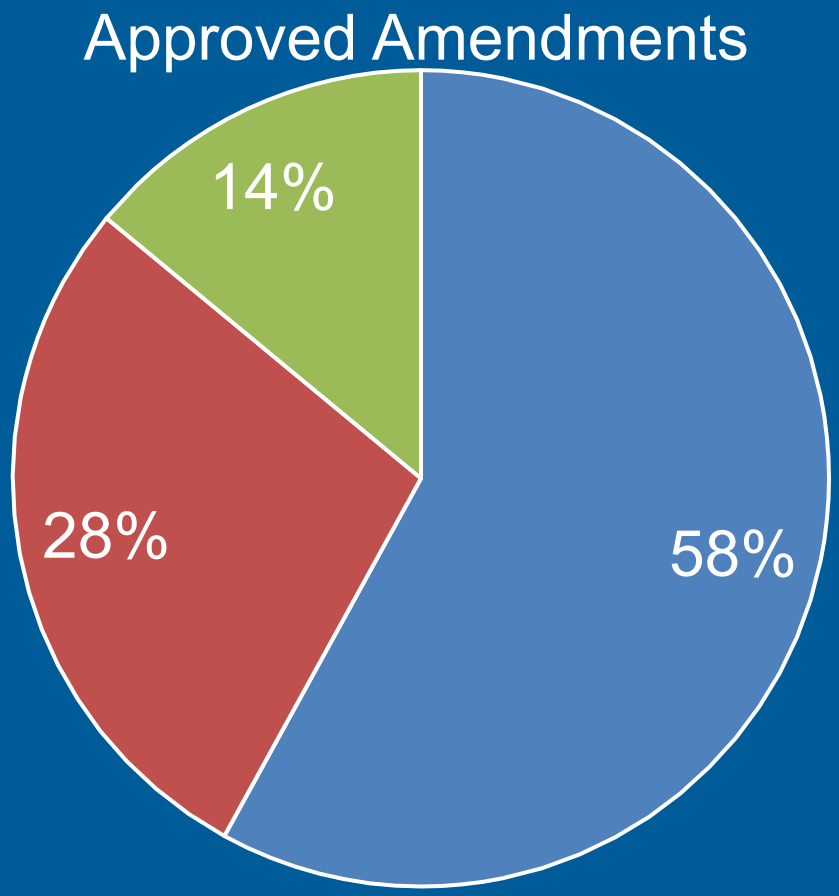
*August 20, 2024*

# History of service contract

- May 24, 2011 – City held a landscape workshop to discuss options for the current grounds maintenance contract. Staff was directed to prepare the specifications to bid the contract for next fiscal year 2011-2012.
- April 25, 2012 – City received (6) competitive bids. Yellowstone LLC (formerly know as Austin Outdoor) was the lowest bidder.
- June 19, 2012 – City Commission authorized through resolution No. 2012-89 the current contract.

Staff would require a similar time frame to execute re-bid process due to it's size, scope, complexity and bid/procurement processes:

- Contract verbiage review & updates
- Consolidate all sites & specifications
- Site map updates, creation & review
- Bid procurement processes
- Bidder inquires & site visits
- Selection process
- Approval of new service contract
- Provide selected vendor time for staffing & equipment requirements to take on services.



# Current state of contract

- Contract is going on 12th year of service.
- Original contract amount. $1,092,397.00
- (10) CPI adjustments totaling. $339,845.85
- (12) Contract Amendment totaling. $507,985.45
- Current contract amount. $1,940,228.30

The contract is primarily funded through the Parks division budget within the general fund and additionally supported by (6) other budget line items:

- Right of Ways maintenance (Parks)
- Grounds maintenance (Parks)
- TIF Fund
- Lift Station/Wastewater
- Water Distribution
- Nova Landfill
- Airport
- Airport Business Park

# Breakdown of amendments

(12) contract amendments have been approved by City Commission

# Consumer Price Index

1. 2014, 2.07% = $24,857.31
2. 2015, 1.95% = $24,625.64
3. 2016, 1.00% = $14,260.12
4. 2017, 1.68% = $23,624.85
5. 2018, 2.87% = $44,061.31
6. 2019, 1.66% = $26,828.40
7. 2020, 0.64% = $10,613.93
8. 2021, 2.64% = $44,745.54
9. 2022, 4.00% = $70,686.70
10. 2023, 2.97% = $55,552.05
11. 2024, 2.80% = $54,326.39 *(Pending Approval)*

(10) CPI Adjustments have been approved by City Commission.

*CPI is capped at 4% regardless of actual CPI %, note 2022 CPI.

# Overview of services

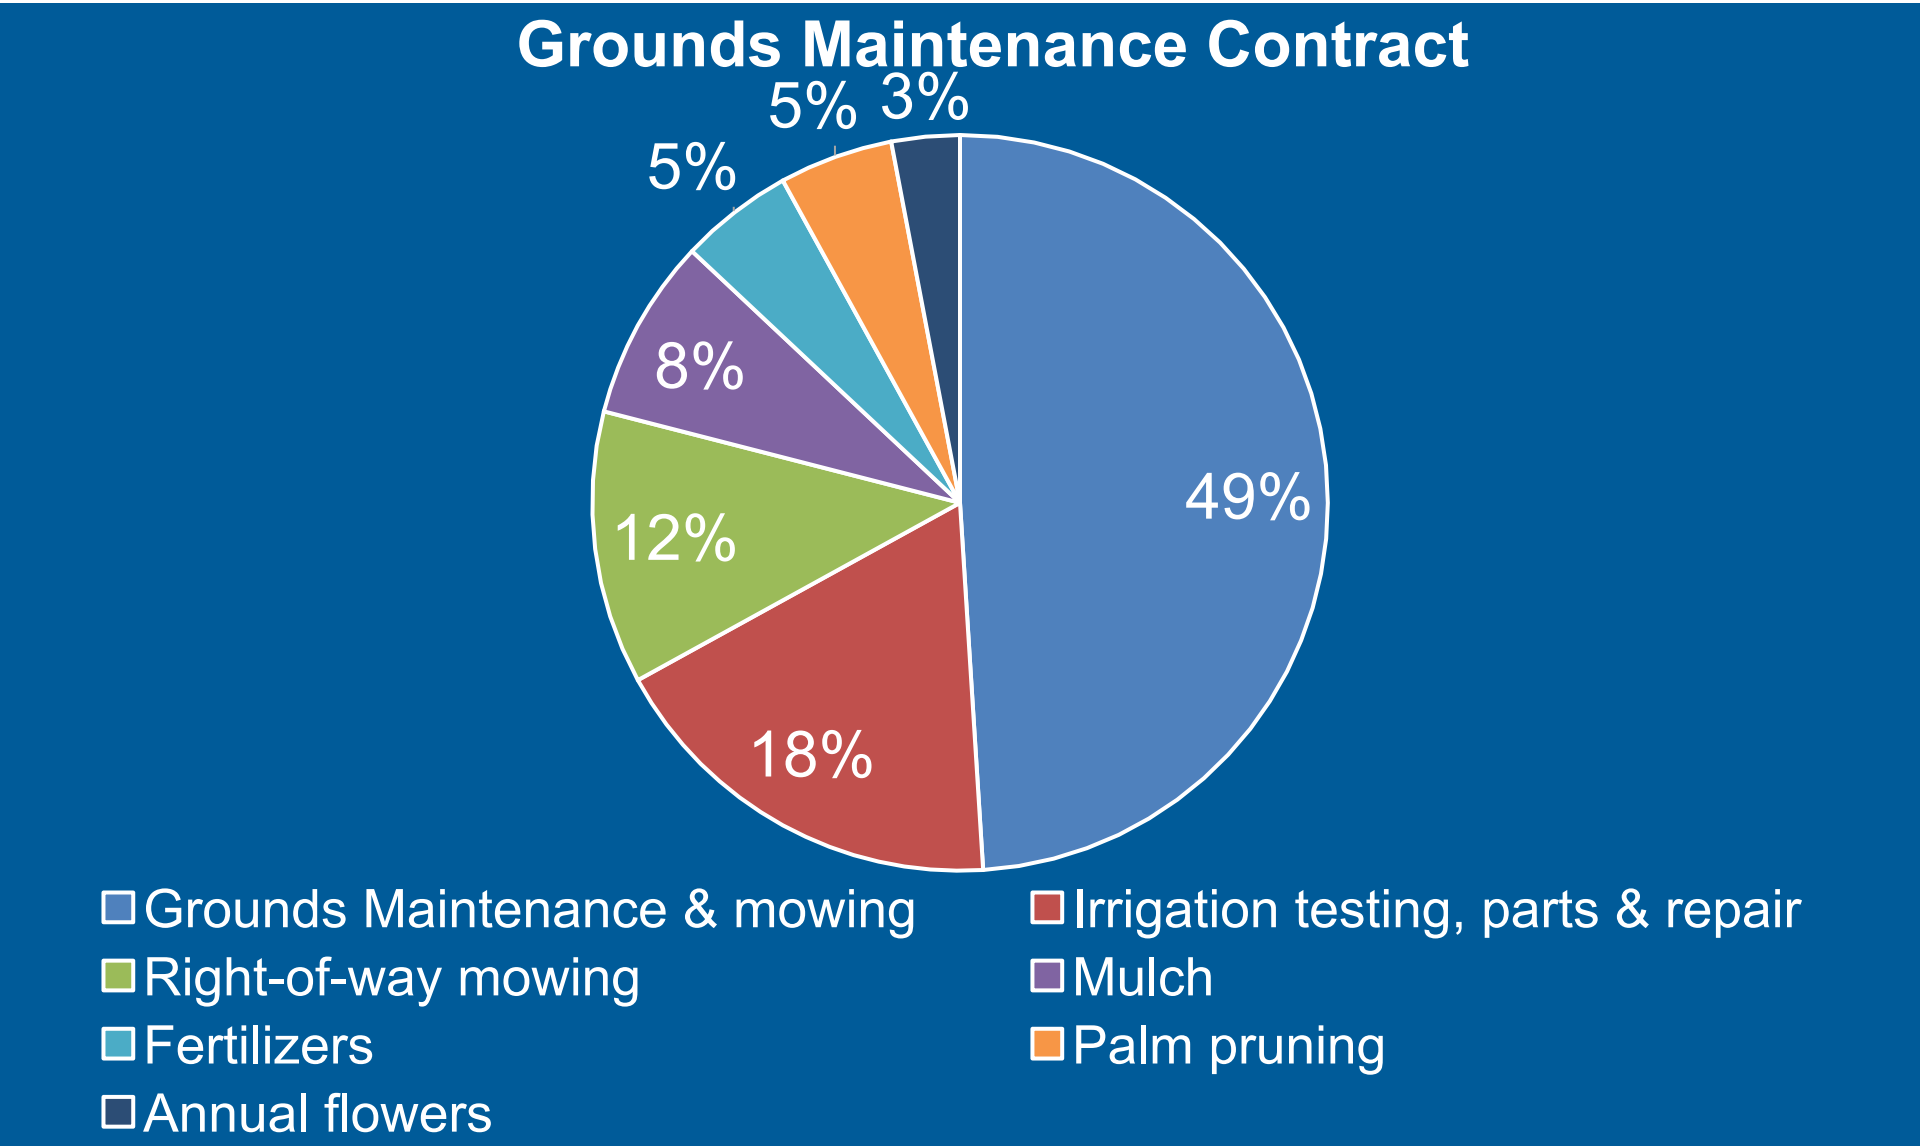
***General tasks & responsibilities include:***

- Mowing
- Edging
- String trimming
- Blowing off of all hard surfaces
- Debris & trash pickup
- Weed control
- Detail landscaping
- Irrigation testing, parts & repair
- Palm pruning
- Tree pruning (up to 7’6 in height)
- Mulch
- Annual flowers
- Pest Control & prevention
- Fertilization

The Grounds Maintenance Contract provides mowing and grounds maintenance services to over **375** sites for the City of Ormond Beach.

*This contract does not include any installation of new landscaping.*

# Contractor Resources



- To meet the demands, the current contractor provides 17 full time staff members throughout the year.
- The corporate office in Daytona Beach also employs several support personnel such as arborists, irrigation specialists, pest-control specialist, landscape architects, consultants and other industry experts.
- Operate - (5-6) days per week, (52) weeks per year.

The contractor also provides several sub-contractors to assist in various rolls.

- Mowerks - rights-of-way bulk mowing.
- Bloom Masters - annual flower grower & installer.
- Cutting Edge tree service – palm pruning.
- Mulch for You – mulch supplier & installer.

# Breakdown of service contract

# Mowing Services

- Mowing activities are performed at parks, facilities, medians, infrastructure sites & right-of-ways.
- Mowing services are separated into 2 large groups.
  - Grounds maintenance & mowing.
  - Right-of-way mowing.

Maintenance Classes:

- Designated for all locations within the contract.

  Class “A” = 39 services per year.
  Class “B” = 29 services per year.
  Class “C” = 16 services per year.
  Class “D” = 11 services per year.

# Irrigation Services

- Contractor is responsible for the entire irrigation system.
- Irrigation system includes all heads, pipes, valves, rain sensors, other components and controllers.
- All irrigation zones require, at minimum, monthly testing & inspections.

Irrigation maintenance:

- Monthly irrigation zone testing (727) x 12 = 8,724 zones tested per year.
- Irrigation Repair (Labor) - City Wide 4,000 hours.
- Irrigation Repair (Parts & Materials) – $25,000 annually.

# Palm & tree pruning

- Palm pruning is performed only in specifically designated parks, facilities, FDOT highway medians and downtown streetscapes.
- City of Ormond Beach has tens of thousands of palm trees.
- Contract calls for 1,877 palms to be pruned.

Palm varieties & quantities that are pruned:

- (1000) Sable palms.
- (542) Medjool/Canary palms that receive 2 pruning per year (1,084 total).
- (191) Reclinata multi-trunk palms.
- (64) Queen palms 4 pruning per year (256 total).
- (80) Mexican Fan palms.

Other tree pruning:

- Contractor is responsible to keep a clear trunk height of 7’6 to avoid sidewalk, parking lot and entrance way obstructions.
- Maintain Crape Myrtles (268), on State Highway medians, to FDOT standards (16’ or within curb lines).
- Other tree pruning is performed by City’s Urban Forestry Division.

# Mulch

Application process:

- All mulched areas are replenished once per year.
- Approximately 1 inch replenishment is added to existing mulch.
- City mandates a total depth of mulch between 3 inches and 4 inches.
- Contractor is responsible to remove mulch if it exceeds 4 inches in depth and/or add additional mulch if deficit is below 3 inches.

Types: (4) different types

- Hardwood
- Pine bark
- Pine straw
- ADA safe playground mulch

# Fertilization, disease, insect and weed control

- *Turf grasses* - (St. Augustine and Zoysia) shall be fertilized (2) times per year.
- *Shade & ornamental trees, shrubs and groundcover* – shall be fertilized (1) time per year.
- *Palm trees* - Medjool palms shall receive a complete granular fertilizer formulated for palms.
- *Disease and insect control* - Contractor is responsible for the control & identification of any insect or disease causing pest.
- *Weed control* - combination of manual removal and herbicides are utilized.

*All processes are completed by licensed applicators.*
*Following all Local, State and Federal laws.*
*Slow-release Nitrogen products are used.*
*Adhere to rainy season blackout periods June-Sept.*

# Annual Flowers

The contractor shall purchase, deliver and furnish all materials, labor and necessary soil amendments for the installation and replacement of annual flowers.

- Quarterly schedule at 8,530 flowers per install.

  January - March
  April - June
  July - September
  October – December

Total flowers installed annually= 34,120

# Storm Damage Cleanup

- The contractor must fully cooperate with the City in the clean-up of determined sites after a storm.
- Contractor shall be reimbursed for the actual documented costs.
- Contractor has provided: staff, equipment, machinery, supplies and extra fuel, on stand-by, in advance of the storm that was anticipated to cause damages.

# Comparison

- Periodically staff researches with neighboring communities to assess our grounds maintenance contract.
- Some services performed in our grounds maintenance contract are near or below market value.

Percent ranges that are favorable towards our grounds maintenance services:

- Labor rate 5-6.5%
- Irrigation Labor 35-41%
- Irrigation materials 30-44%
- Mulch 10-17%
- Palm pruning 15-30%
- Bulk mowing 15-20%

# Questions?

# Thank You!

**CITY OF ORMOND BEACH**
**YELLOWSTONE LANDSCAPE GROUNDS MAINTENANCE WORKSHOP**

| August 20, 2024 | 5:30 p.m. | City Commission Conference Room |
|---|---|---|

## I. CALL TO ORDER

Mayor Bill Partington called the meeting to order at 5:32 p.m.

Present: Mayor Bill Partington, Commissioners Lori Tolland, Travis Sargent, Susan Persis, and Harold Briley, City Manager Joyce Shanahan, Assistant City Manager Claire Whitley, Assistant City Manager Shawn Finley, City Attorney Randy Hayes, Assistant Leisure Services Director Stefan Sibley, Contracts Manager Mike Demchak.

## II. DISCUSSIONS

Ms. Joyce Shanahan, City Manager, stated when the Yellowstone Landscape (Yellowstone) contract was signed, the city created a Contracts Manager position to help manage the contract due to the size and requirements of the contract. She reviewed the work the Contracts Manager, Mike Demchak, completed on a regular basis and reports of what was being completed by the contractor.

Mr. Demchak reviewed the history of the contract, noting 2024 was year 12 of the contract with Yellowstone. He discussed the history of monetary modifications to the contract, contract amendments, and current funding.

Commissioner Briley inquired if the original contract included recreation fields; whereby, Mr. Demchak stated it did not, noting the fields were on a separate contract.

Mr. Demchak reviewed the 12 amendments; noting 58 percent of the amendments were due to upgraded sites, 28 percent were new sites, 14 percent were due to initial contract adjustments. He discussed the Consumer Price Index (CPI) price adjustments, and the maximum Yellowstone could request. He reviewed an overview of services provided by Yellowstone, noting the contract did not include the installation of new landscaping. He discussed the staffing requirements of Yellowstone, the breakdown of the contract based on services provided, mowing schedule based on site classifications, irrigation maintenance, and tree pruning's. He reviewed the Florida Department of Transportation requirements for landscaping and tree pruning.

Commissioner Tolland inquired about the level of service across all palm trees when they get pruned; whereby, Mr. Demchak stated there were standards in place that would be followed by Yellowstone, noting they cut all dead palm fronds while attempting to maintain a full look.

Mr. Demchak discussed the mulch services provided by Yellowstone.

Commissioner Sargent inquired if the city could switch to native plants and other native ground coverings that would require less watering and maintenance; whereby, Mr. Demchak stated that would be a capital project, noting Yellowstone was in favor of native plants and turf to ease maintenance and watering. Mr. Demchak noted the main challenge

would be the medians, if there was an incident that ruined the native coverings and plants, it would be time consuming and expensive to repair.

Ms. Shanahan inquired if there was a cost difference between grass and mulch; whereby, Mr. Demchak stated there was not a significant cost difference.

Mr. Demchak reviewed the fertilization, insect, and weed control aspects of the contract.

Commissioner Persis inquired about the fertilizer utilized; whereby, Mr. Demchak reviewed the products and the impact on the environment.

Commissioner Tolland asked about invasive plant removal; whereby, Mr. Stefan Sibley, Assistant Leisure Services Director, explained there was a $25,000 budget for Brazilian Pepper plant removal. He noted Yellowstone would work with the City's Landscape Architect, Cara Culliver, and Environmental Discovery Center Recreation Coordinator, Sarah Garcia, to identify and remove.

Mr. Demchak reviewed the flower replacement schedule, noting the flowers were for seasonal flare.

Commissioner Tolland inquired about the funds budgeted for the seasonal flowers (pop flowers) and questioned if the city ever considered making the areas smaller and replacing with native plants; whereby, Mr. Demchak noted there was about $60,000 budgeted annually for the pop flowers and noted staff would need to look into flowers that would not lose their luster to maintain the curb appeal.

Mayor Partington expressed support of the pop flowers and noted he would support doubling the budget for them as they help create a sense of place.

Mr. Demchak discussed Yellowstone's contributions to storm and hurricane cleanup efforts. He reviewed the contract compared to other municipalities landscaping contracts. He noted the CPI adjustments are keeping the contract at or below market value, which benefits the city.

Commissioner Sargent stated he would be supportive to see more native plantings compared to mulch.

Ms. Shanahan clarified there was support to move forward with renewing the Yellowstone contract; whereby, the entire Commissioner agreed.

Commissioner Tolland expressed gratitude towards Mr. Demchak for all his hard work.

Mr. Demchak shared a story of Yellowstone going above and beyond for the city when there was an irrigation issue at the Tennis Center.

Ms. Shanahan commended Mr. Demchak for his work and knowledge.

## III. ADJOURNMENT

The meeting was adjourned at 6:17 p.m.

Prepared by: Taylor Lochert

# Monthly Financial Status Report
# May 2025

This report provides the City Commission with an update of the financial status of the City's operating funds. The purpose of the report is to identify any significant variances from the adopted budget and to identify any adverse trends and their implications for the current and future years' budgets.

The first table following this introduction provides a summary of the revenues and expenditures to date by fund. Additional detail by fund type is provided in subsequent tables.

Revenues at or above 67% benchmark is favorable, while expenses at or below the 67% benchmark is also favorable.

**The airport fund has revenue and expense impacts from FAA grants.**
**The Impact Fee funds experienced an increase in revenue due to new subdivisions.**

## Budget Summary

## General Fund Revenues

| Fund | Final Budget | YTD Actual Revenues | YTD % | YTD Actual Expenses | YTD % |

| **Total** | **$ 131,976,868** | **$ 81,143,431** | **61%** | **$ 81,557,451** | **62%** |

**Ad valorem Taxes** – Annual revenue is estimated at $21,823,639 and is based on the taxable value ($5.49 billion) and the operating millage (4.096). Year to date we have received $17.4 million.

**Utility Taxes** – The City levies a utility tax of 10% on electric and gas sales. To date $3 million has been received.

**Communication Taxes** – Communication service taxes collected as of May amount to $958,000.

**Business Tax** – Business tax collections amounted to $89,427. The majority of business taxes are collected in the last quarter of the fiscal year.

**Licenses, Permits and Franchise Fees** – This revenue source includes building permits, plan review and franchise fees. franchise fee agreements require electric and natural gas providers to remit 6% of gross sales to the City. Payments often occur several months after they are collected by providers. Collections through May 2025 are $2.9 million.

**Intergovernmental** – This revenue source includes municipal revenue sharing and sales tax. Through May, the City received a total of $2.76 million in this category.

**Charges for Services** – This category includes Leisure Services user charges and additional revenue from contracts for right of way mowing, traffic signal maintenance, and street lighting. The City received $632,000 in this category through May.

**Fines and Forfeitures** – Traffic, code enforcement, and court fines make up this revenue category. Revenues were $28,432 as of May.

**Miscellaneous Revenue** – Interest and internal service charges for Fleet and Engineering are included in this revenue category. Revenues collected were $2 million.

**Transfers In** – Transfers have been recorded in the amount of $4.57 million through May.

**General Fund Revenues - May 2025**

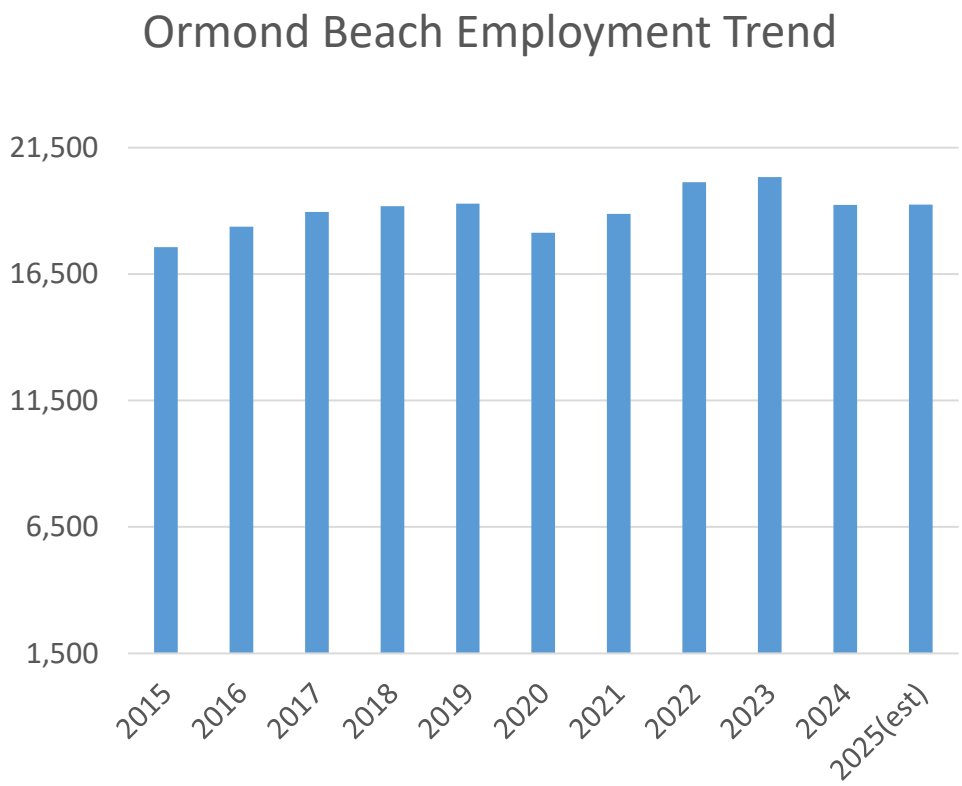
# Economic Development Monthly Report

June 2025



Ormond Beach
May Employment

19,251

Down .1% year over year

Ormond Beach
Unemployment Rate

3.7%

## Notes and Updates:

- **Employment for May** was 19,251 down 0.1% from the same month last year. Employment is up 75 jobs since January. There were 519 job postings in May – leading industries posting Health Care, Retail Trade, Admin Support Services, Leisure/Hospitality and Professional/Scientific Services.

- **In May, the City** issued 21 BTR, 17 for commercial businesses and 4 for home occupations.

- **Ormond Beach appears** at 162 out of 859 cities in a US World Report's 'Best Places to Live' a ranking that weighed five categories: quality of life, job market, value of living, net migration and desire to live in the area. Living in Ormond Beach, FL | U.S. News

- **Forecast: State's economy is strong**, but some bumps in the road ahead, Florida's economy is on solid footing and projected growth over the next five years seems promising, but net migration to Florida will begin to slow, according to the latest economic forecast from Florida TaxWatch. The 2024 to 2030 outlook projects some promising figures, but there are also cautionary signs in the detailed analysis. You can read the full report here.

| Board of Adjustment and Appeals - July 2, 2025, City Commission Chambers of City Hall at 6:00 P.M. | | |
|---|---|---|
| PZ-2025-168 | 480 Cedar Street | Application of Brian Barker, Barker Construction Inc., agent on behalf of the property owner, Christopher Bevan, property owner of 480 Cedar Street. The applicant is seeking an after-the-fact variance to legitimize, through the permitting process, a hard-roof open porch and home addition on the rear of the residence. The property is located in the R-3 (Single-Family Medium Density) zoning district. Section 2-15.B.9.b. of the Land Development Code requires a 20'-rear yard setback. The applicant is seeking to permit the already constructed 16' by 35'-hard-roof open porch with a rear yard setback of 9.7', requiring a variance of 10.3' and a partially constructed 3.1' by 14'-hard-roof enclosed addition with a rear yard setback of 10.8', requiring a variance of 9.2' to the required 20'-rear yard setback. |
| PZ-2025-166 | 151 Ellicott Drive | This is a request for a rear yard variance submitted by Sale Simms, property owner of 151 Ellicott Drive. The subject property is located in the R-2.5 (Single-Family Low-Medium Density) zoning district. Section 2-14.B.9.b., of the Land Development Code, requires a 20' rear yard setback. The existing solid roof screen room has a non-conforming setback of 12' from the rear property line. The applicant seeks a variance of 8' to the required 20' rear yard setback to allow replacement of the solid roof screen room at the same 12' rear yard setback. |
| PZ-2025-173 | 341 Greenwood Avenue | This is a request from Harry Nicholas Heilman II and Megan McLean, property owners of 341 Greenwood Avenue, for an after-the-fact variance to legitimize, through the permitting process, a boathouse structure. The property is located in the R-3 (Single-Family Medium Density) zoning district. Section 2-50(e)(4)(a) of the Land Development Code requires that if the length of the shoreline is sixty-five feet (65') or more, a minimum twenty-five-foot (25')-setback from the riparian lines of adjacent owners is required for all structures. The subject property has a shoreline length of 75'. The applicants are seeking to permit the already constructed boathouse with a side setback of 2.5', requiring a variance of 22.5' to the required 25'-setback. |
| PZ-2025-177 | 134 Hand Avenue | This is a request for a driveway access point variance submitted by Larry Massey, property owner of 134 Hand Avenue. Chapter 3, Article III of the Land Development Code (LDC), Section 3-25.C.1., requires that in all districts, no point of access shall be allowed at the intersections of two (2) streets, as classified in the Comprehensive Plan. Hand Avenue is classified as a major collector roadway and requires a 60'-setback from the intersection with Fred Gamble Way. The applicant is requesting to replace the driveway with pavers and widen it to 11.3' to match the width of the existing carport. Due to the existing point of access location, the applicant is requesting a setback from the intersection of 14', requiring a variance of 46' to the required 60'-setback. |
| **Note:** Board and Adjustment and Appeals information is based upon the best information available as of the publishing of this report and are subject to change. Summary

This is an application for administrative amendments to the following Sections of the Land Development Code: (1) Chapter 2, District and General Regulations, Article VI, Overlay Districts, Section 2-73, Greenbelt and Gateway Preservation Districts and (2) Chapter 3, Performance Standards, Article II, Environmental Protection Standards, Section 3-21, Wetlands protection, subsection h, Buffer requirements.

The purpose of the Land Development Code amendments is to provide the properties within the 1000 block of North U.S. Highway 1, abutting the Tomoka River, with the same landscape buffer and wetland buffer requirements as existed when the properties were located in unincorporated Volusia County.

The Planning Board reviewed the proposed Land Development Code amendment at the May 8, 2025, meeting and recommended approval by a 6-0 vote. There were no individuals who spoke for or against the proposed Land Development Code amendment.

Financial Impact

None

Citizen Impact

The proposed Land Development Code amendment focuses on aligning landscape and wetland buffers consistent with the existing Volusia County standards prior to the implementation of the Interlocal Service Boundary Agreement. No citizen impact is anticipated as a result.

5. Ordinance BIE, 1000 block of North U.S. Highway 1

**ORDINANCE NO. 2025-21**

AN ORDINANCE AMENDING CHAPTER 2, DISTRICT AND GENERAL REGULATIONS, ARTICLE VI, OVERLAY DISTRICTS, SECTION 2-73, GREENBELT AND GATEWAY PRESERVATION DISTRICTS, SUBSECTION (C), DESIGN CRITERIA; AND CHAPTER 3, PERFORMANCE STANDARDS, ARTICLE II, ENVIRONMENTAL PROTECTION STANDARDS, SECTION 3-21, WETLANDS PROTECTION, SUBSECTION (H), BUFFER REQUIREMENTS, OF THE CITY OF ORMOND BEACH *LAND DEVELOPMENT CODE* BY AMENDING THE LANDSCAPE BUFFER AND WETLAND BUFFER REQUIREMENTS FOR PROPERTIES LOCATED WITHIN THE 1000 BLOCK OF NORTH U.S. HIGHWAY 1, ORMOND BEACH, TO BE CONSISTENT WITH VOLUSIA COUNTY STANDARDS; REPEALING ALL INCONSISTENT ORDINANCES OR PARTS THEREOF; PROVIDING FOR SEVERABILITY; AND SETTING FORTH AN EFFECTIVE DATE.

**WHEREAS**, this is a request to amend Chapter 2, District and General Regulations, Article VI, Overlay Districts, Section 2-73, Greenbelt and Gateway Preservation Districts, Subsection (c), Design criteria; and Chapter 3, Performance Standards, Article II, Environmental Protection Standards, Section 3-21, Wetlands protection, Subsection (h), Buffer requirements, of the City of Ormond Beach *Land Development Code* by amending the landscape buffer and wetland buffer requirements for properties located in the 1000 block of North U.S. Highway 1, Ormond Beach, to be consistent with Volusia County standards, and

**WHEREAS**, the local planning agency, being the Planning Board of the City of Ormond Beach, has conducted a public hearing on May 8, 2025, on the requested amendments and has made recommendations thereon to the City Commission, and

**WHEREAS**, all applicable notice requirements of Section 166.041(3)(a), *Florida Statutes*, have been complied with, and

**WHEREAS**, the City Commission finds the amendment to be consistent with the provisions of the *Comprehensive Plan* of the City of Ormond Beach, and in the overall best interest of the public health, safety and welfare, now therefore,

**BE IT ENACTED BY THE PEOPLE OF THE CITY OF ORMOND BEACH, FLORIDA, THAT**:

**SECTION ONE**. Subsection (c), Design criteria, of Section 2-73, Greenbelt and Gateway Preservation Districts, of Article VI, Overlay Districts, of Chapter 2, District and General Regulations, of the City of Ormond Beach *Land Development Code*, is hereby amended as follows:

**Sec. 2-73. Greenbelt and Gateway Preservation Districts**

(a) – (b) (*no change to existing text)*

(c) *Design criteria.*

(1) *Landscape buffer requirements.*

a. The following standards shall apply to single-family residential developments in which access to individual homes is provided from internal streets except for those abutting I-95 (see figure 1):

1. There shall be a ten-foot (10') wide landscaped buffer on the designated greenbelt route side of a minimum five-foot (5') high wall constructed of brick or other type of finished masonry which is compatible with the architectural design of the development; both the wall and the landscaped buffer shall be in a common area under the ownership and maintenance responsibility of the development's homeowners' association, which responsibility shall be clearly established in the restrictive covenants for the development. Where existing vegetation between the wall and right-of-way line is insufficient, additional predominantly native material is to be planted so that no more than thirty feet (30') of wall remains unbuffered by vegetation. (Each plant

grouping between areas of devoid planted wall face shall have a minimum of thirty (30) square feet of planted area.) In situations where placing the wall, as described in this section, will severely impact the existing vegetation, the landscape architect may approve relocating the wall to the rear of the greenbelt landscape buffer.

2. There shall be a fifteen-foot (15') landscaped buffer, to include trees, on the homeowners' side of the aforesaid wall; this landscaped buffer shall be established as a conservation easement in favor of the homeowners' association, but with the city having the right to enforce the easement in instances when the association may fail or refuse to do so, such enforcement to be at the expense of the association and the owner of the lot on which the enforcement action becomes necessary.

3. All principal and accessory residential structures and screen enclosures shall be set back a minimum of ten feet (10') from the landscaped buffer.

4. Except when there is established on the plat a minimum rear yard setback of at least thirty feet (30'), the plat and the restrictive covenants for the development shall prohibit swimming pools in the rear yards of lots abutting designated greenbelt routes; said thirty feet (30') may include the required ten-foot (10') landscaped buffer described in subsection (c)(1)a2 of this section.

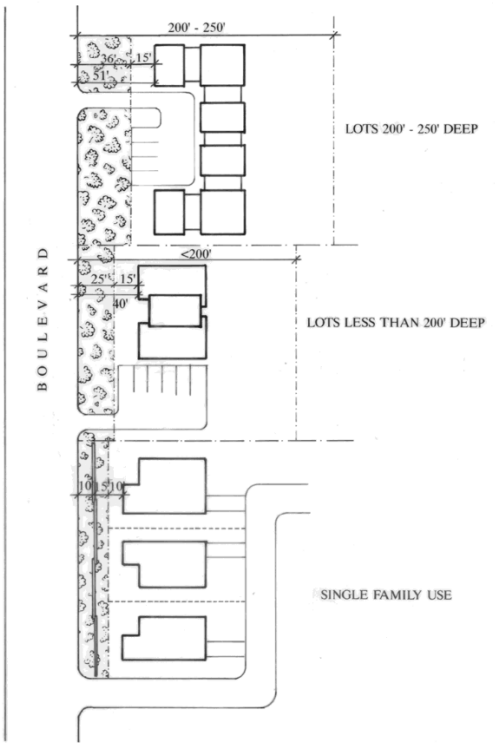
5. The special landscape requirements in subsections (c)(2)a and in (c)(2)d through (2)o of this section, inclusive, shall apply to this section.

b. The following standards shall apply to all development projects:

1. A minimum thirty-six-foot (36') wide landscaped buffer area shall be required on those sides of a lot which abut a designated greenbelt route.

2. For lots in existence prior to April 3, 1984, with an average lot depth of less than two hundred feet (200') and for lots which are reduced to an average lot depth of less than two hundred feet (200') as a result of an eminent domain proceeding, a minimum twenty-five-foot (25') wide landscaped buffer area shall be required on those sides of a lot which abut a designated greenbelt route.

c. The following standards shall apply to all development projects abutting I-95:



1. A minimum sixty-foot (60') wide landscape buffer shall be required on those sides of any lot which abut the designated greenbelt route.

2. A minimum twenty-five-foot (25') wide landscape buffer area shall be provided between any new access road and a designated greenbelt route.

3. All of the special landscape requirements listed in subsections (c)(2)a through (2)o, inclusive, of this section shall apply to all development projects abutting I-95.

d. The following standards shall apply to all development projects between U.S. 1 and Dodson's Creek: a minimum twenty-foot (20') wide landscape buffer shall be required on those sides of any lot which abut the designated greenbelt route.

FIGURE 10.1
GREENBELT CORRIDOR
BUFFER AND SETBACK REQUIREMENTS

e. The following standards shall apply to lots within the 1000 block of North U.S. Highway 1 abutting the Tomoka River: a minimum twenty-foot (20')-wide landscape buffer shall be required on those sides of any lot which abut the designated greenbelt route.

(2) – (4) *(no change to existing text)*

**SECTION TWO.** Subsection (h), Buffer requirements, of Section 3-21, Wetlands protection, of Article II, Environmental Protection Standards, of Chapter 3, Performance Standards, of the City of Ormond Beach *Land Development Code*, is hereby amended as follows:

**Sec. 3-21. Wetlands protection**

(a) through (g) *(no change to existing text)*

(h) *Buffer requirements.*

(1) A buffer not less than twenty-five feet (25') in width shall be established adjacent to and surrounding all wetlands, except as provided in subsection (i) of this section, mitigation standards. Additional buffer requirements shall be required adjacent to the Halifax River, the Tomoka River and all of their associated tributaries and wetlands, as detailed in subsection (h)(4) of this section.

(2) Properties with the county environmental corridor overlay (ECO) map designation shall comply with the wetland development regulations established in the county Land Development Code.

(3) Activity which does not have a significant adverse effect on the natural function of the buffer may be permitted within the buffer without the requirement for mitigation. The activities which may be permitted include, but are not limited to pruning, planting of suitable native vegetation, removal of exotic and nuisance pioneer plant species, and the creation and maintenance of walking trails and removal of vegetation for fire prevention.

(4) The city shall require and enforce the provision and maintenance of adequate and undisturbed upland buffers of native vegetation adjacent to the Halifax River, the Tomoka River, and all of their associated tributaries and wetlands. A minimum shoreline buffer requirement shall be applied for all new development to protect wildlife and marine life habitat areas and the adjacent surface water quality. The minimum shoreline buffer shall be as follows:

a. *Tomoka River and the Little Tomoka River.*

(i) A minimum of one hundred twenty feet (120') from the mean high-water mark or an average of seventy-five feet (75'), but not less than fifty feet (50') from the upland/wetland interface line, whichever is greater. The minimum buffer may be reduced where a planned zoning

district is approved for sites where a bluff of ten feet (10') above the mean high-water mark exists along the river.

(ii) Lots within the 1000 block of North U.S. Highway 1 abutting the Tomoka River: fifty feet (50') from the upland/wetland interface line.

b. *Halifax River.* A minimum of thirty feet (30') from the mean high-water line or upland/wetland interface, or as stipulated by a specific zoning district rear yard setback contained in this Land Development Code, whichever is greater. The minimum setback may be reduced where a planned zoning district is approved for sites where a bluff of ten feet (10') above the mean high-water mark exists along the river.

c. *Mosquito control ditches; Strickland, Dodson and Thompson Creeks; and Misner's and Groover Branches.* A minimum of sixty feet (60') from the mean high-water mark or fifty feet (50') from the upland/wetland interface line, whichever is greater.

(5) For those waterways listed under subsection (h)(4)c of this section, the shoreline and wetland buffer may be adjusted downward on a case-by-case basis, to be no less than thirty feet (30') from the mean high-water mark or no less than twenty-five feet (25') from the upland/wetland interface, whichever is greater. A request for a reduction may be considered, provided that the associated wetland and upland buffer areas are predominantly herbaceous in nature, and the functioning values of the wetland and upland buffer areas are poor for such factors as wetland wildlife quality and quantity, sediment and turbidity control, and surface water runoff control. A determination to allow a reduction in the buffer width shall be based on a finding of conformance to all of the following criteria as conducted through the development review process:

a. The developable portion of the property is less than one hundred fifty feet (150') deep for existing lots of record, as of the date of adoption of the comprehensive plan.

b. The proposed development shall be connected to a central water and sewer system.

c. The proposed development shall not adversely impact the hydroperiod and other functioning values of the adjacent wetland as determined by review of a wetlands management plan, which is required to be submitted per this section.

(i) through (k) *(no change to existing text)*

**SECTION THREE.** All Ordinances or parts of Ordinances in conflict herewith are hereby repealed to the extent of such conflict.

**SECTION FOUR.** In the event any word, phrase, clause, sentence, paragraph, term, or provision of this Ordinance shall be held to be invalid by a court of competent jurisdiction, such judicial determination shall not affect any other word, clause, phrase, sentence, paragraph, term or provision, of this Ordinance, and the remainder of this Ordinance shall remain in full force and effect.

**SECTION FIVE.** This Ordinance shall take effect immediately upon its adoption.

**PASSED UPON** at the first reading of the City Commission, this 22nd day of July, 2025.

**PASSED UPON** at the second and final reading of the City Commission, this 5th day of August, 2025.

# PLANNING BOARD
# STAFF REPORT
## Land Development Code (LDC) Amendments 1000 block of North US Highway 1 Abutting the Tomoka River, Greenbelt and Gateway Preservation District and Wetland Buffer

| | |
|---|---|
| **PLANNING BOARD DATE:** | May 8, 2025 |
| **TENTATIVE CITY COMMISSION DATES:** | July 22, 2025 (1st Reading); August 5, 2025 (2nd Reading) |
| **APPLICANT:** | Administrative |
| **PROJECT NUMBER:** | LDC 2025-157 |
| **SUBJECT:** | LDC amendments: 1000 block of North U.S. Highway 1, abutting the Tomoka River:<br>1. Chapter 2, District and General Regulations, Article VI, Overlay Districts, Section 2-73, Greenbelt and Gateway Preservation Districts; and<br>2. Chapter 3, Performance Standards, Article II, Environmental Protection Standards, Section 3-21, Wetlands protection, subsection h, Buffer requirements |
| **PLANNING STAFF RECOMMENDATION:** | Approval |
| **STAFF CONTACT:** | Steven Spraker, AICP, Planning Director |

**SECTION 1, INTRODUCTION:** This is an application for administrative amendments to the following Sections of the Land Development Code: (1) Chapter 2, District and General Regulations, Article VI, Overlay Districts, Section 2-73, Greenbelt and Gateway Preservation Districts and (2) Chapter 3, Performance Standards, Article II, Environmental Protection Standards, Section 3-21, Wetlands protection, subsection h, Buffer requirements. The purpose of the Land Development Code amendments is to provide the properties within the 1000 block of North U.S. Highway 1, abutting the Tomoka River, the same landscape buffer and wetland buffer requirements as existing when the properties were located in unincorporated Volusia County.

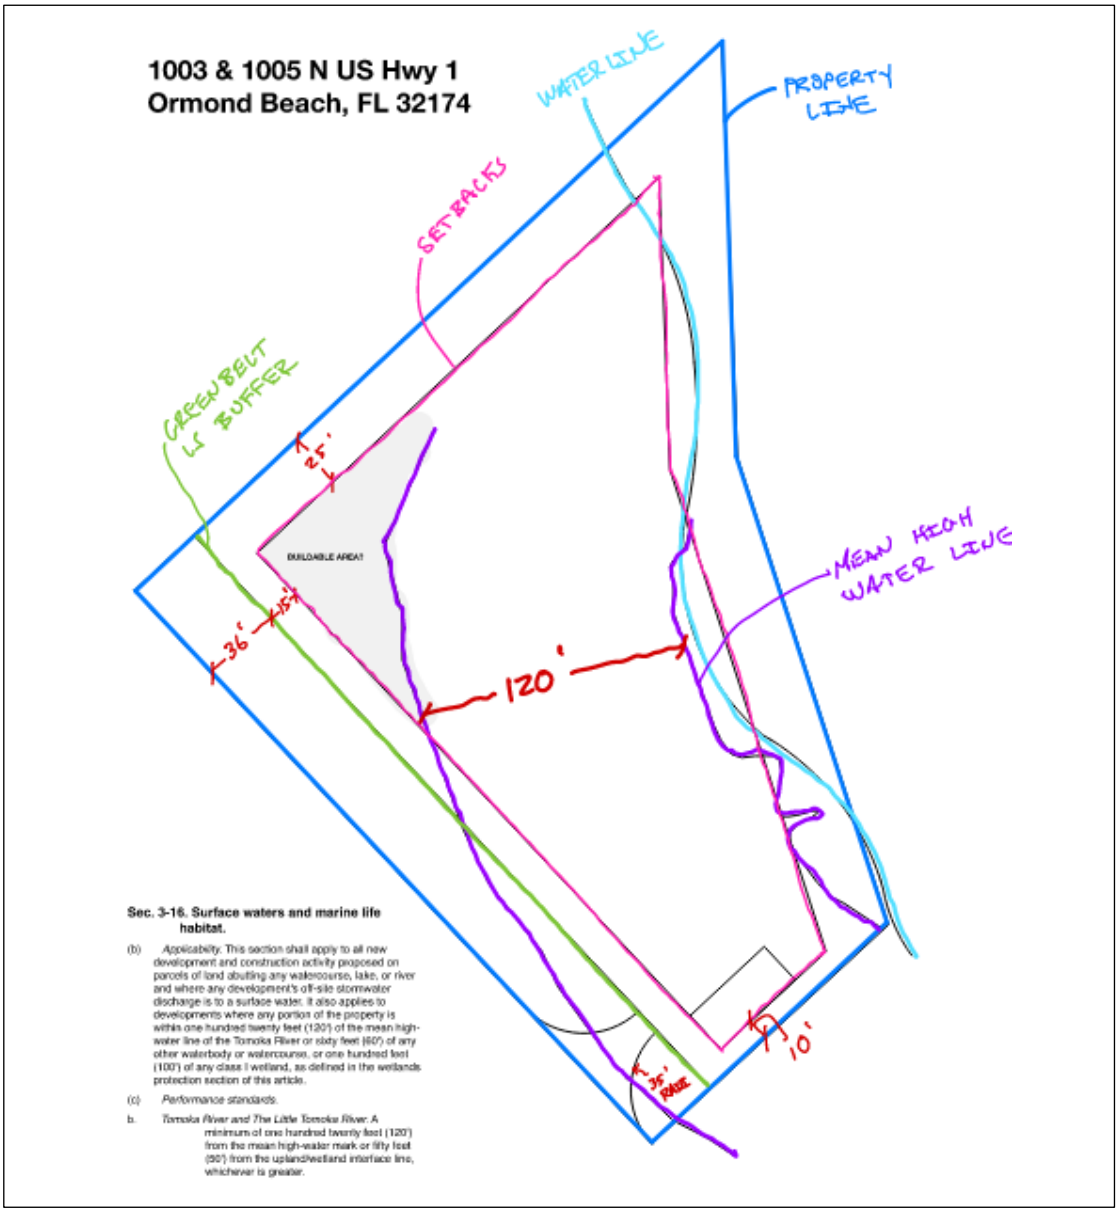
**SECTION 2, BACKGROUND:** In 2014, an Interlocal Service Boundary Agreement between the City of Ormond Beach and the County of Volusia was created. A detailed history of the Interlocal Service Boundary Agreement is provided in Exhibit 2. The agreement allows the City of Ormond Beach land use, zoning, and code enforcement authority within the North U.S.1 corridor, whether the property is within the City of Ormond Beach or unincorporated Volusia County. The property subject to Land Development Code amendments are part of the Interlocal Service Boundary Agreement.

There was an inquiry from a contract purchaser regarding the property at 1003 and 1005 North U.S. Highway 1. These properties are currently vacant, and a restaurant existed at one time which was demolished. The property at 1003 North U.S. Highway 1 was annexed into Ormond Beach in 2016, and 1005 North U.S. Highway 1 was annexed into Ormond Beach in 2025. As part of the conceptual development plan, landscape and wetland buffers were identified as key components of site development. Within this area of North U.S. Highway 1, 1001 North U.S. Highway 1 is developed as the Tomoka Boat Club and is within unincorporated Volusia County. The property at 1009 North U.S. Highway 1 is not part of the Interlocal Service Boundary Agreement and is within unincorporated Volusia County. The land area of North U.S. Highway 1, abutting the Tomoka River, subject to this amendment is shown in Exhibit 1.

**Exhibit 1: Area of U.S. Highway 1, abutting the Tomoka River:**

The history of the Interlocal Service Boundary Agreement is detailed below:

**Exhibit 2: History of the Interlocal Service Boundary Agreement:**



| Action/Approval Date | Description |
|---|---|
| **April 7, 1992**<br>Resolution 1992-70 | Authorized the construction of potable water and sanitary sewer force mains along North U.S. Highway 1 from the south terminus going north to 1899 North U.S. Highway 1 for the City Provisioners project and the execution of a joint project agreement between Ormond Beach and Volusia County. |
| **September 7, 2010**<br>Resolution 2010-131 | Ormond Beach initiated the process to create an Interlocal Service Boundary area established by Chapter 171, Part II, Florida Statutes. |
| **October 7, 2010**<br>Volusia County<br>Resolution 2010-05 | Responding Resolution from Volusia County identifying certain issues along the North U.S. 1 corridor. |
| **August 19, 2014**<br>Ordinance 2014-27 | Authorized the execution of the Interlocal Service Boundary Agreement with Volusia County regarding the North U.S. 1 Joint planning area. The Ordinance also approved a Planning and Services Delivery Sub-Agreement, as well as itinerant vendor criteria. Ormond Beach took control of land use planning, zoning, permitting, and code enforcement of the Interlocal Service Boundary Agreement for properties within Ormond Beach and unincorporated Volusia County. The agreement specified Volusia County would continue maintaining stormwater conveyance systems and when roadways would transfer to Ormond Beach. |
| **August 21, 2014**<br>Volusia County<br>Ordinance 2014-12 | Approved and authorized the execution of an Interlocal Service Boundary Agreement between Volusia County and the City of Ormond Beach. |
| **January 20, 2015**<br>Ordinance 2014-42 | Amended the Future Land Use Element and Intergovernmental Coordination Element of the city's Comprehensive Land Use Plan concerning the land in the Joint Planning Area and Municipal Service Area. |
| **January 20, 2015**<br>Ordinance 2015-5 | Amended the City's Future Land Use Map designation concerning lands in the Interlocal Service Boundary Agreement/Joint Planning Area. |

| Action/Approval Date | Description |
|---|---|
| **April 7, 2015**<br>Ordinances 2015-13 & 14 | Amended the city's Official Zoning Map to rezone the lands in the Joint Planning Area and Municipal Service Area. |
| **June 23, 2015**<br>Ordinance 2015-27 | Amended the Land Development Code to include itinerant merchant regulations for recognized special events and outdoor entertainment activity and temporary campsites in two categories:<br>1. All properties operating year-round businesses with documented Business Tax Receipts with Volusia County were placed on the "Recognized Special Event Host" list and allowed to continue operating itinerant activities with approved City permits.<br>2. The vacant or unimproved properties had a five (5) year period to establish a permanent business to be classified as a recognized special event host. Failure to establish a permanent business would not allow any itinerant vending activities after the five (5) year amortization period. |
| **June 23, 2015**<br>Resolution 2015-136 | Ormond Beach acknowledged the completion of certain matters regarding the establishment and implementation of the North U.S. Highway 1 Joint Planning and Municipal Service Area, acknowledging the City has acquired jurisdictional authority over the lands in the joint project and municipal service area. |
| **August 20, 2019**<br>Ordinance 2019-19 | Approved and authorized the first amended Interlocal Service Boundary Agreement between the City of Ormond Beach and the County of Volusia, which includes a map of the land area of the Plantation Oaks subdivision and any enclaves. The Plantation Oaks land area is approximately 1,034 acres. |
| **September 17, 2019**<br>Volusia County<br>Resolution 2019-15 | Approved and authorized an amendment to the boundaries of the Interlocal Service Boundary Agreement with the City of Ormond Beach. |

| **June 4, 2024**<br>Ordinance 2024-09 | Renewal of an Interlocal Service Boundary Agreement and a Planning sub-agreement, between Ormond Beach and the County of Volusia regarding the North U.S. 1 Joint Planning and Municipal Service Area for a period of ten (10) years. |

As part of the conceptual site plan process, an engineer developed a buildable area of 1003 and 1005 North U.S. Highway 1 which is included as Exhibit 3.

**Exhibit 3: Buildable Area Concept Plan:**

The buildable area exhibit highlighted two Land Development Code standards that differed from when the property was located in unincorporated Volusia County:

**Exhibit 4: Landscape and Wetland Buffer Comparison:**

| Standard | Unincorporated Volusia County | Ormond Beach |
|---|---|---|
| Landscape Buffer along U.S. Highway 1 | 20’ | 36’ |
| Wetland buffer | 50’ | 120’ |

A key consideration of the parcels in the 1000 block of North U.S. Highway 1, abutting the Tomoka River, is the limited lot depth between U.S. Highway1 and the Tomoka River. The application of the Ormond Beach landscape and wetland buffers, as the result of the implementation of the Interlocal Service Boundary Agreement, would restrict development potential on the properties in the 1000 block of North U.S. Highway 1. The purpose of the Land Development Code amendment is to re-establish the landscape requirement along North U.S. Highway 1 and the wetland buffer as it existed in unincorporated Volusia County. Included in ATTACHMENT 2 is a verification of the landscape and wetland buffer standards when the property was located in unincorporated Volusia County.

**ANALYSIS:** These are administrative amendments to the following Sections of the Land Development Code: (1) Chapter 2, District and General Regulations, Article VI, Overlay Districts, Section 2-73, Greenbelt and Gateway Preservation Districts and (2) Chapter 3, Performance Standards, Article II, Environmental Protection Standards, Section 3-21, Wetlands protection, subsection h, Buffer requirements. The purpose of the Land Development Code amendments is to provide the properties within the 1000 block of North U.S. Highway 1 the same landscape buffer and wetland buffer requirements as existed when the properties were located in unincorporated Volusia County. The underlined text are additions to the original text and ~~strike through~~ are the deleted text of the amendment.

**Chapter 2, District and General Regulations, Article VI, Overlay Districts, Section 2-73, Greenbelt and Gateway Preservation Districts**

(a) *Purpose and intent* ****No change to existing text*****

(b) *Scope* ****No change to existing text*****

(c) *Design criteria.*

(1) *Landscape buffer requirements.*

a. The following standards shall apply to single-family residential developments in which access to individual homes is provided from internal streets except for those abutting I-95 (see figure 1):

1. There shall be a ten-foot (10') wide landscaped buffer on the designated greenbelt route side of a minimum five-foot (5') high wall constructed of brick or other type of finished masonry which is compatible with the architectural design of the development; both the wall and the landscaped buffer shall be in a common area under the ownership and maintenance responsibility of the development's homeowners' association, which responsibility shall be clearly established in the restrictive covenants for the development. Where existing vegetation between the wall and right-of-way line is insufficient, additional predominantly native material is to be planted so that no more than thirty feet (30') of wall remains unbuffered by vegetation. (Each plant grouping between areas of devoid planted wall face shall have a minimum of thirty (30) square feet of planted area.) In situations where placing the wall, as described in this section, will severely impact the existing vegetation, the landscape architect may approve relocating the wall to the rear of the greenbelt landscape buffer.

2. There shall be a fifteen-foot (15') landscaped buffer, to include trees, on the homeowners' side of the aforesaid wall; this landscaped buffer shall be established as a conservation easement in favor of the homeowners' association, but with the city having the right to enforce the easement in instances when the association may fail or refuse to do so, such enforcement to be at the expense of the association and the owner of the lot on which the enforcement action becomes necessary.
3. All principal and accessory residential structures and screen enclosures shall be set back a minimum of ten feet (10') from the landscaped buffer.
4. Except when there is established on the plat a minimum rear yard setback of at least thirty feet (30'), the plat and the restrictive covenants for the development shall prohibit swimming pools in the rear yards of lots abutting designated greenbelt routes; said thirty feet (30') may include the required ten-foot (10') landscaped buffer described in subsection (c)(1)a2 of this section.
5. The special landscape requirements in subsections (c)(2)a and in (c)(2)d through (2)o of this section, inclusive, shall apply to this section.

b. The following standards shall apply to all development projects:
   1. A minimum thirty-six-foot (36') wide landscaped buffer area shall be required on those sides of a lot which abut a designated greenbelt route.
   2. For lots in existence prior to April 3, 1984, with an average lot depth of less than two hundred feet (200') and for lots which are reduced to an average lot depth of less than two hundred feet (200') as a result of an eminent domain proceeding, a minimum twenty-five-foot (25') wide landscaped buffer area shall be required on those sides of a lot which abut a designated greenbelt route.

c. The following standards shall apply to all development projects abutting I-95:
   1. A minimum sixty-foot (60') wide landscape buffer shall be required on those sides of any lot which abut the designated greenbelt route.
   2. A minimum twenty-five-foot (25') wide landscape buffer area shall be provided between any new access road and a designated greenbelt route.
   3. All of the special landscape requirements listed in subsections (c)(2)a through (2)o, inclusive, of this section shall apply to all development projects abutting I-95.

d. The following standards shall apply to all development projects between U.S. 1 and Dodson's Creek: a minimum twenty-foot (20') wide landscape buffer shall be required on those sides of any lot which abut the designated greenbelt route.

e. The following standards shall apply to lots within the 1000 block of North U.S. Highway 1 abutting the Tomoka River: a minimum twenty-foot (20')-wide landscaped buffer shall be required on those sides of any lot which abut the designated greenbelt route.

Figure 10.1 - ****No change to existing text****

*(3) Signs. ***No change to existing text****

*(4) Architecture.***No change to existing text****

**Chapter 3, Performance Standards, Article II, Environmental Protection Standards, Section 3-21, Wetlands protection, subsection h, Buffer requirements**

(h) *Buffer requirements.*

(1) A buffer not less than twenty-five feet (25') in width shall be established adjacent to and surrounding all wetlands, except as provided in subsection (i) of this section, mitigation standards. Additional buffer requirements shall be required adjacent to the Halifax River, the Tomoka River and all of their associated tributaries and wetlands, as detailed in subsection (h)(4) of this section.

(2) Properties with the county environmental corridor overlay (ECO) map designation shall comply with the wetland development regulations established in the county Land Development Code.

(3) Activity which does not have a significant adverse effect on the natural function of the buffer may be permitted within the buffer without the requirement for mitigation. The activities which may be permitted include, but are not limited to pruning, planting of suitable native vegetation, removal of exotic and nuisance pioneer plant species, and the creation and maintenance of walking trails and removal of vegetation for fire prevention.

(4) The city shall require and enforce the provision and maintenance of adequate and undisturbed upland buffers of native vegetation adjacent to the Halifax River, the Tomoka River, and all of their associated tributaries and wetlands. A minimum shoreline buffer requirement shall be applied for all new development to protect wildlife and marine life habitat areas and the adjacent surface water quality. The minimum shoreline buffer shall be as follows:

a. *Tomoka River and the Little Tomoka River.*

(i) A minimum of one hundred twenty feet (120') from the mean high-water mark or an average of seventy-five feet (75'), but not less than fifty feet (50') from the upland/wetland interface line, whichever is greater. The minimum buffer may be reduced where a planned zoning district is approved for sites where a bluff of ten feet (10') above the mean high-water mark exists along the river.

(ii) Lots within the 1000 block of North U.S. Highway 1 abutting the Tomoka River: fifty feet (50') from the upland/wetland interface line.

b. *Halifax River.* A minimum of thirty feet (30') from the mean high-water line or upland/wetland interface, or as stipulated by a specific zoning district rear yard setback contained in this Land Development Code, whichever is greater. The minimum setback may be reduced where a planned zoning district is approved for sites where a bluff of ten feet (10') above the mean high-water mark exists along the river.

c. *Mosquito control ditches; Strickland, Dodson and Thompson Creeks; and Misner's and Groover Branches.* A minimum of sixty feet (60') from the mean high-water mark or fifty feet (50') from the upland/wetland interface line, whichever is greater.

(5) For those waterways listed under subsection (h)(4)c of this section, the shoreline and wetland buffer may be adjusted downward on a case-by-case basis, to be no less than thirty feet (30') from the mean high-water mark or no less than twenty-five feet (25') from the upland/wetland interface, whichever is greater. A request for a reduction may be considered, provided that the associated wetland and upland buffer areas are predominantly herbaceous in nature, and the functioning values of the wetland and upland buffer areas are poor for such factors as wetland wildlife quality and quantity, sediment and turbidity control, and surface water runoff control. A determination to allow a reduction in the buffer width shall be based on a finding of conformance to all of the following criteria as conducted through the development review process:

a. The developable portion of the property is less than one hundred fifty feet (150') deep for existing lots of record, as of the date of adoption of the comprehensive plan.

b. The proposed development shall be connected to a central water and sewer system.

c. The proposed development shall not adversely impact the hydroperiod and other functioning values of the adjacent wetland as determined by review of a wetlands management plan, which is required to be submitted per this section.

**CONCLUSION:**

Section 1-15(e) of the Land Development Code requires certain criteria that must be evaluated before adoption of a Land Development Code amendment when making their recommendation, as follows:

1. **The proposed development conforms to the standards and requirements of this Code and will not create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare or quality of life.**

   There is no development proposed as part of the proposed amendment. This is an administrative amendment based upon parcels with unique characteristics abutting the Tomoka River. When the Interlocal Service Boundary Agreement was implemented in 2014, the North U.S. Highway 1 landscape buffer went from 20’ (Volusia County) to 36’(City of Ormond Beach) on these properties. The wetland buffer also increased from 50’ (Volusia County) to 120’ (City of Ormond Beach) on these properties. There are similar properties along the North U.S. 1 corridor along the 700 and 800 blocks that have reduced landscape and wetland buffers. This amendment will not create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare or quality of life.

2. **The proposed development is consistent with the Comprehensive Plan.**

   The proposed Land Development Code amendment is consistent with the Comprehensive Plan. Objective 2.1 of the Future Land Use Element of the Comprehensive Plan discussed the need to update Land Development Code regulations.

3. **The proposed development will not adversely impact environmentally sensitive lands or natural resources, including but not limited to waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells.**

   The proposed Land Development Code amendment does not approve any site-specific development and will not have an adverse impact on environmentally sensitive lands. This is an administrative amendment based on the uniqueness of individual properties and utilize the Volusia County standards that existed prior to the implementation of the Interlocal Service Boundary Agreement.

4. **The proposed use will not substantially or permanently depreciate the value of surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties**.

   The proposed Land Development Code amendment does not approve any site-specific development and will not have any impacts on surrounding properties.

5. **There are adequate public facilities to serve the development, including but not limited to roads, sidewalks, bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds.**

   This is an administrative amendment regarding landscaping and wetland buffers. A concurrency analysis will be included with the submittal of a site plan application. The proposed amendment would not have a negative impact on public facilities.

6. **Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe. This finding shall be based on a traffic report where available, prepared by a qualified traffic consultant, engineer or planner which details the anticipated or projected effect of the project on adjacent roads and the impact on public safety.**

   There is no development proposed as part of the proposed amendment. The application pertains to a Land Development Code amendment.

7. **The proposed development is functional in the use of space and aesthetically acceptable.**

   There is no development proposed as part of the proposed amendment. This is an administrative amendment regarding landscaping and wetland buffers.

8. **The proposed development provides for the safety of occupants and visitors.**

   There is no development proposed as part of the proposed amendment. This is an administrative amendment regarding landscaping and wetland buffers.

**9. The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area.**

There is no development proposed as part of the proposed amendment. This is an administrative amendment regarding landscaping and wetland buffers.

**10. The testimony provided at public hearings**.

There has not been a public hearing at this time. The comments from the Planning Board meeting will be incorporated into the City Commission packet.

**RECOMMENDATION:** It is recommended that the Planning Board **APPROVE** administrative amendments to the following Sections of the Land Development Code: (1) Chapter 2, District and General Regulations, Article VI, Overlay Districts, Section 2-73, Greenbelt and Gateway Preservation Districts and (2) Chapter 3, Performance Standards, Article II, Environmental Protection Standards, Section 3-21, Wetlands protection, subsection h, Buffer requirements. The purpose of the Land Development Code amendments is to provide the properties within the 1000 block of North U.S Highway 1 the same landscape buffer and wetland buffer requirements as existed when the properties were located in unincorporated Volusia County. The proposed amendments are included in ATTACHMENT 1.

Attachment 1: Proposed Land Development Code
Attachment 2: E-mail confirming Volusia County landscape and wetland standards

# ATTACHMENT 1

Greenbelt and Gateway Preservation District and Wetland Buffer, Land Development Code amendment

1000 block of North US Highway 1

**Chapter 2, District and General Regulations, Article VI, Overlay Districts, Section 2-73, Greenbelt and Gateway Preservation Districts**

(a) *Purpose and intent* ***No change to existing text***

(b) *Scope* ***No change to existing text***

(c) *Design criteria.*

(1) *Landscape buffer requirements.*

a. The following standards shall apply to single-family residential developments in which access to individual homes is provided from internal streets except for those abutting I-95 (see figure 1):

1. There shall be a ten-foot (10') wide landscaped buffer on the designated greenbelt route side of a minimum five-foot (5') high wall constructed of brick or other type of finished masonry which is compatible with the architectural design of the development; both the wall and the landscaped buffer shall be in a common area under the ownership and maintenance responsibility of the development's homeowners' association, which responsibility shall be clearly established in the restrictive covenants for the development. Where existing vegetation between the wall and right-of-way line is insufficient, additional predominantly native material is to be planted so that no more than thirty feet (30') of wall remains unbuffered by vegetation. (Each plant grouping between areas of devoid planted wall face shall have a minimum of thirty (30) square feet of planted area.) In situations where placing the wall, as described in this section, will severely impact the existing vegetation, the landscape architect may approve relocating the wall to the rear of the greenbelt landscape buffer.

2. There shall be a fifteen-foot (15') landscaped buffer, to include trees, on the homeowners' side of the aforesaid wall; this landscaped buffer shall be established as a conservation easement in favor of the homeowners' association, but with the city having the right to enforce the easement in instances when the association may fail or refuse to do so, such enforcement to be at the expense of the association and the owner of the lot on which the enforcement action becomes necessary.

3. All principal and accessory residential structures and screen enclosures shall be set back a minimum of ten feet (10') from the landscaped buffer.

4. Except when there is established on the plat a minimum rear yard setback of at least thirty feet (30'), the plat and the restrictive covenants for the development shall prohibit swimming pools in the rear yards of lots abutting designated greenbelt routes; said thirty feet (30') may include the required ten-foot (10') landscaped buffer described in subsection (c)(1)a2 of this section.

5. The special landscape requirements in subsections (c)(2)a and in (c)(2)d through (2)o of this section, inclusive, shall apply to this section.

b. The following standards shall apply to all development projects:

1. A minimum thirty-six-foot (36') wide landscaped buffer area shall be required on those sides of a lot which abut a designated greenbelt route.

2. For lots in existence prior to April 3, 1984, with an average lot depth of less than two hundred feet (200') and for lots which are reduced to an average lot depth of less than two hundred feet (200') as a result of an eminent domain proceeding, a minimum twenty-five-foot (25') wide landscaped buffer area shall be required on those sides of a lot which abut a designated greenbelt route.

c. The following standards shall apply to all development projects abutting I-95:

1. A minimum sixty-foot (60') wide landscape buffer shall be required on those sides of any lot which abut the designated greenbelt route.

2. A minimum twenty-five-foot (25') wide landscape buffer area shall be provided between any new access road and a designated greenbelt route.

3. All of the special landscape requirements listed in subsections (c)(2)a through (2)o, inclusive, of this section shall apply to all development projects abutting I-95.

d. The following standards shall apply to all development projects between U.S. 1 and Dodson's Creek: a minimum twenty-foot (20') wide landscape buffer shall be required on those sides of any lot which abut the designated greenbelt route.

e. The following standards shall apply to lots within the 1000 block of North U.S. Highway 1 abutting the Tomoka River: a minimum twenty-foot (20')-wide landscape buffer shall be required on those sides of any lot which abut the designated greenbelt route.

*(3) Signs. ***No change to existing text****

*(4) Architecture.***No change to existing text****

**Chapter 3, Performance Standards, Article II, Environmental Protection Standards, Section 3-21, Wetlands protection, subsection h, Buffer requirements**

(h) *Buffer requirements.*

(1) A buffer not less than twenty-five feet (25') in width shall be established adjacent to and surrounding all wetlands, except as provided in subsection (i) of this section, mitigation standards. Additional buffer requirements shall be required adjacent to the Halifax River, the Tomoka River and all of their associated tributaries and wetlands, as detailed in subsection (h)(4) of this section.

(2) Properties with the county environmental corridor overlay (ECO) map designation shall comply with the wetland development regulations established in the county Land Development Code.

(3) Activity which does not have a significant adverse effect on the natural function of the buffer may be permitted within the buffer without the requirement for mitigation. The activities which may be permitted include, but are not limited to pruning, planting of suitable native vegetation, removal of exotic and nuisance pioneer plant species, and the creation and maintenance of walking trails and removal of vegetation for fire prevention.

(4) The city shall require and enforce the provision and maintenance of adequate and undisturbed upland buffers of native vegetation adjacent to the Halifax River, the Tomoka River, and all of their associated tributaries and wetlands. A minimum shoreline buffer requirement shall be applied for all new development to protect wildlife and marine life habitat areas and the adjacent surface water quality. The minimum shoreline buffer shall be as follows:

a. *Tomoka River and the Little Tomoka River.*

(i) A minimum of one hundred twenty feet (120') from the mean high-water mark or an average of seventy-five feet (75'), but not less than fifty feet (50') from the upland/wetland interface line, whichever is greater. The minimum buffer may be reduced where a planned zoning district is approved for sites where a bluff of ten feet (10') above the mean high-water mark exists along the river.

(ii) Lots within the 1000 block of North U.S. Highway 1 abutting the Tomoka River: fifty feet (50') from the upland/wetland interface line.

b. *Halifax River.* A minimum of thirty feet (30') from the mean high-water line or upland/wetland interface, or as stipulated by a specific zoning district rear yard setback contained in this Land Development Code, whichever is greater. The minimum setback may be reduced where a planned zoning district is approved for sites where a bluff of ten feet (10') above the mean high-water mark exists along the river.

c. *Mosquito control ditches; Strickland, Dodson and Thompson Creeks; and Misner's and Groover Branches.* A minimum of sixty feet (60') from the mean high-water mark or fifty feet (50') from the upland/wetland interface line, whichever is greater.

(5) For those waterways listed under subsection (h)(4)c of this section, the shoreline and wetland buffer may be adjusted downward on a case-by-case basis, to be no less than thirty feet (30') from the mean high-water mark or no less than twenty-five feet (25') from the upland/wetland interface, whichever is greater. A request for a reduction may be considered, provided that the associated wetland and upland buffer areas are predominantly herbaceous in nature, and the functioning values of the wetland and upland buffer areas are poor for such factors as wetland wildlife quality and quantity, sediment and turbidity control, and surface water runoff control. A determination to allow a reduction in the buffer width shall be based on a finding of conformance to all of the following criteria as conducted through the development review process:

a. The developable portion of the property is less than one hundred fifty feet (150') deep for existing lots of record, as of the date of adoption of the comprehensive plan.

b. The proposed development shall be connected to a central water and sewer system.

c. The proposed development shall not adversely impact the hydroperiod and other functioning values of the adjacent wetland as determined by review of a wetlands management plan, which is required to be submitted per this section.

Volusia County E-mail regarding landscape and wetland buffer requirements

**From:** Keith Abrahamson <KAbrahamson@volusia.org>
**Sent:** Monday, March 31, 2025 2:55 PM
**To:** Spraker, Steven
**Subject:** RE: [EX] Volusia County Wetland and Landscape Standards for 1001, 1003, and 1005 N US Highway 1

**[External Email–Use Caution] – OB/IT Helpdesk**

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Good afternoon,

The upland buffer would be 50 foot in that area. I asked Scott Ashley our Zoning Manger about the landscape question, and he stated there is a 20-foot landscape buffer along US 1. If the lot on the north side is commercial to single family then the north side landscape buffer is 25-feet and if it is commercial to commercial the buffer would be 10-feet.

Keith Abrahamson
County Forester
Environmental Management
County of Volusia FL

**From:** Spraker, Steven <Steven.Spraker@ormondbeach.org>
**Sent:** Monday, March 31, 2025 11:10 AM
**To:** Keith Abrahamson <KAbrahamson@volusia.org>
**Subject:** [EX] Volusia County Wetland and Landscape Standards for 1001, 1003, and 1005 N US Highway 1

**CAUTION:** This email originated from outside Volusia County's email system. **DO NOT CLICK** links or attachments unless you recognize the sender and/or know the content is safe.

**Good morning,**

The properties at 1003 and 1005 North US 1 have been exploring development options. As the conceptual meetings progressed, it appears that the developable areas are impacted by wetland buffer and Greenbelt buffer requirements based on annexation into Ormond Beach. Please see attachment Concept - 2025-03-09.pdf for the buildable area. The parcels are part of the Interlocal Service Boundary Agreement area. 1003 North US Highway 1 was annexed in 2016. 1005 North US Highway 1 is under application for annexation. The buildable area issues would also apply to 1001 North US Highway 1 (Tomoka Boat Club) which is still in unincorporated Volusia County and within the Interlocal Service Boundary Agreement area.

The Ormond Beach Land Development Code sections state:

The two Land Development Code sections creating the reduction of buildable area are:

1. Section 2-73(c)(1)(b)(1) of the Land Development Code states:

   The following standards shall apply to all development projects other than single-family residential developments, in which access to individual homes is provided from internal streets, those projects abutting I-95 and those developments located between U.S. 1 and Dodson's Creek (see figure 1):

   1. A minimum thirty-six-foot (36') wide landscaped buffer area shall be required on those sides of a lot which abut a designated greenbelt route.

2. Section 3-21(h)(4) of the Land Development Code:

   (4) The city shall require and enforce the provision and maintenance of adequate and undisturbed upland buffers of native vegetation adjacent to the Halifax River, the Tomoka River, and all of their associated tributaries and wetlands. A minimum shoreline buffer requirement shall be applied for all new development to protect wildlife and marine life habitat areas and the adjacent surface water quality. The minimum shoreline buffer shall be as follows:

   a. *Tomoka River and the Little Tomoka River.* A minimum of one hundred twenty feet (120') from the mean high-water mark or an average of seventy-five feet (75'), but not less than fifty feet (50') from the upland/wetland interface line, whichever is greater. The minimum buffer may be reduced where a planned zoning district is approved for sites where a bluff of ten feet (10') above the mean high-water mark exists along the river.

   b. *Halifax River.* A minimum of thirty feet (30') from the mean high-water line or upland/wetland interface, or as stipulated by a specific zoning district rear yard setback contained in this Land Development Code, whichever is greater. The minimum setback may be reduced where a planned zoning district is approved for sites where a bluff of ten feet (10') above the mean high-water mark exists along the river.

   c. *Mosquito control ditches; Strickland, Dodson, and Thompson Creeks; and Misner's and Groover Branches.* A minimum of sixty feet (60') from the mean high-water mark or fifty feet (50') from the upland/wetland interface line, whichever is greater.

**Can you please advise what the wetland buffer and landscape buffer (along Highway US 1) requirements were for the properties when they were located in unincorporated Volusia County?**

The three properities in this area are unique and staff is exploring potential Land Development Code amendments to ensure the wetland buffer and landscape buffer along North US Highway 1 are the same as existed in Volusia County.

Please contact me with any questions.  Thank you

Steven

## VII. PUBLIC HEARINGS

### A. PZ-2025-157, Land Development Code, 1000 Block of U.S. Highway 1 Abutting the Tomoka River, Greenbelt and Gateway Preservation District and Wetland Buffer

Mr. Steven Spraker, Planning Director, explained the Land Development Code (LDC) amendment request that focuses on the 1000 Block of N. U.S. Highway 1, abutting the Tomoka River, where it involves Greenbelt and wetland buffer amendments. He continued that the area is part of the Interlocal Service Boundary Area (ISBA), which was done in 2014 and states that anything along the corridor, whether in unincorporated Volusia County or in the City of Ormond Beach, it is under the jurisdiction of Ormond Beach for land use, zoning, and code enforcement, and allows Ormond Beach control of it.

Mr. Spraker stated that 1003 N. U.S. Highway 1 was annexed in 2016 and 1005 N. U.S. Highway 1 annexed this year in 2025. The Tomoka Boat Club at 1001 N. U.S. Highway 1 is still in unincorporated Volusia County. Mr. Spraker continued that the contract purchaser of the subject property addressed the Site Plan Review Committee (SPRC) meeting with their engineer, sharing an exhibit that showed the impacts of the wetland and the landscape buffers on the project that is next to the Tomoka River and U.S. Highway 1, the Greenbelt corridor.

Mr. Spraker explained as part of the amendment process, the existing standards were reviewed in unincorporated Volusia County, versus what exists in the City of Ormond Beach, and expanded on how when the ISBA was created, it increased both the landscape buffer 20' to 36' and the wetland buffer from 50'to 120', which greatly impacts the developability of the property.

Mr. Spraker displayed other properties along U.S. Highway 1 overhead in comparison, showing how the 700 to 800 block of U.S. Highway 1 had similar conditions where Dodson Creek is, where they had reduced wetland and landscape buffers in order to allow the parcels to be buildable. Mr. Spraker added that the ISBA impacted the buildability of the property.

Mr. Spraker stated that the goal is to set it back to what existed in Volusia County. Staff went to Volusia County to discuss their development standards, explaining the amendment to reset it back to those development standards. Mr. Spraker concluded that staff is recommending approval.

#### Board Questions

Ms. Shull asked for clarification on the amendment request. Mr. Spraker replied that the ask is for a buffer reduction. The amendment would set it back to a 20'-buffer for a more buildable parcel. He explained that the contract purchaser initially was looking into building multi-family and is no longer pursuing it.

DRAFT

Mr. Spraker stated that a similar thing was done with electronic changeable copy signage at Destination Daytona. Previously, the City did not allow it and did it in the Phase 2 development since the County allowed it. Mr. Spraker stated that the City is not taking away rights and that in most cases, the landscape and wetland buffers are going to be fine. He concluded that this is a unique area, with three properties that have a unique affect.

Chairman Thomas brought it back up to the Board for questions and entertained a motion.

Ms. Shull stated that she does not agree with the amendment due to it being a special waterfront location and expressed concern with making the buffer less, asking why it was not included in the ISBA. He added that a site-specific analysis was not done until something was looking to be built there. Mr. Spraker explained that once it was noticed, it was a decision to seek amendments to go back to the County's standards so that it could be buildable.

Attorney Hayes contributed information to the topic at hand, explaining that in a normal sequence of annexing property from unincorporated County to the City, the County's land regulations continue to apply after annexation until the City goes through the process of bringing the property under the City of Ormond Beach umbrella. Attorney Hayes suggested giving it the same types of allowable uses that existed in the City or it takes certain rights away and creates a window of liability for the City.

Attorney Hayes stated that the ISBA that was entered in between the City and County in 1981 and revisited later when there were issues on N. U.S. Highway 1, when the legislature created a mechanism in the statute at the time, where the City created a joint planning area in order to annex some properties for which the City had annexation agreements but did not have the practicality to annex at the time. Attorney Hayes added the City applied their own zoning and land use regulations. He explained that the properties on the subject property-end of the service area were not in consideration of at the time. He explained that it was not intended to create a regulation that restricted rights over that which was in the County.

Attorney Hayes stated that staff is proposing a means by which to ameliorate the situation that was created. He concluded that he recommends the Board's favorable consideration to staff's recommendation.

Mr. Railsback commented that the current improvements on a couple of the sites were under the Volusia County setbacks, such as the Volusia County Boat Club, which would have met the 20' to the 50'-buffer. He added that if it goes back to the County standards, it will give the same development entitlements as the County.

Mr. Spraker concurred and added that it was never the intention to take away development rights with the interlocal agreement. As it was brought to the City's attention, staff sought to fix it.

Mr. Galloway stated that he was supposed to be out of town but felt this was important to attend and emphasized the importance of property rights. He explained that as the community grows similar situations can also come up with the county and

city interlocal agreement. Mr. Galloway spoke further on property rights and the devaluation of property, and the exact gps spot of the property, it would not be affordable from a legal standpoint to take away from property owners what they once had by an interlocal agreement. Mr. Galloway commended staff for their attention and time on the correction of the property rights matter.

Mr. Jorczak inquired about flood studies and asked how a mean high-water mark is developed. Mr. Spraker answered that it is established by a surveyor and can change over time. He added that any development project requires state and city permitting. Mr. Spraker explained that if it is a permitted or conditional use that it will be through the Site Plan Review Committee (SPRC) and if they need a Special Exception or a Planned Development, it will come back through the Planning Board and the City Commission. He confirmed that whatever restrictions were placed by St. John's River Water Management District would apply.

Mr. Gentry asked if the City has made similar exceptions for this type of request previously. Mr. Spraker confirmed yes, in the 1990s when the Greenbelt buffer was being established, they realized the impact that it would have on the properties due to the limited depth. He concluded that they are unique properties with the need of unique regulations.

Chairman Thomas asked what could be built on the property. Mr. Spraker replied that the original application was for multi-family and that a restaurant was on the site previously. He added that it is in the B-8 zoning district and any of the uses in the B-8 can go on the property.

**Mr. Railsback motioned to approve PZ-2025-157, Land Development Code, 1000 Block of U.S. Highway 1 Abutting the Tomoka River, Greenbelt and Gateway Preservation District and Wetland Buffer. Mr. Galloway seconded it. Vote was called, and the motion was approved (6-0).**

## VIII. PUBLIC COMMENTS

None.

## IX. OTHER BUSINESS

### A. Convenience Stores, review of potential distance requirements to residential uses

Mr. Spraker explained that staff is looking for direction from the Planning Board regarding convenience stores and a potential distance to residential uses. He stated that on December 04, 2024, the Site Plan Review Committee (SPRC) received a site plan application for the redevelopment of the former Bank of America building located at 699 S. Nova Road. He added that no matter what happens with the amendment, the project will go on the path in which they submitted. Mr. Spraker continued that on February 18, 2025, at the City Commission meeting a resident expressed concerns regarding the proposed gas station along Nova Road and requested that the city review the zoning district which abuts residential areas within the city limits. Mr. Spraker stated that at the March 04, 2025, City Commission meeting, the City Commission directed city staff to look into amending the LDC regarding the distance requirements

# Business Impact Estimate

Proposed ordinance's number and legal title:

**2025-21**

AN ORDINANCE AMENDING CHAPTER 2, DISTRICT AND GENERAL REGULATIONS, ARTICLE VI, OVERLAY DISTRICTS, SECTION 2-73, GREENBELT AND GATEWAY PRESERVATION DISTRICTS, SUBSECTION (C) DESIGN CRITERIA AND CHAPTER 3, PERFORMANCE STANDARDS, ARTICLE II, ENVIRONMENTAL PROTECTION STANDARDS, SECTION 3-21, WETLANDS PROTECTION, SUBSECTION H, BUFFER REQUIREMENTS, AMENDING LANDSCAPE BUFFER AND WETLAND BUFFER REQUIREMENTS CONSISTENT WITH VOLUSIA COUNTY STANDARDS FOR PROPERTIES IN THE 1000 BLOCK OF NORTH U.S. HIGHWAY 1; REPEALING ALL INCONSISTENT ORDINANCES OR PARTS THEREOF; PROVIDING FOR SEVERABILITY; AND SETTING FORTH AN EFFECTIVE DATE.

This Business Impact Estimate is provided in accordance with section 166.041(4), Florida Statutes. If one or more boxes are checked below, this means the City is of the view that a business impact estimate is not required by state law for the proposed ordinance, but the City is, nevertheless, providing this Business Impact Estimate as a courtesy and to avoid any procedural issues that could impact the enactment of the proposed ordinance. This Business Impact Estimate may be revised following its initial posting.

- ☐ The proposed ordinance is required for compliance with Federal or State law or regulation;
- ☐ The proposed ordinance relates to the issuance or refinancing of debt;
- ☐ The proposed ordinance relates to the adoption of budgets or budget amendments, including revenue sources necessary to fund the budget;
- ☐ The proposed ordinance is required to implement a contract or an agreement, including, but not limited to, any Federal, State, local, or private grant or other financial assistance accepted by the municipal government;
- ☐ The proposed ordinance is an emergency ordinance;
- ☐ The ordinance relates to procurement; or
- ☒ The proposed ordinance is enacted to implement the following:
  a. Part II of Chapter 163, Florida Statutes, relating to growth policy, county and municipal planning, and land development regulation, including zoning, development orders, development agreements and development permits;
  b. Sections 190.005 and 190.046, Florida Statutes, regarding community development districts;

c. Section 553.73, Florida Statutes, relating to the Florida Building Code; or
d. Section 633.202, Florida Statutes, relating to the Florida Fire Prevention Code.

**In accordance with the provisions of controlling law, even notwithstanding the fact that an exemption noted above may apply, the City hereby publishes the following information:**

1. **A summary of the proposed ordinance, including a statement of the public purpose to be served by the proposed ordinance, such as serving the public health, safety, morals, and welfare of the City.**

   This is an application for administrative amendments to the following Sections of the Land Development Code: (1) Chapter 2, District and General Regulations, Article VI, Overlay Districts, Section 2-73, Greenbelt and Gateway Preservation Districts and (2) Chapter 3, Performance Standards, Article II, Environmental Protection Standards, Section 3-21, Wetlands protection, subsection h, Buffer requirements. The purpose of the Land Development Code amendments is to provide the properties within the 1000 block of North U.S. Highway 1, abutting the Tomoka River, the same landscape buffer and wetland buffer requirements as existing when the properties were located in unincorporated Volusia County.

2. **An estimate of the direct economic impact of the proposed ordinance on private, for-profit businesses in the City, including the following, if any:**

   a. **An estimate of direct compliance costs that businesses may reasonably incur if the ordinance is enacted;**

      None. This is a Land Development Code amendment for the conditions for landscape buffer and wetland buffer requirements for properties within the 1000 block of North U.S. Highway 1.

   b. **Identification of any new charge or fee on businesses subject to the proposed ordinance, or for which businesses will be financially responsible; and**

      None. This is a Land Development Code amendment for the conditions for landscape buffer and wetland buffer requirements for properties within the 1000 block of North U.S. Highway 1. There are no charges or fees proposed.

   c. **An estimate of the City's regulatory costs, including an estimate of revenues from any new charges or fees that will be imposed on businesses to cover such costs.**

      None. This is a Land Development Code amendment for the conditions for landscape buffer and wetland buffer requirements for properties within the 1000 block of North U.S. Highway 1. There are no new fees proposed.

3. **A good faith estimates of the number of businesses likely to be impacted by the ordinance.**

   None. This is a Land Development Code amendment for the conditions for landscape buffer and wetland buffer requirements for properties within the 1000 block of North U.S. Highway 1.

**4. Any additional information the City determines may be useful.**

*(This section may include: methodology or data used to prepare the Business Impact Estimate, e.g., City staff solicited comments from businesses as to the potential impact of the proposed ordinance by contacting the chamber of commerce, social media posting, direct mail/email, posting on the City's website, public workshop, etc.; efforts made to reduce the potential fiscal impact on businesses; and state the proposed ordinance is a generally applicable ordinance that applies to all persons similarly situated (individuals or businesses) and, therefore, the proposed ordinance does not affect only businesses.)*

No business impacts proposed. The item was advertised by newspaper advertisements. Information on the application is also on the city's website.

Summary

This is an application submitted by Alanna Smith, Esquire, Cobb Cole, on behalf of the property owners, Dr. John C. Long Jr. and Janet G. Long, for a sign variance to allow for the replacement of a pole sign.

The subject property is located at 155 North Nova Road and is zoned B-1, Professional Office/Hospital. Section 3-47(C)(1)(a)(3) of the Land Development Code states monument signs shall be the only type of site signage allowed within the B-1 zoning district, and the application seeks to allow a pole sign based on site-specific conditions.

The property had a legal non-conforming pole sign near the intersection of North Nova Road and Shadow Lakes Boulevard, which Hurricane Milton destroyed. There is a limited landscaping area between the front property line of North Nova Road and the parking lot signs.

The Planning Board recommended approval by a vote of 7-0 of the Special Exception application. There were no individuals who spoke for or against the application.

Financial Impact

None

Citizen Impact

The special exception application seeks to allow a pole sign to be re-established based on specific site conditions after the existing pole sign was destroyed by Hurricane Milton. No citizen impacts are anticipated.

**RESOLUTION NO. 2025-123**

A RESOLUTION AUTHORIZING THE EXECUTION AND ISSUANCE OF A DEVELOPMENT ORDER FOR A SPECIAL EXCEPTION FOR A SIGN VARIANCE FOR PROPERTY LOCATED AT 155 NORTH NOVA ROAD, AND BEING SITUATED WITHIN THE B-1, PROFESSIONAL OFFICE/HOSPITAL ZONING DISTRICT, TO ALLOW THE RECONSTRUCTION OF A POLE SIGN DAMAGED BY HURRICANE MILTON BASED ON SITE SPECIFIC CONDITIONS; ESTABLISHING CONDITIONS AND EXPIRATION DATE OF APPROVAL; AND SETTING FORTH AN EFFECTIVE DATE.

**WHEREAS,** Dr. John C. Long Jr. and Janet G. Long (the "Property Owners"/"Applicants"), have applied for the issuance of a Special Exception for a sign variance to reconstruct a pole sign that was damaged by Hurricane Milton on that real property located at 155 North Nova Road, Ormond Beach ("the Property"), and

**WHEREAS,** the property at 155 North Nova Road is zoned B-1, Professional Office/Hospital, and

**WHEREAS,** Section 3-47C.1.a.(3) of the City of Ormond Beach *Land Development Code* (*Land Development Code*) states that monument signs shall be the only type of site signage allowed within the B-1 zoning district. The application seeks to allow a pole sign based on site-specific conditions, and

**WHEREAS,** Section 3-49 of the *Land Development Code* allows sign variances for the use of a ground, pedestal, or pole sign in lieu of a required monument sign to be reviewed as a Special Exception based on certain criteria, and

**WHEREAS,** the applicant does not propose any new building square footage and the Special Exception request is solely for the site signage, and

**WHEREAS,** the said application is in compliance with the provisions of the *Land Development Code* and the general laws of Florida, and

**WHEREAS,** the Planning Board held a public hearing on June 12, 2025, regarding this matter as required by Chapter 1, Article II, Section 1-15(c), of the *Land Development Code* and provided a recommendation of approval for the application, and

**WHEREAS,** the Planning Board considered in their recommendations, the criteria of Section 3-49 of the Land Development Code, as follows:

**(1)** There are special and unique conditions related to the property or structures on site exist that limit the ability to identify business within the property and cause a need to modify the monument sign height regulations. Examples of special and unique conditions would include limited visibility and traffic safety; and

**(2)** The proposed signs would be conducive to promoting traffic safety by preventing visual distractions; and

**(3)** The special exception shall not amend the requirements of subsection 3-47D. of the Land Development Code (allowed square footage, height maximum of 20', or number of site signs); and

**(4)** Site signs otherwise not permitted within the sign article shall not be introduced through the special exception; and

**(5)** Impacts of the proposed sign on residential uses; and

**(6)** Proposed ground, pedestal, or pole sign shall provide architectural elements, such as wrap columns and no exposed metal poles. Sign renderings shall be included as part of the development order; and

**WHEREAS,** the City Commission has duly held a public hearing on the application and has considered the testimony and evidence presented, and

**WHEREAS,** the City Commission has considered the following:

**(1)** The report and recommendations of the Planning Board;

**(2)** The report and recommendations of the Site Plan Review Committee; and

**(3)** The comments of governmental agencies, utility corporations and individuals, as received, and

**WHEREAS,** based upon all of the foregoing and in consideration thereof, the City Commission finds that:

**(1)** The proposed development conforms to the standards and requirements of the *Land Development Code* and will not create undue crowding beyond the conditions normally permitted in the B-1 (Professional Office/Hospital) zoning district, or adversely affect the public health, safety, welfare or quality of life;

**(2)** The proposed development is consistent with the *Comprehensive Plan*;

**(3)** The proposed development will not adversely impact environmentally sensitive lands or natural resources, including but not limited to waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells;

**(4)** The proposed use will not substantially or permanently depreciate the value of surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties;

**(5)** There are adequate public facilities to serve the development, including but not limited to, roads, sidewalks, bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds;

**(6)** Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe;

**(7)** The proposed development is functional in the use of space and aesthetically acceptable;

**(8)** The proposed development provides for the safety of occupants and visitors; and

**(9)** The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area;

now therefore,

**BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:**

**SECTION ONE.** The above recitals are true and correct and are incorporated herein by reference.

**SECTION TWO.** The Mayor and the City Manager are hereby authorized and directed to execute and issue a Development Order for a Special Exception to allow a sign variance to reconstruct a pole sign that was damaged by Hurricane Milton in accordance with the sign plan

exhibit and conditions described in the Special Exception Development Order, on that real property located at 155 North Nova Road ("the Property"), as described in the Special Exception Development Order, a copy of which is attached hereto and incorporated herein by reference.

**SECTION THREE.** This Resolution shall take effect immediately upon its adoption.

**APPROVED AND AUTHENTICATED this 22nd day of July, 2025**.

## SPECIAL EXCEPTION DEVELOPMENT ORDER

This matter having come on for public hearing before the City Commission of the City of Ormond Beach, Florida, on July 22, 2025, and the City Commission having considered those items as required by Section 1-18 of the *Land Development Code*, and having heard testimony and evidence from all affected persons, the City Commission hereby finds that:

**1.** The proposed development conforms to the standards and requirements of the *Land Development Code* and will not create undue crowding beyond the conditions normally permitted in the B-1, Professional Office/Hospital zoning district, or adversely affect the public health, safety, welfare or quality of life;

**2.** The proposed development is consistent with the *Comprehensive Plan*;

**3.** The proposed development will not adversely impact environmentally sensitive lands or natural resources, including but not limited to water bodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants, animal species or species of special concern, wellfields, and individual wells;

**4.** The proposed development will not substantially or permanently depreciate the value of surrounding property; create a nuisance; or deprive adjoining properties of adequate light and air; create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties;

**5.** There are adequate public facilities to serve the development, including but not limited to roads, sidewalks, bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds;

**6.** Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe;

**7.** The proposed development is functional in the use of space and aesthetically acceptable;

**8.** The proposed development provides for the safety of occupants and visitors; and

**9.** The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area.

**Thereupon and in consideration thereof, the City Commission hereby orders that:**

**A.** The application of the property owners, Dr. John C. Long Jr. and Janet G. Long, for a Development Order for a Special Exception for a sign variance to reconstruct a pole sign that was damaged by Hurricane Milton on that real property located at 155 North Nova Road, Ormond Beach, within the B-1, Professional Office/Hospital zoning district, said property being described and depicted on Exhibit "A" attached hereto and incorporated herein by reference, is hereby granted, subject to the following conditions:

**1.** All applicable provisions of the *Land Development Code* shall be complied with at all times, such provisions being incorporated herein by reference and hereby specifically made a part of this Special Exception Development Order;

**2.** A signage permit for the pole sign is required;

**3.** Full and complete compliance with the Applicant's Sign Plan attached as Exhibit "B";

**B.** No material change shall be made to the final sign plans attached as Exhibit "B" and incorporated herein by reference without further review by the Planning Board and approval by the City Commission in accordance with the procedures for the approval of this Special Exception Development Order.

**C.** All signage construction activity shall be performed in strict compliance with the terms and conditions of this Special Exception Development Order and of the *Land Development Code*.

**D.** If the final signage plan approval lapses under the provisions of Section 1-14(3)(c) of the *Land Development Code* before the signage permit can be established, a new application for a Special Exception Development Order must be submitted for consideration in accordance with the requirements of the *Land Development Code*.

**E.** In the event a Neighborhood Improvement Officer subsequently determines there to be any violation of this Special Exception Development Order, such Officer shall promptly present such determination to Special Magistrate for hearing.

**F.** If this Special Exception Development Order is abandoned for a period of six (6) months, a zoning approval for a new use, subject to Special Exception requirements, shall not be issued until the Site Plan Review Committee determines that all of the conditions of Chapter I, Article II, Section 1-14 of the *Land Development Code* have been met.

**G.** In the event a signage permit has not been issued within twenty-four (24) months, which date shall be July 22, 2027, then this Special Exception Development Order shall automatically become void and shall have no further legal effect per Chapter 1, Article II, Section 1-14(3), of the *Land Development Code*. If a signage permit is issued on or before July 22, 2027, the project shall be vested.

**H.** This Special Exception Development Order shall be recorded in the public records of Volusia County, Florida, at the expense of Dr. John C. Long Jr. and Janet G. Long, and shall be binding upon Dr. John C. Long Jr. and Janet G. Long, and their successors and assigns, and shall run with the real property described in Exhibit "A" attached hereto and incorporated herein by reference. (Parcel ID No.: 4241-01-01-0061)

# PLANNING BOARD STAFF REPORT

## Special Exception
## 155 North Nova Road
## Project Number: PZ 2025-161

| | |
|---|---|
| **PLANNING BOARD DATE:** | June 12, 2025 |
| **TENTATIVE CITY COMMISSION DATE:** | July 22, 2025 |
| **APPLICANT:** | Alanna Smith, Esquire, Cobb Cole, on behalf of the property owners, Dr. John C. Long Jr. and Janet G. Long |
| **LOCATION:** | 155 North Nova Road |
| **REQUEST:** | Allowance for the replacement of a pole sign destroyed by Hurricane Milton instead of a monument sign based on site-specific conditions |
| **SITE PLAN REVIEW COMMITTEE RECOMMENDATION:** | Approval |
| **STAFF CONTACT:** | Steven Spraker, AICP, Planning Director |
| **AERIAL OF PROJECT AREA:** |  |

**SECTION 1, INTRODUCTION:** This is an application submitted by Alanna Smith, Esquire, Cobb Cole, on behalf of the property owners, Dr. John C. Long Jr. and Janet G. Long, for a sign variance to allow for the replacement of a pole sign. The subject property is located at 155 North Nova Road and is zoned B-1, Professional Office/Hospital. Section 3-47(C)(1)(a)(3) of the Land Development Code states that monument signs shall be the only type of site signage allowed within the B-1 zoning district, and the application seeks to allow a pole sign based on site-specific conditions.

**SECTION 2, BACKGROUND:** The property at 155 North Nova was constructed in 1970 and is approximately 2,350 square feet of building area. The building is used as a medical office. The property has 100 feet of lot frontage along North Nova Road. There is a limited landscaping area between the front property line of North Nova Road and the parking lot signs. The property had a legal non-conforming pole sign near the intersection of North Nova Road and Shadow Lakes Boulevard, which Hurricane Milton destroyed. Below is a picture of the site before and after the hurricane.

**EXHIBIT 1: Street view images of 155 North Nova Road**

Source: Google Street View

**SECTION 3, ANALYSIS:** This application seeks to allow the replacement of a pole sign instead of a required monument sign at 155 North Nova Road.

**EXHIBIT 2:**
**Proposed Pole Sign**

The site is designated “Residential, Office, Retail” on the City's Future Land Use Map and is zoned B-1, Professional Office/Hospital. The following table shows the surrounding land uses and zoning:

**EXHIBIT 2: Adjacent Land Uses and Zoning**

| Direction | Uses | Land Use designation | Zoning designation |
|---|---|---|---|
| **North** | Bank | “Residential, Office, Retail” | B-1, Professional Office/Hospital |
| **South** | Office | “Residential, Office, Retail” | B-1, Professional Office/Hospital |
| **East** | Office | “Residential, Office, Retail” | B-1, Professional Office/Hospital |
| **West** | Commercial | “General Commercial” | PBD, Planned Business Development |

Section 3-47 of the Land Development Code contains the regulations for site signage. Section 3-47(C)(1)(a)(3) of the Land Development Code requires monument signs within the B-1, B-9 and B-10 zoning districts. Section 3-47(A) of the Land Development Code states alternative signage may be approved by the city commission through planned developments and special exceptions.

Section 3-49 of the Land Development Code allows sign variances and states: "Sign variances may be requested through the special exception process where an applicant desires the use of a ground, pedestal, or pole sign in lieu of a required monument sign. No other type of variance shall be permitted other than the height of the site signage. Applications shall be reviewed against the following criteria:" Below are the criteria in bold with the staff's response. Note that the applicant's responses are provided in ATTACHMENT 2.

a. **There are special and unique conditions related to the property or structures on site exist that limit the ability to identify business within the property and cause a need to modify the monument sign height regulations. Examples of special and unique conditions would include limited visibility and traffic safety.**

   The existing property has a limited landscaping buffer abutting the North Nova Road frontage and is located on a corner with Shadow Lakes Boulevard. The landscape area is insufficient to locate a monument sign, which typically would require a 5' setback and a 6' monument sign width. Installation of a monument sign with no setback would create a traffic obstruction at the intersection of North Nova Road and Shadow Lakes Boulevard. The applicant's analysis includes a review of the site limitations for monument signs, including a letter from a sign contractor.

**b. The proposed signs would be conducive to promoting traffic safety by preventing visual distractions.**

The former pole sign existed for several years without any traffic or safety issues. A pole sign in this location is appropriate based on the limited monument sign width and the roadway intersection.

**c. The special exception shall not amend the requirements of subsection 3-47D. of this Land Development Code (allowed square footage, height maximum of 20', or number of site signs).**

The Special Exception application seeks to replace what was existing and was damaged by a storm event. The requested signage does not seek any deviations from the allowed square footage or the number of signs.

**d. Site signs otherwise not permitted within the sign article shall not be introduced through the special exception.**

The Special Exception application does not seek to introduce signs that are not allowed under the Land Development Code's signage article.

**e. Impacts of the proposed sign on residential uses.**

There are no residential uses abutting the medical office, and no residential uses will be impacted.

**f. Proposed ground, pedestal, or pole sign shall provide architectural elements, such as wrap columns and no exposed metal poles. Sign renderings shall be included as part of the development order.**

The Special Exception application includes signage information and renderings.

## Section 2-56: Special Exception Criteria

Section 2-56 of the Land Development Code outlines the general criteria for all Special Exception approvals:

**A. *Off-street parking loading and service areas shall be provided and located such that there is no adverse impact on adjoining properties, beyond that generally experienced in the district*.**

The Special Exception is only for the allowance of a pole sign instead of a monument sign. No parking areas shall be modified, and no adverse impacts are anticipated as the sign existed for a number of years.

**B. *Required yards, screening or buffering, and landscaping shall be consistent with the district in general, the specific needs of the abutting land uses, Chapter 3, Article 1, and other applicable provisions of this Code.***

The Special Exception is only for the allowance of a pole sign instead of a monument sign and would not impact any landscaping or buffers on the property.

**C.** ***Size, location, or number of conditional or Special Exceptions in an area shall be limited so as to maintain the overall character of the district in which said conditional or Special Exceptions are located.***

There have been no other recent applications within the Nova Road area for a pole sign instead of a monument sign. The Land Development Code requires monument signage for the office-based zoning districts (B-1, B-9, and B-10). The Land Development Code also understands that there are existing sites with unique site conditions that may warrant the installation of a pole sign.

**D.** ***Hours of operation may be limited and the City may require additional information on structural design and site arrangement, to assure the compatibility of the development with existing and proposed uses in the surrounding area.***

The Special Exception is for the allowance of a pole sign in lieu of a monument sign, and no hours of operation restrictions are needed.

**E.** ***The Special Exception shall not generate hazardous waste or require use of hazardous materials in its operation without use of City-approved mitigative techniques.***

This Special Exception request will not generate hazardous waste.

**F.** ***All development proposed as a Special Exception within or adjacent to a historic district shall be reviewed based on applicable criteria stated herein for residential, commercial or mixed-use development and shall also comply with appearance and design guidelines for historic structures.***

The project is not located within or adjacent to a historic district, and these criteria do not apply to the signage application.

**G.** ***Outdoor lighting shall have no spillover onto adjacent property or rights-of-way beyond the building site property line, and the lumens shall not exceed two (2) foot-candles at the property line.***

The Special Exception is for the allowance of a pole sign in lieu of a monument sign, and no changes to site lighting are proposed.

**Section 1-15.E: Planning Board Criteria and Section 1-18.E: City Commission Criteria**

Sections 1-15.E. and 1-18.E of the Land Development Code establish the Planning Board and City Commission Development Order criteria. The Land Development Code states that the following criteria shall be considered:

1. **The proposed development conforms to the standards and requirements of this Code and will not create undue crowding beyond the conditions normally permitted in the zoning district, or adversely affect the public health, safety, welfare or quality of life.**

The Special Exception is for the allowance of a pole sign instead of a monument sign damaged by a storm event. No other construction activity is proposed. The property had a pole sign that functioned well for several years but was destroyed by a storm. The request will not adversely affect public health, safety, welfare or quality of life.

2. **The proposed development is consistent with the Comprehensive Plan.**

   The site's Future Land Use designation is "Residential, Office, Retail," which is consistent with its existing use. The Comprehensive Plan does not address site signage.

3. **The proposed development will not adversely impact environmentally sensitive lands or natural resources, including but not limited to waterbodies, wetlands, xeric communities, wildlife habitats, endangered or threatened plants and animal species or species of special concern, wellfields, and individual wells.**

   The Special Exception is for the allowance of a pole sign instead of a monument sign damaged by a storm event. The proposed application is an existing developed site and will not adversely impact environmentally sensitive lands or natural resources.

4. **The proposed use will not substantially or permanently depreciate the value of surrounding property, create a nuisance, deprive adjoining properties of adequate light and air, or create excessive noise, odor, glare, or visual impacts on the neighborhood and adjoining properties.**

   The proposed application for a pole sign will not depreciate the value of the surrounding property, create a nuisance, or have other visual impacts. It is important to note that the pole sign existed for many years with no negative impact. Regulations requiring monument signage in certain areas are important. The Land Development Code creates a mechanism for a sign variance through a public hearing process.

5. **There are adequate public facilities to serve the development, including but not limited to roads, sidewalks, bike paths, potable water, wastewater treatment, drainage, fire and police safety, parks and recreation facilities, schools, and playgrounds.**

   Public facilities currently serve the site and there would be no impact on the existing infrastructure as a result of this Special Exception application.

6. **Ingress and egress to the property and traffic patterns are designed to protect and promote motorized vehicle and pedestrian/bicycle safety and convenience, allow for desirable traffic flow and control, and provide adequate access in case of fire or catastrophe. This finding shall be based on a traffic report where available, prepared by a qualified traffic consultant, engineer or planner which details the anticipated or projected effect of the project on adjacent roads and the impact on public safety.**

   The Special Exception is for the allowance of a pole sign instead of a monument sign damaged by a storm event. The subject property is located at the intersection of North Nova Road and Shadow Lakes Boulevard. Staff concur with the applicant's analysis

that a monument sign on the subject property would obstruct the site as vehicles seek to access North Nova Road from Shadow Lakes Boulevard.

7. **The proposed development is functional in the use of space and aesthetically acceptable.**

   The Special Exception request seeks a pole sign based on the limited monument sign placement area and the intersecting roadways of North Nova Road and Shadow Lakes Boulevard. The proposed pole sign is functional in the use of space and aesthetically acceptable.

8. **The proposed development provides for the safety of occupants and visitors.**

   The Special Exception does not impact movement on the site for occupants and visitors.

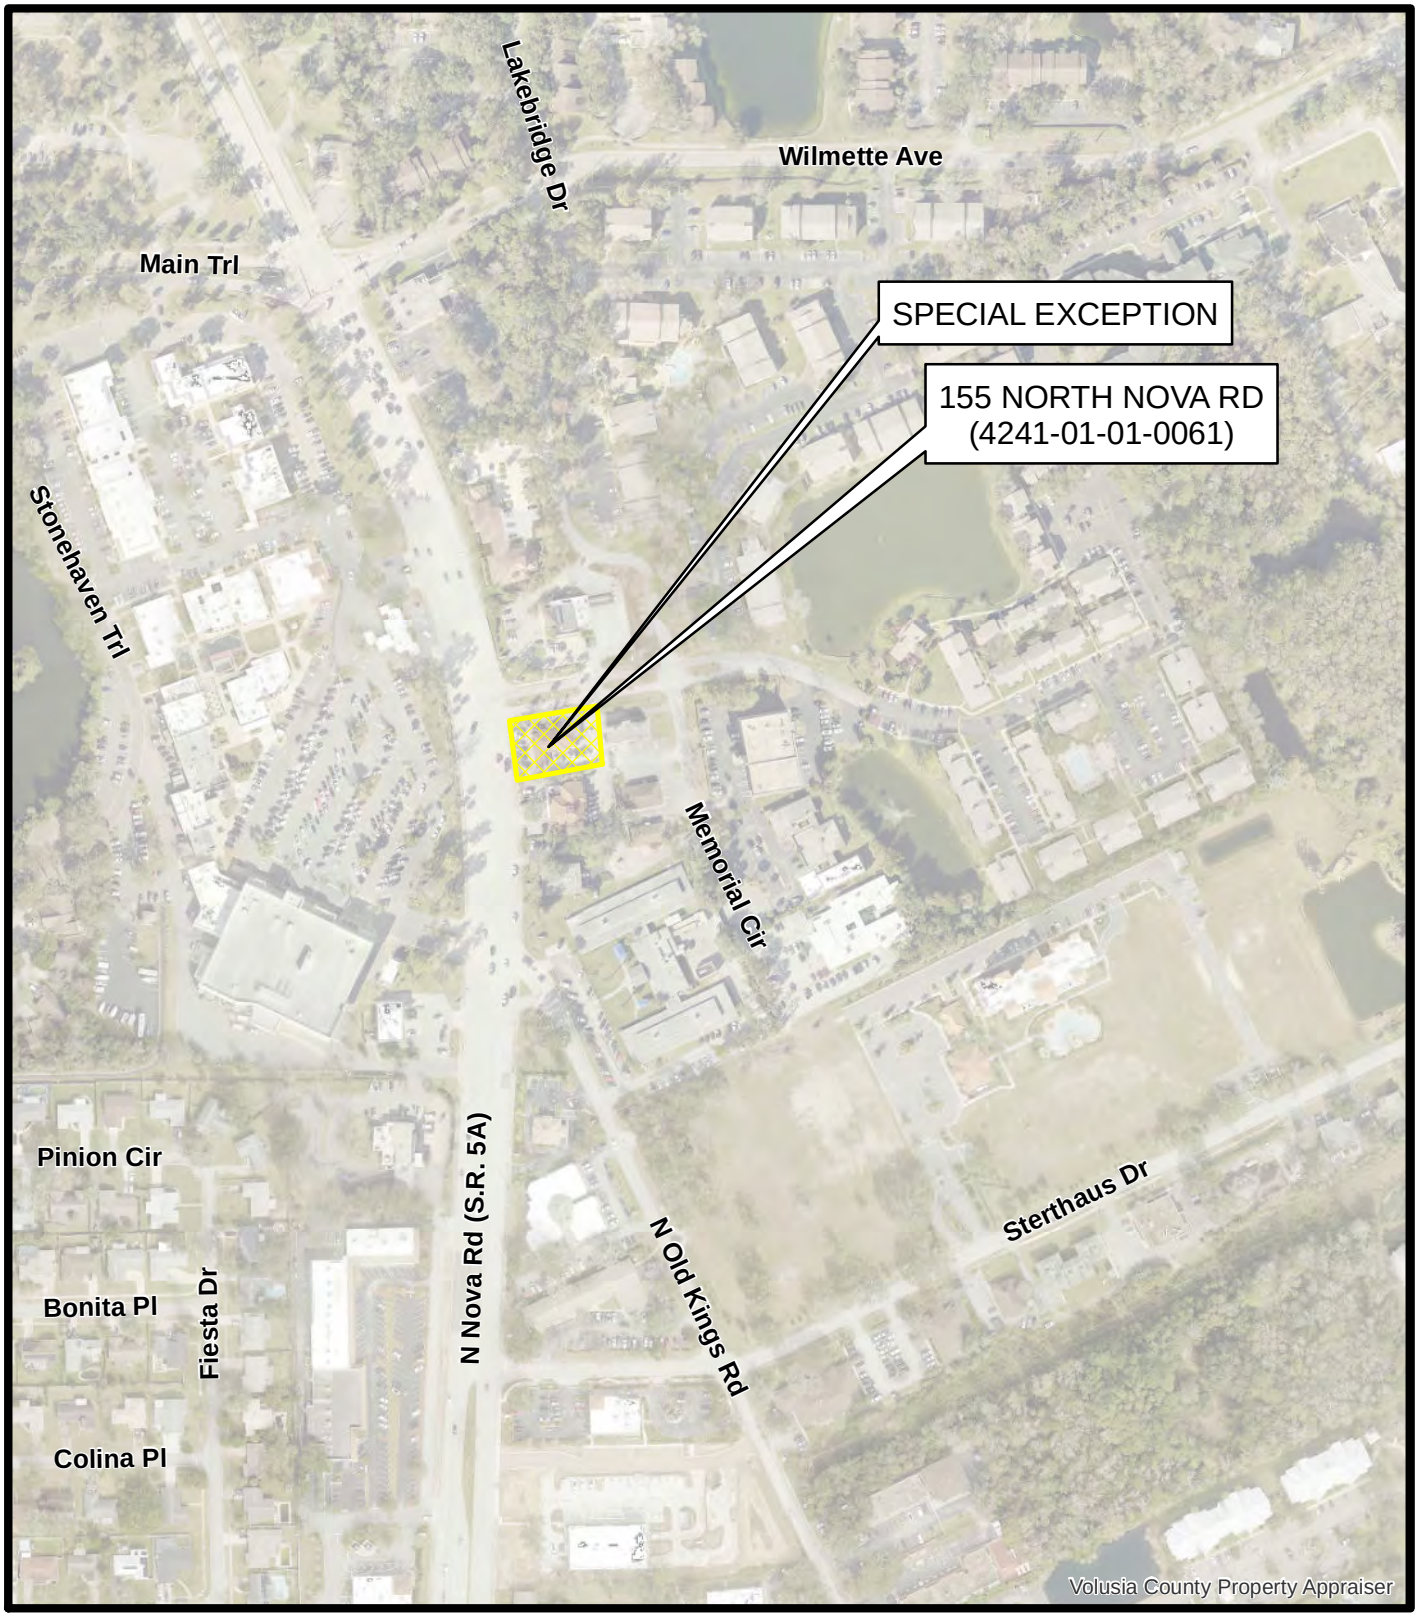
9. **The proposed use of materials and architectural features will not adversely impact the neighborhood and aesthetics of the area.**

   There is no new building development, and the application is solely for a pole sign. Therefore, this criterion is not applicable.

10. **The testimony provided at public hearings.**

    This application has not been reviewed in a public forum, and no testimony has been provided.

## SECTION 4, RECOMMENDATION:



It is recommended that the Planning Board **APPROVE** a Special Exception to replace the former pole sign at 155 North Nova Road, granting a sign variance from the required monument sign as shown in ATTACHMENT 2.

Re: 155 N Nova Road (Parcel Identification No. 424101010061)
Special Exception - Sign Variance Application

Dear Steve:

It is this Firm's pleasure to represent Dr. John Long and Mrs. Janet Long as the owners of the above-referenced property (the "Property") in connection with their request for a Sign Variance to replace the former nylon sign on the Property, which was destroyed during the recent hurricane.

In connection with this request, please find enclosed the following:

1. Public Hearing Application;

2. Application fee in the amount of $850.00;

3. Sign Variance Narrative (included in this letter as well);

4. Property Appraiser Information Cards; and

5. A copy of the signage renderings for the proposed sign.

Pursuant to Section 3-49 of the Land Development Code, sign variances may be requested through the special exception process where an applicant desires the use of a ground, pedestal, or pole sign in lieu of a required monument sign. Our variance request satisfies all of the specific conditions of Section 3-49 necessary to grant the requested variance as follows:

a. **There are special and unique conditions related to the property or structures on site exist that limit the ability to identify business within the property and cause a need**

**to modify the monument sign height regulations. Examples of special and unique conditions would include limited visibility and traffic safety.**

*The subject property (the "Property") is in the B-1 Professional Office/Hospital zoning district. The Land Development Code's business premises sign regulations permit only monument signs in the B-1 district, no closer than five (5') feet from the property line as measured from the leading edge of the sign. The Property has 100 feet of linear frontage along North Nova Road. The exterior landscaping along the site's frontage is bordered by timbers that demarcate the landscaping from the parking lot. This configuration provides only a few feet of space between the landscaping timbers and the Property's front lot line, effectively precluding the installation of a monument sign that meets the required five-foot setback. Even without this setback requirement, the limited space between the landscaping timbers and the front lot line is insufficient to accommodate an effective monument sign. The Property also lacks adequate space on either side to accommodate a monument sign. The north yard, which faces Shadow Lakes Boulevard, and the south yard, which abuts an office use, are both limited by existing landscaping that leaves inadequate room to accommodate a monument sign. These limitations are particularly significant given that North Nova Road serves as the primary roadway for the Property, and a monument sign in an alternative location would not provide sufficient visibility for passing traffic.*

*The Owner operates their business from the Property, relying on signage to identify the business to passing traffic. Requiring a monument sign on the Property would severely limit visibility, hindering passing drivers from identifying the business from a safe distance. The Property previously featured a legally existing pylon sign, which was destroyed during a recent hurricane.* ***Accordingly, the Owner seeks a special exception to install a replacement sign using the existing steel pole and concrete base from the prior sign.***

**b. The proposed signs would be conducive to promoting traffic safety by preventing visual distractions.**

*The former sign was effective in providing clear identification of the Owner's business without causing visual clutter or confusion for drivers. The proposed pylon sign will be in the same location as the former sign and will closely match its design. Accordingly, the proposed sign will not introduce any new distractions or hazards.*

**c. The special exception shall not amend the requirements of subsection 3-47D. of this Land Development Code (allowed square footage, height maximum of 20', or number of site signs).**

*The proposed sign is a singular pole sign. It is approximately 15' tall with a square footage of approximately 39', in accordance with subsection 3-47D.*

**d. Site signs otherwise not permitted within the sign article shall not be introduced through the special exception.**

*The special exception requests a pole sign, which is permitted under the sign article of the Land Development Code.*

**e. Impacts of the proposed sign on residential uses.**

*The proposed sign is not projected to have an impact on residential uses as the Property is surrounded by office/professional uses. Moreover, the proposed sign maintains the same placement and design consistency as the former sign, which did not cause any impacts on residential uses.*

**f. Proposed ground, pedestal, or pole sign shall provide architectural elements, such as wrap columns and no exposed metal poles. Sign renderings shall be included as part of the development order.**

*The proposed sign shall comply with these criteria.*

If you have any questions regarding this request, please don't hesitate to contact me. Thank you for your attention to this matter.

Sincerely,

**Alanna V. Smith for**

## Sign Variance Narrative

**Sec. 3-49. - Sign variances.**

Sign variances to the requirements of this article shall be reviewed as a special exception or as part of a planned business development as follows:

(1) Special exception. Sign variances may be requested through the special exception process where an applicant desires the use of a ground, pedestal, or pole sign in lieu of a required monument sign. No other type of variance shall be permitted other than the height of the site signage. Applications shall be reviewed against the following criteria:

a. There are special and unique conditions related to the property or structures on site exist that limit the ability to identify business within the property and cause a need to modify the monument sign height regulations. Examples of special and unique conditions would include limited visibility and traffic safety.

*The subject property (the "Property") is in the B-1 Professional Office/Hospital zoning district. The Land Development Code's business premises sign regulations permit only monument signs in the B-1 district, no closer than five (5') feet from the property line as measured from the leading edge of the sign. The Property has 100 feet of linear frontage along North Nova Road. The exterior landscaping along the site's frontage is bordered by timbers that demarcate the landscaping from the parking lot. This configuration provides only a few feet of space between the landscaping timbers and the Property's front lot line, effectively precluding the installation of a monument sign that meets the required five-foot setback. Even without this setback requirement, the limited space between the landscaping timbers and the front lot line is insufficient to accommodate an effective monument sign. The Property also lacks adequate space on either side to accommodate a monument sign. The north yard, which faces Shadow Lakes Boulevard, and the south yard, which abuts an office use, are both limited by existing landscaping that leaves inadequate room to accommodate a monument sign. These limitations are particularly significant given that North Nova Road serves as the primary roadway for the Property, and a monument sign in an alternative location would not provide sufficient visibility for passing traffic.*

*The Owner operates their business from the Property, relying on signage to identify the business to passing traffic. Requiring a monument sign on the Property would severely limit visibility, hindering passing drivers from identifying the business from a safe distance. The Property previously featured a legally existing pylon sign, which was destroyed during a recent hurricane.* ***Accordingly, the Owner seeks a special exception to install a replacement sign using the existing steel pole and concrete base from the prior sign****.*

b. The proposed signs would be conducive to promoting traffic safety by preventing visual distractions.

*The former sign was effective in providing clear identification of the Owner's business without causing visual clutter or confusion for drivers. The proposed pylon sign will be in the same*

*location as the former sign and will closely match its design. Accordingly, the proposed sign will not introduce any new distractions or hazards.*

c. The special exception shall not amend the requirements of subsection 3-47D. of this Land Development Code (allowed square footage, height maximum of 20', or number of site signs).

*The proposed sign is a singular pole sign. It is approximately 15' tall with a square footage of approximately 39', in accordance with subsection 3-47D.*

d. Site signs otherwise not permitted within the sign article shall not be introduced through the special exception.

*The special exception requests a pole sign, which is permitted under the sign article of the Land Development Code.*

e. Impacts of the proposed sign on residential uses.

*The proposed sign is not projected to have an impact on residential uses as the Property is surrounded by office/professional uses. Moreover, the proposed sign maintains the same placement and design consistency as the former sign, which did not cause any impacts on residential uses.*

f. Proposed ground, pedestal, or pole sign shall provide architectural elements, such as wrap columns and no exposed metal poles. Sign renderings shall be included as part of the development order.

*The proposed sign shall comply with these criteria.*

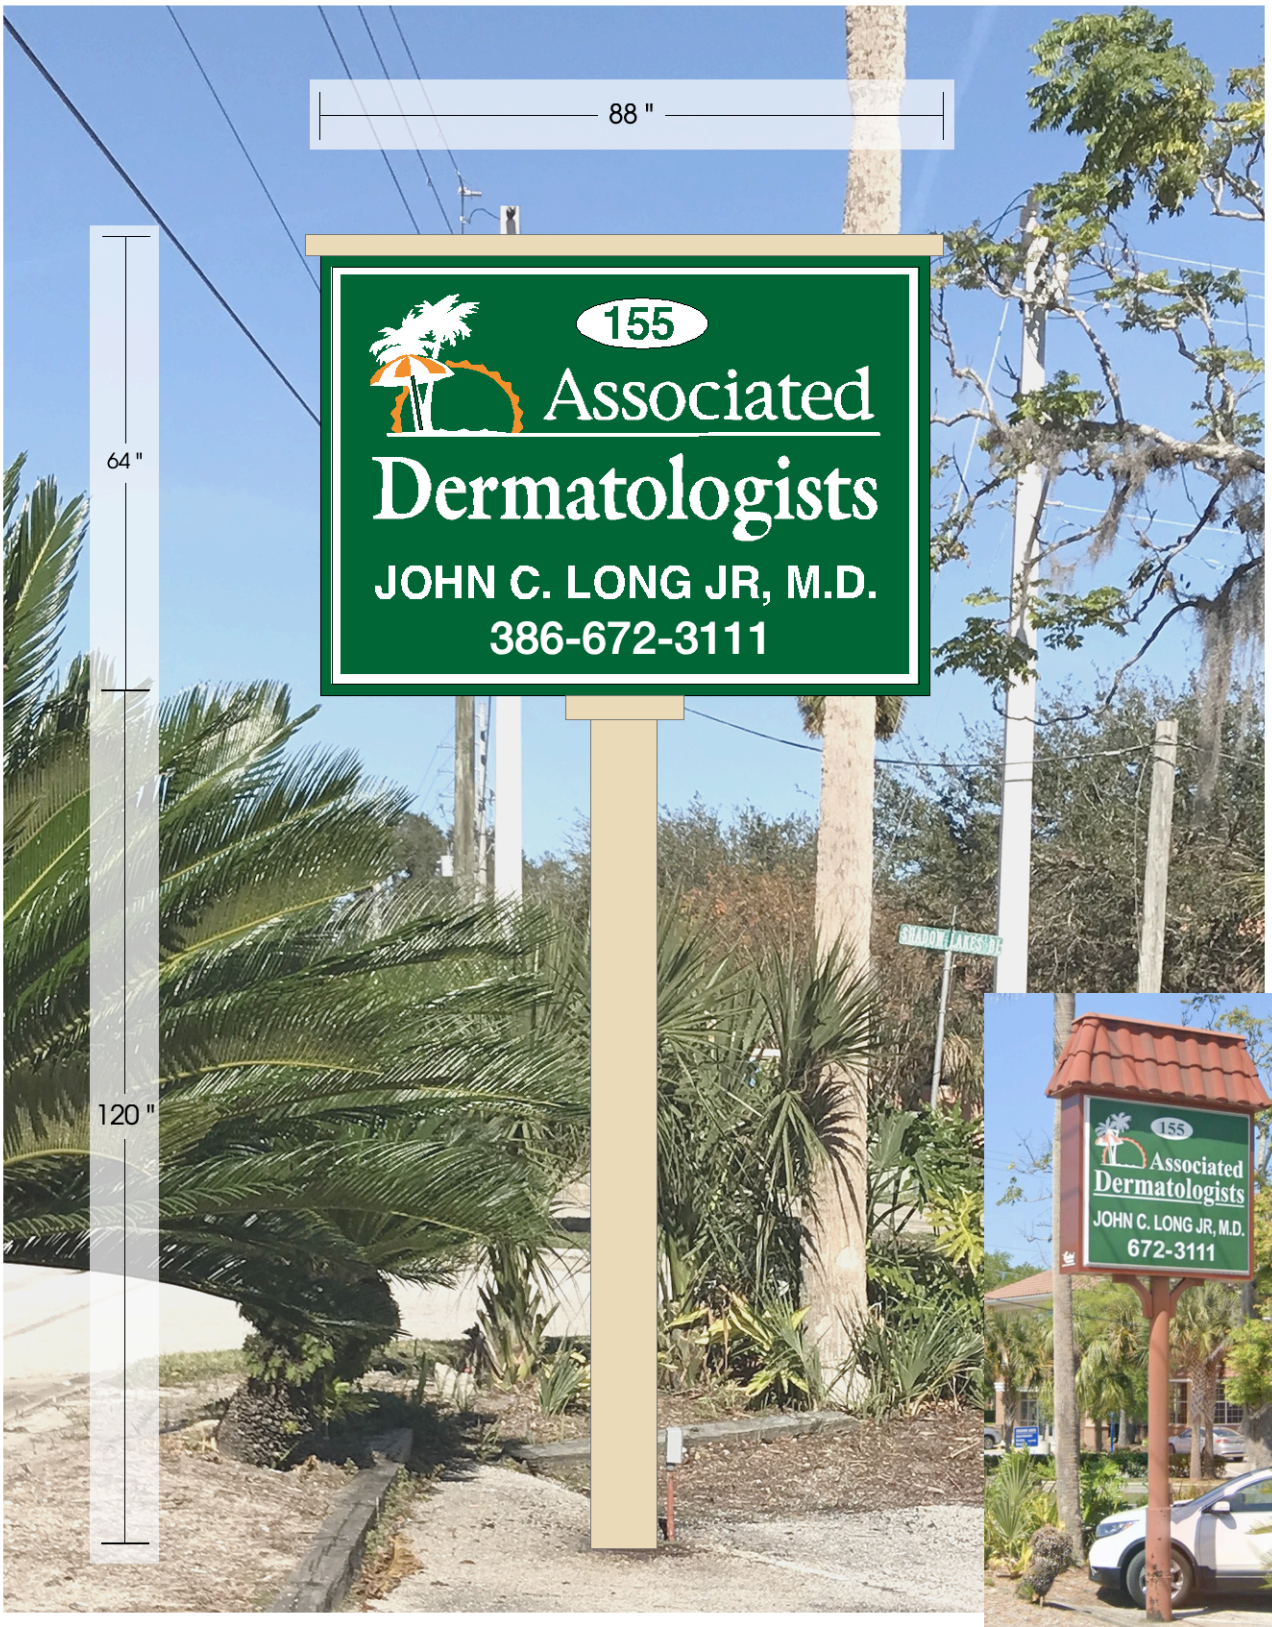
RE: Associated Dermatologists
155 N Nova Road
Ormond Beach, FL 32174



Replace original pylon sign destroyed by hurricane with new sign per approved design and specifications. Use remaining existing steel mounting pole, concrete base and electrical circuit from original sign.

I have surveyed the property to determine any options for the sign location. Due to the property layout with the parking lot situated abutting the Nova Road frontage there is no other suitable location or sign type available for this property.

The original / proposed sign location is set at the front between two parking places so lanscaping around the sign base is not possible.

Let me know if you have any questions.

# Planning Board minutes from June 12, 2025

ITEM:

PZ-2025-161

155 North Nova Road
Signage Special Exception

**Recommended for Approval: 7-0**

**D. PZ-2025-161, Special Exception, 155 North Nova Road**

Mr. Steven Spraker, Planning Director, explained the application submitted for a sign variance to allow for the replacement of a pole sign. He stated the subject property is located at the corner of Shadow Lakes Boulevard and 155 North Nova Road and is zoned B-1, Professional Office/Hospital. Mr. Spraker stated Section 3-47 (C)(1)(a)(3) of the LDC states that monument signs shall be the only type of site signage allowed within the B-1 zoning district, and the application seeks to allow a pole sign based on site-specific conditions. Mr. Spraker added that there is a provision in the code to get a sign variance, and not through the Board of Adjustments and Appeals, but through a Special Exception to allow a pole sign where otherwise a monument sign was required, showing a special circumstance going through the public hearing process.

Mr. Spraker displayed a photograph of the property and the proposed location of the proposed signage. The existing pole sign was damaged from Hurricane Milton and they are seeking to restore the former pole sign. Concerns expressed are distance from Nova Road and the short landscaped area which would not fit a monument sign, and the intersection where it can block view of vehicles on Nova Road. He displayed the proposed pole sign of 20' in height and the location on-site. Mr. Spraker discussed the existing site challenges of locating a monument sign on the property. He stated that Planning staff is recommending approval of the Special Exception based on the existing site conditions of the property.

**Applicant's Presentation**

Ms. Jessica Gow, Esquire, Cobb Cole, One Daytona Boulevard, Daytona Beach, stated that the subject property is a dermatology office where Dr. Long is the primary doctor there and reiterated that the previous pole sign was damaged during the hurricane. She added that the proposed sign is detailed in the board packet and is the same size and will be in the same location, with electric hookup is already in place for the new sign. Ms. Gow continued that the decoration at the top of the former sign is off, more simplified.

Ms. Gow explained that the landscaping strip is less than 5' in some areas, with no room for a monument sign to sit properly without being in the sight distance triangle for traffic concerns. She stated that they have a letter from a sign consultant that further explains where a sign can be located. Their thoughts expressed are that the size matches the overall character. Ms. Gow compared it to older pylon signs, like Mr. Wich's down the road, and how they are requesting to replace it at the size and location that it was currently located and at.

**Board Questions**

Mr. Gentry asked if Mr. Spraker is comfortable with the buffer exception and that it will not block the visual with the turn. Mr. Spraker answered yes.

Chairman Thomas brought it back up to the Board for questions and entertained a motion.

Ms. Shull expressed her concern with it when everything along the street is a monument sign. She added that it is not fair that they can put a tall sign back up. She believes that it should go to the new code. Ms. Gow explained that the property boundary goes in a little past the

DRAFT

sidewalk where the narrow strip is and in order to get a monument sign in there, it would be 1'-wide, extremely tall and illegible and would be more distracting to drivers.

Mr. Galloway stated that he has owned his building on Shadow Memorial Circle and Shadow Lakes for almost 25 years and explained that he is at that intersection up to 15 – 20 times per day, where there has always been a pole sign there. The sign was destroyed by a hurricane at a family business, at one of the most dangerous intersections. Mr. Galloway added that if a monument sign goes in that there will be accidents. He agrees that monument signs would be recommended for any businesses behind the location, but not at the subject property.

Mr. Jorczak concurred and stated that the State is supposed to reconstruct the area and is surprised by the timeline of the survey and any action on it. He concluded that anything that obstructs vision is not something he wants to entertain and is for replacing the particular location with a pole sign.

Mr. Scudiero concurred and commented that he is for uniformity but not at this location.

Mr. Railsback concurred.

Ms. Shull concurred and emphasized that her point prior was that the pole sign needs to go in but pointed out in other locations on corners, where monument signs are allowed, that they block traffic-view.

Board discussion ensued on the topic.

**Mr. Jorczak motioned to approve PZ-2025-161, Special Exception, 155 North Nova Road. Mr. Galloway seconded it. Vote was called, and the motion was approved (7-0).**

Summary

This is a proposed amendment to the Code of Ordinances, Chapter 15, Parks and Recreation. The amendment adds regulations for vaping. City ordinances currently prohibit smoking in all city parks, sports centers and city facilities. This ordinance amendment adds vaping to the prohibition. This amendment adds the definition of vaping in Section 15-3 and adds vaping as a prohibited nuisance in Section 15-8.

Financial Impact

None

Citizen Impact

Prohibiting vaping in city parks and facilities will enhance the environment for all citizens and visitors.

2. Ordinance Business Impact Estimate

**ORDINANCE NO. 2025-22**

AN ORDINANCE AMENDING SECTIONS 15-3 AND 15-8 OF CHAPTER 15, PARKS AND RECREATION, OF THE CITY OF ORMOND BEACH *CODE OF ORDINANCES*, TO PROVIDE FOR THE REGULATION OF VAPING IN PARKS AND AT OTHER MUNICIPAL FACILITIES; PROVIDING FOR THE REPEAL OF ALL ORDINANCES IN CONFLICT HEREWITH; PROVIDING FOR SEVERABILITY, AND SETTING FORTH AN EFFECTIVE DATE.

**WHEREAS,** Section 386.209 of the Florida Statutes (2022) expressly authorizes municipalities to adopt and enforce restrictions as to smoking within the boundaries of any public parks that the municipality owns, and to further restrict smoking within the boundaries of public parks that are within the municipality's jurisdiction but are owned by the county, unless such restriction conflicts with a county ordinance, and

**WHEREAS**, Section 386.209 of the Florida Statutes (2022) preempts municipalities from further restricting unfiltered cigars beyond those restrictions established by State Law, and

**WHEREAS**, while smoking in city parks and facilities is currently prohibited by the *Code of Ordinances*, the City Commission desires to add regulations for vaping, and

**WHEREAS**, the City Commission of the City of Ormond Beach finds that the provisions of this Ordinance are in the best interests of the citizens of and visitors to the City of Ormond Beach, and that such restrictions are necessary for the health, safety and welfare of the citizens and visitors to the City of Ormond Beach, now therefore

**BE IT ENACTED BY THE PEOPLE OF THE CITY OF ORMOND BEACH, FLORIDA, THAT:**

**SECTION ONE.** Section 15-3, Definitions, of Article I, Operation of City Parks and Recreation and Cultural Areas and Facilities, of Chapter 15, Parks and Recreation, of the City of Ormond Beach *Code of Ordinances* is hereby amended to read as follows:

**Sec. 15-3. Definitions.**

The following words, terms and phrases, when used in this article, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning:

*Alcoholic beverage* means distilled spirits and all beverages containing one-half of one percent or more alcohol by volume.

*Animal* means any cat, dog, horse, fowl and living creature.

*Applicant* means any person seeking a permit to use or conduct an activity in a park, cultural or recreation area or facility.

*Beer* means any brewed beverage containing malt.

*Careless* means to operate a vehicle in disregard of the safety of the operator or others.

*Director* means the director of parks and recreation or the director of cultural affairs or their respective designees.

*Municipal property* means all land, bleachers, seating, recreational facilities and structures, parking lots, and buildings owned by the city.

*Organized sports* means the playing of games or practice by any athletic team.

*Park* means a park, reservation, playground, recreational facility or any other public property area in the city, owned or used by the city and devoted to active or passive recreation.

*Permit* means any written license issued by or under the authority of a director, the city manager or the city commission permitting a use, event or activity in a park, cultural or recreation area or facility.

*Smoking* means inhaling, exhaling, burning, or carrying any lighted cigar, cigarette, pipe, weed, plant, or other combustible substance in any manner or in any form.

*Vaping* means to inhale or exhale vapor produced by a vapor-generating electronic device or to possess a vapor-generating electronic device while that device is actively employing an

electronic, a chemical, or a mechanical means designed to produce vapor or aerosol from a nicotine product or any other substance.

*Vehicle* means any wheeled conveyance (except a baby carriage or invalid wheelchair) for the transportation of persons or material whether:

(1) Powered or drawn by motor as an automobile, truck, bus, motorcycle, scooter, minibike or trail bike;
(2) Animal-drawn as a carriage, wagon or cart;
(3) Any rider-propelled bicycle or tricycle;
(4) Any trailer in tow of any size, kind or description;
(5) Any watercraft as defined herein.

Excluded from restrictions as a general class of vehicles are those conveyances established within parks by the city.

*Youth athletic activity* means any event, game, or other activity with participants who are less than 17 years of age, with the duration of such activities or events to include a period of time 15 minutes before and after such activity.

**SECTION TWO.** Section 15-8, Nuisances, of Article I, Operation of City Parks and Recreation and Cultural Areas and Facilities, of Chapter 15, Parks and Recreation, of the City of Ormond Beach *Code of Ordinances* is hereby amended to read as follows:

**Sec. 15-8. Nuisances.**

(a) *Alcoholic beverages.* Possession and consumption of alcoholic beverages within any park are prohibited unless specifically permitted pursuant to section 4-3.

(b) *Fireworks and explosives.*

(1) Possessing, exploding, discharging or burning within any park area or on roadways adjacent thereto of any fire crackers, rockets or other fireworks and explosives, or any other substance which in combination with any other substance becomes an explosive, are prohibited. In an emergency the discharge of distress signals and flares is permitted.

(2) Parents or guardians are responsible for violations by minors of subsection (b)(1) of this section.

(c) *Fortunetelling.* The foretelling of futures or fortunes for money by any method within any park or on any roadway adjacent thereto is prohibited.

(d) *Domestic animals.*

(1) No domestic animals shall be allowed in parks at any time except as provided herein.

(2) Dogs and other fur-bearing pets, except service animals as defined in F.S. § 413.08, shall be excluded from the following places in a park: all camping areas, all bathing and swimming areas, including both land and water portions, park buildings and other designated areas. Pets are permitted in nonrestricted areas if adequately restrained. Dogs must be kept at all times on leashes no longer than eight feet. All animal excrement must be properly cleaned up and properly disposed of by the owner or keeper of the animal.

(e) *Smoking or vaping*.

(1) Except as otherwise provided in this subsection, smoking or vaping is prohibited on any portion of the following municipal properties: Central Park, Fortunato Park, Nova Community Park, Ormond Beach Middle School Park, Osceola School Park, Riviera Park, Sanchez Park, South Ormond Neighborhood Park, Andy Romano Beachfront Park, ~~and~~ Birthplace of Speed Park, or within the boundaries of any other city park. The leisure services director ~~shall~~ may designate one or more areas within these properties as smoking areas, provided that such smoking area(s) shall not be designated in any common area that is expected to be used by the public.

(2) Except as otherwise provided in this subsection, smoking or vaping is prohibited on any portion of the following municipal properties when a youth athletic activity occurs: Ormond Beach Sports Complex, Ormond Beach Tennis Center, Nova Community and Gymnastics Center, ~~and~~ South Ormond Neighborhood Center, or within the boundaries of any other city sports center. The leisure services director ~~shall~~ may designate one or more areas within these properties as smoking areas, provided that such smoking area(s) shall not be designated in any common area that is expected to be used by the public.

(3) Smoking or vaping is prohibited within 25 feet of any entrance to an occupied municipal building or structure.

(4) Private property owners are encouraged to prohibit smoking or vaping within 25 feet of any entrance that affords public access.

**SECTION THREE.** All Ordinances or parts of Ordinances in conflict herewith are hereby repealed to the extent of such conflict.

**SECTION FOUR.** If any section, paragraph, sentence, clause and phrase of this Ordinance is severable, and if any phrase, clause, sentence, paragraph or section of this Ordinance shall be declared unconstitutional, invalid or unenforceable by the valid judgment or

decree of any court of competent jurisdiction, such unconstitutionality, invalidity or unenforceability shall not affect any of the remaining phrases, clauses, sentences, paragraphs and sections of this Ordinance.

**SECTION FIVE.** This Ordinance shall become effective immediately upon adoption.

**PASSED UPON** at the first reading of the City Commission, this 22nd day of July, 2025.

**PASSED UPON** at the second and final reading of the City Commission, this 5th day of August, 2025.

# Ordinance Adoption
# Business Impact Estimate

Proposed ordinance's number and legal title: 2025-22

AN ORDINANCE AMENDING SECTIONS 15-3 AND 15-8 OF CHAPTER 15, PARKS AND RECREATION, OF THE CITY OF ORMOND BEACH *CODE OF ORDINANCES*, TO PROVIDE FOR THE REGULATION OF VAPING IN PARKS AND AT OTHER MUNICIPAL FACILITIES; PROVIDING FOR THE REPEAL OF ALL ORDINANCES IN CONFLICT HEREWITH; PROVIDING FOR SEVERABILITY, AND SETTING FORTH AN EFFECTIVE DATE.

This Business Impact Estimate is provided in accordance with section 166.041(4), Florida Statutes. If one or more boxes are checked below, this means the City is of the view that a business impact estimate is not required by state law for the proposed ordinance, but the City is, nevertheless, providing this Business Impact Estimate as a courtesy and to avoid any procedural issues that could impact the enactment of the proposed ordinance. This Business Impact Estimate may be revised following its initial posting.

- ☐ The proposed ordinance is required for compliance with Federal or State law or regulation;
- ☐ The proposed ordinance relates to the issuance or refinancing of debt;
- ☐ The proposed ordinance relates to the adoption of budgets or budget amendments, including revenue sources necessary to fund the budget;
- ☐ The proposed ordinance is required to implement a contract or an agreement, including, but not limited to, any Federal, State, local, or private grant or other financial assistance accepted by the municipal government;
- ☐ The proposed ordinance is an emergency ordinance;
- ☐ The ordinance relates to procurement; or
- ☐ The proposed ordinance is enacted to implement the following:
  a. Part II of Chapter 163, Florida Statutes, relating to growth policy, county and municipal planning, and land development regulation, including zoning, development orders, development agreements and development permits;
  b. Sections 190.005 and 190.046, Florida Statutes, regarding community development districts;
  c. Section 553.73, Florida Statutes, relating to the Florida Building Code; or
  d. Section 633.202, Florida Statutes, relating to the Florida Fire Prevention Code.

**In accordance with the provisions of controlling law, even notwithstanding the fact that an exemption noted above may apply, the City hereby publishes the following information:**

1. A summary of the proposed ordinance, including a statement of the public purpose to be served by the proposed ordinance, such as serving the public health, safety, morals, and welfare of the City.

The purpose of this ordinance is to add regulations for vaping in city parks and other municipal facilities.

2. An estimate of the direct economic impact of the proposed ordinance on private, for-profit businesses in the City, including the following, if any:

    a. An estimate of direct compliance costs that businesses may reasonably incur if the ordinance is enacted;

    N/A

    b. Identification of any new charge or fee on businesses subject to the proposed ordinance, or for which businesses will be financially responsible; and

    N/A

    c. An estimate of the City's regulatory costs, including an estimate of revenues from any new charges or fees that will be imposed on businesses to cover such costs.

    N/A

3. A good faith estimate of the number of businesses likely to be impacted by the ordinance.
    N/A

4. Any additional information the City determines may be useful.

    *(This section may include: methodology or data used to prepare the Business Impact Estimate, e.g., City staff solicited comments from businesses as to the potential impact of the proposed ordinance by contacting the chamber of commerce, social media posting, direct mail/email, posting on the City's website, public workshop, etc.; efforts made to reduce the potential fiscal impact on businesses; and state the proposed ordinance is a generally applicable ordinance that applies to all persons similarly situated (individuals or businesses) and, therefore, the proposed ordinance does not affect only businesses.)*

Summary

The Florida League of Cities (FLC) requests each municipality designate one official to be the voting delegate for the Annual Business Session to be held on Saturday, August 16, 2025. This designation is to be made and delegate forms returned by July 31, 2025. The business session will be held during the FLC Annual Conference scheduled for August 14-16, 2025, in Orlando, FL.

Financial Impact

None

Citizen Impact

The FLC represents the interests of municipal governments across the state. It is in the citizens' best interest to have a representative City vote at this business meeting.

1. 2025 Voting Delegate Memo

FLC
FLORIDA LEAGUE OF CITIES

To: Key Official

From: Eryn Russell, Florida League of Cities

Date: June 17, 2025

Subject: 2025 Annual Conference Voting Delegate Information

The Florida League of Cities Annual Conference will be held at the Signia by Hilton Orlando Bonnet Creek in Orlando, Florida, from August 14-16, 2025. This conference will provide valuable educational opportunities to help Florida's municipal officials serve their citizenry more effectively.

We ask that each member municipality sending delegates to the Annual Conference **designate one elected official to serve as its Voting Delegate** and cast the municipality's votes at the Annual Business Meeting which will be held on **Saturday, August 16, 2025**. The Voting Delegate designated by each municipality will vote on all official business matters brought before the League membership and requiring a vote during the Business Meeting. Matters such as the election of League leadership, adoption of resolutions and any other official business matters affecting the League may be voted on during the Business Meeting.

In accordance with the League's by-laws, the number of votes allocated to each municipality is determined based upon population. The League will use the latest Florida Estimates of Population as published by the University of Florida, Bureau of Economic and Business Research.

Annual Conference registration materials were sent to each municipality via the League's e-newsletter and are available online at *flcities.com*.

If you have any questions about voting delegates, please email *erussell@flcities.com*. **Voting delegate forms must be received by the League no later than July 31, 2025.**

**2025 Annual Conference**
**Florida League of Cities, Inc.**
**August 14-16, 2025**
**Orlando, Florida**

It is important that each member municipality sending delegates to the Annual Conference of the Florida League of Cities designate one of its elected officials to cast the municipality's votes at the Annual Business Meeting. League By-Laws require each municipality to select one person to serve as the municipality's Voting Delegate.

*Municipalities do not need to adopt a resolution to designate a voting delegate.* Instead, please fill out this form and return it to the League office so that your voting delegate may be properly identified. **Voting delegate forms must be received by the League no later than July 31, 2025.**
